SUBDIVISION IMPROVEMENTS AGREEMENT COPPER RIDGE SUBDIVISION, EIGHTH FILING

THIS AGREEMENT is made and entered into this ___ day of _____, 20___, by and between **COPPER RIDGE WEST, INC.**, whose address for the purpose of this agreement is 175 North 27th Street, Suite 900, Billings, Montana 59101, hereinafter referred to as "Subdivider," and the **CITY OF BILLINGS**, Montana, hereinafter referred to as "City."

WITNESSETH:

WHEREAS, the preliminary plat of Copper Ridge Subdivision, Eighth Filing, located in the City of Billings, Yellowstone County, Montana, was submitted to the Planning and Community Services Department which recommended its approval to the Yellowstone County Board of Planning; and

WHEREAS, at a meeting held on the ___th day of _____, 2018, by the Yellowstone County Board of Planning, the Board recommended for approval, subject to certain conditions, an area known as Copper Ridge Subdivision, Eighth Filing, and

WHEREAS, at a regular meeting held on the ___th day of _____, 2018, the City Council approved, subject to certain conditions, a preliminary plat of Copper Ridge Subdivision, Eighth Filing, and

WHEREAS, a Subdivision Improvements Agreement is required by the City prior to approval of the final plat; and

WHEREAS, the provisions of this agreement shall be effective and applicable to the plat of Copper Ridge Subdivision, Eighth Filing, upon filing of the final plat thereof in the office of the Clerk and Recorder of Yellowstone County, Montana. The subdivision shall comply with all requirements of the City of Billings subdivision regulations; the rules, regulations, policies, and resolutions of the City of Billings; and the laws and administrative rules of the State of Montana.

THEREFORE, THE PARTIES TO THIS AGREEMENT, for and in consideration of the mutual promises herein contained and for other good and valuable consideration, do hereby agree as follows.

I. VARIANCES

Subdivider requests no variances.

II. CONDITIONS THAT RUN WITH THE LAND

- A.** Lot owners should be aware that this subdivision could contain wildlife migratory routes. Consequently, owners are advised that wildlife indigenous to this area could be found on the property and may impact the developed property and interface with domestic animals, residents, and visitors. Owners may also experience problems with damage to landscaped shrubs, flowers, and gardens. Any impacts associated with wildlife and any damage arising therefrom is the responsibility of the lot owners.
- B.** Lot owners should be aware that there is a Declaration of Restrictions and Protective Covenants recorded in conjunction with this subdivision, which outlines additional requirements specific to this subdivision design.
- C.** Lot owners should be aware that the United States Postal Service mail delivery will be made only to centralized delivery locations. Such locations shall consist of from 8 to 16 mailboxes per location. The location of each centralized mailbox setting is shown on the overall development plan and the private contract construction plans. Subdivider shall install the mailboxes within the private contract for the Eighth Filing.
- D.** Lot owners shall be advised that land in proximity to the northern boundary of Copper Ridge Subdivision is a right-of-way owned by the Burlington Northern Santa Fe Railroad, upon which they actively operate a transportation business. The noise from moving trains is clearly audible in the subdivision. This activity is protected by state law and can be expected to continue indefinitely. Subdivider, for itself and all successor owners of property within Copper Ridge Subdivision, hereby waives any right to object and/or protest the noise created by normal operation of trains running along the railway, acknowledges that the railroad right-of-way is private property, and further acknowledges that Copper Ridge Subdivision and successor owners of lots within the subdivision have an affirmative duty to stay off the Burlington Northern Santa Fe Railroad property and to keep children, guests, and invitees off the property.

