FY 2027 - 2031 CAPITAL IMPROVEMENT PLAN SUMMARIES

CIP OVERVIEW

What is a Capital Improvement Plan (CIP)?

The CIP is a comprehensive five-year plan that identifies needs for construction of capital projects or improvements to the City's infrastructure and facilities. The City of Billings FY 2027-2031 CIP contains information on how the City plans to invest available resources into key infrastructure and facilities between fiscal years 2027 and 2031. The CIP provides a forecast of funds available for capital projects and identifies all planned capital improvement projects and their estimated costs over the five-year period.

The City funds construction of its infrastructure and facilities using a wide range of sources, including tax revenues, bond proceeds, and fees for services and continues to look for ways to leverage its funding, through federal, state, and local grants and reimbursements, to maximize funding for CIP projects.

The first year's program in the CIP is adopted by the City Council as the capital budget, as a counterpart to the annual operating budget. Although fiscal resources are appropriated only in the first year of the CIP, the succeeding four years of the CIP are important in providing a longer-term plan for spending priorities, scheduling projects in a logical sequence, and coordinating and targeting capital improvement projects for all City departments. The annual update to the CIP is created with input from the public and direction from the City Council. A community's CIP is a guide that lays out the framework for achieving the current and future goals related to the physical assets of the community.

What is a capital project?

A capital project is a project that costs \$50,000 or more and results in a permanent addition to the City's asset through the acquisition of property, new construction, or rehabilitation of an existing facility to a like-new condition. Project costs can include the cost of land, engineering, architectural planning, and contract services needed to complete the project.

What's in this 5-year CIP?

The FY 2027-2031 CIP includes \$502.6 million for 128 projects. Approximately 10% of the CIP will be funded with debt. Some debt (Sidewalk and Curb bonds and Special Improvement District bonds) is used to assist property owners with needed sidewalk and street improvements by allowing them to pay back the costs of these improvements over time. The City sells bonds and the debt is then assessed back to the property owners who received benefit of the improvements.

The City also uses bonds as a funding source for capital projects when projects cannot be funded prudently from current revenues or fund balances. Debt financing is also utilized to better ensure inter-generational equity by spreading payments for assets and infrastructure over their useful lives.

The proposed Capital Improvement Plan (CIP) is built on the crucial assumption that various utility and maintenance rates will increase significantly over the next few fiscal years to sustain new capital projects and cover expected inflationary costs. Consequently, the CIP is contingent on the implementation of the proposed scheduled rate adjustments, as a failure to realize these future increases, specifically implementing a zero percent growth scenario in future budgets, would necessitate a significant revision of the proposed capital scope. The following approximate projected rate adjustments are required to fund this proposed CIP, ensuring its viability over the long term:

- **Street Maintenance District 2 Assessments:** 7% increase in FY27, followed by 6% annually from FY28 through FY31.
- **Storm Fees:** 13% annually from FY27 to FY30, dropping to 9% in FY31 (per the storm utility plan).
- **Solid Waste:** Consistent 7% annual increase for both collection (primarily due to the ERP) and landfill fees.
- **Water:** FY27 rates are set; 7.5% increase in FY28, followed by 6.5% annually from FY29 through FY31.
- **Wastewater:** FY27 rates are set; 5% increase in FY28, followed by 3% annually from FY29 through FY31.

FY 2027 - 2031 CAPITAL IMPROVEMENT PLAN SUMMARIES

CIP OVERVIEW

Fund Types

Capital Project Funds are used to account for financial resources that are restricted for the expenditure of capital projects that are not otherwise accounted for in other funds. The two capital project funds utilized in the CIP are both funded by selling bonds and assessing the debt back to property owners that benefit from the capital improvements.

Enterprise Funds are operated similarly to a business in that services are provided to the public for a fee that makes the entity self-supporting.

The **General Fund** utilizes taxpayer dollars and other revenues to support general City services. General fund dollars are largely discretionary since the Mayor and Council can allocate the funds to programs and services in any area as opposed to other funds which are dedicated for a particular purpose.

Internal Service Funds are used to account for services provided by a City department to other City departments. Internal service funds are funded by charging the City departments that they provide services to.

Special Revenue Funds are used to account for the proceeds of specific revenue proceeds that are restricted for the expenditure of specific purposes. These funds are typically legally restricted from being able to be used for any other purpose than that which the fund was established for.

Department: Aviation And Transit FY27 - FY31 CIP

Project Category: Airport Project Title: Cargo Ramp Rehabilitation

Project Description/Location:
 Rehabilitate the concrete on the Cargo Ramps where UPS and FedEx park large aircraft. 2 Phases.

Justification:
 The Cargo Ramps west of the Air Traffic Control Tower are used by Federal Express and United Parcel Service on a daily basis. A recent Pavement Condition Index study by our Civil Engineering group Morrison Maierle, identified the signs of the concrete ramp beginning to fail due to Aggregate Silicate Reaction (ASR). When these particular ramps were poured, no additives were included in the mix design to prevent the ASR issue. After 25 years of moisture and heat the ASR has began to show up with cracking and spalling on the surface of the ramp. Once this happens, it should be replaced before it becomes a safety issue.

Project Category: Airport Project Title: Interior Terminal Rehab Phases I, II

Project Description/Location:
 Interior Terminal Rehab - Ticket Counters (Phase 1) and Exterior (Phase 2). Remodel the ticket counters and baggage handling system to process all bags behind the ticket counters.

Justification:
 The five year Terminal remodel of Concourse A, B and C that included a new Great Room, concessions, bathrooms, relocation of the TSA screening area and a new lobby will be completed in 2024. The next project is to rehabilitate the exterior front of the building and interior ticket counter areas and baggage claim that are 30 years old. This work will consist of the following: - Refresh the front of the Terminal, expand the lobby and improve the ticket counter space when passengers are checking in for their flights. Updating the ticket counters will increase the counter space from 27 to 40. This will allow new airlines to come in to the Billings community.

Department: Aviation And Transit FY27 - FY31 CIP

Project Category: Airport Project Title: New Airport Operations Building

Project Description/Location:
 The existing Airport Operations Facility was built in 1990 and is the central location where all firefighting, maintenance and snow removal operations take place from including storage of approximately 60 large pieces of equipment. The 40 year old building no longer meets the current needs of the Airport, is undersized and should be built in a better location which is on the North side of the Airport.

Justification:
 The building was built in 1990 and will be approximately 40 years old when it is replaced because it does not meet the current needs of the Airport. The configuration and size of snow removal equipment and firefighting apparatus has increased over the years; subsequently, the current layout of the mechanics bay and parking stalls are too small. The plan is to lease or rent the existing building to a tenant, i.e., UPS and FedEx have expressed interest in using it as consolidated cargo sorting facility and warehouse since their aircraft operation is very close.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
New Project	Enhancement / New

Operating Budget Impact:
 Repair and Maintenance cost will dramatically decrease due to outdated building. Heating costs may go down because the doors will remain closed when the new, larger equipment is being serviced and stored.

Project Category: Airport Project Title: Parking Garage Construction Phase I

Project Description/Location:
 This project is for the construction of a parking structure at the Airport for car rental companies, with a smaller section for the public.

Justification:
 This will allow the Airport the ability to increase parking and revenue, create a safer and more user friendly parking option for Airport customers, provide protection during inclement weather, and increase overall future expansion at the Airport.

Project Category: **Airport** Project Title: **Rehab Incursion & Fuel Farm Roads**

Project Description/Location:
 The incursion road was last reconstructed in 2006. This road provides airfield fuel trucks and traffic around the commercial Runway 28R staying out of the runway protection area.

Justification:
 The road on the 2022 pavement condition index survey showed a number of 70, Fair. This road has met the useful life and starting to fall apart. It is key to keep this road in good condition to protect the airspace of Runway 28R.

Project Category: Airport Project Title: Rehab Runway 10L/28R

Project Description/Location:
 This project will be the design and construction for rehabilitating the pavement surface of the main air carrier Runway 10L/28R.

Justification:
 Runway 10L/28R is the primary runway for all airlines flying into or out of the Billings Airport. This pavement surface was last replaced in 2013 and the FAA recommends this take place approximately every 15-20 years. This rehab will bring the existing pavement up to new conditions with new LED lighting, pavement marking and grooving for storm water. This will help with safety and keep the pavement in good operating conditions.

Project Category: Airport Project Title: Taxiway C Hotspot Corrections

Project Description/Location:
 The intersection of Taxiway A and C has been flagged as a "Hotspot" safety issue by the FAA and needs to be corrected.

Justification:
 Each year the FAA convenes a group of Airport users for a Runway Safety Action Team (RSAT) meeting to discuss and review areas of concern on the BIL airfield. The intersection of Taxiway A and C was identified as an area of confusion and concern that the FAA would now like to see remedied. This will most likely consist of airfield lighting and paint marking changes to visually show pilots the difference between the runway and taxiway.

Department: Aviation And Transit FY27 - FY31 CIP

Project Category: Airport Project Title: Temporary Shuttle Lot

Project Description/Location:
 Temporary parking lot to be used during peak seasons and while parking garage is built.

Justification:
 Lot will be constructed as a temporary parking lot while parking garage phase I is being built and assist with peak seasons. Construction of the parking garage will interfere with several long-term parking spots, leaving the Airport short of parking stalls for operation. The temporary lot needs to be large enough to handle stalls in long term lot and the overflow during peak seasons.

Project Category: Airport Project Title: Utility Improvements for Business Park

Project Description/Location:
 This project will upsize the existing waterline for capacity and extend the water system to the north side for future Airport Operations Building and Airport Business Park.

Justification:
 The water infrastructure on the south side has capacity issues that need to be increased for fire protection for businesses and hangars. This will extend to the northside for future development within the Business Park. The original business park was built in the early 1960s.

Department: **Aviation And Transit** FY27 - FY31 CIP

Project Category: **Met Transit** Project Title: **Heights Transfer Center**

Project Description/Location:
 Heights area fixed-route transfer center with passenger shelters and restroom, an operator break area and restroom, an office area, vehicle/equipment storage, and a security camera system. MET is currently investigating the feasibility of using existing City owned land in the heights as a potential location. The project includes all real estate, engineering and design fees, labor, equipment, materials, and administrative costs.

Justification:
 MET Transit has identified the need for a heights transfer location to facilitate transfer of passenger between heights circulator routes and routes connecting elsewhere in the City; further, MET has need of a location for operators to utilize restroom and break facilities.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
New Project	Enhancement / New

Operating Budget Impact:
 Will have small impact on maintenance and utility costs; maintenance and cleaning will be performed by MET personnel.

Comments:
 MET does not yet have real property to complete this project; discussion with the Parks Dept and City Admin is ongoing regarding available park land for use. Project is anticipated to be executed using MET capital reserve funds. MET has discussed with Parks the potential to add additional space for parks maintenance equipment for heights location storage as well as parks amenities. Project moved to FY27, budget updated to reflect anticipated full local funds use.

Department:	Aviation And Transit	FY27 - FY31 CIP
Project Category:	Met Transit	Project Title: MET Transit Low/No Emission Maintenance Facility

Project Description/Location:
 New MET Transit fleet maintenance facility supporting low/no emission vehicles including all electric; the anticipated 26,000 sq ft facility will include multiple maintenance bays with built in catwalks for access to vehicle rooftop mounted equipment including batteries as well as multiple vehicle lift bays. Facility will also be equipped to handle maintenance of existing internal combustion powerplants, provide storage for parts/fluids/tire inventory as well as administrative offices for maintenance management. Non-lift, non-catwalk bays will also be present for general maintenance as well as provide for indoor charging locations for electric vehicles.

Project is anticipated to be located on the area of land currently occupied by the Yellowstone Valley Animal Shelter facility; if and when that location is vacated, this project would remove the existing facility and build in that location. The area where the animal shelter exists is currently on the same large lot of City owned land occupied by the METroplex. The project includes all real estate, engineering and design fees, labor, equipment, materials, and administrative costs.

Justification:
 The existing MET Transit maintenance shop is 40+ years old and is not configured correctly for maintenance of vehicles with rooftop mounted batteries or other equipment. Currently MET is experiencing issues with adequate space for storage of all required maintenance equipment and other items; further, available space for usage of vehicle lifts does not provide for adequate work space around the vehicle. Outdated infrastructure was originally designed around smaller vehicles; further, low ceiling space does not allow for full lift usage and poses potential problems with roof exhaust setups. As the Billings area continues to expand and MET service expands with it, a more functional and efficient maintenance area is essential.

CIP Status - SELECT from LIST New Project OR Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New
New Project	Enhancement / New
Operating Budget Impact: Moderate; facility will require ongoing maintenance and cleaning for which MET Transit would anticipate utilizing existing staff as well as additional positions. Facility will require electric and other utility charges, leading to increased expense. However, expenses may be offset by realized efficiencies of maintenance operations within a facility designed for fleet maintenance.	
Comments: 25,000 sq ft - at \$650/sq ft = \$16,250,000 A&E @ 15% Project would require the securement of competitive Federal Transit Administration bus and bus facility funds but may also utilize a portion of annual FTA formula funds.

