    - 2.2.1 Stone Foundation Course: A layer at least 3 inches thick of 3/4- to 1-1/2 inch crushed stone shall be spread over the sub grade or over the drainage filter course constructed thereon and shall be given preliminary compaction by rolling, followed by a filler consisting of 1/4- to 1/2-inch crushed stone to fill voids in the underlying stone. The stone foundation course shall be compacted to a minimum of 90 percent of CE 55 maximum density.
    - 2.2.2 Clay Foundation Course: Selected inorganic fat clay (CH) shall be evenly spread on the stone foundation course to produce a compacted layer not less than 3 inches thick. The clay layer shall be compacted to a minimum of 90 percent of CE 55 maximum density.
    - 2.2.3 Wearing Course: The approved inorganic clay-silt mixture of approximately 50 percent each of clay and silt shall be screened through a 1/4-inch mesh screen. The wearing course shall be mixed in proportions of 1 part sand to 2 parts clay-silt by volume. The wearing course shall be compacted to at least 90 percent of CE 55 maximum density and shall range from 1 to 1-1/2 inches in thickness.
    - 2.2.4 Drainage Filter Course: The drainage filter course shall consist of a well-graded aggregate course encased in a geotextile material and laid in such a manner to allow water to freely drain from the playing surfaces. The geotextile material shall be a woven or non-woven filter material with a minimum permeability of 0.02 cm/sec. The material shall be resistant to mildew, ridding, insects, rodents, and chemicals normally encountered in a subsurface drainage system.
  - 2.3 Bituminous Concrete Playing Surfaces shall consist of a base course, prime coat, bituminous leveling course, tack coat, surface course, color coating and, where required, a drainage filter course, all constructed on a prepared sub grade. The stabilized-aggregate base course shall be compacted at optimum moisture to at least 95 percent CE 55 maximum density. Marshall stability shall not be less than 500 pounds and the flow shall not be greater than 20/100 inch. The bituminous mixture shall be compacted until the voids in the total mix are reduced to less than 4.0 percent by volume.
    - 2.3.1 Thickness of Courses: Base course shall be 4 inches thick after compaction. Leveling course shall be 1-1/2 inches thick after compaction unless directed otherwise. Surface course shall be 1 inch thick after compaction.
    - 2.3.2 Color Coating and Marking Paint: After curing of the bituminous surface course, the entire playing surface shall be covered with a color coat as required.
  - 2.4 Portland cement Concrete Playing Surfaces:
    - 2.4.1 Aggregate: The nominal aggregate size shall be 1-1/2 inches to No. 4 sieve size and shall conform to ASTM C 33.
    - 2.4.2 Portland cement: The cement shall conform to ASTM C 150, Type IA or IIA; or ASTM C 595, Type IP-A.
    - 2.4.3 Thickness: Horizontal Portland cement concrete playing surfaces shall consist of concrete slabs 4 inches thick.
  - 2.5 Maintenance of Sand-Clay Surfaces: Prior to final acceptance, the Contractor shall make one application of 3/4 pound of calcium chloride per square yard to the sand-clay surface of the entire playing area.
  - 2.6 Portable Outdoor Bleachers:
    - 2.6.1 Bleachers shall be designed to support a uniformly distributed live load of 100 pounds per square foot of gross horizontal projection and a horizontal wind load of 30 lbs/sq ft of gross vertical projection. All seat and foot plank members shall be designed to support not less than 120 pounds per linear foot.
    - 2.6.2 Wood Seating and Walk Boards shall be preservative-treated and painted.
  - 2.7 Steel Basketball Poles: Minimum diameter 3-1/2 inches; galvanized pipe.
  - 2.8 Running Track: Gravel and cinders over stone base; compaction to 90 percent of CE 55 maximum density. One hundred percent by weight of the gravel and cinders shall pass the 3/4-inch screen, and 90 percent of the gravel and cinders shall be retained on the No. 4 screen.
  - 3.0 EXECUTION: (Section not used).

**Recreational Facilities**

- 1.0 DESCRIPTION OF WORK: This specification covers the furnishing and installation of miscellaneous/recreational facilities. Products shall match existing materials and/or shall be as directed by the Authorized Member Representative. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.
- 2.0 PRODUCTS:
  - 2.1 Materials shall be resistant to corrosion and degradation by ultraviolet rays. Hardware and fittings shall be at least as corrosion-resistant as the materials fastened.
    - 2.1.1 Steel Plates, Pipe, Tubing, Sheets, Wire Ropes, Chains, and Miscellaneous Shapes shall be stainless steel or galvanized steel, even if painted or coated with vinyl or other protective finish. All open pipe and tube ends shall have rain caps.
    - 2.1.2 Wood shall be all-heart cedar, cypress, or redwood or shall be treated with a non-toxic preservative. Wood shall not be used where it will be in direct contact with the ground, unless approved by the Authorized Member Representative.
    - 2.1.3 Fiberglass shall be smooth fiberglass-reinforced polyester with gelcoat coating and shall meet the following minimum physical properties: 22,000 psi flexural strength, 15,000 psi tensile strength, and 20,000 psi compressive strength.
    - 2.1.4 Aluminum shall be anodized.
    - 2.1.5 Foundations shall be 3,000 psi compressive strength concrete, reinforced as required. Provide embedded anchorage items as required.
  - 2.2 Playground Equipment, shall include, but not be limited to, see-saws, slides, swings, whirlers, and monkey bars, shall be prefabricated and designed to withstand the anticipated structural loads.
    - 2.2.1 Exposed Surfaces shall be smooth (except where required to be nonslip) seamless, and nonsplintering.
    - 2.2.2 Steps, Platforms, and Other Flat Surfaces Subject to Foot Traffic shall be non-slip, but not abrasive and shall be formed to exclude or drain away water.
    - 2.2.3 Fastening shall be flush, concealed, or otherwise formed or located to prevent injury to children playing on the equipment.
    - 2.2.4 Slides shall have stainless steel sliding surfaces.
  - 2.3 Bike Racks shall be mounted, and sections (if rack is sectional) shall be attached with tamper-proof fasteners.
  - 2.4 Fiberglass Shelters shall be reinforced with steel, aluminum, or wood framework as required. Shelter roof shall be sloped to drain. Fiberglass edges shall be returned so that they are not exposed. Shelters shall be prefabricated and designed to withstand the anticipated live, dead, and wind loads.
  - 2.5 Fire Rings shall be Iron Mountain Forge Model Number 120-X or approved equal.
  - 2.6 Pedestal Grills shall be Iron Mountain Forge Model Number 220-X or approved equal.
  - 2.7 6' Long, Galvanized Frame, Aluminum Top and Seat Picnic Table shall be Iron Mountain Forge Model Number 238-6GA or approved equal.
  - 2.8 6' Long, Galvanized Frame, Vinyl Clad Top and Seat Picnic Table shall be Iron Mountain Forge Model Number 238-6GV or approved equal.
- 3.0 EXECUTION: Recreational facilities shall be installed plumb, aligned, and securely anchored to the ground. Adjust equipment with moving parts until operation is smooth and easy.

**Topsoil**

- 1.0 DESCRIPTION OF WORK: This specification covers the furnishing and installation of topsoil. Products shall match existing materials and/or shall be as directed by the Authorized Member Representative. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.
- 2.0 PRODUCTS:
  - 2.1 Topsoil shall be the existing surface soil stripped and stockpiled on the site.
  - 2.2 pH Adjusters:

Attachment 1: Specifications for the Work

- 2.2.1 Agricultural Limestone shall have a minimum calcium carbonate equivalent of 90 percent.
- 2.2.2 Other Liming Materials shall have a minimum calcium carbonate equivalent of 80 percent.
- 2.2.3 Aluminum Sulfate shall be commercial grade.
- 2.3 Soil Conditioners and Amendments:
  - 2.3.1 Peat shall be a natural product conforming to ASTM D 2607.
  - 2.3.2 Sand shall be clean and free of toxic materials.
  - 2.3.3 Vermiculite shall be horticultural grade and free of any toxic materials.
  - 2.3.4 Rotted Manure shall be unleached stable or cattle manure containing no chemicals or ingredients harmful to plants.
  - 2.3.5 Rotted Sawdust shall be free of chips, stones, sticks, soil, and toxic substances.
  - 2.3.6 Gypsum shall be 90 percent pure and free of any toxic materials.
- 2.4 Fertilizer shall be commercial grade, free flowing, uniform in composition and shall conform to applicable State and Federal regulations. Granular fertilizer shall conform to Fed. Spec. O-F-241, Type I, Level B.
- 2.5 Soil Fumigant shall be 97 percent methyl bromide and 3 percent chloropicrin.
- 2.6 Mulch shall be straw, hay, or fiber mulch applied simultaneously with grass seed and fertilizer.
  - 2.6.1 Straw shall be stalks from oats, wheat, rye, barley, or rice that are free from noxious weeds, mold, or other objectionable material.
  - 2.6.2 Hay shall be native hay, sudan-grass hay, broomsedge hay, or other herbaceous mowings, free from noxious weeds, mold, or other objectionable material.
  - 2.6.3 Wood Cellulose Fiber for use with hydraulic application of grass seed and fertilizer shall consist of specially prepared wood cellulose fiber or a combination of wood cellulose and recycled newsprint fibers.
- 2.7 Asphalt Adhesive for application with straw or hay mulch shall be cutback asphalt conforming to ASTM D 2028, or emulsified asphalt conforming to ASTM D 977.
- 2.8 Herbicide and Pesticide use must comply with all applicable State and Federal laws.
- 3.0 EXECUTION:
  - 3.1 Placing Topsoil: Topsoil shall be distributed uniformly and spread evenly to an average thickness of 3 inches, with a minimum thickness of 2 inches. Soil compacted by construction equipment or soil on compacted cut slopes of grades shall be pulverized to a minimum depth of 2 inches by disking or plowing before applying topsoil.
  - 3.2 Application of Soil Conditioners: All fertilizers, pH adjusters, and soil conditioners shall be incorporated into the soil to a depth of at least 4 inches.
  - 3.3 Application of Soil Amendments: Soil amendments shall be spread uniformly over the soil and thoroughly incorporated into the existing soil to a depth of 8 inches.
  - 3.4 Mulch shall be spread uniformly in a continuous blanket, using 1-1/2 tons per acre.

**Sodding and Seeding**

- 1.0 DESCRIPTION OF WORK: This specification covers the furnishing and installation of seed and sod. Products shall match existing materials and/or shall be as directed by the Authorized Member Representative. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.
- 2.0 PRODUCTS:
  - 2.1 Seed shall be the latest season's crop and shall be delivered in original sealed packages bearing the producer's guaranteed analysis for percentages of mixtures and pure live seed. Seed shall be labeled in conformance with U.S. Department of Agriculture rules and regulations under the Federal Seed Act and applicable state seed laws. Weed seed shall not exceed 1 percent by weight of the total mixture.
  - 2.2 Sod shall be nursery grown, field sod, certified sod, or approved sod as classified in the ASPA Guideline Specifications to Turfgrass Sodding.
  - 2.3 Sprigs shall be healthy living stems, stolons, or rhizomes and attached roots of grass without adhering soil. Sprigs shall include two to three nodes, shall be 4 to 6 inches long, and shall be obtained from approved sources where the sod is heavy and dense. Harvesting and planting operations shall be coordinated to prevent exposure of sprigs to the sun for more than 30 minutes

Attachment 1: Specifications for the Work

before covering and moistening.

2.4 Water shall not contain elements toxic to plant life.

3.0 EXECUTION:

3.1 Preparation: Except on slopes steeper than 2 horizontal to 1 vertical, the soil shall be tilled to a depth of at least 4 inches. On slopes between 2 horizontal to 1 vertical and 1 horizontal to 1 vertical tillage, depths shall be 2 inches. On slopes steeper than 1 horizontal to 1 vertical, no tillage will be permitted.

3.2 Application:

3.2.1 Planting Seasons and Conditions: Planting shall not be done when the ground is frozen, snow covered, or in an unsatisfactory condition for planting.

3.2.2 Seed shall be broadcast uniformly. The seed shall be covered to an average depth of 1/4 inch. •02933

3.2.3 Immediately After Seeding, the entire area shall be firmed with a roller and the soil moistened to a depth of 6 to 8 inches.

3.2.4 Sodding shall be accomplished in accordance with the ASPA Guideline Specifications to Turfgrass Sodding.

3.2.5 When Spot Sodding, the sod shall be cut into plugs 2 inches square or 2 inches in diameter. The individual pieces of sod shall be placed on 12-inch centers and pressed firmly into the soil by foot pressure or by tamping.

3.2.6 After Sod Pieces Have Been Placed in Position, the sodded area shall be rolled or tamped so that air pockets are eliminated.

3.2.7 Water Shall Be Applied to the sodded areas at a rate sufficient to ensure thorough wetting of the soil to a depth of at least 4 inches.

3.2.8 Sprigging: Sprigs shall be planted in such quantity as to provide a minimum of 25 viable sprigs or 108 linear inches of viable sprigs per square yard of areas.

3.2.8.1 Immediately After Sprigging Operations Have Been Completed, the planted area shall be firmed with a cultipacker or a roller.

3.2.8.2 Water Shall Be Applied at the time of sprigging operations wetting the soil to a depth of 4 inches.

3.2.9 Protection of Turfed Areas: Immediately after seeding, sodding, or sprigging, the area shall be protected against traffic or other use by erecting barricades, as required, and approved signs shall be placed at appropriate intervals until final acceptance.

**Landscape Irrigation System**

1.0 DESCRIPTION OF WORK: This specification covers the complete irrigation system including: pipe, tubing, fitting, bubbler and emitter heads, control units, and all appurtenances necessary for an operating system. The system shall be Contractor designed, and installed with Authorized Member Representative approval.

2.0 PRODUCTS:

2.1 Piping and Fittings:

2.1.1 Copper Tubing: ASTM B 88, Type K; solder joint fittings, ASME B16.22 and B16.18 using 95-5 tin antimony solder.

2.1.2 PVC Pipe: ASTM D 1785, PVC 1120, Schedule 40 or 80, or ASTM D 2241, PVC 1120 SDR 21, Class 200; threaded or socket type, solvent cemented.

2.1.3 Polyethylene Pipe: ASTM D 2239, PE3406, SDR 15; insert fittings shall be used with stainless steel clamps.

2.1.4 Tubing for use with drip emitters shall be either polyethylene or polybutylene and shall have a minimum working pressure of 100 psi at 37 C.

2.2 Risers for Pop-up Bubbler Heads shall be of the double-swing joint type.

2.3 Application Devices shall be as specified herein.

2.3.1 Pop-up spray heads shall conform to Fed Spec WW-H-001220, Type II, class as required for the spray pattern needed.

2.3.2 Shrubbery sprinkler heads shall be brass nozzle type with adjustable conical spray coverage for permanent aboveground mounting or riser or pop-ups, height compatible with ground cover.

2.3.3 Bubbler heads shall be of the umbrella type in which the flow is evenly distributed around the

Attachment 1: Specifications for the Work

- perimeter of a flat plate on top of the bubbler. The bubbler shall be so adjustable as to provide half or full circle patterns and operating range of 20 psi to 90 psi. The flow rate shall be adjustable for gallonage and pressure by an easily accessible regulating screw.
- 2.3.4 Drip emitters shall be made of rigid, black, ultraviolet-resistant plastic. Each emitter head shall consist of at least two distinct pieces and be designed for easy and complete disassembly for cleaning. The emitters shall be capable of clog-free operation using water filtered through a 30-mesh screen. Emitters shall be multi-headed and shall be spaced to vary with soil conditions and wetted irrigation area.
- 2.4 Valves:
- 2.4.1 Gate valves less than 3 inches shall conform to MSS SP-80, Type 1, Class 150, with threaded or soldered ends.
- 2.4.2 Gate valves 3 inches and larger shall conform to AWWA C509, with flanged ends.
- 2.4.3 Pressure Reducing Valves: One valve shall be installed with each solenoid control valve. The valves shall be hydraulically operated, pilot operated, globe or angle type, and may be actuated either by diaphragm or piston. Valve bodies shall be bronze and shall conform to MSS SP-80, Type 1, Class 150. Valve stem shall be stainless steel. Valve discs and diaphragms shall be synthetic rubber. Valve seats shall be bronze. Pilot controls shall be bronze with stainless steel working parts.
- 2.4.4 Solenoid control valves shall be heavy-duty, all brass construction suitable for 150 psi working pressure and shall be a globe-type diaphragm valve of normally closed design.
- 2.4.5 Manual drain valves less than 2-1/2 inches shall be MSS SP-80, Type 3, Class 150, with soldered or threaded ends. Manual drain valves 2-1/2 inches and larger shall be MSS SP-85, Type II, Class 250, with threaded or flanged ends.
- 2.4.6 Automatic drain valves shall be brass or plastic, spring-loaded ball drip type, 150 pounds, and threaded ends, designed to close at 6 foot pressure head with positive seal at 3 psi pressure or greater, and be open to drain at less than 3 psi pressure.
- 2.4.7 Reduced pressure principle assemblies, double check valve assemblies, atmospheric (nonpressure) type vacuum breakers, and pressure type vacuum breakers shall be tested, approved, and listed in accordance with FCCHR-01. Backflow preventers with intermediate atmospheric vent shall be in accordance with ASSE 1012. Reduced pressure principle backflow preventers shall be in accordance with ASSE 1013.
- 2.5 Accessories:
- 2.5.1 Valve keys for manually operated valves shall be 1/2 inch diameter by 3 feet long, tee handles and keyed to fit valves.
- 2.5.2 Valve Boxes: Boxes shall be reinforced concrete pipe with cast-iron cover. Plastic valve boxes and covers, 9 in. inside diameter and self-draining, may be used as an option when approved by the Authorized Member Representative and in accordance with ASTM D 638. The word "IRRIGATION" shall be cast on cover.
- 3.0 EXECUTION:
- 3.1 Placing and Laying: Pipe shall not be laid in water or when trench conditions are otherwise unsuitable for the work. Water shall be kept out of the trench until the material in the joints has hardened or until caulking or jointing is completed. When work is not in progress, open ends of pipe, fittings, and valves shall be securely closed so that no substance will enter the pipes or fittings. Pipe ends left for future connections shall be valved, plugged, or capped, and anchored as shown or as directed.
- 3.2 Testing:
- 3.2.1 Hydrostatic Tests: After all new piping and risers are in place and prior to the installation of heads, each control valve shall be opened separately and the system shall be thoroughly flushed. After flushing, risers shall be capped and the entire system shall be subjected to a hydrostatic pressure test for a period of four hours. No testing shall be done until the last joint has had at least 12 hours to set. Leaking joints, cracked or defective pipe or valves shall be cut out and replaced and the complete test repeated until satisfactory results are obtained as approved by the Authorized Member Representative.
- 3.2.2 Operational Test: After the hydrostatic test, heads shall be installed and the system completed and tested to demonstrate functional efficiency. The entire system shall be operated on a normal basis

Attachment 1: Specifications for the Work

for at least one month. Deficiencies such as clogging of emitters shall be corrected by the Contractor.

**Plantings**

- 1.0 DESCRIPTION OF WORK: This specification covers the furnishing and installation of plantings. Products shall match existing materials and/or shall be as directed by the Authorized Member Representative. Installation procedures shall be in accordance with the product manufacturer's recommendations. Demolition and removal of materials shall be as required to support the work.
- 2.0 PRODUCTS:
  - 2.1 Plants:
    - 2.1.1 Plants shall be nursery grown or plantation grown stock conforming to ANSI Z60.1 and shall bear botanical names listed in the publication for Standardized Plant Names.
    - 2.1.2 Planting Stock shall be well-branched and well-formed, sound, vigorous, healthy, and free from disease, sun-scald, windburn, abrasion, and harmful insects or insect eggs and shall have healthy, normal, and unbroken root systems.
    - 2.1.3 Balled and Burlapped Plants and balled and potted plants shall have ball sizes and ratios conforming to ANSI Z60.1.
    - 2.1.4 Bare-Root Plants shall be dug with the root system substantially intact but with the earth carefully removed.
    - 2.1.5 Container Grown Plants shall have sufficient root growth to hold the earth intact when removed from containers but shall not be root bound.
  - 2.2 Inert Membranes:
    - 2.2.1 Polyethylene shall conform to ASTM D 2103 and shall be 4 mils thick and black in color.
    - 2.2.2 Roofing Felt shall conform to ASTM D 250, Type II.
    - 2.2.3 Fiberglass Mat shall be of lime borosilicate glass fibers with an average fiber diameter of 8 to 12 microns and 2- to 4-inch strands of fiber bonded with phenol formaldehyde resin. The mat shall be 100 percent textile glass fiber.
  - 2.3 Granular Fill for Plant Pit and Bed Drainage: Granular fill for filling over excavations and for bedding of pipes shall consist of uniformly graded sand, stone, gravel, or stone screenings free from an excess of soft or unsound particles or other objectionable matter.
  - 2.4 Mulch shall be free from deleterious materials and shall be stored so as to prevent inclusion of foreign materials.
  - 2.5 Trunk Wrapping Material: Tree wrap shall be two thicknesses of crinkled paper cemented together with a layer of bituminous material.
  - 2.6 Guying and Staking Material: Stakes for tree support and ground stakes shall be treated with preservative and sized for their usage. Accessories for guying and staking shall include wire and cable, turnbuckles, eyebolts, and deadmen as the project requires.
  - 2.7 Edging Material for plantings shall be composed of wood, metal, or plastic, as the project requires.
  - 2.8 Antidessicant shall be an emulsion that will provide a film over plant surfaces permeable enough to permit transpiration and will not damage the plant.
  - 2.9 Herbicides and Pesticides used must comply with all applicable state and federal laws and be registered with the U.S. Environmental Protection Agency.
- 3.0 EXECUTION:
  - 3.1 Clearing and Grading: Clearing shall consist of the satisfactory removal and disposal of brush, snags, and rubbish occurring within the area designated.
  - 3.2 Protection of Existing Vegetation: If lawns have been established prior to planting operations, the surrounding turf shall be covered before excavations are made in a manner that will protect turf areas. Existing trees, shrubbery, and beds that are to be preserved shall be barricaded in a manner that will effectively protect them during planting operations.
  - 3.3 Turf Removal: Where planting beds occur in existing turf areas, the turf shall be removed to a depth that will ensure the removal of the entire root system.
  - 3.4 Plant Pits shall be dug to produce vertical sides and flat, uncompacted bottoms.
  - 3.5 Planting Seasons and Conditions: Planting shall be done when the ground is not frozen, snow covered, or in an otherwise unsuitable condition for planting.

Attachment 1: Specifications for the Work

- 3.6 Setting Plants: Balled and burlapped and container-grown plants shall be handled and moved only by the ball or container. Plants shall be set plumb and held in position until sufficient soil has been firmly placed around roots or ball.
- 3.7 Fertilization: After establishment of finished grade around plants, all pit and bed areas shall be topdressed with fertilizer at rates recommended by the manufacturer. Fertilizer shall be applied to existing trees at rates recommended by the manufacturer.
- 3.8 Watering: All watering shall be done in a manner that will provide uniform coverage but will not cause erosion or damage to the finished surface. Sufficient water shall be applied to penetrate the planting bed to a depth of 4 inches.
- 3.9 Wrapping: The trunks of deciduous trees shall be wrapped immediately after planting.
- 3.10 Staking and Guying: Plants 4 to 6 feet tall shall be single staked. Plants over 6 feet tall shall be double staked. Hose chafing guards shall be used where wire would contact the plant.
- 3.11 Pruning: New plant material shall be pruned as required. Trimmings shall be removed from the site. Cuts 1/2 inch in diameter and larger shall be painted with tree wound dressing.
- 3.12 Maintenance During Installation: Maintenance operations shall begin immediately after each plant is planted and shall continue as required until final acceptance.

**DIVISION 33-UTILITIES**

**Site Utility Distribution Piping**

- 1.0 DESCRIPTION OF WORK: This specification covers site utility distribution piping, and/or materials as directed by the Authorized Member Representative.
- 2.0 PRODUCTS:
  - 2.1 Polyvinyl Chloride (PVC) Plastic Piping:
    - 2.1.1 Pipe and Fittings: Pipe, AWWA C900, shall be plain end or gasket bell end, Pressure Class 150 (DR 18) with cast-iron-pipe-equivalent OD. Molecular Oriented (MO) PVC pipe, AWWA C900, shall be plain end or gasket bell end, Pressure Class 150 with cast-iron-pipe-equivalent OD. Fittings shall be gray iron or ductile iron, AWWA C110/A21.10 or AWWA C153/A21.53, and have cement-mortar lining, AWWA C104/A21.4, standard thickness. Fittings with push-on joint ends shall conform to the same requirements as fittings with mechanical-joint ends, except that bell design shall be modified, as approved, for push-on joint suitable for use with PVC plastic pipe specified in this paragraph. Pipe color is to be blue or white.
    - 2.1.2 Joints and Jointing Material: Joints for pipe shall be push-on joints, ASTM D 3139. Joints between pipe and metal fittings, valves, and other accessories shall be compression-type joints/mechanical joints, ASTM D 3139 and AWWA A21.11. Provide each joint connection with an elastomeric gasket suitable for the bell or coupling with which it is to be used. Gaskets for push-on joints for pipe, ASTM F 477. Gaskets for compression-type joints/mechanical joints for joint connections between pipe and metal fittings, valves, and other accessories, AWWA A21.11, for mechanical joints. Mechanically coupled joints using a sleeve-type mechanical coupling, as specified in paragraph entitled "Sleeve-Type Mechanical Couplings," may be used as an optional jointing method in lieu of push-on joints on plain-end PVC plastic pipe, subject to the limitations specified for mechanically coupled joints using a sleeve-type mechanical coupling and to the use of internal stiffeners as specified for compression-type joints in ASTM D 3139. 2.
    - 2.1.3 High Density Polyethylene (HDPE) Plastic Pipe ASTM F-714-Pipe Std.; ASTM D3261 – Fittings Std.; AWWA C-901; 3" – 8" SDR 11.0, 160 psi. HDPE inside diameter shall equal or exceed PVC inside diameter.
    - 2.1.4 Valves, Hydrants, and Other Water Main Accessories: Gate Valves on Buried Piping: AWWA C500, AWWA C509, or UL 262. Unless otherwise specified, valves conforming to: (1) AWWA C500 shall be nonrising stem type with double-disc gates and mechanical-joint ends, (2) AWWA C509 shall be nonrising stem type with mechanical-joint ends, and (3) UL 262 shall be inside-screw type with operating nut, double-disc or split-wedge type gate, designed for a hydraulic working pressure of 150 psi, and shall have mechanical-joint ends. Materials for UL 262 valves shall conform to the reference standards specified in AWWA C500. Valves shall open by counterclockwise rotation of the valve stem. Stuffing boxes shall have O-ring stem seals. Stuffing boxes shall be bolted and

Attachment 1: Specifications for the Work

constructed so as to permit easy removal of parts for repair. In lieu of mechanical-joint ends and push-on joint ends, valves may have special ends for connection to sleeve-type mechanical coupling. Valve ends and gaskets for connection to sleeve-type mechanical coupling shall conform to the applicable requirements specified for the coupling. Provide 6 inch size valves with gearing, AWWA C500. Valves shall be of one manufacturer.

- 2.1.5 Fire Hydrants: Hydrant: AWWA C502, UL 246, dry barrel type, inside dimension of 7 inches (175 mm) minimum, with minimum 5 inches (125 mm) diameter valve seat opening; minimum net water area of barrel not less than 190 percent of valve opening; 6 inch (150 mm) bell or mechanical joint inlet connection with accessories, gland bolts, and gaskets. Hydrant outlets shall have 0.90 discharge coefficients.
- 2.1.6 Hydrant Extensions: Fabricate in multiples of 6 inches (150 mm) with rod and coupling to increase barrel length.
- 2.1.7 Hose and Streamer Connection: Match sizes with utility company, two hose nozzles, one pumper nozzle. Install a Storz connection in place of the 4-1/2" steamer connection.
- 2.1.8 Finish: Primer and two coats of enamel in color to be selected by base.
- 2.1.9 Casing (under roadways): Casing under all paved roads shall meet, at a minimum, the following: a. Wall Thickness: (Steel Casing) All casings shall be 0.188", ASTM A139, Grade B. b. Steel casing shall be coated inside and out with approved primer plus one coat of asphaltum paint on outside. c. All casing as a minimum shall extend 3 feet beyond the edge of roadway surfaces.
- 2.1.10 Casing/Pipe Spacers: The Contractor shall provide casing spacers for all piping routed through steel casing. The spacers shall be stainless steel construction with UHMW polymer runners and shall be in two (2) halves. The nuts and bolts used shall be stainless steel. A total of no less than two (2) spacers per joint of pipe shall also be used plus one (1) near the openings (ends) of the casing. The Contractor shall provide casing end seals on all casings. The end seals shall wrap around the casing and carrier pipes after installation to provide a barrier to backfill debris and seepage. Stainless steel bands shall be used to secure the end seals.
- 2.2 Water Service Line Materials: Plastic Piping - Plastic pipe and fittings shall bear the seal of the National Sanitation Foundation for potable water service. Plastic pipe and fittings shall be supplied from the same manufacturer. Polyvinyl Chloride (PVC) Plastic Piping: ASTM D 1785, Schedule 40; or ASTM D 2241, with SDR as necessary to provide 150 psi minimum pressure rating. Fittings, ASTM D 2466. Pipe and fittings shall be of the same PVC plastic material and shall be one of the following pipe/fitting combinations, as marked on the pipe and fitting, respectively: [PVC 1120/PVC I; PVC 1220/PVC 12;] PVC 2120/PVC II; PVC 2116/PVC II. Solvent cement for jointing, ASTM D 2564.
  - 2.2.1 Insulating Joints - Joints between pipe of dissimilar metals shall have a rubber-gasketed or other suitable approved type of insulating joint or dielectric coupling which will effectively prevent metal-to-metal contact between adjacent sections of piping.
  - 2.2.2 Corporation Stops - Ground key type; bronze, ASTM B 61 or ASTM B 62; and suitable for the working pressure of the system. Ends shall be suitable for solder-joint or flared tube compression type joint. Threaded ends for inlet and outlet of corporation stops, AWWA C800; coupling nut for connection to flared copper tubing, ASME/ANSI B16.26.
  - 2.2.3 Curb Boxes - Provide a curb box for each curb or service stop. Curb boxes shall be of cast iron of a size suitable for the stop on which it is to be used. Provide a round head. Cast the word "WATER" on the lid. Each box shall have a heavy coat of bituminous paint.
- 3.0 EXECUTION:
  - 3.1 Location Of Water Lines: Terminate the work covered by this section at a point approximately 5 feet from the building, unless otherwise indicated. Do not lay water lines in the same trench with gas lines or electric wiring. 1. Water Piping Installation Parallel With Sewer Piping a. Normal Conditions: Lay water piping at least 10 feet horizontally from a sewer or sewer manhole whenever possible. Measure the distance edge-to-edge.
  - 3.2 Unusual Conditions: When local conditions prevent a horizontal separation of 10 feet, the water piping may be laid closer to a sewer or sewer manhole provided that: (1) The bottom (invert) of the water piping shall be at least 18 inches above the top (crown) of the sewer piping. (2) Where this vertical separation cannot be obtained, the sewer piping shall be constructed of AWWA-

Attachment 1: Specifications for the Work

approved water pipe and pressure tested in place without leakage prior to backfilling. (3) The sewer manhole shall be of watertight construction and tested in place.

3.3 Installation of Water Piping Crossing Sewer Piping:

3.3.1 Normal Conditions: Water piping crossing above sewer piping shall be laid to provide a separation of at least 18 inches between the bottom of the water piping and the top of the sewer piping.

3.3.2 Unusual Conditions: When local conditions prevent a vertical separation described above, use the following construction: (1) Sewer piping passing over or under water piping shall be constructed of AWWA-approved ductile iron water piping, pressure tested in place without leakage prior to backfilling. (2) Water piping passing under sewer piping shall, in addition, be protected by providing a vertical separation of at least 18 inches between the bottom of the sewer piping and the top of the water piping; adequate structural support for the sewer piping to prevent excessive deflection of the joints and the settling on and breaking of the water piping; and that the length, minimum 20 feet, of the water piping be centered at the point of the crossing so that joints shall be equidistant and as far as possible from the sewer piping.

3.3.3 Pipe Laying And Jointing: Remove fins and burrs from pipe and fittings. Before placing in position, clean pipe, fittings, valves, and accessories, and maintain in a clean condition. Provide proper facilities for lowering sections of pipe into trenches. Do not under any circumstances drop or dump pipe, fittings, valves, or any other water line material into trenches. Cut pipe accurately to length established at the site and work into place without springing or forcing. Replace by one of the proper length any pipe or fitting that does not allow sufficient space for proper installation of jointing material. Blocking or wedging between bells and spigots will not be permitted. Lay bell-and-spigot pipe with the bell end pointing in the direction of laying. Grade the pipeline in straight lines; avoid the formation of dips and low points. Support pipe at proper elevation and grade. Secure firm, uniform support. Wood support blocking will not be permitted. Lay pipe so that the full length of each section of pipe and each fitting will rest solidly on the pipe bedding; excavate recesses to accommodate bells, joints, and couplings. Provide anchors and supports where indicated and where necessary for fastening work into place. Make proper provision for expansion and contraction of pipelines. Keep trenches free of water until joints have been properly made. At the end of each work day, close open ends of pipe temporarily with wood blocks or bulkheads. Do not lay pipe when conditions of trench or weather prevent installation. Depth of cover over top of pipe shall not be less than 2 1/2 feet. Install access fittings to permit disinfection of water system.

3.3.4 Connections To Existing Water Lines: Make connections to existing water lines after approval is obtained and with a minimum interruption of service on the existing line. Scheduling of any outage requires a minimum of one week prior notice for the user of the facility. Make connections to existing lines under pressure in accordance with the recommended procedures of the manufacturer of the pipe being tapped.

3.3.5 Special Requirements For Installation Of Water Mains

3.3.6 Installation of PVC Plastic Water Main Pipe and Associated Fittings: Make push-on joints with the elastomeric gaskets specified for this type joint, using either elastomeric-gasket bell-end pipe or elastomeric-gasket couplings. For pipe-to-pipe push-on joint connections, use only pipe with push-on joint ends having factory-made bevel; for push-on joint connections to metal fittings, valves, and other accessories, cut spigot end of pipe off square and re-bevel pipe end to a bevel approximately the same as that on ductile-iron pipe used for the same type of joint. Use an approved lubricant recommended by the pipe manufacturer for push-on joints. Make compression-type joints/mechanical joints with the gaskets, glands, bolts, nuts, and internal stiffeners previously specified for this type joint; assemble in accordance with the requirements of AWWA C605 for joining PVC pipe to fittings and accessories, with the applicable requirements of AWWA C600 for joint assembly, and with the recommendations of Appendix A to AWWA C111/A21.11. Cut off spigot end of pipe for compression-type joint/mechanical-joint connections and do not re-bevel. Assemble joints made with sleeve-type mechanical couplings in accordance with the recommendations of the coupling manufacturer using internal stiffeners as previously specified for compression-type joints.

3.3.7 Pipe Anchorage: Provide concrete thrust blocks. Thrust blocks shall be in accordance with the requirements of AWWA C605 for reaction or thrust blocking and plugging of dead ends, except that

Attachment 1: Specifications for the Work

size and positioning of thrust blocks shall be as indicated. Use concrete, ASTM C 94, having a minimum compressive strength of 4,000 psi at 28 days. 3. Install a # 10 gage copper trace wire with buried PVC pipe to facilitate location with an electronic detector. Install wire 8 to 12 inches above pipeline and terminate 3 to 4 inches above grade. Do not wrap wire around pipe. The magnetic detectable conductor must have a brightly colored plastic covering with the "Water Service" imprinted in large letters.

- 3.3.8 Installation of Valves: Make and assemble joints to gate valves as specified for making and assembling the same type joints between pipe and fittings.
- 3.3.9 Installation of Hydrants: Install hydrants in accordance with AWWA C600 for hydrant installation and as indicated. Make and assemble joints as specified for making and assembling the same type joints between pipe and fittings. Install hydrants with the 4 1/2 inch connections facing the adjacent paved surface. If there are two paved adjacent surfaces, contact the Contracting Officer for further instructions.
- 3.3.10 Disinfection - Disinfect new water piping and existing water piping in accordance with AWWA C651 and as required by State permit. Bacteriological samples shall be taken on two consecutive days at the connection to the existing system, the end point of the new addition, on each new line branching off main, and every 1,200 feet on straight runs of pipe.

**Modification of Contract  
(Contract Extension)  
(Page 1 of 3)**

Robert Carr  
Pueblo Mechanical and Controls, LLC.  
6771 E. Outlook Drive  
Tucson, AZ 85756

**RE: Contract # 19F-PMAC2-0904 modification of contract through an extension of contract is made by, and between, Pueblo Mechanical and Controls, LLC. and Mohave Educational Services Cooperative (Mohave).**

In accordance with its terms and conditions, Mohave requests to extend contract 19F-PMAC2-0904 for a period of one (1) year, beginning 9/4/2023. The extension shall be under the same terms and conditions contained therein.

Provide your agreement to extend by completing the appropriate information below and on the following pages. If the contract is extended, Pueblo Mechanical and Controls, LLC. agrees to provide products or prices as per 19F-0808.

By signing this Modification of Contract, you hereby certify to the best of your knowledge and belief that your firm complies with Byrd Anti-Lobbying Amendment 31 U.S. Code § 1352, 2 CFR § 200.450 and Federal Acquisition Regulation 52.203-11

We agree to **modify** and **extend** the contract as specified above, abiding by the current terms and conditions, and any attached clarifications.

Signature Robert W. Carr Title OSM

Typed/Printed Name ROBERT W. CARR Date 8/8/2023

Upon your signed, executed Modification of Contract through a Contract Extension, you shall be bound to sell the materials and/or services offered to and accepted by Mohave in accordance with the solicitation, including all terms, conditions, specifications, amendments and any accepted written exceptions.

*Nancy D. Colbaugh*

Mohave Educational Services Cooperative, Inc.  
625 East Beale Street | Kingman, AZ 86401  
Phone 928-718-3228 | Fax 928-718-3232

**If all pages of this notice are not received at Mohave's Kingman office on, or before, 9/4/2023, orders shall be held without processing. Email or fax completed extension to [contracts@mesc.org](mailto:contracts@mesc.org) or 928-718-3232.**

To terminate the contract effective 9/4/2023, email or fax a notice of your request to cancel the contract to [contracts@mesc.org](mailto:contracts@mesc.org) or 928-718-3232. You agree to complete any authorized work or orders received prior to that date. Renewals not received within 14 days following 9/4/2023 may result in cancellation of the contract. However, any authorized orders received prior to this date, shall be completed under this contracts terms and conditions.

# Modification of Contract (Contract Extension)

(Page 2 of 3)

## Requested Pricing Modifications

We list your contract as utilizing Coefficient applied to UPB, Trade Service (TRA-SER) pricing and some fixed price for professional services.. Please confirm the following regarding pricing under your contract:

Our contract utilized firm-fixed pricing. We agree to hold the current prices until the next contract renewal date of 9/4/2024.

Our contract utilized percentage off MSRP/Retail pricing. The current price lists/catalogs are still applicable.

We are requesting a price modification. A price list/catalog will be submitted by \_\_\_\_\_. (Insert Date)

*Remember that your firm cannot quote any new products contained in pricing submitted with your contract extension until it has been reviewed and a Contract Modification through a pricing update/product addition has been issued. Current contract pricing will remain in effect until this process is complete.*

## **Vendor Logo**

Currently, we have the following logo on file for use on our website in our product/vendor finder:

If you wish to revise or update the logo we have on file, keep the following requirements in mind:

- *What file types are acceptable?* Vector point files are highly recommended (such as .ai or .eps files). If you don't have access to a vector point file, a large hi-resolution (approximately 150-300 dpi) JPEG, TIFF, BITMAP, GIF or PNG file will work. Having a file with a high dpi will help keep images looking sharp if we need to resize the logo.
- *What file size is recommended?* There is no limitation to the logo file size.

# Modification of Contract (Contract Extension)

(Page 3 of 3)

## Vendor Benefits Description

Currently, we have the following information on our website detailing the benefits of your contract for our members to view:

---

Pueblo Mechanical and Controls, LLC. is a recognized JOC expert, specializing in full spectrum energy efficient heating, cooling, ventilation, and air conditioning [HVAC] installation and service. Since 2001, having completed over 3,800 projects and thousands of service calls for educational institutions, cities, counties, and various federal and private organizations, state-wide. Procuring our services is simple, secure, and above all, cost effective!

Mohave makes utilizing its approved and trustworthy vendors convenient and statute compliant with guidelines and procedures in place that protect you, the customer. Service is friendly and lightning fast! Inquire about our affordable service contracts and enjoy continued technical and hands-on support for systems of all types and ages.

We proudly service a host of governmental agencies with guaranteed work; we will not rest until the project is done right and worthy of the Mohave membership we serve.

---

If you wish to revise or update the vendors benefits information we have on file, keep the following requirements in mind:

- The description should be 150-200 words that explain the benefits that your company can provide to our members through your Mohave contract.
- The description should give a brief overview for members who may be accessing information about your contract from our product vendor finder on Mohave's website.
- Please note that Mohave reserves the right to revise or modify the information provided either for content or length.

**Email or fax request for information revisions or additional information to [contracts@mesc.org](mailto:contracts@mesc.org) or 928-718-3232. If you have any questions, contact your Contract Specialist either via email at [michaelc@mesc.org](mailto:michaelc@mesc.org) or phone 928-718-3222.**

**Price Proposal – Primary Vendor Information**  
**(Place in a clearly marked, separate sealed envelope)**

**IF YOUR FIRM WAS SHORTLISTED FOR DIVISION 22 PLUMBING, DIVISION 23 HEATING, VENTILATION AND AIR CONDITIONING OR DIVISION 26 ELECTRICAL, PROVIDE COEFFICIENTS AND PRICING INFORMATION FOR BOTH DIVISIONS OR INDICATE IF THE COEFFICIENTS WILL BE IDENTICAL FOR BOTH DIVISIONS.**

**Price Proposal shall be submitted in a clearly marked, separate sealed envelope. Offeror shall provide a price proposal to include the following information:**

- 1. Name and Date of the Unit Price Book (UPB):**
- 2. Coefficient(s) to be applied to pre-priced items (items listed in the UPB) for work performed during:**
  - Normal business hours (Monday - Friday 7 a.m. - 5 p.m.)
  - Other hours (after hours, weekends, and holidays)
  - Note adjustments to the coefficient(s), if applicable, for work performed in different regions of the state.
- 3. Coefficient(s) to be applied to non pre-priced items (items not listed in the UPB) for work performed during:**
  - Normal business hours (Monday - Friday 7 a.m. - 5 p.m.)
  - Other hours (after hours, weekends, and holidays)
  - Note adjustments to the coefficient(s), if applicable, for work performed in different regions of the state.

**Notes:** Provide a brief explanation of the rationale for your coefficients. The rationale should indicate how you determined the cost of doing the work and the various elements that made up your coefficients. See Specification 1.2.13, Pricing, for additional information.

**4. Open Book Pricing Workbook:**

**NOTE: *The workbook contains cells that include formulas to calculate total costs. Do not override the formulas within these cells.***

If offeror is including the Open Book Pricing methodology in their price proposal, the Open Book Price workbook shall be completed as follows:

- Provide complete information in the worksheet titled, "*Price Summary*" in the electronic Open Book Price workbook titled, "*19F-0808 Open Book Price Summary.xlsx*" includes yellow highlighted cells for *General and Administrative Cost (G&A)* and *Profit*. Place the percentage value your firm will use to calculate overhead and profit for the Direct Project Costs and General Conditions.
- The worksheet titled, "*General Conditions*" in the electronic Open Book Price workbook titled, "*19F-0808 Open Book Price Summary.xlsx*", includes general conditions, services, or costs not identified or included in the subcontractor quotations.
- Provide the labor and/or service unit price for the yellow highlighted cells in the section titled, *Admin Fee Items: Unit Price*. Additionally, include the unit of measure (e.g. per hour, per day, per week) as applicable in the *Unit Of Measure* column.
- Provide additional costs as applicable for yellow highlighted cells in the section titled, *Non-Admin Fee Items*. Non-Admin Fee items include costs that are "passed-through" to member at cost to the contract vendor. *Mohave shall not collect administration fees on the above non-admin fee items.*
- Add line items to the Admin and/or Non-Admin Fee schedules as necessary.
- **Only services/costs identified in this price schedule will be allowed under an awarded contract.**
- This workbook will serve as your quoting template for all open book projects under an awarded contract.

**Price Proposal – Primary Vendor Information**  
**(Place in a clearly marked, separate sealed envelope)**

**5. Trade Service Price Guides for items and services not included in the UPB:**

- The pricing methodology to determine the Mohave price shall be:
  - Discount off list (specify discount).
  - Discount off Column Two (specify discount) when List Price is unavailable.

**6. Professional Services (Provide the applicable hourly rate for each service offered. No coefficient will be applied to these rates.)**

- Design Services
- Engineering Services
- Other Professional Services (specify service and rate)

**7. Maintenance Services and Extended Warranties (Provide the cost for all maintenance services and extended warranties that are available after the warranty period. No coefficient will be applied to these prices.)**

**8. Other Charges (Provide any additional costs, or incidental charges. Such charges may include the items listed below. No coefficient will be applied to these charges.)**

- 100% Performance and Payment Bonds
- Meals and incidental expenses (M&IE), transportation and lodging
- Mobilization (Indicate when mobilization charges would apply.)

*NOTE: Mobilization may only be used with projects priced using Trade Service and labor. Mobilization charges shall not be allowed with UPB or Open Book Pricing methodologies.*

- Other

**9. Will you offer members a quick pay discount if payment is made within 10 or 20 days? Yes \_\_\_ No X**

- If Yes, what is the discount for 10 days? \_\_\_\_\_ 20 days? \_\_\_\_\_

**Travel Description**

If travel rates are applicable, describe how they are calculated, and when they are necessary, (e.g. 50 miles from origin). Include information regarding what the travel rates cover. (See **Pricing: Reimbursement for Transportation, Mileage, Lodging, Meals and Incidental Expenses** in the Special Terms and Conditions.)

Travel rates are applicable when work sites exceed 50-mile radius from our current Tucson and Phoenix office locations. In some

cases overnight lodging will not be required if it is more cost effective to travel to the work site daily versus overnight stays.

Meals & Incidentals are only applicable for work involving overnight accommodations.

**Bond Methodology Description**

Provide detailed information explaining the methodology to be used when bonds are applied to projects. Describe in detail the method your surety company requires you to use (e.g., bonds are applied before sales tax is applied, bonds are applied after sales tax is applied). Mohave will use this information to verify that your firm is consistently charging bonds in the same manner under an awarded contract.

The use of bonds is based on current state legislation and owners' requirements. Projects under \$100,000 do not require bonding

Unless specifically requested by the owner, all proposals will include this language. Bonding cost is calculated based on the total

price obligation.

**2. Coefficients - Pre-Priced Primary UPB Coefficients [RS Means CostWorks]:**

**APPLIES TO ALL DIVISIONS**

Normal Business Hours [M-F 7am – 5pm]:	.85
Other Hours [Weekends, holidays, etc.]:	.95
Adjustments to the coefficient(s), if applicable for work performed in different regions of the state:	N/A - None

**Professional Services**

Design Services [Mechanical/Electrical]:	\$116.00/hr.
Engineering Services:	\$120.00/hr.
Principal Engineering Services:	\$142.00/hr.

**Other Professional Services**

Drafting [CAD] Design:	\$92.00/hr.
Architect:	\$142.00/hr.
Principal Architect:	\$160.00/hr.

**Maintenance and Other Services [based on hourly labor rates]:**

Duty Position	Normal Hours	After Hours / Emergency Hours	Holidays
HVAC Chiller Tech [Wetside Applications]	\$104.00/hr.	\$142.00/hr.	\$176.00/hr.
HVAC Unitary Tech [Dryside Applications]	\$99.00/hr.	\$136.00/hr.	\$168.00/hr.
Pipefitter / Steamfitter	\$94.00/hr.	\$129.00/hr.	\$159.00/hr.
Sheet Metal Installation	\$74.00/hr.	\$101.00/hr.	\$125.00/hr.
Plumber	\$98.00/hr.	\$134.00/hr.	\$166.00h/hr.
Water Treatment	\$101.00/hr.	N/A	N/A
HVAC Building Automation Tech – Controls/Programing	\$98.00/hr.	\$134.00/hr.	\$166.00/hr.
Project Manager / Quality Control	\$96.00/hr.	\$131.00/hr.	\$163.00/hr.
Electrical [by PMAC]	\$87.00/hr.	\$119.00/hr.	\$147.00/hr.
General Labor	\$50.00/hr.	\$68.00/hr.	\$85.00/hr.

**Note: Labor rates above are all inclusive, no other factors or mark-ups are applied**

**Note: Normal hours are 7:00 am – 5:00 pm Monday – Friday [Excluding holidays]**

**Other Charges**

**3. Coefficients - Custom or Special Non-Prepriced Items Not Found in UPB or TRA-SER [Pricing based on three quotes when available; single source or customer mandated items due to specific specifications are available if they comply with contract requirements]**

Normal Business Hours [M-F 7am – 5pm]: **1.20**  
 Other Hours [Weekends, holidays, etc.]: **1.20**  
 Adjustments to the coefficient(s), if applicable  
 for work performed in different regions of the state: **N/A - None**

**NOTE:** The use of the non-prepriced pricing option will only take place when the equipment/supplies are not listed in primary or secondary costing and include a statement clearly indicating that pricing is not available via other pricing methodologies

**Explanation Notes:** Established coefficients represent the minimum realistic cost estimate to capture direct/indirect costs, overhead, and a sustainable profit. The coefficients represent project cost averages based on project spanning 15 years of UPB utilization.

**4. Open Book Pricing Workbook/Summary:**

**Name of Pricing Source:** 19F-0808 Open Book Price Summary Excel Spreadsheet – Jul 19

**TITLE:**

**Consideration and Approval of Contract:** Second Amendment to Contract for Services with TB Real Property Consultants, LLC for property acquisitions necessary for the Rio de Flag Flood Control Capital Project in an amount not to exceed \$150,000.

**STAFF RECOMMENDED ACTION:**

1. Approve Second Amendment to Contract for Services in an amount not to exceed \$150,000 for property acquisitions necessary for the Rio de Flag Flood Control Capital Project; and
2. Authorize the City Manager or designee to execute the necessary documents.

**Executive Summary:**

The City entered into a Contract for Services on October 2, 2023, with TB Real Property Consultants, LLC to help acquire property interests necessary for the Rio de Flag Flood Control Capital Project. The Contractor workload has increased as a result of changes in the Project design. As part of the Second Amendment, the Contract amount will increase from a not-to-exceed \$99,500 to a not-to-exceed \$150,000. Contractor has assisted in closing or placing in escrow 7 of the 17 properties assigned. The contract amount is being increased in order to close out the remaining acquisitions.

**Financial Impact:**

Project Name: Rio de Flag Flood Control Project  
Cost: Up to an additional \$50,000  
Account Number Budgeted: 206-08-385-3236-0  
FY Budgeted Amount: \$20,851,032  
Funding Source: Rio de Flag Flood Control Stormwater Capital Improvements FY 2024-25

**Policy Impact:**

No Impact

**Previous Council Decision or Community Discussion:**

March 5th, 2024: Council approved the first amendment to the contract

**Options and Alternatives to Recommended Action:**

1. Approve Second Amendment (recommended)
2. Do not approve Second Amendment

**Connection to PBB Priorities and Objectives:**

Safe and Healthy Community: Provide public safety  
Sustainable, Innovative Infrastructure: Deliver outstanding services to residents through a healthy, well maintained infrastructure system

**Connection to Regional Plan:**

- Manage watersheds and stormwater to address flooding concerns, water quality, environmental protections, and rainwater harvesting.
- Increase the region's preparedness for extreme climate events.
- Incorporate pedestrian access, trails, and watchable wildlife opportunities into natural watercourses when practical.
- Improve mobility and access throughout the region.
- Increase the availability and use of pedestrian infrastructure, including FUTS, as a critical element of a safe and livable community.

**Connection to Carbon Neutrality Plan:**

- Encourage vibrancy, appropriate density, and attainability in existing neighborhoods, so that more residents live within walking distance of their daily needs.
- Create inclusive networks for walking and biking that are continuous, attractive, safe, comprehensive, and convenient for people of all ages.

**Connection to 10-Year Housing Plan:**

**Create 5.8** Prioritize Capital Improvement Projects that facilitate affordable housing.

## SECOND AMENDMENT

### CONTRACT FOR SERVICES

#### Real Estate Services:

#### Land Acquisition for the Rio de Flag Flood Control Project

Contract No. 2023-154/TER-2023-089-AG2

This Second Amendment to the Contract for Services dated October 23, 2023 by and between the City of Flagstaff, an Arizona municipal corporation (“City”) and **TB Real Property Consultants, LLC, an Arizona limited liability company** (“Contractor”), as amended by the First Amendment dated March 28, 2024 (together “the Contract”) is made and entered into this \_\_\_\_\_ day of \_\_\_\_\_, 2024.

WHEREAS, the Contract requires more work than originally anticipated;

NOW THEREFORE, the parties agree that the Contract, paragraphs 2 and 9 and are hereby amended as follows (deleted text is shown as stricken, and new text is shown as underlined and capitalized text):

2. Compensation: In consideration for the Contractor’s satisfactory performance, City shall pay Contractor pursuant to the fee schedule attached hereto as *Exhibit A*, in a total amount not to exceed ~~\$99,500.00~~ \$150,000.00.
9. Price Adjustment: Any price adjustment must be approved by the City in writing as a formal Contract Amendment. The City Council must approve the price adjustment if the annual contract price exceeds ~~\$99,500.00~~ \$150,000.00 otherwise the City Manager or his designee (the Purchasing Director) shall have authority to approve a price adjustment on behalf of the City.

All other provisions of the Contract shall remain unchanged in full force and effect.

*(Remainder of Page Intentionally Blank)*

IN WITNESS WHEREOF, the Parties have caused this Second Amendment to be executed by their duly authorized representatives as of the date first written above. This Second Amendment will be in full force and effect only when it has been approved and executed by the duly authorized City officials.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Brian Huntzinger, Water Production Manager  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Contract:** Contract for the Purchase of Materials/Services with Empire Pump Corp. in an amount not to exceed \$650,000, annually, for Utilities Well and Pump Maintenance.

**STAFF RECOMMENDED ACTION:**

1. Approve the Contract for the Purchase of Materials/Services with Empire Pump Corp. in an amount not to exceed \$650,000, annually, for Utilities Well and Pump Maintenance; and
2. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

The City of Flagstaff, Water Services Division, operates water treatment and distribution facilities including well fields and booster stations. The purpose of establishing the Contract is to provide maintenance and repair of the pumps, motors, wells and other equipment associated with water production, treatment and distribution. The work covered under the Contract is for the removal and replacement of groundwater submersible pumps, motors, column pipe, and line shaft pumps, water treatment pumps and motors, related electrical work, and any other work related to maintaining, cleaning, repairing and testing wells, pumps and motors on an as-needed basis.

The budgeted amount for this contract is \$650,000, annually, for the term of the Contract. The Invitation for Bids advertised a large list of needs that City staff identified to perform the routine maintenance on City well pumps. Empire Pump Corp. submitted a bid with a total catalog value of \$953,450 for all of the items that City staff identified and was deemed the lowest responsible and responsive bidder. During the term of the Contract, City staff will evaluate and order the necessary materials and maintenance services to meet the City's needs within that \$650,000, annual budget.

**Financial Impact:**

The Water Production Section annually budgets based on the number of wells in service, the age of wells, etc. under accounts 202-08-301-1020-0-4229 (Local Wells) for \$252,800, 202-08-301-1021-0-4229 (Lake Mary Wells) for \$103,000, 202-08-301-1022-0-4229 (Woody Mountain Wells) for \$222,593 to cover the costs associated with maintaining the City of Flagstaff's groundwater wells, booster stations and related infrastructure. This Contract may also be utilized by Water Reclamation Facilities (under accounts 203-08-311-1112-0-4229, 203-08-312-1122-0-4229 and 204-08-321-1203-0-4229) for a total of \$171,500 and Water Services Engineering and Project Management.

**Policy Impact:**

This Contract ensures the potable water supply for the City is at maximum capacity at all times and the infrastructure is maintained.

**Previous Council Decision or Community Discussion:**

Similar contracts have been done since 1992. The last contract was approved in March of 2019.

## **Options and Alternatives to Recommended Action:**

1. Approve the Contract for the Purchase of Materials/Services with Empire Pump Corp. in an amount not to exceed \$650,000, annually, for Utilities Well and Pump Maintenance; or
2. Reject all bids for the Utilities Well and Pump Maintenance needs and require each task, job or project to be bid separately. City staff does not recommend this option as it would add significant time maintaining the City's potable water supplies.

## **Background and History:**

The City of Flagstaff, Water Services Division, operates water production, treatment and distribution facilities including well fields, booster stations and treatment plants. In order to service the City of Flagstaff groundwater wells a company needs to have the necessary equipment, licenses, bonds, and professional skills in order to do so as there is the possibility of multiple wells needing maintenance at the same time. Due to potential high water demand in summer months and approximately only two (2) days of peak demand volume in system storage, timing is critical for the maintenance and repair of water production infrastructure. The purpose of establishing the Contract with a qualified contractor is to provide maintenance and repair of the pumps, motors, wells and other equipment associated with water production. The work covered under this contract is for the removal and replacement of groundwater submersible pumps, line shaft pumps, motors, column pipe, water treatment and booster related pumps and motors, related electrical work, and any other work related to maintaining, cleaning, repairing and testing groundwater wells, treatment plants and booster stations on an as-needed basis.

On April 9, 2024, the Purchasing Section posted and Invitation for Bids on the Planet Bids website and advertised the solicitation in the Arizona Daily Sun newspaper. There were five (5) bids that were received for the Utilities Well and Pump Maintenance solicitation with Empire Pump Corp. deemed the lowest responsible and responsive bidder. The initial Contract is for two (2) years with the option to renew for three (3) additional one (1) year periods upon mutual agreement of the City and Empire Pump Corp.

## **Connection to PBB Priorities and Objectives:**

1. Safe & Healthy Community
2. Sustainable and Innovative Infrastructure: Deliver outstanding services to residents through a healthy, well-maintained infrastructure system.

## **Connection to Regional Plan:**

Policy WR.2.2: Maintain and develop facilities to provide reliable, safe, and costeffective water, wastewater, and reclaimed water services.

## **Connection to Carbon Neutrality Plan:**

1. CR-1: Strengthen existing community systems to create resilience to both short-term shocks and long-term change.
2. WS-1: Improve water infrastructure and expand water reuse.

## **Connection to 10-Year Housing Plan:**

None.

## **Connection to Division Specific Plan:**

1. Objective 5: Accelerate Infrastructure Maintenance and Replacement
  2. Objective 6: Ensure Adequate Water Resources and Plan for Climate Change
  3. Objective 7: Maintain Excellent Water Quality
-

## CONTRACT FOR PURCHASE OF MATERIALS/SERVICES

Contract No. 2024-106

This Contract is entered into this \_\_\_\_ day of \_\_\_\_\_, 2024, by and between the City of Flagstaff, a political subdivision of the State of Arizona ("City"), and Empire Pump Corp., an Arizona Corporation ("Contractor").

WHEREAS the City desires to receive, and Contractor is able to provide materials and/or services;

NOW THEREFORE, in consideration for the mutual promises contained herein, the Parties agree:

1. Scope of Work: Contractor shall provide the materials and/or services generally described as follows:

### Utilities Well and Pump Maintenance

and as more specifically described in the Scope of Work attached hereto as Exhibit A.1.

2. Compensation: City will pay Contractor for satisfactory performance of the Contract in an amount not to exceed **six hundred fifty thousand dollars and no cents (\$650,000), annually, for the term of the Contract**, including fees and taxes, made in accordance with the Bid Schedule attached hereto as Exhibit A.2. Any price adjustment must be approved by mutual written consent of the parties through a formal amendment. The City Manager or his/her designee (the Purchasing Director) may approve an amendment if the total amount of the contract as amended is less than \$100,000; otherwise, City Council approval is required.
3. Standard Terms and Conditions: The City of Flagstaff Standard Terms and Conditions, attached hereto as Exhibit B are incorporated by reference and shall apply to performance of this Contract, except to the extent modified in Exhibits A.1 or A.2.
4. Insurance: Contractor shall meet insurance requirements of the City, attached hereto as Exhibit C.
5. Contract Term: The Contract term is for a period of three (3) years unless terminated pursuant to the Standard Terms and Conditions. The Contract will be effective as of the date signed by both parties. Performance shall commence within ten (10) days from the City's issuance of the Notice to Proceed.
6. Renewal: The Contract may be renewed for up to two (2) additional one-(1) year terms by mutual written consent of the parties. The City Manager or his designee (the Purchasing Director) shall have authority to approve renewal on behalf of the City.
7. Extension or Renewal for Procurement: The City may unilaterally extend or renew this Contract for up to four (4) additional ninety-day terms to allow for procurement processes upon the completion of the term of the Contract. The City Manager or his designee (the Purchasing Director) shall have authority to approve extension on behalf of the City.

8. Notice: Any formal notice required under this Contract shall be in writing and sent by certified mail and email as follows:

## **EXHIBIT A.1**

### **SCOPE OF WORK**

**OVERVIEW:** The City of Flagstaff, Arizona operates water processing, treatment and distribution facilities, including well fields. The purpose of this bid is to establish a contract with a qualified Contractor for maintenance and repair of the pumps, motors, and other equipment associated with the water processing, wastewater processing, and distribution process throughout the City of Flagstaff.

The bid is organized into bid schedules, which have similar equipment grouped together. Bid schedules 1-6 apply to Lake Mary Water Treatment Facility and associated potable water production locations, bid schedule 7 refers to the Rio de Flag Reclamation Facility and bid schedule 8 refers to the Wildcat Hill Wastewater Treatment Facility. The bid will be evaluated and awarded in the following manner – bid schedules 1-6 (Lake Mary) is one group; bid schedule 7 and 8 (Rio de Flag Wildcat Hill) is the second group.

**SCOPE OF WORK:** The work covered under this contract is for the removal and replacement of submersible pumps, motors, column pipe and line shaft pumps, water treatment pumps and motors, and related electrical work, on an as needed basis. Each bid schedule has data for each well, pump and motor covered under this contract and is attached for proposing and informational purposes.

**DESCRIPTION OF WORK:** The following items are the minimum requirements of performing the scope of work and are not to be construed to mean limits of the work required. The work may be minimized or expanded depending on the method the Contractor chooses to perform the scope of work.

