City Council Meeting Date: \_\_\_\_\_

**AMENDMENT TO CITY OF CHANDLER AGREEMENT  
LANDSCAPE SERVICES AREAS 1-4  
CITY OF CHANDLER AGREEMENT NO. PW2-988-4516**

THIS AMENDMENT NO. 4 (Amendment No. 4) is made and entered into by and between the City of Chandler, an Arizona municipal corporation (City), and BrightView Landscape Services, Inc., (Contractor), (City and Contractor may individually be referred to as Party and collectively referred to as Parties) and made \_\_\_\_\_, 2026 (Effective Date).

**RECITALS**

WHEREAS, the Parties entered into an agreement for landscape services (Agreement); and

WHEREAS, the term of the Agreement was August 22, 2022, through August 21, 2023, with the option of up to four one-year extensions; and

WHEREAS, the Parties wish to exercise the fourth option through this Amendment to extend the Agreement for one year.

**AGREEMENT**

NOW THEREFORE, the Parties agree as follows:

1. The recitals are accurate and are incorporated and made a part of the Agreement by this reference.
2. Section III is amended to read as follows: The Agreement is extended for a one-year period July 1, 2026, through June 30, 2027.
3. Section IV, Price is amended to read as follows: The City will pay the Contractor the per unit cost set forth in Revised Exhibit B of the original Agreement, attached to and made a part of this Amendment No. 4. Total payments made to the Contractor during the term of this Amendment No. 4 will not exceed \$2,911,575.

- 4. Exhibit A to the Agreement is amended to include scope of work changes and additions in Revised Exhibit A, attached to and made a part of this Amendment No. 4.
- 5. All other terms and conditions of the Agreement remain unchanged and in full force and effect. If a conflict or ambiguity arises between this Amendment No. 4 and the Agreement, the terms and conditions in this Amendment No. 4 prevail and control.

IN WITNESS WHEREOF, the Parties have entered into this Amendment on the Effective Date.

## **RIGHT-OF-WAY LANDSCAPE & LITTER SERVICES**

### **SCOPE OF WORK**

#### **INTRODUCTION**

The City of Chandler intends to establish contracts for landscape maintenance and litter services at various right-of-way (RW) and stormwater retention basin (BN) locations throughout the City limits. The City of Chandler reserves the right to award any geographic or task based portion of this contract to the Contractor or multiple Contractors that best suits the needs of the City of Chandler community. Contracts will become effective four weeks after notification of award and shall remain in effect for one (1) year, with the option for four (4) one (1) year renewal terms. Therefore, the entire contract term shall not exceed five (5) years.

#### **BACKGROUND**

The Contractor is to furnish all supervision, labor, material, equipment, tools, chemicals, transportation, and all effort necessary to maintain the City's ROW in accordance with the City's standards set forth herein. Described in the pages to follow is a general outline and required frequencies of the type of work to be performed under this contract and the minimum acceptable City standards of performance and appearance.

The Contractor must be licensed for landscape maintenance as required by Arizona revised statutes. Contractor shall coordinate workspace along streets as required including approval of traffic control, coordinating of utility marking service as necessary, site clean-up, safety, and any other incidental work. Contractor will be responsible for ensuring public ROW safety requirements such as abiding by the City's traffic control measures, including safety vests, are adhered to while providing the landscape maintenance services.

The Contractor shall be responsible for understanding and following the City of Chandler Engineering & Design Standards Manual AND the Specifications and Standard Details (supplement to MAG), latest edition. Any deviations from the Standards Manual or Details shall require the expressed written approval from the City Engineer. Contractor must adhere to Arizona Department of Environmental Quality and Maricopa County Dust Regulations Rule 310, and 310.01., including compliance to daily Pollution Advisories.

#### **CONTENTS**

- A. DEFINITIONS
- B. OPERATIONS AND ADMINISTRATION
- C. HORTICULTURAL STANDARDS & SPECIFICATIONS
- D. COORDINATION WITH CITY DEPARTMENTS
- E. PRICING SCHEDULE AND ORGANIZATIONAL CHART
- F. LANDSCAPE ENHANCEMENT PROJECT SPECIFICATIONS
  - Part 1: Project Management
  - Part 2: Installation and Construction Standards
- G. PAYMENT TABLE FOR ENHANCEMENT WORK
- H. LANDSCAPE MAINTENANCE INVENTORY

## A. DEFINITIONS

'May' shall mean negotiable.

'Should' shall mean expected.

'Shall' shall mean mandatory.

'Contract Supervisor', shall mean the Landscape Contract Superintendent, Contract Supervisor or Landscape Services Technician

'The City', shall refer to the City of Chandler, Arizona as a whole.

'Contractor', shall refer to the landscape maintenance vendor providing the scope of work services.

'Grounds' shall mean all developed or undeveloped dedicated public rights of way or medians owned by the City of Chandler. This may include landscaped areas adjacent to City buildings or facilities, parks, retention basins, streets, etc.

'Landscape' shall mean all wanted and unwanted plant life and the surface or earth that is growing in or may grow in, which is within the boundaries of specific grounds covered by this contract.

'Hardscape' shall mean any area other than those where surface of the ground is covered with non-plant materials such as concrete, asphalt, pavers, rock products, soil, mulch, or any combination thereof.

'Rights of way' run adjacent to streets and are defined as everything from the face of curb & gutter, the entire sidewalk, and continue to designated property line. This includes pavers, bricks, asphalt, concrete, or any other hardscapes used in lieu of granite.

'Medians' have street on both sides of them and defined as everything from curb/gutter interface to curb/gutter interface and from tip of bull-nose curb to tip of bull-nose curb.

'Routine Work' shall mean all work requirements described in these specifications included as part of the pay items listed for each contract area or areas added by change order.

'Enhancement Work' shall mean any work the City requests the Contractor to perform which is either outside the contract boundaries or does not conform to the definition of "Routine Work" required by these specifications. All authorized and approved Enhancement Work performed under this contract shall be paid at the prevailing Enhancement Work Rate for labor services and

equipment used.

'Net 30' shall mean all invoices for Routine or Enhancement Work must be received within 30 days of the completion of the work. The City may not pay invoices that have not been submitted to accounts payable within the fiscal year of July to June.

'Emergency Response Work' shall mean any work the City requests the Contractor to perform which is in response to an immediate hazard or other emergency as determined by the City. All authorized and approved Emergency Response work shall be paid at the prevailing 'Emergency Rate' for labor services and equipment used.

'Storm Clean Up' shall mean any 'Emergency Response Work' the City requests the Contractor to perform

'Labor Rate' shall be a price the Contractor has submitted with their bid document and has been accepted by the City. This price represents the basis of all 'Enhancement Work', 'Emergency/Storm Response Work.'" All labor rates shall be based on unit pricing representing the hourly rate for one employee, transportation and all appropriate tools or equipment to do the landscape maintenance task.

## B. OPERATIONS AND ADMINISTRATION

### 1. CONTRACTOR'S EMPLOYEES

**Assigned Employees** – As a performance-based contract, it is the Contractor's responsibility to ensure the landscape is maintained to the assigned level of service within the approved schedule. The Contractor may from time to time have to provide additional personnel to meet schedules at no additional cost to the City. **The Contractor will submit an organizational chart with the staff members needed to meet the levels of service described.**

**Upon approval of the Contractor's organizational chart of employees assigned to the contract, the employee categories of crew leaders, irrigation technicians, and pesticide spray technicians described below shall be dedicated to the City contract with no other clients/accounts assigned to them.**

The City believes that to be successful in the maintenance of City landscapes, these key personnel must have the focus to learn the details and nuances in order to have institutional knowledge of the City's rights-of-way and medians. Account managers, Arbor teams, or maintenance and litter crews do not need to be dedicated to the City contract.

Contractor shall have separate well equipped crews to do mowing, palm tree pruning, and larger pesticide/herbicide/pre-emergent applications as needed to meet the service levels. These tasks should not be completed by the maintenance crews.

#### 1.1. Field Supervisor / Account Manager

The Contractor shall furnish at least one qualified field supervisor that will be available Monday through Friday, 6:00 a.m. – 5:00 p.m., to address problems and field inspections, and shall not have any additional labor duties other than incidentals. The field supervisor shall coordinate with the City and be accessible by cellular telephone, text and email as well as the ability to send and receive pictures, provided at Contractor's expense. Field supervisor should make every effort to return calls made by contract supervisor within 30 minutes of receiving a message and respond to emails within 24 hours. The field supervisor shall have separate transportation to be able to move independently between jobsites. An organizational contact chart shall be provided or other alternative contact information for instances when the field supervisor is not available. Field Supervisor is also required to have an internet accessible field device for looking up RW and BN asset numbers in the GIS web application. Additional consideration will be given to field supervisors who are certified in Sustainable Landscape Management practices outlined by the Arizona Landscape Contractors Association.

Contractor agrees that, once assigned to work under this agreement, field supervisor shall not be removed or replaced without prior written notice to the City. If the primary field supervisor is not available for work under this contract for a continuous period exceeding 15 calendar days or are expected to devote substantially less effort to the contract than initially anticipated, the Contractor shall immediately notify the Contract Supervisor.

The Contractor shall replace the primary field supervisor with personnel of equal ability and qualifications within 15 calendar days of notification. The field supervisor selection must be mutually agreed upon with the Contract Supervisor.

**1.2. Crew Leaders/Production Managers** - Contractor crew leaders assigned to the contract to address problems, perform field inspections, and for other coordination with the City. Contractor's crew leaders shall supervise only one contract unless approved by the Contract Supervisor. These persons shall not have any additional labor duties other than incidentals. The Crew Leader shall have separate transportation to allow them to move independently between situations. The crew leader shall coordinate with the City and be accessible by cellular telephone, text and email as well as the ability to send and receive pictures, provided at Contractor's expense. Crew Leader should make every effort to return calls made by contract supervisor within 30 minutes of receiving a message

The Crew Leader must be knowledgeable in the area of responsibility and have a minimum of one (1) year experience in the past two years performing in the same capacity on a contract with a similar scope. An Arizona Landscape Contractors Association certified landscape professional or equivalent, Sustainable Landscape Management certification, and other recognized knowledge or experience with the same level of plant care is encouraged.

Each crew shall have a person (typically the crew leader) trained, qualified, and equipped to utilize a chain saw and have access to a chain saw at any given time. The chain saw shall be well-maintained and in good working order at all times. Moreover, the chain saw needs to be readily available in times of immediate need, typically storm events and traffic accidents. Crew leaders should ensure crew members have hand pruners on their persons as part of their uniform.

**1.3. Irrigation Technician** - Contractor's Irrigation Technician shall have their own dedicated vehicle for repairs and maintenance of the irrigation system. Such vehicle shall be properly equipped with standard irrigation supplies, see Section 6.6 Irrigation Maintenance. An Arizona Landscape Contractors Association Certified Irrigation Technician, and other recognized knowledge or experience with 2-wire systems is encouraged.

The Contractor will work with the City to establish and maintain irrigation station watering schedules. The programming and maintenance of all controllers is the Contractor's responsibility at the direction of the contract supervisor. If the Contractor has reason to believe that a controller has failed, it must be reported immediately to the contract supervisor.

**1.4. Pesticide Spray Technician** - Contractor's Spray Technician shall have their own dedicated vehicle for herbicide applications throughout the City. Such vehicle shall be properly equipped with a minimum 100-gallon spray tank with a powered agitator and compliant with Arizona Office of Pest Management pesticide container and transportation regulations. An Arizona Certified Pest Applicator license is required in the Categories of Right-of-Way and Turf & Ornamental. Contractor shall provide the spray technician with means to provide the City with all daily application records.

**1.5. Litter Control** - Contractor shall have dedicated personnel responsible for patrolling their designated area to pick up litter and debris, broken limbs, repair erosion areas utilizing a drag mat, checking and re-staking trees, sweeping sidewalks and median pavers, and any other duties as assigned. Litter control personnel shall have their own dedicated vehicle, equipped with the tools necessary to complete their job.

Litter Control Tool Inventory	
Round Point Shovel	Square Shovel
Push Broom	Backpack Blower
Pole Pruner Set	Loppers
Hand Pruners	Litter Trash Picker
Leaf Rake	Iron Rake
Trash Bags	Trash Can
Pruning Saw	Post Pounder
Tree Stakes	Guy Wire
Lineman's Pliers	Gas Can
Cleaning Rags (Water Fountains)	Cleaning Solution (Water Fountains)
Any Additional Tools Required to Complete Work Task	

**1.6. Arbor Care** - The Contractor shall employ at least one Certified Arborist and at least one Certified Tree Worker. One individual cannot be considered for both of these certifications. The Contractor's Certified Arborist will be available via cellular phone or email, Monday through Friday, 7:00 a.m. – 4:00 p.m., to address tree related problems and field inspections. If an arborist is not available for work under this contract for a continuous period exceeding 15 calendar days or are expected to devote substantially less effort to the work than initially anticipated, the Contractor shall immediately notify the Contract Supervisor. The Contractor shall replace the arborist with personnel of equal ability and qualifications within 15 calendar days of the written notice to the Contract Supervisor.

**1.7. Qualification Review** - Contract Supervisor shall retain the right to review the qualifications of the Crew Leader, Spray Technician, Arborist and Irrigation Technician. If the Contract Supervisor does not believe the Crew Leader, Spray Technician, Arborist or Irrigation Technician is qualified or lacking the required certifications, the Contractor shall replace them with an employee that meets the qualifications of this contract.

**1.8. Identification** – Contractor's employees shall be required to wear a clean, proper fitting, well-kept uniform bearing the Contractor's name and the name of the employee. Employees found to be without identification badges will be asked to leave city property

**1.9. Driver's License** – employees driving the Contractor's vehicles shall at all times possess and

carry a valid vehicle operator's license issued by the State of Arizona, the class of which shall be appropriate for the vehicles operated, in accordance with State law.

**1.10. Conduct** – Contractor shall be responsible for the conduct of Contractor's personnel. Employees, officers, and sub-Contractors shall not identify themselves as being employees of the City. Contractor's employees, officers and subcontractors shall conduct themselves in a manner which upholds the values of Chandler.

**Commitment:** Dedicate ourselves to consistent and excellent customer service.

**Communication:** Communicate in a positive, honest and productive manner within the organization and with our customers.

**Diversity:** Promote inclusiveness and impartiality throughout the organization.

**Innovation:** Implement unique, creative and cost-effective solutions that promote a forward-thinking organization.

**Integrity:** Adherence to high ethical standards.

**Personal Responsibility:** Take initiative to achieve excellence and accept accountability.

**Respect:** Demonstrate a high regard for others.

**Teamwork:** Promote a high-performance organization through cooperative efforts, open communication and trust.

In the event of difficulty with the public, the Contract Supervisor shall be notified immediately.

Contractor agrees to prohibit the use of intoxicating substances by drivers and crewmembers while on duty or in the course of performing their duties under this contract.

