## ACTIVITY DESCRIPTION

This request is for Chempro 100is to be used by the County's Regional HAZMAT Team during quarterly training events. Currently when training occurs that requires the use of monitoring devices such as the Chempro 100i for identifying unknown substances these monitors must be taken off of front line / first due apparatus. In order to keep existing equipment in service during training events the Cochise County HAZMAT response team would like to request additional monitoring equipment to be used for a minimum of 4 quarterly drills and 2 in service training events per year. This equipment will allow frontline equipment to remain in service and ensure timely response while simultaneously supporting more inclusive and realistic training events. The Countywide HAZMAT annual drill for 2020 will include response to and identification of unknown substances or facility leaks with an unknown origin. Chempro 100s currently owned by the response team are slated for use during this event however training aids such as the ones requested would enhance the learning environment exponentially for years to come.

## HOW DOES THIS FURTHER YOUR ORGANIZATIONS MISSION

This request supports the HAZMAT teams requirement to train local fire departments in integrated HAZMAT response as well as maintaining proficiency for technician level HAZMAT response personnel across the County.
