Open-Front Capability in a Powerful Four-Post Lift

The HDSO 14P is an open-front four-post lift that features clear entry upfront, providing easy vehicle access. A generous 14,000-lb. lifting capacity and extended runways allow you to service a wide variety of vehicles, ranging from small cars to full-size trucks.

Open-front design

We engineered the HDSO 14P without a front cross bar, so operators can easily enter and exit from beneath the vehicle. Now the process of front-end adjustment becomes quick and trouble-free. This model is a must-have for busy alignment bays.

Patented, adjustable front outrigger tubes

For precise front-lift leveling, nothing beats our patented adjustable front outrigger tubes. The infinitely adjustable pitch compensates for excessive loads and unlevel floors.

Dependable design

Four heavy-duty, high-quality, stainless steel lifting cables and a single hydraulic cylinder mounted underneath the runway make this lift the most durable, maintenance-free lifting system on the market.

Oversize dual-hub cable sheaves

Huge 10.5" diameter cable sheaves within the runway and cross tubes work with massive 2.25" diameter sheave axles to improve cable wear and critical component lifespan. Dual-hub cable sheaves reduce stress, fatigue and wear. Naturally, this means a lot less money in service-related expenses down the road.

Multi-level locking positions

The HDSO 14P is equipped with multiple adjustable height locking positions for variable-height parking. A convenient push-button pneumatic safety lock control releases all four independent safety locks simultaneously.

Heavy-duty aircraft cable

Each lift is supplied with four high-quality 1/2" diameter, 6 x 25 stainless steel lifting cables rated at 14,400 lbs. each. The combined rating of these cables is more than 411% of the maximum lifting capacity of the entire lift! This aircraft-quality cable was specifically designed for lifting applications and provides a great balance between abrasion resistance and fatigue. And we make sure it looks tidy too—all lifting cables are fully enclosed within the lift structure itself.

Maintenance-free electric hydraulic

A maintenance-free electric hydraulic power system assures ultimate dependability.

Grease nipples

Grease nipples are located on every sheave and sheave axle to make lubrication maintenance a breeze.

Electric / hydraulic power system

We incorporate maintenance-free electric hydraulic power systems into each lift for ultimate dependability, and all controls are conveniently located within close reach.

Large base plates

12" x 10" base plates provide a solid foundation for the HDSO 14P.

Longer approach ramps

These approach ramps were designed a little longer to help when loading low ground-clearance vehicles. It's the little bit that makes a big difference.

Integrated design

Lifting cables, airlines, safety latches and sheaves are all fully enclosed.

Integrated hydraulic flow

An integrated hydraulic flow restrictor provides a controlled descent in the unlikely event of an unexpected hose rupture.

Automatic safety locks

Aircraft-quality stainless steel and aluminum pneumatic cylinders release all four locks simultaneously with the simple push of a button. The spring-loaded safety locks automatically engage continuously as the lift is raised. For added safety, a secondary lock system acts as a slack-cable device to engage in the unlikely event of cable failure.

Optional 7,000-lb. capacity rolling jacks

The optional 7,000-lb. capacity rolling bridge jack (the RB7000) lets operators perform full wheel and brake service to vehicles. They sit along the inner edges of each runway, engage the lift points and quickly lift the wheels off the ramps. These are essential tools for anyone who wants to get the most out of their four-post lift.

