Gila River Indian Community Grant Application
Grant Cycle 2021

21. Geographic area served

The City of Chandler and its automatic/mutual aid partners.

Gila River Indian Community Grant Application Grant Cycle 2021

Narrative

Please structure your proposal to provide the following information in the order indicated. Provide the narrative in paragraph form in the text field provided. Please be thorough but strive for brevity.

1. Briefly describe your organization's history, mission and goals.

The City of Chandler, Arizona, Fire Department is a progressive, internationally accredited organization with an ISO Class 1 rating and a distinguished history of service to the community. On June 22, 1937, the first meeting of the Chandler Fire Department (CFD) was held. Initially staffed by volunteers, CFD's first paid Fire Chief was hired in 1953. In 1975, CFD added advanced emergency medical care by training three firefighters as paramedics. Since that time, CFD has evolved into an internationally accredited agency that operates 11 fire stations, a regional training facility, a fire administration building, and a mechanical maintenance facility.

Presently, CFD provides fire, emergency medical, hazardous material, and technical rescue services to its residents and those of neighboring cities (under automatic and mutual aid agreements). In total, CFD responded to 26,371 emergency incidents in FY 19-20, 74% of which were medical in nature. Currently, there are 234 sworn and civilian employees within the organization. All station personnel are EMT certified, and 124 of them are paramedics. Additional certifications held by Chandler firefighters include Hazmat, technical rescue, wildland firefighting, child passenger safety technician, and bilingual specializations.

The Department's mission statement reads as follows:

Chandler Fire is:

- Responsive to the Needs of the Community
- Committed to Community Involvement
- Dedicated to Customer Service
- Proud of our Professionalism

2. To determine eligibility for this grant, if the applying organization is non-municipal or a non-profit 501c, please describe your relationship with Arizona municipalities including past and present support, whether through partnerships, collaborations, in-kind contributions, grants, tax-based funding or other. Describe the supporting municipality's role in this project. If the applying organization is a municipality or a municipal sub-division please enter the text "Not applicable" and go to item 3.

Not applicable

Gila River Indian Community Grant Application Grant Cycle 2021

3. Describe the proposed project and your plan to implement.

The City of Chandler Fire Department (CFD) is applying for a grant of \$42,971.74 from the Gila River Indian Community's State-Shared Revenue Program. This proposed project aims to obtain the equipment and software necessary to conduct virtual tactical fire operations training. Once purchased, CFD will install the equipment in an existing room at the Chandler Fire Regional training center to create a new virtual tactical simulation training room for use in the Department's quarterly training. The area will contain both new simulation and command/observation spaces.

The Chandler Fire Department partners with several fire departments throughout the region to conduct its quarterly training, including the Maricopa Fire Department, the Gila River Fire Department, and the Arizona Fire and Medical Authority. The requested equipment will allow the Chandler Fire Department and its regional training partners to provide new specialized virtual training for their company officers and incident commanders to practice their scene management abilities in simulated scenarios. These scenarios will include fires, EMS responses, hazardous materials spills, WMD incidents, natural disasters, roadway incidents, active threat scenarios, and industrial accidents. The simulation software requested also allows for creating custom-tailored scenarios for specific hazards and facilities unique to each community. Pictures from sites in the community can be uploaded to the simulation and augmented with realistic smoke, fire, vehicles, people, and other special effects to create an immersive training experience. The Chandler Fire Department believes that regular training with these simulations will allow Chandler Firefighters and their training partners to respond quicker and more effectively to a wide range of all-hazard incidents.

Due to the nature of the requested equipment, no additional site work or construction will be needed to install this equipment at the Chandler Public Safety Training Center. Once installed, the City of Chandler IT Department will maintain the equipment. The project equipment includes (4) 55" UHD displays mounted in a custom configuration, an 82" UHD display, a 3x2 VESA display consisting of (6) 24" monitors, an intercom system with belt packs and dual muff headphones, and a control center location with docking capabilities for five laptop computers. All additional mounting equipment, cabling, connectors, computer racks, wall plates, and other needed installation items are also included. This configuration will allow for up to five firefights to participate in the training at one time. It is estimated that each company officer and incident commander in the Chandler Fire Department and its regional training partners would have the opportunity to conduct virtual tactical fire operations training at least once a quarter.

Gila River Indian Community Grant Application Grant Cycle 2021

4. Describe how the proposed project satisfies one or more of the priority funding areas identified by the Gila River Indian Community.

The proposed project will satisfy the priority funding area of public safety by improving the quality of training provided to Chandler Fire captains and incident commanders, as well as that of its regional training partners. The requested equipment and software will enable the Chandler Fire Department to conduct virtual tactical fire operations training at its regional fire training center. This training will help develop and enhance the Department's knowledge, skills, and abilities to safely and efficiently manage a wide range of all-hazard incidents. Ultimately, this will result in more effective responses and a higher quality of service for Chandler residents.

5. Identify the needs/problems to be addressed, target population and number of people to be served by the project.

The City of Chandler is comprised of an estimated 266,821 citizens. The Chandler Fire Department's goal is to ensure that these citizens are receiving the best and most efficient emergency response possible. One of the primary ways that it accomplishes this is by providing high-quality training to its firefighters. The Department has recognized that the most effective way to train its company officers and incident commanders is to use simulated incidents. The requested equipment will allow the Chandler Fire Department to simulate a wide range of incident types tailored to the equipment that it uses and the community that it serves. The City of Chandler has several locations throughout the City that offer unique response challenges, such as the 10,000 employee Intel campus and large specialty chemical manufacturing sites. A primary benefit of this proposed equipment and software is that it can be customized so that the Department can train with real buildings and environments from the community, such as these challenging, high-risk locations. The Chandler Fire Department believes that regular training with these simulations will allow Chandler Firefighters to respond quicker and more effectively to a wide range of all-hazard incidents throughout the region. This improved response capability will be a direct benefit to all Chandler residents and the residents of its fire training partners.