Contractor agrees to prohibit texting or other distracting activities while driving or operating equipment in the service of this contract.

The Contract Supervisor reserves the right to deem any actions by the Contractor's employees as portraying the City in a negative image and request that employee no longer perform work under this contract.

**1.11. Eyes and Ears program-** Contractor's employees are encouraged to participate in the City of Chandler Police department eyes and ears program, which is reporting to the proper agencies homeless activities, City code violations, suspicious activities, illegal items found, motor vehicles accidents, vandalism, etc. The Police department non-emergency phone number is 480-782-2473. The Contractor should notify the Contract Supervisor of these issues or findings as well.

**1.12. Communication Skills** - It is important that a minimum of one member of each work crew be proficient in the English language to receive/transmit instructions and other communications from the Contract Supervisor. It is required that the field supervisor who coordinates tasks with the City shall be proficient in the English language

**1.13. Safety Meetings-** At the City's request, the Contractor shall submit their monthly copies of safety meeting notes. Contractor shall take all necessary precautions utilizing protective gear meeting the standards of Occupational Safety and Health Administration, when using power tools and other hazardous equipment. Contractor shall perform all work in a safe manner using the necessary personal protective equipment.

**1.14. Training Plan-** The Field Supervisor shall have and carry the Right-of-Way Horticultural Standards and Specifications, set forth in this contract, for reference and conveying to the Contractor's employees. At the City's request, the Contractor shall submit the company's training plan, which shall include

- The proper use of power equipment
- The proper use of herbicides
- The proper handling of gasoline
- Working in public areas/right of ways/medians

**1.15. Organizational Chart –** The Contractor shall supply the City with a current list of employees assigned to City contracts. The list must include full names, job title, hierarchy and include any pesticide applicator license, backflow certification, or any other pertinent or required certification or registration. The list shall be kept current and provided annually. All company officers and employees working on this contract must be listed.

**2. CONTRACTOR'S EQUIPMENT**

**2.1. Equipment –** Contractor shall provide and maintain during the entire period of this contract, equipment sufficient in number, condition and capacity to efficiently perform the work and render the services required by this contract and in compliance with all state regulatory laws. A fleet list must be provided at the beginning of the contract detailing make, model and year of equipment to be used and their typical area or function of use. Any vehicle deemed unsafe by the City may be requested to be remedied or removed from this contract. Vehicles and trailers should not need to be maintained or fueled during staff working hours, a substitute vehicle must be provided if required.

Contractor's Equipment	
The minimum equipment requirements for this Agreement per maintenance crew	
(2) Chainsaws	Backpack Blowers
(2) Hedge Trimmers	Extended-Reach Trimmer
Telescopic Gas Pole Pruner	18' Pole Pruner Set
Round Point Shovel	Square Shovel
Push Broom	Backpack Blower
Pole Pruner Set	Loppers
Hand Pruners	Litter Trash Picker
Leaf Rake	Iron Rake

Pruning Saw	Post Pounder
Tree Stakes	Guy Wire
Lineman's Pliers	Gas Can
Trash Cans	Any Additional Professional Grade Tools to Complete Work Task

**2.2. GPS Tracking** - During the course of the contract, the City reserves the right to request GPS tracking records of vehicles assigned to the Chandler contract. If GPS tracking records cannot be provided, the City may require the Contractor to install and maintain Plug-n-Play GPS devices, expenses for the GPS will be provided by the City. The Contractor will be responsible for the device and cover the cost of replacement if lost, stolen or damaged beyond repair. All GPS devices shall be returned to the Contract Supervisor at the conclusion of the contract.

**2.3. Vehicles/Service Trucks** - All vehicles must be maintained in good repair, appearance and sanitary condition at all times. The Contractor's staff shall use and maintain all equipment safety features as provided by the manufacturer, i.e. chute guards, shields, covers, cutoff switches, etc. The Contractor's name shall be clearly displayed on all maintenance vehicles and motorized equipment. The City reserves the right to inspect the Contractor's vehicles at any time to ascertain said condition. Additional consideration will be given to those with energy efficient, hybrid or electric vehicles and equipment.

- 2.3.1. Service vehicle operations are prohibited on major and collector streets during peak traffic hours. During other times, the best and most desirable method for optimizing safety is for operators of service vehicles to plan their work to avoid stopping in the traveled portion of the street whenever possible, and when stopped, to reduce the time to a minimum. When service vehicles must travel slowly or stop in City streets for brief periods, they must display one of the following operating, high level warning light systems:
- 2.3.2. Two Rotating Flasher or Strobe Light, High Level Warning Light Devices. These devices must provide 360-degree visibility. They may be used in combination and incorporated into a "light bar" for added visibility.
- 2.3.3. One Advance Warning Arrow Panel. Arrow panels must be used in combination with rotating flashers or strobe lights to provide 360-degree visibility.
- 2.3.4. Flashing lights and arrow panels must be located on service vehicles so that they remain in full view, front, and rear, at all times and are not obscured by trailers or debris, mounted equipment or work activities.
- 2.3.5. When service vehicles must stop in the street for brief periods, they must also display the vehicle's four-way hazard warning flashers and at least two-traffic cones (each one 10 feet minimum to the rear of each rear corner). A short taper of cones (minimum 50 feet and 6 cones) at the rear of the vehicle may be used in high-density traffic areas to improve visibility. Flags on the upper rear corners of the vehicle may also be used to increase visibility.
- 2.3.6. Advance warning arrow panels provide additional advance warning and directional information when traffic must change lanes. Because they are more effective than flashing lights, vehicles equipped with an arrow panel are permitted extended times when stopped in City streets for service work. Maximum stopped time per service

Location is:

- 30 minutes for vehicles equipped with two rotating flashing or strobe light high level warning devices.
- 60 minutes for vehicles equipped with advance warning arrow panels.

### **3. TRAFFIC CONTROL**

Traffic restrictions are not permitted at signalized intersections or on arterial streets during the peak traffic hours of 6:00 AM to 8:30 AM and 4:00 PM to 7:00 PM weekdays except as approved by the City Transportation Engineer. Traffic restriction hours may be extended at the discretion of the City Transportation Engineer or his/her designee. For six-lane roadways, one lane closure may be permitted in the non-peak direction based on peaking characteristics, as determined by the City Transportation Engineer.

Traffic restrictions are not permitted on accesses to major shopping centers during the hours of 9:00 AM to 10:00 PM on Saturdays. In rare instances, exceptions may be granted where the restrictions do not cause the intersection to exceed capacity or create any significant delays.

Left-turn lanes should be maintained at all times. If it can be demonstrated that closing the left-turn lane would result in improved traffic flow, or reduce delays, closure of the left-turn lane may be permitted.

During off-peak traffic hours, a maximum reduction of one through lane in each direction is permitted. Turn lanes may be restricted if approved by the City Transportation Engineer or their designee. Additional lane restrictions may be authorized during emergencies, nights and weekends. Weekends are defined as Friday at 9PM to 5AM on Monday. Nights are defined as 9PM to 5AM.

Maintenance activities are restricted during the holiday season of November 15 through January 1, on streets adjacent to or serving as primary access to large shopping centers. Construction and maintenance activities that interfere with traffic flow near shopping areas and on high volume streets must be carefully evaluated and imposed only when absolutely necessary. In rare instances, exceptions may be granted where restrictions do not cause the intersection to exceed capacity or create any significant delays.

Failure to comply with a Road Restrictions and Lane Closures standards will result in a \$500 per day deduction. Failure to comply with the Traffic Control Plan Permit will result in a \$500 per day deduction. Possible exceptions to deductions may include emergencies affecting public health and safety, or extreme weather conditions. Exceptions would not be granted for typical rain delays or known adverse soil conditions. Deduction deductions shall be deducted from the monthly invoicing. The Contractor shall obtain all necessary permits from the City's Development Services prior to performing construction or landscape maintenance.

### **4. CONDITION OF LANDSCAPE AT BEGINNING & END OF CONTRACT**

**4.1. Condition of Landscape at Beginning of Contract** – Upon receiving official notification that a contract has been approved by the City, the Contractor shall conduct a ride along with the

Contract Supervisor to inspect the areas for pre-existing conditions that would prevent or adversely affect completion of any normal routine maintenance activities. The Contractor shall prepare a list of specific deficiencies found at each contract area and submit the list to the City for review before a notice to proceed will be issued. The City will evaluate each problem listed to determine if extra compensation is warranted for repair work prior to starting the contract's routine maintenance.

The Contract Supervisor may determine that minor deficiencies can be addressed during regular scheduled maintenance or that the items listed represent normal conditions that might be expected at any time during the contract period.

The determination of disposition of all items listed shall be the responsibility of the City and the City's decision shall be final and binding upon the Contractor.

All repairs to pre-existing conditions deemed necessary and authorized by the City shall be made prior to the start of normal maintenance for the identified areas by the new Contractor.

**4.2. Condition of Landscape at End of Contract** – Six (6) weeks prior to this contract expiring or being terminated, the Contract Supervisor and the Contractor will make a final ride along inspection to determine the condition of all landscape areas. Items determined to be improperly maintained by the outgoing Contractor will be listed and evaluated by the Contract Supervisor. The Contract Supervisor will arrange for repairs to be made and/or the costs for making repairs to the areas will be deducted from final payments to the outgoing Contractor. The same will apply even if the current (outgoing) Contractor has been awarded a new contract for the same areas. The last payment shall be that which is due for all work completed during the final 60 days of the contract.

## **5. SCHEDULING OF WORK**

**5.1. Routine Work Schedule** – Contractor shall be required to provide a route schedule for monthly sustainable landscape management and irrigation maintenance of all areas, specifying each week an area will be maintained. Contractor shall make no changes to the schedule without prior approval of the Contract Supervisor. The Contractor shall provide written monthly schedules not later than the 25th of each month for all work planned during the following month. The Contract Supervisor shall review and approve the schedules submitted and reserves the right to make changes or adjustments or to reject the entire proposed schedule if it does not meet timing or horticultural standards set forth by the City. Failure to provide a schedule on time will result in a non-compliance notice of \$250 and/or potential reduction in payment for services rendered without an approved schedule. All maintenance shall be scheduled on Monday through Friday of each week between the hours of 6am and 6pm. Weekend work is permitted for routine work (at the Contractor's discretion) to meet the approved schedule between the hours of 7am and 7pm.

The Contractor must make every effort to stay on schedule and shall complete all routine work during the scheduled calendar week unless unforeseen circumstances beyond the control of the Contractor cause delays.

Weekly, the Contractor will be required to submit to the City a report of work items completed the previous week, this includes providing time stamped photos, spray logs and irrigation logs.

The report will be due by 5:00 P.M. on the Monday following the week completing the work but can be submitted no earlier than Friday morning at 9am. All scheduled items not completed during the week must be included in this report with an explanation why the work was not completed. This report shall be in written form, furnished via email, as a report attachment in the format agreed to by the City. Late or non-submittal of reports may result in a \$250 deduction from the invoice. All reports will be due and reviewed at least one week prior to end of billing month for the monthly invoice to be approved for payment.

The City will determine if work not done on the approved schedule constitutes a deficiency. The Contractor must gain approval from the City to do work not on the approved schedule. If prior approval is not requested or obtained, the City may refuse to pay for work items not completed on the schedule.

**5.2. Quality Control** - Contractor shall establish a complete quality control program to assure the requirements of this Contract are provided as specified. A copy of Contractor's quality control program shall be provided to the Contract Supervisor at the time of notice of award of Contract. Contract supervisor will approve or disapprove Contractor's program; the Contractor shall have an approved program before Contract start date. The Contractor shall provide a quality control person available during work hours and the duration of the contract.

**5.3. Additions and Deletions** - Throughout the year, City staff continually strive to have the most accurate mapping of the right-of-way (ROW) landscape areas. As private development occurs, ROW maintenance responsibilities transition to that development, resulting in a reduction. As the City completes capital improvement projects (CIP), City maintained ROW is added to the inventory. The city will retain the right to modify landscape maintenance area inventory and items to this Contract, which will be done through a contract amendment. The Contract Supervisor will be responsible for tracking inventory changes throughout the term of the contract. Efforts shall be made between both parties to limit contract amendments to the annual renewal period.

Sites may also be part of an ongoing construction project where maintenance is to be performed by another Contractor. If longer than a 30-day period, these sites may be taken off contract temporarily and square foot rate for that area as listed per bid item may be deducted for that period.

Additionally, each year new aerial images are taken as part of a Maricopa Association of Governments (MAG), collective effort. When the new aeri<sup>als</sup> are received, City GIS technicians are constantly refining the polygons within system. For example, a generic polygon may be entered during the construction of a new median, and when the new annual aeri<sup>als</sup> show this new median, refinements are made to accurately portray the curb-to-curb area.

Contract Supervisor may seek a modification to the level of service for that area or total calculated square foot rate and address the change through the annual amendment and renewal period.

**5.4. Enhancement Work-** All extra work ordered in the contracted area shall be compensated for in accordance with the schedule entitled "Payment Rates for Enhancement Work", which contains rates submitted by the Contractor with the proposal. The labor rate is used as a guide to determine labor cost of any particular project. If the work requires more than one staff member then this hourly rate will be multiplied by the required number of staff. No extra payment will be made for time spent on any job where Contractor's employees are above the class of Crew Leader. Supervisors, account managers, estimators, and company owners are considered by City to be compensated for by the overhead portion of other earnings from City. The Contractor shall provide a proposal for the Enhancement Work, including pictures, within 10 working days of the written request from the Contract Supervisor.

The Contractor **shall not** perform any Enhancement Work until written authorization is obtained from the Contract Supervisor. This authorization will be in writing, most commonly in the form of email notification or an additional purchase order number. Enhancement work performed without prior authorization **shall not** be paid. The Contractor is not guaranteed full or exclusive right to perform extra work that may be required. The City reserves the right to obtain competitive quotations or otherwise select the most appropriate Contractor for performing enhancement work. Invoices for work completed must be received within 30 days from the issuance of a valid Purchase Order.

Refer to section D. LANDSCAPE ENHANCEMENT PROJECT SPECIFICATIONS

**5.5. City Holiday Schedule -** The following is a list of holidays on which contract service will NOT be performed unless previously approved by the Contract Supervisor (except emergency service); other federal holidays throughout the year are at the Contractor's discretion:

- New Year's Day- January 1st
- Independence Day - July 4
- Thanksgiving Holiday - Fourth Thursday in November
- Christmas Day - December 25

Should a holiday named herein fall on Sunday, it will be observed on the following Monday, and conversely when a holiday named herein falls on Saturday, it will be observed on the preceding Friday. During the week of a holiday, the Contractor shall adjust the weekly schedule to return to the normal weekly schedule the following week.

If the Contractor desires to take off another time period, a written request must be submitted to and approved by the Contract Supervisor a minimum of two (2) weeks prior to the date or time desired to be absent.

