Commissioner Wall -

I have contacted your office regarding my concerns related to a culvert that runs under CR343A and channels water run off from the West side of the road near the Shaffer Bend Recreation Area to a gully wash at the south end of my property at 625 CR 343A (Property ID: 41302, S7810 SMITHWICK MILLS EST. LOT 34 (3.646 ACS) 33B (.983 ACS) & LOT 48 (1.348 ACS)). Please see the attached map that shows the approximately location of the culvert under the road CR343A (shown in yellow) and the gully wash (shown by medium blue border on my property) near the corner of my lot next to my neighbors (Property ID: 41303).

The water run off appears to be causing soil erosion and could be back washing into the road substrate. Because of this, there is a concern for the public traversing CR343A to/from the south and has the potential to make the CR343A road impassable if it fails. Because of this concern for public safety and need to maintain public access to the road CR343A, I give permission for Precinct 3 County Commissioner Billy Wall to have access and work on my property for the benefit of the public in maintaining the culvert and the road CR343A.

Please contact me regarding any other information or any updates related to this request.

Thank you.

Jerri Paul

625 CR343A
