03/24/2023

Dear Sir/Madam,

This letter is to address the appeal that has been filed in opposition to the Approval of Kaibab Manufacturing (Cochise County Special Use SU 23-05). Our hope is to address these concerns and continue to move forward to be able to move our business to our home property. It saddens us that none of the neighbors who are in opposition chose to contact us directly as we requested in our letter, and instead took to two separate social media sites to create panic and concern in the area.

**Concerning PG 1/5 Opening statement:** Mr. Willie Navarro has filed an appeal against the unanimous 8-0 approval from the Planning Commissioners on March 08,2023. He states that the individuals signed **(Exhibit A)** comprise the residents, property owners or concerned citizens who are in opposition of the approval. I would like to point out that out of the 34 signatures they have, only 9 of them were from homes listed on the labels **(Exhibit B)** that were provided to us of the neighbors who needed to be notified. Four of the signatures reside at Parcel # 20622116, and two own Parcel # 20622114. Mr. Willie Navarro himself is not listed on the labels provided to us, but two women by the name of Celestine and Catrina Navarro are. I would also like to mention that the house that the Navarro family purchased on 10/12/2023 located at 408 W Kaibab Way is, as of the date of this letter, still vacant and no one has moved in yet. The Navarro family is still in San Jose, Ca. The remaining 25 signatures appear to be from outside the area of notifications, which leads me to believe that any information they received is not accurate.

Mr. Navarro states numerous reasons why they are in opposition of the approval such as safety, health, livelihood, and financial well-being of themselves. We have been totally transparent about our business and our products. We have also been totally transparent about our intentions. Our finished products and our production process do not use any harmful contaminants. Our business does not pose any threat to our employees, ourselves, or any outsiders. It does not harm the environment, the water supply, or any nearby livestock. Our business does not use large amounts of water and our water bill from Tucson is never higher than \$ 38.00 per month. Our business will not jeopardize anyone's safety in any way, nor will it affect their financial wellbeing. Our employees will be dining at local restaurants that are located along HWY 191, and when we take our employees out to lunch for a shipping party, we will be dining at one of our local establishments in either Benson or here is Cochise. None of our neighbor's property taxes will increase except for ours. The county will receive tax money, and we hope to hire locally when the need arises. We also plan to give back to the community by hosting holiday food pantries and donating to our local schools. We are a small family owned and operated company that poses no threat to anyone in our community. We purchased our home and lot in Sept of 2019. We love our area and community and would never do anything that would hurt or ruin our home or neighborhood. We simply would like to end our 144-mile commute to Tucson daily and save approx. 10 hours a week in driving time. My son Christopher Grogan who works for us lives in Sun Sites and has 4 children. Reducing his driving time down to 30 minutes a day would greatly improve his home life as well.

### **PG 1/5 # 1.**

Mr. Navarro states that he doesn't feel that our business fits the criteria for Zoning RU-4, which we understand and that is why we applied for the Special Use Permit. We believe that the Planners who have reviewed our application along with the Planning Commissioners, and the Madam Chair who heard our application on March 8, 2023, and voted unanimously 8-0 to approve our application understand our business and understand if our business fits the guidelines for a Special Use Permit.

### **PG 2/5 # 2.**

Mr. Navarro states that the public notices were improper, and questionable. We wrote our letter on 01/20/2023 (**Exhibit C**) and mailed it that day. I can not say when the county mailed their letters, but I can tell you that we received ours from the county on 02/06/2023. I realize Mr. Navarro's address in California is further away, but I do not think from my experience of mailing checks to my vendors that it is any longer than a week. In our letter to our neighbors, we invited them to call, or email us with any concerns. We received one phone call from Mr. Randy Redhawk Parcel # 20622127 address PO Box 451 Pearce, AZ 85625. Mr. Redhawk expressed his concerns and asked questions, we answered them, and he gave us his blessing. We also did receive one mailed in support letter. We also understood that if nothing was received back from a neighbor then that was counted as an approval.

