Approving a $40,000 Contract for Flock Safety in March 2025 with no discussion and no explanation to the citizens of Burnet County about mass surveillance.
Approving a $27,000 Contract with Datafy in February 2026 for cell phone geofencing and demographics data collection during public events in Burnet County. Spying on people without their knowledge or consent.
Irresponsibly wasting tens of thousands of taxpayer dollars on a private law firm's legal "guidance" while the elected County Attorney is paid a salary and benefits to advise the Commissioners Court.

Raising FY 2027 taxes in the County while hard working taxpayers are having difficulties affording gas, groceries, and essentials for their families.
Then the elected civil servants will vote to give themselves raises during the budget workshop ?

Covering up issues with the March primary election.
Why ?
Refusing to let Burnet Citizens know about the issue of disgraced thug and former Judge Oakley's extortion letter demanding payment for his personal legal fees ($218,000 dollars). **Why ?**

The men on the Commissioner's Court don't seem to care that they are destroying any trust that the taxpayers and voters in Burnet County have in their local elected government.
A court that is led by an appointed corrupt former state bureaucrat who is driving the County into deeper debt.

These men are expected to be the leaders as representatives for the people at the county level.
Are these four commissioners representing the people of their precincts ?
Are they representing Burnet County Voters, Taxpayers, Citizens ?
Are the elected servants doing anything to actually serve the citizens of Burnet County ?

No transparency.
No due diligence.
No concern for their fiduciary responsibilities with how they handle the taxpayers money.

Over the last three years as some of the corruption in Burnet County has been exposed, the grifters seem to double down on their corruption. The good ole boy DNA seems to be hardwired into their brains.

Each Commissioner has a vote and the four Commissioner's could change the direction of this Court if they choose to start doing the right and honorable things.

Lies ?
Cover Ups ?
Corruption ?
Lazy and Corrupt Incompetence ?
Legalized Thievery ?

The Burnet County Commissioner's Court is requesting a 4% COLA for all employees, including themselves.
This budget takes about $3.8 million more in property tax than last year.
A third of that increase would be for the proposed 4% COLA raise.

I say **NO pay increases for the servants on the Commissioner's Court.**
No pay raise for the County Attorney.
All are bad employees. Mediocre performance. No representation for the people they serve.
I would propose **ten percent pay cuts** for the County Judge, all four County Commissioners, and the County Attorney.
The combined benefit packages for these six County officials is extravagant when compared to their poor job performance.
