INTRODUCTION & OVERVIEW

ABOUT COCHISE COUNTY

Cochise County encompasses the southeastern corner of Arizona. It is bordered on the east by New Mexico, on the west by Pima and Santa Cruz Counties, on the south by the Mexican state of Sonora, and on the north by Graham and Greenlee Counties. Major municipalities include Benson, Bisbee, Douglas, Sierra Vista, Tombstone, Willcox, and the town of Huachuca City. The county also comprises the Sierra Vista–Douglas Metropolitan Statistical Area.

Cochise County covers approximately 6,219 square miles—roughly the size of Rhode Island and Connecticut combined—making it the eighth largest county in Arizona. Elevation ranges from 3,580 feet in the valleys to nearly 10,000 feet in the mountain ranges, producing

a moderate climate with distinct seasons. With about 14 inches of annual rainfall, Cochise is one of the wetter areas in Arizona. Its diverse topography includes unique “sky islands,” mountain ranges surrounded by desert basins that support extraordinary biodiversity. More than 335 species of birds, 82 species of mammals, and 47 species of amphibians and reptiles thrive here.

OUR PAST

Pre-Historic History: The history of Cochise County stretches back at least 13,000 years to the time of the Clovis people, hunters of extinct megafauna. Indigenous groups, including the Apache, have long maintained enduring cultural ties to the region. The San Pedro Valley contains one of the highest concentrations of Clovis archaeological sites in North America.

Indigenous History: In the 19th century, conflicts between Apache tribes, settlers, and the U.S. Army culminated in the Apache Wars (1861–1886). Chief Cochise, from whom the county takes its name, and later Geronimo, led resistance until their eventual surrender. During this period, multiple army forts, including Fort Huachuca, were established.

Railroad History: The Southern Pacific Railroad, built in 1880, accelerated settlement and economic development by linking mining towns to regional and national markets.

Military History: In 1882, “post” Huachuca was officially redesignated as a “fort.” In 1913, Fort Huachuca became the base for the 10th Cavalry Regiment, known as the “Buffalo Soldiers,” an African American unit. After a brief closure post-World War II, the fort was reactivated during the Korean War and later became a center for electronic warfare and communications. In 1967, it became

the headquarters of the U.S. Army Strategic Communications Command, now known as NETCOM. Fort Huachuca was declared a National Historic Landmark in 1976, recognizing its pivotal role in the Apache Wars and as the site of the Buffalo Soldiers. Fort Huachuca remains the largest military installation and economic engine in Arizona serving a prominent role in national defense missions.

County Origins: Cochise County was officially created on February 1, 1881, when it was annexed out of the eastern portion of Pima County. The first county seat was Tombstone until 1929. Beginning in 1929, the county seat was moved to Bisbee, where it remains to this day.

Cochise County’s location along the U.S.–Mexico border and proximity to New Mexico and other Arizona counties places it at the crossroads of trade, migration, and cultural exchange. It is an active participant in regional planning through the Southeastern Arizona Governments Organization (SEAGO) and engages in cross-border collaborations related to water, environment, and economic development.

^x U.S. Army Fort Huachuca. “History of Fort Huachuca.” U.S. Army. Accessed January 3, 2025. <https://home.army.mil/huachuca/about/history>.

HISTORICAL LAND USE DEVELOPMENT

**Before ~1500 CE
Prehistoric and Indigenous:**
Land use centered on sustainable hunting, gathering, and limited

**Late 1800s-early 1900s
(Mining Boom):** Bisbee, Tombstone, and Douglas emerged as mining hubs for copper, silver, and gold. Mining defined early urbanization patterns and spurred supporting infrastructure.

1900-1950 (Agricultural Expansion): Irrigation and groundwater use supported farming and ranching, especially in the Sulphur Springs Valley.

1950-1980 (Military & Suburban Growth): Expansion of Fort Huachuca spurred population and commercial growth in Sierra Vista and surrounding areas. Post-WWII, suburbanization spread to Douglas and beyond.

1980s- present (Diversification): Growth has been concentrated in cities like Sierra Vista and Benson, with most rural areas remaining sparsely populated, with Hereford being an exception. Retirement, heritage tourism, viticulture, and small business development have become important economic drivers.

REGIONAL CONTEXT

Cochise County borders the the state of Sonora Mexico, New Mexico, as well as the Arizona counties of Santa Cruz, Pima, Graham, and Greenlee

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

MAP 1: SUPERVISOR DISTRICTS

-  District 1
-  District 2
-  District 3

In Arizona, county governments are run by a Board of Supervisors, which serves as the governing body. The Board oversees county operations, manages budgets, enacts policies, and ensures compliance with state and federal laws. The number of supervisors varies by county population, with most counties having five supervisors, except for smaller counties like Cochise County, which has three.

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

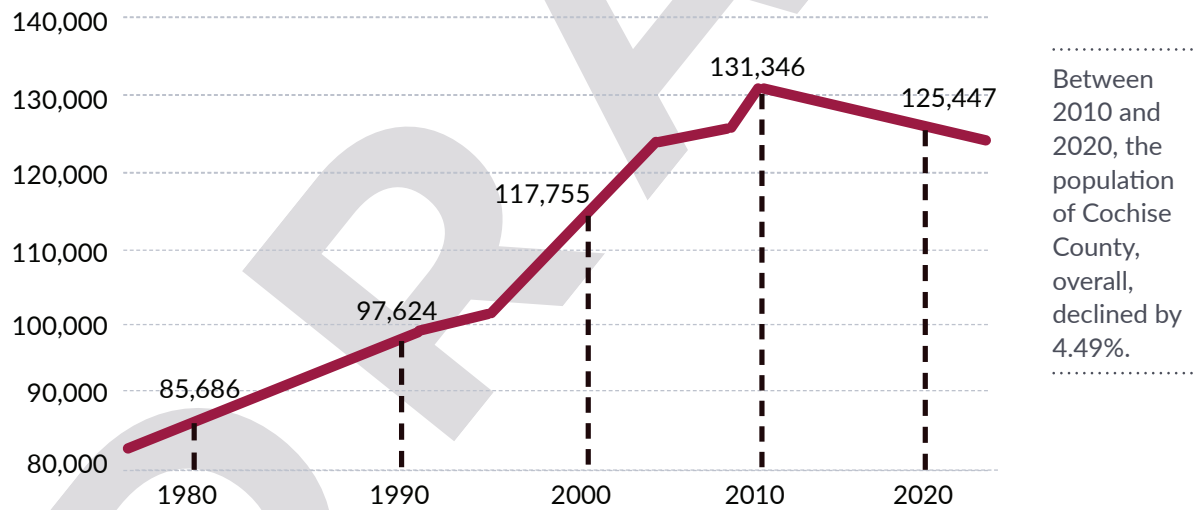

COUNTY DEMOGRAPHICS

Unless otherwise noted, information regarding demographics is taken from the American Community Survey (ACS). A decennial census is required by the U.S. Constitution. Consequently, every 10 years since 1790, Congress has authorized the government to conduct a national census of the U.S. population. The primary function of the decennial census is to provide counts of people for the purpose of congressional apportionment.

In every census between 1940 and 2000, two questionnaires were used to collect information: a “short form” with only basic

questions such as age, sex, race, and ethnicity and a “long form” with the basic short-form questions plus additional questions on social, economic, and housing characteristics. Following the 2000 Census, the long form was replaced by the ACS. The ACS is a nationwide, continuous survey designed to provide communities with reliable and timely social, economic, housing, and demographic data every year. While there is a margin of error of at least 10% of each total value, analyzing ACS information allows us to measure the changing social and economic characteristics of Cochise County^x.

Table 1: Population Growth Trends ^y

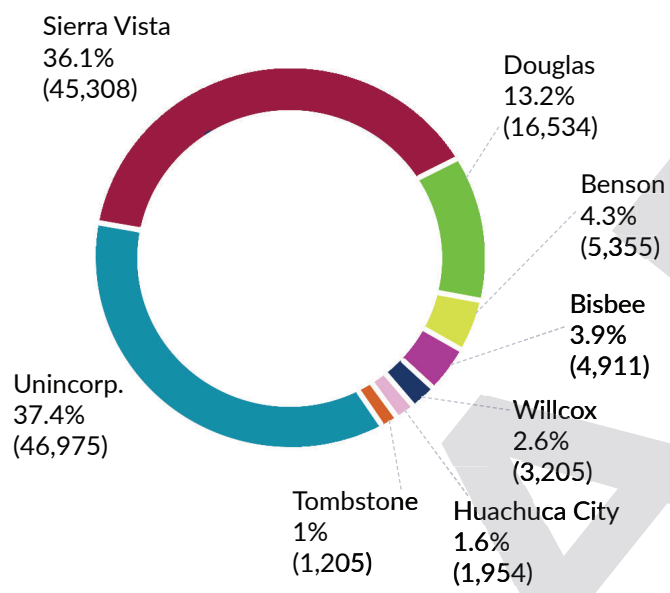

^x (U.S. Census Bureau. (n.d.) 9. Differences between the ACS and the Decennial Census. Website: Census.Gov. https://www.census.gov/content/dam/Census/library/publications/2020/acs/acs_general_handbook_2020_ch09.pdf.)

^y U.S. Census Bureau (2023). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Cochise County, AZ <<http://censusreporter.org/profiles/05000US04003-cochise-county-az/>>

COUNTY DEMOGRAPHICS

Table 2: Population by Municipality

In terms of population, nearly three-quarters (73.2%) of Cochise County residents either live in unincorporated Cochise County or Sierra Vista. The remaining 26.5% of the population lives in one of the six other municipalities.

Table 3: Gender of Residents

The proportion of males to females in Cochise County is comparable to statewide percentages. However, the number of males is a little higher in the County when compared to the nationwide average of 49%.

Source: U.S. Census Bureau (2023). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Cochise County, AZ <<http://censusreporter.org/profiles/05000US04003-cochise-county-az/>>

COUNTY DEMOGRAPHICS

Table 4: Age of Residents ^Y

The median age of Cochise County residents is 44. This is 10% higher than the statewide average of 39.3. Minors (individuals under the age of 18) make up 20% of the county population.

Cochise County's latino population is 10% higher than the state average and 1.5 times higher than the national average.

Source: U.S. Census Bureau (2023). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Cochise County, AZ <<http://censusreporter.org/profiles/05000US04003-cochise-county-az/>>

COUNTY DEMOGRAPHICS

Table 6: Year Moved to Cochise County ^Y

Cochise County shows a somewhat higher rate of recent residential mobility and a smaller share of long-term residents than state and national averages. This pattern may be influenced in part by relocations connected to Fort Huachuca.

Table 7: Educational Attainment

The percent of high school graduates or higher in Cochise County is 88.9%, which is similar to the statewide percentage.

Source: U.S. Census Bureau (2023). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Cochise County, AZ <<http://censusreporter.org/profiles/05000US04003-cochise-county-az/>>

DEMOGRAPHIC STRENGTHS

Cochise County has many demographic strengths that can be leveraged for future economic development. Some of the more significant strengths are as follows:

- **Racial and ethnic diversity:** As shown in [Table X: Race & Ethnicity](#), over one-third (35.8%) of county residents identify as Hispanic or Latino. This diversity can provide bilingual workforce advantages and contribute to our cultural richness.
- **Educated workforce:** Approximately one-quarter of the population has a bachelor's degree or higher. This is a healthy pool of skilled and well-educated workers for employers.
- **Veteran presence:** Approximately 18.6% of county residents have veteran status. This is more than double the state or federal rate. Veterans bring leadership experience, specialized training, and teamwork skills to organizations.

DEMOGRAPHIC IMPLICATIONS

The demographic information presented in this chapter highlights several key implications for policy and planning, including:

- **Need for physically accessible housing units and additional healthcare facilities:** Cochise County's population is older than Arizona's average and our population is aging.
- **Need for economic diversification:** As shown in [Table X, Employment by Sector](#), a large percent of Cochise County residents are employed, either directly or indirectly, by some level of government. In comparison, manufacturing and

DEMOGRAPHIC IMPLICATIONS

construction employment is low. This lack of economic diversification makes the county reliant on defense-related spending by the federal government, which can fluctuate significantly.

- **Need for affordable housing and economic development initiatives:** Affordable housing and economic development remain pressing needs in Cochise County, where the median household income is \$52,025—well below Arizona’s \$77,315—and the poverty rate (15.9%) exceeds the state average of 12.5%.
- **Need for infrastructure to support population growth:** In addition to traditional infrastructure, like roadways and water, access to broadband is also needed to attract remote workers, support businesses, and improve education access.
- **Need for strategies to attract and retain long-term households:** The county shows a somewhat higher rate of recent movers and a smaller proportion of long-term residents compared to state and national averages. This mobility—partly influenced by relocations associated with Fort Huachuca—may affect community cohesion, school enrollment stability, and workforce retention. To help strengthen stability, the county could support neighborhood-based programs, expand partnerships with schools and employers to better integrate new residents, and encourage housing and economic development strategies that attract and retain long-term households.
- **Need for youth retention programs and strategies to counter out-migration:** Like many rural counties, Cochise faces challenges in retaining younger residents. An aging population combined with limited opportunities for younger cohorts may result in future workforce shortages. Programs that strengthen career pathways and enhance quality-of-life amenities will be key to encouraging youth to remain in the county.
- **Need to address health disparities and improve healthcare access:** Higher poverty rates and an aging population increase the need for accessible healthcare services, mental health resources, and elder care—particularly in rural or underserved areas. Addressing these disparities will be vital to improving community well-being.

PURPOSE & STATE LAW ALIGNMENT

Under Arizona Revised Statutes (ARS §11-804), counties are required to adopt a comprehensive plan to guide physical, social, and economic development. The plan provides a long-term policy framework that promotes orderly growth, balances resource management, and supports community well-being. Specific purposes include:

- Guide future land use, housing, transportation, and infrastructure.
- Balance growth with conservation of water, open space, and natural resources.
- Support economic diversification and resilience.

- Enhance community health, safety, and quality of life.
- Engage residents and stakeholders in shaping their shared future.

This plan includes all elements required by A.R.S. §11-804 for counties with more than 125,000 persons, specifically land use, circulation, water resources, and energy. In addition, the plan incorporates optional elements such as open space and public participation to provide a more comprehensive framework. It also supports regional and statewide objectives for economic development, sustainability, and housing.

VISION

The vision for Cochise County 2045 is to secure a vibrant, resilient, and inclusive future by preserving the county's unique rural character, encouraging appropriate economic growth, and ensuring the efficient use of natural resources.

COMMUNITY ENGAGEMENT

County staff initiated the drafting of this update in the fall of 2024. A robust engagement process was implemented to create a plan that reflected the aspirations and needs of its community. The following were key aspects of the engagement strategy:

- **Project website:** A central hub for maps, FAQs, schedules, and surveys.
- **Surveys:** Multiple online surveys capturing residents' preferences on housing, water, land use, transportation,

Cochise County Comprehensive Plan 2045
Planning a better future together

When: 11/12/24, 5 pm
Where: City Council Chambers
599 S Dragoon Street Benson, AZ

Community Input
The community's input is an essential part of the Comprehensive Plan Update. As residents, business owners, and stakeholders in our community, your perspectives, ideas and concerns are vital in ensuring that the Comprehensive Plan reflects the needs and aspirations of our diverse population. By participating in the plan survey or community meeting, you have the opportunity to shape the vision for our community's future and help prioritize actions that will enhance our quality of life.

9. Meeting/Open House 12/10/24, 5 pm Elfrida Community Library

and economy. See Appendix 2 for more detailed survey results.

ENGAGEMENT TAKEAWAYS

The community survey highlights resident priorities and concerns that inform this Comprehensive Plan. Overall, respondents value quality of life but see challenges in housing, infrastructure, water, and economic opportunity.

Quality of Life: Most respondents were satisfied with the quality of life but feel it has either declined or remained stagnant compared to ten years ago.

Land Use/Rural Character Preservation:

ENGAGEMENT TAKEAWAYS

There are concerns about urban sprawl and how to preserve the rural character.

Housing Preferences:

There is high demand for affordable housing, single-family homes, and off-grid housing options. There are mixed opinions on incentivizing higher-density developments.

Transportation:

There are concerns about the condition of roads, with maintenance of paved and dirt roads ranked as top priorities. Most respondents depend on private vehicles to get around, but there is a desire for better bike paths, sidewalks, and public transit options.

Water: Strong concerns about water availability and quality, especially given the prevalence of private well reliance. There is strong interest in stricter water conservation measures and water infrastructure improvements.

Economic Development: There is interest in small business development, though barriers like startup costs and lack of commercial space are significant. A lack of commercial space is also a land use issue. There are calls for modern amenities to support new business and economic diversification.

Environment: There is notable opposition to large-scale agriculture and industrial projects perceived as harmful to water resources and

the environment. Conversely, there is strong support for smaller-scale renewable energy projects, such as residential solar power, as well as for broader conservation efforts.

Recreation and Public Lands: Respondents report frequent use of public lands and trails but request improved access, amenities, and protection from overuse or commercial exploitation.

SURVEY BIAS: Surveys are a valuable tool for gathering insights, understanding community perspectives, and informing decision-making. However, it is important to acknowledge that survey results may be influenced by self-selection, status quo preferences, or socially desirable responses that align with perceived norms rather than their true feelings.

LAND USE & GROWTH ELEMENT

2: Land Use & Growth Element

PURPOSE

The Land Use Element, required by A.R.S. § 11-804(A)(2), provides policies and guidelines for the location, type, and extent of land uses in the county. Its purpose is to ensure orderly growth, protect natural and cultural resources, and promote the community’s general welfare. The element must indicate proposed land uses

by type, density, and location; reflect county development goals and policies; integrate environmental and cultural considerations; and, where applicable, account for military installation influence areas to ensure compatible land uses.

GROWTH PROJECTIONS

Table 8: Population Growth Projections ^Y

Cochise County’s population is expected to experience modest growth, averaging an annual growth rate of approximately 0.27%. In contrast, Arizona’s overall population is projected to grow more rapidly, with an average annual growth rate of about 1.1%.

^Y Office of Economic Opportunity. Population projections. Arizona Office of Economic Opportunity website. Accessed February 13, 2025. <https://oeo.az.gov/population/projections>

LAND USE FRAMEWORK

In Cochise County, land use and growth are guided by growth areas (land use category) and future land use (land use designation). All unincorporated areas are categorized into four distinct Growth Area Categories—A, B, C, and D—based on factors such as development pattern, existing infrastructure, land use density, economic role, and growth potential. Each category reflects the current and anticipated intensity of development, helping to direct resources and planning efforts appropriately. These categories are integral to the Growth Areas Categories Map, which serves as a policy tool to steer future development and ensure it aligns with the county's goals and community values.

To further refine land use planning, the Comprehensive Plan includes seven specific Land Use Designations that detail the

intended character of land areas, such as residential, commercial, industrial, and open space. These designations are mapped across the county and must align with the zoning regulations to maintain consistency and enforceability. When property owners or developers propose changes to land use or density, they must submit an amendment request that justifies the change based on existing or future conditions, ensuring that any modifications are in harmony with the overall planning objectives.

Additionally, Master Development Plans (MDPs) provide a coordinated, site-specific framework for development. Once adopted by the Board of Supervisors, an MDP replaces the existing Growth Area Category and Land Use Designations for the subject property, allowing for a customized approach that reflects unique development needs and community priorities.

Finally, Area Plans offer localized guidance for individual communities or regions. They refine Growth Area Categories and Land Use Designations by addressing community character, infrastructure, transportation, open space, and economic development. Area Plans are advisory in nature—they help shape decisions and investments but do not override the countywide land use framework.

GROWTH AREA CATEGORIES

The growth categories in Cochise County provide a framework for understanding how different areas function and evolve. By considering factors such as development patterns, infrastructure, land use, economic role, and growth potential, these categories help planners, decision-makers, and the community anticipate needs, prioritize investments, and ensure that development occurs in ways that support community character and long-term sustainability.

CATEGORY A

Purpose: Areas adjacent to or surrounding cities with full urban services, suitable for high-density development.

Criteria:

1. Located next to or surrounded by an incorporated city; potential for annexation exists.
2. Served by community sewer, water, and fire protection.
3. Average residential lot size < 1 acre.
4. Supports regional commercial and other non-residential services.
5. Streets and development meet urban standards (e.g., paved roads, limited outdoor storage, asphalt parking).
6. Adequate drainage, transportation, schools (K-12), and recreational facilities exist or are planned.

CATEGORY B

Purpose: Transitional areas between urban and rural zones, experiencing moderate growth.

Criteria:

1. Moderate residential or non-residential development.
2. Functions as a transition between urban and rural areas or has a distinct community identity.
3. Adequate water, sewage, drainage, and road access to support medium-density development.
4. Residential lot sizes generally ≤ 1 acre, increasing toward edges; smaller lots have sewer/water access.
5. Improved arterial or collector streets can accommodate limited non-residential uses.
6. Opportunities exist to preserve open space, washes, or recreational areas.

CATEGORY C

Purpose: Small, slower-growing communities that maintain rural character while accommodating modest growth.

Criteria:

1. Development is clustered in small settlements on varied lot sizes.
2. Roads are mostly unimproved; paving may be required as growth occurs.

GROWTH AREA CATEGORIES

3. Farming and ranching are common nearby.
4. Non-residential uses serve local agricultural needs or pass-through visitors.
5. Typically supports K-8 schools.

CATEGORY D

Purpose: Outlying rural lands with low-density development and extensive open space.

Criteria:

1. Low-density residential development on

large lots.

2. Unimproved roads and minimal infrastructure.
3. Agricultural production or other rural land uses dominate.
4. Non-residential uses limited to local services, tourism, or intensive uses unsuitable for urban areas (e.g., power plants, feedlots).
5. May accommodate future master-planned communities with proper infrastructure.

LAND USE DESIGNATIONS

Building on the framework provided by the growth categories, Cochise County uses plan designations to provide more detailed guidance for smaller areas within each growth category. While Growth Categories define the general function, character, and growth potential of broad areas, Plan

Designations help guide zoning decisions, subdivision standards, and development approvals to ensure that land uses are compatible with the surrounding community and infrastructure. In practice, the Plan Designations work together with the Zoning/ Land Use Compatibility Table to translate the intended character of an area into specific zoning districts and permitted uses, providing clarity and predictability for property owners, developers, and the community. By applying these designations, planners and decision-makers can anticipate needs, prioritize investments, and manage development in ways that reinforce community character and long-term sustainability.

Cochise County recognizes the following seven Plan Designations:

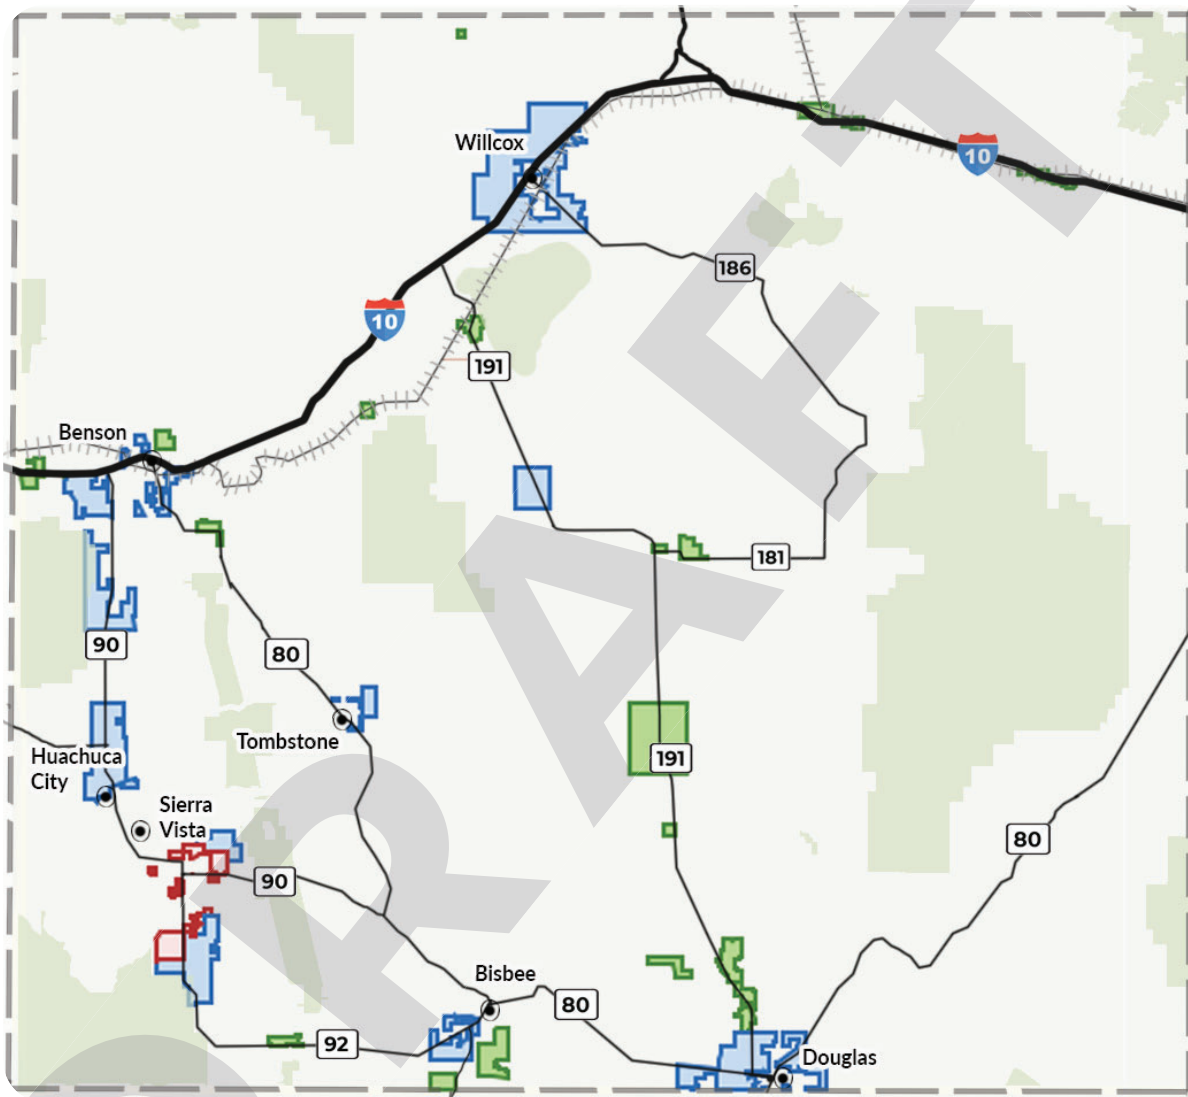

1. **DEVELOPING (DEV)** – Areas in transition

LAND USE DESIGNATIONS

with a mix of residential, business, industrial, or agricultural uses.

- Periodically reviewed for potential re-designation.
 - Found in Growth Categories A, B, or C not meeting other designation criteria.
- 2. ENTERPRISE (ENT)** – Areas with established commercial or industrial uses where future development should follow the existing pattern.
- Supported by adequate infrastructure and public access.
 - Limited residential growth is encouraged.
 - Found in Growth Categories A, B, or C.
- 3. ENTERPRISE REDEVELOPMENT (ER)** – Existing commercial or industrial areas undergoing redevelopment.
- May include deteriorated or incompatible uses.
 - Flexible site or building standards may be applied to encourage investment.
 - Found in Growth Categories A, B, or C.
- 4. NEIGHBORHOOD CONSERVATION (NC)** – Primarily residential neighborhoods protected from incompatible non-residential development.
- Typically includes developed subdivisions with completed infrastructure.
 - Found in Growth Categories A, B, or C.
- 5. NEIGHBORHOOD REHABILITATION (NR)** – Residential neighborhoods showing decline but with potential for revitalization.
- Criteria include deteriorated dwellings, inadequate infrastructure, and interest in improvements or industrial uses. Future development should continue that trend.
 - Criteria include sufficient infrastructure, public access, and limited residential growth.
 - Found in Growth Categories A, B, or C.
- 6. RURAL RESIDENTIAL (RR)**
- Applies to Category D (Rural) areas with established residential development on larger lots (generally 2 acres or more).
 - High-density rezonings or non-residential uses not directly serving residents are generally not appropriate.
 - Limited, low-intensity businesses serving residents may be allowed.
- 7. RURAL (R)**
- Includes remaining lands in Category D not designated Rural Residential.
 - Characterized by sparse population, large lots, agricultural or grazing uses, large private/public lands, or recreational resources.
 - May accommodate intensive industrial uses that cannot be placed in other growth areas.

