STPU	Surface Transportation Program Urban
STPX	Surface Transportation Program Off-System
TA	Transportation Alternatives
TAC	Technical Advisory Committee
TIP	Transportation Improvement Program. A multi-year program of highway and transit projects on the Federal aid system, which addresses the goals of the long-range plans and lists priority projects and activities for the region.
TSP	Total Suspended Particulate
UPP	Urban Pavement Preservation

Introduction

Preface

The Yellowstone County Board of Planning (YCBP) is the Metropolitan Planning Organization, (MPO), for the Billings metropolitan planning area. The Transportation Improvement Program, (TIP), is the funding mechanism for transportation projects requesting federal dollars in the Billings urbanized area. This document contains a list of all surface transportation projects requesting the use of federal funds. Local jurisdictions working through the Billings MPO's Policy Coordinating Committee (PCC) determine how the area's transportation system is developed and expanded.

The Infrastructure Investment and Jobs Act (IIJA) Passed by Congress on November 15, 2021, authorizing funding for Federal transportation programs for the five-year period from 2022-2026. The IIJA effectively replaced the Fixing America's Surface Transportation (FAST) Act and the prior infrastructure act Moving Ahead for Progress in the 21st Century (MAP-21) Act. MAP-21 authorized the Federal surface transportation programs for highways, highway safety, and transit for the 2-year period FFY 2013-2015. Like MAP-21, FAST Act and now IIJA requires that each Metropolitan Planning Organization (MPO) prepare a financially constrained transportation project programming document called a Transportation Improvement Program (TIP). While the IIJA replaced FAST, any previously obligated but unspent funds under the previous acts are still available at this time.

About the Transportation Improvement Program

The TIP is a short-range program of highway and transit projects in the Billings metropolitan planning area and is prepared by YCBP staff in cooperation with state and local agencies. The basic purpose of the TIP is to provide the mechanism for scheduling federal funds for surface transportation projects, indicating regional priorities, and demonstrating a short-range transportation vision for the area. A secondary purpose of the TIP is to provide information about other transportation projects in the planning area that are exempt from the TIP approval process such as projects that do not utilize federal funds.

TIP Process and Development

The development of the TIP document is the responsibility of the Billings MPO and provides an opportunity for local officials to determine priorities and spending for federal highway and transit funds. Any transportation project located in the Billings metropolitan planning area must be included in the TIP prior to receiving federal funds. TIP projects must be included in the area's Long Range Transportation Plan and are proposed for the TIP by local elected officials, transit operating officials, or state highway agencies. The TIP is reviewed and endorsed annually by the Billings MPO's Policy Coordinating Committee, (PCC), and may be modified through the TIP amendment process. The PCC includes a Billings City Council representative, the Chair of the Yellowstone County Commission, the President of the Yellowstone County Board of Planning and the District Administrator of the Montana Department of Transportation. After PCC endorsement, the TIP is submitted to the Montana Department of Transportation (MDT) for approval and to the Federal Highway Administration and Federal Transit Administration for federal review of the document and concurrence.

Federal Regulations

The Transportation Improvement Program (TIP) is a required planning program for federally assisted highway and transit improvements for the Billings metropolitan planning area and the Montana Department of Transportation (MDT) over a five-year period. The principal focus is given to the first two years of the program, the Biennial Element, however the TIP contains projects that could be implemented between October 1, 2024 – September 30, 2028 (FFY 2024 & 2028). The TIP is prepared annually and is in conformance with 23 CFR, Part 450 324-330.

Financial Resources

A range of federal funding sources is available to the Billings planning area for the purposes of funding transportation system improvements. Following is a list of those sources which, when available to the Billings area, are shown in the Transportation Improvement Program. Project implementation is indicated as expected to occur during the pertinent program year. Billings has had a favorable history of receiving federal earmarks as reflected in the table below.

