# CITY OF CHANDLER
## CHANGE ORDER NO. 1
## DATE 5/31/2022

Change Order not valid until signed by both the City and the Contractor. Contractor's signature indicates agreement herewith, including any adjustments in the Contract Price or Contract Time.

Project Name: **Reclaimed Water Interconnect Facility - GMP 2**

Project No.: **WW1901.402**

User Dept.: Public Works & Utilities NTP Date: May 26, 2022

**TO:** **McCarthy Building Companies, Inc.** (CONTRACTOR) **6225 N. 24th St., Ste. 200, Phoenix AZ 85016** (Address)

**Contractor must make the following changes to this contract:** The project is for GMP-2 (Change Order No. 1) for the construction of the Reclaimed Water Interconnect Facility (RWIF), a membrane water treatment facility to be located at the Airport Water Reclamation Facility**.** Major components of the project will include construction of a raw water pump station, self-cleaning strainers, membrane basins, blower building, chemical feed facilities, and related interconnecting piping.

**OWNER NAME & DATE APPROVAL:** **John Pinkston, 5/25/2022**

Changes result in the following revised contract amount and time:

| | |
|---|---|
| **Original contract amount:** | **$5,392,377** |
| **Current contract amount, prior to this Change Order:** (incl. previous Change Orders) | **$5,392,377** |
| **Net change resulting from this Change Order:** (if over $50,000 from contract amount previously approved by Council, Council approval is required) | **$33,539,073** |
| **Revised contract amount, including this Change Order:** | **$38,931,450** |
| **Last contract amount approved by Council:** | **$5,392,377** |
| **Change Order % of last contract amount approved by Council:** (if over 10% of previous contract amount approved by Council, Council approval is required) | **622%** |

| | | | |
|---|---|---|---|
| **Contract time or completion date prior to this Change Order:** (incl. previous Change Orders) | 440 Days | or | _____ Date |
| **Net change resulting from this Change Order:** | 357 Days | | |
| **Revised contract time OR completion date:** | 797 Days | or | _____ Date |

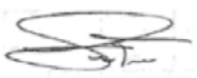
Phoenix AZ 85016

**Project:** Chandler Reclaimed Water Interconnect Facility
**Project Location:** McQueen Road and Queen Creek Road, Chandler, AZ

Dear Ben Whitlock

Alpha Geotechnical & Materials, Inc. (Alpha), is pleased to present our estimate for sampling and testing services for this project. This proposal is based upon a review of the Reclaimed Water Interconnect Facility Plans as part of a request for proposal dated 2/28/2022 by Ben Whitlock w/ McCarthy.

**PROJECT UNDERSTANDING**



The project consists of the interconnect facilities improvements for Chandler Reclaimed Water Facility in Chandler, AZ. Materials sampling and testing services will be required to determine compliance with the applicable specifications and jurisdictional regulations during construction.

Thank you for giving us the opportunity to be a part of your project team. Should you have any questions or require additional information, please do not hesitate to contact me. We have identified the budgeted tasks below, the task details including assumptions are identified in EXHIBIT A, Scope of Services. The Consulting Services Agreement is included in EXHIBIT B.

## Budget Summary for - Chandler Reclaimed Water Interconnect Facility

| Task Name | Cost |
|---|---|
| Mass Grading (MG) | $5,414.00 |
| Reclaimed Water (RW) | $3,592.00 |
| Commercial Structure (CS) | $15,599.00 |
| Streets & Street Related Work (ST) | $2,604.00 |
| Project Management (PM) | $3,076.00 |
| **Project total:** | $30,285.00 |

** All field tests have a two hour minimum charge on a portal to portal basis and Special Inspectors have a 3 hour minimum charge on a portal to portal basis. Time over the minimum will be rounded up to the nearest whole number. Overtime at 1.5 times the standard rate will be charged after 8 hours ,before 7:00 a.m. and after 5:00 p.m. and also on weekends and holidays. This is a unit rate proposal. Retest, show up and cancellation are not included and will be charged at our standard unit rate fees as listed above. The estimated total is listed for your convenience and may change with project schedules and with small concrete placements etc.

Aaron Tiemann

Project Manager

Exhibit A - Scope of Services
Exhibit B - Consulting Service Agreement

# EXHIBIT A
# Scope of Services

## Mass Grading (MG)

Alpha will complete nuclear density-moisture testing to verify that the building pad is constructed in accordance with the geotechnical engineer's recommendations. Alpha estimates this time will be spread over the number of trips identified in the cost estimate below. In addition to field testing, some laboratory testing will also be required and has been included in our estimate.

### Cost Estimate for - Mass Grading (MG)

| Description | Qty | Rate | Units | Total |
|---|---|---|---|---|
| Senior Field Technician | 55.00 | $60.00 | RtHr | $3,300.00 |
| Standard Proctor ASTM D698-C / AASHTO T99-D | 1.00 | $140.00 | EA | $140.00 |
| Plasticity Index (Wet Preparation) ASTM D4318 / AASHTO T89 & T90 & T146 | 1.00 | $160.00 | EA | $160.00 |
| Swell (Remolded Sample) ASTM D4546 | 3.00 | $148.00 | EA | $444.00 |
| Standard Proctor ASTM D698-A / AASHTO T99-A | 3.00 | $115.00 | EA | $345.00 |
| Gradation of soil or aggregate ASTM C136 & C117 / AASHTO T27 & T11 | 4.00 | $80.00 | EA | $320.00 |
| Plasticity Index (Dry Preparation) ASTM D4318 / AASHTO T89 & T90 | 3.00 | $65.00 | EA | $195.00 |
| Mileage Charge | 15.00 | $34.00 | Trip | $510.00 |
| | | | Total for Mass Grading (MG) | $5,414.00 |

## Reclaimed Water (RW)

Alpha will complete nuclear density-moisture testing to check for compliance with the project specificatoins. It is assumed Alpha technicians will be required onsite for mainline, structure backfill, and concrete sampling. In addition to field testing, some laboratory testing will also be required and has been included in our estimate.

### Cost Estimate for - Reclaimed Water (RW)

| Description | Qty | Rate | Units | Total |
|---|---|---|---|---|
| Field Tech (3) | 50.00 | $48.00 | RtHr | $2,400.00 |
| Compressive Strength of Concrete Specimens ASTM C39 | 24.00 | $18.00 | EA | $432.00 |
| Travel - Trip Charge | 20.00 | $38.00 | Trip | $760.00 |
| | | | Total for Reclaimed Water (RW) | $3,592.00 |

## Commercial Structure (CS)

Alpha will complete concrete/grout/material sampling to check for compliance with the project related specifications. Special inspections are excluded. It is estimated that all structural concrete will be poured in approximately 30 placements and all grout in-fills in approximately 5 placements. It is estimate the site wall footings will be poured in 3 placements and the site wall grout in 6 placements. Alpha estimates the total number of trips as identified in the cost estimate below. In addition to materials sampling, the associated required laboratory testing has been included in our estimate.

- Materials testing and special inspections are excluded for trash enclosures, pole bases, and concrete bollards, however may be added upon request.

## Cost Estimate for - Commercial Structure (CS)

| Description | Qty | Rate | Units | Total |
|---|---|---|---|---|
| Field Technician | 171.00 | $55.00 | RtHr | $9,405.00 |
| Compressive Strength of Grout Prisms ASTM C1019 | 44.00 | $19.00 | EA | $836.00 |
| Compressive Strength of Concrete Specimens ASTM C39 | 132.00 | $19.00 | EA | $2,508.00 |
| Mileage Charge | 75.00 | $38.00 | Trip | $2,850.00 |
| | | Total for Commercial Structure (CS) | | $15,599.00 |

## Streets & Street Related Work (ST)

Alpha will complete nuclear density-moisture testing on subgrade materials, collect concrete specimens for laboratory compressive strength testing, and collect samples of asphaltic concrete for compliance with jurisdictional and project specific requirements. Construction of the site civil improvement concrete will requrie 4 placements.

Alpha assumes any required paving operations will be completed in 1 pave day. It is assumed asphaltic concrete coring will not be required for this project. Laboratory testing will also be required to cover the necessary concrete and asphaltic concrete compliance testing. Alpha estimates the total number of trips as identified in the cost estimate below.

- It is assumed that moisture-density relationships for aggregate base materials will be needed.
- Nuclear density testing will be completed during paving operations for informational purposes only.
- Alpha is not responsible for the development of a roll pattern, but will provide data to assist the contractor.
- MCDOT jurisdictional requirements (EOR duties) do not apply to this project.

## Cost Estimate for - Streets & Street Related Work (ST)

| Description | Qty | Rate | Units | Total |
|---|---|---|---|---|
| Field Technician | 23.00 | $55.00 | RtHr | $1,265.00 |
| Rice or Maximum Theoretical Specific Gravity ASTM D2041 / AASHTO T209 / Az 417c | 1.00 | $148.00 | EA | $148.00 |
| Gradation of soil or aggregate ASTM C136 & C117 / AASHTO T27 & T11 | 1.00 | $80.00 | EA | $80.00 |
| Compressive Strength of Concrete Specimens ASTM C39 | 16.00 | $19.00 | EA | $304.00 |
| Plasticity Index (Wet Preparation) ASTM D4318 / AASHTO T89 & T90 & T146 | 1.00 | $160.00 | EA | $160.00 |
| Standard Proctor ASTM D698-C / AASHTO T99-D | 1.00 | $140.00 | EA | $140.00 |
| Oil Content by Ignition Method ASTM D6307 / T308A | 1.00 | $105.00 | EA | $105.00 |
| Gradation of extracted aggregate ASTM D6307 / AASHTO T30 | 1.00 | $60.00 | EA | $60.00 |
| Mileage Charge | 9.00 | $38.00 | Trip | $342.00 |
| | | Total for Streets & Street Related Work (ST) | | $2,604.00 |

## Project Management (PM)

Alpha estimates some project management and minor consultation will be necessary over the course of the project. Some of these actives may include assistance with submittal reviews, attendance to a pre-construction meeting, attendance to pre-activity meetings, test schedule development and report development.

- Weekly or monthly budget updates are not included in this fee.
- Project Administration Fee: Alpha's project administration fee covers dispatching, test data management and test data review.

## Cost Estimate for - Project Management (PM)

| Description | Qty | Rate | Units | Total |
|---|---|---|---|---|
| Professional Engineer, PE stamp and Review for Final Report | 6.00 | $120.00 | RtHr | $720.00 |
| Project Manager | 12.00 | $90.00 | RtHr | $1,080.00 |
| Administrative Assistant | 24.00 | $50.00 | RtHr | $1,200.00 |
| Mileage Charge | 2.00 | $38.00 | Trip | $76.00 |
| | | Total for Project Management (PM) | | $3,076.00 |

**EXHIBIT B**

**Consulting Services Agreement**

This CONSULTING SERVICES AGREEMENT is made by and between: -

McCarthy Building Companies, Inc.

hereinafter referred to as CLIENT, and Alpha Geotechnical & Materials, Inc., hereinafter called Alpha.

The CONSULTING SERVICES AGREEMENT between the parties consists of these terms and conditions, the attached PROPOSAL identified as Alpha Proposal Number:

22-CC-12952 dated: 3/23/2022

and any exhibits or attachments noted in the PROPOSAL. Together, these elements will constitute the entire AGREEMENT superseding any and all prior negotiations, correspondence, or agreements either written or oral. Any changes to this CONSULTING SERVICES AGREEMENT must be mutually agreed to in writing.

**SECTION 1 - SCOPE OF WORK**

Alpha shall perform pursuant to the terms and conditions of this CONSULTING SERVICES AGREEMENT the services as set forth in the accompanying PROPOSAL.

**SECTION 2 - PERMITS & UTILITIES**

**1**. Unless otherwise stated in the PROPOSAL, CLIENT shall apply for and obtain all required permits and licenses. CLIENT shall make all necessary arrangements for right of entry to provide Alpha access to the site for all equipment and personnel at no charge to Alpha.

**2.** While Alpha will take all reasonable precautions to minimize any damage to the property, CLIENT agrees to hold Alpha harmless for any damages to structures or any damage required for right of entry, in the absence of willful and gross misconduct by Alpha.

**SECTION 3 - SAMPLES**

Samples collected during this work will be retained for approximately 30 days after the sample is collected and then disposed.

**SECTION 4 - INVOICES**

Alpha will submit monthly progress invoices to CLIENT. Payment is due upon presentation of invoice and is past due thirty (30) days from invoice date. CLIENT agrees to pay a finance charge of one and percent (1 1/2%) per month on past due invoices. Alpha may require a retainer prior to start of work. Alpha will apply the retainer, if applicable, to the final invoice.

**SECTION 5 - OWNERSHIP OF DOCUMENTS**

**1.** All reports, field data, field notes, calculations, estimates and other documents prepared by Alpha, as instruments of service, shall remain the property of Alpha.

**2.** Alpha will retain all pertinent records relating to the services performed for a period of five years following submission of the report, during which period the records will be made available to CLIENT at reasonable times.

**SECTION 6 - DISPUTES**

In an effort to resolve any conflicts that arise during the design or construction of the Project or following the completion of the Project, the CLIENT and Alpha agree that all disputes arising between them out of or relating to this Agreement or the Project shall be submitted to mediation unless the parties mutually agree otherwise.

**SECTION 7 - STANDARD OF CARE & NOTIFICATION**

**1.** Services performed by Alpha under this CONSULTING SERVICES AGREEMENT will be conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the profession currently practicing under similar conditions. No warranty is expressed or implied.

**2.** Alpha agrees to notify CLIENT when unanticipated hazardous materials or suspected hazardous materials are encountered. CLIENT agrees to make any disclosures required by law to the appropriate governing agencies.

**3**. Alpha will be responsible for data, interpretations, and recommendations, but shall not be responsible for the interpretation by others of the information developed.

**SECTION 8 - LIMITATION OF LIABILITY**

**1.** CLIENT agrees to limit Alpha's liability to CLIENT and all third parties arising from Alpha's negligent acts, errors or omissions, such that the total aggregate liability of Alpha to all those named shall not exceed our fees for the project or $50,000, whichever is less. Neither CLIENT nor any third parties assume any liability for damages to others, which may arise solely on account of Alpha's negligent acts, errors or omissions.

**2.** As part of the consideration Alpha requires for provision of the Services indicated herein, CLIENT agrees that any claim for damages filed against Alpha by CLIENT of any contractor or subcontractor hired directly or indirectly by CLIENT will be filed solely against Alpha or its successors or assigns and that no individual person shall be made personally liable or liable for damages, in whole or in part.

**SECTION 9 - INSURANCE**

Alpha represents and warrants that it and its agents, staff and consultants employed by it are protected by worker's compensation insurance and that Alpha has such coverage under public liability and property damage insurance policies which Alpha deems to be adequate. Certificates for all such policies of insurance will be provided to CLIENT, if requested. Within the limits and conditions of such insurance, Alpha agrees to indemnify and hold CLIENT harmless from and against any loss, damage, or liability arising from any negligent acts by Alpha, it agents, staff, and consultants employed by it. Alpha shall not be responsible for any loss, damage or liability arising from any acts by

CLIENT, its agents, staff, and other consultants employed by it.

**SECTION 10 - TERMINATION**

**1.** This CONSULTING SERVICES AGREEMENT may be terminated by either party upon seven (7) days written notice in the event of substantial failure by the other party to perform in accordance with the terms hereof, or in the event of the parties' failure to agree upon an adjustment to this CONSULTING SERVICES AGREEMENT in accordance with Section 6. Such termination shall not be effective if that substantial failure has been remedied before expiration of the period specified in the written notice. In the event of termination, Alpha shall be paid for services performed to the termination notice date plus reasonable termination expenses.

**2.** In the event of termination or suspension for more than three (3) months prior to completion of all reports contemplated by this CONSULTING SERVICES AGREEMENT, Alpha may complete such analyses and records as are necessary to complete ALPHA's Project files and may also complete a report on the services performed to the date of notice of termination or suspension. The expenses of termination or suspension shall include all direct costs of ALPHA in completing such analyses, records and reports.

**SECTION 11 - ENTIRE AGREEMENT**

This CONSULTING SERVICES AGREEMENT along with the exhibits and/or proposals appended hereto constitute the entire CONSULTING SERVICES AGREEMENT of the parties with respect to the subject matter hereof. The Parties have read the foregoing, understand completely the terms and conditions, and willingly enter into this CONSULTING SERVICES AGREEMENT which will become effective on the date signed by the CLIENT below.

March 28, 2022
Proposal No. 12PHX02-04445

Ms. Nicole Azuri

McCarthy Building Companies
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

Subject: Proposal to Perform Construction Materials Testing and Special Inspection Services
Chandler Reclaimed Water Interconnect Facility
955 E. Queen Creek Rd.
Chandler, Arizona 85286

Dear Ms. Azuri:

We are pleased to present this proposal to provide materials testing and special inspection services at the subject site. In preparation of this proposal, we have reviewed the plans prepared by Wilson Engineers dated February 28, 2022. We understand that this project in includes the addition of a new raw water pump station, self-cleaning strainers, membrane filtration system blower facility, membrane filtration system chemical facility, ACH chemical facility, and membrane electrical building. Additional improvements will include concrete flatwork, underground utilities, and asphalt paving. This proposal was prepared without the benefit of a construction schedule and is based on our assumptions as to the needed materials testing services, and our experience with similar projects.

## SCOPE OF SERVICES

Our scope of services will include the following:

- Materials observation, testing, and sampling during the placement of soil, aggregate, concrete, masonry, and asphalt.
- Special inspection observation and testing of reinforced concrete, structural masonry, welding, high strength bolting, post-installed anchors, shallow foundation, and foundation bearing soils.
- Laboratory testing of soil, aggregate, concrete and asphalt.
- Data compilation, analysis, and processing, as well as report review services of laboratory and field test reports.

## ASSUMPTIONS

We have made the following assumptions:

- Asphaltic Concrete cores will not be required but can be added as a separate service at an additional price at the request of the contractor.

- Our services will be scheduled and coordinated by the Project Inspector or Construction Manager on an as-needed basis.

- Ninyo and Moore did not have the benefit of having a work schedule when preparing this proposal. Upon availability of a construction schedule, Ninyo & Moore will be allowed to review the schedule to determine if the estimated quantities noted on the attached Table 1 are sufficient to meet the needs of the project.

## ESTIMATED FEE

We propose to provide our services on a time-and-materials basis in accordance with the attached Schedule of Fees. We estimate the fee for our services to be approximately $127,800 (One Hundred and Twenty-Seven Thousand and Eight Hundred Dollars). A breakdown of our fees is presented in the attached Table 1.

To authorize our services, please sign and return the attached Work Authorization and Agreement.

We look forward to working with you.

Respectfully submitted,
**NINYO & MOORE**

Rafael Ramirez
Project Manager

Steven T. Lorenzo
Principal/Director of Business Development

RR/STL/tlp

# Schedule of Fees

## Hourly Charges for Personnel

### Professional Staff

| | |
|---|---|
| Principal Engineer/Geologist/Environmental Scientist/Certified Industrial Hygienist | $ 136 |
| Senior Engineer/Geologist/Environmental Scientist | $ 115 |
| Senior Project Engineer/Geologist/Environmental Scientist | $ 102 |
| Project Engineer/Geologist/Environmental Scientist | $ 96 |
| Senior Staff Engineer/Geologist/Environmental Scientist | $ 90 |
| Staff Engineer/Geologist/Environmental Scientist | $ 80 |
| GIS Analyst | $ 84 |
| Technical Illustrator/CAD Operator | $ 48 |

### Field Staff

| | |
|---|---|
| Certified Asbestos/Lead Technician | $ 102 |
| Field Operations Manager | $ 74 |
| Nondestructive Examination Technician (UT, MT, LP) | $ 79 |
| Supervisory Technician | $ 68 |
| Special Inspector (Concrete, Masonry, Structural Steel, Welding, and Fireproofing) | $ 68 |
| Senior Technician | $ 54 |
| Technician | $ 50 |

### Administrative Staff

| | |
|---|---|
| Geotechnical/Environmental/Laboratory Assistant | $ 43 |
| Information Specialist | $ 43 |
| Data Processor | $ 38 |

## Other Charges

| | |
|---|---|
| Concrete Coring Equipment (includes technician) | $ 190/hr |
| Anchor Load Test Equipment (includes technician) | $ 190/hr |
| GPR Equipment | $ 180/hr |
| Inclinometer | $ 100/hr |
| Hand Auger Equipment | $ 80/hr |
| Rebar Locator (Pachometer) | $ 25/hr |
| Vapor Emission Kit | $ 65/kit |
| Nuclear Density Gauge | $ 12/hr |
| X-Ray Fluorescence | $ 70/hr |
| PID/FID | $ 25/hr |
| Air Sampling Pump | $ 10/hr |
| Field Vehicle | $ 10/hr |
| Expert Witness Testimony | $ 450/hr |
| Direct Expenses | Cost plus 15 % |

Special equipment charges will be provided upon request.

## Notes

For field and laboratory technicians and special inspectors, overtime rates at 1.5 times the regular rates will be charged for work performed in excess of 8 hours in one day Monday through Friday and all day on Saturday. Rates at twice the regular rates will be charged for all work in excess of 12 hours in one day, all day Sunday and on holidays.

Field technician and special inspection hours are charged at a 4-hour minimum, and 8-hour minimum for hours exceeding 4 hours.

Invoices are payable upon receipt. A service charge of 1.5 percent per month may be charged on accounts not paid within 30 days.

The terms and conditions are included in Ninyo & Moore's Work Authorization and Agreement form.

# Schedule of Fees for Laboratory Testing

## SOILS

| | |
|---|---|
| Atterberg Limits, D 4318, T 89, T90 | $ 90 |
| California Bearing Ratio (CBR), D 1883 | $ 450 |
| Chloride and Sulfate Content, ARIZ 733, 736 | $ 100 |
| Clay Expansion, FHA Swell | $ 110 |
| Consolidation, D 2435, T 216-94 | $ 250 |
| Crumb Test Dispersion Test, D 4647 | $ 60 |
| Direct Shear, D 3080. T236 | $ 350 |
| Expansion Index, D 4829, UBC 18-2 | $ 120 |
| Expansion Potential (Method A), D 4546 | $ 110 |
| Hydraulic Conductivity, D 5084 | $ 300 |
| Hydrometer Analysis, D 7928, T 88-93 | $ 200 |
| Double Hydrometer Analysis, D 4221, T 88 | $ 400 |
| Lime Determination, pH Method, D 62765 | $ 210 |
| Standard Proctor Density, D 698 | $ 175 |
| Standard Proctor Density Treated Soils, D 698 | $ 195 |
| Modified Proctor Density Treated Soils, D 1557, T 180-93, T 99-94 | $ 205 |
| Miller Box Resistivity | $ 60 |
| Moisture, Ash, & Organic Matter of Peat/Organic Soils | $ 90 |
| Moisture Only, D 2216, T 265 | $ 25 |
| Moisture and Density, D 2937 | $ 35 |
| Permeability, CH, D 2434, T 215 | $ 220 |
| pH and Resistivity, ARIZ 236 c | $ 100 |
| Pinhole Dispersion Test, D 4647 | $ 245 |
| R-value, D 2844, T 190 | $ 250 |
| Sand Equivalent, D 2419, T 176 | $ 90 |
| Sieve Analysis, D 6913 | $ 55 |
| Sieve Analysis, C-136 (includes 200 wash), D 6913, D 1140 | $ 110 |
| Solubility | $ 80 |
| Specific Gravity, D 854, T 100-93 | $ 85 |
| Sulfate & Chloride Content | $ 90 |
| Swell Test, D 4546 | $ 290 |
| Thermal Resistivity (ASTM 5334, IEEE 442) | $ 800 |
| Triaxial Shear, U.U., D 2850 per point | $ 160 |
| Triaxial Shear, C.U., w/pore pressure, D 4767, T 2297 per pt | $ 315 |
| Triaxial Shear, C.D, D 4767, T 297 per pt | $ 375 |
| Unconfined Compression, D 2166, T 208 | $ 175 |

## MASONRY

| | |
|---|---|
| Brick Absorption, C 67 | $ 65 |
| Brick Compression, C 67 | $ 30 |
| Brick Moisture, C 67 | $ 30 |
| CMU Block Compression Test, 8x8x16, C 140 | $ 75 |
| CMU Block Moisture Content, C 140 | $ 70 |
| Core Compression | $ 35 |
| Concrete Block Linear Shrinkage, C 426 | $ 150 |
| Grout Prisms Compressive Strength, C 1019 | $ 40 |
| Masonry Grout, 4x4x8 prism compression, UBC 21-18 | $ 22 |
| Masonry Mortar, 2x4 cylinder compression, UBC 21-16 | $ 22 |
| Masonry Prism, half size, compression, UBC 21-17 | $ 120 |
| Mortar Cubes Compressive Strength, C 109 | $ 20 |

## REINFORCING AND STRUCTURAL STEEL

| | |
|---|---|
| Chemical Analysis, A-36, A615 | $ 125 |
| Fireproofing Density Test, UBC 7-6 | $ 50 |
| Hardness Test, Rockwell, A-370 | $ 40 |
| High Strength Bolt, Nut & Washer Conformance, set, A-325 | $ 150 |
| Mechanically Spliced Reinforcing Tensile Test, ACI | $ 80 |
| Pre-Stress Strand (7 wire), A 416 | $ 150 |
| Reinforcing Tensile or Bend up to No. 11, A 615 & A 706 | $ 85 |
| Structural Steel Tensile Test: Up to 200,000 lbs., A 370 | $ 100 |
| Welded Reinforcing Tensile Test: Up to No. 11 bars, ACI | $ 80 |

## CONCRETE

| | |
|---|---|
| Concrete Core Absorption ASTM C 497 Method A | $ 85 |
| Concrete Core Compressive Strength, C 42 , T 24-93 | $ 90 |
| Concrete Coring Minimum Charge | $ 300 |
| Concrete Laboratory Mix Verification, excluding cylinders | $ 300 |
| Concrete Mix Design | $ 2,000 |
| Compression Tests, 6x12 Cylinder, C 39, T 22-92 | $ 22 |
| Drying Shrinkage, C 157 | $ 300 |
| Flexural Test, C 78 | $ 80 |
| Gunite/Shotcrete, Panels, 3 cut cores per panel and test, ACI | $ 190 |
| Lightweight Concrete Fill Compression, C 495 | $ 40 |
| Measurement of Concrete Cores, ASTM C 174 | $ 20 |
| Rapid Chloride Permeability, C 1202 | $ 425 |
| Splitting Tensile Strength, C 496 | $ 95 |
| Time of Setting of Cement by Vicat Needle, C 191 | $ 250 |

## ASPHALT

| | |
|---|---|
| Asphalt Mix Design Review | $ 400 |
| Asphalt Mix Design, 5 points, Tex | $ 1,500 |
| Asphalt Content/Gradation (Ignition Oven), T 308, D 6307 | $ 200 |
| Bulk Density Lab Molded Samples, Tex 207F (per set) | $ 50 |
| Bulk Specific Gravity per specimen (non-absorptive), D 2726 | $ 25 |
| Bulk Specific Gravity per specimen (coated), D 1188 | $ 45 |
| Compressive Strength of Hot Mix Asphalt, T 167 | $ 275 |
| Extraction, % Asphalt, including Gradation, D 2172, T 164-94 T 30-93, Tex 210F | $ 225 |
| Hveem Stability and Unit Weight CTM or ASTM, CT 366 | $ 200 |
| Hveem Stability, Tex 208F (per set) | $ 90 |
| Marshall Mix Design, Flow and Unit Weight, (set of 3) T 245-94 | $ 215 |
| Marshall Mix Design | $ 3,500 |
| Maximum Theoretical Unit Weight, D 2041, CT 309, Tex 227F | $ 125 |
| Molding Specimens, Tex 206F (per set) | $ 55 |
| Tensile Strength Ratio D 4867, T283 | $ 350 |
| SuperPave Mix Design | $ 4,000 |

## AGGREGATES

| | |
|---|---|
| Absorption, Coarse, C 127 | $ 50 |
| Absorption, Fine, C 128 | $ 75 |
| Alkali Reactivity, C 1260 | $ 750 |
| Alkali-Silica Reactivity, C 1567 | $ 750 |
| Clay Lumps and Friable Particles, C 142 | $ 95 |
| Fractured Faces, NDOT, T 2303, ARIZ 212e | $ 140 |
| Los Angeles Abrasion, C 131 or C 535 | $ 180 |
| Moisture, C 566, T 255-92 | $ 25 |
| Mortar make properties of fine aggregate, C 87 | $ 300 |
| Organic Impurities, C 40 | $ 50 |
| Sand Equivalent, D 2419, T 176 | $ 85 |
| Sieve Analysis, Coarse Aggregate, C 136 | $ 110 |
| Sieve Analysis, Fine Aggregate (included wash), C 136 | $ 110 |
| Sodium Sulfate Soundness (per size fraction), C 88 | $ 240 |
| Specific Gravity, Coarse, C 127 | $ 125 |
| Specific Gravity, Fine, C 128 | $ 125 |
| Unit Weight C 29, T 19 | $ 50 |

Special preparation of standard test specimens will be charged at the technician's hourly rate.
Ninyo & Moore is accredited to perform the AASHTO equivalent of many ASTM test procedures.

# BID PROPOSAL

Date 03/15/2022

Bid Proposal of * Lemme Engineering Inc. DBA Lemme Assocaites AZ (hereinafter called "Bidder")

a ** Coporation organized and existing under the laws of the State of Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: #1.

BASE BID:

The Bidder agrees to perform all **construction staking as clarified by attached exhibit "A"** (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. _____, as described in the Contract Documents, for the Lump Sum of **thirty-nine thousand two hundred dollars and zero cents** DOLLARS ($**39,200.00**).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $_____ |
| Membrane Facility/Strainer | $_____ |
| Chemical Facility | $_____ |
| Blower Building | $_____ |
| Electrical Building | $_____ |
| Site Work | $**39,200.00** |
| Performance & Payment Bond Cost *(If Applicable)* | $_____ |
| Total Subcontract Amount | $**39,200.00** |

The name of the proposed Bonding Company is **N/A**

Bond rate _____%

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $**N/A**.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 0.0%.

Position: _____ Rate: _____.

Equipment: _____ Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☒ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | (initials) |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | (initials) |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | (initials) |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | (initials) |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | (initials) |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | (initials) |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | (initials) |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | (initials) |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | (initials) |
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | (initials) |

| | |
|---|---|
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | (initials) |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

Phone: (480) 417-9506 Fax: _____

The property upon which the services hereinafter described are to be performed is located at:

Chandler Reclaimed Water Interconnect Facility - GMP 2 - Chandler, AZ 85286

Assessor's Parcel No. _____ ("the Property"). Sec _____ T _____ R_____ ☒AZ ☐CA

**A. CLIENT AND CONSULTANT AGREE AS FOLLOWS:**
Client agrees to engage Consultant according to the terms of this agreement ("the Agreement").

**1. Scope:** Consultant agrees to perform the services set forth on Exhibit "A" attached hereto and incorporated herein by this reference ("Services").

**2. Compensation:** Client agrees to compensate Consultant for its Services in the amount of $ 39,200.00 **OR** according to the schedule of payments if attached hereto as Exhibit "B" and incorporated herein by this reference ("Schedule"). Consultant reserves the right to increase the fees set forth in Exhibit "B" at reasonable intervals. **Endorsements to insurance certificates, requested by client, that carry fees will be additional to the contract.**

**3. Documentation:** Client agrees to provide Consultant with any and all documents necessary to identify the ownership, location and condition of the Property, including, but not limited to, deeds, maps, title information, and permits; and to obtain for Consultant the authorization of the owner to enter upon the Property for the purpose of conducting Consultant's Services thereon.

**4. Limitation of Liability:** In recognition of the relative risks and benefits of the Project to both the Client and the Consultant, the risks have been allocated such that the Client agrees, to the fullest extent permitted by law, to limit the liability of the Consultant and Consultants officers, employees, owners and subconsultants for any and all claims, losses, costs, damages of any nature whatsoever or claims expenses from any cause or causes, including attorneys' fees and costs and expert-witness fees and costs, so that the total aggregate liability of the Consultant and Consultants officers, directors, partners, employees, shareholders, owners and subconsultants shall not exceed the Consultant's total fee for services rendered on this Project. It is intended that this limitation apply to any and all liability or cause of action however alleged or arising, unless otherwise prohibited by law.

IN WITNESS WHEREOF, the parties hereby execute this Agreement upon the terms and conditions stated above and on the date first above written.

## DESCRIPTION OF SERVICES:

### CONSTRUCTION STAKING

**BID ITEMS INCLUDE:** ONE set of stakes per structure or activity, providing line and grade, defined as an offset to centerline or edge of structure and reference benchmark elevation.

**SITE WORK AND GRADING**

- ☒ ROUGH grade entire site including retention basins
- ☒ FINISH grade entire site including retention basins

**PARKING LOT/ROADWAY**

- ☒ Rough Subgrade 50 foot grid
- ☐ Bluetop Subgrade 50 foot grid
- ☒ Bluetop ABC at 25 foot grid/stations
- ☐ Culverts, Box Culverts located and graded
- ☒ Curb and Gutters, Islands, Trash Enclosures

**UTILITIES**

- ☐ Storm sewer staking and control 50 'Stations
- ☒ San. sewer staking and control 25 'Stations
- ☒ Water line staking and control 50 'Stations
- ☐ Drywell and catch basin locations
- ☐ Electric line staking - centerline with offsets
- ☐ Light pedestals located and graded

**BUILDING**

- ☒ Pad, Main Corners, Grade
- ☒ Building Finish Floor/Pad Certification

**MISCELLANEOUS**

- ☐ New curb and gutter (off site)
- ☐ Wall Location
- ☐ Set Monument centerline straddlers
- ☒ Calculations (Need AutoCad File)
- ☒ As-Builts
- ☐ Gridlines - First Floor
- ☐ Gridlines - Upper Floors Add / floor
- ☐ Walks
- ☒ Piping Trenches
- ☐ _____
- ☐ _____
- ☐ _____

**NOTE:** **1) *"As Builts" on underground utilities must be open trench!!***
**2) Need City Approved Plan Set for As-Builts.**
**3) Need AutoCAD File for Civil Calcs.**
**4) Contract Charges AND All Outstanding Change Orders, Extra Billing And Reimbursable Expenses Must Be Paid Prior To Receipt Of "As-Built" Drawings.**

### ADDITIONAL SCOPE

- ☐ Modification to approved plans for As-Builts is at Time and Material Rate.
- ☐ Endorsements to insurance certificates, requested by client, that carry fees will be additional to the contract*
- ☐ Maps for Boundary Surveys are required to be recorded with the County. There is a $50.00 charge.
- ☐ _____
- ☐ _____
- ☐ _____

### SURVEY

- ☐ Elevation Cert. (FEMA) _____
- ☐ Boundary Survey _____
- ☐ Topo Survey _____
- ☐ Prelim Grading/Drainage Plan _____
- ☐ Final Grading/Drainage Plan _____
- ☐ Site Plan _____
- ☐ Prelim Plat _____
- ☐ Final Plat _____
- ☐ As-Built Data/Drawing _____
- ☐ ALTA _____

**Comments:**

☐ TIME AND MATERIAL: ☒ TOTAL LUMP SUM BID: ☐ ITEMIZED ABOVE

**Total Contract $39,200.00**

***Requested Endorsements to General Liability Insurance Certificates will be charged at cost. These endorsements may include but are not limited to: CG2503 - Designated Project General Aggregate Limit, CG2010 - Ongoing Operations, CG2037 - Completed Operations.***

## ***PAYMENT TERMS***

Payment for 100% of the value of the material delivered to the job site during the month will be due and payable by the 20th of the following month, but in no case longer than thirty (30) days from the date of the invoice. Accounts past due will bear interest at the rate of one and one half percent (1.5%) per month, or the amount prescribed by law. In the event **SCPT** is required to obtain counsel to collect any sum due hereunder or to enforce any provision hereof, in addition to any sums or other performance due, Buyer shall be responsible for all costs and reasonable attorneys fees incurred by **SCPT** in connection with such collection or enforcement efforts, including but not limited to those incurred for litigation, in addition to any other remedies it may have. If any payment due hereunder is more than thirty(30) days past due, **SCPT** shall have the right to suspend further performance or delivery of materials hereunder until all obligations have been brought current, without liability for delay claims or damages. If any payment due hereunder is more than sixty(60) days past due, **SCPT** shall have the right to declare this contract terminated and shall be relieved of any further obligations hereunder.

## ***DISPUTES***

All claims or disputes arising hereunder shall be resolved by and pursuant to the laws and courts of the state of Texas, and Buyer hereby consents to the exclusive jurisdiction of the laws and courts of said State for the resolution of all matters hereunder or related hereto. Buyers obligation to pay the amounts due hereunder is absolute and shall not be affected or suspended by reason of any disputes between Buyer and any other person who is not a party to this contract, nor by the failure of the Buyer to receive payment from any other source.

## ***BACKCHARGES***

**SCPT** will not be responsible for any back-charges unless written notification is provided and approved prior to performing the work.

*Any re-engineering cost incurred by **SCPT** resultant from Contractor's failure to produce updated drawing editions prior to engineering and/or fabrication of affected areas shall be incurred by the Contractor.

*The offer of this proposal is contingent upon credit approval by our Corporate Credit department.

## JOBSITE CONDITIONS AND EXCLUSIONS

1. OSHA impalement protection resopnsibility of customer
2. Excludes smooth dowels, threaded bar, weldable bar, pick steel, duct bank, pipe encasement, rebar welded to structural, any item not specifically designed or dimensioned.
3. Customer shall provide lines , grades, templates and adequate steel racks layout by customer shall include control points, joints and all openings.
4. Customer shall provide adequate equipment and operator for unloading, hoisting or lowering material to point of work
5. Customer shall provide adequate equipment and operator for setting prefabricated work.
6. Guying and all related labor, equipment and deadmen by others.
7. Caissons are to be tied and stockpiled at an agreed location. Transporting cages to caisson location, setting of cage, spacerss, chairs pvc or block by others.
8. Pulling, blocking or chairing of wwf excluded
9. Welding, pour watch (except for pt work), installation of sitework and scaffolding
10. Excludes any coating such as epoxy or galvanizing

**Price is contingent upon review and acceptance of project schedule**

PREVAILING WAGES EXCLUDED. ALL LABOR PROVIDED OPEN SHOP

ALL REBAR TO CONFORM TO ASTM A614 GR 60

(602) 268-6200
ROC 242133

3807 WEST ADAMS
PHOENIX, AZ

Web : www.suncoast-pt.com

1) All Precast Structures.
2) All Masonry Structures - Not in our Scope.
3) For Alternate No #1 (Ref: 4817 Chandler RWIF GMP2/ Pg.no 59 of 152) - No Reinforcement Details.
4) Concrete Landing Pad (Ref: #36/Question & Answer Log, S-2.21) - No Reinforcement.
5) The following Elements has standard details: -

"U" Type Head Wall (Ref: Note #69/C-1.42), 6" Vertical Curb & Gutter (Ref: #14/C-1.43),4" Roll Curb & Gutter (Ref: #19/C-1.44),

3.5" Roll Curb & Gutter (Ref: #20/C-1.44), 24" Ribbon Curb (Ref: #21/C-1.44), Concrete Drive Way (Ref: #35/C-1.44),

Valley Gutter (Ref: #52/C-1.44).

6) The following elements, were Unknown Location: -

Concrete Encasement for Pipes (Ref: 103/C-7.01), CJ-7, CJ-7A Existing Concrete having Provision (Ref: S-10).

Notes: -

1) As per Corresponding Sections (Ref: 3/S-1.04,4/S-1.46 & 1,3,4/S1.49), we have included formsaver and Refer "Summary sheet" for Barsize and quantities.

2) For all Concrete elements, we have used Lap Splice as per Schedule (Ref: S-3).
3) For all masonry wall dowels, we have used Lap Splice as per Schedule (Ref: S-3).
4) All bars shall conform to ASTM A615, Grade 60.

Additional for PT material IF REQ'D

Excludes drilling & grouting, rust proofing of tendon ends, removal of nails or staples from concrete or formwork. Marking of tendon ends.

Excludes measuring, recording, approval or sealing of elongations

customer to provide written authorization to stress

customer to provide written authorization to cut tendon ends

| 38 | Provide all labor, materials, tools, equipment and appurtenances as required to perform the Work Category 04A - Masonry, in accordance with and reasonably inferable from the Contract Documents, complete and without exception unless otherwise noted below, including, but not limited to the following: | Yes | | | | |
| 39 | Mock ups per the Specifications. Includes maintaining and removing mock-up during/ and or after construction when directed by Architect. | Yes | | | | |
| 40 | Attend all Meetings required, including but not limited to: Pre-installation / Pre-Construction meetings, Shop Drawing / Mock-up reviews, and coordination meetings with other trades. | Yes | | | | |
| 41 | Include all Submittals required per the Specs, which include: Shop Drawings, block samples, Manufacturer's Certificates (for masonry units and grout), Testing Agency Qualifications and Test Reports. | Yes | | | | |
| 42 | Masonry Wall areas to include, but are not limited to, the Raw Water Pump Station. | Yes | | | | |
| 43 | Provide Concrete Masonry Units per the Schedule (See Spec Section 04820) and Drawings. Units to be Type "A", Size: 8"w x 8"d x 16"L unless noted otherwise. | Yes | | | | |
| 44 | Provide total masonry wall length in SF. | 210 LF | | | | |
| 45 | Include all block types/patterns, colors and layouts noted in the Architectural Drawings, sheet A-1.02. | Yes | | | | |
| 46 | Include special shaped/ non-standard blocks configured for corners, lintel, headers , control joint edges, and other detailed conditions noted. | Yes | | | | |
| 47 | Masonry walls shall have solid grouted cells | Yes | | | | |
| 48 | Grout mix to have a 2000 psi strength w/ 7"to 8" slump | Yes | | | | |
| 49 | Mortar mix to have average compressive strength of 2000 psi | Yes | | | | |
| 50 | Where noted in the Specs and drawings include the following: | | | | | |
| 51 | Drainage blocks | Yes | | | | |
| 52 | 8" bond beams | Yes | | | | |
| 53 | 4" solid cap blocks - see A. 1.02 and S-13 detail 4 does not show this on architectural. | Yes | | | | |
| 54 | Furnish and Install ultra-barrier strips on top of masonry wall. | Yes | | | | |
| 55 | Furnish and Install all reinforcement for the masonry blocks per the plans and specifications (see schedule). Include standard joint reinforcement, lap joint reinforcement, and bond beam reinforcement. | Yes | | | | |
| 56 | Include extra reinforcement at masonry wall openings/ends, corners and at intersections. | Yes | | | | |
| 57 | Include installation of gate eye plate to be anchored to masonry (Furnished by WC 05C subcontractor). See sheet A-1.03 for location details. | Yes | | | | |
| 58 | Other Masonry Items to include, but not limited to: | | | | | |
| 59 | Water repellant used in Masonry units | Yes | | | | |
| 60 | CMU Control Joints as required | Yes | | | | |
| 61 | Sealing and Caulking of masonry control joints | Yes | | | | |
| 62 | Anchor, Ties, and Metal Accessories | Yes | | | | |
| 63 | Masonry Waste Disposal | Yes | | | | |
| 64 | Efflorescence Removal after initial Cleaning | Yes | | | | |
| 65 | Preparing, pointing & cleaning as required | Yes | | | | |
| 66 | Wall Bracing where applicable | N/A | | | | |
| 67 | Engineering for Wall Bracing if applicable | N/A | | | | |
| 68 | Trash removal from job site | Yes | | | | |
| 69 | Follow Hot & Cold Weather Protection/Requirements | Yes | | | | |
| 70 | Single Mobilization | Yes | | | | |

ABLE
STEEL
FABRICATORS, INC.

COMMERCIAL & INDUSTRIAL
STRUCTURAL & MISCELLANEOUS
STEEL

Date: March 25, 2022

Quote No: 22RW022

To: McCarthy Building Companies

Attn: Austin Hancock

Ref: Chandler Reclaimed Water Facility

We are pleased to offer our Proposal to detail as required, furnish material, fabricate, deliver (F.O.B. Trucks jobsite) and/or erect structural and miscellaneous steel pursuant to the Terms and Conditions of this Proposal as follows. **Able Steel Fabricates and Erects per the latest AISC Fourteenth Edition:**

# Scope of Work

- Please reference attached document "Scope" for list of inclusions and exclusions
- The parties agree that the work will be performed in accordance with the AISC Code of Standard Practice, which is incorporated in its entirety.
- All erection and/or shop drawings are included for Approval/Review.
- All Requests for Information (RFI's) will be forwarded by email.
- All RFI's will be uniquely numbered and will have a date for the expected answer clearly indicated. Any delay of the answer to an RFI may constitute a delay to the completion of our contract and/or have cost implications to our contract price.
- All communications between the General Contractor and fabricator that have bearing on the detailing of the project must be forwarded to Able Steel Fabricators at the earliest possible convenience.

# Contract Bidding Documents

- Specification Sections: 05051, 05120
- Architectural Drawings: Per sheet index on G-2 dated 2/2022
- Structural Drawings: Per sheet index on G-2 dated 2/2022
- We acknowledge receipt of one addendum.

# Pricing

- We propose to furnish the Membrane Facility & Strainers for a price of $225,624.00
- We propose to furnish the Chemical Facility for a price of $193,092.00
- We propose to furnish the Electrical Bldg. for a price of $36,467.00
- We propose to furnish the ACH Facility for a price of $71,773.00
- Add Alternate-Canopy & Bridge Crane at Membrane Facility ADD $198,378.00
- All taxes are Excluded

# Bid Price Clarifications

- PRIME CONTRACT QUALIFICATIONS – IF BOUND TO THE QUALIFICATIONS OF THE PRIME CONTRACT WE REQUIRE THAT A COPY OF THE PRIME CONTRACT EXCLUDING PRICING BE ISSUED WITH OUR SUBCONTRACT FOR REVIEW.
- RETENTION – TEN PERCENT RETAINAGE UNTIL FIFTY PERCENT OF THE WORK HAS BEEN SATISFACTORILY COMPLETED, AT WHICH TIME REDUCTION IN RETAINAGE TO FIVE PERCENT AND FIFTY PERCENT OF THE FUNDS PREVIOUSLY RETAINED ARE RELEASED TO US WITHIN 30 DAYS. BALANCE OF ALL RETENTIONS DUE 30 DAYS AFTER SUBSTANTIAL COMPLETION OF ORIGINAL STRUCTURAL SCOPE.
- RAW MATERIAL PAYMENT – RAW MATERIALS PAID 100% WITHIN 30 DAYS OF RECEIPT IN ABLE'S YARD. – NO RETENTION.
- PAYMENT – INVOICES SHALL BE PRESENTED MONTHLY, PAYABLE WITHIN 30 DAYS OF DATE OF INVOICE.
- PROFESSIONAL LIABILITY / ERRORS AND OMISSIONS INSURANCE – UP TO $1,000,000.00 INSURED. ANY ADDITIONAL COVERAGE IN EXCESS WILL REQUIRE AN ADDITIONAL INCREASE TO OUR CONTRACT PRICE.
- EXCLUSION - GENERAL LIABILITY INSURANCE OVER $1,000,000.00 PER OCCURENCE, $2,000,000.00 AGGREGATE. AUTO $1,000,000.00. EXCESS UMBRELLA $9,000,000.00
- EXCLUSION - WORKMENS COMP. INSURANCE IN EXCESS OF STATUTORY LIMITS.
- EXCLUSION – ACCEPTANCE OF LIQUIDATED DAMAGES CLAUSES.

# Specific Clarifications

- NOTE: ABLE STEEL FABRICATORS, INC. IS AN "APPROVED FABRICATOR" BY THE CITY OF PHOENIX (CERT. #C04-2001). ABLE STEEL IS ALSO "A.I.S.C. CERTIFIED 'Std".
- All beam to beam and beam to flange connections will be per our standard A.I.S.C. approved single clip connection unless specifically expressed.
- Joist calculations will be provided after return of E.O.R. approved shop drawing submittal.
- Steel fabricated in our shop will be painted per specifications. All other material will receive manufacturer's standard finish. No finish painting is included. No painting of fireproofed steel is included nor is field painting or touch-up unless specifically expressed.
- All items galvanized and requiring a painted finish are to be galvanized only. Prime or finish painting is by others unless specifically expressed herein.
- Railings called out to be 1-1/2" O.D. painted steel pipe shall be 1-1/4" standard pipe (1-5/8" Nominal O.D.)
- In the event of significant delay or price increase of material, equipment or energy occurring during the performance of the contract through no fault of the contractor, the contract sum, time of completion or contract requirements shall be equitably adjusted by change order in accordance with the procedures of the contract documents. A change in price of an item of material, equipment or energy will be considered significant when the price of an item increases ten percent between the date of this contract and the date of installation.

# List of Standard Scope Exclusions

- Access doors, panels and hatches (roof & floor); Anchorage devices for other trades; Backup plates for other trades; Bolts nuts and washers, wood to wood, wood to masonry & concrete, wood to steel and steel through wood to steel; Brackets, hangers and frames for other trades; Catch basins, frames and covers; Chain-link fence, gates and posts; Cost of survey; Cutting of metal deck at openings; Cutting or drilling in field to accommodate other trades; Demolition or reworking of existing construction; Design Engineering & calculations; Dock bumpers, Door hardware and pressed frames; Downspouts, boots and gutters; Embedded steel in precast units; Expansion joints and covers; Extra Verticals at joist (angles for loads added in field by other trades); Field touch-up painting; Field welding of reinforcing steel to structural steel; Fireproofing (including scraping and replacement of same); Galvanizing; Grab bars; Grouting or dry packing; Hoisting for other trades; Special Inspection NDT testing and preparation for same (cost of) except in house quality control (Qual: Visual Inspection Only); Manufactured wood connectors and joist hangers such as Teco, Artcor, Simpson, etc.; Metal louvers; Miscellaneous steel items shown or implied on mechanical; electrical and plumbing drawings; Plate/sheet metal work 10 GA. or under; Reinforcing steel and smooth dowels; Removal and reinstallation of joist; cross or horizontal bridging which interferes with other trades; Removal of shear stud ferrules and sweeping of metal deck; Roof and floor hatches, Roof drains and sump pans; Safety cable removal and maintenance of after Able Steel has left site; Setting of level plates or nuts to elevation; Shoring; Small openings in metal deck; Stainless steel and other nonferrous metals; Stair nosing; Standing Seam metal deck; Thresholds; Unistrut; & Wire mesh panels or partitions

# Terms and Conditions

- This quote is based upon receiving a standard A.I.A. document A401 for our Contractual Agreement.
- The parties agree that the work will be performed in accordance with the AISC Code of Standard Practice, which is incorporated in its entirety.
- A.I.S.C. Specifications will apply and prevail.
- If Able Steel Fabricators, Inc. is the successful bidder, we request the right to negotiate the method of payment
- All prices are valid within acceptance of 15 days after the date of this proposal. All prices are subject to change due to fluctuation in material or component prices. Any deviations after placement of order, such as changes in quantity, partial release or changes in specifications or drawings, are subject to a price increase and/ or additional freight charges.
- Price and delivery are based on and subject to mill availability.
- Any alteration or deviation from the specifications or contract involving additional cost will be executed upon written orders for same, unless otherwise agreed by both parties.
- This Proposal (Able Steel Fabricators, Inc. Quote No. 22RW022 will be made part of any future Contract or Purchase order resulting from this Quote.
- Buyer will remove, relocate or protect all existing utilities interfering with the erection of the structure or limiting the operation of the erection crane.
- If included, all lintels under 300 pounds, anchor bolts and steel embedded in concrete will be erected by others. If material is to be delivered only, unloading will be done by others.
- Clear, reasonable and adequate access throughout erection for cranes and delivery trucks adjacent to all areas of construction shall be provided by others.
- Anchor bolts for columns, weld plates and other field dimensions will be within industry standards for

line and grade.

- Contractor agrees to establish all levels and datum lines, elevations and openings. Survey by general contractor as required.
- This estimate is based on erecting Monday thru Friday (regular hours) excluding holidays and weekends.
- Seventy-two (72) hours' notice required prior to manning of jobsite.
- Contractor/Customer shall provide: Builders Risk Insurance against perils of fire; extended coverage and vandalism and have added Able Steel Fabricators, Inc., as insured “As their interest may appear” and furnish written notice in event of cancellation.
- It is understood that in the event of errors, nonconforming material/workmanship, or installation difficulties being experienced with items provided hereunder, we shall be properly notified in writing, given a reasonable time to inspect as to the validity of any alleged claim and a reasonable time to repair. In the absence of proper notice as described above, we will accept no responsibility for such claims.
- Warranty: Our liabilities shall be limited to replacement or repair of any material or workmanship as provided by Able Steel Fabricators, Inc. and found to be defective. This warranty applies for one (1) year after date of shipment from our plant.
- If Able Steel Fabricators, Inc. is summoned to the job site to defend its fabrication and fault is found to be with other than our fabrication, Able Steel Fabricators, Inc. will be reimbursed for its expenses and fees.

# BID PROPOSAL

Date 3/30/2022

Bid Proposal of * Revolution Industrial (hereinafter called "Bidder")

a **Partnership organized and existing under the laws of the State of

Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: Addendum 1 & 2

Associated documents per building connected and Misc. Metals Scope Deliniation

BASE BID:

The Bidder agrees to perform all Structural Steel (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 05, as described in the Contract Documents, for the Lump Sum of six hundred and sixty six thousand, five hundred and eighty four dollars DOLLARS ($663,584.00).

**BID BREAKDOWN:**

| | |
|---|---|
| Mobilization / Submittal | 14,105.00 |
| Raw Water PS | $19,438.00 |
| Membrane Facility/Strainer | $438,158.00 |
| Chemical Facility | $175,925.00 |
| Blower Building | $0.00 |
| Electrical Building | $0.00 |
| Chlorine Contact Basin | $15,958.00 |
| Site Work | $0.00 |
| Performance & Payment Bond Cost *(If Applicable)* | $7,433.00 |
| Total Subcontract Amount | $671,017.00 |

The name of the proposed Bonding Company is Old Republic Surety Company

Bond rate 1.120 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $56,744.00.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 15% mark up on material.

Position: Refer to attached rate sheet Rate: _____.

Equipment: Refer to attached rate sheet Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☐ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

Chandler WRF GMP 02 Project, which bid on: 4/22/2021.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | IKZ |
| | |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. No | IKZ |
| Please see add alt for escalation - $3,568.00 | |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | IKZ |
| | |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | IKZ |
| | |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | IKZ |
| | |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | IKZ |
| | |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | IKZ |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | IKZ |
| | |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | IKZ |
| | |

| | |
|---|---|
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | IKZ |
| | |
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | IKZ |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

# BID BOND

KNOW ALL MEN BY THESE PRESENTS, that we Revolution Industrial, LLC (here insert full name and address or legal title of Contractor) as Principal, hereinafter called the Principal, and Old Republic Surety Company

(Here insert full name and address or legal title of Surety) a corporation duly organized under the laws of the State of WI as Surety, hereinafter called the Surety, are held and firmly bound unto McCARTHY, hereinafter called the Obligee, in the sum of Fifteen percent of the amount bid $671,017.00
Fifteen Percent of Amount Bid (15%)

DOLLARS ($ 15% of amount), for the payment of which sum well and truly to be made, the said Principal and the said Surety, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal has submitted a bid for Work Category No. _____, for Chandler Reclaimed Water Interconnect Facility Project, 955 E. Queen Creek Road, Chandler, Arizona 85286 - Structural Steel

NOW, THEREFORE, if the Obligee shall accept the bid of the Principal and the Principal shall, within the specified period of time, enter into a formal contract and furnish a surety guaranteeing the full and faithful performance of the Work, all as provided in the Additional Subcontractor Conditions, Plans and Specifications and other Contract Documents, including addenda, of said Obligee, then this obligation shall become void; otherwise it shall remain in full force and effect.

In the event the Obligee determines the Principal has failed to comply with any requirement as set forth in the preceding paragraph, then the Principal and Surety shall be jointly and severally obligated to pay to the Obligee the difference, not to exceed the full penal sum set forth above, between the amount specified in the Principal's bid and such larger amount for which the Obligee may contract with another party to perform the work covered by said bid, together with all court costs, all attorney's fees and any other expense of recovery.

IN TESTIMONY WHEREOF, the said Principal and said Surety have caused this instrument to be signed by their respective officers and their corporate seals to be hereunto affixed this 29th day of March A.D. 2022.

# OLD REPUBLIC SURETY COMPANY

## POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That OLD REPUBLIC SURETY COMPANY, a Wisconsin stock insurance corporation, does make, constitute and appoint:

David J. McKee, Joseph A. Clarken III, Jennifer Castillo, Melanie Ankeney,

Patrick R. Hedges, Chrystal Hedges of Phoenix, AZ

its true and lawful Attorney(s)-in-Fact, with full power and authority for and on behalf of the company as surety, to execute and deliver and affix the seal of the company thereto (if a seal is required), bonds, undertakings, recognizances or other written obligations in the nature thereof, ***(other than bail bonds, bank depository bonds, mortgage deficiency bonds, mortgage guaranty bonds, guarantees of installment paper and note guaranty bonds, self-insurance workers compensation bonds guaranteeing payment of benefits, asbestos abatement contract bonds, waste management bonds, hazardous waste remediation bonds or black lung bonds),*** as follows:

ALL WRITTEN INSTRUMENTS

and to bind OLD REPUBLIC SURETY COMPANY thereby, and all of the acts of said Attorneys-in-Fact, pursuant to these presents, are ratified and confirmed. This appointment is made under and by authority of the board of directors at a special meeting held on February 18, 1982.

This Power of Attorney is signed and sealed by facsimile under and by the authority of the following resolutions adopted by the board of directors of the OLD REPUBLIC SURETY COMPANY on February 18,1982.

RESOLVED that, the president, any vice-president or assistant vice president, in conjunction with the secretary or any assistant secretary, may appoint attorneys-in-fact or agents with authority as defined or limited in the instrument evidencing the appointment in each case, for and on behalf of the company to execute and deliver and affix the seal of the company to bonds, undertakings, recognizances, and suretyship obligations of all kinds; and said officers may remove any such attorney-in-fact or agent and revoke any Power of Attorney previously granted to such person.

RESOLVED FURTHER, that any bond, undertaking, recognizance, or suretyship obligation shall be valid and binding upon the Company

(i) when signed by the president, any vice president or assistant vice president, and attested and sealed (if a seal be required) by any secretary or assistant secretary; or

(ii) when signed by the president, any vice president or assistant vice president, secretary or assistant secretary, and countersigned and sealed (if a seal be required) by a duly authorized attorney-in-fact or agent; or

(iii) when duly executed and sealed (if a seal be required) by one or more attorneys-in-fact or agents pursuant to and within the limits of the authority evidenced by the Power of Attorney issued by the company to such person or persons.

RESOLVED FURTHER that the signature of any authorized officer and the seal of the company may be affixed by facsimile to any Power of Attorney or certification thereof authorizing the execution and delivery of any bond, undertaking, recognizance, or other suretyship obligations of the company; and such signature and seal when so used shall have the same force and effect as though manually affixed.

IN WITNESS WHEREOF, OLD REPUBLIC SURETY COMPANY has caused these presents to be signed by its proper officer, and its corporate seal to be affixed this 23rd day of March, 2020.

**Proposal #22-0227 – Structural Steel**

Wednesday, March 30, 2022

Revolution Industrial is pleased to present our proposal for:

**Client:** McCarthy Building Companies

**Client Contact:** Nicole Azuri – Preconstruction Manager – Nazuri@mccarthy.com

**Project:** Chandler – Reclaimed Water Interconnect Facility

**Project Address:** 905 East Queen Creek Road

**This scope of work includes:** Fabrication and installation of structural steel per quantities and work areas below.

**Structural Steel**

- Pump Station
  - Electrical Canopy – 2,872 LBS - Primed
    - HSS – 6" x 6" x 1/4" - 4 count
    - HSS Beam - 10" x 5" x 3/8" (44 LF) – 2 count
    - HSS Beam - 6" x 5" x 1/4" (19 LF) – 2 count
    - 260 SF – PLN-24 G-60 Galv. Punch Lock
- Self-Cleaning Strainer
  - Cleaning Canopy – 6,830 LBS - Primed
    - HSS Beam - 7" x 5" x 1/4" (120 LF) – 8 count
    - HSS Beam - 10" x 5" x 3/8" (44.5LF) – 2 count
    - HSS Column – 6" x 6" x 1/4" - 6 count
    - 700 SF – PLN-24 G-60 Galv. Punch Lock
- Membrane Facility
  - Lower Canopy – 26,275 LBS - Primed
    - W 16x26 Beam – (400 LF) – 10 Count
    - W 27x84 Beam – (145.5 LF) – 2 count
    - W 12x14 Beam - (150 LF 0 - 18 count
    - 2980 SF – PLN-24 G-60 Galv. Punch Lock
  - Upper Canopy – 40,230 LBS - Primed
    - W 14x26 Beam (275 LF) – 10 count
    - W 12x14 Beams (72.17 LF) – 9 count
    - HSS Beam 14" x 6" ¼" – 4 count
    - W 24x68 Beams (72 LF) 1 count
    - HSS Column – 7" x 7" x 5/16" 4 count
    - 2080 SF – PLN-24 G-60 Galv. Punch Lock
    - Crane Runway Beams – add alts
      - W 21x93 – (122 LF) - 2 count
      - C 12x25 – (122 LF) – 2 count
  - Grating Walkway support beam – 4,502 LBS - Galvanized
    - W 8x18 Beams (186 LF) – 16 count
- Chlorine Contact Basin
  - Canopy (M-1.61) – 2,250 LBS - Primed
    - HSS – 6" x 6" x 1/4" - 4 count
    - HSS Beam - 10" x 5" x 3/8" (44 LF) – 2 count
    - HSS Beam - 6" x 5" x 1/4" (18 LF) – 2 count
    - 165 SF – PLN-24 G-60 Galv. Punch Lock

- MFS Chemical Area
  - ACH Canopy – 8,145 LBS - Primed
    - HSS Beam - 9" x 5" x 1/4" (60 LF) – 4 count
    - HSS Beam – 9" x 6" x ¼" (62 LF) – 4 count
    - HSS Column – 6" x 6" x 1/4" - 6 count
    - 500 SF – PLN-24 G-60 Galv. Punch Lock
  - Chemical Canopy – 24,675 LBS - Primed
    - HSS Beam - 6" x 5" x 3/8" (262 LF) – 16 count
    - HSS Beam – 10" x 5" 3/8" (144 LF) – 6 count
    - HSS Column – 6" x 6" x 2/4" - 14 count
    - 1225 SF – PLN-24 G-60 Galv. Punch Lock

**Our price for this scope of work is as follows:**

1. Lump Sum Price of - $663,584.00
   a. Mobilization - $14,105.00
   b. RAW Water PS (Pump Station) - $19,438.00
   c. Membrane Facility - $388,191.00
      i. Self-Cleaning Strainer - $49,967.00
   d. MFS Chemical Area - $175,925.00
   e. Chlorine Contact Basin - $15,958.00
2. Add Alternates
   a. Demo Chlorine Contact Basin Canopy (D-1.03) - $19,916.00
      i. Includes task-specific mobilization
      ii. Dismantle, package, and turn over to the owner for reuse.
   b. Crane Rail - $56,744.00
   c. Hold Bid for 180 Days - $39,207.00
   **d.** Re-detailing of submittals - $1,500.00 per set, per iteration.
   **e.** Field measuring - $3,000.00 per work area
   f. Performance Bond – $7,433.00
3. Taxes Excluded (Taxes to be added if tax exemption not provided)
   a. Estimated Tax value - $51,759.55

**Clarifications: Qu**ote valid for 10 days from the date of proposal

- **Safety**
  - All work is to be performed according to OSHA safety regulations.
  - Assumes 1 hour of on-site safety training
  - Assumes background checks and fingerprinting transferable from previous jobs. All new or additional are excluded.
  - All COVID precautions are per CDC guidelines. No site specifics have been considered and are excluded.
- **Production** – Labor off 5-day workweek at 10 hours a day.
- **Mobilization** –One for Structural and one for Misc. Metals
  - Assumes all work areas are open at the time of mobilization
- **Installation Duration –** 65 Days, 13 Workweeks
- **Coatings –** Noted in breakout
- **Lead times**
  - Submittals – 4 to 6 weeks from NTP and/or PO/Contract

*This proposal is the sole property of Revolution Industrial. The contents herein are strictly confidential and are supplied on the understanding that they will be held confidentially and not disclosed to third parties without the prior written consent of Revolution Industrial. (© 2015)*

- Long lead materials - Decking is a 16-to-20-week lead time. All steel members were quoted from local vendors and are readily available.
- Assumed start date on site – Q3 of 2022

- **Assumptions**
  - RI to have 6 weeks of notice prior to mobilization
  - Lift access to all areal work.
  - Crane access at canopies.
  - GC to provide all porta johns and dumpsters.
  - FAA permit by GC.
  - Detailing revisions per add alternate
- **Pre-Job Notification:**
  - Owner/Contractor needs to be aware that Revolution Industrial routinely files preliminary notices on projects solely to protect Revolution Industrial's rights in case of dispute or non-payment. This is done to fulfill state requirements allowing us to protect our legal rights.
  - Material procurement and mobilization will be bill 30% of contract value upon contract award.
  - Overhead and Profit: The owner/Contractor needs to be aware the Revolution Industrial has distributed overhead and profits evenly across all line items listed in the cost break out (attached). Please understand that if a line items or quantities are added or removed the price for the remaining line items will change.
  - Fabrication and/or erection sequencing agreed before mobilization. Deviation may result in a change order.
  - This proposal price is based on current material availability. Revolution Industrial cannot commit to a start date for the work until such time that a subcontract is executed, and we are given authority to release the material order. Upon release of the material order, Revolution Industrial will provide projected lead times for delivery. Upon receipt of this information Revolution, Industrial will be in a position to establish a projected schedule for commencement of fabrication or install of the material.
  - This proposal price is based on current labor availability. The availability of Revolution Industrial's labor pool changes on a regular basis due to ongoing or future projects, COVID-19 impacts, including new restrictions, and other government action which incentives workers not to return to the workforce. Revolution Industrial cannot commit to a start date for the work until a firm delivery date is known for the material or equipment to be installed. When a firm delivery date is known, Revolution Industrial will evaluate its then-current labor pool and provide a projected start date for the work.

**Exclusions:**

1. Any items not identified or sized or details not shown or details shown but not cut on the drawings
2. Any items shown or called for on civil, mechanical, plumbing, electrical, or landscape drawings
3. Miscellaneous steel not specifically called out
4. Permits.
5. Sales, use, and gross receipts taxes
6. Cost of bonds or special insurance
7. Demolition and/or removal of existing material.
8. Cost of inspection and testing.
9. Participating in liquidated damages and delays charges of any kind.
10. Prevailing Wage
11. All concrete work, grout & placing of same, core drilling, etc.
12. Concrete inserts, rebar, mesh, etc.
13. Opening frames or mechanical supports (except where specifically shown on structural drawings)
14. Burglar bars @ opening frames.
15. Stair nosings, metal sash and/or mullions
16. Wrought iron fence and gates Chain link fence and gates. Signage post and post sleeves
17. Ornamental metals (aluminum, brass, bronze, glass rail, wrought iron &, etc.)
18. Field welding other than detailed by RI erection drawings
19. Any and all steel associated precast concrete
20. All items embedded in precast concrete
21. Metal studs, tracks, bridging & accessories
22. Sheet metal 10 gauge & lighter, Glass stops
23. Wire mesh partitions & accessories
24. Expansion joint covers
25. Unistrut
26. Back up bars for other trades
27. Pipe sleeves for other trades
28. Anchor bolts for other trades
29. Masonry anchors or ties
30. Bolts other than steel to steel & steel to concrete or masonry
31. Seam welding of metal deck
32. Flashing, gutters, and downspouts
33. Sump pans
34. Cutting of deck at mechanical openings
35. Shoring of any kind
36. All wood products and materials included but not limited to Glulam, Simpson products, hardware and panelized
37. Panelized wooden roof system and all accessories

# BID PROPOSAL

Date 3-25-22

Bid Proposal of * HURRICANE FENCE CO (hereinafter called "Bidder")

a ** CORPORATION organized and existing under the laws of the State of

ARIZONA.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: 1-2

.

BASE BID:

The Bidder agrees to perform all GATE AND OPERATOR (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. _____, as described in the Contract Documents, for the Lump Sum of FIFTY SIX THOUSAND, FOUR HUNDRED TWENTY EIGHT DOLLARS ($56,428.00).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $_____ |
| Membrane Facility/Strainer | $_____ |
| Chemical Facility | $_____ |
| Blower Building | $_____ |
| Electrical Building | $_____ |
| Chlorine Contact Basin | $_____ |
| Site Work | $56,428.00 |
| Performance & Payment Bond Cost *(If Applicable)* | $1,410.70 |
| Total Subcontract Amount | $57,838.70 |

The name of the proposed Bonding Company is _____

Bond rate 2.5 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $_____.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 15%.

Position: _____ Rate: _____.

Equipment: _____ Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☒ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | GS (initials) |
| | |
| In submitting this proposal, the Bidder certifies that this bid is valid for ~~100 calendar days~~. 60 DAYS ONLY | GS (initials) |
| | |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | GS (initials) |
| | |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | GS (initials) |
| | |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | GS (initials) |
| | |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | GS (initials) |
| | |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | GS (initials) |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | GS (initials) |
| | |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | GS (initials) |
| | |

| | |
|---|---|
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | GS (initials) |
| | |
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | GS (initials) |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

Opportunity: McCarthy Chandler WRIF
Location: Phoenix, Arizona

Fibergrate appreciates the opportunity to bid on your FRP requirement, and offers the following quotation for your consideration. Fibergrate is an ISO-9001:2008 certified manufacturer and is one of the original pioneers in the FRP fabrication industry, having invented fiberglass molded grating in 1965. With more than 50 years of experience in FRP fabrications , Fibergrate has the experience and capabilities necessary to design, manufacture , and fabricate the materials for your project to ensure that the assembly at the jobsite will proceed smoothly. Fibergrate continues its commitment as a leader in the FRP market. All of the FRP products and solutions offered in this quotation are heavy metal safe. If you have any questions about heavy metals in FRP products or how they can affect your business, our communities and our environment, please go to our website (www.fibergrate.com) or contact your local Fibergrate Representative.

All material take-offs were derived from drawings and FRP specification received via email on 3/9/22.

***MATERIALS of CONSTRUCTION:***

Safe-T-Span® I4010 VEFR 1 1/4" deep covered pultruded grating with grit surface and 6" tie bars, color dark gray.

Dynaform® VEFR concrete EZ embedment angle, color slate gray.

Non-Domestic 316 Stainless Steel Hardware

***SCOPE of WORK:***

***Fibergrate® will provide the following:***

DRAWINGS S-2.21 & S-2.22:

- (7) 1 1/4" deep x 2' x 2' covered pultruded sump gratings.
- (1) 1 1/4" deep x 3' x 3' covered pultruded sump grating.

***NOTE***

- All grating are to be furnished with concrete embed angle and hold down clips.

***NOTES:***

**Fibergrate reserves the right to a final review of it's quotation prior to accepting a purchase order.**

***This quotation allows for three (3) sets of Approval & Erection drawings, additional drawings are available at an additional cost of $5.00 per sheet.***

Fibergrate's standard fabrication and manufacturing tolerances will apply as follows:

1.) Structural shapes = +/- 1/8"; Cut grating = + 1/8" / - 5/16".

2.) Cut grating may have open or unequal stub bars.

3.) Specifications for design or products were provided with request for quote.

4.) Design criteria and products used in this quotation are per Fibergrate design standards.

5.) No design calculations are included with the quotation.

6.) Design calculations are available with projects requiring approval drawings at an additional charge.

7.) Fibergrate Composite Structures has a manufacturing facility in Stephenville, TX.

8.) Grating will be attached to the structure using provided hold down clips.

9.) This quotation is based upon customer providing AutoCad drawings to Fibergrate before approval drawings can be started.

10.) All grating notches and penetrations shown on the contract drawing are included in this quotation.

11.) All grating notches and penetrations not shown can be provided at additional cost.

12.) Anchors are available but not included in this quotation unless specifically referenced.

13.) Visit www.fibergrate.com for Company history, literature, catalogs, specifications and product information.

14.) Additional freight is included for early shipment of concrete embed angle.

## ***EXCLUSIONS:(to be provided by others)***

Anchor bolts (including concrete screws used in conjunction with grating hold down clips), installation, field measurements and any other items not specifically included in the above described "Scope of Work" are to be provided by others.

## ***PRICING:***

Fibergrate will provide prefabricated materials per this quotation for the amount of:

**Lump Sum Sales Price:** **$8,763.00** (USD) (tax NOT included)

**Freight Included in Total Quoted Price for delivery to zip code 85016.**

**Freight Included based on One Complete Shipment.**

Multiple shipments will result in additional charges to be determined at time of request. Executed change orders will be required prior to release of materials for shipment.

## ***TERMS OF DELIVERY:***

Terms of Delivery: FOB Point of Origin

***SUBMITTAL REVISIONS:*** Submittal revisions due to customer requested changes will be billed at a rate of $60/HR for any additional drafting and/or engineering.

***QUOTE VALIDITY:*** This quotation is firm for acceptance within thirty (30) days from the Bid Date.

***SHIPMENT:*** Prices are firm for shipment within six (6) months of date of receipt of order. After six (6) months, prices may escalate per the Producer Price Index (PPI) for Finished Goods as reported at www.bls.gov/ppi. Price will be adjusted at quarterly intervals per the PPI until material shipment. Executed change orders will be required prior to release of materials for shipment.

## ***ESTIMATED DELIVERY:***

***(Lead times to be determined upon receipt of a purchase order.)***

Project: **147066 - Chandler Reclaimed Water Interconnect Facility - Revison 1** **March 30, 2022**
Location: **Chandler, AZ**

**Base Bid:**

| Item No. | Description | Total Amount |
|---|---|---|
| 1. | **Steel Doors & Frames - Section 08110**<br>03 ea Hollow metal frames - 16 ga. A60 galvanized steel welded and primed.<br><br>03 ea Hollow metal doors - 18 ga. polystyrene core, A40 galvanized steel, 24 x 12 metal louver, top cap installed and primed. | $10,018.00 |
| 2 | **Finish Hardware - per 08710 and on door schedule sheet A-1.83 for single doors**<br>1 lot - Finish hardware, per sets on sheet A-183 No hardware at Overhead Door. | $13,992.00 |
| 3 | **Installation**<br>****Installation of 3 doors and associated hardware, excluding RX switch, Power Supply and DPS by Security Contractor*<br>*Note - Installation, unloading, handling, distributing, storing, etc. of Welded HM Frames to be performed* ***by others*** | $2,222.00 |
| | **Lump Sum Price (*excludes any and all alternates*)** | **$26,232.00**<br>**price excludes tax and bond* |
| **Addenda 1** | **No change in price** | $0.00 |

**General Notes & Qualifications:**

- **Plan Date 2/00/2022** **Spec Date 2/00/2022** **Addendum Number 1**
- Proposal is based on acceptance of all scopes as a package. Price for separate parts of the work may be increased from the values shown above.
- Retention will only apply to installation & labor portion of the above pricing. Material retention not applicable
- An amount equal to 10% of the total contract value will be invoiced on the initial pay application for preconstruction services, engineering, and mobilization.
- Due to world economic reality involving steel and the pricing of its raw materials steel products quoted herein are for market pricing today and may be subject to confirmation of steel pricing and
- Lead times quoted represent the lead times current to the quote date above. Lead times do fluctuate and if the project is awarded longer than 30 days from quoted date, the lead times quoted can
- If material is being supplied but installed by another contractor, it is the installing contractors responsibility (and not American Directs responsibility) to receive, check, verify, inventory, unload,

**Escalation and Material Pricing Notes:**

001 Pricing of welded hollow metal frames and HM doors is good for frames / doors ordered by 07-20-2022. Any frames / doors not on order with the factory by this date will need to be re-priced at current market pricing.
002 Pricing of door HW is good until 9-30-2022. Anything ordered after this date will be re-priced at current market pricing.
003 For material to be consideed 'on-order' with the factory requires an approved submittal to be in American Direct's hands 5 to 10 business days prior to the above dates.
**004 If you're planning on awarding this project to American Direct, please get with us prior to locking in budget with owner, due to the continual volatility in the construction materials market. It is imperative that you provide American Direct with dates as to when you will be taking the above quoted material so American Direct can acquire pricing based on your schedule and those need-by dates, and provide you with the most accurate costing BEFORE the budget is locked in with the owner.**

005 Excludes field welding, field dimensions, and field measurements
006 Excludes hardware at doors/openings not being supplied by American Direct
007 Excludes access panels, gates, etc.
008 Excludes field finishing or touchup of any kind
009 Excludes Bituminous undercoating at hollow metal frames

**Steel Door & Frame Notes:**

- Standard factory lead time of 7-9 weeks from approval of complete submittal package
- See above for specific opening details
- Hollow metal frames are 16ga, un-equal rabbet, 2" face, interlocking tabs and face welded, A60 galvanized steel. All frames primed, reinforced and prepped for hardware as required.
- Hollow metal doors are 18ga, std. lock seam edge construction, beveled 1 side,polystyrene core, A40 galvanized steel. Exterior doors to have flush top caps sealed, Primed.
-

**Re: Chandler Reclaimed Water Interconnect Facility Chandler, AZ**

We are pleased to submit the following proposal for doors, frames, and hardware on the aforementioned project. This proposal is based on plans dated 02/2022 by Wilson Engineers Architects.

**SCOPE: Furnish and install doors, frames, and hardware. (Excludes grouting and installation of HM welded frames).**

METAL FRAMES: Total (3) Hollow Metal Welded Frames A60 16 gage 30x80x8”

METAL DOORS: Total (3) Hollow Metal Doors with Louver A60 18 gage 30x80

FINISH HARDWARE: 9 ea. 5BB14.5x4.5NRP Hinges, 3 ea. 5BB1 4.5x4.5 TW8 Electric Hinges, 3 ea. VD 9875-L-E996-06-FSE, 3 ea. 80-115 Cyl, 3 ea. Everest Core 80-037-EV29 R, 3 ea. LCN 4040XP SCHUSH Closers, 3 ea. Rain Drip, 3 ea. S88 seal, 3 ea. 315CN Sweeps, 3 ea. 172A MSES10 Thresholds, 3 ea. MT15 Reader

**TOTAL PRICE, FURNISHED AND INSTALLED - $18,761.00**

Qualifications:
Excludes bond if required
Work to be completed during normal business hours
Excludes line and low voltage wiring
Hollow Metal Welded Frames FOB jobsite

Thank you for the opportunity to bid on this project, we look forward to working with you.

Jeff Aglialoro

**PROPOSAL**

TO: Nicole Azuri McCarthy — PHONE: FAX: CELL:

DATE: March 24, 2022

RE: Chandler Reclaimed Water Interconnect Facility Paint and Coatings Spec sections 09900, 09900.1, 09920, and 09983

We propose to complete the following work as described below;

**ITEM #** 1 **:** Raw water pump station perimeter wall painting by others (no system provided)
Item # 1 Amount .....

**ITEM #** 2 **:** Raw water pump station gates painting.
Item # 2 Amount ..... $2,240.00

**ITEM #** 3 **:** Raw water pump station above ground piping painting.
Item # 3 Amount ..... $30,673.00

**ITEM #** 4 **:** Raw water pump station wet well piping painting by others not included.
Item # 4 Amount .....

**ITEM #** 5 **:** Raw water pump station electrical canopy structure painting. Decking not included.
Item # 5 Amount ..... $4,300.00

**ITEM #** 6 **:** Raw water pump station electrical equipment painting.
Item # 6 Amount ..... $8,400.00

**ITEM #** 7 **:** Membrane facility basins (4) and CIP tank coating. Sherwin Williams system, Steel seam FT910, Macropoxy 5000 and Poly-Cote 115. Recommended alternate coating system Item #27
Item # 7 Amount ..... $888,000.00

**ITEM #** 8 **:** Membrane facility Canopy structure painting. Decking not included,
Item # 8 Amount ..... $25,292.00

**ITEM #** 9 **:** Membrane facility above ground piping painting.
Item # 9 Amount ..... $52,580.00

**ITEM #** 10 **:** Membrane facility pumps not included.
Item # 10 Amount .....

**ITEM #** 11 **:** Membrane facility bridge Crain rails painting.
Item # 11 Amount ..... $6,840.00

**ITEM #** 12 **:** Self cleaning strainers above ground piping and strainers painting.
Item # 12 Amount ..... $35,424.00

**ITEM #** 13 **:** Self cleaning strainers canopy structure painting. Decking not included.
Item # 13 Amount ..... $9,410.00

**ITEM #** 14 **:** AWRF modified chlorine contact piping painting.
Item # 14 Amount ..... $5,040.00

**ITEM #** 15 **:** Blower building roll up door and man door painting.
Item # 15 Amount ..... $1,450.00

**ITEM #** 16 **:** Blower building fire piping painting.
Item # 16 Amount ..... $13,104.00

**ITEM #** 17 **:** MFS chemical facility sodium hypochlorite piping painting.
Item # 17 Amount ..... $9,840.00

**ITEM #** 18 **:** CIP chemical facility piping painting.
Item # 18 Amount ..... $25,088.00

**ITEM #** 19 **:** Chemical facility canopy structure painting. Decking not included.
Item # 19 Amount ..... $18,533.00

**ITEM #** 20 **:** ACH facility above ground piping painting.
Item # 20 Amount ..... $5,704.00

**ITEM #** 21 **:** ACH facility canopy structure painting. Decking not included.
Item # 21 Amount ..... $7,788.00

**ITEM #** 22 **:** Electrical building doors painting.
Item # 22 Amount ..... $800.00

**ITEM #** 23 **:** Coat interior of 2- 5' dia. By 20' deep manholes with Sewer Shield 150.
Item # 23 Amount ..... $37,480.00

**ITEM #** 24 **:** Provide and install 1- 5' dia by 20' deep Sewer Shield Composites manhole.

Item # 24 Amount ..... $21,000.00

**ITEM #** 25 **:** 3rd party NACE III inspections.
Item # 25 Amount ..... $58,992.00

**ITEM #** 26 **:** Bond 2.5%
Item # 26 Amount ..... $34,554.40

**ITEM #** 27 **:** Membrane facility basins (4) and CIP tank coating. Tnemec series 215 ML/22 mat reinforced epoxy mortar lining system, $488,400.00

Item # 27 Amount .....

Excluded; P.V.C. liner 09910, below grade waterproofing, exposed exterior above grade concrete, No FRP tank painting, No poly tank painting, Wet well coating, Canopy decking

**TOTAL PROPOSAL AMOUNT: ..... $1,302,532.40**

***TPT TAX Paid on Materials at point of Purchase.**

# BID PROPOSAL

Date 3/24/2022

Bid Proposal of * Penington Painting Company (hereinafter called "Bidder")

a ** limited liability corporation organized and existing under the laws of the State of

Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: 1

.

BASE BID:

The Bidder agrees to perform all painting and Coatings (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 09D, as described in the Contract Documents, for the Lump Sum of five hundred and forty four thousand, nine hundred and forty nine DOLLARS ($ 544,949).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $ 56,165 |
| Membrane Facility/Strainer | $ 358,018 |
| Chemical Facility | $ 100,261 |
| Blower Building | $ 14,155 |
| Electrical Building | $ 4,072 |
| Site Work | $ 1,417 |
| Performance & Payment Bond Cost *(If Applicable)* | $ 10,861 |
| Total Subcontract Amount | $ 544,949 |

The name of the proposed Bonding Company is USI

Bond rate 2 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $ 145,000.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 15%.

Position: N/A Rate: .

Equipment: 15% Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☒ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

Chandler RWIF Project, which bid on: 3/25/2022.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | (initials) |
| | JAH |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | (initials) |
| | JAH |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | (initials) |
| | JAH |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | (initials) |
| | JAH |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | (initials) |
| | JAH |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | (initials) |
| | JAH |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | (initials) |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | (initials) |
| | JAH |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | (initials) |
| | JAH |
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | (initials) |
| | JAH |

| | |
|---|---|
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | JAH (initials) |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

Re: City of Chandler RWIF Project
FINAL Equipment Budget Pricing Summary **REV1**

Jason/Nicole,

The following FINAL budget pricing summary is provided by The Coombs-Hopkins Company for your City of Chandler RWIF project.

| Spec Section | Equipment | Manufacturer | Price |
|---|---|---|---|
| 11285 | Slide Gate | Whipps | $32,900 |
| 11320 | Inlet Auto Strainers | RP Adams | $495,000 |
| 13127 | Alum Extruded Flat Covers | CST – **Material ONLY** | $499,900 |
| 13207 | FRP Tanks | Daniel | $165,500 |

Please review this summary and give me a call if you have any questions or comments. I can be reached on my cell phone at (602) 363-6755. I look forward to working with you on this project.

Thanks,

*Jason Vernon*

# QUOTATION

March 11, 2022

To: Bidding Contractors **Quotation #QT01022614**

Project: Chandler, AZ – Reclaimed Water Interconnect Facility Project
Wilson Engineering
Bid Date: March 23, 2022

Dear Estimator:

Following is our quotation for **Section 11285 – HYDRAULIC GATES** on the referenced project. Our offering is as follows:

**Item No. 01 –** Raw Water Pump Station Intake
**Qty. - Size**: One (1) Model RW750-S Slide Gate - 24" wide x 24" tall
**Distance from the Invert of the Opening to the Operating Floor**: 11'
**Design Seating Head / Design Unseating Head (invert to MWL):** 6' / 6'
**Dwg No.:** M-1.04
**Description**: The AWWA C561 compliant, non-self-contained, upward-opening slide gate will be constructed of 316/316L stainless steel with self-adjusting adjusting UHMWPE side and top seals and an EPDM flush bottom invert seal. A single, rising, 316 stainless steel operating stem and clear plastic stem cover with mylar indicator strips will be provided.
**Operating Mechanism:** pedestal mounted, electric actuator (480v-3 phase power, open/close service)
**Mounting Style**: Gate frame will be wall surface mounted with 316 stainless steel adhesive anchors and non-shrink grout. Anchor studs, nuts and washers are included.

**Item No. 02–** FIELD SERVICE
One (1) trip consisting of one (1) day onsite.

**TOTAL SELLING PRICE: $ 21,178.00**

**GENERAL:** Our quotation is based on the plans and specifications and the description listed herein. Please review the quotation and advise our local representative, **Joel Wade of IE Southwest Associates at 315-697-3800,** if there are any discrepancies between the details on this quotation and the actual requirements. The pricing and deliveries listed in the body of the quotation will be held for 60 days from the bid date on Page 1.

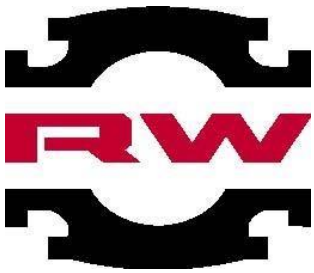
RW Gate is ISO 9001:2015 certified. RW Gate complies with AIS and Buy American requirements.

**INCLUDED:** Submittal drawings, installation instructions and O&M manuals. Installation instructions will be forwarded with the equipment. Information will be sent electronically unless otherwise indicated by the customer.

**EXCLUDED:** The following items are specifically excluded; demolition, installation, field measurements, control panels, remote control stations, instrumentation, wiring, conduit, junction boxes, disconnects, wall thimbles, wall pipes, floor sleeves, concrete, grout, gaskets, mastic, lubricants, grating, hand rail, cover plates, epoxy for anchors and all taxes including local and state sales tax.

**PAYMENT:** Net 30 days. Please contact RW Gate prior to payment via credit card. An additional charge may be necessary when paying by credit card.

**FREIGHT:** Full freight to project site included. Please contact the factory if separate, partial shipments are necessary as a price adder may be required. Unloading will be the responsibility of others.



**STANDARD DELIVERY:** Submittal drawings will ship within 3-4 weeks of receipt of a purchase order. The gate assemblies will ship 12-16 weeks after receipt of approved submittal drawings. Electric actuators will ship direct to the project site from the original manufacturer 30-32 weeks after receipt of approved submittal drawings. Please contact our local representative for expedited or extended delivery dates.

**FIELD SERVICE:** Field service is included as item No. 02. If additional field service is required, please contact our local representative for revised pricing. Please provide a 3-week notice for field service.

Best Regards,

Stephen Payler

PHOENIX PUMPS, INC.

March 23rd, 2022

Proposal Project # P00500

McCarthy Building Companies
Jason House

RE: Chandler - RWIF

Jason,

Phoenix Pumps is pleased to offer the following items for the above project based on the Wilson Plans & Specifications (February 2022). We acknowledge Addendum 1.

## SPECIFICATION SECTION 11311__SUBMERSIBLE PUMPS__

Qty 3) Sulzer ABS XFP 206J-CB2 Submersible Pumps. **Design Condition: 3,473 GPM @ 47 Ft TDH.** Cast Iron Construction. CB2 Non Clog Impeller Design. 58 HP, 1200 RPM, 3/60/460V Motor. 98ft Power Cable. 1U Performance Test, Seal Leak/Over Temp Relay (Installed in Control Panel by Others).

- Includes Guide Rail Assembly with Brackets, Guide Rails
- Includes Spare Parts

**Price…… $130,000.00**

**Comments & Clarifications;**

- Installation is by others
- Does not include controls, gauges or any other items not specifically listed above.
- Includes freight to jobsite, submittal data, O&M manuals, startup services.
- Prices are based on delivery of __20*__ weeks after receipt of approved submittals.
- *Due to market volatility, lead times will be reevaluated after release to production.
- Pricing is valid for 180 days.

## SPECIFICATION SECTION 11217__SAMPLE PUMP__

Qty 1) Goulds-WT J5S Jet Pump. 1-1/4” Suction, 1” Discharge NPT Connections. 1/2 HP, 3500 RPM, ODP Motor. Includes one spare mechanical seal.

**Price…… $3,000.00**

**Comments & Clarifications;**

- Installation is by others
- Does not include controls, gauges or any other items not specifically listed above.
- Includes freight to jobsite, submittal data, O&M manuals, startup services.
- Prices are based on delivery of __12*__ weeks after receipt of approved submittals.
- *Due to market volatility, lead times will be reevaluated after release to production.
- Pricing is valid for 180 days.

PHOENIX PUMPS, INC.

Proposal Comments
This proposal is based on agreement to Phoenix Pumps Inc. (PPI) standard Terms & Conditions (T&C) included with this proposal as an attachment. Negotiating special T&Cs may impact sale price of this equipment. The following comments are supplemental to the attached T&Cs. Only the items listed above are included. Any applicable taxes will be added to quoted prices.
Validity. This proposal is valid for 30 days.
Delivery. Stated delivery times are estimated based on current inventories, typical transit times, and are subject to change.
Equipment Specifications. Any and all references to "contractor" in the specs do not apply to PPI and PPI assumes the role of the pump supplier only. PPI will not be responsible for any specification sections not provided at time of quote. Furthermore, PPI reserves the right to review additional specifications, change selections, their appropriate prices, etc., in order to address the complete plans and specifications for this project as they are made available. All work on installation, electrical, etc. is to be provided by others and is not included in this proposal.
Warranty. All manufacturers' standard warranties apply unless further agreements are made in writing. Warranties do not include removal or installation of the equipment. PPI is available for removal & installation of the equipment at our standard field service, travel time and per diem rates. Warranties do not include transportation charges. Warranty consideration will be initiated by a new Purchase Order from the customer before any evaluation begins. If the equipment is deemed covered under warranty, PPI will issue credit against the purchase order in an agreed upon amount.
Submittal Data. PPI will supply standard submittal data, i.e. dimensional, sectional, curve, paint spec, pump IOM, motor IOM, motor data. Additional documentation may be available for additional fee. Data sheets, drawings, and performance curves included with this proposal are not for official submittal. Final data sheets will be generated and submitted upon receipt of order.
Start-Up Services. Startup Services, if included, will require a minimum of 2 weeks' notice to schedule startup. The customer will provide written confirmation that the system is ready for startup including but not limited to witnesses, electrical supply, sufficient test liquid, completed piping system, etc. If PPI field service personnel travel to the jobsite and are not able to be started up the equipment because of lack of readiness on the customers part, rescheduled startup services will be charged at our standard field service, travel time and per diem rates and will require a new Purchase Order.

If you have any questions please do not hesitate to contact me. On behalf of PPI, I would like to thank you for this opportunity to offer our products on this project.

Sincerely,
Sam McFadden
Phoenix Pumps, Inc.

with double stainless steel guides.

END OF REFERENCE DATA

PERFORMANCE REQUIREMENTS

Furnished, shall be a total of 2 waste water non-clog submersible motor pump(s) 1 of them operating simultaneously. The nature of system is: Single pumps as parallel circuit.

The pump shall be designed to successfully operate at a rated duty point of 3500 US g.p.m. a 47.0 ft and shall be capable to operate within a range from 25.1 ft to 70.4 ft continuously. The shut-off head shall be at minimum 85.3 ft. The pump's nominal speed shall not exceed 1200 rpm.

The pumped media shall have a maximum temperature of 68 °F, a specific gravity of 64.29 lb and a viscosity of 1.077E-5 ft²/s. The minimum pump efficiency at the design point shall be no less than 77 %.

The pump's submersible dry squirrel cage electric motor shall be capable of operation at , thre (3) phase, 60 Hz service. The rated motor power shall not exceed 60 hp.

MATERIALS

The submersible pump shall be of at minimum, the following grades of materials:

| | |
|---|---|
| Pump casing: | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Casing wear ring | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Discharge cover: | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Shaft: | Stainless steel EN-1.4021+QT800 (A 276 Type 420) |

2021/06/02 (Build 213), 32 bit R16.07.01 - 05-08-2021 ALL USA

| Pos.no | Name |
|---|---|

| | |
|---|---|
| Shaft sleeve: | Stainless steel EN-1.4021+QT800 (A 276 Type 420) |
| Impeller: | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Impeller wear ring | --- |
| Bearing bracket: | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Motor casing: | Grey cast iron EN-GJL-250 (A 48 Class 35B) |
| Cable sheath: | Waterproof synthetic rubber compound |
| Elastomer components: | Nitrile rubber (NBR) |
| Bolts. nuts: | Stainless steel A4 (EN-1.4571) (A 276 Type 316) |

PUMP CONSTRUCTION
The pump shall be of submersible centrifugal, non-clog, single stage, volute casing, end suctio type capable of satisfying the specified performance requirements. The pump shall be designe as "back pull-out" such that the entire rotating assembly can be removed from the casing. The pump shall be suited for continuous operation in a submerged condition driven directly by a fu submersible dry squirrel cage induction motor. The impeller shall be fitted directly to the motor shaft.
The head-capacity curve shall have a single flow rate for each pumping head value and have continuously rising head characteristic from the specified design point to shut-off so as to ensure stability and control in both individual and/or parallel operation. The operating range of the pump, as specified, is defined by the maximum and minimum operating heads against which the pump will be required to operate. At no point on the pump's power demand curve between shut-off and the minimum operating head shall the pump's power demand exceed th rated power of the motor.

CASING
The pump shall have a volute casing with centerline discharge. The single piece pump casing shall be made of suitable thickness to allow for long pump life and to safely withstand the pressure at shut off head. The discharge nozzle shall be provided with integrally cast flange. Critical mating surfaces where watertight sealing is required shall be machined and fitted with rings. Fittings will be the result of controlled compression of rubber O-rings in two planes and ring contact of four sides without the requirement of a specific torque limit.
Rectangular cross-sectioned gaskets requiring specific torque limits to achieve compression shall not be considered as adequate or equal. No secondary sealing compounds, elliptical O-rings, grease or other devices shall be used.

WEAR RING
The pump shall be provided with a replaceable wear ring in the pump casing to insure efficien sealing between the volute and suction inlet of the impeller. It shall be firmly secured to prevei rotation or displacement.

IMPELLER
The impeller shall be of a centrifugal, closed, non-clogging design for high efficiency pumping industrial and municipal wastewater. It shall have  vanes and be capable of handling solids of minimum 4 3/16 inch size, long fibres, sludge and other materials as may normally be found ir wastewater. Back vanes shall be provided to minimize axial loads and to propel solids away from the seal area.
The impellers lateral cavities shall be of ample size to protect against wear and clogging.
The impeller shall be a one piece casting of the material as specified. It shall be smooth, well finished, free from blowholes and imperfections, and be dynamically balanced. The impeller sl be securely fitted to the pump shaft in such a manner that it does not loosen or become detached if the pump is operated in the wrong direction as may happen by reversed flow or reversed motor connections

PUMP SHAFT

2021/06/02 (Build 213), 32 bit R16.07.01 - 05-08-2021 ALL USA

| Pos.no | Name |
|---|---|
| | The pump/motor shaft shall be of stainless steel or be completely isolated from the pumped media through the use of a stainless steel shaft sleeve. Do not use carbon steel as a shaft material without using a stainless steel shaft sleeve.<br><br>BEARINGS<br>The shaft shall rotate on at minimum 2 / 1 antifriction bearings. The bearing system shall be adequately designed so as to be capable of handling all axial thrust loads plus any and all rad loads.. The pump shall be provided with re-lubrication ports for lubrication from external.<br><br>SHAFT SEAL<br>Each pump shall be provided with two totally independent, mechanical seals, installed in tandem, each with its own independent single spring system acting in a common direction. Th sealing shall not depend on the direction of rotation.<br>The primary, impeller-side seal shall operate in a large flooded chamber formed by cast recesses in the impeller and backplate. The impeller-side seal shall be of bellows type mechanical seal.<br>The primary and the secondary seal faces shall operate in a generously proportioned lubrican chamber that hydrodynamically lubricates the seal faces to allow for extended periods of dry-running operation without the need for external seal lubrication or cooling systems.<br>The lubricant chamber liquid shall be an environmentally friendly and nontoxic.<br>The seal face material of the primary seal shall be of at minimum Silicon Carbide versus Silicc Carbide (SiC/SiC) for excellent hardness and chemical resistance across the entire "pH" rang<br>The secondary seal shall be of Carbon versus Silicon Carbide (Carbon/SiC). The seal faces must be of a solid material capable of being re-lapped. The seals shall require neither routine maintenance nor adjustment, but capable of being easily inspected and replaced.<br>Mechanical seal metal parts shall be of CrNiMo-stainless steel.<br>Seals shall be non-proprietary in design, and shall be available from another vendor in additio the pump manufacturer.<br>Conventional double mechanical seals with a single or multiple springs acting in opposed direction, cartridge-type mechanical seals; seals with materials other than those specified; sha not be considered as adequate for this critical sealing area.<br><br>BOLTS AND NUTS<br>All nuts or bolts exposed to the pumped media shall be of stainless steel as specified.<br><br>NAMEPLATE<br>Each pump shall be provided with a stainless steel nameplate firmly attached to the pumping unit. It shall be clearly and durable inscribed with the manufacturer's name, year of manufactu pump-type, serial number, and principal rating data. For easy identification of the submerged pumping unit, a second equal nameplate shall be supplied along with its documentation for attachment outside the wet well.<br><br>PROTECTIVE COATING<br>All exterior metal surfaces of the pump shall be subject to following preparation and coating procedure except name plates, bright parts and stainless steel parts.<br>The preparatory treatment of cast and welded components shall be accomplished in accordar to SSPC near white SP 10.<br>The primer when using Zinc dust or Zinc phosphate base shall have a dry film thickness of no less than 1 1/2 mils (35 microns).<br>An abrasion and shock-resistant, non porous 2 component epoxy resin base coating shall be used. It shall be resistant against many diluted acids and brines as well as grease, oil, solvent and seawater and specially suited for use in hydrous media. The solids content shall be not less than 82%.The shop-applied top coat shall have a dry film thickness of not less than 6 mil |

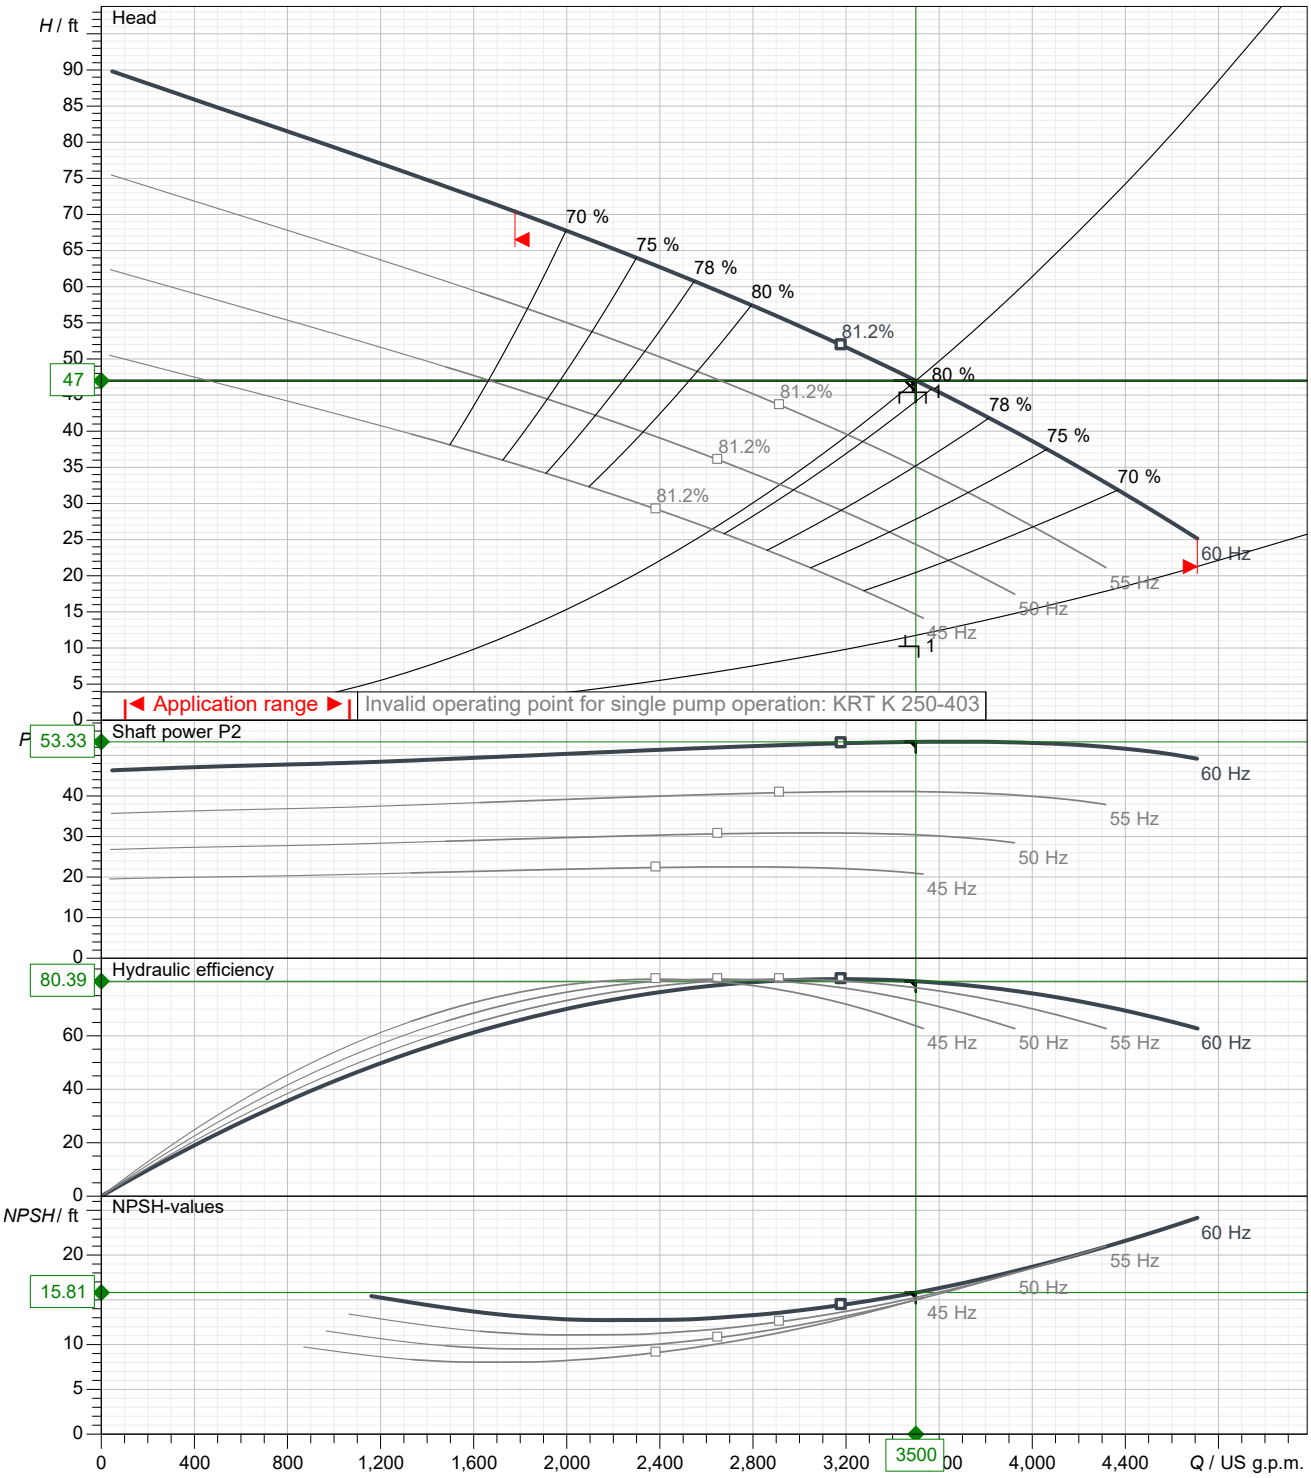
| Pos.no | Name |
|---|---|
| | (150 microns). The color shall be preferably Ultramarine Blue.<br>Name plates shall be masked or removed prior to surface preparation and coating. Polished parts and surfaces (shafts, couplings) shall not be painted but preserved against corrosion. Th coating of stainless steel parts is not required but acceptable. |
| 1.2 | Installation type: S + guide cable .. |
| | INSTALLATION<br>The pump shall be furnished with a double guide system to permit easy removal and reinstallation of the pump without the need for personnel to enter the wet well.<br>The pump shall have a guide claw used to guide the pump into place on the discharge elbow. The claw shall be bolted to the pump and not form an integral part of the same.The discharge elbow of each pump shall be permanently installed in the wet well along with the discharge piping and be designed to receive the pump without the need to remove any bolts and nuts. T discharge elbow shall suit size 10 inch flange connection to ASME/ANSI B16.1, CLASS 125. Perfect sealing between the pump and its discharge elbow shall be accomplished by an O-rin seal. The moment created by the entire weight of the pump unit shall be utilized for sealing. N portion of the weight shall bear directly on the sump floor nor shall any portion of the pump weight be supported by the guides. Simple metal to metal sealings and/ or wedge type connection systems shall not be acceptable.<br>The guide system shall be suitable for an installation depth of 15 ft (4.5 m) extending from the top of the pump well to the discharge elbow. It shall comprise of a bracket and a double stainless steel non-load bearing pre-stressed guides. The system shall function properly even the guides deviate from the vertical by up to +/- 5 degree.<br>The bracket shall be provided with all accessories and bolts forming the upper support of the guides as well as intermediate supports where required for installation.<br>Each pump shall be fitted with a stainless steel lifting chain of 8 ft (2,5 m) length with additiona lifting loops every 8 ft (2.5 m ) to permit raising and lowering the pump from the wet well prope and safely.<br>Materials:<br>Discharge elbow : Grey cast iron EN-GJL-250 (A 48 Class 35B)<br>Claw : Grey cast iron EN-GJL-250 (A 48 Class 35B)<br>Bracket : Stainless steel EN-1.4571 (A 276 Type 316 Ti)<br>Guides : Stainless steel EN-1.4401 (A 276 Type 316)<br>Lifting device: : Stainless steel EN-1.4404 (A 276 Type 316L) |
| 1.3 | Motor: 806XNG IE3 |
| | MOTOR<br>The motor shall be three-phase, dry squirrel-cage induction type in design.The motor shall be be adequately sized and rated for continuous operation to at maximum a fluid temperature of 104 °F (40 °C).<br>The motor housing shall be both air filled and watertight. Motor protection shall be at minimum IP 68. Allowable maximum submergence shall be not less than 100 ft (30 m).<br>The motor shall be rated for supply voltage of 460 V and frequency of 60 Hz and accept voltage fluctuations as per range A of IEC 60034-1 (Supply voltage +/- 5 % supply frequency +/- 2 %). The motor shall be explosionproof to CSA. NEC, FM Class I, Div. 1, Gr. C+D.<br>The motor shall be designed for a maximum of 10 number of starts per hour.<br>The motor stator shall be wound using Class H monomer-free polyester resin insulation resulting in an overall motor rating of 311 °F (155 °C), Class H. The stator windings shall be Current-UV-Dip-Impregnated resulting in a winding fill factor of at least 95 %. The rotor bars and short circuit rings shall be made of cast aluminum.<br>The motor and pump set complete shall be designed and manufactured by the same company.<br><br>COOLING |

2021/06/02 (Build 213), 32 bit R16.07.01 - 05-08-2021 ALL USA



| Pos.no | Name |
|---|---|
| | The cooling system of the motor shall be suited for the intermittent mode of operation in wet well waste water applications, submerged or partially submerged, without damage. Motors containing di-electric oils used for motor cooling and/or bearing lubrication or motors where the the pumped media or externally provided fresh water is directed through the motor shell for cooling are not acceptable.<br><br>ELECTRIC CABLE AND CABLE ENTRY<br>All power and control cables shall be suitable for the flexible connection of the submersible pumps, sized in accordance with NEC, FM, IEC requirements and shall be Ozone, UV, weather, oil and water resistant.<br>The conductors shall be made of finely-stranded copper to Class 5 of IEC 60228. Each conductor shall be insulated by ethylen-propylene-rubber (EPR). An inner sheath of rubber shall also be utilized. The cable outer sheath shall be water and oil-resistant and made of Neoprene. Each cable shall be rated for 600/1000 V and a maximum conductor temperature of 194 °F (90 °C).<br>The power and control cables shall be of 33 ft (10 m) length.<br>Each cable entry seal shall be rated for a submerged depth to 100 ft (30 m).<br>A triple sealed cable entry design along with strain relief and a bend protection shall be provided. Firstly, the cable entry seal shall consist of a elastomer grommet compressed by two stainless steel washers, sealing the outside of the cable against the cable entry casing. Secondly, the entire end of the cable shall be sealed inside the cable entry housing through the use of a non-shrink epoxy resin. Thirdly, a monolithic dam formed by either solder on bare stripped section or by an inserted Copper bushing shall seal each individual cable lead making sure that no entry of moisture is possible into the high-voltage motor terminal area even if the cable is damaged or severed below water level. Cable entries providing only simple rubber grommet (external cable jacket) seals will not be accepted.<br>If a triple sealed cable entry as described is not utilized in the pump's design, then the pump shall have installed a separate moisture sensor mounted in the separated terminal area to shut the pump down should moisture approach the high voltage terminal area.<br><br>MOTOR THERMAL PROTECTION<br>Temperature monitors shall be embedded in the motor windings for use in conjunction with and supplemental to external motor overload protection. These monitors shall be temperature sensitive PTC thermistors (temperature sensitive semi-conducting resistance devices with positive temperature coefficients). These monitors shall interface with the pump’s control and shall shut down the pump should high temperature be detected. The temperature monitors and control shall automatically reset once the motor temperature returns to normal.<br><br>MOTOR HOUSING MOISTURE PROTECTION<br>A moisture detector shall be mounted in the motor's stator cavity allowing a control panel mounted relay to de-energize the motor should leakage occur.<br><br>SEAL LEAKAGE COLLECTION AND DETECTION<br>The pump shall be furnished with a monitoring system to signal in the event either the upper or lower mechanical seal leaks. This monitoring system shall consist of a mechanical float switch located in a separate seal leakage collection chamber. The float switch shall be potential free with NC-contacts rated for 250 V AC and a current of not less than 1.5 A. The seal leakage monitoring and collection system shall be designed so that no seal leakage is allowed to penetrate into the pumps motor chamber or lower bearing assembly. Sealing of the bearing assembly shall be accomplished through the use of two rotary shaft seals in addition to the mechanical seals as described.<br><br>BEARING TEMPERATURE MONITORING<br>The lower thrust bearing shall be provided with a temperature monitor. This sensor shall be resistance type (RTD) with a linear relationship between temperature and resistance. Bearing temperature Alarm then Alarm Shutoff shall be accomplished at two separate preset temperature limits through the use of a PT 100 supervision relay mounted in the pump control panel. |

### Installation

INSTALLATION
Type of installation : Wet well installation designed for automatic connection to a permanently installed discharge elbow
Discharge elbow size (DN2/DN3) : 10 inch / 10 inch
Flange to suit : ASME/ANSI B16.1, CLASS 125
Claw : Bolted to the pump
Installation depth : 15 ft (4.5 m)
Guide system : Double pre-stressed guides
Guide max. deviation : +/- 5 degree from the vertical
Lifting device : stainless steel lifting chain
Length of lifting device: 33 ft (10 m)
Lifting loops : Every 8 ft (2.5 m )
Installation accessories : Discharge elbow, 10 inch / {P.PartNo[Co, GuideWire].Bend DN DS[Co];;;0}
fasteners, claw : bracket,
lifting chain
stainless steel guides
Materials : Discharge elbow : Grey cast iron EN-GJL-250 (A 48 Class 35B)
Claw : Grey cast iron EN-GJL-250 (A 48 Class 35B)
Bracket : {P.PartNo[Co,

# FINANCIAL INFORMATION

To Whom It May Concern:

DXP is a publicly held company whose financial information is filed quarterly with the SEC and can be found for free by going to either DXP's website (www.dxpe.com) or the SEC web site: http://www.sec.gov/idea/searchidea/webusers/htm.

