

Building an AI-Ready Data Environment

WHERE WE ARE TODAY

- Limited data accessibility and governance
- Heavy reliance on paper versus digital records
- Difficulty locating and retrieving documents
- Process inefficiency in responding to public records requests and other constituent/internal inquiries

WHERE WE WANT TO GO

- Establish a structured, compliant, and AI-ready data environment
- Enhance transparency, accessibility, and organizational performance for The County and Constituents
- Support and accelerate enhanced data-driven decision-making with efficient data and AI tools for the Board and County staff

USING INFORMATION AS AN ASSET TO GET THERE

Information/Data Governance, Knowledge Management

Establish policies, roles, and structure to enhance organizational performance, mitigate risks, and foster greater constituent and internal engagement

1

Digitization and Integration

Move to an integrated digital and paperless environment with integrated Master Data Management

2

AI Pilots and Readiness

Pilot AI for data classification and retrieval to increase efficiency and scalability (and other use cases)

Tools to evaluate program development and performance

3

Organizational Change Management

Prepare staff with updated training and communication for a seamless transition

4