BILLINGS FEDERAL EARMARK HISTORY 1999 – through 2009

Project	Earmark
Billings Bypass	\$22,445,600

Funding Sources

- Surface Transportation Program Off System (STPX)
- Surface Transportation Program Secondary (STPS)
- State Funded Construction (SFCN)
- Surface Transportation Program Urban (STPU)
- Surface Transportation Program Primary (STPP)
- National Highway (NH)
- National Highway Freight Program (NHFP)
- Interstate Maintenance (IM)
- Railroad Crossing (RRS)
- Highway Safety Improvement Program (HSIP)
- Bridge Replacement and Rehabilitation Program (BR includes NHPB and STPB)
- Urban Pavement Preservation (UPP)
- Transportation Alternatives (TA)
- Congestion Mitigation Air Quality (CMAQ)
- Montana Air Congestion Initiative (MACI)
- FTA Section 5339
- FTA Section 5307
- FTA Section 5310
- Transade (State Funded)
- Congressionally Directed Funds (EARMARK)

Air Quality Consistency

Billings was designated as a non-attainment area for both Total Suspended Particulates (TSP) and Carbon Monoxide (CO) on March 3, 1978, (Federal Register, Vol. 44, No. 150, page 45421, August 2, 1979). As such, Billings was required to prepare a Transportation Control Plan (TCP). The TCP identified strategies to mitigate the TSP and CO problems. The TCP is the Billings element of Montana's State Implementation Plan (SIP). The TIP is required to be, and is, consistent with the TCP as discussed in the Billings conformity statement. In 1987 the standard for TSP was dropped, and a new standard for particulate matter under 10 microns in size (PM - 10) was adopted (7/1/87 at 52 FR 24854). The Environmental Protection Agency (EPA) has also adopted the PM 2.5 standard and Billings is considered to be in compliance with both of these new standards.

The Billings CO maintenance area has shown continuous maintenance of the CO NAAQS from April 22, 2002, through April 22, 2022 (and to the present date); therefore, the area has met its obligation to demonstrate maintenance of the CO standard for 20 years. The Yellowstone County Board of Planning, as the designated metropolitan planning organization for the Billings area, is no longer required to address the transportation conformity determination requirements of 40 CFR part 93, subpart A for the Billings CO maintenance area, and such determinations for the Billings CO area will not be required as elements of future iterations of the Billings Urban Area Regional Transportation Plan and Transportation Improvement Program.

Regionally Significant Projects

There are no new regionally significant projects in this 2024-2028 Billings Urban Area TIP.

40 CFR part 93, subpart A - §93.126 Highway and Transit projects included in subpart A are exempt from the requirement to determine conformity. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and TIP. A project will not be exempt if the MPO in consultation with other agencies, the EPA, FHWA, or FTA concur that it has potentially adverse emissions impacts for any reason.

REGIONALLY SIGNIFICANT PROJECT (2020-2024)

Project	Scope	Comments
Billings Bypass (aka North Bypass)	Location/Environmental	New Construction

Locally Significant Projects

Grand Avenue

The Billings MPO has identified the need to program the reconstruction of Grand Avenue from 41st Street West to 62nd Street West. In April of 2024, Montana Department of Transportation Highway Commission approved the request to add Grand Avenue to the Urban Highway System. With this approval, the MPO has identified the Grand Avenue project for Surface Transportation Program Urban (STPU) funds.

Project Description

Portions of Grand Avenue exist as a two-lane county road section in a growing area of the city that has no sidewalk or other multi-modal element. Increasing traffic levels on a narrow road and the inability to

separate left-turning vehicles are a main safety concern. This project completes Grand Avenue to City arterial standards where the street has not been constructed between 41st Street West and 62nd Street West. Grand Avenue is proposed as a three-lane roadway from 41st Street West to 62nd Street West, including a transition west from Shiloh Road. The project will construct a separated, multi-use path on one side and a separated sidewalk on the opposite side of the roadway. Multi-modal improvements, including recommendations from the Safe Routes to School plan, will be considered and implemented. Streetlights will be installed along the roadway corridor. A new traffic signal is anticipated at Grand Avenue and 56th Street West. Additionally, stormwater improvements will be constructed with the project, which will serve the roadway runoff as well as developments within the area. This will result in an overall improvement to the functionality of the stormwater on Billings' west end.

This project contributes to the System Performance Measure as the project will enhance the efficiency of the transportation system, reduce congestion and travel times.

Transportation Alternative Program

The Billings MPO added two Transportation Alternatives (TA) projects in 2025, building on earlier TA investments. Previously approved projects included the Stagecoach Trail, submitted by the City of Billings and currently in the design phase, and a Yellowstone County–sponsored project that completes a sidewalk segment in Lockwood.