Bank of America uses a third party that charges a fee up to $25 for credit verification. Third Party Credit Inquiries: www.confirmation.com (Mail or faxed requests are not accepted) Information Line: 1-866-325-7201. Account No. 488038566002

- Audit Confirmations $23.00
- Credit Inquiry-Standard $15.00
- Credit Inquiry-Expedited $25.00

If you choose not to use the DXP or SEC websites, you are authorized to use Bank of America's third party for credit verification.

Sincerely,

Stephen Wick
Controller

# DXP PURCHASE ORDER TERMS & CONDITIONS

PLEASE READ THESE TERMS AND CONDITIONS VERY CAREFULLY.

THE TERMS AND CONDITIONS ARE LIMITED TO THOSE CONTAINED HEREIN. ANY ADDITIONAL OR DIFFERENT TERMS IN ANY FORMS DELIVERED BY YOU ("VENDOR") ARE HEREBY DEEMED TO BE MATERIAL ALTERATIONS AND NOTICE OF OBJECTION TO THEM AND REJECTION OF THEM IS HEREBY GIVEN.

ACCEPTANCE OF THE PURCHASE ORDER OR OTHER DXP DOCUMENTATION, VENDOR AGREES TO BE BOUND BY AND ACCEPTS THESE TERMS AND CONDITIONS.

These terms and conditions constitute a binding contract between Vendor and the DXP Enterprises, Inc. entity identified on Vendor's invoice ("DXP") and are referred to herein as the "Agreement." Vendor accepts this Agreement by accepting a Purchase Order from DXP.

I. CONDITIONS
   a. No terms and conditions contained in any order placed with DXP other than those stated herein shall be binding on DXP Enterprises, Inc. unless hereafter agreed in writing.
   b. Purchase Orders must be accepted and confirmed through an order acknowledgement within 24 hours of receipt.
   c. DXP's Purchase Order number must be referenced on carrier's bill of lading.
   d. Orders are not binding upon DXP until an order acknowledgment is received and accepted by DXP.
   e. All order acknowledgements are subject to acceptance by an officer of DXP.

II. PRICES
   a. Prices quoted to DXP are not subject to change without notice. Vendor is responsible for typographical, stenographical, or clerical errors.

III. PAYMENT TERMS
   a. DXP promises to pay any and all amounts billed for products and services rendered. Vendor accepts the proposed payment of net 60 unless otherwise agreed upon through a mutually signed agreement. Vendor also understands that DXP may not be assessed financial charges, attorney's fees, collection costs, or any other fees, no exceptions. The financial obligation of DXP will be limited to the agreed amount stated in the Purchase Order.

IV. INABILITY TO PERFORM
   a. Vendor may be liable for loss or damage of any kind resulting from delay in delivering or inability to deliver ordered products or other nonperformance hereunder, unless such loss or damage is a result of fire, acts of civil authorities, and acts of military authorities, strikes, riots or acts of God. In lieu of actual damages for such delay, the Vendor agrees that liquidated damages as set forth in a Purchase Order may be assessed and recovered by DXP as against Vendor, in the event of delayed goods and/or material and without DXP being required to present any evidence of the amount or character of actual damages sustained by reason thereof. DXP also reserves the right to cancel partial or complete orders at its sole discretion without any liability or financial obligation to DXP.

V. CONTROLLING LAW
   a. This Agreement shall be construed and interpreted according to the laws of the State of Texas. It is further expressly understood and agreed that this Agreement shall be deemed to have been executed in Houston, Texas.

VI. DISPUTES

a. Any disputes relating to this Agreement and/or any Purchase Order will be resolved in state district court in Harris County, Texas; provided, however, that in DXP's discretion such an action may be heard in some other place designated by DXP if necessary to acquire jurisdiction over third persons so that the dispute may be resolved in one action. Vendor hereby agrees to appear in any such action and hereby consents to the jurisdiction of such courts. All attorney's fees and court costs of all the parties involved will be financial responsibility of their own.

VII. WARRANTY

a. Vendor warrants that products sold by it hereunder will be free from defects in workmanship and material, merchantable, free of all liens and security interests, and fit for their ordinary intended purpose. Vendor's obligation will be to repair or replace any such products which prove to be defective in normal use. Materials and/or goods shall be received subject to DXP's right to inspect, test and approve all such goods and/or materials prior to acceptance or payment. These materials and/or goods will be covered under warranty for a period of eighteen months from the date of delivery.

VIII. SHIPMENT

a. Any shipment dates quoted by Vendor is not subject to change, unless otherwise agreed upon by DXP, and must be submitted in writing and accepted by DXP prior to order placement.
b. Shipping terms will be FOB Destination.
c. The selection of any carrier other than one specified on this Purchase Order must be approved prior to shipment. All deviations will be debited in full.
d. Unless specified in the Ship Via box, please ship via DXP's Freight carriers:
    i. UPS Ground Collection – 150 pounds or less. Do not add additional Declared Value insurance without approval.
    ii. UPS FREIGHT Collect – over 150 pounds.

IX. RETURNS

a. DXP may return items to the Vendor. Any restocking charges may apply but must be mutually agreed to in writing.

X. EXCLUSIVE TERMS AND CONDITIONS

a. The provisions of this Agreement will not be changed or modified, except by an instrument in writing signed by DXP. This instrument, together with the acknowledgment and any attachment by DXP hereto, contains the entire and the only agreement between the parties with respect to the sale of the products covered hereby and supersedes any alleged related representation, promise or conditions not specifically incorporated herein, and notwithstanding any different of additional terms or conditions contained in Vendor's invoice or other proper communication. DXP's order was processed and invoiced only on the conditions by Vendor accepting the terms and conditions contained herein. In the absence of Vendor's acceptance of the terms and conditions contained herein, Vendor's commencement of order will not be construed as acceptance of Vendor's terms and conditions, or any of them. Any confirmation of a Purchase Order or this Agreement by Vendor which states different or additional terms will be operative as an acceptance of this Agreement, but such different or additional terms are hereby rejected unless specifically agreed upon in writing by DXP. If a contract is not earlier formed by mutual agreement in writing, Vendor's acceptance of the order will be deemed acceptance of all of the terms and conditions stated herein.

# UNIFORM SALES & USE TAX EXEMPTION/RESALE CERTIFICATE — MULTIJURISDICTION

The below-listed states have indicated that this certificate is acceptable as a resale/exemption certificate for sales and use tax, subject to the notes on pages 2—4. The issuer and the recipient have the responsibility to determine the proper use of this certificate under applicable laws in each state, as these may change from time to time.

Issued to Seller: _____

Address: _____

I certify that:
Name of Firm (Buyer): *DXP Enterprises, Inc.*
Address: *5301 Hollister St. Houston TX 77040*
*Corporate Office*

is engaged as a registered

Our technology. Your success.
Pumps ▪ Valves ▪ Service

# KRT Submersible Pumps 40 - 700

# Highly efficient and versatile

## Fields of Application:

- Raw sewage containing solid and long fibrous mixtures
- Contaminated liquids with high gas and air content
- Liquids containing sludge and solid substances
- Floating sludge and debris such as vegetable wastes, wood chips and similar waste (KRT as a vacuum suction pump on a pontoon)
- Dirty water and stormwater
- Raw, digested and activated sludge
- Flume and wash water
- Pulp
- Slaughter house wastes
- Water/product suspensions
- Sand/cement/water mixtures
- Plastic granules in liquid
- Textile effluent
- Industrial effluent and wash water as well as media in production plants, e.g. flume water, scale wastes, cutting oil and other media containing abrasive components.
- Chemical and waste disposal effluent with pH-values 2 to 12
- Effluent containing acid
- Seawater, brackish water; and other media with chlorine.

## Advantages and technical features:

- Economical installation
- Wet installation submersible motor pumps operate submerged in the pump sump
- Low building costs, eliminating intermediate shaft, drainage pump and superstructure
- Pump stations below ground do not clutter the landscape, traffic areas remain unchanged when sumps are located under roads
- The compact pump/motor sets require less space and are easy to install
- With the double pump guide rails the pump can be installed at almost any installation depth and withdrawn easily
- No need to enter the pump sump to carry out inspection and maintenance work
- Smaller inspection opening on duplex pump stations
- Small pump sump due to high permissible switching frequency
- Stationary and portable applications possible, see Types of Installations
- Permanent dry well installation possible where the pump is exposed to the danger of occasional flooding
- Minimum assembly and maintenance work
- No coupling to be aligned since KRT pump and motor have a common shaft
- No sealing or flushing water required or leakage outlet
- Motor cooled by the medium
- High operation safety (dry running possible)
- Quiet operation

## Type of construction:

KRT motor pumps are submersible, single stage close-coupled pump sets. Depending on the liquid to be pumped and the size of the pump different impeller shapes are used:

K and K-max - Closed non-clogging 2 or 3 vane impeller
E and E-max - Single vane impeller
F and F-max - Vortex impeller
S - Grinding impeller
D - Open single vane impeller

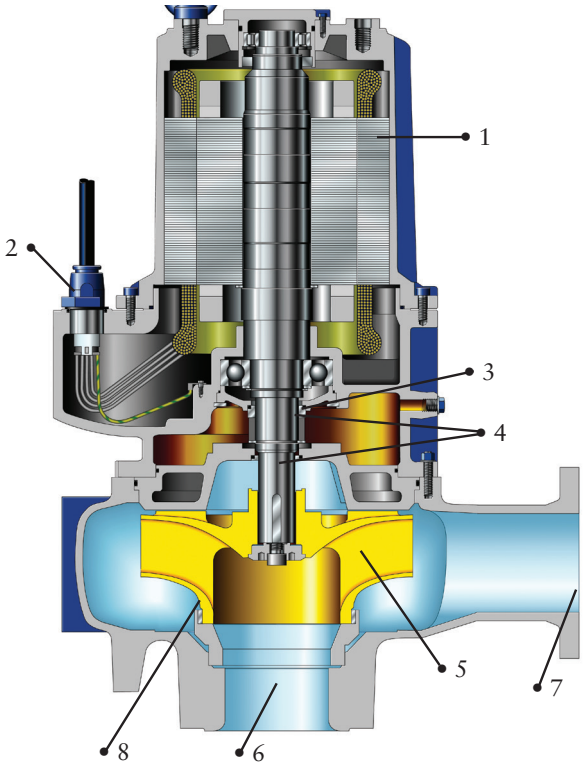
# The safe and reliable solution

### Air cooled motor design:

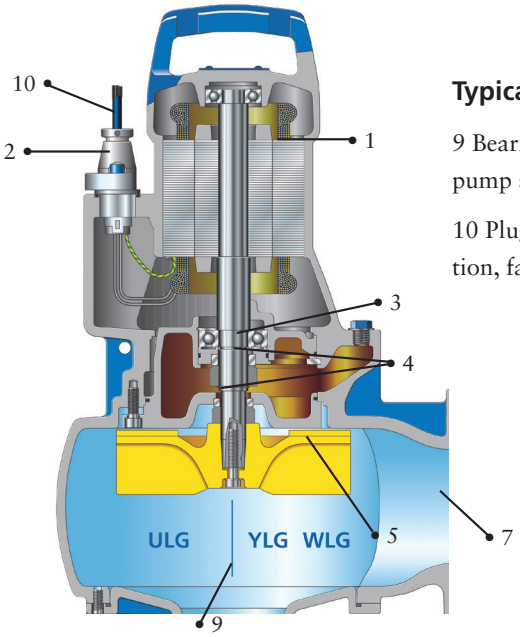
1 Reliable Motor - specifically designed for submersible pumps with air filled housings, explosion proof ratings, continuous duty cycles and automatic monitoring of winding temperature and moisture. All motors FM approved for Class I, Division 1 Group C & D hazardous locations.

2 Water Tight Cable Entry - power cables with grommet and washer. Cable entry further epoxy sealed to ensure no liquid gets inside the motor even if the cables are severed below water level.

3 Non-proprietary silicon carbide faced mechanical seals mounted in tandem in an oil bath.



4 Pump and motor shafts of stainless steel or Gr 1045 carbon steel protected and isolated by stainless steel shaft sleeves (for carbon steel shafts).



5 Flexible Hydraulic System - enclosed 1, 2, and 3 vane, recessed, grinder or open single vane impellers available to allow a hydraulic selection ideally suited for any particular application.

6 Major castings of ASTM A 48 Class 35 B cast iron, duplex stainless steel and wear-resistant chromium white iron to 64 HRC available.

7 Automatic discharge connections with a positive seal between pump and elbow ensures zero leakage.

8 Optional hard metal wear rings maintain hydraulic efficiency.

### Typical cross section of motors 5 HP and below:

9 Bearing, seal and gasket kits that are interchangeable between pump sizes, reducing spare parts costs.

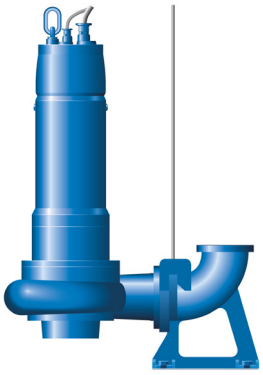
10 Plug in epoxy sealed cable entry for simple, polarized connection, fast pump installation on smaller HP motors.

# The right impeller design for cost effective and reliable operation

Because no one type of impeller is equally suitable for all applications, KSB offers the KRT series with various types of impellers according to specific requirements. Our range of vortex, single and multi-vane, non-clogging open and closed impellers allows the best selection for every application in consideration of operating parameters, including flow rate, head, efficiency, solid size, wear behavior, media, and gas content.

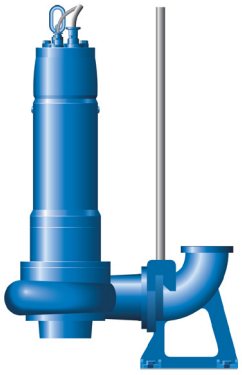
## Impeller Type and Description

**K** Closed non-clogging 2 or 3 vane impeller for contaminated solids-laden liquids
- raw sewage
- effluent
- activated sludge



**E** Single vane impeller for media with solid and long fibrous materials
- raw sewage
- raw sludge
- recirculation and heating sludge

**F** Vortex impeller for liquids with coarse solids and media containing air and gas
- raw sewage
- raw and digested sludge



**D** Open single vane impeller for handling fibrous solids and heavy sludge (up to 13% solids by weight)
- raw sewage
- raw and digested sludge
- activated sludge
- recirculation and heating sludge

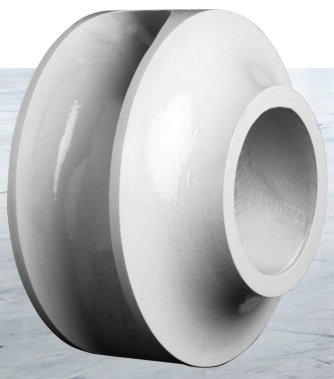
**S** Grinder impeller for high pressure domestic sewage systems containing long fibrous admixtures
- effluents
- domestic sewage

## Flexible Installation Options

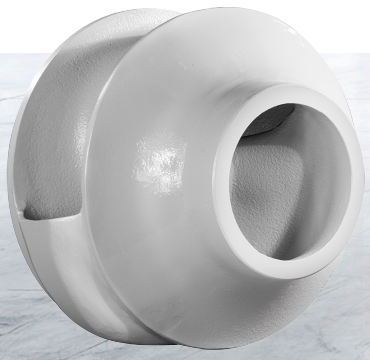
Stationary guide cable installation

Stationary guide rail installation

Portable installation

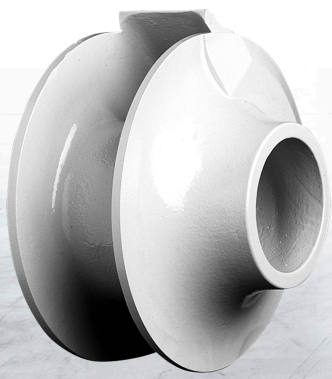


Dry installation vertical or horizontal



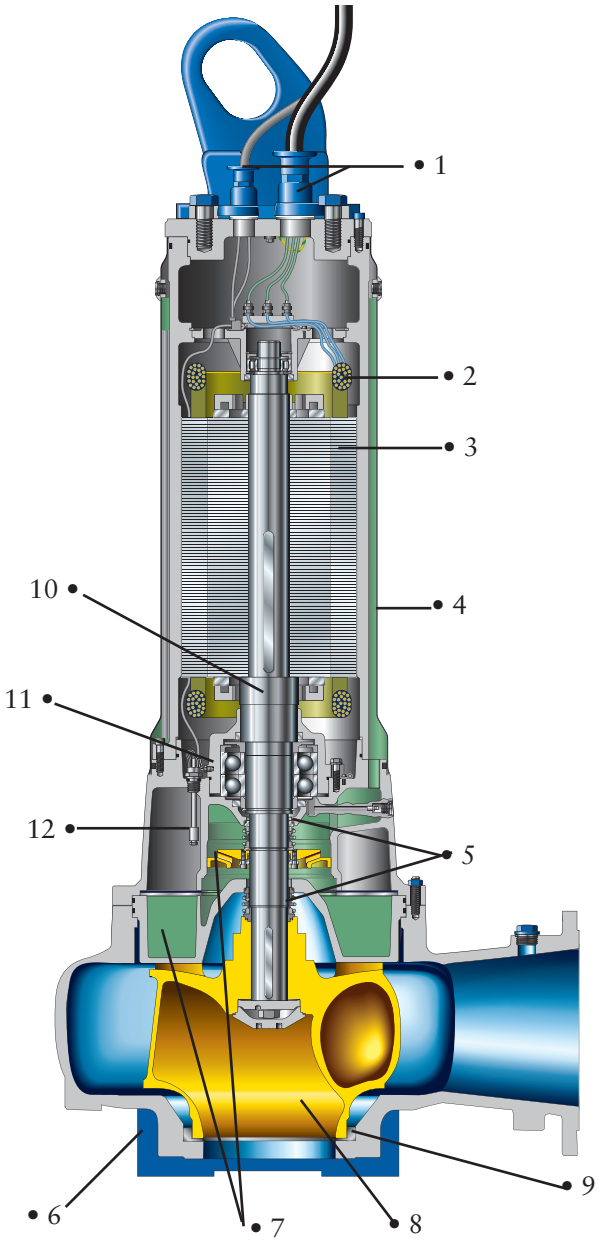
**Stationary guide cable or guide rail installation** - for wet well installation ensuring automatic pressure-tight coupling of the pump to the discharge elbow.

**Portable installation** - with stand and discharge connection for pipe or hose (e.g. with rigid coupling).



**Dry installation** - for installation in a dry well.

K



K-max

E

E-max

# The pump that keeps cool

* Closed Loop Cooling Jacketed Motors Larger than 13HP

1 Cable Entry - absolutely water tight. Even in the event of damage to the cable sheath and core insulation there is no possibility of moisture entering the motor chamber along the strands due to capillary action.

2 Thermal Motor Protection - extensive sensor technology for permanent monitoring to ensure trouble-free operation.

3 High Efficiency Motor - all motors FM approved for Class I, Division 1 Group C & D hazardous locations.

4 Optional Closed-loop Cooling System - optimal cooling in all operating conditions with no external cooling required, perfect for dry-well installations.

5 Silicon carbide faced mechanical seals mounted in tandem in coolant liquid bath.

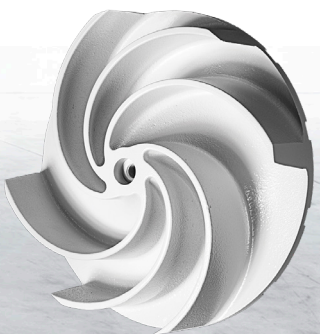
6 Major Casting of ASTM A 48 Class 35 B Cast iron, Duplex Stainless steel and wear resistant Chromium White Iron.

7 Heat exchanger and separate coolant circulating impeller for optional cooling jacket.

8 Enclosed 1, 2, and 3 vane or recessed impellers available to allow a hydraulic selection ideally-suited for any application.

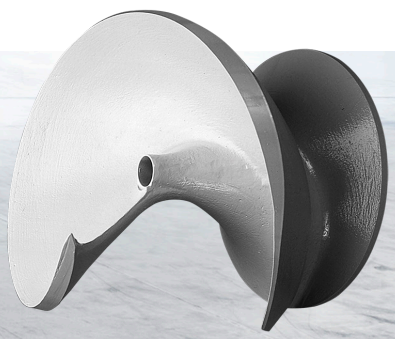
9 Optional wear rings in hard metal to ensure continued high efficiencies and long impeller life.

10 Pump and motor shafts of stainless steel or Gr 1045 carbon steel protected and isolated by stainless steel shaft sleeves.

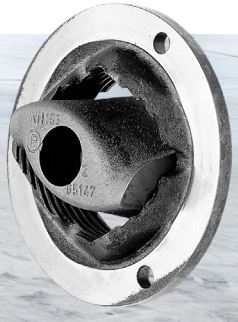


11 Temperature monitoring for lower bearing, optional lower bearing available on larger motors.

12 Float sensor in seperate leakage collection chamber available on larger motors. Prevents leakage from reaching motor or lower bearing.

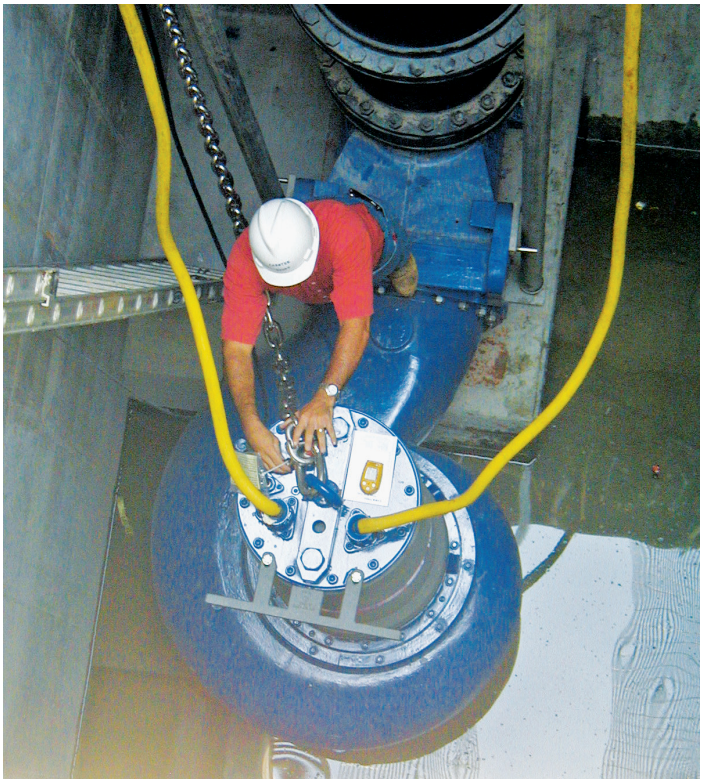


(Please consult KSB for the availability of sizes for motors larger than 80hp.)



F

F-max



D

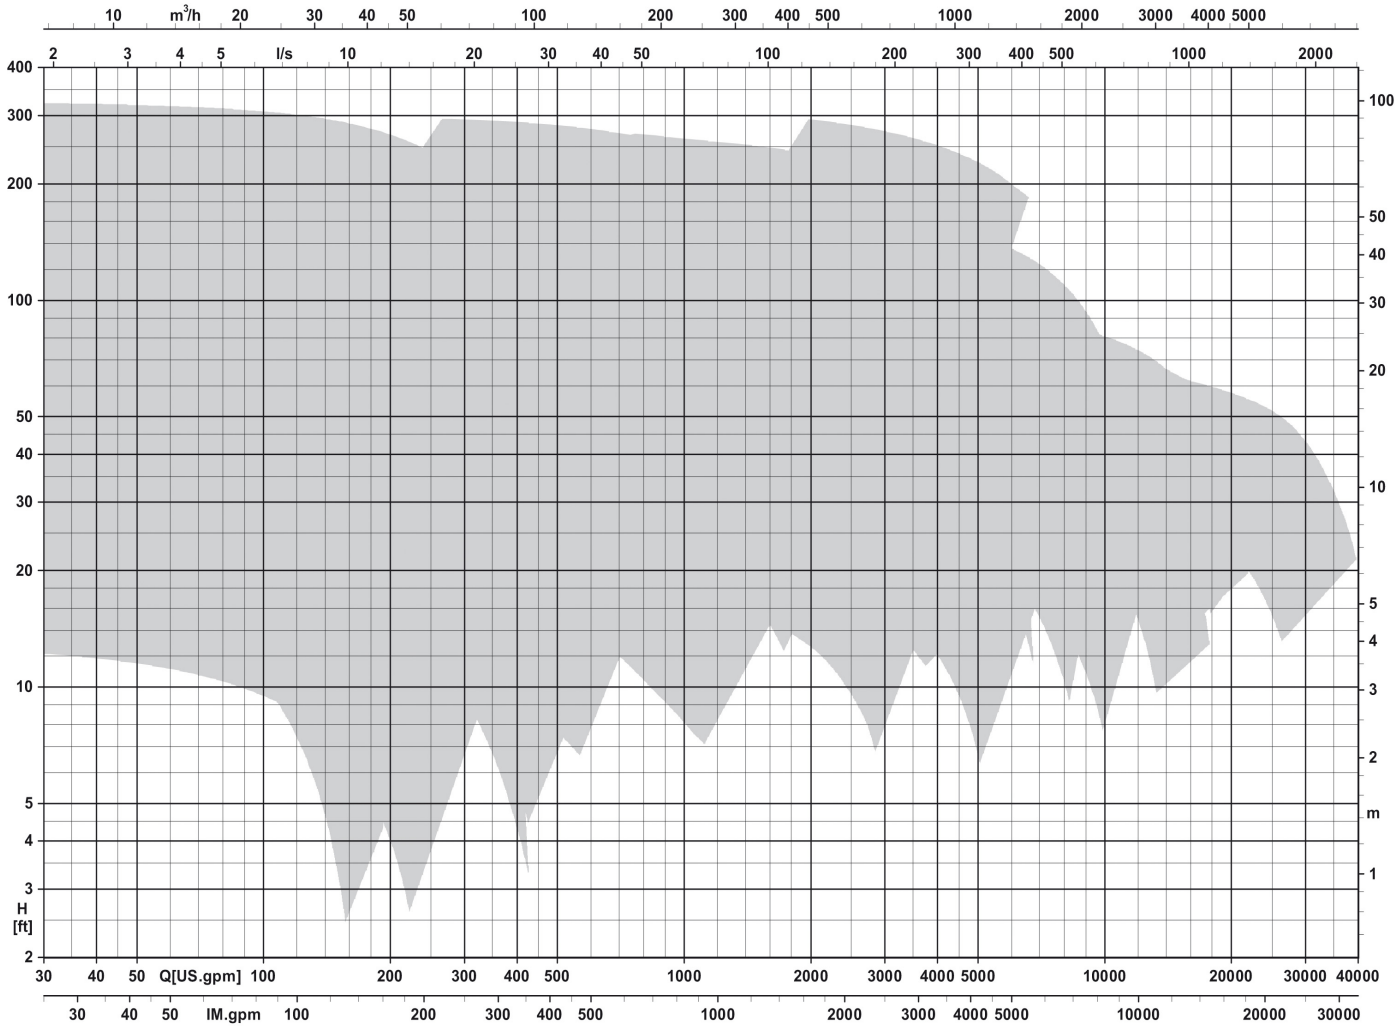
S

## Wet well installations

Two large 24" discharge, 148hp submersible pumps with stainless steel cooling jacket on KSB guide rail system for an effluent wastewater treatment pumping station.

## Dry well installations

Three 12" discharge, 161hp closed-loop cooling dry-pit pumps with stainless steel cooling jacket in existing pumping station.



Two large 24" discharge, 251hp submersible pumps and one 12" discharge, 80hp on KSB guide cable system for a storm-water station.

Three 10" discharge, 194hp closed-loop cooling dry-pit pumps with stainless steel cooling jacket in existing pumping station.

# Technical data

| Operating Data | |
|---|---|

# Amarex KRT –
# Submersible Motor Pump

## Applications:

- Wastewater transport
- Municipal and industrial wastewater
- Wastewater treatment
- Sludge treatment
- Stormwater transport

**More information:**
**www.ksb.us.com**

### Impeller options

Type F-max | Type E-max | Type D | Type K-max

# Amarex KRT – Submersible Motor Pump

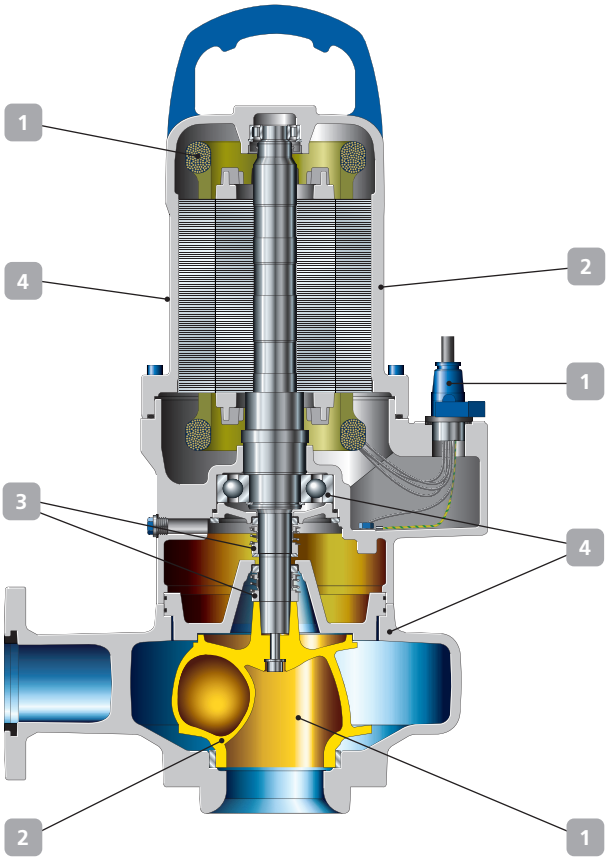
### 1 Reliable operation

- Non-clogging impellers with large free passages, optimized for every type of wastewater
- Specially protected cable entry
- Monitoring: Sensors trigger a warning in the event of overheating or ingress of moisture

### 2 Energy savings

- Optimized hydraulic system yields high efficiency
- Energy-saving motors meeting IE3 requirements*

### 3 Dependability



Two bi-directional mechanical seals

### 4 Cost efficiency

- The right material for every fluid. Available in grey cast iron or, optionally, in corrosion-resistant duplex stainless steel or wear-resistant white cast iron for a long service life
- Rolling element bearings are lubricated for life to reduce maintenance
- Optimized spare parts inventories: Standardized components are interchangeable within this type series and with the waste water pumps of the Sewatec type series

### Flexibility

Various installation types to suit different building structures

### Installation options

Wet installation with guide wire

Wet installation with guide rail(s)

Horizontal dry installation

Vertical dry installation

**Technical data**

| | |
|---|---|
| Sizes | DN 40 to 700, 1½ - 28 in. |
| Capacity | Up to 45,000 gpm |
| Head | Up to 330 ft. |
| Fluid temperature | Up to 140 °F |
| Automation possible | Yes |

* IEC 60034-30 standard not binding for submersible motors. Efficiencies calculated/determined according to the measurement method specified in IEC 60034-2. The marking is used for submersible motors that achieve efficiency levels similar to those of standardized motors to the IEC 60034-30 standard.

BACK TO MAIN KRT SPECIFICATION

# KRT PUMP START-UP CHECKLIST

## 1. GENERAL INSPECTION

Includes:

- Check if the duplicate nameplate supplied with the pump is attached either to the control unit or well head.
- Check nameplates and operating data.
- Check the coolant level (Installation types K and D only)
- Check the oil level of the seal chamber (Installation types S and P only)
- Check the direction of rotation to assure the correct rotation of the impeller (Item 5.5.6 of O&M Manual).
- Check fitness of installation of pump discharge elbow (straight thru) whenever is possible (Item 5.2 and 5.6.1.4.3 of O&M Manual).
- Check fitness of installation of wall bracket and guide wire (Item 5.6.1.4of O&M Manual). (Guide Cable Installation). Make sure the guide wire has the specified tension.
- Check the entire assembly of the guide pipes (Guide Rail Installation)
- Check fitness of power/sensor cable(s) (Item 5.5.2 of O&M Manual). Lift and lower one pump to verify easy operation.

## 2. ELECTRICAL CONNECTIONS

Includes:

- Check if the electrical connection is in accordance with the Electrical connection diagram of the O& M Manual.
  When the power cable(s) of the pump has (have) six (6) conductors (T1, T2, T3, T4, T5 and T6), make sure the motor is connected in $\Delta$ connection (T1&T6 connected to L1, T2&T4 connected to L2 and T3& T5 connected to L3.
  The moisture and the thermal sensors should be connected to validate the warranty of the unit.
- Check function of monitoring devices and fill the Proof of Electrical Protection Form.
- Check the adjustment of over-current relay to FLA current.
- Check adjustment of level control switch.

## 3. RUN TEST

Includes:

- Check and register the power supply voltage and the amperage on each phase.
- Evaluate the flow and head whenever is required and whenever is possible and fill the Start-Up Form.
- Check the proper operation of the check valves and shut-off valves.

# Regional San EchoWater Project: Stringent Requirements Demand Superior Equipment

In Partnership with:
**G3 Engineering**

EchoWater Project
Bringing Water Back

The Echowater Project is upgrading the existing Sacramento Regional Wastewater Treatment Plant located in Elk Grove, California. The facility is being renovated in order to meet the new treatment requirements set by the Central Valley Regional Water Quality Control Board (CVRWQCB) and State Water Resources Control Board (SWRCB).

REGIONALSAN

## The project

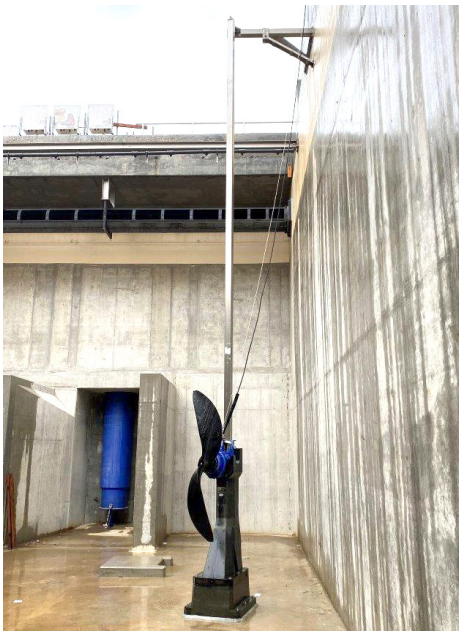
Regional San was issued stringent new treatment requirements in 2010 from the State of California to make significant upgrades to the wastewater treatment plant. The new system, with a targeted completion date in 2023, will produce cleaner water for discharge to the Sacramento River, as well as the potential reuse of recycled water (e.g. for landscape and agricultural irrigation).

This major upgrade has been given the name of "EchoWater Project" to reflect how it will utilize and process the wastewater, returning it to a clean, natural state – in the same manner that an "echo" returns to its source of origination. Once completed, Regional San will be in compliance with its regulatory permits and improve water quality by resulting in a 99 percent reduction in ammonia discharged to the Sacramento-San Joaquin River Delta. Ultimately, EchoWater will be capable of meeting the region's needs and protecting the waterways for generations to come.

PROJECT SPOTLIGHT

The EchoWater Project, which is one of the largest public works projects in Sacramento's history, comprises structures from several other projects, including Biological Nutrient Removal (BNR) tanks, granular media filters, disinfection basins, pumping stations, electrical buildings, and support facilities. The BNR process will eliminate nearly all ammonia and most nitrate, while filtration processes will help remove smaller particles and pathogens from the effluent. Enhanced disinfection will also be implemented to inactive pathogens.

## Key Success Factors



Meeting rigorous reliability and energy efficiency requirements, KSB pumps and mixers serve the heart of the plant. The KSB equipment, supplied in three different project phases, will play a critical role in achieving the stringent requirements issued by the State of California. Additionally, the experience and expertise of KSB and KSB manufacturer representative, G3 Engineering, greatly contributed in the selection process for this complex and highly demanding project.

| KSB Equipment | Applications | Qty. |
|---|---|---|
| KRT Pumps | **Nitrifying Sidestream**<br>Waste Activated Sludge, Stormwater, Mixed Liquor | 20 |
| | **Biological Nutrient Removal**<br>Wet Well Drainage, Primary Effluent Jetting, Bay Drainage, Gravity Diversion Drainage, CFE Drainage, Ox6 Scum Pumps, PE Splitting Scum Pumps, Deoxygenation Scum Pumps, RAS Pre-Anoxic Scum Pumps, Stormwater, Mixed Liquor Flow Splitting Scum Pumps | 27 |
| Amaprop Mixers | Mixed Liquor Fermenter and Anaerobic Mixing, Deoxygenation Mixing, RAS/Pre-Anoxic Channel Mixing | 54 |
| Sewatec Pumps | Waste Activated Sludge, Mixed Liquor Fermenter, Drainage | 14 |
| Amacan P Pumps | Mixed Liquor Recycle | 16 |

Subject: S. P. Kinney Automatic Self-Cleaning Strainer(s) for...
16" Model "AP"

SPK Proposal: File KN-42221- A-GJB

Gentlemen:

Per your most recent inquiry, we are pleased to offer for your consideration the equipment as listed below and described in the attached circulars and drawings - subject to the enclosed terms and conditions.

**S. P. KINNEY AUTOMATIC STRAINERS**

**MOTORIZED SELF-CLEANING DESIGN**

**of the**

**HEAVY DUTY, ROTATING DRUM TYPE**

We are pleased to offer the following....

**ITEM #1**

**THREE (3**) - 16" Kinney Model "AP" Automatic Self-Cleaning Strainer as shown on typical Drawing # 25923, Bulletin #512 and further described below, we are pleased to offer…

**CONSTRUCTION:**

| | |
|---|---|
| Body - | Cast Iron |
| Cover & Bonnet - | Cast Iron |
| Drum - | Cast Iron |
| Shaft - | Fabricated Steel; Ceramic Coated |
| Backwash shoe- | Cast Iron |
| Media | 1/64 Perforated Delrin Discs, (460 microns) |
| Inspection Window Cover - | Transparent |
| Packing Assembly - | 915DN |

**SERVICE CONDITIONS:**

**Strainer design capacity when in use on a fresh water system will exhibit an approximate pressure drop of < 1.87 psig (clean) for normal flows of 3,500 USGPM**

| | |
|---|---|
| Design Pressure: | 150 psig @ 100°F |
| Minimum Working Pressure: | 2 psig |
| Normal Working Pressure: | 2 - 20 psig |
| Hydrostatic Test Pressure: | 225 psig |

**STRAINER DRIVE & MOTOR:**

1.5 HP, 230/460 Volts, 3 Phase, 60 Hertz, 1800 RPM, Totally Enclosed Fan Cooled

Strainer Dry Weight (approx): 8,900 Lbs. Each

We offer the following

**AUTOMATIC BACKWASH CONTROLS / ACCESSORIES**

**ONE (1) PER AUTOMATIC STRAINER** - Control system consisting of a motor operated valve(s) and accessories as described below, we are pleased to offer…….

(1) 3" Wafer Valve complete with electric operator for installation in the backwash inlet manifold.

(1) 3" Wafer Valve complete with electric operator for installation in the backwash discharge manifold.

(1) Pressure Differential Switch

(2) Pressure Gauges

(1) Control Panel – Standard (Size: 25.5"H x 16" W x 9"D)

S. P. Kinney's standard controller is a NEMA 4X 316 SS Classified Control Station –

Which is AS PER SPECIFICATIONS

**NOTE:** The strainer control panels are suitable for wall mounting - not free standing. The price quoted includes only the hardware as listed, internally pre-wired to a terminal block. External wiring from the strainer motor, backwash valve, differential pressure switch to the panel and the labor to wire are not included and is to be done in the field by others.

2 Days Start up and Training **$2,000.00**

**LUMP SUM……..US$ 462,872.00**

# NOTES

## GENERAL NOTES

G1). This quotation does include field installation or supervision.

G2). The equipment will be completely factory assembled and palletized for shipment. Identification marking will be per customer instruction.

G3). Equipment installation does not form a part of this offer. Leveling shims, field grouting and anchor bolts are to be supplied by others, at time of installation.

## DRAWINGS & MANUALS

D1). Pricing includes documentation submittals as follows:

A). Certified Drawings - Three (3) Copies

B). S.P. Kinney Standard Installation, Operation and Maintenance Manuals – One (1) Hard and one (1) Electronic copy. Each manual contains; dimensional drawings, spare parts lists, installation, operation and maintenance procedures and lubrication data.

**NOTE:** Any additional standard IO&M manuals shall be supplied at an additional cost of US$250.00/ EA. Any manuals of a special nature, other than SPK standard manual, shall be priced accordingly as required by specifications or by customer request based on type and quantity of manuals required.

D2). All drawings associated with the proposal should be considered "typical", and for reference only. After receipt of formal purchase order, certified drawings shall be submitted for approval. If waived, certified drawing will be submitted for record purposes.

## TECHNICAL NOTES $ EXCEPTIONS

T1). Replacement parts are neither INCLUDED OR REQUIRED at start-up nor anticipated within the first two (2) years of operation.

T2). The factory testing will consist of hydrostatic pressure test, motor run test and dimensional verification. Purchaser and/or his representatives are welcome to witness these tests. All additional test requirements invoked by the Purchaser will be evaluated and quoted upon review.

E1) SPECIFICATIONS 11320 SPARE PARTS FOR PLC HARDWARE

**PRICING & DELIVERY NOTES**

P1). Prices quoted are FOB: Our Factory, FULL FREIGHT ALLOWED
(FREIGHT WILL BE ADJUSTED AT TIME OF SHIPMENT)

P2). Any applicable Federal, State, GST & Provincial type taxes are not included and are for purchaser account.

P3). The prices offered above will remain firm for a period not to exceed SIXTY (60) days from the date of this offer.

P4). Terms of sale: 100% Net 30 days. Orders in excess of US$200,000.00 are subject to progressive payments as follows:

| | |
|---|---|
| Order Placement | 10% |
| Completion of engineering submittals | 20% |
| Raw material delivery | 30% |
| 50% manufacturing completed | 30% |
| Shipping, ex-works | 10% |

P5). Proposed delivery: 30 Weeks after FINAL approval

We trust the proposal offered above meets with your approval. If we may be of any additional service, please do not hesitate to contact us.

Very truly yours,

S. P. KINNEY ENGINEERS, INC.

Greg Billigen

# BID PROPOSAL

Date 30 March 2022

Bid Proposal of * Amiad USA (hereinafter called "Bidder")

a ** corporation organized and existing under the laws of the State of

North Carolina.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: Addendum 1, Addendum 2,

.

BASE BID:

The Bidder agrees to perform all fabrication, installation, and training as specified in the proposal (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 01A, 01D, 11H, as described in the Contract Documents, for the Lump Sum of _____ to be sold by IES Southwest DOLLARS ($_____).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $_____ |
| Membrane Facility/Strainer | $To be quoted by IES-Southwest |
| Chemical Facility | $_____ |
| Blower Building | $_____ |
| Electrical Building | $_____ |
| Chlorine Contact Basin | $_____ |
| Site Work | $_____ |
| Performance & Payment Bond Cost *(If Applicable)* | $_____ |
| Total Subcontract Amount | $_____ |

The name of the proposed Bonding Company is N/A

Bond rate _____%

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $_____.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): _____.

Position: _____ Rate: _____.

Equipment: _____ Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☑ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR Bidder is in process of renewing the Prequalification Form

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | SM (initials) |
| Please find exceptions to check to spec submitted on a separate sheets | |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | (initials) |
| Our proposal is valid for ~~90~~ 30 days from date of quote (22 Mar 2022) | SM |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | SM (initials) |
| | |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | SM (initials) |
| No extended warranties are offered. | |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | (initials) |
| We have not reviewed the Purchase Order Agreement and it has yet to be reviewed by our legal department. | |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | SM (initials) |
| | |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | SM (initials) |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | SM (initials) |
| We are in the process of renewing our Pre-Qual form with McCarthy | |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | SM (initials) |
| | |

| | |
|---|---|
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | SM (initials) |
| | |
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | SM (initials) |

Within fifteen (~~10~~ (15)) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

# Proposal Package-R2

**Proposal Number:** IE-ABF10KILX-121521-R2 Date: 4/5/2022

Company Name: McCarthy Building Companies, Inc

Attn: Jason House
Tel: (972) 322 1125
E-mail: jjouse@mccarthy.com

Project Name: City of Chandler, Arizona
Reclaimed Water Interconnect Facility Project
City project No. WW1901.203

Engineering Firm: Wilson Engineers

Specification Section(s): 11320-Self-Cleaning Strainers-100% submittals (February, 2022)

## Given Design Criteria

Application Description: 2+1 system design (see clarification for recommended installation)
16" flange connection
Separate controller for each filter
Separate backwash assist pump to address the possible low operating pressure

System Flow Rate: 3475 gpm / per filter (5 MGD)
Filtration Degree: 500 µ
Water Source: Process water
Water Use: Pre Membrane
Stated Operating Pressure: 18 psi (Minimum)
Stated Operating Temperature: 20 °C (Minimum)
Available Power: 480V AC, 3-Ph, 60 Hz
Stated TSS: Not provided

## Amiad Contact Information

Regional Sales Manager: Ruben Delgadillo
Telephone: ***(925) 550 9458***

# Proposal Package - Pricing

**Proposal Number:** IE-ABF10KILX-121521-R2

| Item | Quantity | Part Number and Description | Unit Net Price (USD) | Extended Net Price (USD) |
|---|---|---|---|---|
| 1 | 3 | 16" ABF-10000 In-line automatic self-cleaning filter body, epoxy coated carbon steel, with 150 lb ANSI inlet and outlet flanges, with 3" electrically actuated flush valve (full port ball valve) with S70/120V AC actuator, with 1.0 hp premium eff. NEMA rated Baldor motor and routine test per specs requirements, with necessary adaptors and couplings, with stainless steel name plate | $ 64,476.73 | $ 193,430..19 |
| 2 | 3 | 500 micron screen element, ABF-10000, 316 stainless steel, perforated | Included | |
| 3 | 3 | **Backwash assisted pump**: Gould's model 3657M, end suction centrifugal horizontal pump, cast iron/bronze fitted material, with 10 HP, 1750 RPM,TEFC motor to meet the specification requirements (section 16225); pump operating point shall be 310 gpm @ 30 psig) | Included | |
| 4 | 3 | Accessories required for backwash assist pump operation: 1 x 3" ARI flow indicating check valve, 2 x pressure gauge (suction and discharge), 1 x 3" manual throttle valve/lever operated | Included | |
| 5 | 3 | AML3 controller for single (1) filter control, with Allen Bradley MicroLogix 1400 PLC & PanelView 800 color touch HMI, 480/3/60 power supply, UL approved, with NEMA 4X enclosure, with power and signal to electric flush valve and backwash assist pump, with dry contact output for filter flush in progress and fault; with input for remote filter flush (input to be generated by customer's SCADA system depend on the pressure available in the system); with backwash lockout to prevent simultaneous backwash of the filters (filters will be backwashed sequentially and one after the other); with provisions to backwash the filter system with or without backwash assist pump depending upon the pressure available in the system. | Included | |
| 6 | 1 | Complete submittals and O&Ms | Included | |
| 7 | 3 | On site service of Amiad's technical representative for installation check, adjustments, and training (1 day- including traveling, lodging, meals, and incidentals)-3 separate visits to meet the specification requirements | $ 3,500.00 | $ 10,500.00 |
| | | | **FILTRATION LOT PRICE** | **$ 203,930.19** |

**Deduction**

| | | | | |
|---|---|---|---|---|
| 8 | 3 | **Net cost deduction** to provide 16" ABF-10000HF **On-line** High Flow filter in lieu of the in-line filters in item #1above (refer to the conceptual drawings included in this proposal to identify the difference between the in-line and On-line models. All other features in item #1 remain unchanged) | $ 5,850.00 | **$ 17,550.00** |

**Adders:**

| Item | Quantity | Recommended Spare Parts: (Per filter)/for 12 months period | | Unit Net Price | Extended Net Price |
|---|---|---|---|---|---|
| 9 | 2 | 770104-000076 | Cylinder seal | $ 50.85 | $ 101.70 |
| 10 | 1 | 770102-000188 | Housing O-ring P2-471 | $ 21.15 | $ 21.15 |
| 11 | 2 | 770101-000053 | O-ring 32 x 4 | $ 5.40 | $ 10.80 |
| 12 | 1 | 770101-000055 | External flange O-ring | $ 5.40 | $ 5.40 |
| 13 | 2 | 710103-001885 | Stainless steel brush | $ 164.25 | $ 328.50 |
| 14 | 1 | 700101-000858 | 500 micron perforated screen element | $ 1,600.30 | $ 1600.30 |
| | | | | **SPARE PARTS LOT PRICE** | **$ 2,067.85** |

**Shipping Point:** Mooresville, NC (ExWorks Seller's Factory)
**Terms of Payment:** Net thirty (30) days.
**Estimated Delivery:** 20-22 weeks, ARO and approval of all submittal items

**Amiad's standard terms and conditions will apply. A copy of this standard Terms and conditions has been included in this proposal.**

**Notes:**

1. **A non-return check valve is required at the outlet of each filter as backflow to the above filter will damage the screen. - VALVE TO BE PROVIDED BY OTHERS**
2. **Filed wirings to be done by others.**
3. Terms and Conditions:
   A. Prices are valid for ninety (90) days from the date of quotation. Any changes to the proposed items will nullify this quote and change shipping times.
   B. The above equipment is designed for use in North America only. Shipment or use outside of North America without the express written consent of Amiad Filtration Systems will void equipment warranty.
4. ***Minimum of two weeks notification is required to schedule on-site services***
5. ***Freight charges will be applied at the time of order.***

# Proposal Package – Clarifications

**This proposal is based only on the information received in section(s): 11320, 01300, 01821, 01640, 01750, 01660, 01650, 01800, 16225, 11295, Addendum 1, and Drawings M-1.21 to M-1.25. Amiad shall not be responsible for the requirements and the specifications stated elsewhere.**

**Section 11320-Self-cleaning Strainers:**

**1.4 B. 1.c.:** Hydrostatic and clean screen pressure drop tests shall be done per the specification requirements and be signed by our factory engineers in Israel that are NOT certified in USA.

**2.2 A. 1.:** In order to meet specification requirements, Amiad scope of supply contains 3 separate controllers and there (3) backwash assist pumps. However, Amiad strongly recommends using a single filter controller and single backwash assist pump where all three (3) filters operating online handle the entire flow and if one filter goes fault, then remaining two (2) filters handle the total flow until the fault filter is rectified. This is the best industrial practice to operate multiple filters installed on a common inlet and outlet manifolds to ensure equal wear and tear among the filters and enhance the longevity of the system. This method assures the proper self-cleaning process for every filter in the system and ensures smooth operation of the entire system.

**2.3 B. 2.:** Strainer units shall have an electrically actuated full port ball backwash valve in lieu of a hydraulic valve. This electric valve ensures proper operation of the filter backwash cycle due to low pressure available.

**2.3 B. 3 & 4.:** Please clarify how does Amiad local controller know if the system is met the minimum pressure requirement for the backwash so that it can use pipeline pressure for backwash or utilize the backwash assist pumps. Amiad assumes customer's SCADA system will generate two separate dry contact inputs based on the pressure available so that Amiad controller can choose relevant backwash method. However, if the operating pressure is less than 18 psig during normal system operation, Amiad strongly recommends utilizing only the backwash assist pump for filter system backwash to maintain the simplicity of the filter design and prevent unnecessary obstacle in the backwash line due to the backwash assist pump that is not been in use during filter system backwash when using the pipeline pressure and water.

**2.3 C. 1. b.:** Motor speed shall be 1,770 rpm rather than 3,450 rpm.

**2.3. E. 1.:** Anchor bolts to be provided by others.

**2.3 G. & H.:** Control panel shall be one of Amiad's custom controller designs that may not be satisfied the referenced project specifications in these sections. All instruments and control components shall be our standard.

**2.4. A.:** Filter internal and external coating shall be per Amiad's standard. More information about Amiad's standard painting shall be provided at the submittal stage.

**Section 01300:**

**1.4 . A. & 1.8 A.:** All submittal shall be in electronic format and hard copies and binders to be prepared and provided by others.

**Section 01640:**

**2.1. B. 4.:** Anchor bolts to be provided by others.

**Section 01800:**

**1.4 C.:** The proposed equipment contains Amiad's standard actuators.

**1.4 D.:** The system has been designed with separate controller and a backwash assist pump for each filter. It is highly recommended to operate the system with single controller in order to prevent complexity of the design.

Filter isolation valves are not included in Amiad proposal and to be provided by others.

**Section 16225:**

Exception is taken to the bearing RTD. This is not possible for motor this small.

**Section 11295: Hydraulic Valves**

Exception is taken to this section in its entirety. Our proposal does not include any hydraulic valve. The filter backwash valve shall be electrically actuated valve.

Amiad USA, Inc.
120 Talbert Road, Suite J
Mooresville, NC 28117
Tel: 704.662.3133
Fax: 704.662.3155
Toll Free: 800.243.4583
E-mail: infousa@amiad.com
Web: www.amiadusa.com

**Division 16 & 17:**

Exception is taken to this section in its entirety as Amiad has limitations regarding SCADA integration. Our proposal includes custom controller design with MicroLogix 1400 PLC and PanelView 800 color touch HMI. These controllers will use a remote input generated by customer's SCADA system (based on the pressure available in the system) to initiate backwash cycle. If this is not acceptable or non-negotiable, Amiad shall examine our possibility of meeting the requirements in division 16 by subcontracting the controller to a 3rd party vendor that can design the controller according to the specification requirements and this proposal shall be revised to reflect any additional cost associated with this task.

**Drawing Sheet M-1.21, M-1.22, M-1.23, M-1.24:**

The filter backwash line shall be on the top of the filter rather than on the bottom shown in these drawings.

# Proposal Package - Technical Specifications

**Proposal Number:** IE-ABF10KILX-121521-R2

## General Requirements

| | |
|---|---|
| Minimum flow for flush cycle: | 310 GPM |
| Minimum pressure for flush cycle: | **30 PSI (to be provided by the backwash assisted pump in the scope)** |
| Maximum operating pressure: | 150 PSI |
| Maximum operating temperature: | 140 °F |
| Maximum allowed TSS: | <15 ppm |
| Screen type: | Perforated |
| Filtration Area: | 1,550 in²/Per filter |
| Inlet/Outlet diameter: | 16" |
| Filter housing diameter: | 24" (On-line HF and In-line) |
| Dry weight*: | ~1,466 lb (In-line) / ~1,259 (On-line)-Per filter |
| Shipping weight*: | TBD |

* Dry/wet weight includes only the filter and screen.

## Flushing Data

| | |
|---|---|
| Exhaust valve: | 3" |
| Flush cycle time: | 15 seconds |
| Flush water per cycle: | ~78 gallons (based on 15 seconds backwash cycle duration) |
| Minimum flow for flush cycle: | **310 GPM** |
| Minimum pressure for flush cycle: | 30 PSI |

## Control & Electrical

| | |
|---|---|
| Rated operational voltage: | 480V AC, 3-Ph, 60 Hz |
| Electric motor: | 1.0 HP |
| Current consumption: | TBD |
| Control voltage: | 120 V AC |

## Construction Materials

| | |
|---|---|
| Filter Housing and lid: | Epoxy coated carbon steel 37-2 |
| Screen Element: | Perforated - 316L stainless steel |
| Cleaning Mechanism: | 316L stainless steel, Polyacetal |
| Exhaust Valve: | Ductile iron |
| Seals: | Synthetic rubber |
| Control Panel Enclosure: | NEMA 4X/Polycarbonate |

## SUBMITTAL DEVIATION/CLARIFICATIONS SHEET

## Submittal No. 01-e13466-0 Tote Weight Scale

**Specification Section 13466 – Floor Scale and Instruments**

**All deviations between this submittal package and the requirements of the contract documents are listed below.**

1. **Reference provided deviations and clarifications from manufacturer for various items for this equipment. Advise of any issues with these.**

2. **Submittal is for the Citric Acid Weight Scale, SCL-460-230, shown on drwg 460-M-02 along with the Weight Scale Element, WE-460-230, and Weight Scale Transmitter, WIT-460-230, as shown on drwg 460-E-01.**

3. **For Clarification, optional ramp and scale guard have not been included within this scope for this particular application.**

4. **Spec 13466-1.04.C – Manufacturer's Installation Instructions are included however O&M Submittal per Spec01782 are not identified to be provided.**

5. **Training of Owner Personnel per Spec 01756 is not listed as required and therefore will NOT be provided unless directed otherwise.**

METTLER TOLEDO

## SECTION 13466

## FLOOR SCALE AND INSTRUMENTS

### PART 1 GENERAL

### 1.01 SUMMARY

A. Section includes:
1. Weight instruments used to measure weight of chemical tote bins on concrete pedestal.
2. Mounting hardware for indicators and load cells.

B. National Electrical Manufacturers Association (NEMA):
1. 250 - Enclosures for Electrical Equipment (1000 V Maximum).

### 1.02 REFERENCES

A. National Institute of Standards and Technology (NIST):
1. Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices.

### 1.03 DEFINITIONS

A. NEMA:
1. Type 4X enclosure in accordance with NEMA 250.

### 1.04 SUBMITTALS

A. Product data.

B. Shop drawings: Include the following:
1. Connection diagram.
2. Loop diagram.

C. Manufacturer's installation instructions: Include mounting details.

D. Certificates:
1. Certified calibration data meeting NIST Handbook 44, as applicable to commercial weighing.
2. National Type Evaluation Program Certificate of Conformance.

### 1.05 QUALITY ASSURANCE

A. Manufacturer qualifications: Manufacturer has minimum of 5 years of successful operation of similar scales in similar installations.

### 1.06 WARRANTY

A. Submit manufacturer's standard warranty modified to comply with Contract Documents.

## PART 2 PRODUCTS

### 2.01 INTEGRATED SYSTEM OF WEIGHT SCALE, PLATFORM, AND LOAD CELL

A. Manufacturers: One of the following, or equal: Exception #1
   1. Mettler-Toledo Model 2256 VLC floor scale with ~~Panther Plus~~ Digital Indicator.
   2. ~~Force Flow Model 48-DR 50TBS floor scale with solo G2 digital indicator.~~

B. General provisions:
   1. Provide 1 electronic floor scale systems for the purpose of monitoring chemical solution consumption from a tote bin.
   2. Each scale shall have an overall platform size of 48 inches wide by 48 inches long by not more than 5 inches tall and shall have a gross weighing capacity of 5,000 pounds.
   3. The scale should be constructed for use in a washdown environment and shall have components suited for that environment.
   4. The scale platform and subframe assembly shall be constructed of Type 316 stainless steel or steel with Tuffcoat system.

C. Load cells:
   1. Load cells shall have the following individual characteristics:
      a. Temperature stable, rolling diaphragm type, allows 4-degree tilt of load plate without affecting scale accuracy.
      b. Rated capacity: 2,000 pounds.
      c. Temperature compensation: -10 to +40 degrees Celsius.
      d. Maximum loads:
         1) Safe: 150 percent of rated capacity.
         2) Ultimate overload: 300 percent of rated capacity.
         3) Safe side: 100 percent of rated capacity.
      e. Gauge cavity seal type: Welded hermetic gauge cover.
   2. Load cells to be constructed of 17-4 ph stainless steel and shall have a welded hermetic gauge cover over the gauge and wiring cavities.
   3. Each load cell to have an integral conduit fitting on the cable entrance into the load cell for enhanced moisture protection.
   4. Each load cell to have a data plate affixed to the load cell which clearly shows:
      a. Manufacturer.
      b. Capacity.
      c. Part number.
      d. Serial number.
      e. National Type Evaluation Program certificate of performance number.
      f. Class number.
      g. Maximum divisions (NMax).
      h. Load cell Vmin.

D. Floor scale platform:
   1. Scale shall have an unobstructed weighing surface, use of side rails or other similar designs is not acceptable.
   2. Each scale shall have provisions for lifting the entire floor scale for periodic inspection and maintenance.
      a. The scale manufacturer shall provide a minimum of 2 threaded through hole lifting points in the floor scale for this purpose.

b. The scale manufacturer shall also provide threaded steel plugs for each of these holes to protect the lifting points during non-use.

3. A removable access plate shall be provided in the top of the floor surface to provide access to the load cell summing junction box.
4. Scale suspension shall be of a rocker foot style design to allow ease of movement and installation.
5. Load foot assembly shall be stainless steel and be threaded to allow for adjustment to compensate for uneven floor conditions.
6. A level bubble shall be provided, visible from the top of floor.

E. Junction box:

1. Scale shall have a junction box assembly mounted internally within the floor scale platform.
   a. Access to the junction box assembly shall be accomplished via removable plate in the top of the scale platform.
   b. Remote mounted, or side access junction box assemblies are not acceptable.
2. Junction box enclosure shall be constructed of Type 316 stainless steel and shall be designed to NEMA 4X standards.
3. The junction box enclosure shall have wash down duty connectors, 1 for each load cell cable, and 1 additional connector for the instrument cable.
   a. Multiple cables using single box connectors is not acceptable.
4. The junction box shall contain a printed circuit board for the purpose of individual load cell wiring termination, summing of the output signals from each load cell, trimming/balancing the load cell signals, and wiring the interface to the digital instrument.
5. The printed circuit board shall have individual connectors for each of the load cells, and the instrument interface cable.
   a. Each wire shall have a single terminal connection. Doubling up or ganging of wires to one terminal is not acceptable.
6. The summing printed circuit board shall have potentiometers, one per load cell for the electrical trimming/balancing of the load cell signals during calibration.

F. Digital display console located near the scale with integral power supply for the load cell, integral 4 to 20 milliampere transmitter with output signal proportional to the weight, and relay output (120 V, 10 amp or better rated contact) for low level alarm that will be used as an interlock to shut down the feed equipment.

1. Temperature range: 30 to 105 degrees Fahrenheit.
2. Adjustable low weight alarm relay with dry contacts for remote alarm monitoring.
3. Equipped with automatic tare.
4. Enclosure: NEMA 4X, stainless steel.
5. Power supply: 120 volts alternating current.
6. Weight indicating display.
7. Provides Type 316 stainless steel instrument column.

## PART 3 EXECUTION

### 3.01 INSTALLATION

A. Install in accordance with manufacturer's recommendations.

B. Provide field service by the scale manufacturer who shall perform final calibration and certify the scale to an accuracy of, or better than, that required by NIST, Handbook 44, as applicable to commercial weighing.

END OF SECTION

Exception #1: Panther replaced with upgraded Terminal Model IND570

# VLC

VLC

## COMMERCIAL DUTY—FLOOR SCALE

The METTLER TOLEDO model VLC floor scale is fully electronic, portable, and has a low profile…making it ideal for freight consolidators, or shipping and receiving departments. The Stainless Steel version is available in 304ss or 316ss and was designed specifically for the Food Industry where harsh wet environments are the norm. Its low-profile design minimizes operator effort when loading the scale platform. Installation is easy…whether you decide to mount it in a portable above ground configuration or install it in a preformed pit supplied from METTLER TOLEDO. The VLC floor scale can interface with all METTLER TOLEDO analog instruments and accessories.

### Applications

- OEM machinery
- Shipping and receiving

### Standard Features

- TYPE 4X stainless steel analog j-box
- Ball-in-Cup threaded foot suspension
- Hermetically sealed stainless steel load cells
- 25' plain end-to-end instrument cable

### Options

- Ramps
- Locating plates

### Specifications

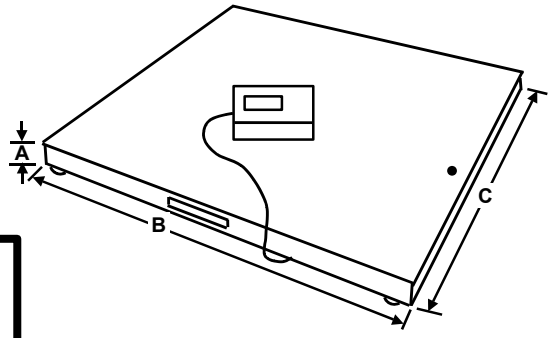
**Approvals:**
NTEP 5000d Class III, COC # 99-111A1, AM-5160, Rev. 2

**Material:**
Mild steel, epoxy painted tread plate or 304 or 316 stainless steel, bead blasted, smooth plate deck finish

**Platform sizes:**
3' x 3' , 4 x 4', 4 x 5', 4 x 6', 5 x 5', 5 x 7'

**Platform height:**
4"

**Available capacities:**
2500 lb, 6000 lb, 10,000 lb



**Standard operating temperature:**
48°F to 104°F (10°C to 40°C)

**Shipping weight:**
250 lb – 925 lb

**Compatible instruments:**
ID7, ID1-A, HAWK™, PANTHER®, LYNX®, JAGXTREME® and PUMA®

### Dimensions (in inches and feet)

Weighing Terminals

# Ready to Work

## Performance and Versatility Delivered

### Solutions for a Perfect Fit

Highly versatile in function. Constructed and approved for the harshest industrial environments. The IND570 is easily expanded with software, communication and control interfaces to meet process requirements – adding cost only when needed.

### Flexible Control Options

Support for manual and automated weighing processes. Use operator routines to collect transaction data and guarantee consistency, quality and traceability. In automated systems, allow fast-updating digital I/O and integrated applications to take control, freeing operators for other assignments.

### Secure, Efficient Access to Data

Convenient data management solutions provide data as you want it, when you need it. PLC, network, USB and standard serial communication interfaces available. Adapt data collection and transfer to meet the unique requirements of each weighing application.

### Performance Monitoring

Improve system performance and avoid expensive down-time with proactive system monitoring. Smart, user-friendly diagnostic screens and reports provide important data to service personnel and system engineers, to help keep the system running at maximum potential.

## IND570 Industrial Weighing Terminal

One Terminal, Many Solutions

Designed for performance and versatility, the IND570 industrial terminal is the easy choice for even the most challenging industrial weighing applications.

The IND570 features a broad offering of functions to manage weighing applications. Introducing advances in connectivity, performance verification and efficient, secure access to critical process data, the IND570 satisfies ever-increasing demand for measurement accuracy, reliability, efficiency and traceability.

METTLER TOLEDO

# Technical Specifications

## Physical and Electrical

| | |
|---|---|
| **Enclosures** | Harsh environment model: 304L Stainless steel, IP69K certified. Includes fixed-angle brackets for wall mounting<br>Panel mount model: Stainless steel front panel, aluminum chassis and integrated mounting hardware. Certified IP65 protection |
| **Weight** | 3.2 kg (7 lbs) |
| **Operating environment** | -10°C to +40°C (14°F to 104°F), 10% to 95% relative humidity, non-condensing |
| **Input power** | AC: 85-264 VAC, 49-61 Hz, 750 mA (harsh and panel enclosure types)<br>DC: 20-29 VDC, 1.25A (panel-mounted enclosure only) |

## Scale Interface

| | |
|---|---|
| **Supported scale types** | Analog: Up to 12 350 Ω load cells, 2 or 3 mV/V cells supported. 10 VDC excitation. Analog/Digital update rate >366 Hz<br>IDNet: High-Precision K-Line, +12V versions only, including T-Brick cell, M-Cell and Point-ADC |
| **Units** | kg, lb, tons, metric tons, g, dwt, lb-oz, oz, ozt, custom unit. Unit switching and multiple unit printing supported |
| **Capacity & increments** | 2,000,000 maximum capacity; maximum 100,000 display increments |

## Human-Machine Interface

| | |
|---|---|
| **Display** | High contrast, high resolution OLED display with 25mm-high weight indication. Decreased power consumption with OLED technology |
| **Status indicators** | Gross, Net, active Range/Interval, Units, Motion, Center of Zero, MinWeigh, Service Icon |
| **Metrology line** | Displays capacity, increments and approval class |
| **System line** | Displays weighing system messages and application information |
| **Auxiliary display** | Select from SmartTrac™ (graphic display of weighing status), rate (weight/time) or discrete I/O status |
| **Keypad** | Tactile keypad for enhanced operator experience. Clear, Tare, Print, Zero keys. Navigation keyset. Alphanumeric keypad. 5 softkeys, programmable with up to 15 unique functions to customize operator interaction with a weighing application |

## Connectivity

| | |
|---|---|
| **USB Host** | USB Host (standard): Type A connection, +5V at 500mA for connected devices. Supports external keyboards, barcode scanners and USB memory devices Use a USB hub for multiple device connection |
| **Serial** | COM1 serial port (standard) supports RS-232/422/485. Optional COM2 & COM3 serial ports support RS-232 and RS-232/422/485 |
| **Network** | Optional Ethernet interface supports speeds of 10 Mb/s and 100 Mb/s using 10 Base-T, 100 Base-TX, 100 Base-FX, and 100 Base-T4. Fully compliant with IEEE standard 802.3 and 802.3x. Full duplex flow control supported. Supports 3 simultaneous socket connections. |
| **Protocols** | MT Continuous Output, MT Continuous Extended, CTPZ input, Demand Print, Continuous Template output, ARM100 Remote I/O, Shared Data Server access, SICS, ASCII input |
| **Fieldbus** | Supports any one of the following options: EtherNet/IP, Analog Output (4-20 mA or 0-10 VDC), Profibus® DP, ControlNet™, DeviceNet™, Modbus TCP |
| **Discrete I/O** | Either 2 inputs and 5 outputs or 5 inputs and 8 outputs available internally<br>ARM100 Remote I/O modules can be used to expand total I/O support to 13 inputs and 20 outputs |
| **Interface update rates** | PLC cyclic data: 25 Hz. Int. Discrete I/O: 50 Hz. Ext. Discrete I/O (ARM100): 25 Hz |

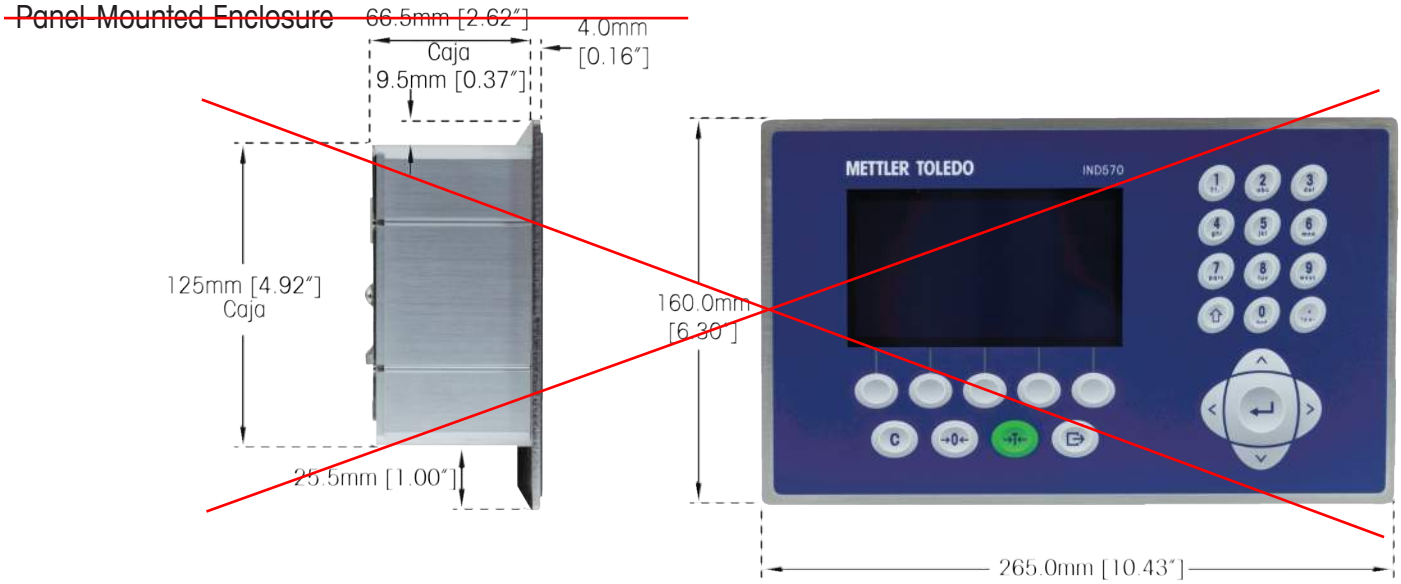
## Integrated Applications

| | |
|---|---|
| **General** | Simple, manual weighing, transaction counter, accumulation/totalization, automatic tare/print/clear, auto-zero maintenance, x10 weight display |
| **Material Transfer** | Standard software supports single material filling or dosing with integrated I/O control |
| **Checkweighing** | Static checkweighing with intuitive graphical display and integrated I/O support |
| **Remote Display** | Functions as a remote display (via a serial or ethernet connection) for another METTLER TOLEDO terminal. Simple function control (clear, tare, zero, print) provided through the HMI |
| **Data tables** | Target Table stores values for up to 200 material IDs. Tare Table stores up to 99 tare weights |
| **Alibi Memory** | Stores individual transaction data. Export as .csv file for further use |
| **Printing** | 10 customizable templates. Manual and automatic print triggers. Standard data and service reports available. Print via serial and Ethernet ports. Direct print to connected USB memory device. Direct print to USB printer is not supported |
| **ID Prompting** | Store up to four 30-step custom routines to guide users through an operating sequence. Use to assure consistency and collection of transaction data. Add external keyboard or barcode scanner to facilitate data entry |
| **USB File Transfer** |  |

## Optional Application PACs

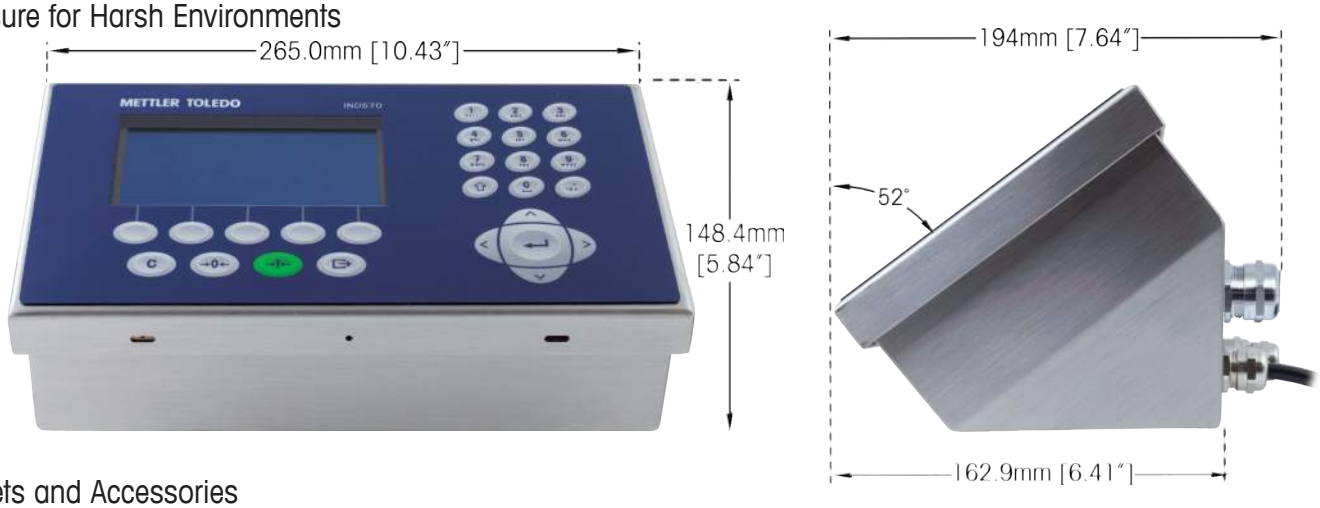
| | |
|---|---|
| **Fill-570** | Advanced control of automatic filling, dosing and blending of up to six materials. Refer to Fill-570 data brief for details |
| **Drive-570** | Supports Inbound/Outbound vehicle weighing. Refer to Drive-570 data brief for details |
| **COM-570** | Retains advanced features and functions of the IND570 while communicating with existing systems via legacy METTLER TOLEDO product protocols, including 8142 Host, 8530 Host, PT6S3 and SMA. Input Command Template allows the IND570 to recognize and respond to customer-specific commands |
| **TaskExpert™** | TaskExpert gives qualified programmers the ability to adapt the standard capabilities of the IND570 to more closely align with a user's specific application requirements |

## Performance



| | |
|---|---|
| **Diagnostics** | Error and Maintenance Logs record system events. Service icon (🔧) displays to indicate an event requiring user/service attention. Terminal Status Report provides real-time system performance data |
| **Email** | Integrated email function can deliver system notifications to designated recipients. Proxy server login supported |
| **Test Manager GWP®** | Supports routine testing of weighing system for performance verification and compliance. Test procedures with performance tolerances are stored in the terminal. Recommended testing periods are monitored and users prompted when routine testing is needed. Standard test reports and GWP Log provide documentation for compliance efforts |
| **Web Server** | Built-in web server provides tools for examining terminal operation over the network using just a web browser |

## Approvals



| | | |
|---|---|---|
| **Weights and Measures** | **USA** | NTEP Class II 100,000d, Class III/IIIL 10,000d, CoC 13-123 |
| | **Canada** | Class II 100,000d, Class III 10,000d, Class IIIHD 20,000d, AM-5593 |
| | **Europe** | OIML R76 Class II approved divisions determined by platform; Classes III and IIII 10,000e, TC8458 |
| | **Pending** | MID R51, MID R61, Australia, South Africa, Brazil |
| **Hazardous areas** | Please contact a METTLER TOLEDO representative for information about the IND570xx models for Division 2 and Zone 2/22 hazardous areas | |
| **Product Safety** | | |

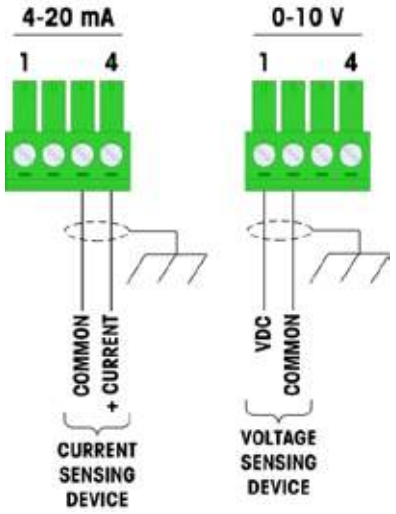
# 1.5. Wiring



**⚠ WARNING**

**DO NOT APPLY POWER TO THE IND570 TERMINAL UNTIL INSTALLATION OF COMPONENTS AND EXTERNAL WIRING HAS BEEN COMPLETED.**

**⚠ WARNING**

**IF THIS DEVICE IS USED IN AN AUTOMATIC OR MANUAL FILLING CYCLE, ALL USERS MUST PROVIDE A HARD-WIRED EMERGENCY STOP CIRCUIT OUTSIDE THE DEVICE OF CIRCUITRY. FAILURE TO OBSERVE THIS PRECAUTION COULD RESULT IN BODILY INJURY.**

The maximum recommended cable length for the 0-10 VDC output is 50 feet (15.2 meters). The maximum recommended cable length for the 4-20 mA output is 1,000 feet (300 meters). The recommended cable for use with the analog output is shielded two-conductor stranded 20-gauge cable (Belden #8762 or equivalent), which is available from METTLER TOLEDO using part number 510220190. See Figure 1-3 for connection and termination information.

**NOTES:**

**USE TWO-CONDUCTOR SHIELDED CABLE.**

**MINIMUM RESISTANCE OF DEVICE LOAD: 500 OHMS.**

**WIRE SIZE: 18 AWG (.823 mm$^2$) MAXIMUM 24 AWG (0.205 mm$^2$) MINIMUM.**

**Figure 1-3: Analog Output Kit Wiring Connections**

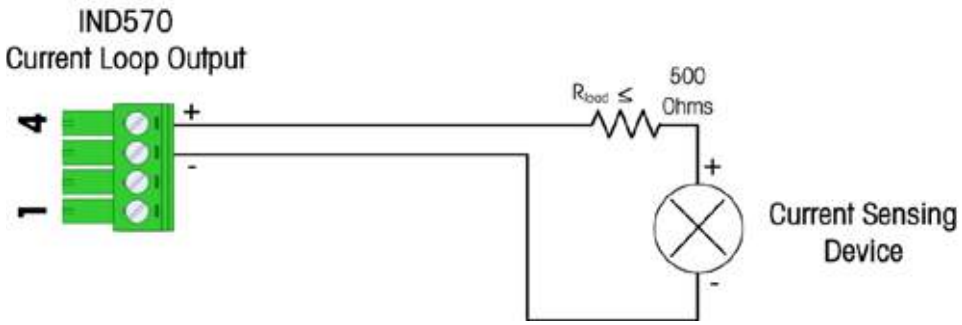


**Figure 1-4: Typical Current Loop connection**

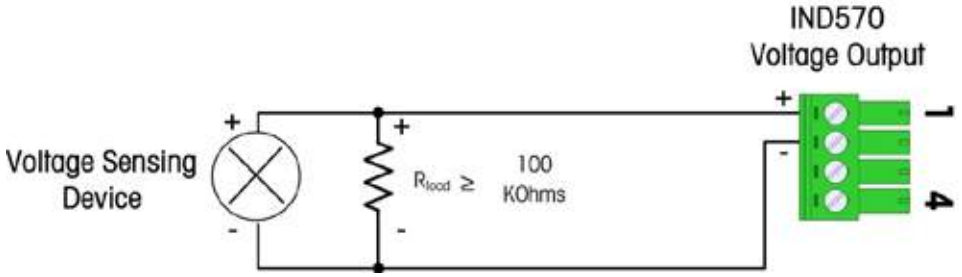

**Figure 1-5: Typical Voltage Measurement Connection**

# 1.6. Spare Parts

There are no associated spare parts with the Analog Output option kit. The kit number is 71209099. Table 1-3 shows what the kit contains.

**Table 1-3: Analog Output Option Kit**

| Description | Qty. |
|---|---|
| Installation Instructions | 1 |
| PCB Package | 1 |
| Installation Kit | 1 |
| Gland Kit | 1 |

# 1.7. Troubleshooting

Before attempting to troubleshoot the output, be sure to read the “Analog Output Operation” section of the manual – paying particular attention to Table 1-1, which explains the various operation modes for the output for the conditions of Under Zero and Over High Limit.

Check the LED Status as indicated in Figure 1-6. Use Table 1-4: to verify that the operational state of the Analog Output board matches the configuration selected.

## 1.7.1. No SIgnal

If no signal is being received from the IND570, check the following

The purpose of this page of the IND570 Tech Manual inserted into the Submittal is to confirm that Discrete I/O are in fact part of the instrumentation package that will be delivered for this project. See highlighted area below.

For example, as Figure 4-10 shows, only the **Large** size displays the high and low tolerance values, while the **Small** size only displays the current scale weight and the bar graph.

#### 4.6.2.5. Terminal > Softkeys

The terminal offers a selection of softkeys which are useful for simple filling activities.

The operator must be able to select a target and to start the filling process so, at a minimum, the **Target** or the **Target Table** softkey must be assigned, as well as either the **Target Start** or **Target Control** softkey. Refer to section 4.6.3, the **Operational Sequence Example**, to see how these softkeys function.

#### 4.6.2.6. Communication > Discrete I/O > Inputs

In some circumstances, it is necessary to perform filling tasks without pressing buttons on the terminal's front panel. This is achieved by configuring discrete inputs which correspond to the **SmartTrac**, **Target Start/Resume** and **Target Pause/Abort** softkeys, so that remote interface devices, such as large buttons, control filling. Of course, the terminal must have one of its DI/O option boards installed for this to be possible. Then it is simply a matter of mapping the remote input device to the address for the corresponding input. For instance, Target Start/Resume might be mapped to input address 0.1.1, and Target Pause/Abort to input address 0.1.2.

## 4.6.3. Operational Sequence Examples

### 4.6.3.1. Automatic Filling

When the terminal is performing filling operations automatically, the operator's main interaction with the process is to issue the start command for each fill. Essentially, this merely confirms that the correct vessel is on the scale and starts the terminal on its fill sequence. Once the fill is complete, the terminal waits to be instructed to start again, after the filled vessel has been removed and a new one placed on the scale.

#### 4.6.3.1.1. Typical Automatic Filling Sequence

In automatic filling, the terminal controls the addition of material to the vessel on the scale, so for the most part the operator merely observes the process, ready to intervene if an error should occur.

The typical filling sequence that follows assumes that a target has been selected, and that a vessel is on the scale, the scale is tared, and the terminal is in net mode.

1. Press the **Target Control** softkey . The Target Control screen will appear, with **Back** and **Target Start** softkeys displayed, and a status message reading **Ready**.
2. After checking that the right vessel is on the scale, press .
3. The terminal starts the filling process. The Target Control screen now shows a status message, **Running**, and a **Pause** softkey in place of **Target Start**. It also adds a **Stop/Abort** softkey in the fifth position. Press one of these to pause or abandon the filling process. When **Pause** is pressed, the **Start** softkey reappears, functioning as a **Resume** button. **Stop/Abort** exits the **Target Control** screen and returns to the view to the terminals home screen. Press the **Back** softkey to display SmartTrac.

# Publication Revision History

**An overview of this manual's revision history is compiled below.**

**Publication Name: 2256 VLC WEIGHT-PLATE Analog Floor Scales Installation and Service Manual**

**Publication Part Number: A14914100A Publication Date: 8/97**

| Part Number | Date | Revisions |
|---|---|---|
| B14914100A | 11/98 | Added Class III acceptable readability data on page 1-1. |
| C14914100A | 8/02 | Revised manual so that it covers the new 2256 VLC design. |
| D14914100A | 8/04 | Added information about new leveling foot. |

## INTRODUCTION

This publication is provided solely as a guide for individuals who have received Technical Training in servicing the METTLER TOLEDO product.

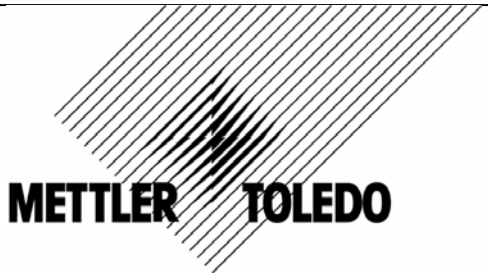
## FCC Notice



This device complies with Part 15 of the FCC Rules and the Radio Interference Requirements of the Canadian Department of Communications. Operation is subject to the following conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**METTLER TOLEDO RESERVES THE RIGHT TO MAKE REFINEMENTS OR CHANGES WITHOUT NOTICE.**

## PROPRIETARY NOTICE

The information contained in this publication is derived in part from proprietary and patented data of METTLER TOLEDO. This publication shall not be copied in whole or in part without prior written approval of METTLER TOLEDO, nor shall it be used for any purpose other than that intended. This document is subject to change without notice.

## STANDARD WARRANTY

METTLER TOLEDO warrants that the equipment covered by this warranty will be free from defects in workmanship and material for two years from date of installation or twenty-six (26) months from date of shipment to the buyer, whichever comes first.

Should any such defects be found and reported during the first thirty (30) days after installation (if installation occurs during the warranty period), METTLER TOLEDO (herein referred to as the "Company") will, at its option, refund the purchase price or correct such defects, furnishing replacement parts and service free of charge to the buyer. For the remainder of the first 12 months of the warranty term, the Company will furnish necessary replacement parts and on-site technician's service free of charge, provided the Buyer agrees to pay reasonable technician's travel time, vehicle mileage, and associated travel expenses to and from the nearest authorized Company service location. If the equipment is covered by a two-year warranty, for the last 12 months or remaining balance of the warranty period, whichever comes first, the Company will furnish the necessary replacement parts to the Buyer free of charge, provided that the Buyer agrees to pay reasonable technician's on-site labor services, travel time, mileage, and expenses to and from the nearest authorized Company service location. The following are NOT covered under any of these warranties:

1. Initial installation and ongoing scale calibration.
2. Damage to scale components by gross abuse, fire, flooding, explosion, water, voltage surges, or civil disturbance.
3. Normal maintenance or consumable items.

This warranty covers only the Model 2256 VLC WEIGHT-PLATE floor scale. Refer to METTLER TOLEDO Standard Product Warranty for coverage of other scale system components, including scale instrument, printer, and/or other accessories.

THE COMPANY EXPRESSLY WARRANTS THE EQUIPMENT MANUFACTURED BY IT AS SET FORTH HEREIN. THE COMPANY MAKES NO OTHER WARRANTIES EITHER EXPRESSED OR IMPLIED (INCLUDING WITHOUT LIMITATION WARRANTIES AS TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE). IN ADDITION, THIS DOCUMENT SHALL CONSTITUTE THE SOLE AND EXCLUSIVE REMEDIES OF THE BUYER FOR ANY BREACH BY THE COMPANY OF ITS WARRANTIES HEREIN.

COMPANY LIABILITY UNDER THIS WARRANTY OR ANOTHER WARRANTY, WHETHER EXPRESSED OR IMPLIED IN LAW OR FACT, SHALL BE LIMITED TO THE REPAIR OR REPLACEMENT OF DEFECTIVE MATERIAL AND WORKMANSHIP, AND IN NO EVENT SHALL IT BE LIABLE FOR CONSEQUENTIAL OR INDIRECT DAMAGES.

This warranty coverage is applicable only to the United States of America.

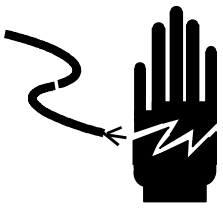
**Export Products:** The Company warrants equipment destined for export or sold for export to be free from defects in workmanship and material for a period of one year from date of installation or 18 months from date of shipment to the Buyer, whichever occurs first. Should any such defect be found within that period, parts will be furnished free of charge (ex works) point of origin or final distribution center. If the Buyer requests the performance of warranty work provided for under the foregoing warranty outside of the contiguous United States, the Buyer shall be required to pay for labor, travel time, living, and travel expenses of any personnel required to perform such warranty work.

## APPLICATION GUIDES

The only warranty of METTLER TOLEDO is for the product it supplies under the Product Warranty Statement listed above. Weighing application guidelines pertain to METTLER TOLEDO products.

# Precautions

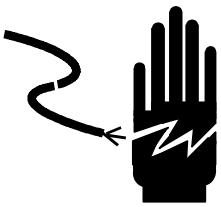
READ this manual BEFORE operating or servicing this equipment.



FOLLOW these instructions carefully.

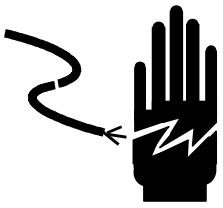
SAVE this manual for future reference.

DO NOT allow untrained personnel to operate, clean, inspect, maintain, service, or tamper with this equipment.



ALWAYS DISCONNECT this equipment from the power source before cleaning or performing maintenance.

CALL METTLER TOLEDO for parts, information, and service.



**⚠ WARNING**

**PERMIT ONLY QUALIFIED PERSONNEL TO SERVICE THIS EQUIPMENT. EXERCISE CARE WHEN MAKING CHECKS, TESTS, AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM.**

**⚠ CAUTION**

**FOR CONTINUED PROTECTION AGAINST SHOCK HAZARD, CONNECT TO PROPERLY GROUNDED OUTLET ONLY. DO NOT REMOVE THE GROUND PRONG.**

**⚠ WARNING**

**DISCONNECT ALL POWER TO THIS UNIT BEFORE INSTALLING, SERVICING, CLEANING, OR REMOVING THE FUSE. FAILURE TO DO SO COULD RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

**⚠ CAUTION**

**BEFORE CONNECTING OR DISCONNECTING ANY INTERNAL ELECTRONIC COMPONENTS OR INTERCONNECTING WIRING BETWEEN ELECTRONIC EQUIPMENT, ALWAYS REMOVE POWER AND WAIT AT LEAST THIRTY (30) SECONDS. FAILURE TO OBSERVE THESE PRECAUTIONS COULD RESULT IN BODILY HARM OR DAMAGE TO OR DESTRUCTION OF THE EQUIPMENT.**

**⚠ CAUTION**

**OBSERVE PRECAUTIONS FOR HANDLING ELECTROSTATIC SENSITIVE DEVICES.**

**⚠ WARNING**

**USE EXTREME CAUTION WHEN LIFTING AND MOVING THE SCALE TO THE DESIRED LOCATION. DO NOT ATTEMPT TO LIFT AND MOVE THE SCALE BY YOURSELF OR INJURY COULD OCCUR.**

# 1 Introduction

## General

Model 2256 VLC WEIGHT-PLATE® floor scales are fully electronic scales for general-purpose weighing. They are designed for top-of-floor installations and can be used as portable or permanently mounted scales.

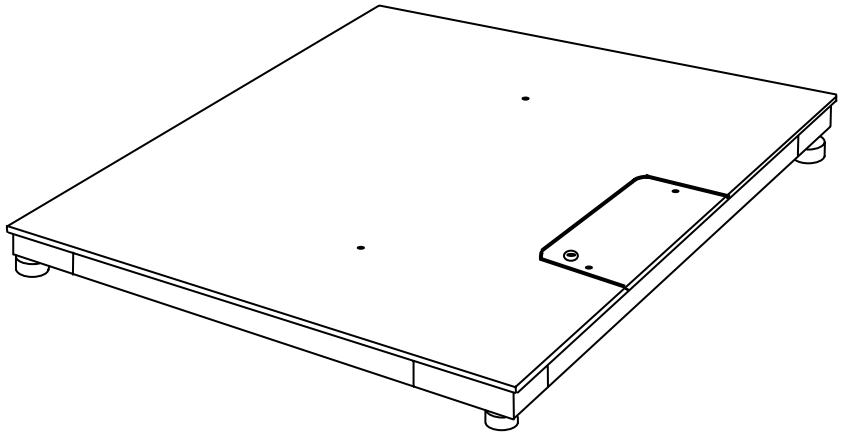

**Figure 1-1: 2256 VLC Floor Scale**

## Model Numbers

The following table shows how standard model numbers are determined for currently available 2256 VLC floor scales.

| XXXX | X | X | X | X | X | X | -X |
|---|---|---|---|---|---|---|---|
| **Model** | **Revision** | **Platform** | **Load Cell Metrology** | **Junction Box** | **Size** | **Scale Capacity** | **Scale Metrology** |
| 2256 | 3 | 0 = Mild steel, tread plate<br>1 = Mild steel, smooth plate<br>2 = Stainless steel, tread plate<br>3 = Stainless steel, smooth plate | 2 = 793 H44 | 0 = Analog | 1 = 3x3 feet<br>2 = 4x4 feet<br>3 = 4x5 feet<br>4 = 5x5 feet<br>5 = 4x6 feet<br>6 = 5x7 feet | 1 = 1,000 lb<br>2 = 2,500 lb<br>3 = 6,000 lb<br>4 = 10,000 lb | -A = 5,000d |

# Load Cells

Model 2256 VLC floor scales include stainless steel, cantilever-beam load cells with integral, four-conductor, shielded cables (see note). Individual load cell capacities are listed below:

NOTE: Scales measuring 5' x 7' use cables that are 20' long. Smaller scales use cables that are 8' long. DO NOT mix cables of different lengths within a platform.

| Scale Platform Capacity | Capacity of Each Load Cell | Minimum Approved Graduation Size |
|---|---|---|
| 2,500 lb | 1,000 lb | 0.5 lb |
| 6,000 lb | 2,500 lb | 1.0 lb |
| 10,000 lb | 5,000 lb | 2.0 lb |

## Load Cell Specifications

NOTE: Previous versions of the 2256 floor scale (Model 22561XXXXX-A) used 2-mV/V load cells.

| | |
|---|---|
| Model Number | 793 |
| Rated Capacity (RC) | 1,000 lb, 2,500 lb, 5,000 lb |
| Rated Output | 3 mV/V |
| Maximum Excitation Voltage* | 15 VDC or VAC rms |
| Recommended Excitation Voltage | 15 VDC |
| Input Terminal Resistance | 350 ohms |
| Output Terminal Resistance | 350 ohms |
| Temperature Range (compensated) | +14°F to +104°F (-10°C to +40°C) |
| Safe Overload | 150% RC |
| Safe Side Load | 100% RC |
| Zero Balance | 2.0% RC |

*The power supply to the load cells is provided by the METTLER TOLEDO indicator.

# Approvals

### NTEP Certification

Model 793 load cells meet or exceed NIST Handbook-44 requirements for Class III 5,000 divisions (multiple cell). A Certificate of Conformance was issued under the National Type Evaluation Program (NTEP) of the National Conference of Weights and Measures (certificate number 92-108A3).

# 2 Inspection and Site Selection

## Inspection

When the 2256 VLC floor scale is delivered, visually inspect it for any damage that might have occurred during shipping and handling. Inspect the following:

1. Platform assembly
2. Load cell and leveling feet
3. Load cell cables
4. Load cell summing junction box

If you find any damage, contact your freight carrier immediately.

## Site Selection

Many problems associated with floor scale installations are caused by improper site conditions. Before installing the scale, check the proposed location for the following conditions:

1. The area where the scale will be located should be level. The scale's leveling feet can be adjusted to compensate for floors that are slightly out of level.
2. The floor/support at each corner of the scale must be strong enough to support weight equal to the maximum weighing capacity of the scale.
3. There should be proper drainage away from the scale.
4. There should be no heavy vibrations or wind currents at or near the scale.
5. The scale should not be subjected to excessive or unusual loading due to the location or type of equipment used.

If the site is acceptable, proceed with the installation. If not, choose a new location or select another scale.

# 3 Installation

## Level the Base

Set up the scale in the location where it will be used. To move the scale, install 3/4-10 eyebolts (P/N MZ0905000003) in the threaded holes in the top of the scale platform. Attach a chain to the eyebolts, and use it to lift the scale with a forklift.

Once the scale is in place, make sure the scale's platform is level. Adjust the leveling feet as needed to level it. All four feet should touch the floor so that the scale does not rock or teeter.

- To adjust a leveling foot upward or downward, use a 1/2-inch wrench to turn the milled flats on the foot (see Figure 3-1). If you are adjusting the foot upward, loosen the jam nut before turning the foot. When the foot is correctly positioned, tighten the jam nut with your fingers so that it is snug against the load cell.

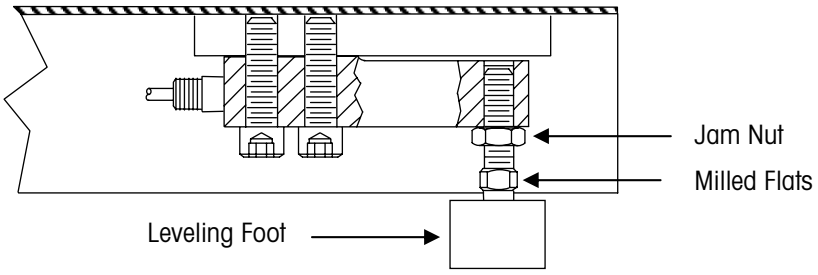

**Figure 3-1: Leveling Foot Assembly**

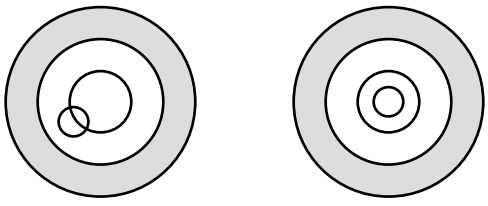
- Check the level that is located on the scale platform's junction box cover. Adjust the leveling feet until the bubble on the level is centered (see Figure 3-2).



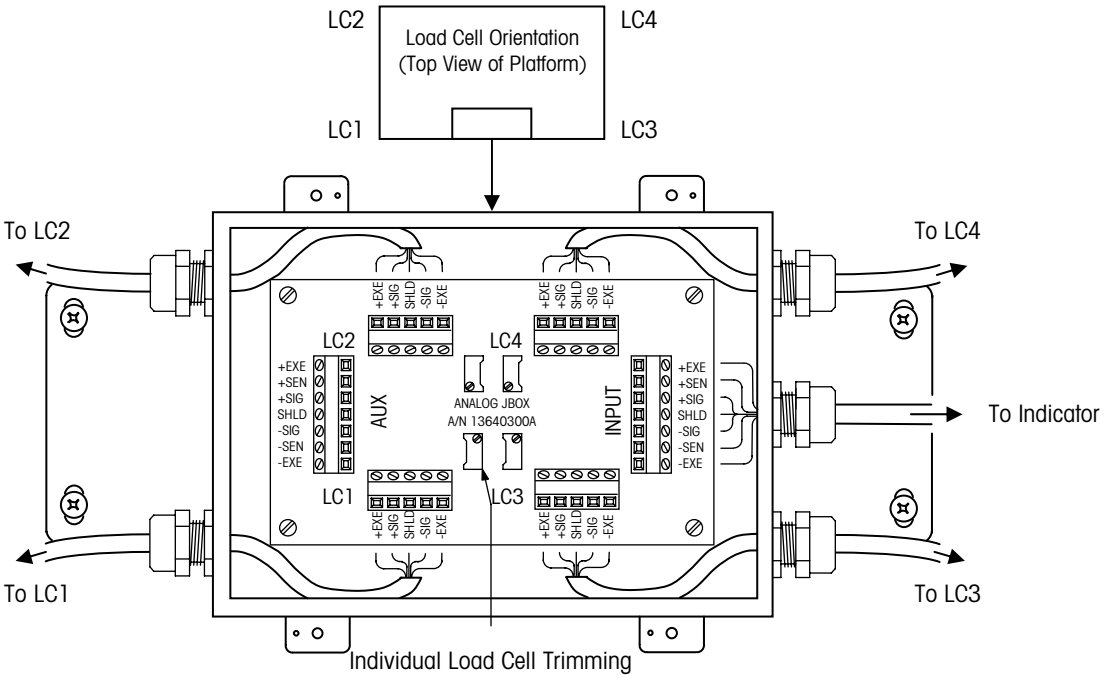


**Figure 3-2: Leveling the Scale Base**

- You must level the scale each time you move it to a new location.

# Junction Box Wiring

A 2256 VLC floor scale must be used with a compatible analog indicator. The scale's load cell outputs are summed by an analog junction box. Open the junction box, and connect the home run cable from the scale indicator to the input terminals on the junction box PCB. See Figure 3-3 and Table 3-1 for the correct cable connections.

NOTE: Do not cut load cell cables. Cutting a cable will affect compensation and void the warranty.

NOTE: Turn all potentiometers fully clockwise prior to calibration.

**Figure 3-3: Analog Junction Box Detail**

| Load Cell Wiring | | Instrument Cable Wiring* | |
|---|---|---|---|
| **Function** | **Color** | **Function** | **Color** |
| +Excitation | Green | +Excitation | White |
| +Sense | Not Used | +Sense | Yellow |
| +Signal | White | +Signal | Green |
| Shield | Yellow | Shield | Orange |
| -Signal | Red | -Signal | Black |
| -Sense | Not Used | -Sense | Red |
| -Excitation | Black | -Excitation | Blue |
| | | *(Based on METTLER TOLEDO Cable Number 510624370) | |

**Table 3-1: Analog Junction Box Wiring Codes**

# Optional Locating Plates

Locating plates are available for scales that will be mounted permanently. Two locating plates installed at adjacent corners of a scale are usually sufficient.

**⚠ WARNING**

**USE EXTREME CAUTION WHEN LIFTING AND MOVING THE SCALE TO THE DESIRED LOCATION. DO NOT ATTEMPT TO LIFT AND MOVE THE SCALE BY YOURSELF OR INJURY COULD OCCUR.**

1. Position the scale in the location where it will be installed.
2. Lift the scale enough to position the locating plates under the corners of the scale.
3. Lower the scale carefully so that its leveling feet fit inside the large holes in the locating plates.
4. Drill holes in the floor for the anchor bolts (two for each locating plate). Use the bolt holes in the plates as guides (see Figure 3-4).
5. Install 1/2-inch insert-type anchor bolts through the bolt holes in the locating plates to anchor the plates to the floor.

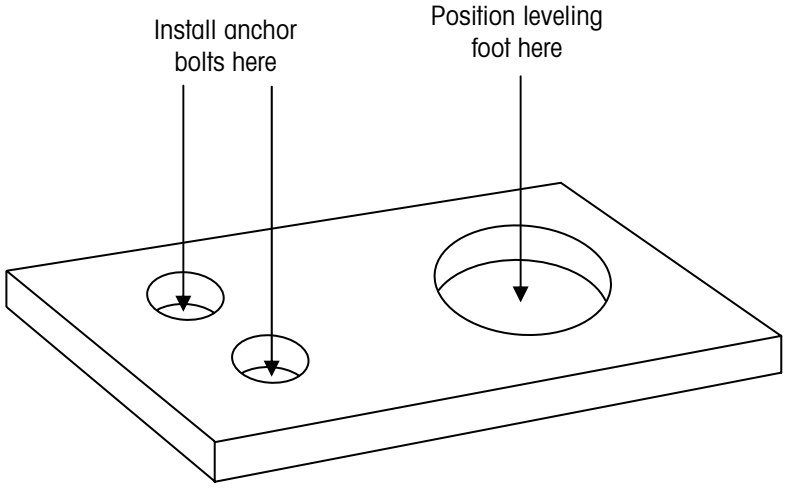

**Figure 3-4: Locating Plate Installation**

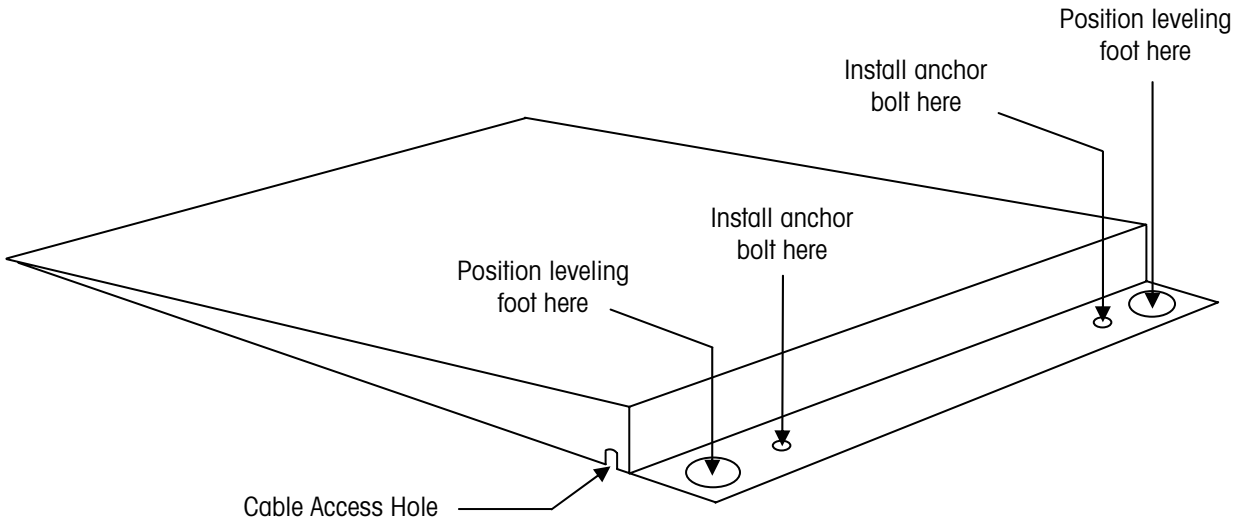
# Optional Ramps

You can install one or more ramps with a 2256 VLC floor scale. Standard ramps are available in widths of 36, 48, and 60 inches.