- E.** There is attached hereto a Waiver waiving the right to protest the creation of the special improvement district or districts, which by this reference is expressly incorporated herein and made as much a part hereof as though fully and completely set forth herein at this point. The Waiver will be filed with the plat, shall run with the land, and shall constitute the guarantee by the Subdivider and property owner or owners of the developments described herein. Said Waiver is effective upon filing and is not conditioned on the completion of the conditions set forth in this agreement. The Subdivider and owner specifically agree that they are waiving valuable rights, and do so voluntarily.
- F.** Individual lot owners should be aware that Best Management Practices for stormwater control shall be required for any construction on lots. Best Management Practices are defined within Section 28-201, BMCC and detailed in the Billings Stormwater Management Manual.
- G.** Certain lots as shown on the final plat of Copper Ridge Subdivision, Eighth Filing contain storm water drainage easements with a drainage swale along property lines. This storm water drainage easement and drainage swale is for conveying storm water and shall not be altered in any way to inhibit the conveyance of storm water. It shall be the lot owners' responsibility to maintain and perpetuate this storm water swale, as a fully functional swale.
- H.** The lowest finished floor elevation (which includes the garage) shall be a minimum of 18-inches higher than the top of curb measured from the highest location along the lot frontage. Higher finished floor elevations shall be required on a lot by lot basis, as noted on the final plat.
- I.** The lowest openings on each home (window well, walk-out basement doors, and equivalent openings) shall be located outside drainage paths. If this is not possible, the homebuilder and lot owners must take necessary measures to protect these openings from being inundated from surface water flows. Allow enough space between window wells and property lines to provide sufficient swales and drainage away from window wells, and meet applicable building codes for drainage requirements.
- J.** The developer and subsequent contractors/builders acknowledge that there is a Stormwater Pollution Prevention Plan (SWPPP) filed with the City and State Department of Environmental Quality (DEQ). This SWPPP shall be adhered to during all phases of construction and shall be updated as required by DEQ under the General Permit for Stormwater Discharges Associated

with Construction Activity, Chapter 28, BMCC and the Billings Stormwater Management Manual.

III. TRANSPORTATION

A. Streets

Right-of-way widths. Copper View Way, Shiny Penny Way, Copper Sunset Drive, Copper Bend Boulevard, and Bronze Boulevard, shall be 56-foot rights-of-way. 70th Street West shall be located in a previously dedicated 61-foot right of way. Rimrock Road is classified as a collector east of 70th Street West. A 74-foot wide right of way has previously been dedicated for Rimrock Road across the frontage of the property.

Pavement widths. Copper View Way, Shiny Penny Way, Copper Sunset Drive, Copper Bend Boulevard, and Bronze Boulevard shall be 34 feet back of curb to back of curb. 70th Street West shall be completed on the west side to a back of curb width of 39 feet with Eighth Filing. These roads shall be built to grade with a satisfactory subbase, base course, curb and gutter, and asphalt surface. All streets shall be built in accordance with the City of Billings site development ordinance, city subdivision regulations, and Uniform Building Code. No street improvements will be constructed on Rimrock Road west of 70th Street West at this time.

B. Sidewalks

City and Subdivider agree that developer will install handicap accessibility ramps at time of private contract construction. No additional boulevard sidewalks will be installed by the developer as part of construction improvements.

Individual lot owners will be responsible for the construction of the sidewalks adjacent to their lot at the time of lot construction. Sidewalks shall be 5-foot-wide boulevard sidewalks.

Subdivider shall install a 5-foot wide boulevard sidewalk between Lots 10A and 11, Block 3 with Copper Ridge Subdivision, Eighth Filing.

C. Street Lighting

Construction or installation of streetlights in subdivision shall not be required at this time, but streetlights are included in the Waiver, which also includes a maintenance district for street light energy and maintenance.

D. Traffic Control Devices

1. The Subdivider shall furnish and install all necessary traffic control devices adjacent to the subdivision. Traffic control devices shall include all necessary signing, striping, and channelization devices to properly complete the implementation of the proposed street construction. All traffic control devices shall be subject to review and approval by the City Engineering office.
2. Street name signs shall be installed at all intersections.
3. The City and Subdivider agree that the Subdivider will make cash contributions to improvements at the following intersections:

Rimrock Road and 62nd Street West – ___ percent
Grand Avenue and 70th Street West – ___ percent
70th Street West and Colton Boulevard – ___ percent

The percentages are based on 378 total lots in the subdivision. Each filing will contribute their proportionate share of the contributions.

The amount and timing of these contributions shall be as outlined below. These contributions represent a fair and equitable amount based on subdivision traffic using these intersections and may be used by the City for design and construction of geometric improvements, auxiliary turn lanes, or intersection controls such as traffic signals or roundabouts, at these intersections. Improvements will not be constructed until the City determines they are needed and the timing and extent of the improvements shall be at the City's sole discretion.

