

In the March primary election 31.5% of Burnet County registered voters cast 12,500 votes with a little over 9,400 voting republican.

The Secretary Of States office fails to correct reporting issues with new T.E.A.M. software systems.

The appointed Judge just gets over the 50% and wins by 407 votes ?

The Burnet County Elections Administrator then resigns right after the primary.

The election is not verified due to discrepancies with the counts that are not reconciled.

Was all this the second phase of the coup ?

Things don't add up?

Early voting ballot totals don't reconcile ?

Numbers just don't add up ?

What is going on ?

Is this rigging the outcome of the election ?

Is this election fraud ?

Who benefits ?

Why have the voters in Burnet County not been informed about all this?

Why is this not the headline news story in the local papers ?

I think the voters and taxpayers in Burnet County should know that an appointed judge has wasted \$900,000 dollars of their money on electronic voting machines that can't be trusted.

The legally required reconciliations were never completed or posted.

There has been no investigation, no explanation, and no public awareness of these issues.

The size of these discrepancies is larger than the margin of victory in the County Judge race itself.

And now this Court is ready to approve the order of Election for the November mid-term elections and sweep all this under the rug ?

Is this the final phase of the coup ?

I object. I say no approval for the order on the election for midterms until an official investigation is completed, the issues are reconciled and the voters informed.

I am calling on this court to request an investigation into all the unreconciled issues related to the March primary election.

Understand that all the information regarding the issues from the March Primary election has now been put on the public record. If you vote yes to approve the order for the midterm elections in November you are willingly participating in the cover up of the March primary election issues.

This all smells worse than the beach during a red tide fish kill.
