

Burnet County Sommissioner Court
220 South Pierce
Burnet, Texas 78611
April 8, 2025

Dear Sirs:

Attached is a copy of a letter of concern that was forwarded to you May 26, 2025. I have received ~~no~~ acknowledgement that it was received by you.

Because of the numerous disasters affecting Central Texas including Burnet County, it is of most importance and should receive immediate consideration by your Court.

June 28, 2024 Commissioner James Luther, Jr. visited with me regarding his desire to annex Hoover Valley Fire Department. I disagreed because of a previous GYPSY SCAM that the other organization had involved against the best interests of Hoover Valley VFD.

During the visitation I voiced my concerns regarding the inability of emergency vehicles having access to the various populated areas of the Hoover Valley. The current disasters strongly show this is another important subject that your Court should address for the welfare and safety of your citizens and many visitors.

A respect from a most concerned citizen,

Nedrah S. Magnan

Dear Sirs:

Why does the County of Burnet not provide services for its Elderly and Disabled residents during public emergency?

Recently, my application was not accepted by the state of Texas Emergency Assistance Registry because Burnet County was not a participant. This STEAR program covers all of the State areas. Why has Burnet County chosen not to participate?

In addition, I contacted Derreck Machio, Burnet County Emergency Management Officer. He was most courteous but again, I was informed that Burnet County had no emergency services for its Elderly and Disabled citizens. Why are these Shut-ins being ignored?

At one time, There had been a ARE YOU OKEY (RUOK) TELEPHONE SERVICE THAT OPERATED IN Burnet County. A daily arranged time call was made to a participant. If the call was not answered, a representative would make a home visit to check if a Homebound was in need of further service. Why was that program discontinued?

Why is telephone line services and Emergency Alarm Button become disfunctional during an emergency situation. Are the communications connected? When was the last time public announcement services were checked for adequate performance?

A recent event on Ranch Road 2342, a Caretaker was denied access to an Elderly, Disabled, Live Alone patient. She requested that someone check on her patient as she was unable to reach her patient via telephone. No one (First Responder, Law Officer, Fireman, etc.) contacted the patient who was never informed to be prepared for evacuation. Is this the proper conduct towards its deserving residents?

Surely, a few tax dollars from the Burnet County Budget be available for protection and services for its needy Elderly and Disable Citizens.

Awaiting reply with acceptable action,

Nedrah S. Magnan