MAP 2: GROWTH AREA CATEGORIES

- Growth Areas A
- Growth Area B
- Growth Area C
- Growth Area D (all area outside Growth Area A-C)

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

2: Land Use & Growth Element

TABLE 9: GROWTH AREA MATRIX

CRITERIA	GROWTH AREA A	GROWTH AREA B	GROWTH AREA C	GROWTH AREA D
DEVELOPMENT PATTERN	Established/planned development; potential annexation; infill and redevelopment	Transition zones; distinct identity	Small clusters of development	Large-lot rural; agriculture
INFRASTRUCTURE & SERVICES	Community water, fire district; adequate transportation, schools	Adequate utilities; arterials/collectors	Limited services; K-8 schools possible	Minimal services; private investment drives growth
LAND USE & DENSITY	Lots under 1 acre; regional commercial centers	Lots ~1 acre or less; smaller lots with water; larger lots at fringes	Mixed lot sizes; adjacent to farming/ranching	Very low density, large lots; agriculture and ranching dominant
ECONOMIC ROLE	Regional hub for employment, retail, and services	Mix of housing and neighborhood-scale businesses	Supports ag, ranching, tourism	Local ag/tourism services; intensive rural uses possible
CHARACTER & GROWTH POTENTIAL	Urban standards; steady growth	Supports growth while preserving open space and washes	Scenic, rural, gradual change	Sparsely populated; open landscapes; growth slow, preserves rural life

TABLE 10: DENSITY & CHARACTER

COMP PLAN DESIGNATION	DENSITY	INTENSITY/CHARACTER
DEVELOP. (DEV)	0.5–5.5 du/acre	Low to moderate; mix of residential and compatible non-residential uses
ENTER. (ENT)	N/A	Higher intensity non-residential; offices, industrial, employment centers
ENTER. REDEV. (ER)	0.5–4.8 du/acre	Redevelopment of urban areas; medium density residential and mixed-use
NEIGH, CONSERV. OR REHAB (NB OR NR)	0.03–5.5 du/acre	Low to moderate; preserve neighborhood character, encourage infill
RURAL (R)	0.25–0.5 du/acre	Very low density; preserve open space, agricultural uses
RURAL RES (RR)	0.03–0.5 du/acre	Low density residential; maintain rural character

MASTER DEVELOPMENT PLANS

A Master Development Plan (MDP) is a developer-initiated, Board-adopted amendment to the Comprehensive Plan that provides a detailed, long-term framework for the coordinated development of a specific property. MDPs ensure large or complex projects address land use, infrastructure, and community character in an integrated way.

PURPOSE

- Establishes a long-range, site-specific development framework consistent with the goals and policies of the Comprehensive Plan.
- Provides a basis for coordinated phasing of land use, infrastructure, transportation, and open space.
- May establish plan-specific land use designations and development standards tailored to the property.

RELATIONSHIP TO THE COMPREHENSIVE PLAN

- Upon adoption by the Board of Supervisors, an MDP becomes an amendment to the Comprehensive Plan.
- Within the boundaries of an adopted MDP, the plan designations and standards contained in the MDP supersede existing Growth Categories, Plan Designations, and policies.
- Serves as a policy foundation for subsequent zoning, subdivision, and permit decisions.

REQUIRED COMPONENTS

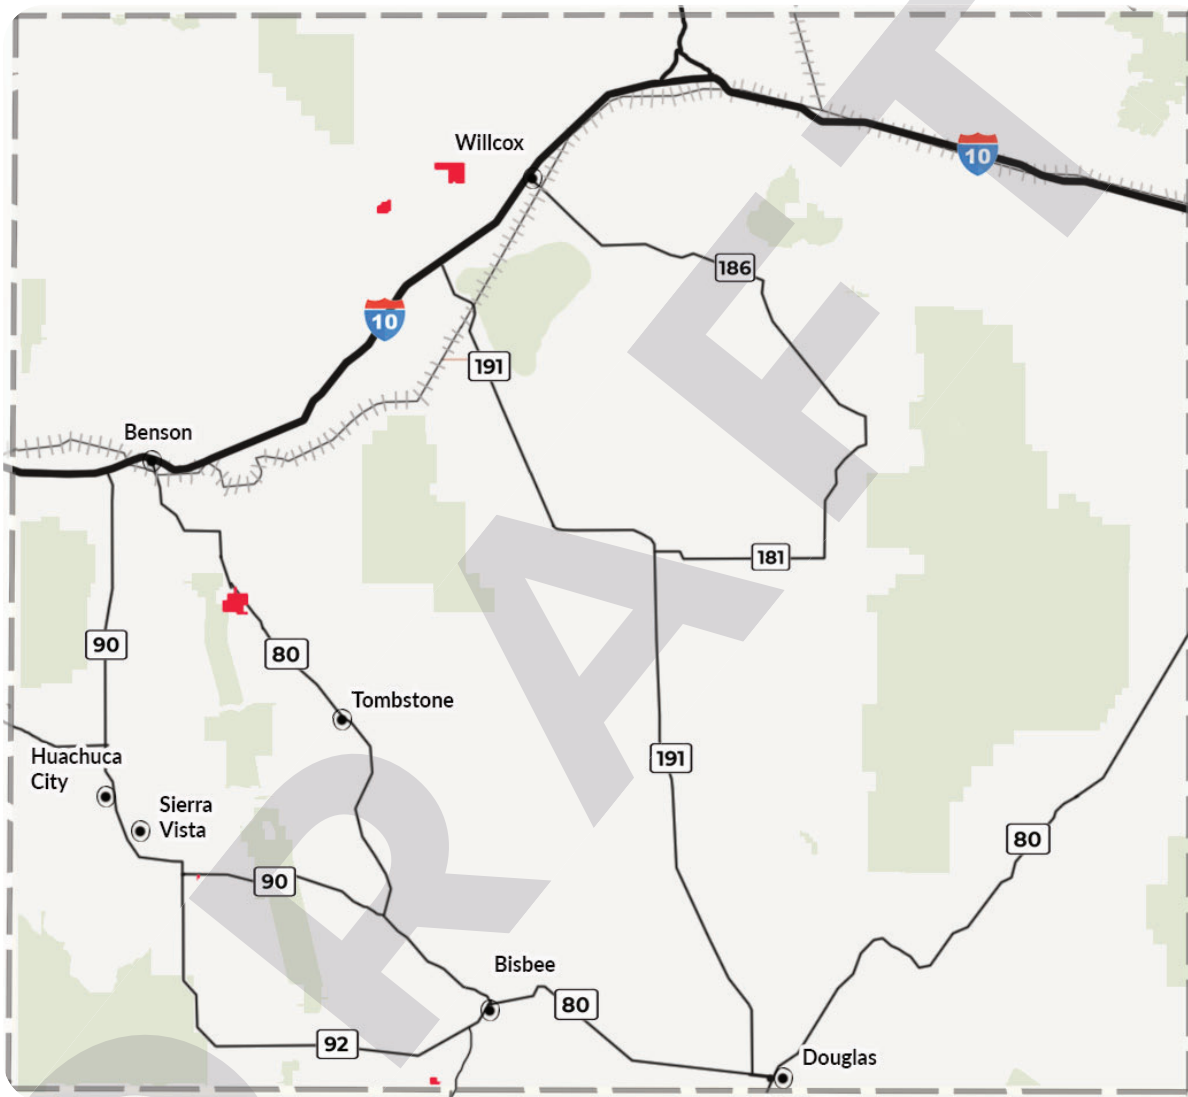

An MDP must include, at minimum:

- A narrative describing the vision, objectives, and proposed development program.
- A land use plan showing proposed designations, general development patterns, and densities/intensities.
- A phasing plan, including anticipated timing and sequencing of development.
- A framework for infrastructure, utilities, transportation, drainage, and public services.
- Identification of open space, natural resource areas, and community amenities.
- Development standards or guidelines applicable within the MDP area.
- An analysis of consistency with Comprehensive Plan goals, policies, and Growth Categories.
- Demonstration of how the MDP coordinates with adjacent land uses and infrastructure.

IMPLEMENTATION AND REVIEW

- Adoption of an MDP by the Board of Supervisors amends the Comprehensive Plan.
- All subsequent zoning, subdivision, and development approvals must conform to the adopted MDP.
- Procedures for application, review, amendment, and enforcement of MDPs are established in the Zoning Regulations.

MAP 4: MASTER DEVELOPMENT PLANS

 Master Development Plan

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

AREA PLANS

The Comprehensive Plan allows for the creation of Area Plans to capture the vision, goals, and priorities of specific communities regarding land use and development. These plans provide localized guidance and may include architectural, landscape, or design standards tailored to the community. Once approved by the Board of Supervisors, an Area Plan is formally adopted into the Comprehensive Plan under the amendment procedures in Chapter X. The following plans have been adopted by the Board of Supervisors:

- Babocomari Area Plan (Adopted 2005)
- Elfrida Community Plan (Adopted 2003)
- Mid-Sulphur Springs Valley Area Plan (Adopted 1999)
- Naco Community Plan (Adopted 1998)
- Saint David Area Plan (Adopted 2005)
- Sierra Vista Sub-Watershed Policy Plan (Adopted 2006)
- Southern San Pedro Valley Area Plan (Adopted 2001)
- Tres Alamos Community Plan (Adopted 2006)

STATUS & LIMITATIONS

All of the Area Plans listed above remain part of the Comprehensive Plan; however, none have been updated to reflect current best practices, emerging land use trends, or evolving community needs. While they provide useful historical context, the plans contain non-binding guidance rather than

enforceable policy. Their regulatory influence is limited, and they do not supersede countywide zoning, growth categories, or land use designations.

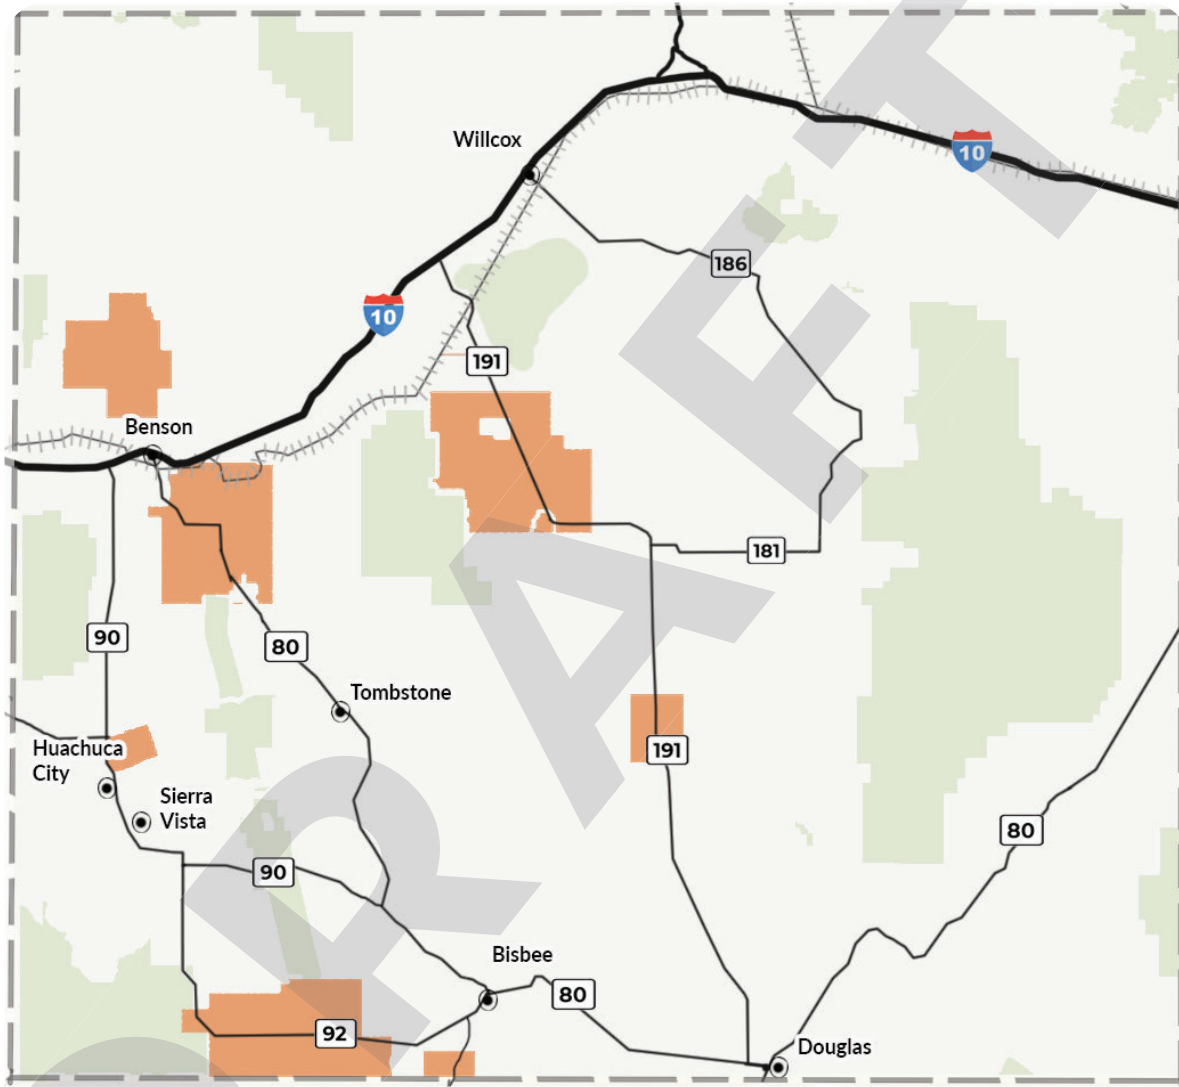

REGIONAL COMMUNITY PROFILES

To ensure fairness, consistency, and clarity, Cochise County intends to transition away from Area Plans and instead establish Regional Community Profiles. These profiles will not serve as binding policy but will provide important contextual information for planning decisions. Regional Community Profiles will:

- Summarize the historical, cultural, and community identity of each area
- Highlight key land use, infrastructure, and environmental considerations.
- Serve as reference documents for planning staff, the Board of Supervisors, and the public.
- Provide a foundation for potential future policy updates or amendments if needed.

This approach will preserve valuable community-specific information while ensuring the Comprehensive Plan remains current and user-friendly. By converting Area Plans to Regional Community Profiles, the County avoids perpetuating outdated or inequitable guidance—where only certain areas had adopted Area Plans—and instead provides equal recognition and documentation for all areas of Cochise County.

MAP 5: AREA PLANS

 Area Plan

Please see <https://experience.arcgis.com/> for the most detailed and up-to-date information.

LANDS OUTSIDE OF COUNTY JURISDICTION —

Within Cochise County’s boundaries, significant areas are owned and managed by federal, state, military, and municipal authorities. While the County has no direct zoning or land use authority over these lands, their management strongly influences regional growth, infrastructure needs, and community development. Coordination with these agencies ensures that local land use planning aligns with broader goals for conservation, transportation, economic development, and public safety. The following sections describe the primary types of non-county lands, their managing authorities, and the County’s role in collaborating on land use and service considerations.

ARIZONA STATE TRUST LANDS

Arizona state trust lands are parcels of land owned by the state of Arizona, granted by the federal government at statehood, and managed specifically to generate revenue for designated public institutions like K-12 schools, universities, and other state agencies. These lands are managed by the Arizona State Land Department, with the primary goal of maximizing revenue through leasing or selling portions of the land.

As stated on the Arizona State Land Department website, “Since ASLD’s inception, its mission has been to manage the State’s Land Trust and to generate maximum revenues, through prudent planning decisions for the Beneficiaries. All land uses must compensate the Beneficiaries, and be minimally invasive, a fact that distinguishes it from the way public land, such as parks or national forests, may be used. While public use of Trust land is not prohibited, it is regulated to ensure protection of the land and reimbursement to the beneficiaries for its use, as prescribed in the State’s Constitution and supporting case law.”

- Authority: Lands are managed by the Arizona State Land Department.

Source: Arizona State Land Department. (n.d.). History of trust land. Retrieved January 23, 2025, from <https://land.az.gov/our-agency-mission/history-trust-land>

MAP 6: LANDS OUTSIDE OF COUNTY JURISDICTION

- | | |
|---|--|
|  Arizona State Trust Lands |  US Fish & Wildlife |
|  Bureau of Land Management |  Military |
|  US Forest Service |  Incorporated |
|  National Park Service | |

.....
 Approximately 43.7% of all land in Cochise County is directly under county jurisdiction.

.....
 Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

LANDS OUTSIDE OF COUNTY JURISDICTION

- Use: Revenue generation for public institutions.
- Jurisdiction: The county has limited jurisdiction over land use and zoning on state trust lands. However, development proposals for state trust lands typically require coordination with the county for infrastructure, zoning compliance, and adherence to local planning ordinances.

BUREAU OF LAND MANAGEMENT LANDS (Example: San Pedro National Conservation Area)

- Authority: Lands are managed by the federal Bureau of Land Management.
- Use: Grazing, recreation, conservation.
- Jurisdiction: Cochise County has no direct authority over land management but may collaborate with the BLM for issues like road access, emergency services, or land use planning. The county can provide input during public comment periods for BLM management plans.

U.S. FOREST SERVICE LANDS (Example: Coronado National Forest)

- Authority: Lands are managed by the U.S. Forest Service under the Department of Agriculture.
- Use: Conservation, recreation, and sustainable resource use.
- Jurisdiction: Cochise County has no direct authority over land management but may collaborate with the BLM for issues like road access, emergency services, or land use planning. The county can provide input during public comment periods for

Photo credit: San Bernardino National Wildlife Refuge landscape, Steve Hil/USFWS, Public Domain, <https://www.fws.gov/media/san-bernardino-national-wildlife-refuge-landscape>

LANDS OUTSIDE OF COUNTY JURISDICTION —

BLM management plans.

NATIONAL PARK SERVICE LANDS (Example: Chiricahua National Monument)

- Authority: Administered by the National Park Service
- Use: Preservation of land for its cultural, historical, and natural significance.
- Jurisdiction: Cochise County has no direct authority but can participate in discussions about land use, environmental impacts, and public safety services. Local infrastructure or roads leading to forest areas may fall under county jurisdiction.

U.S. FISH AND WILDLIFE SERVICE LANDS (Example: San Bernardino National Wildlife Refuge)

- Authority: Managed by the U.S. Fish and Wildlife Service
- Use: Habitat preservation and species conservation.
- Jurisdiction: The county has no regulatory authority but may collaborate on public access, local development impacts, and emergency services in nearby areas.

MILITARY (Example: Fort Huachuca)

- Authority: Military lands are under the exclusive jurisdiction of the Department of Defense and the U.S. Army.
- Use: Both Fort Huachuca and the Willcox

Range are military property. The fort is a U.S. Army installation with a primary focus on military intelligence, cybersecurity, and electronic testing. The Willcox Range is a former Air Force Range that is now used by Fort Huachuca as an electronics proving ground.

- Jurisdiction: The county has no regulatory authority but may collaborate on public access, local development impacts, and emergency services in nearby areas.
- Other: Fort Huachuca has three overlays that influence land use outside of military property. This includes the Buffalo Soldier Electronic Testing Range, the Hubbard Encroachment Area, and the Fort Huachuca High Noise or Accident Potential Zone (HN/APZ). See “Fort Huachuca Overlays Section” for additional information.

INCORPORATED (Example: Bisbee)

- Authority: Incorporated cities and towns within Cochise County (e.g., Sierra Vista, Douglas, Willcox) have their own governance and jurisdiction over local matters such as zoning, public safety, and utilities.
- Jurisdiction: Cochise County does not exercise authority within city or town limits except for countywide services, such as elections or health services, which extend across all jurisdictions.

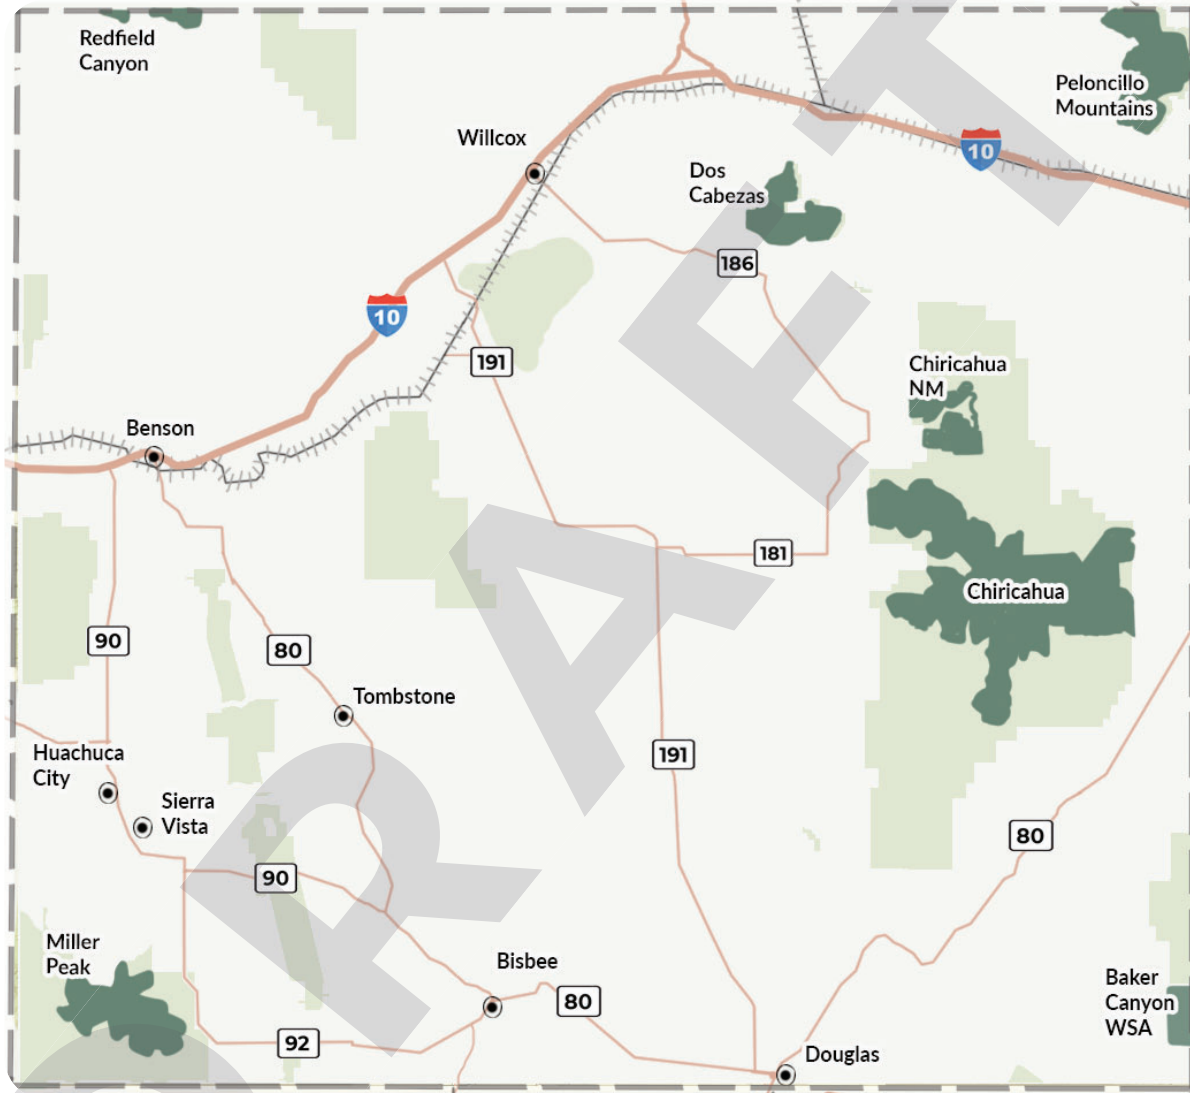

LANDS OUTSIDE OF COUNTY JURISDICTION —

WILDERNESS AREAS

Wilderness Areas are part of the National Wilderness Preservation System, which includes over 109 million acres nationwide. Arizona has more than 90 designated Wilderness Areas covering approximately 4.5 million acres, with roughly 155,600 acres located within Cochise County.

- Authority: Wilderness Areas are federally designated lands protected under the 1964 Wilderness Act. They are managed by federal agencies, including the Bureau of Land Management (BLM), U.S. Forest Service, and National Park Service.
- Use: These lands are intended to remain in their natural condition, providing habitat for wildlife, protecting watersheds, and offering opportunities for primitive recreation such as hiking, horseback riding, and camping. Motorized and mechanized vehicles, including mountain bikes, are prohibited
- Jurisdiction: Cochise County has no regulatory authority over Wilderness Areas. However, the county may consider their presence in adjacent land use planning, environmental conservation efforts, and recreational access strategies.

MAP 7: WILDERNESS AREAS

FORT HUACHUCA OVERLAYS

In addition to lands under direct military jurisdiction, several overlay areas extend into Cochise County that restrict or guide development near Fort Huachuca. These overlays are designed to protect military operations while also reducing potential conflicts with surrounding communities. Development within these areas requires careful coordination with the Department of Defense to ensure land uses remain compatible with military testing, training, and flight safety.

BUFFALO SOLDIER ELECTRONIC TESTING RANGE

- **Development Restrictions:** New development and modification to existing development must avoid interference with the fort's electronic testing operations. This may restrict activities like high-power transmission lines, communication towers, or industrial facilities generating electromagnetic emissions within the designated testing range, which is 2,500-square miles and encompasses a large portion of western Cochise County, as well as portions of Santa Cruz, and Pima Counties. Certain types of infrastructure or technology-heavy developments, may face additional scrutiny and/or restrictions.
- **Compatibility and Coordination:** Permits for new development are transmitted to Fort Huachuca's encroachment board to ensure that the proposed development align with Department of Defense (DoD) compatibility guidelines to ensure no disruption to military operations.

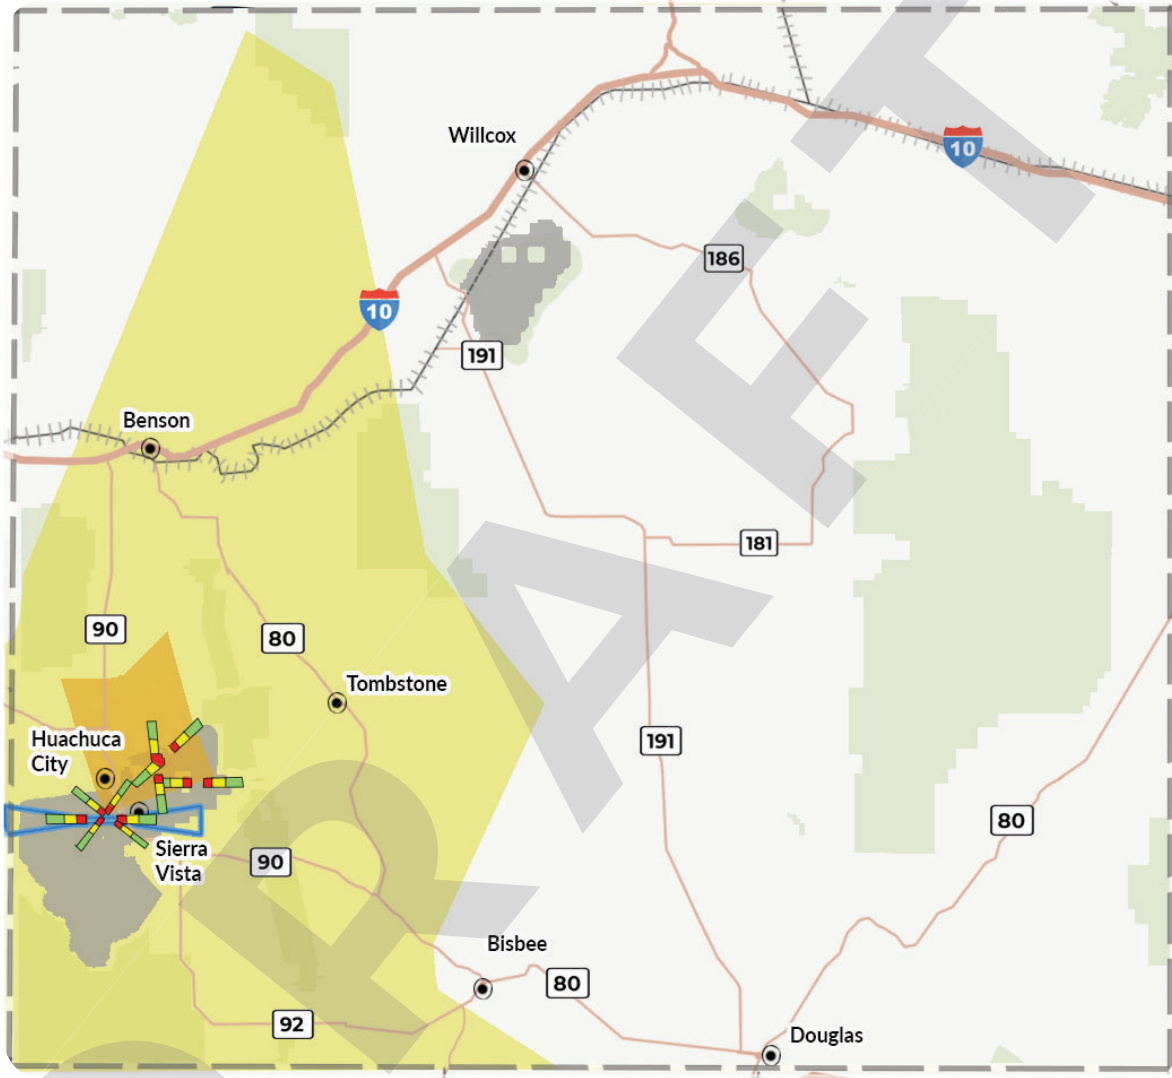

HUBBARD ENCROACHMENT AREA

- **Development Restrictions:** Property in this area is subject to additional restriction intended to prevent urban development that could conflict with Fort Huachuca's training and operational needs. High-density residential, commercial, or industrial developments are generally discouraged, while agriculture, conservation, or low-impact recreation uses are encouraged.
- **Compatibility and Coordination:** Development proposals may require transmittal to Fort Huachuca's encroachment board to ensure compatibility and proactively address potential conflicts.