1. Mobilization and demobilization to pull the pump and to set the pump.
2. Electrical work: The contractor shall disconnect the source power to the well; disconnect power cables from the switch gear, pull electrical cable from conduit as required, take precautions when handling electrical or power cable so as not to damage protective coatings or wire, disconnect motor leads, and/or splice motor leads. The Contractor shall connect the source power to the well; band submersible cable with stainless steel bands every twenty (20) feet, run cable through conduit, make appropriate electrical connections, set, and balance power phases for efficient pump operations. Load protection devices are installed on all wells except those located in the Inner Basin well field.
3. Mechanical and Plumbing: The Contractor shall disconnect all pipe fittings, air lines, oil lines, and discharge heads that are required to be taken apart and removed to pull the pump and motor. At some locations, it will be necessary to remove and replace a removable building, hatch or other structure. Many of these structures have connection eyes on the roof to connect a cable harness to simplify the structure removal. All mechanical and plumbing items removed will be replaced in a workmanlike manner that will result in as good or better installation found prior to the dismantling.
4. Pumps and Motors: The Contractor will pull and deliver to the appropriate City of Flagstaff Water Treatment Facilities all submersible pumps and motors and all line shaft motors and/or pumps unless other arrangements are agreed upon for storage or repair. The deliveries to the City of Flagstaff Water Treatment Facilities will be made during normal

operating hours, Monday through Friday only. The Contractor shall notify the Facility Manager two working days prior to delivery.

LOCATIONS: The well field locations are within a 15-mile radius of Flagstaff City Hall.

1. The Inner Basin well field is approximately 11.5 miles north.
2. The Woody Mountain well field is approximately 6.5 miles southwest.
3. The Lake Mary well field is approximately 8.5 miles southeast.
4. The Wildcat Hill Wastewater Treatment Facility is at 2800 North El Paso Road, telephone number 928.213-2425.
5. The Rio de Flag Reclamation Facility is at 600 Babbitt Way, telephone number 928.213-2414.
6. The Lake Mary Water Treatment Facility is at 4500 South Lake Mary Road, telephone number 928.774.0262.

These facilities are on City maintained streets.

ACCESS TO SITES: City crews will maintain road and site access to all Woody Mountain and Lake Mary well fields during the progress of the work, except in the most severe weather conditions. Inner Basin wells will not be worked on during the winter season (November through May). Road and site access will be maintained to the Inner Basin wells by City crews during the period(s) the Contractor is requested to work on the wells except in periods of severe weather. The City will have an employee on hand to monitor the progress of the work.

#### CONTRACTOR RESPONSIBILITIES:

The Contractor will:

1. Provide all labor, equipment, materials, tools, expertise, and incidentals to perform the scope of work.
2. Safeguard all City equipment at all locations including all wells in related wellfields such as, but not limited to, electrical cables, air lines, oil lines, fittings, pumps, motors and protecting water filled motors from freezing. Some equipment items may be turned over to the City at the Lake Mary Water Treatment Plant (LMWTP) for storage during the time the pump is out of the well hole or storage is essential. While in storage at the LMWTP the Contractor will not be liable for the equipment and/or materials.
3. The Contractor is fully responsible for the protection and security of the water quality and integrity of the well during the period of time the pump is out of the well hole.

SPECIAL ITEMS: Special items under this section refer to materials and services not included within the bid schedules, but which may be necessary for the Contractor to provide.

Examples of items include, but are not limited to:

- “Test pumping” equipment such as generators, variable frequency drives, flowmeters, temporary piping and pipelines.
- Discharge assemblies
- Pitless adapters
- Sounding tubes
- Water delivery: pipe, adaptors, fittings.
- Motor repairs
- Motor replacements (new and/or rebuilt)
- Steel building
- Column pipe
- Bowl assemblies
- Pump replacement (new and/or rebuilt)
- Shaft and tubing
- Bearings
- Check valves
- Electric cables
- Electric controls
- Stainless steel bands
- Well and pump modification
- General excavation, drainage work and trenching
- Well rehabilitation/workover
- Dust control
- Motor control centers/switchgear/transformers
- Load protection devices
- Lightning protection equipment
- Electric panels, and lighting circuits
- Compressors
- Crane

The Contractor will be compensated for such services at a percentage markup of the cost the Contractor pays for the item or service (wholesale price). State the markup percentage: actual invoices must be submitted with billing in order for invoices to be paid.

All special item purchases must be approved, in writing, by the City’s Water Production Manager prior to any purchases being made.

#### RIGHTS AND OBLIGATIONS OF CITY:

1. City's Water Production Manager: The City's Water Production Manager, who shall be empowered to act for the City in accordance with the provisions of this contract where such acts are not contrary to law of City ordinances, shall be the Flagstaff Water Services Director or his designee. The City's Water Production Manager will audit the billings, approve payments, oversee schedules, and generally be responsible for overseeing the execution of this contract. Changes in the contract may be made only with the approval of the Flagstaff City Council in advance of said change.
2. Inspection: Inspectors may be stationed on the worksite to report to the Water Production Manager as to the progress of the work, the manner in which it is being performed and to report whenever it appears that materials furnished, and work performed by the Contractor fails to fulfill the requirements of this contract. The inspector may direct the attention of the Contractor to such failure or infringement, but such inspection shall not relieve the Contractor from any obligation to furnish acceptable materials or to provide completed work that is satisfactory.
3. The Contractor shall properly guard and protect all finished or partially finished work and shall be responsible for the same until the work is completed and accepted by the City's Water Production Manager.

#### RIGHTS AND OBLIGATIONS OF THE CONTRACTOR:

1. Contractor's Licenses: Each proposer shall state his/her Arizona Commercial State Contractor's License Number and Classification as evidence that he/she is qualified to contract the work as indicated in the specifications. Each Contractor is required to have a commercial license issued by the State of Arizona Registrar of Contractors regardless of their location.
2. Authorization to Proceed: Specific authorization to proceed with the services described in "Well Maintenance Specifications" and Schedules shall be as follows:
3. Authorization to proceed shall be by a telephone call from the City's Project Manager or designee confirmed in writing (Task Order). For special services, the Contractor shall include a description of the work to be Performed and the schedule for commencing and completing the work.
4. Response Time: After authorization to proceed has been provided to the Contractor by the City in the above-described manner, the Contractor shall respond with manpower, equipment and materials to the area requested within the following time frames:
  - A. Routine/Scheduled: When non-emergency services are called for by the City, the Contractor shall respond within fourteen (14) calendar days after the City's written notification of the need for the non-emergency services.
  - B. Urgent/Critical: When emergency services are called for by the City, the Contractor shall respond with the most available rig or equipment required, within three (3) calendar days after the City's written notification of the need for emergency services.

5. Time is of the essence in the performance of this contract, and failure to respond within the specified response times shall be considered a breach of the contract and may constitute grounds for the immediate termination of this contract. It shall also be the basis for disallowance of the mobilization and/or demobilization compensation.
6. The Contractor is employed to render specialized service only, and any payment made is compensation solely for those services rendered. Contractor shall follow the practice its trade or profession in providing such service.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Ken Ferguson, Cinder Lake Landfill Project Manager  
**Co-Submitter:** Sam Beckett  
**Co-Submitter:** Sam Beckett  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

**TITLE:**

**Consideration and Approval of Contract:** Professional Services Agreement with Friedman Recycling Company for compaction, transportation, and the processing of recyclable materials.

**STAFF RECOMMENDED ACTION:**

1. Approve the Professional Services Agreement with Friedman Recycling Company for compaction, transportation, processing, and the processing of recyclable materials; and
2. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

Staff solicited a Request for Proposals for Recycling Processing and Transportation Services in early 2024. Four proposals were received, and one subsequently withdrew. A selection committee reviewed the three remaining proposals and selected the proposal from Friedman Recycling Company as the best opportunity for the City. Considerations in this selection included qualifications, industry-specific experience, past performance, the presented approach, and price.

The City is currently under contract with Friedman Recycling Company to provide processing and transportation services, and this Professional Service Agreement (Agreement) essentially continues this relationship. Through the proposal effort and contract negotiations, staff identified areas for improvements in services and efficiency and have built those into this Agreement. Under this Agreement, Friedman will provide two horizontal compactors for maximizing the transfer weights of recycling materials, haul the recycling materials from Flagstaff to their materials recovery facility in Phoenix, and process the recycling materials. The term of the Agreement is 2 years with three, 12-month extensions. Based on an estimated total of 500 tons of commingled recyclables per month, it is estimated that the Friedman Agreement will cost the City approximately \$70,000 per month, or \$140 per ton, post-collection. City staff support the operations and logistics of recycling material management on-site and during the compaction process.

This Agreement allows the City to consider further evaluation of installing a baler process to more efficiently compact and transport recyclables, providing the potential to achieve possible future savings and efficiencies.

**Financial Impact:**

Project Name: Transfer Station Contractuals/Commodities  
 Cost: Approximately \$70,000 per month  
 Account Number Budgeted: 211-06-168-0649-0-4240 (Equipment Rental), 211-06-168-0649-0-4269 (Transporting Services), 211-06-168-0649-0-4221 (Processing)  
 FY2024-25 Budgeted Amount: \$982,500  
 Grant Funded: No  
 Funding Source: Solid Waste Enterprise Fund

**Policy Impact:**

This Agreement allows the City to maintain recycle services and to ensure that materials are recycled to their fullest extent possible. These services are considered to be of community interest, environmental stewardship, natural resource conservation, preservation of the Cinder Lake Landfill capacity, and directly support the City's Rethink Waste and Carbon Neutrality Plans. Through this Agreement the City will be able to accept recycling materials and the Solid Waste department will be working with Sustainability and our Public Information Office to communicate these best practices to the public on all items that are eligible for good quality collection and recycling.

**Previous Council Decision or Community Discussion:**

On June 20, 2023, Council approved a Professional Services Agreement with Friedman Recycling Company for equipment, transportation, processing and recovery of recyclable materials. This previous agreement was for a term of six months with two, three-month extensions.

**Options and Alternatives to Recommended Action:**

1. Approve the Agreement with Friedman Recycling Company for compaction, transportation, and the processing of recyclable materials; or
2. Reject the Agreement and re-solicit quotes for alternative considerations; or
3. Revise the terms and conditions, and return to the vendor for further discussions; or
4. Discontinue the recycling program and establish collection services of the community solid waste total volumes as required.

**Background and History:**

Friedman will maximize hauling efficiencies to limit the City's carbon and energy footprint to the largest degree practical while ensuring continuity in the City's recycling needs and movement of commingled recyclables to the Phoenix metropolitan area. Friedman has worked with the City for the last year providing similar services and the City and Friedman have used this Agreement to further improve these services. Through this agreement, the City will be able to recycle the following materials.

1. Mixed Paper (#54)
2. Clean Cardboard/Old Corrugated Containers (OCC #11)
3. Plastic #1 PET threaded bottles, jars, and jugs
4. Plastic #2 HDPE Natural threaded bottles, jars, and jugs
5. Plastic #2 HDPE Color threaded bottles, jars, and jugs
6. Plastic #5 Polypropylene tubs and containers
7. Steel/Tin Cans and Containers
8. Aluminum Cans and Containers
9. Mixed Rigid/Bulk Plastics

It is noted that the City also recycles glass through a separate Agreement with a different contractor. The glass program is an opt-in subscription service offered to city residents in addition to community drop off locations.

The City Procurement and Solid Waste Sections conducted Request for Proposals competitive solicitation for Material Recycling Facility Services and received proposals for two disciplines, from the following contractors: Joe Dirt Hauling, Waste Management of Arizona, and Friedman Recycling. Friedman Recycling was deemed the highest scoring, responsible, responsive proposer in each discipline. The scoring for these disciplines is as follows:

**Transportation & Compaction**

- Joe Dirt Hauling - 564
- Friedman Recycling - 779

**Processing & Recovery**

- Waste Management of Arizona - 656
- Friedman Recycling - 731

The Solid Waste and Procurement Section request approval from Council to move forward with Friedman for contract award.

**Connection to PBB Priorities and Objectives:**

- High Performance Governance
  - Serve the public by providing high quality customer service
  - Encourage public trust through transparency, accessibility and use of the City's public participation policy
- Safe & Healthy Community
  - Foster a safe, secure, and healthy community
  - Develop alternative diversion programs
- Inclusive & Engaged Community
  - Foster community pride and civic engagement
- Sustainable, Innovative Infrastructure
  - Utilize existing long-range plan(s) that identify the community's future infrastructure needs and all associated costs.
  - Deliver outstanding services to residents through a healthy, well maintained infrastructure system.
- Environmental Stewardship
  - Promote, protect, & enhance a healthy, sustainable environment & its natural resources.

**Connection to Regional Plan:**

Policy LU.16.1. Encourage the continued intensification, expansion, and protection of existing industrial, warehousing, and distribution uses from encroachment where appropriate.

Policy PF.1.4. Build, sustain, and leverage partnerships with local and regional stakeholders for collective investment, efficient action, and shared responsibility in the building of local resiliency.

Policy PF.1.7. Develop strategies and take meaningful steps toward extending the life of the landfill.

Policy PF.2.3. Provide accessible public facilities and services in strategic locations.

**Connection to Carbon Neutrality Plan:**

- Carbon Neutrality Plan
  - Goal ES-4 -- Actively seek to recognize past harms, repair trust, and build deeper relationships with community members.
  - Goal MM-3 -- Divert more waste from the landfill.
  - Goal PF.2 -- Provide sustainable and equitable public facilities, service, and infrastructure systems in an efficient and effective manner to serve all population areas and demographics.

**Connection to 10-Year Housing Plan:**

                             Exhibit A to Agreement with Friedman Recycling

**PROFESSIONAL SERVICES AGREEMENT  
BETWEEN  
THE CITY OF FLAGSTAFF, ARIZONA  
AND**

Contract No. 2024-xxx

THIS AGREEMENT is made between the **CITY OF FLAGSTAFF**, a political subdivision of the State of Arizona (“City”), and **FRIEDMAN RECYCLING COMPANY** an Arizona corporation (“Contractor”). The City and Contractor may be referred to in this agreement as “Party” in the singular, and collectively as the “Parties.” The Parties agree as follows:

1. Term of Agreement.

1.1. The Agreement term is for a period of two (2) years from the effective date unless terminated pursuant to the Terms and Conditions.

1.1.1. **Agreement Probation Period.** The first ninety (90) days of the Agreement term starting at the Agreement effective date shall be a probation period. The City shall have the right to terminate the Agreement at any time during the probation period if the City determines, in its sole discretion, that Contractor has failed to meet the performance expectations outlined in the Agreement and attached Scope of Work. The City reserves the right to cancel or extend the probation period by written notice to the Contractor, which notice must be given before the end of the probation period. If the Contractor’s performance during the probation period is satisfactory, the City will notify Contractor in writing that the probation period has expired, and the Agreement term and duration will continue pursuant to the Agreement Terms and Conditions.

1.2. The Agreement may be renewed or extended for up to three (3) additional one (1) year periods by mutual written consent of the Parties. The City Manager or his designee (the Purchasing Director) shall have authority to approve renewal on behalf of the City.

1.3. Subject to the termination provisions in this Agreement and Exhibit A, Contractor will be the exclusive provider of compaction, hauling, and processing services related to the transportation and processing of recycling materials collected or accepted by the City.

1.4. The Agreement is effective as of the date the last Party executes the Agreement.

2. Scope of Work. Contractor will provide the services as set forth in the Scope of Work attached as Exhibit A (the “Services”), which is incorporated by reference.

The rates and amounts to be paid are inclusive of all Services, including all labor, travel, and expenses through completion of the work.

3. Payments. The City will pay Contractor subject to Contractor submitting an invoice to the City for each requested payment. Invoices will itemize all Services completed to the date of the invoice and provide sufficient detail to justify payment. Upon approval of the invoice, the City will pay the invoiced amount to Contractor.
4. Ownership of Documents. All documents prepared and submitted to the City by Contractor pursuant to this Agreement will be the property of the City.
5. Contractor Personnel. Contractor will provide adequate, experienced personnel capable of providing the Services described in the Scope of Work during the term of this Agreement.
6. Licenses; Materials. Contractor must maintain in current status all federal, state, and local licenses and permits required for the operation of Contractor's recycling materials processing business and transportation operation required for this Agreement.
7. Force Majeure. Except for payment for sums due, neither Party will be liable to the other nor deemed in default under this Agreement if and to the extent that such Party's performance of this Agreement is prevented by reason of force majeure. The term "force majeure" means an occurrence that is beyond the control of the Party affected and occurs without its fault or negligence. Without limiting the foregoing, force majeure includes acts of God; acts of the public enemy; war; acts of terror, hate crimes affecting public order; riots; strikes; mobilization; labor disputes; civil disorders; plague; pandemics (including without limitation, the COVID-19 pandemic); epidemics; quarantine orders or directives by a governmental entity; outbreaks of infectious disease or any other public health crisis, including without limitation, quarantine or other employee restrictions; fire; floods; lockouts, injunctions-interventions-acts, or failures or refusals to act by government authority; events or obstacles resulting from a governmental authority's response to the foregoing; governmental restriction and/or intervention in the buying, selling, and/or transporting of recyclable commodities; inability to secure sufficient suitable labor, machinery, and equipment, including spare parts and supplies necessary for the safe and efficient operation of the recycling facility, and other similar occurrences beyond the reasonable control of the Party declaring force majeure which such Party is unable to prevent by exercising reasonable diligence. The affected Party notifies the other Party of the existence of the force majeure and will be deemed to continue as long as the results or effects of the force majeure prevent the Party from resuming performance in accordance with this Agreement. Force majeure will not include the following occurrences:
  - 7.1. Failure or delay resulting from general economic conditions or other market effects, foreseen or unforeseen, including any increase in the cost of

materials, supplies, or services, or any decrease in profit or profit margins resulting therefrom;

- 7.2. Late delivery of equipment or materials caused by congestion at a manufacturer's plant or elsewhere, an oversold condition of the market, inefficiencies, or similar occurrences; or
- 7.3. Late performance by a subcontractor unless the delay arises out of a *force majeure* occurrence in accordance with this section.

8. Insurance.

8.1. General.

8.1.1. Insurer Qualifications. Without limiting any obligations or liabilities of Contractor, Contractor must purchase and maintain, at its own expense, hereinafter stipulated minimum insurance with insurance companies duly licensed by the State of Arizona.

8.1.2. No Representation of Coverage Adequacy. By requiring insurance herein, the City does not represent that coverage and limits will be adequate to protect Contractor. The City reserves the right to review any and all of the insurance policies and/or endorsements cited in this Agreement but has no obligation to do so. Failure to demand such evidence of full compliance with the insurance requirements set forth in this Agreement or failure to identify any insurance deficiency will not relieve Contractor from, nor be construed or deemed a waiver of, its obligation to maintain the required insurance at all times during the performance of this Agreement.

8.2. Insurance Requirements.

8.2.1. Contractor and subcontractors must procure and maintain until all of their obligations have been discharged, including any warranty periods under this Agreement, are satisfied, insurance against claims for injury to persons or damage to property which may arise from or in connection with the performance of the work hereunder by Contractor, its agents, representatives, employees, or subcontractors.

8.2.2. The insurance requirements herein are minimum requirements for this Agreement and in no way limit the indemnity covenants contained in this Agreement. The City in no way warrants that the minimum limits contained herein are sufficient to protect Contractor from liabilities that might arise out of the performance of the work under this Agreement by Contractor, its agents, representatives,

employees, or subcontractors, and Contractor is free to purchase additional insurance.

8.3. Minimum Scope and Limits of Insurance. Contractor must provide coverage with limits of liability not less than those stated in this Agreement below.

8.3.1. Commercial General Liability – Occurrence Form

The policy must include bodily injury, property damage, personal injury, and broad form contractual liability coverage.

General Aggregate	\$2,000,000
Products - Completed Operations Aggregate	\$1,000,000
Personal and Advertising Injury	\$1,000,000
Blanket Contractual Liability – Written and Oral	\$1,000,000
Fire Legal Liability	\$50,000
Each Occurrence	\$1,000,000

The policy must be endorsed to include the City of Flagstaff and its departments, agencies, boards, commissions, officers, officials, agents, and employees as additional insureds with respect to liability arising out of the activities performed by or on behalf of Contractor. The City of Flagstaff shall be named as an additional insured on all Certificates of Insurance (“COI”) and the COI should reference this Agreement.

8.3.2. Business Automobile Liability

The policy must include coverage for bodily injury and property damage for any owned, hired, and/or non-owned vehicles used in the performance of this Agreement.

Combined Single Limit (CSL)	\$1,000,000
-----------------------------	-------------

The policy must be endorsed to include the City of Flagstaff and its departments, agencies, boards, commissions, officers, officials, agents, and employees as additional insureds with respect to liability arising out of the activities performed by or on behalf of Contractor involving automobiles owned, leased, hired, or borrowed by Contractor. The City of Flagstaff shall be named as an additional insured on all Certificates of Insurance (“COI”) and the COI should reference this Agreement.

8.3.3. Worker's Compensation and Employers' Liability

The policy must include workers' compensation statutory employers' liability coverage.

Each Accident	\$ 500,000
Disease – Each Employee	\$ 500,000
Disease – Policy Limit	\$1,000,000

8.3.4. Professional Liability (Errors and Omissions Liability)

The policy must include professional liability coverage.

Each Claim	\$1,000,000
Annual Aggregate	\$2,000,000

- a) In the event that the professional liability insurance required by this Agreement is written on a claims-made basis, Contractor warrants that any retroactive date under the policy will precede the effective date of this Agreement; and that either continuous coverage will be maintained or an extended discovery period will be exercised for a period of two (2) years beginning at the time work under this Agreement is completed.
- b) The policy must cover professional misconduct or lack of ordinary skill for those positions defined in the Scope of Work of this Agreement.

8.4. Contractor's Coverage is Primary. Contractor's insurance coverage will be primary insurance and non-contributory with respect to all other available sources. Coverage provided by Contractor may not be limited to the liability assumed under the indemnification provisions of this Agreement.

8.5. Notice of Cancellation. Each insurance policy required by this Agreement must provide the required coverage and may not be suspended, voided, canceled, or reduced. Contractor must provide the City with prompt notice if the insurance is suspended, voided, cancelled, or reduced. Such notice must be sent directly to the City's procurement division.

8.6. Verification of Coverage. Contractor will furnish the City with a declarations page for each policy, as well as any amendments or riders in order to verify contractual insurance requirements are being satisfied.

All certificates and endorsements are to be received and approved by the City's procurement division before work commences. Each insurance policy required by this Agreement must be in effect at or prior to

commencement of work under this Agreement and remain in effect for the duration of the project.

All certificates required by this Agreement must be sent directly to the City's procurement division. The City project/contract number, if applicable, and project description must be noted on the certificate of insurance. The City reserves the right to require complete, certified copies of all insurance policies required by this Agreement at any time.

- 8.7. Subcontractors. Contractor's certificate(s) must include all subcontractors as insureds under its policies or Contractor must furnish to the City separate certificates and endorsements for each subcontractor. All coverage for subcontractors is subject to the same terms and conditions and minimum requirements identified above. Contractor shall ensure for any subcontractor policy required under this Agreement and for any policy required by a contract between Contractor and each subcontractor. The subcontractors' certificates of insurance shall list the "City of Flagstaff" as the Certificate Holder and as an additional insured (and any other entities that are required to be listed as such), and shall identify in each certificate of insurance's description: (i) this Agreement by Agreement Number, and (ii) any subcontract between the subcontractor and Contractor related to that subcontractor's work under this Agreement.
- 8.8. Approval. Any modification or variation from the *insurance requirements* in this Agreement will be made by the City, whose decision is final. Such action will not require a formal Agreement amendment, but may be made by administrative action.
9. Indemnification. Each Party (as "Indemnitor") agrees to indemnify, defend, and hold harmless the other Party (as "Indemnitee") from and against any and all claims, losses, liability, costs, or expenses (including reasonable attorney fees) (hereinafter collectively referred to as "Claims") arising out of bodily injury of any personal (including death) or property damage, but only to the extent that such claims which result in vicarious/derivative liability to the Indemnitee are caused by the act, omission, negligence, misconduct, or other fault of the Indemnitor, its officers, officials, agents, employees, or volunteers.
10. Applicable Law; Venue. In the performance of this Agreement, Contractor will abide by and conform to any and all laws of the United States, the State of Arizona, and the City of Flagstaff, including but not limited to federal and state executive orders providing for equal employment and procurement opportunities, the Federal Occupational Safety and Health Act, and any other federal or state laws applicable to this Agreement. This Agreement is governed by the laws of the State of Arizona and suit pertaining to this Agreement may be brought only in courts in the State of Arizona in Maricopa County.

11. Termination; Cancellation.

11.1. Termination.

11.1.1. Probation Period. Pursuant to section 1.1.1. above, the Agreement may be terminated by the City during the probation period due to Contractor's failure to meet the performance expectations outlined in the Agreement and attached Scope of Work.

11.1.2. For Cause. If Contractor fails to materially perform pursuant to the terms of this Agreement and the Scope of Work, City shall provide written notice to Contractor specifying the reason(s) for default. If Contractor does not cure such default(s) within fifteen (15) days, the City may terminate this Agreement for cause. Upon termination for cause, Contractor will be paid for all undisputed services performed up to the termination date. If the Agreement is terminated for cause, there will be no early termination fee.

11.2. Conflict of Interest. This Agreement is subject to the provisions of A.R.S. § 38-511. The City may cancel this Agreement without penalty or further obligations by the City or any of its departments or agencies if any person significantly involved in initiating, negotiating, securing, drafting, or creating this Agreement on behalf of the City or any of its departments or agencies is at any time while the Agreement or any extension of the Agreement is in effect an employee or agent of any other party to the Agreement in any capacity or a consultant to any other party of the Agreement with respect to the Agreement subject.

11.3. Fund Appropriation Contingency. Contractor understands that the continuation of this Agreement is subject to the budget of the City providing for the contract item as an expenditure, which is supported by a fee paid by City residents. If for any reason, the fee is repealed or not renewed as part of any Council action and the City no longer provides recycling services, the City may terminate this Agreement. Upon termination, Contractor will be paid for all undisputed services performed up to the termination date.

12. Miscellaneous.

12.1. Relationship of the Parties; Independent Contractor. Each Party will act in its individual capacity and not as an agent, employee, partner, joint venturer, or associate of the other. An employee or agent of one Party may not be deemed or construed to be the employee or agent of the other for any purpose whatsoever. Contractor is advised that taxes or Social Security payments will not be withheld from any City payments issued hereunder and the Contractor agrees to be fully and solely responsible for the payment of such taxes or any other tax applicable to this Agreement. Contractor, its

employees, and subcontractors are not entitled to workers' compensation benefits from the City. The City does not have the authority to supervise or control the actual work of Contractor, its employees, or subcontractors. Contractor, and not the City, will determine the time of its performance of the Services so long as Contractor meets the requirements of this Agreement. Contractor is neither prohibited from entering into other contracts nor prohibited from practicing its profession elsewhere.

- 12.2. Laws and Regulations. Contractor must at all times during the performance of its duties under this Agreement ensure that it and any person for whom Contractor is responsible remains in compliance with all rules, regulations, ordinances, statutes, or laws affecting the Services, including existing and future (i) City and County ordinances and regulations, (ii) state and federal laws, and (iii) Occupational Safety and Health Administration standards.
- 12.3. Amendments. This Agreement may be modified only by a written amendment signed by persons duly authorized to enter into contracts on behalf of the City and Contractor.
- 12.4. Provisions Required by Law. Each and every provision of law and any clause required by law to be in the Agreement will be read and enforced as though it were included and, if through mistake or otherwise, any such provision is not inserted, or is not correctly inserted, then upon the application of either Party, the Agreement will promptly be physically amended to make such insertion or correction.
- 12.5. Severability. The provisions of this Agreement are severable. To the extent that any provision is held to be invalid by a court of competent jurisdiction, such holding will not affect any other provision of the Agreement which may remain in effect without the invalid provision.
- 12.6. Entire Agreement; Interpretation; Parole Evidence. This Agreement represents the entire agreement of the Parties with respect to its subject matter. All previous agreements or proposals, whether oral or written, entered into prior to this Agreement are hereby revoked and superseded by this Agreement. No representations, warranties, inducements, or oral agreements have been made by any of the Parties except as expressly set forth in this Agreement. This Agreement will be construed and interpreted according to its plain meaning, and no presumption will be deemed to apply in favor of or against the Party drafting the Agreement. The Parties acknowledge and agree that each has had the opportunity to seek and utilize legal counsel in drafting, reviewing, and entering into this Agreement.
- 12.7. Assignment; Subcontractor. No right or interest in this Agreement may be assigned by Contractor without prior written permission of the City, signed by the City Manager, which shall not be unreasonably withheld. No delegation of any duty of the Contractor may be made without prior written

permission of the City, signed by the City Manager, which shall not be unreasonably withheld. Notwithstanding the foregoing, Contractor's use of subcontractors, vendors, and/or contracted third-parties to provide a portion of the Services shall not be deemed a delegation of duty nor a violation of this Agreement.

- 12.8. Subcontracts. Prior to performing any Services as defined in the Scope of Work, Contractor shall provide the City a written list of the corporate names and addresses of any other subcontractors or entities who may receive and/or process the City's recycling materials and/or the corporate names and addresses of landfills where the recycling materials may be disposed. Contractor is responsible for performance under this Agreement whether or not subcontractors or other entities are used.
- 12.9. Rights and Remedies. No provision in this Agreement may be construed, expressly or by implication, as a waiver by the City of any existing or future right or remedy available by law in the event of any claim of default or breach of this Agreement. The failure of the City to insist upon the strict performance of any term or condition of this Agreement or to exercise or delay the exercise of any right or remedy provided in this Agreement, or by law, or the City's acceptance of and payment for services, will not release Contractor from any responsibilities or obligations imposed by this Agreement or by law, and will not be deemed a waiver of any right of the City to insist upon the strict performance of this Agreement.
- 12.10. Attorneys' Fees. Each Party hereto shall bear its own costs, expenses, and attorneys' fees in connection with the negotiation, preparation, execution, delivery, performance, and/or on account of any breach or default of this Agreement.
- 12.11. Notices and Requests. Any notice or other communication required or permitted to be given under this Agreement must be in writing. Notices will be deemed to have been duly given if (i) delivered to the Party at the address set forth below, (ii) deposited in the U.S. Mail, registered or certified, return receipt requested, to the address set forth below, (iii) given to a recognized and reputable overnight delivery service, to the address set forth below, or (iv) delivered by email to the address set forth below or at such other address, and to the attention of such other person or officer, as any Party may designate in writing by notice duly given pursuant to this section.

To the City:                      City of Flagstaff  
Public Works Division  
Attn: Solid Waste Section Director  
3200 W. Route 66  
Flagstaff, Arizona 86001

With Copy to: City of Flagstaff  
Purchasing Department

If to Contractor: Friedman Recycling Company  
3640 W. Lincoln Street  
Phoenix, AZ 85009  
Attn: David Friedman  
Email: DFriedman@FriedmanRecycling.com

Notices are deemed received (i) when delivered to the Party, (ii) three (3) business days after being placed in the U.S. Mail, properly addressed, with sufficient postage, (iii) the following business day after being given to a recognized overnight delivery service, with the person giving the notice paying all required charges and instructing the delivery service to deliver on the following business day, or (iv) when received by email transmission during the normal business hours of the recipient. If a copy of a notice is also given to a Party's counsel or other recipient, the provisions above governing the date on which a notice is deemed to have been received by a Party will mean and refer to the date on which the Party, and not its counsel or other recipient to which a copy of the notice may be sent, is deemed to have received the notice.

12.12. Confidentiality of Records. Contractor must establish and maintain procedures and controls that are acceptable to the City for the purpose of ensuring that information contained in its records or obtained from the City or from others in carrying out its obligations under this Agreement will not be used or disclosed by it, its agents, officers, or employees, except as required to perform Contractor's duties under this Agreement. Persons requesting such information should be referred to the City. Contractor also agrees that any information pertaining to individual persons will not be divulged other than to employees, agents, or officers of the Contractor as needed for the performance of duties under this Agreement.

12.13. Public Records. Notwithstanding any provisions of this Agreement regarding confidentiality, secrets, or protected rights, Contractor acknowledges that all documents provided to the City may be subject to disclosure by laws related to open public records. Consequently, Contractor understands that disclosure of some or all of the items subject to this Agreement may be required by law. In the event the City receives a request for disclosure that is reasonably calculated to incorporate information that might be considered confidential by Contractor, the City agrees to provide Contractor with notice of that request. Within ten (10)

days of such notice, Contractor must inform the City in writing of any objection by Contractor to the disclosure of the requested information. Failure by Contractor to timely object will waive Contractor's ability to object under this section and will waive any remedy against the City for disclosure. In the event Contractor objects to disclosure within the time specified, Contractor agrees to handle all aspects related to the request including properly communicating with the requestor and timely responding with information. Furthermore, Contractor agrees to indemnify and hold harmless the City from any claims, actions, lawsuits, or any other controversy or remedy, in whatever form, that arises from the failure to comply with the request for information and the laws pertaining to public records, including defending the City in any legal action and payment of any penalties or judgments assessed against the City. This provision will survive the termination of this Agreement.

- 12.14. Conflicting Terms. In the event of a conflict between the Scope of Work and this Agreement, the terms of this Agreement will govern.
- 12.15. Compliance with Federal Immigration Laws and Regulations. Contractor warrants that it complies with all federal immigration laws and regulations that relate to its employees and that it complies with A.R.S. § 23-214(A). Contractor acknowledges that pursuant to A.R.S. § 41-4401, a breach of this warranty is a material breach of this Agreement subject to penalties up to and including termination of this Agreement, and that the City retains the legal right to inspect the papers of any employee who works pursuant to the Agreement to ensure compliance with this warranty.
- 12.16. Compliance with A.R.S. § 35-393.01. Contractor hereby certifies that it does not, and will not, participate in during the term of this Agreement, a boycott of Israel in accordance with Arizona Revised Statute § 35-393.01. Contractor hereby agrees to indemnify and hold harmless the City, its agents, and employees from any claims or causes of action relating to the City's action based upon reliance upon this representation, including the payment of all costs and attorney fees incurred by the City in defending such an action.
- 12.17. Compliance with A.R.S. § 35-394. Contractor hereby certifies that it does not currently, and agrees for the duration of this Agreement, that Contractor will not, use: i) the forced labor of ethnic Uyghurs in the People's Republic of China; ii) any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China; or iii) any contractors, subcontractors, or suppliers that use the forced labor or any goods or services produced by the forced labor of ethnic Uyghurs in the People's Republic of China.

\_\_\_\_\_ **(Contractor Initial Here)**

Contractor hereby agrees to indemnify and hold harmless the City, its officials, employees, and agents from any claims or causes of action relating to the City's action based upon reliance upon this representation, including the payment of all costs and attorney fees incurred by the City in defending such an action.

SCOPE OF WORK  
EXHIBIT A  
TO  
PROFESSIONAL SERVICES AGREEMENT  
BETWEEN  
THE CITY OF FLAGSTAFF, ARIZONA  
AND  
CONTRACTOR

See following pages.

## EXHIBIT A SCOPE OF WORK

Contractor shall provide the following compaction, hauling, and processing of recycling materials for the City (the "Services"):

### 1. CITY FACILITY

Contractor shall pick up the single-stream recycling materials from the City's recycling facility, located at *1800 E. Butler Ave, Flagstaff, Arizona 86001*, or other suitable location as agreed to by both Parties in writing prior to hauling to the alternative location ("City Facility"). The City will provide Contractor the ability to access the City Facility.

### 2. EQUIPMENT

A. The City will use equipment provided or contracted by the City to load the single-stream recycling materials into Contractor's compactors and receiver containers.

B. Compactors. Contractor shall provide two (2) large capacity (4 cubic yard and 5 cubic yard or greater) compactors for the City's use during the term of this Agreement. Contractor shall be responsible for the preparation, installation, configuration, and maintenance of the compactors and supporting equipment (such as guide rails, connecting/safety devices, hydraulic pumps, etc.). City shall provide suitable concrete surface and electrical disconnects to within twenty-five (25) feet of each compactor installation location. The Contractor shall conduct quarterly preventative maintenance on the compactors and associated equipment, and will respond within two (2) working days to evaluate any issues reported by the City. An agreed upon plan to resolve any issues identified during the quarterly preventative maintenance or reported by the City must be determined within two (2) working days. In the event that both compactors are inoperable for longer than two (2) working days, Contractor shall initiate contingency hauling provisions as specified below. Contingency hauling shall at no time extend beyond fifteen (15) working days. Failure to return to normal hauling operations within fifteen (15) working days will result in penalties as specified below.

C. Receiver Containers. Contractor shall provide eight (8) 40 cubic yard receiver containers for the City's use during the term of this Agreement. Additional 40 cubic yard receiver containers may be provided by Contractor upon request of City. The Contractor shall maintain the receiver containers and guiderails in good and safe working condition and will conduct regular preventative maintenance (at least quarterly) and respond within two (2) working days to address any receiver container issues identified by the Contractor or City. Any issues identified with a receiver container that cannot be resolved within two (2) working days, Contractor will replace the damaged container with an operational container at no charge to the City.

D. The compactors and containers furnished hereunder by Contractor (referred to herein collectively as "Equipment") shall remain the property of Contractor; however, City acknowledges that it has care, custody, and control of the Equipment while at the City's

Facility. The City accepts responsibility for all loss or damage to the Equipment, except for normal wear and tear, or for loss or damage resulting from Contractor's handling of the Equipment. The City agrees not to overload (by weight or volume), move, or alter the Equipment (except for the normal swapping/repositioning of the receiver containers), and shall use the Equipment only for its proper and intended purpose.

E. The City warrants that any area provided by the City for Contractor's Equipment location is the most convenient location sufficient to bear the weight of the Equipment. Contractor shall not be responsible for damage to any pavement, curbing, or accompanying sub-surface at the City Facility caused by Contractor's reasonable use of any route reasonably necessary to perform the Services.

### **3. CONTRACTOR FACILITIES**

A. Contractor shall haul the single-stream recycling materials from the City Facility to Contractor's Facility for processing, located at *3640 West Lincoln, Street, Phoenix, Arizona 85009* ("Contractor Facility"), or such other site as may be determined by Contractor and agreed to in writing by the City. City's agreement will not be unreasonably withheld.

B. The costs associated with the transportation of the single-stream recycling materials between designated Facilities are identified below.

C. At no time shall single-stream recycling materials be delivered to a processing site, or other facility, that does not process and recover Recyclables (as defined below) in the manner reasonably similar to methods described within this Agreement. Direct delivery of single-stream recycling materials or Recyclables (as defined below) to a landfill, waste to energy, or incineration facility is strictly prohibited and will be grounds for immediate termination of the Agreement.

### **4. MATERIAL ACCEPTANCE**

A. Contractor will pick up and process the City's residential and commercial single stream recycling materials from the City Facility and transport to Contractor Facility for processing and recovery. Single stream recyclables shall be targeted to include and recover the following material types for recycling:

1. Mixed Paper (#54)
2. Clean Cardboard/Old Corrugated Containers (OCC #11)
3. Plastic #1 PET threaded bottles, jars, and jugs
4. Plastic #2 HDPE Natural threaded bottles, jars, and jugs
5. Plastic #2 HDPE Color threaded bottles, jars, and jugs
6. Plastic #5 Polypropylene tubs and containers
7. Steel/Tin Cans and Containers
8. Aluminum Cans and Containers
9. Mixed Rigid/Bulk Plastics

The Parties may add or remove additional materials to the above-listed material types (hereinafter referred to as “Recyclables”) from time to time as agreed to by both Parties in writing.

Contractor is aware and agrees that non-recyclable materials (hereinafter referred to as “Contaminants”) [e.g., trash, organics, non-Recyclables] will commonly be contained in single-stream recyclables. Contaminants, along with other non-recoverable materials, shall be defined as “Residual.”

B. In order to mitigate environmental, health, and safety risks at the City Facility, the goal of the City is to maintain a clean (i.e., empty) tipping floor at the City Facility at the end of every day of production, typically five (5) days per week from Monday through Friday. Therefore, Contractor must provide consistent and reliable service to meet this goal on a daily basis. Based on the past several months of inbound single-stream recyclables to the City Facility (i.e., an average of 22 tons per day Monday through Friday), the following hauling schedule is needed to maintain sufficient conditions and shall be modified only in writing or in accordance with the exceptions listed below:

1. Contractor shall pickup two (2) full receiver containers from the City Facility and transport to Contractor Facility on Mondays; and
2. Contractor shall pickup four (4) full receiver containers from the City Facility and transport to Contractor Facility on Tuesdays, Wednesdays, Thursdays, and Fridays.
3. Full receiver containers shall be swapped out with empty receiver containers by Contractor during pickup.
4. Contractor shall ensure that all receiver containers have been picked up according to the schedule above from the City facility each day.
5. Contractor shall provide ten (10) receiver containers for use by the City, with the intention that four (4) extra receiver containers will be staged at the City Facility at all times to allow for unforeseen circumstances, such as weather, traffic, or staffing issues, that prevent Contractor from meeting the transportation schedule above.
6. Contractor will not haul on any City observed holidays on which single-stream recyclables are not collected (currently Thanksgiving, Christmas, and New Years Day). To account for the altered hauling schedule, Contractor will haul on the Saturday following the observed holiday. On other City-observed holidays on which single-stream recyclables are collected by the City, Contractor shall haul on those days and be compensated the holiday hauling rate identified below. If Contractor is unable to haul on a holiday, the missed holiday haul will be made up on the following Saturday and Contractor will be compensated the weekend/holiday rate for those hauls.
7. Only weekend hauls required due to City observed holidays discussed in paragraph 6 above, and weekend hauls requested by the City shall be billed at the weekend haul rate. Any weekend hauls required by the Contractor to make up for any missed hauls in the prior week, which only require Contractor to pick up full receiver containers, shall be billed at the normal weekday haul rate. Any weekend hauls required by the Contractor to make up for any missed hauls in the prior week

that require the City to staff the City Facility shall be billed at 50% of the normal weekday haul rate.

City and Contractor may agree to alternative hauling schedules based on changes in volumes of single-stream recyclables or hauling challenges. Any such changes shall be requested by the City in writing. The City agrees to provide unobstructed access to the equipment on the scheduled collection day(s).

#### C. Financial Credits for Insufficient Contractor Hauling

The hauling schedule above requires Contractor to pick up and replace thirty-six (36) receiver containers every two (2) weeks. If at the end of any two (2) consecutive weeks Contractor has failed to meet said hauling schedule, and City has not authorized fewer hauls, City may require financial credits from the Contractor pursuant to the below schedule:

1. For every single receiver container haul not completed within a two-week timeframe as specified above, Contractor shall credit City \$150 as a penalty for not meeting the hauling schedule. Therefore, if four (4) receiver boxes are not hauled by Contractor in accordance with the mutual agreed upon hauling schedule, Contractor would credit City \$600.

The expectation is that if Contractor fails to meet the hauling schedule, additional hauls will be made to account for excess single-stream recyclables on the City Facility's tipping floor. City may agree to waive any penalties as specified above; however, any penalty waivers must be agreed upon in writing.

In the event repeated missed hauls result in the City tipping floor reaching capacity (approximately 100 tons), and unable to reasonably and safely accept additional single-stream recyclables requiring the City to direct haul single-stream recyclables to its landfill, Contractor shall credit City \$1,000 per day plus all applicable landfill tipping fees. The determination of whether the City Facility tipping floor is at capacity is subject to the City's sole discretion.

Financial credits shall be applied during monthly billing cycles.

D. The single-stream recyclables to be hauled by Contractor pursuant to this Agreement shall exclude radioactive, volatile, highly flammable, explosive, biomedical, infectious, toxic, or hazardous material, including electronics and batteries of any type. The term hazardous material shall include but not be limited to any amount of waste listed or characterized as hazardous by the United States Environmental Protection Agency or any state agency pursuant to the Resource Conservation and Recovery Act of 1976, as amended, or applicable state and/or county law.

E. Contractor shall acquire possession of the single-stream recyclables upon delivery of single-stream recyclables to Contractor's Facility and subsequent inspection and acceptance by Contractor. In the event of non-acceptance, Contractor shall notify the City in writing of the reason(s) for non-acceptance. Notice must be provided within 24-hours

of the single-stream recyclables being picked up from the City Facility. Notwithstanding the forgoing, title to and liability for any waste not accepted by Contractor shall remain with the City and City expressly agrees to defend, indemnify and hold harmless Contractor from and against any and all damages, penalties, fines and liabilities resulting from or arising out of such waste. For any waste that is not accepted, Contractor will work with City to properly and safely dispose of the material.

Contractor is responsible for containing and securing single-stream recyclables during transport from City Facility to Contractor Facility. Contractor shall be wholly responsible for cleaning up any single-stream recyclables released into the environment during or after transport to Contractor Facility.

F. Within the next two (2) years, the City will explore baling operations to better compact and more efficiently transport single-stream and clean/source-separated recyclables. No later than six (6) months' prior to a change in operations, City will work with Contractor to develop a revised Agreement.

## **5. PROCESSING**

Single-stream recyclables shall be sorted for the recovery of targeted Recyclables to be packaged and sold as ready-to-use raw materials, or other suitable alternative use, by recycling companies. Depending upon the operational needs of the Contractor, Contractor may elect to sell unsorted or partially sorted single-stream recycling materials to other materials recycling operators for processing. Contractor will document its election to sell unsorted or partially sorted recycling materials to third-parties in the Reporting documents described below.

## **6. LANDFILLING**

A. Contractor shall make commercially reasonable effort to maximize the capture of recoverable Recyclables from the single-stream recycling materials.

B. Recycling materials that are contaminated, disfigured, or deformed such that they cannot be detected/captured by normal industry sorting technology/processes and/or are not recovered after commercially reasonable efforts by Contractor shall be classified as Residual and disposed of at an appropriate landfill.

C. If a specific load(s) of recycling materials contains an excess of 50% contamination and/or containing liquid or hazardous materials, Contractor may divert and/or transfer that load(s) to the landfill ("Rejected Shipment").

D. If Contractor is unable to secure sufficient orders to sell the total quantity of a specific commodity generated within an individual month for two (2) consecutive months, the unsalable quantity of that commodity may be re-classified as Residue, and the material composition schedule and sorting process shall be updated accordingly until such time as a viable end-market able to consume the entire generation is secured.

E. If the volume of recycling materials at Contractor's Facility exceeds safe limits, as determined by City of Phoenix ordinance and/or Contractor's policies and procedures, Contractor will divert City hauls to an alternative Materials Recovery Facility (MRF) and remove the recycling materials from the premises in order to bring inventory levels down to sufficient level to comply with applicable safety policies, procedures, and/or ordinances. The City will pay Friedman standard transportation and processing rates to deliver City single-stream recyclables to alternative MRFs.

In the event that Contractor Facility is expected to be closed for thirty (30) or more days, City may consider alternative hauling companies to transport single-stream recyclables to alternative MRFs.

F. The cost to the City for Contractor to haul the recycling materials to a landfill shall comply with the fees identified in this Agreement. However, if Contractor is unable to secure sufficient orders to sell the total quantity of a specific commodity as contemplated in this Section for a period of greater than one (1) month, Contractor will not charge City any additional fees for hauling and/or processing any recycling materials that are deemed unsalable by Contractor.

G. If Contractor diverts the recycling materials to a landfill and/or suspends deliveries at any time, Contractor shall inform the City in writing within twenty-four (24) hours and shall communicate its best estimate as to when the diversion/suspension will end.

## **7. FEE SCHEDULE**

Contractor shall provide the Services described within this Agreement based upon the following fee schedule:

### **A. Hauling (40 Cubic-Yard Receiver Containers)**

1. The standard hauling fee for hauling two (2), 40 cubic-yard receiver containers is \$1,175 per trip. Each trip consists of dropping off two (2) empty 40 cubic-yard receiver containers and picking up two (2) loaded 40 cubic-yard receiver containers with compacted single-stream recyclables. The standard hauling fee applies to hauls conducted Monday-Friday, excluding holidays.
2. The weekend/holiday hauling fee for hauling two (2), 40 cubic-yard receiver containers is \$1,475 per trip. Each trip consists of dropping off two (2) empty 40 cubic-yard receiver containers and picking up two (2) loaded 40 cubic-yard receiver containers with compacted single-stream recyclables.

### **B. Hauling (53-ft Semi Dry Van Trailers) \***

1. The standard hauling fee for hauling baled single-stream recyclables using 53-ft Semi Dry Van Trailers (or equivalent) is \$925 per trip. Each trip consists of dropping off an empty 53-ft Semi Dry Van Trailer (or equivalent) and picking up a 53-ft Semi Dry Van Trailer (or equivalent) loaded with baled single-stream recyclables. The standard hauling fee applies to hauls conducted on Monday-Friday, excluding holidays.

2. The weekend/holiday hauling fee for hauling baled single-stream recyclables using 53-ft Semi Dry Van Trailers (or equivalent) is \$1,225 per trip. Each trip consists of dropping off an empty 53-ft Semi Dry Van Trailer (or equivalent) and picking up a 53-ft Semi Dry Van Trailer (or equivalent) loaded with baled single-stream recyclables.

\*This section is only applicable if the City switches to a baling operation. Pricing in this section is subject to the CPI adjustments discussed below.

C. Contingency Hauling Option

Contractor shall provide the following contingencies to minimize any impact from hauling delays.

- 1) Contractor shall provide two (2) additional 40yd Receiver containers on site for use by the City at no charge. Total receivers dedicated to the execution of this Agreement shall be ten (10).
- 2) If Contractor is unable to operate its doubles trailers, Contractor shall swap out single receivers at a charge of 50% of the then current double haul rates.
- 3) If Contractor utilizes large bulk trailers (i.e. transfer trailers, end dumps, etc.), Contractor shall charge a rate equal to the then current doubles haul rate divided by 80 (to convert the then current haul charge to cubic yard rate) and multiplied by the cubic yard capacity of the bulk trailer used to perform the haul. As an example, if the current doubles haul rate is \$1,175 then the charge for a contingency haul performed by a 60 cubic yard transfer trailer would be \$881.25.  $[(\$1175 / 80) * 60]$ .

D. Hauling to the Landfill

If necessary, Contractor shall charge a maximum of \$89 per ton to transport and/or dispose of recycling materials at an appropriate landfill if the recycling materials are deemed by the Contractor as a Rejected Shipment.

E. 40 Cubic-Yard Receiver Container Rentals

1. \$199 per receiver container/month.
2. Contractor shall provide ten (10) receiver containers for the City's use; however, City will only pay for eight (8).
3. Additional receiver containers in excess of ten (10) will be provided upon request at a cost of \$199 per month, per receiver container.

**8. REVENUE SHARING/TIP FEE**

A. General

1. The Revenue Share/Tip Fee shall be determined based upon the Average Market Value ("AMV") of the City's recycling materials and the MRF Operating Expense Threshold ("MOET") based upon the following formulas and as defined below:

2. When the AMV equals the MOET, the Revenue Share/Tip Fee shall be zero. (There will be no revenue paid to the City and no tip fee charged to the City.)

3. When the AMV is greater than the MOET, Contractor shall pay the City 60% of the difference between the AMV and the MOET (based upon the attached Schedule A) multiplied by the total tons of Recyclables picked up from the City in that month.

4. When the AMV is less than the MOET, the City shall pay Contractor the total difference between the AMV and the MOET multiplied by the total tons picked up from the City in that month.

B. MRF Operating Expense Threshold

The MOET to be used to calculate the Revenue Share/Tip Fee for the processing of the City's single-stream recycling materials shall be defined as **\$109.00** per ton.

C. Average Market Value

The AMV of the City's recycling materials shall be determined by the weighted average of value based upon the current market price of each individual commodity, as defined by the designated published price index listed below, and multiplied by the percent composition each commodity represents as determined by periodic material composition audits. The indices which shall determine current market price shall be the following:

<u>Commodity</u>	<u>Published Index</u>
Mixed Paper (#54)	RISI/PPI Southwest High Side Price for #54 Mixed Paper LESS \$25/ton.
OCC (#11)	RISI/PPI Southwest High Side Price for #11 OCC LESS \$20/ton.
PETE	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Plastics #1 PET.
HDPE-Natural	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Plastics #2 Natural HDPE.
HDPE-Color	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Plastics #2 Colored HDPE.
Polypropylene	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Plastics PP Post Consumer.
Tin Cans	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Metals Steel Cans, Loose.
Aluminum Cans	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Metals Aluminum Cans, Loose.

Rigid Plastics	80% of the Secondary Materials Pricing.com (www.RecyclingMarkets.net) for Pacific Northwest USA, Regional Average Price for Plastics Mixed Bulky Rigid.
Residual	Charge of \$69 per ton

The price published in the earliest edition/posting of the month shall be used to calculate pricing for the entire month. If a published price index (or indexes) indicated above fails to accurately reflect prevailing market conditions, upon agreement by the City which will not be unreasonably withheld, Contractor may use an alternative publication(s) or alternate method to determine the value of each affected commodity until such time that the published price index listed above returns to accurately reflect prevailing market conditions.

#### D. MRF Processing Fee Examples

##### MRF Processing Fees

- Processing Fee: The Processing Fee is \$109.00 per delivered ton.
- Average Market Value (AMV): The AMV of the City's Recyclables shall be determined by the weighted average of value based upon the current market price of each individual commodity, as defined by the designated published price index listed below, and multiplied by the percent composition each commodity represents as determined by periodic material composition audits.
- The Revenue Share Percentage is determined from Schedule A.

##### MRF Processing Fee Examples

###### Example #1 – Weak Market for Recyclables

- Processing Fee is \$109.00 per ton
- AMV is \$28.86 per ton
- 100 tons delivered
- AMV for all tons = 100 tons x \$28.86 = \$2,886
- Processing Fee for all tons = 100 tons x \$109.00 = \$10,900
- \$2,886 - \$10,900 = (\$8,014)
- City owes Contractor \$8,014

###### Example #2 – Strong Market for Recyclables

- Processing Fee is \$109.00 per ton
- AMV is \$150.00 per ton
- 100 tons delivered
- AMV for all tons = 100 tons x \$150.00 = \$15,000
- Processing Fee for all tons = 100 tons x \$109.00 = \$10,900
- \$15,000 - \$10,900 = \$4,100 available commodity value

- \$4,100 x 60% = \$2,460 (City base rebate)
- Contractor owes City \$2,460

## **9. RECORD KEEPING**

A. Contractor shall create, maintain, and provide records as defined in, and required by, all applicable local, state, and federal laws, rules, and regulations, and maintain any records as are reasonably necessary to document and track the information described herein.

B. Contractor shall maintain and allow access to books, records, data, documents, and reports relating to the Agreement for five (5) years following the conclusion or termination of the Agreement.

## **10. REPORTING**

A. Monthly Reports: By the 15th of each month, Contractor shall submit to the City an electronic report summarizing the records kept for processing the recycling materials during the previous calendar month to include:

1. Net total tons of City single-stream recyclables hauled and processed by Contractor, including delivery destination(s).
2. Total tons by commodity as determined by material composition audits.
3. Any payments due to the City.
4. Updated monthly AMVs.
5. Dates when recycling materials were diverted to another MRF or landfill, as a last resort (delineated as Residual, a Rejected Shipment, or because the recycling materials exceeded safe limits at Contractor's Facility), or was sold to a third-party.

B. Semi-Annual Reports: By the 15<sup>th</sup> of January and July, Contractor shall submit semi-annual reports that include the geographical area where each commodity has been shipped for end market processing for the preceding six (6) months.

## **11. COMPOSITION AUDIT**

A composition audit shall be performed by Contractor within sixty (60) days from execution of the Agreement, unless waived by both Parties. Audits will occur at least twice per year, thereafter. The City's representatives shall be invited to observe each audit with a minimum notice of five (5) business days to the City in writing by Contractor. Audited Recyclables shall be comprised of a representative sample captured from each of the City's routes and days and contain a representative sample size of approximately 50 to 100 tons per audit. Audits shall be scheduled in agreement with the City and Contractor at times to best represent the composition of the City's recyclables. Contractor shall use the City's most current composition audit results for the initial sixty (60) days of the Agreement or until such time as Contractor is able to complete its first composition audit. Composition audit data shall be provided to the City by Contractor in writing once completed no later than five (5) business days after completion of a composition audit.

Contractor shall provide a short narrative report with pictures to the City along with the composition audit data.

## **12. RATE ADJUSTMENTS**

A. For twelve (12) months from the effective date of this Agreement, the rate and/or fees charged by Contractor to the City will remain the same.

B. Beginning on July 1, 2025, and as of the first day of July during each subsequent year during the term of this Agreement, the MOET and all other Contractor charges & fees (haul fees, rental fees, processing fees/MOET, and residual charge) shall be subject to an annual inflation adjustment. Adjustment for inflation shall be limited to the percentage change in the Consumer Price Index ("CPI") for the twelve (12) month period ending the previous December 31st. At no time shall a single annual inflation adjustment exceed eight percent (8%) as per the aforementioned adjustment factors. For purposes of this Agreement, the Consumer Price Index means the West Urban Size A Consumer Price Index for All Urban Consumers (CPI-U-West Region), as published by United States Department of Labor, Bureau of Statistics, from time to time (or the Parties may agree in writing to use a similar index if publication of this particular index is terminated).

C. In addition to annual CPI increases, the MOET and adjustments to the published price indices may be adjusted as a result of an uncontrollable circumstance that would have a material adverse impact on the Contractor's ability to perform under this Agreement. All adjustments shall take effect based upon written approval of the City. Such uncontrollable circumstances may include, but are not limited to, significant increases with Contractor-demonstrated financial impacts in minimum wages, new and/or increased taxes, fees, or surcharges, national disaster, additional and/or altered governmental regulations, restraints by domestic and/or foreign governments, trade policies, etc. Contractor shall notify the City in writing of any such occurrence, setting forth in reasonable detail the uncontrollable circumstance of such occurrence and quantify the financial impact(s). The City and Contractor shall use commercially reasonable efforts to expeditiously mitigate the effects of any uncontrollable circumstance.

## **13. VOLUME**

A. The Fee Schedule presumes Contractor hauls a minimum of three hundred (300) tons per month of the City's single-stream recycling materials. If the City fails to make available for hauling a minimum of three hundred (300) tons of single-stream recycling materials in any single month, Contractor shall charge a minimum tonnage fee adjustment equal to 68% of the then current MOET multiplied by the total quantity of tons below three hundred (300) delivered within that month.

B. Contractor will apply the combined weight of the Residual and Recyclables towards the three hundred (300) minimum tonnage requirement.

## **14. SAFETY STANDARDS**

All items and services supplied in this agreement will comply with the current applicable federal and state Occupational Safety and Health Standards, the National Electric Code, the applicable waste and recycling American National Standards (ANSI), and the National Fire Protection Association Standards. The ANSI Z245 standards committee defines and sets the safety standards for the waste industry.

The Contractor will be responsible for ensuring that the above-referenced safety standards are met and acknowledges that the Contractor has general supervisory authority over the worksite, including the power to correct safety and health violations. This would include the power to require subcontractors to correct violations of the above-mentioned safety standards. The Contractor is responsible for how frequently and closely the Contractor needs to inspect to meet the standard of reasonable care for the above-referenced safety standards.

DRAFT

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Sarah Langley, Public Affairs Director  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Letter of Opposition:** Letter of opposition to UNS Electric, Inc. Arizona Power Plant and Transmission Line Siting Committee Application and Appeal to the Arizona Corporation Commission.

**STAFF RECOMMENDED ACTION:**

Retroactively approve the Letter of Opposition.

**Executive Summary:**

The City of Flagstaff's Sustainability Division requested that the Mayor and Council submit a letter of opposition to the Arizona Corporation Commission regarding the UNS Electric, Inc. Arizona Power Plant and Transmission Line Siting Committee Application and Appeal. The Arizona Corporation Commission was scheduled to hear an appeal related to the approval process for new gas peaker plants on Tuesday, June 11. The Sustainability Division noted that this decision could incentivize utilities to build more gas peaker plants without regard for the environmental or health and economic impacts on customers. Adding more gas peaker plants hinders cities' efforts across the state to cut greenhouse gas emissions and build a resilient city for the future. The City's 2024 State Legislative Priorities include the priority of "urging the Arizona Corporation Commission to adopt a statewide clean energy standard that achieves 100% carbon-free energy in our state".

The letter was submitted as a public comment to Docket No. L-00000F-24-0056-00230 on Monday, June 10. Staff is requesting retroactive Council approval of the letter.

# CITY OF FLAGSTAFF

## OFFICE OF THE MAYOR

211 West Aspen Avenue, Flagstaff, Arizona 86001

Main Line: 928-213-2000

Website: <https://www.flagstaff.az.gov>

June 7, 2024

Arizona Corporation Commission  
1200 W Washington St.  
Phoenix, AZ 85007

RE: City of Flagstaff comment letter on the UNS Electric, Inc. Arizona Power Plant and Transmission Line Siting Committee Application and Appeal to the Arizona Corporation Commission.

Dear Chairman O'Connor and Commissioners,

The City of Flagstaff submits this comment letter in response to UNS Electric, Inc Arizona Power Plant and Transmission Line Siting Committee application and appeal to the Arizona Corporation Commission as published in [Docket No. L-00000F-24-0056-00230](#). Thank you for the opportunity to share our input.

The City of Flagstaff asks that you reject UNS Electric's request to create a loophole to avoid environmental reviews and scrutiny regarding the impact of siting large gas power plants. These major facilities must be required to get a Certificate of Environmental Compatibility (CEC), and the Arizona Corporation Commission must allow the AZ Power Plant and Transmission Line Siting Committee to do its job to evaluate the impacts of the proposed plants versus the need for these specific facilities.

The Commission's decision on UNS Electric's request will affect all of Arizona's utilities and developers going forward. The result would be the unchecked development of natural gas power plants in Arizona's communities with no accountability to Arizona's citizens. For fifty years the Line Siting Committee and this Commission has held that the law requires a CEC for facilities which have units that are individually less than 100 MW but collectively over 100 MW. The Commission should not suddenly reject that interpretation of the law.

If UNSE is successful, this sets a concerning precedence. The AZ Power Plant and Line Siting Committee and the Commission would only have authority over transmission lines from now on and the Commission will lose regulatory oversight of gas projects.

The City of Flagstaff urges the Arizona Corporation Commission to affirm the Arizona Power Plant and Transmission Line Siting order and reject UNS Electric's effort to evade a Certificate of Environmental Compatibility for its Black Mountain Generating Station Expansion Project. The Commission should support local government and communities and ensure that utilities are held accountable. Thank you for considering our comments on this important issue.

Best regards,

Becky Daggett,  
Mayor of Flagstaff, on behalf of the Flagstaff City Council

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Ryan Darr, Police Lieutenant  
**Co-Submitter:** Megan Dales  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Grant Award Ratification:** Approve the ratification of the U.S. Department of Justice, through the Arizona Criminal Justice Commission, for the Edward Byrne Justice Assistance Grant Agreement in the amount of \$292,485.09 for the Northern Arizona Street Crimes Task Force (METRO Unit).

**STAFF RECOMMENDED ACTION:**

Approve the ratification of the grant agreement from the U.S. Department of Justice, through the Arizona Criminal Justice Commission, Edward Byrne Justice Assistance Grant funds in the amount of \$292,485.09 for FY2024-FY2025.

**Executive Summary:**

The City of Flagstaff was awarded \$292,485.09 in grant funds from the U.S. Department of Justice, through the Arizona Criminal Justice Commission, for the Edward Byrne Justice Assistance Grant funds. This grant fully funds one Flagstaff Police Sergeant, and partially funds one Flagstaff Police investigator, and one Coconino County Sheriff's Deputy investigator. There is no cost to the City of Flagstaff.