**⚠ WARNING**

**USE EXTREME CAUTION WHEN LIFTING AND MOVING THE SCALE TO THE DESIRED LOCATION. DO NOT ATTEMPT TO LIFT AND MOVE THE SCALE BY YOURSELF OR INJURY COULD OCCUR.**

1. Position the ramp in the location where it will be installed. Check to make sure that you have allowed room for the scale and for any other ramps that will be installed.
2. Drill holes in the floor for the two anchor bolts. Use the bolt holes in the flanged portion of the ramp as guides (see Figure 3-5).
3. Install 1/2-inch insert-type anchor bolts through the bolt holes in the flange to anchor the ramp to the floor.
4. Lower the scale carefully so that its leveling feet fit inside the large holes in the flange.



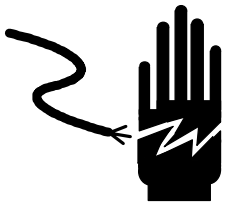


**Figure 3-5: Ramp Installation**

If you will be installing a second ramp, lift the scale and position the large holes in the ramp's flange under the leveling feet on the opposite side of the scale. Then move the scale out of the way. Drill bolt holes, install anchor bolts, and then lower the scale carefully so that its leveling feet fit inside the large holes in the ramp flanges.

# 4 Calibration

## Shift Adjust

**⚠ WARNING**

**PERMIT ONLY QUALIFIED PERSONNEL TO SERVICE THIS EQUIPMENT. EXERCISE CARE WHEN MAKING CHECKS, TESTS, AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM.**

When you shift adjust a scale, you are adjusting the output voltage (signal) of each load cell so that all load cells in the system produce a consistent signal. A correctly adjusted scale will give the same weight reading no matter where on the platform you place a test weight. Each 2256 VLC floor scale is shift adjusted at the factory. For a new installation, the only adjustment that should be needed is minor load cell trimming.

After the scale has been installed, check all mechanical parts to make sure that they work properly. Then check the scale's repeatability by placing a test weight on the same location on the platform several times to make sure that you get the same weight reading each time. After checking for repeatability, adjust the load cell trimming potentiometers as needed.

## Analog Junction Box Shift Adjustment

Use the following procedure to trim the load cells:

1. Remove the access plate from the scale platform, and open the junction box.
2. Figure 4-1 shows test weight locations (A, B, C, and D) at the center of each quadrant of the scale platform. Place a test weight equal to 1/2 of the rated scale capacity at location A and record the weight reading. Then move the test weight to location B and record the weight reading. Continue until you have taken a weight reading at each of the four locations.

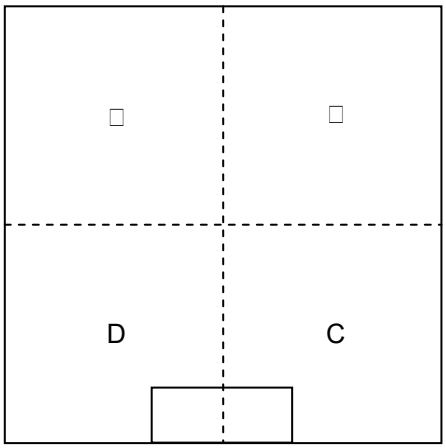

**Figure 4-1: Test Weight Locations**

**3.** Place the test weight at the location immediately clockwise from the location at which you got the lowest weight reading. Then adjust the trimming potentiometer for the load cell that corresponds to the corner of the scale where the test weight is positioned (see Figure 4-2). Make the adjustment by turning the potentiometer until the weight reading matches the lowest reading.

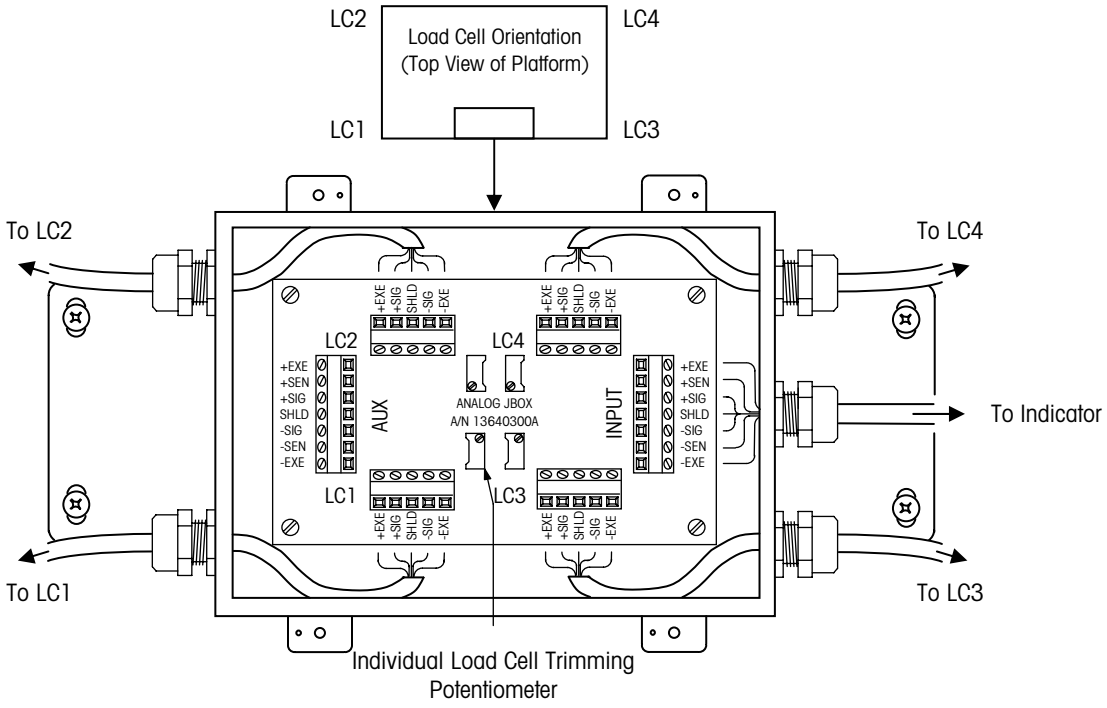

**Figure 4-2: Load Cell Trimming Potentiometers**

**4.** Proceeding clockwise, repeat the adjustment described in Step 3 for the next two test weight locations.

NOTE: Because the trimming potentiometers interact with each other, any adjustment will affect the weight readings at all four corners of the scale.

5. Repeat Steps 2 to 4 until the weight readings at all corners of the platform are the same or are within the specified National Institute of Standards and Technology (NIST) Handbook 44 Scale Accuracy Requirements.
6. Replace the junction box lid and the access plate.

## Scale Calibration

METTLER TOLEDO recommends calibrating the scale using test weights equal to the scale's capacity. Follow the calibration instructions in the manual provided with the scale indicator.

# 5 Routine Care and Maintenance

## General

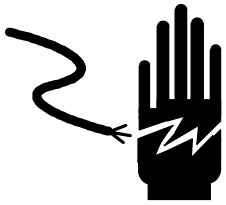
Once the scale has been installed, have an authorized METTLER TOLEDO representative inspect and calibrate it periodically. If the scale is used for legal-for-trade purposes, consult the local weights and measures authorities for minimum inspection requirements. Contact your local authorized METTLER TOLEDO service representative for information about periodic inspection and calibration services.

## Site Inspection

Make sure that the scale site remains in good condition. Check for alterations in the surrounding floor, excessive vibrations, and possible overloading conditions.

## Platform Inspection

During periodic inspections of the scale, check the following:



1. Are there any unusual wear points, paths, or marks on the weighing platform?
2. Is the scale frame bent or damaged?
3. Is the junction box lid properly sealed and are all cable connectors tight against the enclosure?
4. Is there any moisture or foreign material around or inside the junction box assembly?
5. Is the instrument cable damaged or binding the scale?
6. Is there any debris or material build-up under or around the platform that could prevent the platform from moving freely?
7. Visually inspect the load cells and leveling feet for signs of unusual wear.
8. Check repeatability and shift of the scale.

# 6 Troubleshooting

## General

If the scale does not operate properly, find out as much about the problem as possible. Try to determine whether the problem is constant or intermittent. Mechanical and electrical influences can cause malfunctions, so be patient and use sound logic when troubleshooting.

When troubleshooting a 2256 VLC floor scale, examine the scale's physical location. Check for the presence of water, corrosive materials, unlevel floors, high vibrations, air currents, or physical damage to the scale platform or frame. Also check the instrument cable for damage, and check all connections for loose or improper wiring.

**⚠ WARNING**

**PERMIT ONLY QUALIFIED PERSONNEL TO SERVICE THIS EQUIPMENT. EXERCISE CARE WHEN MAKING CHECKS, TESTS, AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM.**

**⚠ CAUTION**

**BEFORE CONNECTING/DISCONNECTING ANY INTERNAL ELECTRONIC COMPONENTS OR INTERCONNECTING WIRING BETWEEN ELECTRONIC EQUIPMENT, ALWAYS REMOVE POWER AND WAIT AT LEAST THIRTY (30) SECONDS. FAILURE TO OBSERVE THESE PRECAUTIONS COULD RESULT IN BODILY HARM OR DAMAGE TO OR DESTRUCTION OF THE EQUIPMENT.**

## Isolate the Problem

Determine whether the problem is in the scale or the indicator.

1. Remove power from the system, and then disconnect the indicator from the scale.
2. Connect the indicator to a load cell simulator (analog simulator available from METTLER TOLEDO).
3. Reapply power and test the indicator. If the problem persists, consult the indicator manual for further troubleshooting assistance.
4. If the problem is NOT present with the load cell simulator attached to the indicator, remove power, disconnect the simulator, and reconnect the scale. If the problem persists, continue troubleshooting the scale.

## Check Wiring

1. Remove power from the system.
2. Remove the access cover plate from the scale platform.
3. Remove the lid from the junction box and check the interior for moisture and foreign material.
4. Make sure that all wiring connections are tight and that no insulation material is touching the terminal contacts.
5. Check all cable connections to make sure they are wired correctly. The wiring color codes are given in Table 6-1:

| Load Cell Wiring | | Instrument Cable Wiring* | |
|---|---|---|---|
| **Function** | **Color** | **Function** | **Color** |
| +Excitation | Green | +Excitation | White |
| +Sense | Not Used | +Sense | Yellow |
| +Signal | White | +Signal | Green |
| Shield | Yellow | Shield | Orange |
| -Signal | Red | -Signal | Black |
| -Sense | Not Used | -Sense | Red |
| -Excitation | Black | -Excitation | Blue |
| *Instrument cable color code based on METTLER TOLEDO cable no. 510624370 | | | |

**Table 6-1: Load Cell Wiring Color Codes**

6. Check all cable connectors and cord grip caps on the junction box.
7. Tighten any loose connectors.

# Check Load Cells

1. Remove power from the system. Fully disconnect each load cell and check for proper input/output resistances (see Table 6-2).

NOTE: The information in this section is for 3-mV/V load cells.

| Measuring Points | Resistance |
|---|---|
| Any lead to shield or ground | Infinity |
| +Exc (Green) to -Exc (Black) | 350 ohms minimum |
| +Sig (White) to -Sig (Red) | 350 ohms |

**Table 6-2: Load Cell Measuring Points**

2. If resistance is within specification, perform a shorted-signal symmetry test.
   - Short the signal leads together and place one multimeter lead on the shorted signals and one lead on the +Excitation wire. Note the resistance value.
   - Remove the lead from the +Excitation wire and place it on the -Excitation wire. The two resistance values should be approximately equal.
3. If the load cells pass the shorted-signal test, reconnect them and reapply power to the scale. Confirm that the proper excitation voltage is reaching the load cells by placing multimeter leads on the excitation positions of each load cell terminal.
4. If proper excitation voltage is reaching the load cells, check the output signal from each cell by disconnecting the signal leads and measuring voltage output. If one cell has a particularly high or low dead-load output, it is suspect. The maximum output possible from any cell is 45 mV at 15 VDC excitation and loaded to gross capacity.
5. If any load cell has an unusual signal, remove all load from that cell by raising the platform.

NOTE: Remove signal leads from terminals to measure output.

   - With the power on, measure the output from the suspect load cell. The no-load zero output should be ± 1.5% of the full scale output. For example, if the excitation voltage is 15 VDC, then the full scale output would be 45 mV and the no-load zero output should be within ± 0.68 mV.
6. If a load cell fails any of the above tests, replace it.

# Check Mechanical Components

Because the 2256 VLC design is so simple, there are only a few mechanical components to troubleshoot. Make sure that the platform can move freely and that there is clearance between the loading end of each load cell and the bottom of the deck. Check the following:

1. The platform should be level and should not rock.
2. Check the load cells for damage. Replace any load cells that are damaged.
3. Check the leveling feet for unusual wear. Replace any leveling feet that are unevenly worn.
4. Inspect the platform and frame for physical damage. Replace any platform or frame that is bent or has broken welds.
5. The mounting surfaces of the load cells and platform should be free of grease and other debris.

# Load Cell Replacement

1. Remove power to the indicator and disconnect the instrument cable.
2. Remove the access plate from the platform to gain access to the junction box. Remove the junction box cover and locate the defective load cell terminal.
3. Disconnect the defective load cell cable from its terminal on the summing PCB.
4. Loosen the cable connector on the junction box and remove the cable from the enclosure.

NOTE: The instrument cable may need to be removed from the junction box to allow the platform to be moved.

5. Carefully position the platform on a stable surface that allows access to the defective load cell and cable, as well as offering protection to the other load cells during disassembly.
6. Attach a string to the end of the defective load cell's cable. The string should be long enough and strong enough to pull the new load cell's cable through the platform structure.

NOTE: If the load cell is mounted with 1/2-13 UNC socket-head cap screws, Use a 3/8" hex Allen socket wrench to remove the screws.

7. Remove the two 1/2-13 UNC screws that mount the load cell to the underside of the scale platform (see Figure 6-1). Keep the screws for installing the new load cell. Then lift the load cell from the mounting surface.

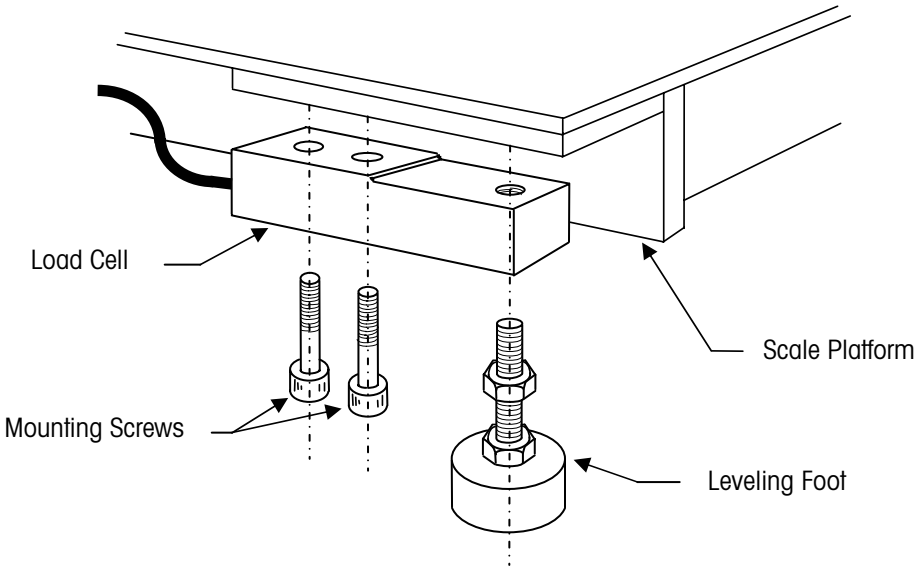


**Figure 6-1: Load Cell and Leveling Foot Assembly (Corner Guard Removed)**

8. Carefully pull the defective load cell's cable through the platform while feeding the string in at the junction box opening. Once the string is at the load cell location, detach it from the load cell cable.
9. Remove the leveling foot from the defective load cell. Reinstall it in the new load cell.
10. Attach the new load cell's cable to the pulling string and carefully thread it through the platform into the junction box opening. Coil any excess cable and store it within the platform's side channel.

NOTE: Make sure load cell and platform mounting surfaces are free of grease and other foreign materials.

11. Secure the new load cell to the platform. Apply an anti-seize compound such as Never-Seez to the threads of the mounting screws and tighten them with a calibrated torque wrench (75 ft-lb for stainless steel hexagonal-head screws and 100 ft-lb for Grade 8 socket-head cap screws).
12. Thread the load cell cable through the connector on the junction box. When enough cable is inside the box, tighten the connector.
13. Wire the new load cell cable to the proper terminal on the PCB according to the wiring codes shown in Chapter 3.
14. Reconnect the instrument cable and power-up the indicator. Perform a shift adjust and recalibrate the scale.

# 7 Service Parts

## 2256 VLC Floor Scale

Refer to Tables 7-1 and 7-2 when ordering parts for a current 2256 floor scale (Model 22563XXXXX-A). Model 22562XXXXX-A uses the same parts except for the leveling foot (see Table 7-3). Replacement parts for Model 22561XXXXX-A are listed in Table 7-4.

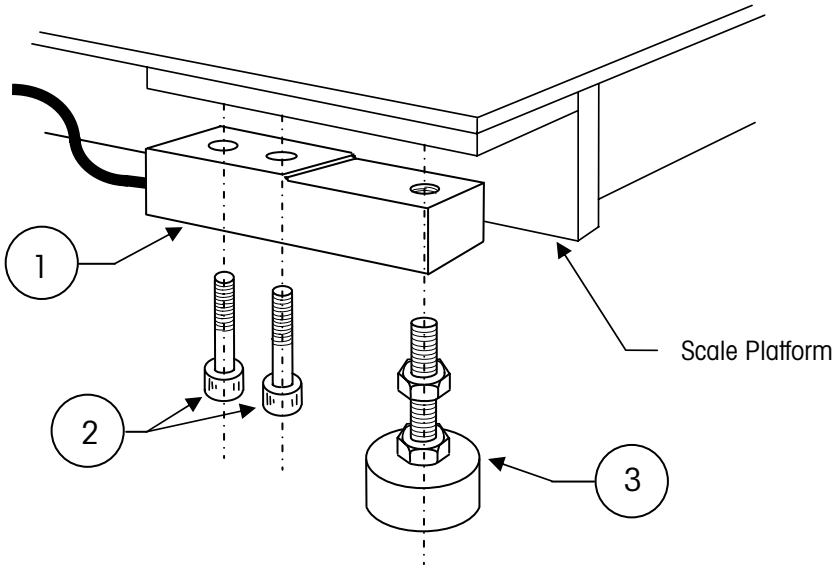

**Figure 7-1: Load Cell and Leveling Foot Assembly (22563XXXXX-A)**

| Ref. No. | Part Number | Description | Qty. |
|---|---|---|---|
| 1 | TB601015-XXX* | Model 793 Load Cell, 1,000 lb (3 mV/V) | 4 |
| | TB601016-XXX* | Model 793 Load Cell, 2,500 lb (3 mV/V) | |
| | TB601018-XXX* | Model 793 Load Cell, 5,000 lb (3 mV/V) | |
| 2 | TN800647 | 1/2-13 Socket Head Cap Screw x 1.75 inches long, Black Oxide | 8 |
| | TN800648 | 1/2-13 Socket Head Cap Screw x 1.75 inches long, Stainless Steel | |
| 3 | TN206043-SS | Leveling Foot, Stainless Steel | 4 |

* -XXX specifies the length of the load cell cable: -008 = 8 feet (for 36x36, 48x48, 48x60, 60x60, and 48x72 scales) and -020 = 20 feet (for 60x84 scales).

## METTLER TOLEDO Service

**Essential Services for Dependable Performance of Your IND570 Weighing Terminal**

Congratulations on choosing the quality and precision of METTLER TOLEDO. Proper use of your new equipment according to this Manual and regular calibration and maintenance by our factory-trained service team ensures dependable and accurate operation, protecting your investment. Contact us about a service agreement tailored to your needs and budget. Further information is available at www.mt.com/service.

There are several important ways to ensure you maximize the performance of your investment:

1. **Register your product**: We invite you to register your product at www.mt.com/productregistration so we can contact you about enhancements, updates and important notifications concerning your product.
2. **Contact METTLER TOLEDO for service**: The value of a measurement is proportional to its accuracy – an out of specification scale can diminish quality, reduce profits and increase liability. Timely service from METTLER TOLEDO will ensure accuracy and optimize uptime and equipment life.
    a. **Installation, Configuration, Integration and Training**: Our service representatives are factory-trained, weighing equipment experts. We make certain that your weighing equipment is ready for production in a cost effective and timely fashion and that personnel are trained for success.
    b. **Initial Calibration Documentation**: The installation environment and application requirements are unique for every industrial scale so performance must be tested and certified. Our calibration services and certificates document accuracy to ensure production quality and provide a quality system record of performance.
    c. **Periodic Calibration Maintenance**: A Calibration Service Agreement provides on-going confidence in your weighing process and documentation of compliance with requirements. We offer a variety of service plans that are scheduled to meet your needs and designed to fit your budget.
    d. **GWP® Verification**: A risk-based approach for managing weighing equipment allows for control and improvement of the entire measuring process, which ensures reproducible product quality and minimizes process costs. GWP (Good Weighing Practice), the science-based standard for efficient life-cycle management of weighing equipment, gives clear answers about how to specify, calibrate and ensure accuracy of weighing equipment, independent of make or brand.
    e. **InTouchSM Remote Services**: Confidently and securely improve the performance and uptime of your weighing systems, with InTouch Remote Service, only available from METTLER TOLEDO. Working within your existing IT security policies, IND570 with embedded InTouch connectivity actively monitors system performance. Proactive alerts to remote service technicians allow a real-time response to performance issues, increasing uptime, overall asset utilization and reduction of unforeseen expenses.

No part of this manual may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, for any purpose without the express written permission of METTLER TOLEDO.

U.S. Government Restricted Rights: This documentation is furnished with Restricted Rights.

Copyright 2015 METTLER TOLEDO. This documentation contains proprietary information of METTLER TOLEDO. It may not be copied in whole or in part without the express written consent of METTLER TOLEDO.

METTLER TOLEDO reserves the right to make refinements or changes to the product or manual without notice.

## COPYRIGHT

METTLER TOLEDO® is a registered trademark of Mettler-Toledo, LLC. All other brand or product names are trademarks or registered trademarks of their respective companies.

## METTLER TOLEDO RESERVES THE RIGHT TO MAKE REFINEMENTS OR CHANGES WITHOUT NOTICE.

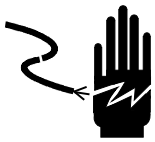
## FCC Notice

This device complies with Part 15 of the FCC Rules and the Radio Interference Requirements of the Canadian Department of Communications. Operation is subject to the following conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his or her expense.

- Declaration of Conformity is located on the documentation CD.

## RoHS Compliance Statement.



- The majority of our products fall within categories 8 and 9. Those categories currently do not fall within the scope of the Directive 2002/95/EG (RoHS) of January 27, 2003. If our products are intended for use in other products which themselves fall within the scope of the RoHS Directive, compliance requirements have to be separately negotiated contractually.
- Those products which fall within categories 1-7 and 10 will be in compliance with the EU RoHS Directive from no later than July 1, 2006.
- If it is not possible for technical reasons to replace any non-RoHS-compliant substances in any of the above products as required, we plan to inform our customers in a timely manner

## Statement Regarding Harmful Substances

We do not make direct use of harmful materials such as asbestos, radioactive substances or arsenic compounds. However, we purchase components from third party suppliers, which may contain some of these substances in very small quantities.

# Safety Warnings and Cautions

- READ this manual BEFORE operating or servicing this equipment. FOLLOW these instructions carefully.
- SAVE this manual for future reference.

**⚠ WARNING**

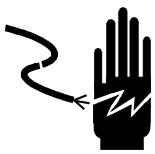
**FOR CONTINUED PROTECTION AGAINST SHOCK HAZARD CONNECT THE TERMINAL TO PROPERLY GROUNDED OUTLET ONLY. DO NOT REMOVE THE GROUND PRONG.**

**⚠ WARNING**

**ONLY PERMIT QUALIFIED PERSONNEL TO SERVICE THE TERMINAL. EXERCISE CARE WHEN MAKING CHECKS, TESTS AND ADJUSTMENTS THAT MUST BE MADE WITH POWER ON. FAILING TO OBSERVE THESE PRECAUTIONS CAN RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

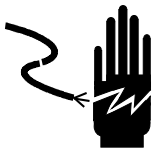
**⚠ WARNING**

**DO NOT INSTALL, DISCONNECT OR PERFORM ANY SERVICE ON THIS EQUIPMENT BEFORE POWER HAS BEEN SWITCHED OFF AND THE AREA HAS BEEN SECURED AS NON-HAZARDOUS BY PERSONNEL AUTHORIZED TO DO SO BY THE RESPONSIBLE PERSON ON-SITE.**



**⚠ WARNING**

**NOT ALL VERSIONS OF IND570 ARE DESIGNED FOR USE IN HAZARDOUS (EXPLOSIVE) AREAS. REFER TO THE DATA PLATE OF THE IND570 TO DETERMINE IF A SPECIFIC TERMINAL IS APPROVED FOR USE IN AN AREA CLASSIFIED AS HAZARDOUS BECAUSE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES. TERMINALS THAT ARE NOT FACTORY LABELED AS DIVISION 2 OR EUROPEAN CATEGORY 3 APPROVED MUST NOT BE INSTALLED IN A DIVISION 2 OR ZONE 2/22 ENVIRONMENT.**



**⚠ WARNING**

**THE INTERNAL DISCRETE I/O RELAY OPTIONS MUST NOT BE USED IN AREAS CLASSIFIED AS HAZARDOUS BECAUSE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES. FAILURE TO COMPLY WITH THIS WARNING COULD RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

**⚠ WARNING**

**WHEN THIS EQUIPMENT IS INCLUDED AS A COMPONENT PART OF A SYSTEM, THE RESULTING DESIGN MUST BE REVIEWED BY QUALIFIED PERSONNEL WHO ARE FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF ALL COMPONENTS IN THE SYSTEM AND THE POTENTIAL HAZARDS INVOLVED. FAILURE TO OBSERVE THIS PRECAUTION COULD RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

**⚠ WARNING**

**ONLY THE COMPONENTS SPECIFIED ON THE IND570 DOCUMENTATION CD CAN BE USED IN THIS TERMINAL. ALL EQUIPMENT MUST BE INSTALLED IN ACCORDANCE WITH THE INSTALLATION INSTRUCTIONS DETAILED IN THE INSTALLATION MANUAL. INCORRECT OR SUBSTITUTE COMPONENTS AND/OR DEVIATION FROM THESE INSTRUCTIONS CAN IMPAIR THE SAFETY OF THE TERMINAL AND COULD RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

**⚠ CAUTION**

**BEFORE CONNECTING/DISCONNECTING ANY INTERNAL ELECTRONIC COMPONENTS OR INTERCONNECTING WIRING BETWEEN ELECTRONIC EQUIPMENT ALWAYS REMOVE POWER AND WAIT AT LEAST THIRTY (30) SECONDS BEFORE ANY CONNECTIONS OR DISCONNECTIONS ARE MADE. FAILURE TO OBSERVE THESE PRECAUTIONS COULD RESULT IN DAMAGE TO OR DESTRUCTION OF THE EQUIPMENT AND/OR BODILY HARM.**

***NOTICE***

**OBSERVE PRECAUTIONS FOR HANDLING ELECTROSTATIC SENSITIVE DEVICES.**

## Disposal of Electrical and Electronic Equipment

In conformance with the European Directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE) this device may not be disposed of in domestic waste. This also applies to countries outside the EU, per their specific requirements.

Please dispose of this product in accordance with local regulations at the collecting point specified for electrical and electronic equipment.

If you have any questions, please contact the responsible authority or the distributor from which you purchased this device.

Should this device be passed on to other parties (for private or professional use), the content of this regulation must also be related.

Thank you for your contribution to environmental protection.

# 1 Introduction

**⚠ WARNING!**

**NOT ALL VERSIONS OF THE IND570 ARE DESIGNED FOR USE IN HAZARDOUS (EXPLOSIVE) AREAS. REFER TO THE DATA PLATE OF THE IND570 TO DETERMINE IF A SPECIFIC TERMINAL IS APPROVED FOR USE IN AN AREA CLASSIFIED AS HAZARDOUS BECAUSE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES.**

This chapter covers
- IND570 Overview
- IND570 Terminal Versions
- Specifications
- Safe Disposal Requirement
- Model Identification
- Physical Dimensions
- Interfaces and Options
- Display and Keyboard

The IND570 represents the latest in METTLER TOLEDO technology and is one of the most versatile weighing terminals available today. Choose from conventional strain gauge or high-precision electromagnetic force restoration weighing technologies. Specify direct PLC or PC communication interfaces or digital I/O control. Combine these selections with the option of panel or desk/wall/column-mounting, and the IND570 is the perfect match for nearly any industrial weighing application, including:

- Basic Weighing
- Filling and Blending
- Drum filling
- Shipping and Receiving
- In-Motion Weighing
- Dosing
- Over/Under Checkweighing
- Vehicle Weighing

Enhance measurement or control applications with an ultra-fast A/D conversion rate of 366 Hz, patented TraxDSP™ digital filtering technology, and an I/O bus update rate of 50 Hz. The IND570 delivers precision measurement data from milligrams to tons in a single cost effective package that easily integrates into existing systems.

The versatile IND570 excels in controlling simple filling and dosing applications delivering best-in-class performance for fast, precise, accurate results in manual, semi-automatic, or fully automatic operations. Utilize the control capabilities of the IND570 to effectively manage project costs. Control up to 20 digital outputs through the IND570 without intervention from a PLC. Target control outputs can be latched, eliminating the need for external logic devices.

For more advanced filling, the Fill-570 Application Software adds additional sequences and component inputs. Without complex and costly programming, quickly configure the Fill-570 advanced filling software, creating custom filling and dosing sequences along with blending applications for up to 6 materials that cue operators and track process data, ultimately supporting efficiency, quality and safety.

Whether communicating weight data to a PLC or providing an easier way to perform terminal configuration, the IND570 offers multiple connectivity options to improve applications.

Direct PLC connectivity is available using 4-20mA Analog Output, PROFIBUS DP, DeviceNet, ControlNet, EtherNet/IP or Modbus TCP protocols. Interfaces are also available for serial data via RS-232/422/485 and Ethernet TCP/IP networking. A standard USB Host interface provides the ability to

connect a QWERTY keyboard for operator input, upgrade terminal firmware, perform a save/restore of terminal configuration and quickly import and export a variety of data tables and reports.

# 1.1. IND570 Overview

## 1.1.1. Versions

The IND570 is available in the following versions:

### 1.1.1.1. AC Powered Models (85-264VAC)

- Harsh enclosure with analog load cell connection
- Harsh enclosure with high-precision (IDNet) base connection
- Panel-mount enclosure with analog load cell connection
- Panel-mount enclosure with high-precision (IDNet) base connection

### 1.1.1.2. 24VDC Powered Models

- Panel-mount enclosure with analog load cell connection
- Panel-mount enclosure with high-precision (IDNet) base connection

## 1.1.2. Standard IND570 Features

- Basic weighing terminal for use in safe areas (IND570 models)
- Panel-mount or harsh environment desk/wall/column-mount enclosures
- Connect one analog load cell scale base, or a network of up to 12 350 ohm load cells, or a single high-precision IDNet base
- Multiple range and multiple interval weighing
- 256 x 128 dot-matrix graphic OLED display with 25 mm-high weight display
- Display, receipt and transmission of information in multiple languages
- USB host port for connection of external keyboard, USB memory device or barcode scanner
- One serial port for asynchronous, bidirectional communication and print output
- Operation as a Remote Display for another terminal
- Real-time clock with battery backup
- 85–264 VAC power input range
- Basic weighing functions including zero, tare, and printing
- Selectable over/under classifying mode of operation
- Selectable material transfer mode of operation for simple filling or dosing
- SmartTrac™ graphical display
- ID mode for prompted transaction sequencing and data collection
- Tracking of material delivery rate

- Comparators – simple coincidence set points for comparison of weight or rate with absolute target values or ranges
- Two standard memory tables for Tare and Target storage – 99 Tare records and 200 Target records
- Unit switching between three different units, including a custom unit
- Alibi memory storage for up to 100,000 records
- Grand total and subtotal registers for accumulating weight
- Ten customizable print templates
- Report printing
- TraxDSP™ digital filtering for analog load cells
- TraxEMT™ performance monitoring and recording
- CalFree™ calibration without test weights
- Routine verification of system accuracy by utilizing Test Manager GWP® (Good Weighing Practice)
- MinWeigh™ to eliminate measurement uncertainties
- Support for the following communication options:
  - Ethernet TCP/IP
  - Additional serial ports
  - Relay based discrete I/O interfaces
  - Analog output
  - ControlNet
  - DeviceNet™
  - EtherNet/IP
  - Modbus TCP
  - PROFIBUS® DP
- Support for the following optional Application Software Modules:

  Fill-570 Drive-570 COM-570

- Support for TaskExpert™ custom application development software

# 1.2. Specifications

The IND570 terminal conforms to the specifications listed in Table 1-1.

**Table 1-1: IND570 Specifications**

| IND570 Specifications | |
|---|---|
| Enclosure Type | Panel-mount stainless steel front panel with an aluminum frame |
| | Harsh environment desk/wall/column-mount type 304L stainless steel enclosure |
| Dimensions (l × w × d) | Panel Mount: 265 mm × 160 mm × 66.5 mm (10.4 in. × 6.3 in. × 2.6 in.) |
| | Harsh Environment: 265 mm × 148.4 mm × 163 mm (10.4 in. × 5.8 in. × 6.4 in.) |
| Shipping Weight | 3.2 kg (7 lb) |
| Environmental Protection | Panel-mount front panel sealing is UL-approved, and provides type 4x and type 12 protection – comparable to IP65 rating |
| | Harsh Environment is UL-approved, and meets IP69K requirements |
| Operating Environment | The terminal (both enclosure types) can be operated at temperatures ranging from –10° to 40° C (14° to 104° F) at 10% to 95% relative humidity non-condensing. |
| Hazardous Areas | Not all versions of the IND570 can be operated in areas classified as Hazardous by the National Electrical Code (NEC) because of the combustible or explosive atmospheres in those areas. Contact an authorized METTLER TOLEDO representative for information about the IND570xx model for hazardous applications. |
| AC Input Power | Operates at 85–264 VAC, 49–61 Hz, 750 mA (both enclosure types). |
| | Panel-mount version provides a terminal strip for AC power connections. |
| | Harsh environment version includes a power cord configured for the country of use. |
| DC Input Power | Operates at –61 Hz, 750 mA (panel mount enclosure only) |
| | Panel-mount version provides a terminal strip for DC power connections. |
| | 24VDC input power option not available on the harsh models |
| Scale Types & Update Rates | Analog load cells, up to Twelve 350-ohm load cells (2 or 3 mV/V). Update rate > 366 Hz<br>or<br>IDNet High-Precision Line (+12V versions only, including T-Brick cell, M-Cell, Point-ADC). Update rate determined by IDNet base. |
| Analog Load Cell Excitation Voltage | 10 VDC |
| Minimum Sensitivity | 0.1 microvolts |

| IND570 Specifications | |
|---|---|
| Interface and Function Update Rates (max) | Internal discrete I/O: 50 Hz; External discrete I/O (ARM100): 25 Hz; PLC cyclic data: 25 Hz; SICS Continuous: 20 Hz; MT Continuous Output: 20 Hz |
| Keypad | 26 keys; 1.22-mm thick polyester overlay (PET) with polycarbonate display lens |
| Communication | **Standard Interfaces**<br>Serial Port: COM1 (RS-232/RS-422/RS-485), 300 to 115,200 baud<br>USB Host Port: Type A connector, +5V at 100mA for connected devices<br>**Optional Interfaces**<br>Ethernet Port: Ethernet 10 Base-T<br>COM2 & COM3 serial ports: RS-232/RS-422/RS-485, 300 to 115,200 baud<br>**Supported Protocols**<br>USB Inputs: ASCII characters (barcode, keyboard), file import<br>USB Outputs: Demand outputs, Report printing, file export<br>Serial Inputs: ASCII characters, ASCII commands for CTPZ (Clear, Tare, Print, Zero), SICS (level 0 and level 1, some support for level 2 commands), Remote Display<br>Serial Outputs: Continuous and Demand outputs, SICS host protocol, report printing, interfaces with external ARM100 Remote Input/Output modules. Optional COM-570 Application Software available for legacy serial protocols.<br>Ethernet Inputs: ASCII commands for CTPZ (Clear, Tare, Print, Zero), SICS (level 0 and level 1, some support for level 2 commands), Remote Display<br>Ethernet Outputs: Continuous and Demand Outputs, report printing, SICS host protocol<br>**PLC Interfaces**<br>A single interface supported: Analog output, ControlNet, DeviceNet™, EtherNet/IP, Modbus TCP, PROFIBUS® DP |
| Approvals | **Weights and Measures**<br>USA: NTEP Class II 100,000d; Class III/IIIL 10,000d; CoC #13-123<br>Canada: Class II 100,000d; Class III 10,000d; Class IIIHD, 20,000d; AM-5933<br>Europe: OIML R76 Class II approved divisions determined by platform; Class III and IIII 10,000e; TC8458<br>**Product Safety**<br>UL, cUL, CE |

# 1.3. Inspection and Contents Checklist

Verify the contents and inspect the package immediately upon delivery. If the shipping container is damaged, check for internal damage and file a freight claim with the carrier if necessary. If the container is not damaged, remove the IND570 terminal from its protective package, noting how it was packed, and inspect each component for damage.

If shipping the terminal is required, it is best to use the original shipping container. The IND570 terminal must be packed correctly to ensure its safe transportation.

The package should include:

- IND570 terminal
- Safety warnings in multiple languages
- Documentation CD (includes all manuals, PLC sample codes, Certificate of Conformance)
- Bag of parts for installation. Depending on terminal, may include ferrites, grommets, rubber feet., etc.

# 1.4. Model Identification

The IND570 model number is located on the data plate on the back of the terminal along with the serial number. Refer to Figure 1-1 to verify the IND570 that was ordered.

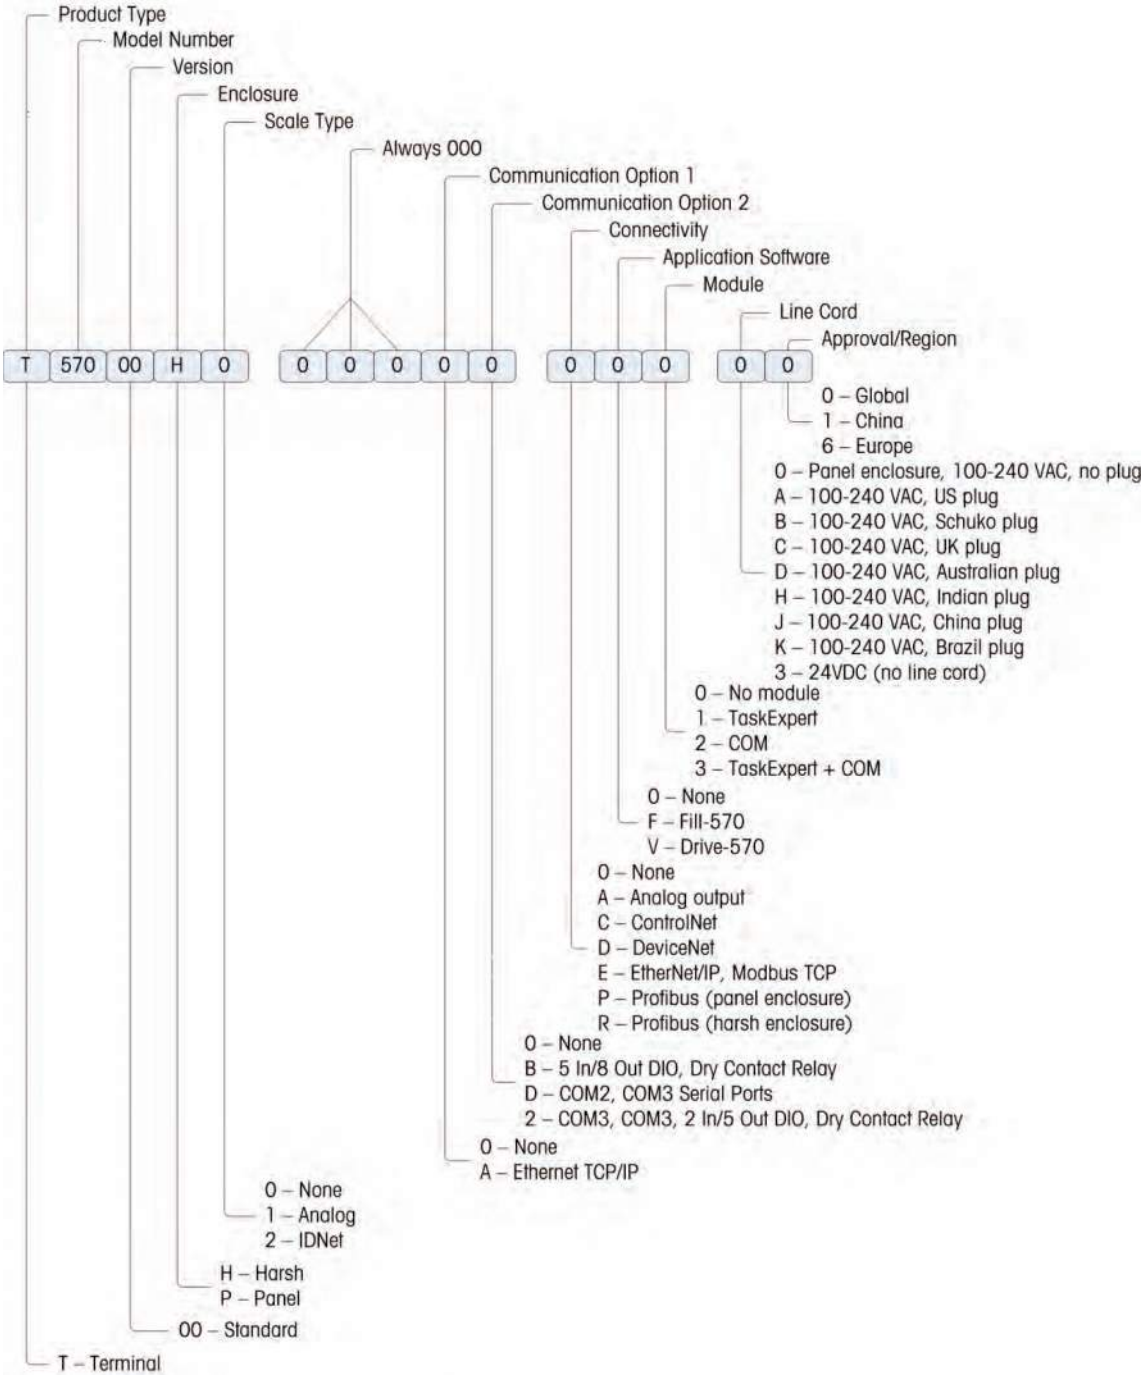

**Figure 1-1: IND570 Model Identification Numbers**

# 1.5. Physical Dimensions

The physical dimensions of the Panel Mount IND570 enclosure are shown in Figure 1-2 in millimeters and [inches]. Figure 1-3 shows the dimensions of the cutout required for the Panel Mount enclosure.

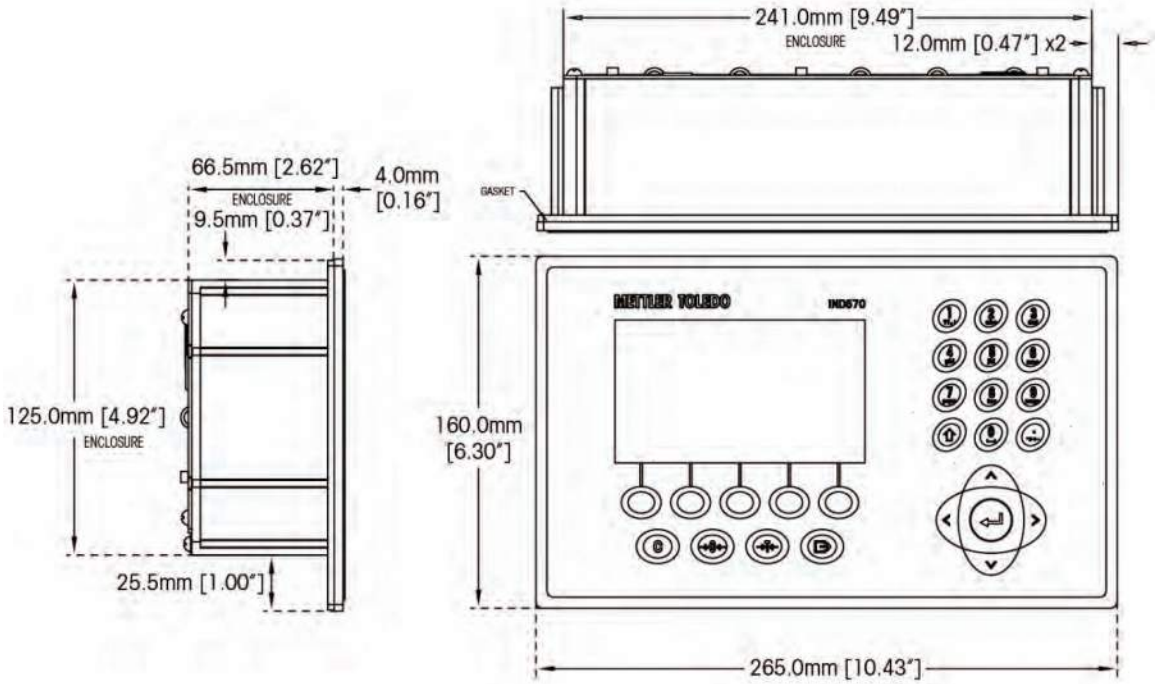

**Figure 1-2: IND570 Panel Mount Enclosure Dimensions**

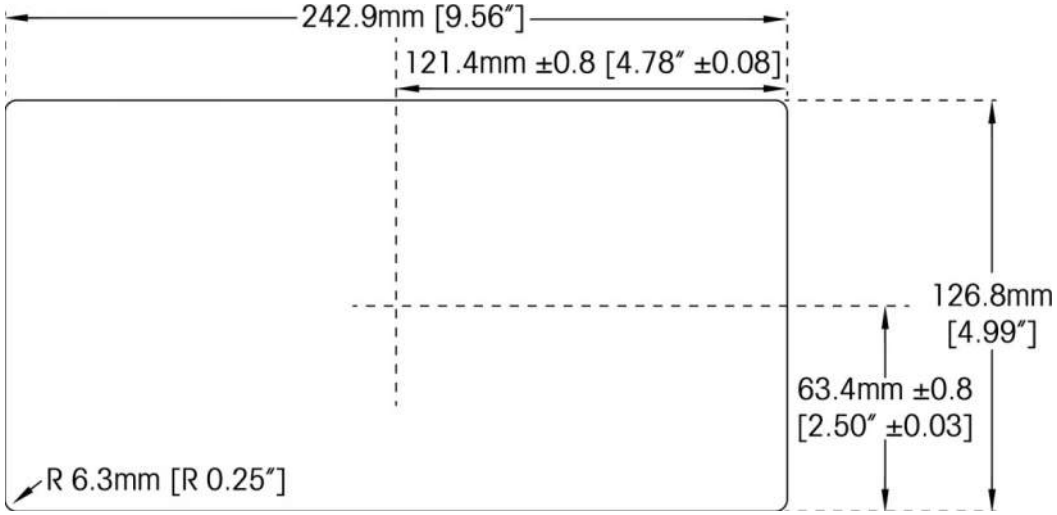

**Figure 1-3: IND570 Panel Mount Cutout Dimensions**

The dimensions of the harsh enclosure desk/wall-mount IND570 terminal are shown in Figure 1-4 and Figure 1-5 in millimeters and [inches].

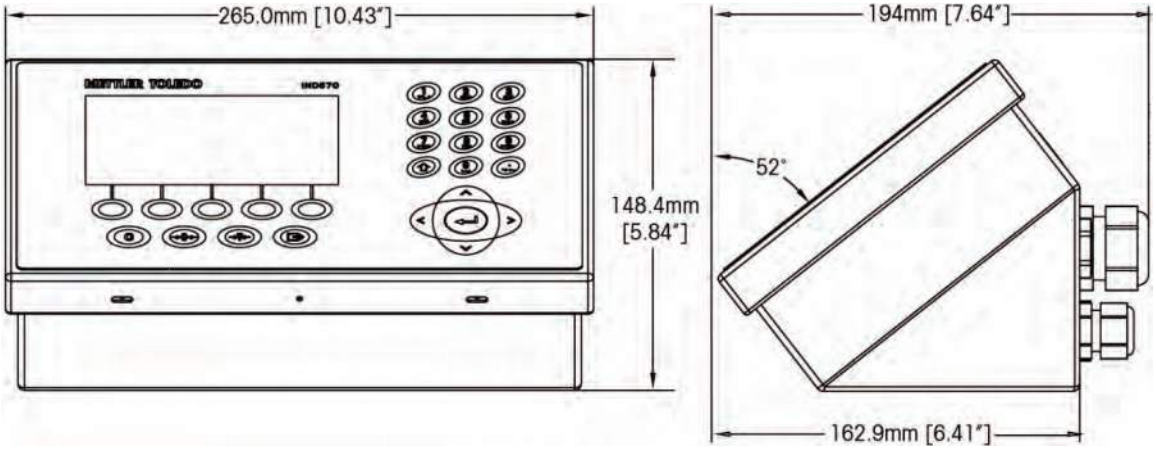

**Figure 1-4: Harsh Environment Enclosure Dimensions**

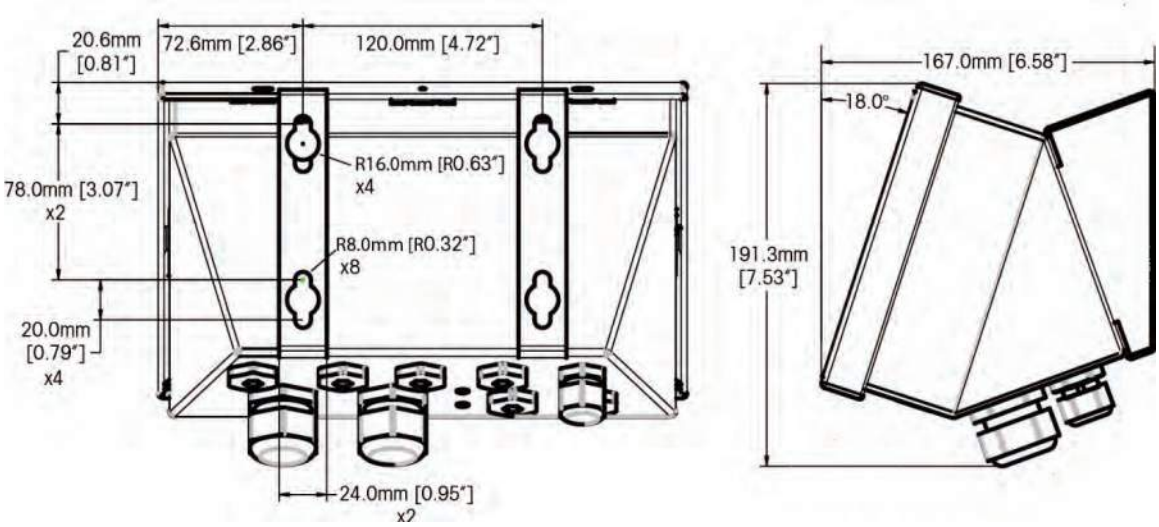

**Figure 1-5: Harsh Environment Enclosure Dimensions with Optional Brackets**

# 1.6. Main PCB

The IND570 terminal's main printed circuit board (PCB) provides the scale interface for analog load cell(s) or IDNet.

The main board also contains the USB Host port for connection of an external keyboard or barcode scanner for data entry or a USB memory device that can be used for data collection, file transfer and system backup.

A single standard serial port (COM1) is located on the main board and provides RS-232, RS-422, or RS-485 communication. The COM1 port is bidirectional and can be configured for various functions such as demand output, remote display, SICS host communications, continuous output, ASCII command input (C, T, P, Z), ASCII character input, report printing, totals printing, or connection to an ARM100 remote I/O module.

The main board also contains an input from the AC (or DC) power supply, front panel keyboard interface, and bus connectors for the option boards.

# 1.7. Scale Bases

The IND570 supports two types of scales: Analog or IDNet.

#### 1.7.1.1. Analog Load Cell Scale

The IND570 main PCB includes an analog load cell interface. The terminal can drive up to twelve 350-ohm analog load cells.

#### 1.7.1.2. IDNet™ Scale Base

The IND570 supports an IDNet scale through a PCB interface that connects to a unique bus on the main board. This interface supports the newer T-brick style of high-precision base through the IDNet scale card. The port provides the +12 volts and communication required to operate this newer style base. The interface also supports M-Cell and Point-ADC. The older K module and Pik-brick cells require +32 volts and are not supported by the IND570.

# 1.8. Options

The following hardware and software options are available for the IND570:

- Discrete I/O
  - Internal, high-level discrete I/O
  - Remote discrete I/O via ARM100 module
- COM2/COM3 Serial Ports
- Ethernet TCP/IP Port
- Programmable Logic Control (PLC) interfaces, including:
  - Analog Output
  - DeviceNet™
  - Modbus TCP
  - PROFIBUS® DP
  - EtherNet/IP™
  - ControlNet™
- Fill-570 application software
- Drive-570 application software
- COM-570 application software
- TaskExpert™ custom application development software
- Various brackets for wall and column mounting of the harsh enclosure
- InSite™ SL Configuration Tool (PC based software for backup and restore)

## 1.8.1. Discrete I/O

The discrete I/O interface options include both internal and remote I/O. Only one internal discrete I/O can be used at a time.

- An internal DIO option is available with 5 inputs and 8 outputs. Each output will switch up to 30 volts DC or 250 volts AC up to 1 amp of current. The inputs are switch-selectable as either active (for simple pushbutton control) or passive (for connection to PLCs or other devices that supply their own power for the I/O).
- Another internal DIO/serial port option is available with 2 inputs, 8 outputs and the COM2 and COM3 serial ports. Each output will switch up to 30 volts DC or 250 volts AC up to 1 amp of current. The inputs are switch-selectable as either active (for simple pushbutton control) or passive (for connection to PLCs or other devices that supply their own power for the I/O).
- Remote I/O function is supported by the ARM100 remote I/O module. This module provides only dry-contact outputs. The ARM100's inputs are passive. An external 10 to 32 VDC power supply is required to operate the ARM100. Either the COM1 or COM3 serial port is required for communication with an ARM100 module.
  - The COM3 serial port is available on the COM2/COM3 option or the COM2/COM3/DIO combination option.
- A maximum of 13 inputs and 20 outputs are supported (5 Inputs/8 Outputs local I/O option, and two ARM100 remote I/O modules).

**⚠ WARNING**

**THE INTERNAL DISCRETE I/O DRY CONTACT RELAY OPTIONS MUST NOT BE USED IN AREAS CLASSIFIED AS HAZARDOUS DUE TO THE PRESENCE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES. FAILURE TO COMPLY WITH THIS WARNING COULD RESULT IN BODILY HARM AND/OR PROPERTY DAMAGE.**

### 1.8.2. Ethernet Option

The Ethernet option provides a TCP/IP port that can be used to transmit demand templates, continuous data, for direct access to data via a shared data server, to send email alerts and terminal status information, and FTP transfer of tare and target tables and complete setup files. It also provides a connection for backup and restore of the terminal's configuration using the METTLER TOLEDO InSite™ SL program.

The Ethernet port offers access to the IND570 Webserver via a customer's local network.

### 1.8.3. COM2/COM3 Serial Ports

Options for additional serial ports include a stand-alone COM2/COM3 option and COM2/COM3 bundled with discrete I/O. Only one option can be used at a time.

COM2 supports an RS-232 connection at communication rates from 300 to 115.2k baud.

COM3 supports an RS-232, RS-422, or RS-485 connection at communication rates from 300 to 115.2k baud.

The serial/discrete I/O combination option includes 2 discrete inputs and 5 discrete outputs. Each output will switch up to 30 volts DC or 250 AC up to 1 amp of current. The inputs are switch-selectable as either active (for simple pushbutton control) or passive (for connection to PLCs or other devices that supply their own power for the I/O).

## 1.8.4. PLC Interfaces

The IND570 PLC interface options include Analog Output, DeviceNet, PROFIBUS DP, EtherNet/IP, Modbus TCP and ControlNet. Only one PLC option can be used at a time.

Additional details about each of these interfaces along with programming guidance can be found in the **IND570 PLC Interface Manual**, document #30205335 provided on the documentation CD included in the terminal packaging. The **IND570 PLC Interface Manual** can also be found at www.mt.com/IND570.

### 1.8.4.1. Analog Output

Analog Output refers to the representation of an internal system variable using a proportional electrical signal. Analog Output can be used to transmit a measured value, such as the gross or net weight.

0-5 volt DC, 0-10 volt DC, 0-20 mA and 4-20 mA signals are provided. Only one signal can be used at a time.

### 1.8.4.2. ControlNet

The ControlNet option enables the IND570 terminal to communicate to ControlNet Programmable Logic Controllers (PLCs) through direct connection to the ControlNet network.

### 1.8.4.3. DeviceNet

The IND570 DeviceNet option enables the terminal to communicate to a DeviceNet network. DeviceNet is an RS-485 based network utilizing CAN chip technology. This network was created for bit and byte-level devices. The network can be configured to run up to 500Kbits per second depending on cabling and distances. Messages are limited to 8 unfragmented bytes. The network can include up to 64 nodes including the master, commonly called the scanner.

### 1.8.4.4. PROFIBUS DP

The PROFIBUS option card enables the IND570 terminal to communicate to a PROFIBUS DP master according to DIN 19 245 and programmable logic controllers such as Siemens S7 series. The IND570 PROFIBUS communication solution consists of this internally installed PCB module and software that resides in the IND570 terminal which implements the data exchange.

### 1.8.4.5. EtherNet/IP

This internally installed PCB module enables the IND570 terminal to communicate to EtherNet/IP Programmable Logic Controllers (PLCs) through direct connection to the EtherNet/IP network at either 10 or 100 Mbps speed. The kit consists of a backplane-compatible I/O module, mounting hardware, and a ferrite. Software to implement the data exchange resides in the IND570 terminal.

### 1.8.4.6. Modbus TCP

In IND570, the Modbus TCP protocol is supported by the IND570 EtherNet/IP interface option. Modbus/TCP is used to establish master-slave/client-server communication between intelligent devices. It is an open standard network protocol, widely used in the industrial manufacturing environment. The ModbusTCP protocol takes the Modbus instruction set and wraps TCP/IP around it. Application Software

#### 1.8.4.7. Installing Application Software

The following application software modules can be added to the IND570 to provide additional functionality for specific workplaces and weighing operations.

#### 1.8.4.8. Fill-570

The Fill-570 is a special application that can be added to the IND570 terminal to provide additional filling and dosing control. It provides control for the following filling sequences:

- Dose out to target
- Dose out with an automatic refill of supply material(s)
- Fill to target
- Fill with a dump to empty
- Blend (up to 6 materials)
- Blend (up to 6 materials) with a dump to empty

Additional features of this software include:

- Specialized discrete I/O assignments for stand-alone control of filling and dosing systems
- Storage of formulas (multiple material blends)
- As-needed scaling of formulas
- Process statistics (maximum cycle time, out of tolerance count, etc.)
- Gain in weight monitoring for spill prevention
- Supply material conservation to support waste reduction

Additional information can be found in the **Fill-570 Technical Manual** which is found on the documentation CD that accompanies all application software modules.

#### 1.8.4.9. COM-570

The COM-570 option is a specialized software module solution focused on the needs of users utilizing legacy communication protocols or that have special command requirements. COM-570 maintains all of the standard features and functions of the standard IND570 in addition to the specific features and functions of the COM-570. It provides the following features and functions:

- Custom ASCII command template
- 8142 Host Protocol
- PT6S3 Protocol
- SMA Protocol
- 8530 Host Protocol

Additional information can be found in the **COM-570 Manual** on the documentation CD that accompanies all application software modules.

#### 1.8.4.10. Drive-570

The Drive-570 option is a specialized application solution focused on simple Inbound-Outbound vehicle weighing requirements. Some features of this software include:

- Two modes of operation: Temporary Tare ID Weighing and Permanent Tare ID Weighing
- Ability to store up to 100 Permanent Tare IDs
- Totalization of Permanent Tare IDs
- One-Step processing of Temporary IDs

- Sharing of Temporary IDs between two IND570 terminals for installations utilizing a separate inbound and outbound scale
- Reprint of previous transaction ticket
- Inbound Weight, Date and Time available on both inbound and outbound tickets
- Storage of up to 2000 transactions
- Support for multiple languages

Additional information can be found in the **Drive-570 Manual** on the documentation CD that accompanies all application software modules.

### 1.8.5. TaskExpert™

TaskExpert functionality provides a way to modify the standard capabilities of an IND570 so that it more closely aligns with a customer's specific application requirements. TaskExpert is a combination of a programming visualization tool, an execution engine and the basic functionality of the terminal. Modifications may be made to the standard sequences of operation and additional functionality may be added to the basic operation of the terminal.

TaskExpert custom programs that were written for the IND560 terminal will function on the IND570. The TaskExpert software development tool provides a converter function for this purpose.

### 1.8.6. InSite™ SL Configuration Tool

InSite™ SL is available to end users of IND570 terminals. The IND570 terminal can connect to a PC running InSite™ SL via Ethernet or Serial to provide the following functions:

- Saving terminal configuration, data tables and information logs to a local PC
- Loading a saved configuration to other terminals performing similar applications
- Restoring to a 'last known good state' for service purposes

# 1.9. Display and Keyboard

The IND570 terminal has an organic LED (OLED) display, 256 × 128 dot matrix graphic type display. An example of the IND570 front panel is shown in Figure 1-6.

**Figure 1-6: IND570 Front Panel Layout**

## 1.9.1. Display Layout

- A **metrology line** is designed to show the capacity and increment size information for the scale. This line is always shown except when in the setup mode. If multiple ranges are selected, this line will scroll through each of the available capacities and ranges. The metrology line is always in use when the terminal is in Approved mode. For non-approved applications, the metrology line can be enabled/disabled in Setup.
- The **system line** is used to display system messages, messages sent remotely from a PLC, and any asynchronous error messages.
- The **Service Icon** graphic is shown in the system line when specific service events are triggered in the terminal. Details of what has triggered the Service Icon can be found by pressing the INFORMATION RECALL softkey and then the SERVICE ICON softkey.
- The middle portion of the display is reserved for the **weight display**. If the **auxiliary display** enabled, this area of the display is shared between the weight display and the selection for auxiliary display (Figure 1-7). Random data entry is also shown in the bottom of this area.

**Figure 1-7: Small Material Transfer SmartTrac Enabled**

- SmartTrac is one of the available options for the auxiliary display. If SmartTrac is disabled, the weight display area can be shared with the **Rate display** (Figure 1-8) or **DIO status display** (Figure 1-9Figure 1-9).

**Figure 1-8: Rate Display**

**Figure 1-9: DIO Status Display**

- The **Tare display** is designed to show the current Tare value and type (pushbutton or preset). The Tare display can be separately enabled and disabled in Setup.
- The **Legend display** area provides the user with current operational information such as center of zero status, gross or net mode, etc.
- The very bottom of the physical display area is reserved for showing the **graphic labels (icons) for the softkeys**. Display positions for up to five softkey icons are provided. Chapter 2, **Operation,** provides more detailed information about all home screen softkeys, in the **Softkeys and Icons** section.
- To the right of the softkey icon area, space is reserved for MORE UP (⮝) or MORE DOWN (⮟) symbols. If present, these indicate additional softkey selections are available by pressing the UP or DOWN navigation keys. Up to 15 softkeys, presented in three sets of five, can be programmed for the home position, depending upon the weighing options and terminal functions enabled. The softkey setup and key mapping capabilities of the terminal determine the row and position of each softkey.

### 1.9.2. Front Panel Keys

Four dedicated scale function keys are located below the five softkeys. These provide the interface to zero or tare the scale, clear a tare and to initiate a print.

The terminal's 12-key alphanumeric keypad is used to enter data and commands. The alphanumeric keys are located on the upper-right side of the terminal front panel. Refer to Chapter 2, **Operation**, for additional details about the entry of alphanumeric data.

Five navigation keys are located below the alphanumeric keypad. These keys enable the operator to navigate through setup options in the menu tree and within setup and application screens.

# 2 Installation

This chapter covers
- Opening and Closing Enclosures
- Environmental Protection
- Mounting the Terminal
- Installing Cables and Connectors
- PCB Switch Settings
- PCB Jumper Positions
- Capacity and Increment Label Instructions
- Sealing the Enclosure

This chapter provides installation instructions for the IND570 terminal panel-mount and harsh enclosures. Please read this chapter thoroughly before beginning installation.

**⚠ WARNING!**

**NOT ALL VERSIONS OF THE IND570 ARE DESIGNED FOR USE IN HAZARDOUS (EXPLOSIVE) AREAS. REFER TO THE DATA PLATE OF THE IND570 TO DETERMINE IF A SPECIFIC TERMINAL IS APPROVED FOR USE IN AN AREA CLASSIFIED AS HAZARDOUS BECAUSE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES.**

**⚠ DIV 2 AND ZONE 2/22 INSTALLATION**

**TERMINALS THAT ARE NOT FACORY LABELED AS DIVISION 2 OR EUROPEAN CATEGORY 3 APPROVED MUST NOT BE INSTALLED IN A DIVISION 2 OR ZONE 2/22 ENVIRONMENT.**

**⚠ WARNING**

**DO NOT INSTALL, DISCONNECT OR PERFORM ANY SERVICE ON THIS EQUIPMENT BEFORE POWER HAS BEEN SWITCHED OFF OR THE AREA HAS BEEN SECURED AS NON-HAZARDOUS BY PERSONNEL AUTHORIZED TO DO SO BY THE RESPONSIBLE PERSON ON-SITE.**

**⚠ WARNING**

**ONLY THE COMPONENTS SPECIFIED IN THIS MANUAL CAN BE USED IN THIS TERMINAL. ALL EQUIPMENT MUST BE INSTALLED IN ACCORDANCE WITH THE INSTALLATION INSTRUCTIONS DETAILED IN THIS MANUAL. INCORRECT OR SUBSTITUTE COMPONENTS AND/OR DEVIATION FROM THESE INSTRUCTIONS CAN IMPAIR THE SAFETY OF THE TERMINAL AND COULD RESULT IN BODILY INJURY AND/OR PROPERTY DAMAGE.**

# 2.1. Opening and Closing Enclosures

Procedures for opening the IND570 terminal panel-mount and harsh enclosures differ and are described in the following sections.

## 2.1.1. Panel-Mount Enclosure

The panel-mount version of the IND570 is opened by removing the three Phillips-head screws on the back panel (see Figure 2-1). The rear panel can then be removed to gain access to the internal workings of the terminal.

**Figure 2-1: Opening the Panel-Mount Enclosure**

## 2.1.2. Harsh Enclosure

### 2.1.2.1. Opening the harsh Enclosure

The front panel of the harsh enclosure IND570 terminal is locked in place by four spring clips attached to the enclosure body. These four clips are located toward the corners of the enclosure. Two additional clips can be found along the sides of the enclosure. These two clips do not engage with the front cover, and are only there to guarantee proper placement and spacing during installation of the front cover on to the enclosure.

To gain access to the terminal's PCB for internal wiring and setting switches, separate the front panel from the enclosure as follows:

1. Insert the tip of a flat-blade screwdriver into one of the two slots located on the bottom of the front panel assembly (see Figure 2-2) and gently push in toward the enclosure. A "pop" sound is made when the cover is released. Pressing down on the front cover while pressing in on the clip can help facilitate release of the clip.

**Figure 2-2: Opening the Harsh Enclosure**

2. Repeat Step 1 for the other slot.
3. After releasing the front panel, lift the bottom of the front panel firmly up and out (Figure 2-3, 1) until it completely clears the top edge of the bottom enclosure.
4. Squeeze the top of the front panel to the enclosure slightly and push upward (Figure 2-3, 2) to unsnap the top two clips, then lift it to clear the two top clips. The cover will swing down, hinged by two wire cables at the bottom.

**Figure 2-3: Removing the Cover**

### 2.1.2.2. Closing the Harsh Enclosure

1. It is very important to replace the front panel of the harsh enclosure correctly and securely, especially for terminals installed in Division 2 areas classified as hazardous. The two clips positioned on the sides of the enclosure help to facilitate the appropriate spacing. Before it is pressed into place, the front panel must be centered on the enclosure, as shown in Figure 2-4.

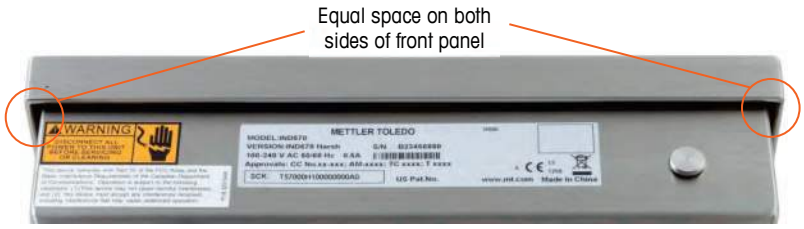

**Figure 2-4: Harsh Enclosure Front Panel Correctly Aligned**

2. With the cover in place and aligned correctly, press down firmly on the front and back edges in the locations shown in Figure 2-5 until four distinct clicks indicate that each of the four spring catches is engaged.

**Figure 2-5: Engaging the Four Spring Catches**

## 2.2. Environmental Protection

| | |
|---|---|
| | **⚠ WARNING** |
| | **NOT ALL VERSIONS OF THE IND570 ARE DESIGNED FOR USE IN HAZARDOUS (EXPLOSIVE) AREAS. REFER TO THE DATA PLATE OF THE IND570 TO DETERMINE IF A SPECIFIC TERMINAL IS APPROVED FOR USE IN AN AREA CLASSIFIED AS HAZARDOUS BECAUSE OF COMBUSTIBLE OR EXPLOSIVE ATMOSPHERES.** |

| | |
|---|---|
| | **⚠ DIV 2 AND ZONE 2/22 INSTALLATION** |
| | **TERMINALS THAT ARE NOT FACORY LABELED AS DIVISION 2 OR EUROPEAN CATEGORY 3 APPROVED MUST NOT BE INSTALLED IN A DIVISION 2 OR ZONE 2/22 ENVIRONMENT.** |

# 2.3. Mounting the Terminal

The panel-mount enclosure is designed to mount into a cutout of a flat surface such as an instrument panel or industrial enclosure or door. The harsh enclosure is designed to be placed on a desktop or can be mounted to a vertical surface with the mounting brackets included in the terminal packaging. Mount the terminal where viewing is optimal and the terminal keypad is easily accessible. Observe location and environment considerations as described in Chapter 1, Introduction.

## 2.3.1. Panel-Mount Enclosure

The panel-mount enclosure includes aluminum clamping brackets at the side of the extrusion. Two Allen-head set screws are used to tighten the brackets against the panel surface. The enclosure will mount and seal properly on panel thicknesses from 16 GA to 11 GA.

To install the panel-mount enclosure, follow these steps:

1. Loosen and remove the four Allen-head screws that secure the clamping brackets to the side of the housing (see Figure 2-6). Use the 2mm Allen wrench included with the terminal.

**Figure 2-6: Clamping Bracket**

2. Remove the two clamping brackets from the housing.
3. Locate the front panel mounting gasket (Figure 2-7) included with the terminal and remove the protective paper to expose the adhesive. Adhere the gasket to the rear of the front panel of the terminal, ensuring that the gasket is flat and spaced evenly on all sides.

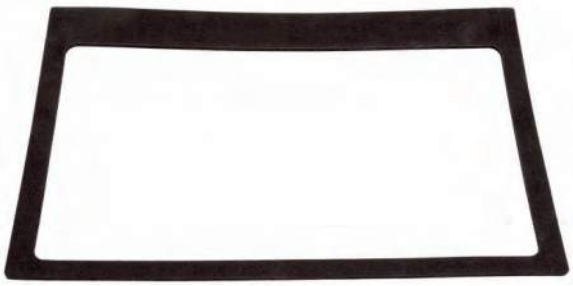

**Figure 2-7: Front Panel Gasket**

4. Cut an opening in the panel or industrial enclosure per the panel cutout dimensions shown in inches and [mm] in Figure 2-8.

   NOTE: The cutout dimensions of IND570 match those of IND560.

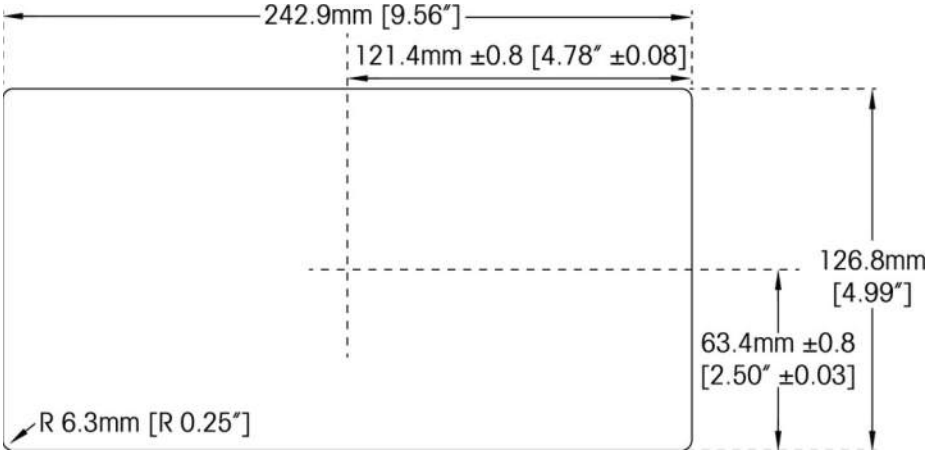

**Figure 2-8: Panel Cutout Dimensions**

5. Place the terminal through the cutout from the front and secure with the clamping brackets and Allen-head screws. The screws should be tightened to a torque of 5 inch pounds (0.55 N-m).

- NOTE: Once the Allen-head screws have been tightened, and the unit secured into place, the rear cover plate of the IND570 panel mount unit may be difficult to remove and replace for servicing. If this occurs, slight loosening of the Allen-head screws should allow for removal and replacement of the rear cover for service purposes.

By design, the rear cover plate can produce outward force on the (extended) retaining brackets, increasing the overall stiffness of the enclosure structure and providing additional assurance that the panel mount unit will remain securely in place.

## 2.3.2. Harsh Enclosure

The harsh enclosure is made of stainless steel with a front panel angle of approximately 38 degrees. The harsh enclosure is designed to rest on a flat surface such as a table or desk top, or it can be mounted to a vertical surface with the mounting brackets included with the terminal.

### 2.3.2.1. Desktop Mounting

When the IND570 terminal will be placed on a flat surface, the four rubber feet included with the terminal should be adhered to the bottom of the enclosure to prevent sliding. Locate the four rubber

feet, remove the protective paper from the adhesive, and press the feet onto the corners of the bottom of the enclosure as shown in Figure 2-9.

**Figure 2-9: Rubber Feet**

### 2.3.2.2. Wall Mounting

Two angled brackets are included with a harsh model IND570 for the purpose of mounting the enclosure to a vertical surface. To wall mount the enclosure, follow these steps:

1. Bolt the two brackets to the bottom of the enclosure using the four M5 screws included with the terminal. The brackets should be attached as shown in Figure 2-10.

**Figure 2-10: Attaching the Wall-Mounting Brackets**

2. If the enclosure will be mounted above eye level, proceed to step 4.
3. If the enclosure will be mounted at or below eye level, it will be necessary to reverse the front cover 180 degrees. Note that reversing of the cover is not possible when the Profibus PLC interface is installed. If the Profibus option is installed, proceed to step 4. To reverse the front cover, perform the following steps:
   A. Open the enclosure per the instructions provided in the Opening the Enclosures section.
   B. Loosen and remove the two nuts securing the two grounding straps (these also operate as hinges for the front cover) to the rear housing. See Figure 2-11.

**Figure 2-11: Loosening the Ground Straps**

**Figure 2-12: Front Panel Removed**

C. Carefully rotate the front cover 180 degrees and reattach the two grounding straps to the two studs near the grip bushings using the two nuts removed in the previous step as shown in Figure 2-13. Tighten the two nuts.

**Figure 2-13: Front Panel and Load Cell Connection Reversed**

4. Mark the position of the mounting holes on the vertical surface per the dimensions shown in Figure 2-14 or by holding the terminal up to the surface and marking through the bracket holes.

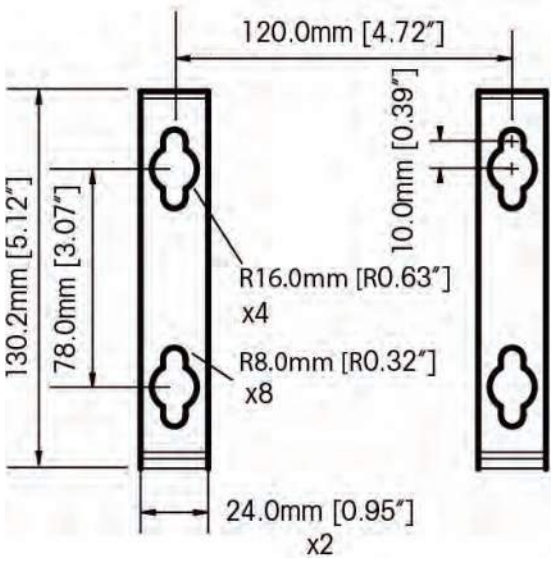

**Figure 2-14: Wall Bracket Mounting Hole Pattern**

5. The hardware to mount the terminal to the vertical surface is not included with the terminal—it must be supplied locally. Ensure that the mounting hardware is capable of supporting the weight of the terminal, which is approximately 3.5 kg (8 lb). Using the locally supplied hardware, mount the terminal to the vertical surface.

# 2.4. Installing Cables and Connectors

Information for installing cables and connectors for the IND570 terminal is provided in this section, including: ferrites, harsh enclosure cable glands, main board wiring connections and wiring connections for options.

## 2.4.1. Ferrites

In order to meet certain electrical noise emission limits and to protect the IND570 from external influences, it is necessary to install a ferrite core on each cable connected to the terminal. There are two ferrite cores included with the basic terminal and additional ferrites are supplied with each of the options.

To install ferrites, simply route the cable through the center of the core and then take one wrap around the outside of the core and route the cable through again. Either the complete cable or the individual wires can be wrapped through the ferrite. This should be done as close to the enclosure as possible. See Figure 2-15.

**Figure 2-15: Installing the Ferrite Cores**

### 2.4.2. Harsh Enclosure Cable Openings

Figure 2-16 and Table 2-1 show the uses of the glands and other openings on the rear of the harsh enclosure.

**Figure 2-16: Harsh Enclosure Cable Opening Assignments**

**Table 2-1: Harsh Enclosure Cable Openings**

| Number | Use | Cable Gland Size, mm |
|---|---|---|
| 1 | Ethernet | 25 |
| 2 | USB and External USB Adapter | 25 |
| 3 | AC Power | 16 |
| 4 | Analog Load Cell | 16 |
| 5 | COM1 | 16 |
| 6 | DI/O and PLC options *or* Ethernet Extension Kit | 16 |

### 2.4.3. Harsh Enclosure Cable Glands

The IND570 harsh environment terminal is designed to withstand severe washdown environments and is certified to IP69K ingress protection. However, care must be taken when installing cables and/or connectors that enter the terminal enclosure. To ensure a watertight seal:

1. Pass the cables through an appropriately sized cable grip before connecting the wires. Figure 2-17 shows one load cell cable installed in its cable grip, and a second grip disassembled.

**Figure 2-17: Cable Glands**

2. Depending upon the diameter of the cable to be installed, select one of the two different sized rubber grommets (if required) to properly seal around the cable.

**Table 2-2: Grommet Cable Sizes**

| Grommet | Cable Diameter |
|---|---|
| None | 7–10 mm (0.28–0.39 in.) |
| Larger size hole | 5– 6 mm (0.20–0.24 in.) |
| Smaller size hole | 3–4 mm (0.12–0.16 in.) |

3. When making cable terminations inside the harsh enclosure, ensure that the cable length from the terminal strip/connector to the terminal housing is sufficient so that no strain is placed on the connector assembly when the housing is in the fully open position.
4. After making the wiring connections as described in the next section, ensure the nut on the cable gland is tightened properly to seal around the cable. Ensure that this seal is watertight.
5. Cable shielding should be grounded to the IND570's enclosure by spreading the shield wires as shown at the top of Figure 2-18, then folding them back over the plastic component of the cable gland before pressing it into the threaded body.

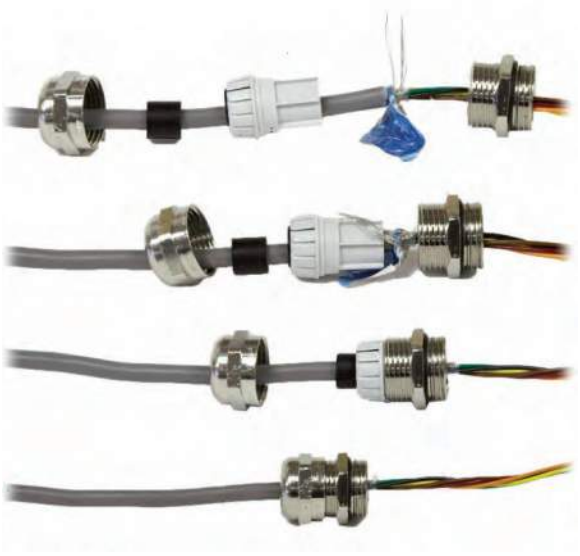

**Figure 2-18: Cable Shield Grounding**

### 2.4.4. External USB Adapter

Long-term connection to the USB port on the main board can be made through the available 25mm cable gland. If quick disconnect of a USB device is required for an application, an optional USB adapter kit can be installed on the harsh environment terminal to make the USB connection accessible from outside the harsh enclosure

**Figure 2-19: External USB Adapter**

## 2.4.5. Main Board Wiring Connections

Once the IND570 terminal harsh enclosure is open, connections can be made to the terminal strips on the main board, as shown in Figure 2-20.

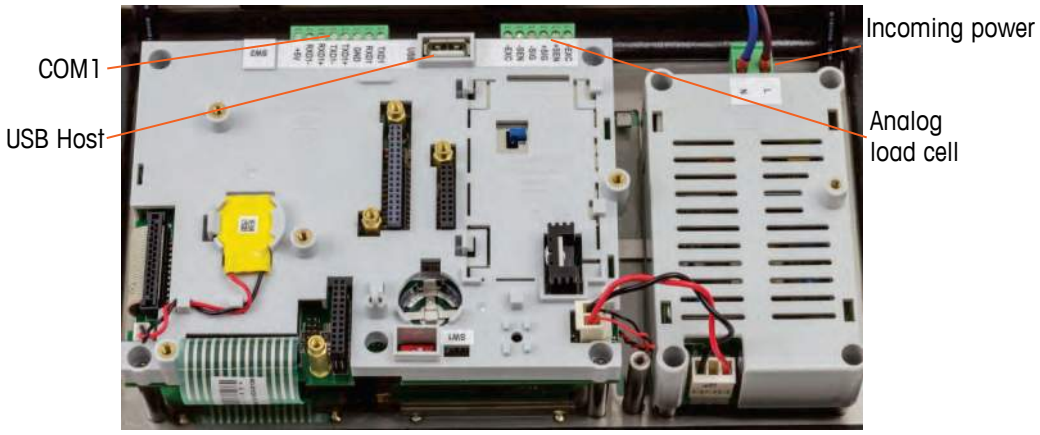

**Figure 2-20: Analog Main Board in Harsh Enclosure**

It is not necessary to open the panel mount enclosure (Figure 2-21) to make these connections.

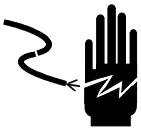

**Figure 2-21: Panel Mount Enclosure Connections, including IDNet Scale Interface**

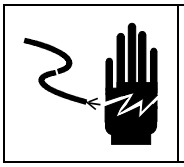
### 2.4.5.1. Power Connection

- NOTE: The integrity of the power ground for equipment is important for both safety and dependable operation of the terminal and its associated scale base. A poor ground can result in an unsafe condition should an electrical short develop in the equipment. A good ground connection minimizes extraneous electrical noise pulses.

- NOTE: The IND570 should not share power lines with noise-generating equipment. To confirm ground integrity, use a commercial branch circuit analyzer. If adverse power conditions exist, a dedicated power circuit or power line conditioner might be required.

A permanently attached line cord supplies the AC power to the harsh enclosure version of the IND570 terminal. The panel-mount enclosure is not supplied with a power cord –it is designed to have AC or 24 VDC wiring brought directly to the rear of the chassis and connected to the incoming power terminal strip.



**⚠ WARNING**

**ENSURE THAT THE POWER CONNECTION TO THE IND570 TERMINAL MATCHES THE SPECIFIED OPERATING VOLTAGE OF THE TERMINAL. REFER TO THE DATA LABEL OF THE TERMINAL FOR THE OPERATING VOLTAGE. CONNECTING THE INCORRECT POWER SOURCE TO THE TERMINAL COULD RESULT IN DAMAGE TO OR DESTRUCTION OF THE EQUIPMENT AND/OR BODILY HARM.**

2.4.5.1.1. AC Powered Models

When an IND570 is configured for AC power, the two AC power connections are marked "L" for line (hot) and "N" for neutral as shown in Figure 2-22, Figure 2-23 and Figure 2-24. A loop terminal and ground screw are provided for the ground connection on the panel mount. Harsh models have the power ground installed with the region appropriate power cord.

No voltage or frequency settings are required since IND570 includes either a universal AC power supply that operates from 85 to 264 VAC. The AC terminal requires 85 to 264 VAC (at 750 mA maximum) with a line frequency of 49 to 61 Hz of power.

**⚠ WARNING**

**FOR CONTINUED PROTECTION AGAINST SHOCK HAZARD CONNECT TO PROPERLY GROUNDED OUTLET ONLY. DO NOT REMOVE THE GROUND PRONG.**

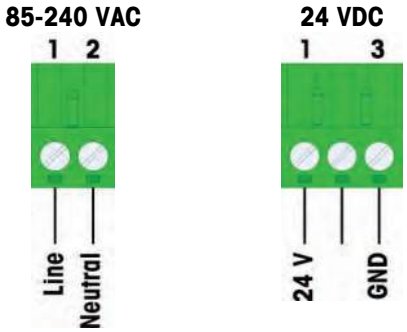


**Figure 2-22: Incoming Power Termination**

**Figure 2-23: AC Power Connection on Panel Mount**

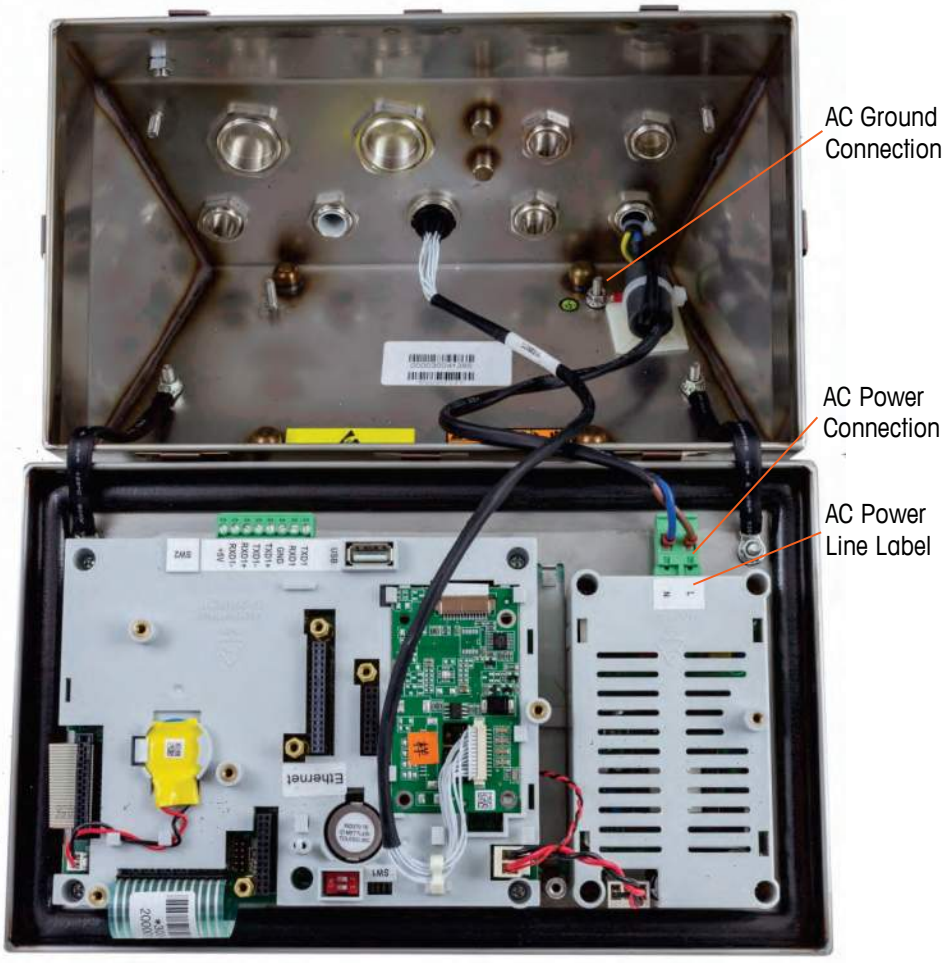

**Figure 2-24: AC Power Connections on Harsh Models**

2.4.5.1.2. DC Powered Models

24 VDC power is only available on panel mount models. The DC terminal requires 24 VDC, -15%, +20% (at 1.25A maximum).

No power cables are included with the 24 VDC powered IND570 terminals. The 24 VDC power and ground must be brought directly to the power connection of the main board and terminated there. Figure 2-21 and show the three position terminal block provided for the DC power connection. A wire is not terminated to the center position.

### 2.4.5.2. Analog Load Cell Connections

| ***NOTICE*** |
| --- |
| **TO AVOID DAMAGE TO THE PCB OR LOAD CELL, REMOVE POWER FROM THE IND570 TERMINAL AND WAIT AT LEAST 30 SECONDS BEFORE CONNECTING OR DISCONNECTING ANY HARNESS.** |

When using an analog load cell version of the IND570, load cell connections are made to the connector located on the main board as shown in Figure 2-20.

The IND570 terminal is designed to power up to twelve 350-ohm load cells (or a minimum resistance of approximately 29 ohms). To confirm that the load cell load for this installation is within limits, the total scale resistance (TSR) must be calculated. To calculate TSR:

$$TSR = \frac{\text{Load Cell Input Resistance (Ohms)}}{\text{Number of Load Cells}}$$

Ensure that the TSR of the load cell network to be connected to the IND570 has a resistance greater than 29 ohms before connecting the load cells. If the resistance is less than 29 ohms, the IND570 will not operate properly.

In addition, the maximum cable distance must be reviewed. Table 2-3 provides recommended maximum cable lengths based on TSR and cable gauge.

**Table 2-3: Recommended Maximum Cable Lengths**

| TSR (Ohms) | 24 Gauge (meters/feet) | 20 Gauge (meters/feet) | 16 Gauge (meters/feet) |
| --- | --- | --- | --- |
| 350 | 243/800 | 610/2000 | 1219/4000 |
| 87 (4-350 Ω cells) | 60/200 | 182/600 | 304/1000 |
| 43 (8-350 Ω cells) | 30/100 | 91/300 | 152/500 |
| 29 (12-350 Ω cells) | 20/67 | 50/167 | 102/333 |

A jumper is provided that adjusts the gain of the analog section for 2 mV/V or 3 mV/V load cells. The factory default position of this jumper is 3 mV/V. Normally this position will work well for both 2 mV/V and 3 mV/V load cells. If 2 mV/V load cells are used, the jumper can be changed to the 2 mV/V position. Refer to Figure 2-52 for the jumper position.

Figure 2-25 shows the terminal definitions on the analog load cell terminal strip. Note that when using four-wire load cells, jumpers must be placed between the +Excitation and +Sense terminals and between the –Excitation and –Sense terminals.

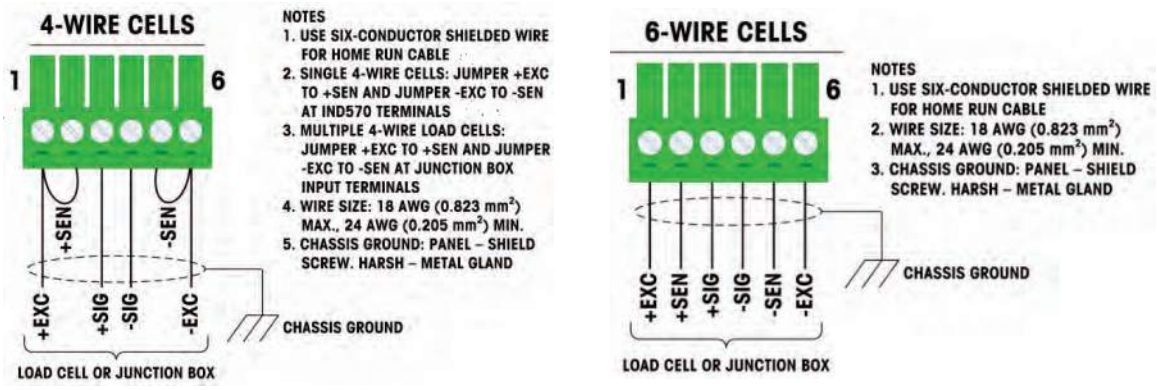

**Figure 2-25: Load Cell Termination**

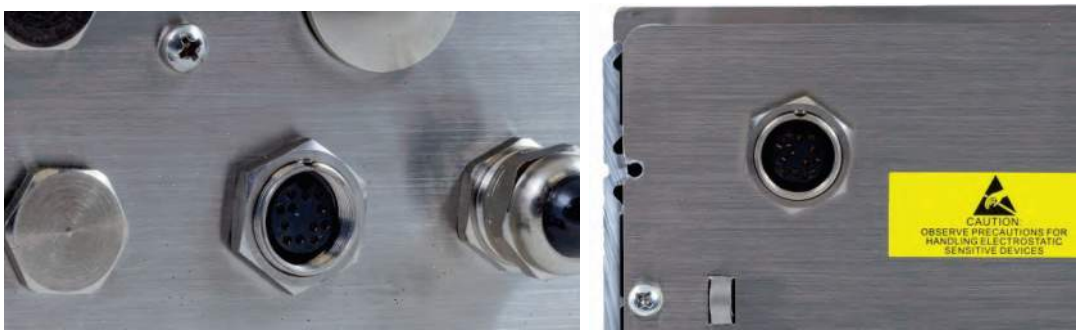
- Note for the standard four-wire cable: If an increase in load results in a decrease in weight display, reverse the signal wires (+SIG and –SIG).

### 2.4.5.3. IDNet Connections

The IND570 terminal supplies 12 V for the newer T-Brick type cell of the IDNet base. Older types of IDNet bases (known as Pik or Pik-Brick) require both a 12 V and a 32 V supply. IND570 does not support older IDNet bases that require a 32 V supply.

When using an IDNet version of the IND570 terminal, the cable connection from the base is made to a connector (Figure 2-26) on the rear of the housing. The IDNet bases are supplied with a length of cable and a connector that mates to the connector on the IND570 terminal.



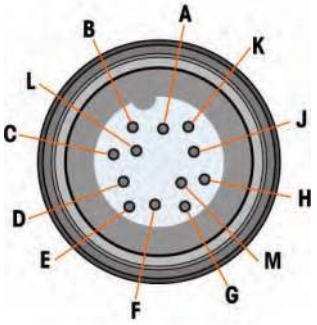


**Figure 2-26: IDNet Connector Location on the Harsh (left) and Panel (right) Enclosures**

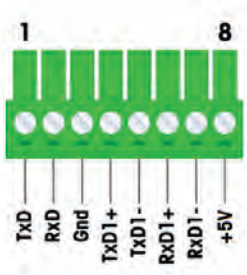
Figure 2-27 shows the pin assignments and wire colors for the IDNet connector.



| IDNet connector | | |
|---|---|---|
| **Pin** | **Color** | **Note** |
| P1–A | Green | TXD+/RXD+ |
| P1–B | Blue | +30V |
| P1–C | Grey | +12V |
| P1–D | Green | Jumper |
| P1–E | Red | RXD1+ |
| P1–F | White | RXD– |
| P1–G | | |
| P1–H | Pink | Ground |
| P1–J | Yellow | TXD– |
| P1–K | Purple | TXD1– |
| P1–L | Black | TSD1+ |
| P1–M | Orange | RXD1– |

**Figure 2-27: IDNet Connector Pin Assignments**

### 2.4.5.4. COM1 Serial Port Connections

The COM1 port includes connections for RS-232, RS-422 and RS-485. There is a setup parameter that must be selected to match the hardware connection used. This parameter controls how the Transmit and Receive lines are controlled.

Figure 2-28 indicates which terminal carries which signal on the COM1 port. Make the connections as necessary.

| Terminal | Signal | Notes |
|---|---|---|
| TxD | Transmit RS-232 | |
| RxD | Receive RS-232 | |
| GND | Logic Ground | |
| TxD1+ | +Transmit RS-422, RS-485 | Jumper to RxD1+ for RS-485 |
| TxD1- | -Transmit RS-422, RS-485 | Jumper to RxD1- for RS-485 |
| RxD1+ | +Receive RS-422, RS-485 | Jumper to TxD1+ for RS-485 |
| RxD1- | -Receive RS-422, RS-485 | Jumper to TxD1- for RS-485 |
| +5V | 5 volts DC | 100 mA nominal current |

**Figure 2-28: COM1 Port Signals**

Some examples of connecting external equipment are shown in Figure 2-29.

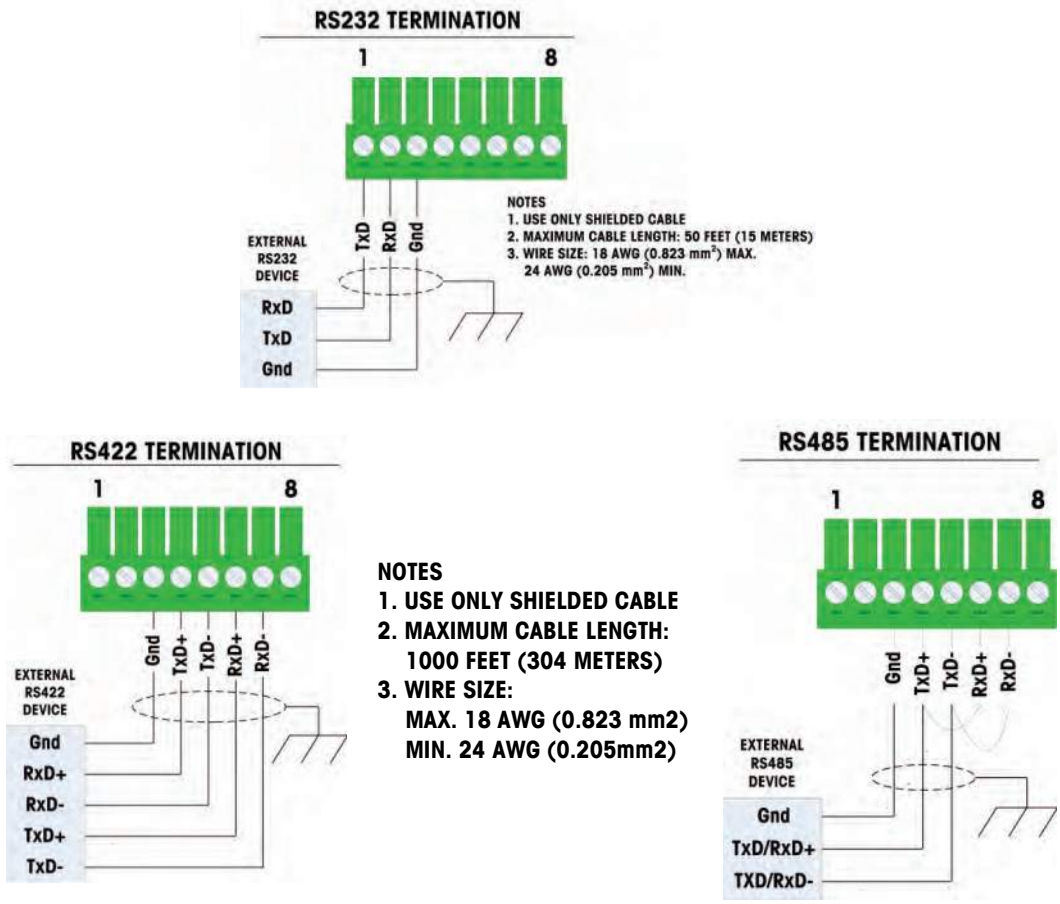


**Figure 2-29: Sample COM1 Connections**

2.4.5.4.1. RS-485 Transmission Line Termination

The RS-485 network should include a terminating resistor, installed between the two lines at or on the last node. The terminating resistor should match the characteristic impedance of the transmission line, approximately 120 ohms. This terminating resistor is required when connecting ARM100 modules to the port.

## 2.4.6. Wiring Connections for Options

Options available for the IND570 terminal that require external connections include the following:

- Ethernet TCP/IP
- COM2/COM3 Serial Ports
- 5 In/8 Out Discrete I/O (Relay)
- COM2/COM3 Serial Ports with 2 In/5 Out Discrete I/O (Relay)
- Analog Output
- ControlNet

- DeviceNet
- Profibus (Harsh Enclosure)
- Profibus (Panel-Mount Enclosure)
- EtherNet/IP – Modbus TCP

Options are installed on the main PCB in the locations indicated in Figure 2-30.

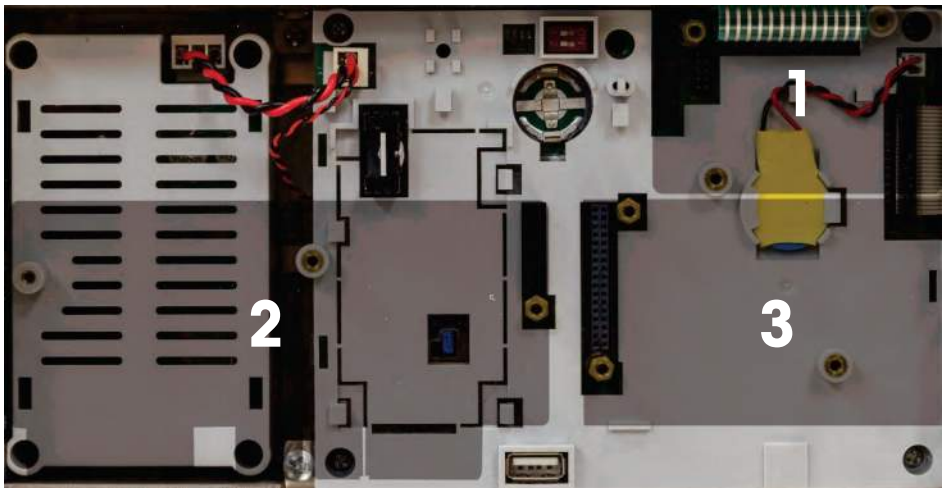

**Figure 2-30: Key to Option Board Locations**

### 2.4.6.1. Ethernet Connection

Figure 2-31 shows the Ethernet option board, and Figure 2-32 shows the board installed in position 1 (Figure 2-30) on the main board. This option board provides a 10 Base-T connection (10 Mb) connection for Ethernet. The Ethernet connection is made via a standard RJ45 connector on the option board.

**Figure 2-31: Ethernet Connection Option Board**

**Figure 2-32: Ethernet Option Installed on Main Board**

- Important: When installing either the Ethernet option, adhere the Ethernet label from the kit to the rear panel of the panel-mount unit near the Ethernet connector. On the harsh enclosure, adhere the Ethernet label to the Main board cover near the Ethernet connector.

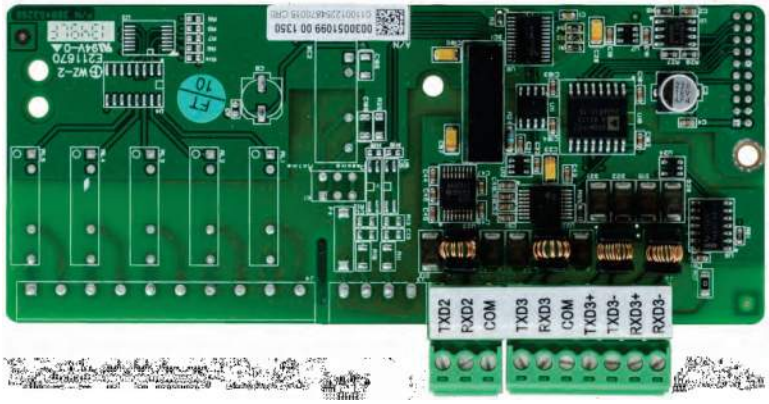
2.4.6.1.1. External Ethernet Adapter

Long-term connection to the optional Ethernet port installed on the main board can be made through the available 25mm cable gland. If quick disconnect of an Ethernet connection is required for an application, an optional Ethernet adapter kit can be installed on the harsh environment terminal to make the Ethernet connection accessible from outside the harsh enclosure. The external Ethernet connector is an M12 connector and can be used with METTLER TOLEDO cable part # 22017610 (M12 to Ethernet-RJ45)

**Figure 2-33: External Ethernet Adapter**

### 2.4.6.2. COM2/COM3 Option

Figure 2-34 shows the COM2/COM3 option, and Figure 2-35 shows it installed in position 2 (Figure 2-30) on the main board. This slot is used for all Discrete I/O and COM2/COM3/Discrete I/O combination options.



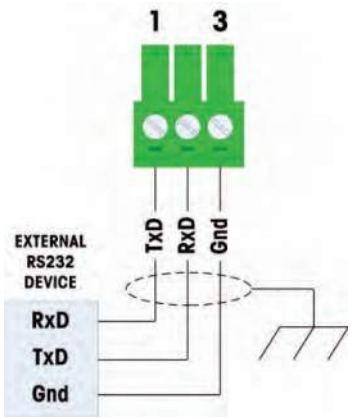


**Figure 2-34: COM2/3 Option Board**

**Figure 2-35: COM2/3 Option Board, Installed**

COM2 provides only RS-232 and should be connected as shown in Figure 2-36.

**NOTES:**

**1. USE ONLY SHIELDED CABLE.**

**2. MAXIMUM CABLE LENGTH: 50 FEET (15 METERS).**

**3. WIRE SIZE: 18 AWG (.823 mm2) MAX. 24 AWG (0.205 mm2) MIN.**

**Figure 2-36: Wiring to COM2**

COM3 provides RS-232, RS-422 or RS-485 connections, which is identical to COM1 on the Main board except the +5 VDC supply on the last terminal is not provided. Refer to the COM1 connection section described previously for instructions for wiring to this port. Review Figure 2-28 and Figure 2-29 for additional details.

### 2.4.6.3. Discrete I/O Options

Two Discrete I/O option boards are available, only one of which can be installed at a time:

- 2 in/5 out, relay, with COM2 and COM3 ports
- 5 in/8 out, relay

These option boards are installed in position 2 (Figure 2-30) on the main board. Inputs and outputs are wired as shown in Figure 2-37, Figure 2-38 and Figure 2-39.

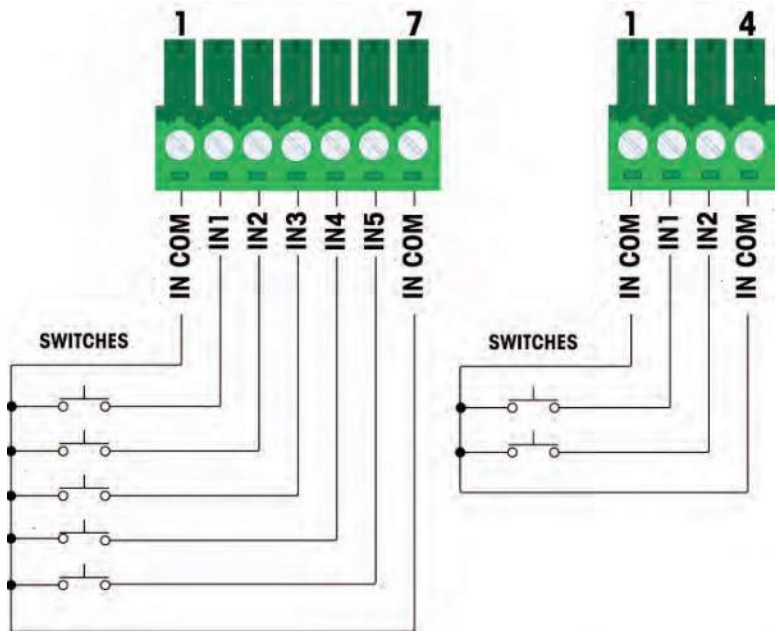

**Figure 2-37: Active Input Wiring**

- Notes for Active Input Discrete I/O wiring:
  - Voltage is logic level 5 VDC. Low resistance contacts recommended.
  - Maximum cable length of 20 feet (6 meters).
  - Do not bundle input wiring with power wiring or any other high energy cables
  - Switches may be replaced with relay dry contacts
  - Wire sizes: 22 AWG min./ 14 AWG max.