**6. WEATHER & CLIMATE**

**6.1. Suspension of Work** – In the event of inclement weather, the Contractor shall obtain approval from the Contract Supervisor prior to not performing any work due to the weather event. The City reserves the right to suspend any or all work due to poor weather conditions or other extreme conditions. The City also reserves the right to authorize the delayed work to be performed at a later date, or the City's Contract Supervisor may deem it more appropriate to

omit the delay work and resume the normal schedule. The Contractor shall not perform any suspended work without written authorization from the Contract Supervisor. The City will require at a minimum that a Crew Leader, Laborer, and Irrigation Tech remain to be 'on call' if a storm or other event issue arises.

**6.2. High Pollution Days** – When the Arizona Department of Environmental Quality issues a high pollution warning, the Contractor shall be expected to eliminate the use of 2-cycle gasoline powered equipment, i.e. blowers, weed eaters, chain saws, etc. for that day and notify their employees of the advisory and the Contract Supervisor of the suspension of work.

**6.3. Truck Idle**- Truck idling of more than 15 minutes is highly discouraged on City property. It is recommended that employees go indoors for breaks from the hot weather to reduce emissions.

## **7. COMPENSATION**

**7.1. Payment** – Payment will be made monthly within 30 days after receipt of a numbered and **itemized** invoice from the Contractor and acceptance of the work by the City, less any deductions or assessments as described. Partially completed routine pay items are to be listed but not billed for in the invoice. An itemized invoice shall include ROUTINE maintenance as a lump sum during the month. The itemized invoice should include work not done on schedule due to inclement weather or other unforeseen delays.

Monthly invoices are requested to be submitted on the 10th or nearest business day of each month for the preceding month. The amounts invoiced shall be those agreed upon by this contract or by amendment to the contract. The unit price shall include all labor, materials (unless supplied by the City), equipment, overhead, profit, and any other incidental costs to perform the contracted maintenance. All invoices for Enhancement Work must be received within 30 days of the completion of the work.

All invoices for Routine and Enhancement Work are to be submitted to the City's accounts payable and the Contract Supervisor. The City may not pay invoices that have not been submitted to accounts payable within the 30-day time frames outlined. Additionally, all invoices for routine work or extra work completed between July to June of the previous year must be submitted to accounts payable by June 30<sup>th</sup>. The Contractor will be given two written notifications to submit all fiscal year invoices during this time frame. Any invoices not submitted within these time frames and with the City's proper notification, may not be paid.

**7.2. Materials** - Any materials required that are not stipulated in this Contract shall be the responsibility of the Contractor. City retains the right to make direct purchases of all materials and to make them available to Contractor's staff for use in fulfilling the terms of this contract.

**7.3. Performance Guarantees / Liquidated Damages** – If the Contractor fails to perform the work in accordance with the contract, the City may hold part or all payments due to the Contractor. The Contract Supervisor shall have the final say in deficient work requiring deduction of payment. Contractors shall make every effort to resolve disagreements in

performance standards and deductions in payment with the Contract Supervisor. If a resolution cannot be met the Contractor can request the City's Materials Management department to be involved as a mediator for resolution. The City reserves the right to have the Contractor's accounting department in attendance.

As described in Section 8 Customer Service below, any citizen service requests, issued work orders and safety-related maintenance may constitute a deficiency in the City's Right-of-Way Standard Specification set forth and as determined by the Contract Supervisor. Each area's cost in the right-of-way inventory, designated by a RW, MD, PV or BN number in the GIS web application, will be calculated using the agreed upon square foot pricing based on its assigned classification category. Deductions in payment for deficient work will equal this calculated amount and will be itemized on the monthly invoice. The Contractor will be given this breakdown of each area's costs for reference at the beginning of the contract. In addition to the cost per site deductions, the City may apply Liquidated Damages for excessive omissions of work requirements with just cause. The Contractor can request the City's assigned procurement officer to arbitrate any deductions or Liquidated Damages they believe are unjustified.

<b>SITUATION</b>	<b>DEDUCTION IN PAYMENT AMOUNT</b>
Failure to correct deficiencies and/or respond to emergencies within the correction time limit schedule.	\$250 per day
Re-issuing of a work order that was previously closed by Contractor staff after re-inspection due to a continued deficiency	\$100 per day
Failure to start and satisfactorily complete routine work and/or enhancement work within the scheduling requirements or withdrawing from job prior to completion without authorization from the City.	\$100 per day
Failure to submit schedules and/or work reports within the allotted day/time required. Also, for submitting inaccurate information on the reports or schedules.	\$250 per day
Palm trimming completion within designated time requirement.	\$50 per palm designated to be trimmed per week beyond schedule.
Failure to repair irrigation systems in a timely manner with acceptable quality. Also, failure to adjust controller schedules as directed by the City.	\$300 per site per day.
Failure to comply with specialty staff requirements.	\$100 per day per employee not provided according to approved org chart.
Tree work that violates ANSI A-300 pruning standards such as lion tailing or topping	\$500 per tree
Failure to comply with Road Restrictions and Lane Closures standards or a Traffic Control Permit	\$500 per day

**8. CUSTOMER SERVICE**

**8.1. Citizen Service Requests** – All citizen service requests that are considered routine by this contract shall be inspected with a response to the Contract Supervisor within twenty-four (24) hours, and include a date of correction, which shall be no later than seven (7) business days from the date of the request. Any vegetation (trees, shrubs, and groundcover) being managed under this contract that is deemed non-compliant with the horticultural standards shall be considered routine work, unless it is a direct result of vandalism, accident or weather related, of in which the procedures outlined in Section 10 Traffic Accidents involving City Maintained ROW shall take effect.

**8.2. Work Order Procedures** - The Contract Supervisor will inspect the work listed on the approved monthly schedule and will document any deficiencies in City standards. Work orders will be submitted via email or Contractor provided portal with all pertinent information to the Contractor’s field supervisor. Areas identified as deficient by the City through a work order must be corrected within the limits of this correction time limit schedule, unless written extension has been authorized. A reply to that email, with the same subject line, when the work has been completed will be used to close the work order request. City access to the Contractor’s work order portal, in lieu of emails, is the preferred method of work order tracking and communication. Additional information concerning the specifics of the deficiency will be given to the Contractor upon request. Failure to correct deficiencies may result in cause for termination of the contract in accordance with provisions of this document. Failure to provide correction on time will result in a non-compliance notice, deductions of \$250 for inspection and/or potential reduction in payment for deficiencies.

CORRECTION TIME LIMIT SCHEDULE

Stopping Water Loss from a Leak	1 Working Day
Irrigation Repair	3 Working Days
Cleaning	1 Working Day
Schedules	1 Working Day
Trimming/Vegetation Maintenance	2 Working Days
Replanting	5 Working Days
Dead Plant Removal	3 Working Days
Weed Control	2 Working Days
Fertilization	3 Working Days
Emergency Response Work	1 Hour response; Complete ASAP

The Contract Supervisor may determine it is necessary to hire an outside Contractor to perform routine work that was neglected or done poorly by the primary Contractor. The City reserves the right to charge back the routine work cost of such outside labor to the primary Contractor.

**8.3. Safety-Related Maintenance** – The Contractor shall supply the appropriate personnel to respond to customer service requests regarded as safety related, twenty-four (24) hours a day, seven (7) days a week. Any customer service request deemed by the Contract Supervisor as an unsafe situation shall be corrected immediately as part of routine work, unless the situation was created by motor vehicle accident, vandalism or severe weather. The Contractor shall notify the City immediately in the event a safety related work request cannot be corrected at

the time of notification.

**8.4. High-Wind Storm Event** – Clean-up efforts after a monsoon event do not specifically require written authorization. Authorization from the Contract Supervisor will be granted via phone call, text, or email. Any tree, or parts, blocking roadways, on sidewalks, in parking lots, or broken branches hanging from the tree, shall be promptly removed upon receipt of the Contract Supervisor's emergency notification to the Contractor. The Contractor is required to respond to emergency requests within one hour of contact. The Contractor shall use item A. Emergency Call Out hourly rate per storm cleanup crew for all extra work clean up requests and must include pictures of each of the damaged trees with the request. Storm cleanup of trees or parts of trees will follow the below order of priority:

1. In roadways blocking traffic
2. Where property damage has occurred
3. Blocking of sidewalks
4. On or in private property
5. In the landscaped area of the median or ROW

Broken branches that are picked up or trimmed on regular routine routes do not constitute an Emergency Call Out. The Contract Supervisor must request a damaged tree to be cleaned up via phone call, text or email to constitute an Emergency Call Out. To clarify this, we have created a Storm Damage Debris Removal, Extra Landscape Crew to indicate we are requesting an additional standard landscape crew to cut up downed trees. Now if the storm damage involves private property or technical climbing to mitigate the risks, we understand this requires a higher-level skill set. Thus, extra work item of Storm Damage Tree Removal, Arbor Technical Crew, will be a rate for the specialty arbor crew to attend to the downed or storm damaged tree. Re-staking of trees after a windstorm does not constitute storm damage clean up

Any work to be completed on private property where staff may have to enter private property needs a signed City of Property owner Acknowledgement, Waiver and Release from Liability Form, most current revision, signed by the property owner unless directed by City staff. A copy of the signed document must be provided to City staff. It should be noted that at all-times the City must be able to coordinate work with the Contractor as priorities change from time to time. Moreover, it is crucial that the Contractor be able to perform in a quick and responsive manner known as Emergency Call Outs, which are typically after large storm events and occasionally accidents using the rates identified in the pricing table.

## **9. Traffic Accidents or Vandalism involving City Maintained ROW**

In the event a traffic accident, theft or vandalism occurs in a city right of way, after notification from the Contract Supervisor the Contractor shall investigate damages within 48 hours. Any vehicle debris and damaged plant material shall be removed within this time frame. The Contractor shall confer with the Contract Supervisor on the list of damages. The Contractor may be asked to provide a proposal for repair and/or replacement as agreed upon, including pictures of the incident scene within 10 working days. If ROW trees are part of the damages and require additional removal costs, those costs are to be included in the

proposal.

The receipt of a purchase order will act as notification for the Contractor to proceed with repairs and/or replacement of the approved list of damages. All invoices for traffic accident repairs and /or replacements shall have a City Risk Dept claim number listed in the description. Invoices for work completed must be received within 30 days from the issuance of a valid Purchase Order.

**C. HORTICULTURAL STANDARDS and SPECIFICATIONS**

**1. SERVICE DELIVERY**

All ROW areas are to be maintained based on their level of service category designation as described herein. During certain seasons, the Contract Supervisor may request an increased level of service for weed abatement and litter control. All Horticultural activities shall follow the applicable ANSI A-300 standards, Maricopa County Dust Abatement Handbook, University of Arizona Cooperative Extension guidelines, Arizona Landscape Contractors Association (ALCA) Sustainable Landscape Management (SLM) practices and the International Society of Arboriculture (ISA) guidelines.

**2. RIGHT OF WAY, MEDIAN AND RETENTION BASIN LEVELS OF SERVICE:**

**Section G** is a list of the City's Right of Way, Medians and Retention Basin locations. Each location has a unique identifier number associated with it and is visually represented in a Right of Way GIS web application. This identifier is made up of three parts, the site number indicating the quadrant of the City, two letters to identify the type of landscape and the electronic identification number. For example:

- 215MD794 = Area 2 Germann Rd Median #794
- 102BN091 = Area 1 Elliot Rd Basin #091
- 407PV115 = Area 4 Ray Rd Pavers #115
- 352VL062 = Area 3 Chandler Blvd Vacant Lot #062

**It is the responsibility of the firm to review the inventory tables and the Landscape GIS web application prior to submitting a proposal.**

**GIS web application at this link:**

**<https://experience.arcgis.com/experience/99677a2bdc9e43efb436aa6215b7724a>**

**The City reserves the right to adjust the level of service of an area annually with contract amendment and renewal**

**Classification 1 Special Maintenance Corridors** – Areas with high density of ornamental and flowering plantings, including palm trees, of high aesthetic appeal along highly trafficked roadways or prominent City facilities.

1. Sustainable landscape maintenance trimming to be performed monthly
  - a) DG or landscape rock is to be raked smooth during monthly service
2. Leaf litter blowing and trash debris shall be removed weekly
3. Irrigation checks every other week, repairs as needed
4. Areas are to be completely weed free including chemical and mechanical removal
5. Palm tree pruning, fertilization and fungicide treatment annually

Areas may require additional litter and trash control. Enhanced litter services is an additional rate above the base maintenance rate as outlined in the pricing table.

**Special Maintenance Corridors** are as follows: Downtown Chandler, Tumbleweed Park-n-Ride, Armstrong Maintenance Yard, AZ87 Arizona Ave, Airport Rd and properties and Price Rd Frontage

**Classification 2 Streetscapes & Retention Basins-** Areas with flowering plantings, trees and palm trees along highly trafficked roadways and storm water basins

1. Sustainable landscape maintenance trimming to be performed monthly
2. DG or landscape rock is to be raked smooth Quarterly
3. Litter and trash debris shall be removed weekly including from drywell grates
4. Areas are to be completely weed free including chemical removal
5. Irrigation checks every other week, repairs as needed
6. Palm tree pruning annually

**Classification 3 Pavers and Vacant Lots-** Median end caps and other hardscapes. Areas owned by the City without irrigation and plantings, including Western canal.

1. Sustainable landscape maintenance to be performed bi-annually on native plants or trees, consisting of only light tree and shrub trimming as well as dead plant material removal.
2. Pre-emergent weed control performed bi-annually, and post-emergent of all weeds monthly
3. DG or landscape rock is to be raked or dragged smooth quarterly
4. Leaf litter and trash debris shall be removed monthly

### **3. VEGETATION MANAGEMENT**

**3.1 Philosophy-** The City of Chandler's landscape maintenance goal is for a clean natural look. The goal is for a clean, tidy and maintained, yet natural environment where the individual plant can grow to reach its mature size and shape. Most plants that are left alone usually require little pruning. The City of Chandler expects landscaping to be maintained with selective pruning to remove unwanted growth and to keep the material healthy. In all landscapes there should be no formal shaping or sculpting of the plant material. We recommend trimming individual plants back at a specific time of year to retain the natural characteristics of each plant with selective pruning per the guidelines of Sustainable Landscape Management.

There are variations to this pruning guideline because the City has ordinances that mandate plants to be cut back for safety requirements. When plants continue to be a nuisance of these standards, the Contractor should recommend removal and replacement of appropriate species. The proper plant selection in the right locations can reduce maintenance problems and increase overall citizen satisfaction.