In January 2025, the Billings MPO issued a call for applications for the Transportation Alternatives Program grant. The MPO was awarded \$1,784,111 for the 2025 funding cycle, which was available to projects sponsored by local, state, or federal agencies. Two applications were received and both were fully funded. The City of Billings was awarded \$1,292,030.94 in TA funds for a suite of Safe Routes to School projects, and Yellowstone County, through the Lockwood Pedestrian District, received \$217,021.43 for the Johnson Lane Sidewalk Connector Project.

These projects contribute to the Safety Performance Measure as the project will assist in the number of non-motorized fatalities and non-motorized serious injuries. These projects also contribute to the Congestion Mitigation and Air Quality (CMAQ) Performance Measure as the project will reduce on-road mobile source emissions.

Energy Conservation Considerations

Energy impact analyses have been conducted as a part of the urban transportation planning process. In addition, increased attention has been given to energy conservation and contingency planning on a project specific basis.

As part of the 2023 update of the Billings Urban Area Transportation Plan, energy conservation was considered in each of the proposed alternative transportation networks.

The City of Billings has a well-developed transit system, and ride-sharing opportunities have been examined. Transit facilities and highway system proposals will continue to be considered in a comprehensive method through the adopted Transportation Planning process.

The detailed energy conservation analysis of specific projects has been conducted for each of the major highway construction projects recommended in the 2023 update of the Billings Urban Area Transportation Plan.

Programming of Non-Urban System, Federal Aid, and State Funding

Proposed projects involving federal-aid funding, other than urban system funding, that are proposed within existing rights-of-way and which are determined to not significantly change traffic patterns, may not be considered to be of appropriate scale to warrant a modification to a currently valid TIP.

When there is knowledge of such projects prior to the annual adoption of the TIP, each project will be included in the program. Generally, projects falling within this category are those which serve to preserve and maintain the integrity of the existing plant or facility such as: overlays to improve or maintain surface conditions; bridge expansion joints and deck repairs necessary to maintain structural and surface sufficiency; slope repair necessary to maintain drainage adequacy; etc. Projects of this nature will be identified by MDT with appropriate justification when requesting program approval of federal highway funds. Local urban area officials will be advised by the Department through the local planning process of the Department's intent to expend federal funds (non-urban system) for such improvements in their area.

Performance Measures

Planning "Performance Measures" are a tool by which the effectiveness of the transportation programs can be measured and are a required element for MPO planning. Specifically, the adoption of Performance Measures and Targets are required for MPOs and States, and they must be included in the MPOs Long Range Transportation Plan (LRTP) and Transportation Improvement Program (TIP).

The Billings MPO has adopted the measures and targets set by the Montana Department of Transportation and has committed to meeting the targets through implementation of its LRTP. The MPO has adopted the State's measures and targets for safety, pavement and bridge condition, system performance, freight and congestion mitigation and air quality, and will support the Billings Transit District's measures associated with transit. To support the targets, the MPO will plan and program projects that contribute toward meeting the targets for each Performance Measure. In general, since the MPO has opted to support the state targets, reporting on this information is completed at the state level. Reporting indicates that the agency has met or made considered progress toward meeting established targets. More detail and supporting data may be found in the Billings LRTP, which are incorporated by reference into this TIP.

The Billings MPO continues to support current targets and affirms this commitment through the inclusion of this statement of support in this document. The narratives and associated table that follow outline the currently adopted measures and targets. Finally, current projects in this TIP that support attainment of specific Performance Measure Targets are identified in the table "Projects List", which includes a column titled "Performance Measure & Target". While the project's contribution to target attainment is identified, it is impossible to quantify the contribution; thus, only the measure and target description are listed.

Safety

The Billings MPO supports the state's targets for applicable safety performance measures. The goal of safety performance measures is to reduce the number of traffic fatalities and serious injuries in the public right of way. Interstate Maintenance, National Highway, Highway Safety Improvement Program, Surface Transportation Program Off-System, Secondary, and State Funded Construction funding sources support projects with the intent to improve safety measures.