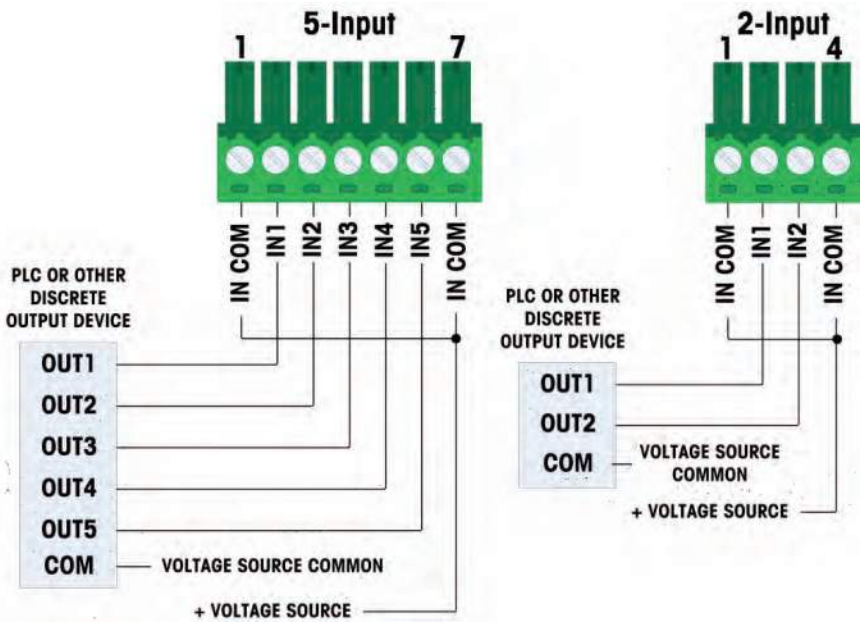

**Figure 2-38: Passive Input Wiring**

- Notes for Passive Input Discrete I/O wiring:
  - Voltage: 5-30VDC, 10 mA max. current. Voltage polarity may be reversed
  - Do not bundle input wiring with power wiring or any other high energy cables
  - Wire sizes: 22 AWG min./14 AWG max.

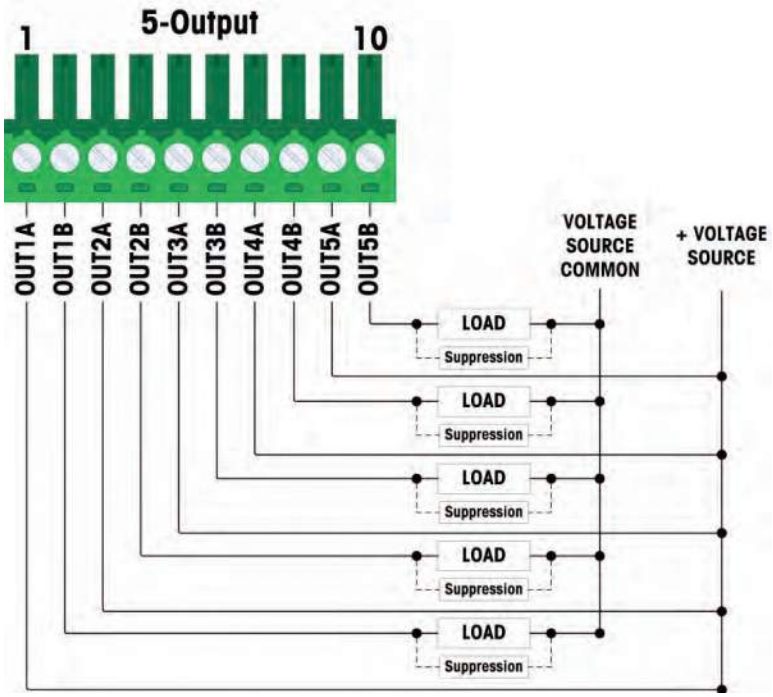

**Figure 2-39: Relay Output Wiring, 5 Outputs**

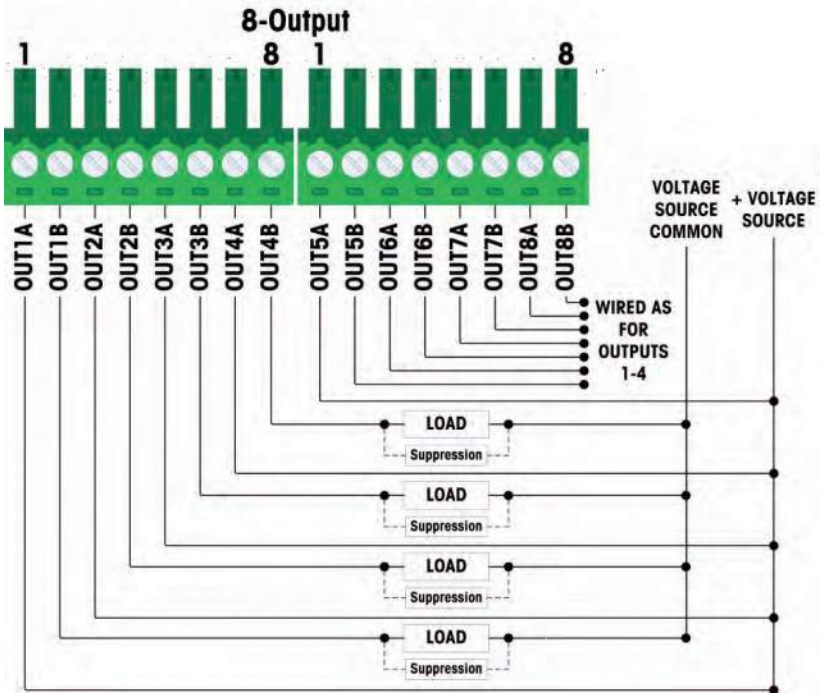

**Figure 2-40: Relay Output Wiring, 8 Outputs**

- Notes for Active Input Discrete I/O wiring:
  - Dry contact relays:

- Rating:

  AC: 250 VAC max., 1 amp into resistive load

  DC: 30 VDC max., 1 amp into resistive load

  Max. switching power: 250 VA, 30 W
- Max. output circuit current = 3 amps
- All inductive loads must be suppressed
- Wire sizes: 22 AWG min./14 AWG max.

#### 2.4.6.4. Analog Output Option

The analog output option board (Figure 2-41) is installed in position 2 (Figure 2-30) on the main board. It provides either a 0-10 VDC or a 4-20mA (but not both at the same time) analog signal proportional to the weight applied to the scale.

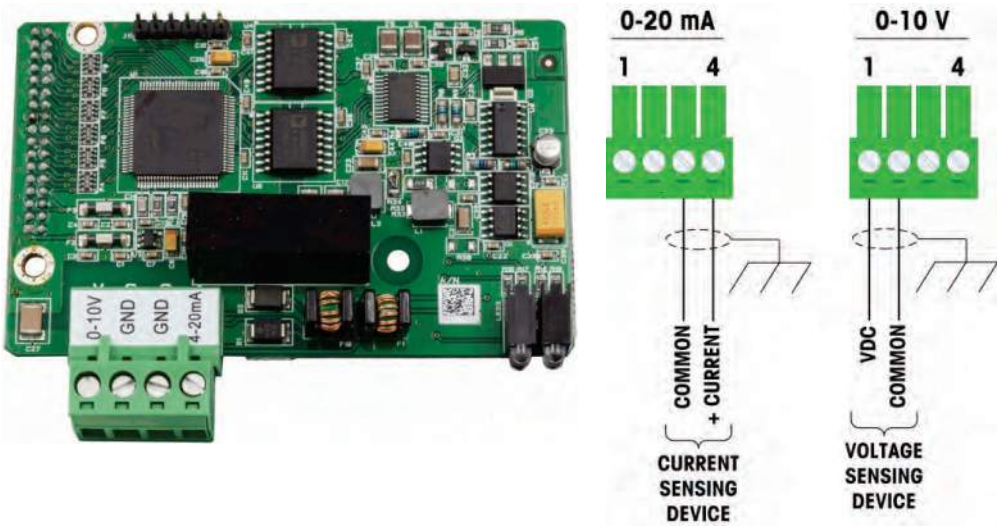

**Figure 2-41: Analog Output Option Board and Wiring**

- Notes for Analog Output option wiring:
  - Use two-conductor shielded cable.
  - Minimum resistance of 0-10V device: 100 KΩ
  - Maximum resistance of 4-20 mA device: 500Ω
  - Wire sizes: 14 AWG max./22 AWG min.

#### 2.4.6.5. ControlNet PLC Option

The ControlNet PLC option board (Figure 2-42) is installed in position 2 (Figure 2-30) on the main board.

- The ControlNet PLC option can only be installed into a pane-mount IND570 terminal.

The ControlNet option connects to the ControlNet network via a tap and drop cable from the original trunk cable. The option supports one connection or two (for redundancy). Channel A is the normal connection and Channel B (redundant with Channel A) can be used if ControlNet detects no signal

on Channel A. Note that the module's address is set in software, and the MAC ID switches indicated in Figure 2-42 are not used.

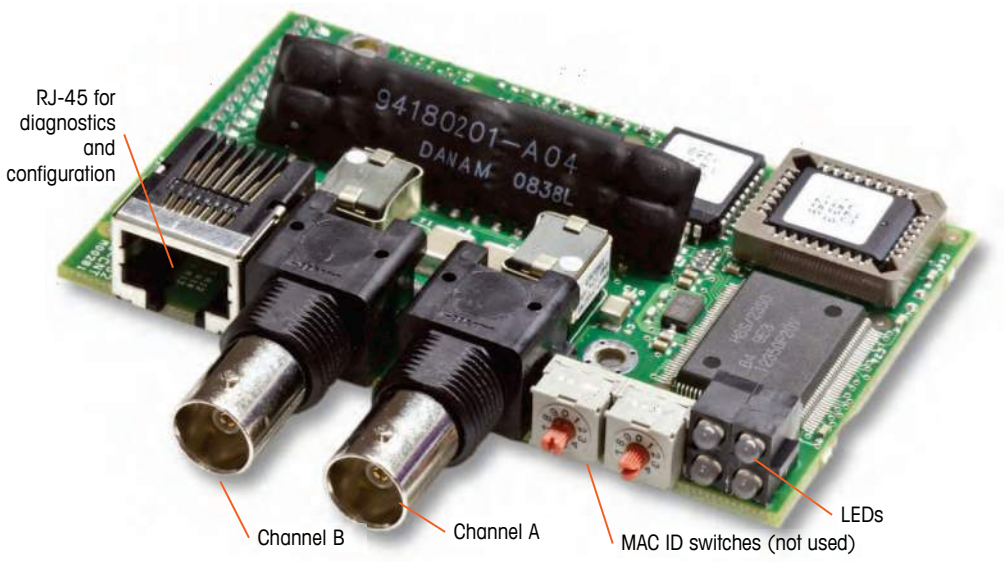

**Figure 2-42: ControlNet PLC Module Connections and Components**

- **Do not** plug an Ethernet cable into the RJ-45 connector shown at left in Figure 2-42. This connection is not used.

ControlNet network connections are made by using taps and drop cables from the main trunk line. Figure 2-43 shows examples of two different ControlNet tap and drop cables. Note that the connector may be straight or right-angled, as seen here. Either can be used with the ControlNet interface installed in a panel mount IND570. This drop cable is not supplied by METTLER TOLEDO.

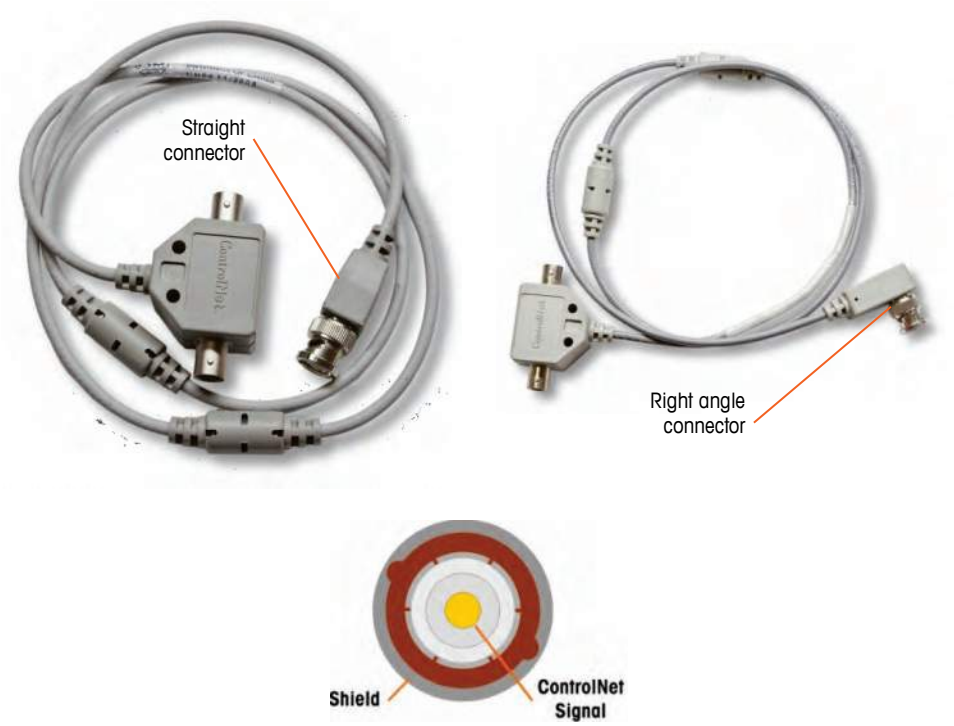

**Figure 2-43: ControlNet Tap and Drop Cables**

### 2.4.6.6. DeviceNet PLC Option

The DeviceNet PLC option board (Figure 2-44) is installed in position 2 (Figure 2-30) on the main board. The DeviceNet option board is connected to the network by a DeviceNet-specific twisted pair cable.

**Figure 2-44: DeviceNet PLC Option Board and Wiring**

- Notes for DeviceNet option wiring:
  - Connection with 2 twisted-pair shielded cables, Belden 3082A or 2083A or equivalent.
  - Refer to ODVA DeviceNet documentation (http://www.odva.org) for other considerations.
  - Wire sizes: 14 AWG max./22 AWG min.

### 2.4.6.7. EtherNet/IP – Modbus TCP PLC Option

The EtherNet/IP – Modbus TCP PLC option (Figure 2-45) is installed in position 2 (Figure 2-30) on the main board. The EtherNet/IP-Modbus TCP PLC option connects to the network via a standard Ethernet patch cable. The module's address is set in software, and the DIP switches are not used and must all be set to OFF.

**Figure 2-45: EtherNet/IP-Modbus TCP Option Board**

Figure 2-46 shows the array of status indicator LEDs on the EtherNet/IP card.

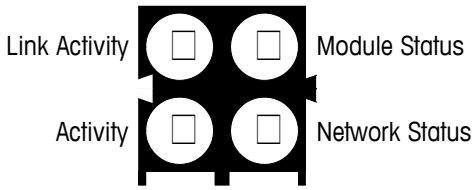

**Figure 2-46: EtherNet/IP Status Indicator LEDs**

For convenience, an EtherNet/IP PLC label is provided in the kit. The label can be applied to an IND570 near the EtherNet/IP connector to help differentiate the RJ45 connector of the EtherNet/IP PLC option from the RJ45 connector of the Ethernet TCP/IP network option shown in Figure 2-31and Figure 2-32.

### 2.4.6.8. Profibus PLC Option (Harsh Enclosure)

The Profibus PLC option board (Figure 2-47) is installed in position 2 (Figure 2-30) on the main board. Connection to the Profibus board in the harsh enclosure (Figure 2-47) is made using a right-angle nine-pin connector inside the IND570 enclosure. This connector is a standard Siemens part # 6ES7 972-0BA41-0XA0 or equivalent. It is not supplied by METTLER TOLEDO.

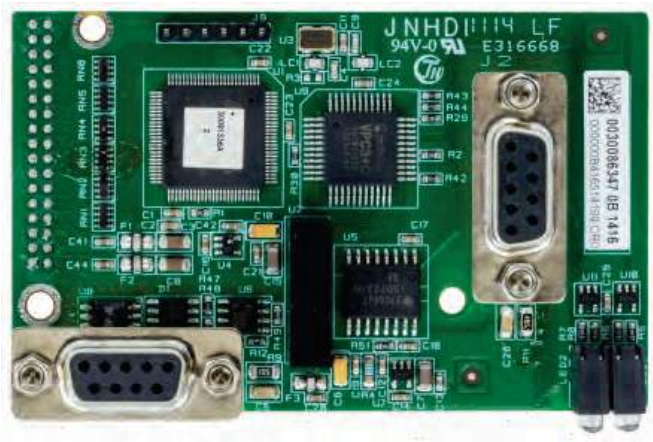

**Figure 2-47: Profibus Option Board for Harsh Enclosure**

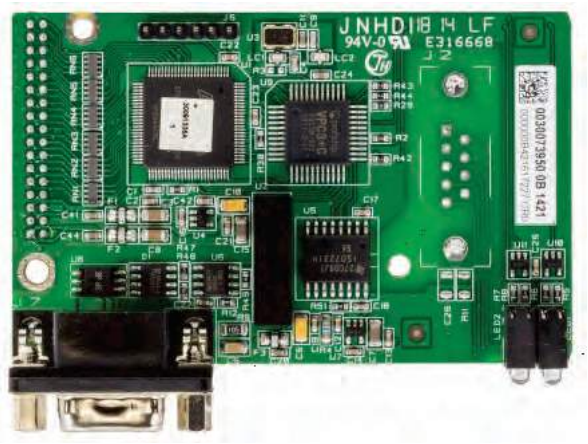
There are two nine-pin connectors on the Profibus board – use the connector and cable routing shown in Figure 2-48. Refer to Figure 2-50 for the Profibus nine-pin connector assignments and follow the wiring instructions included with the connector to terminate the wires.

**Figure 2-48: Profibus Cable Connection in Harsh Enclosure**

### 2.4.6.9. Profibus PLC Option (Panel-Mount Enclosure)

The Profibus PLC option board (Figure 2-47) is installed in position 2 (Figure 2-30) on the main board.



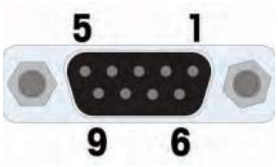


**Figure 2-49: Profibus Option Board, Panel Mount Enclosure**

Either a straight or a right-angled nine-pin connector can be used to make the connection to the Profibus option board installed in a panel-mount version of the IND570. The right-angle nine-pin mating connector is Siemens part # 6ES7 972-0BA41-0XA0. The straight mating connector is

METTLER TOLEDO part # 64054361. Neither of these connectors is supplied by METTLER TOLEDO as part of the option.

Pin assignments for the Profibus PLC interface for both the harsh and the panel-mount enclosure are shown in Figure 2-50. Follow the wiring instructions included with the connector to terminate the wires.

| Pin | Signal |
|---|---|
| 1 | Not used |
| 2 | Not used |
| 3 | RxD/TxD + |
| 4 | RTS |
| 5 | GND bus |
| 6 | +5V bus |
| 7 | Not used |
| 8 | RxD/TxD - |
| 9 | Not used |

**NOTES:**

1. **USE MATING CONNECTORS AND CABLE RECOMMENDED FOR Profibus CONNECTIONS.**
2. **REFER TO Profibus INTERNATIONAL DOCUMENTATION FOR OTHER CONSIDERATIONS.**

**Figure 2-50: Profibus Nine-Pin Connector Assignments**

# 2.5. PCB Switch Settings

PCB switch settings are described in this section, including settings for main PCB switches and the discrete I/O (relay) switch.

## 2.5.1. Main PCB Switches

Four switches (indicated in Figure 2-51, which shows the Analog version of the terminal) are located on the main PCB. These switches function as shown in Table 2-4.

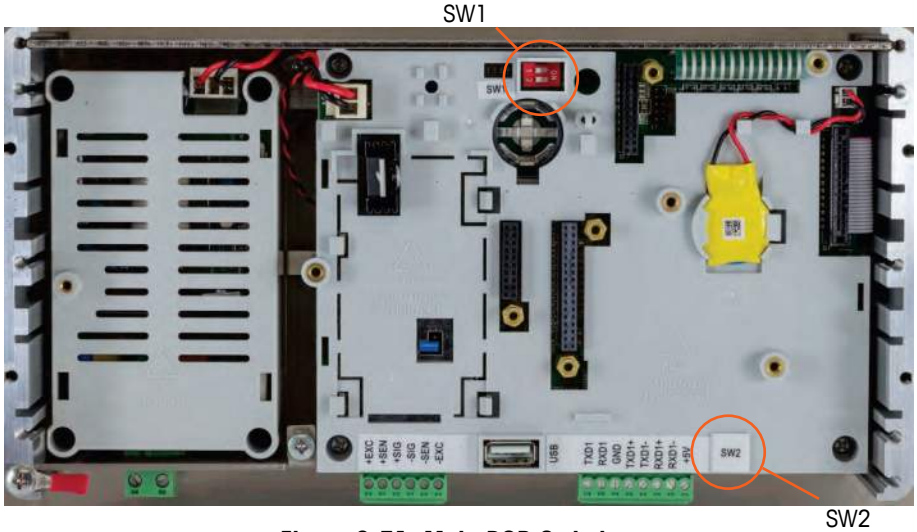

**Figure 2-51: Main PCB Switches**

**Table 2-4: Functions of Main PCB Switches**

| Switch | Functions | |
|---|---|---|
| SW1-1 | Metrology Security Switch (legal for trade).<br>When in the ON position, this switch reduces Administrator access to Maintenance level which prohibits access to the Scale block in the menu tree and other metrologically significant areas. This is true even if no scale approval option is selected in setup. | When both SW1-1 and SW1-2 are set to ON and power is cycled, a Master Reset is performed. Metrologically significant data are not reset unless SW2-1 is also set to ON. |
| SW1-2 | Flash Software.<br>Set in the ON position during software download<br>Set in the OFF position during normal operation | |
| SW2-1 | Factory test.<br>Set in the OFF position at all times for normal weighing. This switch must be ON when connecting to the InSite™ CSL program using the COM1 serial port of the IND570 terminal. | When a Master Reset is performed, set SW2-1 to ON to reset metrologically significant data, such as scale calibration, GEO code, etc. |
| SW2-2 | Factory test.<br>Set in the OFF position at all times | |

- When both SW1-1 and SW1-2 are positioned ON and AC power is applied to the terminal, a Master Reset function will be initiated. This procedure will erase all programming in the terminal and return all settings back to factory default values. This process is described in Chapter 5, Service and Maintenance.

# 2.6. PCB Jumper Positions

Only the analog version of the Main board has a jumper on it. This section provides the details for this jumper.

## 2.6.1. Main PCB Jumper

The IDNet version of the IND570 main board has no jumpers. There is one jumper on the IND570 analog scale main board (W1). This jumper selects either 2 mV/V or 3 mV/V operation of the analog circuitry. 3mV/V is the factory default position. Refer to Figure 2-52 for the jumper location and Figure 2-53 for its settings.

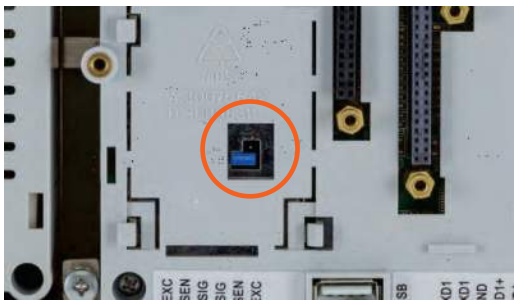

**Figure 2-52: W1 Millivolt Jumper Location, Main PCB**

- When removing the W1 jumper for 3mV/V operation, reposition it on just one of the pins, as shown in Figure 2-52 and at left in Figure 2-53. If this jumper is not correctly positioned, the plastic cover over the Main board will not fit properly. If this occurs, do not force the plastic cover down. Remove the cover and position the jumper as shown.

**Figure 2-53: W1 Millivolt Jumper Positions**

The 2 mV/3 mV jumper settings are described in Table 2-5.

**Table 2-5: Millivolt Jumper Description**

| Jumper | Setting | Description |
|---|---|---|
| W1 | OPEN | Sets the connected scale's load cell setting to 3 mV/V |
| | CLOSED | Sets the connected scale's load cell setting to 2 mV/V. |

# 2.7. Scale Capacity and Increment Display Options

## 2.7.1. Metrology Line

In order to meet metrological requirements from different regions of the world, a metrological line that shows capacity and increment information or Max/Min/e information on the IND570 display can be enabled within terminal configuration (Figure 2-54). This line is always shown except when in the setup mode. If multiple ranges are selected, this line will scroll through each of the available capacities and ranges.

- The metrology line is always in use when the terminal is in Approved mode. For non-approved applications, the metrology line can be enabled/disabled in setup.

Refer to the **Scale** and **Terminal** sections in Chapter 3, **Configuration**, for details on enabling the Metrology Line in IND570. In cases where the metrology line of data is not accepted by an agency, it can be disabled and a label with the required information may be installed near the display.

**Figure 2-54: Metrology Line on IND570 Display**

## 2.7.2. Capacity Label Instructions

To further ensure that scale capacity and increment display requirements can be met during installation, a blue capacity label is included with the terminal. This label can be completed and adhered to the front of the terminal overlay as shown in Figure 2-56.

The capacity label (shown in Figure 2-55) provides space for the Max, min, and e information for each range or interval for which the scale is programmed. If only one or two ranges are used, the unused portion of the label may be cut off with scissors. Written information must be legible and a minimum of 2mm or 0.08 in. in height. A permanent marker should be used for this information.

**Figure 2-55: Preparing the Capacity Label**

Clean any oil or other contaminants from the area of the overlay shown in Figure 2-56 where the capacity label will be added. Peel the backing from the label and adhere it to the overlay in the location shown in Figure 2-56, or another location acceptable to the local regulations.

**Figure 2-56: Capacity Label Installed**

# 2.8. Sealing the Enclosure

When the IND570 terminal is used in a metrologically "approved" application, it must be protected from tampering by use of seals. An optional sealing kit is available from METTLER TOLEDO. The kit (part number 30130836) contains all the required hardware. The method used for sealing will vary depending upon local requirements. The IND570 supports external sealing.

## 2.8.1. External Sealing of the Panel-Mount Enclosure

The panel-mount enclosure supports both two- and three-screw external sealing for the United States and Canada. For external sealing of the panel-mount enclosure, refer to Figure 2-57, Figure 2-59, and Figure 2-60 and follow these steps:

1. Ensure that the appropriate approval region has been selected in setup under Scale > Type > Approval and that the Metrology security switch SW1-1 is in the "on" position.
2. Replace the three Phillips-head screws that secure the rear panel to the enclosure with the three through-hole screws provided in the sealing kit.
3. Thread the wire cable and plastic seal (Figure 2-57) included with the kit through the holes in the new screws. The U.S. requires use of only two of the screws (Figure 2-59). Canada requires use of all three (Figure 2-60).
4. Thread the end of the wire cable through the plastic seal and snap the seal shut.

- Note that there are additional parts in the sealing kit that are only used for sealing in China. For all other regions, only the 3 through-hole screws and sealing wire are required.

**Figure 2-57: External Sealing Wire**

**Figure 2-58: Sealing Screws Installed**

**Figure 2-59: External Sealing for United States**

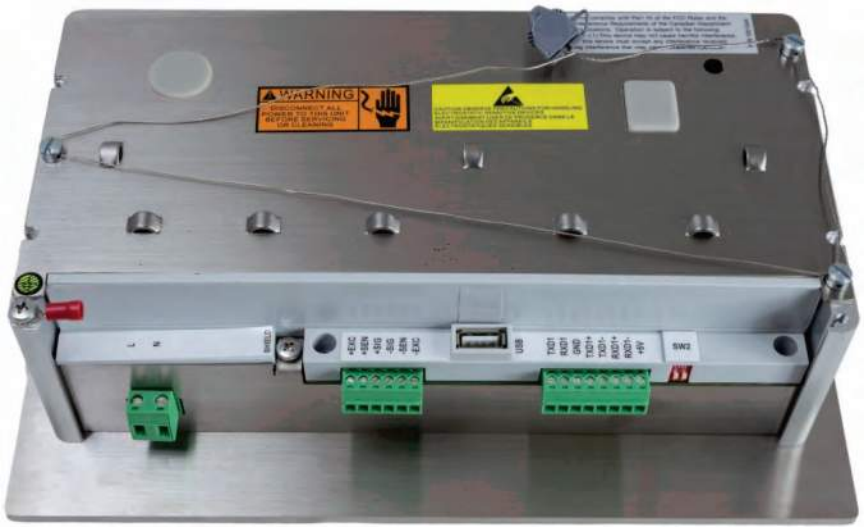

**Figure 2-60: External Sealing for Canada**

## 2.8.2. External Sealing of the Harsh Enclosure

For external sealing of the harsh enclosure, refer to Figure 2-57 and Figure 2-61 and follow these steps:

1. Ensure that the appropriate approval region has been selected in setup under Scale > Type > Approval and that the Metrology security switch SW1-1 is in the "on" position.

- Refer to section 2.1.2.2, **Closing the Harsh Enclosure**, for the correct method to use when replacing the front panel.

2. With the front panel installed on the enclosure and snapped into place, thread the free end of the wire seal through either the left or right hole in the IND570 front panel, and through the hole in the retaining clip.

3. Thread the end of the wire cable through the hole in the plastic seal (as shown in Figure 2-61), remove any remaining slack in the wire, and snap the seal shut.

**Figure 2-61: Harsh Enclosure Seal Threaded and Ready to be Closed – Standard Orientation (left) and with Panel Reversed (right)**

4. Trim off any excess wire.

METTLER TOLEDO Service

## To protect your METTLER TOLEDO product's future:

Congratulations on choosing the quality and precision of METTLER TOLEDO. Proper use according to these instructions and regular calibration and maintenance by our factory-trained service team ensure dependable and accurate operation, protecting your investment. Contact us about a METTLER TOLEDO service agreement tailored to your needs and budget.

We invite you to register your product at www.mt.com/productregistration so we can contact you about enhancements, updates and important notifications concerning your product.

NATIONAL TYPE EVALUATION PROGRAM

# Certificate of Conformance

## for Weighing and Measuring Devices

**For:**
Indicating Element
Digital Electronic
Model: IND570
$n_{max}$: 10 000 (Class III/IIIL); 100 000 (Class II)
Accuracy Class: II/III/IIIL

**Submitted By:**
Mettler-Toledo, LLC
1150 Dearborn Drive
Worthington, OH 43085
Tel: 614-438-4387
Fax: 614-438-4355
Contact: Scott Davidson
Email: scott.davidson@mt.com
Web site: www.mt.com

**Standard Features and Options**

- Semi-Automatic (push-button) Zero Setting Mechanism (SAZSM)
- Automatic Zero Tracking (AZT)
- Initial Zero Setting Mechanism (IZSM)
- Semi-Automatic (push-button) Tare
- Keyboard Tare
- Unit Switching (kg, g, t, lb, oz, ton, dwt, ozt)
- Gross/Net/Tare Display
- Alphanumeric Display
- Multi-Interval
- Multiple Range
- AC Power Supply
- AC/DC Adaptor
- RS-232 Port
- USB
- Remote Printer Capability
- IDNet (interfaced to compatible IDNet devices)
- Intrinsic Safe Barrier, Model ISB
- Analog or Digital Platform Scale Inputs

Temperature Range: -10 ºC to 40 ºC (14 ºF to 104 ºF)

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

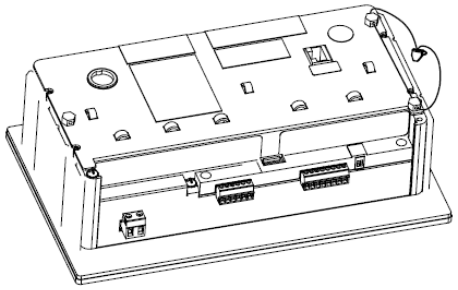
John Gaccione
Chairman, NCWM, Inc.

Stephen Benjamin
Chairman, National Type Evaluation Program Committee
Issued: December 13, 2013

**1135 M Street, Suite 110 / Lincoln, Nebraska 68508**

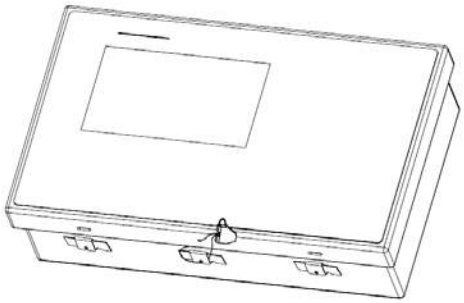
The National Conference on Weights and Measures (NCWM) does not approve, recommend or endorse any proprietary product or material, either as a single item or as a class or group. Results shall not be used in advertising or sales promotion to indicate explicit or implicit endorsement of the product or material by the NCWM.

**Mettler-Toledo, LLC**



Indicating Element / IND570

**Application:** General purpose indicating element for use with NTEP approved and compatible weighing elements.



**Identification:** The required information appears on a self-destructive label on the back of the indicator. The capacity x division statement and capacity in all weight ranges are on the weight display.

**Sealing:** The metrological parameters are sealed using a physical wire seal.

The Panel Mount version is sealed with a wire threaded through bolts at a distance such that the seal will be broken when an attempt is made to unscrew the bolts.

The Desk / Harsh enclosure is sealed by passing the wire through a hole in the center of the cover and then through a hole in a tab on the bottom of the housing.

Access to metrological features will be denied when the device is set to Type Approved:

- To verify type approval press the info icon "" then press the metrology icon "M"
- The statement "Approved: Yes" will be displayed if the device is in the sealed legal for trade or
- The statement "Approved: No" will be displayed if the device is not sealed legal for trade
- In either case, press the exit icon "" two times to exit back to the weighing mode

## Mettler-Toledo, LLC

Indicating Element / IND570

**Test Conditions:** The emphasis of the evaluation was on the device design, operation, marking requirements and compliance with influence factors. The indicator was interfaced with a KA series (Certificate of Conformance Number 00-075A1) Class II approved load-receiving element to verify compliance with zero, zone of uncertainty and motion detection requirements. A load cell simulator was interfaced to the device for Class III, multi-interval and multiple range testing; several increasing/decreasing tests were performed. The device was tested over a temperature range of -10° C to 40° C (14°F to 104°F). Tests were conducted using 100 VAC and 240 VAC.

**Evaluated By:** J. Morrison (OH)

**Type Evaluation Criteria Used:** *NIST Handbook 44 Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices*, 2013 Edition. *NCWM Publication 14 Weighing Devices*, 2013 Edition.

**Conclusion:** The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.

**Information Reviewed By:** J. Truex (NCWM)

## Mettler-Toledo, LLC

Weighing/Receiving Element / 2256, PFA564, PFA569

**Application:** For general purpose weighing.

**Identification:** The required information is on an adhesive badge affixed to the junction box. The junction box is located beneath the access cover on top of the load-receiving element.

**Sealing:** The junction box can be sealed with a wire security seal threaded through two holes in the cover and enclosure.

**Test Conditions:** This Certificate supersedes Certificate of Conformance Number 95-111A7 and is issued to correct the model name in the For Box, Standard Features and Option Box. The model PFA566 is incorrect and should be listed as PFA569. Based on information supplied by the manufacturer, there was no need for any testing. Previous test conditions are listed below for reference.

**Certificate of Conformance Number 95-111A7:** This Certificate supersedes Certificate of Conformance Number 95-111A6 and is issued to include the platform range 2' x 2' to 8' x 10' in the Standard Features and Options Box and include the capacity 500 lb to 10000 lb in the For Box. The 8' x 10' platform size and 500 lb capacity are metrological equivalent to existing models listed on the certificate. A 1000 lb (6' x8') was interfaced to a IND780 indicator (Certificate of Conformance 06-017) and submitted for evaluation. Several increasing / decreasing load shift were performed.

**Certificate of Conformance Number 95-111A6:** This Certificate supersedes Certificate of Conformance Number 95-111A5 and is issued to include the platform range 2' x 2' to 5' x 5' in the Standard Features and Options Box. The 2' x 2' platform size is metrological equivalent to existing models listed on the certificate. Based on information supplied by the manufacturer, there was no need for any additional testing.

**Certificate of Conformance Number 95-111A5:** This Certificate supersedes Certificate of Conformance Number 95-111A4 and is issued to add model names PFA564 and PFA569. These models are metrological equivalent to existing model 2256. No testing was deemed necessary.

**Certificate of Conformance Number 95-111A4:** This Certificate supersedes Certificate of Conformance Number 95-111A3 and is issued without testing to add the wording "or metrologically equivalent" to page 1 under "Standard Features and Options."

**Certificate of Conformance Number 95-111A3:** This Certificate supersedes Certificate of Conformance Number 95-111A2 and is issued to include 0.5 lb $e_{min}$ for a 2500-lb platform. Data from the previous test was reviewed and no further testing was deemed necessary.

**Certificate of Conformance Number 95-111A2:** This Certificate superseded Certificate of Conformance Number 95-111A1 and was issued to increase the number of scale divisions from 3000 to 5000. Data from the previous test was reviewed and no further testing was deemed necessary.

**Certificate of Conformance Number 95-111A1:** This Certificate superseded Certificate of Conformance Number 95-111 and was issued to include additional platform and capacity sizes. The emphasis of the evaluation was on the device design, operation, and marking requirements. Two weighing elements were submitted for evaluation. A 3000 lb (3' x 3') scale base was interfaced with a Toledo Scale Model 8412 (Certificate of Conformance Number 87-106) indicator. A 10 000 lb (5' x 5') scale base was interfaced with a Mettler-Toledo Model Lynx (Certificate of Conformance Number 95-085) indicator. Several increasing/decreasing load, shift and corner tests were performed. The devices were used for 21 days with the minimum use criteria required by NTEP being met, then tested again.

**Certificate of Conformance Number 95-111:** The emphasis of the evaluation was on the device design, operation, and marking requirements. The 5' x 5' platform was submitted for evaluation interfaced with a Toledo scale Model 8412 (Certificate of Conformance Number 87-106) indicator. Several increasing/ decreasing load, shift and corner tests were performed. The devices were tested over a temperature range of -10 °C to 40 °C (14 °F to 104 °F). A load of one-half scale capacity was applied to the scale more than 100 000 times.

**Evaluated By:** A. McCoy (OH) 95-111 & 95-111A1; J. Morrison (OH) 95-111A5; E. Matthews (OH) 95-111A7

**Example of Device:**

# Standard Terms and Conditions of Sale for METTLER TOLEDO Industrial, Retail and Lab Products (U.S.)

**1. CONTRACT** – All current and future sales transactions by Mettler-Toledo, LLC ("Company") are expressly subject to these terms and conditions. Modifications or additions will be recognized only if accepted in writing by an officer of Company. Provisions of the original purchaser ("Buyer")'s purchase order, including Buyer's terms and conditions of purchase, or other documents that add to or differ from these terms and conditions, including any documents presented to Company's field service representatives, are EXPRESSLY rejected. No waiver of these terms and conditions or acceptance of others will be construed as a failure of Company to raise objections. Buyer's acceptance of delivery of the equipment and/or services shall, without prejudice to any other manner in which acceptance of these terms and conditions may be evidenced, constitute unqualified acceptance of these terms and conditions. Any specifications not specifically agreed to in writing are subject to change without notice.

**2. QUOTATIONS AND PUBLISHED PRICES** – Quotations automatically expire 30 calendar days from the date issued unless otherwise stated in the quotation and are subject to withdrawal by notice within that period. Any purchase or service order issued by Buyer upon an expired quotation may be accepted by Company at its sole discretion; any such acceptance will be communicated to Buyer in writing. Prices shown on the published price lists and other published literature issued by Company are not unconditional offers to sell and/or perform services and are subject to change without notice. Company's prices for equipment, unless otherwise specified, do not include an allowance for shipping, installation and/or final on-site adjustment. Prices are subject to adjustment to those in effect at time of shipment or performance of services and may be adjusted to include any necessary surcharge(s). Pricing that differs from Company's published price lists is confidential to Company, and Buyer agrees to strictly maintain such confidentiality. Company expressly disclaims any representation or warranty concerning "most favored customer" pricing which may appear in any of Buyer's documents in connection with any sale by Company to Buyer.

**3. TAXES** – Company's prices do not include any applicable sales, goods/services, use, excise or similar taxes, and the amount of any such tax which Company may be required to pay or collect will be added to each invoice and paid by Buyer unless Buyer has furnished Company with a valid tax exemption certificate acceptable to the taxing authorities prior to shipment. If an exemption certificate provided to Company by Buyer is, through no fault of Company, subsequently determined to be invalid, the previously unpaid sales, use, excise or similar tax will be billed to and paid by Buyer.

**4. TERMS OF PAYMENT** – Unless prepayment is required, terms are cash net 30 days from date of shipment. Payment is due upon invoice for performances of services. Amounts past due are subject to a service charge equal to the greater of 1.5% per month (or fraction thereof) or the maximum contract rate permitted by law. Upon default and placing of Buyer's account for collection or repossession of equipment, Buyer agrees to reimburse collection costs, legal fees, and court costs incurred by Company in connection therewith. If Company deems that by reason of the financial condition of Buyer or otherwise, the continuance, production or shipment on the terms specified is not justified, Company may require full or partial payment in advance. On orders of $100,000 or more and having a delivery schedule of 6 months or longer from date of order, the standard terms will be progressive payments. Subject to the warranties expressly stated in 10 below, all sales are final without right of return. Any indebtedness of Buyer to Company may, at Company's sole option, be credited at any time against any amounts owing by Company to Buyer hereunder.

**5. DELIVERY** – Delivery dates are approximate and are based on prompt receipt of all necessary information regarding the equipment to be delivered, including but not limited to any import/export authorizations required by law or regulation. Company will use reasonable efforts to meet the indicated delivery and service dates but will not be held responsible for its failure to do so. Risk of loss shall pass to Buyer upon delivery to a carrier. In the event of any delay in delivery caused by Buyer, Company will store and handle all items at Buyer's risk and will invoice Buyer for the unpaid portion of the contract price, plus applicable storage, insurance, and handling charges. The invoice will be payable in full within 30 days from the invoice date. Company has the right to make partial shipments and bill for those shipments; Buyer will make payment in accordance with terms referenced in 4 above. Company will not accept responsibility for any shortages or damages unless all shipping containers and packing materials are retained for inspection.

**6. SHIPPING AND HANDLING CHARGES** – Shipments are FOB Shipping Point. Unless Buyer elects a freight collect shipment, shipping charges plus the applicable Company handling charge will be prepaid and billed as a separate item on the equipment invoice.

**7. CHANGES** – Buyer may with the express written consent of Company make changes in the specifications for equipment or work covered hereunder. In such event, the price and delivery dates will be equitably adjusted. Company will be entitled to payment for reasonable profit plus costs and expenses incurred by it for work and materials rendered unnecessary as a result of such changes and for work and materials required to effect said changes.

**8. CANCELLATION** – Undelivered parts of any order may be canceled by Buyer only with the prior written approval of Company. If Buyer makes an assignment for the benefit of creditors, or in the event Company has reason to believe that Buyer is unwilling or unable to perform, Company will have the unconditional right to cancel this sales transaction or demand full or partial payment in advance pursuant to 4 above. In the event of any cancellation of this order by either party, Buyer will pay to Company the reasonable costs and expenses (including engineering expenses and all commitments to its suppliers and subcontractors) incurred by Company prior to receipt of notice of such cancellation, plus Company's usual rate of profit for similar work. The minimum cancellation charge will be 15% of the price hereunder.

**9. SECURITY INTEREST** – Buyer hereby grants to Company a purchase money security interest in the equipment, acknowledges the validity of and its own assent to such a grant, and agrees not to challenge the legitimacy of such a grant. Buyer will assist Company in taking all necessary actions to perfect and protect Company's security interest. In the event of a default by Buyer, Company will be entitled to any of the rights and remedies provided by law or in equity.

**10. WARRANTIES: ABSENT A SEPARATE WARRANTY ISSUED TO BUYER BY COMPANY, COMPANY EXPRESSLY WARRANTS THE EQUIPMENT MANUFACTURED AND THE SERVICES PERFORMED BY IT TO BUYER SOLELY AS SET FORTH HEREIN. COMPANY DISCLAIMS ALL OTHER WARRANTIES, EITHER EXPRESS OR IMPLIED (INCLUDING WITHOUT LIMITATION WARRANTIES AS TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE). THESE WARRANTIES MAY BE TRANSFERRED TO A SUBSEQUENT PURCHASER OF THE EQUIPMENT ONLY WITH THE PRIOR WRITTEN CONSENT OF COMPANY. IN ADDITION, THE FOLLOWING SHALL CONSTITUTE THE SOLE AND EXCLUSIVE REMEDIES OF BUYER FOR ANY BREACH BY COMPANY OF ITS WARRANTY HEREUNDER.**

**A. PRODUCT –** Company warrants that the equipment covered by this warranty will be free from defects in workmanship and materials, under normal use, for a period of 1 year from the date of original installation, or 18 months from the date of shipment to Buyer, whichever occurs first. Should any such defects be found and reported during the term of the warranty, Company will, at its option, refund the purchase price or correct such defects, furnishing replacement parts and labor free of charge to Buyer. Company will also furnish travel up to 80 kilometers (50 miles) from the nearest Company service representative or authorized Company service provider free of charge during the warranty period.

**B. SOFTWARE –** Company warrants that software developed by Company will perform substantially the functions described in the software documentation when properly installed. Company does not warrant that the software is error-free, that Buyer will be able to operate the software without interruption, or that the software will be free of vulnerability to intrusion or attack. The warranty period will be the same as the warranty period for the Company equipment within which the software is embedded. If the software is not embedded within Company equipment, the terms and conditions of the respective end user license agreement of Company shall apply exclusively. If no end user license agreement is applicable, the warranty period will be 90 days from the date of purchase by Buyer.

**C. SERVICE –** Company warrants that services will be performed in a workmanlike manner in conformity with standard industry practice. Should any nonconformity be detected within 30 days after the work is completed and prompt notification is made by Buyer in writing to Company, Company will supply the necessary service, direction or consultation to correct the nonconformity.

**D. GENERAL –** The foregoing warranties are further subject to the following general conditions: (1) Consumables, accessories, normal wear and tear, wear parts and perishables are expressly excluded from the foregoing warranties. (2) If Buyer requests the performance of warranty work provided for under the foregoing warranties during other than normal Company work periods, Buyer will be required to pay for all premium time. (3) These warranties will not apply where Company's equipment and/or software has been subjected to: accident, alteration, misuse, abuse, failure on the part of Buyer to ensure proper storage, operation and/or maintenance, installation or servicing by other than Company authorized personnel, the addition or supply of equipment not approved for incorporation into Company's product, integration into the Buyer's environment, or Buyer/ third party supplied software or interfacing. (4) Company does not warrant the calibration of any scale. Company does however warrant the scales manufactured by it to be capable of being adjusted to meet Company's printed specifications, if any, for weighing accuracy as to the particular model/type scale for the period of warranty above stated when properly installed and used. (5) Products of other manufacturers sold by Company as such are warranted by Company solely to the extent of any remaining warranty provided by the original manufacturer. (6) In the event equipment is repaired by Company, the performance of such repair work will not extend existing nor generate new warranty coverage for the equipment as a whole or for those parts not repaired or replaced by Company. (7) This Section 10 shall not apply to ICS226 and ICS241 products which are covered under a separate warranty.

**E. METHODS OF CORRECTION OF DEFECTS DURING WARRANTY –** To correct defects Company may attempt to diagnose and resolve the defect over the telephone or electronically. Certain equipment contains remote support capabilities for direct problem reporting, remote problem determination, and resolution with Company. When Buyer contacts Company for warranty work, it must follow the problem determination, resolution and procedure that Company specifies. At any time following or to assist in problem determination, Company may require return of the part or product to depot for service. If Company determines on-site work is required, a service technician will be scheduled for on-site work. If Buyer gives notice of a defect to Company and requests Company for on-site work when the defect could have been remedied remotely, or if Company responds to Buyer's notice of defect and no defect is found for which Company is liable, Company shall be entitled to compensation for any work performed and costs it has incurred as a result of Buyer's request. Company encourages Buyer to use available remote support technologies. Failure to install and use available remote connectivity tools and equipment for direct problem reporting, remote problem determination and resolution may result in increased response-time and additional costs to Buyer.

**11. INDEMNITY** – Company agrees to indemnify Buyer and hold it harmless from and against any direct loss suffered and any direct liability to third parties whenever such loss or liability is directly due to bodily injury (including death) to any third party or direct damage to any third party property occurring in the course of, and caused exclusively by, any negligent act or omission by Company on the premises of Buyer that occurs in the performance of the work contemplated herein. This indemnity shall include reasonable legal fees and settlements of claim or suit. Buyer shall provide prompt written notice to Company of any actual or anticipated claims against it that might trigger the foregoing indemnity; failure to do so waives Buyer's right to indemnification hereunder. Following such written notice, Company shall have the sole and exclusive right to manage the defense of any indemnified claims and shall be authorized to settle or compromise such claims at its sole and exclusive discretion. Buyer shall cooperate in the defense of all indemnified claims as deemed necessary by Company.

**12. PATENT INFRINGEMENT** – Company shall defend any suit or proceeding brought against Buyer so far as the same is based on a valid claim that any equipment of Company's design furnished hereunder, or any part thereof, constitutes an infringement of any applicable patent, if notified promptly in writing and given authority, information and assistance (at Company's expense) for the defense of the same and if such alleged infringement is not the result of a design or other special requirement specified by Buyer or the result of the application or the use to which such equipment is put by Buyer or others. Company will pay all damages and costs finally awarded in such suit or proceeding against Buyer provided that Company has the sole and exclusive right to defend, settle or compromise any suit or proceedings and Buyer takes no action that would materially detract from Company's ability to conduct an effective defense, settlement or compromise. In case such equipment or part in such suit held to infringe any such patent and the use thereof is enjoined, Company will at its expense either, at its option; (a) obtain for Buyer the right to continue using such equipment or part or; (b) replace the same with non infringing equipment, or; (c) modify the same so that it becomes non infringing or; (d) remove said equipment and refund the purchase price and the transportation and installation costs thereof. The foregoing states the entire liability of Company to Buyer for patent infringement.

**13. REGULATORY LAWS AND OR STANDARDS** – The performance of the parties hereto is subject to the applicable laws of the United States of America. Company takes reasonable steps to keep its products in conformity with various nationally recognized standards and such regulations, which may affect its products. However, Company recognizes that its products are utilized in many regulated applications and that from time to time standards and regulations are in conflict with each other. Company makes no promise or representation that its product will conform to any federal, provincial, state or local laws, ordinances, regulations, codes or standards except as particularly specified and agreed upon in writing by authorized officers of Buyer and Company. Company prices do not include the cost of any related inspections or permits or inspection fees.

**14. INTELLECTUAL PROPERTY** – The sale and delivery of Company's equipment and/or software to Buyer will in no way transfer to Buyer any right of ownership in any patents, copyrights, trademarks, technologies, designs, specifications, drawings, or other intellectual property incorporated into the equipment and/or software.

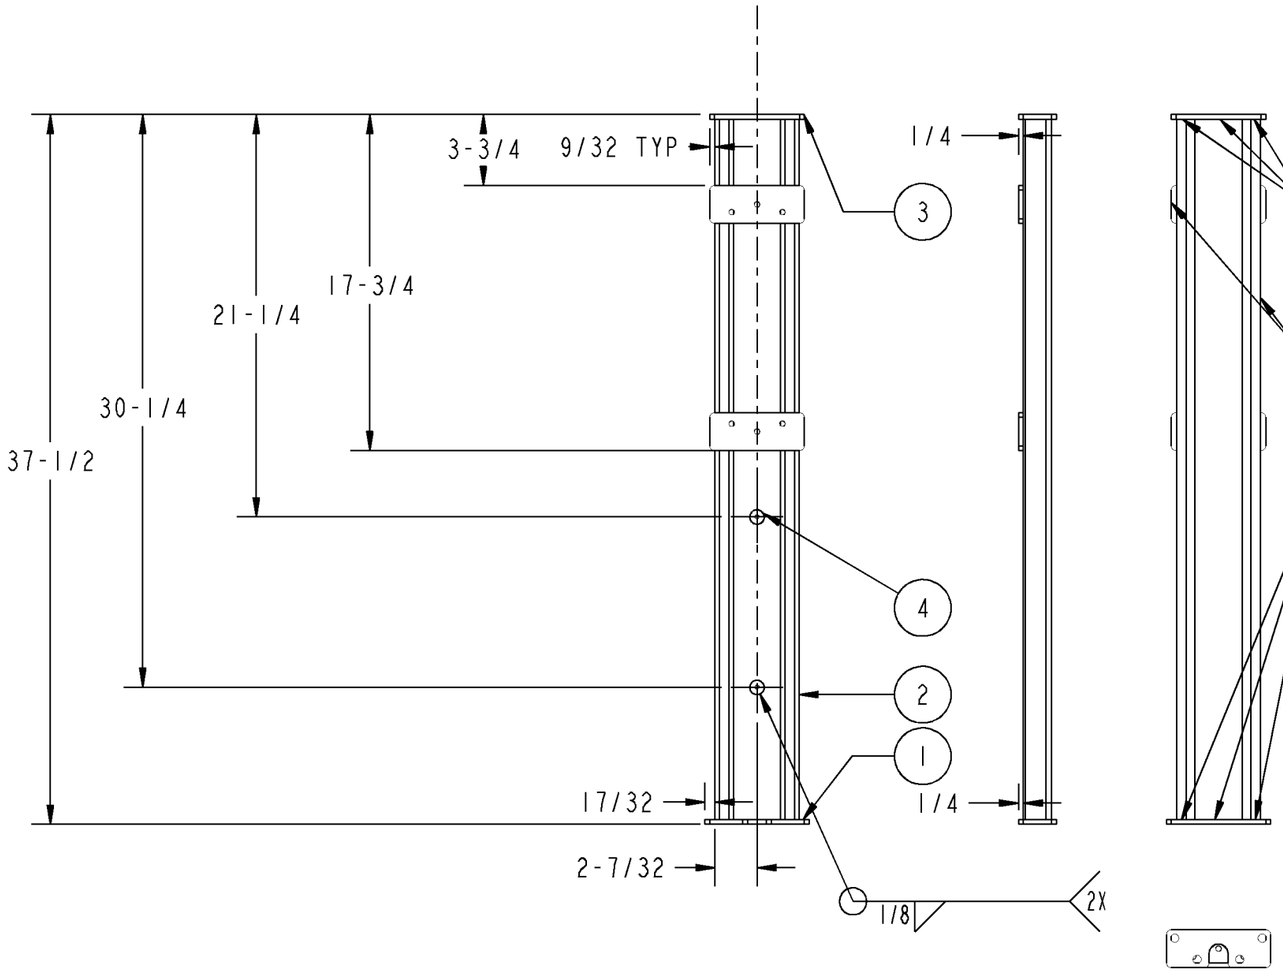
**15. DISCLAIMER OF DAMAGES – IN NO EVENT WILL COMPANY BE LIABLE TO BUYER OR ANY OTHER PARTY FOR ANY TYPE OF SPECIAL, CONSEQUENTIAL, INDIRECT, INCIDENTAL, EXEMPLARY OR PUNITIVE DAMAGES, WHETHER SUCH DAMAGES ARISE OUT OF OR ARE A RESULT OF BREACH OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY OR OTHERWISE.** Such damages shall include but not be limited to loss of profits or revenues, loss of use of the equipment or associated equipment, cost of substitute equipment, facilities, down time costs, increased construction costs or claims of Buyer's customers or contractors for such damages. Buyer will not transfer, assign or lease the equipment sold hereunder to any third party without first securing from such party the protection afforded to Company herein.

**16. LIMITATION OF LIABILITY** – Company will not be liable for any loss, claim, expense or damage caused by, contributed to or arising out of the acts or omissions of Buyer or third parties, whether negligent or otherwise. In no event will Company's aggregate liability for any and all types of damages or losses related to these terms and conditions or the products or services sold or delivered pursuant hereto exceed the cost of the item giving rise to the claim, whether based in contract, warranty, indemnity, or tort (including negligence). Any suit arising hereunder must be commenced within one year from the date on which the cause of action accrues.

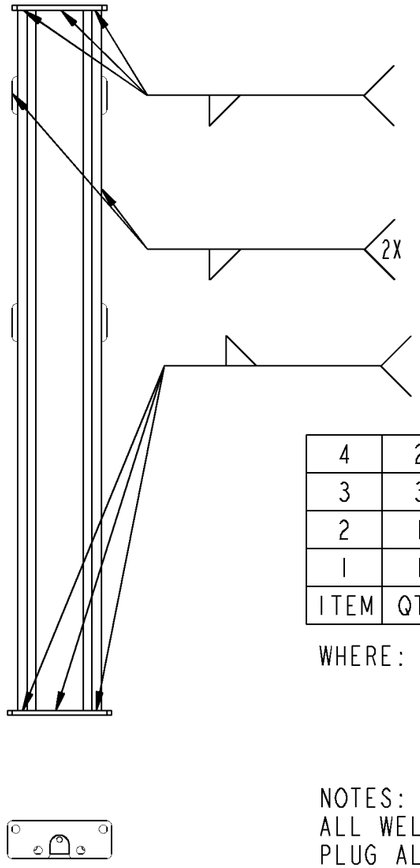
**17. NO RESPONSIBILITY FOR GRATUITOUS INFORMATION OR ASSISTANCE** – Company will not be liable for any information, assistance or advice that, though not required to be provided to Buyer hereunder, is nevertheless provided to Buyer by employees and/or agents of Company while performing Company's obligations hereunder.

**18. INSURANCE** – Upon request, Company shall provide evidence of insurance in accordance with its standard coverage and limits. Company does not provide third parties direct access to its insurance or give additional rights to its insurance, such as naming additional insured parties.

**19. FORCE MAJEURE** – The inability of Company to fulfill its obligations required under these terms and conditions resulting from defaults or delays caused by conditions beyond Company's reasonable control including, but not limited to strikes, insurrection, acts of God, war, terrorist activities, emergencies, shortages or unavailability of materials, weather, change in law or other similar causes, will extend the period for the performance of the obligations for the period equal to the period(s) of any such delays(s) and Buyer will not have the right to termination; provided that Company will continue to perform to the extent feasible in view of such force majeure.



**20. EXPORT CONTROL -** Buyer acknowledges that the equipment may include technologies and software that are subject to export control regulations in Europe or the United States of America or countries in which the equipment is delivered or used. The Buyer is solely responsible for adherence to these restrictions in case the Buyer exports or re-exports the equipment and the Buyer agrees to indemnify and hold Company harmless from, or in connection with, any violation of such export restrictions by Buyer, or its employees, consultants, agents, or customers.



**21. INTERPRETATION** – If any of these terms and conditions contravenes or is invalid under applicable law, these terms and conditions shall not fail as a result but will be construed as if such term or provision was not included. The invalid, illegal or unenforceable provision shall be deemed to be automatically modified, and, as so modified, to be included in these terms and conditions, such modification being made to the minimum extent necessary to render the provision valid, legal and enforceable. Waiver or excuse by Company of any noncompliance with these terms and conditions shall not constitute a waiver or excuse of any prior or subsequent noncompliance.

**22. RETURNS** – Items returned for Buyer's convenience (and not for product or part failure or warranty issues) will be subject to a 15% restocking fee, minimum $200. Company must be contacted for a Return Authorization Number (RAN) within 21 days of shipment (for a customer) or 30 days of shipment (for a dealer / distributor) from Company to be eligible for return credit. Buyer must return items within 10 days of receiving a RAN. Item must be in new and unused condition, packed in original packaging and container, and include all manuals, peripherals and accessories.

**23. SURCHARGES** – Company's pricing shall be subject to certain additional surcharges ("Surcharges") at Company's sole discretion. Such Surcharges may be required to partially offset the increase in costs of certain raw materials and other commodities including, but not limited to, fuel and steel. Applicable Surcharges will appear on invoices issued by Company to Buyer and shall be due and payable in accordance with the invoice terms. Company shall periodically update any applicable Surcharges based upon reported pricing in the respective industry.

**24. GOVERNING LAW AND PLACE OF JURISDICTION –** The legal relationship between Buyer and Company shall be governed by the laws of the State of Ohio and the United States of America. Exclusive place of jurisdiction shall be Franklin County, Ohio. Company however reserves the right to initiate court proceedings against the Buyer at any other court of competent jurisdiction. The United Nations Convention on Contracts for the International Sale of Goods is explicitly excluded.

Subject: FRP Equipment Proposal **37320**

**SPECIAL PRICING AND DELIVERY STATEMENT – 2021 RAW MATERIAL SHORTAGE**

**AS OF Q1 2021, AN INDUSTRY WIDE SHORTAGE EXISTS OF KEY RAW MATERIALS NECESSARY TO FABRICATE FRP EQUIPMENT, INCLUDING RESIN AND GLASS REINFORCEMENT. IT IS UNKNOWN HOW LONG THIS SHORTAGE IS EXPECTED TO CONTINUE. RAW MATERIALS CANNOT BE PURCHASED IN ADVANCE TO LOCK IN PRICES OR SUPPLY AND ARE PRICED IN THE SPOT MARKET.**

**PRICING OFFERED IN THIS QUOTATION IS BASED ON THE COSTS TODAY AND LIMITED AVAILABILITY. DIAMOND WILL ADJUST THE EQUIPMENT PRICING BASED ON THE RAW MATERIAL COSTS AT THE TIME OF DELIVERY FROM OUR SUPPLIERS.**

**DELIVERY QUOTED IS BEST EFFORTS AND BASED ON THE SCHEDULE TODAY AND ASSUMES RAW MATERIALS SUPPLY WILL BE AVAILIBLE AT TIME OF FABRICATION. EQUIPMENT WILL BE MANUFACTURED IN THE ORDER IN WHICH IT WAS PLACED ON THE SCHEDULE AFTER CUSTOMER RELEASE TO FABRICATION.**

**PLEASE CHECK WITH DIAMOND TO CONFIRM IF THIS PRICING AND DELIVERY SITUATION STILL EXISTS WHEN IT IS TIME TO PLACE YOUR ORDER.**

Dear Ed:

In response to the above referenced inquiry, the following FRP Equipment Proposal is provided for your purchase consideration:

Item 1: One (1) 3,200 Gallon Fiberglass 12.5% Sodium Hypochlorite Storage Tank, 8'-0" diameter by 10'-0" sidewall height, flat bottom, flat top. Tank will be fabricated with premium grade vinyl ester resin (BPO/DMA cure) and a double ply Nexus synthetic veil for the 120-mil inner corrosion liner and premium grade vinyl ester resin (MEKP cure) in the outer structural overwrap. In addition, tank will receive a desert sand exterior gelcoat with UV inhibitors and will be fit with the following nozzles and accessories:

| | |
|---|---|
| • One (1) | Diamond Fiberglass SS nameplate |
| • LOT | Vessel design calculations stamped by a PE registered in the state of Arizona |
| • One (1) | Shop atmospheric hydrostatic leak test (2-hour hold time) |
| • One (1) | Shop hot-air post cure treatment (4 hours at 180°F) |
| • One (1) | NFPA vinyl sticker |
| • One (1) | Magnetic liquid level gauge |
| • Three (3) | 2” Flanged and gusseted nozzles |
| • Four (4) | 3” Flanged and gusseted nozzles (1 w/ siphon ell) |
| • One (1) | 4” FRP vent with mesh screen |
| • One (1) | 24” Top flanged hinged manway with 316SS bolting and testing gasket |
| • One (1) | 24” Side flanged hinged manway with 316SS bolting and testing gasket |
| • Two (2) | Viton service gaskets |
| • One (1) | 10’-0” Tall fiberglass caged ladder assembly |

| | |
|---|---|
| • One (1) | 4’ x 4’ FRP step out platform |
| • One (1) | Fiberglass top mounted handrail with safety gate |
| • One (1) | Non-slip surface on tank top |
| • Eight (8) | 316SS tiedown lugs (design and supply of anchor bolts by others) |
| • Two (2) | 316SS lifting lugs |

**PRICE PER TANK, EX-WORKS DIAMOND FIBERGLASS, VICTORIA, TEXAS FACILITY.....$105,617.00**

Item 2: One (1) 4,500 Gallon Fiberglass MFS Backpulse Storage Tank, 9'-0" diameter by 12'-0" sidewall height, flat bottom, flat top. Tank will be fabricated with premium grade fire retardant vinyl ester resin (BPO/DMA cure) and a double ply Nexus synthetic veil for the 120-mil inner corrosion liner and premium grade vinyl ester resin (MEKP cure) in the outer structural overwrap. In addition, tank will receive a desert sand exterior gelcoat with UV inhibitors and will be fit with the following nozzles and accessories:

| | |
|---|---|
| • One (1) | Diamond Fiberglass SS nameplate |
| • LOT | Vessel design calculations stamped by a PE registered in the state of Arizona |
| • One (1) | Shop atmospheric hydrostatic leak test (2-hour hold time) |
| • One (1) | Shop hot-air post cure treatment (4 hours at 180°F) |
| • One (1) | NFPA vinyl sticker |
| • One (1) | Magnetic liquid level gauge |
| • Three (3) | 2” Flanged and gusseted nozzles |
| • One (1) | 3” Flanged and gusseted nozzles |
| • Two (2) | 4” Flanged and gusseted nozzles (1 w/ siphon ell) |
| • Two (2) | 16” Flanged and gusseted nozzles (1 w/ siphon ell) |
| • One (1) | 36” Top flanged hinged manway with 316SS bolting and testing gasket |
| • One (1) | 24” Side flanged hinged manway with 316SS bolting and testing gasket |
| • Two (2) | Viton service gaskets |
| • One (1) | 12’-0” Tall fiberglass caged ladder assembly |
| • One (1) | 4’ x 4’ FRP step out platform |
| • One (1) | Fiberglass top mounted handrail with safety gate |
| • One (1) | Non-slip surface on tank top |
| • Eight (8) | 316SS tiedown lugs (design and supply of anchor bolts by others) |
| • Two (2) | 316SS lifting lugs |

**PRICE PER TANK, EX-WORKS DIAMOND FIBERGLASS, VICTORIA, TEXAS FACILITY.....$133,963.00**

**TOTAL PRICE FOR ALL VESSELS, EX-WORKS DIAMOND FIBERGLASS, VICTORIA, TEXAS FACILITY.....$239,580.00**

**See Quotation Validity statement below.*

FREIGHT: The above equipment is quoted EX-WORKS, Diamond Fiberglass, Victoria, Texas with freight options available upon request. **Estimated freight to the Chandler, AZ. jobsite is $11,616.00.** This is a valid estimated rate at time of quotation and subject to change without notice.

This rate is a base rate determined by the drawings and/or information supplied by the customer during the quoting process. Note that Diamond Fiberglass makes every effort to include the necessary permits, escorts, etc. typically required when quoting freight. However, if fitting additions and/or changes result in the vessel being wider or taller when loaded, additional charges may be applied to the quoted freight rate to cover any

additional permits or oversize escorts required. **Offloading at destination is by others. Detention charges subject to be applied after 2 hours of offloading wait time.**

APPROVAL DRAWINGS: General arrangement drawings for customer approval can be provided 2-3 weeks after receipt of purchase order and clarification of details. Completed shop drawings with design values will be provided after approval of the GA drawings.

PE STAMPED CALCULATIONS *(if included above)*:

If required by project and included in the above tank details, stamped calculations packages will be submitted 2-3 weeks after approval of the general arrangement drawings and clarification of details.

FABRICATION SCHEDULE: Due to current volatility in the raw material markets, Diamond Fiberglass reserves the right to update vessel pricing at any time. Validity of the quotation shall be confirmed with Diamond Fiberglass prior to execution of purchase order.

**IF THIS SCHEDULE DOES NOT MEET YOUR SCHEDULE REQUIREMENTS, PLEASE LET US KNOW WHAT YOU NEED FOR YOUR PROJECT. WE WILL WORK WITH OUR PRODUCTION SCHEDULER TO MORE ACCURATELY DETERMINE IF YOUR EQUIPMENT FABRICATION NEEDS CAN BE MET WITH OUR CURRENT SHOP LOAD.**

DESIGN STANDARDS AND DETAILS

1) Vessel to be designed and fabricated per ASTM 3299, ASTM 4097 and NBS PS-15-69, as applicable.
2) Vessel to be designed for seismic per ASCE 7-10 for Chandler, AZ. jobsite class D, a 1.0 specific gravity, a 108-mph wind load, atmospheric pressure, and ambient temperature.

GENERAL EXCEPTIONS & CLARIFICATIONS

1) Unless otherwise noted in this proposal, design and supply of anchor bolts is by others. Location and details of anchor lugs will be included on the drawings. Diamond Fiberglass designs utilizing the most efficient style and quantity of anchor lugs required based on the information provided. Any addition to quantity or change in style due to limitations of the foundation or anchor bolts, will result in additional cost.
2) All flanged connections will be flat-faced fiberglass flanges unless otherwise stated. Raised faced flanges are not available in fiberglass and are not recommended for use with fiberglass tanks.
3) Diamond Fiberglass' scope of work is to provide the above listed vessels and accessory equipment. All other items (including but not limited to instrumentation, plumbing, valves, installation, and field-testing services) are not included in this quotation and are by others.

FIELD SERVICES

Unless detailed above, this quotation does not include field support services. Diamond can provide field services such as installation, inspections, certifications, testing, training, start-ups, etc. for an additional fee.

SPECIFICATION SECTION 13207 EXCEPTIONS & CLARIFICATIONS

1) 1.7.C: Field test is to be by others and is not provide in this proposal.
2) 2.4.A8: Diamond Fiberglass does not recommend the use of a full drain for a bleach tank. A flange with a siphon ell has been quoted in lieu of the complete drain.
3) 2.4.B3b: Ladders, handrails, and step out platforms for both vessels are quoted as FRP for corrosion resistance.
4) 2.4.B6: Steel components are quoted as 316SS as requested in section 2.4.A6.
5) 2.5: Viton service gaskets have been provided in the proposal as requested. These are the only spare parts that pertain to FRP vessels.
6) 3.1: The installation of the tanks is to be done by others and is not provided in this proposal.

NOTE: Unless governed by previously agreed standard terms, this offer is exclusively and solely governed by Diamond Fiberglass' Standard Terms and Conditions of Sale, which is to be considered a part of this proposal.

PAYMENT TERMS: Quoted pricing is based on terms of Net 30 Days, payment in full thirty (30) days from the invoice date. **New customers and large value projects are subject to progress payment terms.**

PROGRESS PAYMENT SCHEDULE: Quoted pricing is based on terms of Net 30 Days, payment in full thirty (30) days from the invoice date.

- 25% due at drawing submittal
- 25% due at release for fabrication
- 50% due at shop completion / factory acceptance testing
- Freight upon delivery

WARRANTY: Unless otherwise agreed upon, Diamond Fiberglass standard warranty applies. This warrants the vessel free of defects in material and workmanship for a period of 12 months from initial operation or 18 months from delivery. Further information can be found in Diamond Fiberglass' Standard Terms and Conditions of Sale.

VALIDITY PERIOD: Due to current volatility in the raw material markets, Diamond Fiberglass reserves the right to update vessel pricing at any time. Validity of the quotation shall be confirmed with Diamond Fiberglass prior to execution of purchase order.

**MATERIAL SURCHARGE: This quotation is subject to raw material surcharges.** All Purchase Orders deriving from this quotation shall include the allowance of material surcharges.

STORAGE FEES: Diamond will store the finished vessel at our facility for up to two weeks after the vessel has been completed at no charge to the customer. After that two-week period, a storage fee will be charged of 1.5% per month of the purchase order vessel price, prorated by day to recover carrying costs. For long term storage, shrink wrapping and additional protection is available upon request for an additional price.

TAXES: Quoted pricing does not include taxes of any type.

PURCHASE ORDER PLACEMENT: To permit proper processing and coordination of details, a purchase order resulting from this proposal should be issued to:

Diamond Fiberglass
1036 Industrial Park Drive
Victoria, Texas 77905

We look forward to answering any questions you may have after reviewing this submittal and would welcome the opportunity to schedule the production of the quoted equipment at your direction. Should you have any questions or require any additional information, please contact me at (361) 572-4040.

Sincerely,

**David Rogers**
Project Manager

DIAMOND
FIBERGLASS
ASME RTP-1 CERTIFIED

Your business is appreciated!

If you are interested in placing an order with Diamond Fiberglass, please complete the information below, sign and return this document along with a copy of your purchase order.

The undersigned is authorized to purchase products on behalf of the company they represent.

## Why Choose Diamond Fiberglass?

DIAMOND FIBERGLASS
ASME RTP-1 AUTHORIZED FABRICATOR

| | | |
|---|---|---|
| 01 | We are RESPONSIVE. | • Always respond to customers in a prompt manner.<br>• When a response cannot be provided quickly, communicate when it will be provided. |
| 02 | We MANAGE projects better. | • Utilize a proprietary project management system developed specifically for custom FRP equipment.<br>• Communicate openly.<br>• Focus on planning and meeting milestones.<br>• Commit necessary resources at the right time to be successful. |
| 03 | We offer a COMPLETE solution for custom FRP tank and pipe equipment. | • Design.<br>• Fabrication.<br>• Installation.<br>• Maintenance. |

# Diamond Fiberglass Standard Terms and Conditions of Sale

**ARTICLE 1. DEFINITIONS**

1.1 The words, "we", "our", "ours", and "us" mean the Seller. The words "you", "your" and "yours" mean the Purchaser to whom this Proposal is made. The word "Agreement" means this Proposal and your acceptance of this Proposal, and includes all documents expressly incorporated by references.

1.2 "Equipment" means an individual piece or component of the supply of the Agreement. For example, Equipment may be an individual tank or it may be a joint of pipe.

**ARTICLE 2. DURATION OF PROPOSAL-EFFECT**

2.1 We may withdraw this Proposal at any time until we receive your written acceptance. If we do not receive your written acceptance within 60 days of the date of this Proposal, the Proposal will expire and be void. Any changes which you wish to make to this Proposal must be expressly accepted by us in writing; otherwise those changes will be void.

**ARTICLE 3. SHIPMENT AND DELIVERY**

3.1 Our proposed shipping schedule depends on the date on which you accept this Proposal. If you do not provide us promptly with all drawings, information, and approvals, then you will be responsible if we fail to meet our proposed shipping schedule. We will deliver the Equipment F.O.B. Points of Shipment. This will be the only delivery which we are required to make to you. Title and risk of loss will pass to you when we make this delivery.

3.2 We agree to store the Equipment after the agreed date of completion for two weeks at no charge to you. After that two-week period, if you refuse to accept the Equipment for delivery, you agree that we may assess storage fees on the purchase in the amount of 1.5% per month x the value of the Equipment to be stored. Further you agree that we may invoice for payment of the Equipment per Section 8 below.

**ARTICLE 4. TERMINATION**

4.1 Once you have accepted this Proposal, you may not terminate or cancel the Agreement except by giving us written notice. If you terminate or cancel, you must pay us for our costs of labor, material, engineering, administration, and overhead incurred up to the date we received termination or cancellation charges from our vendors. If you request, we will provide you with documentation in support of these costs.

**ARTICLE 5. DELAY**

5.1 We will not be liable to you for loss or damage which results from delay or failure to deliver any or all of the Equipment, if this delay or failure is caused by one or more circumstances beyond our reasonable control "Force Majeure". Force Majeure includes, without limitation, acts of God, war, acts of the public enemy, civil disorder, riot, sabotage, governmental action or law or regulation, strikes or labor shortage or other labor problems, fire flood, earthquake, severe weather, health and safety considerations, embargoes, transportation shortage or delays, fuel or material shortages, failure of performance by a vendor or subcontractor, and your failure to give timely approval and comment to documents.

5.2 Our time of performance will be extended by the length of any delay caused by Force Majeure plus a reasonable time to resume our normal operations. If were are ready to ship, but shipment is delayed through no fault of ours, then the date on which we are ready to ship will be regarded as the date of shipment and delivery for all purposes, including payment. You will be responsible for the cost and risks of storage and handling.

**ARTICLE 6. WARRANTY**

6.1 We warrant to you that the Equipment will be delivered free from defects in material and workmanship. If you find a defect in material or workmanship during the Warranty Period (defined below), you must give us written notice within 10 days. We will either deliver to you a replacement part, F.O.B. Point of Shipment, or repair the defect in place, at our option. For international orders or orders where we are prohibited from performing the repair ourselves, we may offer, at our exclusive option, the value of our cost of repair at the Point of Shipment as remedy for the repair at the actual jobsite. The Warranty Period will expire at the earlier of the twelve (12) months from initial operation or eighteen (18) months from shipment date.

6.2 We will have no obligation to you under Section 6.1 if:

a) The Equipment is not paid for in full; or,
b) You fail to operate or maintain the Equipment in accordance with generally approved industry practice; or
c) You fail to operate or maintain the Equipment in accordance with instructions from us; or
d) You fail to give us written notice within 10 days of your discovery of a defect; or
e) The Equipment has been altered or repaired by someone other than us

6.3 This warranty excludes the following:

a) Service calls to correct the installation of the Equipment or to explain the usage of the Equipment to You; or
b) The cost removal and replacement of a defective part from the overall system, if necessary.
c) Any loss or damage which you sustain after the expiration of the Warranty Period.

6.4 We warrant to you that at delivery, the Equipment will be free of any liens or encumbrances. If there are any such liens or encumbrances, we will cause them to be discharged promptly after you have notified us of their existence. The express warranties we make to you in this Article 6 are the only warranties we will make. There are no statutory, oral, or implied warranties. In particular, there are no implied warranties or merchantability or fitness for a particular purpose. There are no statutory, oral, or implied conditions.

**ARTICLE 7. LIMITATION OF LIABILITY**

7.1 For the purposes of this Article 7, the words, "we", "our", "ours", and "us" mean the Seller and its employees, agents and subcontractors. Our liability to you under this Agreement or under any cause of action relating to this Agreement, whether based on contract, warranty, tort (including negligence), strict liability or otherwise, will not exceed the price of the Equipment in question. We will not be liable to you for loss of profits or revenue or business opportunity, loss by reason of shutdown of your facilities or inability to operate your facilities at full capacity, cost of obtaining other means for performing the function of the Equipment, or incidental or consequential damages of any nature.

7.2 You will have waived your right to sue us at law or in equity unless you commence your suit within one year from the date on which you sustain the loss or damage which is the subject of your suit. The provisions of this Article 7 shall prevail over any inconsistent provisions elsewhere in this Agreement.

7.3 Liquidated or performance damages are not permitted without agreement by Seller in writing and adjustment to purchase price and / or delivery estimates.

**ARTICLE 8. PAYMENT**

8.1 You shall receive an invoice for each purchase made, such invoice shall include the price of the item(s) purchased, date of purchase and the amount due for such purchase. You shall pay in full on or before the due date as reflected on such invoice.

8.2 Unless otherwise noted and upon credit review, the due date for each purchase shall be thirty (30) days from the invoice date. Periodically, fabrication is completed on a purchase and you are not ready for the vessel. The vessel is placed in our delivery hold stock and the invoice is processed for payment. The delivery charge is due thirty (30) days from actual delivery date.

8.3 Special payment terms could be required before order acceptance to cover C.O.D. shipments, pre-payment prior to shipment, and defined process payments for completion of engineering and drawing submittal, receipt of "buy-out" components, and certified percent of completion billing.

8.4 Late payments are subject to a 1 ½% per month fee, pro-rated daily.

**8.5 All invoices are payable to Diamond Fiberglass, PO Box 65, Victoria, TX 77902.**

**ARTICLE 9. TAXES**

9.1 You will pay all sales, use, value added, excise, and other taxes which may be levied or assessed on the transfer to the Equipment to you, or on the Agreement, or on our performance under this Agreement. Our price to you does not include taxes of any sort. You will hold us harmless and indemnity us for any taxes due and associated costs of collection that are not paid by you but determined at any point to be taxable.

**ARTICLE 10. CHANGES**

10.1 We will not make changes in the Equipment unless you and we have executed a written Change Order for such change. The Change Order will include the price adjustment for any added costs of the change plus a reasonable profit. If the change impairs our ability to satisfy our obligations to you, including meeting delivery schedules and performance guarantees, the Change Order will include appropriate modifications to the Agreement. If after the date of this Proposal, new or revised governmental or code requirements shall require a change in the Equipment, the change will be subject to this Article 10.

**ARTICLE 11. CONFIDENTIALITY - USE OF DRAWINGS**

11.1 You acknowledge that the information which we submit to you in connection with this Proposal includes our confidential and proprietary information, both of a technical and commercial nature. You will not disclose our confidential and proprietary information to third parties without our prior written consent. You will not permit any third party to fabricate components of the Equipment from our designs or drawings. You will indemnify us and hold us harmless and defend us from any claim, suit, or liability based on personal injury (including death) or property damage related to any component of the Equipment which is fabricated by a third party without our written consent.

**ARTICLE 13. SECURITY INTEREST**

Until all installment payments, and all other amounts due under this Agreement, have been paid, we shall retain a security interest in the Equipment and, if you sell or otherwise disposes of the Equipment in the proceeds of such sale or disposition.

**ARTICLE 13. ENTIRE AGREEMENT**

12.1 The Agreement contains the entire understanding between you and us, and supersedes any prior oral and written understandings between you and us concerning the Equipment, including any document which is not expressly incorporated by reference to this Agreement.

**ARTICLE 14. INVALIDITY**

13.1 If a final decision of a court of competent jurisdiction holds invalid a portion any sentence of this Agreement, or a sentence of any section of this Agreement, or any Article of this Agreement, the remainder of such sentence or section or this Agreement, as the case may be, shall be valid.

**ARTICLE 15. GOVERNING LAW**

14.1 The Agreement will be governed by and construed according to the laws of the state or province within which Seller maintains its principal office.

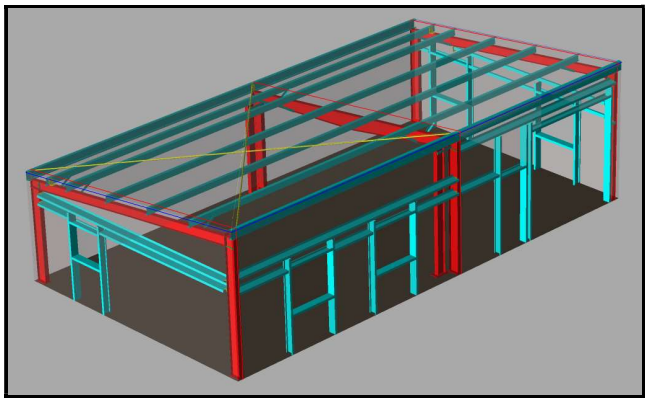
FLEMING WEST

1736 S. Nevada Way
Mesa, AZ 85204
(480) 951-5301

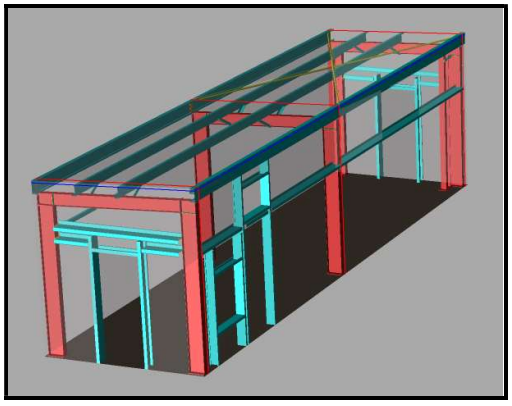
March 25, 2022

McCarthy Building Companies
Attn: Nicole Azuri
6225 N 24th St, 200
Phoenix, AZ 85016



**Re: Chandler Reclaimed Water Interconnect Facility**

Fleming West is pleased to provide this budget proposal to furnish building materials, labor, and equipment necessary to construct **(1) 25' x 45' x 10' @ L.S, (1) 10'-8" x 42' x 11" @ L.S. PEMB** Butler buildings.



This proposal is based on the information supplied in the emails dated 3-4-22.

## DESIGN CRITERIA/BUILD

- Building Code: IBC18
- Use Category: II (Standard Occupancy Structure)
- Live Load: 20 psf (non-reducible)
- Roof Snow Load: 0 psf
- Collateral Load: 5 psf
- Wind Load/Speed: 102 MPH
- Exposure Factor: B
- Seismic Loads: Ss= 17.8 %, S1=6.5 %
- Factory Mutual: Not Required
- Special Loading: N/A

**Blower Room**

**Electrical / PLC Room**

## SCOPE OF WORK

### STRUCTURE

- Provide and install (1) **Blower Room** - 25’ wide x 45’ long x 10’ eave height @ (LS) by Butler Manufacturing.
    - (1) bay @ 20’, (1) bay @ 25’, (1) EW section @ 25’ (see sketch above).
- Provide and install (1) **Electrical / PLC Room** - 10’-8” wide x 42’ long x 11’ eave height @ (LS) by Butler Manufacturing.
    - (1) bay @ 20’, (1) bay @ 22’, (1) EW section @ 10’-8” (see sketch above).
- Provide steel building system drawings, calculations and anchor bolt plans stamped by an Arizona registered engineer.
- All primary and secondary structural steel will have a primer paint. The primer paint is to protect the steel for shipping purposes only. The primer is not to be used as a primer for a finish painted product. It will be scratched during the building erection process.
- Structure shall be comprised of primed painted rigid frame primaries, wind posts, and roof x-rod bracing, G30 zee shaped roof purlins and G30 zee shaped wall girts.
    - All brace rods have been removed from end and side walls and replaced with wind post to eliminate mechanical opening conflicts.
- Galvanized anchor bolts and templates for column base plates.

### ROOFING

- Exterior roof panels shall be the MR-24 roof system as provided by Butler Manufacturing. Panel material shall be 24” wide standing seam roof with spacer blocks. Panel material shall be 24-gauge with a Kynar 500 painted finish in a standard color as provided by the manufacturer.
- Standing Seam MR-24 roofing system required due to the insulation thickness specified at R30.
    - Please be advised that the specification identified corrugated metal panels.

### WALL SHEETING

- Exterior wall panels shall be Shadowall™ wall panel (reverse R panel) system as provided by Butler Manufacturing. Panel material shall be 36” wide with 1½” corrugations and semi-concealed fasteners. Panel material shall be 26-gauge with a Kynar 500 painted finish in Standard color as provided by the manufacturer.

### INSULATION

- Roof insulation R-30 (9 ¼”) double layer blanket insulation with reinforcing facing.
- Wall insulation R-19 (6”) single layer blanket insulation with reinforcing facing.

### WALL ACCESSORIES

- Provide (1) 3’ x 7’ personnel door framed opening (door by others) **Blower Room**
- Provide (1) 3’6” x 3’ duct framed opening (duct by others) **Blower Room**
- Provide (4) 4’6’ x 4’ louver framed openings (louver by others) **Blower Room**
- Provide (1) 10’ x 10’ overhead door opening (doors by others) **Blower Room**
- Provide (2) 3’ x 7’ personnel door framed opening (door by others) **Electrical / PLC Room**
- Provide (1) 3’6” x 3’6” duct framed opening (duct by others) **Electrical / PLC Room**
- Provide (1) 3’6” x 2’ duct framed opening (duct by others) **Electrical / PLC Room**

### TRIM & GUTTERS

- Gable trim, eave trim, standard gutter, and downspouts for all eave conditions. Materials shall have a Kynar 500 painted finish in a standard color as provided by the manufacturer.

## WARRANTY

- Butler Manufacturing to provide the following material warranties:
  5-year Material and Workmanship

**Total Price Base: $157,575.00** (excludes Sales Tax)

## CLARIFICATIONS

- The proposal is valid for (21) days
- At time of order entry, a ship date will be established.
- The proposal has been based on (1) mobilization with an uninterrupted erection of materials.
- Fleming West, LLC safety program is based on the latest Arizona State OSHA regulations. Labor, material and equipment costs for any additional safety requirements not specifically agreed to prior to quoting the work will need to be added by contract modification before start of work. Fleming West will not be responsible for the safety practices of other trades or provide safety measures for their use.
- The standard work week is 40-hours, 4 days at 10 hours per day or 5 days at 8 hours, Monday through Friday between the hours of 5am and 5pm.
- All concrete foundations must be ready, cleared, a ramp set, and anchor bolts clean with (1) nut and (1) washer on each bolt prior to Fleming West's erection crews arriving on the job site.
- The GC shall provide an unobstructed and level access for a minimum of 50' around the full perimeter of building and floor slab for labor, materials and equipment.
- Fleming West requires a material "lay down" area within 100' of where the materials are to be erected.
- OSHA Subpart R requires a steel erector to do the following before being authorized to start the steel erection:
  - All anchor bolts must be verified in correct locations and all concrete clear of any debris
  - Verification that sufficient concrete strength has been attained to support the loads imposed during steel erection
  - Commence only after written notification is received by GC
- Owner's risk by others.
- The net price is based on the Manufacturer's standard products and details unless specifically included above.
- This proposal does not comply with NAFTA or the Buy American or Buy America or FM Global Provisions. If any of these are a requirement of this project the proposal price will have to be revised.
- The protection of stored materials delivered to the construction site shall be the responsibility of the GC
- Clean-up construction debris and place it at an onsite location designated by GC
- Temporary power to be provided by GC
- If GC requires cranes for installation of the steel or special tire coverings for the forklifts to protect the concrete slab, this must be communicated and included in the scope of work.

## EXCLUSIONS

- Sales tax
- 35 Year manufactures warranty
- Eagle Eye Bird & propeller bird deterrents
- Acoustical roof or wall panels
- Roof or wall metal liner panels
- NO Galvanizing of any steel members unless other noted
- Metal Mesh: galvanized steel wire, woven
- Liquidated damages
- Payment and Performance Bonds
- Overhead doors
- Any inspections including, but not limited to bolt, weld, pre, post and during construction

- BIM, Rivet modeling/detailing or any electronic modeling
- SWPP, dust control, track out, toilets, dumpsters and haul off
- Provisions for Davis-Bacon or other special labor range rates
- Anchor bolt design into concrete
- Access ladders, roof hatches, roof curbs, Deck-tites for roof penetrations, and/or skylights
- Cleaning or touch up of steel
- All concrete and drypack (grout)
- Roof vents; Roof Exhaust Fans; HVAC loading of any kind
- Wind locks on overhead doors

We appreciate the opportunity to earn your business. Feel free to contact me with any questions. I look forward to following up with you on this proposal.

Best regards,

*Aaron E. Wolf*

Attn: Austin Hancock @ McCarthy

RE: Chandler RWIF – Blower Building
Chandler, AZ

Arizona Verde Fire Protection (AVFP) is pleased to submit a quote for the above listed project. Included in this price are all equipment, labor and material required to install wet piped fire sprinkler systems in new 1,125 sq. ft. Blower building, starting at 6" A.F.F, per GMP plans by Wilson Engineers. Authority having jurisdiction is the City of Chandler. Specs were viewed. Addendum 1 acknowledged.

**Scope of Work:**

- **Fire sprinkler design, shop drawings and submittals**
- **Fire sprinkler permits & fees**
- **Fire Hydrant flow test**
- **Foreign & Domestic materials**
- **Work to begin at first flange above finished floor**
- **Complete fire sprinkler riser with electric bell, tamper, and flow switch (wired by others)**
- **Backflow prevention device in risers with forward flow test connections**
- **Spare sprinkler cabinet, spare sprinklers, and head wrenches**
- **Pipe stands, supports, braces, and hangars, per NFPA 13**
- **All pipe to be black steel with a CRR of 1.0 or greater**
- **Semi-recessed chrome pendent sprinklers (0)**
- **Brass upright sprinklers (Blower 12, + 4 below duct)**
- **Core drilling & sleeving**
- **Fire stopping and sealing penetrations**
- **Hoisting and rigging of material**
- **Provide daily clean-up and housekeeping**
- **Tagging and identification of all valves**
- **Testing and inspecting of all systems**
- **Closeout documents, warranties, as-builts, and O&Ms**

**Not included in Scope of Work:**

- **Any sales tax or bonds**
- **Electrical Building**
- **Any BIM design and coordination**
- **Building mounted Fire Department Connections (FDC) Not required due to size of buildings**
- **Any dry or chemical type systems**
- **Any alarms, alarm panels, horns, or strobes**
- **Any electrical wiring or hook-ups**
- **Any painting of pipe or masking off sprinklers or pipe**
- **Any fire extinguishers or cabinets**
- **Any underground fire loop and/or hydrants**

**System Design:**

- **Building Construction: Non-Combustible as defined by NFPA 13**
- **Blower Building – Ordinary Hazard Group 2: 20 GPM over 1500 sq. ft. with a 250 GPM hose allowance, 130 sq. ft. per sprinkler**
- **Assumed water supply is adequate for new building, no fire pump or stored water needed**

**Blower Building: $27,400.00**

Installation and approved plans will be per NFPA 13 and the City of Chandler requirements. CAD files are to be made available at no cost for AVFP's use for design.

This quote is based upon work being performed during standard business hours. Any overtime work will be an extra to the contract.

This job will be installed in a quality craftsmanship-like manner by qualified sprinkler fitters.

AVFP is to be paid for the work as outlined herein, in monthly installments of 90% of work completed and material stored on site; net 30 days. The 10% retention shall be paid upon substantial completion of work.

Thank you for considering Arizona Verde Fire Protection for this project.

**QUOTATION**
**Bid No. 2022-036**

March 25, 2022

McCarthy Building Companies, Inc.
6225 North 24th Street
Phoenix, AZ 85016

ATTN: Nicole Azuri
RE: **Chandler Reclaimed Water facility – GMP 2**

Dear Nicole:

We are pleased to offer the following HVAC pricing for your review and consideration at the referenced project. Our pricing is based on the agency review drawings, dated 2/2022 with two addendums noted.

HVAC Total: $278,441.00

**Scope of Work**

We propose to furnish and install the following:

HVAC

- (1) Packaged unit
- (1) Evaporative cooler
- (7) Supply grilles
- (1) Return grille
- (4) Make-up air louvers
- (2) Roof curbs
- (4) Sheetmetal weather cover
- (3) Unistrut supports for exterior ducts
- Flashing provided for through wall duct penetrations
- New galvanized sheet metal ducts provided to SMACNA standards
- Insulation provided for new ducts per specification on drawings
- Certified independent test and balance of installed systems
- As built redline drawings provided upon completion of project

Clarifications

- K CORP has not included temporary cooling as there is not enough direction on what to quote
- K CORP has not included any provisions for housekeeping pads in our proposal
- K CORP has not included any DDC controls integration

EXCLUSIONS:

- **Cost of Sales Tax (TPT)**
- Bond, Fees and permits
- Mock-ups / Sample Construction
- Premium time
- Painting
- Line voltage wiring
- Duct cleaning
- Duct Pressure testing
- BIM or CAD drawings

K CORP specifically reserves the right to mutually negotiate terms and conditions of the contract agreement upon award, whether or not those terms are a part of this proposal. Our quotation is valid for 30 days. Unless noted otherwise our standard warranty period is 1 year.

K CORP welcomes the opportunity to be a part your project team. If you have any questions or need any clarifications, please contact us at your earliest convenience.

Sincerely,

Steven A. Martin
Vice President

# CORBINS ELECTRIC BID PROPOSAL

**CE BID ID:** 21-0660
**PROJECT NAME:** Chandler Reclaimed Water Interconnect Facility
**REVISION:** N/A
**DATE:** 3/25/2022
**DELIVERED TO:** nazuri@mccarthy.om

Dear Nicole Azuri:

Corbins Electric is pleased to offer the following bid proposal for your project. This proposal has been prepared in accordance with the *Contract Documents* listed below as well as the project specific *Inclusions, Exclusions, and Clarifications* attached.

**CONTRACT DOCUMENTS:**

- Drawings listed on G-2 dated: 02/2022
- Specification Section 16 and 17
- Addenda Acknowledged: #1 dated 03/04/22, #2 dated 03/25/22

**PROPOSAL PRICING:**

- Our price for the base bid portion of this work and any proposed adjustments is as follows:

**BASE BID: SEE ATTACHED BID FORM**

We look forward to being selected as the electrical contractor for this project and to working with your project team for its successful and timely completion. If you have any questions, or need any additional information, please contact me at the phone number or email below. Thank you.

Sincerely,

Rick Johnson
VP of Operations

# BID PROPOSAL

Date March 25, 2022

Bid Proposal of * Corbins (hereinafter called "Bidder")

a ** limited liability corporation, LLC organized and existing under the laws of the State of

Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: #1, #2.

BASE BID:

The Bidder agrees to perform all Electrical and I&C (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 16A, as described in the Contract Documents, for the Lump Sum of five million two hundred thirty two thousand six hundred twenty DOLLARS ($5,232,620).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $See Attached |
| Membrane Facility/Strainer | $See Attached |
| Chemical Facility | $See Attached |
| Blower Building | $See Attached |
| Electrical Building | $See Attached |
| Chlorine Contact Basin | $See Attached |
| Site Work | $See Attached |
| Performance & Payment Bond Cost *(If Applicable)* | $36,737 |
| Total Subcontract Amount | $ |

The name of the proposed Bonding Company is Bonding & Insurance Solutions, LLC

Bond rate .70 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $53,998.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): See Attached.

Position: _____ Rate: _____.

Equipment: _____ Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☐ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☒ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | |
| | |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | (*1) |
| | |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | RJ |
| | |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | (*2) |
| | |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | (*3) |
| | |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | RJ |
| | |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | RJ |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | RJ |
| | |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | RJ |
| | |

*See attached Amendments and Clarifications

| | |
|---|---|
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | RJ |
| | |
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | (*4) |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

PHOENIX, AZ 85040
602.275.8500

# Amendments and Clarifications

- (1) - Corbins has included commodity pricing that is good as of today, 03/25/22. We recommend a negotiated material escalation contingency to be carried by owner and used during construction. At end of project any unused proceeds would be provided the McCarthy.

- (2) - Corbins would recognizes and accepts the following extended warranty section. We take exception to the 16305-3.6 (20 year warranty on 5KV Cable and installation)

- (3) - Corbins is currently reviewing the McCarthy Subcontract and Purchase Order Agreement in its entirety. Any redaction, edits or comments will be submitted after document review by Corbins Contract and Executive Leadership Team.

- (4) - Similar to Note (1) above.

| Added Electrical Breakout | | |

CORBINS ELECTRIC

**INCLUSIONS, EXCLUSIONS, AND CLARIFICATIONS**

# 21-0660 CHANDLER RECAIMED WATER INTERCONNECT FACILITY

| TYPE | DESCRIPTION |
|---|---|
| INCLUSION | Specified Switchgear Package including switchboards, panels, transformers, circuit breakers, disconnects and fuses. (including attic stock). We are proposing to use EATON switchgear as they are existing on-site. This will mitigate possible problems with modifying the existing MCC |
| INCLUSION | Specified lighting fixture package |
| INCLUSION | Specified lighting control package |
| INCLUSION | Fire alarm engineering and system devices as shown subject to final approval by the authority having jurisdiction. We are proposing to use Western States Fire Protection. They are the ones currently on-site |
| INCLUSION | Core drilling for Corbin's conduits only |
| INCLUSION | Payment and Performance Bond as an adder on the bid form |
| INCLUSION | All enclosures and cabinets are NEMA N12 or N4X unless specifically noted in inclusions |
| INCLUSION | Demolition of 3 light poles to be relocated (all other demolition is excluded). Existing conduit is to be abandoned in place |
| INCLUSION | The relocation of 3 existing light poles, including the re-routing conduit and cable |
| INCLUSION | Temporary Power as an allowance |
| INCLUSION | BIM is included for the electrical ductbank only at LOD350 as baseline. Once BIM execution plan is agreed upon costs may fluctuate |
| INCLUSION | 120V power to Cathodic Protection as shown on the electrical drawings |
| INCLUSION | Power and controls as shown on the electrical drawings to electrical operators (13128) |
| INCLUSION | Power and controls as shown on the electrical drawings to electrical motor operators (13447) |
| INCLUSION | The specified (Per specifications/Responsibility Matrix) Instrumentation & Controls package including spares. |
| INCLUSION | I&C Programming by Vertech |
| INCLUSION | Corbins base price includes the PVC Conduit, supports, vaults and grounding for all underground duct bank infrastructure |
| EXCLUSION | Excavation, compaction, backfill, concrete and rebar as specifically required for raceways in Corbins Scope |
| EXCLUSION | Fireproofing |
| EXCLUSION | Sales tax on Materials |
| EXCLUSION | On-site construction water for dust control or backfill operations |
| EXCLUSION | Rock excavation (rock is defined as material than cannot reasonably be excavated with the use of a Case 580 or equivalent backhoe without special attachments) |
| EXCLUSION | Any unknown or unmarked underground utilities, structures, or debris, whether natural or manmade |
| EXCLUSION | Patching, painting and rust-proofing other than factory finish |
| EXCLUSION | Fire alarm devices, exit lights, and emergency battery packs added by Fire Marshal, Electrical Inspector, or plan review |
| EXCLUSION | Overtime. This work is bid to be performed Monday through Friday between the hours of 6am and 3pm |
| EXCLUSION | Sales tax on Materials - This project is understood to be considered TPT and an AZ5005 Certificate will be issued on this project (per AZ revised statute) |
| EXCLUSION | Additional costs for hazardous work conditions such as asbestos abatement, confined space etc. |
| EXCLUSION | Energized Electrical Work |
| EXCLUSION | Dumpster and disposal fees (to be provided and paid for by General Contractor) |
| EXCLUSION | All formed concrete for equipment pads, transformer pads, pole bases, and/or pole base auguring, concrete, asphalt and drywall demo, disposal, removal and patch/repair |
| EXCLUSION | Scaffolding in its entirety unless specifically noted in INCLUSIONS |

CORBINS ELECTRIC

**INCLUSIONS, EXCLUSIONS, AND CLARIFICATIONS**

# 21-0660 CHANDLER RECAIMED WATER INTERCONNECT FACILITY

| TYPE | DESCRIPTION |
|---|---|
| EXCLUSION | *Engineering, surveying, CADD license fees, blueprint and reprographics cost, permit and plan check fees, cost of bid, any and all allowances unless specifically noted herein, utility company costs, SWPPP, fees or consumption fees, electrical code upgrades and/or repairs to existing systems, warranty or freight claims for owner provided equipment.* |
| EXCLUSION | Grounding of perimeter fencing |
| EXCLUSION | ***We take exception to specification section 16305-3.6 (20 year warranty on 5kv cable and installation)*** |
| EXCLUSION | The furnishing and installation of electrical operators (13128) |
| EXCLUSION | The furnishing and installation of electrical motor actuators (13447) |
| EXCLUSION | The installation of in-line or flange mounted devices |
| EXCLUSION | Procurement of all vendor provided equipment and instrumentation per McCarthy's responsibility matrix. |
| EXCLUSION | Provide and Install of all valves except for power and control connections. |
| EXCLUSION | It is assumed Portable Bathrooms and Handwash stations will be provided by the GC at no cost to Corbins for the duration of the project |
| EXCLUSION | Badging and Background checks |
| EXCLUSION | On-site Internet connection will be provided for common trailer city area by GC at no cost to Corbins |
| EXCLUSION | On Site Potable Water will be provided for construction personnel use by GC at no cost to Corbins. |
| EXCLUSION | Core drilling is assumed to be provided by single source contractor and carried by the GC. |
| EXCLUSION | Rigging is assumed to be provided by single source contractor and carried by the GC. |
| CLARIFICATION | ***To the extent that Subcontractor's timely performance of work is unreasonably impacted whether by acceleration, delay, disruption or otherwise, however caused, by Contractor, Owner, or any other party for whose acts Subcontractor is not legally liable, Subcontractor shall be entitled to an equitable adjustment to its contract which may include additional compensation and/or an extension of time, including any increased costs of labor, overtime, and/or materials.*** |
| CLARIFICATION | *Upon completion of final plan check comments our firm will begin prefabrication of the electrical system. If modifications to the plans are incorporated after the completion of plan check comments, any prefabricated material, system, labor, and other directly related expenses, which may not be used on the project, shall be considered an additional expense to the project. This additional expense shall be over and above the modifications made to the plans.* |
| CLARIFICATION | ***Unless otherwise extended in writing from Corbin's Electric, this pricing is accurate as of today market pricing, 03/25/22 . Corbins recommends a contingency to be held by the construction parties jointly at an agreed upon rate, in which case any savings at end of project will be provided back to the GC/Owner if not exceeded.*** |
| CLARIFICATION | *This proposal contains proprietary information and is considered confidential to Corbin's Electric. It is submitted upon the express condition that the information contained herein will not be released to competitors or otherwise used directly or indirectly in a way detrimental to the interest of Corbin's Electric. This proposal also supersedes any previously communicated pricing and/or clarification relating to this project.* |
| CLARIFICATION | *Please note that this pricing is based strictly upon the contract documents listed on the Proposal and incorporates by reference, the terms contained in this Corbin's Electric Bid Proposal. We reserve the right to modify, alter or revise any pricing to reflect adjustments to the bid documents, whether provided prior to, or following, the submission of the bid proposal. Corbin's Electric does not bid to 'intent' or 'implied interpretations' of others but to the actual contents of these bid and contract documents as shown on the project bid drawings.* |
| CLARIFICATION | *Workmanship warrantied for 1 year* |

## INCLUSIONS, EXCLUSIONS, AND CLARIFICATIONS

# 21-0660 CHANDLER RECAIMED WATER INTERCONNECT FACILITY

| TYPE | DESCRIPTION |
|---|---|
| CLARIFICATION | (1) 4 " Primary conduit 200' for new 400A service at the RWPS Area has been assumed as no point of connection point was referenced on the plans. If this quantity of conduits, size or distance is changed equitable adjustment will be required. |
| CLARIFICATION | **This proposal is explicitly subject to change (including but not limited to increased cost and delays) as a result of coronavirus/COVID-19 and resulting price escalations, delays in manufacturing and/or delivery of materials and equipment, labor shortages and negative labor fluctuations. Corbins expressly reserves the right to withdraw this proposal in the event of a shelter in place order or any directive from any authority having jurisdiction that the work is suspended, delayed, prohibited, canceled or shut down.** |
| CLARIFICATION | We are assuming that all instrumentation on a vendor supplied package (example: BLO-010) is supplied and installed by the vendor. |
| CLARIFICATION | All existing conduits to be reused are to be in place, installed in compliance with current code and AHJ standards and of sufficient size for new scope of work |
| CLARIFICATION | MCC-RWIF is being quoted as Nema 1A not Nema 12 |

# BID PROPOSAL

Date March 25, 2022

Bid Proposal of * Industrial Power Solutions LLC (hereinafter called "Bidder")

a ** Limited Liability Company organized and existing under the laws of the State of Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: #2.

BASE BID:

The Bidder agrees to perform all 16A - Electrical Instrumentation & Controls (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 16A, as described in the Contract Documents, for the Lump Sum of six million five hundred forty nine thousand, seven hundred eight and no/100 DOLLARS ($ 6,549,708.00 ).

**BID BREAKDOWN:**

Existing Aeration $92,897.00

| | |
|---|---|
| Raw Water PS | $ 710,190.00 |
| Membrane Facility/Strainer | $ 1,081,079.00 |
| Chemical Facility | $ 819,675.00 |
| Blower Building | $ 537,986.00 |
| Electrical Building | $ 1,935694.00 |
| Chlorine Contact Basin | $ 50,657.00 |
| Site Work | $ 1,160,038.00 |
| | Temp Power $ 45,000.00 |
| Performance & Payment Bond Cost *(If Applicable)* | $ 58,422.00 |
| Total Subcontract Amount | $ 6,549,708.00 |

The name of the proposed Bonding Company is Merchants Bonding Company

Bond rate .91 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $ NA .

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 10% Overhead - 10% Profit .

Position: Electrician Rate: $75 p/hr.

Equipment: TBD Rate: TBD.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☒ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | LJB (initials) |
| | |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | ~~(initials)~~ |
| | |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | LJB (initials) |

# BID BOND

KNOW ALL MEN BY THESE PRESENTS, that we Industrial Power Solutions, LLC (here insert full name and address or legal title of Contractor) as Principal, hereinafter called the Principal, and Merchants National Bonding, Inc.

(Here insert full name and address or legal title of Surety) a corporation duly organized under the laws of the State of IA as Surety, hereinafter called the Surety, are held and firmly bound unto McCARTHY, hereinafter called the Obligee, in the sum of Fifteen percent of the amount bid Fifteen Percent of Amount Bid (15%)

DOLLARS ($ 15% of amount), for the payment of which sum well and truly to be made, the said Principal and the said Surety, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the Principal has submitted a bid for Work Category No. ____, for Chandler Reclaimed Water Interconnect Facility Project, 955 E. Queen Creek Road, Chandler, Arizona 85286

NOW, THEREFORE, if the Obligee shall accept the bid of the Principal and the Principal shall, within the specified period of time, enter into a formal contract and furnish a surety guaranteeing the full and faithful performance of the Work, all as provided in the Additional Subcontractor Conditions, Plans and Specifications and other Contract Documents, including addenda, of said Obligee, then this obligation shall become void; otherwise it shall remain in full force and effect.

In the event the Obligee determines the Principal has failed to comply with any requirement as set forth in the preceding paragraph, then the Principal and Surety shall be jointly and severally obligated to pay to the Obligee the difference, not to exceed the full penal sum set forth above, between the amount specified in the Principal's bid and such larger amount for which the Obligee may contract with another party to perform the work covered by said bid, together with all court costs, all attorney's fees and any other expense of recovery.

IN TESTIMONY WHEREOF, the said Principal and said Surety have caused this instrument to be signed by their respective officers and their corporate seals to be hereunto affixed this 24th day of March A.D. 2022.

MERCHANTS
BONDING COMPANY

# POWER OF ATTORNEY

Know All Persons By These Presents, that MERCHANTS BONDING COMPANY (MUTUAL) and MERCHANTS NATIONAL BONDING, INC., both being corporations of the State of Iowa (herein collectively called the "Companies") do hereby make, constitute and appoint, individually,

Chrystal Hedges; David J McKee; Jennifer Castillo; Joseph A Clarken III; Melanie Ankeney; Patrick R Hedges; Ted H Rarrick

their true and lawful Attorney(s)-in-Fact, to sign its name as surety(ies) and to execute, seal and acknowledge any and all bonds, undertakings, contracts and other written instruments in the nature thereof, on behalf of the Companies in their business of guaranteeing the fidelity of persons, guaranteeing the performance of contracts and executing or guaranteeing bonds and undertakings required or permitted in any actions or proceedings allowed by law.

This Power-of-Attorney is granted and is signed and sealed by facsimile under and by authority of the following By-Laws adopted by the Board of Directors of Merchants Bonding Company (Mutual) on April 23, 2011 and amended August 14, 2015 and adopted by the Board of Directors of Merchants National Bonding, Inc., on October 16, 2015.

