Chandler Municipal Airport Noise Report

**Meeting Date:
August 10, 2022**

Staff confirmed aircraft traffic were at or above normal maneuvering altitudes in the traffic pattern as verified through flight tracking software and air traffic control.

The complainant with concerns of increased aircraft traffic was provided information on the flight tracks for traffic patterns in relation to the residential area.

The complainant of the loud and fast-moving aircraft that overflowed the residence was advised it was a Federal Government Law Enforcement (CBP) helicopter that happened to land at CHD for fuel. The complainant indicated that this helicopter did not show up on the FlightRadar24 app and was concerned about the legitimacy of the information provided. Complainant advised that law enforcement and government aircraft generally don't appear on public web-based flight tracking so that the criminal elements can't see where the police aircraft are flying. The complainant stated that it "doesn't seem fair."