The goal of pruning may be to reduce the size of the plants, renew growth, and yet maintain their natural shape and appearance. Monthly maintenance should mostly just require pinching back long shoots or branches, removing dead or damaged material and cleaning debris from around the base of each plant. The sides should taper out at the bottom to allow sunlight to hit the base of the plants and to allow the removal of trash, litter and debris. Some shrubs require pruning immediately after flowering to maximize flower display in the following year. Remove dead, diseased, frost damaged, or weak wood to encourage flowering and to promote new bushy growth.

**3.2 City of Chandler Minimum Pruning Standards –** The management of the vegetation (trees, shrubs, groundcover) in the contract area shall follow the City of Chandler horticultural

standards. Pruning considerations are as follows:

- 1) Anything determined to be a safety hazard.
- 2) Any vegetation impeding roadways, sidewalks or any pedestrian or vehicular path.
- 3) Any vegetation impeding the property of citizens or impeding private lots regardless of height as requested by a citizen service request.
- 4) Blocking vehicular intersection site lines, traffic signals or traffic signs. Also, blocking of streetlights.
- 5) Removal of dead, diseased or broken plant material.
- 6) Selective pruning regardless of height to correct a growth pattern or to encourage corrective growth from utility lines.
- 7) Desert broom, salt cedar and any other unwanted volunteer plant material shall be removed to promote healthy growth of the designed landscape.
- 8) Sucker branches shall be removed, except during the months of June, July and August to protect the tree trunk from sun scald.
- 9) Tree branches shall be maintained at a height no lower than 14 (fourteen) feet over a road, alley or sidewalk. Small trees below 14 feet, shall be pruned away to allow un-impeded travel on road or sidewalk.
- 10) Shrubs should be kept a minimum of 2' off walls and fences. Also, the separation of shrubs, or plants that are growing together that create a hiding space for vagrants may be required.
- 11) Other exceptions may apply. The City of Chandler reserves the right to notify the Contractor of any changes.

Selective pruning will be required to alleviate sight obstructions, safety concerns, property or sidewalk encroachment, and utility access. When pruning is required, the vegetation shall be selectively pruned to mimic its natural shape and form, taking care to avoid unbalanced or lopsided plants. Pruning done to create geometric shapes will not be tolerated and may constitute as a contract deficiency per section 8.3 Deduction in Payment Due.

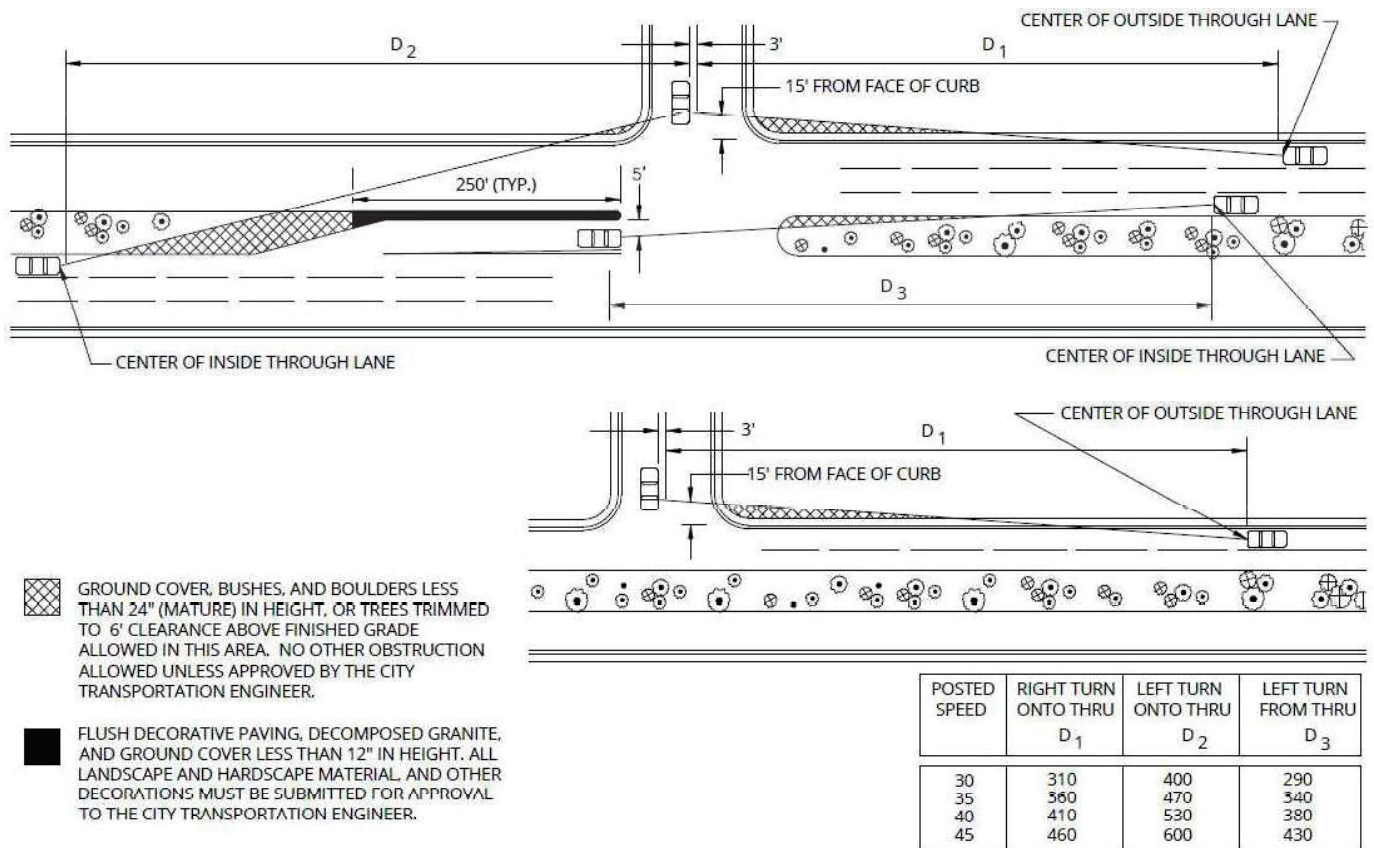

**3.3. Pruning Tools-** Contractor shall have good quality, appropriate hand tools available at all times. Contractor shall keep all tools in a clean, operative, and sharp condition and be sterilized periodically. If disease/infection is suspected or known within a certain plant(s), Contractor shall sterilize his/her cutting tools between each cut. All hand shears and loppers shall be a type having two (2) cutting edges. Anvil type pruners are not acceptable. All branches and clippings shall be removed from site at completion of each workday. The Contractor is to provide each maintenance crew a professional grade pole pruner.

**3.4. Plant removal and/or replacement-** When the live plants (shrubs, perennials, groundcover) continually interfere traffic sight lines, roads, and sidewalks they should be removed to allow mature size. Live plant removals to reduce plant material density shall require written approval from the Contract Supervisor and be considered routine work. Any bubble or drip emitter for a removed plant that will not be replaced shall be capped.

Plants that have died during the time frame of this contract due to neglect, excessive or incorrect pruning, overspray of herbicides or irrigation mismanagement shall be replaced and will be considered routine work.

**3.5 Plant installation-** The Contractor shall bring to the attention of the Contract Supervisor any planting of new plants (shrubs, perennials, groundcover) in a location that could cause future obstructions. Refer to section D: LANDSCAPE ENHANCEMENT PROJECT SPECIFICATIONS

**3.6 Sight Visibility Triangles –** Site visibility triangles or vehicular site lines are described as from centerline of the departure lane to the centerline of the nearest approach lane. The Sight Visibility measurements are based on the posted speed limit. In the critical visibility triangle, within the first 250 feet of the median, all plant material must be less than twelve (12) inches in height. All other plant material within the visibility triangle must be less than 24 inches in height and the bottom of the tree canopy must be six (6) feet above finished grade. Refer to Chandler Standard Detail C-246 Sight Distance for Arterial and Collector Streets

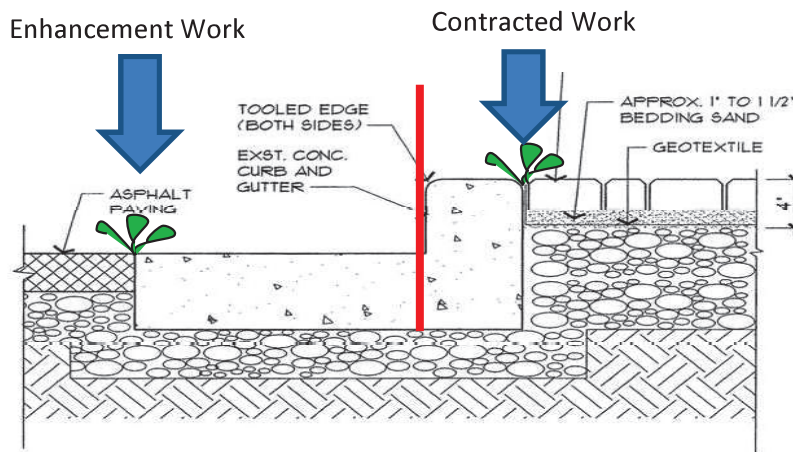

**4. WEED & PEST ABATEMENT**

**4.1 Weed Abatement-** Weed control in all contracted areas shall be considered routine work, including adjacent sidewalks. Contractor shall furnish all chemicals, rodenticides, insecticides, and equipment and labor necessary to provide pest control. The City has the right to direct the Contractor to use specific pesticides or chemicals for the safety of the public and to prevent weed resistance. Contractor shall vary the pesticide mode of action to prevent weed resistance. Weed Free is the absence of unwanted plants, typically summer and winter

annuals, but could also include volunteer, from seed, trees. Contractor shall use herbicides sparingly, within the requirements of the label and applied in a manner that reduces exposure of the general public.

The Contractor shall adhere to all federal and state requirements for weed control as established by the Arizona Department of Agriculture, Office of Pest Management. Materials, techniques and processes shall fully comply with all applicable Federal, State and local laws, regulations, standards and ordinances pertaining to health, safety and environmental protection. Failure to comply shall be sufficient grounds for immediate termination of this contract.

**4.2 Curb and Gutter Weed Abatement:** Weed control in all contracted areas shall be considered routine work, including the adjacent sidewalk. 4.2 Weed Abatement, as described in this enhancement work addition, will include controlling weeds within the public street or roadway between the face of curb and asphalt paving as depicted below, or in expansion joints of the gutter concrete. Contractor shall use chemical herbicide applications and mechanical methods to reduce weeds to a minimum of less than one inch. The Contract Supervisor will provide a list of street or roadway gutters for the Contractor to perform this weed abatement and authorization will be through an approved purchase order number.

**4.3 Pre-emergent Herbicide Applications-** Contractor shall use two separate applications of a pre-emergent herbicide on all locations annually. Product is to be supplied by the Contractor, approved by the Contract Supervisor and shall be applied at label rates for a minimum of 6 months of control. The Contract Supervisor shall receive receipts of product quantities applied. The applications are to use products that have two different modes of action categories as to prevent pesticide resistance, as well as dye or spray indicator to verify area coverage. Weather will be a factor in determining the date of the applications, however the use of a water truck to water-in applications for greater efficiency will be at the discretion of the Contractor. The timing of applications will be determined by the Contractor via email, generally mid fall before the winter rains and late spring, before the summer monsoon. Once notification is given to the Contract Supervisor, the Contractor has 3 weeks to make applications to all areas.

**4.4 Application Records and Safety Data Sheets-** State law requires records to be kept of all pesticides used. The Contractor shall maintain such records as required and provide the Contract Supervisor with copies of each report by the next business day after application.

Treated area descriptions shall use the same GIS RW and BN area numbers as provided by the City. At the beginning of the contract, the Contractor will be required to provide all Safety Data Sheets (SDS) to the Contract Supervisor to be held on file with the City Safety Office. Annually, the Contractor will be required to update the list of SDS sheets with any chemicals that have been or will be used in the service of this contract.

Herbicide Brand Name or Equivalent	
The City has approved the following herbicides to be utilized for weed control for this contract. Additional products may be approved upon request and evaluation by the City	
Product Name	Active Ingredient
Roundup Pro Concentrate	Glyphosate-isopropylammonium
Milestone	Aminopyralid
Chetah Pro	Glufosinate Ammonium
Lontrel	Clopyralid
Gallery	Isoxaben
Q4 Plus	2,4-D, dimethylamine, Dicamba, dimethylamine, Quinclorac , Sulfentrazone
Dimension	Dithiopyr
Reward	Diquat dibromide
Finale	Glufosinate-ammonium
Tribune	Diquat Dibromide
Roundup QuickPro	Diquat dibromide, Glyphosate
Pendulum Aqua Cap	Pendimethalin
MSO Oil	Alkylaryl polyoxyethylene glycol and other ethoxylated derivatives (surfactant)
Gun Smoke	Monocarbamide dihydrogen sulfate, alkyl amine ethoxylate, 1,2,3-trihydroxypropane
Brandt Magnify	Oligomeric D-glucofuranose decyl octyl glycosides, Ammonium sulfate, and Ammonium nitrate
Sedge Hammer	Halosulfuron-methyl, methyl 3-chloro-5-(4,6-dimethoxypyrimidin-2-ylcarbamoysulfamoyl)-1-methylpyrazole-4-carboxylate
Monument 75WG	2-Pyridinesulfonamide, N-[[[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonyl]-3-(2,2,2-trifluoroethoxy)-, monosodium salt, monohydrate
Certainty	Sulfosulfuron

**4.5 Damage Due to Spraying** – The Contractor shall be responsible for the results of application of all herbicides and pesticides applied including soil sterilization, runoff, and drift onto adjacent properties. Vegetation killed or severely damaged shall be replaced at no cost to the

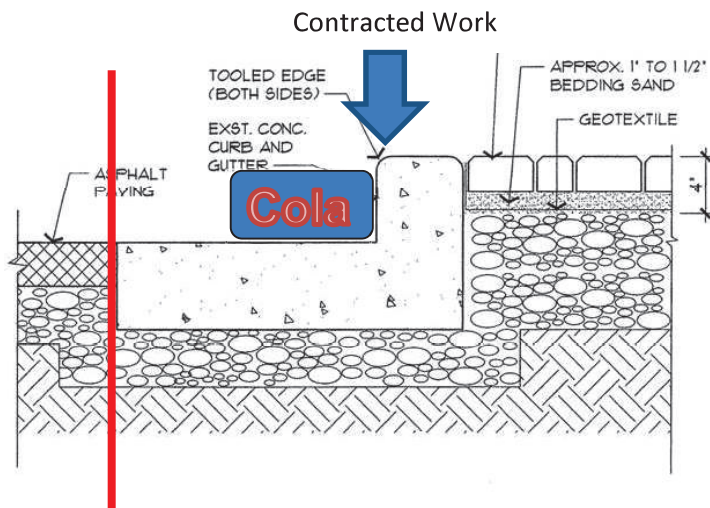

City of Chandler, with the nearest size nursery stock available to the size of the plant being replaced. The soil around the affected plant(s) and planting pit shall be treated with activated charcoal and other soil amendments that may be required to enhance the potential survival and growth of the existing or replacement plants. The Contract Supervisor shall be notified of the location of the vegetation being replaced.