"The President, Secretary, Treasurer, or any Assistant Treasurer or any Assistant Secretary or any Vice President shall have power and authority to appoint Attorneys-in-Fact, and to authorize them to execute on behalf of the Company, and attach the seal of the Company thereto, bonds and undertakings, recognizances, contracts of indemnity and other writings obligatory in the nature thereof."

"The signature of any authorized officer and the seal of the Company may be affixed by facsimile or electronic transmission to any Power of Attorney or Certification thereof authorizing the execution and delivery of any bond, undertaking, recognizance, or other suretyship obligations of the Company, and such signature and seal when so used shall have the same force and effect as though manually fixed."

In connection with obligations in favor of the Florida Department of Transportation only, it is agreed that the power and aut hority hereby given to the Attorney-in-Fact includes any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts required by the State of Florida Department of Transportation. It is fully understood that consenting to the State of Florida Department of Transportation making payment of the final estimate to the Contractor and/or its assignee, shall not relieve this surety company of any of its obligations under its bond.

In connection with obligations in favor of the Kentucky Department of Highways only, it is agreed that the power and authority hereby given to the Attorney-in-Fact cannot be modified or revoked unless prior written personal notice of such intent has been given to the Commissioner-Department of Highways of the Commonwealth of Kentucky at least thirty (30) days prior to the modification or revocation.

In Witness Whereof, the Companies have caused this instrument to be signed and sealed this 4th day of September , 2020 .

# BID PROPOSAL

Date 03/25/2022

Bid Proposal of * Wilson Electric Services Corp (hereinafter called "Bidder")

a ** Corporation organized and existing under the laws of the State of

Arizona.

* Insert name of firm.
** Insert corporation, partnership, or individual, as applicable.

**(INSERT OWNER'S ADDRESS)**
TO: McCarthy Building Companies, Inc.
6225 North 24th Street, Suite 200
Phoenix, Arizona 85016

The Bidder, in compliance with your Invitation for Bids for the construction of Chandler Reclaimed Water Interconnect Facility having examined the Contract Documents entitled City of Chandler, Reclaimed Water Interconnect Facility Project, and other related documents and being familiar with the site of the proposed work, and with all of the conditions surrounding the construction of the proposed project including the availability of materials and labor, and the progress of work to date, if any, hereby proposes to furnish all labor, materials, tools, equipment, machinery, equipment rental, transportation, superintendence, perform all work, provide all services, and to construct all work in accordance with the Contract Documents set forth herein, and at the prices stated below. These prices are to cover all expenses incurred in performing the work required.

The Bidder shall attach a copy of Bidders' detailed estimate to its Bid Proposal. This estimate shall identify all quantities shown in the documents or anticipated along with corresponding labor, material and equipment pricing.

After Bid Proposals are received, tabulated, and evaluated by McCarthy, said Bidder agrees to meet with McCarthy for the purpose of determining any duplications, omissions, or mutually agreed bid adjustments. For these meetings, the Bidder agrees to provide a complete, detailed cost breakdown; a list of all sub-subcontractors proposed for use in the work; and a list of all items, materials and their manufacturers proposed for use in the work.

The Bidder, if awarded a Subcontract, agrees to commence work and to fully complete its Work in accordance with a schedule to be established in collaboration with McCarthy under the provisions of the Additional Subcontractor Conditions of the Specifications.

The Bidder acknowledges receipt of the following Addenda: 1

.

BASE BID:

The Bidder agrees to perform all Electrical and Instrumentation (herein insert the title of the Work Category as it appears in the Additional Subcontractor Conditions) Work for Work Category No. 16A, as described in the Contract Documents, for the Lump Sum of Seven Million Five Hundred Eight One Thousand and Eight Hundred DOLLARS ($ 7,581,800.00 ).

**BID BREAKDOWN:**

| | |
|---|---|
| Raw Water PS | $ 993,070.00 |
| Membrane Facility/Strainer | $ 1,368,214.00 |
| Chemical Facility | $ 1,188,182.00 |
| Blower Building | $ 411,774.00 |
| Electrical Building | $ 2,284,596.00 |
| Site Work | $ 656,005.00 |
| Performance & Payment Bond Cost *(If Applicable)* | $ Included in Line Items Above |
| Total Subcontract Amount | $ 7,581,800.00 |

The name of the proposed Bonding Company is Minard Ames

Bond rate 1 %

All applicable taxes, except sales and use taxes on materials and equipment which are affixed and made a part of the real estate of the Project, are included in the above Base Bid. Bidder agrees that this Bid Proposal shall be good and may not be withdrawn unless McCarthy does not send Bidder a Subcontract within one hundred eighty (180) calendar days after the opening date of Bid Proposals.

(Amounts shall be shown in both words and figures. In case of discrepancy, the amount shown in words will govern.)

ALTERNATES:

The Bidder further agrees that if any or all of the Alternates listed and described below are incorporated and accepted within sixty (60) calendar days after receipt of a Subcontract from McCarthy, the Bidder will adjust its Subcontract by the amount indicated opposite the Alternates listed below.

ALTERNATE NO. 1: Canopy and Bridge Crane @ Membrane Facility:

ADD the sum of $_____.

CHANGE ORDER RATES: (Add separate sheet as needed)

Markup % (on rates and material): 15% .

Position: Journeyman Rate: $72.00 .

Equipment: _____ Rate: _____.

The Bidder understands that McCarthy reserves the right to reject any or all Bid Proposals and to waive any informalities or irregularities therein.

SELECT AS APPROPRIATE

☐ The Bidder has completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program; OR

☐ The Bidder has not completed the Prequalification Form together with all other required data for McCarthy's' Contractor Default Insurance Program because the Bidder has provided the Form and all such information to McCarthy in the past 12 months for the following project:

_____ Project, which bid on: _____.

**RESPONSIVE BID REQUIREMENTS:**

**DO NOT ENCLOSE YOUR STANDARD TERMS AND CONDITIONS**

| | |
|---|---|
| If any exceptions are taken to the requirements of this Proposal form, attach a separate sheet listing those exceptions, stating the sections and paragraphs and the specific exception. | SB (initials) |
| | |
| In submitting this proposal, the Bidder certifies that this bid is valid for 180 calendar days. | (initials) |
| | |
| In submitting this Proposal as described herein, we agree to complete the work in accordance with the included Preliminary Construction Sequence. | SB (initials) |
| | |
| In submitting this Proposal, the Bidder certifies that all cost for extended warranties to start on the date of Substantial Completion is included. | SB (initials) |
| | |
| In submitting this proposal as described herein, we confirm that we have received, reviewed and agree to all commercial terms stated in the McCarthy Subcontract and Purchase Order Agreement. Any exception taken to the commercial terms stated in these Agreements must be listed on a separate sheet noting the article or paragraph and the specific exception. ***Bidders attached Standard Terms and Conditions will not be acknowledged or accepted as part of any given bid.*** | SB (initials) |
| | |
| In submitting this proposal as described herein, the Bidder certifies that this bid is coordinated based on a complete set of documents and that there will be no claims for change order based on the assertion that the Bidder did not have a complete set of Bidding Documents. | SB (initials) |
| | |
| In submitting this proposal, the Bidder certifies that they have included all spare parts, training, O & M Manuals, shop drawings and administration costs as associated to comply with the requirements of the specifications and as listed for their scope of work. | SB (initials) |
| | |
| A bid will be considered non-responsive if the Subcontractor Pre-Qualification Form is not completed as part of the Bid Form **(or on file at McCarthy office)**. | SB (initials) |
| | |
| The Bidder, by submitting their bid, represents that they have read and understand the scope requirements of the Bidding Documents. | SB (initials) |
| | |
| The Bidder certifies that any proposed materials in this scope of work meet or exceeds the requirements stated in the specifications unless noted otherwise within this proposal. | SB (initials) |

| | |
|---|---|
| The bidder certifies that the price listed in this bid is a firm Price through the final delivery of the materials proposed herein, and that no material escalation will be accepted as part of this proposal. | (initials) |

Within fifteen (10) days after receipt by the Bidder from McCarthy of the Subcontract or Purchase Order, the Bidder will execute and return to McCarthy said Subcontract or Purchase Order and if notified from McCarthy that Bidder is not to be enrolled in McCarthy's Contractor Default Insurance Program, deliver to McCarthy Performance and Labor and Material Payment Bonds for the Subcontract or a Supply Contract Bond for the Purchase Order, or the difference between the amount of the bid and such larger amount for which McCarthy may subcontract with another party to perform the work covered by said bid, together with all court costs, all attorney fees and all other expense of recovery, all of which shall not exceed the Bid Security attached in the amount of 15% of the bid, will become the property of McCarthy. The bonds shall name McCarthy as Obligee.

## Scope of Work

The following is a summary of the scope of work envisioned in our proposal:

- Electrical and Instrumentation per the Wilson Engineers Contract documents.

Estimate Notes:

- This budget includes 25,000 hours of direct craft labor. We have budgeted for approximately a one-year duration. This direct labor budget equates into an approximate field crew of 10 workers. We have included an indirect labor budget of 12,847 hours. The breakout for indirect labor is a full-time project Superintendent, a 50%-time Project Engineer, a 50%-time Project Manager, and a 3-month duration for a wiring coordinator.
- The Conduit Schedule was used as a bases for all control conduits for the budget.
- Site Work include Excavation and Backfill, Underground Duct Banks, Site Lighting, and initial investigation.
- Mobilization, office set-up, office supplies, tools & supplies for manpower productivity have been included in budget of each Bid Items mentioned above.
- Underground Duct Banks to be routed per the February 2022 Contract Drawings set.

## Scope of Work

Electrical and Instrumentation Work to include:

1. Existing Aeration Blower Room:
    - Existing MCC-BL1-A and MCC-BL1-B Buckets.
    - Conduit and Conductor per Plan and Specification.
    - Pull Box on exterior wall of Existing Building per Plan and Specification.
2. RWIF Electrical Building:
    - Manholes per Plan and Specification.
    - 2-600A Disconnects DSC-RWIF-A & DSC-RWIF-B.
    - 2-750KVA Oil Filled Transformers XFMR-RWIF-A and XFMR-RWIF-B.
    - Low-Voltage Switchgear MCC-RWIF-A and MCC-RWIF-B.
    - Panelboards PP-RWIF and LP-RWIF and 45KVA Transformer XFMR-L-RWIF.
    - 30A Disconnect for A/C Unit DSC-ACU-100.
    - Instrumentation and Controls to include PLC-RWIF, and ECOM-RWIF.
    - Fire Alarm System Panel per Plan and Specification.
    - All associated Conduits and Conductors per Conduit Schedule.
3. Membrane Filtration System:
    - 4-200A Disconnect Switches for Permeate Pumps, DSC-PP-100, DSC-PP-200, DSC-PP-300, and DSC-PP-400.
    - 6-30A Disconnect Switches for DSC-SD-100, DSC-SD-200, DSC-SD-300, DSC-CIP-710, DSC-CIP-720 and DSC-ILM-100.
    - Lighting Contactor LC-MFS-100.
    - Instrumentation per attached BOM.
    - All associated Conduits and Conductors per Conduit Schedule.
4. RWIF Blower Building:
    - 2-200A Disconnect Switches for Blowers, DSC-BLO-100, and DSC-BLO-200.
    - 1-60A Disconnect Switch for Transformer, DSC-XFMR-BLR.
    - 3-30A Disconnect Switches, DSC-AIC-010, DSC-AIC-020, and DSC-ECU-100.
    - 30KVA Transformer XFMR-L-BLR.
    - Panelboard PP-BLR-A.
    - Instrumentation to include Thermal Mass Flowmeter FIT/FE-030 and Pressure Transmitter PIT-031.
    - All associated Conduits and Conductors per Conduit Schedule.
5. MFS Chemical Feed Area:
    - Lighting Contactor LC-CFF-100
    - Instrumentation per attached BOM.
    - All associated Conduits and Conductors per Conduit Schedule.
6. Chlorine Contact Basin and Existing Admin Building:
    - Instrumentation to Include RWIF Composite Sampler CCB-003-SLP and Sample Pump ECP-CCB-SMP3.
    - All associated Conduits and Conductors per Conduit Schedule.
7. Raw Water Pump Station:
    - 400A Service Entrance Section SES-RWPS-1.
    - 600A Motor Control Center MCC-RWPS-1.
    - 400A Manual Transfer Switch MTS-RWPS.
    - 15KVA Transformer XFMR-L-RWPS-1.
    - 30A Disconnect Switch DSC-RW-001.
    - Panelboard PP-RWPS-1.
    - 400A Generator Connection Panel GEN-CONN-RWPS.
    - Instrumentation per attached BOM.
    - All associated Conduits and Conductors per Panel Schedule.

## Scope of Work

8. Site Work:
    - Underground Duct Bank per Plan and Specification.
    - Excavation and Backfill per Plan and Specification.
    - Site Electrical work per Plan and Specification.
    - All associated Conduit and Commodities per plan and specification.
9. Temporary Electrical Work:
    - Supply and install of Temporary Electrical Power to the Jobsite Trailer.

## Basis of Proposal

-Performance of all work is based on a forty (40) hour work week, Monday through Friday.
-This Proposal is based upon timely completion of a mutually agreed-upon construction schedule.
-The contractual Agreement resulting from acceptance of this Proposal is to be based on AGC Document No. 640, "Standard Form Construction Subcontract," or other mutually acceptable form.
-A mutually acceptable schedule of values will be negotiated to include a mobilization fee.
-We will participate with other contractual parties in the preparation of any necessary coordination and detailing drawings, with CAD input by others. We will maintain red-line drawings on site, with permanent as-built drawings to be prepared in the specified format by the prime contractor.
- We have included clean-up of our own operations only, with debris being deposited into containers supplied by others and in accordance with any site waste management/recycling plan.
-We will install electrical control panels furnished loose by Divisions aside from Division 16
-We will install electrical instruments furnished under other Divisions or by the Owner, except those which are to be preinstalled or shipped loose to be installed on equipment skids (as specified in other Divisions)

## Exclusions

We have excluded any costs for the following items:
-Overtime or shift work except as required to support off-hour shutdown work or maintenance of plant operations
-Permanent or temporary power consumption, nor for connection or construction fees charged by the electrical utility
-Electrical construction permit, sales or use taxes, or bonding
~~-Excavation, encasement, backfill of any electrical or communications duct banks, conduit or manholes~~.
-Concrete housing pads
-Piping, tubing, flanges, valves, installation of flow tube inline instruments, and pipe taps for field instruments

We have excluded the following services from our bid:
-Patching and painting, other than paint touch-up of equipment supplied by us
-Furnishing and installation of any mechanical equipment of related controls not specified in Division 16
-Installation of those instruments which are in-line or process connected (by the mechanical contractor)
-Furnishing and installation of any motors
~~-Concrete or Asphalt cutting, removal, or patching~~.
-Programming or configuration of PLC.

## Clarifications

Total material cost for this budget is approximately: $5,071,491.00
Included in this budget is a $45,000.00 budget for NETA testing.
Per our walkthrough, we have estimated the duct bank on this project as a full electrical install. We have included, sawcut, asphalt removal, excavation, rebar installs, conduit install, concrete encasement of duct bank, backfill of trenches, required street plates, required barriers, AB backfill, and asphalt patch.

RWIF Electrical Building Price is not included in this Bid Proposal. We will follow-up on the Electrical Building pricing once we have a Quote from our Vendor.

## Material Volatility Disclaimer

**MATERIAL PRICE VOLATILITY DISCLAIMER:** Commodity and material pricing has recently been extremely volatile and most of our suppliers have put Wilson Electric Services Corp. on notice of both price changes and/or the inability of the supplier to guarantee pricing in the current environment. Additionally, lead times for the materials and equipment we install may be much longer than what we have previously come to expect. As such, prices for quoted materials and commodities and lead times are not able to be guaranteed at the time of our proposal to you unless we distinctly identify certain components of the work are guaranteed pricing/delivery in this proposal. All other prices set forth herein are subject to adjustment by Manufacturer/Seller in accordance with its pricing policies in effect at the time of shipment unless manufacturers will accept more favorable terms. To be clear, some electrical suppliers will not currently provide binding quotations to electrical contractors; or some that do reserve their right to reprice their quote at the prevailing pricing at time of shipment. Working together, we can provide options for early ordering and delivery to the project site as authorized by you, though in these cases we will require written confirmation from you that we will be paid for stored materials. Until such time that we receive said authorization, commodity and material prices are subject to market fluctuation. We appreciate your understanding in these unique times and please be assured that Wilson Electric is continually looking at all options available to mitigate the volatility the market is experiencing.

| Coombs-Hopkins | Mar 1, 2022 at 11:36 AM | Bid Invite | Invitation to Bid |
| | Mar 1, 2022 at 2:41 PM | Internal Note | I talked with Jason Vernon on 3/1/2022. He will be bidding on 4 packages (11C - Gates, 11E - Strainers, 13A - Flat Covers, and 13B - FRP Tanks). I clarified with him that he will need to submit 4 separate bids, on completed Bid Forms found in the Front End Documents (to be issued later this week). I told him that I would get him the spec for WC13A - Extruded Flat Panel Covers once we get it from Wilson. |

| | Mar 1, 2022 at 3:18 PM | Internal Note | I talked wit Jeff Pals on 3/1/2022. He will be bidding WC11F - Chemical Metering Pumps (UGSI) as a buy-sell with Hennesy Mechanical Sales completing and signing the Bid Form. He may also be bidding on WC11E - Strainers, but it would be an "or equal". I will call him next week to discuss his review of the Chemical Metering Pump spec. |

## Chandler Reclaimed Water Interconnect Facility

| Company/ Description | Timestamp | Type | Subject |
|---|---|---|---|
| | Mar 11, 2022 at 9:37 AM | Internal Note | I left Michael Jones a voicemail on 3/9/2022 with no response. I followed up with this invitation and also a separate email requesting a quotation for the Floor Scales WC. |
| | Mar 14, 2022 at 7:30 AM | Internal Note | I received an email from Brandy Petit stating that Michel Jones no longer works at Mettler-Toledo. Brandy will be working of providing a quote for the Scales and Instruments. |
| | Mar 16, 2022 at 9:53 AM | Message | Questions |
| | Mar 22, 2022 at 11:50 AM | Internal Note | Jim Heaphy is now handling the bid for Mettler-Toledo. We have some conversations last week that resulted in some RFIs. Jim is working on completing the bid. |
| | Mar 25, 2022 at 9:49 AM | Message | Addendum 2 |
| Misco Water | Mar 1, 2022 at 11:36 AM | Bid Invite | Invitation to Bid |
| | Mar 1, 2022 at 2:45 PM | Internal Note | I called and left a message for Dave Redman on 3/1/2022. |
| | Mar 3, 2022 at 12:35 PM | Internal Note | I talked with Dave Redman on 3/2/2022 and again on 3/3/2022. He will be bidding on WC11C - Gates, WC13A - Flat Covers, and WC13B FRP Tanks. He may also bid on WC11E as an "or equal". I'm working with Dave on the Flat Panel Covers with Hallsten to convince them to bid even though they are not a listed manufacturer in the Specs. |
| | Mar 4, 2022 at 9:41 AM | Message | Chandler RWIF- Addenda 1 |
| | Mar 4, 2022 at 10:21 AM | Message | Chandler RWIF- Addenda 1 REV 1 |
| | Mar 11, 2022 at 1:56 PM | Internal Note | Left message with Dave Redman, told him about forthcoming Addendum #2 that will include the answer from Wilson stating that Hallsten will be added back to the specs for the Flat Panel Covers. |
| | Mar 16, 2022 at 9:53 AM | Message | Questions |
| | Mar 18, 2022 at 12:01 PM | Internal Note | I had a video meeting with Dave and with Gary Powell from Hallsten regarding the Flat Aluminum Covers. I sent them a copy of the SUEZ general arrangement drawings for them to coordinate with their estimate. |
| | Mar 22, 2022 at 11:45 AM | Internal Note | I received an email from Dave yesterday (3/21) stating that they would not be able to provide a Flat Panel Cover price from Hallsten because they don't have the proper clearances between membrane cassettes for their cross beams. Their cross beams would need to be removed every time a membrane cassette needed to be removed. |

# McCarthy Subcontractor Outreach

## Chandler Reclaimed Water Interconnect Facility

| Company/ Description | Timestamp | Type | Subject |
|---|---|---|---|
| | Mar 7, 2022 at 9:57 AM | Internal Note | Email Received on 3/7/22:<br>After reviewing the Addenda and the proposed construction schedule, our management team met this morning to discuss the availability of craft manpower, supervision and preconstruction that would be needed to dedicated this proposal as well as construction of the project. We were also notified this morning on another WTP project that they would be issuing us a contract today for it. Taking all of this into consideration, as well as our current commitments in preconstruction and the backlog of contracted work that goes into 2023 - we will have to decline to bid the Chandler RWIF project as we would not want to commit to bidding it without having the proper Team to put on it.<br><br>Please keep us in consideration for future projects. |

| | Mar 25, 2022 at 10:48 AM | Internal Note | 3/25 - 10:45 am - Talked to Tim, he is checking his schedule for next wee and should be reaching out to set up a time for scope review |
| | Mar 31, 2022 at 1:33 PM | Internal Note | 3/31 - 1:30pm - Spoke with Tim, they are still waiting on their programming number and we should have their new price by tomorrow |

SECTION 11220

INLINE RAPID MIXERS

## PART 1 - PART 1 - GENERAL

### 1.1 SUMMARY

A. CONTRACTOR shall provide all labor, materials, equipment, and incidentals as shown, specified, and required to furnish and install one new inline rapid mixer for mixing sodium hypochlorite and membrane permeate water.

B. Install one new inline rapid mixer on the common membrane permeate header, as shown on the Plans.

C. The CONTRACTOR shall have the responsibility to coordinate the installation of the equipment. Any revisions necessary shall be subject to the ENGINEER'S review and approval.

### 1.2 SECTION INCLUDES

A. Inline Rapid Mixer.

Section 05051 – Anchor Bolts, Toggle Bolts, and Concrete Inserts Not included.
Section 10400 – Equipment Identification Plates
- We are providing Manufacturer standard nameplates only.
Special nameplates (if required) are by others: (i.e. lamacoid type plates, warning signs (auto equipment may start at any time) etc.)
- Anchor Bolts and epoxy and anchorage calculations are not included.

### 1.3 RELATED SECTIONS

A. Section 01300, Submittals.

B. Section 01640, Materials and Equipment.

C. Section 01650, Starting of Systems.

D. Section 09900, Painting.

E. Section 16225, Electric Motors 250 Horsepower or Less.

### 1.4 REFERENCE STANDARDS

A. All applicable AGMA, ASTM, OSHA, AFBMA and NEMA Standards.

### 1.5 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Procedures for product delivery are specified in Division 1, General Requirements.

B. Run speed reducers with rust inhibitive oil before shipment.

C. Spray preservative oil on internal reducer housing surfaces before shipment.

D. Manufacturer shall not ship any equipment to the job site until the Shop Drawings are approved by the ENGINEER. Any non-approved equipment shall be removed from the job site by the CONTRACTOR.

## 1.6 SUBMITTALS

A. Shop Drawings: Submit for approval, in conformance with Section 01300, Submittals, the following:
   1. Letters of Certification of Compliance on materials, equipment, etc.
   2. Drawings showing fabrication, dimensions, capacity, weight and materials of construction, electrical diagrams, and installation piping.
   3. Field assembly instructions, assembly drawings and/or diagrams, detailed reference drawing lists, and lists of assembly details.
   4. Shop detail drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
   5. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
   6. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.
   7. General bulletins or catalog cuts showing operating principles and fundamentals.
   8. A complete process description detailing all process parameters.
   9. Documentation that the manufacturer has produced, supplied, and placed into satisfactory service, equipment similar to that specified herein.
   10. Recommended list of spare parts and safety equipment, along with price and ordering information.
   11. Electrical equipment ratings and data sheets for all devices.

B. No equipment shall be shipped until the ENGINEER approves the Shop Drawings.

C. Shop Test Results: Submit results of routine factory motor tests.

D. Field Test Results: Submit a written report giving the results of the required field tests.

E. Manufacturer's Reports: Submit written report of the results of each visit by a manufacturer's serviceman, including purpose and time of visit, tasks performed, and results obtained.

F. Operation and Maintenance Manuals: Submit complete Operation and Maintenance Manuals in conformance with the Operation and Maintenance Manuals Section of Section 01300, Submittals.

G. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

H. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## 1.7 WARRANTY

A. The manufacturer shall warrant the units being supplied to the OWNER against defecting in workmanship and material for a period of twelve (12) months after start up and under normal use, operation, and service. The warranty shall cover parts and labor and shall be in printed form and apply to all similar units.

# PART 2 - PART 2 - PRODUCTS

## 2.1 2.1 MANUFACTURERS

A. Acceptable Manufacturers:
   1. Hayward Gordon, HIM-100-24 Dynamic Inline Mixer.
   2. Or approved equal.

B. The naming of a manufacturer in this Specification is not an indication that the manufacturer's standard equipment is acceptable in lieu of the specified component features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

## 2.2 2.2 DESIGN CRITERIA

A. Job Conditions:
   1. Outdoor Installation.
   2. Mixed Liquid – 100% mixed Membrane Permeate Water containing Sodium Hypochlorite.
   3. Outdoor Temperature Range: 20° F to 122° F.
   4. Membrane Permeate Water Temperature Range: 45° F to 90° F.
   5. Continuous Mixing.
   6. Elevation: CL 1222.51' +/-.
   7. Pipe Diameter: 24-inches.
   8. Flow Rate: 10 MGD.
   9. System Pressure: 50 PSI.
   10. Mixing
   11. Outdoor Environment: Rain, sun, wind, dust.

B. Inline Rapid Mixer:
   1. Number of units: One.
   2. Number of impellers: Two.
   3. Impeller type: Two (2) opposed pitched blade turbine.
   4. Minimum motor size: 10 Hp.
   5. Impeller diameter, minimum: 13-inches.
   6. Impeller rotative speed: 450 rpm.

## 2.3 2.3 MATERIALS

A. Gear Reducer: Close-grained cast iron, stress relieved and reinforced.

B. Impeller Shaft: One piece, 316 Stainless Steel.

C. Impeller: 316 Stainless Steel.

D. Output Shaft: 316 Stainless Steel.

E. Output Coupling: 316 Stainless Steel.

F. Mixer Vessel: 316 Stainless Steel.

G. Flow Straightening Vanes: 316 Stainless Steel.

H. Ring Baffle: 316 Stainless Steel.

## 2.4 2.4 FABRICATION AND MANUFACTURE

A. Impeller:
   1. Type: Two (2) opposed pitched blade turbine, two per shaft.

2. Grind all edges smooth.
3. Statically balanced.
4. Use of stabilizing rings and fins: Unacceptable.
5. Bolted construction, connected to shaft with hook key.
6. Maximum stress in any impeller component at design conditions: 11,000 psi.

B. Speed Reducer:
   1. General:
      a. Designed, manufactured and rated per AGMA Standards.
      b. Maximum noise level: 85 dBA at 3 feet away from drive assembly.
      c. To ensure system responsibility the gear box shall be designed, manufactured, tested and warrantee by the mixer manufacture.
   2. Type:
      a. Solid oversized upper vertical parallel shaft design.
      b. Totally enclosed.
   3. Gears:
      a. Double or triple reduction.
      b. Helical and/or spiral bevel gearing.
      c. Worm gears not acceptable.
      d. AGMA No. 10 or better (AGMA 390.03).
   4. Minimum service factor: 2.0 based on nameplate Hp of
   5. Bearings:
      a. Ball or roller, anti-friction type.
      b. Oil or grease lubricated.
      c. Thrust bearings independent, designed to carry 125% of shaft and impeller loads.
      d. All bearings within drive including output shaft bearing: AFBMA B-10 minimum life of 100,000 hours at full motor nameplate horsepower and at design speed.
      e. Located within drive assembly.
   6. Gearbox Shaft:
      a. Maximum stress at max load: 8,000 psi.
   7. Case:
      a. Removable cover to provide access to gear reducer and all bearings without removing unit.
      b. Provide lifting lugs.
      c. Stress relieved and reinforced.

gearbox is commercially available unit manufactured by others, but otherwise warranteed by mixer manufacturer

Except for lubrication, gear reducer is not servicable with removal from mixer.

C. Impeller Shaft:
   1. Overhung design, no underwater steady bearing.
   2. Maximum stress at maximum operating load: 9,000 psi.
   3. One piece, output coupled to gearbox by rigid coupling.
   4. Minimum extension shaft diameter of 2.5".
   5. Shaft to operate below 65% of 1st critical speed.

6. Provide above surface access to coupling to permit coupling disconnect without dewatering basin or shaft removal.
7. Impeller shaft connection shall be sleeve type between gearbox and mixer shaft. Rating: 200% of full torque and 150% of axial load.

D. Shaft Seal:
1. The mixer will be sealed by a seal housing box fitted with John Crane type 32 dry running mechanical seal.
2. A vent port with ball valve is provided to assist with evacuating air from seal area at startup.

E. Motor:
1. Squirrel cage induction type, for continuous duty in a humid outdoor environment with full mill and chemical duty features. See Section 16225, Electric Motors 250 Horsepower or Less for motor specifications.
2. 460V, 3-phase, 60 Hz, energy efficient.
3. Class H insulation, Class B temperature rise of 50° C ambient at 1.0 service factor. Service factor: 1.15.
4. Lifting lugs.
5. Easily accessible, torsionally resilient flexible coupling between motor and speed reducer.
6. Provide OSHA approved coupling guards.
7. Synchronous speed: 1,800 rpm.

should read B temperature rise above 50 C ambient.

F. Mounting Arrangement:
1. Mount mixer with saddle type foot support for anchoring vessel to concrete equipment pad as shown on Drawings.
2. Provide lifting lug on both side of drive flange.
3. Mounted mixer to prevent any defection in piping system.

G. Baffles:
1. Provide and install flow straightening vanes and ring baffle for optimum mixing, as required by manufacturer's requirements.
2. Baffles to be supplied and mounted by the manufacturer.

H. Shop Painting:
1. All welds shall be thoroughly cleaned and ground smooth in preparation for painting. All iron and steel surfaces, except motors and speed reducers, shall be solvent cleaned in accordance with SSPC-SP1 before shop primer is applied.
2. All iron and steel surfaces, except motors, speed reducers, and stainless steel shall be given a shop coat of the manufacturer's standard rust inhibitive primer.

## PART 3 - PART 3 - EXECUTION

### 3.1 3.1 FIELD QUALITY CONTROL

A. Manufacturer's Field Services
   1. Provide services of manufacturer's field representative. Field representative shall be a factory-trained person employed by the manufacturer, with significant experience with startup and training of equipment of this type.
   2. Field representative to:
      a. Be present during installation and alignment of equipment.
      b. Inspect and verify equipment properly installed per manufacturer's recommendations.
      c. Direct initial startup and instruct plant personnel for proper operation and maintenance of equipment.
      d. Preside at field test of equipment.
      e. Instruct the OWNER'S personnel in operation and maintenance of equipment. Instruction shall include theory, operational procedures for startup, shutdown, routine and abnormal operation, as well as preventive and unscheduled maintenance procedures, including assembly and disassembly of equipment.
      f. Submit a certification of proper installation and satisfactory performance.
      g. Perform testing, startup, and training.
         1) Provide field representative for a minimum of four hours, one trip for Pre-Operational Testing.
         2) Provide field representative for a minimum of eight hours, one trip for start-up testing.
         3) Provide field representative for a minimum of eight hours, one trip, for operations and maintenance training.
   3. Manufacturer shall include all costs for travel and living expenses for field representative in his bid price.

### 3.2 3.2 ADJUSTMENTS AND TESTING

A. Operating Checks:
   1. Pre-operation checks:
      a. Impeller shaft alignment.
      b. Speed reducer - bearing lubrication.
      c. Impeller rotation.
      d. Motor shaft - input shaft lubrication.
      e. System Pressure
   2. Post-operation checks:
      a. Check bearing temperature against manufacturer's recommendation.
      b. Check for motor overload.
      c. Check shaft alignment.
         1) Test impeller shaft by hand turn operation.

2) Deflection: Not to exceed 1/8-inch per 10 feet of length.

d. Check vibration:

1) Test gearbox unit for vibration when operated by motor.

2) Maximum allowable deflection: 5 mil anywhere on motor or speed reducer.

B. Start-Up Testing:

1. Water Test:

a. With pressurized pipe at normal operating condition, operate mixer for three hours.

b. Measure power consumption, shaft speed, and vibration every five minutes for the first hour, and once every half hour thereafter until completion of the test.

2. Testing:

a. Costs:

1) The OWNER will pay for energy costs associated with testing.

2) Supplier will pay for all other costs associated with testing and retesting.

b. Failure to perform:

1) Equipment not meeting specified performance requirements will not be accepted.

2) Supplier shall remove equipment, modify, reinstall, and retest as required to meet test requirements.

c. Test personnel and equipment:

1) Personnel: Qualified and familiar with operation of equipment furnished.

2) Equipment: Calibrated.

d. All tests shall be performed in the presence of the ENGINEER and the OWNER Representatives.

e. Schedule

1) Coordinate testing with the CONTRACTOR, the OWNER, and the ENGINEER.

++ END OF SECTION ++

SECTION 11285

HYDRAULIC GATES

## PART 1 - GENERAL

### 1.1 SUMMARY

A. CONTRACTOR shall provide all labor, materials, equipment, and incidentals as shown, specified, and required to furnish and install stainless steel gates, and appurtenances.

B. Gate mountings shall be supplied by the gate manufacturer and all other appurtenances shall be provided by the CONTRACTOR.

### 1.2 SECTION INCLUDES

A. Heavy-duty fabricated stainless steel slide Gates.

Acknowledged

### 1.3 REFERENCES

A. American Society of Mechanical Engineers (ASME)
   1. Section IX - Boiler and Pressure Vessel Code - Welding and Brazing Qualifications.

B. American Water Works Association (AWWA)
   1. AWWA C 561 - Fabricated Stainless Steel Gates.

F. Section 09900, Painting (Specifications for surface preparation and shop priming required under Section 11285, Hydraulic Gates, are to be done in conformance with Section 09900, Painting).

G. Section 13447, Electric Motor Actuators.

H. Division 16, Electrical.

I. Division 17, Instrumentation.

## 1.5 QUALITY ASSURANCE

A. Manufacturer's Qualifications:
   1. Manufacturer shall have a minimum of five years of experience in the production of substantially similar equipment and shall show evidence of satisfactory operation in at least five installations.
   2. All gates shall be the product of one manufacturer.

B. Shop Tests:
   1. Test each gate fully assembled in the vertical position for proper seating.
   2. Fully open and close gate disc in its guide system to ensure that it operates freely.
   3. Operate and test floor stands, bench stands, and motor operators to ensure proper assembly and operation. Motor operators shall be tested by the operator manufacturer prior to shipment.

We Comply

## 1.6 SUBMITTALS

A. Descriptive Submittals shall be made in accordance with the Data Reference Symbols defined in Section 01300, Submittals.
   1. Shop Drawings:
      a. Letters of Certification of Compliance on materials, equipment, etc.
      b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
      c. Shop Detail Drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
      d. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to

describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.

e. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
f. Materials of construction of all components.
g. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
h. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
i. Deviations from the Contract Documents.

2. O&M Manuals:
   a. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
   b. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
   c. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
   d. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
   e. Materials of construction of all components.
   f. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
   g. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
   h. Test reports, maintenance data and schedules, description of operation, and spare parts information.
   i. Furnish Operation and Maintenance Manuals in conformance with the requirements of Section 01300, Submittals.

We Comply

B. Field Test Results:
   1. Submit a written report giving the results of the field tests required.

C. Lubricant Specification: Furnish a lubricant specification for the type and grade necessary to meet the requirements of the equipment.

D. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are

indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

E. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## 1.7 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to the site to insure uninterrupted progress of the Work.
   1. Deliver anchor bolts and anchorage devices which are to be embedded in cast-in-place concrete in ample time to maintain the construction schedule.

We Comply

B. Handle all gates and appurtenances properly, in accordance with manufacturer's recommendations. Gates which are distorted or otherwise damaged will not be acceptable. Protect all steam threads, bolt threads and ends from damage.

C. Store materials to permit easy access for inspection and identification.

D. Store all mechanical equipment in covered storage off the ground and prevent condensation.

## 1.8 GATE SCHEDULE

A. The Gate Schedule is included at the end of this Section. This schedule is provided for general information on specific gates. In the event of discrepancies between this schedule and the Plans and Specifications, the information on the Plans shall govern.

# PART 2 - PRODUCTS

## 2.1 MANUFACTURERS

A. The gates shall be as manufactured by one of the following (Manufacturers listed in alphabetical order):
   a. Fontaine

b. Golden Harvest, Inc., Burlington, WA.
c. Waterman Industries
d. Whipps, Inc., Athol, MA
e. Or, Approved Equal.
f. The naming of a manufacturer in this Specification is not an indication that the manufacturer's standard equipment is acceptable in lieu of the specified component features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

## 2.2 MATERIALS

A. All materials used in the manufacturing of the gates shall be of the best quality used for the purpose of commercial production.

B. General: Design equipment to be suitable for the process and service conditions described below and in the Gate Schedule.
1. Design gates to safely withstand conditions listed in the Gate Schedule.
2. Gates shall be substantially watertight with leakage less than 0.5 gpm per foot of seating perimeter at design head.
3. Manual operators shall turn right to close, unless otherwise specified. Operators shall indicate the direction of operation.
4. Bolts, studs, cap screws, and adjusting screws shall be of ample section to withstand the force created by operation of the gate under a full head of water.
5. Downward opening gates shall be capable of being lowered to an elevation below the invert of the channel or opening.
6. Gates shall open to not less than 6-inches above the maximum water level in the channel in which they are installed.

We Comply

C. Materials of Construction for Gates:
1. Stainless Steel: For frame, slide, slide stiffeners, rail, yoke, pedestals, wall brackets, and wall thimbles ASTM A276, Type 316 stainless steel. All metal for gate and wall thimble parts shall have a minimum thickness of 1/4-inch.
2. Frame, top stiffener, vertical stiffener, center stiffener, seal landing, and seal retainer shall be made of stainless steel consistent with ASTM A240.
3. Bronze Casting: For operating nut, thrust nut, and lift nut, ASTM B584 Alloy 865.
4. All bolts, studs, cap screws, and adjusting screws shall be of Type 316 stainless steel.
5. Bolts and nuts shall have hexagon heads.
6. Gasket material and installation shall conform to manufacturer's recommendations.
7. Disc:
a. Stainless Steel: Fabricate the slide or disc of ASTM A276, Type 316L stainless steel plate reinforced with structural shapes attached by welding.

b. Provide reinforcing to limit deflection under full head to not more than 1/360 of the span, or 1/16-inch maximum at seal points, whichever is less.
c. Extend reinforcing ribs into the guides overlapping the seating surface of the guide.
d. Disc shall be sized to engage into the guides a minimum of 1-inch on each side.
e. Weld stem mounting guides to the disc.

8. Disc Guides:
   a. Stainless Steel: Guides shall be of Type 316L stainless steel formed and welded to create a one-piece type construction using formed plate. Gussets shall be provided to accommodate the load on the frame in unseating head conditions.
   b. Guides shall be designed for maximum rigidity in accordance with the latest revision of AWWA C561 to take the load developed at maximum design head and the thrust developed during gate operation, including the stall torque of the electric actuator, under maximum head.
   c. Guides shall extend beneath the opening a sufficient amount to completely support the disc in the fully open or closed position.
9. Stem:
   a. Operating stems shall be of Type 316 stainless steel and designed as specified below. Stems shall have a minimum diameter of 1-1/2 inches.
   b. Design stem to transmit in compression at least 2-1/2 times the rated output of the operating mechanism with an 80 lb effort on the crank or handwheel.
   c. Determine the critical buckling load using the Euler column formula, using C = 2. Where hydraulic cylinder lifts are used, the stem design force shall not be less than 1.25 times the output thrust of the hydraulic cylinder with a pressure equal to the maximum working pressure of the hydraulic fluid supply. Where electric motor driven lifts are used, the stem design force shall not be less than 1.25 times the output thrust of the unit in the stalled motor condition.
   d. Stems shall have a slenderness ratio (L/R) less than 200.
   e. Threaded portion of the stem shall have machined cut or machine rolled threads of the Acme type, having a surface roughness finish of 16 micro-inches or less. Join stems of more than one section by stainless steel couplings threaded and keyed, or bored and pinned, to the stems. All threaded and keyed couplings of the same size shall be interchangeable. Provide rising stems with an adjustable stop collar on the stem on manually operated gates.
   f. Connect the stem to the disc by means of a bolted connection with a minimum of two attachment bolts.
10. Yoke (For Self Contained Type Gates):
    a. Furnish tops of the extended guides with a yoke for mounting of the lifting device.

We Comply

b. Construct the yoke of structural shapes of sufficient strength to take the full thrust created by operating the gate under the maximum specified head.
c. Attach the yoke to the framework by bolting or welding so as to permit removal of the gate slide and stem.

11. Lower Seals:
    a. Mount a specially shaped resilient neoprene seal on the bottom of the disc or guide frame to provide flush-bottom closure for gates.
    b. Shape of the seal shall produce a seating surface having a minimum width of 3/4-inch, and the seal will extend beyond the seating surface of the gate frame.
    c. Vertical face of the seal shall be in contact with the seating surface of the guide to provide a proper seal at the corners.
12. Side and Upper Seals:
    a. Side and upper seals shall be self-adjusting seals with compression cord fabricated from ultra high molecular weight (UHMW) polyethylene or UHMW polymer. Weir gates to have the self-adjust seal on the bottom versus top for slide gates. UHMW bearing strips shall be mechanically retained to lock seat in place. Elastomeric seals such as J-Seals and Crown seals or adjust seal designs are not acceptable.

We Comply

## 2.3 APPURTENANCES

A. Stem Guides:
    1. Guides shall be adjustable in two directions and shall be spaced so that stems have a maximum unsupported length of 84-inches.
    2. Anchor bolts for stem guides shall be Type 316 stainless steel.

B. Anchor Bolts:
    1. Provide Type 316 stainless steel anchor bolts as required for stem guides, floorstands, and all equipment or appurtenances which must be secured to concrete walls or floors. Anchor bolts shall be of ample size and strength for the purpose intended, and shall be furnished by the manufacturer. Anchor bolts shall be hooked, and provided for direct embedment during placement of concrete. Anchor bolts shall conform to the requirements of Section 05051, Anchor Bolts, Toggle Bolts and Concrete Inserts.

We recommend adhesive anchors

C. Stem Cover:
    1. Furnish all stems with a clear polycarbonate or butyrate plastic pipe stem cover. Covers shall be furnished with a cast aluminum adaptor for mounting covers to floor stands. Stem covers shall be designed and furnished with gasketing and breathers to eliminate water intrusion into operators and condensation within the covers.
    2. Stem covers shall have with legible markings showing as a minimum the gate position at 1/4 open, 1/2 open, 3/4 open and full open.

We Comply

D. Electric Operators:
   1. Electric motor operators shall be furnished as shown on the Slide Gate Schedule, in accordance with the requirements of Section 13447, Electric Motor Actuators.

E. Identification: Identify each gate with a stainless steel manufacturer's nameplate stamped with the approved designation as shown in the Gate Schedule, below. Manufacturer's nameplate shall be permanently fastened to the gate at the factory.

## 2.4 SURFACE PREPARATION AND PAINTING

A. Clean, prime coat, and finish coat ferrous metal surfaces of equipment in the shop in accordance with the requirements of Section 01640, Materials and Equipment, and Section 09900, Painting.

B. Coat machined, polished and non-ferrous surfaces bearing surfaces and similar unpainted surfaces with corrosion prevention compound which shall be maintained during storage and until equipment begins operation.

We Comply

C. Surface preparation and painting shall conform to Section 09900, Painting.

D. Certify, in writing, that the shop primer and coating system conforms to the requirements of Section 09900, Painting.

## 2.5 SPECIAL TOOLS

A. Furnish two sets of any special tools required for normal operation and maintenance.

## 2.6 LUBRICANTS

A. Furnish Food grade oil and grease meeting NSF 61 for water applications as required for initial operation. Use products recommended by the manufacturer.

## 2.7 GATE SCHEDULE

A. Schedule 11285 is the Gate Schedule. Conform to type, size, operation and other data specified, unless otherwise approved by ENGINEER.

B. Provide all gates as shown on the Drawings and listed in the Gate Schedule.

# PART 3 - EXECUTION

directed to Contractor

## 3.1 INSTALLATION

A. Gates shall be installed in accordance with manufacturer's recommendations.

B. Gates shall be installed at the respective location as shown on the Plans.

directed to Contractor

C. Gate stems shall be plumb and vertical. Each gate shall be adjusted for smooth and easy operation.

D. Brace guides and frames during placement of concrete.

E. Set anchor bolts in accord with approved manufacturers drawings.

F. Provide minimum of 1-inch of non-shrink grout below all floor stands and between gate frame and wall on wall mounted gates.

G. Adjust all parts and components as required to provide correct operation.

3.2 FIELD TESTS

We Comply

A. After CONTRACTOR and ENGINEER have mutually agreed that the equipment installation is complete and ready for continuous operation, CONTRACTOR and a qualified field service representative of the manufacturer shall conduct a functional field test and a leakage test of each gate in the presence of ENGINEER to demonstrate that each gate furnished will function correctly and that maximum permissible leakage is not exceeded.

1. Functional Tests:
   a. Each gate with appurtenances shall be field tested. Tests shall demonstrate to ENGINEER that each part and all parts together function in the manner intended. All necessary testing equipment and manpower shall be provided by CONTRACTOR at his expense. OWNER will furnish all power, and incidental material and labor required for the tests.
2. Leakage Tests:
   a. Maximum permissible leakage shall be in accordance with the requirements of Paragraph 2.2.B.2. Excess leakage shall be reduced to meet specified requirements by adjusting the gate or replacement will be required.
3. In the event that the manufacturer is unable to demonstrate to ENGINEER that his equipment meets the requirements of the tests, the deficient equipment will be rejected and CONTRACTOR shall adjust and/or modify and retest the equipment as often as necessary to meet the specified requirements. No separate payments shall be made for adjustments and/or modifications.

3.3 MANUFACTURER'S FIELD SERVICE

A. A factory employed and trained representative of the manufacturer shall visit the site and provide installation and start-up services, as specified in Section 01650, Starting of Systems. The factory employed representative shall make six visits to the site. The six visits will be split as needed between installation assistance and supervision, checking the completed installation and start-up of the system, and for training on the operation and maintenance of the gates. Trips to include:

1. Installation supervision: 1 trip, 1 day.
2. Dry wall installation inspection and operation: 1 trip, 4 days.

3. Wet wall functional and leakage testing: 1 trip, 4 days.
4. Training and remaining startup: 1 trip, ½ day.

B. Equipment Start-up: A factory employed representative of the manufacturer shall visit the site and provide installation and start-up services as specified in Section 01650, Starting of Systems.

We Comply

C. Training: A factory employed and trained representative of the manufacturer shall visit the site and provide operator training services, in addition to equipment start-up services, as specified in Section 01650, Starting of Systems. A minimum of one day of training and of training will be required.

D. All costs, including travel, lodging, meals, and incidentals, shall be considered as included in the CONTRACTOR'S lump sum bid price.

SECTION 11311

SUBMERSIBLE PUMPS

## PART 1 - GENERAL

### 1.1 SUMMARY

A. CONTRACTOR shall furnish and install three new submersible non-clogging impeller pumps for the Raw Water Pump Station as specified herein and as shown on the Drawings. The pumps shall be complete and operational with motors, discharge elbow, guide bar, brackets, access frames, covers, alternator, and accessories as shown and specified. Anchor bolts are included in this Section.

## 1.4 GENERAL DESCRIPTION

A. Pumps shall be installed in the wet well as shown in the Drawings. Each pump shall be mounted on a discharge connection elbow and guide bar system to allow removal and installation of the pumps without entering the wet well.

B. The entire weight of the pump unit shall be guided by a minimum of two guide bars pressed tightly against the discharge connection elbow. No portion of the pump shall bear directly on the floor of the sump. The pump, with its appurtenances and guide bar system, shall be capable of continuous submergence under water without loss of water tight integrity to a depth of 60 feet.

C. Provide a permanently installed cast iron discharge connection elbow and base in the wet well, along with the discharge piping. The pump shall be automatically connected to the discharge connection elbow when lowered into place and shall be easily removed for inspection or service. Sealing of the pumping unit to the discharge connection elbow shall be accomplished by a simple linear downward motion of the pump.

D. Provide enlargers/reducers as necessary to ensure pump locations, pipe location, and pipe sizes are as shown on the Drawings. If enlargers/reducers affect pump locations, pipe locations, or pipe sizes, the CONTRACTOR shall notify the ENGINEER before construction of the pump station proceeds.

E. In order to centralize responsibility, it is required that all equipment and services provided under this Specification be furnished by a single supplier or manufacturer who shall assume full responsibility for the completeness of the system. CONTRACTOR shall guarantee and be the source of information on all equipment furnished regardless of the manufacturing source of that equipment.

## 1.5 SUBMITTALS

A. Descriptive submittals shall be made in accordance with the Data Reference Symbols defined in Section 01300, Submittals.
   1. Pumps: Shop Drawings:
      a. Letters of Certification of Compliance on materials, equipment, etc.
      b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.

c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
d. Shop Detail Drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
e. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
f. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.
g. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
h. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
i. Certified head and capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.
j. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
k. Materials of construction of all components.
l. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
m. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
n. Bearing manufacturer's standard identification and/or interchangeable number for all anti-friction bearings in the equipment proper and its accessory items.

2. Pumps: O&M Manuals:
   a. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
   b. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
   c. Shop Detail Drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
   d. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.

e. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.
f. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
g. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
h. Certified head and capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.
i. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
j. Materials of construction of all components.
k. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
l. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
m. Bearing manufacturer's standard identification and/or interchangeable number for all anti-friction bearings in the equipment proper and its accessory items.
n. Descriptive O&M's shall be made in accordance with Section 01730, Operation and Maintenance Data.

3. Impellers: Shop Drawings:
a. Letters of Certification of Compliance on materials, equipment, etc.
b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
d. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
e. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
f. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
g. Certified head and capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.

h. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
i. Materials of construction of all components.
j. Bearing manufacturer's standard identification and/or interchangeable number for all anti-friction bearings in the equipment proper and its accessory items.

4. Impellers: O&M Manuals:
   a. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
   b. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
   c. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
   d. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
   e. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
   f. Certified head and capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.
   g. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
   h. Materials of construction of all components.
   i. Bearing manufacturer's standard identification and/or interchangeable number for all anti-friction bearings in the equipment proper and its accessory items.

5. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with

the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

6. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## 1.6 WARRANTY

A. The pump manufacturer shall warrant the units being supplied to the OWNER against defecting in workmanship and material for a period of five years or 10,000 hours under normal use, operation, and service. The warranty shall cover parts and labor and shall be in printed form and apply to all similar units.

## 1.7 QUALITY ASSURANCE

A. Manufacturers regularly engaged in the manufacture of the submersible pump equipment as specified herein and who can demonstrate equipment of this specified design in actual service for not less than five years will be considered as acceptable manufacturers. All like items shall be furnished by one manufacturer to ensure uniformity and interchange ability of parts. Manufacturer shall guarantee all equipment furnished; however, this shall not be construed as relieving the CONTRACTOR from his responsibility for the proper installation and functioning of the Work.

B. Require pump manufacturer to furnish and coordinate pump, driver, drive, and pump components as specified and scheduled below and to provide written installation and check-out requirements.

C. Manufacturer shall have five installations of same size equipment in same application within the last five years in the State of Arizona. Manufacturer to submit installation information, including size, location, and a total of three operator contact names and operator phone numbers with the submittals.

D. Complete assemblies, including motor, cable, and all accessories, shall be listed and approved by the Nationally Recognized Testing Laboratories (NRTL).

E. Shop Tests:
   1. Pump casings shall be hydrostatically tested to twice the discharge head or 1-1/2 times the shutoff head, whichever is greater.
   2. Running Test: Pump assembly shall be operated from zero to maximum capacity as shown on the approved pump curve. Results of the test shall be shown in a plot of test curves showing head, flow, horsepower, efficiency, and

current. Readings shall be taken at a minimum of five evenly spaced capacity points including shut-off, design point and minimum head for which the pump is designed to operate.

3. Each test shall be witnessed by a Registered Professional Engineer, who may be an employee of the manufacturer. He shall sign and seal all copies of curves and shall certify that hydrostatic tests were performed. Tests shall be conducted in conformance with the methods described in Section A6 of AWWA E101.
4. Pumps shall not be shipped until the ENGINEER has approved the test reports.

## PART 2 - PRODUCTS

### 2.1 MANUFACTURERS

A. ITT FLYGT.

~~B. KSB.~~

~~C. Sulzer.~~

D. Or, approved equal.

E. The naming of a manufacturer in this Specification is not an indication that the manufacturer's standard equipment is acceptable in lieu of the specified component features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

### 2.2 DESIGN CRITERIA

A. Equipment Schedule:

</table>

## 2.3 SUBMERSIBLE PUMP COMPONENTS

A. Pumps:
   1. The pumps shall be heavy-duty, electrical, submersible, centrifugal Non-clogging impeller units designed for handling influent wastewater flow.
   2. Major pump components shall be cast iron, ASTM A48, Class 35B, with smooth surfaces devoid of blow holes and other irregularities. All exposed nuts and bolts shall be of AISI Type 316 stainless steel. All surfaces coming into contact with water, other than stainless steel, shall be protected by an approved high quality epoxy coating.
   3. All mating surfaces where watertight sealing is required shall be machined and fitted with nitrile or viton rubber O-rings. Fittings shall be such that sealing is accomplished by metal-to-metal contact between machined surfaces. This will result in controlled compression of rubber O-rings without the requirement of a specific torque limit.
   4. Rectangular cross sectioned gaskets requiring specific torque limits to achieve compression shall not be considered as adequate or equal.

B. Motor:
   1. The pump motor shall be squirrel cage, induction, shell-type design, housed in an air-filled, watertight chamber. The stator windings shall be insulated with moisture resistant Class H insulation rated for 180° C. The stator shall be insulated by the trickle impregnation method using Class H monomer-free polyester resin resulting in a winding fill factor of 95%. The stator shall be heat-shrink fitted into the cast iron stator housing. The use of multiple step dip and bake-type stator insulation process is not acceptable. The motor shall be designed for continuous duty handling pumped media of 40° C capable of sustaining a minimum of 15 starts per hour with a minimum service factor of 1.15. See Section 11100, Motors for Motor Specifications.
   2. Thermal sensors shall be used to monitor stator temperatures. The stator shall be equipped with a minimum of three thermal switches embedded in the end coils of the stator winding (one switch in each stator phase). These shall be used in conjunction with and supplemental to external motor overload protection and wired to the control panel.
   3. Provide a leakage and over temperature protection system which shall consist of leakage and over temperature sensors at the motor and control module which shall be remotely located.
   4. Control module shall be compatible with motor sensors.
   5. Submersible pumps shall have explosion proof motors.

C. Cable Entry:
   1. The cable entry water seal design shall preclude specific torque requirements to insure a watertight submersible seal. The cable entry shall be comprised of a single cylindrical elastomer grommet, flanked by stainless steel washers, all

having a close tolerance fit against the cable outside diameter and the entry inside diameter. The cable entry junction chamber and motor shall be separated by a stator lead sealing gland or terminal board, which shall isolate the motor interior from foreign material gaining access through the pump top. Epoxies, silicones, or other secondary sealing systems shall not be considered acceptable.

D. Junction Chamber:
   1. The junction chamber, containing the terminal board, shall be sealed from the motor by elastomer compression seal (O-ring) and be field replaceable. Connection between the cable conductors and stator leads shall be made with threaded compressed type binding post permanently affixed to a terminal board and, thus, perfectly leak proof.

E. Shaft and Seals:
   1. Pump and motor shaft shall be the same unit. The pump shaft is an extension of the motor shaft. Couplings shall be acceptable. The pump shaft shall be completely isolated from the pumped liquid. The pump shafts for the pumps shall be of carbon steel ASTM A572, Grade 50, or Type 420 stainless steel.
   2. Each pump shall be provided with a tandem mechanical shaft seal system consisting of two totally independent seal assemblies. The seals shall operate in a lubricant reservoir that hydrodynamically lubricates the lapped seal faces at a constant rate. The lower, primary seal unit, located between the pump and the lubricant chamber, shall contain one stationary and one positively driven rotating Tungsten Carbide ring. The upper, secondary seal unit, located between the lubricant chamber and the motor housing, shall contain one stationary Tungsten Carbide seal ring and one positively driven rotating Tungsten Carbide seal ring.
   3. Each interface shall be held in contact by its own spring system. The seals shall require neither maintenance nor adjustment, but shall be easily inspected and replaceable. The following seal types shall not be considered acceptable (not equal to the dual independent seal specified): shaft seals without positively driven rotating members, or conventional double mechanical seals containing either a common single or double spring acting between the upper and lower units. Cartridge seals shall not be acceptable.
   4. Each pump shall be provided with an oil chamber for the shaft sealing system. The seal oil shall be FDA approved and non-toxic. Seal lubrication shall require an oil chamber capacity no greater than 16 pints. The drain and inspection plug, with positive anti-leak seal, shall be easily accessible from the outside.

F. Bearings:
   1. The pump shaft shall rotate on two-permanently lubricated bearings. Motor bearings shall be permanently greased lubricated. The upper bearing shall be a single roller bearing. The lower bearing shall be a two row angular contact bearing to compensate for axial thrust and radial forces. The bearings shall be rated for a 100,000 hours B-10 life.

FLYGT PUMPS STANDARD IMPELLER MATERIAL IS HARD IRON ASTM A-532 (ALLOY IIIA) 25% CHROME CAST IRON WHICH EXCEED THIS SPECIFICATION.

G. Impellers:
   1. Impellers shall be of gray cast iron, ASTM A48, Class 35B, dynamically balanced, double shrouded, non-clogging impeller having a long thrulet without acute turns. The impeller shall be capable of untreated surface water and fibrous materials. The fit between the impeller and the shaft shall be a sliding fit with one key.
   2. The volute shall be of a single piece, non-concentric design and shall have smooth fluid passages large enough at all points and capable of passing the diameter solids listed in the pump performance tables.

THE FLYGT PUMP SPECIFIED DOES NOT HAVE THIS TYPE OF WEAR RING SYSTEM

H. Wearing Rings:
   1. A wear ring system shall be installed to provide efficient volute and impeller. The wear ring system shall consist made of Type 420 stainless steel with a minimum Brinell 450 when tested in accordance with ASTM E10, encased in Nitrile rubber. The wear ring system shall be fitted to the volute inlet. Pumps shall also have a stainless steel impeller wear ring heat-shrink fitted onto the suction inlet of the impeller.

WE ARE PROVIDING 3" SCH 40, 316SS GUIDE RAIL

I. Guide System:
   1. Pumps shall use a guide bar system; guide cables are not acceptable. Guide bars, lifting cable, and guide rail supports shall be supplied by the pump manufacturer and be Type 316 stainless steel. The guide rail supports shall be placed at 8 foot maximum intervals, less as required to provide support. The system shall allow the pump to be automatically connected to the discharge connection when lowered into place and shall be easily removed for inspection or service. Sealing of the pumping unit to the discharge connection shall be accomplished by a linear downward motion of the pump to a metal-to-metal interface or to a profile gasket seal.
   2. The guide system shall include a pump lifting device. The pump lifting device shall slide along the guiderails without need for a downward force. The lifting device shall have a lifting eye which will accommodate a typical monorail or davit crane hook. The lifting device shall engage the pump lifting eye automatically upon contact. The lifting device shall accommodate pumps weighing up to 10,000 lbs. The lifting device will not increase pump height by more than 24 inches.

NOT SURE WHAT THE ENGINEER IS TALKING ABOUT HERE. SOUNDS LIKE FLYGT'S DEEP LIFT LIFTING SYSTEM, WE ARE PROVIDING 316SS LIFTING CHAIN AND SHACKLES.

J. Submersible Cable:
   1. Provide power and control cable from junction box to each pump suitable for submersible applications and indicate same by a code or legend permanently embossed on the cable.
   2. The instrument and power cables shall be submersible to the same water depth as the motor casing, type SPC with Chloroprene jacket, insulated for 90° C, non-wicking fillers, and at a length to suit surface junction box as indicated on the Drawings.

3. Size cable in accordance with applicable NEC requirements.
4. Cable shall be listed by a recognizable testing agency or laboratory.
5. Cable shall be covered in a protective PVC cover. PVC cable cover shall be ozone resistant. CONTRACTOR shall coordinate cable cover with the Odor

BY OTHERS

K. Controls:
1. Provide for control of the system in accordance with Section 17454, Control Descriptions. The CONTRACTOR shall be responsible for control panels as shown on the Drawings.

WE ARE PROVIDING ONE BASIC REPAIR KIT WHICH INCLUDES SEALS, BEARING AND O-RINGS

## 2.4 SPARE PARTS

A. Deliver one set for every furnished pump type and size needed to assemble and disassemble pump system.

B. Total spare parts to be supplied include the following:
1. ~~One set of wear rings.~~
2. One set of gaskets.
3. One set of bearings.
4. One set of mechanical seals.

WE ARE PROVIDING FLYGT'S STANDARD COATING SYSTEM

## 2.5 PUMP SHOP PAINTING

A. The manufacturer shall paint the pumps as follows:
1. CONTRACTOR shall provide finished coat per Section 09900, Painting. Final color selection shall be approved by ENGINEER prior to application.
2. Pumps, motors, drives, frames, baseplates, appurtenances, etc., shall receive shop primer and shop finish coating conforming to the requirements of Section 09900, Painting. If any damage to the paint system occurs, the equipment shall be repainted as directed by the ENGINEER.
3. Surface preparation and painting shall conform to the requirements of Section 09900, Painting.
4. All gears, bearing surfaces, machined surfaces and other surfaces which are to remain unpainted shall receive a heavy application of grease or other rust-resistant coating. This coating shall be maintained during storage and until the equipment is placed into operation.
5. Certify, in writing, that the shop primer and shop finish coating system conforms to the requirements of Section 09900, Painting.

BY CONTRACTOR

# PART 3 - EXECUTION

## 3.1 INSTALLATION

A. The pumps and accessories shall be installed in accordance with the manufacturer's recommendations.

B. Make adjustments required to place system in proper operating condition. Field test and calibrate the equipment to assure that the system operates in accordance with these Specifications and to the satisfaction of the ENGINEER.

C. After completion of installation, the system shall be completely tested to ensure compliance with the operating requirements as specified, indicated on the Drawings and in accordance with Section 01752, Equipment and System Startup and Performance Testing.

## 3.2 MANUFACTURERS' FIELD SERVICE

A. Equipment Start-up: A factory employed representative of the manufacturer shall visit the site and provide installation and start-up services as specified in Section 01650, Starting of Systems.

B. A factory-trained representative shall be provided for installation supervision, start-up and test services and operation and maintenance personnel training services. The representative shall make a minimum of 3 visits, minimum 8hours on-site for each visit, to the site. The first visit shall be for assistance in the installation of equipment. The second visit shall be for checking the completed installation and start-up of the system. The third visit shall be as described under Section 01821, Instruction of Operations and Maintenance Personnel. Manufacturer's representative shall test operate the system in the presence of the ENGINEER and verify that the pumps conform to requirements. Representative shall revisit the job site as often as necessary until all trouble is corrected and the installation is entirely satisfactory.

C. Training: A factory employed representative of the manufacturer shall visit the site and provide operator training services, in addition to equipment start-up services, as specified in Section 01650, Starting of Systems.

++ END OF SECTION ++

Footer information below states this is Nov 21 / 60% Submittal edition of Section 11320. The footer information is not correct: This is DRAFT 90% Submittal.

# SELF-CLEANING STRAINERS

See R.P. Adams Exceptions [EX] below:

## PART 1 - GENERAL

### 1.1 SUMMARY

A. CONTRACTOR shall provide all labor, materials, equipment, and incidentals as shown, specified, and required to furnish and install three in-line, automatic, self-cleaning strainers. The self-cleaning strainers shall remove solids from the process water prior to membrane filtration.

B. The CONTRACTOR shall have the responsibility to coordinate the installation of the equipment. Any revisions necessary shall be subject to the ENGINEER'S review and approval.

### 1.2 REFERENCES

A. The following is a list of standards which may be referenced in this Section:
1. American Institute of Steel Construction (AICS).
2. American Iron and Steel Institute (AISI).
3. American National Standard Institute (ANSI).
4. American Society of Civil Engineers (ASCE).
5. American Society of Mechanical Engineers (ASME).
6. American Society of Testing Materials (ASTM).
7. American Welding Society (AWS).
8. International Building Code (IBC).
9. International Electric Code (IEC).
10. Institute of Electrical and Electronics Engineers (IEEE).
11. National Electric Code (NEC).
12. National Electric Manufacturer's Association (NEMA).
13. Underwriters Laboratory (UL and cUL).

### 1.3 RELATED SECTIONS

A. Section 01300, Submittals.

B. Section 01640, Materials and Equipment.

C. Section 01650, Starting of Systems.

D. Section 11295, Hydraulic Valves

E. Division 16, Electrical.

F. Division 17, Instrumentation.

## 1.4 QUALITY ASSURANCE

A. Manufacturer's Qualifications:
   1. Manufacturer shall have a minimum of five years of experience in the production of substantially similar equipment and shall show evidence of satisfactory operation in at least five installations.
   2. All self-cleaning strainers shall be the product of one manufacturer.

B. Shop Tests:
   Strainer Tests:

   a. Hydrostatic test to 1-1/2 times the working pressure.

EX b. Test for pressure drop at maximum flow with clean media.

EX c. Each test shall be witnessed by a Registered Professional Engineer who may be an employee of the manufacturer. The Professional Engineer shall seal and sign all test reports. Engineer's State of registration, registration number and name on the seal shall be legible.

2. Motor Tests:

a. Perform a routine test on each motor at the manufacturer's factory. The test shall consist of: Running Light Current; Locked Rotor Current; Winding Resistance; High Potential; and Bearing Inspection.

1. Unit Responsibility: Assign Unit Responsibility as specified in Section 01600, General Equipment Provisions, to the manufacturer or supplier for the equipment specified in this Section. A Certificate of Unit Responsibility shall be provided.

## 1.5 SUBMITTALS

A. Descriptive Submittals shall be made in accordance with the Data Reference Symbols defined in Section 01300, Submittals.
   1. Strainer Shop Drawings:
      a. Letters of Certification of Compliance on materials, equipment, etc.
      b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
EX    c. Shop Detail Drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
      d. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in

normal operation, these components shall be included in the description of operation.

e. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
f. Materials of construction of all components.
g. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
h. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
i. Deviations from the Contract Documents.

2. Strainer O&M Manuals:
   a. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
   b. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
   c. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
   d. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
   e. Materials of construction of all components.
   f. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
   g. Stuffing box sizes; packing sizes; specifications and arrangement; and mechanical seal details, specifications, etc., if furnished in equipment.
   h. Test reports, maintenance data and schedules, description of operation, and spare parts information.
   i. Furnish Operation and Maintenance Manuals in conformance with the requirements of Section 01300, Submittals.

B. Field Test Results:
   1. Submit a written report giving the results of the field tests required.

C. Lubricant Specification: Furnish a lubricant specification for the type and grade necessary to meet the requirements of the equipment.

D. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified

paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

E. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## 1.6 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Factory assemble and test self-cleaning strainer system at point of manufacturer.

B. Manufacturer shall fabricate and deliver materials to the job site in conformance with the CONTRACTOR'S construction schedule to minimize handling and on-site storage of equipment.

C. Store materials to permit easy access for inspection and identification.

D. Store all mechanical equipment in covered storage off the ground and prevent condensation.

# PART 2 - PRODUCTS

## 2.1 MANUFACTURERS

A. The strainers shall be as manufactured by one of the following (Manufacturers listed in alphabetical order):
   1. Amiad Water Systems
   2. R.P. Adams
   3. S.P. Kinney
   4. Or, Approved Equal.
   5. The naming of a manufacturer in this Specification is not an indication that the manufacturer's standard equipment is acceptable in lieu of the specified component features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

## 2.2 DESIGN CRITERIA

A. Self-Cleaning Strainer
   1. Number of Self-Cleaning Strainers: 3 (2 duty, 1 standby)
   2. Flow Rate, per Strainer: 5 MGD
   3. Working Pressure, Minimum: 18 psi
   4. Design Pressure, Maximum: 150 psi
   5. Desired Solid Removal: 500 microns
   6. Inlet/Outlet Diameter: 16 inches

B. Self-Cleaning Strainer Motor: As specified in Section 16225, Electric Motors 250 Horsepower or Less, except as otherwise specified or supplemented below:
   1. Motor Power Supply: 480 volts, 3 phase, 60 hertz.
   2. Motor Horsepower, Minimum: 0.5.
   3. Motor Speed, Maximum: 1,800 rpm.
   4. Motor Enclosure: TEFC.
   5. Motor Service Factor: 1.15 at altitude.

## 2.3 MATERIALS

A. Strainer Unit
   1. Body and drum assembly shall be carbon steel or cast iron.
   2. Strainer unit shall be an automatic, self-cleaning type.
   3. Openings in the straining element shall be 500 micrometers.
   4. Straining element shall be perforated or punched hole stainless steel. Wedge wire shall not be accepted.
   5. Strainer element shall be 316L stainless steel.
   6. Inlet and outlet flange connections shall be 16 inches in diameter with drilling to conform to 150 lb ANSI.
   7. Strainer unit shall have a maximum operating pressure of 150 psi and a minimum design water temperature of 20°C.

B. Backwash Mechanism
   1. Strainer unit shall be equipped with a backwash mechanism that facilitates backwashing of the strainer element surface while maintaining forward flow through the strainer unit.
   2. Backwash system of the strainer unit shall include a hydraulic valve in order to control the backwash waste discharge containing the suspended solids removed from the straining element during backwash.
   3. Backwashing: Strainer shall operate under a positive pipeline pressure on the discharge side or downstream from the pump. Pipeline pressure and water shall efficiently backwash strainer media. A valve on the backwash discharge pipe shall control pressure drop and amount of water wasted in backflushing.
   4. Backwashing: Strainer shall operate under suction condition on the intake or upstream side of the pump. Backwash water from ~~pump~~ discharge shall be piped

assist pump

drain

and valved to the ~~strainer~~. Backwash water discharge pipe shall also be valved to maintain the required pressure drop and flow across the filter media.

C. Backwash Assist Pump

1. Motors:

a. Motors shall conform to the requirements of Section 11000, Electric Motors.

EX

b. Motors shall be a totally enclosed fan cooled motor ~~with Class H~~ insulation, with a maximum speed of 3,450 rpm.

c. Motors shall be suitable for operation on 480 volt, 3 phase, 60 Hz power.

d. Motors shall be of adequate size so that there is no overload on the motor above rated manufacturer's nameplate horsepower under normal conditions of service, but not more than 15 horsepower.

e. Motors shall have a 1.15 service factor, and shall comply with the latest ANSI, NEMA, and IEEE Standards as a minimum.

f. Locked rotor current shall be as specified in NEMA standards.

g. Motors thrust bearings shall be adequate to carry continuous thrust loads under all conditions of service, and shall have a minimum B-10 life of 100,000 hours.

h. Motors shall have a stainless steel manufacturer's nameplate which shall provide the following: type, frame, insulation, class, HP, full load current, RPM, centigrade degree rise, manufacturer's name and serial number model, voltage, locked rotor KVA code, bearing numbers and a connection diagram.

i. Motor terminal boxes shall be oversized to provide adequate space for connections and shall be constructed of cast iron or fabricated steel, neoprene gasketed and bolted. The motor leads shall be permanently marked in agreement with the connection diagram.

D. Inspection Port

1. An inspection port shall be provided in the side of the strainer unit to permit visual inspection and maintenance of the strainer element and to allow for removal of any oversize solids which may have entered into the strainer unit.
2. The cover plate of the inspection port shall be easily removable.

E. Anchor Bolts

1. Anchor bolts shall conform to the requirements of Section 05051, Anchor Bolts, Toggle Bolts and Concrete Inserts.

F. Strainer Motor

EX

1. Motor shall be TEFC premium efficiency, ~~Class H insulation.~~
2. See Section 16225, Electric Motors 250 Horsepower or Less, for motor specifications.

G. Instrumentation

1. Provide the following field instrumentation components in accordance with the requirements of Division 17.
    a. Differential Pressure Switch
        1) A differential pressure switch shall be factory connected to the filter inlet and outlet piping to initiate the backwash cycle whenever a differential pressure across the filter exceeds a preset value.
    b. Timers (integrated into the PLC)
        1) Backwash initiation timer
        2) Backwash duration timer
    c. Pressure Gauges

H. Control System
1. Provide control panels, instruments, and instrumentation and control components in accordance with Division 16 and 17.
2. Control system shall be provided for the functionality described in Specification Section 17454.

I. Identification
1. Identify each self-cleaning strainer with a stainless steel manufacturer's nameplate stamped with the approved designation as shown in Section 1800, Equipment Schedule.

J. Spare Parts
1. Procedures: See Section 01750, Spare Parts and Maintenance Materials.
2. Provide a "standard" spare parts list, including prices for all replaceable parts associated with the self-cleaning strainers, including the following at a minimum:
    a. One spare set of expendable material such as gaskets, seals, and packing.
    b. Two sets of new and unused special tools required for installation, operation, and maintenance.
    c. ~~One strainer screen repair kit for each self-cleaning strainer~~ Repair kit is NA. Supply spare set of tubes? EX
    d. Reagents/chemicals, calibration sets, and spare parts as specified for individual equipment items or instruments.
    e. Spare parts for instruments, PLC hardware and control devices as specified in Divisions 16 and 17.
3. Provide recommendations for spare parts and materials for the first 12 months of facility specific system operation.

## 2.4 SHOP PRIMING AND FINISHING

A. Prepare and shop paint surfaces as specified in Sections 09900, Painting.

## PART 3 - EXECUTION

### 3.1 INSTALLATION

A. Install self-cleaning strainers in accordance with the manufacturer's recommended methods.

### 3.2 FIELD TESTS

A. After CONTRACTOR and ENGINEER have mutually agreed that the equipment installation is complete and ready for continuous operation, CONTRACTOR and a qualified field service representative of the manufacturer shall conduct a functional field test and a leakage test of each strainer in the presence of ENGINEER to demonstrate that each strainer furnished will function correctly and that maximum permissible leakage is not exceeded.
   1. Functional Tests:
      a. Each strainer with appurtenances shall be field tested. Tests shall demonstrate to ENGINEER that each part and all parts together function in the manner intended. All necessary testing equipment and manpower shall be provided by CONTRACTOR at his expense. OWNER will furnish all power, and incidental material and labor required for the tests.
   2. In the event that the manufacturer is unable to demonstrate to ENGINEER that his equipment meets the requirements of the tests, the deficient equipment will be rejected and CONTRACTOR shall adjust and/or modify and retest the equipment as often as necessary to meet the specified requirements. No separate payments shall be made for adjustments and/or modifications.

### 3.3 MANUFACTURER'S FIELD SERVICE

A. Equipment Start-up: A factory employed representative of the manufacturer shall visit the site and provide installation and start-up services as specified in Section 01650, Starting of Systems.

Training: A factory employed and trained representative of the manufacturer shall visit the site and provide operator training services, in addition to equipment start-up services, as specified in Section 01650, Starting of Systems. A minimum of one day of training will be required.

A factory-trained representative shall be provided for installation supervision, start-up and test services and operation and maintenance personnel training services. The representative shall make a minimum of 3 visits, minimum 8 hours on-site for each visit, to the site. The first visit shall be for assistance in the installation of equipment. The second visit shall be for checking the completed installation and start-up of the system. The third visit shall be as described under Section 01821, Instruction of Operations and Maintenance Personnel. Manufacturer's representative shall test operate the system in the presence of the ENGINEER and verify that the equipment conforms to the requirements.

Representative shall revisit the job site as often as necessary until all deficiencies have been corrected and the installation is entirely satisfactory.

B. All costs, including travel, lodging, meals, and incidentals, shall be considered as included in the CONTRACTOR'S lump sum bid price.

++ END OF SECTION ++

SECTION 11715

CHEMICAL METERING PUMPS AND APPURTENANCES

## PART 1 - GENERAL

### 1.1 SUMMARY

A. Furnish and install chemical metering pumps and appurtenances. The chemical metering pumps and appurtenances shall be located at the MFS Chemical Facility, the ACH Facility and the Modified Bulk Sodium Hypochlorite Facility as shown on the Drawings and as specified herein for the conveyance of Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), Aluminum chlorohydrate (ACH – 40%) to the following systems:
   1. Self-Cleaning Strainers.
   2. Membrane Facility.

### 1.2 SECTION INCLUDES

A. Chemical metering pumps.

B. Pulsation dampeners.

C. Degassing valve.

D. Pressure relief valve.

E. Pressure gauges/diaphragm seals.

F. Diaphragm valves.

G. Wye strainers.

H. PVC spray hose.

Not Included. I. Pre-cast polymer concrete trench.

J. Flexible couplings.

Not Included. K. Dry disconnect coupling.

L. Control panel.

M. Pipe Supports.

## 1.3 RELATED SECTIONS

A. Section 01300, Submittals.

B. Section 01640, Materials and Equipment.

C. Division 13, Special Construction.

D. Section 15065, Thermoplastic Pipe and Accessories.

E. Division 16, Electrical.

## 1.4 REFERENCE STANDARDS

A. Comply with applicable provisions and recommendations of the following, except as otherwise shown or specified:
   1. Standards of National Electrical Manufacturer's Association.
   2. Recommendations of the Chlorine Institute, Inc.
   3. Occupational Safety and Health Act.
   4. Joint Industrial Council.
   5. Instrument Society of America.
   6. American Water Works Association.
   7. National Fire Protection Association.

Parts only.

## 1.5 WARRANTY

A. The manufacturer shall warrant the units being supplied to the OWNER against defects in workmanship and material for a period of one year under normal use, operation, and service. The warranty shall cover parts and labor and shall be in printed form and apply to all similar units.

B. Any service require for the actuator that fall within the parameter of the warranty conditions shall be provided by the manufacturer or its certified representative to provide the service required.

## 1.6 SUBMITTALS

A. The CONTRACTOR shall provide descriptive submittals in accordance with the Data Reference Symbols defined in Section 01300, Submittals. CONTRACTOR shall submit all equipments and appurtenances specified for in this Section as follows:
   1. Metering Pumps: Shop Drawings:
      a. Letters of Certification of Compliance on materials, equipment, etc.
      b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.

c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
d. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
e. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
f. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.
g. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
h. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
i. Certified head and capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.
j. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
k. Materials of construction of all components.

2. Pulsation Dampeners, Valves, Pressure Gauges, Wye Strainer, PVC Spray Hose, Flexible Couplings, and Dry Disconnect Coupling: Shop Drawings:
   a. Letters of Certification of Compliance on materials, equipment, etc.
   b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
   c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.
   d. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
   e. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
   f. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
   g. Materials of construction of all components.
3. Control Panel: Shop Drawings:
   a. Refer to Division 13, Special Construction, and Division 16, Electrical.

B. Submit Drawings showing fabrication, dimensions, capacity, weight, materials of construction, electrical diagrams and bill of materials, including manufacturers, and installation piping.

C. Submit pump data and performance curves showing efficiency, NPSH, flow, pressure, horsepower, and shut-off head.

D. Submit documentation that the manufacturer has produced, supplied and placed into satisfactory service, equipment similar to that specified herein.

E. No equipment shall be shipped until the Shop Drawings are approved by the ENGINEER.

F. Submit complete Installation, Operation, and Maintenance Manuals, including copies of all approved Shop Drawings.

G. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

H. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## PART 2 - PRODUCTS

### 2.1 CHEMICAL METERING PUMPS

A. Chemical Metering Pumps:

1. Positive displacement, diaphragm type chemical metering pumps shall be provided to deliver 40% aluminum chlorohydrate solution to the self-cleaning strainers, 12.5% sodium hypochlorite, 50% citric acid, 50% Sulfuric Acid, 38% sodium bisulfite, 50% sodium hydroxide, solution to the CIP system at the membrane facility, and 12.5% sodium hypochlorite solution to the membrane permeate pipe at the membrane facility. Chemical metering pumps shall be capable of 24 hour per day operation. Discharge pressure shall be sufficient to feed the chemicals from the chemical facility at a specified rate to meet the design criteria.

B. Operating Conditions:
   1. Each pump shall have a maximum capacity as follows:

| Chemical | Chemical Concentration (%) | Location/Facility | Maximum Capacity (gph) |
|---|---|---|---|
| ACH | 40 | ACH Facility | 5.00 |
| Sodium Hypochlorite | 12.5 | MFS Chemical Facility | 744.00 |
| Citric Acid | 50 | MFS Chemical Facility | 576.00 |
| Sulfuric Acid | 50 | MFS Chemical Facility | 45.60 |
| Sodium Bisulfite | 38 | MFS Chemical Facility | 82.20 |
| Sodium Hydroxide | 50 | MFS Chemical Facility | 208.20 |
| Sodium Hypochlorite | 12.5 | Modified Bulk Sodium Hypochlorite Facility | 14.00 |

C. Pump Construction:
   1. A steel and nodular iron non-loss-motion stroke adjust mechanism, driven by a direct coupled variable speed DC motor, shall actuate a flat, Teflon faced composite diaphragm. Solenoid-driven pumps, lost-motion mechanically actuated diaphragm pumps and hydraulically actuated diaphragm pumps will not be accepted. The liquid ends shall provide for easy maintenance and integral sight flow indication via clear PVC cartridge-type check valves. Conventional threaded valves and external sight flow indicators will not be allowed.

Not all valves are clear.

D. Drive:
   1. A steel and nodular iron non-loss-motion stroke adjust mechanism shall be housed in a corrosion resistance, epoxy painted, cast iron gearbox. All drive bearings shall be tapered rollers; all fasteners shall be oil-bath lubricated. Stroke

length shall be controlled manually via a 10-turn micrometer-type adjuster. A percent scale and vernier shall indicate stroke length in 0.25% increments. Each revolution of the knob shall indicate stroke length by 10%.

E. Liquid End:

1. The process diaphragm shall be of Hypalon construction. It shall incorporate convolutions, for unconstrained rolling action and a steel backing plate for volumetric accuracy. An O-ring groove in the head's diaphragm cavity will provide for a complete leak-free seal. Positive flow shall be ensured via cartridge-type check valves. The valve retainers shall be clear CPVC for integral sight flow indication. They shall allow a compression seal to the pump head and pipe connections via O-rings. Valve service or removal shall not require any disturbances to the pump head pipeworks. A secondary diaphragm shall be completely sealed to separate the pump head from the drive unit in order to eliminate any risk of cross-contaminating gearbox lubricant and process fluid.

Diaphragm is TFE-faced elastomer, not pure Hypalon.

F. Control:

1. Each pump shall automatically shut off if a low level is sensed in the appropriate chemical tanks.

G. Manufacturer:

H. Acceptable Manufacturers:

1. UGSI Chemical Feed, Inc,
2. Or approved equal.
3. The naming of a manufacturer in this Specification is not an indication that the manufacturer's standard equipment is acceptable in lieu of the specified component features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

## 2.2 PULSATION DAMPENERS

A. Schedule:

1. Chemical: Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%).
2. Minimum Volume: 90 cubic inches per pulsation dampener.
3. Bladder Material: Hypalon.

B. Materials of Construction:

1. Wetted Parts: PVC.
2. Hardware: Stainless steel.
3. Air Fittings: Brass.
4. Each unit shall be equipped with charging valve and 0-160 psig gas pad pressure gauge and integral piping fittings.
5. Provide a nitrogen gas bottle and cart for use in charging pulsation dampeners.

C. Features:
   1. Pulsation damper required on the discharge piping.
   2. Pulsation damper shall be single diaphragm, bladder design. Diaphragm shall be constructed of hypalon.

D. Manufacturer:
   1. Pulsation dampener shall be supplied by Primary Fluid Systems, Inc. or approved equal.

## 2.3 DEGASSING VALVE

A. General:
   1. The automatic degassing valve is designed to vent gases that cause vapor lock in metering pumps. Degassing valves shall be designed for applications using Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%)..

B. Materials of Construction:
   1. Valve Body: CPVC.
   2. Seal: Viton.
   3. Top and Bottom Connection: 1/2-inch NPT.

C. Manufacturer:
   1. Degassing valve shall be supplied by Primary Fluid Systems, Inc. or approved equal.

## 2.4 PRESSURE RELIEF VALVES

A. General:
   1. The pump discharge line shall include an external diaphragm type pressure relief valve to protect piping systems from over-pressures, as shown on the Drawings.

B. Materials of Construction:
   1. Valve Body: Type IV, Grade 1, CPVC.
   2. Seals: Teflon.
   3. Diaphragm: Teflon; suitable for Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%).

C. Features:
   1. Valve pressure setting shall be factory set and field adjustable without disconnecting the valve from the line.
   2. Size: As shown on the Drawings.
   3. Capacity: Equal to or greater than pumping head capacity at set pressure.
   4. Set pressure: 50 psi.

D. Manufacturer:
   1. Pressure relief valves shall be supplied by Primary Fluid Systems, Inc. or approved equal.

## 2.5 PRESSURE GAUGES

A. General:
   1. Pressure gauges shall be selected so that the normal operating pressure falls between 50% and 80% of full scale. The face shall be 4-1/2-inches in diameter, 270 degree movement, 1% accuracy, full-scale, and suitable for bottom stem mounting.
   2. Gauges shall have a Type 316 stainless steel bourdon tube, 300 Series stainless steel case, Type 316 stainless steel socket, shatterproof glass, and 1/4-inch bottom connection.
   3. Gauges shall be a premium grade, heavy-duty bourdon-tube unit with pulsation dampening system. Snubbers or orifices shall not be utilized. Gauges shall be Ashcroft General Service Gauge, Type 1009, or approved equal. Gauges shall have diaphragm seals with 1/2-inch process connection, Titanium housing, and Titanium diaphragm. The fill fluid shall be silicone. Diaphragm seal shall be Ashcroft Type 101 or approved equal.

## 2.6 DIAPHRAGM VALVES

A. Valves for 2-inch Diameter or Less Pipe:
   1. Diaphragm valves shall be true union design, socket connection, CPVC body with Teflon diaphragm and seals. Type 304 stainless steel shall be used for exposed metal hardware. Valves shall have Teflon sandwiched gas barrier diaphragm to prevent chlorine gas leakage. All shall be suitable hardware for Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%)..
   2. Diaphragm valves shall be of the size as shown on the Drawings. Valves shall be Type 14, as manufactured by Asahi/America, Inc., or approved equal.

B. Valves for Greater Than 2-inch Diameter Pipe:
   1. Diaphragm valves shall be flanged design, CPVC body with Teflon diaphragm and seals. Type 304 stainless steel shall be used for exposed metal hardware. Valves shall have Teflon sandwiched gas barrier diaphragm to prevent chlorine gas leakage. All shall be suitable hardware for Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%).
   2. Diaphragm valves shall be of the size as shown on the Drawings. CONTRACTOR shall provide the necessary flange connections to the

connection piping for a complete valve installation. Valves shall be Type G as manufactured by Asahi/America, or approved equal.

## 2.7 WYE STRAINER

A. General:
   1. The pump suction lines shall include a strainer, as shown on the Drawings. The wye strainer shall prevent dirt and debris in the chemical entering the pump.

B. Materials of Construction
   1. Strainer Body: Class 23447 per ASTM D1784, CPVC.
   2. Strainer: 1/16-inch perforated plastic, suitable for Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%).

C. Manufacturer:
   1. Wye strainer shall be supplied by Hayward Industrial Products, Inc. or approved equal.

Not Included.

## 2.8 PRE-CAST POLYMER CONCRETE TRENCH

A. General:
   1. The material covered by these Specifications shall be furnished by a reputable and qualified manufacturer of proven ability who has regularly engaged in the manufacture and installation of pre-cast polymer concrete trench. Manufacturer of the polymer concrete trench shall have a minimum five years of experience with Projects similar in scope to this Project.
   2. Pre-cast polymer concrete trench manufacturer shall be experienced in successfully producing polymer drainage fabrications similar to those indicated in the Drawings, with sufficient production capacity to produce required units without causing delay in the Work.
   3. Pre-cast polymer concrete trench and grating shall be designed to withstand Loading Class C per DIN 19580.
   4. Pre-cast polymer concrete trench shall have a neutral slope with minimum 4-inch depth. Grating shall not include any perforations or slots to allow water to mitigate through.

B. Materials of Construction:
   1. Trench: Pre-cast polymer concrete utilizing vinyl ester resin.
   2. Grating: Ductile iron with solid surface.

C. Features:
   1. Grating shall be attached to the trench utilizing stainless steel lock down bolts and bars.
   2. Provide grating sections in lengths to match trench sections.

3. Top of each channel, which meets with the grating surface, shall include a stainless steel backing plate extending over the top of the trench to prevent chipping.
4. Provide end caps and transition pieces for female to female connections and male to male connections for a complete installation.

D. Manufacturer:
1. Strongwell, Lenoir City, TN.
2. ACO Polymer Products, Chardon, OH.
3. Approved equal.

## 2.9 CPVC PIPING

A. General: For CPVC Piping: Refer to Section 15065, Thermoplastic Pipe and Accessories.

## 2.10 FLEXIBLE COUPLINGS

A. General:
1. All chemical piping shall include a flexible coupling as recommended by pipe manufacture.
2. All flexible couplings shall be UV protected for outdoor applications.
3. All flexible couplings shall come complete with flange connections and joint restraints approved by the ENGINEER.
4. All flexible couplings shall be resistant to Sodium hypochlorite (NaOCl – 12.5%), Citric acid (50%), Sulfuric Acid ($H_2SO_4$ – 50%), Sodium bisulfite ($NaHSO_3$ – 38%), Sodium hydroxide (NaOH – 50%), and Aluminum chlorohydrate (ACH – 40%).

B. Manufacturer:
1. Flexible coupling shall be Proco Series 443B or approved equal.

Not Included.

## 2.11 TANK FILL - DRY DISCONNECT COUPLING

A. General:
1. The tank fill line shall include a dry disconnect coupling, as shown on the Drawings. The dry disconnect coupling shall prevent any excess chemical from leaking due tank filling operations.
2. Provide dust cap of the same material as the disconnect coupling.

B. Materials of Construction:
1. Body: Hastalloy C.

C. Manufacturer:
1. Dry disconnect coupling shall be the Kamvalok model as manufactured by OPW, Cincinnati, OH or approved equal.

## 2.12 CONTROL PANEL

A. General:
   1. Furnish an air conditioned NEMA 4X stainless steel control panel for the metering pumps. The control panel shall be supplied as shown on P&IDs and as specified in Division 13, Special Construction. Control panel shall be mounted on a unistrut rack, elevated outside the secondary containment area.

## 2.13 PIPE SUPPORTS

A. General:
   1. Supports and racks for use on all electrical conduit and chemical solution piping within the MFS Chemical Facility, the ACH Facility and the Modified Bulk Sodium Hypochlorite Facility, shall be Type 316 stainless steel. The pipe supports shall include all strut channels, fittings, bolts, nuts, washers, and anchors as shown on the Drawings.

# PART 3 - EXECUTION

## 3.1 INSTALLATION/START-UP TESTING

A. All system equipment shall be installed per manufacturer specifications and approved Shop Drawings.

B. All equipment shall be operationally-tested by the CONTRACTOR at the job site following installation of the equipment, controls, valves, and piping. Should the tests indicate any malfunction, the CONTRACTOR shall make all necessary repairs and/or adjustments. Tests and adjustments shall be repeated until, in the opinion of the ENGINEER, the installation is complete and the equipment is functioning properly and accurately, and is ready for permanent, continuous operation.

## 3.2 MANUFACTURER'S FIELD SERVICE

Field service is not included in this budget price. It is offered as a per diem add-on price.

A. A factory trained representative of the chemical metering pumps shall be provided for installation supervision, start-up and test services, and operation and maintenance personnel training services. The factory representatives shall make a minimum of one visit to the site (minimum of eight hours). The visit shall be for assistance in the installation of the equipment, checking the completed installation, start-up of the system, and training of the operators.

B. All costs, including travel, lodging, meals, and incidentals, shall be considered as included in the CONTRACTOR'S lump sum bid price.

++ END OF SECTION ++

SECTION 13446

= Complies with Specification

FLOOR SCALE AND INSTRUMENTS

= Deviation (explain deviation and why)

## PART 1 - GENERAL

### 1.1 SUMMARY

A. Section includes:
   1. Weight instruments used to measure weight of chemical tote bins on concrete pad.
   2. Mounting hardware for indicators and load cells.

B. National Electrical Manufacturers Association (NEMA):
   1. 250 - Enclosures for Electrical Equipment (1000 V Maximum).

### 1.2 REFERENCES

A. National Institute of Standards and Technology (NIST):
   1. Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices.

### 1.3 DEFINITIONS

A. NEMA:
   1. Type 4X enclosure in accordance with NEMA 250.

### 1.4 SUBMITTALS

A. Submit for approval the following:
   1. Product data:
      a. Manufacturer.
      b. Model Number.
      c. Materials
      d. Rated capacity and rated conditions.
      e. Accuracy.
   2. Shop drawings: Include the following:
      a. Dimensioned Drawings certified for construction,
      b. Foundation and support requirements and anchor bolt setting plans,
      c. Installation instructions.
      d. Connection diagram,
      e. Loop diagram,
   3. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks

(✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

4. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## 1.5 QUALITY ASSURANCE

A. Test reports:
   1. Factory test report and certificate.

B. Certificates:
   1. Certified calibration data meeting NIST Handbook 44, as applicable to commercial weighing.
   2. National Type Evaluation Program Certificate of Conformance.

C. Manufacturer's instructions:
   1. Include manufacturer's instructions of installation including mounting details, description of system operation, start-up data and troubleshooting check lists.

D. Operations and maintenance data:
   1. Include manufacturer's literature; cleaning procedures, replacement part lists, wiring diagrams, and repair data.
   2. Include a list of all configurable parameters, and the final values for each.
   3. List of recommended spare parts.
   4. List of special tools necessary for proper operation and/or maintenance.
   5. Exploded view drawings that illustrate all assemblies, sub-assemblies, and components.
   6. Routine test procedures for all electronic and electrical circuits.
   7. Troubleshooting chart covering the complete valve and controls/electrical power systems, showing description of trouble, probable cause, and suggested remedy.

8. Certified factory and field-test results.

E. Manufacturer qualifications: Manufacturer has minimum of 5 years of successful operation of similar scales in similar installations.

## 1.6 WARRANTY

A. The scale manufacturer shall warrant the units being supplied to the OWNER against defecting in workmanship and material for a period of two years after installation under normal use, operation, and service. The warranty shall cover parts and labor and shall be in printed form and apply to all similar units.

# PART 2 - PRODUCTS

## 2.1 INTEGRATED SYSTEM OF WEIGHT SCALE. PLATFORM, AND LOAD CELL

A. Manufacturers
   1. Acceptable manufacturers:
      a. Mettler-Toledo.
      b. Or Approved Equal.

B. General Provisions
   1. Provide 1 electronic floor scale systems for the purpose of monitoring chemical solution consumption from a tote bin.
   2. Each scale shall have an overall platform size of 59 inches wide by 59 inches long by not more than 9 inches tall and shall have a gross weighing capacity of 5,000 pounds.
   3. The scale should be constructed for use in a washdown environment and shall have components suited for that environment.
   4. The scale platform and subframe assembly shall be constructed of Type 316 stainless steel or steel with Tuffcoat system.

C. Load Cells
   1. Load cells shall have the following individual characteristics:
      a. Temperature stable, rolling diaphragm type, allows 4-degree tilt of load plate without affecting scale accuracy.
      b. Rated capacity: 5,000 pounds.
      c. Temperature compensation: -10 to +40 degrees Celsius.
      d. Maximum loads:
         1) Safe: 150 percent of rated capacity.
         2) Ultimate overload: 300 percent of rated capacity.
         3) Safe side: 100 percent of rated capacity.
      e. Gauge cavity seal type: Welded hermetic gauge cover.
   2. Load cells to be constructed of 17-4 ph stainless steel and shall have a welded hermetic gauge cover over the gauge and wiring cavities.

3. Each load cell to have an integral conduit fitting on the cable entrance into the load cell for enhanced moisture protection.
4. Each load cell to have a data plate affixed to the load cell which clearly shows:
    a. Manufacturer.
    b. Capacity.
    c. Part number.
    d. Serial number.
    e. National Type Evaluation Program certificate of performance number.
    f. Class number.
    g. Maximum divisions (NMax).
    h. Load cell Vmin.

D. Floor Scale Platform
1. Scale shall have an unobstructed weighing surface, use of side rails or other similar designs is not acceptable.
2. Each scale shall have provisions for lifting the entire floor scale for periodic inspection and maintenance.
    a. The scale manufacturer shall provide a minimum of 2 threaded through hole lifting points in the floor scale for this purpose.
    b. The scale manufacturer shall also provide threaded steel plugs for each of these holes to protect the lifting points during non-use.
3. A removable access plate shall be provided in the top of the floor surface to provide access to the load cell summing junction box.
4. Scale suspension shall be of a rocker foot style design to allow ease of movement and installation. The PFD779 design
5. Load foot assembly shall be stainless steel and be threaded to allow for adjustment to compensate for uneven floor conditions.
6. A level bubble shall be provided, visible from the top of floor.

E. Junction Box.
1. 1. Scale shall have a junction box assembly mounted internally within the floor scale platform.
    a. Access to the junction box assembly shall be accomplished via removable plate in the top of the scale platform.
    b. Remote mounted, or side access junction box assemblies are not acceptable.
2. Junction box enclosure shall be constructed of Type 316 stainless steel and shall be designed to NEMA 4X standards.
3. The junction box enclosure shall have wash down duty connectors, 1 for each load cell cable, and 1 additional connector for the instrument cable.
    a. Multiple cables using single box connectors is not acceptable.
4. The junction box shall contain a printed circuit board for the purpose of individual load cell wiring termination, summing of the output signals from each load cell, trimming/balancing the load cell signals, and wiring the interface to the digital instrument.

5. The printed circuit board shall have individual connectors for each of the load cells, and the instrument interface cable.
    a. Each wire shall have a single terminal connection. Doubling up or ganging of wires to one terminal is not acceptable.
6. The summing printed circuit board shall have potentiometers, one per load cell for the electrical trimming/balancing of the load cell signals during calibration.

F. Digital display console located near the scale with integral power supply for the load cell, integral 4 to 20 milliampere transmitter with output signal proportional to the weight, and relay output (120 V, 10 amp or better rated contact) for low level alarm that will be used as an interlock to shut down the feed equipment.
1. Temperature range: 10 to 125 degrees Fahrenheit.
2. Adjustable low weight alarm relay with dry contacts for remote alarm monitoring.
3. Equipped with automatic tare.
4. Enclosure: NEMA 4X, stainless steel.
5. Power supply: 120 volts alternating current.
6. Weight indicating display.
7. Provides Type 316 stainless steel instrument column.

## PART 3 - EXECUTION

### 3.1 INSTALLATION

A. Install in accordance with manufacturer's recommendations.

B. Provide field service by the scale manufacturer who shall perform final calibration and certify the scale to an accuracy of, or better than, that required by NIST, Handbook 44, as applicable to commercial weighing.

END OF SECTION

CST Check To Spec with Deviations As Required.

# ✓ SECTION 13127

# ✓ EXTRUDED FLAT PANEL COVERS

## ✓ PART 1 - GENERAL

### ✓ 1.1 SUMMARY

✓ A. Furnish all labor, materials, and equipment required to design, fabricate, deliver, and install a new extruded flat aluminum cover structure with all appurtenances required for a complete and operational installation.

✓ 1. Membrane Trains 1 thru 4.

✓ 2. Membrane Facility Common Inlet Channel.

✓ 3. CIP Tank.

✗ B. The enclosure shall be a flat cover structure conforming to the dimensions indicated on the Drawings, a rectangle aluminum structure with ~~stainless steel structure~~ members.

Acceptance to: Aluminm Structural Memebers

✗ C. All metal components of the aluminum structure shall be aluminum with ~~cold-formed stainless steel~~. No galvanized, painted, or plated steel shall be used.

Acceptance to: Aluminm Structural Memebers

✓ D. The structure shall be designed as a substantially airtight system under all design load and temperature conditions. All raw edges of the aluminum panels shall be covered and sealed.

✓ E. The cover manufacturer must coordinate with the membrane equipment supplier for design of the covers, design of supporting structural members, and coordination of cover cutouts to accommodate membrane equipment system piping. The membrane basin aluminum cover design must be fully integrated with the membrane equipment system design.

✓ F. The cover manufacturer shall provide ~~4~~ access hatches each for each Membrane Train. Coordinate pipe support attachments and penetrations as shown in the Drawings.

Acceptance: Appurtenaces per drawings [type and QTY]:

### ✓ 1.2 RELATED SECTIONS

✓ A. Drawings and General Provisions of the Contract, including General Supplementary Conditions apply to this Section.

✓ B. Section 01300, Submittals.

Acceptance: Only as applicable to CST and the cover system.

✓ C. Section 01640, Materials and Equipment.

Acceptance: Only as applicable to CST and the cover system.

✓ D. Section 01650, Starting of Systems.

Acceptance: Only as applicable to CST and the cover system.

✓ E. Section 09900, Painting.
Acceptance: Only as applicable to CST and the cover system.

✓ F. Division 13, Special Construction.
Acceptance: Only as applicable to CST and the cover system.

✓ G. Division 15, Mechanical.
Acceptance: Only as applicable to CST and the cover system.

✓ H. Division 16, Electrical.
Acceptance: Only as applicable to CST and the cover system.

## ✓ 1.3 REFERENCES

✓ A. Aluminum Association Specifications for Aluminum Structures.

✓ B. Aluminum Association Aluminum Design Manual, Specification, and Guidelines for Aluminum Structures.

✓ C. ASCE 8-90, Specification for the Design of Cold-Formed Stainless Steel Structural Members.

✓ D. ASTM C864-90, Standard Specifications for Performed Gasket and Sealing Material.

✓ E. ASTM F593, Standard Specification for Stainless Steel Bolts, Hex Cap Screws, and Studs.

## ✓ 1.4 SUBMITTALS

✓ A. Drawings describing the completed structure and all its components shall be submitted, complete with materials of construction and typical details. Drawings shall be sealed and signed by a qualified Professional Engineer registered in the State of Arizona.

✓ B. Records certifying the satisfactory inspection of all structural welds of aluminum components shall be submitted prior to delivery of all fabricated materials.

✓ C. Design calculations verifying conformance to deflection limits shall be submitted. Deflection calculations are required for structural members as well as walking surfaces.

✓ D. Descriptive and Operation and Maintenance Data submittals shall be made in accordance with the Data Reference Symbols defined in Section 01300, Submittals.

✓ 1. Covers: Shop Drawings and O&M Manuals:

✓ a. Letters of Certification of Compliance on materials, equipment, etc.

✓ b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.

✓ c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.

✓ d. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
✓ e. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
✓ f. Materials of construction of all components.

✓E. All equipment manufactures shall submit evidence of conformance with the Specifications as required by the individual Specifications Sections. Naming of a manufacturer in the Specifications is not an indication that the manufacturer's proposed or standard equipment is acceptable in lieu of the specified components and features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

✓F. Before executing any of the Work in this Section prints or Drawings shall be submitted to the ENGINEER showing dimensions, sizes, thickness, gauges, materials, finishes, joint attachments, erection procedure, and thermal expansion allowances.

✓G. A complete set of design calculations for the covers shall be submitted. These calculations shall be signed by a Registered Professional Engineer. All Work shall be fabricated and erected in accordance with the approved Drawings.

✓H. Certification that the specified material alloys, sizes, and quantities have been furnished shall be submitted upon completion of the Project.

✓ I. Unit responsibility form not required for extruded flat panel covers.

✓J. Shop Drawings: Submit for approval the following:
✓ 1. Include the following:
✓ a. Dimensions, sizes, thicknesses, gauges, materials, finishes.
✓ b. Attachment and erection procedures.
✓ c. Number and location of penetrations.
✓ d. Penetration details.
✓ e. Access hatch locations.
✓ f. Special details not specifically indicated on the Drawings.
✓ 2. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The

remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## ✓ PART 2 - PRODUCTS

### ✓ 2.1 DESCRIPTION

✗ A. The flat cover shall be clear-span and self-supporting from the peripheral structure. The aluminum cover shall be composed of panels and beams. All panels shall interlock with the adjoining beam and panels without the use of threaded fasteners. Uplift of each panel will be resisted with the use of an integral latch system. The use of structural members in contact with the contents of the basin is expressly prohibited. The flat cover shall consist of removable panels each weighing no more than ~~275~~ pounds, and other covers not to exceed 150 pounds, unless otherwise indicated on Drawings. The required lifting force per panel shall not exceed the dead weight of the panel. Each panel must be able to be removed without needing to remove more than the two adjacent panels. The need for removing flashing or "hold-down" extrusions longer than the width of the panel is prohibited. The flat cover shall have an integral aggressively non-skid surface. Raised surfaces without the use of texturing to achieve slip resistant is not acceptable. The use of checkered plate, paint, tape, sandblasting, or other applied systems to achieve the slip resistant surface is expressly prohibited.

Accptance to no more than 500lbs and other covers not to exceed 150lbs

✓ B. The design shall prevent water pooling which may result in over-stressing the flat cover.

✓ C. Cover manufacturer shall provide access hatches, gravity vents, and pipe penetrations as shown on the Drawings.

✓ D. The removable closure panels shall be attached continuously along their edges to the structural members using an interlocking joint. Elastomeric weather seal gasket shall form a substantially airtight seal along the panel edges. The gaskets shall be fully enclosed to prevent ultraviolet exposure.

✓ E. Access to any location under the cover shall be gained through integral gear hinged access hatches. The Access Hatch Panels shall have the identical properties as the rest of the aluminum cover including loads, deflection and slip

resistance specifications. The hinged access panels shall be the full panel width. The length of the access panel shall be clearly indicated on drawings. Hinged panel components including hinges, decking and lifting handles shall be extruded 6061-T6. While in the closed position the hatches will be completely flush therefore posing no tripping hazard. In the open position the panel shall lie flat on the cover and will not need a hold open device.

✓ F. The cover system shall be mounted on aluminum angle attached to the inside face of the concrete to match existing aluminum cover systems in appearance and functionality. No portion of the cover system shall be mounted to the top surface of the concrete wall. The aluminum angle shall be mounted at an elevation that provides a zero transition between the cover system and the top of concrete.

## ✓ 2.2 MATERIALS

✓ A. The following is a summary of approved materials and/or material specifications. All aluminum alloys shall be defined by the Aluminum Association and published in the Aluminum Standards and Data:

✓ 1. Bolts and Fasteners: All bolts and fasteners shall be 316 stainless steel.

✓ 2. Structural Shapes: Aluminum structural shapes shall be alloy 6061-T6, 6005A-T6, or 6063-T6 minimum 0.10 inch thick. Load supporting surfaces shall be of sufficient thickness to meet or exceed all loading requirements specified in this Section.

✗ 3. Aluminum extrusions: 6061-T6 alloy, mill-finished. Acceptance: 6061-T6, and 6063-T6

✓ 4. Closure-flashing-to-panel seals: 3/8-inch Hypalon, Santoprene, or Neoprene gaskets.

✓ 5. Closure flashing anchors and hardware: Type 316 stainless steel, 3/8-inch diameter.

✓ 6. Access hatch door and frame materials: Same as for cover panels.

✓ 7. Access hatch hinges, handles, prop rods, and latches: Aluminum.

8. Handrail: Removable, aluminum, able to prevent accidental entry into hatch opening.

✓ 9. Miscellaneous Shapes: Miscellaneous aluminum shapes shall be alloy 6061-T6, 6005A-T6, or 6063-T6.

✓ 10. Gaskets: All gaskets shall be Neoprene conforming to ASTM C864-90, resistant to ozone and shielded from exposure to ultraviolet light.

✓ 11. Sealant: All sealants shall be resistant to ozone and ultraviolet light and conform with Federal Specification TT-S-00230C.

✓ 12. Anchors shall be epoxy-type. Expansion-type anchors are not permitted.

✓ 13. Nameplates, manufacturer's name, or other identifications: Maximum 6 inches by 6 inches in size.

✓ 14. Cover configuration: Free-standing, flat, 1-piece, interlocking, supported at each end only, without intermediate supports, removable, arranged as indicated on the Drawings, with flat, planar surface exposed and welded reinforcing ribs and stiffeners facing downward toward water surface.

15. Covers components: Standard and specially reinforced panels, able to safely sustain specified loads without permanent deformation or evidence of failure.
16. Joints between panels: Horizontal tongue and groove type.
17. Access hatches:
    a. 1. Reinforcement: Aluminum structural members able to prevent bowing, warping, or other distortions.
    b. Doors: Able to be lifted and locked open by 1 person.
    c. Mounting: Curb mounted and flashed.
    d. Curbs: Minimum 3/16-inch thick with welded corners.
    e. Door seal: Gasket against curb.
18. Penetration reinforcement: Minimum 1/4-inch thick aluminum stiffeners, able to prevent bowing, sagging, warping, or other distortions.
19. Penetration flashing and sealant: Manufacturer's standard, able to prevent intrusion of air and allow for removal of covers with minimum disassembly of equipment, piping, or duct.
20. Pressure and vacuum relief: No additional measures required. Pressure and vacuum relief is provided by gravity ventilators and goose-neck vents, downstream of membrane trains, with the air space between membrane trains.
21. Panel top surface: Non-slip, manufactured as part of panels or applied to surfaces

## 2.3 EXPERIENCE

A. No equipment shall be supplied by any manufacturer not regularly engaged in the manufacturing and production of flat covers in the size and character herein specified. The manufacturer must have designed, manufactured and installed at least one roof of the same type and of similar size as units specified herein. This roof must be in satisfactory use for a period not less than five years.

## 2.4 DESIGN LOADS

A. The entire flat cover shall be designed to sustain the loads specified herein, within the stress limitations of the Aluminum Association Specifications for Aluminum Structures.

B. The load cases to be considered shall be those described below, unless more severe loads are specified by the purchaser.
   1. Dead Load: The dead load shall be defined as the weight of the structure and all material permanently attached to and supported by the structure.
   2. Live Load: 40 pounds per square foot live load plus dead load.
   3. Wind Load: The wind load shall be obtained by ASCE 7-98.
   4. Resistance to wind uplift.
   5. Vacuum/Pressure Load: 1-inch water column vacuum.
   6. Panel Design Load: In addition to the above mentioned loads, the aluminum panels shall be designed for a concentrated single load of 500 pounds on any

single panel area equal to 4 square feet. These loads are to be taken as acting separately from one another and not simultaneously with the other design loads.