Department: <u>Aviation And Transit</u>		FY27 - FY31 CIP						
Project Category: <u>Met Transit</u>		Project Title: <u>Update to Bus Stop Infrastructure</u>						
Project Description/Location: MET Transit will spend \$50,000 annually to improve bus stop infrastructure to the 450+ designated stop locations across the City to support the fixed route bus system. Improvements will include adding more bus shelters, ADA corners, concrete bus pads, lighting etc.								
Justification: Proper bus stop infrastructure and design increase the safety and efficiency of the fixed route bus system by adding shelters to protect riders from weather elements; proper access to ADA accessible corners, sidewalks, and bus pads improves accessibility and ensures compliance with federal regulations. Locations will be selected based on criteria outlined in the Bus Stop Master Plan including daily ridership use.								
CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> Modify Existing		Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New		Insert Picture(s) or Map Here				
Operating Budget Impact: Minimal maintenance budget impact; updated bus stop locations may add amenities required to be kept in a state of good repair.								
Comments: Projects updated to \$50,000 per year based on anticipated federal formula funds. FY27 includes additional 5310 funds awarded for bus stop improvements; FY28 anticipate additional bus stop lighting updates to meet minimum FTA 5307 security expenditure requirements. Project is anticipated to be executed using annual FTA formula funds.

Department: City Administration FY27 - FY31 CIP

Project Category: Facilities Project Title: BOC Asphalt Repairs

Project Description/Location:
 Project location is main campus at Billings Operations Center (BOC) on Midland Rd.
 The asphalt at BOC is approximately 21 years old and is in poor condition as minimal maintenance has been done over its lifespan. There are various types of observable failures: block cracking, alligator cracking, depressions, exposed polish aggregate, and releveling. Stahly Engineering and Associates completed a condition audit of the BOC asphalt and their repair methodology ranges from routing and crack sealing (phase 1) to complete reconstruction (phases 2-4) with an estimated project total of approximately \$2.8 million in 2024 construction costs. Considering average life for asphalt is 25 years, it is the Facilities Division recommendation to reconstruct all paved areas and address all subgrade and drainage issues. A proposed phasing plan is included. Project scope to include mill and overlay of light duty and heavy duty pavement and striping.

Justification:
 Considering there has been very minimal routine maintenance of the asphalt mat at BOC there will continue to be failures of various sections. As the asphalt sees daily heavy traffic use from light duty and heavy duty vehicles/equipment (trash trucks, streets maintenance equipment, fire apparatus, trucks and trailers) it is best to do full reconstruction and provide annual maintenance to help extend the life of the second generation of asphalt. Also, during the reconstruction grading will be completed to address water ponding and drainage issues.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
New Project	Renewal/Replacement

Operating Budget Impact:
 To be funded from Facilities capital charges, reserves, or revenue bond. A revenue bond would see a large increase for Tenant charges.

Comments:
 Bid specifications and project manual are completed so only construction costs will be incurred.

Department: City Administration FY27 - FY31 CIP

Project Category: Facilities Project Title: BOC Fleet Expansion

Project Description/Location:
 Project location is Fleet shop at Billings Operations Center (BOC) on Midland Rd.
 Due to the size of the Solid Waste natural gas powered fleet it is imperative that the Fleet Division expand their operations into existing wash bay facility to have a dedicated compressed natural gas (CNG) compliant work area. This expansion will include remodel of the existing wash bays into CNG compliant vehicle repair bays, which will net four CNG compliant repair bays. If more space is needed, we have programmed an additional new construction expansion of the Fleet shop building to the west property line which will net four additional vehicle service bays for a total of eight. The four new vehicle bays shall be constructed to meet class 1, division 2 hazardous area requirements for CNG vehicle storage and repair.

Justification:
 Currently, Fleet has no dedicated CNG compliant work area for repair or indoor storage so the current approach is to off gas - which is a waste of resources. The expansion into existing wash bay is the only location for Fleet to have contiguous space; a CNG compliant facility could be constructed elsewhere on the Property but after discussion with Fleet and Public Works that actually increases inefficiencies as effectively those would become service calls unless a stand alone facility with the same infrastructure is built which a substantial investment.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> New Project	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
--	--

Operating Budget Impact:
 To be funded from Facilities capital charges, reserves, or revenue bond. A revenue bond would see a large increase for Tenant charges.

Comments:
 New wash bay building must be constructed on Fox BOC parcel before this expansion project to ensure continuity of operations for vehicle washing. Codes that govern vehicle maintenance, repair, and vehicle parking are NFPA 30A, 52, 70, 88A, and International Mechanical and Building codes.

Department:	<u>City Administration</u>	FY27 - FY31 CIP
Project Category:	<u>Facilities</u>	Project Title: <u>BOC New Wash Bays</u>

Project Description/Location:
 Project location is Fox parcel at Billings Operations Center (BOC) on Midland Rd. This new wash bay facility is part and parcel of a larger expansion at BOC but is phase 1 in the sequence. See BOC Fleet Expansion for more context on phase 2 and why this project takes priority. The new wash bay building will be constructed on the 20 acre Fox parcel at BOC. Initial design includes two tandem bays for large equipment and one single bay for light duty vehicles.

Justification:
 The existing wash bay facility was not designed for the size and volume of equipment currently employed by the various City departments. The new wash bay facility allows for less maintenance, improved safety, and a right-sized design for the equipment that will utilize that service.

Project Category: Facilities Project Title: New City Hall 3rd Floor HVAC Upgrade

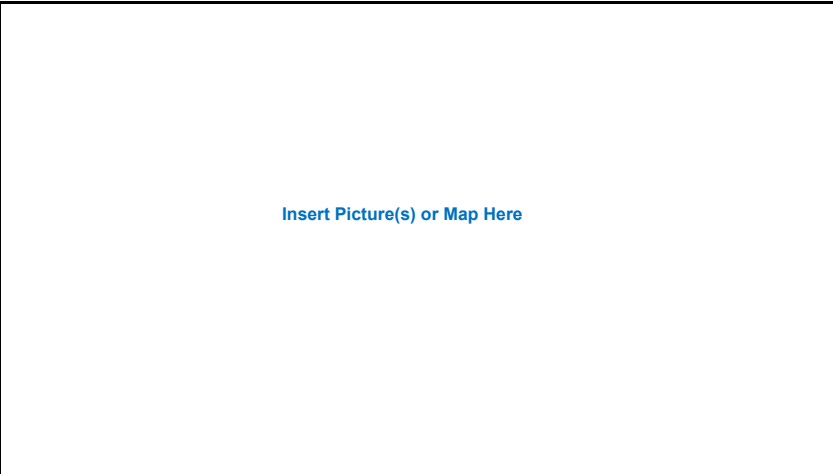

Project Description/Location:
 Project location is City Hall on N 26th St.
 As part of the HVAC system upgrades with the remodel/buildout of New City Hall, the air handling unit and downstream equipment on third floor will need to be upgraded to variable air volume (VAV) units once the County vacates the third floor. Project scope to include installation of new air handling unit, VAV terminal units, and all associated equipment to make a complete system.

Justification:
 As part of the remodel of City Hall, the mechanical engineer designed a VAV system for heating and cooling. Since we retained the original steam equipment on third floor, we cannot upgrade the air handling system until the County vacates at the end of their Lease term: May 2025. Once the third floor equipment is upgraded to the same standard as the other floors we can abandon the steam system and we will see an efficiency with running the entire building off condensing boilers for heating and cooling.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
New Project	Enhancement / New

Operating Budget Impact:
 To be funded from Facilities capital charges, reserves, or revenue bond. A revenue bond would see a large increase for Tenant charges.

Comments:
 The third floor would have been upgraded at the same time as the rest of the building remodel but various County departments are occupying the third floor. Due to the costs and time associated with the upgrade it is best slated for the future. Air Handling Unit is original vintage and installed in early 1960's. Costs are included in FY26 assuming County vacates at Lease term (May 2025) and does not renew, or signs a new Lease and a TI is completed for new occupancy.

Department: <u>City Administration</u>		FY27 - FY31 CIP						
Project Category: <u>Facilities</u>		Project Title: <u>New City Hall Boilers Upgrade</u>						
Project Description/Location: Project location is City Hall on N 26th St. As part of the new and more efficient heating and cooling design upgrades with the remodel/buildout of New City Hall, two condensing boilers will need to be installed once the third floor equipment is upgraded from steam to hot water. Project scope to include installation of two 3 million BTU condensing boilers, conversion of remaining steam coils to hot water, and all associated equipment to make a complete system.								
Justification: As part of the remodel of City Hall, the mechanical engineer designed a variable air volume (VAV) system for heating and cooling, current system is hot deck/cold deck H&V system. Since we retained the original steam equipment (boilers and air handler on third floor for the County), a steam to hot water heat exchanger was installed on the fifth floor to supply VAV boxes for floors 1, 2, 4, and 5. Once the third floor equipment is upgraded to the same standard as the other floors we can abandon the steam boilers in the basement and use high efficiency condensing boilers to produce hot water for heating and cooling.

Project Category: <u>Facilities</u>		Project Title: <u>New City Hall Cooling Towers Replacement</u>						
Project Description/Location: Project location is City Hall on N 26th St. During the due diligence phase of building purchase (July 2021) IMEG Corp., performed an in-depth visual inspection of the mechanical/electrical/plumbing (MEP) systems and determined the existing cooling towers, which were installed in 1989, have reached the end of useful life. Project scope to include replacement of two cooling towers and all associated equipment to make a complete system. To save on construction costs for New City Hall remodel/buildout, the decision was made to delay replacement of towers until a future date.								
Justification: The towers have white rust on a number of components (eliminators, basin, and piping) and have reached the end of their serviceable life.

Project Category: Facilities Project Title: New City Hall Roof Replacement

Project Description/Location:
 Project location is City Hall on N 26th St.
 During the due diligence phase of building purchase (July 2021) Bradford Roof Management performed an in-depth visual inspection of the roofing system and determined the existing roof should be slated for replacement in 2027. Project scope to include tear off of existing gravel surfaced built-up roof (BUR), preparation of substrate, and installation of polyisocyanurate insulation system (ISO) and all associated materials to make a complete system.

Justification:
 An expected roof life can vary but in its current conditions we can expect to do a full roof replacement in FY27. Major issue is wind scouring and the fact that the BUR system is reaching its end of useful life and has deteriorated to the point where replacement is more economical than repair.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> New Project	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Renewal/Replacement

Department: **City Administration** FY27 - FY31 CIP

Project Category: **Facilities** Project Title: **New City Hall Windows**

Project Description/Location:
 Project location is City Hall on N 26th St.
 As part of the building systems upgrades with the remodel/buildout of New City Hall, Council approved replacement of all windows in the building due to a majority being original to the building. All windows with the exception of the units in the demised and Leased third floor space occupied by the County have been replaced. The effort to replace window units in a finished space did not make it feasible to replace until the space is turned over to the City and slated for a new Tenant Improvement.

Justification:
 Benefits are immediate utility and energy savings, fewer issues with window repair, increased building comfort for building occupants, 60+ years of not having to plan for a large-scale replacement of windows, and more cost effective to be completed when the space is vacant.

CIP Status - SELECT from LIST New Project OR Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New
New Project	Renewal/Replacement

Operating Budget Impact:
 To be funded from Facilities capital charges, reserves, or revenue bond. A revenue bond would see a large increase for Tenant charges.

Comments:
 Costs are included in FY26 assuming County vacates at Lease term (May 2025) and does not renew, or signs a new Lease and a TI is completed for new occupancy. 92 windows to be installed.

Department: Fire FY27 - FY31 CIP

Project Category: Fire Project Title: Fire Station 1 Remodel

Project Description/Location:
 Fire Station 1, located at 2305 8th Ave, needs comprehensive renovation to replace the failing infrastructure and to improve functionality. The project will include the demolition of the existing communal restroom and bathing area, which will be replaced by a series of private, single-user bathrooms. The current shared dormitory will be reconstructed into individual sleeping rooms, providing personnel with quiet, private spaces for rest. The kitchen and dining areas will undergo a full demolition. These spaces will be rebuilt with modern finishes, new appliances, and improved access to an outdoor patio. Offices for the Battalion Chiefs and Captains will be renovated to include updated finishes, better lighting, and ergonomic layouts that support administrative and command functions. In addition to interior upgrades, the project includes the replacement of original cast iron storm and sanitary sewer lines with modern piping systems to prevent future failures and reduce maintenance costs. Life safety systems such as fire alarms, smoke detectors, and emergency lighting will be installed throughout the facility to meet current safety codes. Finally, the station's interior layout will be redesigned to comply with ADA standards, including accessible restrooms, widened doorways, and improved circulation paths. The asphalt and concrete has various observable failures of block cracking, alligator cracking, depressions, exposed polish aggregate, and releveling.

Justification:
 Fire Station 1 is the largest and most operationally complex of the city's eight fire stations. It serves as a central hub for Fire Department Administration, the Fire Marshal's Office, Battalion and Training Chiefs, classroom-based training, and suppression and squad crews. Given its critical role in emergency response and departmental operations, the facility requires upgrades that reflect its importance. The existing communal restroom and dormitory layouts do not meet modern fire station standards for privacy or hygiene. Replacing these with individual bathrooms and sleeping quarters will significantly improve comfort and reduce health risks for our City's first responders. Recurrent sleep loss has been correlated with heart attack, suicide, metabolic disorders, and cancer. Renovating the kitchen and dining areas will enhance daily operations, allowing the crews to safely prepare meals. The updated offices will support productivity and improve the effectiveness of command functions. The original cast iron plumbing infrastructure is deteriorating and poses a high risk of failure. Replacing these systems ensures long-term reliability and reduces the likelihood of costly repairs. Installing modern life safety systems is essential for protecting personnel and ensuring compliance with current safety regulations. Redesigning the interior layout to meet ADA standards promotes inclusivity and ensures the station is accessible to all staff and visitors.