Officers in the METRO Unit continuously provide support to numerous community groups including, local schools, Citizens Academy programs, local law enforcement training academies etc. in the form of training and educational presentations, drug awareness, and proactive investigations.

**Financial Impact:**

The grant award is in the amount of \$219,363.82 (75%) with required matching funds of \$73,121.27 (25%). The METRO board has authorized matching funds from the Rico account. The Rico account has provided matching funds in the previous years and the board has agreed to provide the above matching funds for this year's grant. This amount will include all city costs, estimated in kind and administrative costs if above normal departmental allocation. The grant award will be the 37<sup>th</sup> funding cycle (FY 2025) for the METRO unit. This grant is budgeted in Fiscal Year 2024-2025 for \$443,434 in account number 001-04-062-6050-2.

**Policy Impact:**

None

**Previous Council Decision or Community Discussion:**

Yes, the Flagstaff City Council has approved the acceptance of this grant money for the past thirty seven years.

**Options and Alternatives to Recommended Action:**

Approve the ratification of the grant or decline the grant.

**Background and History:**

As previously stated, this is the 37th cycle of this grant in which the Flagstaff City Council has approved the previous 37 cycles.

**Connection to PBB Priorities and Objectives:**

Safe & Healthy Community: Provide public safety services with resources, staff, and training responsive to the community's needs.

**Connection to Regional Plan:**

Effective Governance - Regional Plan (2030) - Planning, Public Safety, Goal PF.3 Provide high-quality emergency response and public safety services. Safe and healthy community: Provide public safety services with resources, staff, and training responsive to the community needs (for 2021)

**Connection to Carbon Neutrality Plan:**

No connection to the Carbon Neutrality Plan

**Connection to 10-Year Housing Plan:**

No connection to Housing plan

**Connection to Division Specific Plan:**

This grant and the investigative officers this funds is supported by nearly every law enforcement entity in Coconino County including the Coconino County Sheriff's Office, The Flagstaff Police Department, Northern Arizona University Police, ATF, FBI, DEA, Homeland Security and the Department of Public Safety. This grant provides specialized police investigations to all the communities located within Coconino County.

Attn: Stacey Brechler-Knaggs, Grants and Contracts Manager  
City of Flagstaff  
211 West Aspen  
Flagstaff, AZ 86001

RE: Drug, Gang, and Violent Crime Control (DGVCC) FY 2025 Award, DC-25-002

Dear Stacey Brechler-Knaggs,

On behalf of the Arizona Criminal Justice Commission, it is my pleasure to inform you that your agency's application has been approved for funding under the FY 2025 Drug, Gang, and Violent Crime Control Program.

Paragraphs six and seven of the enclosed agreement provide the amount of funding awarded to your agency and the specific positions that have been funded. Below, please find additional information that will assist in the administration of your agency's grant award.

**Grant Agreement and Other Required Documents:** Please review the grantee agreement and accompanying instructions as revisions or new requirements may have been included. Please follow the directions outlined in the Grant Agreement instructions, as well as instructions received in DocuSign to execute the contract in its entirety with electronic authorized signatures. Agreements not returned within 90 days of the award date with authorized signatures may be canceled. Additionally, please refer to the Special Conditions section of the grant agreement for a listing of other required documents, as applicable.

**Administrative and Financial Requirements:** In addition to applicable uniform administrative requirements and cost principles, award recipients are required to adhere to grant specific program requirements as defined in the grant agreement.

**Reporting:** Activity and financial reports are required for this grant and the reporting schedules are contained in the agreement. Financial Reporting can be accessed at: <https://grantsportal.azcjc.gov/>. Activity reporting can be accessed at: <https://acjcreporting.azcjc.gov/>.

**Office of Civil Rights Requirements:** Annual Completion of Civil Rights Training is required for this grant. Grantees must contact the Grant Coordinator to obtain registration to access the training. If applicable, agencies awarded must complete an EEOC plan and submit it to the Office of Civil Rights, Office of Justice Programs. Link to helpful EEOC information: <https://www.ojp.gov/program/civil-rights-office/home>.

If you have any questions, please contact Siyeni Yitbarek at [siytbarek@azcjc.gov](mailto:siytbarek@azcjc.gov) or 602.364.1163. Our office looks forward to the continued partnership.

Sincerely,

A handwritten signature in black ink that reads "Tony Vidale".

Assistance Listings Number (ALN) Number 16.738

The following information is provided pursuant to 2 §C.F.R. 200.331(a)(1):

Grantee Name: City of Flagstaff  
Grantee's UEI Number: XMMUMPKTLVQ3  
Grantee Period of Performance Start and End Date: 07/01/2024 to 06/30/2025  
Amount of Federal Funds Obligated by this Agreement: \$125,768.58  
Total Amount of Federal Funds Obligated to the Grantee: \$125,768.58  
Indirect Cost Rate used by the Grantee under this Agreement: 0.0%  
ALN Number and Name: 16.738 - Edward Byrne Memorial Justice Assistance Grant (JAG) Program  
Name of Federal Awarding Agency: Department of Justice, Office of Justice Programs  
Total Amount of the Federal Award in this Agreement: \$4,183,559.00  
Federal Award Identification Number (FAIN): 15PBJA-22-GG-00662-JAGX  
Federal Award Date: 09/13/2021

Federal Award Project Description:

In general, JAG funds awarded to a state under this FY2025 solicitation may be used to provide additional personnel, equipment, supplies, contractual support, training, technical assistance, and information systems for criminal justice, including for any one or more of the following:

- Law enforcement programs
- Prosecution and court programs
- Prevention and education programs
- Corrections and community corrections programs
- Drug treatment and enforcement programs
- Planning, evaluation, and technology improvement programs
- Crime victim and witness programs (other than compensation)
- Mental health programs and related law enforcement and corrections programs

Name of Pass-Through Entity: Arizona Criminal Justice Commission  
Contact Information for Pass-Through Entity: Arizona Criminal Justice Commission, 1110 W. Washington Street,  
Suite 230, Phoenix, AZ, 85007  
Identification of Whether the Award is Research and Development: No  
Indirect Cost Rate for the Federal Award: 0.0%

This Grant Agreement is made this 29th day of May, 2024 by and between the ARIZONA CRIMINAL JUSTICE COMMISSION hereinafter called "COMMISSION" and COCONINO, through CITY OF FLAGSTAFF hereinafter called GRANTEE. The COMMISSION enters into this Agreement pursuant to its authority under the provisions of A.R.S. § 41-2405 (B)(6), and having satisfied itself as to the qualification of GRANTEE;

NOW, THEREFORE, it is agreed between the parties as follows:

1. This Agreement will commence on July 01, 2024 and terminate on June 30, 2025. This Agreement expires at the end of the award period unless prior written approval for an extension has been obtained from the COMMISSION. A request for an extension must be received by the COMMISSION sixty (60) days prior to the end of the award period. The COMMISSION in its sole discretion may approve an extension that furthers the goals and objectives of the program and shall determine the length of any extension.
2. GRANTEE agrees that grant funds will be used in accordance with applicable program rules, guidelines and special conditions.
3. The COMMISSION will monitor GRANTEE performance against program goals and performance standards and those outlined in the grant application. Substandard performance as determined by the COMMISSION will constitute noncompliance with this Agreement. If the COMMISSION finds noncompliance, the GRANTEE will receive a written notice which identifies the area of noncompliance, and the appropriate corrective action to be taken. If the GRANTEE does not respond within thirty (30) calendar days to this notice, and does not provide sufficient information concerning the steps which are being taken to correct the problem, the COMMISSION may suspend funding, permanently terminate this Agreement or revoke the grant.
4. Any deviation or failure to comply with the purpose and/or conditions of this Agreement without prior written COMMISSION approval may constitute sufficient reason for the COMMISSION to terminate this Agreement, revoke the grant, require the return of all unspent funds, perform an audit of expended funds, and require the return of any previously spent funds which are deemed to have been spent in violation of the purpose or conditions of this grant.
5. This Agreement may be modified only by a written amendment signed by the Executive Director or by persons authorized by the Executive Director on behalf of the COMMISSION and GRANTEE. Any notice given pursuant to this Agreement shall be in writing and shall be considered to have been given when actually received by the following addressee or their agents or employees:

A. If to the COMMISSION:

Arizona Criminal Justice Commission  
1110 W Washington St., Ste 230  
Phoenix, Arizona 85007

Attn: Program Manager

B. If to the GRANTEE:

City of Flagstaff  
211 West Aspen  
Flagstaff, AZ 86001

Attn: Grants and Contracts Manager , Stacey Brechler-Knaggs

6. For grant awards above \$100,000, GRANTEE may make budget adjustments of up to ten (10) percent of the total grant within any approved budget category excluding equipment. Written approval from the COMMISSION in advance is required if GRANTEE wishes to make adjustments or reprogram in excess of ten (10) percent or if GRANTEE wishes to purchase equipment not previously approved.

For grant awards less than \$100,000, the GRANTEE may make budget adjustments within approved categories excluding equipment as long as there are no changes to the purpose or scope of the project. If GRANTEE wishes to purchase equipment not previously approved, written approval from the COMMISSION in advance is required.

### APPROVED LINE ITEM PROGRAM BUDGET

Additional Expenses	\$0.00
<b>TOTAL BUDGET</b>	<b>\$292,485.09</b>

POSITIONS FUNDED: Flagstaff PD Sergeant (1), Flagstaff Investigator (.73)

EQUIPMENT FUNDED:

7. The total to be paid by the COMMISSION under this Agreement shall not exceed \$125,768.58 in federal funds awarded to the COMMISSION by the U.S. Department of Justice (USDOJ), Office of Justice Programs (OJP) and \$93,595.24 in State Funds. If this grant has a matching requirement, GRANTEE understands that other federal grant funds cannot be used as a match for this grant. The matching amount for this award is \$73,121.27.

8. Every payment obligation of the COMMISSION under this Agreement is conditioned upon the availability of funds appropriated or allocated for the payment of such obligation. If funds are not allocated and available for the continuance of this Agreement, this Agreement may be terminated by the COMMISSION. No liability shall accrue to the COMMISSION in the event this provision is exercised, and the COMMISSION shall not be obligated or liable for any future payments or for any damages as a result of termination under this paragraph.

9. GRANTEE agrees that if it currently has an active award of federal funds or if it receives any other award of federal funds during the period of performance for this award, and those award funds have been, are being or are to be used, in whole or in part, for one or more of the identical cost items for which funds are being provided under this award, GRANTEE will promptly notify, in writing, the COMMISSION, of the potential of duplication, and if so requested by the COMMISSION, seek a budget modification or change-of-project-scope grant adjustment request (GAR) to eliminate any inappropriate duplication of funding.

10. GRANTEE agrees to retain all books, account reports, files and other records, (paper and/or electronic) relating to this Agreement and the performance of this Agreement for no less than five (5) years from the last financial report submitted to the COMMISSION. All such documents shall be subject to inspection and audit at reasonable times, including such records of any subgrantee, contractor, or subcontractor. GRANTEE also understands and agrees that USDOJ and the United States General Accounting Office (USGAO) are authorized to interview any officer or employee of the GRANTEE (or of any subgrantee, contractor, or subcontractor) regarding transactions related to this award.

11. GRANTEE agrees that activities funded under this award will be closely coordinated with related activities supported with Office of Justice Programs (OJP), State, local or tribal funds. Grant funds may only be used for the purposes in the GRANTEE's approved application. GRANTEE shall not undertake any work or activities not described in the grant application, including staff, equipment, or other goods or services without prior approval from the COMMISSION.

12. GRANTEE agrees to track, account for, and report on all funds (including specific outcomes and benefits) separately from all other funds for the same or similar purposes or programs.

Accordingly, the accounting systems of GRANTEE and all subgrantees must ensure that funds from this award are not commingled with funds from any other source.

13. GRANTEE agrees to abide by Federal and State laws and provide accounting, auditing and monitoring procedures to safeguard grant funds and keep such records to assure proper fiscal controls, management and the efficient disbursement of grant funds.

14. For the purposes of this grant, a capital expenditure means expenditures to acquire capital assets, as defined in 2 C.F.R. 200.12, or expenditures to make additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations, or alterations to capital assets that materially increase their value or useful life, with a cost of \$5,000 or greater. If the GRANTEE's capitalization policy defines a capital expenditure as less than \$5,000, the GRANTEE will follow its own policy.

15. GRANTEE agrees to maintain property records for equipment purchased with grant funds and perform a physical inventory and reconciliation with property records at least every two years or more frequently if required by GRANTEE policy. GRANTEE agrees that funds will not be used for the construction of new facilities.

16. GRANTEE agrees to follow equipment disposition policies outlined in 2 C.F.R. 200.313(e)(1) through (4) *Uniform Administrative Requirements for Grants and Cooperative Agreements-Equipment*, when the equipment is no longer needed for the grant program **Link:** [e-CFR Navigation Aid](http://www.ecfr.gov/cgi-bin/ECFR?page=browse) at <http://www.ecfr.gov/cgi-bin/ECFR?page=browse>.

17. GRANTEE agrees that all salaried personnel (including subgrantee personnel) whose activities are to be charged to the award will maintain timesheets or certifications to document hours worked for activities related to this award and non-award related activities. GRANTEE agrees to keep time and attendance sheets for hourly employees signed by the employee and supervisory official having firsthand knowledge of the work performed by the grant-funded employees.

18. GRANTEE agrees that it will submit financial and activity reports to the COMMISSION in a format provided by the COMMISSION, documenting the activities supported by these grant funds and providing an assessment of the impact of these activities which may include documentation of project milestones. In the event reports are not received on or before the indicated date(s), funding may be suspended until such time as delinquent report(s) are received.

19. These reports are to be submitted according to the following schedule(s):

### ACTIVITY REPORTS

Report Period	Due Date
July 1st to September 30th	October 15th
October 1st to December 31st	January 15th
January 1st to March 31st	April 15th
April 1st to June 30th	July 15th

### FINANCIAL REPORTS

Report Period	Due Date
July 1st to July 31st	August 25th
August 1st to August 31st	September 25th
September 1st to September 30th	October 25th
October 1st to October 31st	November 25th
November 1st to November 30th	December 25th
December 1st to December 31st	January 25th
January 1st to January 31st	February 25th
February 1st to February 28/29th	March 25th
March 1st to March 31st	April 25th
April 1st to April 30th	May 25th
May 1st to May 31st	June 25th
June 1st to June 30th	July 25th

Additional reporting requirements may be required for GRANTEES who are considered high risk.

20. GRANTEE understands that financial reports are required as an accounting of expenditures for either reimbursement or COMMISSION-approved advance payments.

21. The final request for reimbursement of grant funds must be received by the COMMISSION no later than sixty (60) days after the last day of the award period.

22. All goods and services must be received or have reasonable expectations thereof and placed in service by GRANTEE by the expiration of this award.

23. GRANTEE agrees that all encumbered funds must be expended and that goods and services must be paid by GRANTEE within sixty (60) days of the expiration of this award.

24. GRANTEE agrees to remit all unexpended grant funds to the COMMISSION within thirty (30) days of written request from the COMMISSION.

25. GRANTEE agrees to account for interest earned on federal grant funds and shall manage interest income in accordance with the Cash Management Improvement Act of 1990 and as indicated in the Office of Justice Programs Financial Guide. Interest earned in excess of allowable limits must be remitted to the COMMISSION within 30 days after receipt of a written request from the COMMISSION. **Link:** [OJP Financial Guide](https://ojp.gov/financialguide/doj/pdfs/DOJ_FinancialGuide.pdf) at [https://ojp.gov/financialguide/doj/pdfs/DOJ\\_FinancialGuide.pdf](https://ojp.gov/financialguide/doj/pdfs/DOJ_FinancialGuide.pdf).

26. GRANTEE agrees to obtain written COMMISSION approval for all sole source procurements in excess of \$250,000.

27. GRANTEE agrees to obtain written COMMISSION approval prior to the expenditure of grant funds for consultant fees in excess of \$650 per day.

28. GRANTEE agrees to not use federal grant funds to pay cash compensation (salary plus bonuses) to any employee paid by the grant at a rate that exceeds 110% of the maximum annual salary payable to a member of the federal government's Senior Executive Service (SES) at an agency with a Certified SES Performance Appraisal System for that year. (An award recipient may compensate an employee at a higher rate, provided the amount in excess of this compensation limitation is paid with non-federal funds, unless otherwise noted in the grant solicitation.)

29. GRANTEE agrees not to use grant funds for food and/or beverage unless explicitly approved in writing by the COMMISSION.

30. GRANTEE agrees to comply with all applicable laws, regulations, policies and guidance (including specific cost limits, prior approvals and reporting requirements, where applicable) governing the use of grant funds for expenses related to conferences, meetings, trainings, and other events, including the provision of food and/or beverages at such events, and costs of attendance at such events unless explicitly approved in writing by the COMMISSION. Information on pertinent laws, regulations, policies, and guidance is available in the OJP Financial Guide (currently, as section 3.10 "Postaward Requirements" in the DOJ Grants Financial Guide).

31. No funds shall be used to supplant federal, state, county or local funds that would otherwise be made available for such purposes. Supplanting means the deliberate reduction of state or local funds because of the existence of any grant funds.

32. GRANTEE assigns to the COMMISSION any claim for overcharges resulting from antitrust violations to the extent that such violations concern materials or services applied by third parties to GRANTEE in exchange for grant funds provided under this Agreement.

33. The parties agree to use arbitration in the event of disputes in accordance with the provisions of A.R.S. § 12-1501-12-1518. The laws of the State of Arizona apply to questions arising under this Agreement and any litigation regarding this Agreement must be maintained in Arizona courts, except as pertaining to disputes which are subject to arbitration.

I. In the event of a dispute, controversy, or claim arising out of or relating in any way to the Agreement, the complaining Party shall notify the other Party in writing thereof. Within 30 calendar days of such notice, representatives of both Parties shall meet at an agreed location to attempt to resolve the dispute in good faith. Should the dispute not be resolved within 30 calendar days after such notice, the complaining Party shall seek remedies exclusively through arbitration, in accordance with the provisions of A.R.S. § 12-1501 through 12-1518.

II. The arbitration demand must be a clear and concise statement of the claim or dispute. The respondent's answer and any counterclaims must be filed within 20 calendar days of service of the demand.

III. The arbitration shall be conducted in Maricopa County.

IV. The arbitration shall be conducted by one arbitrator. If the Parties are not able to agree upon the selection of an arbitrator, within 20 calendar days of the commencement of an arbitration proceeding by service of a demand for arbitration, the court on application of a Party shall appoint the arbitrator.

V. The arbitrator must promptly set a conference to clarify the claims and defenses, to establish fair procedures, and to set a schedule for completing the arbitration.

VI. It is the intent of the parties that, barring extraordinary circumstances, arbitration proceedings will be concluded with 120 calendar days from the date the arbitrator is appointed. The arbitrator may extend the time limit in the interests of justice. Failure to adhere to this time limit shall not constitute a basis for challenging the award.

VII. The arbitrator must issue a written, reasoned award within 20 calendar days from the date the hearing is formally closed, or as soon after that as is feasible. The sole remedy will be actual damages; no punitive damages are allowed.

VIII. Unless the arbitrator orders otherwise, the Parties must share arbitration costs equally, including arbitrator's fees and expenses. Each party must pay its own expenses and attorney's fees.

34. GRANTEE understands that grant funds may not be released until all delinquent reports and reversion of funds from prior grants are submitted to the COMMISSION.

35. GRANTEE agrees that grant funds are not to be expended for any indirect costs that may be incurred by GRANTEE for administering these funds unless explicitly approved in writing by the COMMISSION. This may include, but is not limited to, costs for services such as accounting, payroll, data processing, purchasing, personnel, and building use which may have been incurred by the GRANTEE.

36. Each party (as "Indemnitor") agrees to defend, indemnify, and hold harmless the other party (as "Indemnitee") from and against any and all claims, losses, liability, costs, or expenses, (including reasonable attorney's fees) (hereinafter collectively referred to as "Claims") arising out of bodily injury of any person (including death) or property damage, but only to the extent that such Claims which result in vicarious/derivative liability to the Indemnitee are caused by the act, omission, negligence, misconduct, or other fault of the Indemnitor, its officers, officials, agents, employees, or volunteers. If the GRANTEE is a State agency, board, commission, or university of the State of Arizona, this paragraph shall not apply.

37. Should GRANTEE utilize a contractor(s) and subcontractor(s) the indemnification clause between GRANTEE and its contractor(s) and subcontractor(s) shall include the following:

Contractor shall defend, indemnify, and hold harmless the GRANTEE and the State of Arizona, and any jurisdiction or agency issuing any permits for any work arising out of this Agreement, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees (hereinafter referred to as "Indemnitee") from and against any and all claims, actions, liabilities, damages, losses, or expenses (including court costs, attorneys' fees, and costs of claim processing, investigation and litigation) (hereinafter referred to as "Claims") for bodily injury or personal injury (including death), or loss or damage to tangible or intangible property caused, or alleged to be caused, in whole or in part, by the negligent or willful acts or omissions of the contractor or any of the directors, officers, agents, or employees or subcontractors of such contractor. This indemnity includes any claim or amount arising out of or recovered under the Workers' Compensation Law or arising out of the failure of such contractor to conform to any federal, state or local law, statute, ordinance, rule, regulation or court decree. It is the specific intention of the parties that the Indemnitee shall, in all instances, except for Claims arising solely from the negligent or willful acts or omissions of the Indemnitee, be indemnified by such contractor from and against any and all claims. It is agreed that such contractor will be responsible for primary loss investigation, defense and judgment costs where this indemnification is applicable. Additionally on all applicable insurance policies, contractor and its subcontractors shall name the State of Arizona, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees as an additional insured and also include a waiver of subrogation in favor of the State. Insurance requirements for any contractor used by GRANTEE are incorporated herein by this reference and attached to this Agreement as Exhibit "A".

38. Restrictions and certifications regarding non-disclosure agreements and related matters

No GRANTEE under this award, or entity that receives a procurement contract or subcontract with any funds under this award, may require any employee or contractor to sign an internal confidentiality agreement or statement that prohibits or otherwise restricts, or purports to prohibit or restrict, the reporting (in accordance with law) of waste, fraud, or abuse to an investigative or law enforcement representative of a federal department or agency authorized to receive such information.

The foregoing is not intended, and shall not be understood by the agency making this award, to contravene requirements applicable to Standard Form 312 (which relates to classified information), Form 4414 (which relates to sensitive compartmented information), or any other form issued by a federal department or agency governing the nondisclosure of classified information.

I. In accepting this award, the GRANTEE--

a. represents that it neither requires nor has required internal confidentiality agreements or statements from employees or contractors that currently prohibit or otherwise currently restrict (or purport to prohibit or restrict) employees or contractors from reporting waste, fraud, or abuse as described above; and

b. certifies that, if it learns or is notified that it is or has been requiring its employees or contractors to execute agreements or statements that prohibit or otherwise restrict (or purport to prohibit or restrict), reporting of waste, fraud, or abuse as described above, it will immediately stop any further obligations of award funds, will provide prompt written notification to the federal agency making this award, and will resume (or permit resumption of) such obligations only if expressly authorized to do so by that agency.

II. If the GRANTEE does or is authorized under this award to make subawards ("subgrants"), procurement contracts, or both--

a. it represents that--

(1) it has determined that no other entity that the recipient's application proposes may or will receive award funds (whether through a subaward ("subgrant"), procurement contract, or subcontract under a procurement contract) either requires or has required internal confidentiality agreements or statements from employees or contractors that currently prohibit or otherwise currently restrict (or purport to prohibit or restrict) employees or contractors from reporting waste, fraud, or abuse as described above; and

(2) it has made appropriate inquiry, or otherwise has an adequate factual basis, to support this representation; and

b. it certifies that, if it learns or is notified that any subrecipient, contractor, or subcontractor entity that receives funds under this award is or has been requiring its employees or contractors to execute agreements or statements that prohibit or otherwise restrict (or purport to prohibit or restrict), reporting of waste, fraud, or abuse as described above, it will immediately stop any further obligations of award funds to or by that entity, will provide prompt written notification to the federal agency making this award, and will resume (or permit resumption of) such obligations only if expressly authorized to do so by that agency.

39. GRANTEE agrees to notify the COMMISSION within ten (10) days in the event that the project official is replaced during the award period.

40. No rights or interest in this Agreement shall be assigned by GRANTEE without prior written approval of the COMMISSION.

41. GRANTEE will comply with the audit requirements of Uniform Guidance (2 CFR 200 subpart F 200.500) and provide the COMMISSION with the audit report and any findings within 90 days of receipt of such finding. If the report contains no findings, the GRANTEE must provide notification that the audit was completed. **Link:** [Audit Requirements for OJP Awards](https://ojp.gov/funding/pdfs/AuditRequirementsPart200.pdf) at <https://ojp.gov/funding/pdfs/AuditRequirementsPart200.pdf>.

42. GRANTEE certifies that it will comply with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements in 2 C.F.R. Part 200, as adopted and supplemented by DOJ in 2 C.F.R. Part 2800 (together, the "Part 200 Uniform Requirements") and the OJP Financial Guide. **Link:** [2 C.F.R Part 200 for OJP Awards](https://ojp.gov/funding/Part200UniformRequirements.htm) at <https://ojp.gov/funding/Part200UniformRequirements.htm> .

43. Compliance with general appropriations-law restrictions on the use of federal funds for awards made after FY 2018. GRANTEE or sub-grantee at any tier, must comply with all applicable restrictions on the use of federal funds set out in federal appropriations statutes. Should a question arise as to whether a particular use of federal funds by a GRANTEE would or might fall within the scope of an appropriations-law restriction, the recipient is to contact OJP for guidance, and may not proceed without the express prior written approval of OJP. Pertinent restrictions, including from various "general provisions" in the [Consolidated Appropriations Act, 2018](https://www.ojp.gov/funding/Explore/FY22AppropriationsRestrictions.htm) at <https://www.ojp.gov/funding/Explore/FY22AppropriationsRestrictions.htm> .

44. GRANTEE agrees that it cannot use any federal funds, either directly or indirectly, in support of any contract or sub award to either the Association of Community Organizations for Reform Now (ACORN) or its subsidiaries, without the express written approval of the Office of Justice Programs through the COMMISSION.

45. GRANTEE understands and agrees that misuse of award funds may result in a range of penalties, including suspension of current and future funds, suspension or debarment from federal grants, recoupment of monies provided under an award, and civil and/or criminal penalties.

46. GRANTEE agrees not to do business with any individual, agency, company or corporation listed in the Excluded Parties Listing Service. **Link:** [System for Award Management](https://www.sam.gov/SAM/) at <https://www.sam.gov/SAM/> .

47. GRANTEE agrees to ensure that, no later than the due date of the GRANTEE's first financial report after the award is made, GRANTEE and any subgrantees have a valid DUNS profile and active registration with the System for Award Management (SAM) database.

48. GRANTEE certifies that it presently has no financial interest and shall not acquire any financial interest, direct or indirect, which would conflict in any manner or degree with the performance of services required under this Agreement.

49. GRANTEE understands and agrees that any training or training materials developed or delivered with funding provided under this award must adhere to the OJP Training Guide Principles for Grantees and Subgrantees. **Link:** [OJP Training Guide Principles for Grantees and Subgrantees](https://www.ojp.gov/funding/implement/training-guiding-principles-grantees-and-subgrantees) at <https://www.ojp.gov/funding/implement/training-guiding-principles-grantees-and-subgrantees>.

50. GRANTEE agrees to cooperate and participate with any and all assessments, evaluation efforts or information and data collection requests, and acknowledges that the federal or state grantor agency has the right to obtain, reproduce, publish or use data provided under this award and may authorize others to receive and use such information.

51. GRANTEE shall provide the COMMISSION with a copy of all interim and final reports and proposed publications (including those prepared for conferences and other presentations) resulting from this Agreement. Submission of such materials must be prior to or simultaneous with their public release.

52. GRANTEE agrees that any publications (written, visual, or sound) excluding press releases and newsletters, whether published at the GRANTEE'S or COMMISSION'S expense, shall contain the following statement:

"This was supported by Award No. 15PBJA-22-GG-00662-JAGX awarded by the Department of Justice, Office of Justice Programs, Office of Justice Programs, U.S. Department of Justice. The opinions findings, and conclusions or recommendations expressed in this publication/program/exhibition are those of the author(s) and do not necessarily reflect the views of the Department of Justice."

53. GRANTEE shall comply with all federal, state, and local laws, rules, policies, or executive orders to prohibit discrimination.

54. GRANTEE agrees to comply with the non-discrimination requirements of the Omnibus Crime Control and Safe Streets Act (Safe Streets Act) of 1968, as amended, 34 U.S.C. § 10228(c); the Victims of Crime Act of 1984, as amended, 34 U.S.C. § 20110(e); the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, 34 U.S.C. § 11182(b); and VAWA, as amended, 34 U.S.C. § 12291(b)(13), contain prohibitions against discrimination on the basis of religion in employment. Despite these nondiscrimination provisions, the DOJ has concluded that it may construe the Religious Freedom Restoration Act (RFRA) on a case-by-case basis to permit some faith-based organizations to receive DOJ funds while taking into account religion when hiring staff, even if the statute that authorizes the funding program generally forbids recipients from considering religion in employment decisions. Please consult with the OCR if you have any questions about the regulation or the application of RFRA to the statues that prohibit discrimination in employment. An organization that is a recipient of financial assistance subject to the nondiscrimination provisions of the Safe Streets Act, must meet two obligations: (1) complying with the federal regulation pertaining to the development of an EEO (see 28 C.F.R. pt. 42, subpt. E) and (2) submitting to the OCR findings of discrimination (see 28 C.F.R. §§ 42.204(c), .205(c)(5)). If in the three years prior to the date of the grant award a Federal or State Court or Federal or State administrative agency makes a finding of discrimination after a due process hearing against GRANTEE, GRANTEE will forward a copy of the findings to the Office for Civil Rights, Office of Justice Programs and the COMMISSION.

55. In accordance with DOJ guidance pertaining to Title VI of the Civil Rights Act of 1964, 42 U.S.C. § 2000d, recipients of federal financial assistance must take reasonable steps to provide meaningful access to their programs and activities for persons with limited English proficiency (LEP). See U.S. Department of Justice, Guidance to Federal Financial Assistance Recipient Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons, 67 Fed. Reg. 41,455 (2002). For more information on the civil rights responsibilities that recipients have in providing language services to LEP individuals, please see the website: **Link:** [Limited English Proficiency A Federal Interagency Website](http://www.LEP.gov) at <http://www.LEP.gov>.

56. GRANTEE agrees to comply with the applicable requirements of 28 CFR Part 38, the Department of Justice regulation governing "Partnerships with Faith - Based and Other Neighborhood Organizations" (the "PFNBO"). The PFNBO Regulation provides in part that Department of Justice financial assistance may not be used to fund any inherently religious activities, such as worship, religious instruction, or proselytization. Recipients of Department of Justice financial assistance may still engage in inherently religious activities, but such activities must be separate in time or place from the Department of Justice funded program, and participation in such activities by individuals receiving services from GRANTEE must be voluntary. The PFNBO Regulation also makes clear that organizations participating in programs receiving financial assistance from the Department of Justice are not permitted to discriminate in the provision of services on the basis of a beneficiary's religion. Notwithstanding any other special condition of this award, faith-based organizations may, in some circumstances, consider religion as a basis for employment. **Link:** <https://ojp.gov/funding/Explore/SolicitationRequirements/CivilRightsRequirements.htm#NDPFaith>.

57. Requirements pertaining to prohibited conduct related to trafficking in persons (including reporting requirements and OJP authority to terminate award)

The GRANTEE or subgrantee at any tier, must comply with all applicable requirements (including requirements to report allegations) pertaining to prohibited conduct related to the trafficking of persons, whether on the part of recipients, GRANTEES, or individuals defined (for purposes of this condition) as "employees" of the recipient or of any GRANTEE.

The details of the recipient's obligations related to prohibited conduct related to trafficking in persons are posted on the OJP web site at <http://ojp.gov/funding/Explore/ProhibitedConduct-Trafficking.htm> (Award condition: Prohibited conduct by recipients and GRANTEES related to trafficking in persons (including reporting requirements and OJP authority to terminate award)), and are incorporated by reference here.

58. GRANTEE should be mindful that the misuse of arrest or conviction records to screen either applicants for employment or employees for retention or promotion may have a disparate impact based on race or national origin, resulting in unlawful employment discrimination. As of June 2013 OJP has issued an advisory that grantees should consult local counsel in reviewing their employment practices. If warranted, grantees should also incorporate an analysis of the use of arrest and conviction records in their Equal Employment Opportunity Plan (EEO). See Advisory for Recipients of Financial Assistance from the U.S. Department of Justice on the U.S. Equal Employment Opportunity Commission's Enforcement Guidance: Consideration of Arrest and Conviction Records in Employment Decisions Under Title VII of the Civil Rights Act of 1964 (June 2013), available at [http://www.ojp.gov/about/ocr/pdfs/UseofConviction\\_Advisory.pdf](http://www.ojp.gov/about/ocr/pdfs/UseofConviction_Advisory.pdf).

59. GRANTEE assures that it will comply with all state and federal laws regarding privacy during the course of the award. All information relating to clients is to be treated with confidentiality in accordance with 42 USC section 3789g or 42 USC 14132(b)(3) that are applicable to the collection, disclosure, use and revelation of data information. GRANTEE further agrees to submit a privacy Certificate that is in accordance with requirements of 28 CFR Part 22 if applicable to the program.

60. GRANTEE agrees to formulate and keep on file an EEO (if GRANTEE is required pursuant to 28 CFR 42 Subpart E). GRANTEE certifies that they have forwarded to the Office for Civil Rights, Office of Justice Programs the EEO, or certifications that they have prepared and have on file an EEO, or that they are exempt from EEO requirements. Failure to comply may result in suspension of grant funds. Copies of all submissions such as certifications to or correspondence with the Office for Civil Rights, Office of Justice Programs regarding this requirement must be provided to the COMMISSION by GRANTEE. In the event a federal or state court or federal or state administrative agency makes an adverse finding of discrimination against GRANTEE after a due process hearing, on the ground of race, color, religion, national origin, or sex, GRANTEE will forward a copy of the findings to the Office for Civil Rights, Office of Justice Programs and the COMMISSION (see 28 CFR 42.204(c), .205(c)(5)).

61. GRANTEE agrees to participate in any required civil rights related training to ensure compliance with all federal and state civil rights laws. GRANTEE will inform the COMMISSION of the position responsible for civil rights compliance and will inform the COMMISSION of change in personnel responsible for civil rights compliance within ten days. **Link:** <https://www.azcjc.gov/Grants/Civil-Rights-Compliance>.

62. Compliance with 41 U.S.C. 4712 (including prohibitions on reprisal; notice to employees) GRANTEE must comply with, and is subject to, all applicable provisions of 41 U.S.C. 4712, including all applicable provisions that prohibit, under specified circumstances, discrimination against an employee as reprisal for the employee's disclosure of information related to gross mismanagement of a federal grant, a gross waste of federal funds, an abuse of authority relating to a federal grant, a substantial and specific danger to public health or safety, or a violation of law, rule, or regulation related to a federal grant. GRANTEE also must inform its employees, in writing (and in the predominant native language of the workforce), of employee rights and remedies under 41 U.S.C. 4712. Should a question arise as to the applicability of the provisions of 41 U.S.C. 4712 to this award, the recipient is to contact the DOJ awarding agency (OJP or OVW, as appropriate) for guidance.

63. To support public safety and justice information sharing, GRANTEE, if a governmental subdivision, shall use the National Information Exchange Model (NIEM) specifications and guidelines for this grant. GRANTEE shall publish and make available without restrictions all schemas generated as a result of this grant to the component registry as specified in the guidelines. **Link:** <http://niem.github.io/reference/specifications/>.

64. In order to promote information sharing and enable interoperability among disparate systems across the justice and public safety community, OJP requires the grantee to comply with DOJ's Global Justice Information Sharing Initiative (DOJ's Global) guidelines and recommendations for this particular grant. Grantee shall conform to the Global Standards Package (GSP) and all constituent elements, where applicable, as described at [https://it.ojp.gov/gsp\\_grantcondition](https://it.ojp.gov/gsp_grantcondition).

Grantee shall document planned approaches to information sharing and describe compliance to the GSP and appropriate privacy policy that protects shared information, or provide detailed justification for why an alternative approach is recommended.

65. To avoid duplicating existing networks or IT systems in any initiatives for law enforcement information sharing systems which involve interstate connectivity between jurisdictions, such systems shall employ, to the extent possible, existing networks as the communication backbone to achieve interstate connectivity, unless GRANTEE can demonstrate to the satisfaction of the COMMISSION that this requirement would not be cost beneficial or would impair the functionality of an existing or proposed IT system.

66. If GRANTEE is a governmental political subdivision, the GRANTEE should, to the extent possible and practical, share criminal justice information with other authorized criminal justice agencies. The process control number (PCN) shall be used in accordance with A.R.S. § 41-1750 when sharing data with other criminal justice agencies as electronic data systems are developed or improved.

67. If GRANTEE is a state agency and the award is for the development of information technology projects for more than \$25,000, GRANTEE must complete a Project Investment Justification (PIJ) and submit the justification to the Arizona Department of Administration (ADOA), with a copy to the COMMISSION. GRANTEE agrees to submit required project status reports to ADOA by the due dates and submit copies to the COMMISSION.

If GRANTEE is not a state agency and the award is for the development of information technology projects, GRANTEE will follow local technology policies and guidelines.

68. GRANTEE must promptly refer to the COMMISSION any credible evidence that a principal, employee, agent, contractor, subgrantee, contractor, subcontractor, or other person has, in connection with funds under this award, has either 1) submitted a false claim that violates the False Claims Act; or 2) committed a criminal or civil violation of laws pertaining to fraud, conflict of interest, bribery, gratuity, or similar misconduct. The COMMISSION shall forward the referral to the Department of Justice, Office of the Inspector General.

69. The COMMISSION encourages GRANTEE to establish workplace safety policies and conduct education, awareness and other outreach to decrease crashes caused by distracted drivers, including adopting and enforcing policies banning employees from text messaging while driving any vehicle during the course of performing work funded by this grant. Executive Order 13513, "Federal Leadership on Reducing Text Messaging While Driving," 74 Fed. Reg. 51225 (October 2009).

70. GRANTEE certifies to comply with the Drug-Free Workplace Act of 1988, and implemented in 28 CFR Part 83, Subpart F, for grantees, as defined in 28 CFR, Part 83 Sections 83.620 and 83.650.

71. GRANTEE agrees to complete and keep on file, as appropriate, Immigration and Naturalization Form (I-9). This form is to be used by recipients to verify that persons are eligible to work in the United States. Additionally GRANTEE ensures compliance with A.R.S. § 41-4401.

72. GRANTEE acknowledges that immigration laws require them to register and participate with the E-Verify program (employment verification program administered by the United States Department of Homeland Security and the Social Security Administration or any successor program) as they both employ one or more employees in this state. GRANTEE warrants that they have registered with and participate with E-Verify. If the COMMISSION later determines that the GRANTEE has not complied with E-Verify, it will notify the non-compliant GRANTEE by certified mail of the determination and of the right to appeal the determination.

73. GRANTEE certifies that no federal funds will be paid, by or on behalf of, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into any cooperative agreement, and for the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan or cooperative agreement. If any funds other than Federal funds are paid or will be paid to any person for influencing or attempting to influence an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal award, grant loan, or cooperative agreement, the GRANTEE will complete and submit to the COMMISSION Standard Form-LLL, "Disclosure Form to Report Lobbying" in accordance with its instructions.

74. GRANTEE understands and agrees that it cannot use any federal funds, either directly or indirectly, in support of the enactment, repeal, modification or adoption of any law, regulation or policy at any level of government, without the express prior written approval of the Commission.

75. GRANTEE agrees that no funds provided, or personnel employed under this Agreement shall be in any way, or to any extent, engaged in conduct of political activities in violation of USC Title 5, Part II, Chapter 15, section 1502.

76. GRANTEE understands and agrees that award funds may not be used to discriminate against or denigrate the religious or moral beliefs of students who participate in programs for which financial assistance is provided from those funds, or of the parents or legal guardians of such students.

77. GRANTEE understands and agrees that- (a) no award funds may be used to maintain or establish a computer network unless such network blocks the viewing, downloading and exchanging or pornography, and (b) nothing in subsection (a) limits the use of funds necessary for any Federal, State, tribal or local law enforcement agency or any other entity carrying out criminal investigations, prosecution, or adjudication activities.

78. GRANTEE agrees to comply with all federal, state and local environmental laws and regulations applicable to the development and implementation of activities to be funded under this award. Additional requirements may be found in Grant Agreement Continuation Sheet.

79. GRANTEE agrees that all gross income earned by the GRANTEE that is directly generated by a supported activity or earned as a result of this award during the period of performance shall be deemed program income. All program income must be accounted for and used for the purpose under the conditions applicable for the use of funds under this award, including the effective edition of the OJP Financial Guide and, as applicable in 2 C.F.R. Part 200 Uniform Requirements.

80. This Agreement is subject to cancellation pursuant to the provision of A.R.S. § 38-511. This Agreement may also be cancelled at the COMMISSION'S discretion if not returned with authorized signatures to the COMMISSION within 90 days of commencement of the award.

81. If any provision of this Agreement is held invalid, the remainder of the Agreement shall not be affected thereby and all other parts of this Agreement shall be in full force and effect.

82. GRANTEE agrees to comply with all Special Condition(s) included with this Agreement on the Grant Agreement Continuation Sheet.

83. GRANTEE understands that grant funds may not be released until GRANTEE is compliant with all requirements of grant agreement.

PAGE INTENTIONALLY LEFT BLANK

**ARIZONA CRIMINAL JUSTICE COMMISSION**  
**DRUG, GANG, AND VIOLENT CRIME CONTROL**  
**GRANT AGREEMENT CONTINUATION SHEET**  
**SPECIAL CONDITION(S)**

ACJC Grant Number DC-25-002

1. GRANTEE must verify the Agency Official, Financial Official, Project Official, and Authorized Official including telephone number and e-mail address. If any information is incorrect or has changed, a Grant Adjustment Request (GAR) must be submitted via the ACJC Grants Portal to document changes. In addition, the Agency Point of Contact for the grant record must assign the Financial Points of Contact and the Program Points of Contact in the Grants Portal prior to payments being made and update those contacts when necessary.

2. GRANTEE must submit the following documents within 45 days of award. Failure to submit the documents will result in a hold of grant funding. Documents must be submitted through the GRANTEE's Grants Portal "Attachment" section.

a. ACJC Subgrantee Self-Assessment Questionnaire can be completed in Grants portal at:  
<https://grantsportal.azcjc.gov/>

b. Benchmark Worksheet can be submitted through Grants Portal at: <https://grantsportal.azcjc.gov/>

c. For any agency that is eligible to receive income as a result of grant-funded activities, it must complete the ACJC program income worksheet on Grants Portal under Manage Personnel.

Before the COMMISSION may transmit Federal funds from FY 2022 Byrne/JAG grant the GRANTEE is required to submit the properly executed certification and assurance by the Chief Executive of the Applicant Government.

d. Certifications and Assurances by the Chief Executive of the Applicant Government. Failure to submit the certification will result in a hold of Federal funds. Certification can be obtained at:  
<https://bja.ojp.gov/doc/fy-22-local-jag-ce-certification.pdf>

3. GRANTEE agrees to comply with the requirements of 28 C.F.R. Part 46 and all Office of Justice Programs policies and procedures regarding the protection of human research subjects, including obtainment of Institutional Review Board approval, if appropriate, and subject informed consent.

4. GRANTEE agrees to comply with all confidentiality requirements of 34 U.S.C. and 28 C.F.R. Part 22 that are applicable to collection, use, and revelation of data or information. GRANTEE further agrees, as a condition of grant approval, to submit a Privacy Certificate that is in accord with requirements of 28 C.F.R. Part 22 and, in particular, section 22.23.

5. GRANTEE ensures that it uses generally accepted laboratory practices and procedures as established by accrediting organizations or appropriated certifying bodies.

6. Absent prior express written approval from the COMMISSION, rates for any lodging charged to the grant may not exceed the posted GSA rate for the location. If the GRANTEE opts to obtain lodging at a higher rate, the cost differential, including associated taxes may not be charged to the award.

7. GRANTEE acknowledges that OJP reserves a royalty-free, non-exclusive, and irrevocable license to reproduce, publish, or otherwise use, and authorize others to use (in whole or in part, including in connection with derivative works), for Federal purposes: (1) any work subject to copyright developed under an award or subaward; and (2) any rights of copyright to which a recipient or subrecipient purchases ownership with Federal support.

8. GRANTEE agrees to comply with the Government Performance and Results Act (Pub. L. No. 103-62) and the GRPA Modernization Act of 2010 (Pub. L. No. 111-352). Performance for current year award is measured by: 1) percent reduction in the average number of days from the submission of a sample to a forensic science laboratory to the delivery of test results to a requesting office or agency (calculated by reporting the average

## SPECIAL CONDITION(S) (Continued):

number of days to process a sample at the beginning of a grant period versus the average number of days to process a sample at the end of the grant period; 2) percent reduction in the number of backlogged forensic cases (calculated by reporting the number of backlogged forensic cases at the beginning of the award period versus the number of backlogged forensic cases at the end of the award period), if applicable to the grant; and 3) number of forensic science or medical examiner personnel who completed appropriate training or educational opportunities with current year Coverdell funds, if applicable to the award. GRANTEE is required to collect and report data relevant to these measures.

9. GRANTEE understands and agrees that program income earned during the award period and expenditures from program income must be reported on the monthly financial report. These funds are subject to audit. Program income that is earned during the final sixty (60) days of the award period, if appropriate, be obligated and expended for permissible uses during the sixty-day (60-day) period following the award period. Any program income that is earned, but not obligated or expended within sixty (60) days of the end of the award period must be returned to the COMMISSION.

10. GRANTEE agrees that within 120 days of award, for any law enforcement task force funded with these funds, the task force commander, agency executive, task force officers and other task force members of equivalent rank, will complete required online (internet-based) task force training to be provided free of charge through BJA's Center for Task Force Integrity and Leadership ([www.ctfli.org](http://www.ctfli.org)). Task force members need only take the training once every four years. GRANTEE will compile and maintain a task force personnel roster and course completion certificates.

11. Quarterly performance metrics reports must be submitted through BJA's Performance Measurement Tool (PMT) website (<https://ojpsso.ojp.gov/>) and ACJC Reporting tool website (<https://acjcreporting.azcjc.gov/>). For more detailed information on reporting and other JAG requirements, refer to the AJG reporting requirements webpage. Failure to submit required JAG reports by established deadlines may result in the freezing of grant funds and future High Risk designation.

12. Any law enforcement agency receiving direct or sub-awarded JAG funding must submit quarterly accountability metrics data related to training that officers have received on the use of force, racial and ethnic bias, de-escalation of conflict, and constructive engagement with the public.

13. GRANTEE assures if they are a state agency that the State Information Technology Point of Contact receive written notification regarding any information technology project funded by this grant. GRANTEE agrees to keep on file documentation showing that it has met this requirement.

14. GRANTEE agrees and understands that funded activities may require the preparation of an Environmental Assessment (EA) as defined by the Council of Environmental Quality's Regulations for implementing the Procedural Provisions of the National Environmental Policy Act (NEPA), found at 40 CFR Part 1500.

15. GRANTEE agrees to comply with all federal, state and local environmental laws and regulations applicable to the development and implementation of activities to be funded under this award. The GRANTEE agrees and understands that complying with NEPA may require the preparation of an Environmental Assessment and/or an Environmental Impact Statement, as directed by BJA. The GRANTEE further understands and agrees to requirements for implementation of a Mitigation Plan, as detailed at <https://www.bja.gov/Funding/nepa.html> for programs relating to methamphetamine laboratory operations.

16. GRANTEE agrees that any information technology system developed or supported by funds will comply with 28 CFR Part 23, Criminal Intelligence Systems Operating Policies, if OJP determines this regulation be applicable. Should OJP determine 28 CFR Part 23 to be applicable, OJP may at its discretion, perform audits of the system, as per 28 CFR 23.20(g). Should any violation of 28 CFR Part 23 occur, GRANTEE may be fined as per 42 USC 3789g(c)-(d). GRANTEE may not satisfy such a fine with federal funds.

17. GRANTEE agrees that no JAG funds may be expended on unmanned aircraft, unmanned aircraft systems, or aerial vehicles (US, UAS, or UAV) without prior express written approval from Commission.

## SPECIAL CONDITION(S) (Continued):

18. If JAG Program funds will be used for DNA testing of evidentiary materials, any resulting eligible DNA profiles must be uploaded to the Combined DNA Index System (CODIS, the national DNA database operated by the Federal Bureau of Investigation (FBI)) by a government DNA lab with access to CODIS. No profiles generated with JAG funding may be entered into any other non-governmental DNA database without prior express written approval from BJA. For more information, refer to the NIJ DNA Backlog Reduction Program, available at [www.nij.gov/topics/forensics/lab-operations/evidence-backlogs/Pages/backlogreduction-program.aspx](http://www.nij.gov/topics/forensics/lab-operations/evidence-backlogs/Pages/backlogreduction-program.aspx).

19. Unreasonable restrictions on competition und the award; association with federal government

SCOPE. This condition applies with respect to any procurement of property or services that is funded (in whole or in part) by this award, regardless of the dollar amount of the purchase or acquisition, the method of procurement, or the nature of any legal instrument used. The provisions of this condition must be among those included in any award.

1. No discrimination, in procurement transactions, against associates of the federal government

Consistent with the (DOJ) Part 200 Uniform Requirements - including as set out at 2 C.F.R. 200.300 (requiring awards to be "manage[d] and administer[ed] in a manner so as to ensure that Federal funding is expended and associated programs are implemented in full accordance with U.S. statutory and public policy requirements") and 200.319(a) (generally requiring "[a]ll procurement transactions [to] be conducted in a manner providing full and open cometition 'and forbidding practices "restrictive of competition," such as "[p]lacing unreasonable requirements on firms in order for them to qualify to do business' and taking "[a]ny arbitrary action in the procurement process") -no the basis of such person or entity's status as an "associate of the federal government" (or on the basis of such person or entity's status as a 200.319(a) or as specifically authorized by USDOJ.

2. Rules of construction

a. The term "associate of the federal government" means any person or entity engaged or employed (in the past or at the present) by or on behalf of the federal government- as an employee, contractor or subcontractor (at any tier), grant recipient or- subgrantee (at any tier), agenty, or otherwise- in undertaking any work, project, or activity for or on behalf of (or in providing goods or services to or on behalf of) the federal government, and includes any applicant for such employment or engagement, and any person or entity committed by legal instrument to undertake any such work project, or activity (or to provide such goods or services) in future.

b. Nothing in this condition shall be understood to authorize or require any grantee, any subgrantee at any tier, or any person or other entity, to violate any federal law, including any applicable civil rights or nondiscrimination law.

20. GRANTEE must comply with all applicable requirements to obtain specific advance approval to use a noncompetitive approach in any procurement contract that would exceed the Simplified Acquisition Threshold (currently, \$250,000). The details of the requirement for advance approval to use a noncompetitive approach in a procurement contract under an OJP award are posted on the OJP web site at <https://ojp.gov/funding/Explore/NoncompetitiveProcurement.htm>.

21. GRANTEE acknowledges the requirements of the award; remedies for non-compliance or for materially false statements. The conditions of this award are material requirements of the award. Compliance with any certifications or assurances submitted by or on behalf of the recipient that relate to conduct during the period of performance also is a material requirement of this award.

Failure to comply with any or more of these award requirements-whether a condition set out in full below, a condition incorporated by the reference below, or a certification or assurance related to conduct during the award period may result in the Office of Justice Programs ("OJP") taking appropriate action with respect to the recipient and the award. Among other things, the OJP may withhold finds, disallow costs, or suspend or terminate the award. The Department of Justice ("DOJ"), including OJP, also may take other legal action as appropriate.

Any materially false, fictitious, or fraudulent statement to the federal government related to this award (or concealment or omission of a material fact) may be the subject of criminal prosecution (including under 18

## SPECIAL CONDITION(S) (Continued):

U.S.C 1001 and/or 1621, and/or 34 U.S.C. 10271-10273), and also may lead to imposition of civil penalties and administrative remedies for false claims or otherwise (including under 31 U.S.C 3729-3730 and 3801-3812).

Should any provision of a requirement of this award be held to be invalid or unenforceable by its terms, that provision shall first be applied with limited construction so as to give it the maximum effect permitted by law. Should it be held, instead, that the provision is utterly invalid or unenforceable, such provision shall be deemed severable from this award.

22. If the recipient is designated "high risk" by a federal grant-making agency currently or at any time during the period of performance under this award, the GRANTEE must disclose that fact and certain related information to the COMMISSION by e-mail at dcaadmin@azcjc.gov. For purposes of this disclosure, high risk includes any status under which a federal awarding agency provides additional oversight due to the GRANTEE'S past performance, or other programmatic or financial concerns with the GRANTEE. The GRANTEE'S disclosure must include the following: 1. The federal awarding agency that currently designates the GRANTEE high risk, 2. The date the GRANTEE was designated high risk, 3. The high-risk point of contact at that federal awarding agency (name, phone number, and e-mail address), and 4. The reasons for the high-risk status as set out by the federal awarding agency.

23. Consonant with federal statutes that pertain to firearms and background checks -- including 18 U.S.C. 922 and 34 U.S.C. ch. 409 -- if the GRANTEE uses this award to fund (in whole or in part) a specific project or program (such as a law enforcement, prosecution, or court program) that results in any court dispositions, information, or other records that are "eligible records" (under federal or State law) relevant to the National Instant Background Check System (NICS), or that has as one of its purposes the establishment or improvement of records systems that contain any court dispositions, information, or other records that are "eligible records" (under federal or State law) relevant to the NICS, the GRANTEE must ensure that all such court dispositions, information, or other records that are "eligible records" (under federal or State law) relevant to the NICS are promptly made available to the NICS or to the "State" repository/database that is electronically available to (and accessed by) the NICS, and -- when appropriate -- promptly must update, correct, modify, or remove such NICS relevant "eligible records". In the event of minor and transitory non-compliance, the GRANTEE may submit evidence to demonstrate diligent monitoring of compliance with this condition. COMMISSION will give great weight to any such evidence in any express written determination regarding this condition.

24. GRANTEE acknowledges JAG funds may not be used as the 50% match for purposes of the DOJ Bulletproof Vest Partnership (BVP) program.

25. GRANTEE must have written procedures in place to respond in the event of an actual or imminent "breach" (OMB M-17-12) if it 1) creates, collects, uses, processes, stores, maintains, disseminates, discloses, or disposes of "personally identifiable information (PII)" (2 CFR 200.79) within the scope of an OJP grant-funded program or activity, or 2) uses or operates a "Federal information system" (OMB Circular A-130). The GRANTEE'S breach procedures must include a requirement to report actual or imminent break of PII to the COMMISSION no later than 24 hours after an occurrence of an actual breach, or the detection of an imminent breach.

26. The GRANTEE warrants its compliance with all federal immigration laws and regulations that relate to its employees and A.R.S. § 23-214(A). If a grantee uses any subcontractors in performance of this contract, subcontractors shall warrant their compliance with all federal immigration laws and regulations that relate to their employees and A.R.S. § 23-214(A). A breach of this warranty shall be deemed a material breach of the contract subject to penalties up to and including termination of this contract. The Commission retains the legal right to inspect the papers of the grantee and its subcontractors who work on the contract to ensure that it or its subcontractors are complying with this warranty.

## ARIZONA CRIMINAL JUSTICE COMMISSION GRANT AGREEMENT

### INSURANCE REQUIREMENTS EXHIBIT "A"

**Insurance Requirements for Governmental Parties to a Grant Agreement:**

None.

**Insurance Requirements for Any Contractors Used by a Party to the Grant Agreement:**

*(Note: this applies only to Contractors used by a governmental entity, not to the governmental entity itself.)*  
The insurance requirements herein are minimum requirements and in no way limit the indemnity covenants contained in the Intergovernmental Agreement. The State of Arizona in no way warrants that the minimum limits contained herein are sufficient to protect the governmental entity or Contractor from liabilities that might arise out of the performance of the work under this Contract by the Contractor, his agents, representatives, employees or subcontractors, and Contractor and the governmental entity are free to purchase additional insurance.

**A. MINIMUM SCOPE AND LIMITS OF INSURANCE:** Contractor shall provide coverage with limits of liability not less than those stated below.

**1. Commercial General Liability - Occurrence Form**

Policy shall include bodily injury, property damage, and broad form contractual liability.

General Aggregate	\$2,000,000
Products – Completed Operations Aggregate	\$1,000,000
Personal and Advertising Injury	\$1,000,000
Fire Legal Liability	\$50,000
Each Occurrence	\$1,000,000

a. The policy shall be endorsed, as required by this written agreement, to include the State of Arizona, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees as additional insureds with respect to liability arising out of the activities performed by or on behalf of the Contractor.

(Note that the other governmental entity(ies) is/are also required to be additional insured(s) and they should supply the Contractor with their own list of persons to be insured.)

b. Policy shall contain a waiver of subrogation endorsement, as required by this written agreement, in favor of the State of Arizona, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees for losses arising from work performed by or on behalf of the Contractor.

**2. Business Automobile Liability**

Bodily Injury and Property Damage for any owned, hired, and/or non-owned vehicles used in the performance of this Contract.

Combined Single Limit (CSL)	\$1,000,000
-----------------------------	-------------

a. The policy shall be endorsed, as required by this written agreement, to include the State of Arizona, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees as additional insureds with respect to liability arising out of the activities performed by or on behalf of, the Contractor involving automobiles owned, hired and/or non-owned by the Contractor.

b. Policy shall contain a waiver of subrogation endorsement as required by this written agreement in favor of the State of Arizona, and its departments, agencies, boards, commissions, universities, officers, officials, agents, and employees for losses arising from work performed by or on behalf of the Contractor.

(Note that the other governmental entity(ies) is/are also required to be additional insured(s) and they should supply the Contractor with their own list of persons to be insured.)

Exhibit "A" Page 2

### 3. Worker's Compensation and Employers' Liability

Workers' Compensation	Statutory
Employers' Liability	
Each Accident	\$1,000,000
Disease - Each Employee	\$1,000,000
Disease - Policy Limit	\$1,000,000

a. Policy shall contain a waiver of subrogation endorsement, as required by this written agreement, in favor of the State of Arizona, and its departments, agencies, boards, commissions, universities, its officers, officials, agents, and employees for losses arising from work performed by or on behalf of the Contractor.

b. This requirement shall not apply to each contractor or subcontractor that is exempt under A.R.S. § 23-901, and when such contractor or subcontractor executes the appropriate waiver form (Sole Proprietor or Independent Contractor).

#### **Additional Insurance Requirements:**

The policies shall include, or be endorsed to include, as required by this written agreement, the following provisions:

The Contractor's policies shall stipulate that the insurance afforded the Contractor shall be primary and that any insurance carried by the Department, its agents, officials, employees or the State of Arizona shall be excess and not contributory insurance, as provided by A.R.S. § 41-621 (E).

Insurance provided by the Contractor shall not limit the Contractor's liability assumed under the indemnification provisions of this Contract.

#### **Notice of Cancellation:**

For each insurance policy required by the insurance provisions of this Contract, the Contractor must provide to the State of Arizona, within two (2) business days of receipt, a notice if a policy is suspended, voided, or cancelled for any reason. Such notice shall be mailed, emailed, hand delivered or sent by facsimile transmission to (Enter Contracting Agency Representative's Name, Address, and Fax Number Here).

#### **Acceptability of Insurers:**

Contractor's insurance shall be placed with companies licensed in the State of Arizona or hold approved non-admitted status on the Arizona Department of Insurance List of Qualified Unauthorized Insurers. Insurers shall have an "A.M. Best" rating of not less than A- VII. The State of Arizona in no way warrants that the above-required minimum insurer rating is sufficient to protect the Contractor from potential insurer insolvency.

#### **Verification of Coverage:**

Contractor shall furnish the State of Arizona with certificates of insurance (valid ACORD form or equivalent approved by the State of Arizona) as required by this Contract. An authorized representative of the insurer shall sign the certificates.

All certificates and endorsements, as required by this written agreement, are to be received and approved by the State of Arizona before work commences. Each insurance policy required by this Contract must be in effect at, or prior to, commencement of work under this Contract. Failure to maintain the insurance policies as required by this Contract, or to provide evidence of renewal, is a material breach of contract.

All certificates required by this Contract shall be sent directly to the Department. The State of Arizona project/contract number and project description shall be noted on the certificate of insurance. The State of Arizona reserves the right to require complete copies of all insurance policies required by this Contract at any time.

Exhibit "A" Page 3

**Subcontractors:**

Contractor's certificate(s) shall include all subcontractors as insureds under its policies or Contractor shall be responsible for ensuring and/or verifying that all subcontractors have valid and collectable insurance as evidenced by the certificates of insurance and endorsements for each subcontractor. All coverages for subcontractors shall be subject to the minimum Insurance Requirements identified above. The Department reserves the right to require, at any time throughout the life of the Contract, proof from the Contractor that its subcontractors have the required coverage.

**Approval and Modifications:**

The Contracting Agency, in consultation with State Risk, reserves the right to review or make modifications to the insurance limits, required coverages, or endorsements throughout the life of this contract, as deemed necessary. Such action will not require a formal Contract amendment but may be made by administrative action.

**Exceptions:**

In the event the Contractor or subcontractor(s) is/are a public entity, then the Insurance Requirements shall not apply. Such public entity shall provide a certificate of self-insurance. If the Contractor or subcontractor(s) is/are a State of Arizona agency, board, commission, or university, none of the above shall apply.

## **ELECTRONIC RECORD AND SIGNATURE DISCLOSURE**

From time to time, Arizona Criminal Justice Commission (we, us or Company) may be required by law to provide to you certain written notices or disclosures. Described below are the terms and conditions for providing to you such notices and disclosures electronically through the DocuSign system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to this Electronic Record and Signature Disclosure (ERSD), please confirm your agreement by selecting the check-box next to 'I agree to use electronic records and signatures' before clicking 'CONTINUE' within the DocuSign system.

### **Getting paper copies**

At any time, you may request from us a paper copy of any record provided or made available electronically to you by us. You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents for a limited period of time (usually 30 days) after such documents are first sent to you. After such time, if you wish for us to send you paper copies of any such documents from our office to you, you will be charged a \$0.00 per-page fee. You may request delivery of such paper copies from us by following the procedure described below.

### **Withdrawing your consent**

If you decide to receive notices and disclosures from us electronically, you may at any time change your mind and tell us that thereafter you want to receive required notices and disclosures only in paper format. How you must inform us of your decision to receive future notices and disclosure in paper format and withdraw your consent to receive notices and disclosures electronically is described below.