**4.6 Animals, Insects and Disease Control** – The Contractor shall be responsible for monitoring the contract area for potential pest infestations and any potential disease problems, such as gophers and bees. The Contractor shall notify the Contract Supervisor of all pest and disease problems in writing. The Contract Supervisor will coordinate treatment options with the Contractor using the rate listed in the enhancement worktable.

**4.7 ADOT Intersection Weed Abatement-** At times it may be necessary to support the landscape services of ADOT by providing additional post-emergent weed control applications at the agreed rate in the Enhancement table. The City will seek permission from ADOT representatives to conduct this work and provide written authorization to the Contractor prior to application. The Contractor shall keep detailed records of applications and submit those spray reports immediately after the day of application to the Contract Supervisor to provide to ADOT.

**5.0 TRASH & LITTER CONTROL**

All trash, litter, or any other unsightly material that has accumulated, or illegally disposed of in the contract area shall be removed from each site and disposed of properly. Cleaning services on the grounds shall include, but not be limited to, removal of all trash, such as paper, cans, bottles, broken glass, dried or dead plants, parts of plants (i.e. leaves, palm fronds, branches, etc.), dirt, sediment, rocks, mattresses, furniture or shopping carts that is in the contract area and shall be removed and disposed of properly. Litter crews are to be separate from the landscape crews. Landscape maintenance crews are required to perform litter control during maintenance cycles to assist in the intent and goals of the Litter crew. The limits of litter control extend to the asphalt of the street and includes the gutter.

**5.1 Pavers & Bullnoses-** Contractor shall sweep and removed debris from all pavers, including median pavers and concrete pads areas as required. Contractor shall be responsible for properly disposing of all litter and other foreign matter in these areas of responsibility listed.

**5.2 Price Frontage Road-** These classification 1 areas will have trash picked up every Monday and as required. The other sites will be scheduled or will arise throughout the rest of the week by the Contractor.

**5.3 Traffic Control Devices for Construction-** On occasion traffic barricades and construction signage is left behind well after the project is completed. At the request of the Contract Supervisor, the Litter crew will remove these barricades and signage, attempt to contact the company whom the sign or barricade belongs and/or deliver the items to a location given by the Contract Supervisor.

**5.4 Non-Traffic Signage-** Political signs, whether candidates or propositions, are to remain in the ROW by law. However, they are not allowed in the medians. If they are found the medians, Contractor is to notify City staff to contact the campaign headquarters to return the campaigns' signs for re-deployment. By law, political signs are permitted to remain in the ROW until 15 days past the election day. At that time, the Contract Supervisor will coordinate with Code Compliance to have them taken down from City Maintained ROW only. Irrigation technicians shall test and repair City systems for any punctures that occurred because of the sign posting.

Any signs that offer goods, services, or events for sale are NOT permitted at any time in the medians or ROW. This includes signs that are selling political merchandise

Exceptions will be made for City sanctioned marathon wayfinding signs at the Paseo Trail crossing points

As a courtesy to our residents; garage sale, yard sale, or estate sale homemade signs shall only be removed on Mondays, Tuesdays, or Wednesdays. If found on a Thursday or Friday, please leave them until the following week. Also, as a courtesy, lost pet signs may remain for a period of one maintenance cycle before being removed. No signage shall remain in medians once found.

**5.5 Western Canal-** Contractor shall rake or utilize a dragmat on gravel areas in accordance with specifications to present a pleasing appearance. All drinking fountains along the Western Canal, three of them at major arterials, shall be cleaned during monthly services.

**5.6 Leaves-** During the autumn or winter season, the Contractor shall provide monthly removal of fallen leaves. Classification 1 areas may require weekly leaf removal to maintain City operations at the request of the Contract Supervisor.

**5.7 List of Resources –** Litter crews are to be separate from trimming crews. The Contractors shall supply the City with a current list of crew leaders, employees, and fleet equipment assigned to Litter control. The list shall be kept current and provided annually.

**5.8 Cleaning Sidewalks –** When contract service areas are being maintained, the sidewalk shall be kept weed and debris free, this includes the expansion joints in the concrete. Blowing or raking debris, leaves, trimmings or any other matter into the street is not permitted. Any service vehicles larger than ¾ ton are not permitted to be on the sidewalks due to cracking of the concrete and pedestrian interference.

## **6.0 IRRIGATION GUIDELINES**

**6.1 Responsibilities** – The City will furnish all water through irrigation systems as related to plant health, establishment and viability. The City will be responsible for all meters, pumps and backflow assemblies. The Contractor is responsible for the maintenance and repair of mainlines, valves, laterals, emitters and sprinklers or any other aspect of the irrigation control system downstream of the backflow or pump, where applicable. The City will supply the Contractor with irrigation electronic valves as requested by the Irrigation Technician. All other materials used in the repair of systems shall be the responsibility of the Contractor. The Contractor will work with the Contract Supervisor to establish and maintain irrigation station watering schedules.

**6.2 Philosophy and Goal** – A functioning irrigation system will be defined as one where all the emitters are providing uniform precipitation rates over a given period of time, resulting in a uniform plant growth, the control timer is keeping time, and all station valves are operating. With these points in mind, the Contractor is responsible to see that all plant material owned by the City, which are planted within the contract boundaries receive the proper amount of water to maintain health and vigor.

All the irrigation systems shall be operated at an appropriate seasonal frequency, using the least amount of water necessary to maintain the growth, health and vigor of all landscape plant material. Water schedules shall promote deep and infrequent irrigation for the health and development of the plant's root system. Per the request of the Contract Supervisor, during the winter months of November, December, January and February watering schedules shall be kept to a minimum to keep valves lubricated. If special watering is needed for any area, it is the responsibility of the Contractor to bring it to the Contract Supervisor's attention, in writing.

Plant material that is damaged due to lack of water or over watering shall be replaced or returned to health at the Contractor's expense. Replacement and plant recovery procedures shall be submitted by the Contractor for the City's approval.

Any Contractor concerns for irrigation system design or management practices, must be submitted to the City, in writing, or otherwise be the responsibility of the Contractor.

When watering, the Contractor shall not water to a point of run-off. If run-off is occurring, adjustment of the watering schedule, or use of wetting agents, may be necessary. It is a violation of Chandler Code to cause any water to flow into a public street.

When irrigation systems are out-of-service involving mainlines, valves, laterals, emitters or sprinklers, the Contractor is required to water by hand, or by other means in accordance with plant needs, and this watering shall be considered routine work. The Contractor will also furnish the water in these instances. When irrigation systems are out-of-service involving meters, backflows, pumps and controllers, the City will assume the cost for necessary hand watering done in accordance with the enhancement worktable.

**6.3 Programming-** The Contractor will program computerized controllers to activate the irrigation system. It is the responsibility of the Contractor to furnish all tools, keys, or equipment to access and program the controllers. It is the Contractor's sole responsibility to notify the landscape Contract Supervisor if the approved watering schedule fails to meet the appropriate watering requirements for the season. The watering schedule should assure the proper maintenance of

plant material, ie. no stressed, dead, or dying plant material. In the rare instance of manual systems, they are to be properly maintained and operated by Contractor based on the required rate and frequency necessary for the season and to maintain healthy plant material.

For efficient use of water, the guideline below should be followed, unless the Contractor can justify, to the Contract Supervisor's satisfaction, the deviation from the guidelines:

- 6.3.1** Drip irrigation should start no earlier than 5:00 a.m. and be off no later than 4:00 p.m., where applicable.
- 6.3.2** Turf irrigation should start no earlier than 12:00am and be off no later than 5:00am; where applicable
- 6.3.3** Drip irrigation of Native Desert Landscapes shall be adjusted seasonally for deep and infrequent watering
- 6.3.4** Adjustments that are made by the Contractor in order to maintain growth at a desired rate must be approved by the Contract Supervisor in writing.

As the City converts areas to smart controllers as a resource to better control water usage, the Contract Supervisor will retain programming responsibility. The Contractor is highly encouraged to work with City staff on appropriate programming for the success of the plant material. City control of the irrigation systems does NOT absolve the Contractor from their requirements to maintain the plants in a healthy and vigorous state. The Contractor's staff will be given permissions to the central control software for the tasks of check systems and valve functions only. The Contractor will be solely responsible for the necessary training of designated irrigation technicians and providing them with smart phones to check the system.

**6.4 Reports-** The Contractor shall maintain an inventory of irrigation clocks and a log of current irrigation station times. This log shall also include the type of vegetation each zone is irrigating. A copy shall be submitted to the City during each bi-weekly check, posted inside the controller cabinet and kept accurate as changes occur.

The report shall include, but not be limited to:

- a) RW Clock location
- b) Station locations
- c) Start times
- d) Days of the week or month cycles
- e) Each station's watering time length

At the direction of the Contract Supervisor, when rain occurs or is forecasted with a certainty to continue for more than one day, all irrigation systems should be turned off by the Contractor's personnel. When rain conditions have passed, the Contractor shall adjust the system for proper operation, again at the direction of the Contract Supervisor. If storm water or nuisance water is being retained in retention basins, the Contractor shall turn-off only the stations impacted by the standing water, until the water recedes or percolates, and then return the stations to normal operation. This adjustment shall be noted on the weekly maintenance

report and submitted to the Contract Supervisor on each occurrence. This shall be considered routine work.

**6.5 Special Watering** – Special watering, when ordered by the City, will be paid for at the agreed upon extra work authorization. The payment for special watering shall only be made for reasonable amounts of time required to set-up equipment, adjust for coverage, occasional monitoring and breakdown of equipment. Equipment and methods used for special watering will be subject to approval by the City.

**6.6 Irrigation Maintenance** – The Contractor is required to employ the necessary qualified irrigation personnel with the knowledge and equipment to diagnose, repair and maintain all watering systems within the contract boundaries. The Irrigation Technician and the Lead Maintenance person will not be the same person. The Contractor shall maintain a reasonable inventory of commonly required repair parts on the service vehicle in order to facilitate prompt equipment repairs. Irrigation equipment shall include, but is not limited to, lateral lines, fittings, control valves, valve boxes, controller clocks and wiring, and emitters. These parts shall be used only to repair areas within the Contract limits.

Irrigation Technician Tool Inventory	
Round Point Shovel	Square Shovel
Trenching Shovel	Sharpshooter shovel
Mattock/Pick	Leaf and Iron Rake
Professional Grade Loppers	Wire Strippers
Lineman’s Pliers	Long Nose/Needle Nose Pliers
Combination Wrench Set	Hex Key Set
18” Heavy Duty Straight Pipe Wrench	24” Heavy Duty Straight Pipe Wrench
Channellock Straight Jaw Tongue & Groove Plier Set	Silicone Filled Wire Connectors
Dri-Splice Wire Pre-Filled Connectors	Hammer
Tape Measure	Water Meter Key
Screwdriver Set	Tone Generator and Probe Kit
Digital Multimeter & Tester	PVC Glue
PVC Primer	Ratcheting PVC Cutter
PVC Saw	Teflon Tape/PTFE
Teflon Paste Thread Sealant	Rain Master Remote, Hunter Remote for Controllers
Keys for Rain Master, Hunter, and Irritrol Controllers	Any Other Tools Required to Perform Irrigation Repairs

If an irrigation controller malfunctions, the Contractor shall be responsible for notifying the Contract Supervisor for repairs and reinstalling the repaired control clock with the station wires in the original order as found or recorded in the records.

If the controller cannot be repaired and the system has been out of service for more than 5 business days the Contractor is responsible for manual operation of the valves to provide the appropriate amount of water to the landscape until an enhancement work authorization can be issued and the Contractor will install a new controller.

The Contractor shall adjust emitters and valve boxes to the level of the ground surface. Valve

boxes, control boxes and wire boxes, shall be kept free and clear of dirt and debris, so as to be visible. Existing irrigation control valves shall be exposed with a minimum of 3" below the valve body. The Contractor will be responsible for securing lids to prevent vandalism or unauthorized manipulation of the valves, quick couplers, multiport, or flush caps. When any work is done on a valve, the Contractor will, raise the valve box to existing grade and add Christie tags to valves with station numbers. The painting of valve box lids is not an acceptable practice; valve identification must be done from inside the valve box. It is highly suggested the Contractor use moth balls for deterring insects and spiders.

Payment for irrigation system maintenance shall be paid for under the price agreed upon as stated in the contract as part of the base monthly fee. Special repairs or watering will be paid for at the price agreed upon on the enhancement worktable.

**6.7 Irrigation Technician Qualifications** - City will certify the skill level of all Irrigation Technicians who will be doing work on City's irrigation maintenance Contract. This certification will be accomplished by a "hands-on" situational exercise conducted by City. Contractor may certify as many individuals as desired to successfully perform the Contract requirements and is encouraged to qualify back-up Irrigation Technicians. Failure to successfully certify Irrigation Technicians will be grounds for termination of this Contract in its entirety.

The situational exercises will consist of nine tasks related to establishing and maintaining a properly functioning irrigation system. The nine tasks consist of:

- 1) Repairing a malfunctioning valve
- 2) Repairing a broken wire with a water-tight connector
- 3) Adjusting the flow on a control valve
- 4) Check the (Ohm) reading on a solenoid assembly for proper operation
- 5) Diagnosing a controller with no display
- 6) Programming an irrigation controller
- 7) Check station voltage on the controller
- 8) Adjust radius and arcs on sprinkler heads
- 9) Install a new nozzle to an existing sprinkler head

Each task will be rated "pass/not pass" by the Contract Supervisor. To achieve certification, the applicant must receive a passing rating on **ALL** tasks. If any applicant fails the test they will be retested in five (5) days. If CONTRACTOR has failed to qualify an Irrigation Technician, the Contract is subject to re-award.

If the Contractor loses their qualified Irrigation Technician during the course of this Contract, the Contractor shall have five (5) working days to hire a replacement and take the test. If the applicant fails the test, they will be retested in five working (5) days. If the applicant fails the test a second time, they will not be retested. If Contractor has failed to qualify an Irrigation Technician in a thirty (30) day time period, the Contract is subject to termination for cause.

**6.8 Erosion-** The Contractor is to repair erosion damage in all landscape areas that may have resulted from irrigation leaks or water main repairs. Reoccurring erosion shall be brought to

the attention of the Contract Supervisor for prevention solutions. These erosion preventions measures will be paid through an enhancement work authorization.

**6.9 Backflow Testing and Repair-** Annually during the winter months when systems are operating minimally, the Contractor will conduct backflow testing at the agreed upon rate per test. If repairs are made, the backflow must be tested again and be included in repair cost. All testing reports shall be submitted to the City's Water Division using their online portal. The Contractor is required to register and certify with the City's Water Quality division. In the event of a repair, the City will provide necessary parts and/or replacement backflow devices. All work is to be done to the approval of the City, specifically meeting the Water Divisions requirements. Backflow testing is to utilize a certified pressure device and certified backflow tester all supplied by the Contractor. The backflow tester shall have a general backflow repair certification through either the American Backflow Prevention Association (ABPA) or the All-American Backflow Prevention (AABP).

