Application Priority Areas

Public Safety

Title of the Project

2026 Gila River Combi Tools

Amount Intended to Request

\$320,125

Purpose of the Grant

This grant would fund the upgrade of the Fire Departments Hurst Combi Tools ("Jaws of Life") for Engine and Low Acuity units to be newer E3 battery technology from the current E2 battery technology.

Project Summary

This grant would fund the upgrade of the Fire Departments Hurst Combi Tools ("Jaws of Life") for Engine and Low Acuity units to be newer E3 battery technology from the current E2 battery technology. Currently the departments Ladder trucks have the newer technology, and the department has found them to be very effective. This grant would fund 15 new tools for disbursement to the units running the older batteries. Benefits of the accepted grant would be that all apparatus being on the same combi tool will allow for easy exchange between units, if necessary, bulk purchase discounts of replacement parts and fewer repairs being needed. Many of the older Combi-Tools have been needing repair, leading to downtime of the tool that impacts operations and potentially impacts responses.

Grant Requirement:

Purchase of Equipment over \$10,000