Performance Measure	2026 State Target (based on 5-year rolling average)
Number of fatalities	No more than 205.4 annual fatalities, which is an annual reduction of 8 fatalities per year
Rate of fatalities per 100 million vehicle miles traveled (AVMT)	No more than 1.507 fatalities per 100 million annual vehicle miles traveled (AVMT) which is a reduction of .056.
Number of serious injuries	No more than 750 serious injuries, which is an annual reduction of 29 serious injuries.
Rate of serious injuries per 100 million vehicle miles traveled (AVMT)	No more than 5.503 serious injuries per 100 million AVMT which is an annual reduction of .210.
Number of non-motorized fatalities and non-motorized serious injuries	No more than 57.2 non-motorized fatal and serious injuries, which is an annual reduction of 2 per year

Pavement and Bridge Condition

Pavement and bridge condition performance measures aim to maintain roadway and bridge infrastructure in such a way it remains functional and in good repair. Pavement and Bridge Condition are impacted most by Interstate Maintenance, National Highway, Bridge Program, and Urban Pavement Preservation funding sources. Projects included for funding under these sources were selected in part due to their contribution towards pavement and bridge condition targets.

Performance Measure	State Target	
	2-Year	4-Year
Percent of Pavements of the Interstate in Good Condition	50%	35%
Percent of Pavements of the Interstate in Poor Condition	2%	2%
Percent of Pavements of the Non-Interstate NHS in Good Condition	40%	30%
Percent of Pavements of the Non-Interstate NHS in Poor Condition	3%	3%
Percent of Bridges Classified as in Good Condition	16%	17%
Percent of Bridges Classified as in Poor Condition	9%	8%

System Performance

System performance measures exist to improve the efficiency of the overall transportation system, while helping to reduce congestion and travel times and increase reliability of the system. These measures are related to Congestion Mitigation and Air Quality, Surface Transportation Program Urban, and

Transportation Alternatives funding sources. Projects included in these funding sources will contribute to meeting state targets for system performance.

Performance Measure	State Target	
	2-Year	4-Year
Percent of the person-miles traveled on the interstate that are reliable	98%	98%
Percent of the person-miles traveled on the non-Interstate NHS that are reliable	80%	80%

Freight

The primary goal for establishing freight performance measures and targets is to improve the national freight network, while providing access to trade and enhancing the capacity of communities to participate in, and support regional economic development. The FHWA has established a performance measure specifically related to freight movement on the Interstate System, and MDT has set a 2- and 4-year target to address freight reliability (see table below).

Freight performance measures are most strongly influenced by the National Highway Freight Program Federal funding source. Projects selected for National Highways funding will contribute to improving the national freight network and meeting state targets. More information regarding freight related performance measures and metrics can be found in the [Montana Freight Plan](#).

Performance Measure	State Target	
	2-Year	4-Year
Truck Travel Time Reliability (TTTR) Index	1.30	1.30

Congestion Mitigation and Air Quality (CMAQ)

The collection of data regarding air quality performance measures helps to evaluate projects to ensure they are protecting and enhancing the health of the natural environment. These performance measures may be impacted by Congestion Mitigation and Air Quality, Montana Air and Congestion Initiative Discretionary Program, Transportation Alternatives, and Federal Transit Administration funding sources and associated projects that provide support for non-motorized transportation projects and programming that enhances air quality and encourages sustainable transportation options.

Performance Measure	State Target	
	2-Year	4-Year
CMAQ Traffic Congestion (Annual Hours of excessive delay per capita)	N/A	N/A
Percent of Non-SOV travel	N/A	N/A
CMAQ On-Road Mobile Source Emissions (Total Emission Reductions)		
Carbon Monoxide (CO)	>0.0 kg/day	>0.0 kg/day
Particulate Matter 10 (PM ₁₀)	>0.0 kg/day	>0.0 kg/day
Particulate Matter 2.5 (PM _{2.5})	N/A	N/A

Transit Asset Management

Transit Asset Management Performance targets and measures established for transit asset management (TAM) serve to provide safe, cost-effective, and reliable public transportation through a strategic and systematic process of operating, maintaining, and improving public transportation capital assets. The FTA has established four transit performance measures, three of which are applicable to MET Transit. Transit agencies are only required to establish targets for assets they have direct capital responsibility over. Thus, MET Transit was not required to establish targets for the infrastructure performance measure in their Transit Asset Management Plan (i.e. the percentage of track segments (by mode) that have

performance restrictions). The performance measures and targets established by MET Transit and supported by the MPO are shown in the table below:

