2. BACKGROUND

- 2.1. ADHS OIVP administers funds provided by the CDC for operation of the Overdose Data to Action (OD2A) Cooperative Agreement , and AHCCCS’ State Opioid Response (SOR) funding from the Substance Abuse and Mental Health Services Administration (SAMHSA);
- 2.2. The overarching goal of the State Opioid Response (SOR) grant is to increase access to OUD treatment, coordinated and integrated care, recovery support services and prevention activities to reduce the prevalence of OUDs, stimulant use disorders, and opioid-related overdose deaths. The project approach includes developing and supporting state, regional, and local level collaborations and service

CONTRACT NUMBER	INTERGOVERNMENTAL AGREEMENT
CTR063847	SCOPE OF WORK

enhancements to develop and implement best practices to comprehensively address the full continuum of care related to stimulant and opioid misuse, abuse and dependency;

- 2.3. Abuse and addiction to opioids is a serious and challenging national public health problem. Deaths from drug overdose have risen steadily over the past two (2) decades and have become the leading cause of injury death in the United States. The latest numbers from the CDC show a reported 92,452 overdose deaths for the year 2020, up thirty percent (30%) from the 71,130 deaths in 2019. Of those 2020 deaths, opioids were involved in 69,031, which accounts for seventy-five percent (75%) of all drug overdose deaths;
- 2.4. Previously, this opioid epidemic had been driven by prescription drug use. According to data from Arizona's CSPMP, there were 4.1 million Class II-IV prescriptions written and 240,511,812 pills dispensed in Arizona in 2019. This equates to thirty-four (34) Schedule II-IV controlled substance pills for every person, adults and children, living in Arizona. According to experts, recent prescribing practices in Arizona rank our state as twenty-eighth (28th) for opioid prescribing with forty-four point one (44.1) prescriptions per 100 people; but this is no longer the root cause of overdose deaths;
- 2.5. Now, the main driver of the opioid crisis is fentanyl. In 2019, synthetic opioids were involved in more than 36,000 deaths in the U. S., which is about seventy-three percent (73%) of all opioid-involved deaths that year. Most of these fentanyl deaths were due to illicitly-made fentanyl, which is found in counterfeit pills and being mixed into other drugs such as heroin. Other street drugs (such as methamphetamines) may be laced with fentanyl without the user's knowledge, adding to risk of overdose. In Arizona, presence of fentanyl in overdoses significantly increased from nine percent (9%) in 2017 to fifty percent (50%) in 2021;
- 2.6. In addition to the human cost, the financial burden of opioid misuse is enormous. In 2019, there were 56,623 hospital visits related to opioids in Arizona, at an average cost of \$11,942 per visit. This equals about \$676 million dollars in health care costs due to opioids; and
- 2.7. Prescription and illicit opioids, like fentanyl, are addictive and responsible for an increasing number of deaths in Arizona. This rise reflects a growing problem across the nation and overdose deaths are the leading cause of preventable injury death.

3. OBJECTIVE

With resources awarded through the CDC and SAMHSA, Arizona will be well equipped to continue expanding prevention services and strategies to halt, reverse, and diminish the opioid crisis in our state. Key strategies and initiatives that will guide ADHS' work include:

- 3.1. Enhancing the capacity of county health departments to address the opioid epidemic through implementation of prevention-based strategies that will lessen the overall impact and burden of opioid misuse across the community; and
- 3.2. Expanding local linkages to care to improve access to prevention-based and Opioid Use Disorder (OUD) treatment services across the state.

4. TASKS

The Contractor shall integrate:

- 4.1. State and Local Prevention and Response Efforts
 - 4.1.1. Implementing a statewide community toolkit or other evidence/evidence informed interventions,
