Commissioner Billy Wall,
bwall@burnetcountytexas.org

This memo confirms a conversation I had with Billy this morning. Billy is proposing installing several culverts on Burnet County Road 340. Specifically, he is proposing elevating the road approximately ½ mile south of the Double Heart entrance and installing culverts that will divert water from Paul King's property under the road and into an existing creek on our ranch.

I support this proposal and give Burnet County permission to make these changes in water flow on our property. Billy has worked hard to move this project forward and I'm glad to help.

Please let me know if you need additional documentation or more information.

Thanks.--
Lee Gaddis

Commissioner Billy Wall,

This memo confirms a conversation I had with Billy yesterday afternoon. Billy is proposing to improve County Road 340 along the south side of our ranch. This will involve elevating the road, installing a few culverts and resurfacing the road with chip seal. One of the culverts will direct water from the property to the south, owned by Lee Gaddis, to our property. This water will eventually drain into Hairston Creek.

I support this proposal and give Burnet County permission to make these changes in water flow on our property. We appreciate the improvements being made to CR 340.

Please let me know if you need additional documentation or more information.

Thanks,

Paul King
