	<b>INTERGOVERNMENTAL AGREEMENT (IGA)</b> <b>Amendment</b>		<b>ARIZONA DEPARTMENT  OF HEALTH SERVICES  OFFICE OF PROCUREMENT</b> 150 N. 18 <sup>th</sup> Ave., Suite 530 Phoenix, Arizona 85007
	Contract No.: CTR070113	IGA Amendment No: 2	<b>Procurement Officer:  Stacy Buske</b>

**1. BACKGROUND**

- 1.1. The Arizona Department of Health Services (ADHS), through the Office of Injury and Violence Prevention (OIVP), administers funding from the Centers for Disease Control and Prevention (CDC) for the Overdose Data to Action (OD2A) Cooperative Agreement. The primary objective of the Overdose Data to Action in States (OD2A-S) initiative is to enhance ADHS’s capacity to track and prevent both nonfatal and fatal overdoses while also identifying emerging drug threats.
- 1.2. OD2A-S focuses on implementing surveillance strategies and promoting evidence-based interventions designed to immediately reduce overdose morbidity and mortality. The initiative targets opioids, stimulants, and polysubstance use when these substances are used in combination. Central to OD2A-S is a data-to-action framework that emphasizes the utilization of surveillance and other data to inform prevention efforts and policy decisions, with a strong commitment to addressing health equity and disparities.
- 1.3. ADHS is dedicated to supporting County health departments in the execution of data-driven prevention programs. As part of the OD2A-S priorities, ADHS provides necessary support to participating counties, which will engage in activities aligned with the following prevention strategies:
  - 1.3.1. **Strategy Seven (7):** Public Safety Partnerships/Interventions
  - 1.3.2. **Strategy Eight (8):** Harm Reduction
  - 1.3.3. **Strategy Nine (9):** Community-Based Linkages to Care (LTC)
- 1.4. The abuse and addiction to opioids represents a significant and complex public health challenge at both national and state levels. Over the past two (2) decades, drug overdose deaths have escalated, becoming the leading cause of injury-related death in the United States. According to CDC data, there were 92,452 overdose deaths reported in 2020, a thirty percent (30%) increase from 71,130 in 2019. Of these deaths, opioids were implicated in 69,031 cases, accounting for seventy-five percent (75%) of all drug overdose fatalities.
- 1.5. Historically, the opioid epidemic was largely driven by prescription medications. Data from Arizona’s Controlled Substances Prescription Monitoring Program (CSPMP) indicates that in 2019, there were approximately 4.1 million Class II-IV prescriptions written and over 240 million pills dispensed in the state—equating to around thirty-four (34) controlled substance pills for every Arizona resident. However, recent statistics reveal that Arizona ranks twenty eighth (28<sup>th</sup>) in opioid prescribing, with forty-four point one (44.1) prescriptions per 100 people, indicating that prescription practices are no longer the primary cause of overdose deaths.
- 1.6. Currently, the predominant factor in the opioid crisis is the emergence of fentanyl. In 2019, synthetic opioids were responsible for more than 36,000 deaths in the U.S., representing seventy-three percent (73%) of all opioid-related fatalities that year. The majority of these deaths were linked to illicitly manufactured fentanyl, commonly found in counterfeit pills or mixed with other drugs, such as heroin. In Arizona, the presence of fentanyl in overdose cases rose dramatically from nine percent (9%) in 2017 to fifty percent (50%) in 2021.

- 1.7. Beyond the tragic human toll, the financial implications of opioid misuse are substantial. In 2019 alone, there were 56,623 hospital visits in Arizona related to opioid use, with an average cost of \$11,942 per visit, resulting in an estimated \$676 million in healthcare costs associated with opioids.
- 1.8. The escalating addiction rates and overdose deaths, driven by both prescription and illicit opioids, underscore a growing national crisis. Overdose fatalities now rank as the leading cause of preventable injury deaths in the United States, necessitating urgent and effective interventions through initiatives like OD2A-S.
- 1.9. Cochise County Health and Social Services (CCHSS) receives OD2A Cooperative Agreement funds to achieve goals that align with strategies aimed at enhancing surveillance, prevention, and intervention efforts related to overdose deaths. This includes implementing evidence-based practices to reduce opioid and stimulant misuse, improving harm reduction initiatives, fostering community partnerships, and addressing health disparities to ensure equitable access to care and support for affected populations. Through these efforts, CCHSS seeks to enhance public health outcomes and ultimately decrease the incidence of both fatal and nonfatal overdoses in the community.

**2. OBJECTIVE**

The objective of this agreement aims to address the escalating opioid crisis in Arizona by enhancing the capacity of County health departments to implement effective prevention strategies, improve access to overdose prevention tools and treatment options, and strengthen community linkages for individuals with Opioid Use Disorder (OUD). The expected outcomes include reduced opioid misuse, increased retention in care, and improved overall community health and safety.

**3. SCOPE OF SERVICES**

- 3.1. The purpose of this IGA is to enhance harm reduction efforts and community-based LTC in response to substance use challenges in Cochise County. The CCHSS shall lead the dissemination of educational materials on overdose prevention and naloxone use to community members, ensuring widespread awareness of available resources.
- 3.2. CCHSS shall also provide Overdose Recognition and Response training sessions for local organizations and individuals, equipping them with essential skills to identify and respond to overdose situations. In partnership with the Cochise County Jail, CCHSS shall coordinate post-release transportation to treatment services, facilitating a smooth transition for individuals into recovery.
- 3.3. To further support these efforts, CCHSS shall increase awareness of local service providers by creating a comprehensive directory of resources, ensuring that community members can easily access the support they need. Collaboration with local Harm Reduction coalitions will enhance responsiveness to community needs and emerging threats.
- 3.4. Through these initiatives, CCHSS aims to improve community awareness, promote harm reduction strategies, and strengthen access to care for individuals affected by substance use disorders.