Department: <u>Fire</u>		FY27 - FY31 CIP								
Project Category: <u>Fire</u>		Project Title: <u>Fire Station 2 Repairs - Improvements</u>								
Project Description/Location: Project location is Fire Station 2 located at 501 S 28th St. The scope of the repairs and improvements includes replacement of the fuel pump, concrete and asphalt, and the original cast iron storm and sanitary sewer pipes, improvements will be made to the restroom, sleeping quarters, kitchen, dayroom, and installation of life safety systems. Restroom improvement includes demolition of existing single restroom/bathing room to construct private single user bathrooms with each room containing a toilet, sink, and shower. Sleeping quarters project will include a design that provides individual sleeping rooms for crew members; the current layout is one large dorm room without privacy. Kitchen project will include demolition of existing original 1964 cabinetry, flooring, and replacement of appliances. The updated floor plan will meet ADA requirements. Life safety upgrade will include installation of a fire/CO alerting system.										
Justification: The existing fuel pump has reached its useful life and has had a history of leaking. The asphalt and concrete has various observable failures of block cracking, alligator cracking, depressions, exposed polish aggregate, and revealing. The original storm and sanitary sewer pipes are cast iron and have failed in several locations and will continue to fail. This station consists of a Captain's quarter with a private sleeping room and bathroom with a shower. The other crew members share a bathroom with one shower, a dormitory style sleeping room that is also utilized as their work out room. The design of only one shower does not provide inclusivity, privacy, or efficiency. An updated design will allow for more privacy for gender equity, quicker decon, and provide a higher level of end user satisfaction. Recent studies have shown the lack of private sleeping rooms can affect fire fighters negatively causing sleep deprivation, sleep interruption, and irregular sleep patterns. Recurrent sleep loss has not only been correlated with heart attack suicide, and metabolic disorders but also to cancer. The current kitchen is original to the building (1964) and is showing its age. The current floor plan is not ADA compliant, and does not offer adequate space for the crew to prepare meals. The life safety system is being added to provide additional layers of safety for crew members.

Department:	<u>Fire</u>	FY27 - FY31 CIP
Project Category:	<u>Fire</u>	Project Title: <u>Fire Station 3 Repairs - Improvements - Replacement</u>

Project Description/Location:
 Project location is Fire Station 3 located at 1928 17th St Sw. The scope of the repairs and improvements includes replacement of the fuel pump, electrical wiring, concrete and asphalt, and the original cast iron storm and sanitary sewer pipes, improvements will be made to the restroom, kitchen, dayroom, and installation of life safety systems. Restroom improvement includes demolition of existing single restroom to construct an ADA compliant restroom. Kitchen project will include demolition of existing original 1964 cabinetry, and replacement of appliances. The updated floor plan will meet ADA requirements. Life safety upgrade will include installation of a fire/CO alerting system.

Justification:
 The existing fuel pump has reached its useful life. The asphalt and concrete have various observable failures of block cracking, alligator cracking, depressions, exposed polish aggregate, and releveling. The 1964 electrical wiring has failed in numerous locations causing safety concerns and disruptions to operations. The original storm and sanitary sewer pipes are cast iron and have failed in several locations and will continue to fail. The current kitchen is original to the building (1964) and is showing its age. The life safety system is being added to provide additional layers of safety for crew members.

Department: Fire FY27 - FY31 CIP

Project Category: Fire Project Title: Fire Station 6 Parking Drainage

Project Description/Location:
 Project location is Fire Station 6 on St. Andrews.
 This project is to repair the negative drainage in the parking lot.

Justification:
 The parking lot does not drain any water and floods with minimal rain fall. The water ponds on the asphalt which will weaken the asphalt and eventually cause subgrade failures.

Department: **Fire** FY27 - FY31 CIP

Project Category: **Fire** Project Title: **Fire Station 9**

Project Description/Location:
 Fire station 9 to house an engine company on our far southwest corridor. The station property will be placed on the reservoir property either facing west on 48th St. W or facing north on Hesper Rd. This location will allow the City to maintain adequate response for a rapidly growing part of our response area while maintaining response resources in current established locations (5 and 7).

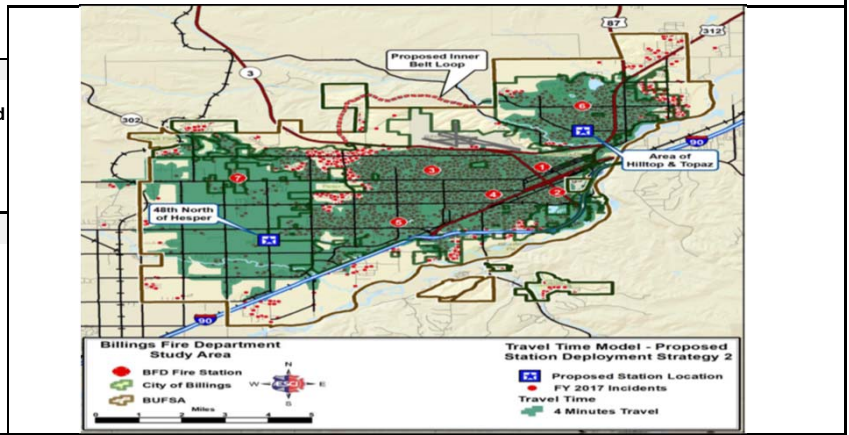

Justification:
 As it stands, we are responding to this area of town 2 to 3 times per day. Stations 7 or 5 are responsible for the response area. There is a negative impact on our resources due to time and distance when there is a call for this rapidly developing area. By placing a station in the Hesper and 48th intersection, we will be more efficient in regards to response times, resources and general wear and tear on our equipment. There is a possibility that this project can be funded by a grant. If this is the case, the money accumulated could be diverted to other projects. It is also worth noting that a new construction building could be used for multiple purposes. For example, Public Works could co-locate to this building for office space given the location (reservoir). Another example could be office space and equipment storage for Parks and Rec. This facility could be used for multiple purposes.

New Project OR Modify Existing Renewal/Replacement OR Enhancement/New

New Project **Enhancement / New**

Operating Budget Impact:
 Staffing this station will require an additional 13 FTE. This will require an additional 1.5 to 2 million in the budget. This will reduce mileage, hours and fuel consumption with this strategic location.

Comments:
 The image is from the 2018 ESCI report. It shows the proposed fire station at 48th and Hesper. The proposed amount for station construction is 6,000 sq/ft times \$1,000 per sq/ft. Equipment is for a new fire engine, fully equipped.

Department: **Fire** FY27 - FY31 CIP

Project Category: **Fire** Project Title: **UST Upgrade and AST Installations**

Project Description/Location:
 Project locations are at Fire Stations 1, 2, 3, 5 and 6. Fire Station 1 scope is to replace only the fuel pump. Fire Stations 2, 3, 5 and 6 project scope is to replace the existing UST's with an aboveground storage tank and fuel pump.

Justification:
 The fuel pumps are at their end of useful life and underground storage tanks range in 31 to 37 years old. The underground storage tanks are a liability risk due to their age and the chance of leaking. ASTs eliminate the need for monthly inspections, reducing operational costs and the risk of non-compliance penalties. USTs pose significant environmental risks, including soil and groundwater contamination, which can lead to costly clean-up and legal liabilities. The reduced liability risk associated with ASTs can also lead to lower insurance premiums, offsetting the higher initial investment over time.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
New Project	Renewal/Replacement

Operating Budget Impact:
 Fire Stations 5, 6 AST installation - \$121,440
 Removal of UST's at Fire Stations 2, 3, 5 & 6 - \$36,070

Comments:
 All quotes are from 10/2023 .
 Removal of the UST's at Fire Stations 5 & 6 is optional. If left in place inspections will need to continue.

 Project Category: Parks And Recreation Project Title: Ironwood Entry Sign Replacement

Project Description/Location:
 Ironwood Park is a Park Maintenance District within the development. The main entry sign for the neighborhood is located at the intersection of Molt Rd and Ironwood Dr.

Justification:
 The original existing sign is weathered, outdated, and difficult to repair with matching materials. The new replacement sign will have an updated design constructed from durable materials and new LED lighting. The new sign will be shorter in overall length allowing better vision for traffic at the intersection.

CIP Status - SELECT from LIST Project Type - SELECT from LIST

Project Category: Parks And Recreation Project Title: Water Reservoir Site Improvements

Project Description/Location:
 This project is for site improvements and recreation opportunities at the new west end reservoir.

Justification:
 There is an opportunity for the needed west end reservoir site to double as an amenity for Billings. The project includes end land use items (trails, docks, picnic areas, beach, etc.) to create a premier recreational amenity that residents and visitors can enjoy.
 The \$6M that is unfunded is not able to be funded with water revenues. If funding is not obtained, this part of the project cannot be constructed.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> Modify Existing	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
--	--

Operating Budget Impact:
 The operating budget impact will be determined during the design phase.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. This project was not ranked because it does not utilize water funding.

Department:	<u>PRPL</u>	FY27 - FY31 CIP
Project Category:	<u>Cemetery</u>	Project Title: <u>Mountview Cemetery Spreading Garden</u>

Project Description/Location:
Add spreading garden in Mountview Cemetery.

Justification:
Montana has the 5th highest cremation rate at 78.5% and expected to reach 88.6% by 2040 (National Funeral Directors Association, 2021). Rental of the Spreading Garden would include a name and dates inscription on the monument walls.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
New Project	Enhancement / New

Operating Budget Impact:
After initial investment garden would be near passive income, requiring only admin and minimal maintenance.

Comments:
Spreading Garden would create additional revenue stream for cemetery. There would be a place for the community to place loved ones' ashes for the life of the cemetery.

Department: *Planning* FY27 - FY31 CIP

Project Category: *(P) Transportation* Project Title: *25th Street Bridge*

Project Description/Location:
 Build a Bike Pedestrian Bridge over the Railroad Tracks at 25th Street between Montana and Minnesota Avenues. The bridge will connect to the bike lane to the south of the railroad tracks and will provide a safe bike and pedestrian alternative to the at-grade crossing of the railroad at 27th as well as provide an emergency connection between the north and south sides of the tracks for police bike patrol or foot patrol in the event of a train blocking the tracks. Visitors driving RVs or other large vehicles could park south of the railroad tracks and use the bridge to access historic Montana Avenue and other parts of downtown.

Justification:

CIP Status - SELECT from LIST <i>New Project OR Modify Existing</i> Modify Existing	Project Type - SELECT from LIST <i>Renewal/Replacement OR Enhancement/New</i> Enhancement / New
--	--

Operating Budget Impact:
 These types of multi-modal trail projects will require annual maintenance of the facility, this could include sweeping, snow removal, weeding/mowing and trail repair as needed. All proposed projects will be developed with the appropriate agency (PRPL/Downtown Billings Alliance) for construction and potential maintenance impacts.

Comments:
 This project is not programmed with currently available funds and is dependent on future funding for completion. The identified future funding sources are available but some are tied to competitive grant programs the City will actively pursue. It is necessary to keep these projects in the CIP so when grants are applied for, or awarded, the City shows formal commitment to the project.

Department: Planning FY27 - FY31 CIP

Project Category: (P) Transportation Project Title: Aronson to Annandale

Project Description/Location:
 This project would consist of a shared use path from Aronson Avenue to Annandale Road. Much of the shared use path would be located in land owned by the City of Billings. Some of the project would require coordination with the State of Montana. The total length of the project would be more than 2.5 miles.

 The Metropolitan Planning Organization (MPO) will conduct a feasibility study on this trail during the Federal Fiscal Year (FFY) '26. This study will help determine trail alignment, risks, possible maintenance costs, and planning level construction costs. This will inform the project further.

Department: **Planning** FY27 - FY31 CIP

Project Category: **(P) Transportation** Project Title: **Downtown-Heights Trail Connection**

Project Description/Location:
 This project extends the trail from South 25th Street to 8th Ave South to South 26th Street to Lillian Avenue, under I-90 at RR, and into Coulson Park Trail, which connects to the Billings Heights. Initial contact has shown preliminary support from several property owners. The Metropolitan Planning Organization (MPO) will be conducting a feasibility study on this trail during the Federal Fiscal Year (FFY) '26. This study will help determine trail alignment, risks, possible maintenance costs, and planning level construction costs. This will inform the project further. Non-profit Billings TrailNet has also donated \$10,000 towards the design of this trail.

Justification:

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
Modify Existing	Enhancement / New

Operating Budget Impact:
 These types of multi-modal trail projects will require annual maintenance of the facility, this could include sweeping, snow removal, weeding/mowing and trail repair as needed. All proposed projects will be developed with PRPL for construction and potential maintenance impacts.

Comments:
 This project is not programmed with currently available funds and is dependent on future funding for completion. The identified future funding sources are available but some are tied to competitive grant programs the City will actively pursue. MDT reconstructed this overpass which should help in facilitating the trail access as well as improve safety. Staff has met with property owners on the southwest side of the underpass and they are in favor of the trail. It is necessary to keep these projects in the CIP so when grants are applied for, or awarded, the City shows formal commitment to the project. Potential need for matching funds associated with grant funding.