### **Consequences of changing your mind**

If you elect to receive required notices and disclosures only in paper format, it will slow the speed at which we can complete certain steps in transactions with you and delivering services to you because we will need first to send the required notices or disclosures to you in paper format, and then wait until we receive back from you your acknowledgment of your receipt of such paper notices or disclosures. Further, you will no longer be able to use the DocuSign system to receive required notices and consents electronically from us or to sign electronically documents from us.

### **All notices and disclosures will be sent to you electronically**

Unless you tell us otherwise in accordance with the procedures described herein, we will provide electronically to you through the DocuSign system all required notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you during the course of our relationship with you. To reduce the chance of you inadvertently not receiving any notice or disclosure, we prefer to provide all of the required notices and disclosures to you by the same method and to the same address that you have given us. Thus, you can receive all the disclosures and notices electronically or in paper format through the paper mail delivery system. If you do not agree with this process, please let us know as described below. Please also see the paragraph immediately above that describes the consequences of your electing not to receive delivery of the notices and disclosures electronically from us.

### **How to contact Arizona Criminal Justice Commission:**

You may contact us to let us know of your changes as to how we may contact you electronically, to request paper copies of certain information from us, and to withdraw your prior consent to receive notices and disclosures electronically as follows:

To contact us by email send messages to: [alefevre@azcjc.gov](mailto:alefevre@azcjc.gov)

### **To advise Arizona Criminal Justice Commission of your new email address**

To let us know of a change in your email address where we should send notices and disclosures electronically to you, you must send an email message to us at [alefevre@azcjc.gov](mailto:alefevre@azcjc.gov) and in the body of such request you must state: your previous email address, your new email address. We do not require any other information from you to change your email address.

If you created a DocuSign account, you may update it with your new email address through your account preferences.

### **To request paper copies from Arizona Criminal Justice Commission**

To request delivery from us of paper copies of the notices and disclosures previously provided by us to you electronically, you must send us an email to [alefevre@azcjc.gov](mailto:alefevre@azcjc.gov) and in the body of such request you must state your email address, full name, mailing address, and telephone number. We will bill you for any fees at that time, if any.

### **To withdraw your consent with Arizona Criminal Justice Commission**

To inform us that you no longer wish to receive future notices and disclosures in electronic format you may:

- i. decline to sign a document from within your signing session, and on the subsequent page, select the check-box indicating you wish to withdraw your consent, or you may;
- ii. send us an email to [alefevre@azcjc.gov](mailto:alefevre@azcjc.gov) and in the body of such request you must state your email, full name, mailing address, and telephone number. We do not need any other information from you to withdraw consent.. The consequences of your withdrawing consent for online documents will be that transactions may take a longer time to process..

### **Required hardware and software**

The minimum system requirements for using the DocuSign system may change over time. The current system requirements are found here: <https://support.docusign.com/guides/signer-guide-signing-system-requirements>.

### **Acknowledging your access and consent to receive and sign documents electronically**

To confirm to us that you can access this information electronically, which will be similar to other electronic notices and disclosures that we will provide to you, please confirm that you have read this ERSD, and (i) that you are able to print on paper or electronically save this ERSD for your future reference and access; or (ii) that you are able to email this ERSD to an email address where you will be able to print on paper or save it for your future reference and access. Further, if you consent to receiving notices and disclosures exclusively in electronic format as described herein, then select the check-box next to ‘I agree to use electronic records and signatures’ before clicking ‘CONTINUE’ within the DocuSign system.

By selecting the check-box next to ‘I agree to use electronic records and signatures’, you confirm that:

- You can access and read this Electronic Record and Signature Disclosure; and
- You can print on paper this Electronic Record and Signature Disclosure, or save or send this Electronic Record and Disclosure to a location where you can print it, for future reference and access; and
- Until or unless you notify Arizona Criminal Justice Commission as described above, you consent to receive exclusively through electronic means all notices, disclosures, authorizations, acknowledgements, and other documents that are required to be provided or made available to you by Arizona Criminal Justice Commission during the course of your relationship with Arizona Criminal Justice Commission.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Stacey Brechler-Knaggs, Grants, Contracts & Emergency Management Director  
**Co-Submitter:** Brian Gall, Airport Director  
**Co-Submitter:** Adam Miele  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Contract:** Construction Manager at Risk (CMAR) Design Phase Services Contract with Loven-Fann Joint Venture in an amount not to exceed \$700,000 for the Airport Snow Removal Equipment Building Project.

**STAFF RECOMMENDED ACTION:**

1. Award the CMAR Design Phase Services contract with Loven-Fann Joint Venture in an amount not to exceed \$700,000, subject to approval by the Federal Aviation Administration (FAA) and Arizona Department of Transportation (ADOT) Multi-Modal Transportation Division; and
2. Authorize Change Order Authority of \$70,000 (10%) to cover potential costs associated with unanticipated or additional items of work. This change order amount is included in the total not to exceed amount of \$700,000; and
3. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

This Project consists of pre-construction design services, including generating one or more Guaranteed Maximum Price(s) (GMP), for the Snow Removal Equipment Building (SREB) project located at the Flagstaff Pulliam Airport that is currently under design.

This Design Phase Services Contract is for the CMAR to assist in the development of the final Project design. The Project will ultimately include the construction of the SREB, which will be presented as a separate item later this year. The SREB will be approximately 25,000 SF and consists of vehicle storage bays and a maintenance bay, equipment and material storage, and associated support areas. The SREB will be capable of supporting the Flagstaff Airport's Snow and Ice Control Plan for multiple 24-hour operational periods. The development site is 6200 S. Pulliam Dr. (APN 116-61-004) of the Airport in the PF (Public Facility) Zone. The SREB will direct access for snow clearing crews to respond to snow and ice conditions at the Airport. The entire Project site area is approximately 4.5 acres within the larger parcel, which is 31.1 acres. The scope of work includes construction of a new SREB and associated site improvements. The Project also includes realignment of the existing road to the Airport Traffic Control Tower (S. Liberator Lane) (ATCT), a new stormwater basin, space for equipment turning movements, an equipment yard, and parking for employees.

**\*\*\* The final Contract will be attached for review prior to the scheduled City Council meeting.**

**Financial Impact:**

Project Name: Airport Snow Removal Equipment Building  
Total Project Estimated Cost: \$24,780,722  
Account Number Budgeted: 221-07-222-3583-0 and 221-07-222-6271-0

FY2024-25 Budgeted Amount: \$18,312,221

Grant Funded: Yes

Funding Source: U.S. Department of Transportation, Federal Aviation Administration and Arizona Department of Transportation

The total Project budget is estimated to be approximately \$24,780,722 (including additive alternate(s) provided by the funding from City of Flagstaff, FAA, and ADOT. Funding for the project will come from multiple grant awards from the Federal Aviation Administration (FAA), matching funds from Arizona Department of Transportation (ADOT) and City funding.

The City has received one of the FAA grants (Airport Improvement Program (AIP) 51) and the ADOT matching grant for a total of \$4,861,391. We are anticipating two additional FAA and ADOT grants for the Project. The City has requested a letter of commitment to the Project from the FAA, however the full federal funding/grant award for the total project cost will not be considered for award until the GMP(s) is available and award is anticipated around June 2025.

The grant monies are anticipated to be dispersed from April 2023 through June 2025. The total Project budget covers all costs to deliver the Project including but not limited to; itemized proposed equipment to aid in the operation of the facility, landscaping, startup and training. If federal discretionary funds are not authorized, the City would use our federal entitlement funds to cover this work initiative. Based on the GMP, the FAA grant will provide 91.06% of total project funding, ADOT grant will provide 4.47% of funding, with the City grant match of 4.47% at the time of grant award.

**Policy Impact:**

None.

**Previous Council Decision or Community Discussion:**

- On August 18, 2020, Council approved a design services grant contract for APMI for the Project.
- On October 17, 2023, Council approved the FAA AIP 51 grant agreement.

**Options and Alternatives to Recommended Action:**

1. Approve the CMAR Design Phase Services Contract with Loven-Fann Joint Venture, as presented. This will allow timely execution of the Project; or
2. Reject approval of the contract and direct staff to pursue traditional design-bid-build project delivery. This would effectively delay progress on the project by one year and jeopardize the grant funding.

**Background and History:**

On August 18, 2020, the City Council approved a design services grant for APMI for the design of the Snow Removal Equipment Building Project. City staff, the design consultants, and representatives from the FAA and ADOT developed several alternative concepts. Preliminary design is complete and the Project is transitioning to final construction documentation. Pursuant to the Construction Manager at Risk (CMAR) Design Phase Services Contract, Loven-Fann Joint Venture will provide pre-construction design services, including confirmation of the constructability of the APMI plans for the Snow Removal Equipment Building (SREB), development of the schedule for construction, and generation of the GMP.

In recent years, the Arizona State Legislature and Federal Aviation Administration have both authorized the use of Alternative Project Delivery Methods (APDM) in lieu of the traditional Design-Bid-Build method of project delivery. These alternative methods allow a contracting agency the opportunity to select a construction team utilizing a qualifications-based selection process to procure construction services from a firm deemed most qualified to perform the work.

On April 13 and 20, 2024, a Request for Statements of Qualifications (RSOQ) for Construction Manager at Risk (CMAR) services was published in the Arizona Daily Sun and was posted on the Purchasing PlanetBids

web site on April 4, 2024. On April 30, 2024, the City of Flagstaff received five Statements of Qualifications that were responsive to the requirements of the RSOQ for providing CMAR services for this project. A selection committee of five members independently reviewed and evaluated those statements in accordance with the evaluative criteria established in the RSOQ. The evaluation committee consisted of three City staff, one local contractor, and one design professional. Based on numerical evaluation of the statements received, Loven-Fann Joint Venture received the highest ranking and was deemed the most qualified among those submitting proposals to provide CMAR services.

The selection committee final scores were:

Firm	Score	Ranking
Agate	293	4
Core Construction	445	3
Kinney Construction	469	2
Loven- Fann Joint Venture	509	1
Sundt	445	3

Airport snow removal equipment is currently stored in the airport's Aircraft Rescue and Fire Fighting (ARFF) building and other locations across the facility. This Project will allow the Airport to store and respond with the snow removal equipment and additional deicing materials from one centralized location. The site for the new SREB is adjacent to the ARFF building and air traffic control tower and across from Taxiway A at a location previously identified in the Airport Master Plan. The construction of the Project will include:

1. The construction of approx. 25,000-sf SREB with a maximum height of approximately 28 feet.
2. The construction of approx. 1,680-square-foot parking lot.
3. The construction of approx. 30,000-sf low impact development (LID) basin to manage stormwater runoff. (Per FAA requirements, water collected in the stormwater basin will be drained within 48 hours.)

The Project will also involve the paving of a small parking lot on the southwest side of the SREB. The parking lot will consist of nine parking spaces including an electric vehicle stall and an American with Disabilities Act (ADA) compliant space. Trenching will be necessary for utilities to connect to existing infrastructure from the southwestern corner of the proposed SREB, and the Project will relocate portions of existing fencing along the western side of the SREB.

**Connection to PBB Priorities and Objectives:**

Safe & Healthy Community

- Ensure the build environment is safe through the use of consistent standards, rules and regulations, and land use practices.
- Promote physical health through providing recreation opportunities, parks, open space & multiple transportation options.

Sustainable, Innovative Infrastructure

- Deliver outstanding services to residents through a healthy, well maintained infrastructure system.
- Provide effective management of the infrastructure for all modes of transportation.

**Connection to Regional Plan:**

**REGIONAL PLAN GOALS AND POLICIES --**

Goal T.10. Strengthen and expand the role of Flagstaff Pulliam Airport as the dominant hub for passenger, air freight, public safety flights, and other services in northern Arizona.

Policy T.10.1. Maintain and expand Flagstaff Pulliam Airport as an important link to the national air transportation system.

Policy T.10.3. Seek opportunities to expand destinations and frequency of regional air service throughout the southwest and west.

This Project will facilitate improved responsiveness to snowfall at the airport by reducing staff time needed to deploy snow removal equipment and improving access for equipment maintenance. The improved response to snow events will place the airport in a better position to support current airport operations, tenants, and air service, and will be a selling point for additional air service.

**Connection to Carbon Neutrality Plan:**

CLIMATE CHANGE AND ADAPTATION GOALS AND POLICIES -- This facility will be an all-electric, high performance green building (standards of the GSA) and be designed to meet the City of Flagstaff carbon neutrality goals.

**Connection to 10-Year Housing Plan:**

N/A

**Connection to Division Specific Plan:**

N/A

## FLAGSTAFF PULLIAM AIRPORT SNOW REMOVAL EQUIPMENT BUILDING PROJECT CONSTRUCTION MANAGER AT RISK

### DESIGN PHASE SERVICES Agreement No. 2024-114

This Design Phase Services Agreement (“Agreement”), made and entered by and between City of Flagstaff, a political subdivision of the State of Arizona (“Owner”) and Loven-Fann Joint Venture, an Arizona joint-venture (“Construction Manager at Risk” or “CMAR”) is entered into on this \_\_\_ day of \_\_\_\_\_, 20\_\_.

#### RECITALS

- A. The City Manager of the City of Flagstaff, Arizona, is authorized and empowered by provisions of the City Charter to execute agreements for professional services and construction services.
- B. The Owner intends to construct the **Flagstaff Pulliam Airport – Snow Removal Equipment Building Project**, as more fully described in Exhibit “A,” attached (“Project”).
- C. This Project is financed with grant funds primarily from by U.S. Department of Transportation, Federal Aviation Administration, Airport Improvement Program.
- D. To undertake the construction administration of the Project, the Owner has entered into separate agreements with APMI Architecture. (“Design Professional(s)”).
- E. CMAR has represented to the Owner the ability to provide design phase services the Project, and based on this representation, the Owner hereby engages CMAR to provide these services and design the Project.
- F. At the end of the design phase, at the Owner’s discretion, the Owner may enter into a separate Construction Phase Services Agreement with CMAR for construction phase services.

#### AGREEMENT

**NOW THEREFORE**, for and in consideration of the mutual covenants and considerations hereinafter contained, it is agreed by and between the Owner and CMAR as follows:

#### ARTICLE 1 - TERMS AND DEFINITIONS

“Addenda” - Written or graphic instruments issued prior to the submittal of the GMP Proposal(s), which clarify, correct or change the GMP Proposal(s) requirements.

“Agreement (Contract)” - This written document signed by the Owner and CMAR covering the design phase of the Project, and including other documents itemized and referenced in or attached to and made part of this Agreement.

“Alternate Systems Evaluations” - Alternatives for design, means and methods or other scope considerations that are evaluated using value engineering principles which have the potential to reduce construction costs while still delivering a quality and functional Project that meets the Owner requirements.

“Change Directive” - A written order prepared and signed by the Owner, directing a change in the Work prior to agreement on an adjustment in the Contract Price and the Contract Time.

“Change Order” - A type of contract amendment issued after execution of the Contract Documents where unanticipated or unforeseen circumstances in the Work have been encountered. Each Change Order shall be signed by the Owner and CMAR, stating their agreement upon all of the following: the addition, deletion or revision in the scope of services or Deliverables; the amount of the adjustment to the Contract Price; the amount of the adjustment to the Contract Time; or other modifications of other Agreement terms.

“City (Owner)” - The City of Flagstaff, a political subdivision of the State of Arizona, with whom CMAR has entered into this Agreement and for whom the services are to be provided pursuant to said Agreement.

“CMAR” - Loven Contracting, Inc. and Fann Contracting, Inc., as participants in the Loven-Fann Joint Venture, who have been selected by the Owner to provide design phase services as detailed in this Agreement.

“CMAR Representative” - The designated CMAR Representative.

“CMAR Senior Representative” - The designated CMAR Senior Representative.

“Construction Documents” - Certain plans, specifications and drawings prepared by the Design Professionals after correcting for permit review requirements or dated plans and specifications specifically identified as the “Construction Documents” herein or in an Exhibit or Addendum which is attached hereto.

“Construction Fee” - CMAR’s administrative costs for providing off-site management, supervision, General Conditions support, support of construction activities, home office overhead, and profit, as applicable to this Project, whether at CMAR’s principal or branch offices.

“Contingency, CMAR’s” - A fund to cover cost growth during the Project, legitimate unforeseen construction expenses, or expenses otherwise agreed to by the Owner to be used at the discretion of CMAR usually for costs that result from Project circumstances. The amount of CMAR’s Contingency shall be negotiated as a separate line item in each GMP package. Use and management of CMAR’s Contingency is described in this Agreement.

“Contingency, Owner’s” - A fund to cover cost growth during the Project used at the discretion of the Owner usually for costs that result from the Owner-directed changes or unforeseen Site conditions. The amount of the Owners’ Contingency shall be set solely by the Owner and shall be in addition to the CMAR’s GMP.

“Contract Documents” - The following items and documents in descending order of precedence executed by the Owner and CMAR: (i) all written modifications, amendments and Change Orders; (ii) this Agreement, including all exhibits and attachments; (iii) Construction Documents; and (iv) GMP Plans and Specifications.

“Contract Price” - The cost for services for this Agreement.

“Contract Time(s)” - The number of days or the dates related to the construction phase, including authorized adjustments, allotted in the Construction Documents for Substantial and final Completion of the Work, subject to Winter Shutdown.

“Cost Models” - Cost tabulation for the construction of the Project developed by the CMAR and continually updated throughout the preconstruction phase fee and utilized to develop the Guaranteed Maximum Price Proposal. The Cost Model is created using the Design Professionals list of standard pay items.

“Cost of the Work” - The direct costs necessarily incurred by CMAR in the proper performance of the Work. The Cost of the Work shall include direct labor costs, subcontract costs, costs of materials and equipment incorporated in the completed construction, costs of other materials and equipment, temporary facilities, permit and license fees, materials testing, and related items. The Cost of the Work shall not include CMAR’s Construction Fee, General Conditions Cost, bonds, insurance, or taxes.

“Critical Path Method” or “CMP” - A scheduling technique used to predict project duration by analyzing which sequence of activities has the least amount of scheduling flexibility thus identifying the path (sequence) of activities which represent the longest time required to complete the Project. Delay in completion of the identified activities shall cause a delay in achieving Substantial Completion.

“Day(s)” - Calendar days unless otherwise specifically noted in the Contract Documents.

“Deliverables, Construction Phase Services Agreement” - The Work conducted by CMAR during the construction phase which may include, but is not limited to: Construction Management Plan, Project Schedule, Schedule of Values, alternative system evaluations, procurement strategies and plans, cost models, construction market surveys, cash flow projections, GMP Proposals, Subcontractor procurement plan, Statement of Proposed Minority Business Enterprise/Women’s Business Enterprise (“MBE/WBE”) Utilization as may be required or appropriate, Subcontractor agreements, Subcontractor bid packages, Supplier agreements, and others as indicated in this Agreement or required by the Project Team and other services set forth in this Agreement or reasonably inferable therefrom.

“Deliverables, Design Phase Services Agreement” - The Work conducted by CMAR during the design phase which may include, but is not limited to: design recommendations, Project scheduling, constructability reviews, alternate systems evaluation, cost estimate, Minority Business Enterprise/Woman’s Business Enterprise/Small Business Enterprise (“MBE/WBE/SBE”) utilization, Subcontractor agreements, Subcontractor bid packages, GMP preparations and other services set forth in this Agreement or reasonably inferable therefrom.

“Design Professional(s)” - A qualified, licensed design professional who furnishes design, construction documents, and/or construction administration services required for the Project.

“Drawings (Plans)” - Documents, which visually represent the scope, extent and character of the Work to be furnished and performed by CMAR during the construction phase, and which have been prepared or approved by the Design Professional(s) and the Owner. Includes Drawings that have reached a sufficient stage of completion and released by the Design Professional(s) solely for the purposes of review and/or use in performing constructability or biddability reviews and in preparing cost models (e.g., conceptual design Drawings, preliminary design Drawings, detailed design Drawings at 30%, 60%, 90% or 100% or schematic, design development, construction documents), but *“not for construction”*. Shop Drawings are not Drawings as so defined.

“Differing Site Conditions” - Concealed or latent physical conditions or subsurface conditions at the Site that: (i) materially differ from the conditions indicated in the Contract Documents; or (ii) are of an unusual nature, differing materially from the conditions ordinarily encountered and generally recognized as inherent in the Work.

“Final Completion” - 100% completion of all construction Work noted in, or reasonably inferred from, the Contract Documents, including but not limited to, all Punch Lists work, all record and close-out documents specified in Owner’s Project specifications and Owner training/start up activities.

“Float” - The number of Days by which an activity can be delayed without lengthening the CMP and extending the Substantial Completion date.

“General Conditions Costs” - All on-site Project-specific costs required to perform the Work, but not itemized or included in the Cost of the Work. Includes, but is not limited to, the following types of costs for CMAR during the construction phase: (i) payroll costs for Project manager or CMAR for Work conducted at the Site, (ii) payroll costs for the superintendent and full-time general foremen, (iii) payroll costs for other management personnel resident and working at the Site, (iv) workers not included as direct labor costs engaged in support (e.g. loading/unloading, clean-up, etc.), (v) costs of offices and temporary facilities setup solely for this Project including office materials, office supplies, office equipment and minor expenses, (vi) cost of utilities, fuel, sanitary facilities and telephone services at the Site; (vii) costs of liability and other applicable insurance premiums not include in labor burdens for direct labor costs; (viii) costs of bonds premiums; (ix) costs of consultants not in the direct employ of CMAR or Subcontractors.

“Guaranteed Maximum Price” (“GMP”) - The sum of the maximum Cost of the Work; the Construction Fee, General Conditions Costs, taxes, and CMAR’s Contingency.

“GMP Plans and Specifications” - Plans and specifications upon which the Guaranteed Maximum Price Proposal is based.

“Grant Provisions” - This Project is financed with grant funds primarily from by U.S. Department of Transportation, Federal Aviation Administration, Airport Improvement Program.

“Guaranteed Maximum Price (GMP) Proposal” - The offer or proposal of CMAR submitted on the prescribed form setting forth the GMP prices for the entire Work or portions of the Work to be performed during the construction phase. The GMP Proposal(s) are to be developed pursuant to Article 2 of this Agreement.

“Legal Requirements” - All applicable federal, state and local laws, codes, ordinances, rules, regulations, orders and decrees of any government or quasi-government entity having jurisdiction over the Project or Site, the practices involved in the Project or Site, or any Work.

“Notice to Proceed” or “NTP” - The directive issued by the Owner, authorizing CMAR to start Work.

“Opening Physical Conditions” - The current physical conditions present on the Site as jointly documented by an inspection of the Site by Owner and CMAR at the Pre-construction Conference.

“Owner’s Representative” - The designated City Project Manager.

“Owner’s Senior Representative” - The City of Flagstaff’s designated Division/Department Head.

“Performance Period” - The period of time allotted in the Contract Documents to complete the Work comprised within a GMP. The Performance Period shall be stated with each GMP and shown on the Project Master Schedule.

“Payment Request” - The form used by CMAR in requesting progress payments or final payment and which shall include such supporting documentation as is required by the Contract Documents and or the Owner.

“Pre-construction Conference” - A Conference held between Owner and CMAR prior to the commencement of any Work, as scheduled by the Owner’s Representative or designee.

“Product Data” - Illustrations, standard schedules, performance charts, instructions, brochures, diagrams, and other information furnished by CMAR to illustrate materials or equipment for some portion of the Work.

“Project” - The Work to be completed in the execution of this Agreement, as amended, and as described in the Recitals above and in Exhibit “A” attached.

“Project Team” - The design phase services team consisting of the Design Professional(s), CMAR, the Owner’s Representative, the Owner’s Client Department representatives and other stakeholders who are responsible for making decisions regarding the Project.

“Schedule of Values (SOV)” - A statement furnished by CMAR to the Owner’s Representative for approval, reflecting the portions of the GMP allotted for the various parts of the Work and used as the basis for evaluating CMAR’s applications for progress payments.

“Shop Drawings” - All drawings, diagrams, schedules and other data specifically prepared for the Work by CMAR or a Subcontractor, Sub-Subcontractor, manufacturer, supplier or distributor to illustrate some portion of the Work.

“Site” - Land or premises on which the Project is located.

“Specifications” - The part(s) of the Contract Documents for the construction phase consisting of written technical descriptions of materials, equipment, construction systems, standards and workmanship, as applied to the Work, and certain administrative details applicable thereto.

“Subconsultant” - A person, firm or corporation having an agreement with CMAR to furnish services required as its independent professional associate or consultant with respect to the Project.

“Subcontractor” - An individual or firm having a direct agreement with CMAR or any other individual or firm having an agreement with the aforesaid contractors at any tier, who undertakes to perform a part of the design phase services or construction phase Work at the Site for which CMAR is responsible.

“Submittals” - Documents and/or things that may be produced or presented by one party for consideration, review, or such other actions as may be required by this Agreement by another party, entity or person. Examples of Submittals include, but are not limited to, preliminary or evolving drafts, product data samples, etc.

“Substantial Completion” - The construction services for the Work (or a specified part thereof) has progressed to the point where, in the opinion of the Owner’s Representative, as evidenced by a Certificate of Substantial Completion, such construction services are sufficiently complete in accordance with the Contract Documents, so that the Work (or specified part) can be utilized for the purposes for which it is intended; without any outstanding concurrent Work at the site, except as may be required to complete or correct Punch List items. If no such certificate is issued, Substantial Completion takes place when the construction services Work or a Construction Phase is complete and ready for final payment as evidenced by the written recommendation of final payment by the Owner’s Representative. The terms “substantially complete” and “substantially completed” as applied to all or part of the construction Work refers to Substantial Completion thereof.

“Supplier” - A manufacturer, fabricator, supplier, distributor, materialman or vendor having a direct agreement with CMAR or with any Subcontractor to furnish materials or equipment to be incorporated in the construction phase Work by CMAR or any Subcontractor.

“Winter Shutdown” - The period of time typically including December through March during which no Work will be performed by any person or entity (including, but not limited to, the CMAR) on the Project and CMAR shall shutdown, properly insulate and shelter the Project in a safe and workmanlike manner pursuant to local, state and federal laws. Although December through March is typically the time frame, the Owner reserves the right to initiate and terminate a Winter Shutdown at the Owner’s sole discretion in the event of adverse weather conditions. A Winter Shutdown may be declared by the Owner despite delays, *for any reason*, on the Project.

“Work” - The entire completed construction or the various separately identifiable parts thereof, required to be furnished during the construction phase. Work includes and is the result of performing or furnishing labor and furnishing and incorporating materials, resources and equipment into the construction, and performing or furnishing services and documents as required by the Contract Documents for the construction phase.

## **ARTICLE 2 – BASIC DESIGN PHASE SERVICES**

### **2.1 GENERAL**

2.1.1 CMAR, to further the interests of the Owner, shall perform the services required by, and in accordance with this Agreement, to the satisfaction of the Owner, exercising the degree of care, skill and judgment a professional construction manager performing similar services in Flagstaff, Arizona would exercise at such time, under similar conditions. CMAR shall, at all times, perform the required services consistent with sound and generally accepted construction management and construction contracting practice.

2.1.2 Program Evaluation. As a participating member of the Project Team, CMAR shall provide to the Owner and Design Professional(s) a written evaluation of the Owner’s Project Program and Project Budget, each in terms of the other, with recommendations as to the appropriateness of each.

- 2.1.3 Project Meetings. CMAR shall attend Project Team meetings which may include, but are not limited to, monthly Project management meetings, Project workshops, special Project meetings, construction document rolling reviews and partnering sessions.
- 2.1.4 CMAR shall provide design phase services, described herein, in a proactive manner and consistent with the intent of the most current Drawings and Specifications. CMAR shall promptly notify the Owner in writing whenever CMAR determines that any Drawings or Specifications are inappropriate for the Project and/or cause changes in the scope of Work requiring an adjustment in the cost models, Project Schedule, GMP Proposals and/or in the Contract Time for the Work, to the extent such are established.
- 2.1.5 CMAR, when requested by the Owner, shall attend, make presentations and participate as may be appropriate in public agency and or community meetings, germane to the Project. CMAR shall provide drawings, schedule diagrams, budget charts and other materials describing the Project, when their use is required or apropos in any such public agency meetings.

## **2.2 CONSTRUCTION MANAGEMENT PLAN**

- 2.2.1 CMAR may, and at the written request of the Owner, shall prepare a Construction Management Plan ("CMP"), which, at the written request of the Owner, shall include CMAR's professional opinions concerning: (a) Project milestone dates and the Project Schedule, including the broad sequencing of the design and construction of the Project, (b) investigations, if any, to be undertaken to ascertain subsurface conditions and physical conditions of existing surface and subsurface facilities and underground utilities, (c) alternate strategies for fast-tracking and/or phasing the construction, (d) the number of separate subagreements to be awarded to Subcontractors and Suppliers for the Project construction, (e) permitting strategy, (f) safety and training programs, (g) construction quality control, (h) a commissioning program, (i) the cost models and basis of the GMP Proposal, and (j) a matrix summarizing each Project Team member's responsibilities and roles.
- 2.2.2 CMAR may, and at the written request of the Owner, shall add detail to its previous version of the CMP to keep it current throughout the design phase, so that the CMP is ready for implementation at the start of the construction phase. The update/revisions may, and at the written request of the Owner shall, take into account (a) revisions in Drawings and Specifications; (b) the results of any additional investigatory reports of subsurface conditions, drawings of physical conditions of existing surface and subsurface facilities and documents depicting underground utilities placement and physical condition, whether obtained by the Owner, Design Professional(s) or CMAR, (c) unresolved permitting issues, and significant issues, if any, pertaining to the acquisition of land and right of way, (d) the fast-tracking if any of the construction, or other chosen construction delivery methods, (e) the requisite number of separate bidding documents to be advertised, (f) the status of the procurement of long-lead time equipment (if any) and/or materials, and (g) funding issues identified by the Owner.

## **2.3 PROJECT MASTER SCHEDULE**

- 2.3.1 The fundamental purpose of the "Project Master Schedule" is to identify, coordinate and record the tasks and activities to be performed by all of the Project Team members and then for the Project Team to utilize that Deliverable as a basis for managing and monitoring all member's compliance with the schedule requirements of the Project. Each Project Team member is responsible for its compliance with the Project Master Schedule requirements. CMAR shall develop and maintain the "Project Master Schedule" on behalf of and to be used by the Project Team based on input from the other Project Team members. The Project Master Schedule shall be consistent with the most recent revised/updated CMP. The Project Master Schedule shall use the Critical Path Method (CPM) technique, unless required otherwise, in writing by the Owner. CMAR shall use scheduling software to develop the Project Master Schedule that is acceptable to the Owner. The Project Master Schedule shall be presented in graphical and tabular reports as agreed upon by the Project Team. If Project phasing as described below is required, the Project Master Schedule shall indicate milestone dates for the phases once determined.
- 2.3.2. The Project Master Schedule shall include a CPM diagram schedule that shall show the sequence of activities, the interdependence of each activity and indicate the CPM.

- 2.3.2.1 The CPM diagram schedule shall be in Days and indicate duration, earliest and latest start and finish dates for all activities, and total Float times for all activities except critical activities. The CPM diagram schedule shall be presented in a time scaled graphical format for the Project as a whole.
- 2.3.2.2 The CPM diagram schedule shall indicate all relationships between activities.
- 2.3.2.3 The activities making up the CPM diagram schedule shall be in sufficient detail to assure that adequate planning has been done for proper execution of the Work and such that it provides an appropriate basis for monitoring and evaluating the progress of the Work. Formulation of the Project Master Schedule must also be based on the Opening Physical Conditions of the Site and any potential Winter Shutdown in the event the Work on the Project is delayed for any reason.
- 2.3.2.4 The CPM diagram schedule shall be based upon activities, which would coincide with the schedule of values.
- 2.3.2.5 The CPM diagram schedule shall show all Submittals associated with each work activity and the review time for each submittal.
- 2.3.2.6 The CPM diagram schedule shall show milestones, including milestones for Owner-furnished information, and shall include activities for Owner-furnished equipment and furniture when those activities are interrelated with CMAR activities.
- 2.3.2.7 The schedule shall include a CPM activity that reflects anticipated weather delay during the performance of this Agreement. The duration shall reflect the average climatic range and usual industrial conditions prevailing in the locality of the Site. Weather data shall be based on the information set forth on the City of Flagstaff's Table of "Monthly Anticipated Adverse Weather Calendar Days" Exhibit "D" attached, and the explanatory paragraphs attached thereto.
- 2.3.3 The Project Schedule shall consider the Owner's and the tenants' occupancy requirements showing portions of the Project having occupancy priority, and Contract Time.
- 2.3.4 Float time shall be as prescribed below:
  - 2.3.4.1 The total Float within the overall schedule, is not for the exclusive use of either the Owner or CMAR, but is jointly owned by both and is a resource available to and shared by both parties as needed to meet Agreement milestones and the Project completion date.
  - 2.3.4.2 CMAR shall not sequester shared Float through such strategies as extending activity duration estimates to consume available Float, using preferential logic, or using extensive crew/resource sequencing, etc. Since Float time within the schedule is jointly owned, no time extensions shall be granted nor delay damages paid until or unless a delay occurs which extends the Work beyond the Substantial Completion date.
  - 2.3.4.3 Since Float time within the schedule is jointly owned, it is acknowledged that the Owner-caused delays on the Project may be offset by Owner-caused time savings (e.g., CPM Submittals returned in less time than allowed by the Agreement, approval of substitution requests and credit changes which result in savings of time to CMAR, etc.). In such an event, CMAR shall not be entitled to receive a time extension or delay damages until all Owner-caused time savings are exceeded, and the Substantial Completion date is also exceeded.
- 2.3.5 The Project Schedule shall be updated and maintained by CMAR throughout the design phase such that it shall not require major changes at the start of the construction phase to incorporate CMAR's plan for the performance of the construction phase Work. CMAR shall provide updates and/or revisions to the Project Schedule for use by the Project Team, whenever required, but no less often than at the monthly Project Team meetings. CMAR shall include with such Submittals a narrative describing its analysis of the progress achieved to-date vs. that planned, any concerns regarding delays or potential delays, and any recommendations regarding mitigating actions.

2.3.6 If phased construction is deemed appropriate and the Owner and Design Professional(s) approve, CMAR shall review the design and make recommendations regarding the phased issuance of Construction Documents to facilitate phased construction of the Work, with the objective of reducing the Project Schedule and/or Cost of the Work. CMAR shall take into consideration such factors as natural and practical lines of Work severability, sequencing effectiveness, access and availability constraints, total time for completion, construction market conditions, labor and materials availability, and any other factors pertinent to saving time and cost.

## **2.4 DESIGN DOCUMENT REVIEWS**

2.4.1 CMAR shall evaluate periodically the availability of labor, materials/equipment, building systems, cost-sensitive aspects of the design; and other factors that may impact the cost models, GMP Proposals and/or the Project Master Schedule.

2.4.2 CMAR shall recommend, in conjunction with the Project Team, those additional surface and subsurface investigations that, in its professional opinion, are required to provide the necessary information for CMAR to construct the Project. Before initiating construction operations, CMAR may request additional investigations in their GMP Proposal to improve the adequacy and completeness of the Site condition information and data made available with the Construction Documents.

2.4.3 CMAR shall meet with the Project Team, as required, to review designs during their development. CMAR shall familiarize itself with the evolving documents through the various design phases. CMAR shall proactively advise the Project Team and make recommendations on factors related to construction costs, and concerns pertaining to the feasibility and practicality of any proposed means and methods, selected materials, equipment and building systems, and, labor and material availability. CMAR shall advise the Project Team on proposed Site improvements, excavation and foundation considerations, as well as, concerns that exist with respect to coordination of the Drawings and Specifications. CMAR shall recommend cost effective alternatives.

2.4.4 CMAR shall conduct constructability and bidability reviews of the Drawings and Specifications as necessary to satisfy the needs of the Project Team and at a minimum as scheduled and identified by milestones in the Project Master Schedule. The reviews shall attempt to identify all discrepancies and inconsistencies in the Construction Documents especially those related to clarity, consistency, and coordination of Work of Subcontractors and Suppliers.

2.4.4.1 Constructability Reviews. CMAR shall evaluate whether (a) the Drawings and Specifications are configured to enable efficient construction, (b) design elements are standardized, (c) construction efficiency is properly considered in the Drawings and Specifications, (d) module/preassembly design are prepared to facilitate fabrication, transport and installation, (e) the design promotes accessibility of personnel, material and equipment and facilitates construction under adverse weather conditions, (f) sequences of Work required by or inferable from the Drawings and Specifications are practicable, and (g) the design has taken into consideration, efficiency issues concerning; access and entrance to the Site, laydown and storage of materials, staging of Site facilities, construction parking, and other similar pertinent issues.

2.4.4.2 Bidability Reviews. CMAR shall check cross-references and complementary Drawings and sections within the Specifications, and in general evaluate whether (a) the Drawings and Specifications are sufficiently clear and detailed to minimize ambiguity and to reduce scope interpretation discrepancies, (b) named materials and equipment are commercially available and are performing well or otherwise, in similar installations, (c) Specifications include alternatives in the event a requirement cannot be met in the field, and (d) in its professional opinion, the Project is likely to be subject to differing Site conditions.

2.4.4.3 Results of the reviews shall be provided to the Owner in formal, written reports clearly identifying all discovered discrepancies and inconsistencies in the Drawings and Specifications with notations and recommendations made on the Drawings, Specifications and other documents. If requested by the Owner, CMAR shall meet with the Owner and Design Professional(s) to discuss any findings and review reports.

- 2.4.4.4 CMAR's reviews shall be from a contractor's perspective, and though it shall serve to reduce the number of Requests for Information (RFI) and changes during the construction phase, responsibility for the Drawings and Specifications shall remain with the Design Professional(s) and not CMAR.
- 2.4.5 Notification of Variance or Deficiency. It is CMAR's responsibility to assist the Design Professional(s) in ascertaining that, in CMAR's professional opinion, the Construction Documents are in accordance with applicable laws, statutes, ordinances, building codes, rules and regulations. If CMAR recognizes that portions of the Construction Documents are at variance with applicable laws, statutes, ordinances, building codes, rules and regulations, it shall promptly notify the Design Professional(s) and Owner in writing, describing the apparent variance or deficiency. However, the Design Professional(s) is ultimately responsible for the compliance with those laws, statutes, ordinances, building codes, rules and regulations.
- 2.4.6 Alternate Systems Evaluations. The Project Team shall routinely identify and evaluate using value engineering principles any alternate systems, approaches, design changes that have the potential to reduce Project costs while still delivering a quality and functional product. If the Project Team agrees, CMAR in cooperation with the Design Professional(s) shall perform a cost/benefit analysis of the alternatives and submit such in writing to the Project Team. The Project Team shall decide which alternatives shall be incorporated into the Project. The Design Professional(s) shall have full responsibility for the incorporation of the alternatives into the Drawings and Specifications. CMAR shall include the cost of the alternatives into the cost models and any GMP Proposals.

## **2.5 COST MODEL**

- 2.5.1 Unless otherwise agreed by both parties, within fourteen (14) days after receipt of the documents for the various phases of design, CMAR shall develop a detailed Cost Model for the entire Project for review by the Owner and the Design Professional(s). The Cost Model shall be prepared in a format agreed upon in advance by the Owner and the CMAR. It will be based on the Design Professional(s)' list of standard pay items.
- 2.5.2 During the review period, the Cost Model will be compared with the estimates prepared by the CMAR and the Owner. The Design Professional(s) and CMAR shall reconcile any disagreements on the estimate to arrive at an agreed cost. If no consensus is reached, the Owner shall make the final determination. Once approved by the Owner, the Cost Model will be continually updated and kept current as the design progresses throughout the Preconstruction Phase until a GMP is agreed upon by both the CMAR and the Owner.
- 2.5.3 The Cost Model shall not include the CMAR's preconstruction services fee, sums due to CMAR, the cost of land, right of way, or other costs which are the responsibility of the Owner. The CMAR shall communicate to the Project Team any assumptions made in preparing the Cost Model.
- 2.5.4 Each Cost Model submitted shall be accompanied by backup documentation which shall include, but not be limited to the following:
- 2.5.4.1 Unit prices and quantity take-offs using the Design Professional(s)' standard pay items;
  - 2.5.4.2 Details of all allowances and unit price work shown and specified in the detailed design documents;
  - 2.5.4.3 Include a list of all assumptions and description and breakdown of all allowances;
  - 2.5.4.4 Material costs, equipment costs, labor costs, General Conditions costs, hourly labor rates, and total cost;
  - 2.5.4.5 Copies of quotations from subcontractors and suppliers;
  - 2.5.4.6 Portion of the work to be performed by subcontractors including subcontractors overhead and profit;

- 2.5.4.7 Production rates, transportation, and other facilities and services necessary for the proper execution of the work, whether temporary or permanent, and whether or not incorporated or to be incorporated into the work;
  - 2.5.4.8 All fixed equipment, site improvements, utility and equipment installations;
  - 2.5.4.9 Project overhead;
  - 2.5.4.10 Allocated general and administrative expenses;
  - 2.5.4.11 Bonds, taxes, insurance;
  - 2.5.4.12 The CMAR's profit; and
  - 2.5.4.13 Memoranda, narratives, reports, and all other information included by the CMAR to arrive at the price shown in the Cost Model or GMP.
- 2.5.5 If any Cost Model submitted to the Owner exceeds previously accepted Cost Models or the Owner's Project budget, CMAR shall make appropriate recommendations on methods and materials to the Owner and Design Professional(s) that CMAR believes shall bring the Project back into the Project budget.
- 2.5.6 In between these milestone estimates, CMAR shall periodically provide a tracking report, which identifies the upward or downward movements of costs due to value engineering or scope changes. It shall be the responsibility of CMAR to keep the Owner and Design Professional(s) informed as to the major trend changes in costs relative to the Owner's budget.
- 2.5.7 If requested by the Owner, CMAR shall prepare a preliminary "cash flow" projection based upon historical records of similar type projects to assist the Owner in the financing process.

**2.6 SECTION LEFT INTENTIONALLY BLANK**

**2.7 GUARANTEED MAXIMUM PRICE (GMP) PROPOSALS**

- 2.7.1 The proposed GMP for the entire Work (or portions thereof) shall be presented in a format acceptable to the Owner and utilizing the formulas as shown in Exhibit "C" attached. The Owner may request a GMP Proposal for all or any portion of the Project and at any time during the design phase. Any GMP Proposals submitted by CMAR shall be based on and consistent with the current update/revised cost model at the time of the request and shall include any clarifications or assumptions upon which the GMP Proposal(s) are based. CMAR guarantees to complete the Project at or less than the final approved GMP Proposal amount, plus approved Change Orders, and agrees that it shall be responsible for any increase in the actual cost of the Work above that amount.
- 2.7.2 The Contract Price is the sum of the GMP and the Owner's Contingency. The Contract Price is comprised of the following actual costs and is a not-to-exceed, reimbursable amount.
- 2.7.2.1 The General Conditions will be included in the GMP as a not-to-exceed, reimbursable amount paid for on actual costs based on submitted and approved invoices.
  - 2.7.2.2 The Construction Fee is a firm fixed lump sum and shall be paid monthly in accordance with the percentage of completion of the work.
  - 2.7.2.3 Bonds are actual costs and are a not-to-exceed reimbursable amount.
  - 2.7.2.4 Insurance is actual costs and is a not-to-exceed reimbursable amount.

- 2.7.2.5 Taxes are deemed to include all sales, use, consumer and other taxes, which are legally enacted when negotiations of the GMP were concluded, whether or not yet effective, or merely scheduled to go into effect. Taxes are actual costs and are a not-to-exceed reimbursable amount.
- 2.7.2.6 CMAR's Contingency is an amount CMAR may use at its sole discretion for increases in the Cost of the Work, legitimate unforeseen construction expenses, or expenses otherwise agreed to by the Owner, and for increases in General Condition Costs with written approval of the Owner. CMAR's Contingency shall be included in the GMP amount provided by the CMAR, but all appropriate markups shall not be applied to the CMAR's Contingency at the time of GMP submission. At the time that the CMAR's Contingency is used the appropriate markups shall be applied, which shall only include Construction Fees, Bonds, Insurance, and Sales Tax. CMAR shall submit a Field Order Proposal, with supporting itemized schedule and pricing documentation, for Owner review and confirmation of appropriate CMAR's Contingency use for the project and for verification that appropriate markups are applied. The Owner has the authority to reject any use of the CMAR's Contingency if the Owner believes in its reasonable judgement that a portion or all the proposed amount is not a legitimate expense for the Project.
- 2.7.2.7 Owner's Contingency are funds to be used at the sole discretion of the Owner to cover any increases in Project costs that result from Owner directed changes or unforeseen Site conditions. Owner's Contingency shall be added to the GMP amount provided by the CMAR, the sum of which shall be the Contract Price for construction. At the time that Owner's Contingency is used, the appropriate markups shall be applied and shall only include Construction Fees, Bonds Insurance, and Sales Tax.
- 2.7.3 GMP amendments are cumulative except for CMAR's Contingency. The amount of CMAR's Contingency for each GMP shall be negotiated separately.
- 2.7.4 CMAR, in preparing any GMP Proposal, shall obtain from the Design Professional(s), three (3) sets of signed, sealed, and dated plans and specifications (including all addenda). CMAR shall prepare its GMP in accordance with the Owner's request for GMP Proposal requirements based on the most current completed plans and specifications at that time. CMAR shall mark the face of each document of each set upon which its proposed GMP is based. These documents shall be identified as the GMP Plans and Specifications. CMAR shall send one set of those documents to the Owner's Representative, keep one set and return the third set to the Design Professional(s).
- 2.7.5 An updated/revised Project Master Schedule shall be included with any GMP Proposal(s) that reflects the GMP Plans and Specifications. Any such Project Master Schedule updates/revisions shall continue to comply with the requirements of Section 2.3 above.
- 2.7.6 The Project Master Schedule required above shall include a preliminary Construction Schedule developed in a CPM with the first requested GMP. If subsequent GMP's are requested, CMAR shall include an updated CPM Construction Schedule with their GMP submittal.
- 2.7.7 GMP savings resulting from a lower actual Project cost than anticipated by CMAR remaining at the end of the project, shall revert to the Owner.
- 2.7.8 GMP Proposal(s) Review and Approval Process
- 2.7.8.1 The Owner may request a GMP from CMAR at any time during the performance of the design phase services. It is the Owner's expectation that the GMP shall not exceed the Owner-stated Project budget.
- 2.7.8.2 CMAR shall meet with the Owner and Design Professional(s) to review the GMP Proposal(s) and the written statement of its basis. In the event the Owner or Design Professional(s) discovers inconsistencies, inaccuracies or confusion in the information presented, CMAR shall make adjustments as necessary to the GMP Proposal, its basis or both.
- 2.7.8.3 CMAR's detailed cost model and GMP shall be reviewed by the Design Professional(s) and the Owner for reasonableness and compatibility with the Owner's Project and the Owner's budget. CMAR shall provide a response to the Design Professional(s) and Owner's questions and an explanation of

differences between the Owner's Project budget and CMAR's cost model and corresponding GMP. Owner may require that such responses and explanations be submitted in writing. CMAR, Owner and Design Professional(s) shall engage in a mutually agreeable process in an effort to achieve a clearly understood mutually acceptable GMP.

- 2.7.8.4 If the GMP exceeds the Owner's Project budget, the Owner reserves the right to direct CMAR (and CMAR shall) work in conjunction with the Design Professional(s) to assist in the redesign of the Project as necessary to meet the agreed upon program and the stated Project budget as follows:
  - 2.7.8.4.1 After direction from the Owner, CMAR shall coordinate and cooperate with the Project Team to assist the Design Professional(s) in altering and re-drafting Construction Documents as necessary to accomplish the required reduction in cost.
  - 2.7.8.4.2 CMAR shall develop and provide to the Owner a GMP in connection with the altered Construction Documents to accomplish the necessary reductions in cost.
  - 2.7.8.4.3 CMAR shall analyze the Design Professional(s)' original submittal and as altered and redrafted Construction Documents and make recommendations to the Owner as to ways and methods to reduce the costs of constructing the Project to a sum which does not exceed the stated Project budget.
  - 2.7.8.4.4 CMAR shall perform the work set forth in this Agreement without additional compensation.
  - 2.7.8.4.5 The Owner, upon receipt of any GMP proposal from CMAR, may submit the GMP Plans and Specifications to a third-party for review and verification.
- 2.7.8.4 If the GMP Proposal is greater than the third-party estimate or if the Owner, for some other stated reason may desire, the Owner may require CMAR to reconfirm its GMP Proposal. CMAR shall accept the third-party's estimate for the cost of Work as part of its GMP Proposal or present a report within seven (7) days of a written request by the Owner for such a report identifying, explaining, and substantiating the differences and/or explaining other concerns the Owner may raise. CMAR may be requested to, or at its own discretion, submit a revised GMP Proposal for consideration by the Owner.
- 2.7.8.5 If during the review and negotiation of GMP Proposals design changes are required, the Owner shall authorize and cause the Design Professional(s) to revise the Construction Documents to the extent necessary to reflect the agreed-upon assumptions and clarifications contained in the final approved GMP Proposal. Such revised Construction Documents shall be furnished to CMAR. CMAR shall promptly notify the Design Professional(s) and Owner in writing if any such revised Construction Documents are inconsistent with the agreed-upon assumptions and clarifications.
- 2.7.8.6 After final submission of the GMP Proposal, the Owner may do any of the following:
  - 2.7.8.7.1 Accept the CMAR original or revised GMP Proposal, if within the Owner's budget, without comment;
  - 2.7.8.7.2 Accept the CMAR original or revised GMP Proposal that exceeds the Owner's budget, and indicate in writing to CMAR that the Project Budget has been increased to fund the differences; or
  - 2.7.8.7.3 Reject the CMAR original or revised GMP Proposal in which event, the Owner may terminate this Agreement and/or elect to not enter into a separate Agreement with CMAR for the construction phase services associated with the scope of Work reflected in the GMP Proposal.
- 2.7.8.7 Upon acceptance by the Owner of a GMP Proposal, the Owner shall prepare, and CMAR shall execute, the Owner's specified form of Agreement to reflect the GMP, and the GMP as approved shall become part of the Construction Services Agreement. Within ten (10) days after execution of the Construction Services Agreement, CMAR shall provide to the Procurement Section a Performance Bond and a Labor and Material Payment Bond, each for 100% of the full Agreement price.

## **2.8 SUBCONTRACTORS AND MAJOR SUPPLIERS SELECTION**

- 2.8.1 There are three (3) ways to select Subcontractors and Major Suppliers prior to submission of any GMP Proposal. They are:
- 2.8.1.1 A combination of qualifications and price derived through competitive bidding.
  - 2.8.1.2 Qualitative selection with the subsequent negotiation of a price that is reasonable, a prudent use of public funds and in the Owner's best interest.
  - 2.8.1.3 Absent special circumstances documented in writing by CMAR as set forth below, the combination of qualifications and price derived through the competitive bidding process shall be used to select Subcontractors and Major Suppliers. The Owner has the sole discretion as to whether to allow the purely qualitative selection of Subcontractors and Major Suppliers. In any event, CMAR shall ensure compliance with A.R.S. § 34-603 et seq.
- 2.8.2 The Owner may approve the selection of Subcontractors and Major Suppliers based only on their qualifications when CMAR can demonstrate, in writing, that it is in the best interest of the Project and that the selection process shall constitute a prudent use of public funds.
- 2.8.2.1 A purely qualification-based selection of Subcontractors and Major Suppliers shall only occur prior to the submittal of any applicable GMP Proposal.
  - 2.8.2.2 CMAR shall prepare a Subcontractor and Supplier selection plan and submit the plan to the Owner for approval. CMAR shall apply the plan in the evaluation of the qualifications of Subcontractors and Major Suppliers and provide the Owner with its review and recommendation.
  - 2.8.2.3 CMAR shall obtain Owner approval of the selected Subcontractors and Major Suppliers. If CMAR is to self-perform under this alternative, CMAR shall submit a detailed explanation and demonstration of the cost of the Work it shall self-perform. CMAR shall further provide documentation to demonstrate that for any Work that is self-performed, the cost of any such Work is a reasonable and prudent use of public funds. The Owner shall approve CMAR self-performance of any part of the Work and the cost therefore prior to accepting any GMP Proposal.
  - 2.8.2.4 CMAR shall negotiate costs for services/supplies from each of the Subcontractors and Major Suppliers selected under this method.
  - 2.8.2.5 Within three (3) days of negotiating cost for services/supplies from all Subcontractors and Major Suppliers selected under this method, CMAR shall then prepare a report for the Owner's approval identifying the recommended Subcontractors and Major Suppliers for each category of the Work to be performed. The report shall be in a format approved by the Owner's Representative and shall include, among other things, the amount of each such cost. CMAR shall, at its discretion or at the request of the Owner's Representative, request written verification of any costs selected. CMAR shall provide an explanation of the qualifying factors for each selection.
- 2.8.3 In all other cases, CMAR shall select Subcontractors and Major Suppliers pursuant to the following process, which includes a combination of qualifications and price, derived through competitive bidding or as may otherwise be agreed in writing by the parties. CMAR shall ensure that any such process is fully compliant with Arizona law.
- 2.8.3.1 CMAR shall develop the interest of Subcontractors and Major Suppliers, submit the names of a minimum of three (3) qualified Subcontractors and Major Suppliers selected pursuant to a qualifications-based procedure, for each trade in the Project for approval by the Owner and solicit bids for the various construction categories. If there are not three (3) qualified Subcontractors or Major Suppliers available for a specific trade or there are extenuating circumstances warranting such, CMAR may request approval by the Owner to submit less than three (3) names. Without prior written approval by the Owner, no change in the Owner-approved Subcontractors shall be allowed.

- 2.8.3.2 If CMAR desires to self-perform certain portions of the Work, it shall comply with, and be subject to, the requirements set forth in this Agreement.
- 2.8.3.3 If the Owner objects to any nominated Subcontractors and Major Suppliers to any nominated self-performed Work for good reason, CMAR shall nominate substitute Subcontractors or Major Suppliers.
- 2.8.3.4 CMAR shall distribute drawings and specifications, and when appropriate, conduct a pre-bid conference with prospective Subcontractors and Major Suppliers.
- 2.8.3.5 CMAR shall receive, open, record and evaluate the bids. The apparent low bidders shall be interviewed to determine the responsiveness of their proposals. In evaluating the responsiveness of bid proposals, CMAR, in addition to bid price, shall consider the following factors: past performance on similar projects, qualifications and experience of personnel assigned, quality management plan, approach or understanding of the Work to be performed, and performance schedule to complete the Work. The final evaluation of Subcontractors' and Major Suppliers' bids shall be done with the Owner representative in attendance to observe and witness the process. CMAR shall resolve any Subcontractors' or Major Suppliers' bid withdrawal, protest or disqualification in connection with the award at no increase in the cost of the Work.
- 2.8.4 Upon completion of the Subcontractors or Major Suppliers' selection process, CMAR shall submit a summary report to the Owner of the entire Subcontractor selection process, including, the selected Subcontractors for each category of Work. The report shall indicate, by bid process, all Subcontractors contacted to determine interest, the Subcontractors solicited, the bids received and costs negotiated, compliance with Arizona law.
- 2.8.5 The selected Subcontractors and Major Suppliers shall provide a schedule of values, which shall be used to create the overall Project schedule of values.
- 2.8.6 CMAR shall contract with only Subcontractors and Major Suppliers who are duly licensed in Arizona and qualified to perform the Work per the requirements of the Contract Documents.
- 2.8.7 Regardless of the selection procedure, CMAR is responsible for ensuring that the costs of the Subcontractor's and Major Supplier's services are reasonable and a prudent use of public funds.
- 2.8.8 Regardless of the selection procedure, and in any case, CMAR is solely responsible for the cost and performance of the selected Subcontractors and Major Suppliers. The Owner's approvals under this Agreement are not, and shall not, be construed to be a waiver, in part or in whole, of CMAR's responsibility and obligation to perform as set forth in this Agreement or any subsequent construction agreement or GMP and for the cost, or less than the cost, set forth in any GMP to which the parties agree.

### **ARTICLE 3 - PERIOD OF SERVICES**

- 3.1 The design phase services described in this Agreement shall be performed by CMAR in accordance with the most current updated/revised Project Master Schedule. Failure on the part of CMAR to adhere to the Project Master Schedule requirements for activities for which it is responsible shall be sufficient grounds for termination of this Agreement by the Owner.
  - 3.1.1 If CMAR fails to adhere to the approved Project Master Schedule, the Owner may provide written notice to CMAR that it intends to terminate this Agreement unless the problem cited is cured, or commenced to be cured, within three (3) days of CMAR's receipt of such notice.
- 3.2 If the date of performance of any obligation or the last day of any time period provided for herein should fall on a Saturday, Sunday, or holiday for the Owner, then said obligation shall be due and owing, and said time period shall expire, on the first day thereafter which is not a Saturday, Sunday or legal City holiday. Except as may otherwise be set forth herein, any performance provided for herein shall be timely made if completed no later than 4:00 p.m. (Flagstaff time) on the day of performance.

## ARTICLE 4 - CONTRACT PRICE AND PAYMENTS

### 4.1 CONTRACT PRICE

4.1.1 The Owner shall pay CMAR a Contract Price for the design phase services Work as proposed by CMAR and accepted by the Owner:

Basic Design Phase Services	\$ 700,000.00
Additional Design Phase Services	\$ 0.00
Total Design Phase Services Agreement Contract Price Not to Exceed	\$ 700,000.00

### 4.2 PAYMENTS

4.2.1 Requests for monthly payments by CMAR for design phase services shall be submitted on the Owner's "Contract Payment Request" form and shall be accompanied by a progress report, detailed invoices and receipts, if applicable. Any requests for payment shall include, as a minimum, a narrative description of the tasks accomplished during the billing period, a listing of any Deliverables submitted, and copies of any Subconsultants' requests for payment, plus similar narrative and listings of Deliverables associated with their Work. Payment for services negotiated as a lump sum shall be made in accordance with the percentage of Work completed during the preceding month. Services negotiated as a not-to-exceed fee shall be paid in accordance with the Work effort expended on that service during the preceding month.

4.2.2 Fees for CMAR and any Subconsultants shall be based upon the Hourly Rate Schedule included as Exhibit "B" attached hereto.

4.2.3 CMAR shall pay all sums due Subconsultants for services and reimbursable expenses within fourteen (14) calendar days after CMAR has received payment for those services from the Owner.

4.2.4 CMAR agrees that no charges or claims for costs or damages of any type shall be made by it for any delays or hindrances beyond the reasonable control of the Owner during the progress of any portion of the services specified in this Agreement. Such delays or hindrances, if any, shall be solely compensated for by an extension of time for such reasonable period as may be mutually agreed between the parties. It is understood and agreed, however, that permitting CMAR to proceed to complete any services, in whole or in part after the date to which the time of completion may have been extended, shall in no way act as a waiver on the part of the Owner of any of its legal rights herein.

4.2.5 No compensation to CMAR shall be allowed contrary to Article I, Chapter I, Title 34 of the Arizona Revised Statutes.

4.2.6 If any service(s) executed by CMAR is delayed or suspended in whole or in part, for a period of more than one hundred eighty (180) days through no fault of CMAR, CMAR shall be paid for the services performed prior to the delay or suspension.

4.2.7 In no event shall the Owner pay more than ninety percent (90%) of the Contract Price until final acceptance of all design phase services, and award of the final approved GMP for the entire Project by City Council.

### 4.3 ADDITIONAL DESIGN PHASE SERVICES

4.3.1 CMAR may be required to provide services in excess of those identified in this Agreement. Mark-ups are not authorized and only the reimbursables specifically identified below shall be reimbursed as authorized herein. Any additional services shall be requested by the Owner, in writing, prior to the delivery of said services. There shall be no payment by the Owner for any additional services provided prior to or without the written request of the Owner for said services.

- 4.3.2 When authorized by the Owner, CMAR shall be entitled to reimbursement at cost of design phase services related expenses incurred for the following items:
  - 4.3.2.1 Reasonable charges for air transportation (not to exceed standard coach rates), ground travel (for automobile rental, taxi, parking, etc. not to exceed \$50 per day), and authorized expenses while traveling (not to exceed the corporate rate at major business hotels in the area and a per diem for meal and miscellaneous business expenses of \$45) shall be reimbursed. CMAR shall provide detailed receipts for all reimbursable charges. Travel expenses shall not exceed \$0.00 without further approval of the Owner.
  - 4.3.2.2 Non-overhead printing expenses incurred including the printing of Construction Documents for bidding, courier services or other Project-related services that may be requested by the Owner. The cost of such service shall not exceed \$ 0.00 (reimbursable allowance) without further approval by the Owner.

## **ARTICLE 5 - OWNER'S RESPONSIBILITIES**

- 5.1 The Owner, at no cost to CMAR, shall furnish the following information:
  - 5.1.1 One (1) copy of data the Owner determines pertinent to the work. However, CMAR shall be responsible for searching the records and requesting information it deems reasonably required for the Project.
  - 5.1.2 All available data and information pertaining to relevant policies, standards, criteria, studies, etc.
  - 5.1.3 The name of the person designated to be the Owner's representative during the term of this Agreement. The Owner's Representative has the authority to administer this Agreement and shall monitor CMAR's compliance with all terms and conditions stated herein. All requests for information from or decisions by the Owner on any aspect of the work or Deliverables shall be directed to the Owner's Representative.
- 5.2 The Owner additionally shall:
  - 5.2.1 Contract separately, with one or more Design Professional(s), to provide architectural and/or engineering design services for the Project. The scope of services for the Design Professional(s) shall be provided to CMAR for its information. CMAR shall have no right, to limit or restrict any changes of such services that are otherwise mutually acceptable to the Owner and Design Professional(s).
  - 5.2.2 Supply, without charge, all necessary copies of programs, reports, drawings, and specifications reasonably required by CMAR except for those copies whose cost has been reimbursed by the Owner.
  - 5.2.3 Provide CMAR with adequate information in its possession or control regarding the Owner's requirements for the Project.
  - 5.2.4 Give prompt written notice to CMAR when the Owner becomes aware of any default or defect in the Project or non-conformance with the Drawings and Specifications, or any of the services required hereunder. Upon notice of failure to perform, the Owner may provide written notice to CMAR that it intends to terminate this Agreement unless the problem cited is cured, or commenced to be cured, within three (3) days of CMAR's receipt of such notice.
  - 5.2.5 Notify CMAR of changes affecting the budget allocations or schedule.
- 5.3 The Owner's Representative shall have authority to approve the Project Budget and Project Master Schedule and render decisions and furnish information the Owner's Representative deems appropriate to CMAR.