✓ 7. MBR Basin cover design as indicated on the drawings is as follows:
- ✓ a. Dead load.
- ✓ b. 2. Live load.
  - ✓ 1) Live load case 1: 100 psf downward.
  - ✓ 2) Live load case 2: 65 psf upward due to seismic sloshing.
  - ✗ 3) Load case 3: 40 psf downward over entire cover plus ~~700~~ pound downward concentrated load over a 1-foot square area. Acceptance: 400lbs
- ✓ c. Unbalanced live load: Live loads patterned in a way to create maximum shear, moments, and deflections.

✓ 8. Membrane cassette load: Aluminum cover panel designed to support loading from one fully wet weight of GE/Zenon 500D membrane cassette, 4 point loads at 2500 pounds each.

✓ 9. Load Combinations: The loads described above shall be applied to the flat cover in the following combinations:
- a. Dead load + live load case 1 + vacuum load.
- b. Dead load + live load case 2.
- c. Dead load + live load case 3 + vacuum load.
- d. Dead load + unbalanced live load + vacuum load.
- e. Dead load + membrane cassette load.

✓ 10. Deflections: For the above loads and load combinations, the deflection of all components (structural and cladding) shall not exceed L/240 with L equal to the short span of the component. This deflection limit applies not only to the flat cover as a whole, but also to the skin of the cover spanning between the supporting edges of each panel or module. Calculations stamped by a Registered Professional Engineer shall be provided at the time of submittal to ensure that this requirement has been met.

✓ 11. Temperature: The load combinations listed above shall be considered for a temperature change of 100° F below the installation temperature and 100° F above the installation temperature and for a material temperature range of 40° F below zero to 160° F above zero.

✓ 12. Seismic criteria:
- a. American Society of Civil Engineers (ASCE):
  - 1) 7-10 - Minimum Design Loads for Buildings and Other Structures.

✓ 13. Wind load:
- a. International Code Council (ICC)
- b. American Society of Civil Engineers (ASCE)
  - 1) 7-10 - Minimum Design Loads for Buildings and Other Structures.

## ✓ 2.5 CONNECTIONS

✓ A. In no case shall a joint be designed to sustain a greater total resultant shear force than that which would be allowed by summing the allowable shear force of the individual fasteners, based on their net cross-section areas through the shear plane

and the allowable shear stress of the material. The use of manufacturers' test data to rationalize an increase in assumed fastener strengths is prohibited. In no case shall values greater than those published by the Aluminum Association and ASTM F593 for aluminum and stainless steel fasteners, respectively, be used. The allowable stresses are as follows:

| Fastener Material | Allowable Shear Stress |
|---|---|
| Series 316 Stainless Steel | 20% of Minimum Tensile Strength as published in ASTM F593 |
| 6061-T6 Aluminum | 11 ksi |
| 7075-T73 Aluminum | 18 ksi |

## 2.6 MANUFACTURERS

A. Acceptable Manufacturer:
   1. CST covers
   2. Or approved equal.

# PART 3 - EXECUTION

## 3.1 INSTALLATION

A. All Work shall be executed by skilled mechanics with a supervisor experience in the erection of flat covers. The flat cover shall be erected plumb and level and in proper alignment.

B. Field refabrication of structural components or panels will not be accepted. Forcing of the structure to achieve fit-up during construction is expressly forbidden and not acceptable.

C. All sealant joints shall be tooled slightly concave after sealant is installed. Care shall be taken to keep sealant confined to joint area, and any outside of the joint shall be moved so that the panels will be free from misplaced sealant. All gasket materials shall be continuous; splices will not be allowed between right angles.

## 3.2 WARRANTY

A. The flat cover manufacturer shall warrant that the work described herein shall be free from defects (workmanship and material). The flat cover manufacturer shall replace or repair only faulty workmanship or defective material furnished by it that is reported to it within one year from the date of completion of this scope of Work.

SECTION 13207

FIBERGLASS REINFORCED PLASTIC ABOVE GROUND STORAGE TANKS

## PART 1 - GENERAL

### 1.1 SUMMARY

A. New Installation:
   1. Furnish all labor, materials, tools, equipment, appurtenances, and services to install the following FRP tanks:
      a. MFS Chemical Facility:
         1) One 3,200 gallon (8 feet diameter by 10 feet high) 12.5% Sodium Hypochlorite Tank.
      b. Membrane Filtration Facility:
         1) One 4,500 gallon (Approximately 9 feet diameter by 12 feet high) MFS Backpulse Storage Tank.

### 1.2 SECTION INCLUDES

A. FRP above ground storage tanks.

### 1.3 RELATED SECTIONS

A. Section 01300, Submittals.

B. Section 09900, Painting.

C. Section 10400, Equipment Identification Plates.

D. Section 11715, Chemical Metering Pumps and Appurtenances

### 1.4 REFERENCES

A. ASTM D3299, Specification for Filament Wound Glass Fiber Reinforced Thermoset Resin Chemical Resistant Tanks.

B. ASTM D2563, Level II.

C. Code of Federal Regulations, Title 29, Chapter XVII, Part 1910 – Occupational Safety and Health Standards.

### 1.5 QUALITY ASSURANCE

A. Manufacturer's Qualifications:

1. The material covered by these Specifications shall be furnished by a reputable and qualified manufacturer of proven ability who has regularly engaged in the manufacture and installation of FRP tanks.
2. Substitution of any component or modification of system shall be made only when approved by the OWNER.
3. FRP tank manufacturer shall be experienced in successfully producing FRP fabrications similar to those indicated in the Drawings, with sufficient production capacity to produce required units without causing delay in the Work.

## 1.6 WARRANTY

A. The manufacturer shall warrant the units being supplied to the OWNER against defects in workmanship and material for a period of one year under normal use, operation, and service. The warranty shall cover parts and labor and shall be in printed form and apply to all similar units.

B. Any services required for the tank that fall within the parameter of the warranty conditions shall be provided by the manufacturer or its certified representative to provide the service required.

## 1.7 SUBMITTALS

A. Shop Drawings: Submit for approval the following:
1. Letters of Certification of Compliance on materials, equipment, etc.
2. Final Certified Drawings showing outline dimensions, foundation layout, or mounting information, and other pertinent dimensions.
3. Assembly drawings and/or diagrams, detailed reference drawing lists, and lists of erection details.
4. Shop Detail Drawings showing individual sub-assemblies and fabricated pieces with material specifications and other applicable data.
5. Installation instructions, operating and/or service manuals, and all other data pertinent to operating or servicing the complete apparatus. Preventative maintenance instructions and recommended frequency.
6. Schematic and wiring diagrams of power, control, and piping systems. A detailed description of operation shall be included for each diagram to describe all modes of operation of the system indicated. Where the integrated system requires interlocking and control of other components in normal operation, these components shall be included in the description of operation.
7. General bulletins and product literature describing complete apparatus including operating principles and fundamentals.
8. Service data sheets showing design performance, utility requirements, etc., as applicable to the specific duty for which the equipment is furnished.
9. Head capacity curves for pumps. Impeller size furnished and maximum size available shall be noted on these data sheets.

*Pumps not included.

10. Curves and/or data for overall range of operation from minimum to maximum capacity or load, showing capacity or load, utilities motive medium required, total or incremental differential head, and other pertinent information applicable to the equipment or its component assemblies.
11. Materials of construction of all components.
12. Renewal parts list with diagrammatic or cross-section drawings showing part identification. Material analysis or trades designation for each significant part is to be noted on parts lists or on a separate sheet.
13. Mechanical seal details, specifications, etc., bearing manufacturer's standard identification and/or interchangeable number for all anti-friction bearings in the equipment proper and its accessory items.

*Pumps not included.

* B. Shop Tests: Submit for approval:
    1. Pump casings shall be hydrostatically tested to twice the discharge head or 1-1/2 times the shutoff head, whichever is greater.
    2. Running Test: Pump assembly shall be operated from zero to maximum capacity as shown on the approved curve. Results of the test shall be shown in a plot of test curves showing head, flow, horsepower, efficiency, and current. Readings shall be taken at rated speed capacity points including shut-off, design point, and minimum head for which pump is designed to operate.
    3. Each test shall be witnessed by the Factory Registered Engineer, who is an employee of the pump manufacturer. Engineer shall sign and seal all copies of curves and shall certify that hydrostatic tests were performed. Tests shall be conducted in conformance with applicable Hydraulic Institute Standards.
    4. Pumps shall not be shipped until the ENGINEER has approved the test reports.

*Field test by others.

* C. Field Test Results:
    1. Submit a written report giving the results of the required field tests.

✓ D. Manufacturer's Reports:
    1. Submit written report of the results of each visit by a manufacturer's serviceman, including purpose and time of visit, tasks performed, and results obtained.

✓ E. Operation and Maintenance Manuals: Submit complete Operation and Maintenance Manuals, including field erection instructions, in conformance with the Operation and Maintenance Manuals Section of Section 01300, Submittals.

✓ F. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons

for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

G. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## PART 2 - PRODUCTS

### 2.1 MANUFACTURERS

A. Acceptable Manufacturers:
1. Palmer of Texas, Andrews, TX.
2. Paramount.
3. Diamond Fiberglass, Victoria, TX.
4. Approved equal.

### 2.2 MATERIALS

A. The design, fabrication, erection, and testing of the tank shall be in strict accordance with ASTM D3299, Specification for Filament Wound Glass Fiber Reinforced Thermoset Resin Chemical Resistant Tanks, except as modified herein. The CONTRACTOR must obtain the ENGINEER'S approval for all deviations, exceptions, and substitutions to this Specification and ASTM D3299, including those which are specifically permitted subject to approval of purchaser.

B. Materials:
1. MFS Chemical Facility:
   a. Sodium hypochlorite (NaOCL) FRP tank materials shall have a Ashland Hetron 992 resin for the corrosion resistant barrier and filament winding, a double Nexus lining, and a BPO-DMA cure, unless otherwise specified on the tank drawings.
2. Membrane Filtration Facility:
   a. Backpulse FRP tank material shall be fabricated utilizing premium grade isophthalic polyester resin with a one “C” or synthetic veil, such as single Nexus 1012, in the 100 mil inner corrosion liner and premium grade

isophthalic polyester resin in the outer structural overwrap. In addition, the vessel is to receive an exterior gelcoat finish with ultraviolet inhibitors. All coatings to be applied by FRP tank manufacturer.

b. Resin shall be Premium grade vinyl ester resin as recommended by the resin manufacturer for the specific operating environment. Add antimony trioxide or pentoxide for Class I fire rating to the structural laminate only. No thixotropic agents shall be used. Manufacturers: One of the following or equal:
   1) Derakane.
   2) Ashland Hetron.
   3) Interplastic.
   4) Reichhold Dion.

3. Materials used in the manufacture shall be new stock of the best quality and shall be free from all defects and imperfections that might affect the performance of the finished product.
4. All materials shall be of the kind and quality specified and where the quality is not specified, it shall be the best of the respective kinds and suitable for the purpose intended.

## 2.3 MANUFACTURED UNITS

A. Fabrication:

1. MFS Chemical Facility:
   a. The FRP resin and cure system shall be suitable for continuous exposure to 12.5% sodium hypochlorite solution, 20% sodium hydroxide solution, and their reaction products.
   b. Tank shell thickness shall be calculated based on liquid levels (both operating and test conditions) at the top of the tank shell.
2. Membrane Filtration Facility:
   a. The FRP resin and cure system shall be suitable for continuous exposure to 12.5% sodium hypochlorite solution
   b. Tank shell thickness shall be calculated based on a 1.0 specific gravity fluid and on liquid levels (both operating and test conditions) at the top of the tank shell.
3. FRP tanks shall be fabricated using a four-layer laminate construction process or better.
4. After fabrication, all cut ends, holes, and abrasions of FRP shapes shall be sealed with a compatible resin coating to prevent intrusion of moisture.
5. All exposed surfaces shall be smooth and true to form.
6. Equipment shall be furnished with nameplates of stainless steel. Pertinent design, hydraulic, and mechanical data will be permanently stamped or cast into each nameplate, and shall include manufacturer and model number.
7. All exterior FRP surfaces shall have a pigmented resin for UV protection; color shall be Tnemec Desert Sands or approved equal.
8. Visual defects shall be in accordance with ASTM D2563, Level II.

B. Delivery, Storage, and Handling:

1. All systems, sub-systems, and structures shall be shop-fabricated and assembled into the largest practical size, suitable for transporting.
2. All materials and equipment necessary for the installation of the FRP tanks and appurtenances shall be stored before, during, and after shipment in a manner to prevent cracking, twisting, bending, breaking, or damage of any kind to the materials or equipment, including damage due to over exposure to the sun. Any material, which in the opinion of the ENGINEER, has become damaged as to be unfit for use, shall be promptly removed from the site of Work and the CONTRACTOR shall receive no compensation for the damaged material or its removal.
3. Identify and match-mark all materials, items, and fabrications for installation and field assembly.

## 2.4 COMPONENTS

A. Chemical and Backpulse Storage Tanks:

1. Design Criteria
   a. Wind Load Design: 100 mph.
   b. Live Load Design: 200 lbs per square foot.
   c. Ambient Temperature: 35° F minimum and 125° F maximum.
   d. Top Tank: Flat top.
2. Provide a vertical, cylindrical, flat top, flat bottom fiberglass storage tank.
3. MFS Chemical Facility and Membrane Filtration Facility :
   a. Provide two 24-inched hinged manways with bolted cover. One will be located on the top and the other on the side at the bottom of the tank or as shown on the Drawings.
4. Provide flanged connections for tank pipe connections, vents, etc., as shown on the Drawings. Connections shall be constructed of the same material as the tank wall with the same inner corrosion barrier. Flanged connections, as shown on the Drawings, shall be gusseted to the tank wall with 1/4-inch thick conical gussets.
5. Provide integrally molded lifting and anchoring lugs as required for lifting, transporting, and anchoring the tank without structural damage to the tank.
6. Only Type 316 stainless steel hardware shall be provided for mounting, anchoring, and connecting.
7. Provide vent for each tank, as shown on the Drawings.
8. Provide complete tank drain fittings below bottom elevation of the tank. This is to ensure total removal of liquid and any solids inside the tank. Location shall be as shown on the Drawings.

B. Internals and Accessories:

1. The CONTRACTOR shall require the tank vendor to furnish and install all internals and accessories as noted on individual tank drawings and/or as specified herein.

2. Fittings, flanged nozzles, and manways shall be of hand layup flange and FRP pipe construction. Nozzle flanges shall be of ANSI 150# style.
3. MFS Chemical Facility:

*Sight glass and valves are not included.

* a. For tanks indicated on the Drawings, the tank vendor shall furnish for CONTRACTOR installation of a clear PVC sight glass and necessary piping calibrated in gallons with diaphragm valves to be located on the bottom sight glass fitting, to shut-off the sight glass, and below the sight glass for sight glass drainage. Diaphragm valves are as specified in Section 11715, Chemical Metering Pumps and Appurtenances.
   b. Gaskets and external bolting shall be furnished for all manholes, hand-holes, and other openings which call for a blind flange or cover. Provide EPDM for testing and servicing of all tanks except sodium hypochlorite tanks. Sodium hypochlorite tanks will be provided with EPDM gaskets for testing and viton gaskets for service. At least four sets of gaskets shall be furnished; two sets for testing and two sets unused with proper protection and identification.
   c. Ladders of fiberglass reinforced plastic construction shall be provided at locations shown on tank drawings and shall include non-skid surfaces with a roof turn and be in compliance with the Code of Federal Regulations, Title 29, Chapter XVII, Part 1910 - Occupational Safety and Health Standards
4. Membrane Filtration System Facility:
   a. Gaskets and external bolting shall be furnished for all manholes, hand-holes, and other openings which call for a blind flange or cover. Provide EPDM gaskets for testing and servicing of all tanks. At least four sets of gaskets shall be furnished; two sets for testing and two sets unused with proper protection and identification.

*Ladder and handrail shall be FRP.

* b. Ladders of Type 316 stainless steel construction shall be provided at locations shown on tank drawings and shall include non-skid surfaces with a roof turn and be in compliance with the Code of Federal Regulations, Title 29, Chapter XVII, Part 1910 - Occupational Safety and Health Standards.
5. MFS Chemical Facility and Membrane Filtration System Facility:
   a. Safety railing shall be provided around the perimeter of the top of the tank. Safety railing shall be in compliance with the Code of Federal Regulations, Title 29, Chapter XVII, Part 1926 – Occupational Safety and Health Standards.
6. All steel components shall be coated in accordance with Section 09900, Painting, of these Specifications.
7. Each tank shall have a chemical identification sign and a hazardous materials identification diamond sign labeled in accordance with NFPA 704 and Section 10400, Equipment Identification Plates.

*By others.

* C. Chemical Solutions:
   1. MFS Chemical Facility:

a. The CONTRACTOR shall supply 3,200 gallons of 12.5% sodium hypochlorite solution for use in testing and start-up. After such testing is completed the CONTRACTOR shall fill the tanks before closing the Contract.

2. Membrane Filtration System Facility:

a. The CONTRACTOR shall supply 6,000 gallons of potable water for use in testing and start-up. After such testing is completed the CONTRACTOR shall fill the tanks before closing the Contract.

2.5 SPARE PARTS

A. Complete set of spare parts shall be provided for each tank as recommended by the manufacturer. A list of spare parts shall be provided with the Shop Drawings.

2.6 SHOP PAINTINGS

*Field painting, if required, is by others.

A. The CONTRACTOR shall certify, in writing, that the shop primer and coating system is compatible with the finish coating system in accordance with the Section 09900, Painting.

PART 3 - EXECUTION

*By others.

.1 INSTALLATION

A. Prior to the start of erection, tank vendor shall inspect each tank foundation for levelness, and formally notify the CONTRACTOR of the acceptance or rejection of it.

B. Provide chemical resistant anchorage devices and fasteners as specified by the tank manufacturer for securing the tank and appurtenances to the foundation and connecting accessories to tank; include threaded fasteners for concrete expansion anchors, through-bolts, and other connectors as required.

C. All field cut and drilled edges, holes, and abrasions shall be sealed with a catalyzed resin compatible with the original resin as recommended by the manufacturer. The sealing of edges shall prevent pre-mature fraying at the cut edges.

D. Install items specified as indicated and in accordance with manufacturer's instructions.

3.2 TOLERANCES

A. Tank fabrication, erection, and foundation tolerances shall be in accordance with ASTM D3299.

B. Tank nozzles (excluding manways) shall be installed within the following tolerances:

1. Projection from Outside of Tank Shell to Extreme Face of Flange: 3/16-inch.
2. Flange Bolt Hole Orientation: ±1/16-inch.

C. Tank manholes shall be installed within the following tolerances:
1. Projection from Outside of Tank Shell to Extreme Face of Flange: 1/2-inch.
2. Flange Tilt in Any Plane, Measured Across the Flange Diameter: 1/2-inch.

## 3.3 INSPECTIONS AND TESTS

A. Thoroughly broom sweep or wash clean inside of each tank.

*Field cleaning and testing is by others.

B. Testing: Tanks shall be tested in accordance with ASTM D3299. Any tank showing evidence of leakage during test must be emptied immediately. The source of leakage must be determined and the defect repaired prior to refilling.

C. Retain, label and submit cut-out samples of all FRP vessels to the ENGINEER for assessment of properties and laminate construction.

Bid Date: March 25, 2022
Project No:

Project: CHANDLER RWIF
Location: 955 East Queen Creek Road
City: Chandler, Az

We are pleased to submit the following cost estimate:

***Pricing Good Through 09/30/2023 (See Standard Provisions)***

| QUANTITY | UNIT | DESCRIPTION | PRICE / UNIT | TOTAL |
|---|---|---|---|---|
| 100 | TON | 3" - 6" PINK CORAL RIP RAP DELIVERED IN END DUMPS | $ 44.00 | $ 4,400.00 |
| 100 | TON | 4" - 8" YAVAPAI CORAL RIP RAP DELIVERED IN END DUMPS | $ 44.00 | $ 4,400.00 |
| | HR | BELLY DUMP TRUCK RENTAL (THRU 12/31/2022) | $ 130.00 | $ |
| | HR | SUPER TRUCK RENTAL (THRU 12/31/2022) | $ 135.00 | $ |
| | | | $ | $ |

***Standard Provisions***

***SUFFICIENT QUANTIIES PER DELIVERY TO INSURE 4 HOUR MINIMUM PER TRUCK***

*Prices do not include weekend, holiday, off hour, or overtime shipments.*
*Additional charges may apply if any of these conditions occur. Unless otherwise noted dirt prices exclude permits, loading, dust control and sweeping.*
*ALL PRICES ASSUME THAT BUESING CORP'S STANDARD INSURANCE IS ACCEPTABLE*
Payment due on or before the 25th day of the month for work completed or materials delivered in the month prior. No retention withheld.

***ALL PRICING WILL BE HONORED THROUGH THE DATE SPECIFIED ABOVE PROVIDED THAT WE RECEIVE A P.O., P.A., OR LETTER OF INTENT WITHIN 29 DAYS. If JOB AWARD IS LONGER THAN 29 DAYS PLEASE NOTIFY US WITHIN THE 29 DAYS, AND WE WILL NEGOTIATE WITH MATERIAL SUPPLIERS TO ALLOW THE PRICE TO BE HONORED***

***Special Provisions***

**HOURLY TRUCK RENTAL REQUIRES A 4 HOUR MINIMUM PER TRUCK PER SHIFT, PLUS 1/2 HOUR TRAVEL PER TRUCK PER SHIFT.**

If These Terms And Conditions Are Acceptable Please Sign This Form And Fax It Back To The Number Below

ACCEPTANCE OF PROPOSAL

The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified, provided there is an understanding between parties that the prime and / or subcontractor must receive an official award. If an official award, contract or subcontract is not consummated this proposal shall become null and void.

**Subject:** Re: Chandler RWIF - 90% GMP - Aggregate/Trucking

Reed - I can only quote super 16's @ $115.00 per hour. That is a demo truck with a 21tn/12yrd capacity.

Hope this helps.

| Haul & Dump – Asphalt (JS) | $160.00 + $75.00 dump fee. | 75 LD |
| Haul & Dump – Pipe (JS)<br><br>"For concrete pipe" | $160.00 + $75.00 dump fee. | 6 LD |
| Haul & Dump – Concrete fee. (JS) | $160.00 + $75.00 dump | 11 LD |
| Haul & Dump – Debris Per ton dump fee. (WBC) No way to estimate time in/out. | $115.00 per hour + $46.75 | 12 LD |
| Haul & Dump – Spoils (SRMG) | $170.00 + $35.00 dump fee. | 312 LD |

All per load quotes, must be loaded out of a stockpile, with a production size loader. (NO WAIT) Otherwise hourly at $115.00 per hour, + dump fees.

All quotes are on an as available basis.

Unfortunately we can not give good through dates at this time. Suppliers all over town, have stopped honoring written quotes

and pricing has been changing overnight without notice. Another factor is fuel.. We, like everyone, experienced an unbelievable increase in fuel pricing, in what seemed like overnight.

Feel free to call me with any questions or concerns.

Any given quote could change without prior notice.

Fuel surcharge of 2% will be added to above quote, if fuel goes up $.020 per gallon

from the date give.

All aggregate quotes are 100 ton minimum unless otherwise specified.

Quotes do not reflect nights or weekend work, resulting in an additional

$10.00 per hour, plus dump fees/materials. 4 hour minimum on all trucks ordered. In the event a supplier of a quoted job runs out of material,

Matt Brown Trucking will not be liable and additional cost will be passed on to the receiving Contractor, "if an alternative source is required"

Best Regards,

Frank.

Matt Brown Trucking Inc.

## Terms, Conditions & Specifications

1. Customer agrees to abide by the terms and conditions on the purchase or rental contract.

2. Quantities are estimates and system is designed with information supplied by the customer. Any additional requirements will incur additional charges.

3. Customer responsible for all permits, traffic control, road crossings, etc.

4. Customer responsible for all FUEL & PM SERVICE during pump rentals.

5. Pump rate is based on **8 hour day, 48 hour week, 192 hour 4 week.**

6. Overtime Charges, if applicable, are Computed: (Monthly Rate / 192) X .5 = O/T Charge Per Hour

7. Labor rate is for normal working hours. Weekend or nighttime will incur additional charges.

8. Rental begins when equipment leaves CPE branch. Pumping systems are on rent during installation.

9. If Water Bridges are rented, they are placed under customer's direction. Customer accepts sole responsibility for placement, ongoing maintenance, and suitability for use in each specific traffic location.

## Charges and Fees

Arizona Materials accepts no responsiblity for any damage to curb and beyond curb line. It will be Buyers reponsibility to contact Arizona Materials Quality Control Department with any concrete issue/concerns within 48 hours after placement. Buyer is responsible to provide safe access to point of delivery. All materials are produced in conformance with ACI / ASTM standards. Mixes quoted below, unless otherwise stated, conform to no specific water cement ratio, minimum sack content, shrinkage, temperature requirement, or the plans and specifications of this project.
All colored concrete loads have a 3 yard minimum.
Arizona Materials cannot guarantee compressive strengths of 5000 PSI or below for loads less than 3 yards.
5000 PSI or above must be 5 yards or more to quarantee compressive strength.

Payment is due and payable on or before the 15th day of the month following to receive 2% discount. Account must be current in full to be eligible to apply discount. A service charge not to exceed the maximum allowed by law applies on unpaid invoice amounts beginning the 1st day of the month following due date and daily thereafter until paid in full. Should litigation be commenced to enforce payment, the prevailing party is entitled to reimbursement of reasonable attorney fees and court costs.

Buyer has 30 days to validate quote with P.O. , signing issued quote, or written verification.

RE: Chandler Reclaimed Water Interconnect Facility Paint and Coatings

We propose to complete the following work as described below;

**ITEM #** 1 **:** Raw water pump station perimeter wall painting.
Item # 1 Amount ..... $11,895.00

**ITEM #** 2 **:** Raw water pump station gates painting.
Item # 2 Amount ..... $2,240.00

**ITEM #** 3 **:** Raw water pump station above ground piping painting.
Item # 3 Amount ..... $30,673.00

**ITEM #** 4 **:** Raw water pump station wet well piping painting.
Item # 4 Amount ..... $18,312.00

**ITEM #** 5 **:** Raw water pump station electrical canopy structure and decking.
Item # 5 Amount ..... $9,266.00

**ITEM #** 6 **:** Raw water pump station electrical equipment painting.
Item # 6 Amount ..... $8,400.00

**ITEM #** 7 **:** Membrane facility basins (4) and CIP tank coating. Sherwin Williams system, Steel seam FT910, Macropoxy 5000 and Poly-Cote 115. Recommended alternate Item #27
Item # 7 Amount ..... $888,000.00

**ITEM #** 8 **:** Membrane facility Canopy structure and decking painting.
Item # 8 Amount ..... $54,584.00

**ITEM #** 9 **:** Membrane facility above ground piping painting.
Item # 9 Amount ..... $52,580.00

**ITEM #** 10 **:** Membrane facility pumps painting.
Item # 10 Amount ..... $6,000.00

**ITEM #** 11 **:** Membrane facility bridge Crain rails painting.
Item # 11 Amount ..... $6,840.00

**ITEM #** 12 **:** Self cleaning strainers above ground piping and strainers painting.
Item # 12 Amount ..... $35,424.00

**ITEM #** 13 **:** Self cleaning strainers canopy structure and decking painting.
Item # 13 Amount ..... $20,820.00

**ITEM #** 14 : AWRF modified chlorine contact piping painting.
Item # 14 Amount ..... $5,040.00

**ITEM #** 15 : Blower building roll up door and man door painting.
Item # 15 Amount ..... $1,450.00

**ITEM #** 16 : Blower building fire piping painting.
Item # 16 Amount ..... $13,104.00

**ITEM #** 17 : MFS chemical facility sodium hypochlorite piping painting.
Item # 17 Amount ..... $9,840.00

**ITEM #** 18 : CIP chemical facility piping painting.
Item # 18 Amount ..... $25,088.00

**ITEM #** 19 : Chemical facility canopy structure and decking painting.
Item # 19 Amount ..... $41,067.00

**ITEM #** 20 : ACH facility above ground piping painting.
Item # 20 Amount ..... $5,704.00

**ITEM #** 21 : ACH facility canopy structure and decking painting.
Item # 21 Amount ..... $17,577.00

**ITEM #** 22 : Electrical building doors painting.
Item # 22 Amount ..... $800.00

**ITEM #** 23 : Coat interior of 2- 5' dia. By 20' deep manholes with Sewer Shield 150.
Item # 23 Amount ..... $37,480.00

**ITEM #** 24 : Provide and install 1- 5' dia by 20' deep Sewer Shield Composites manhole.

Item # 24 Amount ..... $21,000.00

**ITEM #** 25 : 3rd party NACE III inspections.
Item # 25 Amount ..... $58,992.00

**ITEM #** 26 : Bond 2.5%
Item # 26 Amount ..... $34,554.40

**ITEM #** 27 : Membrane facility basins (4) and CIP tank coating. Tnemec series 215 ML/22 mat reinforced epoxy mortar lining system, $488,400.00

Item # 27 Amount .....

Excluded; P.V.C. liner 09910, below grade waterproofing, exposed exterior above grade concrete, No FRP tank painting, No poly tank painting,

Chandler AZ WRIF 90% GMP – Yard List – Notes and Exceptions

1. All prices included in this quotation are good if released for delivery with approved submittals by date noted below:

    - Ductile Iron Pipe - Ship By 6/15/2022
    - Fabricated Ductile Pipe – Ship By 6/15/2022
    - Ductile Iron Fittings – Ship By 9/17/2022
    - Ductile Iron Restraints – Order by 9/17/2022
    - HDPE(ADS) Pipe and Fittings – Order by 5/5/2022
    - PVC and CPVC SCH80 and SCH40 – Order by 5/5/2022
    - C900 PVC Pipe – Order by 3/4/2022 – Ship By 5/5/2022
    - Bolt Nut Gasket Sets – Order by – 8/15/2022
    - Gate Valves – Order by 4/15/2022
    - Air Release Valves – Order by
    - Link Seals – Order by 8/15/2022
    - Valve Boxes – Order by 8/15/2022
    - Small Bore Valves – Order by 8/15/2022
    - Copper Pipe and Fittings – Order by 4/21/2022

2. Quantities and material quoted herein are per Core & Main's interpretation of the plans and specs. Unit prices prevail. This is not a guaranteed bill of materials and it remains the contractor's responsibility to determine final quantities and materials needed to meet plan and specification requirements.

3. Core & Main reserves the right to increase prices upon thirty (30) calendar days' notice to address factors, including, but not limited to Government regulations, tariffs, transportation, fuel and raw material costs. Any material deliveries delayed beyond manufacturer lead times may be subject to price increases and/or applicable storage fees.

4. Core & Main will use commercially reasonable efforts to deliver materials and services ordered within the time specified in the bid documents or the Agreement. Core & Main reserves the right to extend those delivery times based on manufacturer lead times as impacted events beyond the control of Core & Main or the manufacturer including but not limited to availability of materials, availability of raw materials or component parts, the current pandemic, global shipping delays and resin shortage. Core & Main will not be liable for liquidated damages or other delay damages arising from delays in delivery, increases in manufacturer lead times or other circumstances beyond the control of Core & Main. Availability of materials cannot be guaranteed. This term supersedes all other contractual provisions.

## Ductile Iron Pipe, Fabricated Ductile Pipe, Fittings

1. Specific to the ductile iron, this order must be ordered and shipped complete by 6/15/2022.
    a. If no purchase order is received by this date, the quoted pricing for ductile iron is null and void.
    b. Material ordered and shipped after the 6/15/2022 date is subject to a 9% price increase every 180 days.
2. All Ductile Iron Pipe is subject to a surcharge assessed on the day the pipe is shipped form the factory. At this time, the estimated Surcharge for all Straight Length Ductile Pipe on this quote is $ 11,407.00 and will be billed at the time if shipment as a separate line item on the invoice. This surcharge can not be combined with the price of the pipe. This surcharge is subject to change on 4/10/2022.
3. All lengths of Fabricated Ductile are priced per a 6" Increment of Pipe Lay Length. If any item alters above or below this 6" Incremental length, the price will also alter accordingly.
4. Layout Drawings, CAD, Pipe Drawings, Sketches are not included in this quotation. These can be provided if needed at a cost of $400 per sheet.
5. All Fabricated Ductile Pipe is non-returnable.
6. Fittings over 18" In size are Non-Returnable.
7. Protecto 401 and Glass Lines Fittings of all sizes are Non-Returnable.
8. Protecto 401 Coated Pipe and Fittings must be installed no later that 12 months from Coating Date.
9. Tap locations in Blind Flanges, Caps and Plugs are all Centered. If Tap location is offset an additional charge will be incurred.
10. Freight on Pipe - Full Length: Freight allowed to Jobsite for FULL TRUCKLOAD quantities only. (40,000#). $350.00 Drop fee for partial truckload shipments.
11. Freight on Fabricated Pipe: Freight allowed for releases with a minimum of $5000.00 of fabricated items
12. Glass Lined Fittings: Freight allowed for releases with a minimum of $5000.00 of fittings.
13. Glass Lined Products: Freight allowed for releases with a minimum of $40000.00 of glass lined products.
14. Fabricated Pipe, Fittings, and Glass Lined Products may ship in a closed van. If closed vans are not allowed, U.S. Pipe will re-price these items and/or modify the freight terms to allow for flatbed equipment. This requirement must be established prior to bid acceptance.

## PVC Pipe C900, SDR26 and Sch80

1. Core and Main recommends that all PVC Pipe be covered upon delivery to the jobsite and kept covered until it is to be installed.

2. When PVC pipe is properly covered and not exposed to sunlight, the allowable storage time is unlimited. The two year criteria(ASTN F1668 Section 5) is a cumulative value of the time the pipe is in exposed storage and is not based on the date of manufacture.
3. It is important for the gasket in each pipe to be checked for hardening or cracking prior to assembly and installation. If a gasket has become hard or cracked, the product should not be used.

4. TEMPERATURE CONSIDERATIONS PVC will display a variation in physical properties with changes in temperature. Colder temperatures result in increases in pipe stiffness and tensile strength and decreases in impact strength. The decrease in impact strength requires care in handling during installation in freezing temperatures.

## Bolt Nut and Gasket Sets

1. All bolt nut gasket set quoted are of standard length and quantity for an ANSI 150# Ductile Iron Flange Pattern and Thickness unless otherwise stated. If any deviations in Flange Type, Style, Thickness are required, the associated Bolts/Nuts/Gaskets will be re-quoted accordingly.

## All Valves

1. All valve Certificate of Proper Installation certificates required on the project can only be carried out in the event the contractor notifies Core & Main 3 weeks prior to installation of each type of valve to coordinate installation supervision, training and initial commissioning as detailed in the specifications. If the contractor does not notify Core & Main prior to the installation of each type of valve, the Certificate of Proper Installation will not be required nor provided for any such valve and be the responsibility of the contractor.

## Estimated Lead Times (Ship Date).

Quoted date is for convenience only. Estimated dates below are reflective of the order shipping complete after release of the material. Release of the material requires approved submittals.

More accurate ship dates will be given upon order being placed.

- Ductile Iron Pipe – 12-18 Months
- Fabricated Ductile Pipe – 12-18 Months
- Ductile Iron Fittings – 6-9 Months
- Ductile Iron Restraints – 4-6 Months
- PVC and CPVC SCH80 and SCH40 – 3-4 Months
- Bolt Nut Gasket Sets – 4-6 Months
- Air Release Valves – 12-18 Months
- Gate Valves – 8-12 Months
- Link Seals – 1-2 Months
- Valve Boxes/stems/Risers – 4-6 Months
- Small Bore Valves – 4-6 Months
- Copper Pipe and Fittings – 2-4 Months

## Warranty for Valves

Warranty dates shown below are at quoted costs. Some items carry a longer warranty if a % is paid in addition to the quoted price.

- Gate Valves – 120 Months from ship date of each valve
- Air Release Valves – 12 Months from Ship Date of Each valve

# QUOTE

FORTILINE WATERWORKS
a MORSCO brand

Due to the continued cost and supply challenges in the DUCTILE IRON PIPE, PVC and HDPE markets, the pricing of these products will be based solely on the availability at the time of shipment. Also, given the volatility in these markets we will not be responsible for product availability and shipment delays, as they are out of our control. Bid prices should be considered an estimate, materials will only be priced at time of shipment until the current supply chain challenges are resolved. These terms are in leu of our standard terms. We appreciate your partnership.

A Forterra Company

March 14, 2022

To: Valued Distribution Partners and Customers
**Re: Scrap Surcharge**

As you are aware, the Russia-Ukraine conflict has resulted in additional disruptions to an already stretched supply chain. This conflict has impacted multiple inputs to our manufacturing process, the biggest of which is our scrap metal costs. Given the current situation, demand for steel and iron to be supplied by other countries is quickly growing. Those manufacturers are looking to buy more scrap, the same scrap we buy for daily operations. As a result, scrap costs are rising very quickly. The restrictions on pig iron coming from Russia and Ukraine further exacerbates the demand for scrap.

Effective April 1, 2022, all product shipping from our facilities will incur a scrap surcharge to cover these increased scrap costs. While we hope this is a short-lived market condition, we have to prepare for the likely reality that this persists until the conflict has come to resolution, global sanctions on that region of the world are lifted, or some other market mechanism helps compensate for the increase in demand.

That surcharge will be based on the national increase in shredded scrap pricing as tracked by Fastmarkets (https:/www.fastmarkets.com). The prior month average is released on the first business day of the month (i.e., the increase for March will be confirmed on April 1st). It will be communicated on the second of the month and made effective the fifth day of the month. The shredded scrap index is highly correlated to the busheling index which was up $175/ton between February and March. Because of the even higher demand for busheling, we expect the shredded index to be up, but not more than busheling. Based on what we know as of this time, a good planning number should be between $125-175/ton. All surcharges will be noted as a separate line item on your invoice.

As you know, our typical approach is to absorb increases and movements in raw materials pricing both small and large; however, the movement over the last two weeks is historically unprecedented. We believe a surcharge is the most effective mechanism for an adjustment because we intend for this to be temporary. When scrap pricing returns to February 2022 levels, we will pull back the surcharge. Should the conflict last longer and scrap prices remain higher for an extended period of time, we may consider converting the surcharge to a more permanent price increase, but it would be premature to determine that now.

Also note, we will continue to strictly enforce our terms and conditions. If you wish to cancel your order for Made to Stock (MTS) material in lieu of paying a surcharge, you may do so with no cancellation fees. Cancellation fees still apply to Made to Order (MTO) materials.

We regret having to take these actions; however, the metals markets have been greatly impacted by the situation abroad. We appreciate your support and patience while we all navigate these uncertain times.

Best Regards,

Vik Bhatia

## Charges and Fees

Arizona Materials accepts no responsiblity for any damage to curb and beyond curb line. It will be Buyers reponsibility to contact Arizona Materials Quality Control Department with any concrete issue/concerns within 48 hours after placement. Buyer is responsible to provide safe access to point of delivery. All materials are produced in conformance with ACI / ASTM standards. Mixes quoted below, unless otherwise stated, conform to no specific water cement ratio, minimum sack content, shrinkage, temperature requirement, or the plans and specifications of this project.
All colored concrete loads have a 3 yard minimum.
Arizona Materials cannot guarantee compressive strengths of 5000 PSI or below for loads less than 3 yards.
5000 PSI or above must be 5 yards or more to quarantee compressive strength.

Payment is due and payable on or before the 15th day of the month following to receive 2% discount. Account must be current in full to be eligible to apply discount. A service charge not to exceed the maximum allowed by law applies on unpaid invoice amounts beginning the 1st day of the month following due date and daily thereafter until paid in full. Should litigation be commenced to enforce payment, the prevailing party is entitled to reimbursement of reasonable attorney fees and court costs.

Buyer has 30 days to validate quote with P.O. , signing issued quote, or written verification.

**GENERAL TERMS AND CONDITIONS OF SALE**

1. **Applicability**. All references in this document to "Seller" shall include Lehigh Hanson, Inc. and/or its subsidiaries or affiliates (including any division of the foregoing) performing any or all of the scope hereunder, whether or not specifically identified herein. Buyer agrees that the following terms and conditions will apply to all sales of goods or services ("Sales") by Seller to Buyer and any of its subsidiaries or affiliates. By ordering or accepting the goods described herein, Buyer is accepting and agreeing to these terms and conditions. Buyer agrees that any terms and conditions appearing on any document submitted by Buyer which are in conflict with (a) the terms and conditions contained herein or (b) any credit application, invoice, or bill of lading submitted by Seller shall be expressly rejected and shall not constitute terms of any Sales. The terms and conditions of any written agreement signed by Seller and Buyer shall prevail to the extent of any inconsistency with these terms and conditions. Fulfillment of Buyer's order does not constitute acceptance of any of Buyer's terms and conditions and does not serve to modify or amend this document.

2. **Governing Law/Payment Address.** All matters between Seller and Buyer, including venue, will be governed by the laws of the state in which the delivery of goods or services is to occur. All indebtedness due is payable at Seller's office identified in the invoice or billing, unless and until Seller designates a different place of payment. Invoices shall be deemed correct unless contested in writing within seven (7) business days of receipt.

3. **Prices.** Prices in Seller's quotations are subject to change without notice, and all quotations expire and become invalid if not accepted within 30 days from the date of issue, unless otherwise noted by Seller in writing. Price extensions when made are for Buyer's convenience only, and they, as well as any mathematical or clerical errors, are not binding on Seller. Unless expressly written otherwise, prices shown do not include any sales, excise, or other governmental tax or charge payable by Seller to Federal, State or local authority. Buyer agrees to reimburse Seller for any such tax or to provide Seller with an acceptable and authorized tax exemption certificate. Title and risk of loss to goods shall transfer to Buyer upon Seller's delivery (whether F.O.B. Seller's plant or delivery by Seller at location designated by Buyer). Unless otherwise specified herein, all deliveries of goods shall be made FOB Buyer's trucks/railcars at Seller's plant. Seller's weights taken by track scale in the case of rail shipments shall govern.

4. **Buyer Financial Condition.** Any order for goods or services by Buyer shall constitute a representation that Buyer is solvent. In addition to Seller's right under the Uniform Commercial Code, if, in the judgment of Seller, Buyer's financial condition at the time of shipment does not justify the terms of payment specified, Seller reserves the right to require from Buyer full or partial cash payment or other adequate assurance of performance before shipment. Seller reserves the right to suspend its performance until such payment or adequate assurance of performance has been received. Seller maintains the right to periodically review and adapt payment terms as necessary and to curtail, modify or eliminate any credit availability or credit limit within its sole discretion. Buyer shall provide Seller all information requested by Seller to prepare and effect any notices required to perfect lien rights under applicable law. Upon request, Buyer shall provide Seller copies of any payment bonds.

5. **Security Interest**. To secure payment for all purchases from Seller, now and in the future, Buyer hereby grants Seller a continuing security interest in all of Buyer's presently owned or hereafter acquired (a) goods and tangible personal property, (b) rights to payment of cash money, accounts, deposits, and refunds, (c) instruments, (d) promissory notes, (e) Chattel paper (electronic and tangible), (f) documents, (g) books and records, (h) accounts, (i) accounts receivables, (j) equipment, (k) inventory, (l) commercial tort claims, (m) general intangibles, (n) payment intangibles, and (o) software, whether now existing or later acquired, together with all proceeds, substitutions, and all support obligations thereof. Seller's security interest is explicitly limited to outstanding obligations between Buyer and Seller.

6. **Payment Terms**. Buyer agrees to pay Seller all costs and expenses of collection, suit, or other legal action, including all actual attorneys' and paralegal fees, incurred through trial, on appeal, or in any administrative or bankruptcy proceedings brought as a result of the commercial relationship between them. Any cause of action which Seller may have against Buyer may be assigned by Seller. If Buyer's credit application is approved by Seller, then payment terms are Net-30 days, unless otherwise stated on the invoice or other writing from Seller. Payment is due in the form of cash, cash equivalent, check, or money order. Seller may apply Buyer's payment against any open charges within Seller's sole discretion. Seller reserves the right, even after partial payment on account hereof, to require from Buyer payment in advance or satisfactory security or guarantee of the due performance any and all of Buyer's obligations hereunder. Refusal to make such payment in advance or to furnish such satisfactory security guarantee or the failure of Buyer to perform any of its obligations under this or any other existing agreement of sale will entitle Seller to withhold future deliveries or to terminate this agreement of sale, and any unpaid amounts shall thereupon become due and payable without prejudice to any claim for damages the Seller may be entitled to make. On past due accounts Seller may impose a monthly finance charge of the higher of one and one half percent per month or the maximum interest charge permitted by the law governing the account between Buyer and Seller. The finance charge shall continue to accrue after Seller obtains a judgment against Buyer. Seller has the right to exercise setoff or recoupment when needed to satisfy an outstanding debt. All agreements between Seller and Buyer (and any affiliate or subsidiary or Buyer) shall be considered as one single integrated agreement between Seller and Buyer. Buyer agrees to pay reasonable storage fees if materials are stored on Seller's yard more than sixty (60) days after Seller is ready for delivery.

7. **Delivered Goods**. For goods delivered to Buyer by Seller, (a) reasonable unloading time (determined in Seller's sole discretion) shall be included in price of goods; (b) additional unloading time shall be charged at the rate quoted by Seller, or, if not quoted, the standard rate per hour; (c) Seller does not guarantee arrival time or the rate of delivery; (d) Seller shall not be liable for any delays in delivery or loss or damage in transit; (e) delivered prices are based on information provided by Buyer, and if location of project varies, freight will be adjusted and billed accordingly; (f) deliveries will be made only to points which, in Seller's opinion, are reasonably accessible to Seller's equipment under its own power; (g) SELLER IN NO EVENT SHALL BE LIABLE FOR DAMAGE TO SIDEWALKS AND DRIVEWAYS, BUYER ASSUMES ALL RISKS OF AND RELEASES SELLER, SELLER'S AFFILIATES AND THEIR RESPECTIVE EMPLOYEES AND AGENTS ("SELLER INDEMNITEES"), AND AGREES TO INDEMNIFY, DEFEND, AND HOLD HARMLESS SELLER INDEMNITEES FROM AND AGAINST ALL LIABILITY, CLAIMS, FEES, AND EXPENSES FOR, ALL INJURIES TO, DEATH OF, ANY PERSONS AND LOSS OF OR DAMAGE TO PROPERTY, ARISING FROM OR RELATED TO SELLER'S PRESENCE ON, USE OF, OR ACCESS TO THE JOB SITE SPECIFIED BY BUYER FOR DELIVERY, except to the extent any damage arises solely from Seller's negligence; (h) Buyer agrees to pay for all repairs to Seller's trucks or equipment resulting from Buyer's method of unloading goods; (i) trucks which become stuck on the site will be pulled out by a bona-fide wrecker at Buyer's expense; (j) Seller reserves its right to discontinue deliveries of materials until the cause of damage to its truck has been eliminated; (k) Buyer is responsible to provide a safe working environment at the delivery location; and (l) Buyer shall provide an authorized person to sign the Delivery Ticket and a signature on one Delivery Ticket shall be deemed a signature on all Delivery Tickets for all goods received that day.

8. **Concrete**. For concrete sold to Buyer by Seller, (a) concrete mix is designed to meet required strength when placed and tested according to American Concrete Institute standards (ACI) and American Standard of Testing and Measurement specifications (ASTM); (b) Buyer waives and releases liability and voids the limited warranty below if water and/or other foreign material is added by Buyer or at the request of Buyer or its employees, or agents; (c) Seller reserves the right to adjust prices if cement and fly ash costs increase due to a shortage or delay in availability from usual sources; (d) Seller reserves the right

to test all in-place concrete for conformance to agreed specifications; (e) Seller shall not be responsible for any alleged failure to meet specifications of concrete if the concrete have not been conveyed, placed, cured, and protected in accordance with the most recent revision of the ACI Standards; (f) Seller shall not be responsible for any alleged failure to meet specifications if concrete are placed with a slump greater than indicated on the mix design; (g) Seller does not warrant concrete shrinkage, temperature, or the water-to-cement ratio, except as otherwise stated in specifications provided to Seller in advance, concrete mix designs, or Seller's Sales Quotation; (h) Seller is not responsible for variations in color, "pop-outs," or cracking; and (i) all claims regarding delivery, billing, or product quality must be submitted to Seller in writing within 30 days from the date of delivery of the concrete or such claims shall be deemed waived.

9. **Aggregates**. For aggregates sold by Seller, (a) Seller takes no responsibility for degradation or segregation of aggregates after delivery due to equipment or excess handling at the project site; and (b) Seller only warrants the physical properties of the goods (gradation, sand equivalent, or cleanliness value) at the point of delivery to Buyer.

10. **Concrete Blocks and Recycled Materials**. All concrete blocks and recycled materials are sold as-is with all faults and size, shape, and color of materials may vary.

11. **Limited Warranty. THE FOLLOWING IS IN LIEU OF ALL WARRANTIES, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING BUT NOT LIMITED TO ANY EXPRESS OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY OTHER OBLIGATION ON THE PART OF THE SELLER.** Seller warrants that at the time of delivery, the quality of materials and workmanship of Seller's goods or services will conform to the requirements of the specifications set forth in the applicable sales contract(s), quotation, or to Seller's standard manufacturing practice. If Seller's goods or services fail to conform, at time of delivery, to Seller's warranty, Seller's sole and exclusive liability will be, at Seller's sole discretion: (a) to repair or replace the non-conforming goods or services at a reasonable time, F.O.B. Seller's plant, or (b) to refund the purchase price for such non-conforming goods or services. Notice of defective goods or services must be given to Seller immediately upon discovery of the defect, provided, however, that notice of any defect must be given within thirty (30) days from the date of delivery. All scheduled dates are estimated, and in no event shall Seller be liable for any damages resulting from delays in providing goods or services.

12**. Limitation of Liability. SELLER'S LIABILITY ARISING OUT OF OR RELATED TO THE SALES, WHETHER IN CONTRACT, TORT, INDEMNITY, STRICT LIABILITY, OR ANY OTHER LEGAL THEORY, SHALL IN NO EVENT EXCEED THE PRICE OF THE SALES OR PORTION OF SUCH SALES ON WHICH SUCH LIABILITY IS BASED, AND BUYER WAIVES ANY CLAIM IN EXCESS OF THAT AMOUNT. IN NO EVENT SHALL SELLER BE LIABLE FOR LOST PROFITS, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSSES OR EXPENSES, DIRECTLY OR INDIRECTLY ARISING FROM THE SALE, HANDLING OR USE OF THE GOODS OR SERVICES OR FROM ANY OTHER CAUSE OR BREACH INCLUDING, BUT NOT LIMITED TO BREACH OF WARRANTY OR NEGLIGENCE.**

13. **Force Majeure**. Seller will not be responsible for delays in production or delivery for any reason resulting from acts of God, earthquakes, sabotage, fire, flood, epidemics/pandemics, strikes, lockouts, other labor issues of any kind, priorities, allocations, limitations or other restraints which affect manufacture or delivery, accidents, war, insurrection, delays in transportation, equipment failure, damage to equipment or facilities, shortage or delays of transportation, fuel, or materials, present or future laws and governmental interference or regulation, or for any other reason beyond Seller's reasonable control. Seller reserves the right to adjust prices due to delays, shortage, or increased costs of materials or transportation.

14**. Limitation of Action**. No legal action shall be brought by Buyer against Seller for any claim with respect to any sales more than one (1) year after delivery of goods or services. It is agreed that any cause of action with respect to such sales will accrue on the date of delivery. If any provision hereof is held by a court of competent jurisdiction to be illegal, void, or unenforceable, such provision will be of no force and effect, but the legality or unenforceability will have no effect upon and will not impair the enforceability of any other provision.

15. **Documents**. A counterpart of this document delivered by facsimile or electronic transmission shall be deemed an original document and be valid for all purposes. If Seller electronically stores this document, a reproduction from the scanned document shall be considered to be an original counterpart and shall be enforceable. The Electronic Signatures in Global and National Commerce Act (P.L. No. 106-229) or the Uniform Electronic Transactions Act (or its applicable state law equivalent) apply to this document and to all Sales. Electronic and digital signatures may be used by either party. As a standard practice, Seller offers electronic invoicing to customers. Buyer must contact Seller if Buyer does not wish to receive electronic invoicing. When applicable, the terms of Executive Order 11246 and 41 C.F.R. Part 60-1 shall apply to this document and to all Sales. Buyer and Seller represent and agree that there are no third party beneficiaries to this document and that Buyer and Seller are the sole intended beneficiaries of this document and all Sales.

16. **Quantity**. Buyer acknowledges that the amount of goods ordered by it has been determined by Buyer and not by Seller. Conversion of goods from yards to tons or tons to yards is the responsibility of Buyer. Buyer assumes full responsibility and shall hold Seller harmless regarding the adequacy of the amount of goods ordered. Buyer shall not be entitled to receive credit for returned goods. In Seller's sole discretion, Seller may accept returned goods but such return shall be subject to a restocking fee.

17. **Inspection**. Any inspection test or analysis required by Buyer must be specified in writing promptly after Buyer orders the goods and prior to shipment from Seller's plant. If not so made, Buyer waives any claim of failure of the goods to meet such inspection, test or analysis. Any expense of such inspection, test or analysis shall be paid by the Buyer. Seller reserves the right to test all in-place goods for conformance. Buyer shall notify Seller of intent to enter into any agreement with any agency to pave over Seller's base material prior to obtaining passing or failing certification. Upon paving over Seller's base material without obtaining passing or failing results, Buyer assumes any and all financial responsibility for repair and/or replacement of all materials. All claims regarding delivery, billing, or product quality must be submitted to Seller in writing within 30 days from the date the goods are received at Seller's plant, or such claims shall be deemed waived.

## Ready Mix Concrete

### DANGER

May cause cancer.
May cause damage to organs (lung) through prolonged or repeated exposure.
Causes severe skin burns and eye damage.
Causes serious eye irritation.

**See SDS for further information**

| | |
|---|---|
| **Prevention:** | **Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wash any exposed body parts after handling. Wear protective gloves, clothing, eye protection and face protection.** |
| **Response:** | **If exposed or concerned: Get medical advice/attention. If on skin: Take off contaminated clothing immediately and wash it before reuse. Wash exposed body parts thoroughly after handling. If in eyes: Rinse continuously with water for several minutes. Remove contact lenses, if present and easy to do.** |
| **Storage:** | **Restrict or control access to stockpile areas (store locked up). Engulfment hazard: To prevent burial or suffocation, do not enter a confined space, such as a silo, bulk truck or other storage container or vessel that stores or contains concrete without an effective procedure for assuring safety.** |
| **Disposal:** | **Dispose of contents/container in accordance with local, regional, national, and international regulations.** |
| **Supplemental information:** | **Before handling product determine appropriate ventilation or respiratory protection. Repeated inhalation of respirable crystalline silica (quartz) may cause lung cancer. Health risk is dependent upon work duration and levels of potential silica exposure in the workplace.** |

**Lehigh Hanson ● 300 E. John Carpenter Freeway, Suite 1645 ● Irving, TX 75062● www.lehighhanson.com ● 972-424-9300**

HAZ-COM WARNING. Concrete, mortar, cement, and cement admixtures may contain crystalline silica. Prolonged and repeated breathing of crystalline silica dust may cause lung cancer or silicosis. Such products may also cause skin burns, serious eye, nose, and respiratory tract irritation and damage, and serious allergic skin reactions. Take appropriate safety precautions and use appropriate protective clothing and equipment when handling. Wash affected areas with water and seek medical attention if symptoms of exposure persist. Dispose waste according to Federal, State and Local regualtions. For detailed information, see the Safety Data Sheet before using or handling.

**DANGER**

**May cause cancer.**
**May cause damage to organs (lung) through prolonged or repeated exposure.**
**Causes skin irritation and serious eye irritation.**

March 25, 2022

Mr. Austin Hancock
McCarthy Building Companies
6225 N 24h St, 200
Phoenix, AZ 85016

Subject: McCarthy – Chandler Reclaimed Water Interconnecting Pipe Fabrication
**AZCO INC. Proposal No. 220114**

Dear Mr. Hancock:

AZCO INC. is pleased to offer our proposal to supply labor and materials to fabricate and deliver stainless steel pipe for blower building, Yard/Underground and Membrane Facility F.O.B. Appleton, Wisconsin, full freight allowed to Chandler, AZ.

Our firm price to perform this work is One Hundred Fifty-One Thousand One Hundred Ninety-Two Dollars ($151,192.00). This price does not include the cost of bid, payment and performance bond.

- Option # 1 – Changing all piping within Option 1 bounds of Membrane Facility to Stainless steel. **Add: $923,290.00**
- Option #2 – Change all Piping in contact with Cleaning Chemicals to Stainless Steel. **Add: $493,018.00**

**Force Majeure - COVID-19 Relief.** AZCO's acceptance of an award of Work in response to this Proposal is contingent upon the insertion of a Force Majeure provision into any definitive agreement entered into between AZCO and its client which clause shall provide as follows: "AZCO shall be entitled to a period of relief in performance and appropriate cost relief as well as the stay or complete elimination of liquidated damages or other damage, cost or expense for delay imposed by this Agreement, if any, where circumstances arise that are beyond AZCO's control due to a Force Majeure Event. A "Force Majeure Event," is any event or circumstance, or combination of events or circumstances, that is beyond the reasonable control of AZCO and is unavoidable or could not be prevented or overcome by AZCO's reasonable efforts and due diligence. Force Majeure Events include but shall not be limited to, change in law, natural disasters, fire, hurricanes, unusually severe and not reasonably anticipated site conditions, inclement weather, tornadoes, extreme winds, mudslides, lightning, flood, earthquake, acts of God, terrorism, acts of a public enemy, strikes or lockouts or other labor disturbances, public disorder or civil disturbances, blockades, insurrections, riots, war (whether or not declared), sabotage, embargo, expropriation or confiscation, pandemic, epidemic or quarantine and laws, rules, regulations, orders and restrictions enacted pursuant thereto. The payment of money owed by a Party will not be excused because of a Force Majeure Event. Further, whether the possibility of which is known or unknown prior to execution of this Agreement; 1) any cost, damage, expense; 2) any disruption to the labor force or supply chain delay; 3) any prevention or delay in performance as anticipated; and 4) AZCO being subject to any law, rule, regulation, order, restriction or mandate; all to the extent caused by or related to the global outbreak and spread of COVID-19 ("Coronavirus") or vaccinations against Coronavirus; shall be included in the definition of a Force Majeure Event. To the extent applicable, the doctrines of "commercial impracticability" or "frustration of purpose" under the Uniform Commercial Code ("UCC") shall also excuse performance if delivery or performance pursuant to this Agreement's terms has been made "impracticable" by the occurrence of a contingency, the non-occurrence of which both parties assumed when this Agreement was made. At this time, it remains impossible to foresee or to predict the

full impact of COVID-19 around the world and, therefore, AZCO has not included a contingency specifically for COVID-19.

When responding to this proposal, please refer to our Proposal No. 220114. This number should be included in all purchase orders resulting from this proposal.

5. 220114 - McCarthy - Bid Form
6. 220114 McCarthy 4817 Chandler RWIF GMP 2 – Front Ends Final AZCO 03.14.2022
7. Bid Basis for Material

**Clarifications**

1. Proposal based on award/PO by to be determined.

2. Lead times from our material vendors are stock to 10-11 weeks, based on receipt date of purchase order for BASE SCOPE. This is not the lead time for delivery of fabricated components to site. Option 1 material is 27-28 weeks.

3. Lead time for delivery of fabricated components to site is 13-14 weeks after award of PO for Base scope. Option 1 will be 32-36 weeks after award of PO.

4. Delivery schedule will be based upon receipt date of purchase order and is yet to be determined. Prior to an award/PO, a mutually agreeable deliverables schedule with defined priorities and issued for construction drawings issue dates need to be established.

5. Proposal is based on the drawing and transmittal received.

6. Any price increase directly or indirectly caused by changes in law, taxes, tariffs or the market which becomes effective or is imposed on AZCO after the date of this proposal is not included in AZCO's pricing and shall give rise to an equitable adjustment of the contract price and time for performance. Such equitable adjustment shall account for all costs and delays that AZCO incurs arising out of or relating to such change including but not limited to costs and delays relating to escalation, re-procurement, change in suppliers and any increased cost of supplied materials, products, manufactured equipment or goods.

7. Our proposal is based on 19 spools for base scope and 106 spools for Option 1 scope.

8. Estimate weight is 42,138.93 pounds and freight is based on 2 loads for both base scope and options.

9. Base Scope material to be pickled/passivated by acid bath after fabrication. Option 1 scope will have only the welds passivated with pickled paste due to angle face rings with ductile backing flanges being unable to go in acid bath.

10. Slip on flanges for base scope are provided at valves, flow meters and termination points. Not all joints will receive flanges. Spools are made to the fullest extent possible.

11. Angle Face Rings with Ductile Backing Flanges are provided for option scopes.

12. Delivery is subject to federal and state laws and regulations, fires, strikes, disputes with workmen, floods, accidents, embargoes, delays in transportation, shortage of cars, shortage of material, shortage of labor and to any other causes beyond Seller's reasonable control. Seller will accept no penalties for late deliveries for any reason whatsoever. For Customer furnished material, the parties shall mutually agree on a fabrication and material delivery schedule at the time of award. Deviations from an accepted schedule shall be the basis for an equitable schedule and price adjustment.

13. Orders are subject to cancellation only with Seller's consent and upon agreement by the Customer to make payment for all costs incurred by Seller prior to Seller's receipt of Customer's notification of intent to cancel. Such costs include, in addition to actual expenses, a reasonable allowance for overhead and profit.

14. Seller warrants only that the materials will be as specified by the Customer or as modified by subsequent agreement and will be free from defects of workmanship and materials supplied by Seller for a period of 18 months from the date of shipment, or 12 months from the date of installation, whichever expires sooner. The only warranty made by Seller concerning radiography, hardness or any other type of nondestructive examination or functional test of materials and workmanship produced by Seller's shop is a guarantee that shop examined fabrication is of the quality level expressly specified for the project prior to fabrication. The above warranties shall be in lieu of and exclude all other express or implied warranties of merchantability, fitness for purpose, or otherwise. Customer's remedies shall be limited to replacement of nonconforming materials or credit therefor upon return. Seller will not be subject to any other or further liability and all claims for labor or for consequential damages are excluded. Seller will not accept back charges involving examination of fabrication which was not required to be examined to the same quality level prior to shipment from Seller's plant.

15. Seller shall be notified promptly of any material claimed to be nonconforming and such material shall be held subject to Seller's inspection. No back charge for field correction of fabricated piping will be honored unless agreed upon prior to field correction. In no case will Seller's allowance exceed Seller's charge to Customer for the unit of material or labor involved unless agreed upon, in writing, prior to receipt of purchase order.

16. Seller reserves the right to invoice Customer for any or all finished material ready for shipment when held at Customer's request or because of other reasons beyond Seller's control.

17. Customer accepts responsibility for prompt review, approval and return of submittals and seller reserves the right to monetary compensation or schedule extension for any delay incurred.

**Inclusions**

18. Piping fabrication tolerances will be in accordance with PFI standard ES-3.

19. Fabrication in accordance with B31.1 code.

20. 100% visual and dimensional inspection.

21. Customer holds and witness points will be agreed upon with adequate notification.

22. Plastic end protectors.

23. Welding processes GTAW/FCAW & SAW for stainless steel.

24. Materials of foreign or domestic origin.

25. Spool drawings.

26. Spool configuration will compliment normal shipping limitations (8' x 8' x 40').

27. Bid breakdown is for accounting purposes only, not for firm price adds or deducts. It is a guide for bid comparison with other bidders, not for accepting partial award.

28. Freight is included within each cost.

**Exclusions**

29. Field verification of dimensions. McCarthy to provide AZCO a detail model with dimensions or flange to flange lengths per spool.

30. The supply of and labor for bolt, nut and gasket sets, blind flanges, valves, instruments, flex connectors, specialties, supports and support attachments.

31. The supply of and labor for thread pipe assemblies.

32. Design and Engineering.

33. Fabrication in accordance with B31.3, B31.8 and B31.9.

34. Fabrication in accordance with ASME B31.1 BEP and section 1 piping codes. Authorized inspection is excluded.

35. Radiography and post weld heat treating as required by specified code.

36. Hardness testing, dye penetrant testing, magnetic particle testing, ultrasonic testing and PMI.

37. Sandblast, prime and finish paint.

38. All internal linings are excluded.

39. Taxes, permits and fees.

40. Liquidated damages.

41. Isometric drawings.

42. Hydrostatic pressure testing and pneumatic pressure testing.

43. Allowances for delays beyond our control (late and out of sequence customer supplied deliveries, engineering or other such circumstances).

44. On all AZCO INC. supplied materials, "Country of Origin" hereby designates where the final finished form of the item in question was forged, cast, wrought, etc.; not where the raw material was extracted from the earth or where it was made into plate, sheet, strip, coil, billet, etc. "Country of Origin" information given is good only at the time of the original quotation. There is no guarantee, either expressed or implied, that the sources for all of the quoted material will not change between the time of the original bid and the time that a purchase order is issued to AZCO INC.

45. ASTM/ASME does not require "Country of Origin" of raw materials to be reported on the manufacturer test reports (MTR).

46. Taxes, customer shall be responsible for the payment of all sales and use taxes, penalties and/or interest now or hereafter imposed by any governmental authority on the work identified in the award document. Customer shall indemnify and hold AZCO INC. harmless from any and all claims asserted by the governmental authority or third parties to recover sales or use taxes not paid by AZCO INC. at the direction of the customer. Customer agrees to bear all Sales, Use, Privilege, Personal Property Tax and tax of every other character by whatever name designated that now is or hereafter may be imposed in any manner by Federal, State and Local Authorities on this transaction, or on the product covered hereby, or on the manufacture, shipment, sale, lease, possession, ownership, or use of the products; and the Customer agrees to pay the same either to the Seller or the public authorities, as may be required.

**Commercial Terms Clarifications**

47. AZCO INC. proposes to perform the scope of work identified herein based upon the understanding that all work will be performed in accordance with the terms and conditions set forth in the McCarthy Purchase Order and its associated Exhibits which have been marked to reflect AZCO INC.'s required clarifications (the "Terms"). To the extent that any document, term or condition which McCarthy wishes to impose on AZCO differs from the Terms, such document, term or condition is respectfully rejected. Please note that the Additional Subcontractor Conditions, the Subcontract Form, the Agreement Between McCarthy and Consultant and their respective Exhibits and Attachments have, for the purposes of AZCO's Proposal, have been disregarded as inapplicable to the Fabrication scope of work being proposed herein by AZCO and to the extent the representations set forth in the Bid Proposal Form submitted with this Proposal relate to such disregarded documents, such representations shall be inapplicable as well.

Thank you for the opportunity to provide this quotation. If you have any questions concerning this proposal, please feel free to contact Mr. Ethan Budimlija at (920) 734-5791.

Very truly yours,

AZCO INC.

C&B Piping, Inc. is a full service manufacturer of treatment plant piping systems. We are a ductile iron & steel pipe fabricator. We are also an industrial linings and coatings applicator.

We are pleased to offer for your consideration, our proposal covering ductile iron pipe and fittings for the above referenced project. Our quotation is based fully on our interpretation of the documents and other instructions we have. It is not a guaranteed complete scope of materials. Please review our notes, item descriptions, and quantities very carefully to determine if our proposal meets your intended needs. We will gladly work with you in reviewing the final scope.

**Validity**
This quotation is valid for acceptance within 30 days of the date of this quotation. After 30 days, contact C&B Piping to request updated quotation. C&B Piping Quotations are based on agreement in full with C&B Standard Terms and Conditions of sale which are available upon request.

**Freight**
All prices are FOB factory with full truckload freight allowed to jobsite in the 48 continental USA states. Full truckload releases are defined as $40,000 minimum release quantity. For all other releases, freight will be prepaid and added to invoice.

**Payment Terms**
We offer payment terms of NET 30. All past due invoices will be charged 1-1/2% interest per month. No retention is allowed. The bill of material listed in our proposal is our interpretation of the contract drawings or your material list. It is offered as assistance in preparing your total estimate but is not guaranteed as to the final material that would actually be required. Final amounts invoiced will be based on the actual quantities released by customer and shipped to the jobsite.

**Escalation**
If signed purchase order agreement is acceptable to both parties within 30 days of quotation, Ductile Iron Pipe, Fittings, Fabrication, and Restraints prices will be held firm for 6 months from the date of this bid for all deliveries to the jobsite. All products delivered after 6 months from date of bid will be re-quoted prior to shipment.

**Surcharges**
C&B will pass through surcharges currently in place for scrap & fuel. Surcharges will change with economic factors. Any surcharge estimates listed at the bottom of our quotation are presented for information only and to assist in estimating the potential impact. If surcharges cannot be passed through by the contractor, it is the responsibility of the contractor to cover any and all potential costs of these surcharges that will be invoiced by C&B Piping. C&B reserves the right to implement new surcharges that arise from unexpected and volatile market conditions before and during project delivery.

**Force Majeure**
In the event Force Majeure is declared, C&B Piping and all affiliates will not be liable for any causes of action for breach or damages that arise from our inability to meet our delivery or pricing terms.

**Taxes**
The unit prices and totals shown on our quotation do not include applicable sales taxes. If your project is not taxable, we require a tax exemption certificate or resale certificate on file prior to starting the project. If the project is taxable, all applicable taxes will be paid to the appropriate taxing agencies by the customer.

**Layout Drawings:**
C&B Piping, Inc. offers a layout drawing service for Ductile Iron Piping Systems to complement the manufacture and supply of the products we furnish. We will draw all or a part of the project based on customer request. The cost of each drawing is $1000 Each drawing may be revised twice without additional charge. Additional revisions are billed at $75/hour. There is a $500 setup charge for any request of 5 drawings or less. This setup charge is waived for projects requiring more than 5 drawings. Some project drawing costs may be bid using a lump sum amount to cover the ductile iron scope of supply.

C&B Piping offers BIM Modeling Service for piping supplied under contract with C&B. BIM Model Coordination is billed at a rate of $100/hour.

**Quotation Specifications:**

**Pipe:**
We have quoted pipe class as shown.
Flanged Pipe is quoted as Class 53, with 125# flanges
Grooved Pipe is quoted as Class 53 with Rigid Grooves per AWWA C606
Threaded connections to DIP are only quoted if shown on the Mechanical Drawings. All other threaded connections or Saddles required will be additional cost at time of release.

**Fittings:**
Flange: Full Body Ductile Iron 125# (ANSI/AWWA C110/A21.10)
Grooved: Victaulic per AWWA C606
Mechanical Joint: Compact MJ per ANSI/AWWA C153/A21.53

**Lining:**
CL - Standard Thickness Cement (ANSI/AWWA C104/A21.4) Field Repair Kits are $65.00 each available to order.
401 - Protecto 401 Ceramic Epoxy. Field Repair Kits are $70 each available to order as needed for your project

**Coating:**
**BUR** TC - Standard Asphalt Tar 1 mil per AWWA C151
**EXP** PC - Shop Coat of Sherwin Williams Macropoxy 646 Epoxy @ 3-5 mils DFT (See Qualifications Notes below)
**SUB** PC - Shop Coat of Sherwin Williams Macropoxy 646 Epoxy @ 3-5 mils DFT (See Qualifications Notes below)

**Restrained Joints:**
**PIPE** Proprietary Restrained Joint
**FTGS** MJ w/ Wedge Restraints

**Gaskets:**
**PO/MJ** Nitrile where listed on our quotation
**GRV** Victaulic S Nitrile

**Hardware (where listed)**
**BUR** MJ T-Bolts for buried MJ joints are quoted as Std Low Alloy Steel
**EXP** Victaulic as Zinc Plated B/N

**Origin:**
**IMP** Some materials quoted may be globally sourced. If domestic only materials are required, prices may be adjusted accordingly.

**Wall Pipes:**
Wall Collars thicknesses are quoted as industry standard - C&B Submittal

**Polyethylene Encasement:**
V-Bio Polyethylene Encasement per ANSI/AWWA C105/A21.5 is quoted separately.

**QUALIFICATIONS:**

SHOP COAT: C&B Piping offers a shop coat of temporary protection for items noted on our quotation. Responsibility for final system compatibility, proper field surface preparation, field acceptance as system primer, field repair to damaged coating are all by others. If shop coat is not desired, it can be ordered as Bare, or fully removed by field contractor on the jobsite at cost by others.

CATHODIC PROTECTION: C&B does not furnish Cathodic Protection. We have ***NOT*** furnished Steel Bonding Pads to protect special epoxy lined or glass lined pipe spigots unless specifically listed below on our quotation. If they are needed, we can furnish costs upon request.

FLANGE-TYTE® GASKET FULL FACE -1/8" THICKNESS - 3 O-RING SEAL FEATUR

Approximate Bolt Torque (ft-lb)

Improper handling, storage, and/or improper installation will void all warranties. C&B PIPING, INC recommends the use of molded low torque 1/8" thick rubber gaskets for use with threaded ductile iron flanged joints. FLANGE-TYTE® or TORUSEAL® are both acceptable products. The use of alternative gaskets could result in excessive torques and damaged flanges and thus void all warranties.

Re: City of Chandler
Reclaimed Water Interconnect Facility

Bid Date: 23 March 2022 @ 2:00 PM

***** Chandler Base Bid Stainless-Steel with Options 1 & 2 Scope *****

We are pleased to offer our quotation for the stainless-steel pipe and fittings on the above-referenced project per plans, specification as follows:

**Stainless-Steel Base Bid Piping**

1. 12" & 10" Stainless-Steel Air Piping begins at Flanged connection to Two Blower at Rubber Expansion Couplings (Provided by Others) as Shown on Sheets M-1.82, M-1.83, and M-1.84 continuing to Membrane Facility as Shown on Sheets C-1.23 & C-1.24 to termination at Flanged connections at Three 12" Tee's and One 12" Elbow at Train's 2, 3 & 4 as all Shown on Sheets M-1.43 & M-1.45. Please Note: Jifco included Flange Connection for Piping between the Blower Room and the Membrane Facility for No Field Welds.

**Total Lump Sum Price for Base Bid- $251,978.00**

CERTIFIED ISO 9001:2015

STEEL PLATE FABRICATORS ASSOCIATION FOUNDED 1933

**Option 1 (Bid Item 1)**

- 24" S/10S 316L Permeate Header with four 12" s/10s 316L branches that tie into the permeate/back pulse pumps and continue to terminate into the 16" s/10s 316L underground suction header. The 24" S/10S 316L Permeate Header also has four 16" S/10S 316L lines that start at a 16" S/10S 316L tee and terminates at the insulating flange. The 24" S/10S 316L Permeate Header connects at a ductile iron transition and terminates into CIP Tank and it reduces to 16" S/10S 316L and terminates into the Back pulse tank as shown on drawing M-1.45.
- 12" S/10S 316Lline that starts at a ductile iron transition point, continues thru the CIP pumps, and has two line that terminates into the CIP tank, and it also has and underground line that ties the four-membrane tank feed lines that terminate at the 24" membrane tank drain manifold as shown on drawing M-1.41.

**Total Lump Sum Price for Option 1 (Bid Item 1) - $1,141,638.00**

**Option 2 (Bid Item 2)**

- 12" S/10S 316Lline that starts at a ductile iron transition point, continues thru the CIP pumps, and has two line that terminates into the CIP tank, and it also has and underground line that ties the four-membrane tank feed lines that terminate at the 24" membrane tank drain manifold as shown on drawing M-1.41.

**Total Lump Sum Price for Option 2 (Bid Item 2) - $845,320.00**

JIFCO, INC of TEXAS

204 CR 238
Kosse Texas 76653
Phone: (254) 587-2245
Fax: (254) 587-2092

**Please note the following:**

- The above is furnished including elbows, reducers, tees, caps, flanges, blind flanges, flanged outlets, threaded outlets, sleeve type couplings, flanged coupling adapters, split sleeve couplings, harness assemblies, wall spools, weep rings, and anchor rings.

- The above price does not include unless noted otherwise: valves, non-mating flange insulation kits, valve bolting, mating and non-mating bolt, nut & gasket sets, flow meters, back flow preventers, pumps, pipe supports, pipe hangers, pipe straps, PVC pipe, copper pipe, and ductile iron pipe.

- Shop drawings and submittals are included in the above pricing.
- Some Materials Provided May Contain "Foreign" Products.

**Certifications and Capabilities**

- Jifco, Inc. of Texas is an SPFA certified fabricator and an LRQA ISO 9001-2008 company.
- AWS Certified Welding Inspector
- NACE Level 3 Inspector
- SNT-TC-1A Level 2 Inspectors (UT)
- In House SNT-TC-1A Level 2 Inspectors (PT, and MT)

**Payment Terms and Conditions**

- The price is good for 1 week from Bid Date.
- Full payment of the invoiced amount is due 30 days after the invoice date. No retention is allowed.
- All proposals and sales are subject to approval of credit.
- The material is quoted F.O.B. Kosse Texas, with full freight allowed to the jobsite. Freight allowance is based upon shipments in full truckload quantities. Less than full truckloads and emergency shipments are for the buyer's account.
- Sales tax has not been included and will be charged in addition to the prices quoted.

Thank you,

# REVISED BID PROPOSAL

| | | | |
|---|---|---|---|
| **To:** | **McCarthy Building Co.** | ***Project:*** | ***Chandler Reclaimed Water Interconnect Facility*** |
| Address: | 6225 N. 24th St., Ste. 200<br>Phoenix, AZ 85016 | Bid No.: | 22-0220 R1 |
| Phone: | 480.449.4700 | Date: | March 29, 2022 |
| **Attn:** | **Austin Hancock** | Pages: | 2 |

This Proposal was prepared in accordance with the following documents:

Specification Section(s): N/A N/A

Plans Dated: February / 2022 Addenda Noted: 1, 2

**Plumbing Insulation**

| | | |
|---|---|---|
| Insulation of process air supply pipe: | | **$39,501** |
| For sales tax by KMI: | ADD | **$ 2,007** |

**Project-Specific Clarifications:**

- Price based on process air supply pipe as highlighted on drawing dated 2/22 by McCarthy insulated with 2-inch fiberglass thicknesses as requested.
- Price valid for 10 days due to material escalation industry-wide.
- Price includes .016 aluminum jacketing on piping insulation exposed to weather.
- Price excludes insulation of underground piping.
- Price excludes insulation of systems not specifically mentioned above.
- Price excludes overtime labor and/or shift differential.
- Price excludes Davis Bacon wages.
- Price excludes bond cost.

Les Jaeger

# Standard Proposal Clarifications

- Unless specifically stated otherwise on the front page of this Proposal, hard sections to be provided on piping 2-1/2" in diameter and larger only.
- KMI will not guarantee any below-ambient piping system where rising stems are not provided on valves.
- This proposal is based on a normal 40-hour week. No shift work or premium time has been included.
- KMI must be provided a complete set of contract documents upon award of contract.
- No retention to be withheld on projects with a contract amount less than $5,000. Retention held on projects larger than $5,000 to be paid within 30 days after completion of work.
- Adequate area must be provided for the lay down, staging, and storage of KMI materials.
- Temporary facilities within the project, such as light, power, heat, drinking water, and toilets are to be provided at locations convenient to the work at no cost to KMI.
- All trash generated by KMI to be taken to a designated point on site for removal by others at no cost to KMI.
- Any scaffolding required shall be provided by others.
- All permits, taxes, and fees will be paid by others.
- Davis Bacon wages not included in this proposal unless specifically identified in the Project Specific Clarifications above.
- Standard KMI Exclusions:
  *Patching and Repair Due to Damage by Others, Demolition, Protection of Work in Place, Insulation of Hangers/Supports, Painting, Fire Sprinkler Pipe Insulation, Grooved Fittings, Firestopping, Labeling/Stenciling, Heat Tracing, Underground Pipe Insulation, Chiller Insulation, Abatement, Handicapped Lavatory Kits, Exterior Insulation of Lined Ductwork, Exhaust Ducts, Duct Lining, Diffuser Insulation, Mixed Air Plenums on AHU's, Breeching/Flues, Flex Duct to Diffusers, Equipment, Emergency Generator Exhaust Systems.*

RE: City of Chandler Reclaimed Water Interconnect Facility

Miller Insulation thanks you for the opportunity to present our proposal on the above referenced project. In preparing our proposal, we utilized the project prints dated 02/2022 & specification 15260.00. NO addenda have been acknowledged.

We propose to supply the labor and material required to insulate the following:

- **NEW PIPE: SS Process Supply Air Pipe 2" thick fiberglass insulation with PVC jacket exposed to view in mechanical rooms, and aluminum jacket exposed outside.**
  - ***We HAVE included piping inserts/shields (WE supply & YOU install)***
  - *We have included PVC / aluminum jacketing.*
  - *We have NOT included refrigeration piping.*
  - *We have NOT included heat tracing of pipes.*
- **We have not included firestop, acoustic penetration sealant, or painting in our bid.**

Our price to perform this work will be:

Pipe: **$29,250.00**

**This quote is valid for 45 days from bid date.** Questions regarding this proposal should be directed to me at (623) 434-8517.

Thank you,

Bob Conrad General Manager
Miller Insulation Arizona Branch

## Terms & Conditions

**Pricing:**

1. Prices are firm 10 days from the date of this quotation. After 10 days, prices are subject to revisions based on price and availability of materials in effect at time of order.
2. The above prices are based on Buyer's acceptance of this **entire** proposal.
3. Quantities contained in this quotation are approximate and are used for project bidding purposes. Unit prices govern; extensions for pricing are for information only. The actual billable quantities shall be determined by the Seller's layout, and the Buyer will be invoiced accordingly.
4. Any revisions to the scope of work may necessitate a price revision and an approved change order prior to the revision being effective.
5. Seller's pricing excludes all duty, federal, state or local sales taxes of any kind.
6. Payment Terms are Net (30) thirty days from date of invoice. Final acceptance of all orders is subject to approval by Seller's standard credit policy. Seller reserves the right to stop delivery on any project which has outstanding invoices not paid within 60 sixty days of invoice date. No retention is allowed. Seller will file intent to file bond claim and/or intent to lien on all projects.

**Exclusions** –

Unless specifically stated in the scope of the work above.

1. Off-loading of pipe and installation.

**Damages:**

1. Seller will not recognize back-charges of any kind that are caused by trucking delays, Seller supplier delays, weather, or items beyond Seller's control. Seller must be notified of all problems to participate in and/or approve any corrective action. Any claim must be received by the Seller in writing, within 7 calendar days from date of occurrence.
2. Seller will not be held liable for liquidated damages of any kind.

## *Premier Mechanical Insulation respectfully submits the following:*

**For insulation of high temperature process air piping:**

**$ 51,785**

**Qualifications:**

- High temperature process air piping to be insulated with 2" thick fiberglass pipe covering.
- Includes .016 stucco-embossed aluminum jacketing on piping insulation exposed to the weather.
- Price excludes overtime labor, weekend labor and/or shift differential.
- Price excludes Davis Bacon wages, bond costs and sales tax.
- Price valid for (60) days from date of proposal.

## *Premier Mechanical Insulation Standard Clarifications*

1. Payment due for materials stocked onsite or in an approved warehouse.
2. Protection of work is to pass to the general contractor after the completion of each phase of work.
3. Work to proceed sequentially with areas free of debris and obstacles to provide efficient productivity.
4. All hoisting and dump bins are to be provided by the general contractor at no cost to PMI.
5. No retention to withheld on projects with a contract amount less of $5, 000.
6. Retention to be release upon completion of PMI's scope of work.
7. Insulation and warranty of existing systems is excluded.
8. PMI must be provided a complete current set of documents upon award of contract.
9. Any scaffolding required shall be provided by others.
10. All permits, taxes and fees to be provided by others.
11. **Standard Exclusions -** Existing piping/ducts except POCs, underground piping, chiller bodies, fire stop penetrations, transfer ducts, plenum lining, flex ducts, all conditioned space ducts, damage to T-bar grid, lined duct, linear diffusers, duct lining, fire wrap on top of hood, grease duct access doors, grease duct cutting of Access doors, drain assembles, plumbing storage tanks, waiver of subrogation.

Pipe Support Estimator: Jesse Goens (385) 557-6912

## Bid Description

The following scope is for SAC to furnish a complete Pipe Support System as outlined below and highlighted in the Redlines provided. All material shall be delivered to the project site in a finished state ready for turnkey installation. SAC shall provide the final design, field confirmation and certification for the piping supports, seismic restraints, and related work, as specified.

## Pipe Support Systems (3" and larger)

### A. Inclusions

*a. Design & Engineering:*

i. Final Design and Engineering to provide a complete support system in conformance to Specification Section 15140
ii. Support System design shall be by a Professional Engineer licensed in the state of Arizona. The proposed support system engineer shall have at least 5 years' experience in the analysis and design of similar systems.
iii. SAC shall design all supports to meet the seismic and wind requirements for the project.
iv. Submittals – Proper CAD files of Contract Drawings included in the Redline set are required.
    1. 12 weeks after contract execution and receipt of proper CAD files in .dwg format.
    2. 14 weeks after contract execution if proper CAD files are not available. (See Cost Adder in Pricing Section)
*v.* Only electronic copies of submittals will be supplied, no hard copies.

*b. Fabrication & Delivery*

i. Fabrication & Delivery of all necessary Pipe Supports (3" and larger), Hardware, Anchorage and Ancillary Items to support all process piping.
ii. Support, Hardware & Anchor Materials are as follows:

| AREA | SUPPORT MATERIAL | HARDWARE MATERIAL | ANCHOR MATERIAL |
|---|---|---|---|
| Interior & Exterior | Carbon Steel (Primed) | 316SS | 316SS |
| Submerged & Stainless Steel Pipe | 316SS | 316SS | 316SS |
| Chemical | 316SS | 316SS | 316SS |

iii. Supports are to be individually tagged, shipped, and crated based upon Layout of Pipe Supports for ease of installation.
iv. All Anchorage and Hardware for SAC provided supports has been included in this proposal.
v. Fabrication & Shipment of Pipe Supports – 10-12 weeks after release by client. Due to current market volatility, SAC's standard lead times for fabrication and procurement are extending due to material availability. The material availability will be determined when submittals are approved for the respective area.

### B. Notes

a. We have included "1" site visits for coordination and to fulfill the project requirements.
b. This quote is based on "3" shipments.

## C. Exclusions

a. Structural/Misc. Metal items to be supplied by others
b. Plumbing/HVAC/Fire Suppression Supports
c. Supply of Small Bore Supports (2-1/2" and less) & Chemical Trench Pipe
d. Temporary Supports
e. Insulation inserts such as Cal-Sil, and/or pipe shields for supports in contact with pipe insulation
f. Supports called off as concrete
g. Supports called off as Ductile Iron Base Elbows or Base Tees
h. Pipe Supports for Diffuser Piping, supplied by Diffuser Manufacturer
i. Nitric Acid Passivation: Passivation for Stainless Steel Supports shall be Citric Acid. The Citric Acid process is more environmentally friendly, safer, and less toxic method.
j. Undercut, Hastelloy, Titanium anchors. See material schedule above.
k. Third party special inspections
l. BIM/3D modeling; If required, SAC can provide at an additional cost.
m. Top/Finish coat of Carbon Steel supports

| DESCRIPTION | REDLINE DRAWINGS | PRICING |
|---|---|---|
| **Pipe Support System (3" & larger):** | Pipe Support Link | **$375,000** |

**Adder – Submittal Drawings (If contract drawings are not provided in .dwg format)** **$2,000**

**Terms of Payment:**

1) 2% 10 Net 30.
   a. 10% to be billed as Engineering upon Submittal of Design for each Area
   b. 10% to be billed as Engineering upon Approval of Design for each Area
   c. 75% to be billed as Material upon delivery
   d. 5% to be billed as Shipping upon delivery
2) Retention (if held) is to be released no later than 90 days after invoice date that it was withheld.

***Pricing Notes:***

1) *Addenda 1 & 2 have been received*
2) *Price is exclusive of any local, state, or federal taxes.*
3) *No retainage, back charges, or withholds.*
4) *Does not include Bond*
5) *Based on drawings dated: 02/2022*
6) *Due to the volatility in the current metals market, material pricing is only good through 04/05/2022*
7) *AIS or Buy America(n) is EXCLUDED*

## 1. Quoted Prices Exclude:

1.1 All Taxes

1.2 Flange nuts, bolts, gaskets, anchor, mounting bolts, Victaulic couplings, Mechanical Joint Accessories, thimbles, or non-standard tags.

1.3 Extension stems, soil pipes, valve boxes, covers, or “tee” wrenches

1.4 Hydraulic oil for cylinder operators and/or accumulator systems.

1.5 Spare parts

## 2. Clarifications

2.1 Standard Henry Pratt actuators are designed per AWWA C504, maximum 150 ft-lbs input torque at the nut, or maximum 80 ft-lbs rim pull for hand wheel gears.

2.2 Hydrostatic testing will be performed using ambient water temperature

2.3 Any additional information concerning submittals, O&M manuals, Pipe specs, etc., that were not provided at time of quote may impact price and delivery.

2.4 The quoted list of materials included herein represents our interpretation of Plans and Specifications (as provided ) and is not guaranteed to be complete or correct. Prices are subject to change upon review of actual job specifications.

2.5 Electronic submittals and O & M manuals will be provided in PDF electronic format. Hard copies are available upon request.

2.6 The proposed Field Service Option includes technical support and assistance with repairs and/or installations.

2.7 Customer is to provide safe access and a safe working environment. Additionally, the customer is to supply power, light, air source (80 PSI), all rigging including ladders, scaffolding and cranes necessary for repairs and/or installations. (Valves 30” and smaller must be removed from the line for seat removal/installation)

2.8 Because actual service time may vary due to unforeseen circumstances, the Field Service pricing offered is an estimate only. The actual cost of the field service visit will be billed by the Henry Pratt Company.

2.9 Henry Pratt Field Service appointments are not scheduled until receipt of a purchase order and are based on current availability of a service technician.

CONDITIONS OF SALE

## 3. Prices are firm and proposal is valid providing:

3.1 Buyer's purchase order is received within 30 days of bid opening date. If purchase order is not received within 30 days, Seller reserves the right to re-quote and adjust price and/or delivery lead time.

3.2 Quotation assumes shipment of complete quoted material within 365 days from date of a received purchase order.

3.3 Approved drawings, if specifically required by purchase order, are returned within thirty (30) days of submittal date, with full release to manufacturing. If approved drawings are not received within 30 days, Seller reserves the right to re-quote and adjust price and/or delivery lead time.

3.4 Henry Pratt Company's Terms and Conditions of Sale apply to this quotation. A copy of our Terms and Conditions of Sale can be downloaded from https://www.henrypratt.com/sites/henrypratt.com/files/uploads/media/13313-terms-and-conditions-of-sale-pratt_9-10-2018_2.pdf.

3.5 Quoted shipping dates are estimates only based on shop loads and lead times of materials from outside vendors. Seller will meet quoted schedules or reflect currently schedules upon order acknowledgement. Lead time shall be mutually agreed to at the time of product release to manufacture and credit package approval by Seller. Seller shall not be responsible for delay in deliveries due to any cause beyond Seller's reasonable control, regardless of theory of liability.

3.6 Seller shall not be liable for Buyer's loss of profit, indirect, liquidated, incidental, or consequential damages, regardless of theory of liability. Seller's total liability shall not exceed the unit purchase price of the products supplied. Indemnification shall be limited solely to Seller's negligence.

3.7 This quotation is based on payment terms of Net 30 Days from date of invoice with no retainage. Payment terms are extended to customers who have completed a credit application, including credit agreement, and have been approved by our Credit Department. Payment must be made in advance of shipment for all other accounts.

ALL QUOTATIONS/PURCHASE ORDERS ARE SUBJECT TO RENEGOTATION IF DIFFERING TERMS AND CONDITIONS ARE STATED IN BUYER'S PURCHASE ORDER WHEN RECEIVED.

**General Notes:**

This is a unit price estimate, not a lump sum offer. We are not responsible for errors or omissions.
Unless specifically shown or incorporated onto supports for larger lines all supports for 2" and below are not included.
Duct, HVAC or Plumbing supports are not included unless noted otherwise.
Anchors are included. Powers anchors/epoxy is quoted. Any deviations will change pricing and/or anchor scope.
Supports manufactured of FRP materials are not included unless noted otherwise.
Neoprene or rubber isolation pads are not included unless noted otherwise.
Link seals if required for any wall sleeve item quoted are not included unless noted otherwise.
No engineering is included. If required it will be quoted as an additional charge.
All prices are good for 60 days.
This pipe support quote reflects only the materials noted in the details and as noted above. Any deviations are noted herein.
Unless noted otherwise any structural racking regardless of where shown are not included.
The above unit pricing is based upon the entire quote being purchased and released. Scope changes most likely will cause unit price changes.
ABBREVIATIONS: CL = CENTERLINE; HDG = HOT DIP GALVANIZED; BC = BLAST CLEAN; OSC = ONE SHOP COAT PRIMER;
SS304/316 = STAINLESS STEEL; COP = COPPER; BOD = BOTTOM or BACK OF DUCT; (*) = SCALED DIMENSION.
All dimensions are in inches and are to the centerline of pipe, unless noted otherwise.
This quotation does not include jobsite inspections of pipe support installation unless specifically identified otherwise.
This quotation, unless otherwise noted, does not meet any requirements for buy American or domestic material
If this is a project requirement please notify our estimating department and we can revise our quote to meet these needs.
Unless otherwise noted, all materials are non-cancelable/non-returnable.
This take-off has incorporated the following addendum's:
Finish quoted is as shown above and does not include P&P on any stainless steel unless noted as such.
Temporary supports of any kind are not included unless noted otherwise.
Embed plates of any kind are not included unless noted otherwise.
Diffuser Supports are not included unless noted otherwise.
Calcium inserts or shields/saddles for any insulated or PVC piping are not included.
Supports quoted utilize standard 3-1 safety factor. Higher requirements could change pricing and will be quoted as an additional charge.

SECTION 09714

METAL FACED ACOUSTICAL PANELS

## PART 1 - GENERAL

### 1.1 SUMMARY

A. Section includes: Sound absorptive ceiling and wall panels and accessories:
   1. Buildings include:
      a. RWIF Blower Building: all available space on ceilings and walls.

B. Related sections:
   1. The Contract Documents are complementary; what is called for by one is as binding as if called for by all.
   2. It is the Contractor's responsibility for scheduling and coordinating the Work of subcontractors, suppliers, and other individuals or entities performing or furnishing any of Contractor's Work.
   3. The following Sections are related to the Work described in this Section. This list of Related Sections is provided for convenience only and is not intended to excuse or otherwise diminish the duty of the Contractor to see that the completed Work complies accurately with the Contract Documents.
      a. Section 05500 - Metal Fabrications.

### 1.2 REFERENCE STANDARDS

A. ASTM International (ASTM):
   1. C 423 - Standard Test Method for Sound Absorption and Sound Absorption Coefficients by the Reverberation Room Method.
   2. E 84 - Standard Test Method for Surface Burning Characteristics of Building Materials.

### 1.3 SUBMITTALS

A. Shop Drawings: Indicate grid layout and related dimensioning.
   1. Submit for approval the following:
      a. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final

DRAFT

QA #4

authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

b. The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

B. Product Data: Provide data on suspension system components and acoustical units.

## PART 2 - PRODUCTS

### 2.1 SYSTEM DESCRIPTION

A. Sound absorption: Minimum, expressed in sabins, at following octave band center frequencies for 30- by 120-inch panels with 2-inch thick wrapped acoustical insulation, when tested in accordance with ASTM C 423:
1. 125 hertz: 4.5.
2. 250 hertz: 14.1.
3. 500 hertz: 26.7.
4. 1,000 hertz: 28.6.
5. 2,000 hertz: 26.3.
6. 4,000 hertz: 29.2.

B. Fire ratings: Flame spread of 10, smoke developed of 5 when tested in accordance with ASTM E 84.

### 2.2 ACOUSTICAL WALL PANELS

A. Manufacturers:
1. Sound Sorb by Acoustic Systems, Austin, Texas.
2. Eckoustic Functional Panels (EFP) by Eckel Industries, Inc. Cambridge, MA.
3. Or approved equal.

B. Metal facing: 0.032 inch minimum; coated aluminum, ribbed to provide impact resistance.

C. Perforation ratio: Not less than 23 percent.

DRAFT

QA #4

D. Panel size: 18 by 96 inches.

E. Absorber:
1. Fiberglass or mineral wool wrapped in heat-sealed polyvinyl chloride film for outdoor applications or polyethylene sheet for indoor applications.
2. Polyvinyl chloride film thickness 2 mils.
3. Perforation ratio 10 percent within 2 percent both sides.
4. Blanket; semi rigid, not less than 2 inch, density of approximately 1.5 pounds per cubic foot.

F. Perforated metal facing shall be furred out on metals channels by 2 inches.

G. Mounting brackets: Minimum 4; Type 316 stainless steel.

H. Adsorption factors:

| Frequency Band | 125 | 250 | 500 | 1,000 | 2,000 | 4,000 | NRC |
|---|---|---|---|---|---|---|---|
| Wall Panel | 0.34 | 1.11 | 1.48 | 1.15 | 0.74 | 0.56 | 1.10 |

## 2.3 ACOUSTICAL CEILING PANELS

A. Manufacturer:
1. White Sculptured PVC Ceiling Panels by MBI Products, Cleveland Ohio.
2. Eckel Panels by Eckel Industries, Inc., Cambridge, MA.
3. Or approved equal.

B. Fabrication: Semi-rigid, high binder content fiberglass material, 1-inch thick, 3 pounds per cubic foot density.

C. Facing: Heat-sealed layer of 1.5-mil thick perforated PVC film, perforation ratio 10 percent within 2 percent.

D. Attachment:
1. Extruded PVC profiles, mastic glue, stick clips, screw anchors with oversized washers.
2. Attach directly or with spacing not to exceed 2 inches.

E. Size: 48 by 48 inches, cut to fit.

F. Adsorption factors:

G. Adsorption factors:

DRAFT

QA #4

| Frequency Band | 125 | 250 | 500 | 1,000 | 2,000 | 4,000 | NRC |
|---|---|---|---|---|---|---|---|
| Wall Panel | 0.07 | 0.31 | 0.76 | 1.12 | 0.68 | 0.26 | 0.70 |

## PART 3 - EXECUTION

### 3.1 INSTALLATION

A. Install acoustical panels in accordance with manufacturer's instructions.

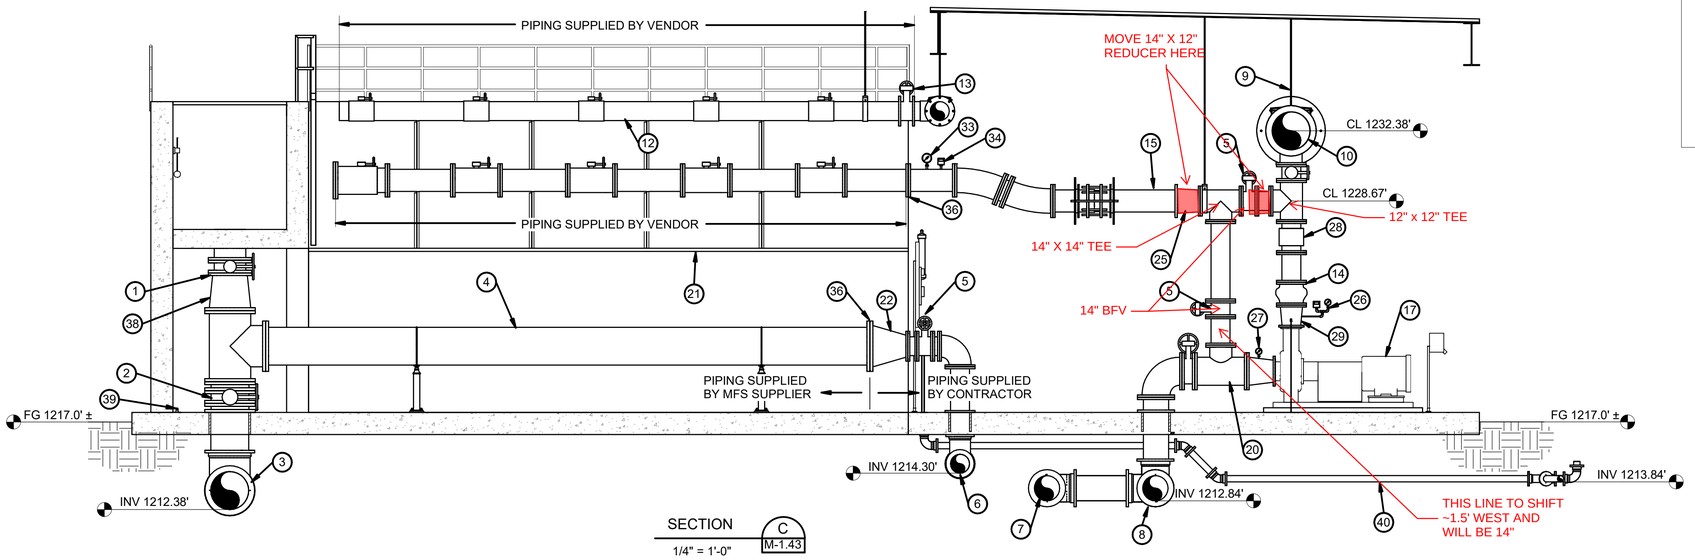
B. Anchor furring to concrete or masonry walls securely.
   1. 1. Anchor horizontally at 12 inches above floor, at 24 inches on center, at ceiling, and vertically at ends.

C. Install insulation between furring.
   1. Hold in place until installation of panels.

D. Place panels vertically on walls, perpendicular to direction of furring, with maximum 1/16-inch space between panels.

E. Paint nail or screw head white.
   1. Nail or screw panels to furring in manufacturer's recommended pattern.
   2. Countersink nails or screws 1/16 inch.

F. Do not cover columns and beams with panels.
   1. Hold panels back 2 inches from columns.



G. When panels require field cutting, make sharp and perpendicular cuts using jigs.

H. Make neat cutouts for pipes, supports, and other projections from wall.
   1. Install metal trim around perimeter of panels.
   2. Fasten trim to edge furring with aluminum nails.
   3. Miter corners.

QA #22 Drawing

NOTES:

1. ALL DOTTED LINES/EQUIPMENT (BY CONTRACTOR). ALL DRAIN POINTS TO BE PLUMBED TO DRAIN BY CONTRACTOR.
2. DRAWING TYPICAL FOR TRAIN 1 TO 4. TAGS: "X" IS "1" FOR TRAIN 1, "2" FOR TRAIN 2 ETC FOR 4 TRAINS.
3. AN OVERFLOW IS REQUIRED FOR EACH TRAIN.
4. A PORTION OF THE AIR HEADER NEEDS TO BE LOCATED ABOVE THE HIGHEST WATER LEVEL IN THE MEMBRANE TANK.
5. PIPE VENT TO MEMBRANE TANK OR OTHER SAFE LOCATION.
6. DRAIN PIPE TO BE LOCATED AT VERY BOTTOM OF TANK. DRAIN PIPING LAYOUT TO ENSURE COMPLETE DRAINING OF MEMBRANE TANK TO WASTE OR CIP TANK.
7. LIT TO BE LOCATED AT VERY BOTTOM OF TANK.
8. CONCRETE MEMBRANE TANK MUST BE LINED APPROPRIATELY FOR MEMBRANE CLEANING CHEMICAL CONTACT. REFER TO SWTS DOCUMENT " CONCRETE TANK LINING GUIDELINES FOR ZEEWEED SYSTEMS" FOR DETAILS.
9. ANY EXPOSED PVC PIPES SHALL BE UV PROTECTED BY CONTRACTOR.
10. PROVIDE AN AIR GAP NEAR THE EJECTOR. DRAIN TO MEMBRANE TANK OR OTHER SAFE LOCATION. DO NOT REDUCE LINE SIZE.
11. MOUNT ON SIDE OF PIPE PIPING CONFIGURATED TO NOT ALLOW ANY AIR ACCUMULATION.
12. THE 3/8" TUBING THAT CONNECTS THE TWO SPOOLS TOGETHER IS TO BE PROVIDED AND INSTALLED ONSITE BY CONTRACTOR.
13. INSTRUMENT AIR SUPPLY ASSEMBLIES LOCATED OUTDOOR TO BE TEMPERATURE AND UV PROTECTED BY CONTRACTOR.
14. FEED CHANNEL AT 0 INCHES IS THE SAME ELEVATION AS THE MEMBRANE TANK AT TO BE DECIDED BY CLIENT.

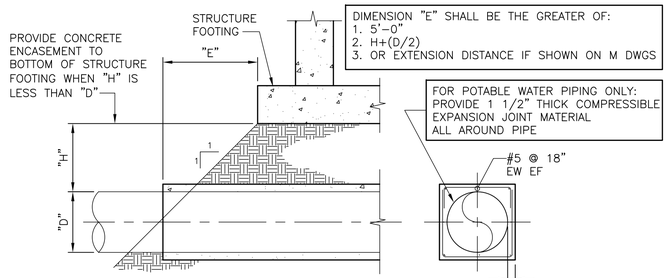
QA #25 Attachment

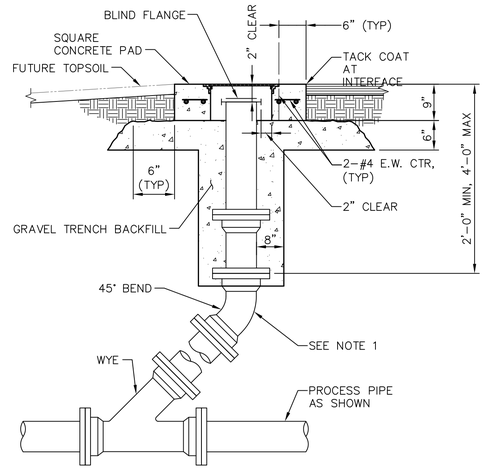


NOTES:

1. D=PIPE OUTSIDE DIAMETER OR 6" MINIMUM WHICH EVER IS GREATER.
2. REINFORCEMENT IS NOT REQUIRED.
3. CLASS "B" CONCRETE 3000 PSI.
4. PIPES PASSING UNDER WALLS SHALL BE WRAPPED IN VISQUEEN AND ENCASED.
5. PIPES SHALL BE LAID SO THAT FITTINGS, FLANGES, JOINTS, ETC. ARE NOT ENCASED.
6. ENCASEMENTS FOR FUTURE PIPES SHALL ENCASE FLANGE BY FLANGE DIP.
7. ENCASEMENT SHALL BE SEPARATED FROM FOOTING BY A MINIMUM OF 6" OF COMPACTED SOIL.
8. CLEAN CUT VERTICAL WALLS OF TRENCH MAY BE USED AS FORMS.
9. ENCASEMENT SHALL NOT BE ALL OR PART OF A THRUST BLOCK.
10. PIPE ENCASEMENTS FOR FUTURE USE SHALL BE CAPPED.

## CONCRETE ENCASEMENT

| DETAIL | 102 |
|---|---|
| NOT TO SCALE | – |

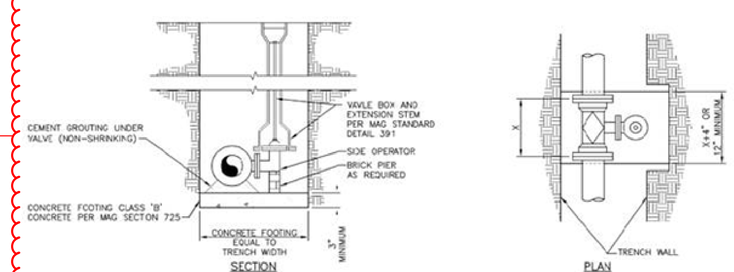


ALL PIPING IS TO BE ENCASED AS FOLLOWS:

ALL PIPE, CONDUIT, ELECTRICAL LINES ETC. WHICH ENCOMPASS AN AREA OF 8", EITHER BY ITSELF, OR THE CO-LOCATION OF SMALLER ELEMENTS EQUALING 8" SHALL BE ENCASED IN CONCRETE WHEN THEY ARE LOCATED LESS THAN 2'-0" BELOW BELOW BOTTOM OF CONCRETE SLAB, FOUNDATION ETC. THIS REQUIREMENT MUST ALSO TAKE INTO ACCOUNT ALL APPLICABLE CODES AND REQUIREMENTS WHERE ENCASEMENT IS NOT ALLOWED BY SAID CODES. WHERE ENCASEMENT IS NOT PERMITTED, ELEMENTS WHICH ARE REGULATED SHALL BE PLACED AS THE CODE REQUIRES FOR THAT PARTICULAR ITEM OR ITEMS. IN THOSE CASES THE ITEM WHICH MAY NOT BE ENCASED SHALL BE PLACED MORE THAN 2'-0" BELOW THE STRUCTURAL CONCRETE.

## CONCRETE ENCASEMENT FOR PIPES UNDER STRUCTURES

| DETAIL | 103 |
|---|---|
| NOT TO SCALE | – |



NOTE:
1. SAME SIZE AS PROCESS PIPE UP TO 8" MAX.

## PRESSURE CLEANOUT

| DETAIL | 104 |

# QA #80 - Chemical Metering Pump Table

**Q/A #80: Chemical Metering Pump Design Criteria**

**From:** Sean E. Zimmerman <sezimmerman@wilson-engineers.com>
**Sent:** Wednesday, March 23, 2022 5:28 PM
**To:** House, Jason <JHouse@mccarthy.com>
**Cc:** Kileigh Phillips <kphillips@wilson-engineers.com>
**Subject:** RE: RWIF Chemical Metering Pumps

Hi Jason,

Please find the latest chemical metering pump design criteria table below:

| Chemical | Chemical Concentration (%) | Location/Facility | Maximum Capacity (gph) |
|---|---|---|---|
| ACH | 40 | ACH Facility | 5.00 |
| Sodium Hypochlorite | 12.5 | MFS Chemical Facility | 1050 |
| Citric Acid | 50 | MFS Chemical Facility | 810 |
| Sulfuric Acid | 50 | MFS Chemical Facility | 90 |
| Sodium Bisulfite | 38 | MFS Chemical Facility | 270 |
| Sodium Hydroxide | 25 | MFS Chemical Facility | 720 |
| Sodium Hypochlorite | 12.5 | Modified Bulk Sodium Hypochlorite Facility | 14 |

These were specified in Suez's most recent revision of the P&IDs (Shop Drawing Submittal #1). Please use these numbers for the metering pump vendor bids.

