Background (Brief):

The Title V Maternal and Child Health (MCH) Services Block Grant funds efforts to “strengthen the family and community by promoting and improving the health status of women, infants and children.” This amendment funds year five of the five-year grant. The objectives of the grant are to enhance preventive and primary care services for this population.

The strategies selected by CCHSS align with the National Performance Measures (NPM) framework for MCH programs. The measures selected include: 1) NPM#1 – Well Women Visits, 2) NPM#4 Breastfeeding and 3) NPM#8 Physical Activity.

Under the Public Health Improvement (PHI) Program, CCHSS may use several strategies to support focal initiatives to achieve healthy communities. As health departments often may not have dedicated funds and resources to build and strengthen their organizations, the Public Health Improvement funds allow for that flexibility within the established strategies. The funds may be used for activities to improve health department efficiency and effectiveness, evaluate and continuously improves processes, quality improvement, increase performance management capacity, and maintain a competent workforce.