## ARTICLE 6 - AGREEMENT CONDITIONS

### 6.1 PROJECT DOCUMENTS AND COPYRIGHTS

- 6.1.1 Owner Ownership of Project Documents. All work products (electronically or manually generated) including but not limited to: cost estimates, studies, design analyses, original mylar drawings, Computer Aided Drafting and Design (CADD) file diskettes, and other related documents which are prepared specifically in the performance of this Agreement (collectively referred to as Project Documents) are to be and remain the property of the Owner and are to be delivered to the Owner's Representative before the final payment is made to CMAR. Nonetheless, in the event these Projects Documents are altered, modified or adapted without the written consent of CMAR, which consent CMAR shall not unreasonably withhold, the Owner agrees to hold CMAR harmless to the extent permitted by law, from the legal liability arising out of and or resulting from the Owner's alteration, modification or adaptation of the Project Documents.
- 6.1.2 CMAR to Retain Copyrights. The copyrights, patents, trade secrets or other intellectual property rights associated with the ideas, concepts, techniques, inventions, processes or works of authorship developed or created by CMAR, its Subcontractors or personnel, during the course of performing this Agreement or arising out of the Project shall belong to CMAR.
- 6.1.3 License to Owner for Reasonable Use. CMAR hereby grants, and shall require its Subcontractors to grant, a license to the Owner, its agents, employees, and representatives for an indefinite period of time to reasonably use, make copies, and distribute as appropriate the Project Documents, works or Deliverables developed or created for the Project and this Agreement. This license shall also include the making of derivative works as guided by this Agreement.
- 6.1.4 Documents to Bear Seal. When applicable and required by state law, CMAR and its Subcontractors shall endorse by an Arizona professional seal all plans, works, and Deliverables prepared by them for this Agreement.
- 6.1.5 Records Inspection. The Owner and its employees, agents, and authorized representatives shall have the right at all reasonable times and during all business hours to inspect and examine CMAR's records related to this Agreement.
- 6.1.6 Record Retention. CMAR shall comply with the Owner's record retention policy regarding all records associated with the Project. This record retention requirement shall remain in effect following expiration of the Agreement or termination of the Agreement by either Party.

### 6.2 COMPLETENESS AND ACCURACY OF CMAR'S WORK

- 6.2.1 CMAR shall be responsible for the completeness and accuracy of its reviews, reports, supporting data, and other design phase Deliverables prepared or compiled pursuant to its obligations under this Agreement and shall at its sole expense correct its work or Deliverables. Any damage incurred by the Owner as a result of additional construction cost caused by such willful or negligent errors, omissions or acts shall be chargeable to CMAR to the extent that such willful or negligent errors, omissions and acts fall below the standard of care and skill that a professional CMAR in Flagstaff, Arizona would exercise under similar conditions. The fact that the Owner has accepted or approved CMAR's Work or Deliverables shall in no way relieve CMAR of any of its responsibilities under this Agreement, nor does this requirement to correct the Work or Deliverables constitute a waiver of any claims or damages otherwise available by law or this Agreement to the Owner. Correction of errors, omissions and acts discovered on architectural or engineering plans and specifications shall be the responsibility of the Design Professional(s).

### **6.3 ALTERATION IN CHARACTER OF WORK**

- 6.3.1 In the event an unanticipated or unforeseen alteration or modification in the character of Work or Deliverables results in a substantial change in this Agreement, thereby materially increasing or decreasing the scope of services, cost of performance, or Project Master Schedule, the Work or Deliverables shall nonetheless be performed as directed by the Owner. However, before any altered or modified Work begins, a Change Order or Amendment shall be approved and executed by the Owner and CMAR. Such Change Order or Amendment shall not be effective until approved by the Owner.
- 6.3.2 Additions to, modifications, or deletions from the Project provided herein may be made, and the compensation to be paid to CMAR may accordingly be adjusted by mutual agreement of the contracting parties.
- 6.3.3 No claim for extra work done, or materials furnished, by CMAR shall be allowed by Owner except as provided herein, nor shall CMAR do any work or furnish any material(s) not covered by this Agreement unless such work or material is first authorized in writing. Work or material(s) furnished by CMAR without such prior written authorization shall be at CMAR's sole jeopardy, cost, and expense, and CMAR hereby agrees that without prior written authorization no claim for compensation for such work or materials furnished shall be made.

### **6.4 DATA CONFIDENTIALITY**

- 6.4.1 As used in this Agreement, data ("Data") means all information, whether written or verbal, including plans, photographs, studies, investigations, audits, analyses, samples, reports, calculations, internal memos, meeting minutes, data field notes, work product, proposals, correspondence and any other similar documents or information prepared by or obtained by CMAR in the performance of this Agreement.
- 6.4.2 The parties agree that all Data, including originals, images, and reproductions, prepared by, obtained by, or transmitted to CMAR in connection with CMAR's performance of this Agreement is confidential and proprietary information belonging to the Owner.
- 6.4.3 CMAR shall not divulge Data to any third party without prior written consent of the Owner. CMAR shall not use the Data for any purposes except to perform the services required under this Agreement. These prohibitions shall not apply to the following Data:
- 6.4.3.1 Data, which was known to CMAR prior to its performance under this Agreement unless such data was acquired in connection with work performed for the Owner;
- 6.4.3.2 Data which was acquired by CMAR in its performance under this Agreement and which was disclosed to CMAR by a third party, who to the best of CMAR's knowledge and belief, had the legal right to make such disclosure and CMAR is not otherwise required to hold such data in confidence; or
- 6.4.3.3 Data which is required to be disclosed by CMAR by virtue of law, regulation, or court.
- 6.4.4 In the event CMAR is required or requested to disclose Data to a third party, or any other information to which CMAR became privy because of any other Agreement with the Owner, CMAR shall first notify the Owner as set forth in this Article of the request or demand for the Data. CMAR shall timely give the Owner sufficient facts, such that the Owner can have a meaningful opportunity to either first give its consent or take such action that the Owner may deem appropriate to protect such Data or other information from disclosure.
- 6.4.5 CMAR, unless prohibited by law, within ten (10) calendar days after completion of services for a third party on real or personal property owned or leased by the Owner, shall promptly deliver, as set forth in this section, a copy of all Data to the Owner. All Data shall continue to be subject to the confidentiality agreements of this Agreement.

6.4.6 CMAR assumes all liability for maintaining the confidentiality of the Data in its possession and agrees to compensate the Owner if any of the provisions of this section are violated by CMAR, its employees, agents or Subconsultants. Solely for the purposes of seeking injunctive relief, it is agreed that a breach of this section shall be deemed to cause irreparable harm that justifies injunctive relief in court.

## **6.5 PROJECT STAFFING**

6.5.1 Prior to the start of any work or Deliverables under this Agreement, CMAR shall submit to the Owner, an organization chart for CMAR staff and Subcontractors and detailed resumes of key personnel listed in its response to the Owner's Request for Qualifications or subsequent fee proposals (or revisions thereto), that shall be involved in performing the services prescribed in this Agreement. Unless otherwise informed, the Owner hereby acknowledges its acceptance of such personnel to perform such services under this Agreement. In the event CMAR desires to change such key personnel from performing such services under this Agreement, CMAR shall submit the qualifications of the proposed substituted personnel to the Owner for prior approval. Key personnel shall include, but are not limited to, principal-in-charge, project manager, superintendent, project director or those persons specifically identified to perform services of cost estimating, scheduling, value engineering, and procurement planning.

6.5.2 CMAR shall maintain an adequate number of competent and qualified persons, as determined by the Owner, to ensure acceptable and timely completion of the scope of services described in this Agreement throughout the period of those services. If the Owner objects, with reasonable cause, to any of CMAR's staff, CMAR shall take prompt corrective action acceptable to the Owner and, if required, remove such personnel from the Project and replace with new personnel acceptable to the Owner.

## **6.6 INDEPENDENT CONTRACTOR**

6.6.1 CMAR is and shall be an independent contractor and whatever measure of control the Owner exercises over the work or Deliverables pursuant to this Agreement shall be as to the results of the Work only. No provision in this Agreement shall give, or be construed to give, the Owner the right to direct CMAR as to the details of accomplishing the work or Deliverables. These results shall comply with all applicable laws and ordinances.

## **6.7 SUBCONTRACTORS**

6.7.1 Prior to beginning the work or Deliverables, CMAR shall furnish, for the Owner's approval, the names of all Subcontractors to be used on this Project. All subsequent changes shall be subject to the approval of the Owner.

## **6.8 TERMINATION**

6.8.1 The Owner and CMAR hereby agree to the full performance of the covenants contained herein, except that the Owner reserves the right, at its discretion and without cause, to terminate any or all services provided for in this Agreement or terminate any portion of the Project for which services have been performed by CMAR.

6.8.2 In the event the Owner terminates any or all of the services or any part of the services as herein provided, the Owner shall so notify CMAR in writing, and CMAR shall immediately after receiving such notice, discontinue advancing the Work specified under this Agreement and mitigate the expenditure, if any, of costs resulting from such termination.

6.8.3 CMAR, upon such termination, shall promptly deliver to the Owner all reports, estimates and other Work or Deliverables entirely or partially completed, together with all unused materials supplied by the Owner.

6.8.4 CMAR shall appraise the Work completed and submit an appraisal to the Owner for evaluation. The Owner shall have the right to inspect CMAR's Work or Deliverables to appraise the Work completed.

6.8.5 CMAR shall receive compensation in full for services satisfactorily performed to the date of such termination and the reasonable direct costs and direct expenses attributable to such termination. The fee shall be paid in accordance with this Agreement and shall be an amount mutually agreed upon by CMAR and the Owner. The Owner shall make the final payment within sixty (60) days after CMAR has delivered the last of the partially or otherwise completed Work items and the final fee has been agreed upon.

## **6.9 DISPUTE AVOIDANCE AND RESOLUTION**

6.9.1 The parties are fully committed to working with each other throughout the Project and agree to communicate regularly with each other at all times so as to avoid or minimize disputes or disagreements. If disputes or disagreements do arise, CMAR and Owner each commit to resolving such disputes or disagreements in an amicable, professional and expeditious manner so as to avoid unnecessary losses, delays and disruptions to the Work.

6.9.2 CMAR and the Owner shall first attempt to resolve disputes or disagreements at the field level through discussions between CMAR's Representative and the Owner's Representative.

6.9.3 If a dispute or disagreement cannot be resolved through CMAR's Representative and the Owner's Representative, CMAR's Senior Representative and the Owner's Senior Representative, upon the request of either party, shall meet as soon as conveniently possible, but in no case later than thirty (30) days after such a request is made, to attempt to resolve such dispute or disagreement. Prior to any meetings between the Senior Representatives, the parties shall exchange relevant information that shall assist the parties in resolving their dispute or disagreement.

6.9.4 Except as otherwise agreed by the parties, any litigation brought by either party against the other to enforce the provisions of this Agreement shall be filed in the Coconino County Superior Court and Arizona law shall apply and control. In the event any action at law or in equity is instituted between the parties in connection with this Agreement, the prevailing party in the action shall be entitled to its costs including reasonable attorneys' fees and court costs from the non-prevailing party.

## **6.10 WITHHOLDING PAYMENT**

6.10.1 The Owner reserves the right to withhold funds from the Owner's progress payments up to the amount equal to the claims the Owner may have against CMAR, until such time that a settlement on those claims has been reached.

## **6.11 RECORDS/AUDIT**

6.11.1 Records of CMAR's direct personnel payroll, reimbursable expenses pertaining to the Project and records of accounts between the Owner and CMAR shall be kept on a generally recognized accounting basis and shall be available for up to three (3) years following final completion of the Project. The Owner, its authorized representative, and/or the appropriate federal agency, reserve the right to audit CMAR's records to verify the accuracy and appropriateness of all pricing data, including data used to negotiate this Agreement and any Change Orders. The Owner reserves the right to decrease the Contract Price and/or payments made under this Agreement if, upon audit of CMAR's records, the audit discloses that CMAR has provided false, misleading, or inaccurate cost and pricing data.

6.11.2 CMAR shall include a provision identifying that generally recognized accounting practices shall be included in all of its agreements with Subconsultants, Subcontractors, and Suppliers providing services under this Agreement to ensure the Owner, its authorized representative, and/or the appropriate federal agency, has access to the Subconsultants', Subcontractors', and Suppliers' records to verify the accuracy of cost and pricing data. The Owner reserves the right to decrease the Contract Price and/or payments made under this Agreement if the above provision is not included in Subconsultant, Subcontractor, and Supplier Agreements, and one or more of those parties do not allow the Owner to audit their records to verify the accuracy and appropriateness of pricing data.

## 6.12 INDEMNIFICATION

- 6.12.1 To the fullest extent permitted by law, CMAR agrees to defend, indemnify and hold harmless the Owner, its officers, agents and employees, and any jurisdiction or agency issuing permits for any Work included in the Project, their officers, agents and employees, hereinafter individually and collectively referred to as "indemnitee", from all suits and claims, including attorney's fees and cost of litigation, actions, losses, damage, expenses, costs or claims of any character or any nature relating to, arising out of, or alleged to have resulted from the negligent, reckless, or intentional acts, errors, mistakes, omissions, work or services of the CMAR related to the Work or Deliverables done in fulfilling the terms of this Agreement, or on account of any act, claim or amount arising out of or recovered under Workmen's Compensation Law, or arising out of the failure of CMAR to conform to any statutes, ordinances, regulation, law or court decree. It is agreed that CMAR shall be responsible for primary loss investigation, defense and judgment costs where this Agreement of indemnity applies.

## 6.13 NOTICES

- 6.13.1 Notices or demands required to be given under this Agreement, may be given in writing, delivered in person, sent by facsimile transmission, emailed, deposited in the United States mail, postage prepaid, or deposited with any commercial air courier or express service at the addresses set forth below, or to such other address as the Parties may substitute by written notice. However, notices of termination, notices of default and any notice regarding warranties shall be sent via registered or certified mail, return receipt requested at the address set forth below **and** to legal counsel for the party to whom the notice is being given.

Or to other such place and with such other copies as either party may designate as to itself by written notice to the other party. Rejection, any refusal to accept, or the inability to deliver because of changed address of which no notice was given shall be deemed to be receipt of the notice as of the date of such rejection, refusal, or inability to deliver.

#### **6.14 COMPLIANCE WITH ALL LAWS**

6.14.1 CMAR will comply with all applicable Federal, State, County and City laws, regulations and policies. CMAR understands and acknowledges the applicability of the Americans with Disabilities Act, the Immigration Reform and Control Act of 1986 and the Drug Free Workplace Act of 1989. CMAR agrees to comply with these laws in performing the Contract Documents and to permit the Owner to verify such compliance.

#### **6.15 CONFLICT OF INTEREST**

6.15.1 To evaluate and avoid potential conflicts of interest, CMAR shall provide written notice to the Owner of any work or services performed by CMAR for third-parties that may involve or be associated with any real property or personal property owned or leased by the Owner. Such notice shall be given at least seven (7) business days prior to commencement of the Project by CMAR for a third party, or at least seven (7) business days prior to an adverse action as defined below. Written notice and disclosure shall be sent to:

Patrick Brown  
Purchasing Director  
City of Flagstaff  
211 West Aspen Avenue  
Flagstaff, Arizona 86001

6.15.2 Actions considered to be adverse to the Owner under this Agreement include but are not limited to:

6.15.2.1 Using Data, as defined in this Agreement, acquired in connection with this Agreement to assist a third party in pursuing administrative or judicial action against the Owner;

6.15.2.2 Filing a notice of claim or lawsuit against the City of Flagstaff, testifying or providing evidence on behalf of any person in connection with an administrative or judicial action against the City of Flagstaff; or

6.15.2.3 Using Data to produce income for CMAR or its employees independently of performing the services under this Agreement, without the prior written consent of the Owner.

6.15.3 CMAR represents that except for those persons, entities and projects previously identified in writing to the Owner, the services to be performed by CMAR under this Agreement are not expected to create an interest with any person, entity, or third-party project that is or may be adverse to the interests of the Owner.

6.15.4 CMAR's failure to provide a written notice and disclosure of the information as set forth in this section shall constitute a material breach of this Agreement.

## **6.16 CONTRACTOR'S LICENSE**

- 6.16.1 Prior to award of this Agreement, CMAR shall provide to the Procurement Section, its Contractor's License Classification and number and its Federal Tax I.D. number.

## **6.17 SUCCESSORS AND ASSIGNS**

- 6.17.1 The Owner and CMAR and their partners, successors, assigns, and legal representatives shall each be bound to the other party to this Agreement and to the partners, successors, assigns, and legal representatives of such other party in respect to all covenants of this Agreement. Neither the Owner nor CMAR shall assign, sublet, or transfer its interest in this Agreement without the written consent of the other. In no event shall any contractual relationship be created or be construed to be created as between any third party and the Owner. Notwithstanding the Owner's consent to assignment, CMAR as Assignor, and the Assignee shall both remain liable under all rights, obligations, terms, and conditions of this Agreement.

## **6.18 FORCE MAJEURE**

- 6.18.1 The parties acknowledge that there may be events that occur during the term of this Agreement that are beyond the control of both the Owner and the CMAR, including events of war, floods, labor, disputes, earthquakes, epidemics, pandemics, adverse weather conditions not reasonably anticipated, forest fires, and other acts of God. These events may result in temporary delay or permanent shut down of the work that is the subject of this Agreement. This may be caused by such things as stay-at-home orders, loss of labor force, supply chain delays, and other impediments to timely delivery of the Agreement.
- 6.18.2 The parties agree that there will be no claims arising from a temporary delay or permanent shut down caused by the events described above and that the Owner will pay no additional costs incurred because of such events.
- 6.18.3 The parties agree to act in good faith to extend the Contract completion date without any penalty to the Contractor and that the extension will be in an amount of time equal to any temporary delay. This term supersedes all other terms regarding temporary delay, permanent shut down, or increased costs.

## **6.19 COVENANT AGAINST CONTINGENT FEES**

- 6.19.1 CMAR warrants that no person has been employed or retained to solicit or secure this Agreement upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, and that no member of the City Council, or any employee of the Owner has any interest, financially, or otherwise, in CMAR. The Owner shall in the event of the breach or violation of this warranty, have the right to annul this Agreement without liability, or at its discretion to deduct from the Contract Price or consideration, the full amount of such commission, percentage, brokerage, or contingent fee.

## **6.20 NON-WAIVER PROVISION**

- 6.20.1 The failure of either party to enforce any of the provisions of this Agreement or to require performance by the other party of any of the provisions hereof shall not be construed to be a waiver of such provisions, nor shall it affect the validity of this Agreement or any part thereof, or the right of either party to thereafter enforce each and every provision.

## **6.21 JURISDICTION**

- 6.21.1 This Agreement shall be deemed to be made under, and shall be construed in accordance with, and governed by the laws of the State of Arizona, without regard to the conflicts or choice of law provisions thereof. An action to enforce any provision of this Agreement or to obtain any remedy with respect hereto shall be brought in the Superior Court, Coconino County, Arizona, and for this purpose, each party hereby expressly and irrevocably consents to the jurisdiction and venue of such Court.

## **6.22 SURVIVAL**

6.22.1 All warranties, representations and indemnifications by CMAR shall survive the completion or termination of this Agreement.

## **6.23 MODIFICATION**

6.23.1 No supplement, modification, or amendment of any term of this Agreement shall be deemed binding or effective unless in writing and signed by the parties hereto and in conformation with provisions of this Agreement, except as expressly provided herein to the contrary.

## **6.24 SEVERABILITY**

6.24.1 If any provision of this Agreement or the application thereof to any person or circumstance shall be invalid, illegal or unenforceable to any extent, the remainder of this Agreement and the application thereof shall not be affected and shall be enforceable to the fullest extent permitted by law.

## **6.25 INTEGRATION**

6.25.1 This Agreement contains the full agreement of the parties hereto. Any prior or contemporaneous written or oral agreement between the parties regarding the subject matter hereof is merged and superseded hereby.

## **6.26 TIME IS OF THE ESSENCE**

6.26.1 Time of each of the terms, covenants, and conditions of this Agreement is hereby expressly made of the essence.

## **6.27 THIRD PARTY BENEFICIARY**

6.27.1 This Agreement shall not be construed to give any rights or benefits in the Agreement to anyone other than the Owner and CMAR. All duties and responsibilities undertaken pursuant to this Agreement shall be for the sole and exclusive benefit of the Owner and CMAR and not for the benefit of any other party.

## **6.28 COOPERATION AND FURTHER DOCUMENTATION**

6.28.1 CMAR agrees to provide the Owner such other duly executed documents as may be reasonably requested by the Owner to implement the intent of this Agreement.

## **6.29 CONFLICT IN LANGUAGE**

6.29.1 All Work or Deliverables performed shall conform to all applicable Owner codes, ordinances and requirements as outlined in this Agreement. If there is a conflict in interpretation between provisions in this Agreement and any Exhibits, the provisions in this Agreement shall prevail.

## **6.30 CANCELLATION FOR CONFLICT OF INTEREST**

6.30.1 All parties hereto acknowledge that this Agreement is subject to cancellation for conflict of interest by the Owner pursuant to the provisions of A.R.S. Section 38-511.

## **6.31 CONFIDENTIALITY OF PLANS & SPECIFICATIONS**

6.31.1 Any plans or specifications received by CMAR regarding the Project are for official use only. CMAR may not share them with others except as required to fulfill Agreement obligations with the Owner.

**6.32 NO BOYCOTT OF ISRAEL**

6.32.1 Pursuant to A.R.S. §§ 35-393 and 35-393.01, if a Party has over ten (10) employees and the Agreement is worth at least one-hundred thousand dollars and no cents (\$100,000), the Party shall certify that it is not currently engaged in, and agrees, for the duration of the Agreement, will not engage in a boycott of Israel.

**6.33 FORCED LABOR OF ETHNIC UYGHURS**

6.33.1 If CMAR engages in for-profit activity and has ten (10) or more employees, pursuant to A.R.S. §35-394, CMAR certifies that it does not currently, and agrees for the duration of the contract that it will not, use: 1) the forced labor of ethnic Uyghurs in the People’s Republic of China; 2) any goods or services produced by the forced labor of ethnic Uyghurs in the People’s Republic of China; and 3) any contractors, subcontractors or suppliers that use the forced labor or any goods or services produced by the forced labor of ethnic Uyghurs in the People’s Republic of China. If CMAR becomes aware during the term of the Contract that the company is not in compliance with the written certification, CMAR shall notify the Owner within five business days after becoming aware of the noncompliance. If CMAR does not provide the Owner with a written certification that CMAR has remedied the noncompliance within 180 days after notifying the Owner of the noncompliance, this Contract terminates, except that if the Contract termination date occurs before the end of the remedy period the Contract terminations on the Contract termination date.

**ARTICLE 7 - INSURANCE**

CMAR shall procure and maintain for the duration of this Agreement, insurance against claims for injury to persons or damage to property which may arise from or in connection with the performance of the Work or Deliverables hereunder by CMAR, its agents, representatives, employees, Subconsultants, Subcontractors, and/or Suppliers. Insurance requirements related to any construction Work done during the design phase or during the construction phase shall be defined in a separate Agreement associated with the construction phase. CMAR shall cause all Subcontracts to contain identical terms and conditions to those included in this Article.

The insurance requirements herein are minimum requirements for this Agreement and in no way limit the indemnity covenants that might arise out of the performance of the Work or Deliverables under this Agreement by CMAR, its agents, representatives, employees, Subconsultants, Subcontractors, or Suppliers and CMAR is free to purchase such additional insurance as it may determine necessary.

**7.1 MINIMUM SCOPE AND LIMITS OF INSURANCE**

7.1.1 Loven Contracting, Inc. and Fann Contracting, Inc., as participants in the Loven-Fann Joint Venture, shall provide coverage at least as broad and with limits of liability not less than those stated below.

7.1.1.1 Commercial General Liability-Occurrence Form

General Aggregate/per project	\$10,000,000/ <del>\$5,000,000</del>
Products-Completed Operations Aggregate	\$1,000,000
Each Occurrence	\$1,000,000

7.1.1.2 Automobile Liability-Any Auto or Owned, Hired and Non-Owned Vehicles

Combined Single Limit Per Accident for Bodily Injury and Property Damage	\$2,000,000
--	-------------

The policy shall be endorsed to include the following additional insured language:

**"The City of Flagstaff shall be named as an additional insured with respect to liability arising out of the activities performed by, or on behalf of Loven Contracting, Inc., including automobiles owned, leased, hired or borrowed by Loven Contracting, Inc."**

**"The City of Flagstaff shall be named as an additional insured with respect to liability arising out of the activities performed by, or on behalf of Fann Contracting, Inc., including automobiles owned, leased, hired or borrowed by Fann Contracting, Inc."**

7.1.1.3 Workers Compensation and Employers Liability

CMAR shall carry Workers' Compensation insurance to cover obligations imposed by federal and state statutes.

7.1.2 Self-Insured Retentions

Any self-insured retentions and deductibles greater than \$10,000 shall be declared to and approved by the Owner.

**7.2 OTHER INSURANCE REQUIREMENTS**

7.2.1 The Commercial General Liability and Automobile Liability policies are to contain, or be endorsed to contain, the following provisions:

**"The City of Flagstaff, its officers, officials, agents, volunteers, and employees, are to be named as additional insureds with respect to liability arising out of: activities performed by or on behalf of Loven Contracting, Inc., including the City of Flagstaff's general supervision of Loven Contracting, Inc.; products and completed operations of Loven Contracting, Inc.; and automobiles owned, leased, hired, or borrowed by Loven Contracting, Inc."**

**"The City of Flagstaff, its officers, officials, agents, volunteers, and employees, are to be named as additional insureds with respect to liability arising out of: activities performed by or on behalf of Fann Contracting, Inc., including the City of Flagstaff's general supervision of Fann Contracting, Inc.; products and completed operations of Fann Contracting, Inc.; and automobiles owned, leased, hired, or borrowed by Fann Contracting, Inc."**

7.2.1.2 The Commercial General Liability Insurance shall contain broad form contractual liability coverage and shall not exclude liability arising out of the explosion, collapse, or underground hazard ("EXU").

7.2.1.3 The City, its officers, officials, agents, and employees shall be additional insureds to the full limits of liability purchased by CMAR, even if those limits of liability are in excess of those required by this Agreement. The Commercial General Liability additional insured endorsement shall be at least as broad as the Insurance Service Office, Inc.'s Additional Insured, Form B CG 20 10 11 85.

7.2.2 CMAR's insurance coverage shall be primary insurance with respect to the City, its officers, officials, agents, and employees. Insurance or self-insurance maintained by the City, its officers, officials, agents, and employees shall be in excess of CMAR's insurance and shall not contribute to it.

7.2.3 CMAR's insurance shall apply separately to each insured against whom claim is made or suit is brought, except with respect to the limits of the insurer's liability. The coverage provided by CMAR and its Subcontractors shall not be limited to the liability assumed under the indemnification provisions of this Agreement.

7.2.4 The policies shall contain a waiver of subrogation against the City, its officers, officials, agents, and employees for losses arising from Work performed for the Owner.

7.2.5 Workers' Compensation and Employers Liability policies are to contain, or be endorsed to contain, the following: The insurer shall agree to waive all rights of subrogation against the City, its officers, officials, agents, and employees for losses arising from work performed for the Owner.

### **7.3 SUBCONTRACTOR INSURANCE**

7.3.1 CMAR's certificate(s) shall include all Subcontractors as insureds under its policies. All coverages for Subcontractors shall be subject to the minimum requirements identified above.

### **7.4 NOTICE OF CANCELLATION**

7.4.1 Each insurance policy required by the insurance provisions of this Agreement shall provide the required coverage and not be suspended, voided, canceled by either party, reduced in coverage or in limits except after thirty (30) days prior written notice has been given, by certified mail, return receipt requested to:

Emily Markel  
Purchasing Manager  
City of Flagstaff  
211 West Aspen Avenue  
Flagstaff, Arizona 86001  
emarkel@flagstaffaz.gov

### **7.5 ACCEPTABILITY OF INSURERS**

7.5.1 Insurance is to be placed with insurers duly licensed companies in the State of Arizona, and with an A.M. Best's rating of no less than A-,7, or as approved by the City and licensed in the State of Arizona with policies and forms satisfactory to the City. The Owner in no way warrants that the above required minimum insurer rating is sufficient to protect CMAR from potential insurer insolvency.

### **7.6 VERIFICATION OF COVERAGE**

7.6.1 CMAR shall furnish the Owner, Certificates of Insurance (ACORD form or equivalent approved by the Owner) with original endorsements effecting coverage as required by this Agreement. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. Any policy endorsement(s) that restricts or limits coverages shall be clearly noted on the Certificate of Insurance.

7.6.2 All certificates and endorsements are to be received and approved by the Owner before work commences. Each insurance policy required by this Agreement shall be in effect at or prior to the earlier of commencement of work under this Agreement or signing of this Agreement, and remain in effect for the duration of the Project. Failure to maintain the insurance policies as required by this Agreement or to provide evidence of renewal shall constitute a material breach of this Agreement.

7.6.3 All Certificates of Insurance required by this Agreement shall be sent directly to the Contracts Division. The Project Number and Project description shall be included on the Certificates of Insurance. The Owner reserves the right to require complete, certified copies of all insurance policies required by this Agreement at any time.

### **7.7 APPROVAL**

7.7.1 Any modification or variation from the insurance requirements in this Agreement shall be approved by the City Attorney's Office, whose decision shall be final. Such action shall not require a formal Agreement amendment but may be made by administrative action.

This Agreement shall be in full force and effect only when it has been approved and executed by the duly authorized City officials.

**IN WITNESS WHEREOF**, the parties hereto have executed this Agreement on \_\_\_\_\_.

## EXHIBIT A – PROJECT DESCRIPTION

The City (Owner) is planning to develop a portion of the Flagstaff Pulliam Airport (Airport) for the Snow Removal Equipment Building (SREB). New construction of the SREB will be approximately 25,000 SF to support vehicle storage and a maintenance shop. The SREB will be capable of supporting the Flagstaff Airport's Snow and Ice Control Plan for multiple 24-hour operational periods. The development site is 6200 S. Pulliam Dr (APN 116-61-004) of the Airport in the PF (Public Facility) Zone. The SREB will provide easy and swift response by snow clearing crews to control snow and ice conditions at the Airport. The entire Project site area is approximately 4.5 acres within the larger Airport site, which is 31.1 acres. The scope of work includes construction of a new SREB and associated site improvements. The SREB will include a maintenance bay, equipment and material storage and associated support areas. It will be necessary to re-work the existing road to the Airport Traffic Control Tower (S. Liberator Lane) (ATCT), a new detention basin, space for equipment turning movements, equipment yard and parking for employees.

The Contractor shall coordinate with Design Professionals selected by the Owner and assist in: (1) the design of the Airport SREB Project (Project); and (2) to construct the Project. The region surrounding Flagstaff, Arizona averages 100 inches of snow annually (NCDC/NOAA archives). Under FAA Advisory Circular (AC) 150/5200-30D, snow and ice should be removed as quickly as possible, with a goal to maintain runways, taxiways, and high-speed turnoffs in a "no worse than wet" condition. Currently, the Airport does not have a large capacity to store snow removal equipment. As a result, the Airport is unable to return the runway to conditions that are compliant with AC 15/5200-30D during winter storms.

The existing snow removal equipment is stored in the airport's Aircraft Rescue and Fire Fighting (ARFF) building. Thus, the Project will allow the Airport to store equipment and additional materials to manage and maintain upkeep of the Airport during winter months. The site for the new SRBE is adjacent to the ARFF building and ATCT and across from Taxiway A. The construction of the Project will include:

1. The construction of approx. 25,000-sf SREB with a maximum height of 28 feet.
2. The construction of approx. 1,680-sf parking lot.
3. The construction of approx. 30,000-sf low impact development (LID) basin to manage stormwater runoff. (Per FAA requirements, water collected in the stormwater basin will be drained within 48 hours.)

The Project will also involve the paving of a small parking lot on the southwest side of the SREB. The parking lot will consist of nine parking spaces including an electric vehicle stall and an American with Disabilities Act (ADA) compliant space. Trenching will be necessary for utilities to connect to existing infrastructure from the southwestern corner of the proposed SREB, and the Project will relocate portions of existing fencing along the western side of the SREB.

## **EXHIBIT B – PROPOSAL AND HOURLY RATE SCHEDULE**

(See Attached Fee Sheet)

## EXHIBIT C - SUBMITTAL REQUIREMENTS FOR THE GMPs

Submit an electronic/(PDF) GMP Proposal or Proposals to the Owner's Project Representative.

Table of Contents:

1. Scope of Work
2. Summary of the GMP
3. Schedule of Values
4. List of Plans and Specifications
5. List of Clarifications and Assumptions
6. Project Master Schedule

### 1. Scope of work

Include the Contract 2024-114, Project Name, and submittal date. Provide a brief description of the work to be performed by CMAR and major points that CMAR and the Owner shall be aware of pertaining to the scope.

### 2. Summary of the GMP

Include a total cost for each of the cost components of the GMP requested under this Agreement. The CMAR shall present this information in the format shown on the attached table. All costs should be listed individually for future use. The General Conditions Costs shall include a detailed breakdown of itemized costs separate but similar to the Schedule of Values.

### 3. Schedule of Values

Provide a summary spreadsheet with the estimated cost organized by subagreement categories, contingencies, general conditions, taxes, bonds, insurances, and construction fee. Additionally, provide supporting documents for the spreadsheet in an organized manner that correlates with the schedule of values. The backup information shall consist of the most current version of the Cost Model utilized to develop the GMP.

### 4. List of Plans and Specifications

Provide a list of plans and specifications with latest issuance date including all addenda used in preparation of the GMP proposal. This document must be date stamped and signed by CMAR.

### 5. List of Clarifications and Assumptions

Provide a list of the clarifications and assumptions made by CMAR in the preparation of the GMP proposal. This information is intended to supplement the information contained within other documents submitted to the Owner.

### 6. Project Master Schedule

Provide a Critical Path Method (CPM) diagram and other information to identify the Project Master Schedule.

**(Do not acquire bond or insurance until notified by the Owner's Project Representative.)**

**NOTE:** Keep the submittal package as simple as possible all on 8 ½ x 11 sheets. Color or shading shall be kept to a minimum. If used, make sure the color or shading shall not affect the reproduction of the submittal. For questions regarding the submittal requirements, please contact Patrick Brown, Purchasing Director (pbrown@flagstaffaz.gov).

# CITY OF FLAGSTAFF SAMPLE GMP SUMMARY TABLE

Contractor can choose to fill in table using percentages or flat rates.

A	B	D	E

## EXHIBIT D – MONTHLY ANTICIPATED ADVERSE WEATHER DAYS

CMAR will be entitled to a Contract Time extension if the actual adverse weather Days experienced during the Work exceed the anticipated adverse weather Days shown in Table 108.7.

**TABLE 108.7 – MONTHLY ANTICIPATED ADVERSE WEATHER CALENDAR DAYS**

MONTH	JANUARY	FEBRUARY	MARCH	APRIL	MAY	JUNE
MONTHLY ANTICIPATED ADVERSE WEATHER CALENDAR DAYS	<b>7 days</b>	<b>7 days</b>	<b>8 days</b>	<b>6 days</b>	<b>4 days</b>	<b>3 days</b>
AVERAGE MONTHLY PRECIPITATION	1.98"	1.96"	2.05"	1.84"	0.68"	0.51"
MONTHLY DAILY HIGH TEMPERATURE ≤32° F	5 days	3 days	2 days	0 days	0 days	0 days
MONTH	JULY	AUGUST	SEPTEMBER	OCTOBER	NOVEMBER	DECEMBER
MONTHLY ANTICIPATED ADVERSE WEATHER CALENDAR DAYS	<b>12 day</b>	<b>11 days</b>	<b>7 days</b>	<b>5 days</b>	<b>5 days</b>	<b>6 days</b>
AVERAGE MONTHLY PRECIPITATION	2.78"	2.68"	1.82"	1.52"	1.49"	1.90"
MONTHLY DAILY HIGH TEMPERATURE ≤ 32° F	0 days	0 days	0 days	0 days	1 day	5 days

The above schedule of anticipated adverse weather days establishes the base line for the project’s monthly weather impacts, based on historical records, as recorded by the National Weather Service at Pulliam Airport, for precipitation in excess of 0.01 inch and daily high temperatures below 32° Fahrenheit.

**EXHIBIT E – GRANT PROVISIONS**  
(ATTACHED)

June 26, 2024

Mr. Adam Miele, P.E.  
Airport Programs Manager  
City of Flagstaff  
6200 S. Pulliam Dr. Ste 204  
Flagstaff, AZ 86005

**RE: Construction Manager at Risk (CMAR)-City of Flagstaff Pulliam Airport Snow Removal Equipment Building  
Design Phase Services Lump Sum Proposal**  
Loven-Fann JV Project # 23-329-01

Dear Mr. Miele,

The following is Loven-Fann Joint Venture's Lump Sum proposal for Design Phase Services for the City of Flagstaff's Pulliam Airport Snow Removal Equipment Building (SREB-Project # 01-23001). This proposal is based upon RSOQ Number: 2024-114, dated April 2024.

**Project Understanding:**

---

The City of Flagstaff intends to use Construction Manager at Risk (CMAR) delivery method for this project. Design phase services will be reimbursed as lump sum. This proposal is based upon the attached preconstruction schedule "Attachment B" coordinated with Owner and Architect of Record.

The project is located at 6200 S. Pulliam Dr. in Flagstaff, AZ. Scope of work generally includes reviewing and providing input on design, plans, specifications, schedules, quantities, procurement, cost estimates, subsurface utility investigations, sequencing of the project, and constructability in coordination with the City of Flagstaff and APMI, Inc to prepare comprehensive construction documents and develop Guaranteed Maximum Prices (GMPs) for the project.

Construction includes a 25,000SF Snow Removal Equipment Building, providing the airport with readily available and accessible equipment. The building will be accompanied by site and infrastructure improvements to serve the building.

**Scope of Services:**

---

**Program Evaluation**

1. Review current project documents, requirements, goals schedule, and funding.

**Project Site Observation and Analysis**

1. Conduct project site visit to review existing conditions.
2. Field locate subsurface utilities within project boundaries. Locations will be documented by a surveyor.

- a. **Deliverable:** Provide PDF document noting locations, material types, depths and sizing of existing utilities within project limits for incorporation into the plans by others and shared with owner and Architect of Record.
3. Provide soil analysis (completed by Speedie Associates, current Geotech contracted by Architect of Record) of client imported fill material (approximately 15,000CY). One mobilization is included to current location of stored materials. Fill material was previously imported by others. Assumes material to be tested is mixed and homogeneous.
  - a. **Deliverable:** Report of test results.
4. Water flow test at existing hydrant with fully functional valve per NFPA 25 and 291. Subject to applicable permits and proper notification to Authority having jurisdiction.
  - a. **Deliverable:** Documentation with final report of NFPA flow rates.

### **Project Meetings**

1. Participate in project kickoff meeting and provide meeting minutes to AE and Client.
2. Participate in weekly design meetings and compile meetings minutes with the City of Flagstaff and the design team.
3. Includes one meeting per GMP with the Airport Commission and City Council.
4. Project design meeting to be revised to bi-weekly after December 2024.
5. Loven-Fann to provide design meetings to Client and Architect of Record for AE to distribute.
  - a. **Deliverable:** Coordination of meeting agendas, meeting materials, and meeting minutes.

### **Project Schedule**

1. Develop the project master schedule including preconstruction and construction durations. Review and coordinate the master schedule with the City of Flagstaff, APMI, and stakeholders. The schedule will include design activities, budget and GMP, submittals, procurement, permitting, construction, commissioning, and post-construction activities. Once approved, the preconstruction schedule will be managed, updated, and distributed weekly. The master schedule will be confirmed and included with progress budgets and GMP deliverables.
  - a. **Deliverable:** Master project schedule, weekly distribution of preconstruction schedule, and confirmation of master schedule with progress budgets and GMPs.

### **Budget**

1. **Cost Model:**
  - a. Provide cost model based on Architect 60% milestone plans and specifications. Cost model will utilize quantities, and unit costs with selective input from trade partners.
    - i. **Deliverable:** Cost model including budget narrative and delineation of costs.
2. **Cost Estimate**
  - a. Provide cost estimate based on Architect 90% milestone plans and specifications. The cost estimate will utilize trade partner, supplier, and vendor input with selective quantity and unit cost.
    - i. **Deliverable:** Cost estimate including budget narrative and delineation of costs.

### Construction GMP(s)

1. **Construction GMP 1- Early Sitework Civil and Early Procurement (Electrical and PEMB/Load Bearing Masonry)**
  - a. Upon approval of the 60% plans and cost model, provide GMP 1. GMP 1 will be based upon 100% final civil plans and 60% Architectural and MEP plans. GMP 1 will include site improvements, electrical and pre-engineered metal building, including supplier and subcontractor solicitation and qualification. GMP will be inclusive of overall project cost with subsequent funding breakdowns.
    - i. **Deliverable:** Construction GMP 1
2. **Construction GMP 2- Final Civil and Building**
  - a. Upon approval of the final construction documents, provide GMP 2. GMP 2 will include the remaining construction scope and costs not included in GMP 1, including supplier and subcontractor solicitation and qualification. Includes budget verification incorporating comments received during the permitting process. GMP will be inclusive of overall project cost with subsequent funding breakdowns.
    - i. **Deliverable:** Construction GMP 2

### Choosing by Advantage Analysis (CBA)

1. Coordinate, review, and finalize building type analysis. Anticipated options include pre-engineered metal building (PEMB) or a combination of structural steel and masonry. The analysis and decision will utilize the Choosing by Analysis process.
  - a. **Deliverable:** Documentation of the CBA process and final decision.

### Offsite Utility Coordination

1. Support designer and owner with coordination of offsite utility companies. Utility fees are not included.
  - a. **Deliverable:** Documentation of coordination meetings.

### Design Document Review

1. Provide review of design documents at 60%, 90%, and 100% design review. Includes constructability analysis, biddability review, and alternative systems strategies. Provide review and input on concrete mix design and treatment to be used in the vehicle bays considering deicing chemicals and runoff.
  - a. **Deliverable:** Mark up design documents provided to the City of Flagstaff and design team.

### Procurement Plan

1. Provide a procurement plan coordinated with the construction schedule. Identify material long-lead times and prepurchase strategies coordinated with construction schedule. Provide analysis of alternative products for time or cost impacts.
  - a. **Deliverable:** Procurement schedule within the master schedule identifying milestones and lead times for equipment coordinated with the project schedule.

### Construction Management Plan

1. Includes development of site logistics plan, site-specific safety plan, and traffic control and haul route plan.
  - a. **Deliverable:** Site logistics plan, site-specific safety plan, and traffic control plan and haul route plan.

### Permit Support

1. Coordinate with the City of Flagstaff and provide support with the permitting process, including SWPPP plan and permit.
  - a. **Deliverable:** SWPPP plan and permit.

### Insurance

1. Insurance indicated in the sample City of Flagstaff sample CMAR preconstruction agreement.

**Note:** Workers' compensation and auto will be provided in the name of Fann Contracting and Loven Contracting. All other insurance will be provided in the name of Loven-Fann Joint Venture.

  - a. **Deliverable:** Certificate of Insurance.

### Additional Services (TBD)

1. Additional services will be provided as requested and approved. Additional services will be reimbursed at the provided hourly rates or an agreed-upon lump sum.

### Reimbursables

1. An allowance for printing, outsourcing, or other reimbursable expenses.

### BIM Modeling

1. Utilize APMI Revit Model plans as the basis for the model to complete a three-dimensional clash detection plan and coordinate with trade partners on proposed building components. Modeling to begin at 90% design development with completion after procurement of major trades. BIM model will provide a comprehensive approach to coordinate design and construction to provide a more efficient process. As well as provide final as-built documentation to show building structure, radiant floor heating layout, equipment within the building, MEP infrastructure layout and overhead door requirements. This final deliverable will help to insure all items noted above properly adhere to the limits and coordinate all aspects within the building.
  - a. **Deliverable:** PDF Revit Model version 2022 to an LOD 350 level.

### REFERENCE DOCUMENTS:

---

1. Attachment "A" Cost Detail
2. Attachment "B" Tentative Design Schedule
3. Attachment "C" Design Assist Labor Billing Rates

## Exclusions

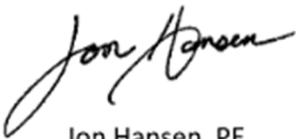

---

1. Archeological and environmental services
2. City of Flagstaff sales tax, or bond not required or included for preconstruction services
3. Design/engineering- architectural, structural, civil, landscape, mechanical, plumbing, electric, FFE, geotechnical, environmental and survey
4. Lightning protection system evaluation and design, to be provided by architect and/or engineering consultants
5. Permit and utility fees associated with these design phased services.
6. Selection and specification of furnishings to be provided by others
7. Additional scope or services not included above
8. Major scope changes from currently presented project scope, requirements or submittal documents
9. Investigation services beyond the currently proposed
10. Additional consulting, public relations, or other third-party services not included above

Loven-Fann Joint Venture appreciates the opportunity to respectfully submit this Lump Sum proposal for design phase services, the value of these services are **as follows:**

- A. Basic Design Phase Services \$692,082.67
- B. Additional Design Phase Services \$ N/A
- C. Total Preconstruction Services Agreement Contract Price Not to Exceed **\$698,582.67**
- D. Reimbursable services included within budget \$6,500.00

Thank you,

Jon Hansen, PE  
Loven-Fann Joint-Venture

## Record of Changes

No.	Date	Item	Change
1	1/29/2016	Entire Document	Re-structured document to enhance user understanding of use and applicability; added suggested provisions for “Termination for Cause”, “Recovered Materials”, “Seismic Safety”.
2	6/10/2016	Table 1	Distracted Driving: Updated “Dollar Threshold” to \$3,500 to reflect current micro-purchase threshold.
3	6/10/2016	A2, Affirmative Action	Update the reference to the Department of Labor online document to be “Participation Goals for Minority and Females”
4	6/10/2016	A12, Disadvantaged Business Enterprise	A12.3: Changed Title to “Required Provisions” A12.3.1: Corrected starting timeframe for submitting written confirmation from “Owner Notice of Award” to “bid opening” A12.3.1: Provided two sets of last paragraphs to reflect change (7 days to 5 days) that occurs on December 31, 2016. A12.3.2: Moved Race/Gender Neutral language up and renamed heading to reflect text is solicitation language. A12.3.3: Moved and renamed contract clause information and clarified it is for prime contract covered by a DBE program.
5	12/12/2017	Cover	Change title of document for clarity
6	12/12/2017	1. Purpose of this Document	Added clarifying text addressing purpose and limitations of this guidance. 1.7-1.9: Added definitions of contract, applicant, bid

No.	Date	Item	Change
7	12/12/2017	2. Sponsor requirements	Added clarifying text addressing sponsor responsibilities.
8	12/12/2017	3. Typical Procurement Steps	Added clarifying text for typical procurement process steps.
9	12/12/2017	Table 1 – Applicability Matrix	Re-arranged table in alphabetic order. Added “Solicitation” column to address solicitation provisions Item I, Seismic Safety: Added Limited Application Added note on Airport Concessions Disadvantaged Business Enterprises
10	12/12/2017	All Clauses	Clarifying revisions made to applicability section.
11	12/12/2017	A5, Civil Rights - General	Rephrased General Civil Rights Provision to simplify language and to clarify duration of obligation for tenant/concessionaire/lessee
12	12/12/2017	A6.3.1 Civil Rights – Solicitations	Added sponsor must select either DBE or ACDBE
12	12/12/2017	A12, Disadvantaged Business Enterprise	The deadline to submit DBE confirmation of participation is now 5 days after bid opening or as a matter of bid responsiveness.  Updated DBE contract assurance (12.3.3) to match language of 49 CFR § 26.13
13	12/12/2017	A24, Tax Delinquency and Felony Conviction	New certification addressing contractor tax delinquency and felony conviction.
14	6/19/2018	6.2.1, Applicability of Title VI Solicitation Notice	For Title VI Clauses for Compliance with Nondiscrimination Requirements, change second sentence in second column to changed “are already subject to nondiscrimination requirements” to “are <b>not</b> already subject to nondiscrimination requirements”.
15	6/19/2018	A6.4.1, Title VI Clauses for Compliance with Nondiscrimination Requirements	In second item, changed “are already subject to nondiscrimination requirements” to “are <b>not</b> already subject to nondiscrimination requirements”.

# CONTRACT GUIDANCE

## 1. Purpose of this Document

- 1) The purpose of this document is to establish a convenient resource for Sponsors that consolidates all possible provisions and clauses into one document that includes an applicability matrix. This document itself does not create, revise or delete requirements for participation in the Airport Improvement Program. The source of requirements addressed within this document are identified within the section for each individual clause.
- 2) Federal laws and regulations require that an sponsor (a recipient of federal assistance) include specific clauses in certain contracts, solicitations, or specifications regardless of whether or not the project is federally funded.
- 3) The term **sponsor** is used in this document to mean either an obligated sponsor on a project that is not federally funded, or a sponsor on an AIP funded project.
- 4) The term **Owner** is generally used in the solicitation or contract clauses because of its common use in public contracts.
- 5) An Owner becomes an obligated sponsor upon acceptance of the Airport Improvement Program (AIP) grant assurances associated with current or prior AIP grant funded projects.
- 6) For purposes of determining requirements for contract provisions, the term **contract** includes subcontracts and supplier contracts such as purchase orders.
- 7) For purpose of remaining compliant with its obligations, a sponsor must incorporate applicable contract provisions in all its procurements and contract documents. Unless otherwise stated, these provisions flow down to subcontracts and sub-tier agreements.
- 8) The term **contractor** is understood to mean a contractor, subcontractor, or consultant; and means one who participates, through a contract or subcontract (at any tier).
- 9) The term **bid** is understood to mean a bid, an offer, or a proposal.
- 10) **Applicant:**
  - a. For the Equal Employment Opportunity (EEO) clause, the term **applicant** means an applicant for employment (whether or not the phrase, *for employment*, follows the word applicant or applicants).
  - b. For all other clauses, the term **applicant** means a bidder, offeror, or proposer for a contract.

## 2. Sponsor Requirements

In general, the sponsor must take the following actions in order to remain consistent with its obligations:

- 1) Include in its procurements the provisions that are applicable to its project.

- 2) Not incorporate the entire contract provisions guidelines in its solicitation or contract documents, whether by reference or by inclusion in whole. Incorporation of this entire guidance document creates potential for ambiguous interpretation and may lead to improper application that unnecessarily increases price. A sponsor that fails to properly incorporate applicable contract clauses may place themselves at risk for audit findings or denial of Federal funding.
- 3) Incorporate applicable contract provisions using mandatory language as required. The subheading entitled *Applicability* advises whether a particular clause or provision has mandatory language that a sponsor must use.
  - (a) Mandatory Language - Whenever a clause or provision has mandatory text, the sponsor must incorporate the text of the provision **without change**, except where specific adaptive input is necessary (e.g. such as the sponsor's name).
  - (b) No Mandatory Language Provided - For provisions without mandatory language, this guidance provides model language acceptable to the FAA. Some sponsors may already have standard procurement language that is equivalent to those federal provisions. In these cases, sponsors may use their existing standard procurement provision language provided the text meets the intent and purpose of the Federal law or regulation.
- 4) Require the contractor (including all subcontractors) to insert these contract provisions in each lower tier contract (e.g. subcontract or sub-agreement).
- 5) Require the contractor (including all subcontractors) to incorporate the applicable requirements of these contract provisions by reference for work done under any purchase orders, rental agreements and other agreements for supplies or services.
- 6) Require that the prime contractor be responsible for compliance with these contract provisions by any subcontractor, lower-tier subcontractor or service provider.
- 7) Verify that any required local or State provision does not conflict with or alter a Federal law or regulation.

### **3. Typical Procurement Steps**

The usual procurement steps in a project are:

- 1) Solicitation, Request for Bids or Request for Proposals – This is also called the Advertisement or Notice to Bidders.
- 2) Bidding or Accepting Proposals – In this stage, the bidders receive a complete set of the procurement documents, also known as the project manual. The project manual will typically include a copy of the solicitation, instructions-to-bidders, bid forms, certifications and representations, general provisions, contract conditions, copy of contract, project drawings, technical specifications and related project documents.
- 3) Bid/Proposal Evaluation – Period when Sponsor tabulates and reviews all proposals for bid responsiveness and bidder responsibility.
- 4) Award – Point when the Sponsor formally awards the contract to the successful bidder.

- 5) Execution of Contract – Point at which the Sponsor formally enters into a legally binding agreement to perform services or provide goods.

#### **4. Applicability Matrix for Contract Provisions**

[Table 1](#) summarizes the applicability of contract provisions based upon the type of contract or agreement. The dollar threshold represents the value at which, when equal to or exceeded, the sponsor must incorporate the provision in the contract or agreement.

Supplemental information addressing applicability and use for each provision is located in Appendix A. Appendix A and the Matrix include notes indicating when the sponsor may incorporate references in the **solicitation** in lieu of including the entire text.

## Meaning of cell values

- Info – Sponsor has discretion on whether to include clause in its contracts.
- Limited – Provision with limited applicability depending on circumstances of the procurement.
- n/a – Provision that is not applicable for that procurement type.
- NIS – Provision that does not need to be included or referenced in the solicitation document
- REF – Provision to be incorporated into the solicitation by reference.
- REQD - Provision the sponsor must incorporate into procurement documents.

**Airport Concessions Disadvantage Business Enterprise (ACDBE) Notes:**

1. Language relative to solicitation for ACDBEs does not need to be included in AIP funded solicitations, since in no case are concessions activities funded with federal funds.
2. Airport sponsors must include the appropriate Title VI language in their solicitation notices when they seek proposals for concessions.

# **APPENDIX A – CONTRACT PROVISIONS**

## **A1 ACCESS TO RECORDS AND REPORTS**

### **A1.1 SOURCE**

2 CFR § 200.333

2 CFR § 200.336

FAA Order 5100.38

### **A1.2 APPLICABILITY**

2 CFR § 200.333 requires a sponsor to retain records pertinent to a Federal award for a period of three years from submission of final closure documents. 2 CFR § 200.336 establishes that sponsors must provide Federal entities the right to access records pertinent to the Federal award. FAA policy extends these requirements to the sponsor's contracts and subcontracts of AIP funded projects.

**Contract Types** – The sponsor must include this provision in all contracts and subcontracts of AIP funded projects.

**Use of Provision** – No mandatory language provided. The following language is acceptable to the FAA with meeting the intent of this requirement. If the sponsor prefers to use different language, the sponsor's language must fully satisfy the requirements of §§ 200.333 and 200.336.

### **A1.3 CONTRACT CLAUSE**

#### **ACCESS TO RECORDS AND REPORTS**

The Contractor must maintain an acceptable cost accounting system. The Contractor agrees to provide the Owner, the Federal Aviation Administration and the Comptroller General of the United States or any of their duly authorized representatives access to any books, documents, papers and records of the Contractor which are directly pertinent to the specific contract for the purpose of making audit, examination, excerpts and transcriptions. The Contractor agrees to maintain all books, records and reports required under this contract for a period of not less than three years after final payment is made and all pending matters are closed.

## **A2 AFFIRMATIVE ACTION REQUIREMENT**

### **A2.1 SOURCE**

41 CFR part 60-4

Executive Order 11246

### **A2.2 APPLICABILITY**

**Minority Participation.** Sponsors are required to set goals for minority participation in AIP funded projects exceeding \$10,000. The goals for minority participation derive from Economic Area (EA) and Standard Metropolitan Statistical Area (SMSA) as established in Volume 45 of the Federal Register dated 10/3/80. Page 65984 contains a table of all EAs and SMSAs and the associated minority participation goals.

To find the goals for minority participation, a sponsor must either refer to the Federal Register Notice or to the Department of Labor online document, "[Participation Goals for Minorities and Females](#)". EAs and SMSAs span state boundaries. A sponsor may have to refer to entries for adjacent states in order to locate the goal for the project location.

**Female Participation.** Executive Order 11246 has set a goal of 6.9% nationally for female participation for all construction projects. This value remains constant for all counties and states.

#### **Contract Types –**

*Construction* – The sponsor must incorporate this notice in all solicitations for bids or requests for proposals for AIP funded construction work contracts and subcontracts that exceed \$10,000. Construction work means construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection and other onsite functions incidental to the actual construction.

*Equipment* – The sponsor must incorporate this notice in any equipment project exceeding \$10,000 that involves installation of equipment onsite (e.g. electrical vault equipment). This provision does not apply to equipment acquisition projects where the manufacture of the equipment takes place offsite at a manufacturer's plant (e.g. firefighting and snow removal vehicles).

*Professional Services* – The sponsor must incorporate this notice in any professional service agreement if the professional services agreement includes tasks that meet the definition of construction work [as defined by the U.S. Department of Labor (DOL)] and exceeds \$10,000. Examples include installation of monitoring systems (e.g. noise, environmental, etc.).

*Property/Land* – The sponsor must incorporate this notice in any agreement associated with land acquisition if the agreement includes construction work (defined above) that exceeds \$10,000. Examples include demolition of structures or installation of boundary fencing.

**Use of Provision – MANDATORY TEXT.** The sponsor must:

- (a) Incorporate the text of this provision in its solicitations without modification.
- (b) Incorporate the applicable minority participation goal and the covered area by geographic name.
- (c) Not simply insert a reference to the 1980 Federal Register Notice.

### **A2.3 SOLICITATION CLAUSE**

#### **NOTICE OF REQUIREMENT FOR AFFIRMATIVE ACTION to ENSURE EQUAL EMPLOYMENT OPPORTUNITY**

1. The Offeror's or Bidder's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Opportunity Construction Contract Specifications" set forth herein.
2. The goals and timetables for minority and female participation, expressed in percentage terms for the Contractor's aggregate workforce in each trade on all construction work in the covered area, are as follows:

#### **Timetables**

Goals for minority participation for each trade:	N/A
Goals for female participation in each trade:	6.9%

These goals are applicable to all of the Contractor's construction work (whether or not it is Federal or federally assisted) performed in the covered area. If the Contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the work is actually performed. With regard to this second area, the Contractor also is subject to the goals for both its federally involved and non-federally involved construction.

The Contractor's compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a) and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and in each trade, and the Contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting the Contractor's goals shall be a violation of the contract, the Executive Order and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

3. The Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs (OFCCP) within 10 working days of award of any construction subcontract in excess of \$10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address, and telephone number of the subcontractor; employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical area in which the subcontract is to be performed.

4. As used in this notice and in the contract resulting from this solicitation, the “covered area” is the City of Flagstaff.

## **A3 BREACH OF CONTRACT TERMS**

### **A3.1 SOURCE**

2 CFR § 200 Appendix II(A)

### **A3.2 APPLICABILITY**

This provision requires sponsors to incorporate administrative, contractual or legal remedies if contractor violate or breach contract terms. The sponsor must also include appropriate sanctions and penalties.

**Contract Types** – This provision is required for all contracts that exceed the simplified acquisition threshold as stated in 2 CFR Part 200, Appendix II (A). This threshold is occasionally adjusted for inflation and is now equal to \$150,000.

**Use of Provision** – No mandatory language provided. The following language is acceptable to the FAA as meeting the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of part 200. Select either “contractor” or “consultant” as applicable.

### **A3.3 CONTRACT CLAUSE**

#### **BREACH OF CONTRACT TERMS**

Any violation or breach of terms of this contract on the part of the *Contractor* or its subcontractors may result in the suspension or termination of this contract or such other action that may be necessary to enforce the rights of the parties of this agreement.

Owner will provide *Contractor* written notice that describes the nature of the breach and corrective actions the *Contractor* must undertake in order to avoid termination of the contract. Owner reserves the right to withhold payments to Contractor until such time the Contractor corrects the breach or the Owner elects to terminate the contract. The Owner’s notice will identify a specific date by which the *Contractor* must correct the breach. Owner may proceed with termination of the contract if the *Contractor* fails to correct the breach by the deadline indicated in the Owner’s notice.

The duties and obligations imposed by the Contract Documents and the rights and remedies available thereunder are in addition to, and not a limitation of, any duties, obligations, rights and remedies otherwise imposed or available by law.

## **A4 BUY AMERICAN PREFERENCE**

### **A4.1 SOURCE**

Title 49 USC § 50101

### **A4.2 APPLICABILITY**

The Buy American Preference requirement in 49 USC § 50101 requires that all steel and manufactured goods used on AIP projects be produced in the United States. The statute gives the FAA the ability to issue a waiver to a sponsor to use non-domestic material on an AIP funded project subject to meeting certain conditions. A sponsor may request that the FAA issue a waiver from the Buy American Preference requirements if the FAA finds that:

- 1) Applying the provision is not in the public interest;
- 2) The steel or manufactured goods are not available in sufficient quantity or quality in the United States;
- 3) The cost of components and subcomponents produced in the United States is more than 60 percent of the total components of a facility or equipment, and final assembly has taken place in the United States. Items that have an FAA standard specification item number (such as specific airport lighting equipment) are considered the equipment.
- 4) Applying this provision would increase the cost of the overall project by more than 25 percent.

**Timing of Waiver Requests.** Sponsors desiring a Type 1 or Type 2 waiver must submit their waiver requests *before* issuing a solicitation for bids or a request for proposal for a project.

The sponsor must submit Type 3 or Type 4 waiver requests *prior* to executing the contract. The FAA will generally not consider waiver requests after execution of the contract except where extraordinary and extenuating circumstances exist. The FAA cannot review waiver requests with incomplete information. Sponsors must assess the adequacy of the waiver request and associated information prior to forwarding a waiver request to the FAA for action.

**Buy American Conformance List.** The FAA Office of Airports maintains a listing of equipment that has received a nationwide waiver from the Buy American Preference requirements or that fully meet the Buy American requirements. The Nationwide Buy American Waiver List is available online at [www.faa.gov/airports/aip/buy\\_american/](http://www.faa.gov/airports/aip/buy_american/). Products listed on the Buy American Conformance list do not require additional submittal of domestic content information under a project specific Buy American Preference waiver.

**Facility Waiver Requests.** For construction of a facility, the sponsor may submit the waiver request after bid opening, but prior to contract execution. Examples of facility construction include terminal buildings, terminal renovation, and snow removal equipment buildings.

#### **Contract Types –**

*Construction and Equipment* – The sponsor must meet the Buy American Preference requirements of 49 USC § 50101 for all AIP funded projects that require steel or manufactured

goods. The Buy America requirements flow down from the sponsor to first tier contractors, who are responsible for ensuring that lower tier contractors and subcontractors are also in compliance.

Note: The Buy American Preference does not apply to equipment a contractor uses as a tool of its trade and which does not remain as part of the project.

*Professional Services* – Professional service agreements (PSAs) do not normally result in a deliverable that meets the definition of a manufactured product. However, the emergence of various project delivery methods has created situations where task deliverables under a PSA may include a manufactured product. If a PSA includes providing a manufactured good as a deliverable under the contract, the sponsor must include the Buy American Preference provision in the agreement.

*Property* – Most land transactions do not involve acquiring a manufactured product. However, under certain circumstances, a property acquisition project could result in the installation of a manufactured product. For example, the installation of property fencing, gates, doors and locks, etc. represent manufactured products acquired under an AIP funded land project that must comply with Buy American Preferences.

**Use of Provision** – No mandatory language provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s revised language must fully comply with 49 USC § 50101.

There are two types of Buy American certifications. The sponsor must incorporate the appropriate “Certificate of Buy America Compliance” in the solicitation:

- Projects for a facility (buildings such as terminals, snow removal equipment (SRE) buildings, aircraft rescue and firefighting (ARFF) buildings, etc.) – Insert the Certificate of Compliance Based on Total Facility.
- Projects for non-facility development (non-building construction projects such as runway or roadway construction or equipment acquisition projects) – Insert the Certificate of Compliance Based on Equipment and Materials Used on the Project.

