

PUBLIC COMMENTS

July 20, 2026

Good afternoon, Commissioners, my name is Claire Nybro, voter, taxpayer, interested person.

On July 16, President Trump declassified intelligence proving China has compromised over 220 million American voter files. This critical information was deliberately suppressed from the public and from the President himself for roughly five to six years since the 2020 election cycle. We now have communications proving the Intelligence Community knowingly withheld this valuable intelligence from the President as part of a broader plot to remove him from office. The very next day, Secretary of Homeland Security Markwayne Mullin warned that foreign adversaries have access to the back end of our voting machines, can change voter registrations, and can alter votes. This is official acknowledgment at the highest levels.

Here in Burnet County, you — the Commissioners Court — hold the direct legal authority to choose our voting system. For the November election, one of the most consequential in our lifetime, that authority must be exercised with courage and wisdom.

We know there were irregularities in our own March primary that led to the resignation of Michael Evans. The latest DHS data exposes over **250,000 non-citizens** illegally registered to vote in just four states. Texas has flagged almost 114,000 illegal registrations. With more states still to review, this problem is far more pervasive than anyone truly appreciates.

When the system that translates the people's will into leadership becomes untrustworthy, the injury doesn't stop at the candidate. It lands on every citizen whose vote was supposed to carry real weight. Corrupting the ballot doesn't just change results — it breaks the chain of consent that makes self-government legitimate.

We have paper ballots. The time has come to return to the proven, transparent gold standard our republic was built on: **hand-counted paper ballots at the precinct level, conducted in public view with observers from every side.**

Commissioners, the question before you is simple: Will you continue risking our elections on vulnerable, insecure, & uncertified centralized tabulation systems, or will you lead Burnet County by choosing verifiable hand-count processes that the people can actually trust?

Restoring trust in our elections begins right here at the county level. The people of Burnet County are watching closely. We demand real integrity — no more excuses, no more delays, no more dragging of feet on machines we cannot trust. Let's restore that trust today, one honest, hand-counted ballot at a time.

Thank you.

PREVENTING ALIEN VOTING

NATIONAL SECURITY INVESTIGATIONS: The Department of Homeland Security has initiated multiple investigations related to allegations of non-citizen voting and registration. Review of the first set of public voter files from states that have not utilized the SAVE system revealed:

**OVER 250,000 NON-CITIZENS ARE ILLEGALLY REGISTERED TO VOTE
IN JUST THE FOUR STATES FOR WHICH PUBLIC DATA FILES HAVE BEEN REVIEWED.**

State election officials in California, Pennsylvania, New Jersey and Nevada have been notified of this serious threat to national security and DHS stands ready to support their efforts to identify and remove ineligible registrants. The investigation is expanding to include multiple additional states. In addition, DHS will support the Department of Justice's review of voter files obtained pursuant to their enforcement authority under the National Voter Registration Act of 1993 and the Help America Vote Act of 2002.

STATES THAT PROTECT FEDERAL ELECTIONS: Numerous proactive, conscientious state officials have successfully utilized free services offered by the Department of Homeland Security to assist election officials in identifying non-citizens who have registered and/or voted in their states.

In the short time that the enhanced SAVE system has been available to states, 10 have states processed their full voter lists. As of June 22, 2026, a total of 25 different states processed more than 68 million registration records through the SAVE system. DHS has enabled those states to identify over **400,000** deceased registrants and over **28,000** non-citizens who illegally registered to vote.

As demonstrated by the sample data to the right, these states are serious about ensuring that only US citizens vote in US elections. DHS applauds their efforts to prevent non-citizens from registering and to remove ineligible registrants who unlawfully register.

Proactive SAVE User States		
State	Deceased	Non-Citizen
Georgia	42,776	2,549
Ohio	59,774	769
Tennessee	37,850	1,009
Texas	111,573	2,296
North Carolina	34,622	1,599
Idaho	4,328	49
Alabama	33,165	465
Missouri	10,660	1,112
Louisiana	15,231	419
Kansas	10,197	449

Several other proactive state officials have also signed Memoranda of Agreement with USCIS to utilize the SAVE system and have processed portions of their state voter rolls. Unfortunately, due to the actions of the activist Judge Sparkle Sooknanan, many of the enhancements to this service of USCIS have been suspended pending appeal. As a result, US citizens are at risk of having their votes diluted by ineligible alien voters.

UNAMBIGUOUS CONTRAST: There is an undeniable pattern emerging as DHS begins to unravel the horrific damage done by the open border policies of the Biden administration. States that have adopted alien-first policies instead of American-first policies have a disproportionate number of non-citizens on their voter rolls.