Department: Planning FY27 - FY31 CIP

Project Category: (P) Transportation Project Title: Highway 3 Underpass

Project Description/Location:
 This project would develop an underpass beneath Highway 3 that would connect the Skyline Trail to the bike/pedestrian multi-use path along Skyway Drive. The best leg of the intersection to have the underpass would be on the east side of Highway 3. The Montana Department of Transportation is undertaking a Highway 3 Corridor Study of the area. While the study has not been finalized yet, the consultant has recommended this underpass be constructed in the long-term (within 10-20 years) by 2045 when the intersection is upgraded to a two-lane roundabout. However, the MPO or the City may choose to build this underpass sooner if an opportunity arises.

Justification:

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
Modify Existing	Enhancement / New

Operating Budget Impact:
 These types of multi-modal trail projects will require annual maintenance of the facility, this could include sweeping, snow removal, weeding/mowing and trail repair as needed. All proposed projects will be developed with PRPL for construction and potential maintenance impacts.

Comments:
 This project has become a community priority with the completion of the Skyway Drive multi-use path and Skyline Trail. This project could be funded by MDT in 10-20 years, but if the community decides this is a priority sooner, Transportation Alternatives funds could be a potential source of funding with potential matching funds from Billings TrailNet and private contributions.

Department: **Planning** FY27 - FY31 CIP

Project Category: **(P) Transportation** Project Title: **Yellowjacket Trail**

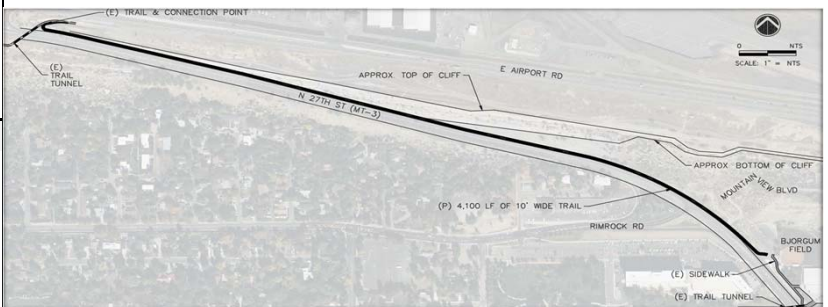

Project Description/Location:
 This project would build a shared use path along N. 27th Street connecting N. 27th Street below the Rims/Rimrock Road to Skyline Trail/Swords Park. Non-profit Billings TrailNet recently conducted a feasibility study for this shared use path. The study determined that the most feasible route would be parallel to N. 27th St. on the north side of the road. There is sufficient space to construct this trail while still meeting Montana Department of Transportation minimum corridor requirements for the roadway. The shared use path could either be at the back of curb, or could be elevated 4 feet off of the road. This project could also an opportunity to improve stormwater functionality on the rims.

Justification:

POLICE DEPARTMENT

POLICE PROJECTS

Project Name	FY 2027	FY 2028	FY 2029	FY 2030	FY 2031	Total
Evidence Facility Lot Expansion	100,000	1,200,000	-	-	-	1,300,000
Total Police Projects	100,000	1,200,000	-	-	-	1,300,000

POLICE DEPARTMENT TOTAL	100,000	1,200,000	-	-	-	1,300,000
--------------------------------	----------------	------------------	----------	----------	----------	------------------

Department: Police FY27 - FY31 CIP

Project Category: Police Project Title: Evidence Facility Lot Expansion

Project Description/Location:
 Expansion of the fenced/secure lot at the Billings Police Department Evidence Facility located at 4845 Midland Road. The expansion would increase the number of spots for evidence vehicle storage on the east side of the existing lot with the proposal that the lot and fence be extended to the east property line. This expansion would require expansion of the fencing, lighting, security system, and surfacing the added area with either gravel, millings, or blacktop.

Justification:
 The current secured lot is not large enough to adequately store the current number of vehicles required to be held by the BPD's current case load, Billings Municipal Court and Yellowstone County Attorney's Office's ability to release vehicles seized or held as evidence for trial, or vehicles held for statutory reasons. On average the lot holds 20-30 vehicles over its designed capacity at any given point. The number of vehicles seized and held at evidence is estimated to continue growing causing strain on the existing infrastructure, making it more difficult to properly store and secure evidence in compliance with best practices and Montana Code Annotated.

CIP Status - SELECT from LIST New Project OR Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New

Total Solid Waste Projects	13,941,000	906,000	-	933,000	-	15,780,000

Department: Public Works FY27 - FY31 CIP

Project Category: Solid Waste Project Title: Horizontal Gas Wells

Project Description/Location:
 This project will fund Lift 3 and 4 of the horizontal methane gas collection system in cells 3, 4, and 5 at the landfill.

Justification:
 Gas wells are required to help manage the methane. The landfill has reached the threshold put in place by the EPA that states we have to have a collection system in place to manage the gas. In 2022 the first phase of the horizontal gas collection wells was installed to address "hot spots" that staff was seeing from surface emissions monitoring. The second phase of the horizontal gas wells was installed in 2025. Horizontal gas wells will need to be installed on every other lift in cells 3, 4, and 5 until we have exhausted the airspace in this area. These wells will connect directly to the flare that has been constructed to help the landfill meet compliance under the air permit.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> New Project	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
--	--

Operating Budget Impact:
 This will be a one-time capital outlay. MDU is responsible for managing the well heads and the flow once they are constructed.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 116.6 and was ranked 1st amongst Solid Waste projects.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Solid Waste	Project Title: Landfill Cell 6 Expansion & Leachate Pond

Project Description/Location:
 This project is for the construction of cell 6 at the landfill. The design is planned for FY26 and the construction will be in FY 27.

Justification:
 The landfill will be nearing capacity of cells 3, 4 and 5. The construction of cell 6 is needed to continue the ability to take in waste from the City of Billings and surrounding areas. This project is included in the Solid Waste Master Plan. Also included in the master plan and as a part of this project is a second leachate containment pond.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Enhancement / New

Operating Budget Impact:
 The city will be required to fund additional closure and post-closure costs with the opening of a new cell.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 100.1 and was ranked 2nd amongst Solid Waste projects.

Project Category: Storm Project Title: Annual Local Area Capital Improvements

Project Description/Location:
 This is an annual project to improve intersections and other local areas with storm drainage problems.

Justification:
 There are several areas in the city that experience localized flooding issues during some storm events. This project is intended to fix the small, localized problems using valley gutters, additional inlets, small areas of pipe extensions, outfalls for detention areas, and other methods. Without this project, localized storm drainage issues will not be addressed. Design and construction management will be done in-house.

Project Category: **Storm** Project Title: **Annual Storm Sewer Rehabilitation Program**

Project Description/Location:
 The storm drain system is aging and a preventative maintenance and replacement program is necessary to ensure proper performance of the system.

Justification:
 The storm drain system is aging and in need of additional work beyond regular maintenance in some areas. The entire system is being TV'd and areas of concern will be repaired or replaced. Without this program, the efficiency of the storm drainage system will be reduced due to areas of obstructions within the system. The engineering and construction management will be done in-house if staff time permits.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Storm** Project Title: **Annual Yellowstone River Flood Protection**

Project Description/Location:

Improve the stormwater outfalls to the Yellowstone River.

Justification:

The City's storm drain system outfalls into the Yellowstone River. In some locations, the functionality of the storm outfalls is dependent on the condition of the outfall and the condition of the river. The City needs to be able to access, monitor, and improve each of the Yellowstone River outfalls. Additionally, the City has an MS4 permit with Montana DEQ and the City needs to start moving towards better water quality deliverables at the outfalls.

Project Category:	Storm	Project Title: Expo & 1st Avenue North Storm Drain Contribution

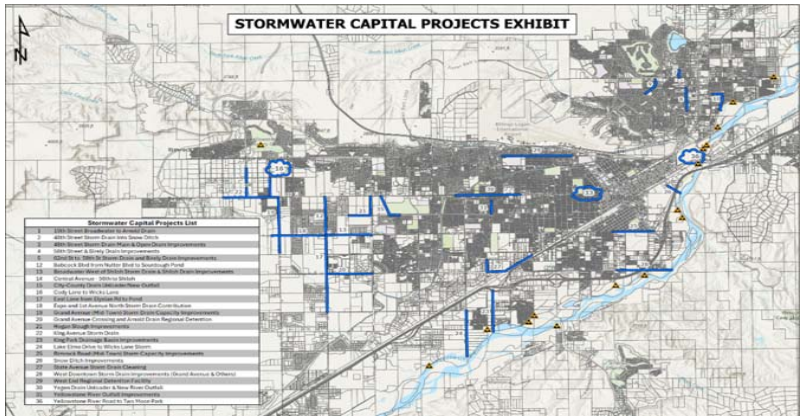

Project Description/Location:
 This project is for a contribution to MDT for regional drainage improvements within the 1st Avenue North and Expo Drive drainage basins.

Justification:
 MDT is making street and drainage improvements to 1st Avenue North from Division Street to Expo Drive and Expo Drive from 6th Avenue North to 1st Avenue North. From those projects, MDT has evaluated regional drainage solutions and has developed a plan that addresses both MDT's and the City drainage needs in the area. As part of their analysis and in coordination with the City, the City's cost share to make those regional improvements was determined to be \$1.4 million.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Storm** Project Title: **Hogan's Slough Improvements**

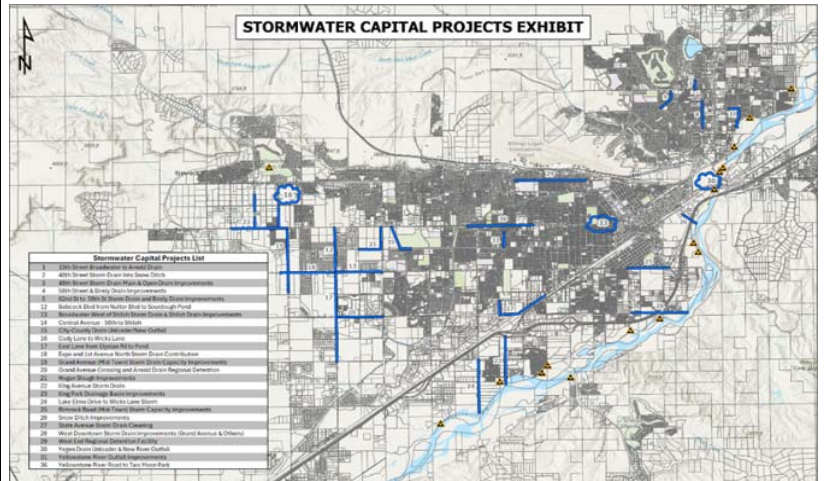

Project Description/Location:
 This project will evaluate and upgrade the drainage features of Hogan's Slough from Shiloh Road to the Yellowstone River.

Justification:
 Hogan's Slough is a drainage channel starting near the Shiloh Conservation Area and ending at the Yellowstone River near Annafeld Subdivision. Portions of Hogan's Slough are undersized and need to be upgraded. This project will provide a comprehensive analysis of the slough and construction projects needed to maintain the functionality of this critical stormwater infrastructure.

CIP Status - SELECT from LIST: **New Project OR Modify Existing**
 Project Type - SELECT from LIST: **Renewal/Replacement OR Enhancement/New**
 Enhancement / New

Operating Budget Impact:
 This project installs new drainage infrastructure that needs to be maintained; however, as a result of this project, there may be a reduction of other storm-related maintenance work along this project corridor.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 114.2 and was ranked 6th amongst Storm System projects.

Project Category: **Storm** Project Title: **King Avenue Storm Drain**

Project Description/Location:
 This project will extend the existing storm drain trunk main in King Avenue West from 44th Street West to 48th Street West.

Justification:
 As property along King Avenue West between 44th Street West and 48th Street West continues to develop, the City should plan for drainage infrastructure necessary to serve both development and roadway expansion within the regional area. This project is located on an MDT Urban Route and may qualify for cost reimbursement in the future when MDT completes roadway improvements to this section of King Avenue West.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Storm	Project Title: <u>Olympic Subdivision Regional Pump/Detention Facility</u>

Project Description/Location:
 This project involves replacing eight individual boulder pits within Olympic Park Subdivision with a conventional pump and pipe system that will discharge stormwater to the Shiloh Drain or King Avenue West storm drain system.

Justification:
 The boulder pits within Olympic Park Subdivision were installed in 1985 and have reached the end of their useful lifespan. It was decided during a project evaluation that installing a pump and pipe system to mitigate stormwater within this subdivision provides a lower long-term cost solution than replacing the boulder pits in kind.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
New Project	Enhancement / New
Operating Budget Impact: This project installs new drainage infrastructure that needs to be maintained; however, as a result of this project, there will be a significant reduction in maintenance time spend pumping out the street and failed boulder pits after every normal rain event.	
Comments: Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 112.2 and was ranked 9th amongst Storm System projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Storm** Project Title: **Wicks Lane Outfall Rehab**

Project Description/Location:
 This project will formalize the Wicks Lane storm drain outfall channel located east of the intersection of Wicks Lane and River View Drive. The channel will be reconstructed and graded from the current storm drain pipe terminus point on Wicks Lane to the side channel of the Yellowstone River located approximately 1,500-feet east of the intersection.

