

Thank you so much for this opportunity.

My name is Jared Dodd, and I am a resident of Burnet County.

I would like to first off, humbly request, that the delivery of this notice be included in the minutes of this meeting.

As our County elected officials, you have received a copy of The Omega Brief that has also been delivered to every Texas House Representative and State Senator, Governor, Lt. Governor and Attorney General.

This document contains irrefutable evidence of COVID pandemic criminal conspiracy and racketeering identified in patent filings by David Martin, Ph.D. Criminal charges are being filed for using the flawed PCR testing responsible for the gross overstatement of positive COVID cases.

We know the contents of this brief and are excited and grateful for the clarity this information brings to the COVID chaos that we have all suffered from in one form or another. We hope and pray this information aids you in your duty and oath to defend the U.S. Constitution and uphold our laws by using your power and authority to seek avenues to help prosecute guilty parties.

In addition, let me plead with you, seeing as you gentlemen, along with our wonderful sheriff, Calvin Boyd, are our primary defense against tyranny, that it is also our hope and prayer that you will not allow the tyranny which is happening in other places regarding unconstitutional mandates to come here to Burnet County.

My family is counting on your protection of our personal liberty.

Thank you again for your service and God bless you all.

Jared Dodd
361-902-7267
