

McConnell Sidewalk & Multimodal Improvements Project

Project Mission

The Mission of the Project is to provide the best design solution for multimodal circulation & safety improvements to minimize congestion and confusion of all modes along a section of the McConnell Drive Corridor on NAU's Flagstaff campus.

Project Highlights

- Partnership With NAIPTA
- Partial FTA Grant Funding from NAIPTA to Start Design
- New Transit Station Improvements Planned
- 10' wide Accessible Sidewalk Along N. Side of McConnell
- Connection to FUTS Trail
- ADOT Interstate Off-Ramp Coordination
- Connection to Future ADOT Sidewalk
- New Campus Gateway Entry Opportunity
- Proposed Roundabout & Stop Light Intersections
- Proposed Buffered Bike Lanes
- Cross Agency Stakeholder Collaboration (ADOT, NAIPTA, COF)
- Sinclair Wash Impact & Restoration Opportunity

Project Milestones

- | | |
|-------------------------------------------------------|--------------------|
| 1. Design Team Request for Qualifications & Selection | January-April 2019 |
| 2. Design Development Start: | May 2019 |
| 3. Phased Construction (2-3 Years): | TBD |

Milton/Route 66 New Campus Entry Study

Project Mission

The primary mission of this study is to determine the feasibility, benefits, constraints, challenges, conceptual layout, and assumed costs of construction to add an additional 4th leg at the intersection of Milton Road and Arizona State Route 66, and to provide vehicle, transit, bike and pedestrian access to NAU's Flagstaff campus.

Project Highlights

- Partnership With NAIPTA
- Partial FTA Grant Funding from NAIPTA to perform Feasibility Study
- AECOM Design Team Performing Study through NAIPTA On-Call Task Order
- Parcel Optimization for New Campus Gateway Entry & Development – Outcome Intended to Inform Future Campus Master Plan
- Intended to Improve Campus Circulation of all modes for Current & Future Growth on & off Campus
- Possible Solutions Proposed Include Connectivity to Riordan Ranch Rd. or Knoles Drive

Project Milestones

- | | |
|------------------------------------------------|--------------------|
| 1. Project Scope Development | January-March 2019 |
| 2. Traffic Impact Analysis & Feasibility Study | March-July 2019 |

Strategic Space Utilization Study

Project Mission

The Mission of the study is to examine the utilization and appropriateness of spaces for current and desired methods of teaching, research learning, and student life; identify programmatic needs to support the university's mission; and develop a set of recommendations to improve and enhance spaces to meet programmatic needs and overarching goals.

Project Highlights

- Study being performed by the leading national space and master planning firm Sasaki
- Series of Onsite Work Sessions with Steering Committee & Focus Groups representing all areas of campus
- Stakeholder Interviews, Data & Space Analysis, Space Needs Assessments, and Collaboration Surveys
- First Phase of an Overall Campus Master Plan

Project Milestones

- | | |
|----------------------------------------------|------------------|
| 1. Discovery & Analysis | March-June 2019 |
| 2. Program Accommodation Strategy | July-August 2019 |
| 3. Final Recommendations & Study Deliverable | September 2019 |
