Chandler Municipal Airport Noise Report

Meeting Date:
April 12, 2023

- First complainant reported a loud aircraft doing pattern work early on a Saturday morning. Flight tracking indicated the CHD based twin-engine aircraft was conducting pattern work at 5:30AM. All data revealed the aircraft was operating at regulatory altitudes.
- Second complainant reported repeated aircraft noise in proximity to the residence but left very little details. Multiple messages to the complainant that went un-returned. Hotline call was logged.
- Complainants #3, #4, #5 and #6 reported the same “extremely loud” aircraft repeatedly flying over the neighborhood on a Sunday morning. Flight tracking revealed a Scottsdale-based T-6 Texan did six circuits in the pattern and then landed and parked at the Hangar Café. All data revealed that the aircraft was at regulatory altitudes during the pattern work.
- Complainants #6 and #7 live nearly a block away from each other and inquired if the north traffic pattern had change due to the increase of aircraft traffic. Both complainants live just north of the Hwy 202 and Cooper Road area and were provided the CHD Traffic Pattern graphic indicating the circuit of the north runway.