Asset Category – Performance Measure	Asset Class	2024 Target	2025 Target	2026 Target	2027 Target	2028 Target
REVENUE VEHICLES						
Age - % of revenue vehicles within a particular asset class that have met or exceeded their minimum useful life	BU – Bus	11%	0%	0%	0%	0%
	CU – Cutaway Bus	59%	53%	0%	0%	0%
SERVICE VEHICLES						
Age - % of vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)	Trucks and other Rubber Tire Vehicles	100%	13%	25%	25%	25%
FACILITIES						
Condition - % of facilities with a condition rating below 3.0 on the FTA Transit Economic Requirements Model (TERM) Scale	Passenger Facilities	0%	0%	0%	0%	0%
	Administration and Maintenance	0%	0%	0%	0%	0%

Transit Safety Plan Targets

The Public Transportation Agency Safety Plan (PTASP) Final Rule (49 CFR Part 673) requires certain operators of public transportation systems that receive federal funds under FTA's Urbanized Area Formula Grants to develop safety plans that include the processes and procedures to implement Safety Management Systems (SMS). The plan must include safety performance targets regarding fatalities, injuries, safety events, and system reliability. The rule applies to all operators of public transportation systems that are recipients and sub-recipients of federal financial assistance under the Urbanized Area Formula Program (49 U.S.C. § 5307). MET Transit developed and established a Transit Agency Safety Plan with the following safety performance targets:

Safety Performance Targets for 2026	Fixed Route Service	Paratransit Service
Major Safety Events (Total)	2	0
Major Event Rate (per 100k VRM)	<0.25	0
Collision Rate (per 100k VRM)	<0.25	0
Pedestrian Collision Rate (per 100k VRM)	0	0
Vehicular Collision Rate (per 100k VRM)	<0.25	0
Fatalities (Total)	0	0
Fatality Rate (per 100k VRM)	0	0
Transit Worker Fatality Rate (per 100k VRM)	0	0
Injuries (Total)	2	0
Injury Rate (per 100k VRM)	<0.25	0
Transit Worker Injury Rate (per 100k VRM)	0	0
Assault on Transit Workers (Total)	0	0
Assault on Transit Workers Rate (per 100k VRM)	0	0
System Reliability (VRM/Failures)	30,000	50,000

Federal Transit Administration Projects

The Federal Transit Administration funded projects, including FTA Section 5339 grant projects, are intended to assure the continued efficient operation, maintenance and administration of the MET Transit system fleet and facilities, including meeting federal regulations such as the Americans with Disabilities Act (ADA). The operating grants are for the fiscal years of July 1, 2024, to June 30, 2028, and the Section 5339 grant projects will permit Bus and Bus Facilities projects in Fiscal Years 2024 through 2028.

The vehicle purchases for MET PLUS are projects to enable the City to continue providing the required specialized demand-responsive paratransit service for citizens who are unable to use the MET Transit System due to their disabling conditions. The projects to purchase vehicles for other entities will address some of the transportation needs of individuals with disabilities and senior populations.

Advancement of Projects

It is mutually agreed that the first two years of this program are the best estimate of the project phase that will be undertaken during the Biennial timeframe. Occasionally, projects advance through the design process faster than anticipated. An approved project may accelerate into the next logical phase providing that the funding source does not change from that which was initially identified in the TIP. Federal, State, and local governments have agreed that a TIP revision is not required in order to accelerate a specific project phase, so long as other planned work is not unduly delayed.

- The priorities with regard to the FTA Section 5307 projects in the Biennial Element are:
 - 1) Operating Assistance.
- The priorities with regard to the FTA Section 5310 projects in the Biennial Element are:
 - 1) Replacement vehicles for MET Special Transit and other local agencies.
- The priorities with regard to the FTA Section 5339 projects are:
 - 1) Assistance for bus/bus facilities

Annual Listing of Projects

Federal regulation (23 CFR §450.334) requires publication of an annual listing of projects for which Federal funds have been obligated in the TIP in the preceding year consistent with the categories identified in the TIP. The MPO will post this list to the Transportation Resource page of the City of Billings Website: https://billingsmt.gov/DocumentCenter/View/54291/10-1-2024TO9_30_2025BLGS

Understanding TIP Funding Tables

The TIP project funding tables consist of multiple components and are designed to best display integral information regarding the projects within the TIP. The image below identifies and explains each of the various components of the TIP project funding tables and can be used as a tool to understand the information being presented within the funding tables.

All construction projects included in the TIP will be completed in multiple phases (i.e. PE, RW, IC, and CN). Funding for each construction project is broken down by the costs of each specific phase. The table below provides a description of construction project phases and additional project phases the reader can expect to see within TIP funding tables.

