**Project Description** (Insert additional pages if necessary)

changing Asphalt Shingles to Copper  
metal roof

**Submittal Requirements**

An application to the Heritage Preservation Commission and Historic Preservation Officer shall contain at least the following information:

1. Completed Application including all signatures and payment of fees.
2. Eight copies of drawings as needed to describe the proposal, which may include a Site Plan, Floor Plans, Exterior Elevations, Building Sections, Exterior Details, Lighting Plan, and a Landscape Plan. All drawings shall be drawn to scale and dimensioned, and shall clearly and accurately represent the natural and built conditions of the context area and the project, including both existing conditions and proposed work.
3. Photographs of the context, including the property, surrounding properties, and the neighborhood.
4. A Color Board depicting all exterior materials and finishes associated with the work.
5. Proof of ownership, or letter of authorization from the current property owner, if the applicant and owner are not the same.
6. Statement of approval from a subdivision or property owners association, if applicable.
7. Filing fee.
8. Any other information which the applicant feels would be helpful and/or pertinent to the request.
9. Any other information as may be required by the Historic Preservation Officer or Heritage Preservation Commission to assist in the review of the requested application.

Hi Neighbors,

This is jon Hirsh from 113 N Aztec

I am in the process or redoing my roof and want to change the roof material from asphalt to metal. Im looking for neighbors feedback. The house is in an historic district and the idea is to preserve the characteristics of the house for the future. I have lots of color choices and some style choices. If you have a moment , if you could give me feedback on first, the change from asphalt to metal roof, if you have a concern with that. Second on a change of color....including some acceptibe color choices. Some of the color choices I was thinking include...rust color, coper, gray or tan. if you have any questions, please call me a 907-303-7120.

If you can please reply by March 5.

Sincerely

jon hirsh

Comments (include yes/no metal and if yes which color seems in your view best for hood):

Metal is longlasting & has historic precedent.

Color? We can see the roof from inside our house so our preference is for it to not reflect light (heat) into our house.

My only other comment is to consider the impacts of our WIDE temp. swings (even in a 24 hr period). Repetitive expansion & contraction could affect the longevity. For this reason perhaps use neither a light (reflective) color nor a dark (heat absorbing) color.

Lastly, the NACET building has a metal roof that is very noisy due to

-to, I believe, expansion & contraction. Our metal internal storm windows are noisy for this reason.

Thanks for asking Jon.

Hi Jon, an additional comment is to compliment your color choice w/ the brick of your house.  
cheers, - Charlie