The amount of the contributions for the Rimrock Road/62nd Street West, Grand Avenue/70th Street West, and 70th Street West/Colton Boulevard intersections shall be as follows:

	Rimrock Road/62nd Street West	Grand Ave./70th Street West	70th Street West/Colton Blvd.
Eighth Filing (74-Residential Lots	\$XXXX	\$XXXX	\$XXXX
Lot 10, Block 5	\$XXXX	\$XXXX	\$XXXX

The contributions for Copper Ridge Subdivision, Eighth Filing (75-residential lots) shall be made prior to final plat approval. No building permits or private contract permits will be issued until Subdivider has made the cash contribution to the City.

It is anticipated that Lot 10, Block 5 will be developed in separate subdivision filings. The total cash contribution attributable to Lot 10, Block 5 shall be as stated above; however, the contribution may be apportioned over the various phases based on the amount of traffic each is expected to generate. No building permits or private contract permits shall be issued for Lot 10, Block 5 until payment has been made for the phase being developed at that time.

E. Access

Access will be provided in four locations for the subdivision. Extension of Copper Sunset Drive, Copper View Way, Shiny Penny Way, 70th Street West will provide access

F. Billings Area Bikeway and Trail Master Plan

The Billings Area Bikeway and Trail Master Plan identifies the BNSF Railroad right of way adjacent to the subdivision as a potential future trail alignment. As such, a potential future trail alignment is nearby to this subdivision; therefore, City and the Subdivider agree that no additional trails will be required with this subdivision.

G. Public Transit

There are no MET Transit routes that service this subdivision at this time. No improvements with regard to MET Transit vehicles are anticipated at this time.

IV. EMERGENCY SERVICES

Access is provided to this subdivision from two existing locations. The Copper Ridge Subdivision, Eighth Filing, will complete a street connection from Copper Sunset Drive and from 70th Street West. In addition, fire hydrants will be installed at the required locations as reviewed and approved by the City of Billings Fire Department.

Construction of buildings made of combustible materials shall have adequate fire apparatus access roads and fire hydrant(s) in place to allow for fire suppression requirements. Prior to the issuance of a building permit for construction using combustible materials (i.e. lumber, plywood, wood trusses, etc.), fire apparatus access roads and water supply requirements shall be provided in accordance with the International Fire Code as adopted by the City of Billings.

At a minimum, the following is required:

- An unobstructed gravel road or gravel road base must be within 150 feet of the furthest portion of a building under construction as measured along an approved route.
- The access roads are required to support fire apparatus vehicle loading (40 tons) during all weather conditions and shall be a minimum of 20-feet-wide.
- An operational fire hydrant shall be located within 600 feet of the furthest portion of a residence under construction or within 400 feet of the furthest portion of a commercial building under construction as measured along the access roads to the site.
- The above requirements do not alter or effect the current minimum subdivision requirements for fire apparatus access and water supply.

V. STORM DRAINAGE

- A. All storm drainage improvements shall comply with the provisions of Chapter 28, BMCC, and shall be in accordance with the recommendations of an approved storm drain study to be submitted to the City of Billings Engineering Department by the Subdivider. The stormwater in the subdivision will be managed on-site through surface flow on the streets, inlets, piping, and stormwater detention facilities. The stormwater design for Copper Ridge Subdivision, Eighth Filing, will conform to the current City of Billings Stormwater Management Manual and be reviewed by the City of Billings Public Works Department.

- B. The developer will construct one detention basin along the southern boundary of the subdivision. The developer will construct one detention facility with this filing located on Lot 9, Block 3. The remaining detention facilities will be constructed with future filings. The detention facilities will be located on Home Owner's Association (HOA) owned lots and shall be operated and maintained by the HOA. The stormwater detention facilities will have an outlet to Rimrock Road and be piped to a City of Billings owned stormwater management facility located near the intersection of 62nd Street West and Rimrock Road via the Birely Drain.
- i. The Subdivider may direct runoff from this filing and future filings to the City of Billings stormwater management facility located near the intersection of Rimrock Road and 62nd Street West. The City of Billings will review the stormwater storage provided on-site to ensure compliance with the City of Billings Stormwater Management Manual (SWMM). The Subdivision will be required to retain, or provide treatment, of the water quality volume/flow on-site in accordance with the SWMM.
 - ii. All required stormwater storage for the subdivision will be provided on-site. Therefore, no off-site stormwater contributions to the City of Billings stormwater management facility will be required.