Justification:
 Previously the City upgraded and built new storm drain infrastructure in Wicks Lane and Bitterroot Drive to serve as the regional storm drain trunk mains for a large portion of the east Heights. Reconstructing the outfall channel to the side channel of the Yellowstone River is the last portion of the project that needs to be constructed.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
New Project	Enhancement / New

Operating Budget Impact:
 This project installs new drainage infrastructure that needs to be maintained; however, as this is a primary stormwater outfall, maintenance of this facility would be occurring regularly as part of the City's maintenance process.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. Department: **Public Works** FY27 - FY31 CIP

Project Category: **(PW) Transportation** Project Title: **32nd St W Widening/Signal Improvements**

Project Description/Location:
 This project will construct intersection improvements and selected areas of widening of 32nd St W. The project will be constructed in phases.

Justification:
 32nd Street West experiences heavy peak hour traffic as well as heavy daily traffic leading to congestion and heavy queuing. These challenges will continue to exacerbate with development of lands adjacent to 32nd Street West, particularly between Broadwater Avenue and Poly Drive. Furthermore, this street acts as a major north-south regional travel way and is the main connector to Skyway Drive. Improvements to intersections and potential widening will improve safety.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
New	

Operating Budget Impact:
 The intersection improvements and widening of 32nd Street West will increase maintenance associated with sweeping, additional signage, paint striping, and plowing.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 94.2 and was ranked 22nd amongst Transportation projects.

Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: 54th Street West - Grand to Rimrock

Project Description/Location:

This project will reconstruct 54th Street West from Grand Avenue to Rimrock Road to meet arterial, complete street standards, and include storm drain improvements to serve the area.

Justification:

54th Street West initially started as a county road and the last couple of decades of adjacent residential and commercial development requires additional improvements to increase safety and longevity. This project will add turn lanes, shoulders, storm drain improvements, multimodal facilities, and remaining sidewalk construction along the corridor.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
0	Enhancement / New

Operating Budget Impact:
The maintenance of 54th Street West was becoming onerous so PW repaved the road in 2022. This was a temporary fix to reduce the O&M until funding could be found to reconstruct the road section completely. Currently, the O&M is low but within five to ten years, it will increase back to unsustainable levels. Some additional O&M will be required to maintain the additional width of street after reconstruction.

Comments:

Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: Annual Gravel Street Reconstruction

Project Description/Location:
 In an effort to reduce the number of gravel streets within the city, Public Works has developed a program to work with neighborhoods to develop SIDs to construct streets to a maintainable city standard. The gas tax portion of this project will provide funding for corner lot subsidies and for any street component that is the City's financial responsibility that may be included in a SID for a given year.

Justification:
 The city has many streets that are gravel. The goal of the program is to bring all streets up to maintainable, City standards. Streets are being prioritized based on requests from the property owners, maintenance level for our crews, need for multimodal facilities, and proximity of storm drainage. Engineering is typically done with in-house staff.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u>
Modify Existing	Enhancement / New

Operating Budget Impact:
 Gravel streets use significant resources. This project will reduce the resources required as streets are completed.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 112.1 and was ranked 11th amongst Transportation projects.

Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: Annual Intersection Improvements

Project Description/Location:
 This project is for the evaluation and construction of improvements to selected intersection trouble areas. While the priority of the intersections may change, current priorities include protected-permissive left-turn signals (elimination of the blinking yellow left-turn to a protected green left-turn arrow) at approximately 10 intersections, a southbound right-turn lane at Grand Avenue and Zimmerman and potentially a west-bound right-turn also at the Grand Avenue and Zimmerman intersection, King Avenue West and 24th Street West intersection capacity improvements (running three east-bound through the intersection), Grand Avenue and 24th Street Signal Phase Improvements, Wicks Lane Intersection Capacity Improvements—High Sierra Boulevard to Gleneagles/Governors Boulevard, Wicks Lane and Main Street east lane addition, Central and 15th intersection capacity and safety study, North 30th Street and 11th Avenue improvements.

Justification:
 Intersections are evaluated regularly to determine priority based on traffic counts, crash history, pedestrian counts, and other factors. These intersections are a priority due to high traffic volumes and an accident history. Design and Construction management may be done in-house if staff time permits.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
Modify Existing	Enhancement / New

Operating Budget Impact:
 Negligible. Increase in power costs due to signal operation.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 96.6 and was ranked 19th amongst Transportation projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **(PW) Transportation** Project Title: **Annual Misc. Curb, Gutter, and Sidewalk Program**

Project Description/Location:
 This project funds the annual replacement and infill program of the curb, gutter, and sidewalk. The project focuses on areas of missing sidewalk primarily on arterials, school routes, near parks, and where requested by citizens.

Justification:
 Many areas of the City that have missing or severely damaged sidewalk or curb and gutter. This program allows the City to get these areas completed or repaired and is oftentimes the financial responsibility of the adjacent property owner. A safe pedestrian facility is important along city streets. Curb and gutter are typically paid for by the City if it is being replaced due to condition. Curb and gutter are important to the storm drain system and to keeping the asphalt in good condition. All work is designed and managed by internal staff.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> Modify Existing	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
---	---

Operating Budget Impact:
 Reduced cost for storm drain maintenance when curb and gutters are replaced. Sidewalk is generally the responsibility of adjacent property owners to maintain.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. Department:	<u>Public Works</u>	FY27 - FY31 CIP
Project Category:	<u>(PW) Transportation</u>	Project Title: <u>Annual PAVER Program</u>

Project Description/Location:
 This annual program is responsible for crack sealing, overlay, and chip seals of various streets throughout the City.

Justification:
 Asphalt needs to be maintained to extend its lifespan. The City established a preventative pavement maintenance program over 30 years ago and it includes overlaying, crack sealing, and chip sealing all streets within the City. Each street is evaluated on an ongoing basis and prioritized according to its condition. Staff also considers utility work that needs to be done when scheduling the projects each year to ensure that the utility work is done before the pavement maintenance. Staff does have a 5-year plan but it fluctuates depending on if streets deteriorate at the expected rate and other factors such as utility work. The lower the condition of a street, the higher the costs are to repair it. The city's cycles for overlaying and chipsealing streets are significantly longer than best practices. In FY23, Council requested that the PAVER program be increased slowly to reduce the gap between funding and pavement preservation practices.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
Modify Existing	Renewal/Replacement

Operating Budget Impact:
 Preventative maintenance of the streets reduces the operating budget due to the lack of potholes and other maintenance items.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Project Category: **(PW) Transportation** Project Title: **Annual Pedestrian Crossings**

Project Description/Location:
 This is an annual project for enhanced pedestrian crossings throughout the City. Specific locations will be determined based on a priority study.

Justification:
 Enhanced pedestrian crossings create a safer environment for pedestrians crossing streets than simple crosswalks do. Typically, enhanced crossings are located on school routes or areas where there is a lot of pedestrian activity with no signalized intersection nearby.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New

Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: Annual SIDs

Project Description/Location:

Annual amount used for any SIDs that neighborhoods bring forward. The gas tax portion of this project will provide funding for corner lot subsidies and for any street component that is the City's financial responsibility that may be included in an SID for a given year.

Justification:

The use of SIDs is an important and necessary method of constructing improvements in existing developed neighborhoods and business districts, as well as in new residential and commercial subdivisions. Bonds are sold to finance the improvements and charged back to the property owners that benefit from the improvements over a period of time. Engineering is typically done with in-house staff. These projects are initiated/requested by property owners and typically for new streets and other infrastructure.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Enhancement / New

Operating Budget Impact:
 Most of the improvements that are constructed under this project did not exist before the project so the operations cost will increase to cover regular maintenance activities such as sweeping, sanding, and plowing.

Comments:

Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Department: **Public Works** FY27 - FY31 CIP

Project Category: **(PW) Transportation** Project Title: **Annual SRTS (Non-sidewalk)**

Project Description/Location:
 This project will install various pedestrian and traffic safety countermeasures along the routes to the 22 Billings elementary schools. These could be crossing treatments, street treatments, signs and markings, signals and other methods to reduce traffic and pedestrian issues.

Justification:
 The Billings Safe Routes to School Plan Update ("the Plan") identifies projects that will create walking routes for all 22 public elementary schools in Billings. Many of the projects identified in the Plan are sidewalks that will be completed under the the Miscellaneous Curb, Gutter, and Sidewalk Program. This funding will enable staff to complete the non-sidewalk projects identified in the Plan. This annual project was requested by Council in FY23.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **(PW) Transportation** Project Title: **Annual Street Reconstruction**

Project Description/Location:
 In an effort to reduce the number of non-maintainable streets within the City, Public Works has developed a program to work with neighborhoods to develop projects to construct or reconstruct streets. The gas tax portion of this project will provide funding for corner lot subsidies and for any street component that is the City's financial responsibility such as existing curb and gutter or asphalt. Adjacent property assessments will cover the cost of additional asphalt, new curb and gutter, sidewalk, or other associated improvements that do not exist.

Justification:
 The city has many streets that have never been constructed to a maintainable standard. The goal of the program is to bring all streets up to maintainable, City standards. Streets are being prioritized based on requests from the property owners, maintenance level for our crews, and proximity of storm drainage. Engineering is typically done with in-house staff.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Enhancement / New

Operating Budget Impact:
 Non-maintainable streets use significant resources. This project will reduce the resources required as streets are completed.

Comments:

Department:	Public Works	FY27 - FY31 CIP
Project Category:	(PW) Transportation	Project Title: Broadwater - Vermillion to Shiloh

Project Description/Location:
 This project will reconstruct and widen Broadwater Avenue from Vermillion to Shiloh. The project will review access control for current and future accesses along the corridor and will add turn lanes for several sections of two-lane street that exists today. Storm drainage that currently sits adjacent to the road and contributes to poor drainage will be improved through additions of storm inlets and piping. The project will also address the infrequent number of north-south pedestrian crossings.

Justification:
 Certain areas of Broadwater Avenue east of 32nd Street West (Zimmerman Trail) have no west bound turn lanes into developed subdivisions to the south. Adding turn lanes at this location should improve safety and operational efficiency on the eastern portion of the project. A majority of the road is prone to frequent repair through poor drainage associated with the absence of curb and gutter. Access control is limited on the western portion of the street, that can be improved with the project. Furthermore, much of the project area is dark, and the addition of street lights will be considered with the project, particularly at pedestrian crossing locations given the existing multi-use path on the north side of the street. This section of broadwater Avenue contains limited pedestrian crossing potential to developed subdivisions south of Broadwater and those pedestrian crossings would be considered in multiple locations, including those recommended by Safe Routes to School.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
New Project	Enhancement / New

Operating Budget Impact:
 The reconstruction of Broadwater Avenue will decrease the ongoing maintenance associated with aging asphalt, and soft subgrade, but will increase maintenance associated with sweeping, additional signage, paint striping, and plowing.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 111.9 and was ranked 12th amongst Transportation projects.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	(PW) Transportation	Project Title: Daniels Street - King Ave to Industrial Ave

Project Description/Location:
 This project will reconstruct Daniels Street from King Avenue to Industrial Avenue to an arterial, complete street standard.

Justification:
 This project will reconstruct and add storm drain to Daniels Street and increase safety, particularly on the edges that have steep embankments. Most of this street has no sidewalk, shoulder or turn lanes. A large portion of the street is used by heavy truck traffic and experiences rutting and poor access control. Intersection alignment and safety will be improved at the King Avenue corner/intersection.

CIP Status - SELECT from LIST New Project OR Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New
0	Enhancement / New

Operating Budget Impact:
 Reconstruction of the road will decrease O&M associated with aging asphalt. The widening of the road will increase O&M for maintenance activities like sweeping and plowing.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 109.6 and was ranked 13th amongst Transportation projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **(PW) Transportation** Project Title: **Elysian Road - South Frontage Road to Annafeld Roundabout**

Project Description/Location:
 This project funds the completion of Elysian Road from South Frontage Road to the Annafeld Roundabout and East Lane north of Elysian Road to the South Frontage Road.

Justification:
 This is a fast-growing area of the City, with recently annexed land along and adjacent to the remaining portion of Elysian Lane to be improved. A portion of the road is located along the frontage of Elysian School, a rapidly growing school. The project would likely be constructed by SID and utilize previous developer contributions and SID waivers. Elysian Road and East Lane are both 24-foot wide roads with narrow shoulders and no multimodal facilities.

CIP Status - SELECT from LIST New Project OR Modify Existing Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New Renewal/Replacement
--	--

Operating Budget Impact:
 The reconstruction of Elysian Road will decrease the ongoing maintenance associated with aging asphalt but will increase maintenance associated with sweeping, additional signage, paint striping, and plowing.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 112.3 and was ranked 10th amongst Transportation projects.

Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: Grand Avenue - 43rd Street West to 62nd Street West

Project Description/Location:
 This project completes improvements to Grand Avenue to an arterial standard including multi-modal elements and a traffic signal at 56th Street West.

Justification:
 Portions of Grand Avenue exist as a two-lane county road section in a fast-growing area of the City. This project completes Grand Avenue to arterial standards where the street has not been constructed to new city standards, particularly between 43rd Street West and 52nd Street West, as well as the section between 58th Street West and 62nd Street West. This project will require significant right-of-way acquisition. Increasing traffic levels and the inability to separate left turn lanes are major safety concerns, particularly east of 48th Street West. This project will be funded by Urban Funds and a small amount of developer contributions that have previously been collected. Urban funds are state funds available at a certain amount each year from the State of Montana for specific uses to be used for major transportation projects and refining City and County Planning projects. The City is not planning on using City funds for this project.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Renewal/Replacement

Operating Budget Impact:
 The asphalt on Grand Avenue is deteriorating which causes additional resources to maintain. New asphalt will reduce regular maintenance but additional pavement will require negligible increases in O&M for plowing, sanding, and replacement eventually.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 86.1 and was ranked 24th amongst Transportation projects.