**CITY OF CHANDLER, ARIZONA**

**Reclaimed Water Interconnect Facility**

**Project No. WW1901.203**

**ADDENDUM NO. 1**

**Date: 02/28/2022**

The attention of the contractor submitting GMP for the above referenced project is called to the following addendum to the plans & specifications. The items set forth herein, whether of omission, addition, substitution, or clarification, are all to be included as a procurement package as part of proposed work. Specifications and design drawing set are included for vendor review. The vendor shall review the attached information and acknowledge the enclosed drawings with reference to conformance to the layout of the equipment. Any modifications required for the proper functioning of the proposed equipment shall be included along with the proposal. Further, the vendor's review shall include confirmation of the proposed preliminary layout and if necessary, shall propose modifications as necessary for optimum operation of the proposed equipment (such as modifications to the structure footprint and spacing between equipment). If no information is provided in the bid package, it is assumed that the proposed equipment will operate as specified with the drawing set and the proposed layout that is provided with this addendum. The vendor shall also include the duration required for shop drawing preparation and the duration from the time of approved shop drawings to delivery of equipment on-site with the bid package. In addition, the vendor shall provide expedited durations for shop drawing preparation and equipment delivery from time of approved shop drawings along with associated costs in the bid package as a separate line item.

Make the following change and/or additions/deletions to the Contract Documents.

1. Specification Section 11314 End Suction Centrifugal Pump

   **DELETE** end suction centrifugal pump criteria outlined in section 1.4.A table and **REPLACE WITH** table below.

| Service | Permeate Pump | CIP Pump |
|---|---|---|
| Quantity | 5 (4 Service, 1 Spare) | 2 |
| Rated Design Flow (gpm) | 3,720 | 2096 |
| Rated Design Head (feet) | 53 | 17 |
| Minimum Overall Efficiency (%) | 85 | 82 |
| Maximum Motor Horsepower | 75 | 15 |
| Maximum Speed (rpm) | 900 | 900 |
| Voltage | 460 | 460 |
| Power Phases | 3 | 3 |
| Power Frequency (Hz) | 60 | 60 |
| Discharge Flow Diameters (in.) | 10 | 14 |
| Suction Flow Diameter (in.) | 12 | 14 |

**DELETE** "wetted pump materials shall be NSF certified" in paragraph 2.2.A.1.a.1 and **REPLACE WITH** "Wetted pump material shall be NSF-61 certified"

2. Specification Section 11371 Positive Displacement Blowers

**ADD** "Or Approved equal" after 2.1.A .

**DELETE** specifications listed in 2.2.A Positive Displacement Blower and **REPLACE WITH** specifications below.

A. Positive Displacement Blower:
   **1.** Number of Blowers: 2 (1 duty, 1 standby).
   **2.** Rated Speed: 2,164 rpm.
   **3.** Rated Air Flow at Rated Speed: 1,895 scfm.
   **4.** Required Air Flow Range: 600 to 3,000 scfm.
   **5.** Inlet Piping Pressure: 0.20 pound per square inch.
   **6.** Rated Discharge Pressure: 19 psig.
   **7.** Rated Inlet Pressure: 14 psia
   **8.** Inlet Temperature: 25° to 110° Fahrenheit
   **9.** Inlet Humidity: 0% to 50%.
   **10.** Approximate Site Elevation: 1,200 feet above sea level.

B. Motor: As specified in Section 16225, Electric Motors 250 Horsepower or Less, except as otherwise specified or supplemented below:
   **1.** Motor Power Supply: 480 volts, 3 phase, 60 hertz.
   **2.** Motor Horsepower: 125.
   **3.** Motor Speed, Maximum: 2,400 rpm.
   **4.** Motor Enclosure: TEFC.
   **5.** Motor Service Factor: 1.15 at altitude.

3. Specification Section 11372 Air Compressor

**ADD** the following after Section 2.2.D:

"E. Connections
   **1.** Inlet and outlet: threaded 1" NPT
   **2.** Automatic brass drain: threaded 1/8" FPT"

4. Specification Section 11500 Membrane Equipment System

**DELETE** "*During backpulse (5 – 25 min./train, every 2 hours); During Maintenance Clean (15 – 30 minutes/train, once per day); During Recovery Clean (6 – 25 hours/train, once per month)" after Section 2.2.A.2. Table 1 and **REPLACE WITH** "*The membrane system will be designed to increase flows through online trains to accommodate constant inlet feed flow to the membranes up to 10 MGD (net)/95% = 7,310 gpm (net) during Maintenance Cleans, Membrane Integrity Tests, and Backwashing, with all other trains otherwise in service".

**DELETE** "During Recovery Clean of one Train, where three Trains are in operation, production shall meet 10 MGD. This applies even during Backpulse and Maintenance Clean cycles of one of the three operating trains." From Section 2.3.A.2.b and **REPLACE WITH** "b. If a train is off-line for Recovery Clean or for any other equipment repair or maintenance, then the influent flow will be decreased. The feed flow that can

be accommodated with one train out of service for Recovery Clean or for any other equipment repair or maintenance is 7,310 gpm (net) x 3/4 = 5,482 gpm (net)."

5. Specification Section 13127 Extruded Flat Panel Covers

   **REPLACE** Specification Section 13127 in entirety with attached Specification Section 13127.

If you have any questions, please e-mail me at: SRengaraj@wilson-engineers.com.

Sreeram Rengaraj, P.E.
Wilson Engineers LLC

SECTION 13127

EXTRUDED FLAT PANEL COVERS

## PART 1 - GENERAL

### 1.1 SUMMARY

A. Furnish all labor, materials, and equipment required to design, fabricate, deliver, and install a new extruded flat aluminum cover structure with all appurtenances required for a complete and operational installation.
   1. Membrane Trains 1 thru 4.
   2. Membrane Facility Common Inlet Channel.
   3. CIP Tank.

B. The enclosure shall be a flat cover structure conforming to the dimensions indicated on the Drawings, a rectangle aluminum structure with stainless steel structure members.

C. All metal components of the aluminum structure shall be aluminum with cold-formed stainless steel. No galvanized, painted, or plated steel shall be used.

D. The structure shall be designed as a substantially airtight system under all design load and temperature conditions. All raw edges of the aluminum panels shall be covered and sealed.

E. The cover manufacturer must coordinate with the membrane equipment supplier for design of the covers, design of supporting structural members, and coordination of cover cutouts to accommodate membrane equipment system piping. The membrane basin aluminum cover design must be fully integrated with the membrane equipment system design.

F. The cover manufacturer shall provide 4 access hatches each for each Membrane Train. Coordinate pipe support attachments and penetrations as shown in the Drawings.

### 1.2 RELATED SECTIONS

A. Drawings and General Provisions of the Contract, including General Supplementary Conditions apply to this Section.

B. Section 01300, Submittals.

C. Section 01640, Materials and Equipment.

D. Section 01650, Starting of Systems.

E. Section 09900, Painting.

F. Division 13, Special Construction.

G. Division 15, Mechanical.

H. Division 16, Electrical.

## 1.3 REFERENCES

A. Aluminum Association Specifications for Aluminum Structures.

B. Aluminum Association Aluminum Design Manual, Specification, and Guidelines for Aluminum Structures.

C. ASCE 8-90, Specification for the Design of Cold-Formed Stainless Steel Structural Members.

D. ASTM C864-90, Standard Specifications for Performed Gasket and Sealing Material.

E. ASTM F593, Standard Specification for Stainless Steel Bolts, Hex Cap Screws, and Studs.

## 1.4 SUBMITTALS

A. Drawings describing the completed structure and all its components shall be submitted, complete with materials of construction and typical details. Drawings shall be sealed and signed by a qualified Professional Engineer registered in the State of Arizona.

B. Records certifying the satisfactory inspection of all structural welds of aluminum components shall be submitted prior to delivery of all fabricated materials.

C. Design calculations verifying conformance to deflection limits shall be submitted. Deflection calculations are required for structural members as well as walking surfaces.

D. Descriptive and Operation and Maintenance Data submittals shall be made in accordance with the Data Reference Symbols defined in Section 01300, Submittals.
   1. Covers: Shop Drawings and O&M Manuals:
      a. Letters of Certification of Compliance on materials, equipment, etc.
      b. Final Certified Drawings showing outline dimensions, foundation layout or mounting information, and other pertinent dimensions.
      c. Field erection instructions, assembly drawings and/or diagrams, detailed reference drawing lists, lists of erection details, and list of spare parts supplied with equipment.

d. Shop Detail Drawings showing individual sub- assemblies and fabricated pieces with material specifications and other applicable data.
e. General bulletins and catalog cuts describing complete apparatus, including operating principles and fundamentals.
f. Materials of construction of all components.

E. All equipment manufactures shall submit evidence of conformance with the Specifications as required by the individual Specifications Sections. Naming of a manufacturer in the Specifications is not an indication that the manufacturer's proposed or standard equipment is acceptable in lieu of the specified components and features. Naming is only an indication that the manufacturer may have the capability of engineering and supplying a system as specified.

F. Before executing any of the Work in this Section prints or Drawings shall be submitted to the ENGINEER showing dimensions, sizes, thickness, gauges, materials, finishes, joint attachments, erection procedure, and thermal expansion allowances.

G. A complete set of design calculations for the covers shall be submitted. These calculations shall be signed by a Registered Professional Engineer. All Work shall be fabricated and erected in accordance with the approved Drawings.

H. Certification that the specified material alloys, sizes, and quantities have been furnished shall be submitted upon completion of the Project.

I. Unit responsibility form not required for extruded flat panel covers.

J. Shop Drawings: Submit for approval the following:
1. Include the following:
a. Dimensions, sizes, thicknesses, gauges, materials, finishes.
b. Attachment and erection procedures.
c. Number and location of penetrations.
d. Penetration details.
e. Access hatch locations.
f. Special details not specifically indicated on the Drawings.
2. A copy of this specification section, with addendum updates included, and all referenced and applicable sections, with addendum updates included, with each paragraph check-marked to indicate specification compliance or marked to indicate requested deviations from specification requirements. Check marks (✓) shall denote full compliance with a paragraph as a whole. If deviations from the specifications are indicated, and therefore requested by the CONTRACTOR, each deviation shall be underlined and denoted by a number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons for requesting the deviation. The ENGINEER shall be the final authority for determining acceptability of requested deviations. The CONTRACTOR shall furnish equipment and/or services as specified if an exception and/or deviation is rejected. The

remaining portions of the paragraph not underlined will signify compliance on the part of the CONTRACTOR with the specifications. Failure to include a copy of the marked-up specification sections, along with justification(s) for any requested deviations to the specification requirements, with the submittal shall be sufficient cause for rejection of the entire submittal with no further consideration.

The CONTRACTOR shall submit the preventive maintenance information package as part of the shop drawing submittal package to the ENGINEER for review and approval. **SHOP DRAWING SUBMITTAL PACKAGE WILL NOT BE APPROVED WITHOUT ACCEPTANCE OF PREVENTIVE MAINTENANCE INFORMATION.**

## PART 2 - PRODUCTS

### 2.1 DESCRIPTION

A. The flat cover shall be clear-span and self-supporting from the peripheral structure. The aluminum cover shall be composed of panels and beams. All panels shall interlock with the adjoining beam and panels without the use of threaded fasteners. Uplift of each panel will be resisted with the use of an integral latch system. The use of structural members in contact with the contents of the basin is expressly prohibited. The flat cover shall consist of removable panels each weighing no more than 275 pounds, and other covers not to exceed 150 pounds, unless otherwise indicated on Drawings. The required lifting force per panel shall not exceed the dead weight of the panel. Each panel must be able to be removed without needing to remove more than the two adjacent panels. The need for removing flashing or "hold-down" extrusions longer than the width of the panel is prohibited. The flat cover shall have an integral aggressively non-skid surface. Raised surfaces without the use of texturing to achieve slip resistant is not acceptable. The use of checkered plate, paint, tape, sandblasting, or other applied systems to achieve the slip resistant surface is expressly prohibited.

B. The design shall prevent water pooling which may result in over-stressing the flat cover.

C. Cover manufacturer shall provide access hatches, gravity vents, and pipe penetrations as shown on the Drawings.

D. The removable closure panels shall be attached continuously along their edges to the structural members using an interlocking joint. Elastomeric weather seal gasket shall form a substantially airtight seal along the panel edges. The gaskets shall be fully enclosed to prevent ultraviolet exposure.

E. Access to any location under the cover shall be gained through integral gear hinged access hatches. The Access Hatch Panels shall have the identical properties as the rest of the aluminum cover including loads, deflection and slip

resistance specifications. The hinged access panels shall be the full panel width. The length of the access panel shall be clearly indicated on drawings. Hinged panel components including hinges, decking and lifting handles shall be extruded 6061-T6. While in the closed position the hatches will be completely flush therefore posing no tripping hazard. In the open position the panel shall lie flat on the cover and will not need a hold open device.

F. The cover system shall be mounted on aluminum angle attached to the inside face of the concrete to match existing aluminum cover systems in appearance and functionality. No portion of the cover system shall be mounted to the top surface of the concrete wall. The aluminum angle shall be mounted at an elevation that provides a zero transition between the cover system and the top of concrete.

## 2.2 MATERIALS

A. The following is a summary of approved materials and/or material specifications. All aluminum alloys shall be defined by the Aluminum Association and published in the Aluminum Standards and Data:
   1. Bolts and Fasteners: All bolts and fasteners shall be 316 stainless steel.
   2. Structural Shapes: Aluminum structural shapes shall be alloy 6061-T6, 6005A-T6, or 6063-T6 minimum 0.10 inch thick. Load supporting surfaces shall be of sufficient thickness to meet or exceed all loading requirements specified in this Section.
   3. Aluminum extrusions: 6061-T6 alloy, mill-finished.
   4. Closure-flashing-to-panel seals: 3/8-inch Hypalon, Santoprene, or Neoprene gaskets.
   5. Closure flashing anchors and hardware: Type 316 stainless steel, 3/8-inch diameter.
   6. Access hatch door and frame materials: Same as for cover panels.
   7. Access hatch hinges, handles, prop rods, and latches: Aluminum.
   8. Handrail: Removable, aluminum, able to prevent accidental entry into hatch opening.
   9. Miscellaneous Shapes: Miscellaneous aluminum shapes shall be alloy 6061-T6, 6005A-T6, or 6063-T6.
   10. Gaskets: All gaskets shall be Neoprene conforming to ASTM C864-90, resistant to ozone and shielded from exposure to ultraviolet light.
   11. Sealant: All sealants shall be resistant to ozone and ultraviolet light and conform with Federal Specification TT-S-00230C.
   12. Anchors shall be epoxy-type. Expansion-type anchors are not permitted.
   13. Nameplates, manufacturer's name, or other identifications: Maximum 6 inches by 6 inches in size.
   14. Cover configuration: Free-standing, flat, 1-piece, interlocking, supported at each end only, without intermediate supports, removable, arranged as indicated on the Drawings, with flat, planar surface exposed and welded reinforcing ribs and stiffeners facing downward toward water surface.

15. Covers components: Standard and specially reinforced panels, able to safely sustain specified loads without permanent deformation or evidence of failure.
16. Joints between panels: Horizontal tongue and groove type.
17. Access hatches:
    a. 1. Reinforcement: Aluminum structural members able to prevent bowing, warping, or other distortions.
    b. Doors: Able to be lifted and locked open by 1 person.
    c. Mounting: Curb mounted and flashed.
    d. Curbs: Minimum 3/16-inch thick with welded corners.
    e. Door seal: Gasket against curb.
18. Penetration reinforcement: Minimum 1/4-inch thick aluminum stiffeners, able to prevent bowing, sagging, warping, or other distortions.
19. Penetration flashing and sealant: Manufacturer's standard, able to prevent intrusion of air and allow for removal of covers with minimum disassembly of equipment, piping, or duct.
20. Pressure and vacuum relief: No additional measures required. Pressure and vacuum relief is provided by gravity ventilators and goose-neck vents, downstream of membrane trains, with the air space between membrane trains.
21. Panel top surface: Non-slip, manufactured as part of panels or applied to surfaces

## 2.3 EXPERIENCE

A. No equipment shall be supplied by any manufacturer not regularly engaged in the manufacturing and production of flat covers in the size and character herein specified. The manufacturer must have designed, manufactured and installed at least one roof of the same type and of similar size as units specified herein. This roof must be in satisfactory use for a period not less than five years.

## 2.4 DESIGN LOADS

A. The entire flat cover shall be designed to sustain the loads specified herein, within the stress limitations of the Aluminum Association Specifications for Aluminum Structures.

B. The load cases to be considered shall be those described below, unless more severe loads are specified by the purchaser.
    1. Dead Load: The dead load shall be defined as the weight of the structure and all material permanently attached to and supported by the structure.
    2. Live Load: 40 pounds per square foot live load plus dead load.
    3. Wind Load: The wind load shall be obtained by ASCE 7-98.
    4. Resistance to wind uplift.
    5. Vacuum/Pressure Load: 1-inch water column vacuum.
    6. Panel Design Load: In addition to the above mentioned loads, the aluminum panels shall be designed for a concentrated single load of 500 pounds on any

single panel area equal to 4 square feet. These loads are to be taken as acting separately from one another and not simultaneously with the other design loads.

7. MBR Basin cover design as indicated on the drawings is as follows:
    a. Dead load.
    b. 2. Live load.
        1) Live load case 1: 100 psf downward.
        2) Live load case 2: 65 psf upward due to seismic sloshing.
        3) Load case 3: 40 psf downward over entire cover plus 700 pound downward concentrated load over a 1-foot square area.
    c. Unbalanced live load: Live loads patterned in a way to create maximum shear, moments, and deflections.
8. Membrane cassette load: Aluminum cover panel designed to support loading from one fully wet weight of GE/Zenon 500D membrane cassette, 4 point loads at 2500 pounds each.
9. Load Combinations: The loads described above shall be applied to the flat cover in the following combinations:
    a. Dead load + live load case 1 + vacuum load.
    b. Dead load + live load case 2.
    c. Dead load + live load case 3 + vacuum load.
    d. Dead load + unbalanced live load + vacuum load.
    e. Dead load + membrane cassette load.
10. Deflections: For the above loads and load combinations, the deflection of all components (structural and cladding) shall not exceed L/240 with L equal to the short span of the component. This deflection limit applies not only to the flat cover as a whole, but also to the skin of the cover spanning between the supporting edges of each panel or module. Calculations stamped by a Registered Professional Engineer shall be provided at the time of submittal to ensure that this requirement has been met.
11. Temperature: The load combinations listed above shall be considered for a temperature change of 100° F below the installation temperature and 100° F above the installation temperature and for a material temperature range of 40° F below zero to 160° F above zero.
12. Seismic criteria:
    a. American Society of Civil Engineers (ASCE):
        1) 7-10 - Minimum Design Loads for Buildings and Other Structures.
13. Wind load:
    a. International Code Council (ICC)
    b. American Society of Civil Engineers (ASCE)
        1) 7-10 - Minimum Design Loads for Buildings and Other Structures.

## 2.5 CONNECTIONS

A. In no case shall a joint be designed to sustain a greater total resultant shear force than that which would be allowed by summing the allowable shear force of the individual fasteners, based on their net cross-section areas through the shear plane

and the allowable shear stress of the material. The use of manufacturers' test data to rationalize an increase in assumed fastener strengths is prohibited. In no case shall values greater than those published by the Aluminum Association and ASTM F593 for aluminum and stainless steel fasteners, respectively, be used. The allowable stresses are as follows:

| Fastener Material | Allowable Shear Stress |
|---|---|
| Series 316 Stainless Steel | 20% of Minimum Tensile Strength as published in ASTM F593 |
| 6061-T6 Aluminum | 11 ksi |
| 7075-T73 Aluminum | 18 ksi |

## 2.6 MANUFACTURERS

A. Acceptable Manufacturer:
   1. CST covers
   2. Or approved equal.

# PART 3 - EXECUTION

## 3.1 INSTALLATION

A. All Work shall be executed by skilled mechanics with a supervisor experience in the erection of flat covers. The flat cover shall be erected plumb and level and in proper alignment.

B. Field refabrication of structural components or panels will not be accepted. Forcing of the structure to achieve fit-up during construction is expressly forbidden and not acceptable.

C. All sealant joints shall be tooled slightly concave after sealant is installed. Care shall be taken to keep sealant confined to joint area, and any outside of the joint shall be moved so that the panels will be free from misplaced sealant. All gasket materials shall be continuous; splices will not be allowed between right angles.

## 3.2 WARRANTY

A. The flat cover manufacturer shall warrant that the work described herein shall be free from defects (workmanship and material). The flat cover manufacturer shall replace or repair only faulty workmanship or defective material furnished by it that is reported to it within one year from the date of completion of this scope of Work.

AGENCY REVIEW

XREFS: TB-WE-D; SEAL-UKG; SEAL-SR

G:\PROJECT\21007\CADD\DESIGN\GENERAL\21007G2.DWG, 2/28/2022 4:46:09 PM, klcasey, 1:2.1887

## GENERAL NOTES:

1. ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE MOST CURRENT ADOPTED MAG SPECIFICATIONS AND STANDARD DETAILS AS SUPPLEMENTED BY THE CITY OF CHANDLER.

2. THE CONTRACTOR SHALL OBTAIN ALL NECESSARY PERMITS PRIOR TO CONSTRUCTION.

3. THE DEVELOPMENT ENGINEER'S OFFICE SHALL BE NOTIFIED 24 HOURS PRIOR TO STARTING EACH PHASE OF CONSTRUCTION (480-782-3320).

4. PROJECT ELEVATIONS ARE BASED UPON NGVD 29 DATUM FOR AWRF. THE FOLLOWING BENCHMARKS WERE UTILIZED:

| BENCHMARK NUMBER | NGVD 29 ELEVATION | DESCRIPTION | EQUATION | NAVD 88 ELEVATION |
|---|---|---|---|---|
| AWRF 43A | 1213.88 | 3" BRASS CAP IN CONCRETE, ON ROAD SIDE BY SRP STRUCTURE | +1.693' | 1215.57 |

5. PRIOR TO ANY CONSTRUCTION IN THE PUBLIC RIGHT-OF-WAY, THE CONTRACTOR/DEVELOPER SHALL NOTIFY THE LANDSCAPE COMPLIANCE COORDINATOR AT 480-782-3428. ANY CONSTRUCTION WITHIN THE PUBLIC RIGHT-OF-WAY SHALL BE RESTORED TO ORIGINAL CONDITIONS USING THE FOLLOWING REQUIREMENTS:

   A. ALL TREES IMPACTED BY CONSTRUCTION SHALL BE REPLACED WITH THE SAME SIZE AND TYPE OF TREE AT A LOCATION DETERMINED BY THE CITY;

   B. ALL IRRIGATION SYSTEMS SHALL BE RESTORED TO FULLY FUNCTIONING STATUS. ANY IRRIGATION LOCATED BENEATH ASPHALT OR CONCRETE SHALL BE SLEEVED WITH SCHEDULE 40 PVC TWO NOMINAL SIZES LARGER;

   C. THE AREA OF CONSTRUCTION SHALL BE TREATED WITH PRE-EMERGENT HERBICIDE (I.E. SURFLAN);

   D. GRANITE OF A SIZE AND COLOR TO MATCH EXISTING SHALL BE SPREAD A MINIMUM OF TWO INCHES THICK;

   E. THE STREET DIVISION SHALL BE CONTACTED TO INSPECT ALL WORK BEFORE A CONDITIONAL ACCEPTANCE IS ISSUED;

   F. THE CONTRACTOR/DEVELOPER SHALL MAINTAIN THE AREA FOR NINETY DAYS AFTER CONDITIONAL ACCEPTANCE. AFTER 90 DAYS THE CITY SHALL BE CONTACTED FOR FINAL ACCEPTANCE AND ASSUMPTION OF MAINTENANCE.

6. ANY WORK PERFORMED BY THE CONTRACTOR:

   A. ANY WORK PERFORMED WITHOUT THE APPROVAL OF THE CITY ENGINEER AND/OR ALL WORK AND MATERIAL NOT IN CONFORMANCE WITH THE SPECIFICATIONS IS SUBJECT TO REMOVAL ABD REPLACEMENT AT THE CONTRACTOR'S EXPENSE;

   B. WHENEVER THE INSPECTOR FINDS ANY WORK BEING PERFORMED IN A DANGEROUS OR UNSAFE MANNER, OR CONTRARY TO THE PLANS OR SPECIFICATIONS, OR NOT MEETING THE INTENT OF THE PLANS OR SPECIFICATIONS, THE INSPECTOR WILL ISSUE A STOP WORK ORDER. UPON ISSUANCE OF A STOP WORK ORDER, THE CITED WORK SHALL IMMEDIATELY CEASE. THE STOP WORK ORDER SHALL STATE THE REASON FOR THE ORDER, AND THE CONDITIONS WHICH CITED WORK IS AUTHORIZED TO RESUME UPON WRITTEN ORDER TO RESUME WORK. WHERE AN EMERGENCY EXISTS, THE INSPECTOR SHALL NOT BE REQUIRED TO GIVE A WRITTEN NOTICE PRIOR TO STOPPING THE WORK. THE CONTRACTOR IS RESPONSIBLE FOR ALL COSTS AND DELAYS FOR THE WORK RELATED TO THE STOP WORK ORDER;

7. THE CONTRACTOR SHALL UNCOVER ALL EXISTING CITY UTILITY LINES BEING TIED INTO TO VERIFY THEIR TYPE, CONDITION, LOCATION, INVERT, SLOPE AND ANY OTHER INFORMATION NEEDED TO DETERMINE THAT THE UTILITY CONNECTION WILL FUNCTION AS DESIGNED. THE CONTRACTOR IS RESPONSIBLE FOR MAKING ANY REPAIRS NECESSARY TO THE LATERAL OR MAIN LINES OF THE CITY WATER, RECLAIMED WATER, SANITARY SEWER, AND/OR STORM DRAIN SYSTEM NECESSARY FOR THE CONNECTION TO FUNCTION AS DESIGNED. THE CONTRACTOR SHALL LOCATE OR HAVE LOCATED ALL EXISTING UNDERGROUND PRIVATE UTILITIES (ELECTRIC, TELEPHONE, PIPELINES, ETC.) AND STRUCTURES IN ADVANCE OF CONSTRUCTION AND SHALL ELIMINATE ALL CONFLICTS PRIOR TO START OF CONSTRUCTION. BLUE STAKE TELEPHONE (602) 263-1100.

8. THE CITY OF CHANDLER IS NOT RESPONSIBLE FOR LIABILITY INCURRED DUE TO DELAYS AND/OR DAMAGES TO UTILITIES IN CONJUNCTION WITH THIS CONSTRUCTION. THE CITY WILL NOT PARTICIPATE IN THE COST OF CONSTRUCTION OR UTILITY RELOCATION.

9. NO FINAL ACCEPTANCE SHALL BE ISSUED UNTIL 4 MIL PHOTO MYLAR REPRODUCIBLE "AS-BUILT" PLANS CERTIFIED AND SEALED BY A REGISTERED CIVIL ENGINEER, HAVE BEEN SUBMITTED AND ACCEPTED BY THE CITY ENGINEER.

10. APPLICATIONS FOR STREET CUT PERMITS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO APPROVAL OF IMPROVEMENT PLANS. ALL PAVEMENT REPLACEMENT SHALL BE IN ACCORDANCE WITH SECTION 336 AND AS MODIFIED BY CITY SUPPLEMENTS.

11. BACKFILLING SHALL NOT BE STARTED UNTIL LINES ARE APPROVED BY THE CITY ENGINEER. ALL BACKFILL SHALL BE HALF-SACK CLSM UNLESS OTHERWISE APPROVED ON THE PLANS. ABC OR NATIVE MATERIAL SHALL BE INSTALLED IN ACCORDANCE WITH MAG SECTION 601, TYPE I. BACKFILL PLACEMENT AND SURFACE REPLACEMENT SHALL BE IN ACCORDANCE WITH MAG STD DTL 200 T-TOP.

12. CONSTRUCTION OF CONCRETE OR PAVING ITEMS SHALL NOT COMMENCE UNTIL ALL UNDERGROUND WORK HAS BEEN INSPECTED AND TESTED.

13. DISPOSAL OF AND STOCKPILING OF EXCESS MATERIAL WITHIN THE CHANDLER CITY LIMITS OR PLANNING AREA SHALL BE DONE IN SUCH A WAY THAT WILL NOT CREATE A NUISANCE. THE PLACING OF MATERIAL ON PRIVATE PROPERTY OF ANOTHER REQUIRES WRITTEN AUTHORIZATION. EARTHWORK STOCKPILES ARE NOT TO EXCEED 6 FEET IN HEIGHT. SLOPES ON ALL SIDES OF THE STOCKPILE SHALL NOT EXCEED A 1 TO 2 RATIO OF HEIGHT TO LENGTH. ANY EARTHWORK STOCKPILE, EVEN LESS THAN 6 FEET, MUST BE REMOVED WITHIN 7 DAYS OF CITY NOTIFICATION IF DUST SUPPRESSION EFFORTS FAIL TO MAINTAIN SATISFACTORY AIRBORNE CONTAMINANT CONTROL.

14. TRAFFIC CONTROL SHALL BE MAINTAINED IN ACCORDANCE WITH THE CHANDLER TRAFFIC BARRICADE MANUAL AND APPROVED TRAFFIC SEQUENCING PLANS AND/OR NOTES.

15. THE CONTRACTOR SHALL PROVIDE ADEQUATE MEANS FOR CLEANING TRUCKS AND/OR OTHER EQUIPMENT OF MUD PRIOR TO ENTERING PUBLIC STREETS, AND IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN STREETS, ALLAY DUST, AND TAKE WHATEVER MEASURES ARE NECESSARY TO INSURE THAT ALL ROADS ARE MAINTAINED IN A CLEAN, MUD AND DUST-FREE CONDITION AT ALL TIMES THE CONTRACTOR SHALL UTILIZE A PM10-CERTIFIED STREET SWEEPER FOR STREET CLEANING.

16. AN APPROVED SET OF PLANS SHALL BE MAINTAINED ON THE JOB SITE AT ALL TIMES THAT WORK IS IN PROGRESS. DEVIATION FROM THE PLANS SHALL NOT BE ALLOWED WITHOUT AN APPROVED PLAN REVISION.

17. A MINIMUM HORIZONTAL SEPARATION OF SIX (6) FEET IS REQUIRED BETWEEN SEWER SERVICES AND WATER OR FIRELINE SERVICES. A MINIMUM HORIZONTAL SEPARATION OF SIX (6) FEET IS REQUIRED BETWEEN RECLAIMED WATER SERVICES AND SEWER, WATER, OR FIRELINE SERVICES.

18. SETBACKS FOR UTILITY POLES, STRUCTURES, AND OTHER SIMILAR FACILITIES (NOT INCLUDING LANDSCAPING) GREATER THAN 18 INCHES IN HEIGHT SHALL BE 5.5 FEET FROM THE BACK OF CURB UNLESS APPROVED IN WRITING BY THE CITY ENGINEER. IN CASES WHERE THE FACILITIES ARE ADJACENT TO A DECELERATION LANE, BUS BAY, OR MEDIAN CURB, THE SETBACK CAN BE REDUCED TO 2.5 FEET FROM THE BACK OF CURB.

19. SCREEN WALL OVER 7', RETAINING WALLS OVER 4' MUST HAVE A BUILDING PERMIT AND BE IN CONFORMANCE WITH CHANDLER BUILDING CODE.

## GENERAL NOTES (CONT):

20. ALL UNDERGROUND FACILITIES INSTALLED IN ANY REAL PROPERTY OUTSIDE THE CITY'S RIGHT-OF-WAY SHALL COMPLY WITH THE FOLLOWING MARKING STANDARDS IN ACCORDANCE WITH HOUSE BILL 2256. A YELLOW INSULATED COPPER WIRE OR OTHER APPROVED CONDUCTOR SHALL BE INSTALLED ADJACENT TO UNDERGROUND UTILITIES FOR FIRE LINE PIPING, POTABLE WATER DISTRIBUTION PIPING, SANITARY SEWER LINES, STORMWATER PIPING, RECLAIMED WATER PIPING, GRAVITY FLOW IRRIGATION PIPING AND PRESSURIZED IRRIGATION PIPING LARGER THAN TWO (2) INCHES IN DIAMETER UNLESS THESE FACILITIES CAN BE DETECTED FROM ABOVE GROUND WITH AN ELECTRONIC LOCATING DEVICE. ACCESS SHALL BE PROVIDED TO THE TRACER WIRE OR THE TRACER WIRE SHALL TERMINATE ABOVE GROUND AT EACH END OF THE PIPING. THE TRACER WIRE SHALL NOT BE LESS THAN 18 AWG AND THE INSULATION TYPE SHALL BE SUITABLE FOR DIRECT BURIAL.

21. ANY CONSTRUCTION DETOURS WILL REQUIRE AN ALL-WEATHER SURFACE PER MARICOPA COUNTY AIR QUALITY REQUIREMENTS.

22. THE CONTRACTOR SHALL SUPPLY PUBLIC WORKS INSPECTOR CONSTRUCTION MATERIAL TESTING DOCUMENTATION THROUGHOUT THE PROJECT.

23. ALL SITE IMPROVEMENTS, INCLUDING LANDSCAPE AND SITE CLEANUP, MUST BE COMPLETE PRIOR TO CERTIFICATE OF OCCUPANCY FOR ANY BUILDING WITHIN A PHASE

24. THE FOLLOWING UTILITY COMPANIES HAVE BEEN IDENTIFIED BY BLUE STAKE COORDINATION AND PROJECT PLANS HAVE BEEN SUBMITTED MOST RECENTLY AS NOTED:

| UTILITIES WITHIN OR AFFECTED BY THE PROJECT | |
|---|---|
| UTILITY CONTACT | DATE SUBMITTED |
| AIR PRODUCTS & CHEMICALS | N/A |
| ARIZONA PUBLIC SERVICE | N/A |
| AT&T TELEPHONE LONG DISTANCE | N/A |
| COX CABLE | N/A |
| EL PASO NATURAL GAS | N/A |
| QWEST | N/A |
| ROOSEVELT WATER CONSERVATION DISTRICT (RWCD) | N/A |
| SALT RIVER PROJECT (POWER) | N/A |
| SALT RIVER PROJECT (SRVWUA) | N/A |
| KINDER MORGAN ENERGY PARTNERS | N/A |
| SOUTHWEST GAS | N/A |
| SPRINT TELEPHONE LONG DISTANCE | N/A |

## SEWER NOTES:

1. A MINIMUM HORIZONTAL SEPARATION OF SIX FEET IS REQUIRED BETWEEN SEWER MAINS AND SERVICES AND WATER, FIRELINE, AND RECLAIMED MAINS AND SERVICES. PROTECTION SHALL BE IN ACCORDANCE WITH MAG SECT 610.5.5 WITH THE EXCEPTION DUCTILE IRON PIPE IS NOT ALLOWED FOR SEWER CONSTRUCTION.

2. ALL SEWER TAPS SHALL BE WYE, WYE SADDLE, OR TEE.

3. CONNECTIONS TO EXISTING SEWER MAINS SHALL BE ACCOMPLISHED BY MACHINE TAPPING, UTILIZING A SADDLE, OR BY CONSTRUCTION OF A MANHOLE.

4. SEWER TAPS SHOULD HAVE 4-1/2 FEET COVER AT PROPERTY LINE. TO RAISE THE TAP FROM THE MAINS DEEPER THAN 6 FEET AND LESS THAN 12 FEET, THE WYE AND 1/8 BEND SHALL BE SET AT A 45 DEGREE ANGLE FROM HORIZONTAL AND A SHORT PIECE OF STRAIGHT PIPE SHALL BE PLACED ON THE 1/8 BEND. ANOTHER 1/8 BEND IS PLACED AT THE OTHER END OF THE SHORT PIPE TO BRING THE TAP TO APPROPRIATE GRADE AT THE PROPERTY LINE. FOR MAINS 12 FEET OR DEEPER, REFER TO C-410.

5. ALL SEWER SERVICE CONNECTIONS SHALL BE EXTENDED A SUFFICIENT DISTANCE BEYOND STREET RIGHT-OF-WAY LINES TO CLEAR ALL FACILITIES TO BE INSTALLED IN PUBLIC UTILITY EASEMENTS WHICH PARALLEL THE STREET RIGHT-OF-WAY. REFER TO MAG STD DTL 440, TYPE A, FOR ADDITIONAL REQUIREMENTS.

6. ALL SEWER PIPE SHALL BE CONSTRUCTED WITH BEDDING CONFORMING TO C-402. ALL SEWER LINES 10 FEET IN DEPTH AND GREATER SHALL BE VCP PIPE, OR AS SPECIFIED ON THESE PLANS. LOCATOR WIRE AND IDENTIFICATION TAPE SHALL BE INSTALLED IN ACCORDANCE WITH C-408.

7. PIPE BACKFILL SHALL BE 1/2 SACK CLSM IN ACCORDANCE WITH MAG SECTION 728, UNLESS OTHERWISE DETAILED AND APPROVED ON THESE PLANS. PAVEMENT REPLACEMENT SHALL BE IN ACCORDANCE WITH MAG STD DTL 200, T-TOP WITH A MINIMUM 16" DEPTH ABC SHELF.

8. ALL MANHOLES SHALL BE PRECAST CONCRETE PER MAG STD DTL 420 WITH 5-FOOT DIAMETER SHAFTS, 30-INCH DIAMETER COVERS, AND WITHOUT STEPS. MANHOLES IN ARTERIAL STREETS AND FOR SEWERS 18" AND LARGER SHALL INCLUDE CORROSION PROTECTION. ALL MANHOLES SHALL BE SPRAYED WITH PESTICIDE COATING. SEE THE LIST OF APPROVED PRODUCTS FOR CORROSION PROTECTION AND PESTICIDE COATINGS.

9. CONCRETE MANHOLES CONSTRUCTED IN ARTERIAL STREETS SHALL BE COATED WITH A CORROSION PROTECTIVE COATING APPLIED IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATION.

10. CORROSION PROTECTIVE MANHOLES SHALL INCLUDE COMPOSITE FRAMES AND COVERS, COMPOSITE ADJUSTMENT RINGS, COMPOSITE OR POLYMER CONCRETE CONE AND RISER SECTIONS AND CAST-IN-PLACE BASES WITH APPROVED PROTECTIVE COATING. REFER LIST OF APPROVED PRODUCTS, SUPPLEMENTS TO MAG SECTIONS 345 AND 625, AND DETAILS C-400 AND C-401. CORROSION-PROTECTIVE MANHOLES AND MATERIALS USED SHALL BE AS SPECIFIED ON THE PLANS AND/OR SPECIAL PROVISIONS.

11. MANHOLES SERVING PUBLIC SEWER LINES 12-INCH AND SMALLER AND NOT WITHIN ARTERIAL STREETS SHALL BE COATED WITH A LATEX INSECTICIDE PAINT APPLIED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS. REFER TO THE CITY'S LIST OF APPROVED PRODUCTS FOR ALLOWABLE INSECTICIDE COATING PRODUCTS. THE COATING SHALL BE APPLIED IN ACCORDANCE WITH US ENVIRONMENTAL PROTECTION AGENCY RECOMMENDATIONS STARTING FROM THE TOP OF THE MANHOLE TO A DEPTH OF 8 FEET BELOW.

12. MANHOLE FRAME AND COVERS SHALL BE ADJUSTED PER C-401. DEBRIS SHIELDS SHALL BE USED TO PREVENT DEBRIS FROM ENTERING SANITARY SYSTEM. CONTRACTOR SHALL BE RESPONSIBLE TO CLEAN SYSTEM FOR A MINIMUM OF ONE REACH IF DEBRIS ENTERS SYSTEM. ANY MISSING OR DEFECTIVE FRAMES OR COVERS SHALL BE REPORTED TO THE CITY IN WRITING DURING THE INITIAL LOCATION PROCESS TO ALLOW FOR TIMELY REPLACEMENT.

## SEWER NOTES (CONT'D):

13. ALL NEW 8" AND LARGER SEWER LINES (INCLUDING STUB-OUTS) SHALL BE CLOSED CIRCUIT TV (CCTV) INSPECTED BY CITY CCTV VENDER PRIOR TO FINAL ACCEPTANCE. CITY PAYS FOR THE INITIAL INSPECTION IN ACCORDANCE WITH MAG SECTION 611. OWNER/CONTRACTOR MAY CONTRACT DIRECTLY WITH CITY'S CCTV VENDER OR USE THEIR PREFERRED NASSCO CERTIFIED CONTRACTOR FOR ADDITIONAL CCTV INSPECTION(S). SEWER LINES SHALL BE VACTORED AND WATER ADDED TO THE SYSTEM PRIOR TO CCTV INSPECTION, WITNESSED BY CITY INSPECTOR. ANY DEFECTS IN THE PIPE, CONSTRUCTION METHODS, OR INADEQUATE CLEANING SHALL BE CORRECTED AT NO ADDITIONAL COST TO THE CITY. PIPE DEFLECTIONS GREATER THAN ONE-INCH SHALL NOT BE ALLOWED. CITY CCTV VENDER SHALL INSPECT LINES AGAIN PRIOR TO END OF ONE-YEAR WARRANTY, PAID BY THE CITY.

14. A PLUG SHALL BE INSTALLED AT THE POINT(S) OF CONNECTION TO EXISTING LINES (OUTFALLS) AT THE START OF CONSTRUCTION PER C-403. EACH RESPECTIVE PHASE SHALL BE PLUGGED AND REMAIN PLUGGED UNTIL ACCEPTED BY THE CITY. NO FLOWS SHALL BE RELEASED INTO THE CITY SANITARY SEWER UNTIL ALL TESTS HAVE BEEN PASSED AND APPROVED BY THE CITY. FAILURE TO INSTALL PLUG MAY RESULT IN CLEANING EXISTING SEWER ONE-MILE IN EACH DIRECTION.

## GRADING AND DRAINAGE NOTES:

1. A GRADING PERMIT IS REQUIRED.

2. NO MINIMUM FINISH FLOOR ELEVATION SHALL BE ALTERED.

3. STAKING FINISH FLOOR ELEVATION IS THE RESPONSIBILITY OF THE DEVELOPER AND HIS ENGINEER.

4. CONTRACTOR SHALL PROVIDE GRADING FOR POSITIVE DRAINAGE IN ALL RETENTION BASINS AT ELEVATIONS AS SHOWN ON THE PLANS. BOTTOM OF BASIN SHALL BE GRADED TO DRAIN TOWARD DRYWELLS (WHEN USED). MAXIMUM SIDE SLOPES SHALL BE 4:1.

5. DRYWELL INLET GRATE SHALL BE FLUSH WITH ROAD SURFACE OR TURF, OR 1-1/2" ABOVE THE FINISHED GRADE OF DECOMPOSED GRANITE LANDSCAPED AREAS.

6. DRILLING LOGS FOR DRYWELLS WILL BE FURNISHED TO THE CITY INSPECTOR PRIOR TO FINAL ACCEPTANCE.

7. A PERCOLATION TEST SHALL BE REQUIRED OF COMPLETED DRYWELLS PRIOR TO ACCEPTANCE. SHOULD EXISTING SOIL CONDITIONS BE ENCOUNTERED WHICH LACK SUFFICIENT PERCOLATION RATES, ADDITIONAL DRYWELLS OR AN ALTERNATE METHOD OF STORM WATER RUN-OFF DISPOSAL WILL BE REQUIRED.

| DRYWELL KEY MAP # | ADEQ REG # | FIELD PERC RATE (CFS) |
|---|---|---|
| N/A | N/A | N/A |

8. DRYWELL CONSTRUCTION SHALL BE DONE ONLY BY CONTRACTORS LICENSED BY THE ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY. APPLICATION FOR DRYWELL REGISTRATION WAS SUBMITTED TO ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY ON 4/5/2012 (DATE)

9. THE APPROVED DRYWELL REGISTRATION SHALL BE SUBMITTED TO THE CITY BY THE DEVELOPER OR HIS ENGINEER AT THE TIME AS-BUILTS ARE SUBMITTED.

10. ALL WEEP HOLES IN WALLS SHALL BE PROVIDED WITH EROSION PROTECTION 12" THICK WITH D50 = 4" RIPRAP, 24" IN WIDTH, EXTENDED TO THE BACK OF SIDEWALK OR TO THE BOTTOM OF RETENTION BASIN, WHICHEVER APPLIES.

11. A RETAINING WALL WILL BE REQUIRED IF AT THE COMPLETION OF GRADING THERE EXISTS MORE THAN ONE FOOT OF DIFFERENCE IN ELEVATION BETWEEN THIS SITE AND ADJACENT PROPERTIES.

12. SCREEN WALLS OVER 7', RETAINING WALLS OVER 4' MUST HAVE A BUILDING PERMIT AND BE IN CONFORMANCE WITH CHANDLER BUILDING CODE.

13. THE EXISTING RETENTION AND DRAINAGE FACILITIES ON THIS SITE WILL NOT BE REMOVED FROM SERVICE UNTIL THE PERMANENT RETENTION AND DRAINAGE FACILITIES ARE FUNCTIONAL.

## PAVING NOTES:

1. THE LOCATION OF ALL VALVES MUST BE REFERENCED AT ALL TIMES BY THE CONTRACTOR DURING CONSTRUCTION.

2. NO PAVING CONSTRUCTION SHALL BE PERFORMED UNTIL ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY HAVE BEEN COMPLETED.

3. THE BASE COURSE WILL NOT BE PLACED ON SUBGRADE UNTIL BASE REQUIREMENTS HAVE BEEN COMPLETED AND ACCEPTED BY THE CITY ENGINEER.

4. GUTTERS WILL BE WATER TESTED IN THE PRESENCE OF THE CITY ENGINEER TO INSURE PROPER DRAINAGE PRIOR TO FINAL APPROVAL.

5. THE EXACT POINT OF PAVEMENT MATCHING FOR TERMINATION AND OVERLAY MAY BE DETERMINED IN THE FIELD BY THE CITY ENGINEER.

6. NO JOB WILL BE CONSIDERED COMPLETE UNTIL ALL CURBS, PAVEMENT AND SIDEWALKS HAVE BEEN SWEPT CLEAN OF ALL DIRT AND DEBRIS.

7. STREET NAME SIGNS WILL BE INSTALLED BY THE CITY ON DEVELOPER INSTALLED POLES AT THE DEVELOPER'S EXPENSE. POLES SHALL BE PER C-613. PAYMENT WILL BE COLLECTED AT THE TIME A PAVING PERMIT IS ISSUED.

8. ALL TRAFFIC CONTROL SIGNS SHALL BE CONSTRUCTED OF HIGH INTENSITY GRADE SHEETING, UNLESS OTHERWISE NOTED.

9. ALL STREET SECTIONS, EXCEPT ARTERIALS, SHALL HAVE INSTALLED A PRESERVATIVE SEAL COAT PER MAG SECTION 334 AND SHALL BE TIRE RUBBER MODIFIED SURFACE SEAL PER MAG SECTION 718. THE SEAL SHALL BE INSTALLED AT THE END OF THE WARRANTY PERIOD, OR AT THE CITY'S OPTION, A FEE MAY BE COLLECTED IN LIEU OF THE APPLICATION.

10. ALL CURB-OPENING CATCH BASIN ACCESS COVERS SHALL BE PER MAG STD DTL 536, ALTERNATE COVER. A STORM DRAIN INLET MARKER IN ACCORDANCE WITH C-508 SHALL BE INSTALLED ON THE TOP OF THE CURB AND ALIGNED WITH THE CENTER OF THE INLET.

11. PAVEMENT MATCHING AND SURFACING REPLACEMENT SHALL BE IN ACCORDANCE WITH MAG STD DTL 200, MAG SECTION 336, AND SECTION 337. ALL CRACKS AND JOINTS SHALL BE SEALED, UNLESS OTHERWISE DIRECTED BY CITY ENGINEER OR STREET SUPERINTENDENT.

AGENCY REVIEW

## APS AND/OR SRP FACILITIES:

NOTE: THE SALT RIVER PROJECT, ARIZONA PUBLIC SERVICE, AND OTHER UTILITY PROVIDERS MAINTAIN ENERGIZED AERIAL AND UNDERGROUND ELECTRICAL POWER LINES AND GAS PIPE LINES IN THE IMMEDIATE VICINITY OF THIS PROJECT. DO NOT CONSIDER THESE LINES TO BE INSULATED OR ENCASED. CONSTRUCTION PERSONNEL WORKING IN PROXIMITY TO THESE UTILITY LINES ARE EXPOSED TO AN EXTREME HAZARD. CONTRACTORS, THEIR EMPLOYEES, AND ALL OTHER CONSTRUCTION PERSONNEL WORKING ON THIS PROJECT ARE WARNED OF THE DANGER AND INSTRUCTED TO TAKE ADEQUATE PROTECTIVE MEASURES. (SEE OSHA STD. 1926) AS AN ADDITIONAL SAFETY PRECAUTION, CONTRACTORS ARE INSTRUCTED TO CALL THE SALT RIVER PROJECT AT (602) 236-8888 OR ARIZONA PUBLIC SERVICE AT (602) 371-7171, TO ARRANGE, IF POSSIBLE, TO HAVE THESE LINES DE-ENERGIZED OR RELOCATED WHEN THE WORK REACHES THEIR IMMEDIATE VICINITY. THE COST OF SUCH TEMPORARY ARRANGEMENTS SHALL BE BORNE BY THE CONTRACTOR. A 2 WORKING DAY (48 HOUR) ADVANCE NOTICE MUST BE GIVEN BUT UP TO 60 DAYS LEAD TIME MAY BE REQUIRED FOR RELOCATION OR OTHER ARRANGEMENTS.

## UTILITIES LOCATION:

UTILITIES LOCATION: THE CONTRACTOR, 2 WORKING DAYS (48 HOURS) PRIOR TO PERFORMING UNDERGROUND EXCAVATION, SHALL TELEPHONE THE BLUE STAKE CENTER AT (602) 263-1100 TO OBTAIN FIELD UNDERGROUND UTILITIES LOCATION MARKING, THE CONTRACTOR SHALL UNCOVER AHEAD OF CONSTRUCTION, ALL LINES BEING TIED INTO AND ALL INTERSECTING UTILITIES SHOWN ON THE PLANS OR MARKED BY BLUE STAKE TO VERIFY THEIR LOCATION AND DEPTH. UTILITY SERVICES SHALL BE LOCATED AND PROTECTED BY THE CONTRACTOR. ALL PRECAUTIONS SHALL BE USED WHILE WORKING NEAR ALL UTILITIES, TO AVOID INJURY OR DEATH TO PERSONNEL PROPERTY DAMAGE AND/OR INTERRUPTION OF SERVICE. (SEE OSHA STD 1926-651 (A)).

## RECLAIMED WATER NOTES:

1. RECLAIMED WATER LINES SHALL BE CONSTRUCTED IN ACCORDANCE WITH MAG SECTION 616, CITY SUPPLEMENTS, AND THESE NOTES.
2. THE MINIMUM DEPTH OF COVER WITHIN THE RIGHT-OF-WAY OF ARTERIAL STREETS SHALL BE 7', AND IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS.
3. PIPE SEPARATION ALSO SHALL CONFORM TO ARIZONA RULE R18-9-602, PIPELINE CONVEYANCES OF RECLAIMED WATER.
4. A REDUCED PRESSURE BACKFLOW DEVICE SHALL BE INSTALLED, AS PART OF THE ORIGINAL SYSTEM, ON A RECLAIMED WATER SYSTEM THAT WILL USE POTABLE WATER AS AN INITIAL SOURCE AND WILL USE RECLAIMED WATER AS A SOURCE LATER. ON SUCH A SYSTEM, CONCURRENT CONNECTIONS SHALL NOT BE MADE AT ANY TIME TO BOTH POTABLE WATER AND RECLAIMED WATER SYSTEMS, REGARDLESS WHETHER ONE OR BOTH SYSTEMS ARE DEVOID OF SUPPLY.
5. PRIVATE RECLAIMED WATER LINES SHALL BE INSTALLED IN SLEEVES WHERE THEY CROSS PUBLIC OR PRIVATE RIGHT-OF-WAY. PIPE SLEEVES SHALL BE PIPE MEETING THE REQUIREMENTS FOR CONVEYANCE PIPE AND SHALL BE TWO NOMINAL SIZES LARGER.
6. RECLAIMED WATER IRRIGATION SYSTEM SPRINKLER HEADS, VALVE BOXES AND COVERS, AND FLOW CONTROL HANDLES ON VALVES SHALL BE PURPLE.
7. THE WORDS "RECLAIMED WATER" SHALL BE STENCILED ON BACKFLOW ASSEMBLIES USING THE COLOR PURPLE OR SHALL BE OTHERWISE BE LEGIBLY MARKED.
8. PVC PIPE SHALL NOT BE EXPOSED TO DIRECT ULTRAVIOLET RADIATION (SUNLIGHT) FOR MORE THAN 30 DAYS, WHETHER THE TIME IS CONTINUOUS OR CUMULATIVE. PVC PIPE SHALL BE PROTECTED FROM DIRECT ULTRAVIOLET RADIATION FOR ANY TIME OF EXPOSURE EXCEEDING 30 DAYS. PVC PIPE THAT HAS BEEN DISCOLORED BY EXPOSURE TO ULTRAVIOLET RADIATION IS UNACCEPTABLE.
9. VALVES 4" THROUGH 24" SHALL BE GATE VALVES UNLESS NOTED OTHERWISE. EACH VALVE SHALL BE FURNISHED WITH A BAR WELDED TO THE OPERATING NUT IN ACCORDANCE WITH C-406, THEREBY REQUIRING A TOOL WITH A KEY SLOT TO EXERCISE THE VALVE. VALVE BOXES AND COVERS SHALL CONFORM TO C-406. A DEBRIS CAP, WHICH CONFORMS TO MAG STD DTL 392 SHALL BE INSTALLED IN EACH VALVE BOX.
10. NO VALVE, RISER, BOX OR COVER SHALL BE LOCATED BENEATH OR WITHIN A SIDEWALK OR SIDEWALK RAMP.
11. CITY RECLAIMED WATER VALVES SHALL BE OPERATED BY CITY OF CHANDLER PERSONNEL ONLY.
12. CITY OF CHANDLER WILL FURNISH AND INSTALL WATER METERS WITH PREVAILING COSTS PAID BY THE DEVELOPER.
13. METER BOXES AND COVERS SHALL BE SUPPLIED BY THE DEVELOPER AND SHALL BE INSTALLED BY THE CONTRACTOR FACING AWAY FROM THE STREET. METER BOXES FOR METERS 2" AND SMALLER SHALL BE CONCRETE AND SHALL CONFORM TO MAG STD DTL 320 OR SHALL BE POLYMER CONCRETE AND CONFORM TO C-301. THE INSIDE OF EACH METER BOX SHALL BE PAINTED PURPLE. METER BOX COVERS SHALL BE POLYMER CONCRETE AND SHALL CONFORM TO C-301. METER BOX COVERS SHALL BE CAST WITH THE WORDS "RECLAIMED WATER" IN THE OUTSIDE SURFACE OR HAVE TAGS WITH THE WORDS "RECLAIMED WATER" FIRMLY ATTACHED TO THE OUTSIDE SURFACE. LETTERING SIZE AND FORMAT SHALL BE SIMILAR TO THE LETTERING IN MAG STD DTL 310. TAGS SHALL OTHERWISE MEET THE REQUIREMENTS FOR RECLAIMED WATER VALVE TAGS.
14. METER VAULTS SHALL BE IN CONFORMANCE TO C-416. THE INSIDE OF EACH METER VAULT AND METER BOX SHALL BE PAINTED PURPLE. METER VAULT AND METER BOX COVERS SHALL INCLUDE THE WORDS "RECLAIMED WATER" AS REQUIRED FOR METER BOX COVERS ABOVE FOR METERS 2" AND SMALLER. THE CITY OF CHANDLER WATER DISTRIBUTION DIVISION SHALL BE NOTIFIED 24 HOURS BEFORE INSTALLATION AT (480) 782-3700.
15. WARNING SIGNS: AREAS IRRIGATED WITH RECLAIMED WATER SHALL BE IDENTIFIED BY SURFACE MOUNTED SIGNS, AT LEAST 12" WIDE BY 9" HIGH, OF C-405 PAGE 11 OF 12. SIGNS SHALL BE PROMINENTLY LOCATED AT ALL SUBDIVISION AND PARK ENTRANCES, IN ALL AREAS SUBJECT TO IRRIGATION, AND AT ALL LAKES AND WATER FEATURES. SIGNS SHALL BE POSTED AT EACH PEDESTRIAN ENTRANCE AND ACCESS POINT TO AN AREA WHERE RECLAIMED WATER IS USED. SIGNS SHALL BE SPACED AT A MAXIMUM INTERVAL OF 100 YARDS, EXCEPT FOR ROADWAY MEDIANS, WHERE SIGNS MAY BE SPACED AT A MAXIMUM INTERVAL OF 300 YARDS.
16. RECLAIMED WATER LINES GREATER THAN OR EQUAL TO 4" IN DIAMETER SHALL BE TESTED IN ACCORDANCE WITH THE SAME REQUIREMENTS AS POTABLE WATER LINES. RECLAIMED WATER LINES LESS THAN 4" IN DIAMETER ARE NOT REQUIRED TO BE TESTED. ON A RECLAIMED WATER SYSTEM THAT WILL NOT USE POTABLE WATER AS AN INITIAL SOURCE, RECLAIMED WATER MAY BE USED IN LIEU OF POTABLE WATER TO FILL RECLAIMED WATER PIPE BEING TESTED. DISINFECTION OF THE RECLAIMED WATER MAIN SHALL NOT BE REQUIRED.
17. RECLAIMED WATER LINES LARGER THAN TWO (2) INCHES IN DIAMETER SHALL HAVE LOCATOR WIRE INSTALLED PER C-408.

## WATER NOTES:

1. ALL EXTENSIONS TO EXISTING WATER LINES OVER ELEVEN (11) MONTHS IN AGE SHALL HAVE A NEW VALVE OF LIKE SIZE INSTALLED AT THE POINT OF EXTENSION. A 3/4" SADDLE AND RISER SHALL BE INSTALLED ON THE LINE BETWEEN THE NEW VALVE AND THE FIRST EXISTING VALVE. THIS LINE WILL BE FLUSHED AND TESTED BY THE CITY AND THE 3/4" NUT AND RISER REMOVED.
2. WATERLINES SHALL BE INSTALLED PER C-308 AND THE CITY SUPPLEMENT TO SECTION 610. TESTING SHALL BE IN ACCORDANCE WITH SECTION 611. DEVELOPER IS RESPONSIBLE FOR TESTING PRIVATE WATERLINES 4" AND LARGER.
3. FIRE HYDRANTS SHALL BE FURNISHED BY THE CONTRACTOR AND INSTALLED IN ACCORDANCE WITH C-303 AND C-305.
4. ALL WATER SERVICE LINE AND METER BOX INSTALLATIONS SHALL CONFORM TO C-301. METER BOXES AND LIDS SHALL BE SUPPLIED BY THE DEVELOPER AND INSTALLED FACING THE LOT.
5. CITY OF CHANDLER WILL FURNISH AND INSTALL ALL WATER METERS WITH PREVAILING COSTS TO BE PAID BY DEVELOPER. THE CITY OF CHANDLER WATER DIVISION SHALL BE NOTIFIED AT (480) 782-3700 24 HOURS PRIOR TO INSTALLATION. THE DEVELOPER SHALL PROVIDE ANY NECESSARY WATER METER ADAPTERS FOR CONNECTION TO THE SERVICE LINES.
6. ALL VALVES 6" - 24" SHALL BE GATE TYPE IN CONFORMANCE WITH MAG SECTION 630.3, UNLESS OTHERWISE NOTED.
7. ALL VALVE BOXES SHALL CONFORM TO C-307.
8. CITY WATER VALVES SHALL BE OPERATED BY CITY PERSONNEL ONLY. CITY REQUIRES A 48 HOUR NOTICE FOR SYSTEM SHUTDOWNS. CONTRACTOR IS REQUIRED TO NOTIFY AFFECTED CUSTOMERS 24 HOURS PRIOR. BUSINESS' MAY REQUIRE AFTER HOURS SHUTDOWNS. RESIDENTIAL FLOWS AFTER SHUTDOWN MAY REQUIRE A PUMP. CONTRACTOR IS RESPONSIBLE TO INSTALL 2" TAPS TO RELIEVE PRESSURE AND ALLEVIATE RESIDUAL FLOWS WHEN NEEDED.
9. ALL TAPS SHALL USE A BRONZE SERVICE SADDLE. EIGHT (8) INCHES OR LESS SHALL BE SINGLE STRAP AND TEN (10) INCHES OR GREATER SHALL BE DOUBLE STRAP.
10. TAPS IN ACP SHALL BE MADE IN ACCORDANCE WITH THE RECOMMENDATIONS OF THE ACP MANUFACTURERS ASSOCIATION.
11. ALL FIRELINE PIPING, POTABLE WATER DISTRIBUTING PIPING LARGER THAN TWO (2) INCHES IN DIAMETER SHALL HAVE TRACER WIRES INSTALLED PER C-408.
12. ALL PIPE IN THE GROUND SHALL HAVE AWG THWN #14 INSULATED COPPER TRACING WIRE ATTACHED TO THE PIPE AND INTERCONNECTED TO VALVES AT VALVE BOX SPACING INTERVALS. WARNING TAPE IS TO BE USED BURIED A MINIMUM 12" ABOVE THE PIPE. SEE C-408.
13. POLYETHYLENE ENCASEMENT SHALL CONFORM WITH THE APPLICABLE REQUIREMENTS OF AWWA C-600 & AWWA C-105.
14. MECHANICAL OR RESTRAINED JOINT DUCTILE IRON PIPE SHALL BE USED FOR WATER LINE PROTECTION WHEN MAG STD DTL 404 IS SPECIFIED ON THE PLANS.
15. VALVE BOX AND COVER GRADE LOCATED OUTSIDE OF A PAVED AREA SHALL BE SET ONE HALF INCH ABOVE SIDEWALK OR ADJACENT GRADE PER C-317.
16. NO VALVE BOX SHALL BE LOCATED WITHIN SIDEWALK OR SIDEWALK RAMP.
17. ALL 1" SERVICES SHALL BE INSTALLED WITH APPROVED ANGLE BALL METER VALVE, OF A SIZE DEPENDENT ON WATER METER SIZE. SEE C-301.
18. ALL FIRE HYDRANTS SHALL BE PROVIDED WITH "OUT OF SERVICE" SIGNS AT TIME OF INSTALLATION. THE SIGNS SHALL COMPLY WITH FIRE DEPARTMENT STANDARD DETAIL NO. FD123 AND SHALL REMAIN ON THE FIRE HYDRANTS UNTIL THE WATER LINES ARE TESTED, APPROVED AND PRESSURIZED. THE SIGNS SHALL BE REINSTALLED AT ANY TIME ANY FIRE HYDRANTS ARE TAKEN OUT OF SERVICE, REGARDLESS OF REASON OR THE AMOUNT OF TIME THE FIRE HYDRANTS ARE EXPECTED TO BE OUT OF SERVICE, AND DISPATCH SHALL BE NOTIFIED AT (480) 782-4130. ONLY CITY PERSONNEL SHALL REMOVE A SIGN.

## FIRE DEPARTMENT NOTES TO CONTRACTOR:

CONSTRUCTION

- FIRE DEPARTMENT VEHICLE ACCESS ROADWAYS SHALL BE PROVIDED AND MAINTAINED THROUGHOUT CONSTRUCTION. TEMPORARY ACCESS ROADS SHALL HAVE AN UNOBSTRUCTED WIDTH OF NOT LESS THAN TWENTY (20) FEET AND AN UNOBSTRUCTED VERTICAL CLEARANCE OF NO LESS THAN FIFTEEN (15) FEET CONSTRUCTED OF SIX (6) INCH COMPACTED AB, GRAVEL OR OTHER APPROVED MATERIALS. NO TRENCHING ACROSS FIRE ACCESS ROADS IS ALLOWED.
- PERMANENT FIRE VEHICLE ACCESS ROADWAYS SHALL HAVE AN UNOBSTRUCTED WIDTH OF NOT LESS THAN TWENTY (20) FEET EXCLUSIVE OF SHOULDERS, EXCEPT FOR APPROVED SECURITY GATES IN ACCORDANCE WITH SECTION 503.6 OF THE 2018 IFC, AN UNOBSTRUCTED VERTICAL CLEARANCE OF NOT LESS THAN FIFTEEN (15) FEET CONSTRUCTED OF AN ALL-WEATHER SURFACE. IF HYDRANTS ARE PLACED IN THE ACCESS ROAD, THE WIDTH SHALL BE AN UNOBSTRUCTED WIDTH OF NOT LESS THAN TWENTY-SIX (26) FEET CONSTRUCTED OF AN ALL-WEATHER SURFACE.
- APPROVED FIRE FLOW AND WATER SUPPLY SHALL BE PROVIDED AND MAINTAINED THROUGHOUT CONSTRUCTION. PRIOR TO ANY COMBUSTIBLES BEING BROUGHT ON SITE, AN APPROVED WATER SUPPLY SHALL BE AVAILABLE.

PLANS: BUILDING & SYSTEMS

- ANY WORK (INSPECTION, TESTING OR MAINTAINING) CONDUCTED ON FIRE PROTECTION SYSTEMS SHALL BE DONE BY A CONTRACTOR LICENSED TO PERFORM SUCH WORK BY THE STATE OF ARIZONA, AND CURRENTLY PERMITTED BY THE CHANDLER FIRE DEPARTMENT (SEE FD FORM NO. 707 - FIRE PROTECTION CONTRACTOR PERMIT).
- ALL CONSTRUCTION, MODIFICATIONS OR INSTALLATION SHALL COMPLY WITH NATIONALLY RECOGNIZED CODES AND STANDARDS, AND THE CITY CODES.
- FIRE SPRINKLER SYSTEM (S) SHALL BE INSTALLED IN ACCORDANCE WITH THE ADOPTED FIRE CODE, NFPA 13, AND CITY OF CHANDLER CODES.
- FIRE ALARM SYSTEMS SHALL BE INSTALLED IN ACCORDANCE WITH THE ADOPTED FIRE CODE, NFPA 72 AND CITY OF CHANDLER CODES.
- STANDPIPE & HOSE SYSTEMS SHALL BE INSTALLED IN ACCORDANCE WITH THE ADOPTED FIRE CODE, NFPA 14 AND CITY OF CHANDLER CODES.
- WET CHEMICAL EXTINGUISHING SYSTEMS SHALL BE INSTALLED IN ACCORDANCE WITH THE ADOPTED FIRE CODE, NFPA 17A AND CITY OF CHANDLER CODES.
- FIRE DEPARTMENT CONNECTIONS (FDC'S) INSTALLED IN ACCORDANCE WITH THE ADOPTED FIRE CODE, BUILDING CODE AND NFPA 13 FIRE SPRINKLER SYSTEMS SHALL BE TWO AND A HALF (2½) INCH FEMALE SWIVELS WITH NATIONAL STANDARD THREADS (NST). NO FDC SHALL BE LOCATED ON THE BUILDINGS (EXCEPT AS APPROVED BY THE FIRE MARSHAL OR IN THE DOWNTOWN DEVELOPMENT AREA PER FD144). WITH RESPECT TO HYDRANTS, DRIVEWAYS, BUILDINGS AND LANDSCAPING, FDC'S SHALL BE SO LOCATED THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS. THE LOCATION OF FDC'S SHALL BE LOCATED ON PRIVATE PROPERTY SIX (6) TO TEN (10) FEET BEHIND THE CURB (OF STREET) AT A PERMANENT ENTRANCE TO THE SITE OR AS OTHERWISE APPROVED BY THE FIRE MARSHAL.
- ALL FIRE DEPARTMENT HOSE CONNECTIONS AND STANDPIPE HOSE CONNECTIONS FOR FIRE DEPARTMENT USE SHALL BE TWO AND A HALF (2½) INCH NATIONAL STANDARD THREADS. NO HOSE SHALL BE ATTACHED TO THE FIRE DEPARTMENT HOSE STATIONS.
- RESIDENTIAL (MULTI-FAMILY) - ALL PRIVATE SHARED DOMESTIC AND RESIDENTIAL FIRE LINE MAINS SHALL HAVE A REDUCED PRESSURE BACKFLOW INSTALLED PER COC DETAIL C-315.
- FDC'S FOR NFPA 13R SPRINKLER SYSTEMS SHALL BE SINGLE FEMALE SWIVELS WITH ONE AND A HALF (1½) NATIONAL STANDARD THREADS.
- FIRE ALARM ROOM(S) & FIRE SPRINKLER ROOM(S) SHALL BE SIGNED IN ACCORDANCE WITH FD106 AND ZONE MAPS FOR FIRE ALARMS &SPRINKLER SYSTEMS SHALL BE PLACED AT EACH LOCATION (I.E. PANEL AND RISER).

TENANT IMPROVEMENT PROJECTS

ANY MODIFICATIONS TO EXISTING FIRE PROTECTION SYSTEMS SHALL BE SUBMITTED FOR PLAN REVIEW AND PERMITS TO THE DEVELOPMENT SERVICES DIVISION. PLANS SHALL BE REVIEWED, APPROVED, PERMIT ISSUED AND ON SITE PRIOR TO WORK BEGINNING.

INSPECTIONS

ALL NEW CONSTRUCTION AND TENANT IMPROVEMENT INSPECTIONS ARE CONDUCTED BY THE DEVELOPMENT SERVICES DIVISION, BUILDING SAFETY DEPARTMENT. PLEASE USE THE ON-LINE SCHEDULING TOOL TO SCHEDULE INSPECTIONS: https://developmentpermits.chandleraz.gov/clics/

| HEADS | SPRINKLER SYSTEM TEST REQUIRED |
|---|---|
| 9 OR < | A VISUAL INSPECTION ONLY IS REQUIRED |
| 10 - 19 | 50 PSI ABOVE NORMAL STATIC PRESSURE FOR 15 MINUTES |
| 20 OR > | 50 PSI ABOVE NORMAL STATIC PRESSURE FOR 2 HOURS |
| ALL NEW SYSTEMS | PER NFPA 13 |

THE CONTRACTOR SHALL PROVIDE THE CITY INSPECTOR WITH COPY OF:

- "CONTRACTOR'S MATERIAL AND TEST CERTIFICATE FOR ABOVEGROUND PIPING" IN ACCORDANCE WITH NFPA 13; AND
- "CONTRACTORS MATERIAL & TEST CERTIFICATE FOR UNDERGROUND PIPING" IN ACCORDANCE WITH NFPA 24; AND
- "CERTIFICATE OF COMPLIANCE" FOR FIRE ALARM SYSTEMS IN ACCORDANCE WITH NFPA 72, UPON SUCCESSFUL COMPLETION OF THE SYSTEM TEST AND PRIOR TO CITY ACCEPTANCE OF THE SYSTEM.

## SIGNING AND STRIPING

1. THE CITY TRANSPORTATION ENGINEER'S OFFICE SHALL BE NOTIFIED 5 BUSINESS DAYS PRIOR TO STARTING ANY SIGNING OR STRIPING WORK AT (480) 782-3454.
2. ALL PAVEMENT MARKINGS, SIGN MATERIALS AND CONSTRUCTION SHALL CONFORM TO ARIZONA DEPARTMENT OF TRANSPORTATION STANDARD DRAWINGS AND SPECIFICATIONS UNLESS OTHERWISE NOTED.
3. SIGN LOCATIONS AND OFFSETS MAY BE ADJUSTED BY THE CITY TRANSPORTATION ENGINEER TO IMPROVE VISIBILITY.
4. ALL MEDIAN NOSES SHALL BE PAINTED YELLOW WITH REFLECTIVE GLASS BEADS PER C-617.
5. ALL RAISED PAVEMENT REFLECTORS SHALL BE INSTALLED WITH CRAFCO PAVEMENT REFLECTOR ADHESIVE, OR EQUAL.
6. ALL TRAFFIC CONTROL SIGNS, EXCEPT STOP SIGNS, SHALL BE ATTACHED TO STREET LIGHT POLES IF THE POLE IS WITHIN 25 FT. OF SIGN LOCATION AS SHOWN ON THE SIGNING AND STRIPING PLANS.
7. ALL CROSSWALKS, STOP BARS, MINI-SKIPS, TURN ARROWS AND LEFT/RIGHT TURN LANE STRIPING SHALL BE THERMOPLASTIC.
8. ALL TRAFFIC CONTROL SIGNS SHALL BE CONSTRUCTED OF HIGH INTENSITY GRADE SHEETING SCREENED WITH 3-M APPROVED INKS OR EQUIVALENT APPROVED BY THE TRANSPORTATION DIVISION. WARRANTY DOCUMENTS ARE REQUIRED AND SHALL BE SUBMITTED PRIOR TO FINAL JOB ACCEPTANCE.
9. ALL EXISTING SIGNS TEMPORARILY REMOVED BY THE CONTRACTOR SHALL BE SALVAGED FOR REINSTALLATION BY THE CONTRACTOR. ALL EXISTING SIGNS PERMANENTLY REMOVED BY THE CONTRACTOR SHALL BE SALVAGED FOR RETURN TO THE CITY SIGN SHOP.
10. ALL CONFLICTING PAVEMENT MARKINGS WILL BE OBLITERATED BY WATER BLASTING BY THE CONTRACTOR. GRINDING IS NOT PERMITTED.
11. A SEALANT APPROVED BY THE CITY OF CHANDLER STREETS DIVISION SHALL BE APPLIED BY THE CONTRACTOR TO ALL AREAS OF PAVEMENT MARKING OBLITERATION. REFER TO THE LIST OF APPROVED PRODUCTS.
12. THE CITY TRANSPORTATION ENGINEER MAY REQUIRE THE CONTRACTOR TO ADJUST SIGNING AND STRIPING AS NECESSARY.
13. ALL CONFLICTING SIGNAGE SHALL BE REMOVED BY THE CONTRACTOR.
14. ALL CITY SIGNS MUST BE RETURNED TO THE CITY SIGN SHOP.

## CONTRACTOR NOTES:

1. CONTRACTOR SHALL PROTECT ALL EXISTING FIRE HYDRANTS AND WATER LINE SERVICE TAPS IN PLACE DURING CONSTRUCTION. ALL EXISTING FIRE HYDRANTS AND SERVICE TAPS SHALL REMAIN IN SERVICE DURING CONSTRUCTION.
2. THE CONTRACTOR IS RESPONSIBLE FOR ARRANGING THE RELOCATION AND ASSOCIATED COSTS OF ALL UTILITIES. A UTILITY RELOCATION SCHEDULE SHALL BE SUBMITTED PRIOR TO THE ISSUANCE OF PERMITS.
3. CONTRACTOR IS ADVISED THAT A SOILS REPORT HAS BEEN PREPARED FOR THIS PROJECT AND IS AVAILABLE FOR CONTRACTORS INFORMATION PRIOR TO AND AFTER BID. CONTRACTOR SHALL BASE THE BID ON AND BE PREPARED TO PROVIDE TRENCH SHORING AS REQUIRED ON THIS PROJECT AT NO ADDITIONAL COST TO THE CITY IN THE EVENT UNSUITABLE SOILS ARE ENCOUNTERED DURING THE CONSTRUCTION OF THIS PROJECT.
4. CONTRACTOR SHALL MAINTAIN PLANT ROADWAY ACCESS TO ALL FACILITIES DURING CONSTRUCTION. IF THE WORK REQUIRES INTERRUPTION OF EXISTING ACCESS TO OPERATING PLANT FACILITIES THE CONTRACTOR SHALL PROVIDE TEMPORARY ACCESS (APPROVED BY ENGINEER) TO THESE FACILITIES.
5. THE CONTRACTOR SHALL PROVIDE A TEMPORARY THRUST RESTRAINT SYSTEM FOR EXISTING PIPES WHEREVER THE INSTALLATION OF NEW PIPES DISTURBS THE EXISTING PIPES THRUST RESTRAINT. UPON COMPLETION OF THE NEW PIPE INSTALLATION, THE CONTRACTOR SHALL RESTORE THE EXISTING PIPE THRUST RESTRAINT SYSTEM TO LIKE NEW CONDITION.

Sheet No.D-1.00

SITE PLAN
SCALE = 1"=20'

0 10 20 40
1" = 20'

## KEYED NOTES

1. REMOVE ASPHALT AND CURB TO EXTENTS SHOWN
2. RELOCATE LIGHTPOLE (TYP), SEE ELECTRICAL SHEETS FOR DETAILS
3. REMOVE AND RELOCATE 8" DIA PVC POTABLE WATER PIPE AND GATE VALVES TO EXTENT SHOWN
4. REMOVE AND RELOCATE 2" DIA PVC DRAIN PIPE TO EXTENT SHOWN
5. REMOVE VALLEY GUTTER
6. REMOVE MANHOLE

## DEMOLITION NOTES:

1. CONTRACTOR SHALL FIELD VERIFY DIMENSIONS AND LOCATIONS OF EXISTING PIPE, ELECTRICAL AND STRUCTURES PRIOR TO DEMOLITION.
2. DEMOLITION OF OTHER UTILITIES, PIPING AND STRUCTURES MAY BE SHOWN ON YARD PIPING AND PROCESS PLANS.
3. ITEMS INDICATED AS BEING "REMOVED" SHALL BE REMOVED FROM EXISTING CONSTRUCTION AND THE SITE AS THE WORK PROGRESSES.
4. ITEMS INDICATED AS BEING "RELOCATED" SHALL BE MOVED, CLEANED, STORED AS REQUIRED AND REINSTALLED WHERE INDICATED OR AS DIRECTED BY THE ENGINEER.
5. ITEMS INDICATED AS BEING "SALVAGED" SHALL BE MOVED, CLEANED AND DELIVERED TO OWNER ON SITE TO LOCATION AS DIRECTED BY ENGINEER. IF THERE IS DAMAGE, WHERE DAMAGE IS BEYOND REPAIR, ITEM SHALL BE REPLACED AT CONTRACTOR EXPENSE.
6. CARE SHALL BE EXERCISED TO ENSURE THAT DAMAGE TO ITEMS TO REMAIN, TO BE RELOCATED, OR TO BE SALVAGED, IS MINIMIZED. CONTRACTOR SHALL PATCH OR REFINISH TO MATCH ADJACENT LIKE MATERIAL WHERE THERE IS DAMAGE, WHERE DAMAGE IS BEYOND REPAIR, ITEMS SHALL BE REPLACED AT CONTRACTORS EXPENSE.
7. ALL ELECTRICAL CONDUITS, DUCTBACKS AND LIGHT POLES SHOWN ARE SCHEMATIC. ACTUAL LOCATIONS MAY VARY.
8. CONTRACTOR SHALL COORDINATE WITH ENGINEER FOR DEMOLITION SCHEDULING AND APPROACH WITH THE GOAL TO KEEP THE PLANT OPERATIONAL AT ALL TIMES.

## CONTROL

### BENCHMARK #43A

SECTION 9, T2S, R5E, 3" BRASS CAP IN CONCRETE, 100' NORTH, 70' WEST OF INTERSECTION OF ARIZONA AVE AND QUEEN CREEK RD; ON ROADSIDE BY SRP STRUCTURE.
(NORTHING 823148.607, EASTING 723063.962)
ELEVATION = 1213.88 (NGVD29)

### VERTICAL DATUM

SURVEY BASED ON NGVD 29 ELEVATIONS (CITY OF CHANDLER DATUM PRIOR TO JULY 2011). TO CONVERT TO NAVD 88 (CITY OF CHANDLER DATUM AS OF JULY 2011) A VALUE OF 1.693 FEET IS ADDED TO THE NGVD 29 ELEVATIONS.

### HORIZONTAL DATUM:

THE DATUM IS "CITY OF CHANDLER", REVISED AUGUST 2007 AND PUBLISHED. THE "CITY DATUM" IS BASED ON NAD83, ARIZONA STATE PLANE, CENTRAL ZONE ADJUSTED FROM GRID TO GROUND. AVERAGE COMBINED SCALE FACTOR BEING 0.9998472125, AS DOCUMENTED IN CITY OF CHANDLER RECORDS.

4. EXISTING CHEMICAL CONTAINMENT TRENCH, SEE DETAIL 301 AND TRENCH CROSS SECTION D SHEET C-7.03

## SURVEY NOTES:

1. LOCATIONS, ELEVATIONS AND DIMENSIONS OF EXISTING UTILITIES, STRUCTURES AND OTHER FEATURES ARE SHOWN ACCORDING TO THE BEST INFORMATION AVAILABLE AT THE TIME OF THE PREPARATION OF THESE PLANS, BUT DO NOT PURPORT TO BE ABSOLUTELY CORRECT AND ARE APPROXIMATE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING LOCATIONS, ELEVATIONS AND DIMENSIONS OF ALL EXISTING UTILITIES, STRUCTURES AND OTHER FEATURES AFFECTING THE WORK AND AVOIDING DAMAGE TO SAME. LANDSCAPE IRRIGATION LINES ARE NOT SHOWN. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING ANY LANDSCAPE IRRIGATION LINES DAMAGES DURING CONSTRUCTION.
2. THE CONTRACTOR SHALL LOCATE OR HAVE LOCATED ALL EXISTING UNDERGROUND PIPELINES, TELEPHONE AND ELECTRIC CONDUITS, AND STRUCTURES IN ADVANCE OF CONSTRUCTION AND SHALL OBSERVE ALL POSSIBLE PRECAUTIONS TO AVOID DAMAGE TO SAME.
3. CONTRACTOR SHALL CONFIRM IN WRITING SURVEYED INFORMATION CLOSELY MATCHES THE DESIGN DOCUMENTS AND PROVIDE A SIGNED/SEALED SURVEY REPORT PRIOR TO START OF CONSTRUCTION. IF CONTRACTOR'S SURVEY DIFFERS FROM THE DESIGN DOCUMENTS, CONTRACTOR SHALL NOTIFY ENGINEER IN WRITING IMMEDIATELY PRIOR TO START OF CONSTRUCTION.

PLAN
SCALE: 1" = 20'

| PIPE POINTS | | | | |
|---|---|---|---|---|
| POINT # | ELEVATION | NORTHING | EASTING | DESCRIPTION |
| P01 | 1223.34 | 821518.64 | 728108.76 | 24" SW 22.5 DEGREE BEND |
| P02 | 1222.36 | 821531.92 | 728087.69 | 24" SW 45 DEGREE BEND |
| P03 | 1219.90 | 821783.30 | 728030.75 | 24" SW 11.25 DEGREE BEND |
| P04 | 1223.67 | 821817.30 | 728017.00 | 24" SW 45 DEGREE BEND |

## KEYED NOTES

1. CONNECT TO SRP CONSOLIDATED CANAL TURNOUT STRUCTURE 24" DIA RGRCP PIPE. LOCATION AND ELEVATION OF SRP CONSOLIDATED CANAL TURNOUT STRUCTURE 24" DIA RGRCP PIPE ARE APPROXIMATE. CONTRACTOR TO FIELD VERIFY. IF CONTRACTOR'S FIELD VERIFICATION DIFFERS FROM THE DESIGN DOCUMENTS, CONTRACTOR SHALL NOTIFY THE ENGINEER IN WRITING IMMEDIATELY PRIOR TO CONNECTING
2. 2" DIA. COMBINATION AIR/VACUUM VALVE

NOTES:

1. ACTUAL NEW PIPE ALIGNMENTS AND DEPTH SHALL BE ADJUSTED IN THE FIELD TO AVOID CONFLICT WITH OTHER UTILITIES. ALL LOCATION ADJUSTMENTS SHALL BE APPROVED BY THE ENGINEER.
2. ALL PIPELINES SHALL MAINTAIN A MINIMUM 4'–0" OF COVER, UNLESS OTHERWISE NOTED.
3. ALL VALVES ON NPW AND POT LINES ARE TO BE INSTALLED WITHIN 3'–0" OF FITTINGS, UNLESS OTHERWISE NOTED.
4. INSTALL NPW VALVE BOXES AND COVERS PER COC STANDARD DETAILS C–406 AND C–317.
5. ELECTRICAL DUCT BANKS VARY IN DIMENSIONS AND DEPTH OF BURIAL, CONTRACTOR TO FIELD VERIFY.
6. ALL NEW MANHOLES SHALL BE 5'–0" IN DIAMETER AND INSTALLED PER MAG STANDARD DETAIL 420, UNLESS OTHERWISE NOTED. ALL NEW MANHOLES SHALL HAVE A COVER AND COLLAR PER COC STANDARD DETAIL C–400 AND C–401, RESPECTIVELY. ALL NEW SEWER MANHOLES SHALL HAVE PVC LINERS. SEE SPECIFICATION SECTION 09910.
7. INSTALL POTABLE WATER VALVE BOXES AND COVERS PER COC STANDARD DETAILS C–307 AND C–317.
8. CONTRACTOR SHALL FIELD VERIFY ALL CONNECTIONS TO EXISTING PIPES AND/OR FACILITIES PRIOR TO CONSTRUCTION.
9. ALL DISIMILAR METALS SHALL HAVE DIELECTRIC ISOLATION FITTINGS PER DETAIL 401 SHEET M–7.04.
10. SHADE CANOPIES NOT SHOWN FOR CLARITY.
11. ALL POTABLE AND NON–POTABLE WATER LINES SHALL BE INSTALLED PER MAG STANDARD DETAIL 404 FOR SEPARATION AND/OR PROTECTION. WHEN A NON–POTABLE WATER MAIN IS ADJACENT OR CROSSES A POTABLE WATER MAIN, THE NON–POTABLE WATER MAIN SHALL BE CONSIDERED A PRESSURE OR FORCE SANITARY SEWER, WHEN A NON–POTABLE WATER MAIN IS ADJENCENT OR CROSSES A SANITARY SEWER, THE NON–POTABLE WATER MAIN SHALL BE CONSIDERED A POTABLE WATER MAIN. PROCESS LINES SHALL BE CONSIDERED AS A PRESSURE OR FORCE SANITARY SEWER AT ALL TIMES.
12. NPW LINES AND POT LINES SHALL HAVE 4'–0" OF MINIMUM COVER. INSTALL FITTINGS AS NECESSARY TO MAINTAIN CLEARANCE AS REQUIRED.
13. THRUST BLOCKS SHALL BE INSTALLED FOR ALL PIPING UP TO 24". RESTRAINED FITTINGS ARE ACCEPTABLE IN AREAS WHERE THRUST BLOCKS CANNOT BE INSTALLED. CONTRACTOR SHALL OBTAIN PRIOR APPROVAL FROM THE ENGINEER FOR SUBSTITUTING RESTRAINED JOINTS FOR THRUST BLOCKS. APPROVAL IS AT THE DISCRETION OF THE ENGINEER.
14. CONNECT TO EXISTING PIPE.
15. THE SITE CONTAINS SEVERAL EXISTING UTILITIES. SOME OF THE NEW PIPING IS PROPOSED IN VERY CLOSE PROXIMITY TO EXISTING PIPING. CONTRACTOR SHALL PROTECT EXISTING PIPING DURING INSTALLATION OF NEW STRUCTURES/PIPING.
16. THRUST RESTRAINTS (INCLUDING THRUST BLOCKS) ARE LOCATED ON ALL EXISTING BURIED PIPING. CONTRACTOR SHALL LOCATE AND PROTECT ALL EXISTING THRUST RESTRAINTS. CONTRACTOR SHALL INSTALL TEMPORARY THRUST RESTRAINTS ON EXISTING PIPING THAT MAY BE IN CONFLICT WITH NEW PIPING AND THEN REINSTALL THRUST RESTRAINTS.
17. NOT ALL VALVES ARE SHOWN ON YARD PIPING SHEETS SEE SPECIFICATIONS AND OTHER SHEETS FOR VALVE INFORMATION.
18. IN AREAS OF NEW PAVEMENT ALL EXISTING VALVE BOXES SHALL BE ADJUSTED OR REMOVED AND REPLACED AS NECESSARY TO MEET COC STANDARD DETAILS C–307 AND C–317.

PROCESS LINES SHALL BE CONSIDERED AS A PRESSURE OR FORCE SANITARY SEWER AT ALL TIMES.
12. NPW LINES AND POT LINES SHALL HAVE 4'–0" OF MINIMUM COVER. INSTALL FITTINGS AS NECESSARY TO MAINTAIN CLEARANCE AS REQUIRED.
13. THRUST BLOCKS SHALL BE INSTALLED FOR ALL PIPING UP TO 24". RESTRAINED FITTINGS ARE ACCEPTABLE IN AREAS WHERE THRUST BLOCKS CANNOT BE INSTALLED. CONTRACTOR SHALL OBTAIN PRIOR APPROVAL FROM THE ENGINEER FOR SUBSTITUTING RESTRAINED JOINTS FOR THRUST BLOCKS. APPROVAL IS AT THE DISCRETION OF THE ENGINEER.
14. CONNECT TO EXISTING PIPE.
15. THE SITE CONTAINS SEVERAL EXISTING UTILITIES. SOME OF THE NEW PIPING IS PROPOSED IN VERY CLOSE PROXIMITY TO EXISTING PIPING. CONTRACTOR SHALL PROTECT EXISTING PIPING DURING INSTALLATION OF NEW STRUCTURES/PIPING.
16. THRUST RESTRAINTS (INCLUDING THRUST BLOCKS) ARE LOCATED ON ALL EXISTING BURIED PIPING. CONTRACTOR SHALL LOCATE AND PROTECT ALL EXISTING THRUST RESTRAINTS. CONTRACTOR SHALL INSTALL TEMPORARY THRUST RESTRAINTS ON EXISTING PIPING THAT MAY BE IN CONFLICT WITH NEW PIPING AND THEN REINSTALL THRUST RESTRAINTS.
17. NOT ALL VALVES ARE SHOWN ON YARD PIPING SHEETS SEE SPECIFICATIONS AND OTHER SHEETS FOR VALVE INFORMATION.
18. IN AREAS OF NEW PAVEMENT ALL EXISTING VALVE BOXES SHALL BE ADJUSTED OR REMOVED AND REPLACED AS NECESSARY TO MEET COC STANDARD DETAILS C–307 AND C–317.

PLACE 6" MIN ABC TO 95% MIN. COMPACTION PER M.A.G. SPECS. SEC. 310. MATCH TO EXISTING PAVEMENT SECTION, WHICHEVER IS GREATER

4" MIN. AC PER SOILS REPORT AND M.A.G. SPECS. SEC. 321. MATCH TO EXISTING PAVEMENT SECTION, WHICHEVER IS GREATER

SCARIFY, MOISTEN AS REQUIRED AND RECOMPACT SUBGRADE TO 95% FOR A MIN. OF 8" AS PER SOILS REPORT*

ASPHALT CONCRETE SECTION

DETAIL 1 / NOT TO SCALE / C-1.42

ASPHALT MILLINGS ACCESS ROAD SECTION

DETAIL 2 / NOT TO SCALE / C-1.42

PAVING CONSTRUCTION NOTES

(4) CONSTRUCT RECYCLED ASPHALT MILLINGS ACCESS ROADWAY COMPACTED TO 90% PER DTL. 2 ON SHEET C-1.42. MILLINGS MATERIAL SHALL NOT EXCEED 1" IN SIZE (WIDTH PER PLAN).

(60) ADJUST MANHOLE FRAME & COVER TO FINISH GRADE PER M.A.G. STD. DTL. 422 AND SPEC. SEC. 345. CONSTRUCT CONCRETE COLLAR PER C.O.C. STD. DTL. C-401.

(69) CONSTRUCT SITE WALL PER SECTION 4, SHEET S-6 OF THE STRUCTURAL PLANS. THE HEIGHT OF THE PERIMETER WALL SHALL BE MAINTAINED BETWEEN 7'-6" AND 8'-2" THROUGHOUT THE ENTIRE LENGTH OF THE WALL. WHERE GRADE CAUSES THE PERIMETER WALL HEIGHT TO FALL BELOW OR RISE ABOVE THIS RANGE, THE CONTRACTOR SHALL STEP THE WALL AND ITS FOUNDATION UP OR DOWN 8".

(71) INSTALL SLIDING GATE TO ACCESS FACILITY PER STRUCTURAL DETAILS.

GRADING & DRAINAGE CONSTRUCTION NOTES

(18) INSTALL 6-4"x4" WALL OPENINGS FOR DRAINAGE (3 BLOCKS TURNED SIDEWAYS).

(24) INSTALL "U" TYPE HEADWALL PER M.A.G. STD. DTL. 501-1 MODIFIED FOR 12' WINGWALLS.

(42) INSTALL HAND PLACED ANGULAR NATIVE STONE RIP-RAP (D50-6"), 12" THICK OVER MIRAFI S1000 GEOTEXTILE FABRIC (OR EQUIVALENT) WITH 2 FOOT TURNDOWNS ON ALL EDGES.

(54) INSTALL 18" HDPE HDPE SMOOTH LINED PIPE AT SLOPE PER PLAN. MAINTAIN A MINIMUM COVER OF 2.0 FEET DURING CONSTRUCTION.

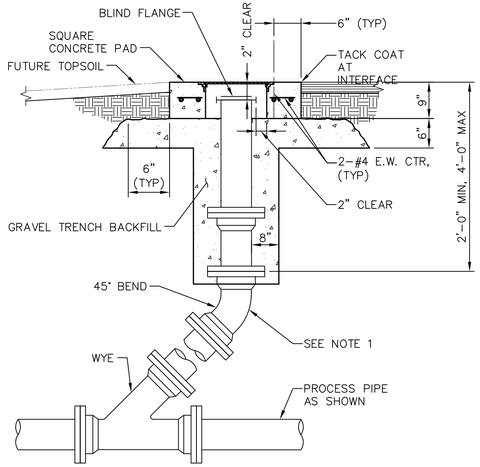
NOTES:

1. D=PIPE OUTSIDE DIAMETER OR 6" MINIMUM WHICH EVER IS GREATER.
2. REINFORCEMENT IS NOT REQUIRED.
3. CLASS "B" CONCRETE 3000 PSI.
4. PIPES PASSING UNDER WALLS SHALL BE WRAPPED IN VISQUEEN AND ENCASED.
5. PIPES SHALL BE LAID SO THAT FITTINGS, FLANGES, JOINTS, ETC. ARE NOT ENCASED.
6. ENCASEMENTS FOR FUTURE PIPES SHALL ENCASE FLANGE BY FLANGE DIP.
7. ENCASEMENT SHALL BE SEPARATED FROM FOOTING BY A MINIMUM OF 6" OF COMPACTED SOIL.
8. CLEAN CUT VERTICAL WALLS OF TRENCH MAY BE USED AS FORMS.
9. ENCASEMENT SHALL NOT BE ALL OR PART OF A THRUST BLOCK.
10. PIPE ENCASEMENTS FOR FUTURE USE SHALL BE CAPPED.

## CONCRETE ENCASEMENT

| DETAIL | 102 |
|---|---|
| NOT TO SCALE | – |



ALL PIPING IS TO BE ENCASED AS FOLLOWS:

ALL PIPE, CONDUIT, ELECTRICAL LINES ETC. WHICH ENCOMPASS AN AREA OF 8", EITHER BY ITSELF, OR THE CO-LOCATION OF SMALLER ELEMENTS EQUALING 8" SHALL BE ENCASED IN CONCRETE WHEN THEY ARE LOCATED LESS THAN 2'-0" BELOW BELOW BOTTOM OF CONCRETE SLAB, FOUNDATION ETC. THIS REQUIREMENT MUST ALSO TAKE INTO ACCOUNT ALL APPLICABLE CODES AND REQUIREMENTS WHERE ENCASEMENT IS NOT ALLOWED BY SAID CODES. WHERE ENCASEMENT IS NOT PERMITTED, ELEMENTS WHICH ARE REGULATED SHALL BE PLACED AS THE CODE REQUIRES FOR THAT PARTICULAR ITEM OR ITEMS. IN THOSE CASES THE ITEM WHICH MAY NOT BE ENCASED SHALL BE PLACED MORE THAN 2'-0" BELOW THE STRUCTURAL CONCRETE.

## CONCRETE ENCASEMENT FOR PIPES UNDER STRUCTURES

TRENCH PIPE SCHEDULE

NOTE:

1. SEE STRUCTURAL SHEETS FOR CHEMICAL PIPING TRENCH DIMENSION DETAILS.

NOTES:

1. TRENCH SHALL BE FIBERGLASS OR PRE-CAST POLYMER CONCRETE UTILIZING VINYL ESTER RESIN.
2. GRATING SHALL BE DUCTILE IRON WITH SOLID SURFACE AND DESIGNED FOR A CLASS 'D' LOAD PER DIN 19580. GRATING SHALL ATTACH TO TRENCH UTILIZING STAINLESS STEEL LOCK DOWN BOLTS.
3. TRENCH SHALL SLOPE AT 0.5% (MINIMUM) TOWARD DRAIN LINES. SLOPE MAY BE ACCOMPLISHED BY NATURAL GRADE OR BY USE OF SLOPED TRENCHES. AT NO POINT SHALL THE INVERT OF THE TRENCH BE LESS THAN 7 INCHES BELOW SOLID GRATE.
4. MANUFACTURER SHALL BE ACO OR EQUAL. CHEMICAL TRENCH SYSTEM LAND LAY DRAWINGS TO BE SUBMITTED TO ENGINEER FOR APPROVAL.
5. PROVIDE TELESCOPING EXPANSION JOINT WITH 6" TRAVEL WITH EPDM O-RINGS MANUFACTURED BY GF PIPING SYSTEMS OR EQUAL. INSTALL EXPANSION JOINTS EVERY 100' MINIMUM, AT BENDS, AT PENETRATIONS AND AS NEEDED.
6. PROVIDE UNISTRUT PIPE SUPPORTS, MODEL P7000 SERIES OR EQUAL ON SIDES AND/OR BOTTOM OF TRENCH AT 5'-0" INTERVALS. PROVIDE AT LEAST 1" CLEAR PATH ALONG BOTTOM OF TRENCH TO ALLOW FOR DRAINAGE.

DETAIL 301
NOT TO SCALE -

## KEYED NOTES

1. 4" SCHEDULE 80 CPVC DRAIN LINE
2. PRECAST CHEMICAL TRENCH WITH COVER AS SPECIFIED IN DETAILS 1 NOTES
3. TRENCH TO BE CAST INTO CONCRETE, EXTENT OF CONCRETE TO BE DETERMINED BY TRENCH MANUFACTURER BASED ON LOADING CLASS C PER DIN 19580
4. TRENCH DRAINLINE AND GRAVEL PACK TO BE PLACED AT 100' (MAXIMUM) INTERVALS LOCATIONS TO BE APPROVED BY ENGINEER
5. INSTALL VALVE BOX AND COVER PER CHANDLER STANDARD DETAIL C-307
6. GRAVEL PACK SHALL CONTAIN ROCK MATERIAL NO LESS THAN 1" DIA AND NO GREATER THAN 3" IN DIA

NOTE:

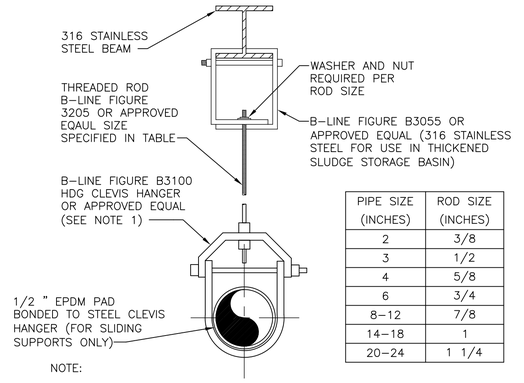
1. FOR USE ON CONCRETE SLABS.

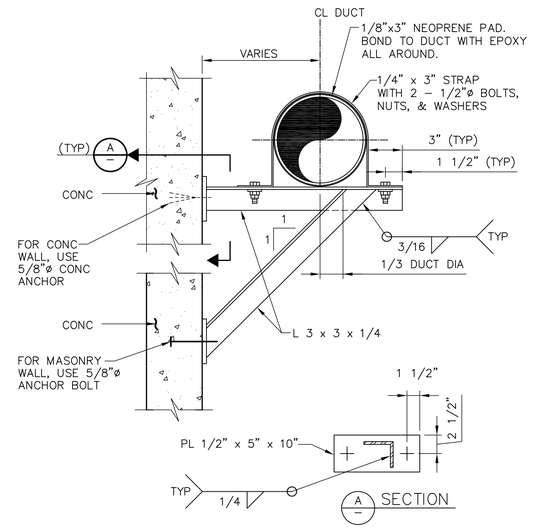


## ADJUSTABLE PIPE SUPPORT

| DETAIL | 501 |
|---|---|
| NOT TO SCALE | – |

## AIR AND VACUUM VALVE

| DETAIL | 502 |
|---|---|
| NOT TO SCALE | – |



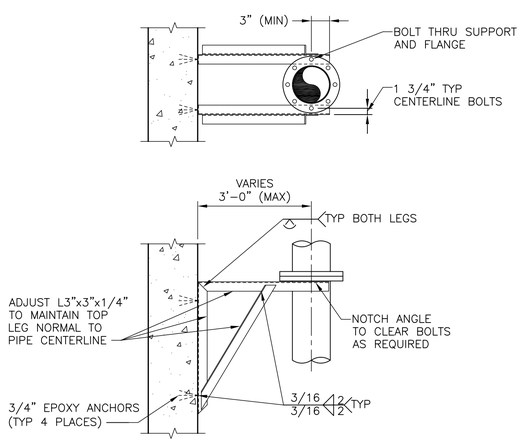
| PIPE SIZE (INCHES) | ROD SIZE (INCHES) |
|---|---|
| 2 | 3/8 |
| 3 | 1/2 |
| 4 | 5/8 |
| 6 | 3/4 |
| 8–12 | 7/8 |
| 14–18 | 1 |
| 20–24 | 1 1/4 |

NOTE:

1. FOR DUCTILE IRON PIPE USE B-LINE FIGURE B3102 AND FOR STAINLESS STEEL PIPE USE B-LINE FIGURE B3105 OR APPROVED EQUAL.

## ATTACHMENT PIPE HANGER FOR BEAMS UP TO 24" DIAMETER

| DETAIL | 503 |
|---|---|
| NOT TO SCALE | – |

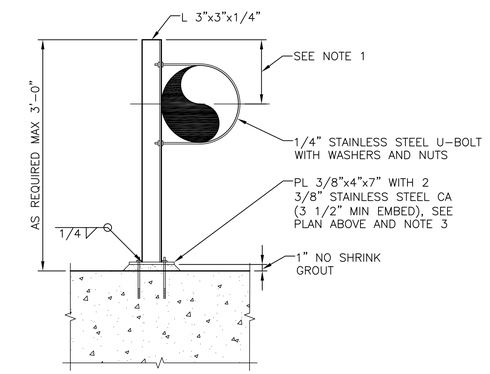


NOTES:

1. ALL METAL SHAPES SHALL BE TYPE 304 SST UNLESS OTHERWISE INDICATED ON THE DRAWINGS.
2. ALL BOLTS, NUTS, WASHERS, AND CONNECTIONS SHALL BE TYPE 304 SST.
3. SEE DRAWINGS FOR THE SIZE OF DUCT.
4. SHALL APPLY TO ALL RECTANGULAR DUCTS AND ALL ROUND DUCTS 18" AND LARGER.

## WALL MOUNT SUPPORT

| DETAIL | 504 |
|---|---|
| NOT TO SCALE | – |



## RISER PIPE SUPPORT (PIPE DIAMETER GREATER THAN 1'–0")

NOTES:

1. HOT–DIP GALVANIZE SUPPORT AFTER FABRICATION
2. 316 SS FOR SUBMERGED CONDITIONS (RAW WATER PUMP STATION WET WELL AND CHLORINE CONTACT BASIN)

| DETAIL | 505 |
|---|---|
| NOT TO SCALE | – |

NOTES:

1. DIMENSION SHALL BE 1" CLEAR BEYOND EDGE OF NUT.
2. SUPPORT SHALL BE HOT DIP GALVANIZED OR FABRICATED FROM FRP WHEN INDICATED ON PLANS.
3. BASE PLATE CAN ALSO BE WELDED TO STEEL MEMBERS.

## PIPE SUPPORT

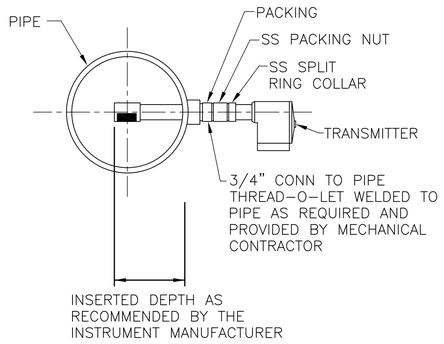
AGENCY REVIEW

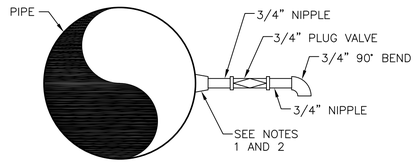


NOTE:

1. ABOVE GROUND SUPPLY PIPE IS INSULATED.
2. PROVIDE P-TRAP IF DRAIN CONNECTS TO SANITARY SEWER.

## EMERGENCY EYEWASH/SHOWER STATION

| DETAIL | 601 |
|---|---|
| NOT TO SCALE | – |

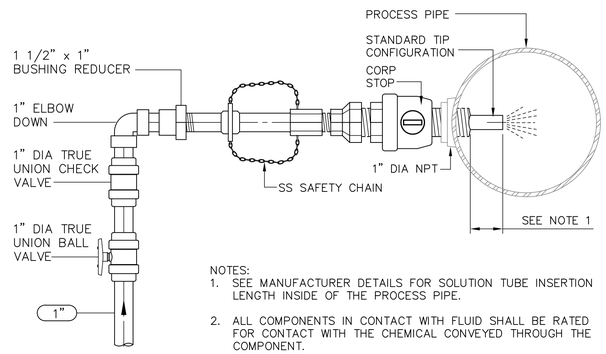


NOTES:

1. THERMAL MASS FLOW ELEMENT/PRESSURE TRANSMITTER ORIENTATION MAY DIFFER FROM THAT SHOWN. SEE MECHANICAL DRAWINGS FOR LOCATIONS AND ORIENTATION
2. ALL STRUCTURAL STEEL AND COMPONENTS SHALL BE 316 SS
3. ALL ANCHORING AND MOUNTING HARDWARE SHALL BE 316 SS

## THERMAL MASS FLOWMETER AND PRESSURE TRANSMITTER MOUNTING

| DETAIL | 604 |
|---|---|
| NOT TO SCALE | – |

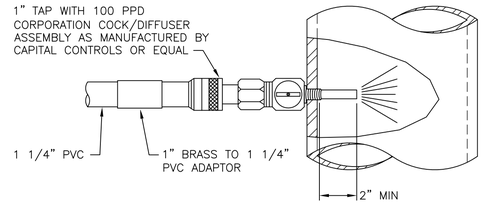


NOTES:

1. FOR DUCTILE IRON PIPE – DRILL AND TAP, USE BRASS NIPPLES AND BALL VALVE.
2. FOR STEEL – WELD 3/4" COUPLING FOR CONNECTION, USE STAINLESS STEEL NIPPLE AND STAINLESS STEEL VALVE.

## SAMPLE CONNECTION

| DETAIL | 602 |
|---|---|
| NOT TO SCALE | – |



NOTES:

1. SEE MANUFACTURER DETAILS FOR SOLUTION TUBE INSERTION LENGTH INSIDE OF THE PROCESS PIPE.
2. ALL COMPONENTS IN CONTACT WITH FLUID SHALL BE RATED FOR CONTACT WITH THE CHEMICAL CONVEYED THROUGH THE COMPONENT.
3. PROVIDE SAF-T-FLO MODEL NO. EB-159-B-9-(LENGTH)-O-01 OR APPROVED EQUAL.

## CHEMICAL INJECTION QUILL CONNECTION

| DETAIL | 605 |
|---|---|
| NOT TO SCALE | – |

NOTE:

1. SOLUTION TUBE LENGTH SHOULD BE A MAXIMUM OF 1/3 THE INSIDE DIAMETER OF THE PIPE OR AS PER DRAWING.

## CHLORINE DIFFUSER CONNECTION

AGENCY REVIEW

## STRUCTURAL DESIGN PARAMETERS

1.01 DESCRIPTION:
- A. ALL CONSTRUCTION SHALL COMPLY WITH THE BUILDING CODE AND OTHER APPLICABLE CODES AND STANDARDS.

1.02 COORDINATION:
- A. BUILDING CODE: 2018 EDITION OF THE INTERNATIONAL BUILDING CODE (IBC 2018) AS ADOPTED AND AMENDED BY THE CITY OF CHANDLER.
- B. COMPLY WITH ACI 350-06 " CODE REQUIREMENTS FOR ENVIRONMENTAL ENGINEERING CONCRETE STRUCTURES."

1.03 QUALITY ASSURANCE:
- A. REFERENCE STANDARDS FOR DESIGN LOADS AND LOAD COMBINATIONS: BUILDING CODE, ASCE 7-16.

2.01 DESIGN CRITERIA:
- A. SUPERIMPOSED DEAD LOADS
  1. ROOF FRAMING = 25 PSF
- B. LIVE LOADS
  1. ROOF FRAMING = 20 PSF (MIN)
  2. STAIRS = 100 PSF
  3. HEAVY STORAGE AREAS = 250 PSF
  4. MAINTENANCE PLATFORMS = 150 PSF
- C. RISK CATEGORY III
- D. WIND LOAD PARAMETERS
  1. EXPOSURE CATEGORY = C
  2. BASIC DESIGN WIND SPEED = 108 MPH
  3. ALLOWABLE STRESS DESIGN WIND SPEED = 85 MPH
  4. INTERNAL PRESSURE COEFFICIENTS (GC(PI)) = ± 0.18
- E. SEISMIC LOAD PARAMETERS
  1. STRUCTURAL RISK CATEGORY = III
  2. SEISMIC IMPORTANCE FACTOR, Ie = 1.25
  3. SPECTRAL RESPONSE ACCELERATION PARAMETERS:
     - i. Ss = 0.178 g
     - ii. S1 = 0.065 g
     - iii. S(DS) = 0.189 g
     - iv. S(D1) = 0.103 g
  4. SITE CLASS = D
  5. SEISMIC DESIGN CATEGORY = B

## GENERAL STRUCTURAL NOTES

1.01 DESCRIPTION:
- A. THE STRUCTURAL DRAWINGS SHOW THE COMPLETED PROJECT. THEY DO NOT INCLUDE COMPONENTS THAT MAY BE NECESSARY FOR CONSTRUCTION SAFETY. THE CONTRACTOR IS RESPONSIBLE FOR SAFETY IN AND AROUND THE JOB SITE DURING CONSTRUCTION.
- B. GENERAL NOTES AND TYPICAL DETAILS APPLY EVEN THOUGH NOT SPECIFICALLY REFERENCED ON STRUCTURAL DRAWINGS, UNLESS NOTED OTHERWISE.