## **7.0 TURFGRASS MANAGEMENT**

**7.1 Mowing-** Mowing task shall only be performed during the growing season when turf is green and growing. Mowing is to be performed by a separate crew. Turfgrass shall be kept to a height of no more than three inches (3") and no lower than one inch (1"). Mowing shall at not remove more than 1/3 of the grass blade in a single day. All existing debris shall be removed prior to mowing tasks. Grass clippings shall be collected and removed if they are thick enough to be designated unsightly or do not disperse evenly over the turf area. Mowing operation should be suspended if conditions are too wet, either from rain or irrigation, which may cause rutted or muddy turf. Grass areas adjacent to sidewalks, curbs and hard surface pads or patios shall be edged and blown off. Mechanical edging and trimming shall be done around underneath all other fixed structures (i.e. tables, benches, posts, valve boxes, etc.). Line trimmers shall not be used around trees or shrubs. Any special mowing or vacuuming required will be paid for at the price agreed upon by an enhancement work authorization.

**7.2 Grass Weeds and Pests-** Turf areas are to be maintained as outlined in Section 4, Weed and Pest Abatement. Chemical control of grass will be permitted along fences, around sign posts, structures, and in sidewalk expansion joints only. Chemical control of turfgrass around trees will not be permitted. Chemical spraying must be performed in accordance with the State of Arizona Office of Pest Management Rules and Regulations. The Contractor is required to be properly licensed for the specific pest control to be utilized. The Contractor shall furnish properly certified and trained personnel and equipment for routine grass mowing and spraying. If the Contractor is not licensed for the specific pest control, a licensed subcontractor may be used for the specific pest. The subcontractor and its personnel are then bound by the above requirements. Chemical and/or other accepted methods of weed control are the responsibility of the Contractor. Any herbicide used shall be considered a management tool and will not be paid for by the City.

Contractor must post public signage related to the application, per State of Arizona Office of Pest Management and remain up until re-entry period has expired. Signage shall also not remain posted longer than 12 hours after the re-entry period has expired.

**7.3 Grass Fertilization-** The Contract Supervisor may request turfgrass areas to be fertilized with fertilizer specified by the City and will be paid for at the price agreed upon on the enhancement work authorization. The Contractor is fully responsible for the proper application of nutrients and fertilizer. Plant material, including turfgrass, that are damaged due to over fertilization or burning resulting from contact shall be replaced or returned to health at the Contractor's expense. Replacement and plant recovery procedures shall be submitted by the Contractor for the City's approval.

Any spillage or fertilizer overthrown onto sidewalks, patios, hard surface courts, etc. shall be immediately removed. The Contractor will be liable for all costs associated with the damage to city and/or private property, which occurs during fertilization.

## **8.0 ARBOR CARE**

This section is intended to provide more detail of the arbor care standards within the City of Chandler ROW boundaries. The Contractor shall familiarize themselves with these standards in addition to adhering to the City of Chandler horticultural standards. All Arbor Care activities shall follow the applicable ANSI A-300 standards and ISA guidelines. It is encouraged that green waste be recycled as much as possible.

**8.1 Tree Staking –** All trees that are unable to support themselves in an upright position, whether new plants or plants damaged in storms, will need to be staked within three (3) working days. The Contractor shall be responsible for staking trees, maintaining tree ties, removal or loosening of tree ties and removal of stakes on an as needed basis. All holes from any removal of tree stakes shall be backfilled and packed to maintain the grade level. At no time shall broken portions of tree stakes be left above ground level. Trees that are staked shall have 2 (two), 8 (eight) foot lodge pole stakes with 2 (two) sets of tree ties to maintain a healthy growth pattern. Multi-trunked trees should have three (3) stakes on the largest caliper stems. Tree ties are to be broad, smooth and somewhat elastic; wire with cut garden hose sections is an unacceptable tie material. Once a tree is properly staked, nursery stakes shall be removed by the Contractor. Trees with a caliper greater than that of their stakes shall be evaluated monthly. Stakes and ties shall be removed from any tree able to stand upright on its own and notification to the Contract Supervisor shall be given prior to removing stakes. Any tree fatally girdled by improper ties shall be replaced at the Contractor's expense with a like-size tree and species to be approved by the City. In areas of high pedestrian traffic adjacent to a tree, the Contractor shall tie durable, brightly colored ribbons on the ties. All stakes and ties shall be reviewed on an annual basis as part of routine scheduled work.

**8.2 Tree Pruning –** All trees and shrubs shall be pruned to ANSI A-300 standards and ISA guidelines. All pruning techniques shall only be necessary as to encourage and maintain healthy growth of trees. All tree pruning must have at least a Certified Tree Worker present. Tree pruning should remove no more than 25% of the leaf-bearing canopy. Thinning cuts are the preferred type of pruning cut and reduction or heading cuts should only be made if part of a structural pruning plan. All cuts shall be made using the three-cut method. Topping or lion-tailing of trees will not be tolerated, and the Contract Supervisor has the right to deduct from the Contractor's

invoice \$500 per tree. With prior written approval from the Contract Supervisor, topping may be performed as part of utility line clearance.

**As part of routine work, crown cleaning pruning of any dead, damaged or diseased limbs or branches, partially detached or not, shall be removed as needed, to a height of 15 feet.**

Damage done to plant material due to frost or freezing shall be removed as soon as conditions become favorable, without threat of further damage occurring.

Any special pruning, such as structural pruning, crown thinning and crown reduction, may be performed by an enhancement work authorization using the agreed payment rates on the enhancement work pricing sheet. Special pruning is to be done by trained staff who is familiar with ISA guidelines and with at least the Certified Tree Worker present. Structural pruning shall follow the below four (4) step process.

1. Select and establish a desired structure, and dominant leader. Competing stems should be subordinated.
2. Select and establish the lowest permanent branch, keeping in mind the minimum height requirements per Code compliance
3. Select and establish scaffold branches, which have good attachment, appropriate size, and desirable spacing in relation to other branches
4. Selection and subordination of temporary branches both below the permanent branch and among the scaffold branches.

The Contractor, during the same working day, shall remove all debris accumulated from tree pruning.

**8.3 Tree Removal** – Whenever a tree dies or is damaged as a result of storm, age, uncontrollable pest infestation, disease, or vandalism, the Contractor shall remove the tree and document. All trees 2 inches in diameter or less are considered routine and part of this contract for removal by the Contractor. All tree removals greater than 2 inches in diameter shall be approved by the City, in writing, before the Contractor begins any work at the agreed-upon enhancement pricing. Tree removal doesn't require a certified Arborist to perform this work.

The labor, equipment, plants, and materials required for removal and replanting by the Contractor will be paid for at the price agreed upon by an extra work authorization. Included in the pricing shall be the grinding of the stump below grade or if replanting will occur then the price for the entire stump to be dug out. Under no circumstances shall a stump be left for more than 10 business days. All holes from removed trees shall be filled, or refilled, until grade level is maintained. Any bubble or drip emitter for a removed tree that will not be replaced shall be capped. All tree removals shall be approved by the City, in writing, before the Contractor begins any work. The Contractor shall submit a report to include specific location, date, and time on all areas where landscape plant material has been removed. The log shall include:

- a.) Area location
- b.) Work order authorization number
- c.) Date actually removed
- d.) Approximate location onsite
- e.) Type of tree removed

- f.) Approximate diameter and height
- g.) If replaced, or not

The Contractor through an incident report shall document storm damage and vandalism.

If the tree dies as a result of neglect or poor management the Contractor shall supply all labor, materials, equipment and a like-sized species with the nearest size of nursery stock available at no cost to the City.

For the purpose of this specification, a dead plant or tree shall mean any plant or tree which the Contract Supervisor determines is in such a poor condition that its appearance detracts significantly from the otherwise pleasing appearance of the landscape, and which may not be expected to fully recover within a reasonable period of time. Seasonally dormant plants shall not be considered dead.

**8.4 Tree Replanting or New Tree Plantings-** The Contractor shall install new plants and trees, if so ordered by the City, at the price agreed upon by an extra work authorization. The Contract Supervisor has the right to select a species best suited to the planting location(s). When purchasing new trees, the Contractor shall notify the Contract Supervisor and accommodate the Contract Supervisor's schedule to allow hand selection of nursery stock. If the Contract Supervisor waives their right to hand select nursery stock, the Contractor shall select trees of the specified species that are free of girdling roots, co-dominate trunks, unusual bends in the trunk and the trunk flare must be visible.

**8.4.1** All plantings of trees shall follow the techniques outlined below.

- A. The planting hole should be two to three times the width of the root ball at the soil surface, sloping down to about the width of the root ball at the base.
- B. The planting hole should never be deeper than the distance from the trunk flare to the bottom of the root ball. If necessary, soil should be removed from the root ball to expose the trunk flare and at least 2 primary roots.
- C. Do not add soft fill to the bottom of the hole as the root ball will settle, resulting in excessive planting depth. Gravel should also not be used in the planting hole to aid in drainage.
- D. The tree shall be handled only by the root ball and not the trunk.
- E. Burlap, wire baskets, plastic containers, wooden boxes and any other type of root ball holding container shall be completely removed at planting.
- F. Backfilling should use the existing soil, working it around the ball while adding water to prevent large pockets of air. Slightly tamp soil and water thoroughly and slowly after backfilling.
- G. Mulching around tree shall extend to at least six (6) feet or to the drip line of the canopy, and be between two to four inches in depth. The mulch shall be organic such as compost, wood chips, or bark chips. Mulch, of any kind, shall not be in contact with the trunk or stem.

Refer to the City of Chandler Landscape Installation and Design Guidelines for more information

**8.5 Palm Trees** – The palm tree quantity may vary slightly due to maintenance area responsibility with the addition and subtraction of maintenance areas. Palm trees regardless of height shall have frond stubs and seed pods removed starting May 1st and completed by June 30th. Palms shall receive appropriate skinning at the time of annual pruning. This will be on an as needed basis at no additional cost. All palms require trimming unless otherwise advised by authorized City personnel.

All Palm tree locations can be found at the below link. This inventory is regularly updated and currently the City is responsible for 595 palms.

<https://app.arborprousa.com/viewer/8oRY1IFrKXKsaKjr>

In classification 1 landscapes, palm trees are to be treated with a preventative fungicide, approved by the Contract Supervisor, for the prevention of bud and root rot diseases.

Palm trimming shall be completed by a separate crew, not the required landscape maintenance staff as specified within this contract. Trimming including the removal of 'hangers' must be completed to the satisfaction of city staff. Any palms not trimmed within the contract period for reasons other than force majeure will be deducted from the billing.

**8.6 Olive and Oak Trees** - All fruit bearing olive trees and nut producing oak trees may be treated for fruit and nut prevention at the request of the Contract Supervisor and paid at the agreed upon rate in the Enhancement Table. Contractor to provide chemical label and SDS sheet for approval and shall be used at the recommended label rate. A chemical log sheet must be submitted to Contract Supervisor indicating the date, location and chemical used during the application. A chemical spray log shall be submitted the same day after application.

**8.7 Fertilization** – Applications of nutrients to trees and planting areas, when ordered by the City, will be paid for at the rate agreed upon by an enhancement work authorization. Avoid lodging or spraying material on or in foliage. Thoroughly water material into the soil immediately following application on trees and planting areas.

The Contractor is fully responsible for the proper application of nutrients and fertilizer. Plant material that is damaged due to over fertilization or burning resulting from contact shall be replaced or returned to health at the Contractor's expense. Replacement and plant recovery procedures shall be submitted by the Contractor for the Contract Supervisor's approval.

Any spillage or fertilizer overthrown onto sidewalks, patios, hard surface courts, etc. shall be immediately removed. The Contractor will be liable for all costs associated with the damage to city and/or private property which occurs during fertilization.

**SPECIALIZED HORTICULTURAL MAINTENANCE SCHEDULING AND NOTIFICATION.** Contractor shall notify the Contract Supervisor, in writing, at least two (2) weeks prior to the date of all specialized horticultural maintenance operations. In some cases, this will be done as a proposal using the agreed upon enhancement work rates.

- a. Fertilization- Seasonal Schedule depending on plant species

- b. Soil amendment and conditioning- Proposal as requested
- c. Chemical pest control and or gopher control- Proposal as requested
- d. Palm Trimming – Annual Schedule
- e. Palm Treatment(s) (Copper Fungicide)- Schedule for classification 1
- f. Fruit bearing Olive and Oak Tree Treatments- Annual Schedule
- g. Tree Trimming- Proposal for annual tree pruning
- h. Turf Mowing – Seasonal schedule
- i. Backflow Testing- Proposal for testing and any repairs

Specifications of the material to be applied shall also be supplied to the Contract Supervisor at least two (2) weeks prior to the date of all specialized horticultural maintenance operations.

### D. CITY DEPARTMENT COORDINATION

While the primary contacts will be the ROW Landscape division, the City has provided the current City representative and contact information for coordination of services with the respective departments that utilize this contract.

**Parks** - overseeing Rights-of-way, retention basins and medians

Brandon Putman- Parks Maintenance & Operations Superintendent

P: 480-782-2662

[brandon.putman@chandleraz.gov](mailto:brandon.putman@chandleraz.gov)

**Streets**- overseeing vacant properties and street maintenance yard

Esgar Garcia- Streets Maintenance & Operations Superintendent

P: 480-782-3428

[esgar.garcia@chandleraz.gov](mailto:esgar.garcia@chandleraz.gov)

**Transit**- overseeing bus stops and transit centers

Jason Crampton- Transportation Planning Manager

P: 480-782-3402

[jason.crampton@chandleraz.gov](mailto:jason.crampton@chandleraz.gov)

Nancy Jackson- Transportation Planning Program Coordinator

P:480-782-3442

[nancy.jackson@chandleraz.gov](mailto:nancy.jackson@chandleraz.gov)

**Airport**- overseeing the airport properties

Scott Rinkenberger- Airport Operations Manager

P:480-782-3545

[scott.rinkenberger@chandleraz.gov](mailto:scott.rinkenberger@chandleraz.gov)

Diana Alonzo- Airport Management Assistant

P: 480-782-3542

[diana.alonzo@chandleraz.gov](mailto:diana.alonzo@chandleraz.gov)

AIRPORT	\$	7,404.45
<b>TOTAL</b>	<b>\$</b>	<b>2,098,971.97</b>

**Notes:**

- All rates are per square foot. Monthly rates as proposed by Contractor; annual rates = monthly \* 12.
- Enhanced Litter Service is an additional rate above the base maintenance rate:  
\$0.0030/sq ft/mo = 2\* per week litter patrol | \$0.0060/sq ft/mo = 3\* per week patrol.
- Standard Litter patrol (1x per week) is included in the base maintenance rate for all tiers.
- Enhanced Litter Service (\$0.0030/sq ft/mo) may be applied to Western Canal if warranted.
- Blue text = rates and inventory. Black text = formulas.
- The City retains the right to adjust category designations and inventory through annual amendment.