HIGH NOISE AND ACCIDENT POTENTIAL ZONE

- **Development Restrictions:** Properties in these zones are subject to noise from military aircraft and operations. Development may require soundproofing measures or limitations on noise-sensitive uses like schools, hospitals, and residential. Areas within accident potential zones (APZs) are subject to restrictions based on DoD guidelines, which discourage or prohibit high-density uses (e.g., apartments, schools, large commercial centers) to reduce risks to life and property. discouraged, while agriculture, conservation, or low-impact recreation uses are encouraged. The military typically defines three (3) safety zones that extend from each end of every runway: the clear

encroachment board to ensure compatibility and proactively address potential conflicts.

OTHER EXEMPTIONS

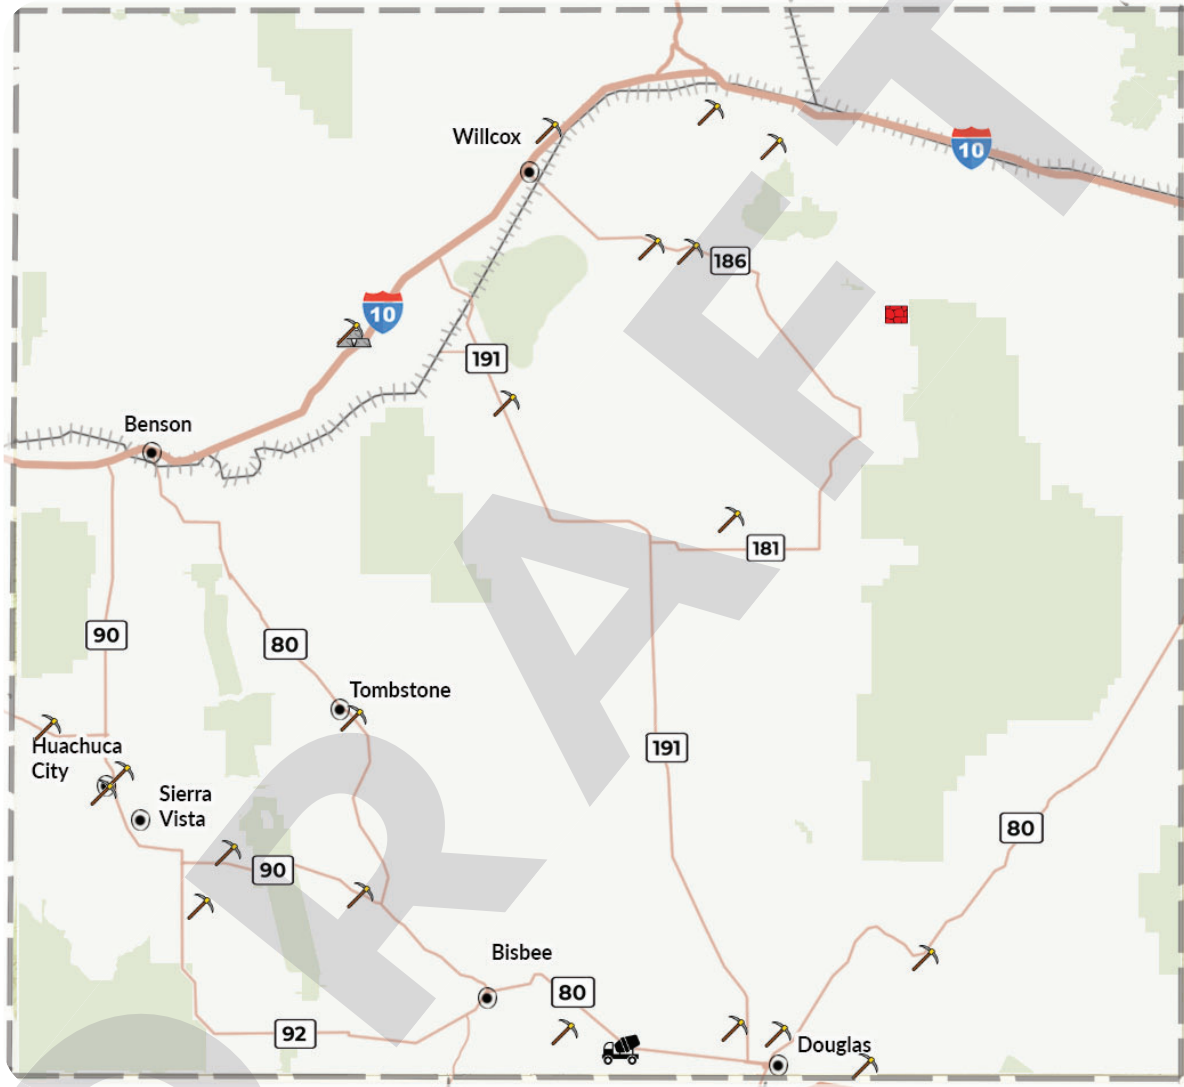

In Arizona, certain land uses, like agriculture and mining, are largely exempt from county authority and zoning regulations due to state law. Specifically, the county may not "Prevent, restrict or otherwise regulate the use or occupation of land or improvements for railroad, mining, metallurgical, grazing or general agricultural purposes, if the tract concerned is five or more contiguous commercial acres" (ARS 11-812.A.2.).

IMPLICATIONS:

- Mining, agricultural, and grazing activities can have significant impacts on natural resources, water usage, and infrastructure.
- Cochise County has little authority over the location or impact of exempt operations within its boundaries.
- Land use planning must account for the potential establishment or expansion of exempt activities without the ability to enforce zoning restrictions.
- While regulation is restricted, the county can work with landowners and operators to promote sustainable practices, minimize environmental impacts, and proactively address potential conflicts with surrounding uses. Collaboration through voluntary agreements or incentives can encourage responsible development.

MAP 9: MINES & SOURCES OF AGGREGATE

-  Aggregates and Crushed Stones (2022)
-  Cement and Lime (2022)
-  Building Stone (2022)
-  Metals (2022)

Please see <https://cochise.maps.arcgis.com/> or the Arizona Geological Survey website (link below) for the most detailed and up-to-date information.

Source: Arizona Geological Survey. (n.d.). Arizona active mines map. Retrieved January 23, 2025, from <https://uagis.maps.arcgis.com/apps/webappviewer/index.html?id=9eceb192cd86497e8eed04113302db8b>

MINES IN COCHISE COUNTY

Arizona leads the United States in copper production, contributing nearly 70% of the nation's output. Cochise County has a rich history in mining, particularly in copper extraction. The mining industry continues to play a significant role in the county's economy, with ongoing operations and potential future developments. This is largely because the county's geological formations are rich in mineral resources, making it a favorable location for mining activities. The Arizona Geological Survey provides detailed maps and information on mining operations, which accessible through their website. Map X illustrates all active mines in Cochise County as of 2022.

FLOODPLAINS

A Flood Insurance Rate Map (FIRM) is an official map created by the Federal Emergency Management Agency (FEMA) that outlines flood hazard areas within a community. These maps are essential tools for understanding flood risks and are used for insurance, development planning, and floodplain management. FEMA floodplain designations significantly impact land use planning,

property development, and infrastructure investments. While these regulations help reduce flood damage risks, they also increase development costs and can restrict certain types of development.

It is also important to note flood hazards can change over time. Updated flood maps provide a more accurate picture of a property's flood risk. How water flows and

Source: Excelsior Mining Corp. (2014). Excelsior reaffirms positive economic impact of Gunnison project. Gunnison Copper. Retrieved January 24, 2025, from <https://www.gunnisoncopper.com/news/news-2014/excelsior-reaffirms-positive-economic-impact-of-gunnison-project>

Source: MAX Power Mining Corp. (n.d.). MAX Power makes high-grade lithium discovery at Arizona's Willcox Playa. Retrieved January 24, 2025, from <https://www.maxpowermining.com/max-power-makes-high-grade-lithium-discovery-at-arizonas-willcox-playa/>

FLOODPLAINS

drains can change due to new construction and community development or natural forces such as changing weather patterns or terrain changes. Also, communities may build levees and dams, decreasing flood risk over time. Though the National Flood Insurance Reform Act of 1994 requires that FEMA assess the need to revise and update all flood maps every five years.

BUILDING RESTRICTIONS AND PERMIT REQUIREMENTS

- Elevation Requirements: New construction within Special Flood Hazard Areas (SFHAs) must be elevated above the Base Flood Elevation (BFE) to minimize flood risk.
- Floodplain Use Permits: Property owners in designated flood zones must obtain permits from the county, ensuring compliance with FEMA and local floodplain

management regulations.

- Limitations on Certain Structures: Some types of development (e.g., mobile homes, critical infrastructure) may be restricted or require additional floodproofing measures to withstand potential flooding.

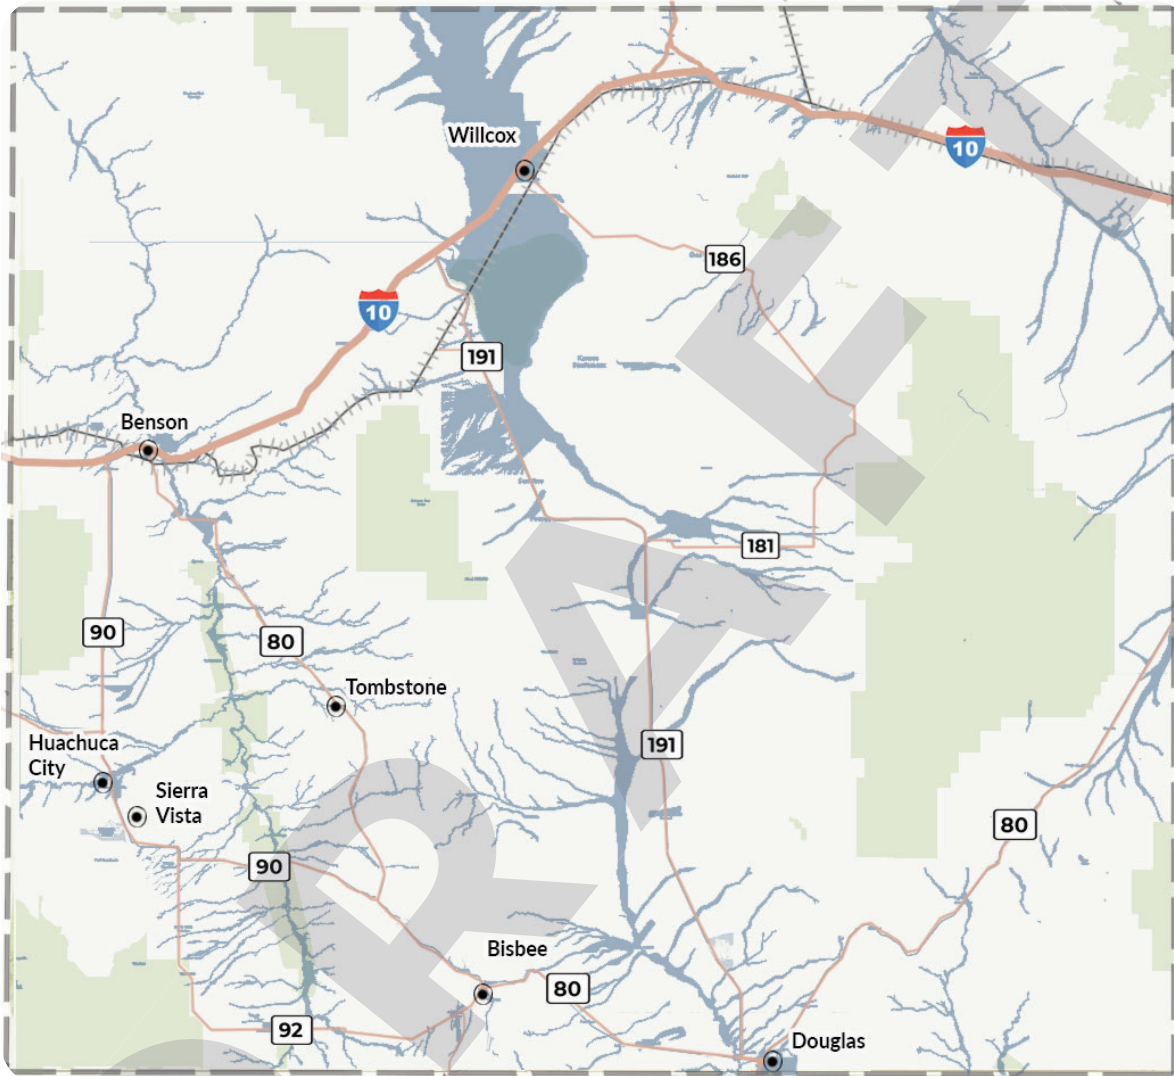

PROPERTY VALUE IMPACTS

- Properties in flood-prone areas often have lower values due to the potential increased risk and insurance costs.
- Developers may face higher construction costs due to flood mitigation requirements, such as elevated foundations, drainage improvements, and flood-resistant materials.

FLOOD INSURANCE MANDATE

- National Flood Insurance Program (NFIP) Compliance: If a property is within a FEMA flood zone and has a federally backed mortgage, flood insurance is mandatory
- Higher Insurance Premiums: Homes and businesses in high-risk flood zones (e.g., 100-year floodplains) face significantly higher flood insurance premiums, making homeownership and development more expensive.

MAP 10: FLOODPLAINS

 Special Flood Hazard Area*

*Map X "FEMA Floodplains in Cochise County" illustrates FEMA maps effective as of February 2025. *FEMA is currently evaluating revisions within unincorporated Cochise County. Once finalized, the new floodplain maps will become effective in the fall of 2025.

Please see <https://cochise.maps.arcgis.com/> or the Arizona Geological Survey website (link below) for the most detailed and up-to-date information.

FLOODPLAINS

LAND USE PLANNING CONSIDERATIONS

- The county may limit or prohibit high-density development in floodplains to reduce overall flood damage risks.
- Flood-prone areas may be considered for as area for parks or agricultural use rather than areas for residential or commercial development.

EMERGENCY PREPAREDNESS & INFRASTRUCTURE CONSIDERATIONS

- Flood Control Projects: The county may need to invest in levees, drainage systems, and flood control projects to protect existing developments.
- The County should ensure that areas within flood-prone areas have emergency response plans for potential flood events.

PM10 NON-ATTAINMENT

PM10 refers to particulate matter with a diameter of 10 micrometers or less. These inhalable particles can penetrate the respiratory system, reaching the lungs and potentially causing health issues.

Sources of PM10 include vehicle emissions, unpaved roads, industrial activities, construction sites, agricultural operations, and natural events like wildfires and dust storms. In 2013, EPA determined that the Douglas Nonattainment Area had met the 1987 PM10 federal limit established by the federal National Ambient Air Quality Standards (NAAQS) and issued a clean data determination (CDD). This suspended the need for Clean Air Act requirements related to developing a nonattainment State Implementation Plan (SIP) for as long as the Douglas area continued to meet the PM10 standard. The CDD did not, however, remove the nonattainment status for

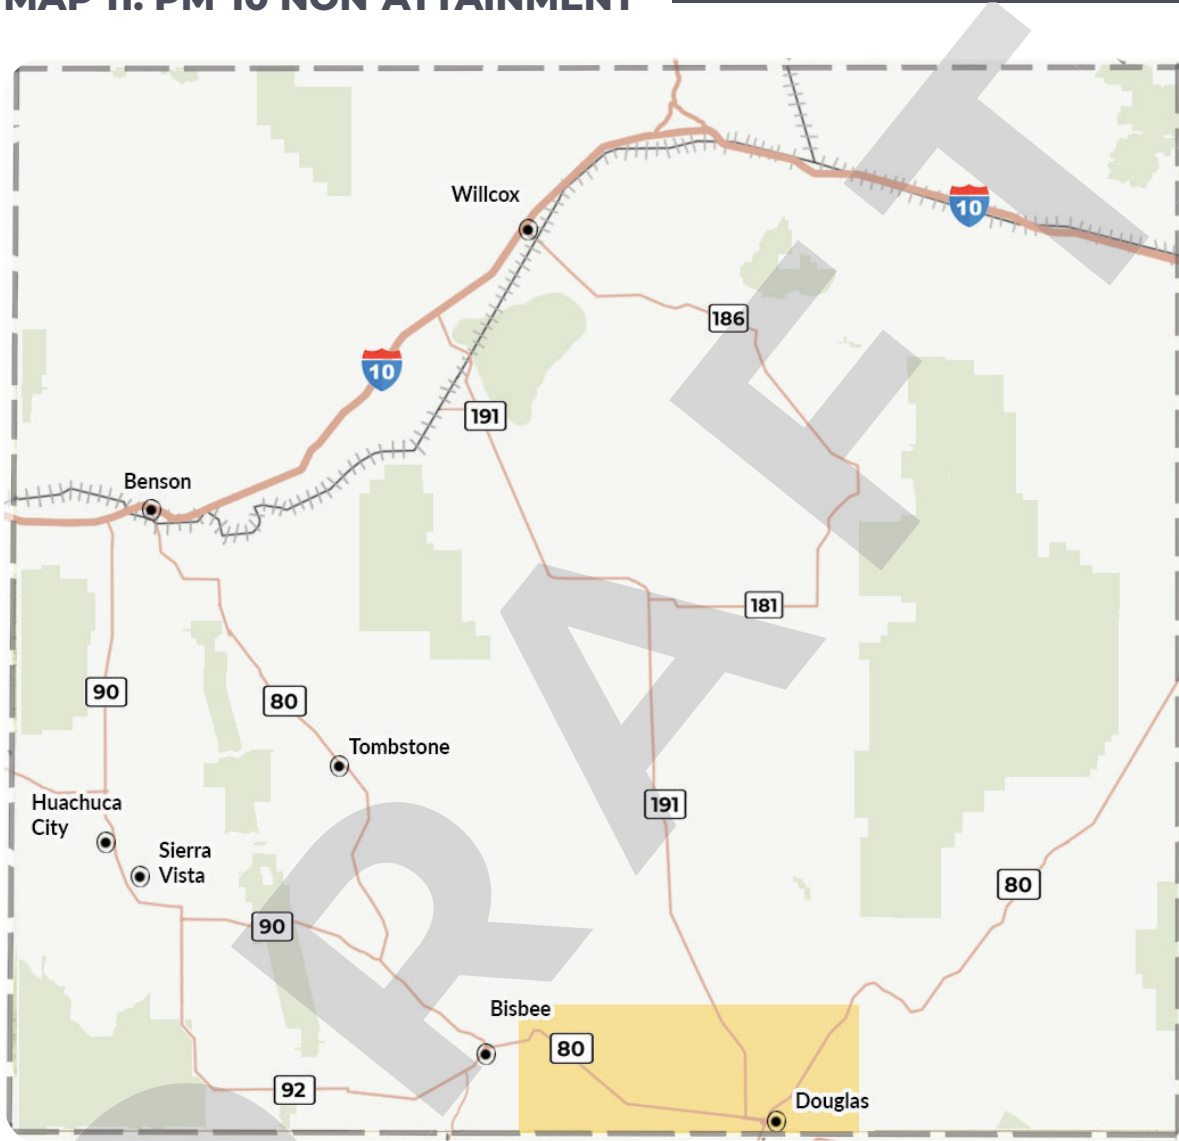

the Douglas PM10 Nonattainment Area.

This means that new development projects within the Douglas Nonattainment Area may be subject to additional permitting requirements to ensure they do not worsen air quality. Specifically, projects may need to undergo a quantitative hot-spot analysis to assess their impact on PM10 levels. This includes transit projects that would notably increase diesel vehicle traffic in the area.

Additionally, the Arizona Department of Environmental Quality (ADEQ) is responsible for developing a nonattainment State Implementation Plan (SIP) to improve air quality in the area. This plan includes an updated emissions inventory, a modeled attainment demonstration, a strategy for possible exceptional events demonstrations, and rules for PM10 controls.

LAND USE & GROWTH GOALS & POLICIES

GOAL 1: Smart Growth, Right Places

- Policy 1: Prioritize infrastructure improvements in growth areas A–C to support economic development while preserving the rural character of surrounding areas.
- Policy 2: Continue pursuing U.S. Environmental Protection Agency brownfield assessment grants to transform underutilized properties into productive assets and maximize the use of existing land and infrastructure.
- Policy 3: Improve infrastructure—such as roads, parking, broadband, and signage—in tourism areas to enhance visitor access and experiences.

GOAL 2: Investing in People, Powering Industry

- Policy 1: Strengthen workforce development by partnering with Cochise College, local high schools, and workforce agencies to expand vocational training, apprenticeships, dual-credit opportunities, and programs aligned with emerging industries such as renewable energy, technology, and health services.
- Policy 2: Strengthen the regional economy by collaborating with neighboring counties, SEAGO, and cross-border partners in Sonora to expand trade, logistics, and supply-chain opportunities.
- Policy 3: Target key industry sectors—including defense, aerospace, agriculture,

viticulture, and healthcare—through land use planning, infrastructure investments, and marketing initiatives.

GOAL 3: Showcase Cochise

- Policy 1: Create guidelines for adaptive reuse of historic properties geared toward tourism businesses like boutique hotels, museums, or the like.
- Policy 2: Support development of visitor-serving infrastructure such as wayfinding signage, trail systems, and cultural/heritage centers.
- Policy 3: Encourage and support local events, festivals, and cultural celebrations that highlight Cochise County’s unique history, arts, food traditions, agricultural heritage, and natural assets.
- Policy 4: Encourage dark sky tourism by pursuing Dark Sky Community and Dark Sky Park designations where feasible.

GOAL 4: Healthy Land, Healthy Life

- Policy 1: Encourage the donation of scenic easements by raising public awareness of their environmental and tax benefits.
- Policy 2: Encourage farmers to voluntarily adopt practices that enhance biodiversity, such as creating wildlife corridors, rotational grazing, and using integrated pest management through outreach and educational campaigns.

LAND USE & GROWTH GOALS & POLICIES

GOAL 5: Power from the Sun

- Policy 1: Ensure new development maximizes access to solar energy to support renewable, affordable, and resilient energy options for all residents.
- Policy 2: Lead by example by installing solar panels or solar-ready infrastructure on county facilities, schools, and other public buildings to reduce long-term operating costs and demonstrate the benefits of solar to the community.
- Policy 3: Consider adopting Appendix U of the International Residential Code (IRC), which establishes solar-ready construction standards for new one- and two-family dwellings and townhouses, including roof orientation, structural requirements, and plan documentation.

GOAL 6: Rocks, Resources, Resilience

- Policy 1: Maintain a comprehensive GIS inventory of aggregate resources, including existing mines and areas identified by the Arizona Geological Survey as having high geologic suitability.
- Policy 2: Evaluate the creation of “Aggregate Development Overlay Areas” in locations with high resource potential. Require development within these overlays to provide adequate

buffers to minimize land use conflicts.

- Policy 3: Consider adding mining and mineral processing to the activities allowed under industrial zoning designations by right.

GOAL 7: High-Flying Safety, Grounded Planning

- Policy 1: Promote land use compatibility within high-noise and accident-potential zones by minimizing residential encroachment and prioritizing safe, resilient development patterns.
- Policy 2: Maintain low-density residential as the primary compatible use within these zones. Rezoning or special use requests for higher-density residential or general business should generally not be supported.

LAND USE & GROWTH GOALS & POLICIES

- Policy 3: Industrial zoning and/or agricultural use are considered more compatible with military operations due to their higher resiliency to noise and safety risks. Encourage industrial and agricultural uses in these areas, as they are more resilient to noise and operational risks. Rezoning or special use requests to industrial should generally be supported within high-noise or accident-potential zones.

GOAL 8: Every Community Counts: Equitable, Informed Planning

- Policy 1: Transition from outdated Area Plans to Regional Community Profiles that capture each community's historical, cultural, and environmental identity without creating conflicting or inequitable policy.
- Policy 2: Ensure all regions of Cochise County are represented through profiles, providing consistent recognition and documentation across the entire county.
- Policy 3: Use Regional Community Profiles as reference tools for staff, the Board of Supervisors, and the public, supporting planning decisions while maintaining the Comprehensive Plan as the county's single source of binding policy.

- Policy 4: Regularly update profiles, consistent with updates to the Comprehensive Plan to reflect emerging conditions, ensuring they remain relevant, accessible, and reflective of community values.

GOAL 9: Working Landscapes, Balanced Futures

- Policy 1: Protect agricultural and ranch lands as working landscapes that contribute to the county's economy, culture, and open space character.
- Policy 2: Direct new development away from areas at high risk of flooding, wildfire, or other natural hazards to promote long-term resilience.
- Policy 3: Coordinate land use decisions with incorporated cities, towns, military installations, and federal/state land managers to promote consistency, efficiency, and regional cooperation.

CIRCULATION ELEMENT

PURPOSE

The purpose of the Circulation Element is to plan and guide the development and improvement of Cochise County’s transportation network in a way that accommodates growth, enhances mobility, ensures public safety, and supports the county’s broader goals for land use, economic development, and sustainability. It aims to create a functional, efficient, and interconnected system that serves both residents and visitors.

This element inventories all major transportation modes in Cochise County—including freeways and interstates, arterial and collector streets, railroads, public

transit, airports, and pedestrian and bicycle routes—and identifies policies to ensure a safe, resilient, and well-connected system through 2045.

ROADWAYS

Cochise County’s roadway network is organized into a hierarchy based on function, ownership, and maintenance responsibility. Understanding this hierarchy is essential for planning improvements, allocating funding, and coordinating with multiple agencies.

1. Federal Highways

- Major interstate highways, such as Interstate-10 (I-10), are part of the federal highway system and are managed by the Federal Highway Administration (FHWA).

- Maintenance, repair, and upgrades are carried out by the Arizona Department of Transportation (ADOT) under federal guidelines.
- Federal highways serve as major regional connectors, supporting long-distance travel and freight movement.

2. State Highways

- State and U.S. routes, such as State Route 80, are maintained by ADOT.
- Responsibilities include major repairs,

ROADWAYS

reconstruction, and significant upgrades.

- State highways provide intercity connectivity and often form key corridors for economic activity and tourism.

3. Local Municipal Roads

- Roads within cities and towns are maintained by their respective municipalities.
- Maintenance includes routine repairs, street cleaning, minor improvements, and traffic management.
- Municipal roads provide local connectivity, linking neighborhoods, schools, commercial centers, and public facilities.

4. County Roads: Cochise County maintains a network of public roads outside incorporated areas. These can be divided into two categories:

- **County-maintained roads:** The county performs routine maintenance, including pothole repairs, street cleaning, and minor improvements.
- **Public roads not accepted into the county system:** These roads are legally public but receive no routine county maintenance unless formally accepted. No entity is formally responsible for

maintenance. Roads in this category may remain unimproved until:

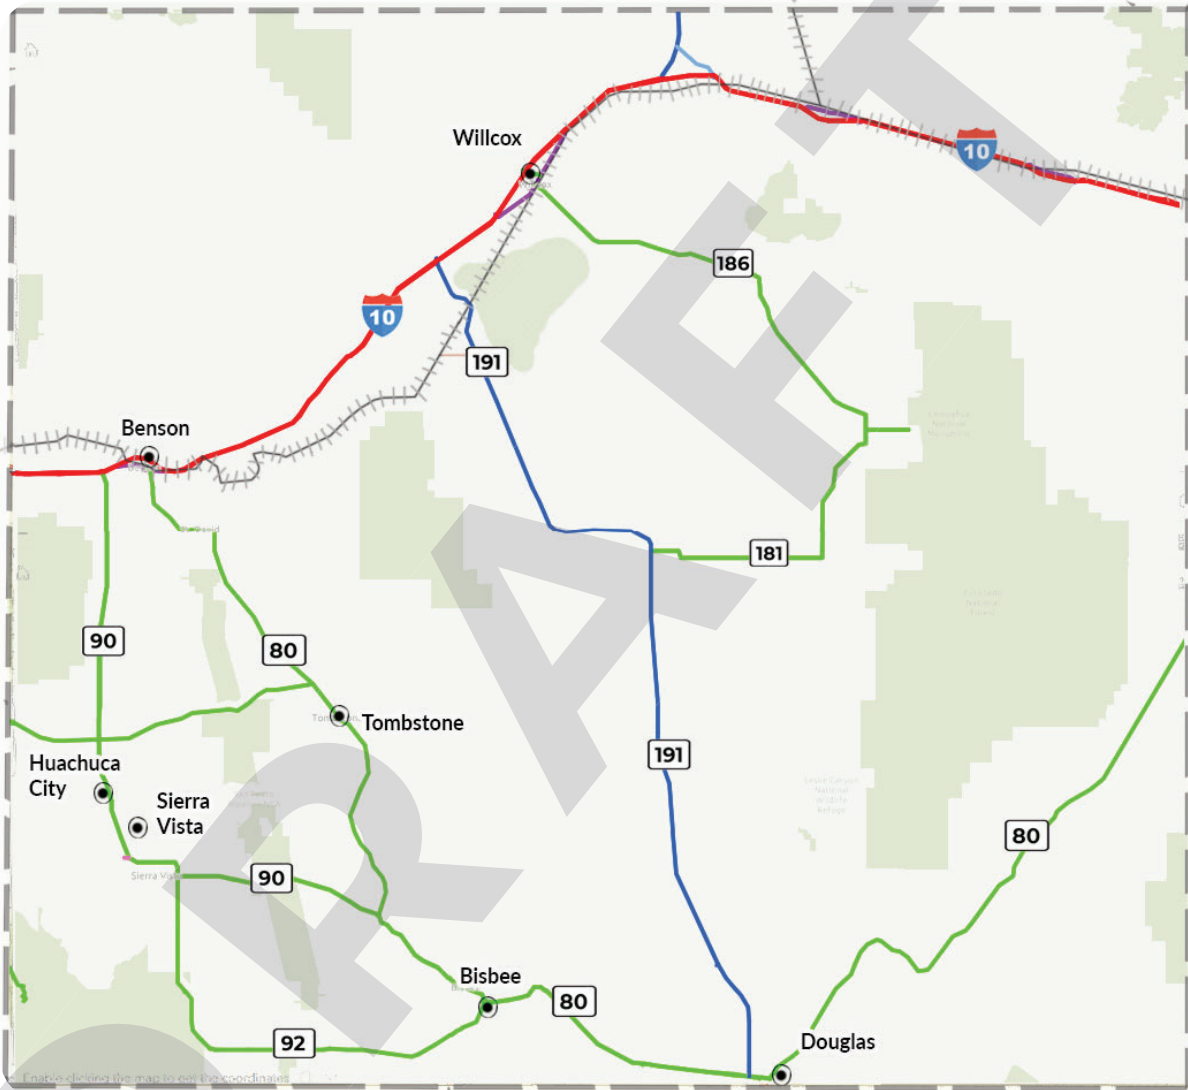

- » They are formally accepted into the county maintenance system by the Board of Supervisors, or
- » A Road Improvement District (RID) or Road Improvement and Maintenance District (RIMD) is established to assume responsibility.