Gila River Indian Community Grant Application Grant Cycle 2021

6. Define the project as a new or continuing program. Has GRIC previously funded this project?

This project is a new program and has not previously received any funding from the Gila River Indian Community. Should this grant request be awarded, it would be the first time that the Chandler Fire Regional Training Center would be able to offer large-scale virtual tactical fire operations training.

7. Provide a brief timeline including start and finish dates. Indicate if the timeline is flexible.

Should the Chandler Fire Department receive a grant award notification in October 2021, it will immediately purchase the materials and software required for this project. The purchase and delivery of these materials will likely occur within two months after the grant is awarded. Installation of the materials at the Chandler regional training center would then occur before the end of December 2021. The first virtual tactical fire operations training should then begin in January of 2022. However, this timeline is very flexible and can be adapted to meet the Gila River Indian Community's time requirements.

8. Identify other organizations, partners or funders participating in the project and their roles.

The Chandler Fire Department will provide the funding to cover the annual repair, maintenance, and replacement costs of the virtual tactical fire operations training equipment after the initial equipment purchase. Additionally, Chandler's regional training partners will also be utilizing this new software and equipment when they attend their quarterly training. The training partners include the Maricopa Fire Department, the Gila River Fire Department, and the Arizona Fire and Medical Authority.

9. Would you be able to implement the proposed plan if your organization received partial funding for this project?

The Chandler Fire Department would be able to implement a scaled-down version of the project with partial funding. Currently, the virtual tactical simulation training room will be able to accommodate five individuals training at once. This training capacity could be scaled back to allow for a lower number of concurrent participants. However, if this were to occur, CFD will not be able to meet its goal of providing each company officer and incident commander a chance to conduct virtual tactical fire operations training each quarter.

Gila River Indian Community Grant Application Grant Cycle 2021

10. Describe your plan for project financial sustainability beyond the grant period. If this is a program/project previously funded by the Gila River Indian Community describe efforts made towards the previously described sustainability plan.

The costs associated with the virtual tactical fire operations training equipment are primarily upfront. Once purchased, the equipment will be maintained and serviced by the City of Chandler IT Department. The Chandler Fire Department budget will absorb any additional repairs and maintenance costs along with any future recurring software service charges. These costs are expected to be minimal.

11. Describe your plan to document progress and results.

All required reports will be submitted according to the format and timetable specified by the Gila River Indian Community at the time of the award. CFD will keep physical and digital copies of all relevant grant documents through the grant period. All purchases made with grant funding will be tracked separately in the City of Chandler accounting system to ensure an accurate and complete recording of expenditures. Unit response metrics and incident outcomes will be measured and recorded by the Department throughout the grant period and the following fiscal years to determine what impact the virtual tactical fire operations training has on response effectiveness.

12. Indicate any application to and/or awards made by a tribe other than the Gila River Indian Community for state shared revenues for this and any other project for the past five (5) years. If this information is included in a separate attachment, please indicate that here.

The Chandler Fire Department has not received or applied to any awards made by tribes other than the Gila River Indian Community for state shared revenues over the past five years.

Project Budget Detail

Please provide a narrative description for each of the project budget items listed on the previous page. Include the dollar figure and how it was derived.

1. Incident Command Tactical Simulator Design, Hardware, and Installation - \$39,573.74 – This dollar figure was derived through extensive consultation with Spinitar, an audiovisual design/integration company. Spinitar has been vetted as an approved vendor for City of Chandler audiovisual projects and provided the design, equipment, and installation for the City of Chandler Emergency Operations Center. The quote provided includes all design, hardware, and installation cost for the virtual tactical simulations room, along with a one-year performance guarantee.

2. Incident Command Simulation Software - \$3,398.00 – This dollar figure was derived by quote directly from SimsUshare. SimsUshare is the premier fire simulation software in the industry. It allows for creating custom scenarios and events tailored to real-life environments and locations through photo upload. Realistic smoke, fire, vehicles, people and other effects can then be added to the simulation to create an immersive training experience. This software will be utilized to control the simulation environment.

TITLE:
Incident Command Tactical Simulator

SCOPE OF WORK:
Spinitar shall provide an audio visual system interface and control center for the Chandler Fire Tactical simulator. The system shall consist of wall-mounted displays for five operators within the space, as well as a control center location at the rear of the room for observation and control of the Sim.

Spinitar shall install four 55 inch displays , for two users on each side, and one 82 inch display at the center on the front wall. These displays shall be connected back to the new/provided equipment rack housing the OFE simulator laptop PCs. (Assumes the pc's are laptops for space savings in the rack)

The control console shall consist of an equipment rack adjacent to an owner furnished table for the Sim operator to use. A 3 x 2 desktop mount VESA display , accommodating six 24 inch HD displays shall be installed on the table and arranged in a format reflective of the seated positions in the room. The bottom center display shall be utilized by the Sim operator to have access to each of the five Sim laptops and utilize a KVM system to select which laptop to view/control via keyboard hotkeys for quick selection.

Also included is an intercom system with belt packs and dual muff headphones for each of the five Sim participants along with the main Sim control operator. It is a party line base system with push to talk capability. Wall plates shall be installed near each Sim users station on the wall for the intercom connection. The displays shall turn on and off based on signal presence and/or screen saver modes from the five Sim laptops.

Spinitar shall provide wiring from a wall plate at the Sim control center to each of the displays as well as the intercom. We shall require AC to each of the displays on the wall, and wall backing for the 82 inch display, provided by others.