VI. UTILITIES

Water and sanitary sewer lines shall be sized and installed in conformance with the City design standards and specifications, and the rules and regulations of the City of Billings.

The Subdivision Improvements Agreement does not constitute an approval for extension of or connection to water mains and sanitary sewers. The property owner shall make application for extension/connection of/to water mains and sanitary sewers to the Public Works Department, Engineering Division. The extension/connection of/to water mains and sanitary sewers are subject to the approval of the applications and the conditions of approval. Applications shall be submitted for processing prior to the start of any construction and prior to review and approval of any project plans and specifications.

The developer/owner acknowledges that the subdivision shall be subject to the applicable system development fees in effect at the time new water and/or sanitary sewer service connections are made.

The design/installation of sanitary sewers and appurtenances, and water mains and appurtenances (fire hydrants, etc.) shall be in accordance with design standards, specifications, rules and regulations of, and as approved by, the City of Billings Public Works Department, Fire Department, and the Montana Department of Environmental Quality.

A. Water

Service to the subdivision will be provided from the existing 12-inch water main stub located at the intersection of 70th Street West and Copper Sunset Drive and 8-inch stubs at Copper View Way, Shiny Penny Way, Copper Bend Boulevard, and Bronze Boulevard. The Subdivider will extend the existing 12-inch water main from the existing terminus at 70th Street West/Copper Sunset Drive west along Copper Sunset Drive to the intersection with Copper Boulevard, then south along Copper Bend Boulevard to the intersection with Shiny Penny Way, then west along Shiny Penny Way to future filings of the subdivision. Bronze Boulevard, Copper Boulevard north of Copper Sunset Drive and Copper View Way shall extend 8-inch diameter water mains. No water main will be installed in Rimrock Road west of 70th Street West at this time.

Appropriately sized mains and services in the internal streets will provide service to the individual lots within the subdivision. It is anticipated that each lot shall be provided with its own separate water service. All water construction improvements shall be installed in conformance with the design standards, specifications, and rules and regulations of the City of Billings and Montana Department of Environmental Quality, and will be approved by the Public Works Department.

B. Sanitary Sewer

Service to the subdivision will be from the existing 8-inch sanitary sewer stubs located in Copper View Way, Shiny Penny Way, Copper Sunset Drive, Copper Boulevard, Bronze Boulevard, and 70th Street West. No sanitary sewer main will be installed in Rimrock Road west of 70th Street West with this subdivision, but is anticipated to be extended to the west from the intersection of 70th Street West and Rimrock Road with future filings.

Appropriately sized mains and services in the internal streets will provide service to the individual lots within the subdivision. Each lot shall be provided with its own service. All sanitary sewer construction improvements shall be installed in conformance with the design standards,

specifications, and rules and regulations of the City of Billings and Montana Department of Environmental Quality, and will be approved by the Public Works Department.

Improvements noted herein shall include, but not be limited to, any and all interim improvements that may be deemed necessary due to phased or partial construction.

C. Power, Telephone, Gas, and Cable Television

All telephone, gas, electrical power, and cable television lines shall be placed in designated easements outside of the right-of-way and shall be installed underground prior to surface improvements. The location of all such facilities shall be subject to approval of the City Engineer.

VII. PARKS/OPEN SPACE

Section 76-3-621 of the Montana Subdivision and Platting Act covers the park dedication requirement. Additionally, Section 23-1002.B.1 of the City of Billings municipal code covers parkland dedication of major subdivisions. The Eighth Filing has a total of 74 residential lots, requiring a parkland dedication of 1.49 acres. The Subdivider will make a cash in-lieu contribution for the 1.49 acres in lieu of parkland dedication.

VIII. HOMEOWNER'S ASSOCIATIONS

A homeowner's association (HOA) will be established for this subdivision. The HOA will have the following responsibilities:

A. Contact Information

HOA shall provide contact information of the senior board official to the City Engineering Department upon the establishment of the HOA and/or changing of board members.

B. Stormwater Drainage Facilities

The HOA shall be responsible for the maintenance of the on-site stormwater drainage facilities located on Lot 19, Block 1 and Lot 9, Block 3. The HOA shall share the cost of maintenance of the community stormwater facilities.