5. Private Roads and Access Easements

- Privately owned roads are maintained by the property owner or a private entity, such as a homeowner's association.
- These roads primarily serve internal access needs and are not eligible for county maintenance unless formally incorporated into a public system.

MAP 14: ROAD CLASSIFICATIONS

- Interstate
- Principal Arterial
- Minor Arterial
- Major Collector
- Minor Collector

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

RAILROADS

Railroads have played a central role in Cochise County's settlement, commerce, and regional connectivity. The Gadsden Purchase of 1853 provided a southern route for a transcontinental railroad, supporting the growth of communities such as Benson, Bisbee, Douglas, and Tombstone. While most corridors are inactive, preserving them through railbanking or adaptive reuse offers long-term mobility and economic options.

SAN PEDRO & SOUTHWESTERN RAILROAD (SPSR)

The SPSR operated a line from Benson to Paul Spur (~67 miles) and the Bisbee Branch (~5.6 miles).

- » In 2006, the Surface Transportation Board authorized abandonment of approximately 76.2 miles of the SPSR line due to limited freight demand.
- » Following abandonment, tracks and infrastructure were removed, and the right-of-way largely returned to private ownership, though some portions remain under public or conservation ownership.

MEXICO-SONORA RAILROAD

Cochise County historically connected to cross-border rail operations, notably the Mexico-Sonora Railroad, linking U.S. rail networks with Sonora, Mexico. While most of

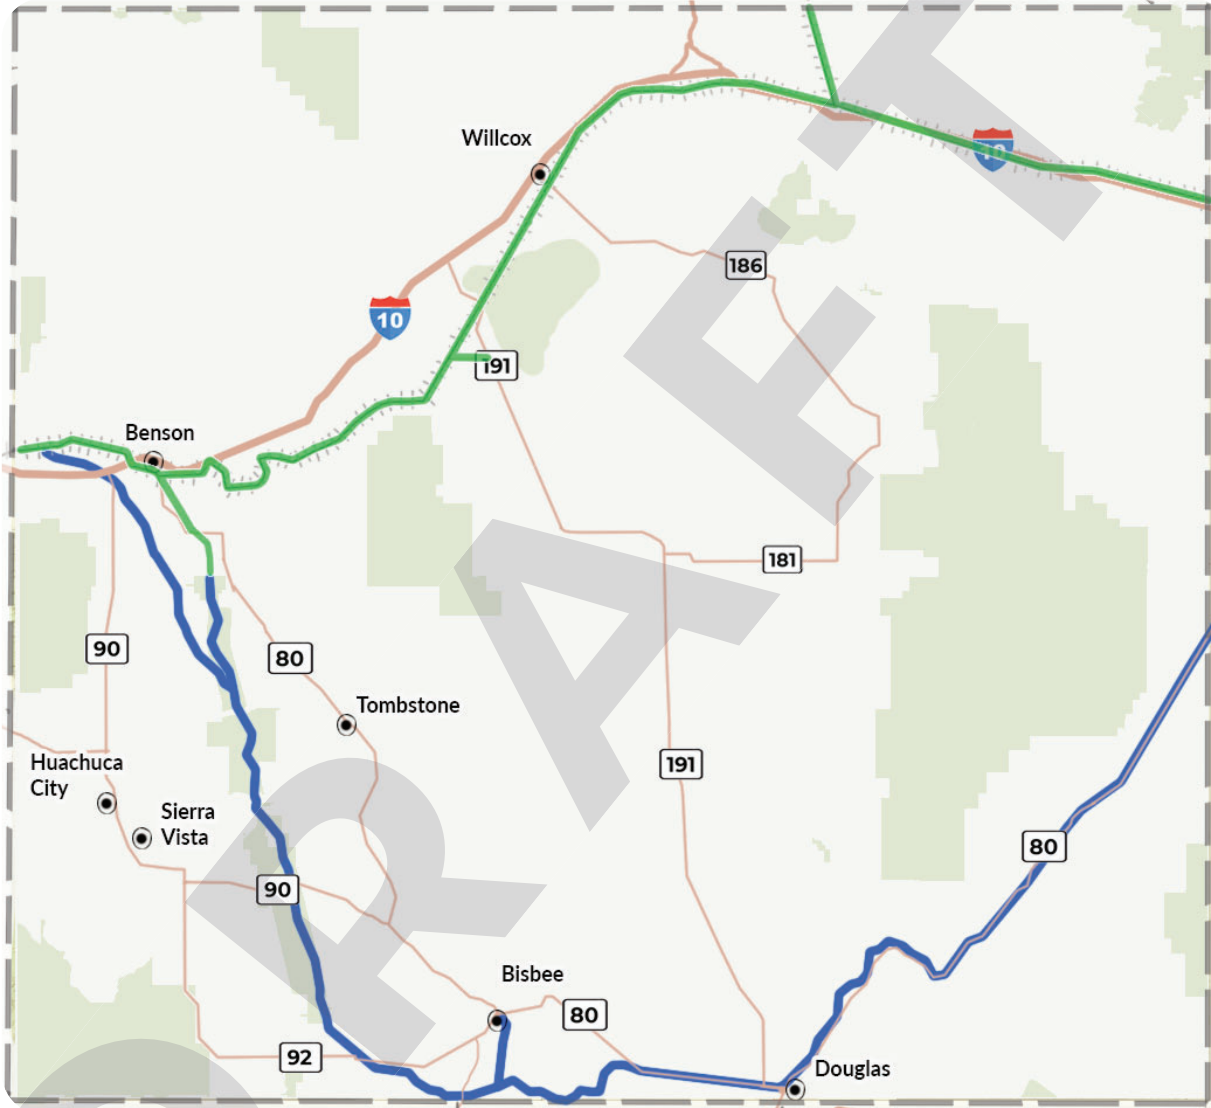

these connections are inactive, they remain part of the county's heritage and present tourism potential.

PASSENGER RAIL AND FUTURE OPPORTUNITIES

Currently, Cochise County has no active passenger rail service. Historical lines, such as the San Pedro Valley Railroad and other regional connectors, primarily supported freight operations. Regional studies, including the Phoenix-Tucson Passenger Rail Corridor, highlight growing interest in passenger rail in southern Arizona, though no immediate expansions into Cochise County are planned. The County will continue to monitor state and regional studies to remain prepared should future opportunities for passenger service emerge.

PUBLIC TRANSIT

Public transit in Cochise County is concentrated in urban areas, with a mix of fixed-route and demand-response services. Cities including Sierra Vista, Douglas, Benson, and Bisbee operate fixed-route systems, while Willcox and Huachuca City provide demand-response services.

COUNTYWIDE TRANSIT SERVICES

- **Cochise Connection:** Regional bus linking Bisbee, Douglas, and Sierra Vista, connecting medical centers, shopping, downtown districts, and Cochise College. Buses have bike racks and Wi-Fi; seniors and riders with disabilities ride free.
- **Vista Transit (Sierra Vista):** Fixed-route and paratransit service covering employment centers, Fort Huachuca, shopping, and medical facilities.
- **Douglas Rides (Douglas):** Fixed-route and paratransit service connecting neighborhoods, downtown, schools, shopping, and the U.S.-Mexico Port of Entry.
- **Benson Area Transit (Benson):** Fixed-route and demand-response service, with regional connections for trips outside the city.
- **Bisbee Bus (Bisbee):** Small fixed-route service linking neighborhoods, downtown, schools, and healthcare; demand-response available.
- **Willcox and Huachuca City:** Reservation-based demand-response services connecting residents to shopping, healthcare, and employment.

REGIONAL COORDINATION AND PLANNING

SEAGO supports transit planning, funding coordination, and compliance with federal regulations. County systems are funded through a mix of federal and state grants, municipal budgets, and fares.

AIRPORTS

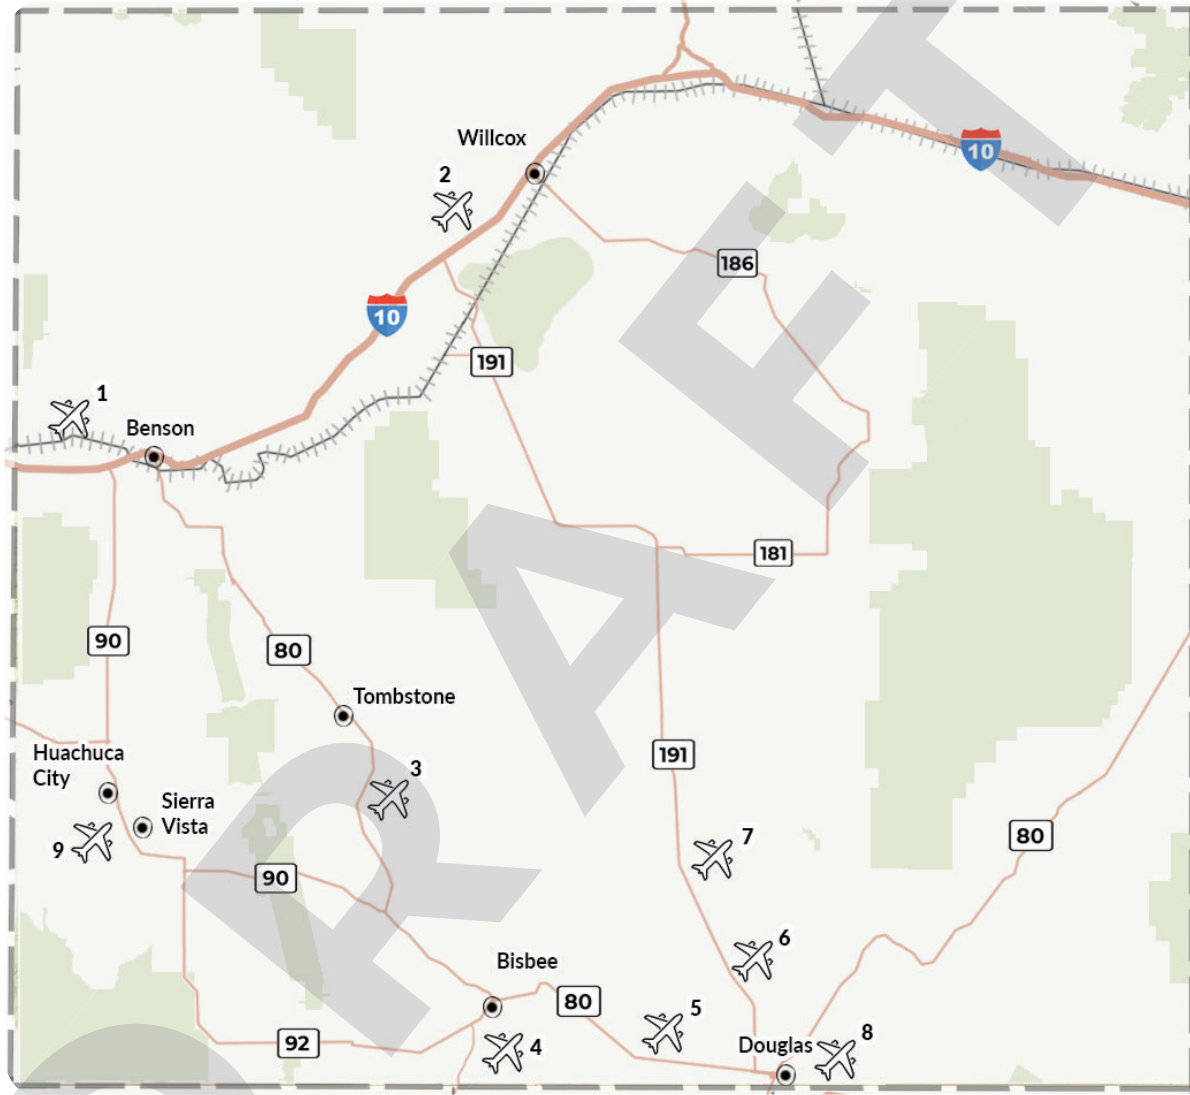

There are nine airports in Cochise County that serve various aviation needs, from general aviation to military operations. Below is a brief overview of these facilities:

1. Benson Municipal Airport – City-owned, general aviation facility with a full-service Fixed Base Operator (FBO).
2. Cochise County Airport – County-owned, general aviation; included in the FAA’s National Plan of Integrated Airport Systems.
3. Tombstone Municipal Airport – City-owned, general aviation serving visitors and private pilots.
4. Bisbee Municipal Airport – City-owned, general aviation managed by an Airport Advisory Committee.
5. Cochise College Airport – Operated by Cochise College, primarily for pilot training and aviation programs.
6. Bisbee-Douglas International Airport – County-owned, general aviation; built during WWII as a bomber training base, transferred to the County in 1949.
7. Tribal Air Airport – Privately owned near McNeal, used by New Tribes Mission for aviation operations.
8. Douglas Municipal Airport – City-owned, general aviation; first international airport in the U.S.
9. Libby Airfield / Sierra Vista Municipal Airport – Joint-use facility for general aviation and U.S. Army operations at Fort Huachuca.

Note: County airports maintain FAA-required master plans, guiding investments and ensuring compatibility with surrounding land uses

BICYCLE & PEDESTRIAN ROUTES

Cochise County supports a growing network of bicycle and pedestrian routes that enhance mobility, recreation, and sustainable transportation. In Sierra Vista, dedicated bike lanes, shared-use paths, and multi-use trails connect neighborhoods, schools, parks, and commercial areas, including over 30 miles of multi-use paths for commuting and recreation.

In rural areas, bicycle infrastructure is limited but expanding. U.S. Bicycle Route 90 (USBR 90) runs east-west through Benson, Sierra Vista, Tombstone, and Bisbee, linking to state and national networks. County routes often

use existing highways, offering long-distance cycling and access to scenic and historic sites.

Pedestrian facilities are concentrated in urban centers, with sidewalks, crosswalks, stairways, and multi-use paths connecting neighborhoods to schools, parks, commercial areas, and transit. Smaller towns have more limited pedestrian infrastructure, though key public spaces often include sidewalks or shared paths.

SUN CORRIDOR TRAIL

The Sun Corridor Trail, one of the most significant regional trail efforts currently under development, is a proposed 1,500-mile multi-use route from Douglas, Arizona, to Las Vegas, Nevada. It connects communities such as Bisbee and Sierra Vista within Cochise County. Federal, state, and local partners are presently developing segments, including a \$4.5 million pedestrian and cyclist path in Bisbee funded in 2022.

MAP 18: U.S. BICYCLE ROUTE 90

 Designated Route

 Planned Segment

Ride with GPS. (2025, September 25).

COUNTY ROAD MAINTENANCE

The Highway Division of Cochise County Public Works is responsible for constructing, maintaining, and repairing all county roads that have been formally accepted for county maintenance by the Board of Supervisors. As of the drafting of this document, this includes 680 miles of paved roads and 761 miles of dirt roads (see Map X).

Funding for road maintenance in Cochise County relies heavily on the Arizona Highway User Revenue Fund (HURF). HURF distributes funds collected from fuel taxes, vehicle license fees, and other transportation-related sources to counties and municipalities. These funds are legally designated for the construction and maintenance of the county's surface transportation system.

Over the past ten years, road construction and maintenance have become increasingly expensive and challenging due to rising material costs, state-level funding reallocations, inflation, and increased road

use associated with population growth. While the Board of Supervisors does not control the amount of HURF received each year, it does decide how these funds are spent within the County.

The current dirt road grading schedule is:

- » Every four weeks: Cascabel Road and Geronimo Trail (up to Milepost 13.5)
- » Every nine to twelve weeks: All other roads, excluding primitive roads
- » Once or twice per year: Primitive roads

“Primitive roads” are substandard dirt roads established before June 13, 1975, prior to the creation of county road construction standards. Roads built after this date must meet publicly funded construction standards. Primitive roads are signed to warn the public of their substandard conditions. There are 255 miles of primitive roads in Cochise County.

PARTNERSHIPS & IMPROVEMENT DISTRICTS

PUBLIC-PRIVATE PARTNERSHIPS

Property owners along eligible public roads may enter into a public-private partnership with the county to upgrade a road from a dirt surface to a chip-sealed surface. Eligible roads must be open and in active use and have direct access to a county-maintained road or another road maintained by a

governmental entity. The maximum length for any single project generally shall not exceed one mile. This program facilitates a one-time improvement and does not obligate the county to assume ongoing maintenance unless the road is formally accepted into the county's maintenance system through established procedures.

PARTNERSHIPS & IMPROVEMENT DISTRICTS

ROAD IMPROVEMENT DISTRICT

A Road Improvement District (RID) is a special tax district established to finance, construct, or maintain roads within a designated area. It is a community-driven process, enabling property owners to collaboratively fund and implement road enhancements in their neighborhood or community. To form an RID,

at least 51% of property owners within the proposed district must agree to incur the necessary expenses. Once established, each parcel is assessed an equitable share of the improvement costs, which is reflected on the parcel's tax bill.

PLANNING & COORDINATION

Metropolitan Planning Organizations (MPOs) are federally mandated and funded transportation policy-making entities established for urbanized areas with populations that exceed 50,000. The primary purpose of MPOs is to ensure that federal transportation funds are allocated based on a comprehensive, continuous, and cooperative planning process.

The Sierra Vista Metropolitan Planning Organization (SVMPO) is the designated transportation organization for the southeastern Cochise County region. It is

a policy and planning agency serving the a planning area that encompasses 614 square miles and includes the city of Sierra Vista, the town of Huachuca City and portions of urbanizing Cochise County, in partnership with the Arizona Department of Transportation.*

Both the Transportation Improvements Program (TIP), which is a 4-5 year program, and the Long-Range Transportation Plan, which spans a 20-year horizon, includes several transportation projects that will benefit residents within it's service boundary.

3: Circulation Element

MAP 19: SVMPO BOUNDARIES

 SVMPO Boundaries

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

CIRCULATION GOALS & POLICIES

GOAL 1: Preserving Rails, Promoting Mobility

- Policy 1: Maintain an inventory of active, abandoned, and inactive rail corridors to support transportation planning.
- Policy 2: Evaluate abandoned rail corridors for railbanking, trails, or utility uses while preserving the potential for future rail service.
- Policy 3: Coordinate with rail operators and regional partners to support freight connectivity and economic development.
- Policy 4: Preserve historic rail corridors and infrastructure to promote heritage tourism.
- Policy 5: Monitor regional passenger rail studies for potential future connections in Cochise County.

GOAL 2: Aviation for Growth and Access

- Policy 1: Maintain and enhance county-owned airports to support general aviation, emergency services, and economic development.
- Policy 2: Coordinate with municipal, military, and educational airports to ensure safe, efficient, and integrated aviation services throughout Cochise County.
- Policy 3: Encourage airport improvements that support training, tourism, and business aviation while minimizing impacts on surrounding land uses.
- Policy 4: Work with federal, state, and regional partners, including the FAA, to secure funding for maintenance, upgrades,

and expansions that meet regional needs.

- Policy 5: Keep master plans for county-owned airports current to guide improvements, land use compatibility, and investment priorities.

GOAL 3: Move by Foot and Wheel

- Policy 1: Expand and maintain safe, connected bicycle and pedestrian routes throughout urban centers and rural areas to support commuting, recreation, and sustainable transportation.
- Policy 2: Leverage regional and statewide networks—including U.S. Bicycle Route 90 and the Sun Corridor Trail—to enhance connectivity, long-distance travel, and tourism opportunities.
- Policy 3: Coordinate with local municipalities, the MPO, community organizations/not-for-profits, and state and federal partners to secure funding, plan improvements, and integrate pedestrian and bicycle infrastructure into the county's transportation system.

GOAL 4: Connect Through Transit

- Policy 1: Maintain and enhance existing fixed-route and demand-response services in cities and rural areas, including regional connections like the Cochise Connection.
- Policy 2: Work with municipalities, SEAGO, and state/federal partners to plan, fund, and integrate transit services across the

CIRCULATION GOALS & POLICIES

county.

- Policy 3: Increase equitable access by ensuring transit options meet the needs of seniors, riders with disabilities, and low-income residents while connecting homes to jobs, schools, healthcare, and shopping.
- Policy 4: Coordinate with municipal, regional, and international partners to facilitate transit connections between Cochise County and Sonora, Mexico, supporting commerce, tourism, and workforce travel.

GOAL 5: Paving the Way Forward

- Policy 1: Establish a regular schedule in which to comprehensively evaluate all roadways within county maintenance to determine if the current maintenance schedule is still working, or if it should be adjusted.
- Policy 2: Prioritize maintenance and upgrades on county roads using a framework that weighs safety, condition, traffic, connectivity, equity, and funding opportunities.

- Policy 3: Implement cost-effective improvements, including grading, resurfacing, and chip sealing, with funding from HURF, grants, and partnerships.

GOAL 6: Driving Improvements Through Partnerships

- Policy 1: Support public-private partnerships that allow property owners to upgrade eligible roads, while ensuring long-term maintenance responsibilities are clearly defined.
- Policy 2: Facilitate the creation of Road Improvement Districts (RIDs) and Road Improvement and Maintenance Districts (RIMDs) to fund and implement local road projects collaboratively.
- Policy 3: Coordinate with the Sierra Vista MPO and other regional planning organizations to ensure county roads integrate with broader transportation planning and future growth areas.

4

**WATER RESOURCE
ELEMENT**

PURPOSE

The water resource element plays a crucial role in managing and ensuring the sustainable use of water resources. Its primary purposes include:

- **Resource Management:** It outlines strategies for managing water supply and demand to ensure a reliable and adequate supply for various uses, including residential drinking water, agriculture, and industrial.
- **Conservation:** It sets guidelines for conserving water resources by promoting efficient usage, reducing waste, and implementing practices that protect and preserve water quality.
- **Quality Protection:** It includes measures to protect water quality from pollutants and contaminants, ensuring that water sources remain safe and clean for all uses.
- **Resilience and Adaptation:** It prepares

for and mitigates the impacts of climate change and other environmental factors that could affect water availability and quality, helping the County adapt to potential challenges.

More specifically, the county is tasked with identifying the following:

- (a) The known legally and physically available surface water, groundwater and effluent supplies.
- (b) The demand for water that will result from future growth projected in the comprehensive plan, added to existing uses.
- (c) An analysis of how the demand for water that will result from future growth projected in the comprehensive plan will be served by the water supplies identified by all legally and physically available water supply or a plan to obtain additional necessary water supplies, if needed.

WATER RESOURCE INVENTORY

Cochise County relies on a combination of surface water, groundwater, and effluent to meet residential, agricultural, industrial, and ecological needs. This inventory identifies current water sources, their uses, and ongoing management programs, providing a foundation for planning future water supply and conservation strategies. Managing these sources sustainably is essential to supporting growth, maintaining resource reliability, and enhancing resilience to drought and flooding.

SURFACE WATER

San Pedro River

The San Pedro River flows north from Sonora, Mexico, through Cochise County, providing one of the last major undammed riparian corridors in the Southwest. Its flow is closely tied to groundwater, which supports agriculture, municipal supply, and ecological health. Recharge and conservation projects help sustain river flow and aquifer levels.

WATER RESOURCE INVENTORY

Parker Canyon Lake

Located in the Huachuca Mountains and managed by the U.S. Forest Service, Parker Canyon Lake is a man-made reservoir supporting recreation, fishing, wildlife habitat, and local aquifer recharge.

Willcox Playa

This large, seasonal dry lakebed in the Sulphur Springs Valley contributes to groundwater recharge and provides critical habitat for migratory birds, though it does not supply water directly.

Whitewater Draw

Managed for habitat conservation and public recreation, the seasonal wetlands of Whitewater Draw contribute to aquifer recharge and provide important ecological benefits.

Other Surface Waters

Smaller reservoirs, stock ponds, and ephemeral streams support ranching, limited irrigation, and local wildlife, while contributing incrementally to groundwater recharge.

GROUNDWATER

Groundwater is the primary water source for most communities, agriculture, and industry in Cochise County. The main aquifer systems include the Upper San Pedro Basin and the Sulphur Springs Valley Basin, with smaller aquifers serving outlying areas. These aquifers supply municipal systems, private wells, and irrigation districts.

Groundwater levels in some areas have experienced long-term declines due to pumping that exceeds natural recharge. Monitoring by the Arizona Department of Water Resources (ADWR) and local conservation districts helps track water levels and usage. Recharge occurs through natural infiltration from precipitation, streams, and flood events, as well as from managed recharge projects using stormwater and treated effluent.

Because of its importance, groundwater management is closely tied to future growth, agricultural needs, and long-term sustainability of water supplies in Cochise County.

Active Management Areas (AMAs)

Parts of Cochise County, including the Douglas and Willcox areas, fall within Active

WATER RESOURCE INVENTORY

Management Areas regulated by ADWR. AMAs establish rules for groundwater withdrawal, well permits, and conservation measures to ensure sustainable use of limited supplies. County planning and development proposals in these areas must consider AMA requirements to align growth with available water resources.

Because of its importance, groundwater management—including AMAs—is closely tied to future growth, agricultural needs, and long-term sustainability of water supplies in Cochise County.

EFFLUENT / RECLAIMED WATER

Treated wastewater provides a supplemental water source in Cochise County. Municipal treatment facilities in communities such as Sierra Vista and Benson produce effluent reused for irrigation of parks, golf courses, and other landscapes, as well as some industrial purposes. Effluent is also used in managed recharge projects to help replenish local aquifers and support streamflow. While smaller than groundwater in overall volume,

effluent is critical for extending supplies, improving resilience, and reducing pressure on aquifers.

Cochise Conservation & Recharge Network (CCRN)

Cochise County participates in the Cochise Conservation & Recharge Network, a collaborative partnership among local, state, and federal agencies, conservation organizations, and water providers. CCRN coordinates and implements water recharge and conservation projects throughout Cochise County, including stormwater capture, effluent reuse, and aquifer recharge initiatives. These projects enhance groundwater sustainability, improve resilience to drought and flooding, and support reliable water supplies for communities, agriculture, and the environment. The County contributes technical support, planning resources, and project coordination to advance CCRN's mission.

WATER DEMAND AND SUPPLY ANALYSIS

Projected growth in Cochise County will increase demand for residential, commercial, agricultural, and industrial water uses. As the population expands, additional water will be needed to support housing development, economic activity, and associated public services.

To meet this demand, the County relies on:

- Groundwater as the primary and most reliable source.
- Surface water where legally and physically available.

WATER DEMAND AND SUPPLY ANALYSIS

groundwater demand, Cochise County will continue to participate in collaborative initiatives such as the Cochise Conservation & Recharge Network (CCRN). CCRN's recharge projects directly support aquifer replenishment, reduce long-term groundwater overdraft, and provide resilience against drought, flooding, and population growth. Integration of CCRN outcomes into County water planning ensures that recharge activities are aligned with projected needs for residential, agricultural, and commercial uses, while also supporting ecological and community resilience.

- Effluent / reclaimed water to supplement supplies and offset groundwater use.

