1. INTRODUCTION

Continuing to build on their reputation of building high-quality single-family communities, K. Hovnanian Homes (“K Hovnanian”), is the proposed developer of approximately 19.85± gross (18.64± net) acres located south of the southwest corner of Basha Road and Ocotillo Road (the “Site”) as shown in **Figure 1: Context Aerial**. K. Hovnanian intends to develop the Site with 107 single-family lots, a density of approximately 5.74 du/ac, that will be known as “Havenwood Manor.” The challenging, infill property is ideally suited for a residential development. The proposed development offers a housing product which brings the highly demanded but often overlooked “Missing Middle” housing option to the market.

2. REQUEST

To achieve this, K Hovnanian requests:

- Zoning the Site Planned Area Development (PAD) for single-family residential,
- Preliminary Development Plan (PDP) for subdivision layout and housing product, and
- Preliminary Plat approval.

Simultaneous with these requests, approximately 15.4 acres of the Site that lies within unincorporated Maricopa County will be annexed into the City of Chandler (the “City”).

3. SITE BACKGROUND & CONTEXT

The Site was previously utilized as the corporate office for the Basha’s family and grocery chain of stores. Since selling the stores in 2022, the corporate offices are no longer necessary. A portion of the Site is zoned AG-1 and the unincorporated parcels are zoned RU-43 in Maricopa County. The Site is surrounded on two sides by Echelon a residential development consisting of single-family homes (west) and townhomes (north). Immediately south is the City’s Snedigar Sports Complex. To the east, across Basha Road, exists a variety of uses including a day school, vacant land, and residential uses, all zoned AG-1. The Basha Road frontage has been designated Historical by the City to protect the canal and palm trees running parallel to the road.

4. GENERAL PLAN DESIGNATION

The City’s General Plan designates the Site as ‘Neighborhood’. K Hovnanian’s requests are supported by the following goals and policies of the General Plan:

- Land Use & Development Policy 1.1.1(f) Encourage compatible infill projects.
- Housing & Neighborhoods Policy 1.1.2 (a), 1.1.2 (b), 1.1.2 (c) Provide for a variety of housing choices for all income levels and promote a compatible mix of housing types in infill areas. Encourage a range of housing types within walking distance of schools and other community facilities (e.g, recreation spaces).
- Growth Areas: It is important to note that there are infill lots and parcels that will be redeveloped outside of these growth areas. Chandler encourages infill and redevelopment to occur in appropriate areas throughout Chandler.
- Infill: Development of vacant lands in predominantly built-up portions of the community or redevelopment of properties that are underutilized so as to make the most efficient use of existing infrastructure and attain higher economic return from real estate.

5. PROPOSED AREA PLAN AMENDMENT

K. Hovnanian requests an Area Plan Amendment to update the Ocotillo Master Plan to modify the site’s designation of “Existing Basha’s Facility” to “Single-Family uses”. This amended designation is appropriate for the infill site with its surrounding existing uses for residential and recreation. See **Figure 2: Existing**

6. PROPOSED PLANNED AREA DEVELOPMENT

One of the objectives of PAD zoning is “to assist in the fulfillment of the goals, objectives, and policies of the Chandler General Plan.” Another objective is “to provide a maximum choice in the types of environments for residential, commercial, and industrial uses and facilities.” The intent of this PAD is to accomplish those objectives by rezoning the Site from AG-1 and RU-43 to PAD Residential. The proposed zoning change responds to the existing and future needs of the community by providing additional housing choices for people seeking to live in an infill setting in south Chandler. The proposed PAD meets the applicable zoning objectives and is supported by the General Plan.

7. PROPOSED PRELIMINARY DEVELOPMENT PLAN

Site Layout

Havenwood Manor will be a high-quality, gated community that has been thoughtfully designed to comply with the City’s Residential Design Standards, and to preserve and enhance the historic-designated canal and palm trees along the Basha Road frontage. The community will have 107 residences with a minimum lot size of 40’x100’. One primary point and one emergency/exit only access point are provided off of Basha Road, maintaining the existing canal crossings. See *Figure 4: Site Plan.*

The community offers a minimum of 20% open space with an amenity park towards the northeast corner of the development. The lots are a minimum of 4,000 square feet with detached single family housing product. The subdivision offers 39-foot-wide private local streets, which will accommodate guest parking on one side of the street. In addition, each home will provide two car garages and two car driveways, providing four parking spaces for each home.

Amenities & Open Space

Over 4-acres of open space are provided, with landscaping creating a sustainable and colorable plant palette as shown on *Figure 8: Landscape Plan.* The selected plant material will be low water use and selected from the Arizona Department of Water Resources (ADWR) “Low Water Use Plant List”. The amenity area will include a tot lot, ramada, and turf area. Additionally, a walking trail is provided along the perimeter of the site providing connection to the Snedigar Dog Park, and Basha Road.