Department: Public Works FY27 - FY31 CIP

Project Category: (PW) Transportation Project Title: Pedestrian Crossing of Exposition Drive

Project Description/Location:
 This project is for a pedestrian grade separated crossing across Exposition Drive between 1st Avenue North and 6th Avenue North. This project continues to remain several years out in the CIP with the intention of it being paired with work on Exposition Drive, commercial development on the east side of Exposition Drive, and improvements to the perimeter of the Metra Park complex.

Justification:
 The pedestrian crossing of Exposition Drive is a key element in the revitalization of the East Billings Urban Renewal District (EBURD). As identified in the 2013 Exposition Gateway Concept Plan and the 2013 City of Billings Hospitality Corridor Planning Study, a pedestrian crossing would provide a vital connection between the east end of the EBURD and MetraPark. Exposition Drive is a principal arterial on a north-south alignment in Billings that currently provides three lanes in each direction with a center turn lane at intersections in the project location and a pedestrian crossing will significantly enhance a connection over the busiest thoroughfare in Montana to the busiest entertainment venue in the region. Other benefits include enhancing future development by encouraging investment in adjacent idle property, improving connectivity and safety, providing opportunities for event organizers, and allow users to enjoy amenities within walking distance in the Exposition Gateway Area.

Project Category: (PW) Transportation Project Title: Rimrock Road Improvements - Clearview Drive to 54th

Project Description/Location:
 This project will reconstruct Rimrock Road from Clearview Drive to 54th Street West to full arterial, complete streets standards.

Justification:
 Rimrock Road from Clearview Drive to 54th Street West has seen greatly increased use over the past decade since development has occurred on the far west end of Billings. This project is the second part of a larger two-section goal to improve Rimrock Road from Clearview Drive to 62nd Street West. The goal of this larger project is to replace deteriorating pavement, increase safety on the narrow two-lane road section, and install multi-modal facilities.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> 0	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
--	--

Operating Budget Impact:
 Reconstruction of the road will decrease O&M associated with aging asphalt. The widening of the road will increase O&M for maintenance activities like sweeping and plowing. PW will maintain the multiuse path but adjacent property owners will be responsible for maintenance of the sidewalk.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. Department:	Public Works	FY27 - FY31 CIP
Project Category:	(PW) Transportation	Project Title: Wicks Lane - Hawthorne Lane to Bitterroot

Project Description/Location:
This project funds the design and reconstruction of Wicks Lane and the construction of sidewalks.

Justification:
Wicks Lane is an arterial that carries a volume of traffic that would be more efficient and safe if the road was reconstructed as a three-lane section with multimodal facilities. Bitterroot Road connects to Wicks Lane and needs to be improved as well due to the development that has occurred in the area. Sidewalks and a small section of Wicks Lane west of Hawthorne Lane were constructed in FY22 to improve pedestrian access and other improvements will be constructed in FY27.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
0	Enhancement / New

Operating Budget Impact:
The reconstruction of Wicks Lane and Bitterroot Road will decrease the ongoing maintenance associated with aging asphalt.

Comments:

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Utilities	Project Title: Wastewater - Annual Line Extensions

Project Description/Location:
 This project will fund developer-driven extensions as developments occur in previously unserved areas.

Justification:
 This allows the city to get ahead of development and ensure developments included in the annexation area develop in the city rather than the county. Costs are expected to be paid back over time as developments occur. Thus, after sufficient "seed money" is collected, the fund can act as a revolving fund for wastewater extensions.

CIP Status - SELECT from LIST New Project OR Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New Enhancement / New
--	--

Operating Budget Impact:
 Additional sewer lines will require regular O&M, however, these extensions will provide service to new customers which increases the rate base.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 62 and was ranked 6th amongst Wastewater projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Utilities** Project Title: **Wastewater - Annual Main Replacements**

Project Description/Location:

This is an annual program to fund the replacement of sanitary sewer mains throughout the City.

Justification:

The City's sanitary sewer infrastructure is aging and in need of replacement. Annual projects to replace areas of greatest need help to reduce leaks and failures and maintain reliable service to customers. The funding request specified increases the annual funding by 10% per year to slowly start increasing the funding to the level needed.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Utilities** Project Title: **Wastewater - Annual Treatment Plant Campus Electrical**

Project Description/Location:
 This is a project to fund various electrical and automation projects at the Water Reclamation Facility.

Justification:
 Electrical upgrade projects are common at the Water Reclamation Facility (WRF) due to the obsolescence of automation systems and replacements of electrical equipment damaged by hydrogen sulfide gases. The electrical priorities at the WRF are subject to change based on equipment failure and obsolescence. It's difficult to predict which components will need replacement or upgrades due to the corrosive gases.

CIP Status - SELECT from LIST New Project OR Modify Existing Modify Existing	Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New Renewal/Replacement
---	---

Operating Budget Impact:
 Fewer emergency repairs and replacements will be needed as preventative repair or replacement be done which will typically result in lower costs.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 84.4 and was ranked 4th amongst Wastewater projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Utilities** Project Title: **Wastewater - FOG Improvements**

Project Description/Location:
 This project proposes the design and construction of a dedicated FOG (Fats, Oils, and Grease) Receiving Station at the landfill.

Justification:
 The landfill currently utilizes open-air FOG ponds to accept and store FOG waste; however, these ponds are failing to perform effectively, creating several operational and environmental challenges including gas production issues, operational inefficiencies, and potential environmental risk. Directing FOG to a designated receiving station prevents it from entering the sewer system, reducing the risk of blockages, backups, and treatment plant upsets. Removing FOG from the ponds eliminates a major source of contamination that is currently disrupting methane generation and collection. The proposed facility will provide a controlled location for receiving and managing FOG waste from commercial haulers, separate from the existing FOG ponds. Once the FOG is dewatered, it will be hauled to the working face of the landfill for disposal.

CIP Status - SELECT from LIST <i>New Project OR Modify Existing</i>	Project Type - SELECT from LIST <i>Renewal/Replacement OR Enhancement/New</i>
New Project	Renewal/Replacement

Operating Budget Impact:
 The cost to maintain the receiving station is approximately the same as maintaining the FOG ponds so there is no anticipated impact on O&M.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Department: Public Works		FY27 - FY31 CIP							
Project Category: Utilities		Project Title: Wastewater - Monad Sewer Extension							
Project Description/Location: This project will reconstruct the existing 12- and 18-inch sewer main in Monad Road between Shiloh Road and 32nd St West. A 30-inch sanitary sewer main was recently installed upstream of this main, west of Shiloh Road.									
Justification: The Shiloh Lift Station is nearing capacity with continued growth on the west end of Billings. Rather than expanding the lift station, the 2021 Wastewater Master Plan Update recommended the construction of a large sewer main from west of Monad and Shiloh to the intersection of King and 48th St, allowing for gravity flow along Monad and west on King Avenue. The existing sewer main in Monad Road east of Shiloh is undersized for this added contributing area. The reconstructed main in Monad Road will need to accommodate flows from the upstream 30-inch main as well as the existing flows routed to the sanitary sewer main. The replacement of the 12- and 18-inch mains will be triggered by upstream development.									
CIP Status - SELECT from LIST New Project OR Modify Existing		Project Type - SELECT from LIST Renewal/Replacement OR Enhancement/New Enhancement / New							
Operating Budget Impact: Additional sewer lines will require regular O&M, however, this extension will provide service to many new customers which increases the rate base.									
Comments: Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. Department: <u>Public Works</u>		FY27 - FY31 CIP						
Project Category: <u>Utilities</u>		Project Title: <u>Wastewater Compensation Agreements</u>						
Project Description/Location: This is an on-going program to fund compensation agreements with private developers for oversizing sewer mains and other City authorized costs.								
Justification: Per the City's rules and regulations for sanitary sewer service, the city will pay for oversizing of sewer mains when they are extended by developers. Without these funds, the lines installed by developers would not be large enough to serve areas beyond each development and the wastewater system would not function properly.								
CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> Modify Existing		Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New		COMPENSATION AGREEMENT THIS AGREEMENT entered into this _____ day of _____, 20__ between THE CITY OF BILLINGS, Billings, Montana, hereinafter referred to as the "CITY", and _____ of _____, hereinafter referred to as "DEVELOPER". WITNESSETH WHEREAS, the CITY'S Water/Wastewater Extension Policy outlines the procedure and criteria the CITY uses in approving extensions of the public water and wastewater systems; and WHEREAS, the CITY'S Utilities Fees Practice outlines how the CITY participates in construction of various water and wastewater facilities and applies water and wastewater construction fees and system development fees to developments; and WHEREAS, no person, developer, customer or applicant shall acquire any vested rights under the terms and provisions of this agreement; and WHEREAS, DEVELOPER has agreed to extend or replace water and/or wastewater facilities for the purpose				
Operating Budget Impact: Additional sewer lines will require regular O&M however, by installing larger lines initially, fewer lines will be needed in the long run.								
Comments: Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. This project is not included in the CIP prioritization tool because Water and Wastewater Rules and Regulations require the annual funding of compensation agreements.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Utilities	Project Title: Water - 48th St Transmission Line Phases I-III

Project Description/Location:
 The project constructs a water transmission main from King Avenue to Grand Avenue completing a main trunk in water service zone 3. The water main would be constructed in phases, with likely phases occurring from Central Avenue to Grand Avenue via 44th Street West, from King Avenue to Monad Road via 48th Street West, and from Monad Road to Central Avenue via 48th Street West. Each construction phase would loop and provide redundancy for the local area.

Justification:
 This is needed to serve new growth and loop water lines on the west end of Billings. Water system looping is a common practice that improves water quality and system redundancy. This project is generally shown and recommended in the 2023 Water Master Plan. By connecting this water main, a second major trunk line parallel to Shiloh Road is completed that provides redundancy in the case of main breaks and major looping to the area. Looping improves water quality, provide two ways to serve water in case of main breaks, improves pressures in Zone 3, and improves available fire flow. Each construction phase would loop and provide redundancy for the local area.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Utilities	Project Title: Water - Annual Main Replacements

Project Description/Location:
 This is an annual program for the replacement of water mains throughout the City. Generally, water main replacements are prioritized based on break history and age. Projects are also prioritized and completed ahead of pavement preservation projects. The anticipated prioritized projects include the following areas: North 24th Street from Montana Avenue to 2nd Avenue North, North 23rd Street from Montana to 2nd Avenue North, Avenues C-D-E from 10th Street West to 13th Street West, 11th Street from Grand Avenue to Avenue C, Monad Road from Daniaels Street to Plainview Drive, Broadwater Avenue from Division to 11th Street West, North 18th Street from 4th Avenue to 6th Avenue North, 6th Avenue North from North 18th to North 13th, North 13th from 6th Avenue North to 4th Avenue North, Byrd Street from Kratz Lane to Jackson Street, Jefferson Street from Orrel Drive to Kratz Lane, Kratz Lane and Orrel Drive east of Jackson Street, Monroe Street from Orrel Drive to Kratz Lane, Virginia Lane from Grand Avenue to Rimrock Road.

Justification:
 The City's water infrastructure is aging and in need of replacement. Annual projects to replace areas of greatest need help to reduce leaks and failures and maintain reliable service to customers.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Renewal/Replacement

Operating Budget Impact:
 Reduced O&M due to reduced leaks and failures.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 85.8 and was ranked 1st amongst Water projects.

Department: **Public Works** FY27 - FY31 CIP

Project Category: **Utilities** Project Title: **Water - Annual Treatment Plant Electrical Improvements**

Project Description/Location:

This is a project to fund various electrical and automation upgrade projects at the Water Treatment Plant and pumping stations.

Justification:

Electrical upgrade projects are common in the water system due to the obsolescence of automation systems and replacements of electrical equipment at the Water Treatment Plant (WTP) and pumping stations. In FY27, transformers T5, T6, and T7A will be replaced.

CIP Status - SELECT from LIST Project Type - SELECT from LIST

New Project OR Modify Existing Renewal/Replacement OR Enhancement/New

Modify Existing **Renewal/Replacement**

Operating Budget Impact:

New electrical equipment typically results in lower electrical costs as the equipment is more efficient. Also, new equipment requires fewer repairs.

Comments:

Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 79.5 and was ranked 2nd amongst Water projects.

Department:	Public Works	FY27 - FY31 CIP
Project Category:	Utilities	Project Title: Water - Fox Reservoir #1 Replacement

Project Description/Location:
This project will replace the existing reservoir.

Justification:
The existing steel reservoir was constructed in 1982. The interior paint has reached the end of its lifecycle and is required to be recoated. Rather than recoat the reservoir, the life cycle costs are less to replace the reservoir with a concrete reservoir. Failure to complete this project will require that the existing reservoir be recoated and long-term increase in costs.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
Modify Existing	Renewal/Replacement

Operating Budget Impact:
Long-term O&M will be reduced.

Comments:
Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. Project Category: **Utilities** Project Title: **Water - High Service Pump Station Meter Upgrade**

Project Description/Location:
 This project will replace two (2) 36" water meters in High Service Pump Station at the Water Treatment Plant.