The Arizona Department of Water Resources (ADWR) provides records on legally and physically available supplies, which serve as a foundation for assessing long-term water adequacy. Future water demand will be addressed through a combination of:

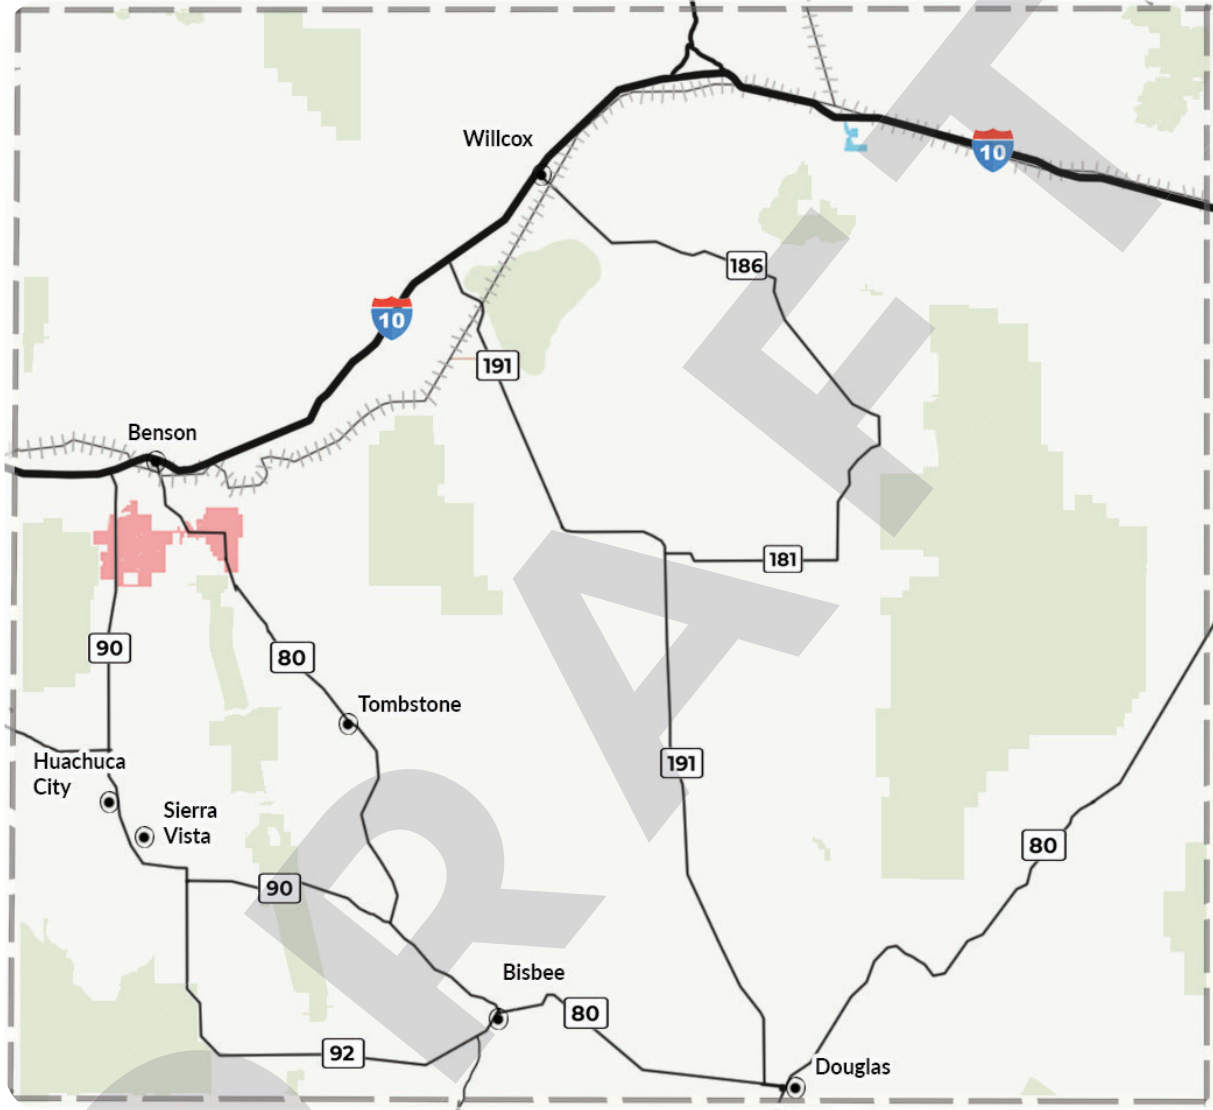

- Maximizing efficient use of existing supplies through conservation and reuse
- Supporting recharge and watershed management projects to sustain aquifers and surface water systems.
- Coordinating with ADWR, municipalities, irrigation districts, and private providers to identify additional water resources if needed.

Collaborative Recharge and Conservation
To help offset projected increases in

Local Irrigation Districts

Irrigation districts are legally recognized local governmental entities established to manage water delivery, maintain infrastructure, and collect assessments for agricultural and municipal use. In Cochise County, districts such as St. David (established 1920s) and Pistachio Pass (established 1940s) have historically played a central role in managing groundwater resources for farming and local communities. Operating under state law, these districts coordinate with County and state agencies to ensure sustainable water use. Their operations support agricultural and residential needs, contribute to water reliability, maintain water quality, and provide a framework for regional governance. Incorporating irrigation districts into County water planning reinforces coordinated management, supports long-term sustainability, and acknowledges their ongoing

MAP 22: IRRIGATION DISTRICTS

-  St. David
-  Pistacio Pass

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

WATER DEMAND AND SUPPLY ANALYSIS

role in meeting current and future water demands.

Community Water Districts and Systems

Cochise County is also served by multiple community water districts (CWDs) and community water systems (CWSs), which provide municipal water service to towns, neighborhoods, and unincorporated areas.

- **Community Water Districts (CWDs):** Legally recognized local governmental entities with authority to manage water supply, distribution infrastructure, and funding for operations. Examples in Cochise County include the Southeastern Arizona Water District (SEAZWD) and St. David Irrigation District. CWDs manage both water quantity and quality, maintain infrastructure, operate treatment facilities, protect sources, and participate in regional planning.
- **Community Water Systems (CWSs):** Systems serving 15 or more connections or 25+ year-round residents, as defined by ADEQ. These may be publicly or privately operated and are primarily responsible for providing safe drinking water and complying with state and federal standards.

Potential Future Sources

In addition to maximizing the use of current supplies, Cochise County may need to explore new sources

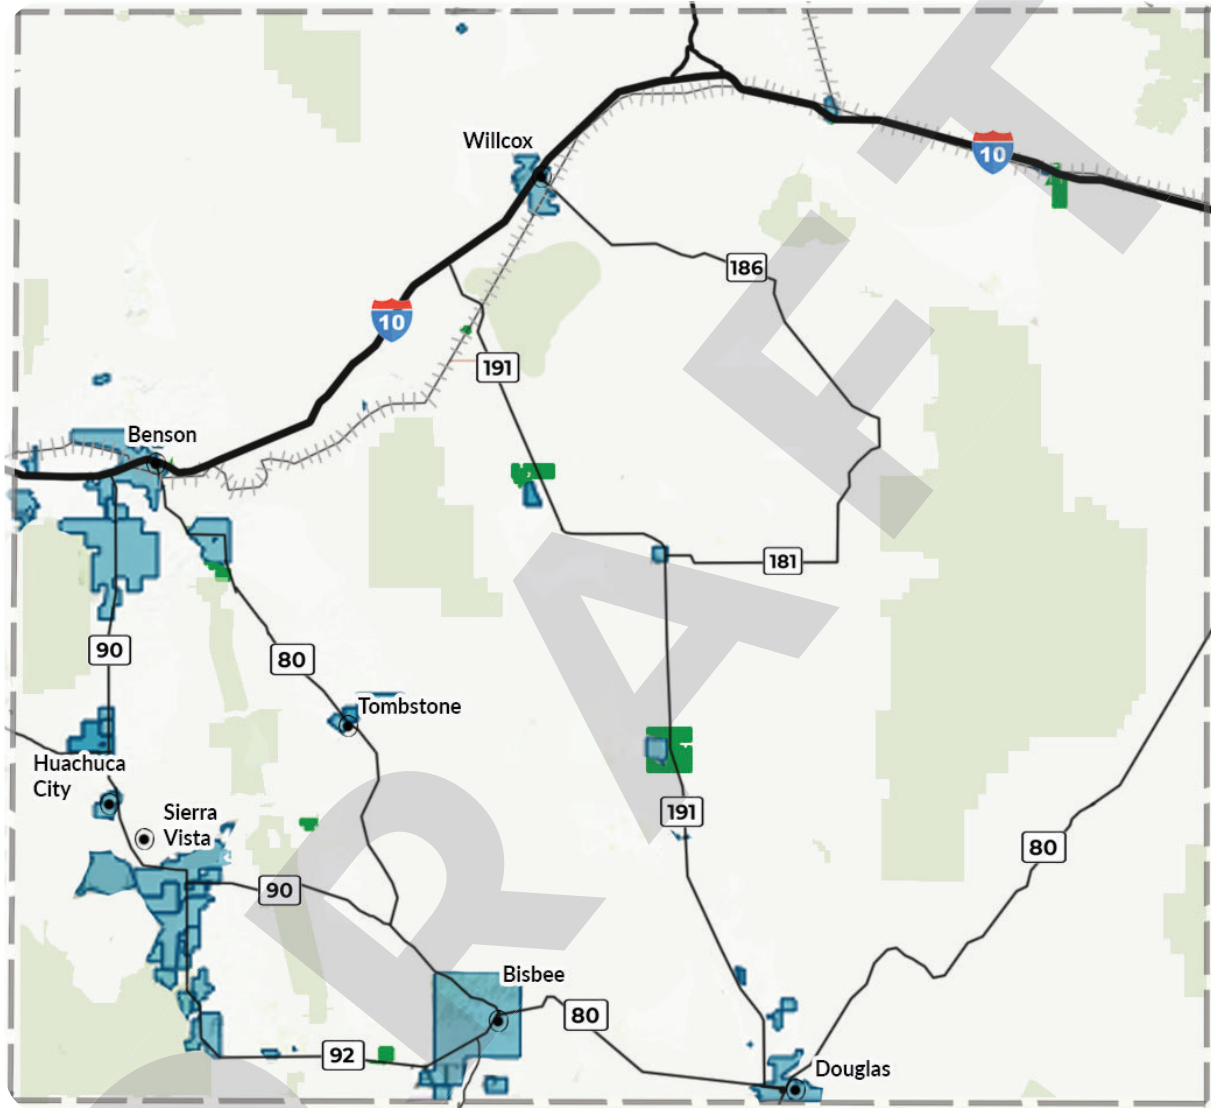

of water to meet long-term needs. Potential options include:

- Binational desalination projects in Sonora, Mexico, with water conveyed north through regional partnerships.
- Inter-basin transfers from other Arizona watersheds, subject to legal and physical feasibility.
- Expanded water reuse and recycling, including advanced treatment for potable or industrial applications.
- Stormwater capture and storage projects that go beyond existing recharge efforts.

Evaluating these options will require coordination with state, federal, and international partners, as well as careful consideration of costs, infrastructure requirements, environmental impacts, and long-term sustainability.

MAP 23: COMMUNITY WATER DISTRICTS & SYSTEMS

-  Community Water System
-  Community Water District

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

WATER RESOURCE GOALS & POLICIES

GOAL 1: Keep the Water Flowing – Reliable Water for All

- Policy 1: Coordinate with ADWR, municipalities, irrigation districts, community water districts, community water systems, and private providers to support monitoring and sustainable management of groundwater, surface water, and effluent supplies to meet current and projected demands for residential, commercial, agricultural, and industrial uses.
- Policy 2: Support collaborative planning and data-sharing with state and regional partners to identify additional water sources and optimize existing supplies.
- Policy 3: Promote investments in County-supported infrastructure and technologies, such as stormwater capture, effluent reuse, and water delivery improvements, to enhance reliability and extend available supply.
- Policy 4: Incorporate water availability and provider capacity into capital infrastructure and public facilities decisions to ensure growth aligns with sustainable supply.
- Policy 5: Evaluate and plan for potential new water sources, including binational desalination, inter-basin transfers, and advanced water reuse, ensuring feasibility, cost-effectiveness, and sustainability before integration into County water planning.

GOAL 2: Pure and Protected – Safeguarding Water Quality

- Policy 1: Implement best management practices for water quality protection in municipal, agricultural, and industrial settings.
- Policy 2: Encourage partnerships with public, private, and nonprofit organizations to reduce pollution and maintain safe water supplies.
- Policy 3: Integrate water quality considerations into public infrastructure and facilities projects, including collaboration with water districts and systems.

GOAL 3: Use it Wisely – Water Conservation

- Policy 1: Encourage water conservation measures for residents, businesses, and agricultural operations, including incentives, education, and technical support.
- Policy 2: Promote the adoption of water-efficient technologies, including irrigation systems, low-flow fixtures, and xeriscaping.
- Policy 3: Support reuse of treated effluent for irrigation, industrial uses, and managed recharge to reduce reliance on groundwater,

GOAL 4: Recharge and Restore – Protecting Aquifers and Watersheds

WATER RESOURCE GOALS & POLICIES

- Policy 1: Identify and implement projects to recharge aquifers, including stormwater capture, effluent infiltration, and other sustainable methods.
- Policy 2: Protect riparian corridors, playas, and other natural recharge areas through conservation programs and land management strategies.
- Policy 3: Coordinate with state and federal agencies to align recharge projects with regional water resource planning.
- Policy 4: Incorporate assessments of emerging water supply strategies into long-term planning to enhance resilience against population growth, drought, and climate change impacts.
- Policy 5: Evaluate the potential impacts of climate change, drought, and extreme weather on water availability and plan for adaptive strategies.
- Policy 6: Develop emergency water supply plans for communities and critical infrastructure in coordination with Emergency Management.
- Policy 7: Promote flexible policies that allow the County to respond to changing water demands and regulatory requirements over time.

GOAL 5: Plan Ahead for Water

- Policy 1: Evaluate the potential impacts of climate change, drought, and extreme

ENERGY

ELEMENT

PURPOSE

The Energy Element of the Cochise County Comprehensive Plan provides a framework for managing, conserving, and developing energy resources. Its purpose is to promote a sustainable energy system that supports economic growth, protects the environment,

and enhances the well-being of residents. The element identifies strategies for efficient energy use, encourages renewable energy development, and guides policies to ensure reliable and resilient energy services throughout the county.

ELECTRICITY

Electricity is the primary energy source for residential, commercial, and public facilities in Cochise County. The county is served by several electric providers, each with distinct roles in generation, transmission, and distribution. The primary distribution entities are Sulphur Springs Valley Electric Cooperative (SSVEC), Arizona Public Service (APS), and Columbus Electric Cooperative (CEC), while Arizona Electric Power Cooperative (AEPCO) provides wholesale generation and transmission services. This section summarizes each provider, their service areas, energy sources, and recent trends.

ARIZONA ELECTRIC POWER COOPERATIVE (AEPCO)

AEPCO is a generation and transmission cooperative that provides wholesale power to distribution cooperatives, including SSVEC and CEC. It owns and operates the Apache Generating Station in Cochise County, with a total generating capacity of 625 MW, and approximately 852 miles of transmission lines.

- Historically, the Apache Generating Station relied on coal and natural gas, but AEPCO

ELECTRICITY

has been transitioning toward cleaner energy. Coal production in Arizona ceased in 2019, and AEPSCO now imports coal for its remaining plants from New Mexico, Wyoming, and Montana. The cooperative is expanding renewable energy, with projections showing that renewables will account for over 60% of AEPSCO's generation by 2031.

SULPHUR SPRINGS VALLEY ELECTRIC COOPERATIVE (SSVEC)

SSVEC is a member-owned distribution cooperative serving over 60,000 customers across Cochise, Graham, Pima, and Santa Cruz counties. In Cochise County, SSVEC covers approximately 87.5% of the land area. SSVEC primarily sources electricity from AEPSCO but has also invested in renewable energy:

- Coal reduction: From 80% in 2016 to 26% in 2024.
- Natural gas increase: From 3% in 2016 to over 43% in 2024.
- Renewable energy expansion: Solar grew to over 12% by 2024, supported by a second large SSVEC solar farm with battery storage.

ARIZONA PUBLIC SERVICE (APS)

APS provides electricity to select areas of Cochise County, including Douglas. The utility

is pursuing a clean energy portfolio, targeting:

- 65% clean energy by 2030, with nearly half from renewables
- Coal phase-out by 2031
- 100% clean, carbon-free electricity by 2050

COLUMBUS ELECTRIC COOPERATIVE (CEC)

- CEC is a nonprofit, consumer-owned utility serving approximately 3,198 customers in rural southwestern New Mexico and southeastern Arizona, including parts of Cochise County. While detailed information on CEC's energy mix is not publicly available, it is likely following similar trends as other regional cooperatives, increasing renewable energy use and reducing reliance on coal.

KEY TRENDS

- Shift from coal to cleaner sources: AEPSCO and SSVEC are reducing coal and increasing natural gas and renewable energy.
- Renewable energy growth: Solar and other renewables are expanding, with battery storage supporting reliability
- Clean energy targets: APS and AEPSCO have set ambitious goals for renewable and carbon-free electricity through 2050.

GAS, PROPANE & HAZARDOUS LIQUIDS

Energy in Cochise County relies on a mix of sources to meet residential, commercial, and industrial needs. Natural gas is a primary source for heating, cooking, and industrial applications, while electricity remains the main power source. In areas not served by pipelines, propane provides an important alternative for homes, farms, and businesses. Additionally, hazardous liquid pipelines, which transport crude oil and refined petroleum products, support the county's energy infrastructure and supply to local and regional markets. Together, these energy sources provide reliable, efficient, and flexible options that support local economic activity, public services, and the county's goal of a resilient and diversified energy supply.

NATURAL GAS PROVIDERS

- **Southwest Gas Corporation (SWG)**
SWG is the primary provider of natural gas in urbanized areas, including Sierra Vista, Benson, and Douglas. It delivers gas through regional pipeline networks and wholesale markets, ensuring reliable service to homes, businesses, and public facilities.
- **El Paso Natural Gas (EPNG)**
EPNG is a major regional transporter of natural gas, operating a 10,140-mile pipeline system supplying the Southwest from production areas such as the Permian Basin in Texas and the San Juan

Basin in New Mexico. In Cochise County, the Dragoon Compressor Station near Benson is a critical facility that maintains pipeline flow, enabling gas delivery to local utilities and regional markets. The South Mainline Expansion Project, which included a 17-mile pipeline loop and additional compression, was completed on July 8, 2020, enhancing capacity and reliability.

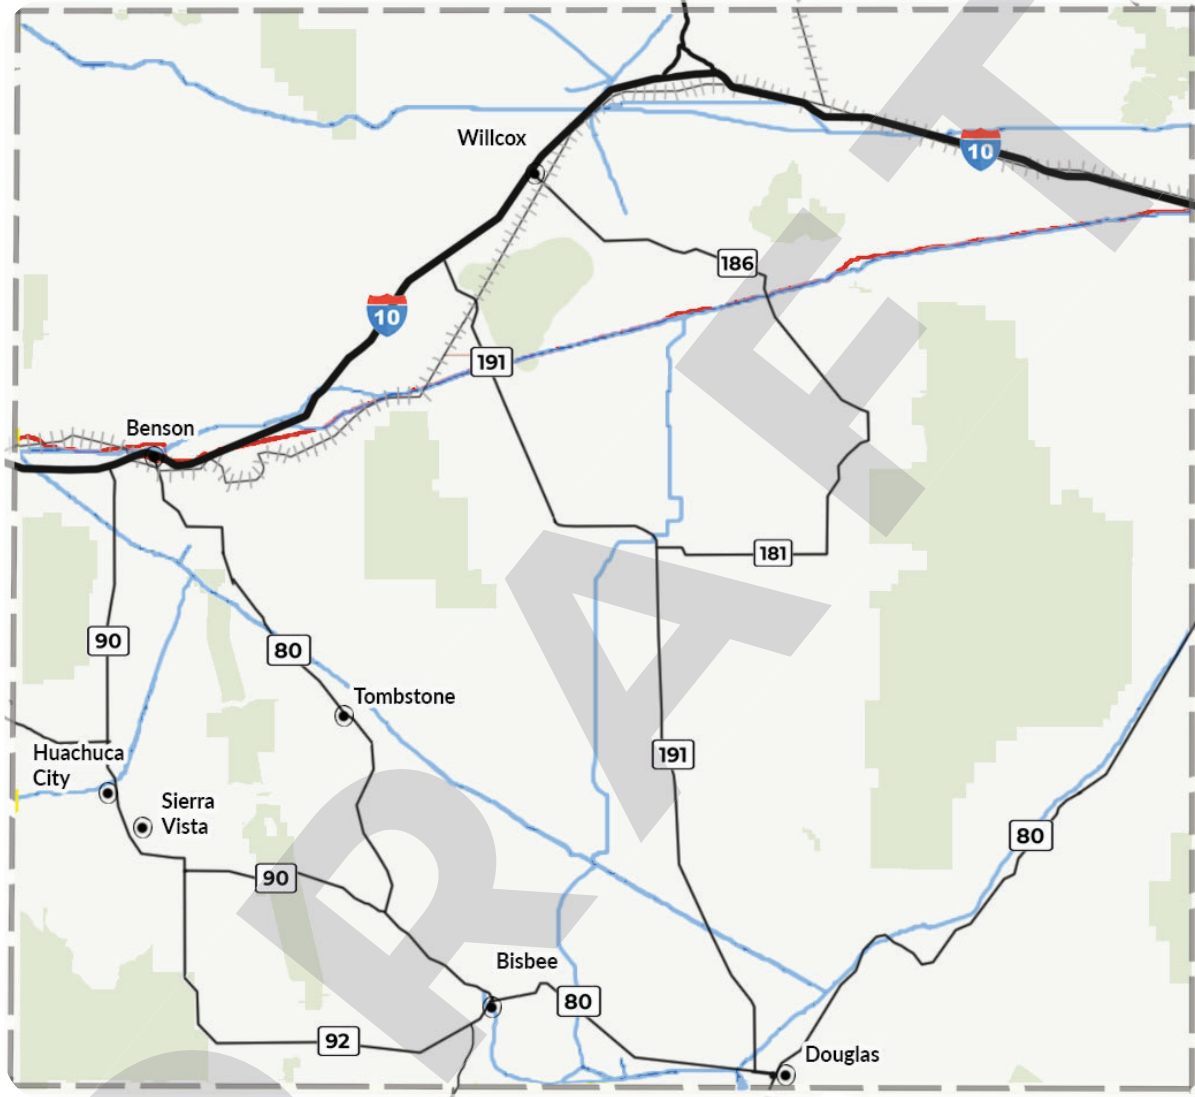

PROPANE SUPPLIERS

In rural areas where pipeline gas is unavailable, propane serves as a flexible energy alternative. Local distributors deliver propane to residences, farms, and businesses throughout the county.

HAZARDOUS LIQUID PIPELINES

Hazardous liquid pipelines, primarily transporting crude oil and refined petroleum products, cross parts of Cochise County and are part of the broader energy infrastructure. These pipelines are operated by regional midstream companies such as Plains All American Pipeline and Magellan Midstream Partners. Supporting facilities, including pump stations and terminal connections, help move these liquids safely and efficiently to local markets and interstate destinations.

MAP 25: GAS & HAZARDOUS LIQUID PIPELINES

NUCLEAR POWER

While nuclear energy is a significant source of low-carbon electricity for Arizona, it is not a practical option for local generation in Cochise County. The county lacks existing nuclear facilities, suitable sites, and the water resources necessary for plant operation. Additionally, the high capital costs, long construction timelines, and regulatory requirements make local development unrealistic. However, electricity from the Palo Verde Nuclear Generating Station, the largest nuclear power plant in the United States, and other regional nuclear sources contributes

to the statewide grid, producing about 27% of Arizona's electricity and 61% of the state's carbon-free generation. Local electric providers, including Sulphur Springs Valley Electric Cooperative (SSVEC) and Arizona Public Service (APS), purchase this electricity from the regional grid, supplying Cochise County homes, businesses, and public facilities with reliable, low-carbon power. This allows the county to benefit from nuclear energy without hosting its own nuclear infrastructure, supporting energy resilience, sustainability, and diversification.

RENEWABLE ENERGY

Cochise County has strong potential for renewable energy development, particularly solar and wind, which can contribute to a diversified, low-carbon energy portfolio supporting local economic development, sustainability, and resilience goals.

SOLAR ENERGY

Arizona ranks among the top five states nationally for total solar capacity, with more than 6,100 megawatts generated from both utility-scale and small-scale installations. About 60% of this generation comes from large photovoltaic (PV) facilities, while 40% comes from smaller systems such as rooftop

solar. Thanks to high solar irradiance levels, Cochise County's solar resources—averaging 5 to 6 kilowatt-hours per square meter (kWh/m²) daily—are among the best in the state. These conditions make the county well-suited for residential, commercial, and utility-scale solar development.^X

Individual Rooftop or Ground Mount Solar Residential and commercial rooftop or ground mount solar allows homeowners, businesses, and public facilities to generate electricity on-site, reduce utility bills, and increase energy independence. Distributed solar supports the

^X Source: Sengupta, M., Xie, Y., Lopez, A., Habte, A., Maclaurin, G., & Shelby, J. (2018). The National Solar Radiation Data Base (NSRDB). *Renewable and Sustainable Energy Reviews*, 89, 51-60. <https://doi.org/10.1016/j.rser.2018.01.032>

^X Source: U.S. Energy Information Administration. "Arizona State Energy Profile." Accessed February 12, 2025.

RENEWABLE ENERGY

county's resilience by diversifying the energy supply and can complement grid-scale projects by reducing peak electricity demand.

Community Solar

Community solar projects provide access to solar energy for households, renters, and businesses that cannot install rooftop systems. Participants typically subscribe to or co-own a portion of the energy produced, receiving credits on their utility bills. These projects improve energy equity, expand access to renewable energy in rural or urban areas, and provide local economic and educational benefits, while complementing larger-scale utility projects.

WIND ENERGY

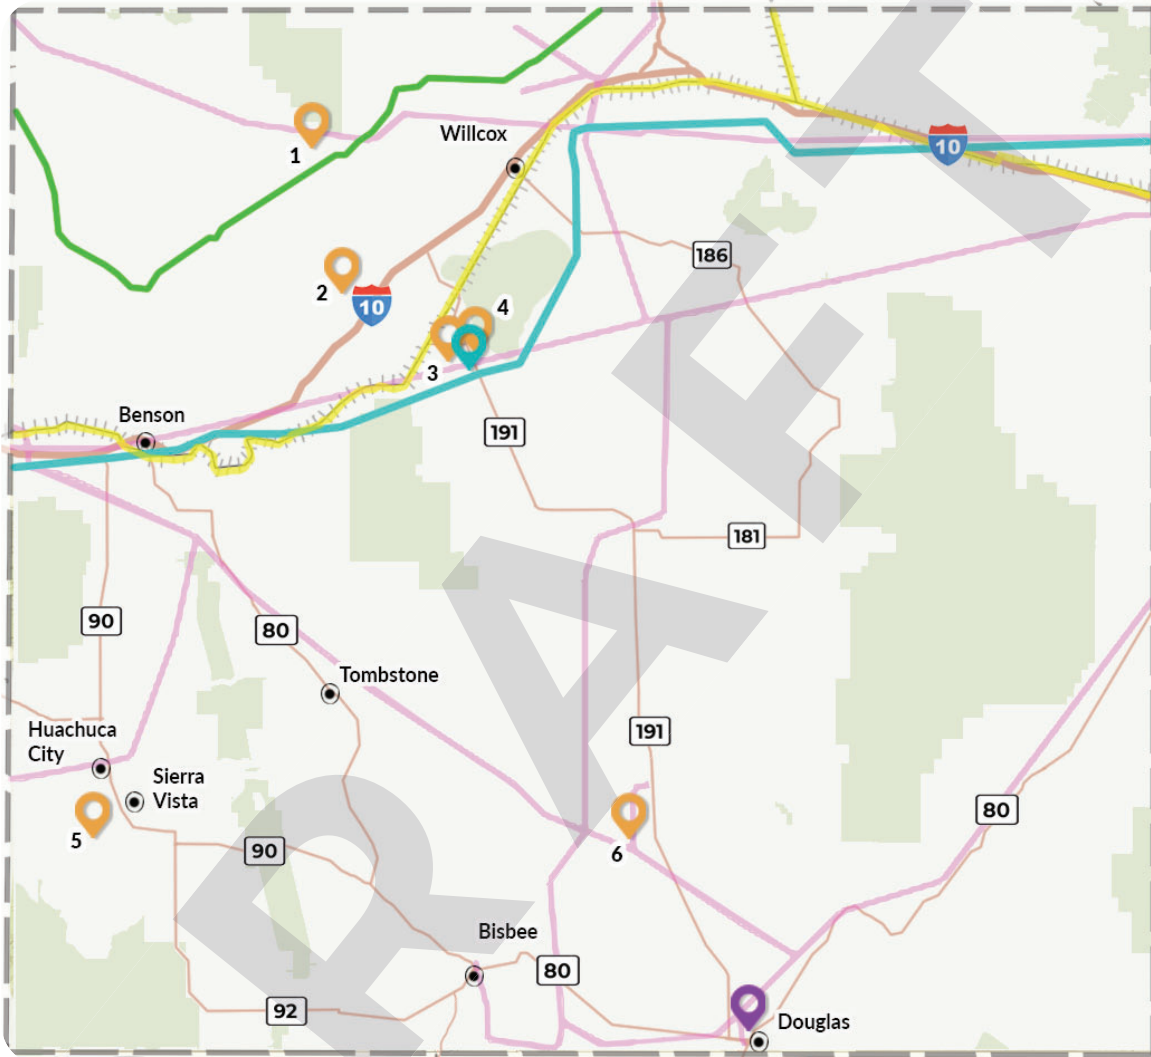

While wind currently provides less than 2% of Arizona's electricity, the state is ranked among the top 10 in the nation for wind energy potential. Cochise County hosts one operating wind farm, Red Horse 2, which has produced 30 MW of renewable energy since its commissioning in 2015 (see Map X). Another proposed utility-scale wind project, with a capacity of 175 MW, is under consideration. If developed and approved, it could provide enough electricity to power more than 30,000 Arizona homes annually, further enhancing the county's renewable energy contribution.

PLANNING & POLICY CONTEXT

Together, utility-scale solar and wind resources, distributed rooftop solar, and community solar projects represent significant opportunities for Cochise County to expand its renewable energy base, increase energy access and equity, reduce reliance on fossil fuels, and strengthen resilience to long-term energy challenges. The County's role is not to generate power directly, but to guide the siting, permitting, and integration of renewable facilities—large and small—in ways that balance energy development with environmental protection, land use compatibility, community participation, and local economic benefits.