Entry, Walls, Signage

Two entry monuments shall be located on either side of the primary entry drive. A tribute to the Basha Family’s legacy will be provided as a plaque along the perimeter walkways alongside the entry monumentation. Additionally, by using a corrugated steel roof decking material mechanically connected (skinned) to a CMU core, the vertical rib / board and batten look of the existing Bashas building will be replicated on monumentation throughout the community. Ground mounted lighting shall be provided to illuminate the monument as well as accent larger box trees immediately adjacent. See *Figure 8: Interpretive Sign Elevation* and *Figure 9: Hardscape Details.*

Rear lot walls along the north, west, and south edges of the site, and backing the amenity, will be a 1’ over 5’ partial view wall to provide visibility to the perimeter walking trail and active open spaces. A theme wall designed to match the existing walls of the Echelon community to the north of the project will be along the eastern portion of the community, with a secondary theme wall for side lot walls adjacent to open space tracts. The landscaping and hardscape improvements along the Basha Road frontage are consistent with

what was put in by the Echelon Community.

8. SUBDIVISION LAYOUT DIVERSITY

Havenwood Manor incorporates several of the Subdivision Diversity Elements into its design. Prior to arrival, the community begins to build visual interest prior to arrival through the staggered thematic-themed perimeter along Basha Road bordered by landscaped open spaces and irregular shaped retention basins. Upon turning onto the community’s curvilinear street system, a sense of neighborhood will be experienced through the diverse, but complementary, architectural styles, landscaping, and open spaces.

Havenwood Manor is seeking to provide a middle housing option in an infill development. The site faces certain challenges that a traditional greenfield development would not. Havenwood Manor made intentional design choices such as providing additional open space and multi-use paths instead of vehicular rear yard access. The proposed multi-use paths wrap the community and provide several internal access points and opportunities for pedestrian connectivity. To create a visually interesting experience, the paths are lined with a variety of planting materials, are visible from adjacent rear yards by the implementation of partial view fencing, and lead to pockets of open space and retention basins that were designed for passive recreation. Staggered walls and select areas of full view fencing along the Basha Road frontage further this goal of visual interest, safety and welfare.

9. DEVELOPMENT STANDARDS

TABLE 2 – PROPOSED DEVELOPMENT STANDARDS	
Lot Size (min.)	40’ x 100’
Front Setback	20’ from Back of Sidewalk 13’ from PL to livable
Rear Setback	10’; The rear yard setback for an accessory building shall be a minimum of 5 feet.
Street Side Setback	10’ landscape tract can reduce the minimum street side setback by the width of the tract up to 5’
Side Setback	5’-5’
Building Height	30’
Density (Maximum)	5.7 du/ac
Common Open Space	20%
Lot Coverage	60%

Below are the development standards proposed for the Havenwood Manor residential subdivision:

10. HOUSING PRODUCT

Havenwood Manor will provide high-quality architecture consisting of Spanish Modern, Farmhouse and Contemporary styles. Four-sided architecture has been provided on all homes throughout the community. Each elevations style has 4 different color scheme options provided to further enhance the character and uniqueness of the community. Additionally, each architectural style will incorporate specific details, e.g., window trim, shutters, board and batten siding, masonry veneer, corbels, parapets, window girds, and

stucco control joints. See *Appendix A: Building Elevations & Floorplans*, and *Appendix B: Color & Materials Palette*.

The homes will be two story and range in size from 1,979 SF to 2,640 SF. All home designs include front doors and covered entry/porches that are visible from the street. The garage styles, locations, and coach

lights further diversify the design and deemphasize garage fronts. The image below illustrates the diversity of design and the unique collection of architectural styles.

11. MISCELLANEOUS

A. Grading and Drainage

The On-Site Drainage Map is attached as *Exhibit 11*. All development drainage systems will be designed and constructed in accordance with the latest MAG Standard Specifications and Details and the latest City Standards Details and Specifications. Onsite drainage and retention shall consist of catch basins, storm drains, and retention basins. Retention basins have been sized to retain runoff from the 100-year, 2-hour storm.

B. Utilities

Utilities and services will be provided by the City.

C. Phasing

There is only one phase for the development. Any deviations from this phasing schedule may be administratively approved by Staff.

D. Preliminary Plat

A Preliminary Plat is included as *Exhibit 12*.

12. CONCLUSION

Havenwood Manor makes good use of this infill Site, providing housing choices and variety that will be an attractive presence in the area. Developing the Site with a high-quality community, K. Hovnanian will inject a new type of housing product in this established part of the City. This development provides a sustainable solution on a challenging site and serves as an appropriate and compatible land use for this Site and surrounding area. The thoughtful design will be an attractive presence in the area. We request your approval.
