| Comments Cochise EM, in partnership with Cochise Fire Association, requests to create two foam caches (north and south) for response to HAZMAT incidents, approx 15-20 pails each. Fire Depts/Districts maintain their own foam, this would create two caches, and not supplant current stock. Primary concern is the I-10 interstate and rail corridor and the Douglas Port of Entry and Hwy 191 corridor. Full request is 40 pails, however we are thankful for any number. | | |