### **A4.3 SOLICITATION CLAUSE**

#### **A4.3.1 Buy American Preference Statement**

##### **BUY AMERICAN PREFERENCE**

The Contractor agrees to comply with 49 USC § 50101, which provides that Federal funds may not be obligated unless all steel and manufactured goods used in AIP funded projects are produced in the United States, unless the Federal Aviation Administration has issued a waiver for the product; the product is listed as an Excepted Article, Material Or Supply in Federal Acquisition Regulation subpart 25.108; or is included in the FAA Nationwide Buy American Waivers Issued list.

A bidder or offeror must complete and submit the Buy America certification included herein with their bid or offer. The Owner will reject as nonresponsive any bid or offer that does not include a completed Certificate of Buy American Compliance.

#### **A4.3.2 Certificate of Buy American Compliance – Total Facility**

##### **CERTIFICATE OF BUY AMERICAN COMPLIANCE FOR TOTAL FACILITY**

As a matter of bid responsiveness, the bidder or offeror must complete, sign, date, and submit this certification statement with its proposal. The bidder or offeror must indicate how it intends to comply with 49 USC § 50101 by selecting one of the following certification statements. These statements are mutually exclusive. Bidder must select one or the other (i.e. not both) by inserting a checkmark (✓) or the letter “X”.

- Bidder or offeror hereby certifies that it will comply with 49 USC § 50101 by:
- a) Only installing steel and manufactured products produced in the United States; or
  - b) Installing manufactured products for which the Federal Aviation Administration (FAA) has issued a waiver as indicated by inclusion on the current FAA Nationwide Buy American Waivers Issued listing; or
  - c) Installing products listed as an Excepted Article, Material or Supply in Federal Acquisition Regulation Subpart 25.108.

By selecting this certification statement, the bidder or offeror agrees:

- To provide to the Owner evidence that documents the source and origin of the steel and manufactured product.
  - To faithfully comply with providing U.S. domestic products.
  - To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.
- The bidder or offeror hereby certifies it cannot comply with the 100 percent Buy American Preferences of 49 USC § 50101(a) but may qualify for either a Type 3 or Type 4 waiver under 49 USC § 50101(b). By selecting this certification statement, the apparent bidder or offeror with the apparent low bid agrees:
- a) To submit to the Owner within 15 calendar days of the bid opening, a formal waiver request and required documentation that supports the type of waiver being requested.
  - b) That failure to submit the required documentation within the specified timeframe is cause for a non-responsive determination that may result in rejection of the proposal.
  - c) To faithfully comply with providing U.S. domestic products at or above the approved U.S. domestic content percentage as approved by the FAA.
  - d) To furnish U.S. domestic product for any waiver request that the FAA rejects.
  - e) To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.

#### **Required Documentation**

**Type 3 Waiver** – The cost of components and subcomponents produced in the United States is more than 60 percent of the cost of all components and subcomponents of the “facility”. The required documentation for a Type 3 waiver is:

- a) Listing of all manufactured products that are not comprised of 100 percent U.S. domestic content (excludes products listed on the FAA Nationwide Buy American Waivers Issued listing and products excluded by Federal Acquisition Regulation Subpart 25.108; products of unknown origin must be considered as non-domestic products in their entirety).
- b) Cost of non-domestic components and subcomponents, excluding labor costs associated with final assembly and installation at project location.
- c) Percentage of non-domestic component and subcomponent cost as compared to total “facility” component and subcomponent costs, excluding labor costs associated with final assembly and installation at project location.

**Type 4 Waiver** – Total cost of project using U.S. domestic source product exceeds the total project cost using non-domestic product by 25 percent. The required documentation for a Type 4 of waiver is:

- a) Detailed cost information for total project using U.S. domestic product
- b) Detailed cost information for total project using non-domestic product

**False Statements:** Per 49 USC § 47126, this certification concerns a matter within the jurisdiction of the Federal Aviation Administration and the making of a false, fictitious or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code.

### **A4.3.3 Certificate of Buy American Compliance – Manufactured Product**

#### **Certificate of Buy American Compliance for Manufactured Products**

As a matter of bid responsiveness, the bidder or offeror must complete, sign, date, and submit this certification statement with their proposal. The bidder or offeror must indicate how they intend to comply with 49 USC § 50101 by selecting one on the following certification statements. These statements are mutually exclusive. Bidder must select one or the other (not both) by inserting a checkmark (✓) or the letter “X”.

- Bidder or offeror hereby certifies that it will comply with 49 USC § 50101 by:
- a) Only installing steel and manufactured products produced in the United States;
  - b) Installing manufactured products for which the Federal Aviation Administration (FAA) has issued a waiver as indicated by inclusion on the current FAA Nationwide Buy American Waivers Issued listing; or
  - c) Installing products listed as an Excepted Article, Material or Supply in Federal Acquisition Regulation Subpart 25.108.

By selecting this certification statement, the bidder or offeror agrees:

1. To provide to the Owner evidence that documents the source and origin of the steel and manufactured product.
  2. To faithfully comply with providing U.S. domestic product.
  3. To furnish U.S. domestic product for any waiver request that the FAA rejects
  4. To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.
- The bidder or offeror hereby certifies it cannot comply with the 100 percent Buy American Preferences of 49 USC § 50101(a) but may qualify for either a Type 3 or Type 4 waiver under 49 USC § 50101(b). By selecting this certification statement, the apparent bidder or offeror with the apparent low bid agrees:
1. To the submit to the Owner within 15 calendar days of the bid opening, a formal waiver request and required documentation that supports the type of waiver being requested.
  2. That failure to submit the required documentation within the specified timeframe is cause for a non-responsive determination may result in rejection of the proposal.
  3. To faithfully comply with providing U.S. domestic products at or above the approved U.S. domestic content percentage as approved by the FAA.
  4. To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.

#### **Required Documentation**

**Type 3 Waiver** – The cost of the item components and subcomponents produced in the United States is more than 60 percent of the cost of all components and subcomponents of the “item”. The required documentation for a Type 3 waiver is:

- a) Listing of all product components and subcomponents that are not comprised of 100 percent U.S. domestic content (Excludes products listed on the FAA Nationwide Buy American Waivers Issued listing and products excluded by Federal Acquisition Regulation Subpart 25.108; products of unknown origin must be considered as non-domestic products in their entirety).
- b) Cost of non-domestic components and subcomponents, excluding labor costs associated with final assembly at place of manufacture.
- c) Percentage of non-domestic component and subcomponent cost as compared to total “item” component and subcomponent costs, excluding labor costs associated with final assembly at place of manufacture.

**Type 4 Waiver** – Total cost of project using U.S. domestic source product exceeds the total project cost using non-domestic product by 25 percent. The required documentation for a Type 4 of waiver is:

- a) Detailed cost information for total project using U.S. domestic product
- b) Detailed cost information for total project using non-domestic product

**False Statements:** Per 49 USC § 47126, this certification concerns a matter within the jurisdiction of the Federal Aviation Administration and the making of a false, fictitious or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code.

Title

## **A5 CIVIL RIGHTS - GENERAL**

### **A5.1 SOURCE**

49 USC § 47123

### **A5.2 APPLICABILITY**

There are two separate civil rights provisions that apply to projects:

1. FAA General Civil Rights Provision and,
2. Title VI provisions, which are addressed in Appendix A6.

**Contract Types** – The General Civil Rights Provisions found in 49 USC § 47123, derived from the Airport and Airway Improvement Act of 1982, Section 520, apply to all sponsor contracts *regardless* of funding source.

**Use of Provision – MANDATORY TEXT.** There are two separate general civil rights provisions —one that is used for contracts, and one that is used for lease agreements or transfer agreements. The sponsor must incorporate the text of the appropriate provision without modification into the contract, or the lease or transfer agreement.

### **A5.3 CONTRACT CLAUSE (Use the Correct Clause for the Situation)**

#### **A5.3.1 Clause that is used for Contracts**

##### **GENERAL CIVIL RIGHTS PROVISIONS**

The Contractor agrees to comply with pertinent statutes, Executive Orders and such rules as are promulgated to ensure that no person shall, on the grounds of race, creed, color, national origin, sex, age, or disability be excluded from participating in any activity conducted with or benefiting from Federal assistance.

This provision binds the Contractor and subcontractors from the bid solicitation period through the completion of the contract. This provision is in addition to that required by Title VI of the Civil Rights Act of 1964.

#### **A5.3.2 Clause that is used for Lease Agreements or Transfer Agreements**

##### **GENERAL CIVIL RIGHTS PROVISIONS**

The (tenant/concessionaire/lessee) agrees to comply with pertinent statutes, Executive Orders and such rules as are promulgated to ensure that no person shall, on the grounds of race, creed, color, national origin, sex, age, or disability be excluded from participating in any activity conducted with or benefiting from Federal assistance. If the (tenant/concessionaire/lessee) transfers its obligation to another, the transferee is obligated in the same manner as the (tenant/concessionaire/lessor).

This provision obligates the (tenant/concessionaire/lessee) for the period during which the property is owned, used or possessed by the (tenant/concessionaire/lessee) and the airport remains obligated to the

Federal Aviation Administration. This provision is in addition to that required by Title VI of the Civil Rights Act of 1964.

## A6 CIVIL RIGHTS – TITLE VI ASSURANCE

### A6.1 SOURCE

49 USC § 47123

FAA Order 1400.11

### A6.2 APPLICABILITY

Title VI of the Civil Rights Act of 1964, as amended, (Title VI) prohibits discrimination on the grounds of race, color, or national origin under any program or activity receiving Federal financial assistance. Sponsors must include appropriate clauses from the Standard DOT Title VI Assurances in all contracts and solicitations.

The text of each individual clause comes from the U.S. Department of Transportation [Order DOT 1050.2](#), Standard Title VI Assurances and Nondiscrimination Provisions, effective April 24, 2013. These assurances require that the Recipient (the sponsor) insert the appropriate clauses in the form provided by the DOT. Where the clause refers to the applicable activity, project, or program, it means the AIP project.

The clauses are as follows:

#### A6.2.1 Applicability of Title VI Solicitation Notice

Contract Clause	The Sponsor must include the contract clause in:	Clause Text is Included in Paragraph
Title VI Solicitation Notice – <ul style="list-style-type: none"><li>Assurance 2 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li><li>Assurance 30d of the Airport Sponsor Assurances</li></ul>	<ol style="list-style-type: none"><li>All AIP funded solicitations for bids, requests for proposals, or any work subject to Title VI regulations; and</li><li>All sponsor proposals for negotiated agreements <b>regardless of funding source.</b></li></ol>	A6.3.1
Title VI Clauses for Compliance with Nondiscrimination Requirements <ul style="list-style-type: none"><li>Assurance 3 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li><li>Assurance 30e.1 of the Airport Sponsor Assurances</li></ul>	Every contract or agreement (unless the sponsor has determined, and the FAA concurs, that the contract or agreement is not subject to the Nondiscrimination Acts and Authorities)  It has been determined that service contracts with utility companies that are not already subject to nondiscrimination requirements must include this clause.	A6.4.1

Contract Clause	The Sponsor must include the contract clause in:	Clause Text is Included in Paragraph
<p>Title VI Required Clause for Property Interests Transferred from the United States</p> <ul style="list-style-type: none"> <li>Assurance 4 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li> <li>Assurance 30e.3 of the Airport Sponsor Assurances</li> </ul>	<p>As a covenant running with the land, in any deed from the United States effecting or recording a transfer of real property, structures, use, or improvements thereon or interest therein to a sponsor.</p> <p>This is a rare occurrence and it will be the responsibility of the United States government to include the clause in the contract.</p>	A6.4.2
<p>Title VI Required Clause for Transfer of Real Property Acquired or Improved Under the Activity, Facility or Program –</p> <ul style="list-style-type: none"> <li>Assurance 5 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li> <li>Assurance 30e.4a of the Airport Sponsor Assurances</li> </ul>	<p>As a covenant running with the land, in any future deeds, leases, licenses, permits, or similar instruments entered into by the sponsor with other parties for all transfers of real property acquired or improved under Airport Improvement Program</p> <p>This applies to agreements such as leases where a physical portion of the airport is transferred for use, for example a fuel farm, apron space, or a parking facility.</p>	A6.4.3
<p>Clause for Construction/Use/Access to Real Property Acquired Under the Activity, Facility or Program</p> <ul style="list-style-type: none"> <li>Assurance 6 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li> <li>Assurance 30e.4b of the Airport Sponsor Assurances</li> </ul>	<p>In any future (deeds, leases, licenses, permits, or similar instruments) entered into by the sponsor with other parties for the construction or use of, or access to, space on, over, or under real property acquired or improved under Airport Improvement Program</p> <p>This applies to agreements such as leases of concession space in a terminal.</p>	A6.4.4
<p>Title VI List of Pertinent Nondiscrimination Acts and Authorities</p> <ul style="list-style-type: none"> <li>Assurance 3 of the DOT Standard Title VI Assurances and Nondiscrimination Clauses</li> <li>Assurance 30e.2 of the Airport Sponsor Assurances</li> </ul>	<p>Insert this list in every contract or agreement, unless the sponsor has determined, and the FAA concurs, that the contract or agreement is not subject to the Nondiscrimination Acts and Authorities.</p> <p><b>This list can be omitted if the FAA has determined that the contractor or company is already subject to nondiscrimination requirements.</b></p>	A6.4.5

## **A6.3 SOLICITATION CLAUSE**

**The sponsor must include this clause in:**

- 1) All AIP funded solicitations for bids, requests for proposals, or any work subject to Title VI regulations; and
- 2) All sponsor proposals for negotiated agreements **regardless of funding source.**

### **A6.3.1 Title VI Solicitation Notice**

**Title VI Solicitation Notice:**

The **(Name of Sponsor)**, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 USC §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders or offerors that it will affirmatively ensure that any contract entered into pursuant to this advertisement, [select disadvantaged business enterprises or airport concession disadvantaged business enterprises] will be afforded full and fair opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award.

## A6.4 CONTRACT CLAUSES

### A6.4.1 Title VI Clauses for Compliance with Nondiscrimination Requirements

The sponsor must include this contract clause in:

- 1) Every contract or agreement (unless the sponsor has determined, and the FAA concurs, that the contract or agreement is not subject to the Nondiscrimination Acts and Authorities); and
- 2) Service contracts with utility companies that are not already subject to nondiscrimination requirements.

#### **Compliance with Nondiscrimination Requirements:**

During the performance of this contract, the Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the “Contractor”), agrees as follows:

1. **Compliance with Regulations:** The Contractor (hereinafter includes consultants) will comply with the Title VI List of Pertinent Nondiscrimination Acts and Authorities, as they may be amended from time to time, which are herein incorporated by reference and made a part of this contract.
2. **Nondiscrimination:** The Contractor, with regard to the work performed by it during the contract, will not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurements of materials and leases of equipment. The Contractor will not participate directly or indirectly in the discrimination prohibited by the Nondiscrimination Acts and Authorities, including employment practices when the contract covers any activity, project, or program set forth in Appendix B of 49 CFR part 21.
3. **Solicitations for Subcontracts, including Procurements of Materials and Equipment:** In all solicitations, either by competitive bidding or negotiation made by the Contractor for work to be performed under a subcontract, including procurements of materials, or leases of equipment, each potential subcontractor or supplier will be notified by the Contractor of the contractor’s obligations under this contract and the Nondiscrimination Acts and Authorities on the grounds of race, color, or national origin.
4. **Information and Reports:** The Contractor will provide all information and reports required by the Acts, the Regulations, and directives issued pursuant thereto and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the sponsor or the Federal Aviation Administration to be pertinent to ascertain compliance with such Nondiscrimination Acts and Authorities and instructions. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish the information, the Contractor will so certify to the sponsor or the Federal Aviation Administration, as appropriate, and will set forth what efforts it has made to obtain the information.
5. **Sanctions for Noncompliance:** In the event of a Contractor’s noncompliance with the non-discrimination provisions of this contract, the sponsor will impose such contract sanctions as it or the Federal Aviation Administration may determine to be appropriate, including, but not limited to:

- a. Withholding payments to the Contractor under the contract until the Contractor complies; and/or
  - b. Cancelling, terminating, or suspending a contract, in whole or in part.
6. **Incorporation of Provisions:** The Contractor will include the provisions of paragraphs one through six in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Acts, the Regulations, and directives issued pursuant thereto. The Contractor will take action with respect to any subcontract or procurement as the sponsor or the Federal Aviation Administration may direct as a means of enforcing such provisions including sanctions for noncompliance. Provided, that if the Contractor becomes involved in, or is threatened with litigation by a subcontractor, or supplier because of such direction, the Contractor may request the sponsor to enter into any litigation to protect the interests of the sponsor. In addition, the Contractor may request the United States to enter into the litigation to protect the interests of the United States.

#### **A6.4.2 Title VI Clauses for Deeds Transferring United States Property**

This is a rare occurrence, and it will be the responsibility of the United States government to include the clause in the contract. It will be included as a covenant running with the land, in any deed from the United States effecting or recording a transfer of real property, structures, use, or improvements thereon or interest therein to a sponsor.

#### **CLAUSES FOR DEEDS TRANSFERRING UNITED STATES PROPERTY**

The following clauses will be included in deeds effecting or recording the transfer of real property, structures, or improvements thereon, or granting interest therein from the United States pursuant to the provisions of the Airport Improvement Program grant assurances.

**NOW, THEREFORE**, the Federal Aviation Administration as authorized by law and upon the condition that the (*Title of Sponsor*) will accept title to the lands and maintain the project constructed thereon in accordance with (*Name of Appropriate Legislative Authority*), for the (**Airport Improvement Program or other program for which land is transferred**), and the policies and procedures prescribed by the Federal Aviation Administration of the U.S. Department of Transportation in accordance and in compliance with all requirements imposed by Title 49, Code of Federal Regulations, U.S. Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non-discrimination in Federally-assisted programs of the U.S. Department of Transportation pertaining to and effectuating the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252; 42 USC § 2000d to 2000d-4), does hereby remise, release, quitclaim and convey unto the (*Title of Sponsor*) all the right, title and interest of the U.S. Department of Transportation/Federal Aviation Administration in and to said lands described in (*Exhibit A attached hereto or other exhibit describing the transferred property*) and made a part hereof.

#### **(HABENDUM CLAUSE)**

**TO HAVE AND TO HOLD** said lands and interests therein unto (*Title of Sponsor*) and its successors forever, subject, however, to the covenants, conditions, restrictions and reservations herein contained as follows, which will remain in effect for the period during which the real property or structures are used for a purpose for which Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits and will be binding on the (*Title of Sponsor*), its successors and assigns.

The (*Title of Sponsor*), in consideration of the conveyance of said lands and interests in lands, does hereby covenant and agree as a covenant running with the land for itself, its successors and assigns, that (1) no person will on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination with regard to any facility located wholly or in part on, over, or under such lands hereby conveyed [,] [and]\* (2) that the (*Title of Sponsor*) will use the lands and interests in lands and interests in lands so conveyed, in compliance with all requirements imposed by or pursuant to Title 49, Code of Federal Regulations, U.S. Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non-discrimination in Federally-assisted programs of the U.S. Department of Transportation, Effectuation of Title VI of the Civil Rights Act of 1964, and as said Regulations and Acts may be amended[, and (3) that in the event of breach of any of the above-mentioned nondiscrimination conditions, the Department will have a right to enter or re-enter said lands and facilities on said land, and that above described land and facilities will thereon revert to and vest in and become the absolute property of the Federal Aviation Administration and its assigns as such interest existed prior to this instruction].\*

(\*Reverter clause and related language to be used only when it is determined that such a clause is necessary in order to make clear the purpose of Title VI.)

#### **A6.4.3 Title VI Clauses for Transfer of Real Property Acquired or Improved Under the Activity, Facility, or Program**

This applies to agreements such as leases where a physical portion of the airport is transferred for use—for example a fuel farm, apron space, or a parking facility—and will be included as a covenant running with the land, in any future deeds, leases, licenses, permits, or similar instruments entered into by the sponsor with other parties for all transfers of real property acquired or improved under the Airport Improvement Program.

#### **CLAUSES FOR TRANSFER OF REAL PROPERTY ACQUIRED OR IMPROVED UNDER THE AIRPORT IMPROVEMENT PROGRAM**

The following clauses will be included in (deeds, licenses, leases, permits, or similar instruments) entered into by the (*Title of Sponsor*) pursuant to the provisions of the Airport Improvement Program grant assurances.

- A. The (grantee, lessee, permittee, etc. as appropriate) for himself/herself, his/her heirs, personal representatives, successors in interest, and assigns, as a part of the consideration hereof, does hereby covenant and agree [in the case of deeds and leases add “as a covenant running with the land”] that:
  1. In the event facilities are constructed, maintained, or otherwise operated on the property described in this (deed, license, lease, permit, etc.) for a purpose for which a Federal Aviation Administration activity, facility, or program is extended or for another purpose involving the provision of similar services or benefits, the (grantee, licensee, lessee, permittee, etc.) will maintain and operate such facilities and services in compliance with all requirements imposed by the Nondiscrimination Acts and Regulations listed in the Pertinent List of Nondiscrimination Authorities (as may be amended) such that no person on the grounds of race, color, or national origin, will be excluded from participation in, denied the benefits of, or be otherwise subjected to discrimination in the use of said facilities.
- B. With respect to licenses, leases, permits, etc., in the event of breach of any of the above Nondiscrimination covenants, (*Title of Sponsor*) will have the right to terminate the (lease,

license, permit, etc.) and to enter, re-enter, and repossess said lands and facilities thereon, and hold the same as if the (lease, license, permit, etc.) had never been made or issued.\*

- C. With respect to a deed, in the event of breach of any of the above Nondiscrimination covenants, the (*Title of Sponsor*) will have the right to enter or re-enter the lands and facilities thereon, and the above described lands and facilities will there upon revert to and vest in and become the absolute property of the (*Title of Sponsor*) and its assigns.\*

(\*Reverter clause and related language to be used only when it is determined that such a clause is necessary to make clear the purpose of Title VI.)

**A6.4.4 Title VI Clauses for Construction/Use/Access to Real Property Acquired Under the Activity, Facility or Program**

This applies to agreements such as leases of concession space in a terminal and any future deeds, leases, licenses, permits, or similar instruments entered into by the sponsor with other parties for the construction or use of, or access to, space on, over, or under real property acquired or improved under the Airport Improvement Program.

**CLAUSES FOR CONSTRUCTION/USE/ACCESS TO REAL PROPERTY ACQUIRED UNDER THE ACTIVITY, FACILITY OR PROGRAM**

The following clauses will be included in deeds, licenses, permits, or similar instruments/agreements entered into by (*Title of Sponsor*) pursuant to the provisions of the Airport Improvement Program grant assurances.

- A. The (grantee, licensee, permittee, etc., as appropriate) for himself/herself, his/her heirs, personal representatives, successors in interest, and assigns, as a part of the consideration hereof, does hereby covenant and agree (in the case of deeds and leases add, “as a covenant running with the land”) that (1) no person on the ground of race, color, or national origin, will be excluded from participation in, denied the benefits of, or be otherwise subjected to discrimination in the use of said facilities, (2) that in the construction of any improvements on, over, or under such land, and the furnishing of services thereon, no person on the ground of race, color, or national origin, will be excluded from participation in, denied the benefits of, or otherwise be subjected to discrimination, (3) that the (grantee, licensee, lessee, permittee, etc.) will use the premises in compliance with all other requirements imposed by or pursuant to the List of discrimination Acts And Authorities.
- B. With respect to (licenses, leases, permits, etc.), in the event of breach of any of the above nondiscrimination covenants, (*Title of Sponsor*) will have the right to terminate the (license, permit, etc., as appropriate) and to enter or re-enter and repossess said land and the facilities thereon, and hold the same as if said (license, permit, etc., as appropriate) had never been made or issued.\*
- C. With respect to deeds, in the event of breach of any of the above nondiscrimination covenants, (*Title of Sponsor*) will there upon revert to and vest in and become the absolute property of (*Title of Sponsor*) and its assigns.\*

(\*Reverter clause and related language to be used only when it is determined that such a clause is necessary to make clear the purpose of Title VI.)

#### **A6.4.5 Title VI List of Pertinent Nondiscrimination Acts and Authorities**

Insert this list in every contract or agreement, unless the sponsor has determined and the FAA concurs, that the contract or agreement is not subject to the Nondiscrimination Acts and Authorities. This list can be omitted if the FAA has determined that the contractor or company is already subject to nondiscrimination requirements.

##### **Title VI List of Pertinent Nondiscrimination Acts and Authorities**

During the performance of this contract, the Contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the “Contractor”) agrees to comply with the following non-discrimination statutes and authorities; including but not limited to:

- Title VI of the Civil Rights Act of 1964 (42 USC § 2000d *et seq.*, 78 stat. 252) (prohibits discrimination on the basis of race, color, national origin);
- 49 CFR part 21 (Non-discrimination in Federally-assisted programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act of 1964);
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 USC § 4601) (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Section 504 of the Rehabilitation Act of 1973 (29 USC § 794 *et seq.*), as amended (prohibits discrimination on the basis of disability); and 49 CFR part 27;
- The Age Discrimination Act of 1975, as amended (42 USC § 6101 *et seq.*) (prohibits discrimination on the basis of age);
- Airport and Airway Improvement Act of 1982 (49 USC § 471, Section 47123), as amended (prohibits discrimination based on race, creed, color, national origin, or sex);
- The Civil Rights Restoration Act of 1987 (PL 100-209) (broadened the scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms “programs or activities” to include all of the programs or activities of the Federal-aid recipients, sub-recipients and contractors, whether such programs or activities are Federally funded or not);
- Titles II and III of the Americans with Disabilities Act of 1990, which prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities (42 USC §§ 12131 – 12189) as implemented by U.S. Department of Transportation regulations at 49 CFR parts 37 and 38;
- The Federal Aviation Administration’s Nondiscrimination statute (49 USC § 47123) (prohibits discrimination on the basis of race, color, national origin, and sex);
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, which ensures nondiscrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations;
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting agency guidance, national origin discrimination includes discrimination because of limited English proficiency (LEP). To ensure compliance with Title VI, you must take reasonable steps to ensure that LEP persons have meaningful access to your programs (70 Fed. Reg. at 74087 to 74100);

- Title IX of the Education Amendments of 1972, as amended, which prohibits you from discriminating because of sex in education programs or activities (20 USC 1681 et seq).

## **A7 CLEAN AIR AND WATER POLLUTION CONTROL**

### **A7.1 SOURCE**

2 CFR § 200, Appendix II(G)

### **A7.2 APPLICABILITY**

**Contract Types** – This provision is required for all contracts and lower tier contracts that exceed \$150,000.

**Use of Provision** – No mandatory language provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor's language must fully satisfy the requirements of Appendix II to 2 CFR §200.

### **A7.3 CONTRACT CLAUSE**

#### **CLEAN AIR AND WATER POLLUTION CONTROL**

Contractor agrees to comply with all applicable standards, orders, and regulations issued pursuant to the Clean Air Act (42 USC § 740-7671q) and the Federal Water Pollution Control Act as amended (33 USC § 1251-1387). The Contractor agrees to report any violation to the Owner immediately upon discovery. The Owner assumes responsibility for notifying the Environmental Protection Agency (EPA) and the Federal Aviation Administration.

Contractor must include this requirement in all subcontracts that exceeds \$150,000.

## **A8 CONTRACT WORKHOURS AND SAFETY STANDARDS ACT REQUIREMENTS**

### **A8.1 SOURCE**

2 CFR § 200, Appendix II(E)

### **A8.2 APPLICABILITY**

Contract Workhours and Safety Standards Act Requirements (CWHSSA) requires contractors and subcontractors on covered contracts to pay laborers and mechanics employed in the performance of the contracts one and one-half times their basic rate of pay for all hours worked over 40 in a workweek. CWHSSA prohibits unsanitary, hazardous, or dangerous working conditions on federally assisted projects. The Wage and Hour Division (WHD) within the U.S. Department of Labor (DOL) enforces the compensation requirements of this Act, while DOL's Occupational Safety and Health Administration (OSHA) enforces the safety and health requirements

#### **Contract Types –**

*Construction* – This provision applies to all contracts and lower tier contracts that exceed \$100,000, and employ laborers, mechanics, watchmen, and guards.

*Equipment* – This provision applies to any equipment project exceeding \$100,000 that involves installation of equipment onsite (e.g. electrical vault equipment). This provision does not apply to equipment acquisition projects where the manufacture of the equipment takes place offsite at the vendor plant (e.g. ARFF and SRE vehicles).

*Professional Services* – This provision applies to professional service agreements that exceed \$100,000 and employs laborers, mechanics, watchmen, and guards. This includes members of survey crews and exploratory drilling operations.

*Property* – While most land transactions do not involve employment of laborers, mechanics, watchmen, and guards, under certain circumstances, a property acquisition project could require such employment. Examples include the installation of property fencing or testing for environmental contamination

**Use of Provision – MANDATORY TEXT.** Sponsors must incorporate this text without modification.

### **A8.3 CONTRACT CLAUSE**

#### **CONTRACT WORKHOURS AND SAFETY STANDARDS ACT REQUIREMENTS**

##### **1. Overtime Requirements.**

No contractor or subcontractor contracting for any part of the contract work which may require or involve the employment of laborers or mechanics shall require or permit any such laborer or mechanic, including watchmen and guards, in any workweek in which he or she is employed on such work to work in excess of forty hours in such workweek unless such laborer or mechanic receives compensation at a

rate not less than one and one-half times the basic rate of pay for all hours worked in excess of forty hours in such workweek.

#### 2. Violation; Liability for Unpaid Wages; Liquidated Damages.

In the event of any violation of the clause set forth in paragraph (1) of this clause, the Contractor and any subcontractor responsible therefor shall be liable for the unpaid wages. In addition, such contractor and subcontractor shall be liable to the United States (in the case of work done under contract for the District of Columbia or a territory, to such District or to such territory), for liquidated damages. Such liquidated damages shall be computed with respect to each individual laborer or mechanic, including watchmen and guards, employed in violation of the clause set forth in paragraph (1) of this clause, in the sum of \$10 for each calendar day on which such individual was required or permitted to work in excess of the standard workweek of forty hours without payment of the overtime wages required by the clause set forth in paragraph (1) of this clause.

#### 3. Withholding for Unpaid Wages and Liquidated Damages.

The Federal Aviation Administration (FAA) or the Owner shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld, from any moneys payable on account of work performed by the contractor or subcontractor under any such contract or any other Federal contract with the same prime contractor, or any other federally assisted contract subject to the Contract Work Hours and Safety Standards Act, which is held by the same prime contractor, such sums as may be determined to be necessary to satisfy any liabilities of such contractor or subcontractor for unpaid wages and liquidated damages as provided in the clause set forth in paragraph (2) of this clause.

#### 4. Subcontractors.

The Contractor or subcontractor shall insert in any subcontracts the clauses set forth in paragraphs (1) through (4) and also a clause requiring the subcontractor to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for compliance by any subcontractor or lower tier subcontractor with the clauses set forth in paragraphs (1) through (4) of this clause.

## **A9 COPELAND “ANTI-KICKBACK” ACT**

### **A9.1 SOURCE**

2 CFR § 200, Appendix II(D)

29 CFR Parts 3 and 5

### **A9.2 APPLICABILITY and PURPOSE**

The Copeland (Anti-Kickback) Act (18 USC 874 and 40 USC 3145) makes it unlawful to induce by force, intimidation, threat of dismissal from employment, or by any other manner, any person employed in the construction or repair of public buildings or public works, financed in whole or in part by the United States, to give up any part of the compensation to which that person is entitled under a contract of employment. The Copeland Act also requires each contractor and subcontractor to furnish weekly a statement of compliance with respect to the wages paid each employee during the preceding week.

#### **Contract Types –**

*Construction* – This provision applies to all construction contracts and subcontracts financed under the AIP that exceed \$2,000.

*Equipment* – This provision applies to all equipment installation projects (e.g. electrical vault improvements) financed under the AIP that exceed \$2,000. This provision does not apply to equipment acquisitions where the equipment is manufactured at the vendor’s plant (e.g. SRE and ARFF vehicles).

*Professional Services* –The emergence of different project delivery methods has created situations where Professional Service Agreements (PSAs) include tasks that meet the definition of construction, alteration, or repair as defined in 29 CFR Part 5. If such tasks result in work that qualifies as construction, alteration, or repair and it exceeds \$2,000, the PSA must incorporate the Copeland Anti-kickback provision.

*Property* –Ordinarily, land acquisition projects would not involve employment of laborers or mechanics and thus the Copeland Anti-Kickback provision would not apply. However, land projects that involve installation of boundary fencing and demolition of structures would involve laborers and mechanics. The sponsor must include this provision if the land acquisition project involves employment of laborers or mechanics for a contract exceeding \$2,000.

**Use of Provision – MANDATORY TEXT.** 29 CFR Part 5 establishes specific language a sponsor must use in construction contracts. The sponsor may not make any modification to the standard language. Architectural/Engineering (A/E) firms that employ laborers and mechanics on a task that meets the definition of construction, alteration, or repair are acting as a contractor. The sponsor may not substitute the term “contractor” for “consultant” in such instances.

### **A9.3 CONTRACT CLAUSE**

#### **COPELAND “ANTI-KICKBACK” ACT**

Contractor must comply with the requirements of the Copeland “Anti-Kickback” Act (18 USC 874 and 40 USC 3145), as supplemented by Department of Labor regulation 29 CFR part 3. Contractor and subcontractors are prohibited from inducing, by any means, any person employed on the project to give up any part of the compensation to which the employee is entitled. The Contractor and each Subcontractor must submit to the Owner, a weekly statement on the wages paid to each employee performing on covered work during the prior week. Owner must report any violations of the Act to the Federal Aviation Administration.

## **A10 DAVIS-BACON REQUIREMENTS**

### **A10.1 SOURCE**

2 CFR § 200, Appendix II(D)

29 CFR Part 5

### **A10.2 APPLICABILITY**

The Davis-Bacon Act ensures that laborers and mechanics employed under the contract receive pay no less than the locally prevailing wages and fringe benefits as determined by the Department of Labor.

#### **Contract Types –**

*Construction* – Incorporate into all construction contracts and subcontracts that exceed \$2,000 and include funding from the AIP.

*Equipment* – This provision applies to all equipment installation projects (e.g. electrical vault improvements) financed under the AIP that exceed \$ 2, 000. This provision does not apply to equipment acquisitions where the equipment is manufactured at the vendor’s plant (e.g. SRE and ARFF vehicles)

*Professional Services* – The emergence of different project delivery methods has created situations where Professional Service Agreements (PSAs) includes tasks that meet the definition of construction, alteration, or repair as defined in 29 CFR Part 5. If such tasks result in work that qualifies as construction, alteration, or repair and it exceeds \$2,000, the PSA must incorporate this clause.

*Property* – Ordinarily, land acquisition projects would not involve employment of laborers or mechanics and thus the provision would not apply. However, land projects that involve installation of boundary fencing and demolition of structures would involve laborers and mechanics. The sponsor must include this provision if the land acquisition project involves employment of laborers or mechanics for a contract exceeding \$2,000.

*Fencing Projects* – Fencing projects that exceed \$2,000 must include this provision.

**Use of Provision – MANDATORY TEXT.** 29 CFR part 5 establishes specific language a sponsor must use. The sponsor may not make any modification to the standard language. A/E firms that employ laborers and mechanics on a task that meets the definition of construction, alteration, or repair are acting as a contractor. The sponsor may not substitute the term “Contractor” for “Consultant” in such instances.

### **A10.3 CONTRACT CLAUSE**

#### **DAVIS-BACON REQUIREMENTS**

1. Minimum Wages.

(i) All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any

account (except such payroll deductions as are permitted by the Secretary of Labor under the Copeland Act (29 CFR Part 3)), the full amount of wages and bona fide fringe benefits (or cash equivalent thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the Contractor and such laborers and mechanics.

Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1(b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (1)(iv) of this section; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in 29 CFR Part 5.5(a)(4). Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: *Provided* that the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under (1)(ii) of this section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by the Contractor and its subcontractors at the site of the work in a prominent and accessible place where it can easily be seen by the workers.

(ii)(A) The contracting officer shall require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

- (1) The work to be performed by the classification requested is not performed by a classification in the wage determination;
- (2) The classification is utilized in the area by the construction industry; and
- (3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(B) If the Contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Washington, DC 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(C) In the event the Contractor, the laborers, or mechanics to be employed in the classification, or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits where appropriate), the contracting officer shall

refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(D) The wage rate (including fringe benefits where appropriate) determined pursuant to subparagraphs (1)(ii) (B) or (C) of this paragraph, shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If the Contractor does not make payments to a trustee or other third person, the Contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program: *Provided* that the Secretary of Labor has found, upon the written request of the Contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the Contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

## 2. Withholding.

The Federal Aviation Administration or the sponsor shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld from the Contractor under this contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers, employed by the Contractor or any subcontractor the full amount of wages required by the contract. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of work, all or part of the wages required by the contract, the Federal Aviation Administration may, after written notice to the Contractor, Sponsor, Applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

## 3. Payrolls and Basic Records.

(i) Payrolls and basic records relating thereto shall be maintained by the Contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work. Such records shall contain the name, address, and social security number of each such worker; his or her correct classification; hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in 1(b)(2)(B) of the Davis-Bacon Act); daily and weekly number of hours worked; deductions made; and actual wages paid. Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, the Contractor shall maintain records that show that the commitment to provide such benefits is

enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and that show the costs anticipated or the actual costs incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs.

(ii)(A) The Contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to the Federal Aviation Administration if the agency is a party to the contract, but if the agency is not such a party, the Contractor will submit the payrolls to the applicant, Sponsor, or Owner, as the case may be, for transmission to the Federal Aviation Administration. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i), except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually identifying number for each employee (*e.g.* the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH-347 is available for this purpose from the Wage and Hour Division Web site at [www.dol.gov/whd/forms/wh347instr.htm](http://www.dol.gov/whd/forms/wh347instr.htm) or its successor site. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker and shall provide them upon request to the Federal Aviation Administration if the agency is a party to the contract, but if the agency is not such a party, the Contractor will submit them to the applicant, sponsor, or Owner, as the case may be, for transmission to the Federal Aviation Administration, the Contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this section for a prime contractor to require a subcontractor to provide addresses and social security numbers to the prime contractor for its own records, without weekly submission to the sponsoring government agency (or the applicant, Sponsor, or Owner).

(B) Each payroll submitted shall be accompanied by a "Statement of Compliance," signed by the Contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

- (1) The payroll for the payroll period contains the information required to be provided under 29 CFR § 5.5(a)(3)(ii), the appropriate information is being maintained under 29 CFR § 5.5 (a)(3)(i), and that such information is correct and complete;
- (2) Each laborer and mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations 29 CFR Part 3;
- (3) Each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

(C) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the “Statement of Compliance” required by paragraph (3)(ii)(B) of this section.

(D) The falsification of any of the above certifications may subject the Contractor or subcontractor to civil or criminal prosecution under Section 1001 of Title 18 and Section 231 of Title 31 of the United States Code.

(iii) The Contractor or subcontractor shall make the records required under paragraph (3)(i) of this section available for inspection, copying, or transcription by authorized representatives of the sponsor, the Federal Aviation Administration, or the Department of Labor and shall permit such representatives to interview employees during working hours on the job. If the Contractor or subcontractor fails to submit the required records or to make them available, the Federal agency may, after written notice to the Contractor, Sponsor, applicant, or Owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR 5.12.

#### 4. Apprentices and Trainees.

(i) Apprentices. Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Bureau of Apprenticeship and Training, or with a State Apprenticeship Agency recognized by the Bureau, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Bureau of Apprenticeship and Training or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to the contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman’s hourly rate) specified in the Contractor’s or subcontractor’s registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice’s level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Bureau of Apprenticeship and Training, or a State Apprenticeship Agency recognized by the Bureau,

withdraws approval of an apprenticeship program, the Contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees. Except as provided in 29 CFR 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination that provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate that is not registered and participating in a training plan approved by the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, the Contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal Employment Opportunity. The utilization of apprentices, trainees, and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR Part 30.

#### 5. Compliance with Copeland Act Requirements.

The Contractor shall comply with the requirements of 29 CFR Part 3, which are incorporated by reference in this contract.

#### 6. Subcontracts.

The Contractor or subcontractor shall insert in any subcontracts the clauses contained in 29 CFR Part 5.5(a)(1) through (10) and such other clauses as the Federal Aviation Administration may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR Part 5.5.

#### 7. Contract Termination: Debarment.

A breach of the contract clauses in paragraph 1 through 10 of this section may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

#### 8. Compliance with Davis-Bacon and Related Act Requirements.

All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR Parts 1, 3, and 5 are herein incorporated by reference in this contract.

#### 9. Disputes Concerning Labor Standards.

Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR Parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the Contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

#### 10. Certification of Eligibility.

(i) By entering into this contract, the Contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in the Contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1).

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1).

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 USC 1001.

## **A11 DEBARMENT AND SUSPENSION**

### **A11.1 SOURCE**

2 CFR part 180 (Subpart C)

2 CFR part 1200

DOT Order 4200.5

### **A11.2 APPLICABILITY**

The sponsor must verify that the firm or individual that it is entering into a contract with is not presently suspended, excluded, or debarred by any Federal department or agency from participating in federally assisted projects. The sponsor accomplishes this by:

- 1) Checking the System for Award Management (SAM.gov) to verify that the firm or individual is not listed in SAM.gov as being suspended, debarred, or excluded;
- 2) Collecting a certification from the firm or individual that it is not suspended, debarred, or excluded; and
- 3) Incorporating a clause in the contract that requires lower tier contracts to verify that no suspended, debarred, or excluded firm or individual is included in the project.

**Contract Types** – This requirement applies to *covered transactions*, which are defined in 2 CFR part 180. AIP funded contracts are non-procurement transactions, as defined by §180.970. Covered transactions include any AIP-funded contract, regardless of tier, that is awarded by a contractor, subcontractor, supplier, consultant, or its agent or representative in any transaction, if the amount of the contract is expected to equal or exceed \$25,000. This includes contracts associated with land acquisition projects.

**Use of Provision** – No mandatory language provided. The following language is acceptable to the FAA in meeting the intent of this requirement. If the sponsor uses different language, the sponsor's language must fully satisfy the requirements of 2 CFR part 180. For professional service agreements, sponsor may substitute bidder/offeror with consultant.

### **A11.3 SOLICITATION CLAUSE**

#### **A11.3.1 Bidder or Offeror Certification**

##### **CERTIFICATION OF OFFERER/BIDDER REGARDING DEBARMENT**

By submitting a bid/proposal under this solicitation, the bidder or offeror certifies that neither it nor its principals are presently debarred or suspended by any Federal department or agency from participation in this transaction.

### **A11.3.2 Lower Tier Contract Certification**

#### **CERTIFICATION OF LOWER TIER CONTRACTORS REGARDING DEBARMENT**

The successful bidder, by administering each lower tier subcontract that exceeds \$25,000 as a “covered transaction”, must verify each lower tier participant of a “covered transaction” under the project is not presently debarred or otherwise disqualified from participation in this federally assisted project. The successful bidder will accomplish this by:

1. Checking the System for Award Management at website: <http://www.sam.gov>.
2. Collecting a certification statement similar to the Certification of Offerer /Bidder Regarding Debarment, above.
3. Inserting a clause or condition in the covered transaction with the lower tier contract.

If the Federal Aviation Administration later determines that a lower tier participant failed to disclose to a higher tier participant that it was excluded or disqualified at the time it entered the covered transaction, the FAA may pursue any available remedies, including suspension and debarment of the non-compliant participant.

## **A12 DISADVANTAGED BUSINESS ENTERPRISE**

### **A12.1 SOURCE**

49 CFR part 26

### **A12.2 APPLICABILITY**

A sponsor that anticipates awarding \$250,000 or more in AIP funded prime contracts in a federal fiscal year must have an approved Disadvantaged Business Enterprise (DBE) program on file with the FAA Office of Civil Rights (§ 26.21). The approved DBE program will identify a 3-year overall program goal that the sponsor bases on the availability of ready, willing, and able DBEs relative to all businesses ready, willing, and able to participate on the project (§ 26.45).

**Contract Types** – Sponsors with a DBE program on file with the FAA must include the three following provisions, if applicable:

- 1) Clause in all solicitations for proposals for which a contract goal has been established,
- 2) Clause in each prime contract, and
- 3) Clause in solicitations that are obtaining DBE participation through race/gender neutral means.

#### **Use of Provision –**

1. *Solicitations with a DBE Project Goal* – No mandatory language provided. 49 CFR §26.53 requires a sponsor's solicitation to address what a contractor must submit on proposed DBE participation. The language of A12.3.1 is acceptable to the FAA in meeting the intent of this requirement. If the sponsor uses different language, the sponsor's revised language must fully satisfy these requirements. The sponsor may require the contractor's submittal on proposed DBE participation either at bid opening as a matter of responsiveness or within five days of bid opening as a matter of responsibility.
2. *Solicitations Relying on Race-gender Neutral Means* – No mandatory language provided. The language of A12.3.2 is acceptable to the FAA in meeting the intent of this requirement. If the sponsor uses different language, the sponsor's revised language must fully satisfy requirements for a sponsor that is not applying a project specific contract goal but is covered by a DBE program on file with the FAA.
3. *Contracts Covered by DBE Program* – **MANDATORY TEXT PROVIDED**. Sponsors must incorporate this language if they have a DBE program on file with the FAA. This includes projects where DBE participation is obtained through race-gender neutral means (i.e. no project goal). Sections §26.13 and §26.29 establish mandatory language for contractor assurance and prompt payment. The sponsor must not modify the language.
4. Sponsors that are not required to have a DBE program on file with the FAA are not required to include DBE provisions and clauses.

## **A12.3 REQUIRED PROVISIONS**

### **A12.3.1 Solicitation Language (Solicitations that include a Project Goal)**

Information Submitted as a matter of bidder responsiveness:

The Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR §26.53.

As a condition of bid responsiveness, the Bidder or Offeror must submit the following information with its proposal on the forms provided herein:

- 1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
- 2) A description of the work that each DBE firm will perform;
- 3) The dollar amount of the participation of each DBE firm listed under (1)
- 4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet the Owner's project goal; and
- 5) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by the Bidder or Offeror as described in appendix A to 49 CFR part 26.

Information submitted as a matter of bidder responsibility:

The Owner's award of this contract is conditioned upon Bidder or Offeror satisfying the good faith effort requirements of 49 CFR §26.53.

The successful Bidder or Offeror must provide written confirmation of participation from each of the DBE firms the Bidder or Offeror lists in its commitment within five days after bid opening.

- 1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
- 2) A description of the work that each DBE firm will perform;
- 3) The dollar amount of the participation of each DBE firm listed under (1)
- 4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet the Owner's project goal; and
- 5) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by the Bidder or Offeror as described in appendix A to 49 CFR part 26.

### **A12.3.2 Solicitation Language (Race/Gender Neutral Means)**

The requirements of 49 CFR part 26 apply to this contract. It is the policy of the [Insert Name of Owner] to practice nondiscrimination based on race, color, sex, or national origin in the award or performance of this contract. The Owner encourages participation by all firms qualifying under this solicitation regardless of business size or ownership.

**A12.3.3 Prime Contracts (Projects Covered by a DBE Program)**

**DISADVANTAGED BUSINESS ENTERPRISES**

**Contract Assurance (§ 26.13) –**

The Contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The Contractor shall carry out applicable requirements of 49 CFR part 26 in the award and administration of Department of Transportation-assisted contracts. Failure by the Contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as the Owner deems appropriate, which may include, but is not limited to:

- 1) Withholding monthly progress payments;
- 2) Assessing sanctions;
- 3) Liquidated damages; and/or
- 4) Disqualifying the Contractor from future bidding as non-responsible.

**Prompt Payment (§26.29) –** The prime contractor agrees to pay each subcontractor under this prime contract for satisfactory performance of its contract no later than thirty (30) days from the receipt of each payment the prime contractor receives from City of Flagstaff. The prime contractor agrees further to return retainage payments to each subcontractor within thirty (30) days after the subcontractor's work is satisfactorily completed. Any delay or postponement of payment from the above referenced time frame may occur only for good cause following written approval of the City of Flagstaff. This clause applies to both DBE and non-DBE subcontractors.

## **A13 DISTRACTED DRIVING**

### **A13.1 SOURCE**

Executive Order 13513

DOT Order 3902.10

### **A13.2 APPLICABILITY**

The FAA encourages recipients of Federal grant funds to adopt and enforce safety policies that decrease crashes by distracted drivers, including policies to ban text messaging while driving when performing work related to a grant or subgrant.

**Contract Types** – Sponsors must insert this provision in all AIP funded contracts that exceed the micro-purchase threshold of 2 CFR §200.67 (currently set at \$3,500).

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA in meeting the intent of this requirement. If the sponsor uses different language, the sponsor’s revised language must fully satisfy these requirements.

### **A13.3 CONTRACT CLAUSE**

#### **TEXTING WHEN DRIVING**

In accordance with Executive Order 13513, “Federal Leadership on Reducing Text Messaging While Driving”, (10/1/2009) and DOT Order 3902.10, “Text Messaging While Driving”, (12/30/2009), the Federal Aviation Administration encourages recipients of Federal grant funds to adopt and enforce safety policies that decrease crashes by distracted drivers, including policies to ban text messaging while driving when performing work related to a grant or subgrant.

In support of this initiative, the Owner encourages the Contractor to promote policies and initiatives for its employees and other work personnel that decrease crashes by distracted drivers, including policies that ban text messaging while driving motor vehicles while performing work activities associated with the project. The Contractor must include the substance of this clause in all sub-tier contracts exceeding \$3,500 that involve driving a motor vehicle in performance of work activities associated with the project.

## **A14 ENERGY CONSERVATION REQUIREMENTS**

### **A14.1 SOURCE**

2 CFR § 200, Appendix II(H)

### **A14.2 APPLICABILITY**

The Energy Conservation Requirements of 2 CFR § 200 Appendix II(H) requires this provision on energy efficiency.

**Contract Types** – The sponsor must include this provision in all AIP funded contracts and lower-tier contracts.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s revised language must fully satisfy these requirements. Sponsor may substitute “Contractor and subcontractor” with “Consultant and sub-consultant” for professional service agreements.

### **A14.3 CONTRACT CLAUSE**

#### **ENERGY CONSERVATION REQUIREMENTS**

Contractor and Subcontractor agree to comply with mandatory standards and policies relating to energy efficiency as contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (42 USC 6201 *et seq*).

## **A15 DRUG FREE WORKPLACE REQUIREMENTS**

### **A15.1 SOURCE**

49 CFR part 32

Drug-Free Workplace Act of 1988 (41 U.S.C. 701 *et seq.*, as amended)

### **A15.2 APPLICABILITY**

The Drug-Free Workplace Act of 1988 requires some Federal contractors and *all* Federal grantees to agree that they will provide drug-free workplaces as a condition of receiving a contract or grant from a Federal agency. The Act does **not** apply to contractors, subcontractors, or subgrantees, although the Federal grantees workplace may be where the contractors, subcontractors, or subgrantees are working.

**Contract Types** – This provision applies to all AIP funded projects, but not to the contracts between the grantee (the sponsor) and a contractor, subcontractors, suppliers, or subgrantees.

**Use of Provision** – No mandatory or recommended text provided because the requirements do not extend beyond the sponsor level.

### **A15.3 CONTRACT CLAUSE**

None.

## **A16 EQUAL EMPLOYMENT OPPORTUNITY (EEO)**

### **A16.1 SOURCE**

2 CFR 200, Appendix II(C)

41 CFR § 60-1.4

41 CFR § 60-4.3

Executive Order 11246

### **A16.2 APPLICABILITY**

The purpose of this provision is to provide equal opportunity for all persons, without regard to race, color, religion, sex, or national origin who are employed or seeking employment with contractors performing under a federally assisted construction contract. There are two provisions — a construction clause and a specification clause.

The equal opportunity contract clause must be included in any contract or subcontract when the amount exceeds \$10,000. Once the equal opportunity clause is determined to be applicable, the contract or subcontract must include the clause for the remainder of the year, regardless of the amount or the contract.

#### **Contract Types –**

*Construction* – The sponsor must incorporate contract and specification language in all construction contracts and subcontracts as required above.

*Equipment* – The sponsor must incorporate contract and specification language into all equipment contracts as required above that involves installation of equipment onsite (e.g. electrical vault equipment). This provision does not apply to equipment acquisition projects where the manufacture of the equipment takes place offsite at the vendor plant (e.g. ARFF and SRE vehicles).

*Professional Services* – The sponsor must include contract and specification language into all professional service agreements as required above.

*Property* – The sponsor must include contract and specification language into all land acquisition projects that include work that qualifies as construction work as defined by 41 CFR part 60 as required above. An example is installation of boundary fencing.

**Use of Provision – MANDATORY TEXT.** 41 CFR § 60-1.4 provides the mandatory ***contract*** language. 41 CFR § 60-4.3 provides the mandatory ***specification*** language. The sponsor must incorporate these clauses without modification.

## **A16.3 MANDATORY CONTRACT CLAUSE**

### **A16.3.1 EEO Contract Clause**

#### **EQUAL OPPORTUNITY CLAUSE**

During the performance of this contract, the Contractor agrees as follows:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identify, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff, or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the Contractor's commitments under this section and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the

administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however*, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

### **A16.3.2 EEO Specification**

#### **STANDARD FEDERAL EQUAL EMPLOYMENT OPPORTUNITY CONSTRUCTION CONTRACT SPECIFICATIONS**

1. As used in these specifications:

- a. “Covered area” means the geographical area described in the solicitation from which this contract resulted;
- b. “Director” means Director, Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, or any person to whom the Director delegates authority;
- c. “Employer identification number” means the Federal social security number used on the Employer’s Quarterly Federal Tax Return, U.S. Treasury Department Form 941;
- d. “Minority” includes:
  - (1) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);
  - (2) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin regardless of race);
  - (3) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands); and
  - (4) American Indian or Alaskan native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

2. Whenever the Contractor, or any subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of \$10,000 the provisions of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

3. If the Contractor is participating (pursuant to 41 CFR part 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors shall be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved plan is individually required to comply with its obligations under the EEO clause and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other

contractors or subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

4. The Contractor shall implement the specific affirmative action standards provided in paragraphs 7a through 7p of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization the Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in a geographical area where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. The Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

5. Neither the provisions of any collective bargaining agreement nor the failure by a union with whom the Contractor has a collective bargaining agreement to refer either minorities or women shall excuse the Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

6. In order for the non-working training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees shall be employed by the Contractor during the training period and the Contractor shall have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees shall be trained pursuant to training programs approved by the U.S. Department of Labor.

7. The Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of the Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The Contractor shall document these efforts fully and shall implement affirmative action steps at least as extensive as the following:

a. Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other onsite supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

b. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

c. Maintain a current file of the names, addresses, and telephone numbers of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor

by the union or, if referred, not employed by the Contractor, this shall be documented in the file with the reason therefore along with whatever additional actions the Contractor may have taken.

d. Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or female sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.

e. Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor. The Contractor shall provide notice of these programs to the sources compiled under 7b above.

f. Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

g. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decisions, including specific review of these items, with onsite supervisory personnel such as superintendents, general foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

h. Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other contractors and subcontractors with whom the Contractor does or anticipates doing business.

i. Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, to schools with minority and female students; and to minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations, such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

j. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on the site and in other areas of a contractor's workforce.

k. Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR part 60-3.

l. Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel, for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

m. Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.

n. Ensure that all facilities and company activities are non-segregated except that separate or single user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

o. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

p. Conduct a review, at least annually, of all supervisor's adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

8. Contractors are encouraged to participate in voluntary associations, which assist in fulfilling one or more of their affirmative action obligations (7a through 7p). The efforts of a contractor association, joint contractor union, contractor community, or other similar groups of which the Contractor is a member and participant may be asserted as fulfilling any one or more of its obligations under 7a through 7p of these specifications provided that the Contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the Contractor. The obligation to comply, however, is the Contractor's and failure of such a group to fulfill an obligation shall not be a defense for the Contractor's noncompliance.

9. A single goal for minorities and a separate single goal for women have been established. The Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, if the particular group is employed in a substantially disparate manner (for example, even though the Contractor has achieved its goals for women generally), the Contractor may be in violation of the Executive Order if a specific minority group of women is underutilized.

10. The Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

11. The Contractor shall not enter into any subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

12. The Contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination, and cancellation of existing

subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and its implementing regulations, by the Office of Federal Contract Compliance Programs. Any contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

13. The Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in paragraph 7 of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If the Contractor fails to comply with the requirements of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR part 60-4.8.

14. The Contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government, and to keep records. Records shall at least include for each employee, the name, address, telephone number, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in an easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

15. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g. those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

## **A17 FEDERAL FAIR LABOR STANDARDS ACT (FEDERAL MINIMUM WAGE)**

### **A17.1 SOURCE**

29 USC § 201, et seq

### **A17.2 APPLICABILITY**

The U.S. Department of Labor (DOL) Wage and Hour Division administers the Fair Labor Standards Act (FLSA). This act prescribes federal standards for basic minimum wage, overtime pay, record keeping, and child labor standards.

**Contract Types** – Per the Department of Labor, all employees of certain enterprises having workers engaged in interstate commerce; producing goods for interstate commerce; or handling, selling, or otherwise working on goods or materials that have been moved in or produced for such commerce by any person are covered by the FLSA.

All consultants, sub-consultants, contractors, and subcontractors employed under this federally assisted project must comply with the FLSA.

*Professional Services* – 29 CFR § 213 exempts employees in a bona fide executive, administrative or professional capacity. Because professional firms employ individuals that are not covered by this exemption, the sponsor’s agreement with a professional services firm must include the FLSA provision.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of 29 USC § 201. The sponsor must select *contractor* or *consultant*, as appropriate for the contract.

### **A17.3 SOLICITATION CLAUSE**

All contracts and subcontracts that result from this solicitation incorporate by reference the provisions of 29 CFR part 201, the Federal Fair Labor Standards Act (FLSA), with the same force and effect as if given in full text. The FLSA sets minimum wage, overtime pay, recordkeeping, and child labor standards for full and part-time workers.

The [*Contractor* | *Consultant*] has full responsibility to monitor compliance to the referenced statute or regulation. The [*Contractor* | *Consultant*] must address any claims or disputes that arise from this requirement directly with the U.S. Department of Labor – Wage and Hour Division.

## **A18 LOBBYING AND INFLUENCING FEDERAL EMPLOYEES**

### **A18.1 SOURCE**

31 USC § 1352 – Byrd Anti-Lobbying Amendment

2 CFR part 200, Appendix II(J)

49 CFR part 20, Appendix A

### **A18.2 APPLICABILITY**

Consultants and contractors that apply or bid for an award of \$100,000 or more must certify that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant, or another award covered by 31 USC 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award.

**Contract Types** – The sponsor must incorporate this provision into all contracts exceeding \$100,000.

**Use of Provision – MANDATORY TEXT.** Appendix A to 49 CFR Part 20 prescribes language the sponsor must use. The sponsor must incorporate this provision without modification.

### **A18.3 CONTRACT CLAUSE**

#### **CERTIFICATION REGARDING LOBBYING**

The Bidder or Offeror certifies by signing and submitting this bid or proposal, to the best of his or her knowledge and belief, that:

- (1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the Bidder or Offeror, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
- (2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, “Disclosure Form to Report Lobbying,” in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under

grants, loans, and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

## **A19 PROHIBITION of SEGREGATED FACILITIES**

### **A19.1 SOURCE**

41 CFR § 60

### **A19.2 APPLICABILITY**

The contractor must comply with the requirements of the EEO clause by ensuring that facilities they provide for employees are free of segregation on the basis of race, color, religion, sex, sexual orientation, gender identity, or national origin. This clause must be included in all contracts that include the equal opportunity clause, regardless of the amount of the contract.

**Contract Types** – AIP sponsors must incorporate the Prohibition of Segregated Facilities clause in any contract containing the Equal Employment Opportunity clause of 41 CFR §60.1. This obligation flows down to subcontract and sub-tier purchase orders containing the Equal Employment Opportunity clause.

*Construction* – Construction work means construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways, or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection, and other onsite functions incidental to the actual construction.

*Equipment* – On site installation of equipment such as airfield lighting control equipment meets the definition of construction and thus this provision would apply. This provision does not apply to equipment projects involving manufacture of the item at a vendor’s manufacturing plant. An example would be the manufacture of a SRE or ARFF vehicle.

*Professional Services* – Professional services that include tasks that qualify as construction work as defined by 41 CFR part 60. Examples include the installation of noise monitoring equipment.

*Property/Land* – Land acquisition contracts that include tasks that qualify as construction work as defined by 41 CFR part 60. Examples include demolition of structures or installation of boundary fencing.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of 41 CFR § 60.

### **A19.3 CONTRACT CLAUSE**

#### **PROHIBITION OF SEGREGATED FACILITIES**

(a) The Contractor agrees that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. The Contractor agrees that a breach of this clause is a violation of the Equal Employment Opportunity clause in this contract.

(b) “Segregated facilities,” as used in this clause, means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees that are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, or national origin because of written or oral policies or employee custom. The term does not include separate or single-user rest rooms or necessary dressing or sleeping areas provided to assure privacy between the sexes.

(c) The Contractor shall include this clause in every subcontract and purchase order that is subject to the Equal Employment Opportunity clause of this contract.

## **A20 OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970**

### **A20.1 SOURCE**

29 CFR part 1910

### **A20.2 APPLICABILITY**

**Contract Types** – All contracts and subcontracts must comply with the Occupational Safety and Health Act of 1970 (OSH). The U.S. Department of Labor Occupational Safety and Health Administration (OSHA) oversees the workplace health and safety standards wage provisions from OSH.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of 20 CFR part 1910.

### **A20.3 CONTRACT CLAUSE**

All contracts and subcontracts that result from this solicitation incorporate by reference the requirements of 29 CFR Part 1910 with the same force and effect as if given in full text. The employer must provide a work environment that is free from recognized hazards that may cause death or serious physical harm to the employee. The employer retains full responsibility to monitor its compliance and their subcontractor’s compliance with the applicable requirements of the Occupational Safety and Health Act of 1970 (20 CFR Part 1910). The employer must address any claims or disputes that pertain to a referenced requirement directly with the U.S. Department of Labor – Occupational Safety and Health Administration.

## **A21 PROCUREMENT OF RECOVERED MATERIALS**

### **A21.1 SOURCE**

2 CFR § 200.322

40 CFR part 247

Solid Waste Disposal Act

### **A21.2 APPLICABILITY**

Sponsors of AIP funded development and equipment projects must comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. Section 6002 emphasizes maximizing energy and resource recovery through use of affirmative procurement actions for recovered materials identified in the Environmental Protection Agency (EPA) guidelines codified at 40 CFR part 247. When acquiring items designated in the guidelines, the sponsor must procure items that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition.

**Contract Types** – This provision applies to any contracts that include procurement of products designated in subpart B of 40 CFR part 247 where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired by the preceding fiscal year exceeded \$10,000.

*Construction and Equipment* – Include this provision in all construction and equipment projects.