Justification:
 High Service Pump Station is the final pump station at the Water Treatment Plant. It pushes water through four (4) pipelines that deliver water all around the City. Each pipeline has a meter. Two (2) of the meters have been replaced with the other two (2) still in need of replacement. These meters are relied upon to conduct water audits to minimize water loss in the system.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> New Project	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
---	---

Operating Budget Impact:
 New metering equipment requires less maintenance and fewer calibrations.

Comments:

Department: Public Works FY27 - FY31 CIP

Project Category: Utilities Project Title: Water - Storage Improvements (Zone 1)

Project Description/Location:

This project will construct an additional water tank in Pressure Zone #1 which serves the downtown area.

Justification:

Pressure Zone #1 serves the downtown area which includes critical facilities such as hospitals and healthcare facilities. Currently, Pressure Zone #1 is deficient in water storage per the Water Master Plan. Storage is needed to address fire, operational, and other emergency needs. This project will add a 3 million gallon storage tank to Pressure Zone #1. The Water Master Plan recommended an alternative of constructing a tank on the north side of Swords Park with a water main that connects the tank to Walter Pump Station.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
<u>New Project OR Modify Existing</u>	<u>Renewal/Replacement OR Enhancement/New</u>
0	Enhancement / New

Operating Budget Impact:
There is additional O&M associated with a storage tank but it is minor for a newly constructed reservoir.

Comments:
Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. Department: **Public Works** FY27 - FY31 CIP

Project Category: **Utilities** Project Title: **Water - Treatment Plant 750 kW Solar PV Generation**

Project Description/Location:
 This project will install a 750kW photovoltaic power system at the existing water treatment plant. Electrical switchgear will be added to connect to the water treatment plant electrical switchgear.

Justification:
 The water treatment plant has the largest electrical demand in the City of Billings, accounting for more than \$1,800,000 annually. A portion of that cost can be offset by installing a solar photovoltaic system. A study done in 2023 by NREL recommended installing a 750kW system. Other communities, such as Missoula have pursued power purchase agreements where the system is owned, operated, and maintained by a separate entity and the power is purchased from the separate entity. This option can be pursued in lieu of City ownership.

CIP Status - SELECT from LIST	Project Type - SELECT from LIST
New Project OR Modify Existing	Renewal/Replacement OR Enhancement/New
0	Enhancement / New

Operating Budget Impact:
 The PV power system is expected to save approximately \$100,000 annually on the water treatment plant power bill. Additional maintenance of electrical equipment and switchgear will be required.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Department:	<u>Public Works</u>	FY27 - FY31 CIP
Project Category:	<u>Utilities</u>	Project Title: <u>Water - Zone 6 Storage and Looping Improvements</u>

Project Description/Location:
 This project will construct an additional water tank and water line in Pressure Zone #6 which serves the area on top of rims including a portion of Skyway Drive.

Justification:
 Pressure Zone #6 serves the area on top of the rims west of the airport and also includes Rehberg Ranch Subdivision. Currently, Pressure Zone #6 is a closed pressure zone (has no storage) and relies on the limited water storage in Pressure Zone #5 (0.1 million gallons). Storage is needed to address fire, operational, and other emergency needs. This project will add a 1 million gallon storage tank to Pressure Zone #6. This project will also address the lack of a redundant water main to the top of the rims, including the airport, by providing pumps and a pipeline from Ironwood Tank to the new Zone #6 tank. The Water Master Plan recommended acquiring land and easement near Indian Cliffs Subdivision or along Highway 3. The water main would connect to the existing system near the intersection of Highway 3 and Zimmerman Tr. This will also benefit the airport water system by providing a redundant way to fill the Logan Tank (Zone #5) and will delay or eliminate the need for a water line connection from Alkali Creek.

CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u>	Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Enhancement / New
--	---

Operating Budget Impact:
 There are minor O&M costs associated with a new reservoir. While the additional water line will require O&M, it eliminates the need for another water line which reduces potential additional costs.

Comments:
 Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. The CIP prioritization tool and strategy are based on advanced asset management strategies to provide a rigorous and defensible decision-making process that enables staff to balance the costs of assets with acceptable levels of risk, while continuously delivering established levels of services. Public Works projects are evaluated and scored against capital project objectives including safety (public and staff), compliance with regulations, maintaining current service levels, improving service levels, serving new growth, promoting efficiency, and protecting the environment. This project has a MODA score of 59.6 and was ranked 9th amongst Water projects.

Department: <u>Public Works</u>		FY27 - FY31 CIP						
Project Category: <u>Utilities</u>		Project Title: <u>Water Compensation Agreements</u>						
Project Description/Location: This is an on-going program to fund compensation agreements with private developers for oversizing water mains and other City authorized costs.								
Justification: Per the City's rules and regulations for water service, the city will pay for oversizing of water mains when they are extended by developers. Without these funds, the lines installed by developers would not be large enough to serve areas beyond each development and the systems would not function properly.								
CIP Status - SELECT from LIST <u>New Project OR Modify Existing</u> Modify Existing		Project Type - SELECT from LIST <u>Renewal/Replacement OR Enhancement/New</u> Renewal/Replacement		<p style="text-align: center;"><u>COMPENSATION AGREEMENT</u></p> <p style="text-align: center;">THIS AGREEMENT entered into this _____ day of _____, 20__ between THE CITY OF BILLINGS, Billings, Montana, hereinafter referred to as the "CITY", and _____ of _____, hereinafter referred to as "DEVELOPER".</p> <p style="text-align: center;">WITNESSETH</p> <p>WHEREAS, the CITY'S Water/Wastewater Extension Policy outlines the procedure and criteria the CITY uses in approving extensions of the public water and wastewater systems; and</p> <p>WHEREAS, the CITY'S Utilities Fees Practice outlines how the CITY participates in construction of various water and wastewater facilities and applies water and wastewater construction fees and system development fees to developments; and</p> <p>WHEREAS, no person, developer, customer or applicant shall acquire any vested rights under the terms and provisions of this agreement; and</p> <p>WHEREAS, DEVELOPER has agreed to extend or replace water and/or wastewater facilities for the purpose</p>				
Operating Budget Impact: Additional water lines will require regular O&M however, by installing larger lines initially, fewer lines will be needed in the long run.								
Comments: Public Works utilizes a Multi-Objective Decision Analysis (MODA) approach to prioritization and CIP development. This project is not included in the CIP prioritization tool because Water and Wastewater Rules and Regulations require the annual funding of compensation agreements.

The proposed Capital Improvement Plan (CIP) is built on the crucial assumption that various utility and maintenance rates will increase significantly over the next few fiscal years to sustain new capital projects and cover expected inflationary costs. Consequently, the CIP is contingent on the implementation of the proposed scheduled rate adjustments, as a failure to realize these future increases, specifically implementing a zero percent growth scenario in future budgets, would necessitate a significant revision of the proposed capital scope. The following approximate projected rate adjustments are required to fund this proposed CIP, ensuring its viability over the long term:

- **Street Maintenance District 2 Assessments:** 7% increase in FY27, followed by 6% annually from FY28 through FY31.
- **Storm Fees:** 13% annually from FY27 to FY30, dropping to 9% in FY31 (per the storm utility plan).
- **Solid Waste:** Consistent 7% annual increase for both collection (primarily due to the ERP) and landfill fees.
- **Water:** FY27 rates are set; 7.5% increase in FY28, followed by 6.5% annually from FY29 through FY31.
- **Wastewater:** FY27 rates are set; 5% increase in FY28, followed by 3% annually from FY29 through FY31.

Future CIP Projects

The list below, by department, are the future CIP projects that have been identified as needs. These are either outside of the current 5-year CIP, or have no identified funding source. It should be assumed that projects included on this list are not priorities, and as a result, are not being focused on by City staff at the current time.

FUTURE CIP PROJECTS LIST	
Library	
Project Title	Estimated Costs
Branch Library	14,000,000
Aviation	
Project Title	Estimated Costs
Northside Ramp Expansion	2,500,000
Terminal Parking Garage- Phase II	50,000,000
Operations/ARFF Building (New)	25,000,000
IP 1-4 Hangar Removal	500,000
Customs FIS Facility	5,000,000
TWY D Extension	5,000,000
Runway 10R-28L Extension	23,000,000
Fuel Farm Expansion	6,000,000
Terminal Rehab	18,000,000
Transit	
Project Title	Estimated Costs
West End Transfer Center	5,000,000
Police	
Project Title	Estimated Costs
PD2 Expansion	1,000,000
Real Time Crime Center	2,000,000

FUTURE CIP PROJECTS LIST

Parks, Recreation, and Public Lands

Project Title	Estimated Costs
Annafeld Subdivision Playground Replacement	112,500
Centennial Event/Picnic Shelters & Athletic Courts	1,000,000
Centennial Park Playground	1,000,000
Cemetery Barrier Wall	1,000,000
Copper Ridge Playground Replacement	112,500
Cottonwood Park	900,000
Country Manor Playground Replacement	70,000
Francis Park Playground Replacement	100,000
Harvest Irrigation Replacement	1,000,000
Harvest Playground Replacement	70,000
Ironwood Playground Replacement	70,000
Kiwanis Playground Replacement	70,000
Olympic Irrigation Replacement	1,000,000
Olympic Playground Replacement	70,000
Rimrock West Playground Replacement	80,000
Unita Park Playground Replacement	100,000
Waldon Grove Park Playground Replacement	100,000
Walsh Park Playground Replacement	350,000
Yellowstone Family Park Playground Replacement	100,000

Wastewater

Project Title	Estimated Costs
IBL - Sewer Main (Hwy 3 headed south on IBL to sewer lagoons)	3,400,000
IBL - Sewer Main (Top of Skyway to Alkali Creek)	3,200,000
Rehberg Ranch Lift Station	1,880,000
IBL -Sewer Main (Alkali Creek to Skyway)	1,100,000
IBL - Sewer Main (Force Main to Top of Skyway)	900,000
Sahara Sands Lift Station Reconstruction	850,000
Gravity thickener sweep replacements	800,000
WRF Underground Sludge Line Replacement	500,000
WRF Underground Nonpotable Water Line Replacement	500,000
WRF Laboratory Improvements	400,000
Wastewater Treatment Plant Intercom	200,000

FUTURE CIP PROJECTS LIST

Solid Waste

Project Title	Estimated Costs
Future solid waste needs are being determined through studies and a master plan and will be included in the next CIP. Significant equipment needs are expected.	

Water

Project Title	Estimated Costs
Water Storage Improvements Zone 4	8,525,000
Staples Reservoir Replacement	7,000,000
Pipe Up Rims Replacement from Staples to Waldo	4,500,000
Water - Fox Reservoir #1 Replacement (FY32 Construction)	4,720,000
WTP Filter Anthracite Replacement	1,800,000
Existing WTP Intake 2/LSPS 2 Improvements	1,422,000
Cure in place pipe up rims at Staples	700,000
High Sierra Waterline Extension	600,000
Chapple Generator Replacement	400,000
Repaint Ironwood Reservoir	400,000
Water Tank Land Purchases for Zone 6, 4, and 3	300,000
PRS at Christensen Pump Station	180,000
Upgrade Zone transfer station at Staples Pump Station from Zone 3 to Zone 2	180,000
Ironwood tank chlorine issues	100,000
PRS at Ironwood Pump Station from Zone 6 to Zone 3	100,000
Convert upper Zone 1 to Zone 2	74,000
Move generator at Voelker Pump Station to Willett Pump Station	70,000
PRS at Ironwood Pump Station from Zone 6 to Zone 5W	50,000
Zone 4 Waterlines (Skyway Drive)	3,600,000
Zone 4N Reservoir (Skyway Drive)	2,900,000
Zone 5N waterlines (Skyway Drive)	3,100,000
Zone 5N pump station (Skyway Drive)	1,900,000
Zone 6 waterlines (Skyway Drive)	3,400,000

Transportation

Project Title	Estimated Costs
1st Avenue South - Minnesota	6,610,000
Pemberton Lane - BBWA to Lake Elmo	3,400,000
13th Street Road Diet (6th Ave N to 1st Ave N)	800,000
Central Ave - Shiloh to 48th	3,900,000
62nd St W - Rimrock to Western bluffs	1,400,000
36th - Broadwater to Central	2,860,000

FUTURE CIP PROJECTS LIST

Transportation continued

Project Title	Estimated Costs
Hawthorne - YRR to Wicks	3,640,000
Bitterroot Dr - Wicks to Mary	5,834,000
Governors/Constitution Secondary Access	385,000
Hesper - Shiloh to Gabel	no estimate available
S. 32nd - Gabel to Hesper	no estimate available
Rock removal above Zimmerman and 6th Ave	500,000
62nd and Bushwood - connecting YCC and Ironwood	500,000
YRR Bench to Bitterroot	no estimate available
21st Underpass Improvements	14,500,000
5th Ave Corridor	8,000,000
19th/20th/Monad intersection	5,000,000
Alkali Creek Widening - Senators to Skyway	9,270,000
6th Ave N Multiuse path	520,000
Bitterroot - YRR to Wicks	no estimate available
Hawthorne - Wicks to Barrett	no estimate available
W. Wicks - intersections and widening	no estimate available
Jackson Street - State to King Ave E	no estimate available
32nd Street West - future phases	25,000,000
Alkali Creet - STRS	467,000
Arrowhead - SRTS	130,000
Big Sky - SRTS	88,000
Broadwater - SRTS	165,000
Eagle Cliffs - SRTS	130,000
Meadowlark - SRTS	640,000

Yegen Drain Unloader & New River Outfall	2,140,000
Grand Avenue (Mid-Town) Storm Drain Capacity Improvements	4,280,000
King Park Drainage Basin Improvements	1,926,000
State Avenue Storm Drain Cleaning	4,387,000
Suburban Ditch Crossing	250,000
Sierra Granda Storm Drain Extension	940,000
4th Ave North Drainage Improvements	370,000
Hesper Regional Pond Improvements	660,000

CIP Glossary

FY 2027 - 2031 CAPITAL IMPROVEMENT PLAN

GLOSSARY

A

ADA

Americans with Disabilities Act.