# Hybrid Contract Staff Requirements

## F. LANDSCAPE ENHANCEMENT PROJECT SPECIFICATIONS

### SCOPE OF WORK

**INTENT:** To ensure the continuity of plant and tree warranties at the time of planting with the on-going landscape maintenance services, landscape revegetation will now be included the contract as "Landscape Enhancements".

**DESCRIPTION:** Contractor shall furnish all labor, material, and equipment necessary to vegetate, design, repair and redress areas within the City as specified. This portion of the agreement is an on call / as needed service of the contract. Work shall be performed in accordance with all applicable laws, codes, and regulations required by authorities having jurisdiction over such work and provide for all Inspections and permits required by federal, state, and local authorities in furnishing, transporting and Installing landscapes as shown or for completing the work Identified herein.

***Contractor is aware that the Landscape Enhancement portion of the agreement is "as needed" and that there are no guarantees as to the minimum quantity of work that will be required by the City.***

At a minimum the Contractor shall be able to furnish or remove and dispose, transport, and plant any material typically associated with street median landscape including backfill excavation and watering per City specifications. In addition, the Contractor shall coordinate work space as required including approval of traffic control, coordinating of utility marking service as necessary, site clean-up, safety, and any other Incidental work. Contractor shall install plant material within City landscaped areas only.

At times storms may occur during the course of an Enhancement project scope affecting the new plant material, causing erosion or washouts, and flooding debris into open irrigation pipes. These Enhancement worktable rates are to address any justified cleanup efforts to get the project back on track. The Contractor must provide a proposal of the labor required to remedy storms that affected the new plant material, caused erosion or washouts, or flooded debris into open irrigation pipes. The Contract Supervisor will have the final approval of any justified cleanup efforts to get the project back on track and to have a quality outcome for our citizens.

## LANDSCAPE ENHANCEMENTS TECHNICAL SPECIFICATIONS

### Part 1 – Project Management

#### LANDSCAPE AND IRRIGATION DESIGN SERVICES

Contractor to provide access to a Landscape Designer, who which does not need to be a registered landscape architect, for general landscape plantings and irrigation designs. The Contractor and their Designer shall conduct a site evaluation (i.e. study planting site characteristics such as the

amount of sun or shade, soil type, pH, soil compaction, existing plants/shrubs/trees and water drainage) and provide recommendations for landscaping enhancements/improvements. The Contractor should use their expertise and vision to make the areas more aesthetically pleasing.

Low Impact Design and Green Infrastructure practices, such as preserving existing native trees and vegetation, rainwater harvesting, xeriscaping, and the use of drought adapted plant material to minimize the use of irrigation. Refer to the Green Infrastructure Handbook by ASU for more details.

The Contractor is required to utilize the existing irrigation system components when applicable. Repairs necessary for project success are the responsibility of the Contractor and the installation of new control valves and/or water lines shall only be installed with Contract Supervisor approval.

The Landscape Designer shall use the most current version of the City's landscape and irrigation details and specification found within the Uniform Design Manual and the Approved Products List on the City's website under section 8. (<https://www.chandleraz.gov/government/departments/development-services/unified-development-manual>)

It is preferred that the Landscape and Irrigation designers be able to provide AutoCAD files of their designs to the City for incorporation into the City's GIS system of record keeping.

## **UTILITY CLEARANCES AND PERMITS**

Contractor shall adhere to all current and applicable CITY, STATE, and FEDERAL codes and laws.

Maricopa County Dust Control Permits must be obtained by the Contractor prior to the commencement of work on projects exceeding one acre. Dust control permits require daily dust logs, and when applicable a list of all Rule 310 certified employees and a list of subcontractors working under your permit. The Contractor and all subcontractors shall register with the Maricopa County Air Quality Department and provide their registration ID number to the Contract Supervisor. Contractor shall follow all standard outlined in the Maricopa County Air Quality Department, Rule 310 Dust Abatement Handbook.

A Stormwater Pollution Prevention Plan (SWPPP) may be required depending upon the scope of work. It will be the responsibility of the Contractor to create the plan and submit to the City's Engineering Counter prior to obtaining the Notice to Proceed.

All Horticultural activities shall follow the applicable ANSI A-300 standards, Arizona Landscape Contractors Association (ALCA) Sustainable Landscape Management (SLM) practices, Arizona Nursery Association Guides and the International Society of Arboriculture (ISA) guidelines.

Contractor must obtain Traffic Control Plan permits when applicable and shall adhere to the most current edition of the City's Uniform Design Manual for Traffic Barricade Design. Contractor shall adhere to the Federal Highway Administrations, Manual of Uniform Traffic Code Devices, (MUTCD), most current edition and the City of Phoenix Barricade Manual.

## **CONTRACTOR'S EQUIPMENT**

Contractor shall provide and maintain during the entire period of this contract, equipment sufficient in number, condition and capacity to efficiently perform the work and render the services required by this contract and in compliance with all state regulatory laws. A fleet list must be provided at the beginning of the contract detailing make, model and year of equipment to be used and their typical area or function of use.

All vehicles must be maintained in good repair, appearance and sanitary condition at all times. The Contractor's staff shall use and maintain all equipment safety features as provided by the manufacturer, i.e. chute guards, shields, covers, cutoff switches, etc. The Contractor's name shall be clearly displayed on all maintenance vehicles and motorized equipment. The City reserves the right to inspect the Contractor's vehicles at any time to ascertain said condition. Additional consideration will be given to those with energy efficient, hybrid or electric vehicles and equipment.

When the Arizona Department of Environmental Quality issues a high pollution warning, the Contractor shall be expected to eliminate the use of gasoline powered equipment, i.e. blowers, weed eaters, chain saws, etc. for that day and notify their employees of the advisory and the Contract Supervisor of the suspension of work.

Truck idling of more than 15 minutes is highly discouraged within City limits. It is recommended that employees go indoors for breaks from the hot weather to reduce emissions.

## **CONDITION OF LANDSCAPE AT BEGINNING OF PROJECT**

Upon receiving official notification that an enhancement project has been approved by the City, the Contractor shall conduct a ride along with the Contract Supervisor to inspect the areas for pre-existing conditions that would prevent or adversely affect completion of any improvement activities. The Contractor shall prepare a list of specific deficiencies found at each project area and submit the list to the City for review before a notice to proceed will be issued. The City will evaluate each problem listed to determine if extra compensation is warranted for repair work prior to starting the contract's enhancement project. The Contract Supervisor may authorize the Contractor to make extra cost repairs or may determine that the items listed represent normal conditions that might be expected at any time during the contract period. The determination of disposition of all items listed shall be the responsibility of the City and the City's decision shall be final and binding upon the Contractor. All repairs to pre-existing conditions deemed necessary and authorized by the City shall be made during the execution of the enhancement project. Contractor shall replace or repair in kind any damage to property resulting from the Contractor's actions to the satisfaction of the Contract Supervisor.

**It is the Contractor's responsibility to document pre-existing site conditions for verification that any potential damage was not done by the Contractor.**

## **SCHEDULING OF WORK**

The Contractor shall provide written project schedules not later than one (1) week prior to project commencement. The Contract Supervisor shall review and approve the schedules submitted and reserves the right to make changes or adjustments or to reject the entire proposed schedule if it does not meet timing or standards set forth by the City. A project is not permitted to begin until the schedule is approved. All projects shall be scheduled on Monday through Friday of each week between the hours of 6am and 3pm. Weekend work is NOT permitted without prior Contract Supervisor approval. The Contractor must make every effort to stay on schedule and shall complete all work during the scheduled calendar week unless unforeseen circumstances beyond the control of the Contractor cause delays.

Weekly, the Contractor will be required to submit to the City a report of work items completed the previous week and an updated 3-week look ahead schedule. The report will be due by 5:00 P.M. on the Monday following the week completing the work. All scheduled items not completed during the week must be included in this report with an explanation why the work was not completed. This report shall be in written form, furnished via email, as a report attachment. Late or non-submittal of reports may result in a \$250 deduction from invoices for services rendered. All reports will be due and reviewed at least one week prior to end of project for the final invoice to be approved for payment.

## **WEATHER & CLIMATE**

In the event of inclement weather, the Contractor shall obtain approval from the Contract Supervisor prior to not performing any work due to the weather event. The City reserves the right to suspend any or all work due to poor weather conditions or other extreme conditions. The City also reserves the right to authorize the suspended work to be performed at a later date, or the City's Contract Supervisor may deem it more appropriate to omit the suspended work and resume the normal schedule. The Contractor shall not perform any suspended work without written authorization from the Contract Supervisor.

## **SITE INSPECTION**

The Contractor shall establish milestones within the schedule for City staff to inspect the progress of the project. Contact the assigned City representative at least 48 hours prior for an inspection. Work cannot continue until inspections occur.

Typically, these milestones are:

- the completion of clear and grub
- installation of irrigation system piping prior to burying
- function and pressure testing of irrigation system for 48 hours prior to planting
- scheduling of nursery tree and plant selection by City staff
- granite or mulch ground cover samples
- subgrades and final grades

## **SUBMITTAL SAMPLES AND TESTING**

Contractor shall provide submittal and may be sampled for testing at the point of delivery. The submittal will be accepted or rejected upon the results of tests performed or at the Contract Supervisors discretion for the ultimate success of the project.

If desired by the City, items/services bid shall be subjected to testing, dissection or analysis by a recognized testing laboratory or consultant selected by the City to determine that the material(s) submitted for bid conform to the bid specifications. The cost of testing, dissection or analysis shall be borne by the Contractor.

## **SAFE SERVICE AREAS**

All service areas shall be maintained to prevent the existence of safety hazards. If safety hazards cannot be corrected before Contractors' employees leave a service area (ie. end of workday), the Contractor shall ensure the proper protective barriers are in place. Protective barriers may include cones, A-frame barricades, warning signage and/or temporary fencing depending up on the severity of the safety hazard as determined by the Contract Supervisor. Costs associated with protective barriers are the responsibility of the Contractor.

## **SITE CLEANLINESS**

The Contractor shall keep the premises clean of all rubbish and debris generated by the work involved and shall leave the premises neat and clean. All surplus material, rubbish, and debris shall be disposed of by the Contractor at their expense. The work areas shall be cleaned at the end of each workday. Sweep, scrub or hose affected areas as directed by the owner's representative to maintain a clean and neat work area.

All materials, tools, equipment, etc., shall be removed or safely stored. The City is not responsible for theft or damage to the Contractor's property. All possible safety hazards to workers or the public shall be corrected immediately and left in a safe condition at the end of each workday. If there is a question in this area, the City's Contract Supervisor will be consulted.

Protect landscape work and materials from damage due to bulk material installation operations, by other Contractors and trades, trespassers, and animals. Maintain protection during installation and maintenance periods. Treat, repair or replace damaged work as directed by the Contract Supervisor. All scars, ruts or other marks in the ground caused by this work shall be repaired and the ground left in a neat and orderly condition throughout the site.

## **DISPOSAL OF TRASH AND WASTE**

All trash and any other waste generated from executing this agreement shall be transported and disposed of in compliance with federal, state, county and City laws and regulations. The Contractor is solely responsible for any disposal fees (dumping charges), incurred as a result of routine work. Fees for disposal of waste accumulated from extra work or emergency response work shall be included in Extra

Work, Payment Rates or Emergency Response Work on the invoices. The disposal must be at an authorized landfill, recycling center or green waste facility.

## **COMPENSATION**

The unit price of proposal shall include all labor, materials (unless supplied by the City), equipment, overhead, profit, and any other incidental costs to perform the enhancement project. The City will not sign Contractor proposals; the issuance of a Purchase Order is the written authorization to proceed. The amounts invoiced shall be those agreed upon in the proposal or by change order to the proposal.

Payment will be made on a completed project basis within 30 days after receipt of a numbered and itemized invoice from the Contractor and acceptance of the work by the City, less any deductions or assessments as described. An itemized invoice shall identify the specific project name.

All invoices are to be submitted to the City's Accounts Payable Department via email, fax, or mail and the Contract Supervisor copied. All invoices for projects completed between July to June of the fiscal year must be submitted to accounts payable by June 30<sup>th</sup>. The Contractor will be given two written notifications to submit all fiscal year invoices during this time frame. Any invoices not submitted within these time frames and with the City's proper notification, may not be paid.

Contractors shall make every effort to resolve disagreements in performance standards and deductions in payment with the Contract Supervisor. If a resolution cannot be met the Contractor can request the City's Procurement department to be involved as a mediator for resolution. The City reserves the right to have the Contractor's accounting department in attendance.

## **CONDITION OF LANDSCAPE AT END OF PROJECT**

One (1) week prior to project completion, the Contract Supervisor and the Contractor will make a final ride along inspection to determine the condition of all landscape project area(s). Items determined to be improperly installed or executed by the Contractor will be listed and evaluated by the Contract Supervisor. The Contractor will arrange for repairs to be made and the costs for making repairs to the areas shall be the responsibility of the Contractor. After completion of punch list items, the Contractor and Contract Supervisor shall re-inspect the project and upon satisfactory completion of punch list items, issue a written statement of acceptance of installation and establish the beginning of the project warranty period. The last payment shall be that which is due for all work completed fulfilling the scope of said enhancement project.

## **WARRANTY**

Unless otherwise specified, all irrigation system items shall be guaranteed against defect in material and workmanship for a minimum period of two (2) years from date of acceptance by the City. Tree planting shall be guaranteed for one (1) year from time of planting and shrub planting for 90 days. The project warranty period begins upon written acceptance of project installation by the Contract Supervisor and Contractor. At any time during that period, if a defect should occur in any item, that item

shall be replaced or repaired by the Contractor at no obligation to the City except where it be shown that the defect was caused by misuse, vandalism, or by faulty design.

Contractor expressly warrants that all goods or services furnished under this contract shall conform to the specification, appropriate standards, and will be new and free from defects in material or workmanship. Contractor warrants that all such goods or services will conform to any statements made on the containers, labels or advertisements for such goods, or services, and that any goods will be adequately contained, packaged, marked and labeled.

Contractor warrants that all goods or services furnished will be merchantable and will be safe and appropriate for the purpose which goods or services of that kind are normally used. If Contractor knows or has reason to know the particular purpose for which City intends to use the goods or services, Contractor warrants that goods or services furnished will conform in all respect to samples. Inspection, test, acceptance of use of the goods or services furnished shall not affect the Contractors obligation under this warrant and such warranties shall survive inspection, test, acceptance and use. Contractor's warranty shall run to City, its successors, and assigns.