*Professional Services and Property* – Include this provision if the agreement includes procurement of a product that exceeds \$10,000.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of 2 CFR § 200.

### **A21.3 CONTRACT CLAUSE**

#### **PROCUREMENT OF RECOVERED MATERIALS**

Contractor and subcontractor agree to comply with Section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, and the regulatory provisions of 40 CFR Part 247. In the performance of this contract and to the extent practicable, the Contractor and subcontractors are to use products containing the highest percentage of recovered materials for items designated by the Environmental Protection Agency (EPA) under 40 CFR Part 247 whenever:

- 1) The contract requires procurement of \$10,000 or more of a designated item during the fiscal year; or
- 2) The contractor has procured \$10,000 or more of a designated item using Federal funding during the previous fiscal year.

The list of EPA-designated items is available at [www.epa.gov/smm/comprehensive-procurement-guidelines-construction-products](http://www.epa.gov/smm/comprehensive-procurement-guidelines-construction-products).

Section 6002(c) establishes exceptions to the preference for recovery of EPA-designated products if the contractor can demonstrate the item is:

- a) Not reasonably available within a timeframe providing for compliance with the contract performance schedule;
- b) Fails to meet reasonable contract performance requirements; or
- c) Is only available at an unreasonable price.

## **A22 RIGHT TO INVENTIONS**

### **A22.1 SOURCE**

2 CFR § 200, Appendix II(F)

37 CFR §401

### **A22.2 APPLICABILITY**

**Contract Types** – This provision applies to all contracts and subcontracts with small business firms or nonprofit organizations that include performance of *experimental, developmental, or research work*. This clause is not applicable to construction, equipment, or professional service contracts unless the contract includes *experimental, developmental, or research work*.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of Appendix II to 2 CFR part 200.

### **A22.3 CONTRACT CLAUSE**

#### **RIGHTS TO INVENTIONS**

Contracts or agreements that include the performance of experimental, developmental, or research work must provide for the rights of the Federal Government and the Owner in any resulting invention as established by 37 CFR part 401, Rights to Inventions Made by Non-profit Organizations and Small Business Firms under Government Grants, Contracts, and Cooperative Agreements. This contract incorporates by reference the patent and inventions rights as specified within 37 CFR §401.14. Contractor must include this requirement in all sub-tier contracts involving experimental, developmental, or research work.

## **A23 SEISMIC SAFETY**

### **A23.1 SOURCE**

49 CFR part 41

### **A23.2 APPLICABILITY**

**Contract Types** – This provision applies to construction of new buildings and additions to existing buildings financed in whole or in part through the Airport Improvement Program.

*Professional Services*– Sponsor must incorporate this clause in any contract involved in the construction of new buildings or structural addition to existing buildings.

*Construction* – Sponsor must incorporate this clause in any contract involved in the construction of new buildings or structural addition to existing buildings.

*Equipment* – Sponsor must include the construction provision if the project involves construction or structural addition to a building such as an electrical vault project to accommodate or install equipment.

*Land* – This provision will not typically apply to a property/land project.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of 49 CFR part 41.

### **A23.3 CONTRACT CLAUSE**

#### **A23.3.1 Professional Service Agreements for Design**

##### **SEISMIC SAFETY**

In the performance of design services, the Consultant agrees to furnish a building design and associated construction specification that conform to a building code standard that provides a level of seismic safety substantially equivalent to standards as established by the National Earthquake Hazards Reduction Program (NEHRP). Local building codes that model their building code after the current version of the International Building Code (IBC) meet the NEHRP equivalency level for seismic safety. At the conclusion of the design services, the Consultant agrees to furnish the Owner a “certification of compliance” that attests conformance of the building design and the construction specifications with the seismic standards of NEHRP or an equivalent building code.

#### **A23.3.2 Construction Contracts**

##### **SEISMIC SAFETY**

The Contractor agrees to ensure that all work performed under this contract, including work performed by subcontractors, conforms to a building code standard that provides a level of seismic safety substantially equivalent to standards established by the National Earthquake Hazards Reduction

Program (NEHRP). Local building codes that model their code after the current version of the International Building Code (IBC) meet the NEHRP equivalency level for seismic safety.

## **A24 TAX DELINQUENCY AND FELONY CONVICTIONS**

### **A24.1 SOURCE**

Sections 415 and 416 of Title IV, Division L of the Consolidated Appropriations Act, 2014 (Pub. L. 113-76), and similar provisions in subsequent appropriations acts.

DOT Order 4200.6 - Requirements for Procurement and Non-Procurement Regarding Tax Delinquency and Felony Convictions

### **A24.2 APPLICABILITY**

The sponsor must ensure that no funding goes to any contractor who:

- Has been convicted of a Federal felony within the last 24 months; or
- Has any outstanding tax liability for which all judicial and administrative remedies have lapsed or been exhausted.

**Contract Types** – This provision applies to all contracts funded in whole or part with AIP.

**Use of Provision** – The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of DOT Order 4200.6.

### **A24.3 CONTRACT CLAUSE**

#### **CERTIFICATION OF OFFERER/BIDDER REGARDING TAX DELINQUENCY AND FELONY CONVICTIONS**

The applicant must complete the following two certification statements. The applicant must indicate its current status as it relates to tax delinquency and felony conviction by inserting a checkmark (✓) in the space following the applicable response. The applicant agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification in all lower tier subcontracts.

#### **Certifications**

- 1) The applicant represents that it is (  ) is not (  ) a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.
- 2) The applicant represents that it is (  ) is not (  ) is not a corporation that was convicted of a criminal violation under any Federal law within the preceding 24 months.

#### **Note**

If an applicant responds in the affirmative to either of the above representations, the applicant is ineligible to receive an award unless the sponsor has received notification from the agency suspension and debarment official (SDO) that the SDO has considered suspension or debarment and determined that further action is not required to protect the Government’s interests. The applicant therefore must provide information to the owner about its tax liability or conviction to the Owner, who will then notify

the FAA Airports District Office, which will then notify the agency's SDO to facilitate completion of the required considerations before award decisions are made.

### **Term Definitions**

**Felony conviction:** Felony conviction means a conviction within the preceding twentyfour (24) months of a felony criminal violation under any Federal law and includes conviction of an offense defined in a section of the U.S. code that specifically classifies the offense as a felony and conviction of an offense that is classified as a felony under 18 U.S.C. § 3559.

**Tax Delinquency:** A tax delinquency is any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted, or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability.

## **A25 TERMINATION OF CONTRACT**

### **A25.1 SOURCE**

2 CFR § 200 Appendix II(B)

FAA Advisory Circular 150/5370-10, Section 80-09

### **A25.2 APPLICABILITY**

**Contract Types** – All contracts and subcontracts in excess of \$10,000 must address *termination for cause* and *termination for convenience* by the sponsor. The provision must address the manner (i.e. notice, opportunity to cure, and effective date) by which the sponsor’s contract will be affected and the basis for settlement (i.e. incurred expenses, completed work, profit, etc.).

#### **Use of Provision –**

*Termination for Default* – **MANDATORY TEXT.** Section 80-09 of FAA Advisory Circular 150/5370-10 establishes standard language for Termination for Default under a construction contract. The sponsor must not make any changes to this standard language.

*Termination for Convenience* – No mandatory text provided. The sponsor must include a clause for termination for convenience. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor’s language must fully satisfy the requirements of Appendix II to 2 CFR part 200.

*Equipment, Professional Services, and Property* – No mandatory text provided. The sponsor may use their established clause language provided that it adequately addresses the intent of Appendix II(B) to Part 200, which addresses termination for fault and for convenience.

### **A25.3 CONTRACT CLAUSE**

#### **A25.3.1 Termination for Convenience**

#### **TERMINATION FOR CONVENIENCE (CONSTRUCTION & EQUIPMENT CONTRACTS)**

The Owner may terminate this contract in whole or in part at any time by providing written notice to the Contractor. Such action may be without cause and without prejudice to any other right or remedy of Owner. Upon receipt of a written notice of termination, except as explicitly directed by the Owner, the Contractor shall immediately proceed with the following obligations regardless of any delay in determining or adjusting amounts due under this clause:

1. Contractor must immediately discontinue work as specified in the written notice.
2. Terminate all subcontracts to the extent they relate to the work terminated under the notice.
3. Discontinue orders for materials and services except as directed by the written notice.
4. Deliver to the Owner all fabricated and partially fabricated parts, completed and partially completed work, supplies, equipment and materials acquired prior to termination of the work, and as directed in the written notice.

5. Complete performance of the work not terminated by the notice.
6. Take action as directed by the Owner to protect and preserve property and work related to this contract that Owner will take possession.

Owner agrees to pay Contractor for:

- 1) completed and acceptable work executed in accordance with the contract documents prior to the effective date of termination;
- 2) documented expenses sustained prior to the effective date of termination in performing work and furnishing labor, materials, or equipment as required by the contract documents in connection with uncompleted work;
- 3) reasonable and substantiated claims, costs, and damages incurred in settlement of terminated contracts with Subcontractors and Suppliers; and
- 4) reasonable and substantiated expenses to the Contractor directly attributable to Owner's termination action.

Owner will not pay Contractor for loss of anticipated profits or revenue or other economic loss arising out of or resulting from the Owner's termination action.

The rights and remedies this clause provides are in addition to any other rights and remedies provided by law or under this contract.

#### **TERMINATION FOR CONVENIENCE (PROFESSIONAL SERVICES)**

The Owner may, by written notice to the Consultant, terminate this Agreement for its convenience and without cause or default on the part of Consultant. Upon receipt of the notice of termination, except as explicitly directed by the Owner, the Contractor must immediately discontinue all services affected.

Upon termination of the Agreement, the Consultant must deliver to the Owner all data, surveys, models, drawings, specifications, reports, maps, photographs, estimates, summaries, and other documents and materials prepared by the Engineer under this contract, whether complete or partially complete.

Owner agrees to make just and equitable compensation to the Consultant for satisfactory work completed up through the date the Consultant receives the termination notice. Compensation will not include anticipated profit on non-performed services.

Owner further agrees to hold Consultant harmless for errors or omissions in documents that are incomplete as a result of the termination action under this clause.

#### **A25.3.2 Termination for Default**

##### **TERMINATION FOR DEFAULT (CONSTRUCTION)**

Section 80-09 of FAA Advisory Circular 150/5370-10 establishes conditions, rights, and remedies associated with Owner termination of this contract due to default of the Contractor.

##### **TERMINATION FOR DEFAULT (EQUIPMENT)**

The Owner may, by written notice of default to the Contractor, terminate all or part of this Contract if the Contractor:

1. Fails to commence the Work under the Contract within the time specified in the Notice- to- Proceed;
2. Fails to make adequate progress as to endanger performance of this Contract in accordance with its terms;
3. Fails to make delivery of the equipment within the time specified in the Contract, including any Owner approved extensions;
4. Fails to comply with material provisions of the Contract;
5. Submits certifications made under the Contract and as part of their proposal that include false or fraudulent statements; or
6. Becomes insolvent or declares bankruptcy.

If one or more of the stated events occur, the Owner will give notice in writing to the Contractor and Surety of its intent to terminate the contract for cause. At the Owner's discretion, the notice may allow the Contractor and Surety an opportunity to cure the breach or default.

If within [10] days of the receipt of notice, the Contractor or Surety fails to remedy the breach or default to the satisfaction of the Owner, the Owner has authority to acquire equipment by other procurement action. The Contractor will be liable to the Owner for any excess costs the Owner incurs for acquiring such similar equipment.

Payment for completed equipment delivered to and accepted by the Owner shall be at the Contract price. The Owner may withhold from amounts otherwise due the Contractor for such completed equipment, such sum as the Owner determines to be necessary to protect the Owner against loss because of Contractor default.

Owner will not terminate the Contractor's right to proceed with the Work under this clause if the delay in completing the work arises from unforeseeable causes beyond the control and without the fault or negligence of the Contractor. Examples of such acceptable causes include: acts of God, acts of the Owner, acts of another Contractor in the performance of a contract with the Owner, and severe weather events that substantially exceed normal conditions for the location.

If, after termination of the Contractor's right to proceed, the Owner determines that the Contractor was not in default, or that the delay was excusable, the rights and obligations of the parties will be the same as if the Owner issued the termination for the convenience the Owner.

The rights and remedies of the Owner in this clause are in addition to any other rights and remedies provided by law or under this contract.

#### **TERMINATION FOR DEFAULT (PROFESSIONAL SERVICES)**

Either party may terminate this Agreement for cause if the other party fails to fulfill its obligations that are essential to the completion of the work per the terms and conditions of the Agreement. The party initiating the termination action must allow the breaching party an opportunity to dispute or cure the breach.

The terminating party must provide the breaching party [7] days advance written notice of its intent to terminate the Agreement. The notice must specify the nature and extent of the breach, the conditions

necessary to cure the breach, and the effective date of the termination action. The rights and remedies in this clause are in addition to any other rights and remedies provided by law or under this agreement.

- a) **Termination by Owner:** The Owner may terminate this Agreement in whole or in part, for the failure of the Consultant to:
1. Perform the services within the time specified in this contract or by Owner approved extension;
  2. Make adequate progress so as to endanger satisfactory performance of the Project; or
  3. Fulfill the obligations of the Agreement that are essential to the completion of the Project.

Upon receipt of the notice of termination, the Consultant must immediately discontinue all services affected unless the notice directs otherwise. Upon termination of the Agreement, the Consultant must deliver to the Owner all data, surveys, models, drawings, specifications, reports, maps, photographs, estimates, summaries, and other documents and materials prepared by the Engineer under this contract, whether complete or partially complete.

Owner agrees to make just and equitable compensation to the Consultant for satisfactory work completed up through the date the Consultant receives the termination notice. Compensation will not include anticipated profit on non-performed services.

Owner further agrees to hold Consultant harmless for errors or omissions in documents that are incomplete as a result of the termination action under this clause.

If, after finalization of the termination action, the Owner determines the Consultant was not in default of the Agreement, the rights and obligations of the parties shall be the same as if the Owner issued the termination for the convenience of the Owner.

- b) **Termination by Consultant:** The Consultant may terminate this Agreement in whole or in part, if the Owner:
1. Defaults on its obligations under this Agreement;
  2. Fails to make payment to the Consultant in accordance with the terms of this Agreement;
  3. Suspends the Project for more than [180] days due to reasons beyond the control of the Consultant.

Upon receipt of a notice of termination from the Consultant, Owner agrees to cooperate with Consultant for the purpose of terminating the agreement or portion thereof, by mutual consent. If Owner and Consultant cannot reach mutual agreement on the termination settlement, the Consultant may, without prejudice to any rights and remedies it may have, proceed with terminating all or parts of this Agreement based upon the Owner's breach of the contract.

In the event of termination due to Owner breach, the Engineer is entitled to invoice Owner and to receive full payment for all services performed or furnished in accordance with this Agreement and all justified reimbursable expenses incurred by the Consultant through the effective date of termination action. Owner agrees to hold Consultant harmless for errors or omissions in documents that are incomplete as a result of the termination action under this clause.

## **A26 TRADE RESTRICTION CERTIFICATION**

### **A26.1 SOURCE**

49 USC § 50104

49 CFR part 30

### **A26.2 APPLICABILITY**

Unless waived by the Secretary of Transportation, sponsors may not use AIP funds on a product or service from a foreign country included in the current list of countries that discriminate against U.S. firms as published by the Office of the United States Trade Representative (USTR).

**Contract Types** – The trade restriction certification and clause applies to all AIP funded projects.

**Use of Provision – MANDATORY TEXT.** 49 CFR part 30 prescribes the language for this model clause. The sponsor must include this certification language in all contracts and subcontracts without modification.

### **A26.3 SOLICITATION CLAUSE**

#### **TRADE RESTRICTION CERTIFICATION**

By submission of an offer, the Offeror certifies that with respect to this solicitation and any resultant contract, the Offeror –

- 1) is not owned or controlled by one or more citizens of a foreign country included in the list of countries that discriminate against U.S. firms as published by the Office of the United States Trade Representative (USTR);
- 2) has not knowingly entered into any contract or subcontract for this project with a person that is a citizen or national of a foreign country included on the list of countries that discriminate against U.S. firms as published by the USTR; and
- 3) has not entered into any subcontract for any product to be used on the Federal project that is produced in a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18 USC Section 1001.

The Offeror/Contractor must provide immediate written notice to the Owner if the Offeror/Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. The Contractor must require subcontractors provide immediate written notice to the Contractor if at any time it learns that its certification was erroneous by reason of changed circumstances.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR 30.17, no contract shall be awarded to an Offeror or subcontractor:

- 1) who is owned or controlled by one or more citizens or nationals of a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR or
- 2) whose subcontractors are owned or controlled by one or more citizens or nationals of a foreign country on such USTR list or
- 3) who incorporates in the public works project any product of a foreign country on such USTR list.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

The Offeror agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in all lower tier subcontracts. The Contractor may rely on the certification of a prospective subcontractor that it is not a firm from a foreign country included on the list of countries that discriminate against U.S. firms as published by USTR, unless the Offeror has knowledge that the certification is erroneous.

This certification is a material representation of fact upon which reliance was placed when making an award. If it is later determined that the Contractor or subcontractor knowingly rendered an erroneous certification, the Federal Aviation Administration (FAA) may direct through the Owner cancellation of the contract or subcontract for default at no cost to the Owner or the FAA.

## **A27 VETERAN'S PREFERENCE**

### **A27.1 SOURCE**

49 USC § 47112(c)

### **A27.2 APPLICABILITY**

**Contract Types** – This provision applies to all AIP funded projects that involve labor to carry out the project. This preference, which excludes executive, administrative, and supervisory positions, applies to covered veterans (as defined under § 47112(c)) only when they are readily available and qualified to accomplish the work required by the project.

**Use of Provision** – No mandatory text provided. The following language is acceptable to the FAA and meets the intent of this requirement. If the sponsor uses different language, the sponsor's language must fully satisfy the requirements of 49 USC § 47112.

### **A27.3 CONTRACT CLAUSE**

#### **VETERAN'S PREFERENCE**

In the employment of labor (excluding executive, administrative, and supervisory positions), the Contractor and all sub-tier contractors must give preference to covered veterans as defined within Title 49 United States Code Section 47112. Covered veterans include Vietnam-era veterans, Persian Gulf veterans, Afghanistan-Iraq war veterans, disabled veterans, and small business concerns (as defined by 15 USC 632) owned and controlled by disabled veterans. This preference only applies when there are covered veterans readily available and qualified to perform the work to which the employment relates.

As a matter of bid responsiveness, the bidder or offeror must complete, sign, date, and submit this certification statement with their proposal. The bidder or offeror must indicate how they intend to comply with 49 USC § 50101 by selecting one on the following certification statements. These statements are mutually exclusive. Bidder must select one or the other (not both) by inserting a checkmark (✓) or the letter "X".

- Bidder or offeror hereby certifies that it will comply with 49 USC § 50101 by:
- a) Only installing steel and manufactured products produced in the United States;
  - b) Installing manufactured products for which the Federal Aviation Administration (FAA) has issued a waiver as indicated by inclusion on the current FAA Nationwide Buy American Waivers Issued listing; or
  - c) Installing products listed as an Excepted Article, Material or Supply in Federal Acquisition Regulation Subpart 25.108.

By selecting this certification statement, the bidder or offeror agrees:

1. To provide to the Owner evidence that documents the source and origin of the steel and manufactured product.
2. To faithfully comply with providing U.S. domestic product.
3. To furnish U.S. domestic product for any waiver request that the FAA rejects
4. To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.

- The bidder or offeror hereby certifies it cannot comply with the 100 percent Buy American Preferences of 49 USC § 50101(a) but may qualify for either a Type 3 or Type 4 waiver under 49 USC § 50101(b). By selecting this certification statement, the apparent bidder or offeror with the apparent low bid agrees:

1. To submit to the Owner within 15 calendar days of the bid opening, a formal waiver request and required documentation that supports the type of waiver being requested.
2. That failure to submit the required documentation within the specified timeframe is cause for a non-responsive determination may result in rejection of the proposal.
3. To faithfully comply with providing U.S. domestic products at or above the approved U.S. domestic content percentage as approved by the FAA.
4. To refrain from seeking a waiver request after establishment of the contract, unless extenuating circumstances emerge that the FAA determines justified.

### Required Documentation

**Type 3 Waiver** – The cost of the item components and subcomponents produced in the United States is more than 60 percent of the cost of all components and subcomponents of the "item". The required documentation for a Type 3 waiver is:

- a) Listing of all product components and subcomponents that are not comprised of 100 percent U.S. domestic content (Excludes products listed on the FAA Nationwide Buy American Waivers Issued listing and products excluded by Federal Acquisition Regulation Subpart 25.108; products of unknown origin must be considered as non-domestic products in their entirety).

- b) Cost of non-domestic components and subcomponents, excluding labor costs associated with final assembly at place of manufacture.
- c) Percentage of non-domestic component and subcomponent cost as compared to total "item" component and subcomponent costs, excluding labor costs associated with final assembly at place of manufacture.

**Type 4 Waiver** – Total cost of project using U.S. domestic source product exceeds the total project cost using non-domestic product by 25 percent. The required documentation for a Type 4 of waiver is:

- a) Detailed cost information for total project using U.S. domestic product
- b) Detailed cost information for total project using non-domestic product

**False Statements:** Per 49 USC § 47126, this certification concerns a matter within the jurisdiction of the Federal Aviation Administration and the making of a false, fictitious or fraudulent certification may render the maker subject to prosecution under Title 18, United States Code.

# A11 - CERTIFICATION OF LOWER TIER CONTRACTORS REGRAIDING DEBAREMENT

## PULLIAM AIRPORT FLAGSTAFF, ARIZONA

The successful bidder, by administering each lower tier subcontract that exceeds \$25,000 as a "covered transaction", must verify each lower tier participant of a "covered transaction" under the project is not presently debarred or otherwise disqualified from participation in this federally assisted project. The successful bidder will accomplish this by:

1. Checking the System for Award Management at website: <http://www.sam.gov>.
2. Collecting a certification statement similar to the Certification of Offerer /Bidder Regarding Debarment, above.
3. Inserting a clause or condition in the covered transaction with the lower tier contract.

If the Federal Aviation Administration later determines that a lower tier participant failed to disclose to a higher tier participant that it was excluded or disqualified at the time it entered the covered transaction, the FAA may pursue any available remedies, including suspension and debarment of the non-compliant participant.

# A12 - ASSURANCE OF DISADVANTAGED BUSINESS ENTERPRISE PARTICIPATION

## PULLIAM AIRPORT FLAGSTAFF, ARIZONA

To meet the mandated requirements of the United States Department of Transportation, 49 CFR Part 26, the assurance below shall be signed by the bidder and submitted with the bid.

### **BIDDER'S ASSURANCE OF COMPLIANCE WITH TITLE 49 CFR PART 26 RELATING TO DISADVANTAGED BUSINESS ENTERPRISE PARTICIPATION**

The successful Bidder or Offeror must provide written confirmation of participation from each of the DBE firms the Bidder or Offeror lists in its commitment **within five days after bid opening**.

- 1) The names and addresses of Disadvantaged Business Enterprise (DBE) firms that will participate in the contract;
- 2) A description of the work that each DBE firm will perform;
- 3) The dollar amount of the participation of each DBE firm listed under (1)
- 4) Written statement from Bidder or Offeror that attests their commitment to use the DBE firm(s) listed under (1) to meet the Owner's project goal; and
- 5) If Bidder or Offeror cannot meet the advertised project DBE goal, evidence of good faith efforts undertaken by the Bidder or Offeror as described in appendix A to 49 CFR part 26.

The requirements of 49 CFR part 26 apply to this contract. It is the policy of the City of Flagstaff to practice nondiscrimination based on race, color, sex, or national origin in the award or performance of this contract. The Owner encourages participation by all firms qualifying under this solicitation regardless of business size or ownership.

The Contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The Contractor shall carry out applicable requirements of 49 CFR part 26 in the award and administration of Department of Transportation-assisted contracts. Failure by the Contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as the Owner deems appropriate, which may include, but is not limited to:

- 1) Withholding monthly progress payments;
- 2) Assessing sanctions;
- 3) Liquidated damages; and/or
- 4) Disqualifying the Contractor from future bidding as non-responsible.

**Prompt Payment (§26.29)** – The prime contractor agrees to pay each subcontractor under this prime contract for satisfactory performance of its contract no later than seven (7) days from the receipt of each payment the prime contractor receives from City of Flagstaff. The prime contractor agrees further to return retainage payments to each subcontractor within seven (7) days after the subcontractor's work is satisfactorily completed. Any delay or postponement of payment from the above referenced time frame may occur only for good cause following written approval of the City of Flagstaff. This clause applies to both DBE and non-DBE subcontractors.

The bidder hereby gives assurance pursuant to the requirements of Title 49 CFR Part 26 that bidder has made a reasonable effort to meet the goals for Disadvantaged Business Enterprise participation specified for the contract for which this proposal is submitted and that bidder, if the contract is awarded to bidder, will have a **DBE participation of [REDACTED] percent of the amount of this bid**. Bidder further gives

assurance that bidder has submitted the documentation required by said Regulations and the contract specifications, including the Listing of Disadvantaged Business Enterprises with which the bidder will subcontract if the contract is awarded and if bidder is unable to meet the contract goals for DBE participation, and the steps bidder has taken to obtain DBE participation.

**The DBE Participation goal for this project is 1.89% Race Neutral**

**NOTE: Bidder shall insert the percentage for DBE participation even if the percentage is less than the contract goal. A bid that fails to meet these requirements may be considered grounds for rejecting the bid.**

# **A16 - BIDDER'S STATEMENT ON PREVIOUS CONTRACTS SUBJECT TO EEO CLAUSE**

## **PULLIAM AIRPORT FLAGSTAFF, ARIZONA**

During the performance of this contract, the Contractor agrees as follows:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, sexual orientation, gender identify, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff, or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the Contractor's commitments under this section and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however,* that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

# A18 – LOBBYING AND INFLUENCING FEDERAL EMPLOYEES

## PULLIAM AIRPORT FLAGSTAFF, ARIZONA

The Bidder or Offeror certifies by signing and submitting this bid or proposal, to the best of his or her knowledge and belief, that:

- (1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the Bidder or Offeror, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.
- (2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
- (3) The undersigned shall require that the language of this certification be included in the award documents for all sub-awards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all sub-recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

**A19 - CERTIFICATION PROHIBICION OF SEGREGATED FACILITIES (CONTRACTORS/SUBCONTRACTORS)**

**PULLIAM AIRPORT  
FLAGSTAFF, ARIZONA**

(a) The Contractor agrees that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. The Contractor agrees that a breach of this clause is a violation of the Equal Employment Opportunity clause in this contract.

(b) "Segregated facilities," as used in this clause, means any waiting rooms, work areas, rest rooms and wash rooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees that are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, sex, or national origin because of written or oral policies or employee custom. The term does not include separate or single-user rest rooms or necessary dressing or sleeping areas provided to assure privacy between the sexes.

(c) The Contractor shall include this clause in every subcontract and purchase order that is subject to the Equal Employment Opportunity clause of this contract.

**NOTE: The penalty for making false statements in offers is prescribed in 18 U.S.C. 1001.**

# **A26 - TRADE RESTRICTION CERTIFICATE TO BE INCLUDED IN ALL SOLICITATIONS, CONTRACTS, AND SUBCONTRACTS**

## **PULLIAM AIRPORT FLAGSTAFF, ARIZONA**

By submission of an offer, the Offeror certifies that with respect to this solicitation and any resultant contract, the Offeror –

- 1) is not owned or controlled by one or more citizens of a foreign country included in the list of countries that discriminate against U.S. firms as published by the Office of the United States Trade Representative (USTR);
- 2) has not knowingly entered into any contract or subcontract for this project with a person that is a citizen or national of a foreign country included on the list of countries that discriminate against U.S. firms as published by the USTR; and
- 3) has not entered into any subcontract for any product to be used on the Federal project that is produced in a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR.

This certification concerns a matter within the jurisdiction of an agency of the United States of America and the making of a false, fictitious, or fraudulent certification may render the maker subject to prosecution under Title 18 USC Section 1001.

The Offeror/Contractor must provide immediate written notice to the Owner if the Offeror/Contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. The Contractor must require subcontractors provide immediate written notice to the Contractor if at any time it learns that its certification was erroneous by reason of changed circumstances.

Unless the restrictions of this clause are waived by the Secretary of Transportation in accordance with 49 CFR 30.17, no contract shall be awarded to an Offeror or subcontractor:

- 1) who is owned or controlled by one or more citizens or nationals of a foreign country included on the list of countries that discriminate against U.S. firms published by the USTR or
- 2) whose subcontractors are owned or controlled by one or more citizens or nationals of a foreign country on such USTR list or
- 3) who incorporates in the public works project any product of a foreign country on such USTR list.

Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render, in good faith, the certification required by this provision. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

The Offeror agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in all lower tier subcontracts. The Contractor may rely on the certification of a prospective subcontractor that it is not a firm from a foreign country included on the list of countries that discriminate against U.S. firms as published by USTR, unless the Offeror has knowledge that the certification is erroneous.

This certification is a material representation of fact upon which reliance was placed when making an award. If it is later determined that the Contractor or subcontractor knowingly rendered an erroneous certification, the

Federal Aviation Administration (FAA) may direct through the Owner cancellation of the contract or subcontract for default at no cost to the Owner or the FAA.

**NOTE: Failure to complete the blanks may be grounds for rejection of the bid.**

**DAVIS-BACON AND RELATED ACTS  
REQUIREMENTS  
AND  
WAGE RATE**

## Fact Sheet #66: The Davis-Bacon and Related Acts (DBRA)

This fact sheet provides general information concerning DBRA.

### Coverage

DBRA requires payment of prevailing wages on federally funded or assisted construction projects. The [Davis-Bacon Act](#) applies to each federal government or District of Columbia contract in excess of \$2,000 for the construction, alteration, or repair (including painting and decorating) of [public buildings or public works](#). Many federal laws that authorize federal assistance for construction through grants, loans, loan guarantees, and insurance are Davis-Bacon “related Acts.” The “related Acts” include provisions that require Davis-Bacon labor standards apply to most federally assisted construction. Examples of “related Acts” include the Federal-Aid Highway Acts, the Housing and Community Development Act of 1974, and the Federal Water Pollution Control Act.

### Basic Provisions/Requirements

Contractors and subcontractors must pay [laborers and mechanics employed](#) directly upon the [site of the work](#) at least the locally prevailing wages (including fringe benefits), listed in the Davis-Bacon wage determination in the contract, for the work performed. [Davis-Bacon labor standards clauses](#) must be included in covered contracts.

The Davis-Bacon “prevailing wage” is the combination of the basic hourly rate and any fringe benefits listed in a Davis-Bacon wage determination. The contractor’s obligation to pay at least the prevailing wage listed in the contract wage determination can be met by paying each laborer and mechanic the applicable prevailing wage entirely as cash wages or by a combination of cash wages and employer-provided bona fide fringe benefits. Prevailing wages, including fringe benefits, must be paid on all hours worked on the site of the work.

Apprentices or trainees may be employed at less than the rates listed in the contract wage determination only when they are in an apprenticeship program registered with the Department of Labor or with a state apprenticeship agency recognized by the Department.

Contractors and subcontractors are required to pay covered workers weekly and submit weekly certified payroll records to the contracting agency. They are also required to post the applicable Davis-Bacon wage determination with the [Davis-Bacon poster \(WH-1321\)](#) on the job site in a prominent and accessible place where they can be easily seen by the workers.

### Davis-Bacon Wage Determinations

Davis-Bacon wage determinations are published on the Wage Determinations On Line ([WDOL](#)) website for contracting agencies to incorporate them into covered contracts. The “prevailing wages” are determined based on wages paid to various classes of laborers and mechanics employed on specific types of construction projects in an area. Guidance on determining the type of construction is provided in All Agency Memoranda [Nos. 130](#) and [131](#).

## **Penalties/Sanctions and Appeals**

Contract payments may be withheld in sufficient amounts to satisfy liabilities for underpayment of wages and for liquidated damages for overtime violations under the Contract Work Hours and Safety Standards Act (CWHSSA). In addition, violations of the Davis-Bacon contract clauses may be grounds for contract termination, contractor liability for any resulting costs to the government and debarment from future contracts for a period up to three years.

Contractors and subcontractors may challenge determinations of violations and debarment before an Administrative Law Judge (ALJ). Interested parties may appeal ALJ decisions to the Department's Administrative Review Board. Final Board determinations on violations and debarment may be appealed to and are enforceable through the federal courts.

## **Typical Problems**

(1) Misclassification of laborers and mechanics. (2) Failure to pay full prevailing wage, including fringe benefits, for all hours worked (including overtime hours). (3) Inadequate recordkeeping, such as not counting all hours worked or not recording hours worked by an individual in two or more classifications during a day. (4) Failure of to maintain a copy of bona fide apprenticeship program and individual registration documents for apprentices. (5) Failure to submit certified payrolls weekly. (6) Failure to post the Davis-Bacon poster and applicable wage determination.

## **Relation to State, Local, and Other Federal Laws**

The [Copeland "Anti-Kickback" Act](#) prohibits contractors from in any way inducing an employee to give up any part of the compensation to which he or she is entitled under his or her contract of employment, and requires contractors to submit a weekly statement of the wages paid to each employee performing DBRA covered work.

Contractors on projects subject to DBRA labor standards may also be subject to additional prevailing wage and overtime pay requirements under State (and local) laws. Also, overtime work pay requirements under CWHSSA) and the [Fair Labor Standards Act](#) may apply.

Under [Reorganization Plan No. 14 of 1950](#), (5 U.S.C.A. Appendix), the federal contracting or assistance-administering agencies have day-to-day responsibility for administration and enforcement of the Davis-Bacon labor standards provisions and, in order to promote consistent and effective enforcement, the Department of Labor has regulatory and oversight authority, including the authority to investigate compliance.

## **Where to Obtain Additional Information**

## Instructions For Completing Payroll Form, WH-347

[WH-347](#) (PDF)

OMB Control No. 1235-0008, Expires 02/28/2018.

**General:** Form WH-347 has been made available for the convenience of contractors and subcontractors required by their Federal or Federally-aided construction-type contracts and subcontracts to submit weekly payrolls. Properly filled out, this form will satisfy the requirements of Regulations, Parts 3 and 5 (29 C.F.R., Subtitle A), as to payrolls submitted in connection with contracts subject to the Davis-Bacon and related Acts.

While completion of Form WH-347 is optional, it is mandatory for covered contractors and subcontractors performing work on Federally financed or assisted construction contracts to respond to the information collection contained in 29 C.F.R. §§ 3.3, 5.5(a). The Copeland Act (40 U.S.C. § 3145) requires contractors and subcontractors performing work on Federally financed or assisted construction contracts to "furnish weekly a statement with respect to the wages paid each employee during the preceding week." U.S. Department of Labor (DOL) Regulations at 29 C.F.R. § 5.5(a)(3)(ii) require contractors to submit weekly a copy of all payrolls to the Federal agency contracting for or financing the construction project, accompanied by a signed "Statement of Compliance" indicating that the payrolls are correct and complete and that each laborer or mechanic has been paid not less than the proper Davis-Bacon prevailing wage rate for the work performed. DOL and federal contracting agencies receiving this information review the information to determine that employees have received legally required wages and fringe benefits.

Under the Davis-Bacon and related Acts, the contractor is required to pay not less than prevailing wage, including fringe benefits, as predetermined by the Department of Labor. The contractor's obligation to pay fringe benefits may be met either by payment of the fringe benefits to bona fide benefit plans, funds or programs or by making payments to the covered workers (laborers and mechanics) as cash in lieu of fringe benefits.

This payroll provides for the contractor to show on the face of the payroll all monies to each worker, whether as basic rates or as cash in lieu of fringe benefits, and provides for the contractor's representation in the statement of compliance on the payroll (as shown on page 2) that he/she is paying for fringe benefits required by the contract and not paid as cash in lieu of fringe benefits. Detailed instructions concerning the preparation of the payroll follow:

**Contractor or Subcontractor:** Fill in your firm's name and check appropriate box.

**Address:** Fill in your firm's address.

**Payroll No.:** Beginning with the number "1", list the payroll number for the submission.

**For Week Ending:** List the workweek ending date.

**Project and Location:** Self-explanatory.

**Project or Contract No.:** Self-explanatory.

**Column 1 - Name and Individual Identifying Number of Worker:** Enter each worker's full name and an individual identifying number (e.g., last four digits of worker's social security number) on each weekly payroll submitted.

**Column 2 - No. of Withholding Exemptions:** This column is merely inserted for the employer's convenience and is not a requirement of Regulations, Part 3 and 5.

**Column 3 - Work Classifications:** List classification descriptive of work actually performed by each laborer or mechanic. Consult classification and minimum wage schedule set forth in contract specifications. If additional classifications are deemed necessary, see Contracting Officer or Agency representative. An individual may be shown as having worked in more than one classification provided an accurate breakdown or hours worked in each classification is maintained and shown on the submitted payroll by use of separate entries.

**Column 4 - Hours worked:** List the day and date and straight time and overtime hours worked in the applicable boxes. On all contracts subject to the Contract Work Hours Standard Act, enter hours worked in excess of 40 hours a week as "overtime".

**Column 5 - Total:** Self-explanatory

**Column 6 - Rate of Pay (Including Fringe Benefits):** In the "straight time" box for each worker, list the actual hourly rate paid for straight time worked, plus cash paid in lieu of fringe benefits paid. When recording the straight time hourly rate, any cash paid in lieu of fringe benefits may be shown separately from the basic rate. For example, "\$12.25/.40" would reflect a \$12.25 base hourly rate plus \$0.40 for fringe benefits. This is of assistance in correctly computing overtime. See "Fringe Benefits" below. When overtime is worked, show the overtime hourly rate paid plus any cash in lieu of fringe benefits paid in the "overtime" box for each worker; otherwise, you may skip this box. See "Fringe Benefits" below. Payment of not less than time and one-half the basic or regular rate paid is required for overtime under the Contract Work Hours Standard Act of 1962 if the prime contract exceeds \$100,000. In addition to paying no less than the predetermined rate for the classification which an individual works, the contractor must pay amounts predetermined as fringe benefits in the wage decision made part of the contract to approved fringe benefit plans, funds or programs or shall pay as cash in lieu of fringe benefits. See "FRINGE BENEFITS" below.

**Column 7 - Gross Amount Earned:** Enter gross amount earned on this project. If part of a worker's weekly wage was earned on projects other than the project described on this payroll, enter in column 7 first the amount earned on the Federal or Federally assisted project and then the gross amount earned during the week on all projects, thus "\$163.00/\$420.00" would reflect the earnings of a worker who earned \$163.00 on a Federally assisted construction project during a week in which \$420.00 was earned on all work.

**Column 8 - Deductions:** Five columns are provided for showing deductions made. If more than five deduction are involved, use the first four columns and show the balance deductions under "Other" column; show actual total under "Total Deductions" column; and in the attachment to the payroll describe the deduction(s) contained in the "Other" column. All deductions must be in accordance with the provisions of the Copeland Act Regulations, 29 C.F.R., Part 3. If an individual worked on other jobs in addition to this project, show actual deductions from his/her weekly gross wage, and indicate that deductions are based on his gross wages.

**Column 9 - Net Wages Paid for Week:** Self-explanatory.

**Totals** - Space has been left at the bottom of the columns so that totals may be shown if the contractor so desires.

**Statement Required by Regulations, Parts 3 and 5:** While the "statement of compliance" need not be notarized, the statement (on page 2 of the payroll form) is subject to the penalties provided by 18 U.S.C. § 1001, namely, a fine, possible imprisonment of not more than 5 years, or both. Accordingly, the party signing this statement should have knowledge of the facts represented as true.

**Items 1 and 2:** Space has been provided between items (1) and (2) of the statement for describing any deductions made. If all deductions made are adequately described in the "Deductions" column above, state "See Deductions column in this payroll." See "FRINGE BENEFITS" below for instructions concerning filling out paragraph 4 of the statement.

**Item 4 FRINGE BENEFITS - Contractors who pay all required fringe benefits:** If paying all fringe benefits to approved plans, funds, or programs in amounts not less than were determined in the applicable wage decision of the Secretary of Labor, show the basic cash hourly rate and overtime rate paid to each worker on the face of the payroll and check paragraph 4(a) of the statement on page 2 of the WH-347 payroll form to indicate the payment. Note any exceptions in section 4(c).

**Contractors who pay no fringe benefits:** If not paying all fringe benefits to approved plans, funds, or programs in amounts of at least those that were determined in the applicable wage decision of the Secretary of Labor, pay any remaining fringe benefit amount to each laborer and mechanic and insert in the "straight time" of the "Rate of Pay" column of the payroll an amount not less than the predetermined rate for each classification plus the amount of fringe benefits determined for each classification in the application wage decision. Inasmuch as it is not necessary to pay time and a half on cash paid in lieu of fringe benefits, the overtime rate shall be not less than the sum of the basic predetermined rate, plus the half time premium on basic or regular rate, plus the required cash in lieu of fringe benefits at the straight time rate. In addition, check paragraph 4(b) of the statement on page 2 the payroll form to indicate the payment of fringe benefits in cash directly to the workers. Note any exceptions in section 4(c).

## Use of Section 4(c), Exceptions

Any contractor who is making payment to approved plans, funds, or programs in amounts less than the wage determination requires is obliged to pay the deficiency directly to the covered worker as cash in lieu of fringe benefits. Enter any exceptions to section 4(a) or 4(b) in section 4(c). Enter in the Exception column the craft, and enter in the Explanation column the hourly amount paid each worker as cash in lieu of fringe benefits and the hourly amount paid to plans, funds, or programs as fringe benefits. The contractor must pay an amount not less than the predetermined rate plus cash in lieu of fringe benefits as shown in section 4(c) to each such individual for all hours worked (unless otherwise provided by applicable wage determination) on the Federal or Federally assisted project. Enter the rate paid and amount of cash paid in lieu of fringe benefits per hour in column 6 on the payroll. See paragraph on "Contractors who pay no fringe benefits" for computation of overtime rate.

---

**Public Burden Statement:** We estimate that it will take an average of 55 minutes to complete this collection of information, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. If you have any comments regarding these estimates or any other aspect of this collection of information, including suggestions for reducing this burden, send them to the Administrator, Wage and Hour Division, ESA, U.S. Department of Labor, Room S3502, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

**Note:** In order to view, fill out, and print PDF forms, you need Adobe® Acrobat® Reader® version 5 or later, which you may download for free at [www.adobe.com/products/acrobat/readstep2.html](http://www.adobe.com/products/acrobat/readstep2.html). To save the completed forms on your workstation, you need to use the "Save As" method to save the file.

For example, move your mouse cursor over the PDF link and click on your "RIGHT" mouse button. This will cause a menu to be displayed, from which you will select the proper save option -- depending upon which browser you are using:

For Microsoft IE users, select "Save Target As"

For Netscape Navigator users, select "Save Link As"

Once you've selected the proper save option for your browser, and have saved the file to a location you specified, go to your program menu and start the Adobe Acrobat® Reader. Once open, locate the PDF file you saved and open it directly in Acrobat®.

# EMPLOYEE RIGHTS

## UNDER THE DAVIS-BACON ACT

### FOR LABORERS AND MECHANICS EMPLOYED ON FEDERAL OR FEDERALLY ASSISTED CONSTRUCTION PROJECTS

#### PREVAILING WAGES

You must be paid not less than the wage rate listed in the Davis-Bacon Wage Decision posted with this Notice for the work you perform.

#### OVERTIME

You must be paid not less than one and one-half times your basic rate of pay for all hours worked over 40 in a work week. There are few exceptions.

#### ENFORCEMENT

Contract payments can be withheld to ensure workers receive wages and overtime pay due, and liquidated damages may apply if overtime pay requirements are not met. Davis-Bacon contract clauses allow contract termination and debarment of contractors from future federal contracts for up to three years. A contractor who falsifies certified payroll records or induces wage kickbacks may be subject to civil or criminal prosecution, fines and/or imprisonment.

#### APPRENTICES

Apprentice rates apply only to apprentices properly registered under approved Federal or State apprenticeship programs.

#### PROPER PAY

If you do not receive proper pay, or require further information on the applicable wages, contact the Contracting Officer listed below:

or contact the U.S. Department of Labor's Wage and Hour Division.

WAGE AND HOUR DIVISION  
UNITED STATES DEPARTMENT OF LABOR

1-866-487-9243

# Equal Employment Opportunity is **THE LAW**

## **Private Employers, State and Local Governments, Educational Institutions, Employment Agencies and Labor Organizations**

Applicants to and employees of most private employers, state and local governments, educational institutions, employment agencies and labor organizations are protected under Federal law from discrimination on the following bases:

### **RACE, COLOR, RELIGION, SEX, NATIONAL ORIGIN**

Title VII of the Civil Rights Act of 1964, as amended, protects applicants and employees from discrimination in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral, and other aspects of employment, on the basis of race, color, religion, sex (including pregnancy), or national origin. Religious discrimination includes failing to reasonably accommodate an employee's religious practices where the accommodation does not impose undue hardship.

### **DISABILITY**

Title I and Title V of the Americans with Disabilities Act of 1990, as amended, protect qualified individuals from discrimination on the basis of disability in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral, and other aspects of employment. Disability discrimination includes not making reasonable accommodation to the known physical or mental limitations of an otherwise qualified individual with a disability who is an applicant or employee, barring undue hardship.

### **AGE**

The Age Discrimination in Employment Act of 1967, as amended, protects applicants and employees 40 years of age or older from discrimination based on age in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral, and other aspects of employment.

### **SEX (WAGES)**

In addition to sex discrimination prohibited by Title VII of the Civil Rights Act, as amended, the Equal Pay Act of 1963, as amended, prohibits sex discrimination in the payment of wages to women and men performing substantially equal work, in jobs that require equal skill, effort, and responsibility, under similar working conditions, in the same establishment.

### **GENETICS**

Title II of the Genetic Information Nondiscrimination Act of 2008 protects applicants and employees from discrimination based on genetic information in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral, and other aspects of employment. GINA also restricts employers' acquisition of genetic information and strictly limits disclosure of genetic information. Genetic information includes information about genetic tests of applicants, employees, or their family members; the manifestation of diseases or disorders in family members (family medical history); and requests for or receipt of genetic services by applicants, employees, or their family members.

### **RETALIATION**

All of these Federal laws prohibit covered entities from retaliating against a person who files a charge of discrimination, participates in a discrimination proceeding, or otherwise opposes an unlawful employment practice.

### **WHAT TO DO IF YOU BELIEVE DISCRIMINATION HAS OCCURRED**

There are strict time limits for filing charges of employment discrimination. To preserve the ability of EEOC to act on your behalf and to protect your right to file a private lawsuit, should you ultimately need to, you should contact EEOC promptly when discrimination is suspected:

The U.S. Equal Employment Opportunity Commission (EEOC), 1-800-669-4000 (toll-free) or 1-800-669-6820 (toll-free TTY number for individuals with hearing impairments). EEOC field office information is available at [www.eeoc.gov](http://www.eeoc.gov) or in most telephone directories in the U.S. Government or Federal Government section. Additional information about EEOC, including information about charge filing, is available at [www.eeoc.gov](http://www.eeoc.gov).

---

## Employers Holding Federal Contracts or Subcontracts

Applicants to and employees of companies with a Federal government contract or subcontract are protected under Federal law from discrimination on the following bases:

### **RACE, COLOR, RELIGION, SEX, NATIONAL ORIGIN**

Executive Order 11246, as amended, prohibits job discrimination on the basis of race, color, religion, sex or national origin, and requires affirmative action to ensure equality of opportunity in all aspects of employment.

### **INDIVIDUALS WITH DISABILITIES**

Section 503 of the Rehabilitation Act of 1973, as amended, protects qualified individuals from discrimination on the basis of disability in hiring, promotion, discharge, pay, fringe benefits, job training, classification, referral, and other aspects of employment. Disability discrimination includes not making reasonable accommodation to the known physical or mental limitations of an otherwise qualified individual with a disability who is an applicant or employee, barring undue hardship. Section 503 also requires that Federal contractors take affirmative action to employ and advance in employment qualified individuals with disabilities at all levels of employment, including the executive level.

### **DISABLED, RECENTLY SEPARATED, OTHER PROTECTED, AND ARMED FORCES SERVICE MEDAL VETERANS**

The Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended, 38 U.S.C. 4212, prohibits job discrimination and requires affirmative action to employ and advance in employment disabled veterans, recently separated veterans (within

three years of discharge or release from active duty), other protected veterans (veterans who served during a war or in a campaign or expedition for which a campaign badge has been authorized), and Armed Forces service medal veterans (veterans who, while on active duty, participated in a U.S. military operation for which an Armed Forces service medal was awarded).

### **RETALIATION**

Retaliation is prohibited against a person who files a complaint of discrimination, participates in an OFCCP proceeding, or otherwise opposes discrimination under these Federal laws.

Any person who believes a contractor has violated its nondiscrimination or affirmative action obligations under the authorities above should contact immediately:

The Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, 1-800-397-6251 (toll-free) or (202) 693-1337 (TTY). OFCCP may also be contacted by e-mail at [OFCCP-Public@dol.gov](mailto:OFCCP-Public@dol.gov), or by calling an OFCCP regional or district office, listed in most telephone directories under U.S. Government, Department of Labor.

---

## Programs or Activities Receiving Federal Financial Assistance

### **RACE, COLOR, NATIONAL ORIGIN, SEX**

In addition to the protections of Title VII of the Civil Rights Act of 1964, as amended, Title VI of the Civil Rights Act of 1964, as amended, prohibits discrimination on the basis of race, color or national origin in programs or activities receiving Federal financial assistance. Employment discrimination is covered by Title VI if the primary objective of the financial assistance is provision of employment, or where employment discrimination causes or may cause discrimination in providing services under such programs. Title IX of the Education Amendments of 1972 prohibits employment discrimination on the basis of sex in educational programs or activities which receive Federal financial assistance.

### **INDIVIDUALS WITH DISABILITIES**

Section 504 of the Rehabilitation Act of 1973, as amended, prohibits employment discrimination on the basis of disability in any program or activity which receives Federal financial assistance. Discrimination is prohibited in all aspects of employment against persons with disabilities who, with or without reasonable accommodation, can perform the essential functions of the job.

If you believe you have been discriminated against in a program of any institution which receives Federal financial assistance, you should immediately contact the Federal agency providing such assistance.

# EMPLOYEE RIGHTS UNDER THE FAIR LABOR STANDARDS ACT

## FEDERAL MINIMUM WAGE

# \$7.25

 PER HOUR

BEGINNING JULY 24, 2009

## STATE AND LOCAL GOVERNMENT EMPLOYEES

### OVERTIME PAY

At least 1½ times the regular rate of pay for all hours worked over 40 in a workweek.

Law enforcement and fire protection personnel: You may be paid overtime on the basis of a “work period” of between 7 and 28 consecutive days in length, rather than on a 40-hour workweek basis.

### COMPENSATORY TIME

Employees may receive compensatory time off instead of cash overtime pay, at a rate of not less than 1½ hours for each overtime hour worked, where provided pursuant to an agreement or understanding that meets the requirements of the Act.

### EXEMPTIONS

The Act does not apply to persons who are not subject to the civil service laws of State or local governments and who are: elected public officials, certain immediate advisors to such officials, certain individuals appointed or selected by such officials to serve in various capacities, or employees of legislative branches of State and local governments. Employees of legislative libraries do not come within this exclusion and are thus covered by the Act.

Certain types of workers are exempt from the minimum wage and overtime pay provisions, including bona fide executive, administrative, and professional employees who meet regulatory requirements.

Any law enforcement or fire protection employee who in any workweek is employed by a public agency employing less than 5 employees in law enforcement or fire protection activities is exempt from the overtime pay provisions.

### YOUTH EMPLOYMENT

16 years old is the minimum age for most occupations. An 18-year old minimum applies to hazardous occupations. Minors 14 and 15 years old may work outside school hours under certain conditions. For more information, visit the YouthRules! Web site at [www.youthrules.dol.gov](http://www.youthrules.dol.gov).

### ENFORCEMENT

The Department has authority to recover back wages and an equal amount in liquidated damages in instances of minimum wage, overtime, and other violations. The Department may litigate and/or recommend criminal prosecution. Employers may be assessed civil money penalties for each willful or repeated violation of the minimum wage or overtime pay provisions of the law. Civil money penalties may also be assessed for violations of the FLSA’s child labor provisions. Heightened civil money penalties may be assessed for each child labor violation that results in the death or serious injury of any minor employee, and such assessments may be doubled when the violations are determined to be willful or repeated. The law also prohibits retaliating against or discharging workers who file a complaint or participate in any proceeding under the FLSA.

### ADDITIONAL INFORMATION

- Some state laws provide greater employee protections; employers must comply with both.
- Employees under 20 years of age may be paid a youth minimum wage of not less than \$4.25 an hour during their first 90 consecutive calendar days after initial employment by an employer.
- Employers are required to display this poster where employees can readily see it.

**The law requires employers to display this poster where employees can readily see it.**

WAGE AND HOUR DIVISION  
UNITED STATES DEPARTMENT OF LABOR

1-866-487-9243  
TTY: 1-877-889-5627  
[www.dol.gov/whd](http://www.dol.gov/whd)

"General Decision Number: AZ20240012 01/19/2024

Superseded General Decision Number: AZ20230012

State: Arizona

Construction Type: Residential

Counties: Coconino and Yavapai Counties in Arizona.

EXCLUDING NAVAJO INDIAN RESERVATION

RESIDENTIAL CONSTRUCTION PROJECTS (consisting of single family homes and apartments up to and including 4 stories).

Note: Contracts subject to the Davis-Bacon Act are generally required to pay at least the applicable minimum wage rate required under Executive Order 14026 or Executive Order 13658. Please note that these Executive Orders apply to covered contracts entered into by the federal government that are subject to the Davis-Bacon Act itself, but do not apply to contracts subject only to the Davis-Bacon Related Acts, including those set forth at 29 CFR 5.1(a)(1).

<p>If the contract is entered into on or after January 30, 2022, or the contract is renewed or extended (e.g., an option is exercised) on or after January 30, 2022:</p>	<ul style="list-style-type: none"> <li>. Executive Order 14026 generally applies to the contract.</li> <li>. The contractor must pay all covered workers at least \$17.20 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on the contract in 2024.</li> </ul>
<p>If the contract was awarded on or between January 1, 2015 and January 29, 2022, and the contract is not renewed or extended on or after January 30, 2022:</p>	<ul style="list-style-type: none"> <li>. Executive Order 13658 generally applies to the contract.</li> <li>. The contractor must pay all covered workers at least \$12.90 per hour (or the applicable wage rate listed on this wage determination, if it is higher) for all hours spent performing on that contract in 2024.</li> </ul>

The applicable Executive Order minimum wage rate will be adjusted annually. If this contract is covered by one of the Executive Orders and a classification considered necessary for performance of work on the contract does not appear on this wage determination, the contractor must still submit a conformance request.

Additional information on contractor requirements and worker protections under the Executive Orders is available at <http://www.dol.gov/whd/govcontracts>.

=====  
\*\* Workers in this classification may be entitled to a higher minimum wage under Executive Order 14026 (\$17.20) or 13658 (\$12.90). Please see the Note at the top of the wage determination for more information. Please also note that the minimum wage requirements of Executive Order 14026 are not currently being enforced as to any contract or subcontract to which the states of Texas, Louisiana, or Mississippi, including their agencies, are a party.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within

the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

-----

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

#### Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

#### Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

#### Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in

the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

---

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

=====

END OF GENERAL DECISION"

-----  
WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

=====  
\*\* Workers in this classification may be entitled to a higher minimum wage under Executive Order 14026 (\$17.20) or 13658 (\$12.90). Please see the Note at the top of the wage determination for more information. Please also note that the minimum wage requirements of Executive Order 14026 are not currently being enforced as to any contract or subcontract to which the states of Texas, Louisiana, or Mississippi, including their agencies, are a party.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

-----  
The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed

in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

#### Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

#### Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

---

#### WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

- \* an existing published wage determination
- \* a survey underlying a wage determination

- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
 Wage and Hour Division  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
 U.S. Department of Labor  
 200 Constitution Avenue, N.W.  
 Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

=====

END OF GENERAL DECISION"

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Mark Wilson, Deputy Fire Chief  
**Co-Submitter:** Emily Markel  
**Co-Submitter:** Emily Markel  
**Date:** 06/24/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Contract:** Cooperative Purchase Contract with Hughes Fire Equipment, Inc. in the amount of \$1,064,108,07, plus fees and costs, for the purchase of two Fire Department Water Tenders with Bond funding.

**STAFF RECOMMENDED ACTION:**

1. Approve the Cooperative Purchase Contract with Hughes Fire Equipment, Inc. in the amount of \$1,064,108,07, plus fees and costs, for the purchase of two Fire Department Water Tenders with Bond funding; and
2. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

A water tender is a specialized vehicle that brings large amounts of water to a fire incident. The proposed Flagstaff Fire Department tenders are equipped with 2000-gallon tanks to help support smaller engines with additional water already operating on the fire. The use is typically for wildfires, but can also be used for interstate fires or structure fires in areas with limited water supply. Wildfires continue to increase in size, intensity, and cost in and around our community. Maintaining a quick, effective, and safe response by the Flagstaff Fire Department is critical to protecting our community and surrounding public forests. In response to increased wildfire threats in our area, FFD is recommending that the City Council approve a Cooperative Purchase Contract replacing two 20+-year-old fire Water Tenders with new units and funded through voter-approved Prop 441 funding. This purchase helps increase dependability by replacing older aged-out units and provides up-to-date safety equipment for our membership. FFD has chosen to work with Hughes Fire Equipment, Inc. through a vetted cooperative agreement. This company has also proven a high quality of work, and history with excellent warranty support.

**Financial Impact:**

**Project Name:** Prop 441 Bond Funding for replacement of two Fire Department Water Tenders  
**Cost:** \$1,064,108.07  
**Account Number Budgeted:** Bond Account - 410-03-051-0205-2-4401  
**FY2024-25 Budgeted Amount:** \$2,295,000  
**Grant Funded:** No  
**Funding Source:** Bond Funding plus money from General Fund to cover the gap approved by the City Budget Team in March of 2024.

**Policy Impact:**

None.

**Previous Council Decision or Community Discussion:**

The City Council, along with a Citizens Committee was informed and approved the voter 441 bond funding initiative to purchase two new Water Tenders for the Fire Department. We also held multiple public meetings to discuss the project and the purchasing of these units before the bond went to vote.

**Options and Alternatives to Recommended Action:**

1. Approve the Cooperative Purchase Contract with Hughes Fire Equipment, Inc. for the two new Water Tenders with Bond funding; or
2. Not purchase the units and maintain the use of the current 20+ year old units.

**Background and History:**

In 2021 a capital deficit was identified in the Fire Department that could not be covered by normal general funds. A bond committee was established to identify various unfunded capital projects in the city. The Fire Department was approved to place four (4) 20+ -year-old aged-out units that were not part of the current FLEET replacement plan. Two of those units have been purchased and the two Water Tenders are the two remaining to complete the voter-approved Fire Department initiative. These units will keep the Fire Department with dependable, safe, and efficient equipment for the various uses in which they serve.

City of Flagstaff Procurement department completed a review of an agency contract through the Houston-Galveston-Area-Council Cooperative Purchasing Program (HGAC). HGAC conducted a competitive open procurement through Request For Proposals ID:FS12-23 that resulted in contract FS12-23 with the Contractor.

**Connection to PBB Priorities and Objectives:**

Performance-Based Budget Priorities:

Safe & Healthy Community - Provide public safety with the resources, staff, and training to respond to community needs.

High Performing Governance - Serve the public by providing high-quality internal and external service.

**Connection to Regional Plan:**

Goal PF.3. Provide high-quality emergency response and public safety services including law enforcement, fire, medical, and ambulance transport service.

Policy PF.3.1. Maintain high-quality effectiveness and efficiency in law enforcement, fire, and emergency services to the extent that is consistent with governmental operations, plans, public policies, population served, and monies available.

**Connection to Carbon Neutrality Plan:**

Reduces carbon emission through wildfire mitigation.

**Connection to 10-Year Housing Plan:**

N/A

**Connection to Division Specific Plan:**

Part of the 8-year Apparatus capital replacement plan.

                          Exhibit C - Photograph of Water Tender

## COOPERATIVE PURCHASE CONTRACT

Contract No. 2024-201

This Cooperative Purchase Contract is made and entered into this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_ by and between the City of Flagstaff, Arizona, a political subdivision of the State of Arizona ("City") and Hughes Fire Equipment, Inc., an Oregon "S" Corporation ("Contractor").

### RECITALS:

- A. Contractor is a fully authorized vendor of **Fire Apparatus and Related Vehicles**;
- B. The **Houston-Galveston-Area-Council Cooperative Purchasing Program (HGAC)** conducted a competitive and open procurement process through Request for Proposal **Project ID: FS12-23** that resulted in Contract No. **FS12-23** with Contractor ("Agency Contract"); and
- C. The City has authority to enter into a cooperative purchase contract with Contractor utilizing the Agency Contract.

### AGREEMENT:

NOW THEREFORE, in consideration for the mutual promises herein, the Parties agree as follows:

1. Materials and or Services Purchased: Contractor shall provide to the City the materials and/or services, as specified in the Scope of Work attached as Exhibit A, and in accordance with the Agency Contract. A general description of materials and/or services being purchased is:

#### **TWO (2) FREIGHTLINER 114SD BME CASCADE TENDERS**

2. Specific Requirements of City: Contractor shall comply with all specific purchase and delivery requirements and/or options of City, as specified in the Scope of Work attached as Exhibit A and incorporated by reference.
3. Payment: Payment to Contractor for the materials and/or services not to exceed **ONE MILLION SIXTY-FOUR THOUSAND ONE HUNDRED EIGHT DOLLARS AND SEVEN CENTS (\$1,064,108.07)**, in addition to other fees and costs; made in accordance with the price list and terms set forth in the Agency Contract. Any price adjustment must be approved by mutual written consent of the parties through a formal amendment. The City Manager or his/her designee (the Purchasing Director) may approve an amendment if the amendment price increase is less than \$100,000; otherwise, City Council approval is required.
4. Certificates of Insurance: All insurance provisions of the Agency Contract shall apply, including any requirement to name the City as an additional insured. Prior to commencing performance under this Contract, Contractor shall furnish City with a copy of the current Certificate of Insurance required by the Agency Contract.
5. Term: This Cooperative Purchase Contract shall commence upon execution by the Parties and shall continue until expiration or termination of the underlying Agency Contract, unless sooner terminated by City in writing.