ENERGY GOALS & POLICIES

GOAL 1: Harness the Wind, Capture the Sun

- Policy 1: Encourage utility-scale renewable energy projects (solar, wind) on previously disturbed land, brownfields, or areas with low agricultural or ecological sensitivity.
- Policy 2: Favor sites with access to existing roads, transmission lines, and substations to reduce costs and minimize impacts.
- Policy 3: Align County review with state and federal processes to ensure protection of wildlife, sensitive habitats, and cultural resources.
- Policy 4: Promote early and ongoing community engagement to ensure transparency and public support.
- Policy 5: Maximize local economic benefits through workforce training, contracting, and procurement opportunities.

GOAL 2: Power Smart, Power Efficient

- Policy 1: Encourage high-efficiency building standards (e.g., Energy Star, LEED, or similar) for new development.
- Policy 2: Support and promote weatherization, retrofits, and energy audits to reduce energy costs for households and businesses.
- Policy 3: Partner with utilities and local programs to expand incentives for energy efficiency in rural and urban areas.

GOAL 3: Solar Together – Equitable Energy Access

- Policy 1: Support community solar programs that provide renewable energy access for renters, low-income households, and underserved communities.
- Policy 2: Partner with utilities to expand net metering and distributed energy generation in the county.
- Policy 3: Promote outreach and technical assistance for small businesses and homeowners interested in rooftop solar or small wind systems.

PUBLIC SERVICES & FACILITIES ELEMENT

PURPOSE

The Public Services & Facilities Element of the Cochise County Comprehensive Plan provides a framework for planning, coordinating, and managing the county's essential facilities and services. Its purpose is to ensure that county-provided and coordinated public facilities support sustainable growth, maintain public safety, and enhance the quality of life for residents. The element identifies strategies to provide equitable, efficient, and compatible services, including county law enforcement, detention, health-related services, community facilities, administrative offices, and

emergency management.

This element is closely linked to the Land Use Element, which designates broad areas for public buildings and grounds, and to other mandatory elements such as Circulation, Water, and Energy, which provide critical infrastructure support. The guiding principle of this element is to ensure that public facilities are sited and managed in a manner that is accessible, compatible with surrounding land uses, and capable of adapting to the county's changing needs over time.

SAFETY SERVICES & FACILITIES

COUNTY JAIL & DETENTION CENTERS

Function and Regional Role: Cochise County's detention facilities serve as critical components of the regional criminal justice system, providing secure housing for individuals awaiting trial or serving sentences. The primary facility is the Cochise County Jail, located in Bisbee, with additional temporary holding substations in Sierra Vista and Willcox. These facilities support law enforcement operations, judicial proceedings, and public safety across the county.

Location Considerations: The Cochise County Jail is located at 203 N Judd Drive, Bisbee, AZ 85603. This central location provides accessibility for county operations and proximity to judicial and administrative services. Temporary holding substations are located in Sierra Vista and Willcox to support regional law enforcement activities. These sites

are designed to balance operational efficiency, security, and compatibility with surrounding land uses.

Expansion or Modernization: Recognizing the limitations of the existing facilities, Cochise County has explored options for a new detention center. A Jail District Public Outreach Committee, formed in 2022, conducted a comprehensive review of county jail needs, including safety, infrastructure, and operational challenges, and recommended the construction of a new facility. Following the November 4, 2025 election, the outcome of the Jail District tax to fund planning and construction of a new facility will guide next steps. The County will continue to plan for secure, accessible, and operationally efficient detention facilities that meet the needs of the region while remaining compatible with surrounding land uses.

SAFETY SERVICES & FACILITIES

LAW ENFORCEMENT FACILITIES/ SUBSTATIONS

Function and Regional Role

Law enforcement facilities provide the physical infrastructure needed to deliver policing, investigations, and community safety services throughout Cochise County. The Cochise County Sheriff's Office (CCSO) operates regional substations across the county in addition to its main office. These facilities serve as bases for deputies, administrative staff, and specialized units, ensuring that law enforcement services are accessible and responsive to both incorporated and unincorporated communities.

Location Considerations:

The CCSO maintains substations in Bisbee, Benson, Douglas, Sierra Vista, Willcox, and Elfrida. These facilities are strategically located to provide countywide coverage across Cochise's large and diverse geography. Proximity to major transportation routes and population centers enhances response times and operational efficiency. When siting or upgrading facilities, considerations include security, accessibility for the public, and compatibility with surrounding land uses.

EMERGENCY MANAGEMENT

Cochise County's Emergency Management Department coordinates preparedness, response, recovery, and mitigation for large-scale emergencies. Its mission is to

help residents, businesses, and government entities prepare for and recover from disasters, recognizing that resilience begins locally and requires participation from the whole community.

Through planning, training, and outreach, the Emergency Management Department strengthens readiness across all sectors. Preparedness, however, is a shared responsibility—families, businesses, and organizations must develop their own plans, maintain supplies, and protect property from hazards to support countywide resilience.

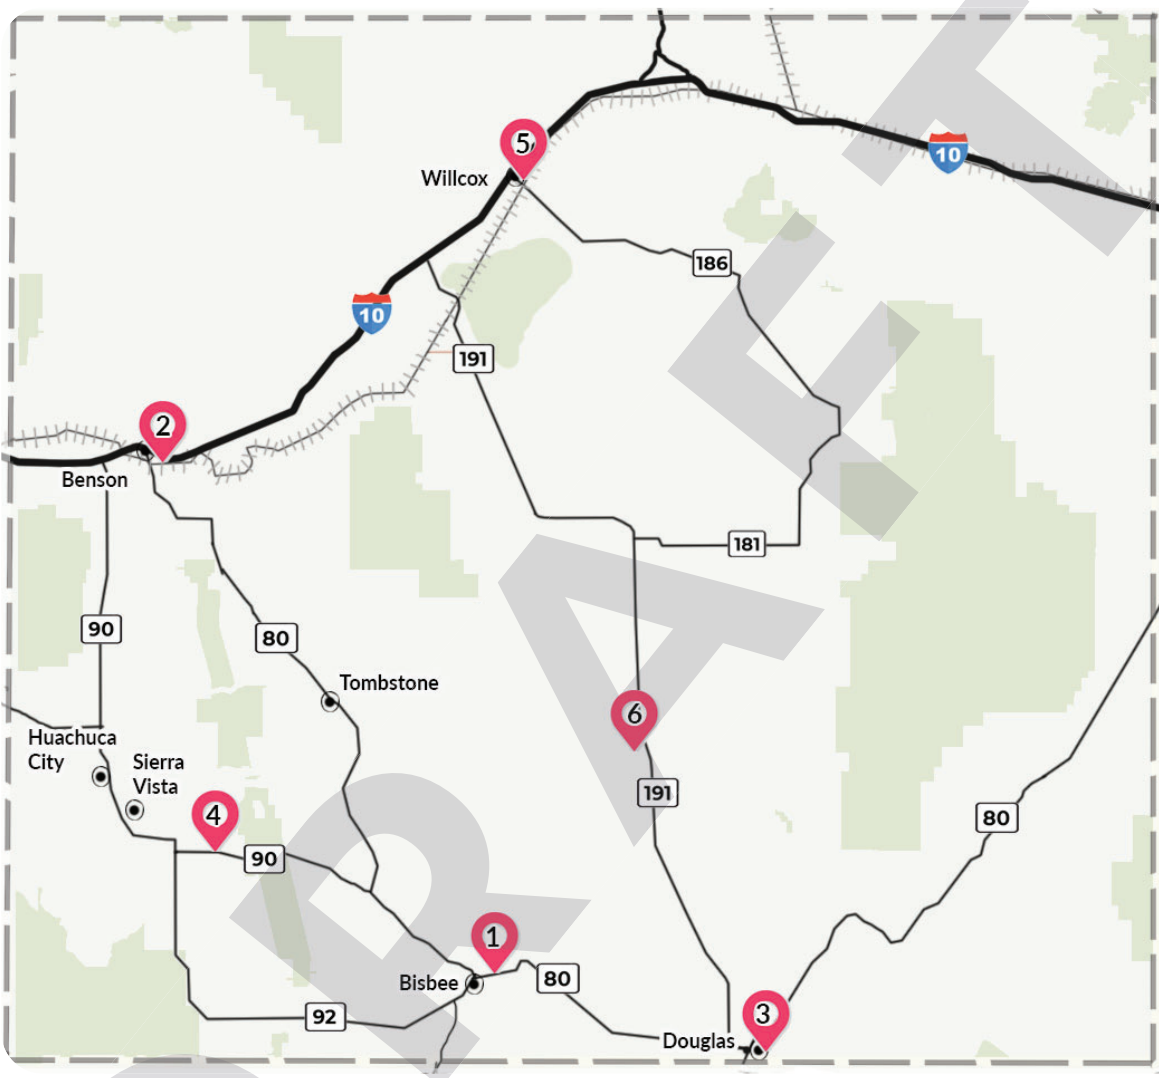

Existing Emergency Plans & Programs:

Cochise County maintains several plans to guide hazard mitigation and response, including the following:

- Community Wildfire Protection Plan (2014) – Wildland-urban interface risk reduction.
- Hazardous Materials Plan / LEPC – Response to hazardous materials

6: Public Services & Facilities Element

SAFETY SERVICES & FACILITIES

incidents.

- Multi-Jurisdiction Hazard Mitigation Plan (2022) – Identifies risks and prioritizes mitigation.
- Public Health Preparedness Program – Plans for outbreaks, mass care, and medical surge.
- Community Evacuation Plans – Area-specific evacuation strategies, such as Ramsey Canyon. Together, these provide a coordinated framework for disaster preparedness and response across the county.

FIRE DISTRICTS & EMERGENCY MANAGEMENT SERVICES (EMS) COORDINATION

Fire protection and emergency medical services in Cochise County are provided primarily by independent fire districts. While the County does not directly operate these services, it plays a key role in coordination and support to ensure effective coverage and public safety.

County responsibilities include:

- Development Review & Referral – Providing input on new development proposals to help fire districts maintain adequate response times and access
- Intergovernmental Agreements – Supporting mutual aid, resource sharing,

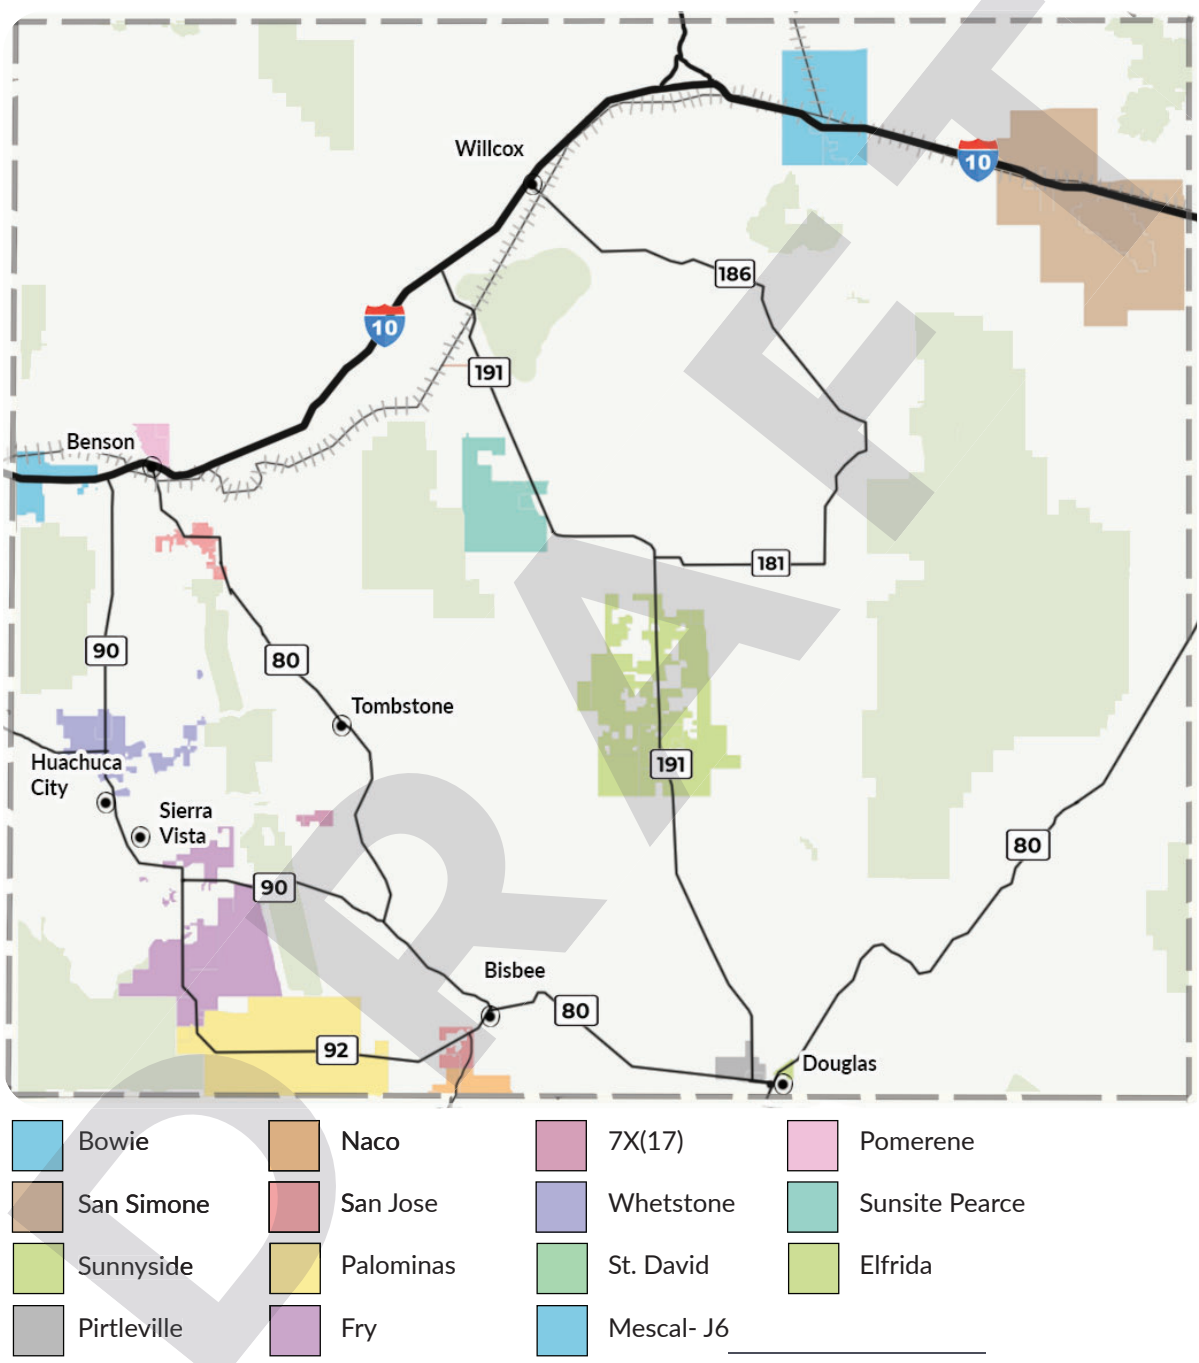

and formal coordination between fire districts, law enforcement, and County departments.

- Disaster Planning & Preparedness – Integrating fire district capabilities into County emergency management and hazard mitigation plans.
- Public Safety Coordination – Promoting joint training exercises, communications interoperability, and planning for large-scale emergencies that require multi-agency response.

By fostering collaboration with fire districts and EMS providers, the County helps maintain equitable and efficient emergency services while ensuring that land use, infrastructure, and public safety planning are aligned across jurisdictions.

6: Public Services & Facilities Element

Please see <https://cochise.maps.arcgis.com/> for the most detailed and up-to-date information.

HEALTH & HUMAN SERVICES

HEALTH FACILITIES IN COCHISE COUNTY

Hospitals and health clinics are essential community facilities that provide primary care, specialty services, and emergency treatment. Cochise County does not operate any county-run hospitals or clinics; most healthcare services are provided by private or nonprofit organizations. Major facilities include:

- Canyon Vista Medical Center (Sierra Vista) – Offers emergency care, cardiology, orthopedics, and labor and delivery services.
- Copper Queen Community Hospital (Bisbee) – Provides 24/7 emergency care and operates rural clinics in Bisbee, Palominas, Douglas, Hereford, and Tombstone.
- Northern Cochise Community Hospital (Willcox) – Rural primary care hospital offering emergency, inpatient, outpatient, and primary care services.
- Chiricahua Community Health Centers, Inc. – Federally Qualified Health Center serving underserved communities across southeastern Arizona.
- Cochise County Health & Social Services Clinics – Clinics in Bisbee, Benson, Douglas, Sierra Vista, and Willcox providing immunizations, reproductive health, STD testing, and vital records

These facilities are concentrated near population centers to ensure reasonable travel distances, especially in a county with large rural areas. The County's role is to coordinate

and support these providers, ensuring integration into broader emergency planning, infrastructure, and land use considerations.

BEHAVIORAL HEALTH & SOCIAL SERVICES

Behavioral health and social services in Cochise County are primarily provided by private and nonprofit organizations, with facilities concentrated near population centers such as Sierra Vista, Douglas, Benson, Bisbee, and Willcox. This ensures access for residents in the county's rural areas.

Key Providers and Services

- Southeastern Arizona Behavioral Health Services (SEABHS) – Outpatient treatment, trauma therapy, dual diagnosis, vocational rehab; locations in Sierra Vista, Bisbee, Douglas, Benson, Willcox, Hereford, Palominas, and Tombstone.
- Chiricahua Community Health Centers (CCHCI) – Integrated primary care and mental health services via fixed clinics and mobile units.
- Cochise County Health & Social Services Clinics – Health and social services in Sierra Vista, Bisbee, Douglas, Benson, and Willcox.
- Other nonprofit providers – Community Bridges (Benson), Easterseals Blake Foundation (Sierra Vista), CPIH (Sierra Vista), and Mary's Mission (Hereford) offer outpatient and residential mental health services.

COMMUNITY SERVICES

ANIMAL SHELTERS

Cochise County provides animal control services through its Animal Control Division of the Sheriff's Office, enforcing state laws and county ordinances primarily concerning dogs and cats. The County does not operate its own shelters; instead, it contracts with two shelters to house stray or surrendered animals:

- City of Douglas Animal Shelter – Serves County residents through a contractual agreement.
- Willcox Animal Control – Provides shelter services under contract with the County.

Other Shelters in Cochise County

Several other shelters operate independently of the County:

- Benson Animal Shelter – City-operated, serving Benson and surrounding areas
- Bisbee Animal Shelter – City-operated shelter in Bisbee.
- Nancy J. Brua Animal Care Center – Provides shelter and adoption services (location in Sierra Vista).
- Tombstone Small Animal Shelter – Serves Tombstone and surrounding areas

Partnerships and Programs

The County collaborates with organizations such as the Cochise County Humane Society, which provides low-cost spay/neuter programs, foster services, and adoption support. While not a shelter, it plays a key role in animal welfare and population control.

Current Initiative

Cochise County is working to establish a centralized animal shelter by converting a vacant County building into a modern facility, supported by federal funds and in collaboration with the Humane Society of Southern Arizona. Until this facility opens, contracted shelters continue to house County animals, and some are transported to partner organizations to increase adoption opportunities.

LIBRARY SERVICES

Cochise County supports access to educational, recreational, and social services through partnerships with municipal libraries, community centers, and senior centers. While many facilities are operated by cities or nonprofit organizations, the County helps coordinate services, promote equitable access, and encourage multi-use opportunities.

Library Locations

Libraries serve as centers for learning, digital access, and community engagement. Key facilities across the county include:

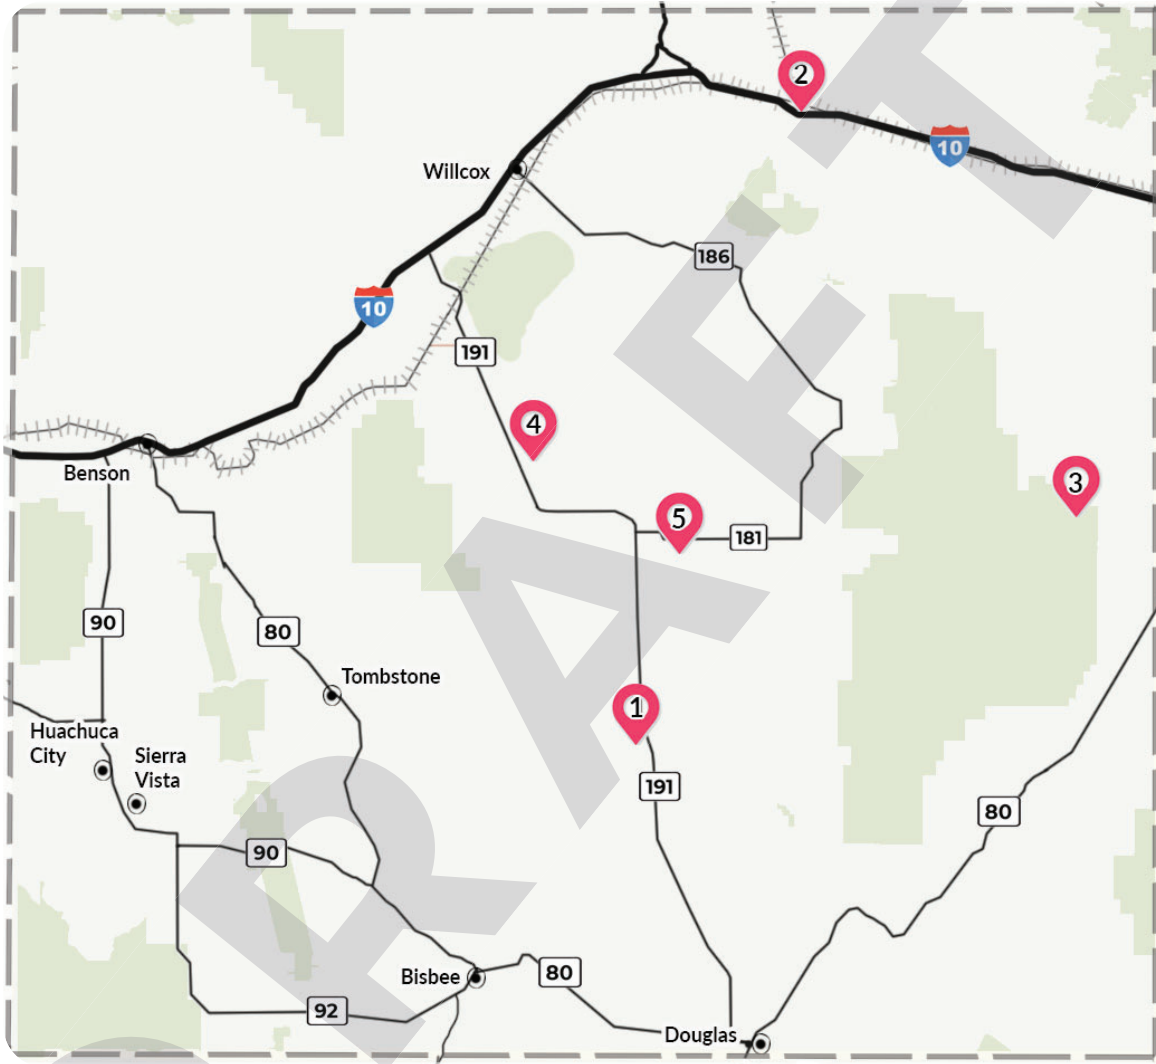

Municipal Libraries

- Benson Public Library
- Copper Queen Library (Bisbee)
- Douglas Public Library
- Huachuca City Public Library
- Sierra Vista Public Library

Cochise County Library District Branches

Notes: County coordinates access through the One County One Card program, allowing residents to borrow from all participating libraries.

PUBLIC SERVICES & FACILITIES GOALS & POLICIES

GOAL 1: Safe, Secure, and Ready Law Enforcement

- Policy 1: Plan for future expansion of detention facilities, guided by community input and funding opportunities.
- Policy 2: Modernize the Cochise County Jail to ensure safety and operational efficiency.

GOAL 2: Strong Fire & EMS Services for Every Community

- Policy 1: Strengthen collaboration with independent fire districts and EMS providers through resource sharing and coordinated planning.
- Policy 2: Integrate emergency management review into all new development proposals to verify adequate road access, hydrant placement, and response times for fire and EMS services, ensuring safety standards are met in both urban and rural areas.
- Policy 3: Help fire districts identify and apply for federal, state, and private grants for equipment, station improvements, and apparatus purchases

GOAL 3: Healthy Communities, Connected Care

- Policy 1: Support hospitals, rural clinics, and Federally Qualified Health Centers to ensure residents have reasonable access to

primary, specialty, and emergency care.

- Policy 2: Ensure transportation planning considers routes to health facilities for ambulances, first responders, and patient access, particularly in rural areas.
- Policy 3: Coordinate land use and infrastructure decisions (e.g., zoning, utilities, road access) to support the siting, expansion, or relocation of healthcare facilities in underserved areas.

GOAL 4: Modern, Humane Animal Services

- Policy 1: Maintain and enforce animal control services, ensuring compliance with state laws and county ordinances.
- Policy 2: Support contracted shelters in Douglas and Willcox while advancing plans for a centralized county animal shelter.
- Policy 3: Partner with nonprofits, including the Cochise County Humane Society, for spay/neuter programs, foster care, and adoption initiatives.

GOAL 5: Libraries & Community Centers for All

- Policy 1: Encourage co-location and multi-use opportunities for community centers and senior centers within libraries.
- Policy 2: Expand programming and outreach to serve all residents, with attention to rural and underserved communities.

HOUSING

ELEMENT

PURPOSE

The housing element serves as a blueprint for addressing housing issues and guiding new residential development. By focusing on housing needs, affordability, quality, sustainability, and inclusivity, this element helps ensure that the housing market supports the well-being of all residents and contributes to the overall health

and vitality of the community.

Cochise County faces several housing challenges. This includes a limited supply of quality housing, infrastructure challenges, substandard housing conditions, and external market pressures which increase home purchase and home rental prices.

EXISTING HOUSING SUPPLY

KEY TAKEAWAYS*

- **Single-Unit Structures:** In Cochise County, 66.9% of housing units are single-unit structures, closely aligning with the national average of 67.4%.
- **Multi-Unit Structures:** The county has 12.7% multi-unit housing, significantly lower than Arizona's 21.1% and the national average of 26.9%.
- **Mobile Homes:** At 19.5%, Cochise County has a higher proportion of mobile homes compared to Arizona (8.9%) and the national average (5.5%).
- **Other Structures:** Boat, RV, van, etc., account for 0.9% in the county, slightly above Arizona's 0.4% and national average of 0.1%.

Table X: Housing Type*

* Source: United States Census Bureau. QuickFacts: Arizona; Cochise County, Arizona. United States Census Bureau website. Accessed February 26, 2025. <https://www.census.gov/quickfacts/fact/table/AZ,cochisecountyarizona/>

EXISTING HOUSE SUPPLY

Table X: Occupied Vs. Vacant Housing*

Approximately 15.4% of housing units are vacant, which is 5% higher than the statewide average of 10.3%. A housing shortage is typically indicated by a vacancy rate below 5%.

Table X: Renter Vs. Owner-Occupied Housing*

The proportion of owner-occupied housing is 1.6% higher than that of Arizona and 4.1% than the national average. This suggests there is stability in the Cochise County housing market.

Source: Census Reporter. Cochise County, AZ. Accessed February 26, 2025.
<http://censusreporter.org/profiles/05000US04003-cochise-county-az/>

EXISTING HOUSE SUPPLY

Table X: Year of Home Construction^Y

The median year of construction of existing homes in Cochise County is 1986. This is similar to the average age of homes in the United States but approximately nine years older than the median age of housing stock in Arizona. Older homes, especially those built before 1970, may have unique architectural features and historical value, potentially enhancing their appeal and value, but they often lack energy-efficient features and may have higher maintenance costs.

Overall, while Cochise County has a diverse housing stock, single-family homes constitute a significant majority of the housing stock (66.9%), followed by manufactured homes (19.5%). This distribution suggests a preference for traditional, detached housing units, which is likely influenced by the rural nature of the county.

Moreover, between 1990 and 2000 manufactured home installation increased by 56.9%*. The substantial rise in manufactured homes suggests a trend toward more affordable and flexible housing options during that period.

* Source: Point2Homes. Cochise County, AZ Household Income, Population & Demographics. Accessed February 26, 2025. <https://www.point2homes.com/US/Neighborhood/AZ/Cochise-County-Demographics>

* Source: Arizona Department of Housing. (n.d.). Cochise County housing profile. Retrieved February 26, 2025, from <https://housing.az.gov/sites/default/files/documents/files/hpCOCHISE%2520COUNTY.pdf>

HOUSING AFFORDABILITY

Table X: Value of Owner-Occupied Housing ^Y

The median owner-occupied housing value in Cochise County of \$207,400 is significantly lower than both the statewide average of \$411,200 and nationwide average of \$340,200.

The U.S. Department of Housing and Urban Development defines “affordable housing” as housing in which the occupant is paying no more than 30 percent of gross income for housing costs, including utilities. Exceeding that threshold may classify a household as “cost-burdened,” potentially limiting the occupant’s ability to afford other necessities. As indicated by Table X: Value of Owner-Occupied Housing, Cochise County has a relatively low median home value cost.

However, more recent housing market trends indicate that as of January 2025, the median listing home price in Cochise County was \$315,000, reflecting a 6.4% increase from the previous year. Despite rising prices, the county is considered a buyer’s market, with homes typically selling below the asking price and remaining on the market longer.*

HOUSING SUBMARKETS

RENTAL MARKET

Renters are significantly more cost-burdened than homeowners in Cochise County. Regardless of the apartment size, renters that are paid an average wage are likely to experience housing insecurity and difficulties paying for basic necessities when compared with non-renters.