IX. SOILS/GEOTECHNICAL STUDY

The Subdivider has retained an engineering firm to prepare a geotechnical analysis for this property. A copy of the entire geotechnical report prepared by Rawhide

Engineering, Inc., dated ____, 2018, is available for review at the City Building and/or Planning Division offices. There are variable soil conditions throughout the Subdivision, and the potential exists for collapsible soils within the Subdivision. A lot specific geotechnical report shall be the responsibility of the lot owner. The Subdivider has contracted with Rawhide Engineering to perform a preliminary geotechnical analysis for this property dated ____, 2018.

Recommendations from the report include:

1. Approximately 6-inches of surface soils should be stripped and removed from the site, or stockpiled for use in non-structural areas.
2. Fill should be placed and compacted to a minimum of 97 percent relative compaction, in accordance with the ASTM D698 compaction test method.
3. Provide positive drainage away from residences.
4. Street subgrade, utility trenches, parking areas and concrete flatwork subgrade should be placed at a minimum of 97 percent of ASTM D698.
5. A large track hoe or specialized equipment may be required during foundation excavations, depending on the location and depth of the excavation. The boring logs should be reviewed for conditions across the site.
6. Due to the hydro-collapse and settlement potential of native soils on this site, plants should not be placed within 3 feet of foundations. Care should be taken with the landscaping not to create drainage obstructions, such as concrete curbing, which will collect and retain water near the foundations.
7. As noted in the Rawhide Engineering _____, 2018 report, and in accordance with the International Residential Code, downspouts with 6-foot extensions should be used. Positive drainage away from all foundations should have 6 inches of fall in the first 10 feet away from the foundations. If sufficient room is not available to construct the 10-foot slope, drainage swales should be constructed as far from the foundations as possible.

X. FINANCIAL GUARANTEES

Except as otherwise provided, Subdivider shall install and construct said required improvements with cash or by utilizing the mechanics of a private contract secured by letters of credit or a letter of commitment to lend funds from a commercial

lender. All engineering and legal work in connection with such improvements shall be paid by the contracting parties pursuant to said private contract, and the improvements shall be installed as approved by the City Engineering Department and Public Works Department, Distribution and Collection Division.

XI. LEGAL PROVISIONS

- A.** Subdivider agrees to guarantee all public improvements for a period of one year from the date of final acceptance by the City of Billings.
- B.** The owners of the properties involved in this proposed subdivision, by signature subscribed herein below, agree, consent, and shall be bound by the provision of the agreement.
- C.** The covenants, agreements, and all statements in this agreement apply to and shall be binding on the heirs, personal representatives, successors, and assigns of the respective parties.
- D.** In the event it becomes necessary for either party to this agreement to retain an attorney to enforce any of the terms or conditions of this agreement or to give any notice required herein, then the prevailing party giving notice shall be entitled to reasonable attorney fees and costs.
- E.** Any amendments or modifications of this agreement or any provisions herein shall be made in writing and executed in the same manner as this original document, and shall after execution become a part of this agreement.
- F.** Subdivider shall comply with all applicable federal, state, and local statutes, ordinances, and administrative regulations during the performance and discharge of its obligations. Subdivider acknowledges and agrees that nothing contained herein shall relieve or exempt it from such compliance.

IN WITNESS WHEREOF, the parties hereto have set their hands and official seals on the date first above written.

WAIVER OF RIGHT TO PROTEST

FOR VALUABLE CONSIDERATION, the undersigned, being the Subdivider and all of the owners of the hereinafter described real property, do hereby waive the right to protest the formation of one or more special improvement district(s) for a period of no more than twenty years from the recording of this waiver, for street light maintenance and energy, and for the construction of streets, street widening, sidewalks, survey monuments, street name signs, curb and gutter, street lights, driveways, traffic signals, and traffic control devices, parks and park maintenance, trails, sanitary sewer lines, water lines, storm drains (either within or outside the area), and other improvements incident to the above which the City of Billings may require.

This Waiver and Agreement is independent from all other agreements and is supported by sufficient independent consideration to which the undersigned are parties, and shall run with the land and shall be binding upon the undersigned, their successors and assigns, and the same shall be recorded in the office of the County Clerk and Recorder of Yellowstone County, Montana.
