

Zone Change #958 – Skyline Court

Prior to any recommendation to the City Council, the Zoning Commission shall consider the following:

1. *Is the new zoning designed in accordance with the Growth Policy?*

The proposed zone change is consistent with the following guidelines of the 2016 Growth Policy:

- **Essential Investments:** Infill development and development near existing City infrastructure may be the most cost effective. Neighborhoods that are safe and attractive and provide essential services are much desired;

New buildings, sidewalks, landscaping and fencing would make this area of Billings more visually appealing to residents and visitors. Infill development is the most cost effective since there is already infrastructure in place. Providing basic services near residential development is much desired and convenient to the local residential community.

- **Prosperity:** A diversity of available jobs can ensure a strong Billings' economy. Successful businesses that provide local jobs benefit the community.

Rezoning the parcel will allow construction of the proposed medical building which will require employees and provide jobs that will be a benefit to the community.

- **Strong Neighborhoods:** Neighborhoods that are safe and attractive and provide essential services are much desired.

The proposed zoning will allow the construction of the proposed medical building and clean up an area in Billings that has been underused and fallen into disrepair which attracts unwanted activity in the area. New development will provide needed services and be more attractive than what has been on this land for many years.

2. *Is the new zoning designed to secure from fire and other dangers?*

The new zoning requires minimum setbacks, open and landscaped areas and building separations. The new zoning, as do all zoning districts, provides adequate building separations and density limits to provide security from fire and other dangers.

3. *Whether the new zoning will promote public health, public safety and general welfare?*

Public health and public safety will be promoted by the proposed zoning. The current zoning of the parcel does not lend itself to single family housing because it is on the edge of a commercial development and a major road, 27th Street, and doesn't provide for enough separation from the traffic noises or safety concerns. Most of this property has fallen into disuse and neglect over the years. This has had a negative effect on the surrounding properties and neighborhood. Re-zoning this property would allow redevelopment and will promote the public health, safety and general welfare of the area.

4. *Will the new zoning facilitate the adequate provision of transportation, water, sewerage, schools, parks and other public requirement?*

- Transportation: The proposed zoning will not have any effect on the existing transportation system.
- Water and Sewer: The City provides water and sewer to the property. There will be no additional impacts to the system from the proposed zoning.
- Schools and Parks: Schools and parks should not be affected by the proposed zoning.

Fire and Police: The subject property is served by city public safety services. The Police and Fire Departments had no concerns with the zone change.

5. *Will the new zoning provide adequate light and air?*

The proposed zoning provides for sufficient setbacks to allow for adequate separation between structures and adequate light and air.

6. *Will the new zoning effect motorized and non-motorized transportation?*

The new zoning will have no effect on transportation systems.

7. *Will the new zoning promote compatible urban growth?*

The new zoning does promote compatibility with urban growth. The proposed zoning will allow this parcel to re-develop into a medical building which will provide needed service to Billings and the surrounding areas around Billings and a lower traffic use of medical building is compatible with the existing neighborhood.

8. *Does the new zoning consider the character of the district and the peculiar suitability of the property for particular uses?*

The proposed zoning does consider the character of the district and the suitability of the property for the proposed use. The proposed zoning will allow the re-development of the land as a medical use and improve the area with new buildings, landscaping and separation from the major road, 27th Street, for the residential uses that it abuts.

9. *Will the new zoning conserve the value of buildings?*

The property is currently mostly a vacant lot with 3 older residential building that have fallen into disrepair. The proposed developed of a medical building with landscape, new sidewalks, and buildings will most likely improve values in the neighborhood. Approval of the zone change will conserve the value of the existing surrounding buildings and the parcel will be improved by the proposed zoning.

10. *Will the new zoning encourage the most appropriate use of land throughout the City of Billings?*

The proposed zoning will allow re-development of the land to a new medical building. Residential development on this property and commercial development is not the most appropriate use of the land at this location. A medical services development to buffer residential from commercial development is the best use of the land.