While the Housing Authority of Cochise County (HACC) administers several programs, including the Housing Choice Voucher Section 8 Program, Family Self-Sufficiency (FSS), and Veterans Affairs Supportive Housing (HUD-VASH), it does not own any public housing. Consequently, HACC must rely on private landlords to accept housing vouchers, which can limit the availability of affordable housing options for low-income residents. Rental units are also subject to market conditions. In tight housing markets, voucher holders may struggle to find suitable accommodations.

FORT HUACHUCA

Fort Huachuca offers on-post and off-post housing options for military personnel and their families. The installation's housing is managed through a partnership with Mountain Vista Communities (MVC), which oversees on-post family housing.

QUICK FACTS*

- Median household income in Cochise County is \$52,025 (2019-2023)
- Median value of owner-occupied housing units is \$235,200, with median monthly owner costs (with a mortgage) at \$1,343.
- 24.1% of homeowners with a mortgage spend more than 30% of their income on housing.
- 31% percent of households in Cochise County are renters. For renters, the median gross rent is \$939 per month.
- 46% of renters spend more than 30% of their income on housing.

On-Post housing: Fort Huachuca provides 1,954 family housing units, with 218 designated for officers and 1,736 for enlisted personnel. Active duty military members with dependents from all service branches assigned to Fort Huachuca are eligible for these housing units.*

Off-post housing: Military members and their family may also chose to live off-post. The Fort's Housing Services Office provides resources and assistance for personnel seeking off-post accommodations.

* Source: Military Installations. Fort Huachuca Housing Info & Resources. U.S. Department of Defense. <https://installations.militaryonesource.mil/military-installation/fort-huachuca/housing/housing>. Accessed March 10, 2025.

FEDERAL, STATE, & LOCAL HOUSING FUNDS

COMMUNITY DEVELOPMENT BLOCK GRANTS (CDBG)

The Community Development Block Grant (CDBG) program is a federal initiative funded by the U.S. Department of Housing and Urban Development (HUD) to support community development projects that benefit low- and moderate-income individuals. In Arizona, the program is administered by the Arizona Department of Housing (ADOH).

The CDBG Regional Account (RA) comprises 85% of Arizona's allocation from HUD. These funds are distributed non-competitively to rural cities, towns, and counties in Arizona. Each regional Council of Governments (COG) develops a Method of Distribution (MOD) to determine fund distribution within its region. The regional COG in Cochise County is the SouthEastern Arizona Governments Organization (SEAGO). SEAGO's region encompasses Cochise, Graham, Greenlee, and Santa Cruz Counties.

Within SEAGO's jurisdiction, CDBG funds are allocated based on a rotation system among sub-regions, pursuant to the MOD. This system ensures that each sub-region receives funding in a structured sequence over the specified fiscal years.

In Cochise County, CDBG funds are currently dedicated towards county-administered programs, like owner-occupied housing rehabilitation and emergency home repairs. Specifically, the county's Emergency Home Repair Program offers financial assistance

to eligible homeowners facing urgent repair needs to ensure their homes' safety and livability.

In the future, the county could consider allocation of CDBG funds towards a wider array of options, such as development associated with new affordable housing and infrastructure improvements.

HOME INVESTMENT PARTNERSHIP PROGRAM (HOME)

Administered by the U.S. Department of Housing and Urban Development (HUD), the HOME program offers grants to states and localities to fund activities such as building, buying, and rehabilitating affordable housing for rent or homeownership.

RURAL HOUSING SERVICE (RHS)

The Rural Housing Service (RHS), a division of the U.S. Department of Agriculture's Rural Development, offers various programs aimed at improving housing conditions and fostering economic growth in rural areas.

LOW-INCOME HOUSING TAX CREDIT (LIHTC)

The low-income housing tax credit program is a federal program, administered at a state level, that incentivizes private investment in affordable rental housing by providing tax credits to developers. These credits are typically claimed over a 10-year period.

* Source: SouthEastern Arizona Governments Organization. What is CDBG? <https://www.seago.org/what-is-cdbg>. Accessed March 12, 2025.

FEDERAL, STATE, & LOCAL HOUSING FUNDS

However, recent legislative initiatives, such as Governor's proposal to extend the state's LIHTC, aim to enhance the effectiveness of this program in addressing Arizona's housing.

ARIZONA HOUSING TRUST FUND

This state-established fund allocates resources for affordable housing projects, including new construction, rehabilitation, and emergency repairs.

ARIZONA DEPARTMENT OF HOUSING (ADOH)

ADOH administers various programs to promote affordable housing, including the State Housing Fund (SHF), which combines federal HOME funds with state resources to support housing projects, the Arizona Housing Trust Fund (HTF), and the Weatherization Assistance Program (WAP).

ARIZONA INDUSTRIAL DEVELOPMENT AUTHORITY (IDA)

The Arizona Industrial Development Authority (Arizona IDA) is a state-established entity dedicated to enhancing Arizona's economic development through the issuance of taxable and tax-exempt bonds. By acting as a conduit between private borrowers and investors, the Arizona IDA helps reduce financing costs for various projects, including affordable housing. Specifically, this entity administers the Arizona is Home Mortgage Assistance Program, Mortgage Revenue Bond Program, and Home

Plus Program.

SECTION 8 HOUSING CHOICE VOUCHER PROGRAM

The Housing Authority of Cochise County (HACC) administers the Section 8 Housing Choice Voucher Program to assist very low-income families, the elderly, and individuals with disabilities in obtaining affordable, safe, and sanitary housing within Cochise County, Arizona. Participants receive subsidies that cover the difference between 30% of their monthly adjusted income and the payment standard, directly paid to the landlord.

THE COUNTY'S ROLE

Cochise County plays a pivotal role in administering and distributing various federal, state, and local housing funds to enhance affordable housing and community development. Specifically, as previously mentioned, the Housing Authority of Cochise County directly administers several key programs including the Section 8 Housing Choice Voucher Program. The County also collaborates with the Arizona Department of Housing to administer their various programs and coordinates with the Southeastern Arizona Governments Organization (SEAGO), on rotation, for CDBG funds.

In addition, the county is currently developing an Affordable Housing Plan. This will serve as a strategic framework guiding access to

* Source: SouthEastern Arizona Governments Organization. What is CDBG? <https://www.seago.org/what-is-cdbg>. Accessed March 12, 2025.

FEDERAL, STATE, & LOCAL HOUSING FUNDS

safe and affordable housing for low- and moderate-income individuals and families. It will assess current and future housing

needs, set clear goals, guide future policy development, recommend allocation of resources, and promote partnerships.

COLONIAS

In Arizona, a colonia refers to a specific type of community designated by the Arizona Department of Housing (ADOH)

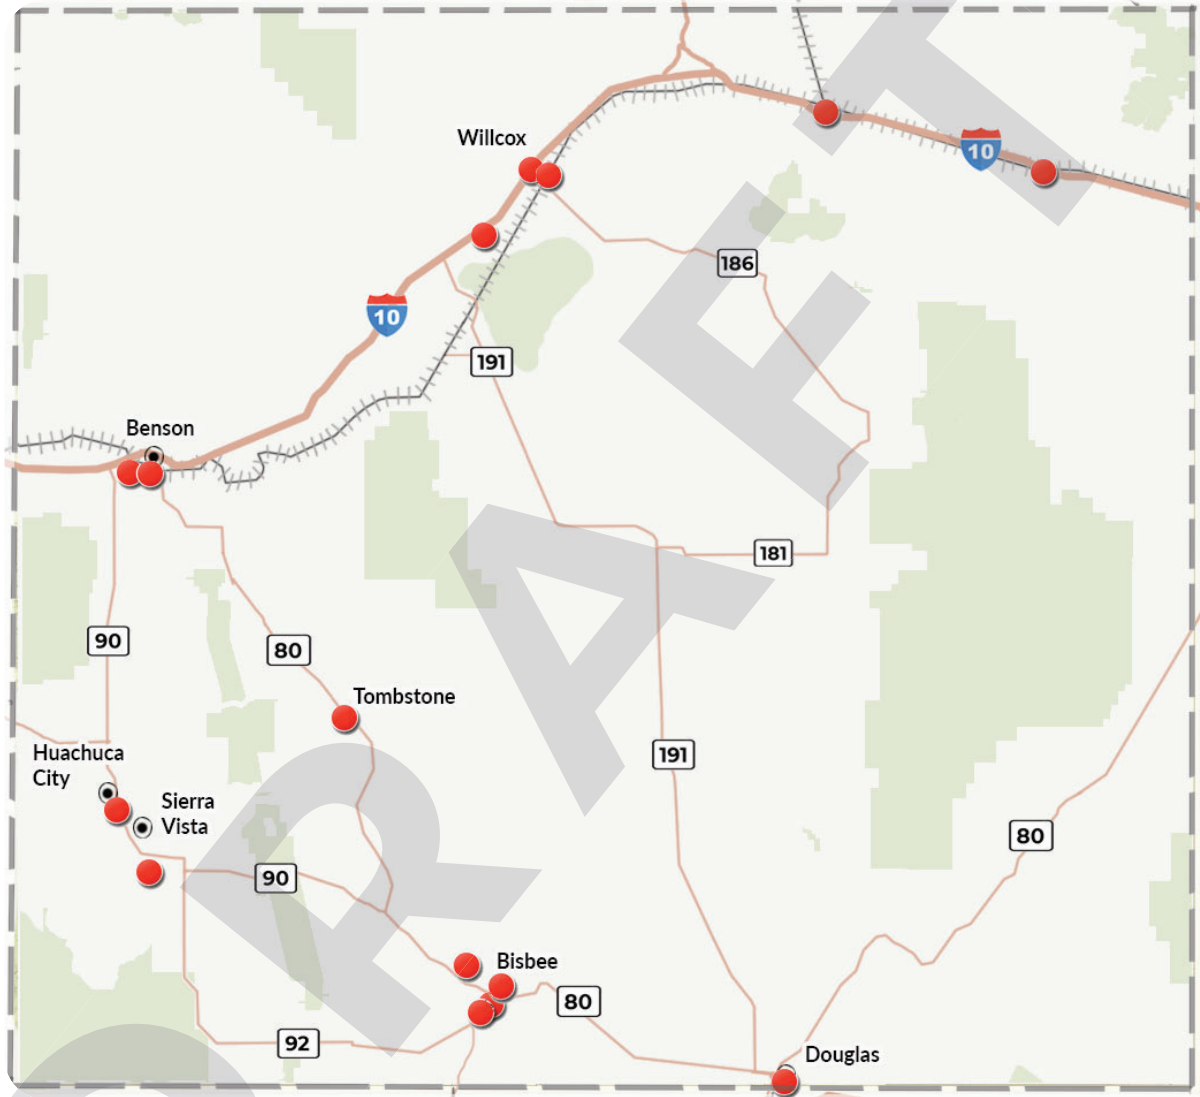

based on criteria established under federal legislation, particularly Section 916 of the Cranston-Gonzalez National Affordable Housing Act of 1990. Colonias are located within 150 miles of the U.S.-Mexico border and are characterized by certain deficiencies in infrastructure and housing quality. The community must have existed as a colonia before November 28, 1990. The colonia designation enables these communities to access specific federal and state resources aimed at improving living conditions. For example, Arizona is required to allocate 10% of its annual Community Development Block Grant (CDBG) funds to benefit colonias, focusing on enhancing infrastructure and housing quality.

Cochise County currently has 15 colonias. Their general location is indicated on Map X.

GOALS & POLICIES

GOAL 1: Safe, Healthy, and Energy-Efficient Homes

- Policy 1: Offer owner-occupied housing rehabilitation for low- and moderate-income homeowners to address essential repairs and safety upgrades, using available CDBG
- Policy 2: Promote programs and rebates that help income-eligible households reduce energy bills through home efficiency improvements, including online outreach and application support.
- Policy 3: Partner with nonprofits, such as Habitat for Humanity, to provide painting, landscaping, weatherization, and minor repairs for eligible property owners.
- Policy 4: Provide targeted administrative support to colonia residents to help navigate grant applications and access available resources.

GOAL 2: Build Smart, Live Green

- Policy 1: Lead by example by retrofitting county-owned buildings with energy-efficient upgrades and sustainable materials.
- Policy 2: Adopt building codes and/or building code amendments that encourage

energy-efficient designs, sustainable materials, and renewable energy integration.

GOAL 3: Homes for Every Budget

- Policy 1: Identify publicly owned or underutilized land in unincorporated Cochise County suitable for affordable housing.
- Policy 2: Adjust zoning regulations, as needed, to remove barriers to affordable housing development.

GOAL 4: Revitalize Our Neighborhoods

- Policy 1: Direct CDBG funds, as available, to infrastructure improvements—such as street paving, enhanced lighting, or pocket parks—in eligible areas.

GOALS & POLICIES

- Policy 2: Focus code compliance efforts on rehabilitating or removing dilapidated and unsafe structures in distressed areas.
- Policy 3: Provide additional free access to solid waste transfer stations to residents in economically distressed areas.
- Policy 4: Apply proactive code enforcement in revitalization areas while supporting neighborhood cleanups and community engagement.
- Policy 5: Explore the creation of a Solid Waste District or similar program to provide consistent curbside pickup, recycling, and bulk waste services in underserved and economically distressed

areas, improving public health, safety, and neighborhood quality of life.

GOAL 5: Affordable Homes for Renters

- Policy 1: Promote the availability of rental assistance programs and community support services through online outreach.
- Policy 2: Implement strategies from the Cochise County Affordable Housing Plan to reduce renter cost burdens and housing insecurity.
- Policy 3: Update county regulations and policies as needed to align with ongoing state legislation supporting affordable housing.

ECONOMIC

DEVELOPMENT ELEMENT

8: Economic Development Element

PURPOSE

The purpose of the economic development element is to establish policies and strategies that foster a robust and diversified economy. Although optional, this element specifically aims to:

- Attract and retain businesses: Implement initiatives to draw new businesses and support the retention and expansion of existing ones.
- Enhance employment opportunities: Develop programs that create jobs and improve workforce skills to meet market demands.
- Improve quality of life: Invest in infrastructure, education, and community services to enhance living standards, making the area more appealing to residents and businesses alike.

- 100-199
- 5-99

Cochise County's employment landscape reflects its rural character, with significant reliance on government and healthcare sectors. In addition, the prominence of Fort Huachuca means that a substantial portion of Cochise County's workforce is concentrated in public administration and defense-related roles.

Please see <https://geo.azmag.gov/maps/azemployer> for the most detailed and up-to-date information.

MAJOR INDUSTRIES & EMPLOYERS

FORT HUACHUCA

Fort Huachuca, established in 1877, is an Army installation located within Sierra Vista city limits and the largest employer in Cochise County. It currently houses the U.S. Army Intelligence Center and the Network Enterprise Technology Command, serving as a hub for military intelligence and communications. It is also the primary location for developmental testing of all the Army's communication electronics systems and the operational testing of all intelligence electronic warfare systems.

Fort Huachuca also encompasses 946 square miles of restricted airspace and 2,500 square miles of protected electronic ranges.

MINING

The mining industry significantly contributes to Cochise County's economy. A 2014 Economic Impact of the Excelsior Mining Corporation on Cochise County and the State of Arizona, found that \$319.9 million in State revenue was generated directly from the project, and \$756.8 million in economic activity was generated in Cochise County alone. Statewide, the mining industry remains a major economic driver. In 2020, mining activities in Arizona generated close to 48,000 direct and indirect jobs, with mining

Source: The Maguire Company and Elliott D. Pollack & Company. Economic Impact of Arizona's Principal Military Operations. Prepared for the State of Arizona Military Affairs Commission, 2023. Accessed March 14, 2025. https://dema.az.gov/sites/default/files/2023-11/2023_

QUICK FACTS*

- Fort Huachuca supports a combined workforce and retiree community of 19,644 individuals.
- In the fiscal year 2022, Fort Huachuca's payroll amounted to approximately \$1.66 million.
- The fort's operations contributed an estimated \$4.3 billion to Arizona's economy in 2022.
- Approximately 3,188 military retirees reside within a 50-mile radius of Fort Huachuca.

positions being among the highest-paying in the state.

Future Outlook: Although the agricultural and military sectors are more significant contributors to the local economy, the future of mining in Cochise County appears promising. This is helped by the increasing demand for copper driven by advancements in technology and renewable energy. Copper's essential role in electrical applications positions the county to benefit from this growing demand. Projects like the

Source: Excelsior Mining Corp. (2014). Excelsior reaffirms positive economic impact of Gunnison project. Gunnison Copper. Retrieved January 24, 2025, from <https://www.gunnisoncopper.com/news/news-2014/excelsior-reaffirms-positive-economic-impact-of-gunnison-project>

MAJOR INDUSTRIES & EMPLOYERS

Gunnison Copper mine could see expansion if market demand remains strong. Arizona is increasingly exploring critical minerals like lithium, rare earth elements, and cobalt, which are essential for high-tech and green energy applications. In 2024, MAX Power Mining Corp. announced the discovery of near-surface lithium-rich clays over a broad area of state-leased ground near the Willcox Playa. As of the drafting of this plan, the ongoing drilling and analysis, aimed at assessing the area’s potential for large-scale lithium extraction was still underway.X

Excelsior Mining is actively developing copper mining projects in Cochise County, notably the Johnson Camp Mine and the forthcoming Gunnison Copper project. These initiatives are expected to generate substantial economic benefits for the region. According to a 2014 economic impact report, the production phase of the mine could contribute approximately \$35.9 million annually to Cochise County’s Gross State Product (GSP).

AGRICULTURE

Agriculture has always been a cornerstone of the Cochise County economy. In 2022, there were 1,002 farms in Cochise County.

Cochise County ranks in the

QUICK FACTS*

- **Market Value:** In 2022, the total market value of agricultural products sold in Cochise County reached \$340.5 million, marking a 135% increase from 2017
- **Farm Size:** In 2022, the average farm size expanded to 1,034 acres, up 15% from 899 acres in 2017
- **Product Sales:** Crops accounted for 66% of agricultural sales, while livestock contributed 34%.
- **Cochise County’s top crop items in 2022, by acreage, were corn for grain; forage (hay/haylage); pecans; and pistachios. Top livestock inventory were cattle and calves, layers, horses and ponies, and goats.**

MAJOR INDUSTRIES & EMPLOYERS

Table X: Employment by Sector^Y

Nearly half of all jobs in Cochise County are supplied by the government, primarily due to Fort Huachuca's presence.

top 10% of all U.S. counties for total crop sales and in the top 8% for vegetable sales.* Agriculture faces several challenges. Agriculture in Cochise County relies heavily on groundwater. Over-extraction, particularly by large-scale farming operations, has led to declining water tables. Proposed regulations

to manage groundwater use have raised concerns among farmers. While aiming to prevent resource depletion, these regulations may limit water availability for irrigation, challenging traditional farming practices.

INCOME & COST OF LIVING

Table X: Median Household Income

The median household income for Cochise County is \$52,025. This is two-thirds of the average for Arizona (\$77,315). The median per capita income is \$29,608, which is three-quarters of the average for Arizona (\$41,290). Moreover, approximately 15.9% of the county population live below the poverty line. This is 25% higher than the statewide level of 12.5%.

Although median household earnings are lower in Cochise County when compared to state and national levels, the county offers a notably affordable living environment. Key aspects of affordability include:

Overall Cost of Living:

- Typical expenses of Cochise County residents are 15.2% lower than the U.S. average and 20.3% lower than Arizona’s average.

Income Requirements:

- Single Person: Recommended annual income of \$31,200 to cover basic expenses comfortably.
- Family: Suggested annual income of \$42,840 for a similar standard of living.X

MAJOR PROJECTS & INFRASTRUCTURE

A NEW PORT OF ENTRY

One of the largest infrastructure projects underway is the construction of a new port of entry in unincorporated Cochise County west of Douglas. A port of entry is a facility that provides controlled entry into, or departure from, the United States for people or materials. Ports of entry house the U.S. Customs and Border Protection and other federal inspection agencies responsible for enforcing federal laws.

Arizona has ports of entry into the United States in six locations along its border with Mexico. The Douglas port of entry is the second-largest commercial port in the state. It is also the sole port of entry between the cities of Douglas and Agua Prieta. Unlike the San Luis and Nogales ports of entry, where commercial and non-commercial traffic is separated, both modes of traffic currently compete at the Douglas port.

Raul Hector Castro Port Of Entry: Douglas is currently served by the Raul Hector Castro Port of Entry, which was originally constructed in 1933. Although this port was subsequently expanded in 1993, more is needed to adequately meet traffic demands and U.S. Customs and Border Protection requirements. Funding has been dedicated to increasing inspection capacity and modernizing the facility.

A Two-Port Solution: A second commercial port of entry in the Douglas area will improve

safety, security, and overall operations at the border. It will simultaneously reduce:

- Overcrowding and commercial truck traffic in downtown Douglas;
- Queuing times for everyone, heading north or south; and
- Conflicts between commercial trucks and non-commercial vehicles will increase pedestrian safety.

Economic Impact: The development of a new port of entry is significant due to its

MAJOR PROJECTS & INFRASTRUCTURE

multifaceted impact on trade, local economies, infrastructure, and border security.

The addition of a new port of entry and the renovation of the existing port in Douglas are estimated to bring an additional \$10.8 - \$20 million per year in revenue to the region. Initially, approximately 110 new employees will be needed, which could double within the decade. The improvements are anticipated to increase traffic at the local Bisbee-Douglas International Airport, boost the student population at the nearby Cochise College campus, and increase demand for residential housing in the immediate area. Construction work is scheduled to begin in late 2025 and reach substantial completion Fall 2028.

BROADBAND

Access to broadband internet is crucial for economic development, serving as a catalyst for growth, innovation, and competitiveness. Cochise County is committed to expanding broadband availability to ensure our residents and businesses have the connectivity they need. Here's why broadband matters:

- **Education:** In today's world, education often relies on digital resources, whether it's online courses, research materials, or interactive learning platforms. Broadband connectivity ensures that students have equal access to educational resources, regardless of their location.
- **Economic Development:** Access to broadband opens doors for economic opportunities. Businesses can reach wider markets, entrepreneurs can launch

innovative startups, and remote work becomes feasible. By bridging the digital divide, broadband fosters economic growth and job creation. Moreover, Regions with comprehensive broadband infrastructure are more attractive to investors and companies seeking reliable digital connectivity.

- **Healthcare:** Telemedicine has revolutionized healthcare delivery, allowing patients to consult with healthcare providers remotely. Broadband enables seamless video consultations, remote monitoring, and access to medical records, especially in rural areas where healthcare facilities may be scarce.

Community Engagement: From participating in online forums to accessing government services, broadband empowers communities to stay informed and engaged. It facilitates communication with elected officials, access to online resources, and community-driven initiatives. services to enhance living standards, making the area more appealing to residents and businesses alike. Over the next decade, both Arizona and Cochise County are implementing comprehensive strategies to enhance broadband access to residents and business owners. This includes participation in numerous federal and state-led efforts including:

- **Broadband Equity, Access and Deployment (BEAD)** program is a significant federal initiative established under the Infrastructure Investment and Jobs Act of 2021 which prioritizes bringing internet

MAJOR PROJECTS & INFRASTRUCTURE

access to unserved and underserved communities through infrastructure improvements.

- American Rescue Plan Act (ARPA) was a federal stimulus package enacted to address the economic and health impacts of the COVID-19 pandemic. Cochise County has dedicated a portion of its ARPA funds to enhance broadband infrastructure.
- The Arizona Broadband Development Grant (ABDG) Program is a state initiative designed to expand high-speed internet access across Arizona.

In areas that are ineligible for BEAD funding, which includes “served” locations where broadband services meet or exceed speeds of 100 megabits per second (Mbps) download and 20 Mbps upload, the county can use other strategies, such as collaborating with Internet Service Providers (ISPs) to invest in and expand broadband services, leveraging both public funds and private sector expertise. In 2025, Cochise County used a portion of its remaining ARPA funds for this purpose. There are also state grant programs, like the Arizona Broadband Development Grant Program, which aims to improve connectivity in unserved and underserved areas across the state.

Table X: Current Broadband Coverage

- Served: Access to access to broadband speeds of 100 megabits per second (Mbps) download, 20 Mbps upload, or higher
- Underserved: Broadband is available but no facilities-based provider offers service at speeds of at least 100 Mbps download and 20 Mbps upload
- Unserved: Either no broadband connectivity at all or internet service with speeds less than 25Mbps download and 3 Mbps upload

TAX CREDITS & INCENTIVES

FILM PRODUCTION

Arizona's Motion Picture Production Program (MPPP) is a refundable tax credit program that allows production companies the opportunity to recapture a percentage of qualified production expenses spent in Arizona to produce more than 50% of their movie, television show, commercial, or music video at a Qualified Production Facility and/or at a Practical Location beginning January 1, 2023.*

OPPORTUNITY ZONES

Opportunity Zones are federally designated areas that are intended to spur economic development by offering tax incentives to investors who reinvest capital gains into these zones through Qualified Opportunity Funds. The primary benefits include deferral, reduction, and potential elimination of capital gains taxes, depending on the investment's duration.

In Cochise County, Arizona, four Opportunity Zones have been designated, collectively encompassing approximately 14,000 residents, which is about 11% of the county's total population.

BROWNFIELD PROGRAMS

A brownfield is a site which has remained unused or underused due to real or perceived environmental contamination; often a site of

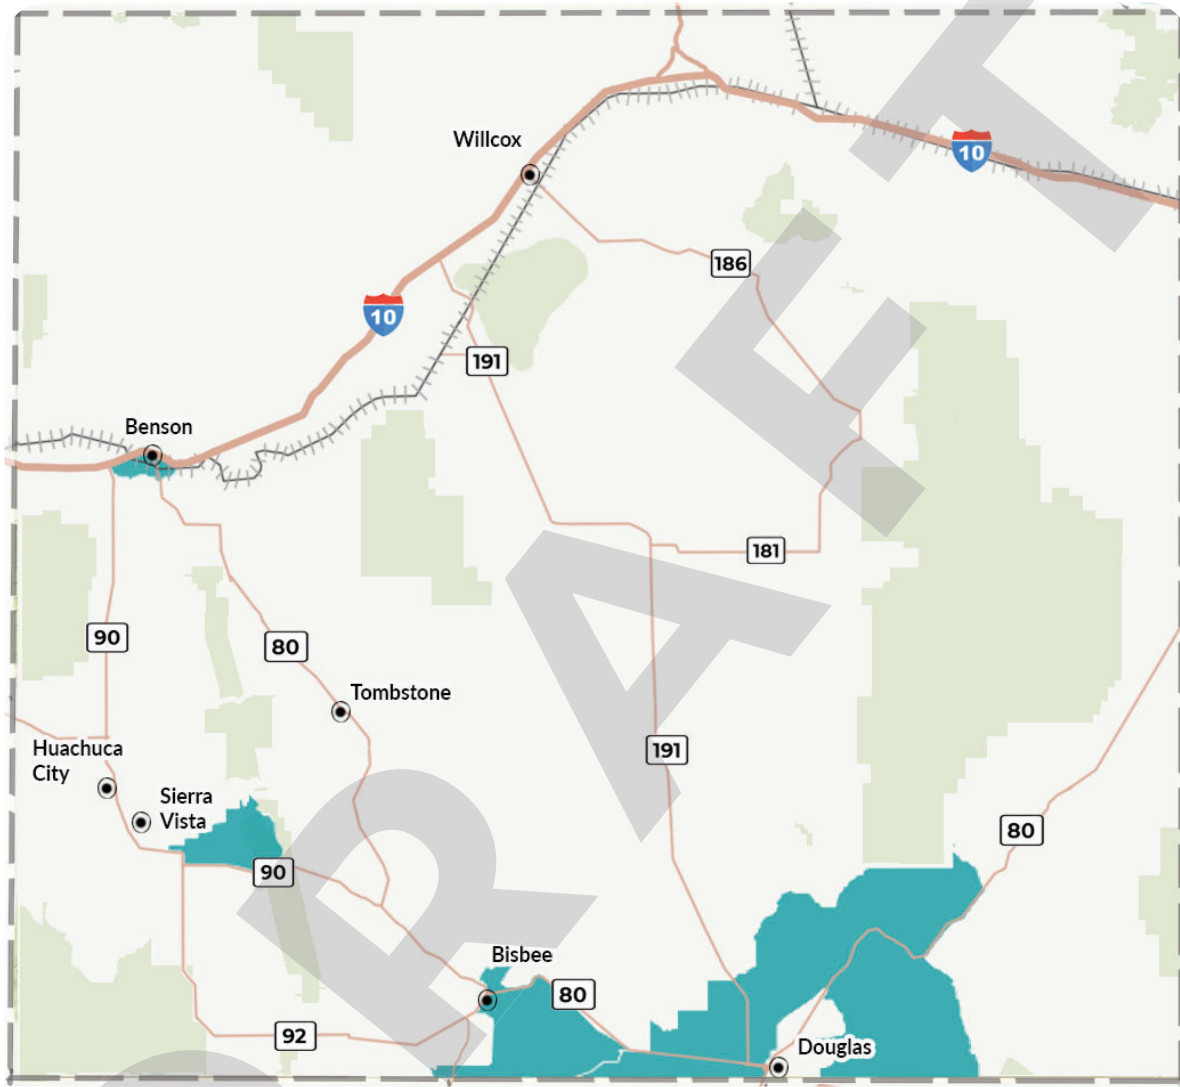

previous industrial use. In Cochise County, Arizona, the EPA's Brownfields Program has been instrumental in supporting local redevelopment efforts. Since 2019, the county has secured multiple grants, including two Brownfields Assessment Grants and Brownfield Revolving Loan Fund (BRLF) Grants, totaling \$2.1 million.