It is agreed that the Contractor shall be fully responsible for making any correction, replacement, or modification necessary for specification or legal compliance. In the event of any call back, Contractor agrees to give the City first priority. Contractor agrees that if the product or service offered does not comply with the foregoing, the City has the right to cancel the purchase at any time with full refund within 30 calendar days after notice of non-compliance and Contractor further agrees to by full responsible for any consequential damages suffered by the City.

## **LANDSCAPE ENHANCEMENTS TECHNICAL SPECIFICATIONS**

### **Part 2 –Installation and Construction Standards**

All projects are to be installed based on the scope designation as provided by the Contract Supervisor. All Horticultural activities shall follow the applicable ANSI A-300 and Z133 standards, Arizona Landscape Contractors Association (ALCA), Sustainable Landscape Management (SLM) practices, and the International Society of Arboriculture (ISA) guidelines. The Enhancement project shall use the most current version of the City's landscape and irrigation details and specification found within the Uniform Design Manual and the Approved Products List on the City's website under section 8.

(<https://www.chandleraz.gov/government/departments/development-services/unified-development-manual>)

#### **TREE, SHRUB, GROUNDCOVER AND CACTI PLANTING**

The Contractor shall install new plants and trees, if so ordered by the City, at the price agreed upon in the attached pricing table. The Contract Supervisor has the right to select a species best suited to the planting location(s). When purchasing new trees and/or plants, the Contractor shall notify the Contract Supervisor and accommodate the Contract Supervisor's schedule to allow hand selection of nursery stock. Typically, trees are hand selected and other plants can be approved by nursery pictures.

If the Contract Supervisor waives their right to hand select nursery stock, the Contractor shall select trees of the specified species that are free of girdling roots, co-dominant trunks, unusual bends in the trunk and the trunk flare must be visible. Selected plant stock shall not be recently re-potted, nor have roots growing through drainage holes and of the correct size and species specified in the approved proposal. Plant stock shall be well-shaped, fully branched, healthy, vigorous, and densely foliated when in leaf. All trees and shrubs are expected to be free of disease, pests, eggs, larvae, and defects such as knots, sun scald, injuries, abrasions, and disfigurement. Substitutions in species are not allowed without prior Contract Supervisor authorization.

All plantings of trees and/or plants shall follow the techniques and standards found in the Chandler Uniform Design Manual, Section 8. Deviations from these standards require written authorization from the Contract Supervisor. In addition, the techniques below shall be followed:

- The planting hole should be two to three times the width of the root ball at the soil surface, sloping down to about the width of the root ball at the base.
- The planting hole should never be deeper than the distance from the trunk flare to the bottom of the root ball. If necessary, soil should be removed from the root ball to expose the trunk flare and at least 2 primary roots.
- Do not add soft fill to the bottom of the hole as the root ball will settle, resulting in excessive planting depth. Do not add gravel to the planting hole to aid in drainage. Contractor shall test drainage of tree and shrub pits by filling with water twice in succession. Conditions permitting the retention of water in planting pits for more than twenty-four (24) hours shall be brought to the attention of the

Contract Administrator/designee, Contractor shall submit a written proposal for the correction to the Contract Supervisor for approval prior to proceeding with the work.

- Do not handle container plants/trees by the tops, stems or trunks at any time. Lift all plants so that the root ball is supported from the underside.
- At no time shall trees or plant materials be pruned, trimmed or topped prior to delivery and any alterations of their shape shall be conducted only with the approval and in the presence of the Contract Supervisor.
- Burlap, wire baskets, plastic containers, wooden boxes and any other type of root ball holding container shall be completely removed at planting. After removing plant from container, Contractor shall scarify side of root-ball to eliminate root-bound condition.
- Backfilling should use the existing soil, working it around the ball while adding water to prevent large pockets of air. Slightly tamp soil and water thoroughly and slowly after backfilling.
- Fertilizer tablets shall be used on all "non-native" and/or "desert-adapted" plant material. Native plant material may be omitted from this requirement. The tablets shall be composed of 20% nitrogen, 10% phosphorous, and 5% potassium
- All trees that are unable to support themselves in an upright position, whether new plants or plants damaged in storms, will need to be staked within three (3) working days. The Contractor shall be responsible for staking trees, maintaining tree ties, removal or loosening of tree ties and removal of stakes on an as needed basis. All holes from any removal of tree stakes shall be backfilled and packed to maintain the grade level. At no time shall broken portions of tree stakes be left above ground level. Trees that are staked shall have 2 (two), 8 (eight) foot lodge pole stakes with 2 (two) sets of tree ties to maintain a healthy growth pattern. Multi-trunked trees should have three (3) stakes on the largest caliper stems. Tree ties are to be broad, smooth and somewhat elastic; wire with cut garden hose sections is an unacceptable tie material.
- The nursery tree stake shall be removed prior to the installation of supporting stakes.
- Trees with a caliper greater than that of their stakes shall be evaluated monthly during the maintenance period. Stakes and ties shall be removed from any tree able to stand upright on its own and notification to the Contract Supervisor shall be given prior to removing stakes. Any tree fatally girdled by improper ties shall be replaced at the Contractor's expense with a like-size tree and species to be approved by the City. All stakes and ties shall be reviewed prior to maintenance turnover following applicable installation warranties.
- All palms shall be placed straight and perpendicular to an assumed level ground surface. Do not place palms perpendicular to sloped ground. Contractor shall set palms firm enough so as not to reduce the need for stakes or bracing. Contractor shall assume all responsibility to maintain palms in an upright position. If Contractor believes bracing is necessary, It shall be his responsibility to notify the Contract Supervisor prior to the commencement of palm installation

## **IRRIGATION INSTALLATION**

A functioning irrigation system will be defined as one where all the emitters are providing uniform precipitation rates over a given period of time, resulting in a uniform plant growth, the control timer is keeping time and all stations are operating. With these points in mind, the Contractor is responsible to see that all newly planted material owned by the City receives the proper amount of water to properly establish and maintain health and vigor.

All the irrigation systems shall be operated at an appropriate seasonal frequency, using the least amount of water necessary for proper establishment and to maintain the growth, health and vigor of all landscape plant material. Water schedules shall promote prompt establishment and development of the plant's root system. If special watering is needed for any area, it is the responsibility of the Contractor to bring it to the Contract Supervisor's attention, in writing.

Plant material, that is damaged due to lack of water or over watering shall be replaced or returned to health at the Contractor's expense. Replacement and plant recovery procedures shall be submitted by the Contractor for the City's approval.

Any Contractor concerns for irrigation system design or management practices, shall be submitted to the City, in writing, or otherwise be the responsibility of the Contractor. When irrigation systems are out-of-service involving laterals, emitters or heads, the Contractor is required to water by hand, or by other means in accordance with plant needs, and this watering shall be considered routine work. The Contractor will also furnish the water in these instances.

When watering, the Contractor shall not water to a point of run-off. If run-off is occurring, adjustment of the watering schedule, or use of wetting agents, may be necessary. It is a violation of Chandler Code to cause any water to flow into a public street.

Upon written notification from the Contractor of system failure involving electric supply and/or water supply from the City's main lines, backflows or valves the City will assume the cost for necessary hand watering done in accordance with the special watering provision on the Pricing table.

The Contractor will provide desired program parameters for computerized controllers to activate the irrigation system in writing. It is the Contractor's sole responsibility to notify the Contract Supervisor if the approved watering schedule fails to meet the appropriate watering requirements for the project. The watering schedule should assure the proper maintenance of plant material; no stressed, dead, or dying plant material.

For efficient use of water, the guideline below should be followed, unless the Contractor can justify, to the Contract Supervisor's satisfaction, the deviation from the guidelines:

- Drip irrigation should start no earlier than 5:00 a.m. and be off no later than 4:00 p.m., where applicable
- Turf irrigation should start no earlier than 10:30 p.m. and be off no later than 5:00 a.m., where applicable
- Adjustments that are made by the Contractor in order to maintain growth at a desired rate must be approved by the Contract Supervisor in writing.

**BULK MATERIAL GROUND COVER**

The Contractor shall provide a Water Truck or Water Mechanism if necessary to comply with Environmental Issues (Dust Control) set by the Arizona Department of Air Quality (ADEQ) guidelines. The Contractor will utilize a granite shooter style truck or other means to load and spread landscape rock and other various materials. The Contractor shall confirm that a sufficient quantity is available so that the entire area will be of the same composition and appearance. Contractor shall be responsible for providing and use the stone slinger truck for loading and spreading landscape rock or various materials as needed.

The Contractor will provide clean-up after each work assignment and clean-up any spillage or debris left from the work/project back to the original state. Sweep as necessary.

All bulk material installation activities shall follow the applicable Maricopa County Dust Abatement Handbook. The Contractor shall suppress emission of dust to comply with the twenty percent (20%) visible emission opacity limit in Rule 310 of Maricopa County's Air Pollution Control Regulations.

The Contractor is responsible for providing transportation, placement and leveling of all bulk materials per the contract scope for each enhancement project. The Contractor shall install landscape boulders, decomposed granite, riprap, and/or mulch if so ordered by the city, at the price agreed upon in the attached pricing table. The Contract Supervisor has the right to select the color, size, and texture best suited to the project location(s). When purchasing new rock, or mulch the Contractor shall notify the Contract Supervisor and provide a current supplier sample for inspection and approval. Selected materials shall be of the correct size and color specified in the approved proposal.

Decomposed granite, boulders, and/or riprap shall be native, local, desert stone at the size and color, meeting industry standard gradation. The decomposed granite and/or rip rap shall be from a single source, free from coating, clay, caliche or organic matter.

Woody Mulch should be used as an alternative to granite under trees and shrubs and on bare soil at the request of the City with a minimum 3-inch layer. To the greatest extent possible, Contractor shall not procure mulch products that originate from forest products. When possible, Contractor shall give preference to mulch products produced locally, or from regionally generated plant debris including that made at the City of Chandler.

All granite/mulch installation projects shall comply with the following guidelines below:

- Placement of materials without damaging surrounding areas.
- Complete finished soil grades, adjacent to paving, curbs and headers will consider the depth of applied toppings materials such as granite to a 2-inch depth and mulch to a 3-inch depth.
- Protect existing vegetation from damage during rock shooting installations The Contractor is responsible to replace any damaged vegetation in kind as directed by the City.
- Any decomposed granite that lands within plant material shall be removed. Granite to be distributed 4-6 inches away from the base of plants and/or trees.

- Decomposed granite shall be evenly distributed on the designated areas to a depth as indicated on the plans and details. If a depth is not indicated, the minimum granite depth shall be 2-inches and mulch 3-inches
- After rough spreading and rough grading of the granite/mulch within the designated areas, the granite shall be raked evenly and thoroughly blend the different gradation sizes. Mulch shall be tamped flat to remove air pockets for a uniform surface.
- Remove all non-planted vegetation from all areas designated to receive granite (by chemical or mechanical means) and maintain the designated areas "vegetation-free" prior to placement of the granite.
- Contractor shall provide a written record detailing a minimum of (1) application of pre-emergent herbicide per manufacturer's recommendations before granite installation and a second application after completion.
- Contractor shall maintain a minimum of ½" finished surface grade below any applicable concrete headers and/or landscape edging.
- Contractor is responsible for all cleanup and debris removal generated as a result of the project.

### **TURFGRASS REMOVAL**

Increase water run times and perform an approved fertilization to promote active growth of the turfgrass in collaboration with the Contract Supervisor. The Contract Supervisor will provide guidance to the thickness of sod cut removal classification to use in turfgrass removal.

#### Spraying out of Turfgrass

- Contractor to request the Irrigation cutoff timing, in conjunction with schedule of herbicide treatments.
- Timing of herbicide sprays shall be part of the summer active growing season. Submit products to Parks Department will approve types of herbicides
- Nutsedge treatment using approved herbicides

#### Thickness of sod cut removal

1. Scrape the top 1 inch off
2. 3 inches along hardscape edges
3. Sod cut 2 inches throughout

#### Follow up spraying and removal warranty for one year.

**TREE PRESERVATION** – Tree preservation is the process of protecting trees and vegetation from damage related to construction activity or turfgrass removal. Tree preservation fence installation is required to provide protection to the root zone, trunk, and canopy of City trees. Fencing will typically be four feet (4') high, orange, UV resistant, high density barricade fabric. Fence shall be secured to each stake with three (3) appropriate ties near the top, middle, and bottom of each stake. When feasible, fencing should be maintained to ten feet (10') beyond the tree crown dripline or to protect the critical root zone. Other preservation activities may be utilized to prevent soil compaction such as thick layers of composted

mulch. Consult with the City's Urban Forestry division for guidance on turfgrass removal around existing trees.

**SUB GRADES**

Typically, sub-grades have been previously graded. Contractor shall be required to make repairs, which are pitted, eroded or scoured due to surface drainage, or other damage where necessary. All ground surfaces shall be graded reasonably smooth prior to completion of the landscape Installation.

**FINISH GRADES**

Unless otherwise noted, landscape finish grades shall be 1" below adjacent pavements, curbs and walks, etc. All landscape areas within this agreement shall be uniformly graded so that finished surfaces conform to typical City of Chandler standards. Finished surfaces shall be reasonably smooth, and free from irregularities or debris deemed not acceptable by City. If required, swales shall be finished to permit proper surface drainage or rainwater harvesting.

**G. PAYMENT TABLE FOR ENHANCEMENT WORK**

Enhancement Work including Labor for Placement, Installation, or Planting	Normal Working Hours	Emergency Call Out
<b>MAINTENANCE RATES</b>		
Storm Damage Tree Removal (Arbor Technical crew)	\$225 /hour	\$265 /hour
Storm Damage Debris Removal (Extra Landscape crew)	\$180 /hour	\$195 /hour
General Labor	\$47.50 /hour	\$55 /hour
Irrigation Technician	\$55 /hour	\$75 /hour
Backflow Test	\$55 /test	\$75 /test
Backflow repairs/replacement (not including parts)	\$65 /hour	\$75 /hour
Pest Control (Rodents & Insects)	\$65 /hour	\$65 /hour
Curb & Gutter Weed Abatement	\$55 /hour	\$65 /hour
ADOT Intersection Weed Abatement	\$75 /hour	\$85 /hour
Landscape Tractor w/Operator	\$125 /hour	\$125 /hour
Backhoe with Operator	\$155 /hour	\$155 /hour
Bobcat with Operator	\$175 /hour	\$175 /hour
Dump Truck with Operator	\$85 /hour	\$95 /hour
Irrigation Design Services	\$75 /hour	
Landscape Design Services	\$85 /hour	
Special Watering	\$55 /1000sqft	\$65 /1000sqft
Daily Litter Pick Up	\$0.015 /sqft	\$0.02 /sqft
Daily Power washing	\$0.03 /sqft	\$0.035 /sqft
