

Large Landscape Water Efficiency Program

PROGRAM BENEFITS

- ❖ The program is designed to encourage communities to save water while maintaining thriving landscape areas.
- ❖ Provides a monthly landscape water budget based on weather conditions to help reveal ways to reduce water use, save money, and optimize sustainable watering practices.
- ❖ Provides access to a visually intuitive platform (Waterfluence) that tracks water use and issues customized watering recommendations based on the landscape water use budget.
- ❖ Site contacts can authorize third parties such as HOA board members and landscape contractors to access site information.

Large Landscape Efficiency Program Cont.

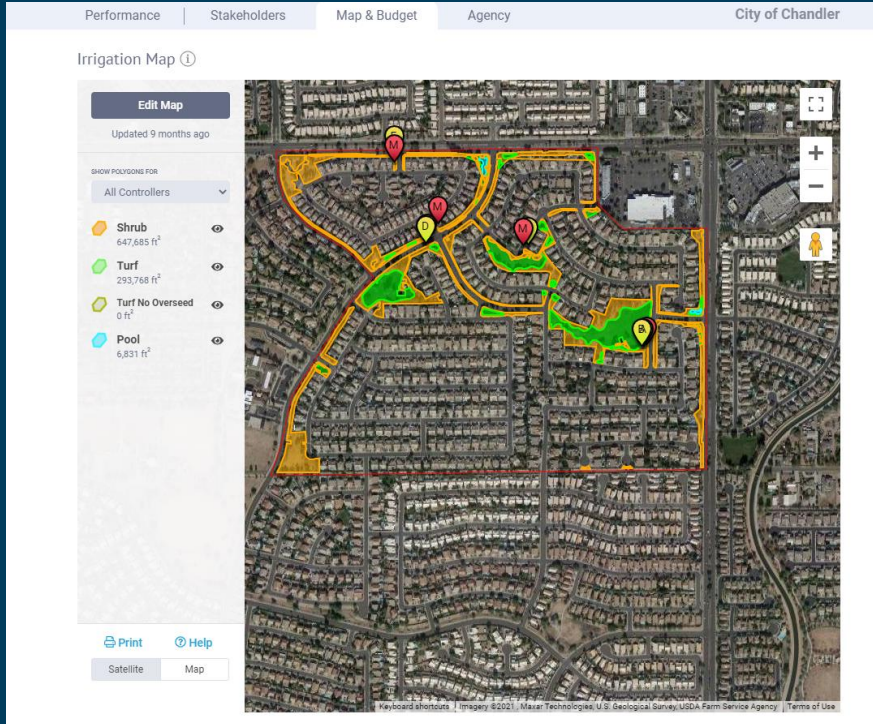

HOAs have access to:

- Site characteristics
- Historical water use
- Water budget range
- Customized messages
- Peer-based irrigation performance metrics

All based on site characteristics and daily local weather during that billing cycle.

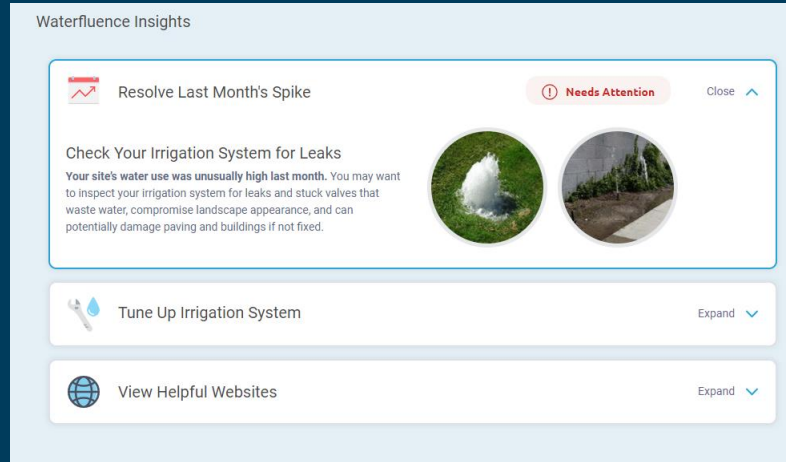

Large Landscape Efficiency Program Cont.

A customized map, will be created for each site using aerial imagery that includes measurements of irrigated turf, irrigated shrubs/trees, and water features.

Large Landscape Efficiency Program Cont.

- ❖ HOA site managers have access to maintain and manage site contacts to maximize program engagement.
- ❖ City of Chandler will send site specific messages to HOAs. Messages might include information on potential leaks, suggested repairs, other landscape programs, and useful hyperlinks.