### **PG 2/5 #3**

Mr. Navarro is questioning the format of the meeting as well as the length of time my husband and I spoke for. We had watched previous meetings on You Tube to understand how the meetings worked. We also asked questions and were told that we would have ten minutes in the beginning to introduce ourselves and to explain about our application and project. We would then have an additional five minutes following the citizens' comments to address any concerns. For our first ten minutes we spoke according to the video on You Tube from 45:57 to 51:07, approx. 6 min. Mr. Navarro spoke from 51:19-51:29, he then paused for Madam Chair and then began speaking again at 51:40 through 55:20. Approx. 4 minutes. When listening to it is unfortunate that Mr. Navarro was more concerned about giving his employment history and education than his concerns. We also wish these concerned citizens would have reached out or even come by the business in Tucson to see our shop. I really think they do not understand that although we classify as a Manufacturer, that classification is broad. We are an assembly shop that buys components and puts them together to make a product. After the Citizens Comments we spoke from 1:00 to 1:02 for our rebuttal. The meeting was then closed to the public and it was an opportunity for the Board of Commissioners to speak and ask any questions. They requested to see the parts we brought for display.

### **PG 2/5 #4A**

Mr. Navarro stated that the business was downplayed from Manufacturer to a simple assembly type of operation. Yes, we explained what we do. I would not call it downplaying but simply explained what we do. The word "Manufacturer" when google searched it is defined by : **A person or company that makes goods for sale.**

We understand that the label "Manufacturer" can create images in one's thoughts of all different types of manufacturing which could be inappropriate, or damaging to our area, depending on the type of manufacturing that is taking place. That is why we brought samples of our parts that we provide, along with submitting two letters from our Machine Shops (**Exhibit D**) in Tucson that supply us with our Metal housings and machined parts. We explained that we purchase components and assemble them to manufacture our end products.

### **PG 3/5 #4B**

Mr. Navarro also states that we were dishonest in our answers regarding traffic increases caused by large trucks or semi's. He states that we recently had two semis unloading bulky material at our home. That is

not accurate. We did have one Estes Semi Truck that delivered a Carport purchased at Home Depot. It was delivered on Friday 2/08/2023 @ 10:40 AM. **(Exhibit E)** We have also agreed to sign a Maintenance Agreement to care for the dirt roads in our immediate area.

**PG 3/5 #4C**

Mr. Navarro does not like the conditions set forth for the approval. I believe that he doesn't understand that those conditions were set forth after Ms McLachlan reviewed the comments and concerns by the citizens, and the conditions addressed the concerns that were brought forth at that time.

**PG 3/5 #4E & #5**

Mr. Navarro is questioning why our application was listed in our name's vs the company name. It is because my husband owns the land Parcel # 20622115 that the building would be placed on, not the company.

**PG 3/5 #5 A**

Mr. Navarro demands the business information, which was provided on the Letter we sent dated 01/20/2023 **(Exhibit C)**. I also verbally told him this information during the hearing on 3/08/2023. He states that we are a Veteran owned business with a total of 15 employees. This is old information and was updated after Charles Lipscomb (Christophers father) passed away in 2021. Even at his time of death we did not have 15 employees, so I am not sure where Mr. Navarro obtained his information. With Chucks passing we lost our Veteran Owned Status and now are simply categorized as Small Business. These statuses serve to help the buyers fit the first choice when fulfilling a solicitation. We are still able to BID and win the contract for solicitations that we are not categorized for. If possible, they choose the company that is in that particular category but if no manufacturers make the part, they are looking for then it goes to a company that isn't whatever the subcategory is.

**PG 4/5 5A**

Mr. Navarro also states that once the business is moved that all our Government Certifications, permits and licenses become invalid. That is false. We have spoken with our QAR through DCMA, which is the division of the DOD that does our quarterly audits and Inspections on parts when called for in the contracts. In addition to it being false it has absolutely nothing to do with the approval of the Cochise County on our Special Use Permit.

**PG 4/5B & 6**

Mr. Navarro also calls out the NAICS Codes. Anyone can see our NAICS on the SAM (System for Award Management). When you google search NAICS this is the definition you will see: Federal agencies use the North American Industry Classification System (NAICS) to classify businesses when collecting, analyzing, and publishing statistical data about the United States economy. This numeric coding system is also used for administrative, regulatory, contracting, and taxation purposes.