Best Car Lift Guide

Introduction to car lift types

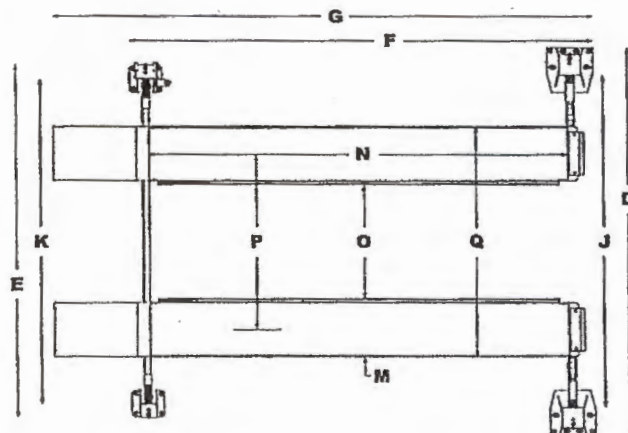

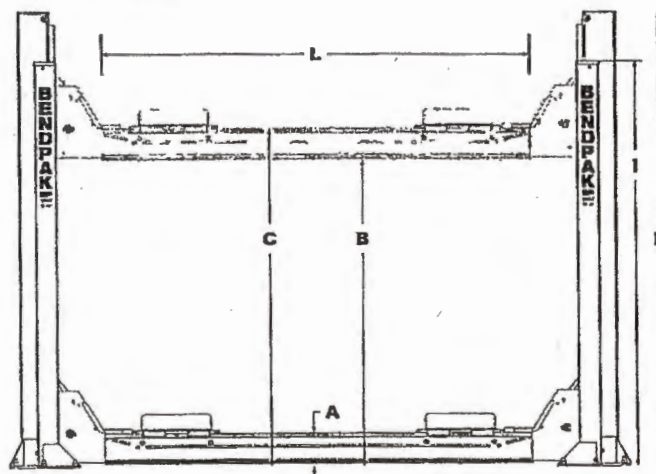

Things to Know

Before buying a car lift

Features & Specs

- 14,000-lb. lifting capacity
- CE Approved and Certified. Meets or exceeds the standards prescribed by European Standard EN 1493
- Huge cable sheaves reduce wear and tear
- Extremely convenient open-front design for easy access
- Extended runway length for servicing
- Longer approach ramps for low ground clearance vehicles
- Electric / hydraulic power system
- Runways include rail-kit for optional accessories
- Runways adjust for different tread widths
- Automatic leveling system with multiple auto-leveling locking positions
- Single hydraulic cylinder mounted underneath runway
- Fully enclosed lifting cables, safety locks, and sheaves
- Internal anti-sway slider blocks in each column
- Pneumatic push-button safety release
- Features heavy-duty 1/2" aircraft cable
- Safety locks enclosed in columns minimize pinch points
- Oversized sheave diameter reduces cable fatigue
- Rugged, self-lubricating cable sheaves
- Features 1-3/8" sheave axles

Capacity

Lifting Capacity*	14,000 lbs. (6,350 kg)
*Max Capacity / Front Axle	7,000 lbs. (3,175 kg)
*Max Capacity / Rear Axle	7,000 lbs. (3,175 kg)

Four post lift
Lift is well built. The only issue is the set up instructions. Not very clear in a lot of areas but figured things out

Estimate: #20230413-0021

Burnet County
220 S Pierce Street
Burnet, TX 78611

Attn: Steve Gandy

SUBJECT: Burnet County Jail - (2) Chiller Replacement/(2) CHW Pumps - BUDGET

Thank you for the opportunity to offer our Proposal for the above subject project. Our budget number includes the following items related to the installation of the HVAC & Electrical:

I. BID DOCUMENTS:

- RFP/Bid Instructions: Per customer rep via Brandt technician
- Drawings: Site survey
- Specifications: Match existing

II. SCOPE OF WORK:

1. Labor, material and equipment to replace existing 100-ton chiller with (2) new Trane air cooled scroll chiller with minimal HVAC piping and electrical components.
2. Replace existing CHW pumps – “like for like”
3. Demo and removal of existing equipment off site.
4. Rework and minimal modifications to HVAC and electrical systems for new unit.
5. Installation of heat tracing for new piping.
6. HVAC-DDC Building Automation Controls disconnect/reconnect only
7. HVAC equipment start-up, Commissioning, Warranty and Owner-training.
8. HVAC outdoor Insulation to match existing.
9. Permit and License Fees if required.

III. EXCLUSIONS:

1. Sales or Remodel Taxes.
2. Overtime or afterhours work.
3. HVAC Test & Balance.
4. Replacement or installation of new pumps.
5. HVAC-DDC Building Automation Controls Integration/Programming
6. Chemical Water Treatment for hydronic piping systems.
7. Flushing of hydronic piping systems.
8. Bid, Payment or Performance Bonds.

