

MEMORANDUM

TO: Nick Russo, Public Works Director
FROM: Scott Ketchmark, Utilities Superintendent
SUBJECT: Thompson Ranch Piping Replacement Project
DATE: February 9th, 2026

The purpose of this memo is to provide justification to complete capital project 62622 (Thompson Ranch Discharge Piping Replacement) internally. The project will be designed and completed in-house, using mechanical type joints, with no welding or custom fabricating needed.

Completing this project in-house will reduce the project cost by an estimated 67%, shorten the timeline to completion, and provide an excellent training opportunity for water division staff.

Lakos Sand Separator	\$19,051.40
<u>6" piping, elbows, tee's, check valve, couplings, etc.</u>	<u>\$26,900.00</u>
Total Project Estimate:	\$45,951.40