AIP

Airport Improvement Program.

Airport FAA Grant

The Airport Improvement Program (AIP) provides grants to public agencies for the planning and development of public-use airports that are included in the National Plan of Integrated Airport Systems (NPIAS).

Airport Fund

Accounts for the Billings Logan International Airport operations and for all the resources received and used for acquisition and development of airport capital improvements and equipment.

Airport Improvement Program (AIP)

Federally funded grant program in which annual entitlements combined with local share dollars, are used to fund Federally approved airfield improvements and/ or equipment purchases. Examples of AIP projects include taxiway/ runway overlays, airfield lighting, navigational equipment installation, airfield firefighting equipment, etc.

Airport User Fees

Fees assessed the end user of airport services and are typically used as a funding source for projects, improvements and maintenance of airport facilities.

Americans with Disabilities Act (ADA)

Federal law providing for a wide range of protection to individuals with disabilities ranging from prohibitions against discrimination in employment to specific requirements for modifications of public facilities and transportation systems.

Arterial Construction Fund

Accounts for construction and reconstruction of arterial streets throughout the City.

B

BARSAA

Bridge and Road Safety and Accountability Act

Baseball Field/ Stadium Donations (for Capital Fund)

Accounts for donations to fund future capital maintenance for the ball field and stadium.

Billings Metropolitan Transit

Public Transit System providing fixed-route and paratransit bus services to the City of Billings.

Billings Operations Center (BOC)

Facility that houses the Central Motor Pool, Solid Waste Division, Street-Traffic Division, Parks Maintenance Division, and the Police Department Roll-Call and Training location.

Billings Trailnet

A non-profit that supports urban trail systems by raising money to be used as fund matching for City funding and projects.

Bond

Debt instruments that require repayment of a specified principal amount on a certain date (maturity date) together with interest at a stated rate or according to a formula for determining the interest rate. For the purposes of the City of Billings we use the General Obligation, Revenue, Sidewalk and Curb District, Special Improvement District, and Tax Increment Bonds.

Bridge and Road Safety and Accountability Act

House Bill 473, known as the Bridge and Road Safety and Accountability Act (BaRSAA), provides for a graduated increase in motor fuel tax by fiscal year 2023 and is managed by the Montana Department of Transportation (MDT). Funds can be used to pay for the construction, reconstruction, maintenance, and repair of rural roads, city streets and alleys; and bridges.

BUILD Grant

Provided by the US Department of Transportation to invest in projects that promise to achieve national objectives related to road, rail, transit and port systems.

C

Capital Asset(s)

Assets of significant value and having a useful life of several years. Also called Fixed Assets.

Capital Improvement Plan (CIP)

The CIP provides a forecast of funds available for capital projects and identifies all planned capital improvement projects and their estimated costs over the five-year period.

Capital Expenditure

An outlay that results in or contributes to the acquisition or construction of a capital asset.

Capital Project

A capital project is a project that costs \$25,000 or more and results in a permanent addition to the City's asset through the acquisition of property, new construction, or rehabilitation of an existing facility to a like-new condition. Project costs can include the cost of land, engineering, architectural planning, and contract services needed to complete the project.

Capital Project Fund(s)

These account for the acquisition and construction of major capital facilities such as a fire station or stadium. Revenues may be from grants, taxes, bonds, donations, transfers from other funds or assessments. For the purposes of the City of Billings there are currently these funds in this fund type: Sidewalks and Curb District Fund, Special Improvement Districts (SID) Fund.

Capital Replacement Fund

Used strictly for the replacement of vehicles and major items of equipment. Reserves are accumulated in this fund through transfers from benefitting funds.

Category

Projects in the CIP are organized into groupings based on common criteria. Typically this will be under the Department heading and may reflect a Division, operational work-group or service type.

Cell Tower Revenue

Funds generated from the leasing of City owned property.

CFC

Customer Facility Charge.

Charges to City Departments

Internal service fees assessed between Departments.

CIP

Capital Improvement Plan (CIP)

CIP Status

An identifying status is used to indicate if a project is new or has already been approved and is now subject to a change. For the purpose of the City of Billings examples include Modify Existing and New Project status designations.

Contribution(s)

A revenue source that is not an assessment tax or service fee, these may come from entities such as Private, Contractor, and may be Matched or account for full funding of a project.

Customer Facility Charge

User fee charged by an airport operator for rental car use.

D

Department

Defined work group or operation center within the City hierarchy. For the purposes of the City of Billings examples would include Aviation & Transit, Fire, Police, and Public Works.

Developer Contributions

Monetary commitments used for improvements and infrastructure that are received as part of a development project such as a subdivision.

E

East Tax Increment District Fund

Accounts for revenues from property tax levies in the East Tax Increment District on increased taxable values. Amounts collected are used for the benefit of the tax district.

Enterprise Fund

Funds established to account for specific services funded directly by user fees and charges to users for services. These funds are intended to be self-supporting. For the purposes of the City of Billings, these funds include Airport, Parking, Solid Waste, Transit, Wastewater, Water funds.

Environmental Protection Agency (EPA)

An independent agency of the United States federal government responsible for environmental protection.

EPA

Environmental Protection Agency (EPA)

EPA Grant

Funds awarded by the EPA to other organizations to conduct environmental programs or projects.

F

FAA

Federal Aviation Administration

Facilities Charges for Services

Internal services charges related to Facilities Management and usually accounting for building maintenance.

Facilities Management Fund

An Internal Services Fund that provides operating and maintenance services to the City Hall and BOC buildings. Also provides project management, specifications, and/or advice to all City Departments.

Facilities Master Plan

Document that describes and organization's facilities, their purpose and future needs planning, including maintenance, reconstruction and acquisitions.

Federal Transit Administration (FTA)

An agency within the United States Department of Transportation (DOT) that provides financial and technical assistance to local public transit systems.

Fixed Asset(s)

Assets of significant value and having a useful life of several years. Also called Capital Assets.

FTA

Federal Transit Administration (FTA)

Fund

An existing collection of money.

Fund Type

For the purposes of the City of Billings, Montana, there are five (5) funding types that are utilized in relation to the CIP, examples include Capital Project, Enterprise, General, Internal Service, and Special Revenue.

Funding

The source of money being collected into a fund.

G

Gas Tax Fund

Accounts for revenues received from the State of Montana gasoline tax.

General Fund

Accounts for resources not otherwise required to be in another specified fund, either legally or by financial management practices. For the purposes of the City of Billings it is funded by property tax, licenses, permits, fees for service, fines and forfeitures, and state intergovernmental revenues.

Grant

A contribution by the State or Federal government, or another organization for a specific purpose, activity or facility. For the purposes of the City of Billings examples would include the Airport Cargo, Airport FAA, Build, EPA, NRDP/YRRP, Recreational Trails, Transit FTA, and Transportation Alternatives Grants.

H

I

IBL

Inner Belt Loop

Inner Belt Loop (IBL)

A planned route intended to better connect the West End of Billings with the Heights using Zimmerman Trail, Alkali Creek Road and Wicks Lane.

Internal Service Fund

Accounts for activities and services performed by a City Department for other organizational units within the City. For the purposes of the City of Billings an example would be the Facilities Management Fund.

J

Justification

An explanation of how a project addresses a specific issue or need.

K

L

M

MDT

Montana Department of Transportation

MET

Billings Metropolitan Transit.

Mill Levy

A special tax, assessment or service charge based on the taxable value of a property and used to support specified governmental activities.

Missing Sidewalk and Construction Program

Addresses sidewalk repair and construction needs on an on-going basis. Managed by the Engineering Division of Public Works.

N

Natural Resource Damage Program (NRDP)

Division of the Montana Department of Justice that seeks to recover damages to natural resources injured by the release of hazardous substances and to restore, rehabilitate, replace or acquire the equivalent of the injured natural resource.

NRDP

Natural Resource Damage Program.

NRDP/YRRP Grant

Grant partnership providing funds for projects related to the protection, restoration and development of natural resources.

O

Operating Budget Impact

An estimate of a capital project's ongoing operating expenses upon completion and the impact on the City's operating budget.

P

Park District 1 Fund

Accounts for the city-wide park assessment revenues and is used for maintenance and improvements of City parks.

Park Maintenance District Fund

Accounts for revenues from special assessment districts that support the maintenance of various, individual parks.

Parking Fund

Accounts for operations of the City Parking Division.

Parks Program Fund

Accounts for revenues and expenditures related to park acquisitions and improvements.

PAVER Program

Preventative asphalt maintenance program that addresses on-going needs of streets within the City of Billings, including overlaying, crack sealing and chip sealing. Managed by the Engineering Division of the Public Works Department.

Private Contribution

Funds provided to the City for use on specified projects from a privately owned entity or individual(s).

Project Funding

How a project is specifically financed, this may include one or various funds as a funding source.

Project Type

Designation that indicates if a project will be maintaining a current resource or adding a new or increased asset/ value. For the purposes of the City of Billings examples include types Renewal/ Replacement, or Enhancement/ New.

Public Safety Fund

Accounts for the Fire Department and Police Department operations, this includes the Animal Control Division.

Q

R

Recreational Trails Grant

Federally funded grant for the support of Montana recreational trails systems.

Recreational Trails Program

Administered by Montana State Parks and provides funds to develop and maintain recreational trails and related facilities throughout the state.

Revenue Source

Income produced by a given source. For the purposes of the City of Billings examples include charges to City Departments, Contributions, Debt, Grant, Special Assessments, State Revenue, Tax Revenue, User Fees and Charges that fund various projects and operations.

S

SID

Special Improvement District.

Sidewalk and Curb District Fund

Accounts for the payment of debt used for the construction of sidewalks and curbing throughout the City.

Solid Waste Fund

Accounts for the operations of the Solid Waste Division, including collection services and landfill operations.

South Tax Increment District Fund

Accounts for revenues from property tax levies in the South Tax Increment District on increased taxable values. Amounts collected are used for the benefit of the tax district.

Special Assessments

A levy imposed on certain properties to defray all or part of the cost for a specific improvement or service which primarily benefits the property being assessed. For the purposes of the City of Billings examples include Arterial, Park District 1, Storm, and Street Maintenance District assessments.

Special Improvement District

Districts established to accommodate special assessment needs to support improvements such as water, sanitation, storm drains and streets.

Special Improvement District (SID) Fund

Accounts for the funds generated from a Special Improvement District assessment.

Special Revenue Fund

Accounts for the proceeds of specific revenue sources (other than those for expendable trusts and major capital projects and enterprise activities) to finance specified activities as required by law or administrative regulation. For the purposes of the City of Billings examples of this fund type are Arterial Construction, Baseball Field/ Stadium Donations for Capital Fund, East Tax Increment District, Gas Tax, Park District 1, Park Program, Public Safety, South Tax Increment District, Storm, Trails, and Transportation Alternatives.

State Revenue

Funding from the State, this may be from taxes or other sources.

Storm Drain Assessment

Used to generate funding for the operation, maintenance and construction of the storm drain system.

Storm Fund

Accounts for the operation and maintenance of the storm drain system.

Stormwater Master Plan

Contains information on the condition of the City's stormwater management systems, streams and watersheds in addition to recommendations for improvements.

T

Tax Increment District

Areas within the City which have been identified by Resolution to be "blighted", this allows for special property tax treatment. Defined as an area with declining taxable value that requires redevelopment in the interest of public health and safety and citizen welfare. Tax revenue from construction and improvements in an assessed Tax District are then used for new construction and improvements for the same District

Tax Increment District Bond

Specially limited obligation bond payable from anticipated incremental increases in tax revenues, resulting from the redevelopment of a specified area.

Tax Increment District Fund

Accounts for funding from a Tax Increment District. For the purposes of the City of Billings examples include the South, East, and Tax Increment District Funds.

Tax Revenue

Revenues resulting from tax assessments and treated as income for specified projects or operations.

TIFD

Tax Increment District Fund

Trails Fund

Accounts for the maintenance and development of the multi-use trail system.

Transit FTA Grant

The Federal Transit Administration provided funding for local transit systems to support and expand their services.

Transit Fund

Accounts for the operations of the public transportation system.

Transportation Alternatives Program (TAP)

Managed by the US federal Highway Administration and provides funding for projects defined as transportation alternatives, such as pedestrian and bicycle projects, scenic and environmental projects, and historic preservation projects.

Transportation Alternatives Program Fund

Accounts for the maintenance and development of non-driver transportation projects.

U

User Fees and Charges

Service charges and fees assessed to the end user of a service.

V

W

Wastewater Fund

Accounts for the operations related to the wastewater systems and reclamation facility.

Water Fund

Accounts for the operations related to the water systems and treatment plant.

X

Y

Yellowstone River Recommended Practices (YRRP)

Yellowstone River Conservation District Council

YRRP

Yellowstone River Recommended Practices

Z
