

Three military doctors signed a sworn affidavit to be used in a federal lawsuit attesting to the fact that the data correlates with their clinical experience in treating soldiers in 2021 and that in their professional opinion, the mass vaccination is the most likely culprit of these increased injuries and ailments. The military has denied the statistics because of a “glitch” but to my knowledge has not corrected the data.

This is in addition to the original data Renz revealed to Sen. Johnson showing a tenfold increase in diagnoses for neurological issues, a 300% increase in miscarriage diagnoses, and a total cancer diagnosis increase of about 300%.

Hypertension – 2,181% increase

Diseases of the nervous system – 1,048% increase

Malignant neoplasms of esophagus – 894% increase

Multiple sclerosis – 680% increase

Malignant neoplasms of digestive organs – 624% increase

Guillain-Barre syndrome – 551% increase

Breast cancer – 487% increase

## Do women have miscarriages due to the vaccine?

**COVID vaccines do not cause miscarriages.** COVID disease does kill pregnant women.

- 13,956 women (5.5% vaccinated) and 4521 women with miscarriages (5.1% were vaccinated) showed median number of days between vaccine and miscarriage to be 19.
- There is no evidence of increased risk for early pregnancy loss after COVID vaccination.

The initial data I am seeing shows two things-

**1- rates of vaccine associated myocarditis appear to peak at 2nd dose and decrease with 3rd dose.**

2- COVID disease causes significantly higher rates of myocarditis than vaccines do.

It's important to remember these things take time to develop and analyze. There is **not enough data** yet to make a hard recommendation on a population health level.

**COVID Vaccines and Myocarditis**

- Large study of over 2.3 million people
- 0.8 cases per 1 million patients with first dose
- 5.8 cases per 1 million patients with second dose
- All were men aged 20-32 years old
- All cases resolved with conservative management

AFFIDAVIT OF **LTC. THERESA LONG M.D.** IN SUPPORT OF A MOTION FOR A PRELIMINARY INJUNCTION ORDER I, Lieutenant Colonel Theresa Long, MD, MPH, FS being duly sworn, depose and state as follows:

- Therefore individuals fully vaccinated with mRNA vaccines have at least two independent risk factors for myocarditis after vaccination. **Additional booster shots add more risk.** It is impossible to perform a risk/benefit analysis on the use of mRNA as counter measures to SARs-CoV-2 without **further data.**

## Measures a local health agency shall:

1. Review each report received under Article 2 for completeness and accuracy
2. Confirm each diagnosis
3. Conduct epidemiologic and other investigations required by this Chapter or in cooperation with the Department
- 4. Facilitate notification of known contacts**
- 5. Conduct surveillance**
6. Determine trends
7. Implement control measures, **quarantines, isolations**, and exclusions as required by the Arizona Revised Statutes and this Chapter
8. Disseminate surveillance information to health care providers
- 9. Provide health education to a disease case or contact to reduce the risk of transmission of the respective disease**
10. Report to the Department, as specified in R9-6-206 and this Article