AUSTIN	DALLAS	FORT WORTH	HOUSTON	SAN ANTONIO	WACO
19001 N. Heatherwilde Blvd, Ste. 120 Pflugerville, TX 78660 512.491.9100 TACLA 30430C TECL 20109 M 41312	1728 Briercroft Court Carrollton, TX 75006 972.395.6000 TACLA 19981C TECL 20109 M 40211	2502 Gravel Drive Fort Worth, TX 76118 817.626.0033 TACLA 00060298C TECL 20109 M 40211	13810 Hollister Drive, Ste. 100 Houston, TX 77086 832.714.3200 TACLA 15221C TECL 20109 M 40245	6023 Corridor Parkway, Ste. 100 Schertz, TX 78154 210.599.6120 TACLA 18441C TECL 20109 M 41312	205 Schroeder Dr. Waco, TX 76710 254.772.1693 TACLA 26979C TECL 20109 M 40211

9. Payment application fees, if required for electronic submission.
10. Medical Testing or Training, Badging, Security, Background Checks or Parking Fees.
11. Mechanical, Electrical or Structural Engineering services.
12. BIM or 3D Modeling Coordination.
13. Maintenance, Warranty or repairs to existing equipment.
14. Repairs due to existing Code violations.
15. Relocation of furniture, equipment, dumpsters or personnel for access to work areas.
16. Installation of barricades or plastic sheeting for safety, noise or dust control.
17. Concrete patching, pour-back or grouting of cored holes or saw-cut trenches.
18. Patching, painting or touch-up of any floors, walls or ceilings.
19. Any added Structural support required for new HVAC equipment.
20. Temporary utilities or spot cooling/heating during construction.
21. Painting or priming of equipment, fixtures, ductwork or piping.
22. Asbestos and mold testing, removal or remediation.

IV. CLARIFICATIONS:

1. This budget proposal is based on a phased approach to have one chiller and pump operating at all times.
2. This replacement will require an electrical outage of existing systems. It is assumed the affected systems can be shut down for the duration of the electrical changeover as required.
3. Brandt assumes all isolation valves utilized are operational and in good working order.
4. This proposal is based unit selection determined by matching tonnage of existing unit.
5. Due to the current volatility in commodity material costs that underlies our pricing, Brandt's proposal will expire 30 days from the date above. After that period, Brandt's pricing is subject to adjustment to reflect any increase in commodity material costs at the time of acceptance.
6. Brandt's proposal is conditioned upon prompt award of the project contract, in sufficient time to allow approval of submittals and procurement of materials and equipment in order to meet the project schedule.
7. Brandt reserves the right to review and approve all contract conditions as a condition of this proposal offer. Brandt's proposal is an offer expressly conditioned upon the parties reaching mutually-agreeable contract terms, including but not limited to a waiver of or reasonable cap on liability for any consequential damages from any source. Any language in the contract documents that purports to exclude or supersede the conditions of this proposal is expressly rejected.
8. Brandt will promptly submit pricing for any changes, modifications, or additions to the scope of work set out in this proposal. Brandt will not be required to proceed with any changed/additional/modified work until it receives a signed change order at a mutually-agreed upon price. If Brandt is directed to proceed and time is of the essence, Brandt will only be required to perform the changed/additional/modified work upon receiving a signed "time and materials" work order. The cost and Brandt's fee for this T&M work may be billed during the billing period in which the work is performed and will be due and paid within 30 days. Brandt's proposal is expressly conditioned up on the acceptance of this provision and this provision is incorporated by reference into any applicable contract documents and supersedes any provision to the contrary in those contract documents.

V. SUMMARY PRICING: (Plus applicable tax)

- Base Bid – Total: (Scroll Chiller) **\$ 396,500**

Please do not hesitate to call if you need clarification or have any questions. This Estimate is valid for 30 days.

Sincerely,

JAKE AVANZATO · SERVICE ACCOUNT MANAGER
THE BRANDT COMPANIES, LLC

24/7 DISPATCH 512.491.9100 | M 512.364.9164

Weld up with roof only and 2 endwalls, you would be somewhere in the \$13-15,000 range for a weld up.
