RE: Donation of Framed Marble Falls Map Recreation Displays

Dear Hon. Janet Parker,

Kofile Technologies, Inc. is pleased to donate two framed map recreations of the Marble Falls Bridge over the Lake Marble Falls. These framed displays emphasize the important investment Burnet County has made to ensure the survival of these records.

Each recreated map is mounted on matte black board, cased in glass, and framed in a handsome dark wood. These may be wall-mounted in a visible, public area to maximize exposure, providing the citizens of Burnet County with an example of the significance of preserving and protecting these crucial government records.

A professional display of these maps will demonstrate Burnet County's commitment to ensuring the integrity of its permanent retention and historical records for future generations. These displays will serve as reminder of the importance of maintaining public records. Kofile is honored to donate these pieces to Burnet County in commemoration of this administration's conservation efforts.

Sincerely,
Catherine "Cathy" Drolet
Kofile Technologies