The main purpose is so that the buyer when searching the BIDS can verify that the Contractor, they choose are able to manufacture this product. For Example, one of our codes is 33531- Motor and Generator Manufacturing. This does not mean we manufacture Motors completely in their entirety. This means we can manufacture a motor or any of the maintenance parts needed for them. Our REM P/N 9705400 NSN: 5930-01-237-7322 Nomenclature: Switch, Thermostatic **(Exhibit F)** is a temperature sensor for a Hum-V. For this part, we purchase the Brass Housing with the wires already attached, we purchase the rubber connector that comes with a Pin and a Pin retainer on top. Then we purchase and apply an ID Band stamp marked "458" and an ID Label. **(Exhibit G, is the Bill of Materials)**

On the last page of Mr. Navarro's concerns, he lists different reference material pertaining to the manufacturing of circuit cards, while we are not arguing that the actual manufacturing process of circuit cards may be very harmful, we do not make the actual circuit cards. We have a vendor, Proton Circuits (**Exhibit H**- Letter from Vendor) that we purchase the cards from made to our specifications. When they are delivered, they are clean of any toxins/contaminants and ready to be stuffed with the appropriate components. As we stated during the hearing on 03/08/2023, we do not use any dangerous or harmful chemicals. We purchase all our components and simply assemble them, together using soldering irons, and hand tools. We use Lead Free solder and Biodegradable Flux.

In closing, we would like to add that we have been transparent and welcome all questions from the county or citizens. We love Cochise County and love our home and neighborhood. We would not do anything to destroy the beauty that we live in. Thank you for your time.

Sincerely,

President / CEO

Dear Friends and Neighbors,

Our name is **Christopher and Beth Rush**, and we represent **REM PRODUCTS, INC**. We have an existing business in Tucson and we are looking to relocate our business to our home, located at **372 W Kaibab Way, Cochise AZ 85606, parcel number 20622115**. We have been in **business 28 years** and have **28 years'** experience in manufacturing. We are a small business that manufactures Electrical Components for the Department of Defense such as Thermostatic Switches, Relays, Magnetic Solenoids and Circuit Cards. Our only customer is the US Government, and we will not have the public or daily foot traffic of customers. We are hopeful to continue to grow to include hiring locally a few more employees.

Our Project will include:

- **5000** Square foot building
- **2 employees**, and ourselves
- **7** parking stalls

The county requires us to go through the zoning process of acquiring a special use authorization. Part of that process includes getting feedback from you, our neighbors.

You will also be receiving a letter from the county, with contact information in case of objections to the project. If you have any concerns, questions, or objections, we ask and encourage you to contact us first. We are happy to address them, and it may be something we haven't thought of that will make the project that much better. We hope that this will be the start of a very cooperative relationship.

Thank you for your time and consideration. Please find our contact information below.

Sincerely,  
Chris and Beth Rush

To Whom it May Concern,

My name is Matthew Colegrove Owner of Precision Machine & Speed.

We manufacture parts for REM Products, we make the parts to comply with all print requirements supplied from REM . All machining, cleaning , and finish requirements are 100% completed by us. When we ship parts to REM they are clean and ready to be assembled. Rem takes the parts we manufacture , along with other purchased products and does assembly only. If you have any questions about any of the processes we complete for them please feel free to call anytime.

Sincerely,  
Matthew Colegrove

To Whom It May Concern,

D&S currently is and has been for over 25 years the primary machined, sheet metal and fabricated parts manufacturer for REM Products. We also provide all part finishing which includes, but not limited to plating, painting, powder coating, silk screening and engraving.

We provide all these types of parts complete for them to their assembly shop.

Thank you,

A handwritten signature in black ink, appearing to read "Daniel Marques", with a long horizontal line extending to the right.

Daniel Marques

# EXHIBIT H

To whom it may concern.

REM Products Inc. purchases bare Printed Circuit Boards (PCBs) from Prototron Circuits Southwest Inc. Located at 3760 E 43<sup>rd</sup>. Place. Tucson, Arizona 85713.

These PCBs are manufactured per REM provided data and specifications from raw materials that Prototron purchases and keep at our facility.

The PCBs are manufactured here at our facility. While manufacturing PCBs is a highly regulated process involving metals and chemicals. Prototron complies with all Local and Federal regulations regarding the manufacturing of PCBs.

Finished PCBs are shipped to a variety of locations including Government labs, Contract manufacturers, private residences , and electronics OEM's. These PCBs are free of any contaminants or hazardous chemicals and are ready to have components assembled to them creating a finished assembly.

PCB's that ship from Prototron are not considered to be hazardous and there are no regulations regarding shipping a finished PCB other than import restrictions.

When a customer receives a finished PCB from Prototron, they typically assemble components to the board which involves no hazardous materials or processes.

Best regards,

Russ Adams