1.02 COORDINATION:
- A. DETAILS ON THE STRUCTURAL DRAWINGS ARE TYPICAL. VERIFY ALL SITE DIMENSIONS, ELEVATIONS, AND SLOPES WITH THE ARCHITECTURAL, CIVIL, AND GRADING DRAWINGS. STRUCTURAL DIMENSIONS CONTROLLED BY OR RELATED TO MECHANICAL OR ELECTRICAL EQUIPMENT SHALL ALSO BE VERIFIED BY THE CONTRACTOR PRIOR TO CONSTRUCTION.
- B. MECHANICAL AND ELECTRICAL EQUIPMENT SUPPORTS, ANCHORAGES, OPENINGS, RECESSES AND REVEALS NOT SHOWN ON THE STRUCTURAL DRAWINGS BUT REQUIRED BY OTHER CONTRACT DRAWINGS SHALL BE PROVIDED PRIOR TO PLACING CONCRETE. STRUCTURAL DRAWINGS SHALL BE USED IN COORDINATION WITH MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS AND SHOP DRAWINGS PROVIDED BY MANUFACTURERS OF EQUIPMENT.

2.01 SHOP ACTIONS:
- A. VERIFY ALL NEW AND EXISTING DIMENSIONS AND CONDITIONS PRIOR TO STARTING WORK. NOTIFY THE ENGINEER OF ANY DISCREPANCIES OR INCONSISTENCIES.

3.01 FIELD EXECUTION:
- A. STRUCTURES HAVE BEEN DESIGNED FOR OPERATIONAL LOADS ON THE COMPLETED STRUCTURES. DURING CONSTRUCTION, THE STRUCTURES SHALL BE PROTECTED BY BRACING AND BALANCING WHEREVER EXCESSIVE CONSTRUCTION LOADS MAY OCCUR.

## SPECIAL INSPECTION

1.01 DESCRIPTION:
- A. THE OWNER OR THE REGISTERED DESIGN PROFESSIONAL ACTING AS THE OWNER'S AGENT SHALL EMPLOY ONE OR MORE SPECIAL STRUCTURAL INSPECTORS IN ACCORDANCE WITH THE APPLICABLE BUILDING CODE.

1.02 CONTRACTOR'S RESPONSIBILITIES:
- A. IT IS THE CONTRACTOR'S RESPONSIBILITY TO INSPECT ALL STRUCTURAL WORK FOR CONFORMANCE WITH THE CONTRACT DOCUMENTS. ANY STRUCTURAL INSPECTION PROVIDED BY OTHERS DOES NOT RELIEVE HIM OF HIS RESPONSIBILITY. ANY STRUCTURAL DEVIATIONS FROM THE CONTRACT DOCUMENTS THAT ARE FOUND AT A LATER DATE AND ARE DECLARED TO BE SIGNIFICANT BY THE STRUCTURAL ENGINEER SHALL BE CORRECTED BY THE CONTRACTOR AT HIS OWN EXPENSE AND WITH ALL DISPATCH.
- B. THE STRUCTURAL INSPECTOR IS NOT AUTHORIZED TO STOP OR DELAY THE WORK. IF THE CONTRACTOR ELECTS TO CONTINUE WITH CERTAIN WORK AFTER BEING NOTIFIED BY THE STRUCTURAL INSPECTOR THAT SUCH WORK IS UNACCEPTABLE, HE DOES SO AT HIS OWN RESPONSIBILITY AND RISKS CORRECTING THE WORK AT A LESS OPPORTUNE TIME.
- C. THE CONTRACTOR IS RESPONSIBLE FOR PROVIDING ADEQUATE FACILITIES FOR THE STRUCTURAL INSPECTOR TO INSPECT THE WORK SAFELY AND EFFICIENTLY. TWENTY-FOUR (24) HOUR NOTICE IS REQUIRED FOR INSPECTION.
- D. WORK MUST BE COMPLETED AT TIME OF INSPECTION. CONTRACTOR SHALL BEAR THE EXPENSE OF ANY ADDITIONAL INSPECTION THAT MAY OCCUR BECAUSE OF INCOMPLETE OR INCORRECT WORK.

1.03 INSPECTOR'S RESPONSIBILITIES:
- A. THE STRUCTURAL INSPECTOR IS NOT INSPECTING FOR ANY OSHA COMPLIANCE OR FOR ANY TEMPORARY CONSTRUCTION, SUCH AS BRACING.
- B. THE STRUCTURAL INSPECTOR IS NOT AUTHORIZED TO DIRECT OR APPROVE ANY CHANGES FROM THE CONTRACT DOCUMENTS. IF THE CONTRACTOR WISHES TO QUESTION THE STRUCTURAL INSPECTOR'S INTERPRETATION OF THE CONTRACT DOCUMENTS, HE MAY DO SO DIRECTLY WITH THE STRUCTURAL ENGINEER.

2.01 SHOP ACTIONS:
- A. SHOP FABRICATION WORK IS SUBJECT TO SPECIAL INSPECTION UNLESS THE FABRICATOR IS REGISTERED AND APPROVED TO PERFORM WORK WITHOUT SPECIAL INSPECTION.

3.01 REQUIRED VERIFICATION AND INSPECTIONS
- A. THE FOLLOWING ITEMS REQUIRE SPECIAL INSPECTION.

INSPECTION OF SOILS (RE:2018 IBC TABLE 1705.6)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| 1. SOIL STABILITY, PREPARATION AND EXCAVATION | PERIODIC |
| 2. MATERIALS USED AND PLACEMENT | CONTINUOUS |

INSPECTION OF STEEL CONSTRUCTION (RE:AISC 360-16 CHAPTER N SECTION N.5, N5.4-1, N5.4-2 N5.6-1, N5.6-2, N5.6-3, N6)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| A. WELDING OF STRUCTURAL STEEL: | |
| 1. COMPLETE AND PARTIAL PENETRATION GROOVE WELDS | CONTINUOUS |
| 2. MULTI-PASS FILLET WELDS | CONTINUOUS |
| 3. SINGLE-PASS FILLET WELDS > 5/16" | CONTINUOUS |
| 4. SINGLE-PASS FILLET WELDS < 5/16" | PERIODIC |
| B. STRUCTURAL STEEL FRAMING: | CONTINUOUS |
| 1. COMPLIANCE WITH CONSTRUCTION DOCUMENT DETAILS AND SPECIFICATIONS | PERIODIC |
| 2. MATERIALS INDENTIFICATION | PERIODIC |

INSPECTION OF STEEL CONSTRUCTION OTHER THAN STRUCTURAL (RE:2018 IBC 1705.2)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| A. MATERIAL VERIFICATION OF COLD-FORMED STEEL DECK: | |
| 1. IDENTIFICATION MARKINGS TO CONFORM TO ATSM STANDARDS SPECIFIED IN THE APPROVED CONSTRUCTION DOCUMENTS | PERIODIC |
| 2. MANUFACTURER'S CERTIFIED TEST REPORTS | PERIODIC |
| B. INSPECTION OF WELDING AND/OR OTHER FORMS OF ATTACHMENT OF COLD FORMED STEEL DECK: | |
| 1. FLOOR AND ROOF DECK WELDS OR OTHER ATTACHMENT | PERIODIC |

INSPECTION OF CONCRETE CONSTRUCTION (RE:2018 IBC TABLE 1705.3)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| A. STRUCTURAL CAST-IN-PLACE CONCRETE: | |
| 1. REINFORCING STEEL MATERIALS AND PLACEMENT | PERIODIC |
| 2. BOLTS INSTALLED IN CONCRETE PRIOR TO AND DURING CONCRETE PLACEMENT | CONTINUOUS |
| 3. VERIFY USE OF REQUIRED MIX DESIGN | PERIODIC |
| 4. SAMPLING OF FRESH CONCRETE | CONTINUOUS |
| 5. CONCRETE AND SHOTCRETE PLACEMENT TECHNIQUE | CONTINUOUS |
| 6. MAINTENANCE OF SPECIFIED CURING TEMPERATURE AND TECHNIQUES | PERIODIC |
| 7. FORMWORK FOR SHAPE, LOCATION, AND DIMENSIONS | PERIODIC |
| B. PRECAST CONCRETE: | |
| 1. ERECTION OF PRECAST CONCRETE MEMBERS | PERIODIC |
| 2. CONNECTION OF PRECAST MEMBERS | PERIODIC |
| C. REINFORCING STEEL: | |
| 1. VERIFICATION OF WELDABILITY OF REINFORCING STEEL OTHER THAN ASTM A706 | PERIODIC |
| 2. REINFORCING STEEL RESISTING FLEXURAL AND AXIAL FORCES IN INTERMEDIATE AND SPECIAL MOMENT FRAMES, AND BOUNDARY ELEMENTS OF SPECIAL STRUCTURAL WALLS OF CONCRETE AND SHEAR REINFORCEMENT | CONTINUOUS |
| 3. SHEAR REINFORCEMENT | CONTINUOUS |
| 4. OTHER REINFORCING STEEL | PERIODIC |

INSPECTION OF LEVEL C MASONRY CONSTRUCTION (RE: TMS 402/602-16 TABLES 3 AND 4)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| A. STRUCTURAL REINFORCED MASONRY: | |
| 1. PROPORTIONS OF SITE-PREPARED MORTAR | PERIODIC |
| 2. PLACEMENT OF MASONRY UNITS AND CONSTRUCTION OF MORTAR JOINTS | PERIODIC |
| 3. LOCATION/PLACEMENT OF REINFORCEMENT, CONNECTORS, AND ANCHORAGES | CONTINUOUS |
| 4. SIZE AND LOCATION OF STRUCTURAL ELEMENTS | PERIODIC |
| 5. TYPE, SIZE, AND LOCATION OF ANCHORS INCLUDING ANCHORAGE OF MASONRY TO STRUCTURAL MEMBERS, FRAMES OR OTHER CONSTRUCTION | CONTINUOUS |
| 6. REINFORCEMENT SIZE, GRADE, AND TYPE | PERIODIC |
| 7. WELDING OF REINFORCING BARS | CONTINUOUS |
| 8. PREPARATION, CONSTRUCTION AND PROTECTION OF MASONRY DURING COLD WEATHER OR HOT WEATHER | PERIODIC |
| 9. GROUT SPACE IS CLEAN | CONTINUOUS |
| 10. GROUT PLACEMENT | CONTINUOUS |
| 11. OBSERVE PREPARATION OF REQUIRED GROUT SPECIMENS, MORTAR SPECIMENS, AND/OR PRISMS | CONTINUOUS |
| 12. VERIFY COMPLIANCE WITH THE REQUIRED INSPECTION PROVISIONS OF THE CONSTRUCTION DOCUMENTS AND THE APPROVED SUBMITTALS | PERIODIC |

INSPECTION OF POST-INSTALLED ANCHORS AND DOWELS (RE: PRODUCT ICC-ES EVALUATION REPORT)

| INSPECTION ITEM | FREQUENCY OF INSPECTION |
|---|---|
| A. ADHESIVE ANCHORS AND REINFORCEMENT DOWELS: | |
| 1. VERIFY DRILL BIT TYPE AND SIZE | CONTINUOUS |
| 2. HOLE DEPTH AND CLEANING PROCEDURE | CONTINUOUS |
| 3. PRODUCT DESCRIPTION INCLUDING NAME, ROD TYPE, DIAMETER, AND LENGTH | CONTINUOUS |
| 4. ADHESIVE EXPIRATION DATE | CONTINUOUS |
| 5. PROPER INSTALLATION TECHNIQUE FOR ADHESIVE ANCHORS | CONTINUOUS |

1. "PERIODIC" SPECIAL INSPECTION: THE PART-TIME OR INTERMITTENT OBSERVATION OF WORK REQUIRING SPECIAL INSPECTION BY AN APPROVED SPECIAL INSPECTOR WHO IS PRESENT IN THE AREA WHERE THE WORK HAS BEEN OR IS BEING PERFORMED AND AT THE COMPLETION OF WORK. 2018 IBC CHAPTER 2 "SPECIAL INSPECTIONS"
2. "CONTINUOUS" SPECIAL INSPECTION - THE FULL-TIME OBSERVATION OF WORK REQUIRING SPECIAL INSPECTION BY AN APPROVED SPECIAL INSPECTOR WHO IS PRESENT IN THE AREA WHERE THE WORK IS BEING PERFORMED. 2018 IBC CHAPTER 2 "SPECIAL INSPECTIONS"
3. ITEMS NOT SHOWN MAY REQUIRE CONTINUOUS OR PERIODIC SPECIAL STRUCTURAL INSPECTION AT THE DISCRETION OF THE ENGINEER OF RECORD. ITEMS LISTED MAY REQUIRE ALTERNATE FREQUENCIES OF INSPECTION OTHER THAN SHOWN ABOVE UNDER DIRECTION OF THE ENGINEER OF RECORD.
4. WELDING OF REINFORCING STEEL NOT ACCEPTABLE UNLESS DIRECTED BY THE ENGINEER OF RECORD.
5. VERIFY SOILS INSPECTION REQUIREMENTS WITH PROJECT SOILS ENGINEER/CONSULTANT AS OUTLINED IN SOILS REPORT AND PROJECT SPECIFICATIONS.

## SHOP DRAWINGS

1.01 DESCRIPTION:
- A. SHOP DRAWINGS ARE DETAILED DRAWINGS OR OTHER INFORMATION CREATED TO DESCRIBE PRODUCTS OR PARTS OF THE WORK TO BE INSTALLED.
- B. SEE OTHER SECTIONS OF CONTRACT DOCUMENTS INCLUDING NOTES, PLANS, SECTIONS, AND DETAILS, AND SPECIFICATIONS FOR DESCRIPTIONS ABOUT WORK, PRODUCTS, AND DATA REQUIRED FOR SUBMITTALS.

1.02 COORDINATION:
- A. ELEMENTS REQUIRED TO BE SHOWN IN THE SHOP DRAWINGS SHALL BE REDRAWN BY THE PARTY PREPARING THE SHOP DRAWINGS. SHOP DRAWINGS COPIED FROM THE CONTRACT STRUCTURAL DRAWINGS WILL BE REJECTED.
- B. THE PROGRAM/PROJECT MANAGER WILL REVIEW SHOP DRAWINGS FOR COMPLIANCE WITH THE GENERAL DESIGN INTENT OF THE STRUCTURE AND REQUIREMENTS OF THE CONTRACT DOCUMENTS.
- C. IF A SHOP DRAWING OR OTHER SUBMITTAL CONTAINS VARIATIONS FROM THE CONTRACT DRAWINGS, NOTIFY THE PROGRAM/PROJECT MANAGER IN WRITING DESCRIBING THE EXTENT AND REASON FOR THE VARIATION, AND CLEARLY IDENTIFY ALL ITEMS INVOLVED. REVIEW OF VARIATIONS DOES NOT GUARANTEE THAT THE VARIATIONS WILL BE ACCEPTABLE.
- D. RE-SUBMITTED SHEETS SHALL CLEARLY IDENTIFY ADDED OR CORRECTED INFORMATION AND THE ITEMS INVOLVED BY CLOUDING AROUND ADDED OR CHANGED INFORMATION.

1.03 QUALITY ASSURANCE:
- A. BEFORE SUBMITTING A SHOP DRAWING OR ANY RELATED MATERIAL FOR REVIEW, THE CONTRACTOR SHALL REVIEW, APPROVE, AND SO STAMP EACH SUBMISSION FOR CONFORMANCE WITH MEANS, METHODS, TECHNIQUES, SEQUENCES, AND OPERATIONS OF CONSTRUCTION, AND WITH SAFETY PRECAUTIONS AND PROGRAMS INCIDENTAL THERETO, ALL OF WHICH ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
- B. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CHECK SHOP DRAWINGS, AND COORDINATE SUBMITTAL INFORMATION AND CONTRACT INTERFACES PRIOR TO SUBMITTING TO THE PROGRAM/PROJECT MANAGER.
- C. SHOP DRAWINGS WILL BE RETURNED FOR RE-SUBMITTAL IF A CURSORY REVIEW SHOWS MAJOR ERRORS WHICH SHOULD HAVE BEEN FOUND BY THE CONTRACTOR'S CHECKING. MATERIAL NOT CALLED FOR OR WHICH HAS NOT BEEN APPROVED BY THE CONTRACTOR AND BEAR THEIR STAMP WILL BE RETURNED WITHOUT COMMENT.
- D. WORK DONE PRIOR TO OR WITHOUT SHOP DRAWING REVIEW AND APPROVAL BY THE PROGRAM/PROJECT MANAGER IS PERFORMED AT THE CONTRACTOR'S OWN RISK AND RESPONSIBILITY.
- E. DIMENSION CHECKING AND CHECKING OF DESIGN CHANGES PROPOSED BY THE CONTRACTOR WITHOUT PRIOR CONSULTATION WITH THE ENGINEER SHALL BE CHECKED ONLY IF THE CONTRACTOR WISHES THEM TO BE CHECKED AT THEIR OWN COST.
- F. ENGINEERING SUBMITTED FOR REVIEW SHALL BE APPROPRIATELY SEALED. FULL RESPONSIBILITY FOR SUCH ENGINEERING RESTS WITH THE PERSON SEALING THE DESIGN.

## DEFERRED SUBMITTALS

1.01 DESCRIPTION:
- A. DEFERRED SUBMITTALS ARE THOSE PORTIONS OF THE DESIGN THAT ARE NOT SUBMITTED AT THE TIME OF PERMIT APPLICATION BUT WILL BE SUBMITTED TO THE BUILDING OFFICIAL WITHIN A SPECIFIC TIME. DEFERRAL OF ANY SUBMITTAL ITEMS IS SUBJECT TO APPROVAL BY THE BUILDING OFFICIAL.
- B. THE CONTRACTOR SHALL INCLUDE IN HIS BID ALL TIME AND EFFORT REQUIRED TO OBTAIN A BUILDING DEPARTMENT REVIEW AND PERMIT FOR DEFERRED STRUCTURAL ITEMS. THE CONTRACTOR SHALL ALSO INCLUDE IN HIS BID ALL TIME AND EFFORT TO SECURE CALCULATIONS AND DRAWINGS APPROPRIATELY SEALED BY AN ENGINEER FOR DEFERRED ITEMS REQUIRING DESIGN.

1.02 SUBMITTALS:
- A. DOCUMENTS FOR DEFERRED SUBMITTALS SHALL BE SUBMITTED TO THE DESIGN PROFESSIONAL IN RESPONSIBLE CHARGE FOR REVIEW PRIOR TO THEM BEING FORWARDED TO THE BUILDING OFFICIAL. THE DESIGN PROFESSIONAL WILL REVIEW THE SUBMITTAL DOCUMENTS FOR GENERAL CONFORMANCE WITH THE DESIGN INTENT FOR THE STRUCTURE OR FACILITY.
- B. SUBMITTALS OF ENGINEERING DESIGN PROVIDED BY OTHERS SHALL HAVE DRAWINGS AND CALCULATIONS APPROPRIATELY SIGNED AND SEALED BY AN ENGINEER REGISTERED IN THE STATE OF ARIZONA.
- C. IN ALL CASES THE COMPONENTS MUST BE DESIGNED AND MANUFACTURED BY A FABRICATOR APPROVED BY THE GOVERNING BODY HAVING JURISDICTION.
- D. SUBMITTALS SHALL INCLUDE KEY PLANS, SECTIONS, AND DETAILS REQUIRED FOR CONSTRUCTION.

2.01 SHOP FABRICATION:
- A. THE FOLLOWING ITEMS ARE DEFERRED SUBMITTAL ITEMS.
  1. MISCELLANEOUS PIPE SUPPORTS
  2. METAL STAIRS, HANDRAILS AND GUARDRAILS
  3. ALL GRATING, ALUMINUM COVERS & CHECKER PLATES
  4. ACCESS HATCHES

3.01 FIELD EXECUTION:
- A. FIELD INSTALLATION OF DEFERRED STRUCTURAL ITEMS IS SUBJECT TO SPECIAL STRUCTURAL INSPECTION.
- B. SHOP FABRICATION OF DEFERRED STRUCTURAL ITEMS MAY ALSO BE SUBJECT TO SPECIAL STRUCTURAL INSPECTION, UNLESS NOTED OTHERWISE.

## FOUNDATIONS

1.01 DESCRIPTION:
- A. PERFORM ALL WORK IN ACCORDANCE WITH THE BUILDING CODE SOILS AND FOUNDATION REQUIREMENTS, CONTRACT DOCUMENTS, AND GEOTECHNICAL INVESTIGATION REPORT.

1.02 COORDINATION:
- A. PERFORM ALL WORK IN ACCORDANCE WITH THE SOILS REPORT BY R.A.M.M. & ASSOCIATES, PROJECT NO. G27733 DATED FEBUARY 3, 2022
- B. FOUNDATION DESIGN IS BASED ON THE FOLLOWING PROPERTIES:
  1. SOIL CLASSIFICATION = CLAYEY TO SILTY SAND
  2. VERTICAL (GRAVITY) NEW BEARING PRESSURE = 1500 PSF AT 1'-6" BELOW NATURAL GRADE; 2000 PSI AT 2'-0" BELOW NATURAL GRADE; 3000 PSI AT 3'-0" BELOW NATURAL GRADE.
  3. LATERAL AT-REST PRESSURES = 55 PSF/FT
  4. LATERAL ACTIVE PRESSURES = 35 PSF/FT
  5. LATERAL PASSIVE PRESSURES = 250 PSF/FT
  6. BASE FRICTION COEFFICIENT = 0.45
- C. UNLESS OTHERWISE SHOWN, ON ALL STRUCTURAL DRAWINGS THE FINISH GRADE AROUND STRUCTURES IS SHOWN THUS ⩘⩘⩘ INDICATING EITHER GROUND SURFACE, TOP OF CONCRETE SLAB, OR A.C. PAVEMENT. FOR DETAILS OR FINISH SURFACES, SEE CIVIL SITE DRAWINGS. PROVIDE CONCRETE ENCASEMENT FOR ALL UNDERGROUND PIPES BENEATH STRUCTURES.

2.01 PLACE FOUNDATION CONCRETE ONLY ON UNDISTURBED NATIVE SOILS FOR DEPTHS GREATER THAN 10'-0" DEEP AND AT LEAST 2'-0" BELOW THE LOWEST ADJACENT FINISHED GRADE, WHICHEVER IS LOWER. FOR AT-GRADE STRUCTURES, PLACE FOUNDATIONS ON CLEAN, FIRM BEARING MATERIAL FOR SPREAD FOUNDATIONS AT LEAST 1'-6" BELOW LOWEST ADJACENT FINISHED GRADE AND MAT FOUNDATIONS FOUNDED ON AT LEAST 1'-0" BELOW FINISHED GRADE. VERIFY THE SUITABILITY OF THE BEARING MATERIAL WITH THE SOILS CONSULTANT BEFORE PLACING FOUNDATIONS.

2.02 CONTROLLED LOW STRENGTH MATERIAL (CLSM):
- A. CLSM SHALL BE USED AS AN UNREINFORCED FILL MATERIAL TO REPLACE EXCAVATED SOIL INCLUDING UNDER STRUCTURE FOUNDATIONS AND AS SHOWN ON DRAWINGS.
- B. PROPORTIONS: CEMENT CONTENT = 94 LBS/CU YD (+/- 5%); SLUMP = 7 INCHES (+/- 1 INCH); COMPRESSIVE STRENGTH AT 28 DAYS = 75 PSI (+/-25 PSI/ 10 PSI).

3.01 PLACEMENT:
- A. PLACE DOWELS AND ANCHOR BOLTS BEFORE POURING CONCRETE. USE TEMPLATES TO ENSURE PROPER PLACEMENT.
- B. CENTER FOUNDATIONS UNDER COLUMNS AND WALLS UNLESS NOTED OTHERWISE.

## CONCRETE

1.01 DESCRIPTION:
- A. THIS SECTION INCLUDES REQUIREMENTS FOR MATERIALS, PROPORTIONING, AND INSTALLATION OF CONCRETE (RE: ACI 301-05, ACI 350-06). PROVIDE NORMAL WEIGHT CONCRETE (144PCF WET).

1.02 COORDINATION:
- A. INSTALL JOINTS, WATERSTOPS, AND SEALANTS IN CONCRETE WHERE APPLICABLE IN ACCORDANCE WITH OTHER SECTIONS OF THE GENERAL STRUCTURAL NOTES, PLANS, AND PROJECT SPECIFICATIONS.
- B. PATCHING OF CONCRETE SHALL BE CONSIDERED STRUCTURAL. SEE STRUCTURAL CONCRETE REPAIR SECTION OF THE GENERAL STRUCTURAL NOTES.
- C. MECHANICAL AND ELECTRICAL EQUIPMENT SUPPORTS, ANCHORAGES, OPENINGS, RECESSES AND REVEALS NOT SHOWN ON THE STRUCTURAL DRAWINGS BUT REQUIRED BY OTHER CONTRACT DRAWINGS SHALL BE PROVIDED PRIOR TO PLACING CONCRETE.

1.03 SUBMITTALS:
- A. SUBMIT THE FOLLOWING TO THE ENGINEER FOR REVIEW PRIOR TO PLACEMENT OF CONCRETE. INDICATE FOR EACH MIX DESIGN THE LOCATION ON THE PROJECT WHERE IT WILL BE USED. PREPARE OR CERTIFY SUBMITTALS TO CONFORM TO ACI CODES BY AN INDEPENDENT TESTING LABORATORY PRIORY TO SUBMITTING TO ENGINEER.
  1. CONCRETE MIX PROPORTIONS AND CHARACTERISTICS
  2. COMPRESSIVE STRENGTH TESTING DATA
  3. MATERIALS DATA FOR CEMENTITIOUS MATERIALS, AGGREGATES, ADMIXTURES, AND WATER AND ICE.
  4. JOINT LOCATIONS IF DIFFERENT THAN SHOWN ON DRAWINGS.

1.04 QUALITY ASSURANCE:
- A. PRODUCE AND DELIVER CONCRETE IN ACCORDANCE WITH THE STANDARD SPECIFICATIONS IN ACI 301 AND TOLERANCES OF ACI 117. PLACE CONCRETE IN ACCORDANCE WITH ACI 304. CONDUCT HOT WEATHER AND COLD WEATHER CONCRETING IN ACCORDANCE WITH ACI 305 AND ACI 306 RESPECTIVELY.

2.01 MIX WATER:
- A. USE POTABLE WATER FREE FROM MATERIALS THAT ARE DELETERIOUS TO CONCRETE OR STEEL (ASTM C1602).

2.02 CEMENTITIOUS MATERIALS:
- A. PORTLAND CEMENT: CONFORM TO ASTM C 150, TYPE II, EXCEPT FOR MASS CONCRETE PROVIDE TYPE IV CEMENT OR ADDITIVES OR OTHER PROVISIONS TO REDUCE THE HEAT OF HYDRATION.
- B. FLY ASH: ACCEPTABLE FOR USE IN MIX DESIGN IF COMPLIANT WITH REQUIREMENTS OF CONTRACT DOCUMENTS AND THE MAX RATIO OF FLY ASH TO TOTAL CEMENT AND FLY ASH DOES NOT EXCEED 20 PERCENT BY WEIGHT. CONFORM TO ASTM C 618, TYPE F. DO NOT USE FLYASH IN COLORED CONCRETE WITHOUT WRITTEN APPROVAL.

2.03 AGGREGATE:
- A. PROVIDE A SINGLE SIZE OR A GRADATION OF AGGREGATE WITH THE MAXIMUM SIZE AS SHOWN ON THE MIX DESIGN PROPORTIONS BELOW. DO NOT USE AGGREGATES CONTAINING SOLUBLE SALTS OR OTHER SUBSTANCES SUCH AS IRON SULFIDES, PYRITE, MARCASITE, OCHRE, OR OTHER MATERIALS THAT MAY CAUSE STAINS ON EXPOSED CONCRETE SURFACES.
- B. UNLESS NOTED OTHERWISE, AGGREGATE SHALL BE NORMAL WEIGHT CONFORMING TO ASTM C33.

2.04 ADMIXTURES:
- A. SUBMIT ALL ADMIXTURES TO THE ENGINEER FOR REVIEW. DO NOT USE ADMIXTURES CONTAINING CALCIUM CHLORIDE. ADMIXTURES AND COMBINATIONS OF ADMIXTURES SHALL BE THE SAME AS THOSE USED IN THE FIELD OR TRIAL TEST DATA SUBMITTED.
- B. AIR ENTRAINING ADMIXTURE (ASTM C260): DO NOT USE CONTENT OF ENTRAINED AIR GREATER THAN THAT SUBMITTED IN TEST DATA FOR REVIEW. ALLOWABLE TOLERANCE FOR AIR CONTENT AT THE POINT OF DELIVERY IS +/ -1.5 PERCENT.
- C. SUPERPLASTICIZERS (HIGH RANGE WATER REDUCERS) AND WATER REDUCERS: COMPLY WITH ASTM C494 TYPE A AND TYPE F. FOR PLANT-ADDED SUPERPLASTICIZERS, MIXES THAT ARRIVE ON SITE WITH A SLUMP OF 5" OR LESS WILL NOT BE ACCEPTED. FOR SITE-ADDED SUPERPLASTICIZERS, THE MIX SHALL BE SLUMPED AT THE JOB SITE PRIOR TO THE ADDITION OF SUPERPLASTICIZERS. PROVIDE COMPUTER BATCH RECORDS IF SUPERPLASTICIZERS ARE USED. DO NOT ADD ADDITIONAL SUPERPLASTICIZERS ON SITE.
- D. SHRINKAGE REDUCING ADMIXTURE:
  1. USE IN ALL CONCRETE TOPPINGS FOR STAIR TREADS AND LANDINGS.
  2. PROVIDE ADMIXTURE THAT REDUCES CONCRETE DRYING SHRINKAGE BY 41 TO 62 PERCENT WHEN TESTED PER ASTM C157 WITHOUT REDUCING CONCRETE 28-DAY STRENGTH AND THAT IS COMPATIBLE WITH OTHER ADMIXTURES USED INCLUDING THOSE FOR AIR-ENTRAINMENT.

2.05 SLUMP:
TOLERANCE FOR SPECIFIED SLUMP IS +/-1 INCH BEFORE THE ADDITION OF SUPERPLASTICIZERS/WATER REDUCERS PER ACI 117. MAX SLUMP WITH SUPERPLASTICIZERS IS 8 INCHES. WATER MAY BE ADDED ON SITE FOR SLUMP ADJUSTMENT PROVIDED THE TOTAL AMOUNT ADDED IS MAINTAINED WITHIN THE WATER/CEMENTITIOUS RATIO AND SLUMP LIMITS SPECIFIED. DO NOT ADD WATER IF SUPERPLASTICIZERS HAVE BEEN ADDED.

2.06 MIX DESIGN PROPORTIONS (NORMAL WT CONCRETE U.N.O.)
- A. PROVIDE COMPUTERIZED BATCH RECORDS WITH ALL LOAD LOCATION.

| LOCATION | MIN 28 DAY COMPR. STRENGTH | MAX W/CM RATIO | SLUMP | % AIR | MAX AGG SIZE |
|---|---|---|---|---|---|
| SIDEWALKS, CURBS, GUTTERS, CONCRETE FILL, PIPE ENCASEMENTS | 3000 PSI | 0.50 | 4" | 1.5 | 1" |
| CAST-IN-PLACE REINFORCED CONCRETE | 4000 PSI | 0.40 | 4" | 4.5 | 1" |

2.07 NON-SHRINK GROUT:
- A. USE PLASTIC OR STIFF (DRY PACK), NON-METALLIC NON-SHRINK GROUT WITH MINIMUM 7,000 PSI COMPRESSIVE STRENGTH AT 28 DAYS. CONFORM TO THE REQUIREMENTS OF CRD-C 621 CORPS OF ENGINEERS FOR NON-SHRINK GROUT.
- B. SATURATE THE AREA WITH POTABLE WATER FOR 24 HOURS IMMEDIATELY PRIOR TO APPLICATION OF THE GROUT PER THE MANUFACTURER'S RECOMMENDATIONS. WET CURE AND APPLY CURING COMPOUNDS TO EXPOSED GROUT SURFACES.
- C. USE BASF CONSTRUCTION GROUT, EUCO DRY PACK GROUT, OR EQUAL.

2.08 NON-SHRINK EPOXY GROUT:
- A. USE POURABLE, NON-SHRINK, 100% SOLIDS FORMULA WITH MINIMUM 5000 PSI COMPRESSIVE STRENGTH AT 24 HOURS.
- B. ROUGHEN CONCRETE SURFACE AND EXPOSE AGGREGATE. APPLY TO CLEAN, DRY SURFACE PER MANUFACTURER'S RECOMMENDATIONS.
- C. USE BASF MASTERFLOW 648 CP, EUCO E3-F OR EQUAL.

3.01 CONCRETE PLACING:
- A. DO NOT PLACE CONCRETE IN CONTACT WITH ALUMINUM.
- B. DO NOT ADD WATER ON SITE OR AFTER SUPERPLASTICIZERS HAVE BEEN ADDED.
- C. THE MAXIMUM FREE DROP OF ANY CONCRETE IS 6'-0" WITHOUT A TREMI PIPE TO PREVENT SEGREGATION. DEPOSIT CONCRETE AS NEAR AS POSSIBLE TO ITS FINAL POSITION. DO NOT USE ANY PRACTICES THAT WILL CAUSE SEGREGATION SUCH AS (BUT NOT LIMITED TO) VIBRATING TO TRAVEL CONCRETE.
- D. MECHANICALLY VIBRATE ALL CONCRETE, EXCEPT THAT SLABS ON GRADE NEED BE VIBRATED ONLY AROUND UNDER-FLOOR DUCTS AND OTHER ITEMS EMBEDDED IN THE SLAB. REVIBRATE TOPS OF COLUMNS, CAISSONS (DRILLED PIERS), AND THE TOP 5 FEET OF WALLS (OVER 10 FEET IN HEIGHT).
- E. DO NOT CAST WALLS OR GRADE BEAMS IN A SINGLE POUR IN LENGTHS OVER 40 FEET. WAIT 48 HOURS BETWEEN ADJACENT CONCRETE CASTINGS.
- F. WAIT 28 DAYS MINIMUM AFTER CONCRETE HAS BEEN PLACED BEFORE SAND BLASTING, WATER BLASTING OR OTHER SURFACE TREATMENT.
- G. DO NOT PLACE CONCRETE IN STANDING WATER

3.02 FINISHING:
- A. PROVIDE FINISHES ON FORMED SURFACES PER ACI 301 AND FORMED SURFACE IRREGULARITIES PER ACI 117 AS FOLLOWS.
  1. ROUGH FORM FINISH: SURFACES NOT EXPOSED TO PUBLIC VIEW. PATCH TIE HOLES, LEAVE TEXTURE IMPARTED BY FORM, REMOVE FINS GREATER THAN 1/2 INCH IN HEIGHT.
  2. SMOOTH FORM FINISH: SURFACES EXPOSED TO PUBLIC VIEW. REMOVE FINS GREATER THAN 1/8 INCH IN HEIGHT.
  3. SURFACES EXPOSED TO VIEW: CLASS B SURFACE WITH ABRUPT IRREGULARITIES LESS THAN 1/4 INCH.
- B. THE USE OF WATER OR "SPRINKLING" AS AN AID TO FINISHING UNFORMED SURFACES IS NOT ACCEPTABLE.
- C. PROVIDE 3/4" X 3/4" CHAMFERS AT ALL EXPOSED CORNERS OF SLABS, WALLS, COLUMNS AND BEAMS.

3.03 CURING:
- A. CURE CONCRETE PER ACI 350-06 AND ACI 301 FOR 7 DAYS AFTER PLACEMENT. WHERE USED, ALL CURING COMPOUNDS SHALL HAVE A FUGITIVE DIE. ALL CURING COMPOUNDS SHALL BE COMPATIBLE WITH FUTURE TOPPINGS, PAINT, WATERPROOFING AND FINISHES. APPLY TWO HEAVY COATS OF CURING COMPOUND USING A HIGH PRESSURE AIRLESS SPRAYER. APPLY THE SECOND COAT 90 DEGREES TO THE FIRST. CLEAN ALL NOZZLES AFTER EACH USE.
- B. ALL CONCRETE SURFACES IN CONTACT WITH POTABLE WATER OR WATER THROUGHOUT TREATMENT TO BE POTABLE SHALL BE CONTINUOUSLY MOIST CURED OR CURING COMPOUNDS SHALL BE ANSI/NSF-61 CERTIFIED.
- C. ALL CONCRETE SURFACES NOT IN CONTACT WITH POTABLE WATER OR THE PROCESS OF TREATMENT FOR POTABLE WATER SHALL MEET THE MOISTURE RETENTION REQUIREMENTS OF ASTM C-309, TYPE 1-D AT COVERAGE RATE SPECIFIED, AND PASS VOC REQUIREMENTS.
- D. COLUMNS, WALLS, GRADE BEAMS, AND FOUNDATIONS: START CURING IMMEDIATELY UPON THE REMOVAL OF FORMS AND THE COMPLETION OF FINISHING WORK. THE TOPS OF SPREAD FOUNDATIONS WILL REQUIRE CURING COMPOUND.
- E. SLAB AND CAST-IN-PLACE FINISHED CONCRETE: START CURING IMMEDIATELY ONCE THE CONCRETE IS SET ENOUGH TO WALK ON WITHOUT HARMING THE FINISH.

3.04 CONCRETE REPAIR OR DEMOLITION:
- A. ALL PATCHING OF CONCRETE SHALL BE CONSIDERED STRUCTURAL. NOTIFY ENGINEER ON A CASE BY CASE BASIS.
- B. WHEN DRILLING, CHIPPING, SAWCUTTING, OR CORING INTO CONCRETE, GPR, X-RAY OR FERROSCAN EXISTING CONCRETE TO LOCATE REINFORCING. DO NOT CUT, NICK, OR OTHERWISE DAMAGE EXISTING REINFORCING.

## REINFORCING STEEL

1.01 DESCRIPTION:
- A. THIS SECTION COVERS THE REQUIREMENTS FOR MATERIALS, DETAILING, AND INSTALLATION OF REINFORCING STEEL (RE: ACI 301-05, ACI 350-06).

1.02 COORDINATION:
- A. PLACE REINFORCEMENT IN CONFORMANCE WITH ACI DETAILING MANUAL ACI SP-66.
- B. DO NOT DAMAGE OR DISRUPT REINFORCING BARS OR CONNECTORS FROM THEIR PROPER LOCATION BY THE PLACEMENT OF EMBEDDED PIPING OR CONDUIT. PROVIDE CLEARANCE BETWEEN REINFORCEMENT AND EMBEDDED PIPING AND CONDUIT AT ALL TIMES.

1.03 SUBMITTALS:
- A. SUBMIT PLACING DRAWINGS PER ACI DETAILING MANUAL, ACI SP-66. INCLUDE ELEVATIONS SHOWING REINFORCING AT ALL CONCRETE WALLS AND FOUNDATIONS.
- B. SUBMIT ICC EVALUATION REPORTS OR OTHER APPROVED EVALUATIONS REPORTS AND LOCATIONS OF REINFORCEMENT CONNECTORS (MECHANICAL COUPLERS, ETC) AND REBAR TERMINATORS.

1.04 QUALITY ASSURANCE:
- A. TOLERANCES FOR FABRICATION, PLACEMENT, BAR BENDS, STANDARD HOOKS AND LAP SPLICES FOR REINFORCEMENT SHALL CONFORM TO ACI 117, SECTION 2 AND CRSI STANDARDS.

2.01 REINFORCEMENT MATERIALS:
- A. REINFORCING STEEL SHALL BE DEFORMED EXCEPT SPIRALS, AND WELDED PLAIN WIRE FABRIC.
- B. REINFORCING STEEL SHALL CONFORM TO THE FOLLOWING STANDARDS.
  1. #3 BARS AND LARGER - ASTM A 615, GRADE 60
  2. STIRRUPS AND COLUMN TIES - ASTM A 615, GRADE 60
  3. STEEL WIRE - ASTM A 82
  4. WELDED PLAIN (SMOOTH) WIRE FABRIC - ASTM A 185
  5. WELDABLE REINFORCING STEEL - ASTM A 706
  6. REBAR TERMINATORS - ASTM A 576

2.02 REINFORCEMENT CONNECTORS:
- A. REINFORCEMENT CONNECTORS ARE ACCESSORIES INCLUDING MECHANICAL BUTT SPLICES, FORM SAVERS, COUPLERS, AND TERMINATORS.
- B. TENSION, AND COMPRESSION AS REQUIRED, SPLICE CAPACITY OF CONNECTORS MUST EXCEED 125% OF THE YIELD STRENGTH (FY) OF THE REINFORCING BAR IN ACCORDANCE WITH ACI 318. INSTALL PER THE ICC REPORT AND MANUFACTURER'S RECOMMENDATIONS.
- C. SPECIAL INSPECTION WILL INCLUDE RANDOM TORQUE TESTING OF COUPLERS BEFORE AND AFTER INSTALLATION IN FORMS. IF ANY COUPLER DOES NOT PASS THE TORQUE TEST, ALL COUPLERS WILL BE TORQUED BY AN INDEPENDENT TESTING LAB AT THE CONTRACTOR'S EXPENSE. COUPLERS USED IN COLUMNS SHALL NOT BE LONGER THAN 8" OR HAVE A DIAMETER LARGER THAN 2.5 INCHES.
- D. REBAR TERMINATORS SHALL BE OF SUFFICIENT DIAMETER AND WIDTH TO BE CAPABLE OF DEVELOPING THE SPECIFIED YIELD STRENGTH OF THE REBAR. CONNECTION OF THE REBAR TERMINATORS TO THE REINFORCING STEEL SHALL BE CAPABLE OF DEVELOPING THE TENSION SPLICE CAPACITY FOR CONNECTORS.

AGENCY REVIEW

## REINFORCING STEEL (CONTINUED)

3.01 PLACEMENT:
- A. SECURELY TIE ALL REINFORCING AND EMBEDDED ITEMS IN POSITION BEFORE PLACING CONCRETE OR GROUT. DO NOT STAB OR SHOVE INTO FRESHLY PLACED CONCRETE.
- B. TIE COLUMN CAGES TO FORMS AND SQUARE BEFORE PLACING CONCRETE. ALL CAGES AND FORMS SHALL BE SQUARED UP PLUMB AND CENTERLINE LOCATIONS OF ALL COLUMNS SHALL BE CHECKED BEFORE PLACING CONCRETE.

3.02 SLAB REINFORCEMENT (MIN), UNLESS NOTED OTHERWISE ON DRAWINGS:
- A. THE MINIMUM QUANTITY OF REINFORCEMENT IN SLABS SHALL BE AS SHOWN BELOW.

| SLAB THICKNESS | REINFORCEMENT |
|---|---|
| 6" SLAB | #3 @ 9" OR #4 @ 16" |
| 8" SLAB | #3 @ 7" OR #4 @ 12" |
| 10" SLAB | #4 @ 10" |

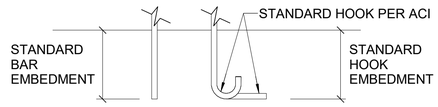
- B. EDGE BARS: THE EDGES OF ALL SLABS SHALL BE REINFORCED WITH 2 #5 BARS CONTINUOUS.
- C. ALL OPENINGS IN SLABS SHALL HAVE 2 #5 BARS PARALLEL TO ALL EDGES, EXTENDING 2'-0" BEYOND EACH CORNER.
- D. SLAB REINFORCEMENT SHALL NOT BE CUT AT PLUMBING OR OTHER OPENINGS. SPREAD REINFORCEMENT AROUND OPENINGS.
- E. SUPPORT SLAB TOP REINFORCEMENT ON HIGH CHAIRS. USE #5 BARS AS SUPPORT BARS WHERE REQUIRED. ALL BARS AND CHAIRS MUST BE SECURELY TIED TOGETHER. PROVIDE SUFFICIENT SUPPORT TO MAINTAIN CONCRETE PROTECTION AS SPECIFIED. USE NON-FERROUS CHAIRS WHERE RUST STAINS ARE UNACCEPTABLE.

3.03 REINFORCEMENT (MIN), UNLESS NOTED OTHERWISE ON DRAWINGS:
- A. THE MINIMUM QUANTITY OF REINFORCEMENT IN WALLS SHALL BE AS SHOWN BELOW.

| WALL THICKNESS | REINFORCEMENT (EACH FACE) |
|---|---|
| 6" | #4 @ 18" VERT, #3 @ 7" HORIZ |
| 8" | #4 @ 16" VERT, #4 @ 9" HORIZ |
| 10" | #4 @ 14" VERT, #4 @ 8" HORIZ |
| 12" | #5 @ 12" VERT, #5 @ 12" HORIZ |

- B. PROVIDE 2 #5 BARS AT ALL WALL CORNERS AND ENDS, UNLESS NOTED OTHERWISE.
- C. ALL OPENINGS IN WALLS SHALL HAVE 2 #5 BARS PARALLEL TO ALL EDGES, EXTENDING 2'-0" BEYOND CORNERS.

3.04 COLUMN REINFORCEMENT:
- A. HOOKS ON COLUMN TIES SHALL BE 135 DEGREES. PROVIDE 90 DEGREE HOOKS AT TERMINATION OF COLUMN. HOOK VERTICAL REINFORCEMENT INTO SLAB OR BEAMS.



3.05 BEAM REINFORCEMENT:
- A. STIRRUP SUPPORT BARS SHALL BE PROVIDED BETWEEN ENDS OF TOP BARS AS REQUIRED. SUPPORT BARS SHALL BE #6 MINIMUM.

3.06 COVER:
- A. MINIMUM CONCRETE COVERAGE FOR REINFORCING BARS (TO FACE OF BAR INCLUDING PRIMARY REINFORCEMENT, STIRRUPS, TIES, AND SPIRALS) UNLESS NOTED OTHERWISE ON DRAWINGS.
- B. CAST-IN-PLACE CONCRETE (NON-PRESTRESSED)
  1. CONCRETE CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH: ALL BARS - 3"
  2. CONCRETE CAST AGAINST FORMS AND PERMANENTLY EXPOSED TO EARTH OR WEATHER: #3 THRU #18 BARS - 2"
  3. CONCRETE NOT EXPOSED TO EARTH OR WEATHER:
     - i. SLABS, WALLS, JOISTS #3 THRU #18 BARS - 2"
     - ii. BEAMS, COLUMNS PRIMARY REINF, TIES, STIRRUPS, SPIRALS - 2"

3.07 SPLICES:
- A. ALL REINFORCEMENT IS CONTINUOUS AND MUST BE LAPPED WITH A FULL TENSION LAP OR TERMINATED WITH A 90 DEGREE STANDARD HOOK, UNLESS NOTED OTHERWISE ON DRAWINGS.
- B. ALL WALL REINFORCEMENT AT CORNERS, INTERSECTIONS, AND JUNCTIONS SHALL BE CONTINUOUS AND LAPPED OR TERMINATED IN A 90 DEGREE STANDARD HOOK.
- C. ALL RADIAL WALLS SHALL HAVE STAGGERED SPLICES WITH NO MORE THAN 1/3 OF THE REINFORCEMENT SPLICED AT ANY LOCATION.
- D. SPLICE REINFORCING BARS ONLY AT APPROVED LOCATIONS. SPLICE BOTTOM BARS OVER SUPPORTS AND TOP BARS AT MID-SPAN ONLY, UNLESS NOTED OTHERWISE ON DRAWINGS.
- E. DOWEL ALL VERTICAL REINFORCEMENT TO FOUNDATIONS, UNLESS NOTED OTHERWISE ON DRAWINGS. ALL DOWELS SHALL BE THE SAME SIZE AND SPACING AS THE REINFORCEMENT THAT IT IS SPLICED WITH, UNLESS NOTED OTHERWISE ON DRAWINGS.

3.08 LAP SPLICE LENGTHS:
- A. TOP BARS ARE CONSIDERED HORIZONTAL BARS LOCATED WHERE 12 INCHES OR MORE OF FRESH CONCRETE WILL BE PLACED BELOW THE BAR.
- B. LAP WELDED WIRE FABRIC TWO FULL SQUARES.
- C. ALL LAP SPLICES ARE CLASS 'B' SPLICES, UNLESS NOTED OTHERWISE ON DRAWINGS.
- D. MINIMUM LAPS SPLICE LENGTHS FOR CLASS 'B' LAPS AND FOR BARS WITH CONCRETE COVER OF AT LEAST ONE BAR DIAMETER ARE GIVEN IN THE FOLLOWING SCHEDULE, UNLESS NOTED OTHERWISE ON DRAWINGS.

| REINFORCEMENT LAP SPLICE AND EMBEDMENT LENGTH (f'c ≥ 4000 PSI) | | | | | | | |
|---|---|---|---|---|---|---|---|
| BAR SIZE NO. | METRIC BAR SIZE NO. | BAR SPACING | MIN LAP LENGTH (IN) | | MIN EMBEDMENT LENGTH (IN) | | |
| | | | TOP BARS | OTHER BARS | STRAIGHT BARS | | WITH STANDARD HOOK |
| | | | CLASS B | CLASS B | TOP BARS | OTHER BARS | |
| REQUIREMENTS FOR SLABS & WALLS** | | | | | | | |
| #3 | #10 | ≥ 3db | 24 | 19 | 19 | 15 | 7 |
| #4 | #13 | | 32 | 25 | 25 | 19 | 10 |
| #5 | #16 | | 40 | 31 | 31 | 24 | 12 |
| #6 | #19 | | 48 | 37 | 37 | 29 | 15 |
| #7 | #22 | | 70 | 54 | 54 | 42 | 17 |
| #8 | #25 | | 80 | 62 | 62 | 48 | 19 |
| #9 | #29 | | 91 | 70 | 70 | 54 | 22 |
| #10 | #32 | | 102 | 79 | 79 | 61 | 24 |
| #11 | #36 | | 113 | 87 | 87 | 67 | 27 |
| REQUIREMENTS FOR BEAMS AND COLUMNS | | | | | | | |
| #3 THRU #7 | #10 THRU #22 | ≥ 2db | SAME AS SLABS AND WALLS ABOVE | | | | |
| #8 | #25 | 2 db OR LESS | 121 | 93 | 93 | 71 | 19 |
| #9 | #29 | | 136 | 105 | 105 | 61 | 22 |
| #10 | #32 | | 153 | 118 | 118 | 91 | 24 |
| #11 | #36 | | 170 | 131 | 131 | 181 | 27 |

** FOR BAR CLEAR SPACING LESS THAN 3 BAR DIAMETER, ADD 50%

3.09 WELDING:
- A. DO NOT WELD REINFORCING STEEL EXCEPT WHERE SUCH WELDING HAS BEEN SUBMITTED TO THE OWNER'S AGENT FOR REVIEW BY THE STRUCTURAL ENGINEER.
- B. WELDING WILL NOT BE ACCEPTED AS A SUBSTITUTE FOR TIE WIRES OR TO AID IN SUPPORTING REINFORCING STEEL.
- C. WELD REINFORCING BARS IN CONFORMANCE WITH AWS D1.4 USING ELECTRODE E8018-X.
- D. SUBMIT WELDER CERTIFICATIONS AND WELDING PROCEDURES PER AWS D1.4.

## CONSTRUCTION JOINTS

1.01 LOCATION OF ALL CONSTRUCTION JOINTS SHALL BE AS SHOWN ON THE DRAWINGS OR APPROVED BY THE ENGINEER. SUBMIT CONSTRUCTION JOINT LOCATIONS NOT SHOWN ON THE STRUCTURAL DRAWINGS TO THE ENGINEER FOR REVIEW.

1.02 PROVIDE AND INSTALL POLYVINYLCHLORIDE (PVC), THERMOPLASTIC VULCANIZATE WATERSTOP (TPV) AND HYDROPHILIC VINYLESTER WATERSTOPS WHERE SHOWN ON DRAWINGS AND AT ALL CONSTRUCTION JOINTS IN WATERBEARING, AND PARTIALLY AND FULLY UNDERGROUND SLABS AND WALLS (INCLUDING ELEVATOR AND ESCALATOR PITS, AND CHEMICAL CONTAINMENT AREAS). WATERSTOPS ARE NOT REQUIRED IN WALLS AND SLABS WHEN THERE IS WATER ON BOTH SIDES UNLESS NOTED OTHERWISE.

1.03 PROVIDE AND INSTALL PREFORMED JOINT MATERIAL IN EXPANSION AND ISOLATION JOINTS WHERE NOTED ON DRAWINGS. PROVIDE ELASTOMERIC JOINT SEALANT AND ALL NECESSARY ACCESSORIES SUCH AS BACKER ROD AND BOND BREAKER TAP WHERE EXPANSION JOINT IS TO BE SUBMERGED FOR ANY AMOUNT OF TIME OR WHERE NOTED ON DRAWINGS AS "CAULK AND SEAL".

1.04 SUBMIT THE FOLLOWING PRIOR TO START OF WORK:
- A. LAYOUT OF CONSTRUCTION AND EXPANSION JOINTS
- B. MANUFACTURER'S PRODUCT SPECIFICATIONS AND INSTALLATION INSTRUCTIONS FOR WATERSTOPS AND JOINT FILLER MATERIAL AND ACCESSORIES.

2.01 PROVIDE WATERSTOPS AND JOINT SEALANT SUITABLE FOR THEIR CONDITION OF USE SUCH AS MOVEMENT AND/OR CHEMICAL ATTACK (FOR EXAMPLE, WATER CONTAMINATED WITH SOLVENTS AND HYDROCARBONS).

2.02 PROVIDE PREFORMED JOINT FILLER IN ACCORDANCE WITH ASTM D 1752 TYPE I (FOAM RUBBER) OR TYPE II (CORK) AT INTERIOR EXPANSION JOINTS AND AS NOTED ON DRAWINGS. PROVIDE PREFORMED BITUMINOUS JOINT FILLER IN ACCORDANCE WITH ASTM D 1751 FOR EXTERIOR ISOLATION JOINTS AND AS NOTED ON DRAWINGS.

3.01 ALL CONSTRUCTION JOINTS SHALL BE THOROUGHLY CLEANED FOR BOND. CAULK AND SEAL JOINTS PER JOB SPECIFICATIONS AND WHERE NOTED ON DRAWINGS.

3.02 SEE TYPICAL DETAILS FOR INSTALLATION OF CONSTRUCTION JOINTS AND WATERSTOPS IN NEW CONSTRUCTION AND BETWEEN EXISTING AND NEW CONSTRUCTION.

3.03 FOR NON-WATERBEARING SLABS-ON-GRADE, PLACE JOINTS IN 12" SLAB ON GRADE AT 20'-0" MAXIMUM OR IN RATIOS NOT TO EXCEED 2:1. TIMING OF JOINT SAWING IS CRITICAL. JOINTS SHOULD BE SAWN AS SOON AS THE CONCRETE IS HARD ENOUGH THAT THE SAWING DOES NOT RAVEL JOINT EDGES OR DISLODGE COURSE AGGREGATE PARTICLES. PROVIDE SAWCUTS IN A RECTANGULAR PATTERN AS SHOWN ON PLANS. WHERE A PATTERN IS NOT SHOWN, SAWCUT ON COLUMN LINES, AT EQUAL SPACES BETWEEN COLUMN LINES TO PRODUCE THE MAXIMUM SPACING, AND AT ALL RE-ENTRANT CORNERS AND SLAB CHANGES. PROVIDE ISOLATION JOINTS IN A DIAMOND PATTERN AROUND COLUMNS. SUBMIT JOINT LAYOUT PLAN PRIOR TO STARTING WORK.

## MASONRY CONSTRUCTION

1.01 DESCRIPTION:
- A. THIS SECTION INCLUDES THE REQUIREMENTS FOR MATERIAL PROPORTIONING, AND REQUIREMENTS FOR INSTALLATION OF MASONRY CONSTRUCTION.

1.02 SUBMITTALS:
- A. MASONRY SHOP DRAWINGS SHALL INCLUDE THE FOLLOWING ITEMS:
  1. COMPLETE LAYOUT OF MASONRY WALLS INCLUDING MODULAR PLANNING AND SPECIAL SHAPES. SHOW DETAILS FOR EACH CONDITION ENCOUNTERED. PROVIDE PLANS AND ELEVATIONS DRAWN AT 1/4-INCH SCALE AND DETAILS DRAWN AT 1 1/2 INCH SCALE. SHOW ITEMS REQUIRED TO BE BUILT INTO MASONRY.
  2. MASONRY CONTROL JOINT LOCATIONS AND DETAILS.
  3. LOCATION, EXTENT AND CONFIGURATION OF EMBEDDED AND PENETRATING ITEMS TO BE BUILT INTO THE UNIT MASONRY.
  4. DRAWINGS FOR FABRICATION, BENDING AND PLACEMENT OF REINFORCING BARS. INCLUDING BAR SCHEDULES, BAR DIAGRAMS, STIRRUP SPACING, LATERAL TIES AND OTHER ITEMS REQUIRED FOR FABRICATION AND PLACEMENT OF MASONRY REINFORCING.

1.03 QUALITY ASSURANCE:
- A. MINIMUM 28-DAY COMPRESSIVE STRENGTH OF EACH WYTHE OF CONCRETE MASONRY, f'm = 2000 PSI.

2.01 MATERIALS:
- A. LOAD BEARING HOLLOW CONCRETE MASONRY UNITS: NORMAL WEIGHT WITH COMPRESSIVE STRENGTH OF 1900 PSI ON THE NET AREA. UNITS SHALL CONFORM TO ASTM C-90.
- B. GROUT: 2000 PSI, MINIMUM 28 DAY COMPRESSIVE STRENGTH. MECHANICALLY VIBRATE GROUT IMMEDIATELY AFTER POURING AND AGAIN AFTER NO LATER THAN 20 MINUTES FOR RECONSOLIDATION. GROUT SHALL CONFORM TO ASTM C 476 AND ACI-530-11 BUILDING CODE. MIX GROUT FOR AT LEAST FIVE MINUTES AND UNTIL MIX HAS BEEN ATTAINED.GROUT SHALL HAVE SUFFICIENT WATER ADDED TO PRODUCE A CONSISTENCY FOR POURING WITHOUT SEGREGATION (8" TO 11" SLUMP). USE GROUT WITHIN 1 1/2 HOURS AFTER ADDING WATER TO THE MIX.
- C. MORTAR SHALL BE PORTLAND CEMENT-LIME TYPE S CONFORMING TO ASTM C 270, WITH A MINIMUM AVERAGE 28 DAY COMPRESSIVE STRENGTH OF 1800 PSI AND MAXIMUM AIR CONTENT OF 12%. DO NOT USE MASONRY CEMENT IN MORTAR. THE MIXTURE OF CEMENTITIOUS MATERIAL, AGGREGATE, AND WATER SHALL CONFORM TO THE FOLLOWING PROPORTIONS BY VOLUME:
  1. 1 PART PORTLAND CEMENT OR BLENDED CEMENT CONFORMING TO ASTM C 150 AND ASTM C515 RESPECTIVELY.
  2. 1/4 TO 1/2 PARTS HYDRATED LIME OR LIME PUTTY CONFORMING TO ASTM C 207.
  3. VOLUME OF AGGREGATE, MEASURED IN DAMP LOOSE CONDITION, EQUAL TO 2 1/4 TO 3 TIMES THE SUM OF THE VOLUMES OF THE ABOVE CEMENTITIOUS MATERIALS.

2.02 MINIMUM WALL VERTICAL REINFORCEMENT:
- A. PROVIDE CONTINUOUS FULL HEIGHT VERTICAL REINFORCING IN CENTER OF GROUTED VERTICAL CELLS AS SHOWN ON PLANS. PROVIDE MINIMUM VERTICAL REINFORCEMENT OF (1) #5 AT 32" ON CENTER, UNLESS NOTED OTHERWISE ON DRAWINGS.
- B. FOR OPENINGS 16" AND GREATER, PROVIDE 1 #5 WITHIN 16" OF EACH SIDE OF OPENINGS. EXTEND REINF SAME LENGTH AS ADJACENT WALL REINFORCEMENT. OPENINGS SMALLER THAN 16" ONLY NEED ADDITIONAL REINFORCEMENT IF TYPICAL REINFORCEMENT IS DISRUPTED.
- C. PROVIDE (3) #5 AT CORNERS, (4) #5 AT INTERSECTIONS (1) #5 EACH SIDE OF MOVEMENT JOINTS, AND (1) #5 AT WALL ENDS.

2.03 MINIMUM WALL HORIZONTAL REINFORCEMENT (UNLESS NOTED OTHERWISE ON DRAWINGS):
- A. PROVIDE 8" DEEP CONTINUOUS GROUTED BOND BEAMS WITH: PROVIDE (2) #5 AT SLAB ON GRADE (SOG), (2) #5 BARS AT WALL MIDHEIGHT (8'-0" MAX ABOVE FINISHED FLOOR), ROOF DIAPHRAGM CONNECTION, AND (2) #5 AT TOP OF PARAPETS. EXTEND REINFORCING THROUGH EXPANSION AND CONTROL JOINTS, WRAPPING BARS WITH TWO-LAYERS OF 1/8" THICK BOND BREAKING TAPE 2'-0" BOTH SIDES OF JOINT. DO NOT SPLICE BOND BEAM REINFORCING WITHIN 6'-0" OF AN EXPANSION OR CONTROL JOINT. PROVIDE BOND BEAM TYPE BLOCK FOR ALL HORIZONTAL REINFORCING.
- B. JOINT REINFORCEMENT: PROVIDE GALVANIZED LADDER TYPE #9 JOINT REINFORCING AT 16" VERTICAL SPACING OF CROSS WIRES AT 16" SPACING DO NOT USE TRUSS TYPE JOINT REINFORCING. CONFORM TO ASTM A951
- C. AT PITCHED ROOF LINES, BOND BEAM SHALL BE STEPPED TO MATCH THE WALL/DIAPHRAGM JUNCTION.
- D. PROVIDE (1) #5 BAR ABOVE AND BELOW ALL OPENINGS WITH ENDS EXTENDING 24" PAST THE OPENING. UNLESS OTHERWISE NOTED ON DRAWING OR BY LINTEL DETAILS OR LINTEL SCHEDULE.

2.04 SPLICES:
- A. REBAR LAP SPLICES

| BAR SIZE | LAP LENGTH |
|---|---|
| #3 | 16" |
| #4 | 36" |
| #5 | 45" |
| #6 | 54" |

- B. LAP JOINT REINFORCING 12" MINIMUM AT SPLICES. SPLICES SHALL CONTAIN AT LEAST ONE CROSS WIRE OF EACH PIECE OF REINFORCEMENT IN THE LAPPED DISTANCE.

2.05 JOINTS:
- A. SEE PLANS FOR MASONRY CONTROL JOINTS (MCJ) LOCATIONS. SPACE MASONRY CONTROL JOINTS 24'-0" ON CENTER UNLESS SHOWN OTHERWISE. LOCATE CONTROL JOINTS NO MORE THAN 12'-0" FROM WALL CORNERS. LOCATE CONTROL JOINTS AT VERTICAL INTERFACES OF CHANGES IN WALL HEIGHT OR WALL THICKNESS UNLESS SHOWN DIFFERENT ON DRAWINGS.
- B. EXPANSION JOINTS, CONTROL JOINTS, AND CONTINUOUS VERTICAL MORTAR JOINTS, SHALL BE AT LEAST 16" AWAY FROM BEARING PLATES AND OPENINGS OF JAMBS.

AGENCY REVIEW

## MASONRY CONSTRUCTION (CONTINUED)

3.01 MASONRY UNIT PLACEMENT:
- A. LAY UNITS IN RUNNING BOND. CORNERS SHALL BE STANDARD BOND WITH OVERLAPPING UNITS.
- B. MAXIMUM GROUT LIFT WITHOUT CLEAN-OUTS AND INSPECTION OF CLEANOUTS SHALL BE 5'-4".
- C. PROVIDE LINTEL TYPE BLOCKS AT THE BOTTOM OF LINTELS. PROVIDE DOUBLE OPEN END HALF WEB HEIGHT BLOCK FOR REMAINDER OF LINTEL DEPTH. PLACE ALL BLOCKS OF LINTEL IN RUNNING BOND THROUGHOUT SPAN AND AT JAMBS.
- D. CONCRETE MASONRY UNITS SHALL NOT BE WETTED.

3.02 REINFORCING PLACEMENT:
- A. PROVIDE REINFORCEMENT BAR POSITIONER ON ALL VERTICAL REINFORCING AT EACH END OF BAR AND AT 4'-0" MAXIMUM VERTICAL SPACING USING SINGLE WIRE LOOP TYPE TIES AS MANUFACTURED BY HOHMANN AND BARNARD INC PRODUCTS COMPANY OR APPROVED ALTERNATE.
- B. REINFORCING SHALL BE CLEAR OF MASONRY FACE SHELLS AND OTHER REINFORCING NOT SPLICED: 1/4" FOR FINE GROUT AND 1/2" FOR COURSE GROUT.

3.03 GROUT PLACEMENT:
- A. PRIOR TO GROUTING, CLEAN OUT SPACES TO BE FILLED WITH GROUT. REMOVE MORTAR PROJECTIONS GREATER THAN 1/2 INCH, MORTAR DROPPINGS AND OTHER FOREIGN MATERIAL. SPACES DESIGNATED TO BE GROUTED SHALL BE FILLED COMPLETELY WITH GROUT AND THE GROUT SHALL BE CONFINED TO THOSE SPECIFIC SPACES. REMOVE DEBRIS FROM BOTTOM OF MASONRY CELLS PRIOR TO GROUTING.
- B. GROUT SOLID WALLS IN CONTACT WITH EARTH (RETAINING WALLS, STEM WALLS, ETC.) AND AS NOTED ON DRAWINGS. GROUTED MASONRY SHALL BE CONSTRUCTED IN SUCH A MANNER THAT ALL ELEMENTS OF THE MASONRY ACT TOGETHER AS A STRUCTURAL ELEMENT.
- C. THE GROUTING OF ANY SECTION OF WALL SHALL BE COMPLETED IN ONE DAY WITH NO INTERRUPTIONS GREATER THAN ONE HOUR.
- D. BETWEEN GROUT POURS, A HORIZONTAL CONSTRUCTION JOINT SHALL BE FORMED BY STOPPING ALL WYTHES AT THE SAME ELEVATION AND WITH THE GROUT STOPPING A MINIMUM OF 1 1/2 INCHES BELOW A MORTAR JOINT, EXCEPT AT THE TOP OF THE WALL. WHERE BOND BEAMS OCCUR, THE GROUT POUR SHALL BE STOPPED A MINIMUM OF 1/2 INCH BELOW THE TOP OF THE MASONRY.
- E. CELLS AND SPACES CONTAINING REINFORCEMENT, ANCHOR BOLTS, OR HEADED ANCHOR STUDS (HAS) SHALL BE FILLED WITH GROUT. EMBEDS SHALL BE TIED OR FIXED IN PLACE PRIOR TO GROUTING.
- F. GROUT SHALL BE CONSOLIDATED BY MECHANICAL VIBRATION DURING PLACEMENT BEFORE LOSS OF PLASTICITY IN A MANNER TO FILL THE GROUT SPACE. GROUT POURS GREATER THAN 12 INCHES IN HEIGHT WILL BE RECONSOLIDATED BY MECHANICAL VIBRATION TO MINIMIZE VOIDS. GROUT POURS 12 INCHES OR LESS IN HEIGHT SHALL BE MECHANICALLY VIBRATED OR PUDDLED AND RODDED WITH SMOOTH BAR WITH ROUNDED END. VIBRATORS SHALL BE 120V, 60 HERTZ. BATTERY POWERED VIBRATORS ARE PROHIBITED.
- G. PROVIDE CONTINUOUS WIRE LATH GROUT BARRIERS AT TOP AND BOTTOM OF BOND BEAMS IN PARTIALLY GROUTED WALLS TO PREVENT GROUT FROM FLOWING UP AND OUT OF CELLS.
- H. BEAM POCKETS SHALL BE GROUTED FULL WITH NON-SHRINK GROUT AFTER ALL WELDS/CONNECTION HAVE BEEN STRUCTURALLY INSPECTED.

3.04 EMBEDDED ITEMS:
- A. WHERE MASONRY ENCOMPASSES STEEL BEAMS PROVIDE DOVETAIL ANCHORS AT 16 INCHES ON CENTER.
- B. HOLES IN MASONRY UNITS SHALL BE DRILLED. HOLES MADE BY CHIPPING WILL NOT BE ACCEPTED.
- C. MINIMUM EMBEDMENT OF BOLTS IN MASONRY OR GROUT PERPENDICULAR TO THE PLANE OF THE WALL SHALL BE 6" WITH A HEAD AT THE EMBEDDED END OR 5" WITH A 3" HOOK AT THE EMBEDDED END. MINIMUM EMBEDMENT OF BOLTS PROJECTING VERTICAL OUT OF THE TOP OF MASONRY WALL SHALL BE 8" WITH A HEAD BOLT AT THE EMBEDDED END OR 5" WITH A 3" HOOK AT THE EMBEDDED END.
- D. PROVIDE DOVETAIL ANCHORS AT 16 INCHES o.c. WHEN NEW MASONRY WALLS ABUT WITH NEW CONCRETE WALLS AND COLUMNS.
- E. WHERE DRAWING CALL FOR THE USE OF SPLIT-FACE TYPE BLOCK OR FLUTED TYPE BLOCK THE CONTRACTOR SHALL CHIP OFF AND GRIND SMOOTH SPLIT-FACE AND CHIPPED SURFACE AREAS SO THAT FACE MOUNTED STEEL EMBED PLATES WILL BE INSTALLED FLUSH TO BLOCK SURFACE. CONTRACTOR MAY BE REQUIRED TO SUPPLY ADDITIONAL STEEL SPACER PLATES OF DIFFERENT THICKNESS TO ALIGN EMBEDS.

## STRUCTURAL STEEL

1.01 DESCRIPTION:
- A. THIS SECTION COVERS THE REQUIREMENTS FOR MATERIALS AND INSTALLATION OF STRUCTURAL STEEL.

1.02 SUBMITTALS:
- A. SUBMIT SHOP DRAWINGS FOR ENGINEER'S REVIEW. FABRICATE ONLY FROM REVIEWED DRAWINGS.

1.03 QUALITY ASSURANCE:
- A. STEEL CONSTRUCTION SHALL CONFORM TO THE SPECIFICATIONS AND STANDARDS AS CONTAINED IN THE LATEST EDITION OF THE AMERICAN INSTITUTE OF STEEL CONSTRUCTION (AISC) MANUAL, INCLUDING THE COMMENTARY AND SUPPLEMENTS THERETO, AS ISSUED.

2.01 MATERIALS SHALL CONFORM WITH THE FOLLOWING STANDARDS, UNLESS NOTED OTHERWISE ON DRAWINGS:
- A. W-SHAPES - ASTM A992, FY=50 KSI
- B. PLATES FOR W-SHAPE MEMBERS AND STRUCTURAL TUBES - ASTM A572 GR 50
- C. OTHER ROLLED SECTIONS (ANGLES, CHANNELS, PLATES, ETC.) - ASTM A36, FY=36 KSI
- D. WHERE NOTED 50 KSI ON DRAWINGS - ASTM A572, FY=50 KSI
- E. STEEL PIPE - ASTM A53, GR. B, FY=35 KSI
- F. STRUCTURAL PIPES (HSS) - ASTM A500, GR. C, FY=46 KSI
- G. STRUCTURAL RECTANGULAR (HSS) - ASTM A500, GR C, FY=50 KSI
- H. STRUCTURAL BOLTS U.N.O. - ASTM A325 (TYPE N CONNECTION)
- I. ANCHOR BOLTS - ASTM F1554, GRADE 36
- J. WELDING RODS - E-70XX SERIES LOW HYDROGEN.

2.02 FINISHES:
- A. STEEL COMPLETELY ENCASED IN CONCRETE SHALL NOT BE PAINTED AND AT THE TIME THE CONCRETE IS PLACED, SHALL BE CLEAN AND FREE FROM ANY SUBSTANCE THAT MIGHT IMPAIR THE BOND BETWEEN THE STEEL AND CONCRETE.
- B. SEE STEEL SPECIFICATIONS FOR PRIME COATING OF ALL STEEL MEMBERS AND PAINTING SPECIFICATIONS FOR PAINTING STEEL.

3.01 WELDING:
- A. WELDING SHALL CONFORM TO AMERICAN WELDING SOCIETY (AWS) STRUCTURAL WELDING CODE FOR STEEL, AWS D1.1.
- B. ALL WELDERS SHALL HOLD VALID CERTIFICATES ISSUED BY AN ACCEPTED TESTING AGENCY WITHIN THE LAST 12 MONTHS. IF ANY CERTIFICATE IS MORE THAN 12 MONTHS OLD SUBMIT DETAILS OF COMPANY QUALITY CONTROL PROGRAM.
- C. ALL WELDERS SHALL SUBMIT PREQUALIFIED WELDING AND WELDING PROCEDURES TO BE AVAILABLE ON PREMISES FOR REVIEW.
- D. WELDS INDICATED WITH A SHOP WELD SYMBOL MAY BE MADE IN THE FIELD ONLY WHEN SUCH WELDING HAS BEEN SUBMITTED TO THE ENGINEER FOR REVIEW.
- E. PERFORM ULTRA-SONIC TESTS ON ALL FULL PENETRATION WELDS.
- F. GRIND SMOOTH ALL EXPOSED WELDS AND CUT EDGES. FINAL APPROVAL IS BY THE ENGINEER.
- G. ALL WELDING SHALL BE BY EITHER THE SHIELDED METAL ARC WELDING (SMAW) METHOD OR SHALL CONFORM TO AWS CODE FOR ARC AND GAS WELDING CONSTRUCTION. PROVIDE MINIMUM WELD SIZES PER AISC SPECIFICATIONS FOR GENERAL PROVISIONS FOR CONNECTIONS, JOINTS AND FASTENERS UNLESS SHOWN OTHERWISE ON DRAWINGS.

3.02 BOLTING:
- A. WHEN LONG SLOTTED HOLES ARE SPECIFIED BY DETAILS AND/OR NOTES ON DRAWINGS, THE CONTRACTOR SHALL SUPPLY PLATE WASHERS AS REQUIRED BY AISC SPECIFICATIONS.

## STAINLESS STEEL

1.01 EXPOSED STRUCTURAL STEEL, INCLUDING STEEL CONNECTIONS, SHALL BE STAINLESS STEEL AS NOTED ON THE DRAWINGS. ALL EMBEDDED STEEL COMPONENTS OF A STAINLESS STEEL CONNECTION SHALL ALSO BE STAINLESS STEEL.

2.01 STAINLESS STEEL MEMBERS AND MEMBER COMPONENTS SHALL CONFORM TO THE FOLLOWING ASTM SPECIFICATIONS:
- A. PLATES, SHEETS, AND STRIPS - ASTM A240
- B. BAR AND SHAPES - ASTM A276
- C. BOLTS - ASTM F593
- D. NUTS - ASTM F594
- E. WASHERS - ASTM A320
- F. DEFORMED AND PLAIN BARS FOR CONCRETE REINFORCEMENT - ASTM A955

3.01 WELDING OF STAINLESS STEEL COMPONENTS SHALL CONFORM TO AWS D1.6.

## POST-INSTALLED ANCHORS AND DOWELS

1.01 DESCRIPTION:
- A. THIS SECTION COVERS THE REQUIREMENTS FOR MATERIALS AND INSTALLATION OF POST-INSTALLED ADHESIVE ANCHORS, DOWELS AND MECHANICAL ANCHORS IN CONCRETE AND MASONRY CONSTRUCTION.
- B. DO NOT USE POST-INSTALLED ADHESIVE ANCHOR OR DOWELS SYSTEMS TO RESIST GRAVITY LOADS IN FIRE RATED CONSTRUCTION.
- C. POST INSTALLED ANCHORS AND DOWELS SHALL ONLY BE USED WHERE SPECIFIED ON THE CONSTRUCTION DOCUMENTS. THE CONTRACTOR SHALL OBTAIN WRITTEN APPROVAL FROM THE ENGINEER OF RECORD PRIOR TO INSTALLING ANY STRUCTURAL POST INSTALLED ANCHORS OR DOWELS THAT MAY BE USED TO REPLACE MISSING OR MISPLACED CAST-IN-PLACE ANCHORS OR DOWELS.

1.02 QUALITY ASSURANCE:
- A. PROVIDE SPECIAL INSPECTION IN ACCORDANCE WITH THE APPLICABLE ICC-ES REPORT, THE BUILDING CODE, AND THE GENERAL STRUCTURAL NOTES.

2.01 ANCHORS RODS, BOLTS, AND SLEEVES:
- A. SUBMERGED, EXTERIOR, OR BURIED CONDITIONS: PROVIDE ASTM F593 AISI TYPE 316 STAINLESS STEEL ANCHOR BOLTS WITH ASTM F594 STAINLESS STEEL NUTS.
- B. INTERIOR CONDITIONS: PROVIDE ASTM A307 CARBON STEEL ANCHOR RODS UNLESS NOTED OTHERWISE.

2.02 MECHANICAL ANCHORS FOR GROUT FILLED MASONRY (CMU):
- A. KWIK BOLT 3 EXPANSION ANCHOR BY HILTI (ICC-ES REPORT #ESR-1385), (STAINLESS STEEL BODY FOR EXTERIOR OR DAMP EXPOSURE).
- B. WEDGE-ALL ANCHOR BY SIMPSON (ICC-ES REPORT #ESR-1396), (STAINLESS STEEL BODY FOR EXTERIOR OR DAMP EXPOSURE).
- C. OR APPROVED EQUAL.

2.03 MECHANICAL ANCHORS FOR CONCRETE:
- A. KWIK BOLT TZ EXPANSION ANCHOR BY HILTI (ICC-ES REPORT #ESR-1917) (USE STAINLESS STEEL ANCHORS FOR EXTERIOR OR DAMP EXPOSURE)
- B. STRONG-BOLT 2 (USE STAINLESS STEEL ANCHORS FOR EXTERIOR OR DAMP EXPOSURE) WEDGE ANCHOR BY SIMPSON (ICC-ES REPORT #ESR-3037)
- C. OR APPROVED EQUAL.

2.04 ADHESIVES FOR ANCHORS AND DOWELS IN GROUT FILL MASONRY (CMU):
- A. HIT HY 200 BY HILTI (ICC-ES REPORT #ESR-3963).
- B. SET-XP ADHESIVE ANCHOR SYSTEM BY SIMPSON (IAPMO ER 265).
- C. OR APPROVED EQUAL.

2.05 ADHESIVES FOR ANCHORS AND DOWELS IN CONCRETE:
- A. HIT-RE 500 V3 BY HILTI (ICC-ES REPORT #ESR-3814).
- B. SET-3G BY SIMPSON (ICC-ES REPORT #ESR-4057).
- C. OR APPROVED EQUAL.

3.01 FIELD INSTALLATION:
- A. INSTALL ANCHORS ONLY AFTER CONCRETE HAS REACHED ITS MINIMUM SPECIFIED STRENGTH.
- B. LOCATE ANCHORS TO AVOID DAMAGE TO REINFORCEMENT. USE GROUND PENETRATING RADAR (GPR) CONCRETE TO LOCATE THE EXISTING REINFORCING. MARK REINFORCING LOCATIONS ON THE CONCRETE SURFACE. COORDINATE LOCATIONS OF HOLES TO BE DRILLED WITH MARKS TO CLEAR THE EXISTING REINFORCING.
- C. INSTALL ANCHORS IN ACCORDANCE WITH MANUFACTURER'S PUBLISHED INSTALLATION INSTRUCTIONS.
- D. CLEAN DRILLED HOLES USING WIRE BRUSH AND COMPRESSED AIR AS REQUIRED TO REMOVE PARTICULATE DEBRIS AND TO ACHIEVE A DUST FREE SURFACE.
- E. TORQUE ADHESIVE ANCHORS UPON INSTALLING BASE MATERIAL, BUT ONLY AFTER ADHESIVE IS FULLY CURED AND LOAD TEST HAVE BEEN PERFORMED.

## METAL DECK

1.01 DESCRIPTION:
- A. THIS SECTION DESCRIBES STEEL DECKING AS SHOWN ON THE DRAWINGS. SEE DRAWINGS FOR EXTENT, ORIENTATION, TYPE AND THICKNESS OF DECK REQUIRED.

1.02 COORDINATION:
- A. PROVIDE FIRE-STOP BETWEEN DECK AND MASONRY OR CONCRETE SURFACE AT ALL FIRE RATED ASSEMBLIES.
- B. FOR INSULATING CONCRETE MATERIALS, SEE CONCRETE SECTION OF GENERAL STRUCTURAL NOTES.
- C. PROVIDE METAL PROFILE CLOSURES AT DECK FLUTES AT PERPENDICULAR SUPPORTS.

1.03 SUBMITTALS:
- A. SHOP DRAWINGS SHALL SHOW THE ERECTION PROCEDURE AND DETAILS, THE ICC-EVALUATION SERVICE REPORT NUMBER, SECTION PROPERTIES, AND DIAPHRAGM SHEAR FURNISHED AND SHALL BE SUBMITTED FOR REVIEW PRIOR TO FABRICATION.

2.01 TYPE "N" ROOF DECK
- A. ALL SHEETS TO BE 20 GAGE, 3" DEEP, AND 24" WIDE PER IAPMO ER 2018 OR EQUAL. NARROWER CLOSURE STRIPS SHALL NOT BE LESS THAN 1'-6" WIDE AND SHALL BE FASTENED TO ADJACENT FULL SHEET WITH TYPICAL SIDE SEAM ATTACHMENT.
- B. PROVIDE STEEL DECK CONFORMING TO ASTM A 653, SS GRADE 50 (MIN) WITH GALVANIZED COATING DESIGNATION G60.
- C. MINIMUM DECK PROPERTIES ARE AS FOLLOWS:
  1. YIELD STRENGTH, Fy = 50 KSI
  2. POSITIVE BENDING EFFECTIVE SECTION MODULUS (DECK TOP IN COMPR) a. +Sx = 0.443 IN^3/FT
  3. NEGATIVE BENDING EFFECTIVE SECTION MODULUS (DECK BOTTOM IN COMPR) a. -Sx = 0.531 IN^3/FT
  4. DEFLECTION a. Id = 0.907 IN^4/FT
- D. FASTEN TO STRUCTURAL FRAMING WITH HILTI X-ENP-19 L15 AS PER ESR-2197 AT:
  1. ALL FLUTES AT TRANSVERSE SUPPORTS AND
  2. ALL STEEL MEMBERS PARALLEL TO FLUTES @ 12"o.c.
- E. FASTEN SIDE-LAPS WITH HILTI KWIK-FLEX 1/4-14 x 1" AT 12"o.c.
- F. FASTEN DECK WITH 3/4" PUDDLE WELD (1/2 FUSION AREA) TO:
  1. ALL TRANSVERSE SUPPORTS (JOISTS, BEAMS, ANGLES, PLATES, ETC.) FOUR WELDS PER SHEET = WELD EACH SIDE OF SEAM AND AT TWO INTERMEDIATE FLUTES.
  2. ALL STEEL PARALLEL TO FLUTES AT 12"o.c.
  3. EACH FLUTE AND AT 6"o.c. AT OPENING EDGES
  4. STANDING SEAM SIDE LAPS 1-1/2" LONG TOP SEAM WELD OR BUTTON PUNCH WITH PIERCING TOOL AT 12"o.c.

2.02 TYPE "B" FORMLOK ROOF DECK
- A. ALL SHEETS TO BE 20 GAGE, 1-1/2" DEEP, AND 36" WIDE PER IAPMO ER 2018 OR EQUAL. NARROWER CLOSURE STRIPS SHALL NOT BE LESS THAN 1'-6" WIDE AND SHALL BE FASTENED TO ADJACENT FULL SHEET WITH TYPICAL SIDE SEAM ATTACHMENT.
- B. PROVIDE STEEL DECK CONFORMING TO ASTM A 653, SS GRADE 50 (MIN) WITH GALVANIZED COATING DESIGNATION G60.
- C. MINIMUM DECK PROPERTIES ARE AS FOLLOWS:
  1. YIELD STRENGTH, Fy = 50 KSI
  2. POSITIVE BENDING EFFECTIVE SECTION MODULUS (DECK TOP IN COMPR) a. +Sx = 0.230 IN^3/FT
  3. NEGATIVE BENDING EFFECTIVE SECTION MODULUS (DECK BOTTOM IN COMPR) a. -Sx = 0.237 IN^3/FT
  4. DEFLECTION a. Id = 0.219 IN^4/FT
- D. FASTEN TO STRUCTURAL FRAMING WITH HILTI X-HSN 24 AS PER ESR 2197 AT:
  1. ALL FLUTES AT TRANSVERSE SUPPORTS AND
  2. ALL STEEL MEMBERS PARALLEL TO FLUTES @ 12"o.c.
- E. FASTEN SIDE-LAPS WITH HILTI KWIK-FLEX 1/4-14 x 1" AT 12"o.c.
- F. FASTEN DECK WITH 3/4"DIA PUDDLE WELD (1/2 FUSION AREA) TO:
  1. ALL TRANSVERSE SUPPORTS (JOISTS, BEAMS, ANGLES, PLATES, ETC.) 6 WELDS PER SHEET = WELD ONE SIDE OF SEAM AND AT ALL INTERMEDIATE FLUTES.
  2. ALL STEEL PARALLEL TO FLUTES AT 18"o.c.
  3. EACH FLUTE AND AT 6"o.c. AT OPENING EDGES
  4. STANDING SEAM SIDE LAPS BUTTON PUNCH WITH PIERCING TOOL AT 24"o.c.

AGENCY REVIEW

## GRATING AND COVER PANELS

1.01 GENERAL:
- A. PROVIDE AND INSTALL GRATING SYSTEMS WHERE NOTED ON STRUCTURAL, PROCESS, OR MECHANICAL DRAWINGS COMPLETE WITH COVER PANELS AS NOTED ON DRAWINGS AND ALL NECESSARY ACCESSORIES INCLUDING, BUT NOT LIMITED TO, EMBEDDED EDGE ANGLES, MID-SUPPORT CLIPS, AND ANCHORAGES AT SUPPORTS. PROVIDE REQUIRED SEPARATION (BEARING PADS ETC.) BETWEEN NON-COMPATIBLE MATERIALS. COORDINATE CUTOUTS AS REQUIRED FOR PIPING AND EQUIPMENT PER MECHANICAL DRAWINGS.

1.02 SUBMITTALS:
- A. SUBMIT SHOP DRAWINGS AND CALCULATIONS FOR THE GRATING AND THEIR RESPECTIVE ATTACHMENTS TO THE ENGINEER FOR REVIEW. THE DRAWINGS AND CALCULATIONS SUBMITTED FOR REVIEW SHALL BEAR THE SEAL AND SIGNATURE OF A PROFESSIONAL STRUCTURAL/CIVIL ENGINEER REGISTERED IN THE STATE IN WHICH THE SUBMITTED ITEMS WILL BE INSTALLED.

1.03 QUALITY ASSURANCE:
- A. PROVIDE SIZES, ANCHORING DETAILS, FABRICATION TOLERANCES IN ACCORDANCE WITH THE LATEST EDITION OF NAAMM METAL BAR GRATING MANUAL (ANSI/NAAMM MBG 531).
- B. PROVIDE NON-SKID TRAFFIC SURFACE THAT CONFORMS TO FEDERAL SPECIFICATION RR-G-1602A.
- C. LIMIT THE WEIGHT OF INDIVIDUAL GRATING AND COVER PANEL UNITS DESIGNATED AS REMOVABLE TO 75 POUNDS.
- D. USE ANCHORAGE DEVICES AND FASTENERS TO SECURE ALL GRATING TO SUPPORT ELEMENTS OR PREPARED OPENINGS, AS RECOMMENDED BY THE MANUFACTURER. PROVIDE REMOVABLE FASTENERS FOR GRATING AND COVER PANELS THAT ARE REMOVABLE.

2.01 STEEL MATERIAL:
- A. STEEL GRATING SHALL BE GALVANIZED CARBON STEEL BEARING BARS AND CROSS BARS WELDED TOGETHER. CROSS BARS MAY BE ROUND OR TWISTED. PROVIDE LOAD TYPE BANDING (WELD EACH BEARING BAR TO BAND BAR) CONTINUOUS ALONG EDGES AND CUTOUTS.
  1. GRATING BEARING BARS, CROSS BARS, AND BAND BARS SHALL CONFORM TO ASTM A 1011/A COMMERCIAL STEEL, TYPE 2.
  2. HOT-DIP GALVANIZE GRATING AFTER FABRICATION IN CONFORMANCE WITH ASTM A 123/A GRADE 45 (COATING NOT LESS THAN 1.8OZ/SQFT).
     - i. MAXIMUM STEEL FIBER STRESS: 18,000 PSI (UNDER LIVE LOADS).

2.02 ALUMINUM MATERIAL:
- A. PROVIDE ALLOY 6061-T6 OR ALLOY 6063-T6 CONFORMING TO ASTM B221. PROVIDE SWAGE-LOCKED CROSS BARS.
- B. WHERE ALUMINUM IS IN CONTACT WITH CONCRETE OR MASONRY SURFACES, CONTACT SURFACES SHALL BE COATED WITH HEAVY ALKALI-RESISTANT BITUMINOUS PAINT.
- C. MAXIMUM ALUMINUM FIBER STRESS: 12,000 PSI (UNDER LIVE LOADS)

2.03 FRP MATERIAL:
- A. PREMIUM GRADE, FIRE RETARDANT VINYLESTER RESIN WITH GLASS REINFORCEMENT CONSTRUCTED BY THE PULTRUSION METHOD. CONFORM FIRE RESISTANCE PROPERTIES TO ASTM E-84.
  1. ASTM D-635, SELF-EXTINGUISHING. ALL HARDWARE USED SHALL BE TYPE 316 STAINLESS STEEL.

2.04 GRATING
- A. SHALL BE DESIGNED FOR THE FOLLOWING MINIMUM LOADING REQUIREMENTS IN ACCORDANCE WITH THE BUILDING CODE. THE FOLLOWING LOADING CONDITIONS NEED NOT BE APPLIED SIMULTANEOUSLY:
- B. UNIFORMLY DISTRIBUTED LIVE LOAD - 300 PSF (WITH NO LIMIT ON DEFLECTION).
- C. CONCENTRATED LIVE LOAD - 3000 LBS ON 2.5FT X 2.5FT AREA (WITH NO LIMIT ON DEFLECTION).
- D. MAXIMUM DEFLECTION UNDER UNIFORMLY DISTRIBUTED LIVE LOAD OF 100 PSF OR CONCENTRATED LIVE LOAD OF 1000 LBS ON 1.0FT X 1.0FT AREA: 1/4" MAX OR SPAN/240, WHICHEVER IS LESS

3.01 FIELD EXECUTION:
- A. ALL GRATING SHALL BE PERMANENTLY INSTALLED BY FIELD WELDING TO ALL END BEARING AND INTERMEDIATE SUPPORTS UNLESS NOTED OTHERWISE AS REMOVABLE ON DRAWINGS. SECURE REMOVABLE GRATING TO END BEARING AND INTERMEDIATE SUPPORTS USING REMOVABLE DEVICES AND FASTENERS AS RECOMMENDED BY THE MANUFACTURER.
- B. ALL COVER PANELS SHALL BE INSTALLED AS REMOVABLE.

## PRE-ENGINEERED METAL BUILDING

1.01 DESCRIPTION:
- A. THIS SECTION COVERS THE REQUIREMENTS FOR DESIGN, MATERIALS, PROPORTIONING, AND INSTALLATION OF PRE-ENGINEERED BUILDING SYSTEMS AND COMPONENTS.
- B. THE MANUFACTURER SHALL BE RESPONSIBLE FOR THE ENTIRE DESIGN OF THE PRIMARY FORCE RESISTING SYSTEM, WALLS, ROOF, FASCIAS, SUPPORT, BRACING, LATERAL ANALYSIS, ANCHORAGE TO THE FOUNDATION, AND ALL RELATED WORK. ALL JOINTS IN FLOORS, WALLS, AND ROOFS SHALL BE WEATHERPROOF.
- C. STEEL PURLIN TYPE AND SPACING AND ROOFING SELECTION (STEEL DECK OR OTHER MATERIAL) SHALL BE THE OPTION OF THE PRE-ENGINEERED BUILDING MANUFACTURER WITH APPROVAL OF THE ENGINEER.

1.02 COORDINATION:
- A. PURLINS AND OTHER ROOF FRAMING SHALL BE ABLE TO ACCOMMODATE ROOF OPENINGS, SKYLIGHTS, ETC. SHOWN ON DRAWINGS AND REQUIRED FOR HVAC DUCTS AND PIPING. COORDINATE WITH OTHER DISCIPLINES.
- B. COORDINATE OPENINGS, PENETRATIONS, AND NECESSARY EQUIPMENT SUPPORT WITH OTHER CONTRACT DOCUMENTS AND EQUIPMENT PURCHASED. PRE-ENGINEERED BUILDING MANUFACTURER SHALL DESIGN AND SUPPLY ALL REQUIRED SUBFRAMING FOR OPENINGS, INCLUDING FRAMING TO SUPPORT THE WEIGHT OF THE EQUIPMENT.
- C. PRE-ENGINEERED BUILDING MANUFACTURER SHALL DESIGN THE CANOPY ROOF AT THE BLOWER BUILDING TO SUPPORT ALL DEAD AND LIVE LOADS ASSOCIATED WITH THE MONORAIL CRANE. SEE SPECIFICATIONS FOR MORE INFORMATION ON THE MONORAIL CRANE. SEE ARCHITECTURAL AND MECHANICAL DRAWINGS FOR LOCATION AND RUN. CONTRACTOR SHALL COORDINATE MONORAIL MANUFACTURER REQUIREMENTS WITH THE PRE-ENGINEERED BUILDING MANUFACTURER.
- D. FOUNDATIONS HAVE BEEN DESIGNED BASED UPON GENERAL ASSUMPTIONS AND ARE SHOWN ON STRUCTURAL DRAWINGS. THE GENERAL CONTRACTOR SHALL VERIFY THE ACTUAL LOADS WITH THE PRE-ENGINEERED BUILDING MANUFACTURER AND SHALL HAVE THE FOUNDATION DESIGN CHECKED AND REDESIGNED IF REQUIRED. DRAWINGS AND CALCULATIONS FOR THE FOUNDATION REVIEW AND REDESIGN (IF REQUIRED) SHALL BE SEALED BY A PROFESSIONAL STRUCTURAL/CIVIL ENGINEER REGISTERED IN THE STATE IN WHICH THE SUBMITTED ITEMS WILL BE INSTALLED AND SHALL BE SUBMITTED FOR REVIEW PRIOR TO CONSTRUCTION.

1.03 SUBMITTALS:
- A. SUBMIT DESIGN CALCULATIONS AND DRAWINGS SEALED BY A PROFESSIONAL STRUCTURAL/CIVIL ENGINEER REGISTERED IN THE STATE IN WHICH THE SUBMITTED ITEMS WILL BE INSTALLED AND SHALL BE SUBMITTED FOR REVIEW PRIOR TO CONSTRUCTION. DRAWINGS SHALL SHOW ALL INFORMATION INCLUDING, BUT NOT LIMITED TO, DIMENSIONS, MEMBER SIZES AND PROPERTIES, FRAMING PLANS, CONNECTIONS AND OTHERS SECTIONS AND PERTINENT DETAILS. FABRICATE FROM REVIEWED DRAWINGS.
- B. SUBMITTAL DOCUMENTS SHALL INCLUDE DESIGN CALCULATIONS, DRAWINGS, AND ALL REACTIONS IMPARTED TO THE PRIMARY STRUCTURE FOUNDATION CORRELATED TO LOAD COMBINATIONS USED AND MANUFACTURER'S RECOMMENDED DESIGN AND DETAILS OF ANCHORAGE TO THE PRIMARY STRUCTURE.

1.04 QUALITY ASSURANCE:
- A. THE ENTIRE SYSTEM, INCLUDING THE PRIMARY FORCE RESISTING SYSTEM AND SECONDARY COMPONENTS AND CLADDING, SHALL BE DESIGNED IN ACCORDANCE WITH THE BUILDING CODE.
- B. THE PRE-ENGINEERED BUILDING SHALL BE DESIGNED TO SUPPORT SELF WEIGHT PLUS SUPERIMPOSED DEAD, LIVE, WIND, SEISMIC LOADING WHICHEVER COMBINATION PRODUCES THE MOST SEVERE CONDITIONS, IN ACCORDANCE WITH THE LATEST RECOMMENDATIONS OF THE METAL BUILDING MANUFACTURERS ASSOCIATION AND ASCE 7 MINIMUM DESIGN

2.01 MATERIALS:
- A. STEEL PURLIN TYPE AND SPACING AND STEEL DECK SELECTION SHALL BE THE OPTION OF THE PRE-ENGINEERED BUILDING MANUFACTURER WITH APPROVAL OF THE ENGINEER.

2.02 BASIS FOR DESIGN
- A. DEAD LOAD = (SELFWEIGHT AS DETERMINED BY MANUFACTURER AND SHALL INCLUDE BUT NOT BE LIMITED TO THE SELF WEIGHT OF ROOFING SYSTEM, PURLINS, INSULATION, SPRINKLERS AND THE STRUCTURAL FRAME)
- B. SUPERIMPOSED DEAD LOAD = 25 PSF (THIS LOAD SHALL NOT BE USED TO RESIST ANY UPLIFT FORCES)
  1. CEILING UNDERHUNG EQUIPMENT DEAD LOAD = 300 LBS AT HANGER SPACED AT MAXIMUM OF 5'-0"o.c. EACH WAY ON ROOF FRAMING MEMBERS.
  2. ELECTRICAL BUILDING: SUPERIMPOSED DEAD LOAD SUPPORTED BY CEILING SHALL BE = 100 PSF
- C. WIND = (SEE STRUCTURAL DESIGN PARAMETERS)
- D. SEISMIC = (SEE STRUCTURAL DESIGN PARAMETERS)
- E. DEFLECTION CRITERIA:
  1. LATERAL DRIFT: H/200 MAX AT EAVE LINE OR 3/4" MAX.
  2. COLD-FORMED METAL ROOFING AND SIDING, TOTAL LOAD DEFLECTION-L/60
  3. SECONDARY ROOF STRUCTURAL MEMBERS SUPPORTING METAL ROOFING, LIVE LOAD DEFLECTION-L/150
  4. SECONDARY WALL MEMBERS SUPPORTING METAL SIDING, DESIGN WIND LOAD DEFLECTION-L/90
  5. PRIMARY STRUCTURAL ROOF MEMBERS,
     - i. W DEFLECTION -L/180
     - ii. LIVE LOAD DEFLECTION-L/180

## GUARDRAILS AND HANDRAILS

1.01 DESCRIPTION:
- A. PROVIDE AND INSTALL GUARDRAIL AND HANDRAIL SYSTEM COMPLETE WITH VERTICAL POSTS, TOP RAIL, INTERMEDIATE RAILS, HANDRAILS, TOE BOARD ("KICK PLATE"), AND BASE CONNECTION COMPONENTS AND ACCESSORIES INCLUDING, BUT NOT LIMITED TO, EMBEDDED SLEEVES OR ANCHORED PLATES.
- B. DESIGN SHALL COMPLY WITH LOCAL LIFE SAFETY AND BUILDING CODE REQUIREMENTS.
- C. FIELD WELDING OF GUARDRAIL AND HANDRAIL SYSTEM SHALL NOT BE ALLOWED UNLESS APPROVED BY THE ENGINEER.

1.02 SUBMITTALS:
- A. SUBMIT DRAWINGS AND CALCULATIONS FOR GUARDRAILS, AND THEIR RESPECTIVE ATTACHMENTS TO THE PROJECT MANAGER FOR REVIEW BY THE ENGINEER. THE DRAWINGS AND CALCULATIONS SUBMITTED FOR REVIEW SHALL BEAR THE SEAL OF A PROFESSIONAL STRUCTURAL/CIVIL ENGINEER REGISTERED IN THE STATE IN WHICH THE SUBMITTED ITEMS WILL BE INSTALLED.

1.03 QUALITY ASSURANCE:
- A. PROVIDE GUARDRAIL WITH HANDRAIL, TOEBOARD, INTERMEDIATE RAILS, AND EXTENSIONS AS SHOWN ON PLANS. PROVIDE HANDRAIL GRASPABILITY, CONTINUITY, EXTENSIONS, AND CLEARANCE IN ACCORDANCE WITH THE BUILDING CODE, AND WITH THE LATEST ADDITION OF NAAMM PIPE RAILING SYSTEM MANUAL (ANSI/NAAMM AMP 521).

1.04 MATERIAL:
- A. FRP PREMIUM GRADE, FIRE RETARDANT VINYLESTER RESIN WITH GLASS REINFORCEMENT CONSTRUCTED BY THE PULTRUSION METHOD. FIRE RESISTANCE PROPERTIES SHALL CONFORM ASTM E-84 (LESS THAN 25) AND ASTM D-635, SELF-EXTINGUISHING. ALL HARDWARE USED SHALL BE TYPE 316 STAINLESS STEEL.
- B. ALUMINUM PIPE (6061-T6) --------- Fy =35KSI AND Fb = 24KSI
- C. CARBON STEEL (A53-TYPE F)---------Fy = 25KSI Fb =18KSI

2.01 LOADING REQUIREMENTS:
- A. ATTACHMENTS AND ATTACHMENT DEVICES ARE CONSIDERED PART OF THE GUARDRAIL AND HANDRAIL SYSTEM AND MUST BE ABLE TO TRANSFER THE FOLLOWING MINIMUM LOADING REQUIREMENTS TO THE PRIMARY STRUCTURE.
  1. LINEARLY DISTRIBUTED LIVE LOAD OF 50 PLF APPLIED IN ANY DIRECTION AT THE TOP.
  2. CONCENTRATED LIVE LOAD OF 200 LBS APPLIED IN ANY DIRECTION AT ANY POINT ALONG THE TOP.
- B. DESIGN COMPONENTS OF THE GUARDRAIL SYSTEM SUCH AS INTERMEDIATE RAILS, BALUSTERS, AND PANEL FILLERS FOR THE FOLLOWING MINIMUM LOADING REQUIREMENTS IN ACCORDANCE WITH THE BUILDING CODE THIS LOADING NEED NOT APPLY SIMULTANEOUSLY WITH OTHER LIVE LOADS MENTIONED ABOVE.
  1. CONCENTRATED LIVE LOAD OF 50 LBS ON AN EQUIVALENT AREA OF 1FT X 1FT INCLUDING OPENINGS AND SPACE BETWEEN RAILS.

N.T.S

NOTE: 1. DO NOT PROVIDE A TOE PLATE FOR 6" HIGH GUARDRAIL PROVIDE ONE RAIL AT THE TOP OF THE 6" HIGH HANDRAIL.

POST w/ EMBEDDED PIPE SLEEVE

A-A

NOTE:
1. MAXIMUM POST SPACING 4'-0"
2. USE EMBEDDED OR SIDE MOUNT BASED ON LOCATIONS OF RAILINGS SHOWN ON PLANS.
3. USE HILTI HIT-RE 500 V3 ANCHORAGE SYSTEM IN ALL EXISTING CONCRETE AND NEW CONCRETE.
4. CONNECTION OF POSTS AND ANCHORAGE TO CONCRETE PER GUARDRAIL MANUFACTURER.

POST w/ SIDE MOUNTED PIPE SLEEVE

## ALUMINUM GUARDRAIL (3 RAIL) MOUNTING DETAILS POST BASE/SIDE CONNECTION

DETAIL 4 S-12

1" = 1'-0"

GUARDRAIL/HANDRAIL NOTES:

1.) GUARDRAILS ARE TO PROTECT OPENINGS OR SIDES OF FLOORS & BASINS.

2.) HANDRAILS ARE A SPECIAL FORM OF GUARDRAIL, WITH DIFFERENT REQUIREMENTS USED AT STAIRS AND RAMPS.

3.) GUARDRAIL MATERIAL (I.E.. S.S., ALUM, FRP) SHALL BE AS SPECIFIED OR AS INDICATED ON THE DRAWINGS.

4.) PLACE CENTER OF GUARDRAIL 6" FROM EDGE OF CONCRETE UNLESS OTHERWISE NOTED ON THE DRAWINGS.
ALL GUARDRAIL SHALL BE FIXED UNLESS OTHERWISE INDICATED ON THE DRAWINGS.

5.) PLACE GUARDRAIL POSTS OPPOSITE EACH OTHER WHERE RAILINGS ARE PARALLEL.

6.) PROVIDE SLIP JOINT AT 24'-0" MAX CENTERS FOR EXPANSION OF RAILS & KICKPLATE LOCATE RAIL JOINT AT FACE OF POST. GAP AT TIME OF INSTALLATION SHALL BE BASED ON TEMPERATURE OF GUARDRAIL (3/8" GAP AT 25°F, 0" AT 100°f).
AT CONCRETE EXPANSION JOINTS, PROVIDE MIN OF 1" GAP IN SLIP JOINTS, BUT NOT LESS THAN CONCRETE EXPANSION JOINT. INSERT SLEEVES SHALL BE LONG ENOUGH TO ALLOW FOR FULL RANGE OF MOVEMENT.

7.) KICKPLATE MAY BE EXTRUDED OR BENT PLATE & SHALL BE ATTACHED WITH S.S. BOLTS IN 5/16" x 3/4" SLOTTED HOLES. BLOT KICKPLATE TO POST WITH BOTTOM 1/4" CLEAR FROM SURFACE. FOR SIDE MOUNTED GUARDRAIL, PROVIDE STANDARD SPACER BLOCK BETWEEN POST & KICKPLATE TO MAINTAIN 1/4" MAX CLEAR SPACING. PROVIDE KICKPLATE AT ALL PLACES WHERE DROP FROM ONE LEVEL TO ANOTHER EXCEEDS 4'-0" & WHERE INDICATED ON THE DRAWINGS. HAND TIGHTEN & CENTER PUNCH BOLT TO LOCK SPLICES SHALL ACCOMMODATE EXPANSION PER NOTE 6. OMIT KICKPLATE WHERE GUARDRAIL IS MOUNTED ON 4" CURB INSTALL KICKPLATE IN ALL OTHER LOCATIONS.

8.) MATERIAL FOR SPLICE PLATE AND KICKPLATE CHANNEL SHALL BE OF THE SAME MATERIAL AS THE GUARDRAIL.

9.) FOR GUARDRAIL MOUNTED TO BEAM OR STAIR STRINGERS, PROVIDE MANUFACTURES REINFORCED CONNECTIONS FROM PIPE POST TO PLATE. PLATE & REINFORCING INSERTS SHALL BE ALUMINUM OR S.S..

10.) SINGLE RAIL HANDRAIL AT WALL, ABOVE STAIR, SHALL BE MOUNTED AT 3'-0" HIGH, MATCHING PROFILE OF TOP RAIL ON OPPOSITE SIDE OF STAIR.

FOR CONCRETE CUTTING
SEE 3 / S-14

TYPICAL PIPE PENETRATION INFILL AT
EXISTING CONCRETE WALL/FLOORS

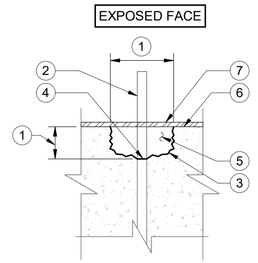
DETAIL 1 / S-14

1" = 1'-0"

EXPOSED REINFORCEMENT REPAIR PROCEDURES

1. REMOVE EXISTING CONCRETE (DIMPLE) AROUND REINFORCEMENT TO A DIAMETER OF 2.5 TIMES THE REBAR DIAMETER (1-1/2 -INCH DIAMETER MINIMUM) AND A MINIMUM DEPTH OF 1-INCH. DIMPLE SIDES SHALL BE NEAR PERPENDICULAR TO EXPOSED SURFACE FACE.
2. REMOVE/ TORCH CUT THE EXPOSED REINFORCING END TO THE BOTTOM OF DIMPLE.
3. ROUGHEN AND CLEAN DIMPLE SURFACE TO A MINIMUM SURFACE PROFILE OF +/- 1/16 INCH.
4. COAT END OF EXPOSED REINFORCEMENT WITH SIKA ARMATEC 110 EPOCEM. SIKA ARMATEC REQUIRES TWO COATS WITH A DRYING PERIOD IN-BETWEEN COATS. SEE PRODUCT LITERATURE FOR ADDITIONAL INFORMATION.
5. AFTER SECOND COAT OF SIKA ARMATEC HAS DRIED, FILL DIMPLE USING A REPAIR MORTAR SUCH AS SIKATOP 122 PLUS - HORIZONTAL. SIKATOP 123 PLUS VERTICAL AND OVERHEAD.

SURFACE PROTECTION PROCEDURES:



6. SEE OVERALL SECTION FOR EXTENT OF COATING. CONCRETE SURFACES SHALL BE CLEAN AND FREE FROM ANY DUST, LAITANCE, GREASE, AND ALL BOND-INHIBITING MATERIALS.
7. APPLY TWO COATS OF SIKAGARD 62 TO THE SURFACE OF THE CONCRETE. SEE PRODUCT LITERATURE FOR ADDITIONAL INFORMATION.

NOTES:
REFERENCE PRODUCT LITERATURE FOR SURFACE PREPARATIONS, MIXING PROCEDURE, POT LIFE, APPLICATION PROCEDURES, AND ANY ADDITIONAL INFORMATION. ANY PRODUCT SUBSTITUTIONS SHALL BE SUBMITTED TO THE ENGINEER FOR APPROVAL. PRODUCTS SHALL BE APPROVED FOR CONTACT WITH POTABLE WATER.

EXPOSED REINF REPAIR PROCEDURE DETAIL