The EPA's Brownfield Assessment Grants provide funding to local governments and organizations to identify contaminated or potentially contaminated properties for redevelopment. These grants support environmental site assessments, cleanup planning, and community engagement to revitalize underutilized properties and promote economic growth. In Cochise County, the EPA awarded an initial \$600,000 Brownfield

TAX CREDITS & INCENTIVES

Assessment Grant in 2019, followed by an additional \$500,000 in 2022.

The Brownfields Revolving Loan Fund (BRLF) assists in the actual cleaning up and redeveloping of brownfield sites—properties where redevelopment is complicated by the presence of hazardous substances or pollutants. These grants enable recipients to establish revolving loan funds, providing no-interest or low-interest loans and subgrants for the remediation of contaminated sites.

In summary, Assessment Grants identify problems and plan solutions, while RLF Grants fund their cleanup to make redevelopment possible. Both programs, which are currently available in Cochise County, work together to transform brownfield sites into productive properties.

GOALS & POLICIES

GOAL 1: Power Up the Economy – Support Military & Defense Jobs

- Policy 1: Strengthen collaboration with Fort Huachuca and associated federal programs to support workforce development, technology testing, and innovation.
- Policy 2: Encourage local business partnerships and service providers to leverage Fort Huachuca’s economic impact.
- Policy 3: Promote programs that retain and attract military-related contractors and high-tech businesses to the region.

GOAL 2: Digging for Success – Expand Mining & Resource Opportunities

- Policy 1: Support environmentally responsible development of existing and new mining operations, including copper and critical minerals.
- Policy 2: Coordinate with state and federal agencies to streamline permitting, environmental review, and workforce readiness for mining projects.
- Policy 3: Promote local supply chain participation and community benefits from mining activities, including job creation and training.

GOAL 3: Grow Our Fields – Strengthen Agriculture & Rural Enterprise

- Policy 1: Support sustainable water

use and irrigation practices to maintain productive farmland while conserving aquifers.

- Policy 2: Promote local food production, agribusiness, and value-added processing to enhance economic diversification.
- Policy 3: Provide technical assistance, education, and grant opportunities to small and family-owned farms to improve competitiveness and resilience.

GOAL 4: Border Opportunities – Maximize Ports of Entry & Trade

- Policy 1: Facilitate the development of the new Douglas port of entry and modernization of existing facilities to increase trade efficiency.
- Policy 2: Support infrastructure improvements, including roads, utilities, and connectivity, to accommodate increased commercial activity.
- Policy 3: Leverage border trade to create local employment opportunities and stimulate business growth in adjacent communities.

GOAL 5: Connect & Compete – Expand Broadband Access Countywide

- Policy 1: Coordinate public and private investments to improve broadband coverage in unserved and underserved areas.
- Policy 2: Promote digital literacy programs and workforce training to enable residents

GOALS & POLICIES

and businesses to benefit from broadband expansion.

- Policy 3: Integrate broadband planning into economic development strategies, supporting education, healthcare, and entrepreneurship.

GOAL 6: Film & Fame – Grow the Creative Economy

- Policy 1: Promote the Arizona Motion Picture Production Program and Cochise County locations to attract film, TV, and commercial production.
- Policy 2: Develop local support services, workforce training, and incentives for film production in the county.
- Policy 3: Encourage collaboration with municipalities, tourism agencies, and educational institutions to maximize economic benefits from creative industries.

GOAL 7: Build Skills, Build Jobs – Workforce Development & Training

- Policy 1: Support partnerships between schools, colleges, employers, and trade programs to align workforce skills with industry needs.
- Policy 2: Encourage apprenticeships, internships, and workforce training programs in emerging sectors, including technology, renewable energy, and advanced manufacturing.
- Policy 3: Focus on retention strategies that keep skilled workers in Cochise County to support local economic growth.

9

**AMENDMENTS &
IMPLEMENTATION**

PURPOSE

The Cochise County Planning and Zoning Commission, the Board of Supervisors, and any other County department, commission, official, or employee acting in an advisory capacity to the Board of Supervisors shall consult, consider, and generally be guided by this Comprehensive Plan. The Cochise County Zoning Regulations, Subdivision Regulations, building code, and other ordinances affecting growth and land use in Cochise County shall be written or amended to implement the Comprehensive Plan.

This section of the plan outlines the process to

modify the Comprehensive Plan, in a manner that ensures adaptability to meet changing needs of property owners and compliance with state law. Specifically, this section will:

- define what constitutes a major amendment,
- provide amendment procedures for both staff and applicant-initiated amendments,
- list review criteria for amendment consideration, and
- establish record-keeping and periodic implementation assessment.

AMENDMENTS

The Comprehensive Plan may be amended periodically to respond to changes in growth patterns, development needs, or public policy. Amendments to Growth Area Categories and Plan Designations are intended to:

1. Protect the existing character of an area.
2. Ensure that amendments are justified by specific evidence showing that the current land use category no longer reflects the actual or projected growth patterns.

Unless such evidence is provided, the presumption favors retaining the existing category.

AMENDMENT CONSIDERATIONS

When considering a change to a land use category, the following factors shall be evaluated:

1. Infrastructure and Services: Availability of roads, water, sewer, and utilities to serve the proposed development.
2. Land Use Patterns: Existing zoning, land use, and density compared to the surrounding area.
3. Compatibility with Surrounding Areas: How well the proposed land use fits with nearby uses, including buffers and transitions
4. Development Plans: Whether a detailed plan or master development plan is submitted and complete.
5. Community Input: Input from property owners, neighbors, and local organizations, including written comments and endorsements.

AMENDMENTS

MAJOR AMENDMENT DEFINITION

The Planning Commission may initiate amendments or new elements of the Comprehensive Plan on its own motion or upon application by interested parties. The Board of Supervisors will schedule a hearing on a major amendment at the first available meeting following completion of the required public participation and Planning Commission review process.

A major amendment, as defined in ARS §11-805, is any change that results in a substantial alteration of the county's land use mixture or balance in the affected area.

- A "substantial alteration" is an amendment that increases potential densities or intensities of use across 2,000 acres or more.

APPLICATION TIMELINE

The Planning Commission may initiate amendments or new elements of the Comprehensive Plan on its own motion or upon application by interested parties. The Board of Supervisors will schedule a hearing on a major amendment at the first available meeting following completion of the required public participation and Planning Commission review process.

MAJOR AMENDMENT NOTIFICATION REQUIREMENTS

Applicants must notify, and if requested, meet with:

- All municipalities in Cochise County

- Contiguous counties
- Regional planning agency (SEAGO)
- Arizona Commerce Authority or designated state planning agency.
- Department of Water Resources (for water element amendments).
- Military airports or ancillary facilities if the amendment affects their vicinity.
- Attorney General for areas in high-noise or accident potential zones near military airports.
- Any person or entity requesting a review copy in writing.

Notices must include the amendment application, supporting documentation, and instructions for submitting comments.

MINOR AMENDMENT NOTIFICATION REQUIREMENTS

Applicants must notify adjacent and potentially impacted property owners:

- Within the subject property area.
- Within 1,500 feet (rural areas) or 1,000 feet (urban areas) of the subject property boundary.

PUBLIC HEARINGS

1. After review of agency and public comments, the Planning Commission shall hold at least one public hearing. Notice

AMENDMENTS

- must be published 15–30 days in advance in newspapers of general circulation.
2. The Commission submits its recommendation to the Board of Supervisors.
 3. The Board shall hold at least one public hearing, considering the Commission’s recommendation, agency feedback, and public input.
 4. Protests or objections may be considered. If changes are proposed, the affected portion shall be referred to the Commission for recommendation before final action.
 5. Adoption or re-adoption of the Comprehensive Plan or any amendment shall be by resolution of the Board by an affirmative vote of at least two-thirds of Board members.

A1

APPENDIX

KEY TERMS

KEY TERMS

Access: The means for pedestrians, vehicles, and other travel modes to enter or leave a property.

Access Management: A set of policies and standards that manage the number and location of access points on the public road system.

Acre: A measure of land containing 43,560 square feet.

Adaptive Reuse: Rehabilitation or renovation of existing buildings or structures for any use other than the present use.

Affordable Housing: Housing that has a sale price or rental amount that is within the means of a household that may occupy middle-, moderate-, or low-income housing.

Aggregate Material: A category of raw material such as sand, gravel and stone that is used for construction purposes

Agricultural Lands: Lands used primarily for raising crops, forage and livestock.

Agritourism: Tourism that focuses on the enjoyment of, or education about, agricultural and ranching activities.

Airport: Any area of land or water designed and set aside for the landing and take-off of aircraft, including all necessary facilities for the housing and maintenance of aircraft.

All-Terrain Vehicle (ATV): Any motorized, off-road vehicle 50 inches or less in overall width, having a dry weight of 600 pounds or less, designed to travel on three or more low pressure tires, having a seat designed to be straddled by the operator and handle bars for

steering control.

Amendment: A formal revision, addition or suggested change made to an existing plan or statute.

Annexation: The process by which cities extend their municipal services, regulations, voting privileges, and taxing authority to new territory.

Aquifer: An underground geologic formation that contains sufficient saturated, permeable material to yield significant quantities of groundwater to wells and springs.

Area Plan: A plan that covers specific subareas of the county.

Arizona Corporation Commission (ACC): The state agency with regulatory responsibility for incorporation, securities, railroad and pipeline safety, and utilities.

Arizona Department of Environmental Quality (ADEQ): The agency with regulatory responsibility for air and water quality, as well as for the storage, treatment, and disposal of solid and hazardous waste.

Arizona Department of Transportation (ADOT): The agency responsible for developing, operating, and maintaining the state and federal highway infrastructure.

Arizona Department of Water Resources (ADWR): The agency with regulatory responsibility for managing surface water and groundwater resources in Arizona.

Arizona Game & Fish Department (AGFD): The agency charged with conserving,

KEY TERMS

Arterial Roadway: Roadways designed to carry longer trips across the region and to other regions.

Average Daily Traffic (ADT): The average number of vehicles passing a fixed point during a 24-hour timeframe used for measuring traffic volume.

Bike Lane: A linear corridor expressly reserved for bicycles, existing on a street or roadway in addition to any lanes for use by motorized vehicles.

Blight: The process whereby a previously functioning city, or part of a city, falls into disrepair and decrepitude

Board of Supervisors (BOS): The three elected officials, each representing a geographic district, that govern Cochise County.

Brownfields: A site which has remained unused or underused due to real or perceived environmental contamination; often a site of previous industrial use.

Bureau of Land Management (BLM): The federal agency within the U.S. Department of the Interior that administers 262 million acres of America's public lands, located primarily in 12 western states.

Collector Roadway: Typically, a rural route of primarily intra-county importance that funnels traffic between local streets and the arterial roadway system.

Comprehensive Plan: An adopted, official statement of the county's desired future, intended to serve as the primary decision-

making guide for growth and development in the form of text and maps, regarding the long-term development of the county.

Conservation: The management of natural resources to prevent waste, destruction, or degradation.

Conservation Easement: An easement intended to protect, preserve, and conserve a natural feature, which shall prohibit the construction of any buildings or structures within the easement and shall prohibit the removal of all vegetation, except that which is necessary for protecting the public health and safety and/or according to an approved forest management plan, where required.

County Island: Unincorporated area completely surrounded by land under the county's jurisdiction.

Dedication: The turning over by an owner or developer of private land for public use, and the acceptance of land for such use by the governmental agency having jurisdiction over the public function for which it will be used.

Deed Restriction: A private legal restriction on the use of land, attached in the deed to a property.

Density: The number of dwelling units within a given area, usually expressed in dwelling units, population, or employment per acre or square mile.

Development: The physical extension and/or construction of urban land uses.

Development Services Department: The County department responsible for planning

KEY TERMS

and zoning as well as building permits and inspections.

Development Standards: Regulations that limit the size, bulk, or siting conditions of particular types of buildings or uses located within any designated district zoning pertaining to heights, lot area, fences, walls, landscaping area, access, parking, signs, setbacks, and other physical requirements.

Disturbed Area: An area of land subjected to erosion due to the removal of vegetative cover and/or earthmoving activities, including filling.

Downzone: A change in the zoning classification of land to a classification permitting development that is less intensive or dense

Drought: A sustained, natural reduction in precipitation that results in negative impacts to the environment and human activities.

Dwelling Unit: A single unit providing complete, independent living facilities for one or more persons, including permanent provisions for living, sleeping, eating, cooking, and sanitation.

Earth Fissures: Open ground fractures that form in unconsolidated sediments as the result of tensional stresses associated with land subsidence.

Easement: A legal interest in land, granted by the owner to another person, which allows the use of all or a portion of the owner's land, generally for a stated purpose including but not limited to access or placement of utilities.

Ecotourism: Tourism that focuses on enjoyment of the environment or natural resources.

Effluent: Liquid waste or sewage, treated or untreated, discharged to the environment.

ENERGY STAR: A joint program of the EPA and the U.S. Department of Energy helping to save Americans money and protect the environment through energy efficient products and practices.

Environmental Assessment: The procedure for analyzing the impacts of some proposed action on a given environment and the documentation of the analysis.

Environmental Impact Statement (EIS): A statement on the effect of development proposals and other major actions that significantly affect the environment.

Environmentally Sensitive Area: Any area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and which could be easily disturbed or degraded by human activities and developments

Erosion: The general process by which soils are removed by flowing surface or subsurface water or by wind.

Federal Aviation Administration (FAA): The federal agency charged with primary responsibility for the safety of civil aviation.

Federal Emergency Management Agency (FEMA): The federal agency responsible for reducing the loss of life and property and

KEY TERMS

protecting the nation's critical infrastructure from hazards.

Federal Highway Administration (FHA): The federal agency responsible for developing, maintaining, and funding the federal roadway system.

Floodplain/100-Year Flood: A standard adopted by the Federal Emergency Management Agency to identify areas where there exists a 1 percent annual chance of a flood occurring.

Floodproofing: Any combination of structural and non-structural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents by means other than elevation.

Floodway: The area of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation. Also referred to as "Regulatory Floodway."

Fossil Fuels: Fuels formed by natural processes such as anaerobic decomposition of buried dead organisms.

General Plan: An adopted statement of an incorporated community's desired future, intended to serve as the primary decision-making guide for growth and development for the jurisdiction.

Goal: The ultimate purpose of an effort stated in a way that is general and broad in

nature and immeasurable.

Grade: The average level of the finished surface of the ground adjacent to the exterior walls of the building

Gray Water: Wastewater, collected separately from sewage flow, that originates from a clothes washer, bathtub, shower, or sink, but not from the kitchen sink, dishwasher, or toilet.

Grazing: The consumption of standing forage (edible plants) by wildlife and livestock on rangelands or fenced pasture. Livestock grazing is usually associated with commercial uses related to ranching.

Green Building: Structures that incorporate the principles of sustainable design— design in which the impact of a building on the environment will be minimal over the lifetime of that building.

Groundwater: Water that occurs beneath the land surface, also called subsurface water or subterranean water.

Growth Boundary: A line denoting the limit of areas where growth is to be encouraged or accommodated using growth management techniques.

Growth Management: The use of a wide range of techniques to influence the location, timing, type, character and rate of development desired by a community and to channel that growth into designated areas.

Habitat: The physical location or type of environment in which an organism or

KEY TERMS

biological population lives or occurs.

Hauled Water: Water transported by tank from its source to an area where it is otherwise unavailable.

Hardship: A restriction on property so unreasonable that it results in an arbitrary and capricious interference with basic property rights.

Hazardous Materials: Any substance that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment.

Hazard Mitigation Plan: Plan that identifies natural hazards, assesses vulnerability and risks to people and structures, and identifies and implements strategies for mitigating the identified natural hazards.

Highway User Revenue Fund (HURF): A fund consisting of fees and charges relating to the registration and operation of motor vehicles on Arizona highways which are distributed to cities, towns, counties and the State Highway Fund for highway construction, improvements and related expenses.

Historic Preservation: The adaptive use, conservation, protection, reconstruction, rehabilitation, restoration, or stabilization of an historic resource.

Impervious Surface: A surface consisting of asphalt, concrete, roofing material, brick, paving block, plastic, or other similar material

which does not readily absorb water.

Infill: The development of new housing or other structures on scattered vacant sites within built-up areas.

Infrastructure: Any and all of the public facilities and services needed for development of a lot or parcel of land.

Intergovernmental Agreement: A contractual agreement between Cochise County and another governmental entity.

International Building Code (IBC): International standards for protecting life and property by regulating the design, construction, quality of materials, use, and occupancy of structures.

Invasive Species: A plant species not historically found in the local area. When introduced into an area, these species proliferate, replacing native species and reducing biodiversity.

Irrigation: A permanent, artificial watering system designed to transport and distribute water to plants.

Land Use: A description of how land is occupied or utilized.

Land Use Map: A map that graphically depicts existing or future land uses and densities.

Landscape: The unique patterns, structures, and features such as landforms, vegetation, soil, and waterways that distinguish one part of the earth's surface from another.

Leadership in Energy & Environmental

KEY TERMS

Design (LEED): A building rating system based on the amount of energy savings achieved through efficient siting and use of building materials.

Legal Access: A public right of vehicular ingress and egress between the lots, parcels or fractional interests being created.

Level of Service Standards (LOS): A measure of the relationship between service capacity and service demand for public facilities.

Local Roadway: A street that provides access to land parcels (primarily residential) adjacent to the collector network and serves travel over relatively short distances.

Low-Impact Development (LID): A land planning and engineering design approach to manage stormwater runoff; a set of tools such as swales, detention basins, and impervious pavement that retain storm water on site.

Major Collector: A type of roadway that links major areas of development, including rural activity centers and residential, commercial, and industrial land uses and connects minor arterials, minor collectors, and local roads.

Manufactured Home: A structure built in accordance with the National Manufactured Home Construction and Safety Standards Act of 1974 and Title VI of the Housing and Community Development Act of 1974 and as amended. Does not include mobile homes, factory-built buildings, or recreational vehicles.

Memorandum of Understanding (MOU): An agreement of cooperation that defines the

roles and responsibilities related to an issue over which several organizations or agencies have concurrent jurisdiction.

Mining: The development or extraction of a mineral from its natural occurrences on affected land.

Minor Arterial: A type of roadway or transportation corridor that links cities, towns, and other traffic generators. Minor arterials attract travel over long distances, provide intercounty and some intracounty service, and generally connect to other arterial roadways or collector roadways.

Minor Collector: A type of roadway that primarily routes traffic from local roads to major collectors or minor arterials.

Minor Land Division: A division of land into five or fewer separate parcels.

Mitigation: Compensatory action to restore natural functions and values lost through development and human alterations.

Mobile Home: A structure built prior to June 15, 1976, on a permanent chassis, capable of being transported in one or more sections and designed to be used with or without a permanent foundation as a dwelling when connected to on-site utilities. Does not include recreational vehicles, factory-built buildings, or manufactured homes.

Modular Home: A residential or nonresidential building, including a dwelling unit or habitable room that is either wholly or in substantial part manufactured at an off-site location to be assembled on-site and placed on a permanent foundation. Factory-

KEY TERMS

Built Buildings are constructed to Building Code standards and are regulated by the Arizona Department of Housing. Factory-Built Buildings do not include manufactured homes, recreational vehicles, or mobile homes. A factory-built building used for residential purposes shall be considered a single-household dwelling unit.

Multiple-Family Housing: Multiple and separate residential units that are contained within a single building. Such housing typically includes duplexes, condominiums, townhouses and apartment buildings.

Municipality: An incorporated city or town.

National Environmental Policy Act (NEPA): The legislation passed in 1969 to serve as the country's "national charter" for protecting the environment. NEPA requires environmental impact statements for all major federal actions that significantly affect the environment.

National Park Service (NPS): The federal agency within the Department of the Interior charged with preserving the natural and cultural resources and the values of the national park system.

National Pollutant Discharge Elimination System (NPDES): A provision of the Clean Water Act that prohibits the discharge of pollutants into waters without a special permit from the U.S. Environmental Protection Agency, state, or tribal government.

Nonconformance: A condition that occurs when, on the effective date of adoption

of this code or a previous ordinance or on the effective date of an ordinance text amendment or rezoning, an existing lot, structure, building, sign, development, or use of an existing lot or structure does not conform to one or more of the regulations currently applicable to the district in which the lot, structure, building, sign, development, or use is located

Nonpoint-Source Pollution: Sources for pollution that are less definable and usually cover broad areas of land,

Objectives: Broad statements of intent to implement the goals and provide framework for the policies.

Open Space: An open space area not occupied by any structure or impervious surface.

Ordinance: A law or regulation set forth and adopted by a governmental authority.

Overlay Zone: An area where certain additional requirements are superimposed upon a base zoning district or underlying district and where the requirements of the base or underlying district may or may not be altered.

Para-Transit: Transportation services that operate vehicles, such as buses, jitneys, taxis, and vans for senior citizens, and/or mobility impaired.

Parcel: A legally recognized, continuous plot of land usually resulting from the division of a larger land area.

Park: An open space with natural vegetation

KEY TERMS

and landscaping; may include recreational facilities.

Planning & Zoning Commission (P&Z):

A 9-member volunteer citizen’s board in Cochise County that is responsible for reviewing applications for special use permits, subdivisions, rezoning, and public right-of-way abandonment requests. Three members are appointed by each County Supervisor.

Point Source Pollution: Pollution that originates from an identifiable point.

Policy: A general rule for action focused on a specific issue, derived from more general goals.

Pollution: The presence of contaminants in concentrations that degrade the natural environment or impact people’s health, safety, and comfort.

Potable Water: Water suitable for drinking and cooking purposes.

Reclaimed Water: Tertiary treated effluent, suitable for use in landscaping or water features as determined by the presiding water district.

Renewable Energy: As defined by the U.S. Energy Information Administration, an energy source that is regenerative or virtually inexhaustible, including sunlight, wind, rain, tides and waves and geothermal heat.

Rezoning: An amendment to the zoning map which changes the zoning district applied to a site or area to another zoning district.

Right-of-Way: An area of land not on a lot that is dedicated for public or private use to accommodate a transportation system and necessary public utility infrastructure (including but not limited to water lines, sewer lines, power lines, and gas lines.)

Runoff: The rainfall, snowmelt, or irrigation water flowing that has not evaporated or infiltrated into the soil, but flows over the ground surface.

Rural: A sparsely developed area where the land is primarily used for farming, forestry, resource extraction, very low-density residential uses or open space uses. These areas typically receive limited public services.

Scenic Road: A highway, road, drive, or street that, in addition to its transportation function, provides opportunities for the enjoyment of natural and man-made scenic resources and access or direct views to areas or scenes of exceptional beauty or historical cultural interest.

Section: One of 36 units of land within a given township, usually about one square mile (640 acres) in area.

Sierra Vista Metropolitan Planning Organization (SVMPO): the designated transportation organization for the southeastern Cochise County region. The planning area encompasses the City of Sierra Vista, the Town of Huachuca City and portions of urbanizing Cochise County,

Single-Family Housing: Separate or free-standing dwelling intended for occupancy by

KEY TERMS

just one household or family.

Site-Built Home: A home that is primarily constructed on the site in which it is located.

Smart Growth: Development that enhances existing communities, that is compatible with the natural environment, and that uses tax dollars efficiently while attracting private investment.

Solid Waste: Any garbage, refuse, rubbish, or other discarded materials, that may be in solid, liquid, or gaseous form.

Special Use Permit: A specific approval for a use that has been determined to be more intense or to have a potentially greater impact than a permitted use within the same zoning district

State Historic Preservation Office (SHPO): A division of Arizona State Parks that is responsible for identifying and protecting Arizona's prehistoric and historic cultural resources.

State Trust Lands: Lands in Arizona that are held in trust and managed for the sole purpose of generating revenues for the 13 beneficiaries, the largest of which is Arizona's K-12 education. These lands were granted to the state under the provisions of the federal Enabling Act that provided for Arizona's statehood in 1912.

Stormwater: The flow of water which results from a rainfall event.

Subdivision: The division of land into six or more lots, parcels, or fractional interests

under 36 acres, for sale or lease.

Subdivision Regulations: The set of regulations adopted by the BOS specifying the rules and standards for dividing land.

Surface Water: Water on the earth's surface exposed to the atmosphere such as rivers, lakes, and creeks.

Transfer of Development Rights (TDR): A transfer of the right to develop or build from one portion of a property to another portion, or from one property to another property.

Transit: A transportation mode that moves larger numbers of people than an automobile; generally refers to passenger service provided to the public along established routes with fixed or variable schedules at published fares.

U.S. Environmental Protection Agency (EPA): The federal agency established in 1970 to consolidate a variety of federal research, monitoring, standard-setting, and enforcement activities related to protecting the natural environment.

U.S. Fish & Wildlife Service (USFW): The federal agency whose mission is to conserve, protect, and enhance fish, wildlife, and plants, along with their habitats.

U.S. Forest Service (USFS): The federal agency charged with managing public lands in designated national forests and grasslands for multiple uses.

User Fee: A charge for the use of a product, facility, or service.

KEY TERMS

Utility-Scale Energy Systems: The production of energy with the intent of producing power for on-site consumption.

Variance: Permission to depart from this development code when, because of special circumstances applicable to the property, strict application of the provisions of this development code deprives such property of privileges enjoyed by other property in the vicinity that is under identical zoning.

Wastewater: Water carrying wastes from homes, businesses, and industries that is a mixture of water and dissolved or suspended solids, or excess irrigation water that is runoff to adjacent land.

Watershed: The land area that contributes runoff to a given stream, river, or reservoir.

Water Table: The upper limit of the portion of the soil that is completely saturated with water.

Well: A hole or shaft sunk into the earth to tap an underground supply of water.

Wind Turbine: An alternate energy device which converts wind energy by means of a rotor to mechanical or electrical energy. A wind generator may also be deemed a windmill.

Xeriscape: Landscaping characterized by the use of vegetation that is drought-tolerant or of low water use in character.

Zoning: The division of the county by legislative regulations into areas, or zones, which specify allowable uses for real property and size restrictions for buildings within these areas. Also, a program that implements policies of the general plan.

SURVEY RESULTS

CP2045 SURVEY

A quick look at the most typical responses:

UNINCORPORATED

Where in Cochise County do you live?

11+ YEARS

How long have you lived in Cochise

OWN RESIDENCE

Do you own or rent your current residence in Cochise County?

SATISFIED

How satisfied are you with the overall quality of life in Cochise County?

YEAR-ROUND

How many months of the year do you live in Cochise County?

ABOUT THE SAME

How does the quality of life in Cochise County today compare to ten years ago, or since you moved to the community if less than ten years?

CP2045 SURVEY

A quick look at the most typical responses:

**RURAL**

How would you describe the predominant land use near your home?

**NOT AG. EMPLOYED**

Do you own a ranch/farm or work in agriculture ?

**EMPLOYED BY OTHERS**

Do you own a business in Cochise County and/or are you self-employed?

**NO INCENTIVES**

Should the county offer incentives to encourage developers to build at a higher density?

**NO NEARBY IMPACTS**

Have you experienced any negative impacts (e.g., noise, traffic, pollution) from nearby property?

**BUSINESS START INTEREST**

Are you interested in starting a business in Cochise County?

CP2045 SURVEY

A quick look at the most typical responses:

RELIABLE WATER

Do you have access to a safe and reliable water source for your home?

WATER COMPANY

What is the primary water source for your home?

SEPTIC SYSTEM

How do you treat the wastewater generated in your home?

EFFICIENT PLUMBING FEATURES

Do you have any plumbing fixtures in your home that intended to save water?

CAR OR MOTORCYCLE

What is your primary mode of transportation?

SOLAR POWER HOME

Is your home powered by on-site solar panels?

CP2045 SURVEY

A quick look at the most typical responses:

Pace of Residential Construction

Pace of Commercial Construction

Prioritization for Vehicular Improvements on County-Maintained Roads

- Resurface Paved Rds 1
- Re-Grade Dirt Rds 2
- New Rd Segments 3
- Increase # of Rd Lanes 4

Prioritization for Non-Vehicular Transportation Funding

- New Multi-Use Paths 1
- Additional Sidewalks 2
- More Bike Lanes/Facilities 3
- New Hiking Trails 4

CP2045 SURVEY

When considering Cochise County’s existing transportation networks, state whether you agree or disagree with the following statements:

THE ROADS NEAR ME ARE ABLE TO HANDLE CURRENT TRAFFIC

THE ROADS NEAR ME ARE IN GOOD CONDITION

I AM ABLE TO EASILY ACCESS MY PROPERTY REGARDLESS OF THE WEATHER

CP2045 SURVEY

Rate your level of concern regarding water availability and water quality below.

WATER AVAILABILITY IN YOUR COMMUNITY

WATER QUALITY IN YOUR COMMUNITY

If your home is not currently powered by solar panels, what are the primary reasons? (select any that apply)

CP2045 SURVEY

What types of housing would you like to see more of in Cochise County? Select all that apply.

Do you own an electric vehicle?

CP2045 SURVEY

Do you feel there is enough access to public lands in the county?

CP2045 SURVEY

Have you visited any of the following recreational facilities within Cochise County?

Have you hiked/biked any of the following recreational trails within Cochise County?