Project Phase	Description
CN	Construction – Construction and/or reconstruction work performed by the agency or contractor to include construction engineering.
IC	Incidental Construction – ‘Safety net’ for unexpected construction expenditures
OT	Other – Additional programmatic expenditures including costs for education, and outreach
PE	Preliminary Engineering – Analysis and design work completed prior to project construction (the abbreviation EIS will be added if phase includes an environmental impact statement)
Purch.	Purchase – Procuring equipment, software, vehicles, or facilities
RW	Right of Way – Tasks associated with acquiring and preparing the right of way for a project (e.g. property acquisition and utility relocation)
Transit	Transit operations

Billings MPO Project List

PROJECT	UPN	SCOPE	COMMENTS	PERFORMANCE MEASURES
CMAQ				
Billings Bypass - Yellowstone River Bridge	4199-003	New construction of bridge over the Yellowstone River

Public Comment

The MPO will post the draft Transportation Improvement Program (TIP) to the Transportation Resource page of the City of Billings Website. Link to the page is: <https://www.billingsmt.gov/2336/Transportation-Resources> .

The MPO published a Public Hearing Notice in the Yellowstone County News on April 10 & April 17, 2026, noting that public comment will be received on the Transportation Improvement Plan at the Yellowstone County Planning Board Meeting scheduled for Tuesday, April 28, 2026.

Below is a list of the Public Meetings that allow for public review and comment on the Transportation Improvement Program. Each meeting minutes note the number of public attending and comments received from any public:

Technical Advisory Committee:	April 9, 2026
YC Planning Board:	April 28, 2026
YC Board of Commissioners:	May 12, 2026
Billings City Council:	April 27, 2026
Policy Coordinating Committee:	May 19, 2026 Attendance at Meeting: PCC Members, Staff, MDT Planning; Public Comment period

Public Participation Plan City of Billings MET Transit and the Billings MPO

The purpose of the City of Billings MET Transit Public Participation Plan is to ensure and improve access to MET's decision-making process for all members of the public including low-income, minority, and other disadvantaged populations. MET endeavors to provide opportunities for the public to assist and provide input on transit projects in regard to social, environmental, and economic impacts to the area's population.

The Public Participation Plan identifies methods for informing and involving the public in the decision-making process, including minority and limited-English proficiency (LEP) populations. Methods of informing the public include, but are not limited to, printed material, partner and community outreach, press releases, paid advertising, transit advertising, and the MET website and social media platforms. Methods of involving the public include, but are not limited to, public meetings, public hearings, surveys, Aviation and Transit Commission meetings, and multiple feedback options.

To download a copy of MET's updated (April 2025) Public Participation Plan, insert the link below in your browser

<https://www.billingsmt.gov/DocumentCenter/View/53562/2025-TITLE-VI-AND-PPP>

The Billings Metropolitan Planning Organization's (MPOs) [Public Participation Plan](#) (PPP) is intended to meet the Federal Highway Act of 1973 requirement to provide a cooperative, comprehensive, and continuing transportation planning and decision-making process. The MPO acts as a liaison between local governments, communities, residents, and the State and Federal Departments of Transportation (DOTs). The MPO currently operates under the U.S. DOT's IIJA (Infrastructure Investment and Jobs Act).

The Yellowstone County Planning Board (YCPB) is the designated MPO and oversees transportation planning for the Billings Urban Area. The area encompasses the City of Billings as well as a planning area extending approximately 4.5 miles outside the city limits.

The MPO is committed to the concept that planning is a community-based effort. In support of this, the MPO Public Participation Plan (PPP), defines a process that ensures reasonable opportunity for all interested parties to participate in the planning process.

This PPP serves two main purposes. The first is to provide the public with a guidebook for how and when they can participate in local and regional transportation planning and decision-making. Secondly, it outlines the policies and procedures for public engagement committed by the MPO. It is the intent of the MPO to consistently inform and engage the public throughout the regional planning process from the development of planning policies to the conceptual stages of planning projects through the adoption of formal planning documents.

Certification

The Billings Metropolitan Planning Organization for the Billings, Montana, urbanized area hereby certifies that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- I. 49 USC. Section 5303 and 23 USC. 134 and CFR 450.336;
- II. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- III. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- IV. Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- V. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- VI. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- VII. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- VIII. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- IX. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.