6. Renewal: This Cooperative Purchase Contract shall be automatically renewed if the underlying Agency Contract is renewed, for the same renewal period, unless City provides advance written notice to Contractor of its intention to non-renew.
7. Notice: Any formal notice required under the Contract shall be in writing and sent by certified mail and email as follows:

To the City:  
 Mark Wilson  
 Deputy Chief  
 City of Flagstaff  
 211 W. Aspen Ave.  
 Flagstaff, AZ 86001  
[mwilson@flagstaffaz.gov](mailto:mwilson@flagstaffaz.gov)  
 928-213-2506

To Contractor:  
 Ed McDonald  
 Hughes Fire Equipment, Inc.  
 5159 W. Roosevelt Street  
 Phoenix, AZ 85043  
[emcdonald@hughesfire.com](mailto:emcdonald@hughesfire.com)  
 623-910-4415

With a copy to:  
 Emily Markel  
 Purchasing Manager  
 City of Flagstaff  
 211 W. Aspen Ave.  
 Flagstaff, AZ 86001  
[emarkel@flagstaffaz.gov](mailto:emarkel@flagstaffaz.gov)

9. Authority: Each Party warrants that it has authority to enter into the Contract and perform its obligations hereunder, and that it has taken all actions necessary to enter into the Contract.

Build Location: Boise, Idaho

Proposal Price	\$993,776.00	
Arizona State Sales Tax @ 5.60%		55,651.46
Phoenix Sales Tax @ 2.70%		26,831.95
PHX Transportation Plan Tax @ 0.3% of \$13,886.00		83.32
<b>Total Bid Price Including Sales Tax</b>		<b>\$1,076,342.73</b>
Less payment upon completion @ factory discount	(11,297.00)	
<b>Subtotal including all pre-pay discounts</b>	<b>\$982,479.00</b>	
Arizona State Sales Tax @ 5.60%		55,018.82
Phoenix Sales Tax @ 2.70%		26,526.93
PHX Transportation Plan Tax @ 0.3% of \$13,886.00		83.32
<b>Total Bid Price Including Sales Tax</b>		<b>\$1,064,108.07</b>

**Terms:**

**Price Expiration:** The above pricing is valid until July 30, 2024.

**Delivery:** Based on BME's current delivery schedule the apparatus would be ready for delivery within **18 to 20** months from receipt of chassis at the manufacturing facility. Delivery is subject to change pending BME's delivery schedule at time of order. This time does not include any possible delays that may be caused by national disasters or pandemic.

**Payment Terms:**

- a. If pre-payment discount options are elected, the following terms will apply:
  - i. **Payment Upon Completion at Factory Discount:** If elected, final payment is due prior to apparatus leaving the factory for delivery. If payment is not processed upon receipt of invoice the discount total will be required in addition to the invoice amount.
  - b. If pre-payment discount options are not elected standard payment terms will apply: Final payment will be due 10 days after the apparatus leaves the factory for delivery. If payment is not made at that time a late fee will be applicable.
  - c. If Customer elects to purchase the proposed apparatus using a credit card a convenience fee will be applicable.

**Change Orders:** Changes processed after order placement will be processed per the following structure; deductions will be based on the option price at time of order placement, additions will be based on current pricing levels at time of change request.

**Consortium Purchase:** The proposal is based on the unit being purchased through H-GACBuy (Houston-Galveston-Area-Council Cooperative Purchasing Program) utilizing contract FS12-23 valid until 11/30/2027, with a registered End User member Interlocal Contract "ILC." It is the purchaser's responsibility to determine if the use of consortiums meets their purchasing requirements. More information can be found at hgacbuy.org.

**Component/Chassis Price Volatility:** BME and the dealer have absolutely no control over chassis pricing and/or delivery. BME will issue a quote to the dealer for the chassis price, but pricing can/will be subject to any increases or surcharges issued by the manufacturer. Significant components, i.e., tanks, pumps, lighting, and or controls, could be subject to an increase if it is over 3%. Any price increase for components/chassis of Product will be passed through to the Customer and will be documented on a Change Order.

**Performance Bond:** A performance bond is not included in the above price.

**Transportation:** Transportation of the apparatus to be driven from the factory to the customer's location is included in the above pricing. If customer elects to drive the apparatus from the factory, **\$6,000.00 (or \$3,000.00 per unit)** may be deducted from the purchase price. If this option is elected payment in full and proof of insurance must be provided prior to leaving the factory and the customer is responsible for compliance with all state, local and federal DOT requirements.

**Inspection Trips:** Two (2) factory inspection trips for four (4) customer representatives is included in the above pricing. The inspection trips will be scheduled at times mutually agreed upon between the manufacture's representative and the customer, during the window provided by the manufacturer. Airfare, lodging and meals while at the factory are included. In the event the customer is unable to travel to the factory or the factory is unable to accept customers due to the restrictions caused by a national disaster or pandemic then the Dealership reserves the right to use forms of electronic media to accomplish the intention of the inspection trips. Every effort will be made to make the digital media as thorough as possible to satisfy the expectations of the of the customer. If the customer elects to forgo an inspection trip **\$2,000.00** per traveler (per trip) will be deducted from the final invoice.

**Acceptance of Proposal:** If the customer wishes to purchase the proposed apparatus Hughes Fire Equipment will provide the Customer its form of Purchase Agreement for the Customer's review and signature. If the Customer desires to use its standard form of purchase order as the Purchase Agreement, the purchase order is subject to review for any required revisions prior to acceptance. **All purchase orders shall be made out to Hughes Fire Equipment.**

BME Fire Trucks, LLC

**FIRE TRUCKS**

FOR  
**FLAGSTAFF FIRE DEPARTMENT**

**3,000 GALLON TENDER  
"CASCADE"**

**DETERMINATION OF APPARATUS WEIGHT**

# BME Fire Trucks, LLC

BME Fire Trucks, LLC. shall submit estimated "in-service" weight analysis required by applicable NFPA standards. This Excel computer weight analysis shall break down all major components of the apparatus and shall show the impact on percentage-of-load on the front and rear axles, total weight, and weight on each tire set.

The analysis shall evenly distribute the NFPA required minimum payload allowance or estimated equipment payload as provided by the purchaser into the specified compartments. The allowance for personnel, hose loads, water and foam fluids, and required NFPA equipment shall be outlined individually in the analysis and placed on the apparatus in its specific intended position.

## **CENTER-OF-GRAVITY ANALYSIS**

BME Fire Trucks, LLC. shall perform an estimated center of gravity calculation as required by the applicable section of NFPA standards. This calculation shall include tilt angles, the estimated right to left load distribution, and load on each axle, including all specified major components.

## **LOW VOLTAGE TEST REQUIRMENTS**

The fire apparatus low voltage electrical system shall be tested as required by this section and the test results shall be certified by the apparatus manufacturer. The certification shall be delivered to the purchaser with the documentation for the completed apparatus. The tests shall be performed when the air temperature is between 0 degrees Fahrenheit and 110 degrees Fahrenheit.

## **TEST SEQUENCE**

The three tests defined below shall be performed in the order in which they appear. Before each test, the chassis batteries shall be fully charged until the voltage stabilizes at the voltage regulator set point and the lowest charge current is maintained for 10 minutes. The failure of any of these tests shall require a repeat of the test sequence.

## **RESERVE CAPACITY TEST**

The chassis engine shall be started and kept running until the chassis engine and engine compartment temperatures are stabilized at normal operating temperatures and the chassis battery system is fully charged. The chassis engine shall be shut off and the minimum continuous electrical load shall be applied for 10 minutes. All electrical loads shall be turned off prior to attempting to restart the chassis engine. The chassis battery system shall then be capable of restarting the chassis engine. The failure to restart the chassis engine shall be considered a failure of this test.

## **ALTERNATOR PERFORMANCE TEST AT IDLE**

# BME Fire Trucks, LLC

The minimum continuous electrical load shall be applied with the chassis engine running at idle speed. The chassis engine temperature shall be stabilized at normal operating temperature. The chassis battery system shall be tested to detect the presence of a chassis battery current discharge. The detection of chassis battery current discharge shall be considered a failure of this test.

## **ALTERNATOR PERFORMANCE TEST AT FULL LOAD**

The total continuous electrical load shall be applied with the chassis engine running up to the engine manufacturer's governed speed. The test duration shall be a minimum of two hours. The activation of the electrical system load management system shall be permitted during this test. The activation of an alarm due to excessive chassis battery discharge, as detected by the system required by NFPA (current edition), or an electrical system voltage of less than 11.8 volts direct current for a 12 volt direct current nominal system, for more than 120 seconds, shall be considered a failure of this test.

## **LOW VOLTAGE ALARM TEST**

Following the completion of the tests described above, the chassis engine shall be turned off. With the chassis engine turned off, the total continuous electrical load shall be applied and shall continue to be applied until the excessive battery discharge alarm activates. The chassis battery voltage shall be measured at the battery terminals.

The test shall be considered to be a failure if the low voltage alarm has not yet sounded 140 seconds after the voltage drops to 11.70 volts direct current for a 12 volt direct current nominal system. The chassis battery system shall then be able to restart the chassis engine. The failure of the chassis battery system to restart the chassis engine shall be considered a failure of this test.

The completed fire apparatus shall undergo a complete 12 volt electrical load and performance testing per applicable sections of NFPA standards with inspection and test sheets included in delivery documentation.

## **DOCUMENTATION**

The apparatus manufacturer shall provide the results of the low-voltage electrical system performance test, certified in writing, with the documentation provided to the purchaser at the time of delivery of the completed apparatus.

The test results shall consist of the following documents:

- (1) Documentation of the electrical system performance tests.
- (2) A written electrical load analysis, including the following:
  - (a) The nameplate rating of the alternator.
  - (b) The alternator rating under the conditions specified in NFPA 1906 (current edition).
  - (c) Each of the component loads specified that make up the minimum continuous electrical load.

# BME Fire Trucks, LLC

- (d) Additional electrical loads that, when added to the minimum continuous electrical load, determine the total continuous electrical load.
- (e) Each individual intermittent electrical load.

## **TEST RESULTS**

BME Fire Trucks LLC. shall provide results of the apparatus testing and shall certify the following:

The weight of the completed apparatus, when loaded to its estimated in service weight, does not exceed the GVWR and GAWR of the chassis.

The complete unit, when loaded to its estimated in service weight, meets the weight distribution and vehicle stability requirements, as defined in the current NFPA guidelines.

The unit meets all required federal standards pertaining to the manufacturer and completion of the apparatus and a label tag has been affixed to the apparatus by the manufacturer stating same.

BME Fire Trucks LLC. shall provide all testing results, including engine, speed, acceleration, road ability, braking, and auxiliary braking to the Purchaser at the time of delivery.

## **DELIVERY REQUIREMENTS**

The bidder shall not be responsible for delays in delivery due to strikes, acts of God, failure of suppliers to deliver, chassis shortage and other reasons beyond the reasonable control of the builder. Should BME Fire Trucks, LLC. be unable to comply with the proposed delivery date, we shall immediately contact the purchaser regarding delay information and actions to be taken by the company.

This vehicle shall be F.O.B. the BME Fire Trucks facility in Boise Idaho. Dealer shall be responsible for arrangement of delivery from factory.

## **GENERAL WARRANTY PROVISIONS**

All materials and workmanship herein specified, including all equipment furnished, shall be guaranteed for a period of one (1) year after the acceptance date of the apparatus, unless otherwise noted, with the exception of any normal maintenance services or adjustments which shall be required. Under this warranty, BME Fire Trucks, LLC. shall be responsible for the costs of repairs to the apparatus that have been caused by defective workmanship or materials during this period.

This warranty shall not apply to the following:

- Any component parts or trade accessories such as chassis, engines, tires, pumps, valves, signaling devices, batteries, electric lights, bulbs, alternators, and all other installed equipment and accessories, in as much as they are usually warranted separately by their respective manufacturers, or are subject to normal wear and tear.

# BME Fire Trucks, LLC

- Failures resulting from the apparatus being operated in a manner or for a purpose not recommended by the apparatus manufacturer.
- Loss of time or use of the apparatus, inconvenience or other incidental expenses.
- Any apparatus which has been repaired or altered without written consent or outside of the apparatus manufacturer's factory and or authorized service center in any way that affects its stability, or which has been subject to misuse, negligence, or accident.
- Delivery of the apparatus to repair site.

## **DISCLAIMER**

NO WARRANTIES ARE GIVEN BEYOND THOSE DESCRIBED HEREIN. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. THE COMPANY SPECIFICALLY DISCLAIMS WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OTHER REPRESENTATIONS TO THE USER/PURCHASER AND ALL OTHER OBLIGATIONS OR LIABILITIES. FURTHER, THE COMPANY EXCLUDES LIABILITY FOR CONSEQUENTIAL AND INCIDENTAL DAMAGES, ON THE PART OF THE COMPANY OR SELLER. No person is authorized to give any other warranties or to assume any liabilities on the Company's behalf unless made or assumed in writing by the seller; and no other person is authorized to give any warranties or to assume any liabilities on the seller's behalf unless made or assumed in writing by the seller.

## **OBTAINING SERVICE**

Return the vehicle to any BME Fire Trucks, LLC. dealer/authorized service center; Return the vehicle to BME Fire Trucks, LLC. or contact BME Fire Trucks, LLC.. BME Fire Trucks, LLC. shall be solely responsible for determining the extent of repair under the terms of the warranty. Transportation costs shall be the responsibility of the purchaser.

## **MATERIAL AND WORKMANSHIP**

All equipment provided shall be guaranteed to be new and of current manufacture, and unless specified otherwise, shall meet all requirements of these specifications and prevailing NFPA documents and be in condition at time of delivery for use as specified for this type of apparatus.

All workmanship shall be of the highest quality and accomplished in a professional manner so as to insure a functional apparatus with a high quality aesthetic appearance.

# BME Fire Trucks, LLC

The construction shall be rugged and ample safety factors shall be provided to carry the loads specified to meet both on and off road requirements.

The apparatus shall be designed and the equipment mounted with due consideration to the distribution of load between the front and rear axles, so all specified equipment, with a full complement of personnel, can be carried without damage to the apparatus.

## **BODY AND STRUCTURAL WARRANTY**

BME Fire Trucks, LLC. shall warrant each new apparatus body, if used in a normal and reasonable manner, against structural defects caused by defects in material, design or workmanship for a period of ten (10) years, covering parts & labor to the original purchaser which shall start on day of acceptance.

This warranty shall not apply to:

- Normal maintenance services or adjustments
- To any vehicle which will have been repaired or altered outside of our factory in any way so as, in the judgment of BME Fire Trucks, LLC., to affect it's stability, nor which has been subject to misuse, negligence, or accident, nor to any vehicle made by us which will have been operated to a speed exceeding the factory rated speed, or loaded beyond the factory rated load capacity.
- Commercial chassis and associated equipment furnished with chassis, signaling devices, generators, batteries, or other trade accessories as they are usually warranted separately by their respective manufacturers.
- Shipping costs of parts or apparatus for purposes of repair or replacement of parts. This warranty is in lieu of all other warranties, expressed or implied. All other representations as to the original purchaser and all other obligations or liabilities, including for incidental or consequential damage on the company's behalf unless made in writing by the company.

## **PLUMBING WARRANTY**

The stainless steel fire pump plumbing shall carry a ten (10) year parts and labor warranty against defects in workmanship and perforation corrosion.

## **AKRON VALVE WARRANTY**

The Akron valves shall carry a ten (10) year parts and labor manufacturer's warranty. Provisions of this warranty shall be provided with the completed apparatus documentation.

## **PAINT WARRANTY**

# BME Fire Trucks, LLC

BME Fire Trucks, LLC. shall provide a seven (7) year paint warranty which shall cover peeling and/or de-lamination of the top coat and other layers of paint, cracking or checking, loss of gloss caused by cracking, checking or chalking, and any paint failure caused by defective paint materials covered by the paint manufacturer's material warranty.

## **CHASSIS WARRANTY**

The specified chassis shall be provided with the chassis manufacturer's warranty. The exact provisions of this warranty shall be supplied with the completed apparatus documentation.

## **APPARATUS OPERATION MANUAL(S)**

BME Fire Trucks, LLC. shall provide (2) electronic apparatus operational manual(s) on a USB thumb drive.

## **CHASSIS SPECIFICATIONS**

## **CAB SEATING AND WEIGHT ALLOWANCE**

A warning label shall be installed in the cab to indicate seating positions.

## **LABELS, STANDARD PACKAGE SET**

A standard set of labels shall be provided and installed on the inside of chassis cab area. The labels shall contain the required information based on the applicable components for the apparatus.

## **DATA PLAQUE**

A data plaque shall be provided and installed on the inside of the cab. The data plaque shall contain the required information based on the applicable components for the apparatus:

- Engine oil
- Engine coolant
- Chassis transmission fluid
- Drive axle lubricant
- Power steering fluid
- Pump, generator, or other component lubrications
- Other NFPA applicable fluid levels or data as required
- Paint manufacturer, type, and color number
- Tire Speed Ratings

## **DATA PLAQUE**

A data plaque shall be provided and installed. The plaque shall contain the following information.

- Pump make and model
- GPM capacity rating

## BME Fire Trucks, LLC

- Truck serial and production number
- Pump performance (specific GPMs at rated pressures with engine RPM)
- Governed engine RPM
- Pump gear ratio

### **WARNING LABEL -- NO RIDING ON REAR**

A warning label stating: "WARNING: DO NOT RIDE ON REAR STEP WHILE VEHICLE IS IN MOTION. DEATH OR SERIOUS INJURY MAY RESULT" shall be installed on the rear of the apparatus. The label shall be applied to the vehicle at the rear step area. The label shall warn personnel that riding in or on these areas, while the vehicle is in motion, is prohibited.

### **WARNING LABEL -- OCCUPANT SEATED AND BELTED**

A warning label for occupants seated to be belted shall be mounted in a location visible to all occupants of the cab. The label shall meet FAMA07 standards.

Label shall read "Crash hazard occupants must be seated and belted when vehicle is in motion. Use only OEM approved belts. Unbelted occupants are at greater risk of injury or death in a crash."

### **WARNING LABEL -- SIREN NOISE**

A warning label for siren noise {will/shall} be located inside driver cab door. The label shall comply with FAMA42 standards.

Label shall read, "Sirens produce loud sounds that may damage hearing. Roll up windows. Wear hearing protection. Use only for emergency response. Avoid exposure to siren sound outside of vehicle."

### **WARNING LABEL -- HELMET WORN IN CAB**

A warning label for wearing helmet in cab shall be located visible from each seating location. The label shall comply with FAMA43 standards.

The label shall read, "Cash Hazard. Do not wear helmet while seated unless necessary during suppression operations. Serious head or neck injury may result from helmet use in cab. Failure to comply may injure or kill."

### **AIR FILTER EMBER PROTECTION SCREEN WARNING LABEL**

A warning label, stating: "THIS VEHICLE HAS AN AIR INTAKE EMBER SCREEN WHICH REQUIRES PERIODIC INSPECTION & CLEANING" shall be provided and installed in the apparatus cab interior.

# BME Fire Trucks, LLC

## **FRESH AIR EMBER SEPARATOR WARNING LABEL**

A warning label, stating: “THIS APPARATUS IS EQUIPPED WITH A CAB FRESH AIR INTAKE EMBER PROTECTION SCREEN. ROUTINE INSPECTION IS REQUIRED.” shall be provided and installed in the apparatus cab interior.

## **MANUFACTURER LOGO**

The apparatus shall include a BME logo plaque which shall be affixed at the rear of the apparatus.

The BME plaque shall feature white reflective material on the outside of the Maltese cross and red reflective material in the middle.

## **FRONT TOWING PROVISIONS**

Two (2) front towing provisions shall be installed by the chassis manufacturer.

## **REAR TOW EYES**

Two (2) bolt-on tow eyes shall be installed at the rear of the chassis. The tow eyes shall be painted or powder coated gloss black.

## **AIR HORN**

One (1) Buell brand, Model #1063 15" air horn shall be provided and mounted on the frame rail of the passenger's side frame, behind the bumper.

## **AIR HORN FOOT SWITCH**

One (1) foot switch shall be provided and installed. The foot switch shall be located on the driver's side of the floor and shall activate the air horn system.

## **EXHAUST SYSTEM MODIFICATION**

The chassis exhaust system shall be modified to exit on the passenger side of the apparatus ahead of the rear wheel.

## **REAR MUD FLAPS**

The chassis shall be supplied with mud flaps with BME's logo. The mud flaps shall be installed behind the rear wheels.

# BME Fire Trucks, LLC

## **CAB DOOR REFLECTIVE PANELS**

The cab doors shall include reflective white trim installed inside each door.

Specified part shall include Red and White DOT approved reflective striping.

## **FRONT AIR RIDE SEATS**

### **CAB SEATING**

The apparatus shall be equipped with two (2) Bostrom Sierra 100 air ride seats. The seats shall have an inside arm rest.

The specified seat(s) covers shall be dark grey vinyl.

## **UNDERHOOD LIGHTS**

There shall be two (2) Tecniq LED light(s) installed under the hood of the chassis. Lights shall have local switching on the driver side under the hood.

## **AIR FILTER EMBER PROTECTION SCREEN AND WARNING LABEL**

The chassis air intake shall be protected by an ember guard of 18 Mesh, 0.017-inch wire diameter, and a maximum mesh opening of 0.039 inches. The ember guard shall be sized to fit and located at the intake opening. The screen shall be readily accessible for inspection and maintenance.

## **EMBER SEPARATOR -- FRESH AIR INTAKE TO CAB**

The cabin air filter shall be protected by an ember guard with a maximum mesh opening of 0.039 inches.

## **OEM TINTED CAB WINDOWS**

The cab windows shall remain as tinted by the OEM chassis manufacturer for UV resistance only, no aftermarket tinting shall be done.

## **TIRE PRESSURE INDICATOR SYSTEM**

There shall be a tire pressure indicator at each road tire's valve stem on the vehicle. The indicators shall provide LED indication if there is insufficient pressure in the specific tire.

## **FIRE PUMP SPECIFICATIONS**

# BME Fire Trucks, LLC

A Waterous model CSUC22, 1500 GPM single stage centrifugal pump shall be designed to mount on the chassis frame rails and shall be split-drive shaft driven. The pump casing shall be of high-tensile, close-grained gray iron. Pump body shall be horizontally split in two (2) sections, for easy removal of impeller assembly including wear rings and bearings from beneath the pump without disturbing the mounting or piping.

A matched bronze impeller specifically designed for the fire service will be provided. It shall be accurately balanced both mechanically and hydraulically, for vibration-free operation. Stainless steel heat-treated and precisely ground to size. It shall be supported on both ends by oil or grease lubricated ball bearings.

Replaceable wear rings, bronze, reverse-flow, labyrinth-type shall be provided. Three (3) deep groove ball bearings shall be located outside the pump to give rugged support and proper alignment to the impeller shaft. The bearings shall be oil or grease lubricated. All bearings shall be completely separated from the water being pumped. Located on the impeller shaft between stuffing boxes and bearing housing shall be provided.

The housing shall be constructed of high tensile aluminum and be of three (3) piece, horizontally split design. The transmission driveline shafts shall be made from alloy steel forged, hardened and ground to size. The drive and driven sprockets shall be made of steel and shall be carbonized and hardened. The drive chain shall be Morse HV in volute form chain. The lubrication system shall be impeller shaft driven oil pumps to deliver oil to an integral spray header, to completely pressure lubricate the drive chain.

A pump bearing grease fitting shall be provided in the pump enclosure. Fitting shall have a protective dust cap and shall be properly labeled. The pump shall be bolted to steel angles in pump module, using grade 8 bolts.

## **FIRE PUMP WARRANTY**

A seven (7) year warranty on the Waterous fire pump shall be provided. The provisions of this warranty shall be described in the completed apparatus documentation.

## **PRIMING SYSTEM**

A Waterous model #VPOS electrically driven, positive displacement, rotary vane type 'oil less' priming pump shall be installed. The pump shall be capable of taking suction and discharging water with a lift of 10 feet in not more than 30 seconds with the pump dry, through 20 feet of suction hose of appropriate size. It shall be capable of developing a vacuum of 22" at an altitude of up to 1000 feet. The system shall be activated with a push button switch.

## **PRIMING VALVE**

A Waterous model #82507-2T VAP priming valve shall be installed on the apparatus.

## **FIRE PUMP SHIFT**

# BME Fire Trucks, LLC

The fire pump shall be equipped with an air operated pump shift, pneumatically controlled using a power-shifting cylinder. The Waterous air shift control valve shall be mounted in the cab. The fire pump-shift system shall be equipped with a means to prevent unintentional movement of the control device from its set position. The system shall include a nameplate indicating the chassis transmission shift selector position to be used for pumping and located so that it can be easily read from the driver's position.

The system shall have required indicator and interlock systems shall be installed as required by the pump manufacturer and applicable NFPA standards.

The system shall include all required interlocks and pump shift and OK TO PUMP indicator lights in the cab and pump panel. The fire pump system shall be equipped with an interlock system shall be provided to ensure that the pump drive system components are properly engaged in the pumping mode of operation so that the pumping system can be safely operated from the pump operator's position. The secondary braking device shall be automatically disengaged for pumping operations.

## **THIRD PARTY FIRE PUMP TEST**

The pump shall undergo an Underwriters Laboratories Incorporated witnessed and certified test per applicable sections of NFPA 1900 standards, prior to delivery of the completed apparatus. The UL acceptance certificate shall be furnished with the apparatus on delivery. No exceptions to UL testing, no other third party agency shall be acceptable.

## **FIRE PUMP DRIVE LINE INSTALLATION**

The mid-ship fire pump shall be installed with constant heavy duty #1810 drive shafts with vibration free angles to the rear axle.

## **INTAKE DUMP VALVE**

An Waterous brand intake dump valve shall be provided and mounted on the suction side of the pump. The discharge piping of the dump valve shall be a minimum of 2-1/2" diameter and shall terminate with a 2-1/2" male NST adapter. The excess water shall be discharged to the ground. A label shall be provided indicating: "DUMP VALVE DISCHARGE, DO NOT CAP".

## **BYPASS FIRE PUMP COOLER**

The fire pump shall be equipped with a cooling line, the line shall be routed through the main and auxiliary pump (if applicable) to an adjustable valve, from the valve the water shall be routed through the apparatus' engine cooling system and then to the water tank. The valve on the pump panel shall be labeled "Engine Cooler".

## **PLUMBING- GENERAL**

# BME Fire Trucks, LLC

The plumbing system shall utilize stainless steel piping incorporating hosing to allow for flex. The piping shall utilize TIG welding to provide a complete seal. Hard angles shall be avoided when possible to improve water flow characteristics. The piping shall utilize Victaulic couplers whenever possible to allow flex as the body module flexes.

Threaded sections of piping shall be avoided to reduce the leak potential of the system. Victaulic couplers shall be used in place of threading to reduce leak potential. Schedule 10 stainless steel piping shall be used for transport type piping. Schedule 40 stainless steel shall be used for areas requiring threading to provide a stable threading base. Brackets shall be installed to support threading locations thereby reducing the potential for leaks.

All hoses shall be connected directly to the tank due to the different flex ratios of the tank to body. Any front discharges, any rear discharges, and all cross lays shall use hose to reach the actual discharge. The use of hose shall be utilized due to the difference in flex or movement between the discharge location and the pump connection. Drain lines shall be provided at the lowest points in the plumbing system to allow for complete drainage. Bleeders shall be provided for all gauges to relieve pressure after use. Push/ pull handles shall be provided for all bleeders and the primer control.

## **6" UNGATED INTAKE -- LEFT SIDE**

One (1) 6" un-gated suction intake shall be installed on the left side pump panel to supply the fire pump from an external water supply. The threads shall be 6" NH male and equipped with a removable screen.

One (1) chrome brass 6" NH long handle cap shall be installed on the intake.

## **6" UNGATED INTAKE -- RIGHT SIDE**

One (1) 6" un-gated suction intake shall be installed on the right side pump panel to supply the fire pump from an external water supply. The threads shall be 6" NH male and equipped with a removable screen.

One (1) chrome brass 6" NH long handle cap shall be installed on the intake.

## **2-1/2" GATED INTAKE -- LEFT SIDE**

One (1) 2-1/2" gated suction intake shall be recessed mounted on the left side pump panel to supply the fire pump from an external water supply. The valve shall be a quarter-turn ball valve with the appropriate handle and shall have 2-1/2" NH female thread.

The intake shall be equipped with a South Park Corp. 3/4" Push-pull type drain valve mounted to the bottom of the valve.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed

## BME Fire Trucks, LLC

to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2-1/2" NH rocker lug plug with a securing chain or cable shall be installed on the intake.

### **2-1/2" GATED INTAKE -- RIGHT SIDE**

One (1) 2-1/2" gated suction intake shall be recess mounted on the right side pump panel to supply the fire pump from an external water supply. The valve shall be a quarter-turn ball valve with the appropriate handle and shall have 2-1/2" NH female thread.

The intake shall be equipped with a South Park Corp. 3/4" Push-pull type drain valve mounted to the bottom of the valve.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

One (1) chrome brass 2-1/2" NH rocker lug plug with a securing chain or cable shall be installed on the intake.

### **WATER TANK SUPPLY LINE TO FIRE PUMP**

One (1) 4" water tank to pump line shall be installed with a 4" full flow quarter turn ball valve and 4" piping. The line shall be equipped with a hump hose with stainless steel hose clamps and a 4" full flow check valve to prevent pressurization of the water tank.

One (1) Akron 8840 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement. The valve shall be operated by an electric actuator.

The specified electric valve shall be controlled with a Navigator Pro 2.0 9333 controller.

### **PUMP TO TANK**

One (1) 2" pump to tank line shall be installed with a 2" full flow quarter turn ball valve and 2" piping.

One (1) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed

## BME Fire Trucks, LLC

to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

For valve actuation, the specified discharge shall be equipped with a side mount valve control. The ergonomically designed 1/4 turn push-pull T-handle shall be chrome plated zinc with recessed labels for color coding and signage. The gear-control rod, double laminated locking clips, and rod housing shall be stainless steel and provide true positive lock that will eliminate valve drift. Bronze and Teflon impregnated stainless steel bushings in both ends of rod housing shall eliminate rod deflection, never need lubrication and ensure consistent long-term operation.

The control assembly shall include a decorative chrome-plated zinc panel mounted bezel with recessed color-coded label.

### **2-1/2" DISCHARGE LEFT SIDE -- REARWARD PUMP PANEL**

(2) 2-1/2" discharge shall be installed on the left side rearward pump panel area with controlled by a quarter turn ball valve. The discharge shall have 2-1/2" NH male hose threads and label adjacent the control handle.

The discharge outlet shall be equipped with an Innovative Controls 3/4" bleeder assembly with side stem lever control.

Two (2) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

The specified valve shall have a direct actuated 'local' control Akron Model TSC valve handle.

(2) chrome plated brass 30 degree elbow with 2.5" swivel female NH x 2.5" male NH thread with rocker lugs shall be provided on the discharge.

Two (2) chrome brass 2.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

The line discharge water pressure gauge(s) shall be Innovative Controls model# 3010353-40003. The gauges shall have a 2" diameter face with a graduated output scale of 0-600 PSI. The gauge shall be mounted within 6" of the control device with a name plate label.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

## BME Fire Trucks, LLC

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

### **2-1/2" DISCHARGE RIGHT SIDE --FORWARD PUMP PANEL**

One (1) 2-1/2" discharge shall be installed on the right side forward pump panel area with controlled by a quarter turn ball valve. The discharge shall have 2-1/2" NH male hose threads and label adjacent the control handle.

The discharge outlet shall be equipped with an Innovative Controls 3/4" bleeder assembly with side stem lever control.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

For valve actuation, the specified discharge shall be equipped with a side mount valve control. The ergonomically designed 1/4 turn push-pull T-handle shall be chrome plated zinc with recessed labels for color coding and signage. The gear-control rod, double laminated locking clips, and rod housing shall be stainless steel and provide true positive lock that will eliminate valve drift. Bronze and Teflon impregnated stainless steel bushings in both ends of rod housing shall eliminate rod deflection, never need lubrication and ensure consistent long-term operation.

The control assembly shall include a decorative chrome-plated zinc panel mounted bezel with recessed color-coded label.

(1) 2-1/2" IC discharge pressure gauges (0-600 PSI) shall be provided. The face of the gauge shall be a white dial with black letters. The gauges will be located on the pump instrument panel.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

(1) chrome plated brass 30 degree elbow with 2.5" swivel female NH x 2.5" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome brass 2.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

### **4" DISCHARGE RIGHT SIDE -- FORWARD PUMP PANEL**

# BME Fire Trucks, LLC

One (1) 4" discharge shall be installed on the right side forward pump panel area with controlled by a slow close 4" quarter turn ball valve. The discharge shall have 4" NH male hose threads and label adjacent the control handle.

The discharge outlet shall be equipped with an Innovative Controls 3/4" bleeder assembly with side stem lever control.

One (1) Akron 8840 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement. The valve shall be operated by an electric actuator.

The specified electric valve shall be controlled with a Navigator Pro 2.0 9333 controller.

One (1) chrome plated brass 30 degree elbow with 4" swivel female NH x 4" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome plated brass 4" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

The line discharge water pressure gauge(s) shall be Innovative Controls model# 3010353-40003. The gauges shall have a 2" diameter face with a graduated output scale of 0-600 PSI. The gauge shall be mounted within 6" of the control device with a name plate label.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

## **2.5" DISCHARGE -- REAR RIGHT**

One (1) 2.5" discharge shall be installed on the rear right panel with controlled by a quarter turn ball valve. The discharge shall have 2.5" NH male hose threads and nameplate label adjacent the control handle.

The discharge outlet shall be equipped with an Innovative Controls 3/4" bleeder assembly with side stem lever control.

One (1) Akron 8825 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed

## BME Fire Trucks, LLC

to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

For valve actuation, the specified discharge shall be equipped with a side mount valve control. The ergonomically designed 1/4 turn push-pull T-handle shall be chrome plated zinc with recessed labels for color coding and signage. The gear-control rod, double laminated locking clips, and rod housing shall be stainless steel and provide true positive lock that will eliminate valve drift. Bronze and Teflon impregnated stainless steel bushings in both ends of rod housing shall eliminate rod deflection, never need lubrication and ensure consistent long-term operation.

The control assembly shall include a decorative chrome-plated zinc panel mounted bezel with recessed color-coded label.

(1) 2-1/2" IC discharge pressure gauges (0-600 PSI) shall be provided. The face of the gauge shall be a white dial with black letters. The gauges will be located on the pump instrument panel.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

(1) chrome plated brass 30 degree elbow with 2.5" swivel female NH x 2.5" male NH thread with rocker lugs shall be provided on the discharge.

One (1) chrome brass 2.5" NH rocker lug cap with a securing chain or cable shall be installed on the discharge.

### **1-1/2" CROSSLAY DISCHARGE**

There shall be two (2) pre-connect 1-1/2" hose cross lays installed over pump enclosure. The outlets shall be equipped with a 1-1/2" NPT female chickens swivel x 1-1/2" male NH hose threads. The hose bed decking shall be constructed with a removable slatted material. The bed shall be approximately 8" wide, 14" deep, and 72" right to left over the pump enclosure area. The hose beds shall provide a minimum capacity of 200 feet of 1-3/4" diameter double jacket hose with nozzle provided by fire department.

Two (2) Akron 8820 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement.

## BME Fire Trucks, LLC

For valve actuation, the specified discharge shall be equipped with a side mount valve control. The ergonomically designed 1/4 turn push-pull T-handle shall be chrome plated zinc with recessed labels for color coding and signage. The gear-control rod, double laminated locking clips, and rod housing shall be stainless steel and provide true positive lock that will eliminate valve drift. Bronze and Teflon impregnated stainless steel bushings in both ends of rod housing shall eliminate rod deflection, never need lubrication and ensure consistent long-term operation.

The control assembly shall include a decorative chrome-plated zinc panel mounted bezel with recessed color-coded label.

(2) 2-1/2" IC discharge pressure gauges (0-600 PSI) shall be provided. The face of the gauge shall be a white dial with black letters. The gauges will be located on the pump instrument panel.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

The crosslay hosebed shall be equipped with an aluminum diamond plate hinged cover and vinyl end flap enclosures on each side, installed in compliance with applicable NFPA #1900 standards. The cover shall be equipped with rubber bumpers and lift up handle on each end of the cover.

The specified crosslay/deadlay flaps shall be red.

### **CROSSLAY EDGES**

The crosslay side sheets shall be rolled on each side to act as a guide for the hose to come out of the tray.

The specified outlet(s) shall be equipped with a 1-1/2" NPT female chickens swivel x 1-1/2" male NH hose threads.

Front Bumper Discharge Options

### **MONITOR DISCHARGE**

One (1) 3" monitor discharge shall be installed over the pump enclosure. The discharge shall be controlled by a slow close 3" quarter turn ball valve. The discharge shall terminated with 3" hose threads or Victaulic coupling.

## BME Fire Trucks, LLC

The discharge outlet shall be equipped with an Innovative Controls 3/4" bleeder assembly with side stem lever control.

One (1) Akron 8630 series swing-out style valve(s) shall be supplied and installed. All valves shall be designed to operate under normal conditions up to 500 PSI and shall have dual seats to work in both pressure and vacuum environments. All valves and controls shall be easily accessible for service, repair or replacement. The valve shall be operated by an electric actuator.

The specified electric valve shall be controlled with a Navigator Pro 2.0 9333 controller.

**NO-** Deck gun is included with this discharge.

The line discharge water pressure gauge(s) shall be Innovative Controls model# 3010353-40003. The gauges shall have a 2" diameter face with a graduated output scale of 0-600 PSI. The gauge shall be mounted within 6" of the control device with a name plate label.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

### **FOAM SYSTEM**

A FoamPro #2001 electronic foam system shall be provided. The system shall be designed for use with Class A foam concentrate. The foam proportioning operation shall be designed for direct measurement of water flows and shall remain consistent within the specified flows and pressures. The system shall be capable of accurately delivering foam solution as required by applicable sections of the NFPA standards.

The system shall be equipped with a control module suitable for installation on the pump panel. There shall be a microprocessor incorporated within the motor driver that shall receive input from the system's flow meter, while also monitoring the foam concentrate pump output. The microprocessor shall compare the values to ensure that the desired amount of foam concentrate is injected onto the discharge side of the fire pump. A "foam capable" paddlewheel-type flow meter shall be installed in the discharge side of the piping system.

The control module shall enable the pump operator to:

1. Activate the foam proportioning system
2. Select the proportioning rates from 0.1% to 3.0%

## BME Fire Trucks, LLC

3. Display a "Lo Con" warning when the foam tank level becomes low and in two (2) minutes, if the foam concentrate has not been added to the tank, the foam concentrate pump shall be capable of shutting down.
4. Display the current flow rate of water or foam solution per minute.
5. Display the total amount of water or foam pumped (resetable).
6. Display the foam concentrate injection rate setting.

A 12 volt electric motor driven positive displacement plunger pump shall be provided. The pump capacity range shall be 0.1 to 2.6 GPM at 150 PSI with a maximum operating pressure up to 400 PSI. The system shall draw a maximum of 40 amps at 12 volts. The motor shall be controlled by the microprocessor which shall be mounted to the base of the pump. It shall receive signals from the control module and power the 1/2 horsepower electric motor in a variable speed duty cycle to ensure that the correct proportion of concentrate is injected into the water stream.

A full flow check valve shall be provided in the discharge piping to prevent foam contamination of the fire pump and water tank. A minimum 11 PSI opening pressure check valve shall be provided in concentrate line.

Components of the complete proportioning system as described above shall include:

1. Operator control module
2. Paddlewheel flow meter
3. Pump and electric motor/motor driver
4. Wiring harnesses
5. Low level tank switch
6. Foam injection check valve
7. Main waterway check valve
8. Flow meter with paddle wheel

The foam system shall be installed and calibrated to manufacturer's requirements. In addition the system shall be tested and certified by the apparatus manufacturer to meet applicable NFPA standards.

The foam system design shall be tested and pass environmental testing in accordance to SAE standards.

An installation and operation manual shall be provided for the unit.

The FoamPro 2001 Series foam system shall be provided with a FoamPro control cable from the controller to the foam pump assembly. The FoamPro 2001 Series foam system shall be provided with a standard pump panel mounted FoamPro control head.

The flow meter shall be installed in the "foam capable" discharge piping.

The foam system shall have a pump operator's panel-mounted digital control module that shall provide a constant readout of GPM of water, foam solution, concentrate rate and totals of quantities being discharged at

## BME Fire Trucks, LLC

any time during operation. The total readable figure shall be 99,999 gallons. The foam system shall be capable of being calibrated from the pump operator's panel. Diagnostic testing shall be provided in the readout from the instruments on the pump operator's panel.

A FoamPro foam system schematic label shall be installed on the pump panel near foam controls. The label shall be a diagram of the FoamPro 2001 foam system layout and shall meet applicable sections of the NFPA standards.

Foam concentrate shall be provided from the onboard foam concentrate storage tank. The system shall be compatible with nozzle aspirating systems, where nozzle flow volumes must be adjustable on demand, while maintaining a constant quality foam solution.

### **FOAM SYSTEM OUTLETS**

The following discharges shall have foam distributed to them.

- Front bumper discharges (If applicable)
- Front bumper monitor (If applicable)
- Booster hose reel (If applicable)
- 1-1/2" Cross lays
- Rear 2-1/2" discharge
- Right side 2-1/2" discharge
- 3" Top Monitor (If applicable)

A 3/4" PVC fitting shall be provided on the foam tank for connection of the foam tank to the suction side of the foam system.

### **PUMP ENCLOSURE**

The mid-ship fire pump enclosure shall be a separate unit from the body unit and shall be attached and supported at the chassis frame rails. This module shall allow independent flexing of the pump enclosure from the body, chassis, tank, and shall permit quick removal. The module shall have plastic or rubber mounting pads and shall be attached to the frame rails with spring mountings. The support structure shall be constructed of #6061 aluminum channel, tubing and angle.

The "module" enclosure shall allow for removal of valves, piping, and fire pump in a single unit, with a minimum number of components to be disassembled. The right and left side panels, front panel, and floor above the plumbing system shall be bolted and easily removable.

The pump enclosure shall be approximately 50" front to rear, 72" right to left, and 70" high with a left side mounted pump panel.

# BME Fire Trucks, LLC

## **PUMP ENCLOSURE RUNNING BOARD**

Both the drivers and passenger side shall be equipped with a side running board. The running board shall extend along the width of the pump enclosure from the forward end of the body module to behind the chassis cab. The exterior edge of the running board shall be constructed of a non-slip aggressive surface, supported by the pump enclosure framework, and bolted in place with stainless steel fasteners.

## **PUMP ACCESS SERVICE DOOR -- UPPER LEFT SIDE**

The upper left side of the side mount pump enclosure shall be provided with a pump service access door. The hinged door shall be constructed of stainless steel with a brushed finish.

## **DOOR LATCH**

The specified hinged door(s) shall be equipped with (2), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

## **PUMP ACCESS SERVICE DOOR -- UPPER RIGHT SIDE**

The upper right side of the side mount pump enclosure shall be provided with a pump service access door. The hinged door shall be constructed of stainless steel with a brushed finish.

## **DOOR LATCH**

The specified hinged door(s) shall be equipped with (2), textured chrome lever latch(es). Latch(es) shall be non-locking style with a raised button.

## **PUMP PANEL-LEFT SIDE**

The pump panel shall be constructed of stainless steel, and bolted to the pump enclosure with stainless steel fasteners. Discharges and intakes shall feature a bezel to aid in removal of panel for maintenance and repairs.

## **PUMP PANEL-RIGHT SIDE**

The pump panel shall be constructed of stainless steel, and bolted to the pump enclosure with stainless steel fasteners. Discharges and intakes shall feature a bezel to aid in removal of panel for maintenance and repairs.

## **MASTER PRESSURE CENTER - GAUGE SET**

One (1) master pressure gauge set (discharge pressure and intake gauge), with labels shall be provided on the pump instrument panel. The set shall be an Innovative Controls Master Pressure Center and shall incorporate one (1) 4" master intake pressure gauge, one (1) 4" master discharge pressure gauge, an audible alarm, and one

# BME Fire Trucks, LLC

(1) set of vacuum/pressure test taps into an integrated, bezeled platform.

The specified gauge shall feature a drain located at the gauge inlet to help prevent freezing. The drain shall be a twist open and close type.

Gauge(s) shall include internal, back-lit 12 volt lighting. Replaceable, White, LED bulb in a water-resistant holder.

Gauge(s) shall be supplied with a white dial face with black lettering and black gauge marks.

## **PRESSURE GOVERNOR and ENGINE MONITORING DISPLAY**

Fire Research PumpBoss Max series PBA504-C10 pressure governor and control module kit shall be installed. The kit shall include a control module, discharge pressure sensor, and cables. The control module housing shall be waterproof and have dimensions not to exceed 7 1/2" high by 3 5/8" wide. The control knob shall be 2" in diameter with no mechanical stops, have a serrated grip, and a red idle push button in the center. It shall not extend more than 2" from the front of the control module. The control LCD shall be 3.5" in size with a minimum brightness of 1000 nits and optically bonded to 3mm Borofloat Glass. Inputs for monitored engine information shall be from a J1939 data bus. Outputs for engine control shall be on the J1939 data bus. Inputs from the pump discharge pressure sensor shall be electrical.

The following continuous displays shall be provided:

- Engine RPM; shown on LCD screen
- Check engine and stop engine warning; shown on LCD screen
- Engine oil pressure; shown on LCD screen
- Engine coolant temperature; shown on LCD screen
- Transmission Temperature; shown on LCD screen
- Battery voltage; shown on LCD screen
- Pressure and RPM operating mode LEDs
- Pressure / RPM setting; shown on LCD screen
- Throttle ready / Ok to Pump LEDs.

On screen (LCD) message display shall show diagnostic and warning messages as they occur. It shall show monitored apparatus information, stored data, and program options when selected by the operator. LCD Screen and LED's intensity shall be automatically adjusted for day and nighttime operation.

The program shall store the accumulated operating hours for the pump and engine to be displayed with the push of a button. It shall monitor inputs and support audible and visual warning alarms for the following conditions:

- High Battery Voltage
- Low Battery Voltage (Engine Off)
- Low Battery Voltage (Engine Running)
- High Transmission Temperature
- Low Engine Oil Pressure
- High Engine Coolant Temperature

# BME Fire Trucks, LLC

Out of Water (visual alarm only)

No Engine Response (visual alarm only).

The program features shall be accessed via push buttons located on the front of the control module. There shall be a USB port located at the rear of the control module to upload future firmware enhancements.

The pressure governor shall operate in two control modes, pressure and RPM. No discharge pressure or engine RPM variation shall occur when switching between modes. A throttle ready and Ok to Pump LED shall light when the interlock signal is recognized. The pressure governor shall start in pressure mode and set the engine RPM to idle. In pressure mode the pressure governor shall automatically regulate the discharge pressure at the level set by the operator. In RPM mode the governor shall maintain the engine RPM at the level set by the operator except in the event of a discharge pressure increase. The pressure governor shall limit a discharge pressure increase in RPM mode to a maximum of 30 psi. Other safety features shall include recognition of low water and no water conditions with an automatic programmed response and a push button to return the engine to idle.

The pressure governor control module shall be programmed at installation for a specific engine.

## **WATER TANK GAUGE**

IC Soft-Glo Tank Level Monitor System Innovative Controls Soft-Glo Series Tank Level Monitors shall be installed. The system shall be CAN Bus capable and include a variety of electronic display modules and CAN extension cables. The display modules are divided into 4 distinct sections that show the volume of (Water or Class A Foam or Class B Foam) in the tank using multi-color and programmable superbright LEDs. Tank level indication is enhanced by the use 180° wide-angle diffusion lenses in front of the LEDs. The LEDs are diffused by a proprietary method that creates an illumination effect that remains bright but eliminates the typical irritation to an operator's eyes traditionally caused by bright LEDs.

The specified tank level gauge shall feature a blue bezel.

The specified level gauge shall be active anytime the chassis battery switch is turned on.

## **FOAM TANK GAUGE**

IC Soft-Glo Tank Level Monitor System Innovative Controls Soft-Glo Series Tank Level Monitors shall be installed. The system shall be CAN Bus capable and include a variety of electronic display modules and CAN extension cables. The display modules are divided into 4 distinct sections that show the volume of (Water or Class A Foam or Class B Foam) in the tank using multi-color and programmable superbright LEDs. Tank level indication is enhanced by the use 180° wide-angle diffusion lenses in front of the LEDs. The LEDs are diffused by a proprietary method that creates an illumination effect that remains bright but eliminates the typical irritation to an operator's eyes traditionally caused by bright LEDs.

# BME Fire Trucks, LLC

The specified tank level gauge shall feature a green bezel.

The specified level gauge shall be active anytime the chassis battery switch is turned on.

## **NOMENCLATURE PLATES**

The apparatus shall be equipped with color coded labels. The labels shall be furnished for discharges, intakes, and for other controls and indicators. All labels shall be in English format.

## **MIDSHIP PUMP PANEL LIGHTS -- DRIVERS SIDE**

There shall be three Tecniq brand LED lights installed under a stainless steel light shield mounted above the pump panel. The two outer lights shall be operated by a panel mounted switch, while the middle light will only be activated upon pump engagement.

One (1) of the pump panel lights shall illuminate at the time the fire pump is engaged.

## **MIDSHIP PUMP PANEL LIGHTS -- PASSENGER SIDE**

There shall be three Tecniq brand LED lights installed under a stainless steel light shield mounted above the pump panel. The two outer lights shall be operated by a panel mounted switch, while the middle light will only be activated upon pump engagement.

One (1) of the pump panel lights shall illuminate at the time the fire pump is engaged.

## **DESIGN AND SCOPE OF TANKER/TENDER BODY**

The body shall be designed and constructed of commonly available structural components for ease of repair and maintenance. The body shall be of a modular design with the body structure independent of the chassis frame rails. The body module shall be mounted to the chassis frame rails utilizing a unique double spring mounting system for flexibility and durability over the lifetime of the apparatus. The fabrication of the body shall be of welded construction to withstand the rigors of fire service use.

The body shall be designed to incorporate and support the tank, hose bed, compartments, and all other equipment intended to be stored in or mounted to the body module. The body skeleton and compartment framework shall be designed of tubular members for increased strength and stress resistance. There shall be no sheet metal or extrusions utilized in the foundation or structural components of the body module due to their critical role in assuring lifetime durability, functionality and usability.

## **BODY FRAMEWORK**

# BME Fire Trucks, LLC

The entire body framework shall be fabricated of 6061-T6 aluminum architectural style tubing. The body framework shall be a completely welded unit, forming a connected, stable frame for strength, longevity and providing the skeleton of the body module. The internal upright members of the framework shall act as support for the top layer of the body module. The external upright members shall act as an exoskeleton providing form and support for compartments while acting as the external surfaces of the module. The framework shall define the compartment openings and provide a rigid mounting location for all compartments and doors.

The foundation cross-members shall be placed perpendicular to the chassis frame rails in the wheel well area extending the full width of the body and shall be constructed of 3 inch high x 2 inch wide x .250 inch tubing. The foundation members parallel to the chassis frame rails shall be constructed of 3 inch square x .250 inch tubing and shall connect the foundation cross members and extend the full length of the body.

All tank support cross members shall be placed to support the water tank as per the tank manufacture's recommendation. These supports shall be constructed of 3 inch high x 2 inch wide x .250 inch aluminum tubing. The tank support angles shall be constructed of 4 inch x 4 inch x .250 inch thick angles and shall be placed at the tank sides parallel to the chassis frame rails to provide lateral support for the tank and protection from debris from the wheels.

The internal upright supports for top layer components shall be placed to provide support for all components located on the top layer of the body module and shall be constructed of aluminum tubing measuring 2 inch square x .250 inch wall thickness. All front to rear connecting members shall be 3 inches high x 2 inches wide x .125 inch wall thickness and shall be placed in between the interior upright support members to provide rigidity, stability and support to all top layer components. All gussets shall be constructed of 2 inches high x 3 inches wide x .250 inch thick plate which shall be placed on the top and bottom of the foundation cross members where they intersect with the exterior members.

## **BODY MOUNTING SYSTEM**

The mounting assembly shall be designed to isolate and protect the body module from vibration and twisting stresses imparted by the flexing of the chassis frame rails. The body module shall employ spring loaded body mounting assemblies. Each two piece mounting assembly shall be designed to positively position the body on the frame rails while allowing lateral and forward or aft movement. Mounting assemblies shall be placed forward and rearward of the rear axle as necessary to provide a strong and stable mounting of the body module. Each mounting assembly shall consist of a "male" upper mounting bracket and a "female" lower mounting bracket.

## **BODY MATERIAL**

All materials utilized shall be of the correct type, alloy, and thickness to withstand the intended usage and provide protection against cracking, corrosion or metal fatigue. The body compartments shall be fabricated using .125 inch 5052-H32 aluminum for most compartments unless otherwise stated. Any use of proprietary parts or materials in the construction of the body shall be unacceptable, due to potential delays or difficulties in

# BME Fire Trucks, LLC

an unlikely event of future repairs or when service becomes necessary.

All external upright supports for integral compartments shall incorporate a second set of upright supports constructed of 3 inch wide x 2 inch deep x .250 inch wall thickness and shall be located outboard of the internal upright supports to provide a rigid structure for the compartments to be mounted to. The compartment openings shall be constructed of 3 inch high x 2 inch wide x .125 inch wall thickness cross members and shall be placed in between the external upright supports to define the openings of all enclosed body compartments again, providing a rigid mounting location for compartments.

## **COMPARTMENT FLOOR-SWEEP OUT STYLE**

Each compartment shall feature a raised floor sufficient enough so the lip of the compartment shall clear the frame rail of the body module to allow debris to be removed easily from the compartment. A hat shaped support shall be placed under the floor to improve stability and prevent bowing of the floor with use and age.

## **COMPARTMENTATION**

All compartments shall be constructed of smooth aluminum and welded for strength and shall be sealed from the elements. The compartments shall be attached to the aluminum superstructure only, in order to maintain a truly modular design. Each compartment shall include ventilation louvers which shall be provided on each side panel of the compartment to maximize moisture evacuation for the protection of the equipment and the compartment itself. Louvers shall be placed in the ventilation holes to prevent debris transfer to and from the inside of the body module. Each compartment shall feature a smooth edges and surfaces from the walls to each weld without burrs or sharp edges in the material.

## **DRIVER SIDE COMPARTMENT D1**

The driver's side forward compartment shall be located ahead of the rear wheels and shall include a "clear door opening" measurement of approximately 46" wide x 32" high. Compartment depth shall be determined by space available and shall measure approximately 25.5".

## **COMPARTMENT VENTILATION**

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) 1/4-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

## **COMPARTMENT FLOOR DRAIN**

The compartment shall be provided with rear corner floor drains to the underside of the body.

# BME Fire Trucks, LLC

## **COMPARTMENT SILL PLATE**

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

## **ADJUSTABLE UNISTRUT**

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with one horizontally installed on the back wall near the top of the compartment.

## **ADJUSTABLE SHELF**

There shall be (1) adjustable shelf(ves) installed; and the shelf(ves) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(ves) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

## **COMPARTMENT SHELF GRATING**

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

## **COMPARTMENT GRATING**

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

## **COMPARTMENT GRATING EDGE**

The Dri-Dek grating shall be equipped with beveled edges where required.

# BME Fire Trucks, LLC

The specified Dri-Dek grating shall be black in color.

## **COMPARTMENT LIGHTING**

The specified compartment shall have two vertical Code 3 800 series lights installed.

## **DOOR AJAR SENSOR**

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

## **PASSENGER SIDE COMPARTMENT P1**

The passenger's side front lower compartment shall be located ahead of the rear wheels and shall include a "clear door opening" measurement of approximately 46" wide x 32" high. Compartment depth shall be determined by space available and shall measure approximately 25.5".

## **COMPARTMENT VENTILATION**

A minimum 2-inch single "Weber" style polished stainless steel swivel vent with four (4) ¼-inch vent holes shall be provided. These vents shall have a stainless steel center bolt to lock the vent in either the open or closed position and be located in the compartment walls. All vents will contain fire resistant filters to minimize dust entering the compartment.

## **COMPARTMENT FLOOR DRAIN**

The compartment shall be provided with rear corner floor drains to the underside of the body.

## **COMPARTMENT SILL PLATE**

The compartment shall feature a polished stainless steel sill plate protecting the painted surface of the compartment when items are accessed.

## **ADJUSTABLE UNISTRUT**

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with two (2) channels on the left wall and two (2) channels on the right wall. The tracks shall be positioned to provide support for equipment mounting. The length of the tracks shall be sized to allow for optimum use of the compartment interior.

Adjustable Uni-Strut equipment mounting tracks shall be installed inside the compartment with one horizontally installed on the back wall near the top of the compartment.

# BME Fire Trucks, LLC

## **ADJUSTABLE SHELF**

There shall be (1) adjustable shelf(ves) installed; and the shelf(ves) shall be constructed of .125" thick smooth aluminum plate and be mounted in the specified compartment with double bolt aluminum shelf brackets. The shelf(ves) shall have a broken front edge, and a broken rear edge for added strength and reinforcement.

## **COMPARTMENT SHELF GRATING**

The specified compartment shelf shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

The specified Dri-Dek grating shall be black in color.

The compartment shelf and or shelves shall have reflective striping added to the outside lip. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

## **COMPARTMENT GRATING**

The compartments shall be fitted with removable interlocking vinyl Dri-Dek grating. This material shall be resistant to heat, cold, ultra-violet radiation, mechanical impacts, chemical actions and is corrosion resistant.

## **COMPARTMENT GRATING EDGE**

The Dri-Dek grating shall be equipped with beveled edges where required.

The specified Dri-Dek grating shall be black in color.

## **COMPARTMENT LIGHTING**

The specified compartment shall have two vertical Code 3 800 series lights installed.

## **DOOR AJAR SENSOR**

The Specified door(s) shall feature a magnetic proximity switch to indicate when the compartment door is ajar.

## **WHEEL WELL PANEL CONSTRUCTION**

# BME Fire Trucks, LLC

The outer wheel well panel shall be an integral part of the overall body design and constructed of aluminum. It shall be welded in to place. The exterior wheel well area shall be painted to match the body.

## **WHEEL WELL LINERS**

Wheel well liners designed to protect the body from impact resulting from road debris thrown by the tires shall be installed. The removable liners shall be constructed from UHMW material to encompass the entire inner wheel well area. The liners shall be secured with threaded fasteners.

## **TANDEM REAR WHEEL FENDERETTES**

Rubber fenderettes shall be installed over the four (4) tandem rear wheel openings. The fenderettes shall be positioned outside of the wheel well panel to cover the tire area that extends past the body. The fenderettes shall be secured with threaded fasteners.

## **RUB RAILS, CLEARANCE LIGHTS, AND REFLECTIVE TAPE**

The sides of the lower body area fore and aft of the wheel well area shall be provided with 2" x 1.25" x .250" extruded aluminum rub rails, with end caps or angled corners.

Specified part shall include White reflective striping.

## **FRONT OF BODY -- PROTECTIVE SURFACE**

The front of the apparatus body shall include a protective surface, constructed of aluminum tread plate material, which shall cover the outboard portion of each side of the body.

## **FRONT CORNERS OF BODY -- PROTECTIVE SURFACES**

The front corners of the apparatus body shall include a protective surface installed. The surface shall be constructed of polished stainless steel material.

## **REAR BODY PANELS**

The entire rear of the apparatus body shall be painted apparatus color.

## **OUTER REAR BODY PANELS -- PROTECTIVE COVERING**

The rear outer panels of the body shall have protective surfaces installed on the corners. The protective covering shall be constructed of polished stainless steel material.

## **TOP OF BODY COMPARTMENTS -- PROTECTIVE SURFACES**

# BME Fire Trucks, LLC

The top of the side compartments shall have a protective surfaces installed. The surface shall be constructed of aluminum tread plate material.

## **ALUMININUM – COMPARTMENT DOOR, HINGED OVERLAP**

There shall be two (2) double, vertically hinged sets of doors fabricated from aluminum and installed on the apparatus body. Each door shall feature exterior surfaces which overlaps the opening of the compartment. The exterior surface shall be .125” aluminum for durability and damage resistance. The interior surface shall be .080” aluminum for structural support and overall appealing appearance of the compartment. The frame of the doors shall be constructed of 1.75” x 1.75” x .125” aluminum tubing to prevent corrosion and provide structural support. The spacing created by the frame tubing shall be filled with Styrofoam for added support and dent resistance, temperature insulation, and noise reduction.

A .75” lip shall be constructed around the opening of the compartment and the exterior of the door. A rubber seal shall be installed on the .75” lip of both the compartment and the door to provide for a double seal against water and dust. A rain gutter shall be mounted above the latch type door for an added third layer of water protection.

The doors shall be designed utilizing a D-ring latch system. A 6 inch stainless steel D-ring latch, large enough to accommodate a gloved hand, shall be mounted on the exterior of the door to allow the door to seal and fasten in the closed position. A stainless steel bezel shall be installed to house and protect the D-ring locking mechanism. The easily serviced bezel shall be mounted utilizing stainless steel screws for added stability of the mechanism and ease of maintenance in the event of damage. The D-ring locking mechanism shall be of a double catch design. The first catch shall engage to secure the door in the event of improper closure. The second catch will seal the door to water and other elements once the doors has been properly closed.

The doors shall be mounted with a stainless steel hinges with .25” diameter hinge pin for stability. The vertical hinges shall be mounted to the body frame with threaded inserts and stainless steel screws to preserve functionality with use or age and ease of maintenance in the event of damage.

Gas struts shall be utilized to hold the door in the open position and to prevent the door from slamming during closing. The gas struts are mounted directly to the door with a stainless steel bracket assembly for stability and ease of maintenance. The gas struts shall be mounted to the interior of the compartment with fully adjustable assembly for ease of adjustment and maintenance while increasing stability.

The specified door(s) shall have a Polished stainless-steel D-ring door handle.

The specified door(s) D-ring handles shall be equipped with manual key door locks keyed to use the 1250 key.

## **COMPARTMENT DOOR EDGE STRIPING**

# BME Fire Trucks, LLC

The hinged compartment doors shall have reflective striping applied on the edges. The stripe shall be a 1-1/2" minimum in width.

Specified part shall include Red and White DOT approved reflective striping.

## **REAR STEP**

The rear step shall have a frame work constructed of structural aluminum angles. There shall be channels on the exterior perimeter with center supports forming an independent assembly, and shall be bolted to the rear body structural framing to provide body protection and a solid rear stepping platform.

The walking surface of the rear step shall be aggressive DIAMOND BACK aluminum extrusions that complies to applicable NFPA standards.

## **FOLDING STEP -- DRIVERS SIDE FRONT**

There shall be one (1) Innovative Controls chrome plated zinc steps installed. The steps shall be a spring loaded design with an approx 8" by 6" stepping surface and feature a BME logo and an LED light to light up the stepping surface. The step shall be installed on the front drivers side of the body.

## **FOLDING STEP -- PASSENGER SIDE FRONT**

There shall be one (1) Innovative Controls chrome plated zinc steps installed. The steps shall be a spring loaded design with an approx 8" by 6" stepping surface and feature a BME logo and an LED light to light up the stepping surface. The step shall be installed on the front passenger side of the body.

## **HANDRAILS**

Two (2) knurled type non-slip handrail, approximately 36" in length, shall be vertically installed.

## **ROOF ACCESS LADDER**

A Ziamatic swing out and down ladder shall be installed on the drivers side of the rear body panel for access to the roof. The ladder shall be designed to store parallel to the body when not in use. A handle shall be provided to unlock the ladder from the travel position to allow the ladder to be pulled out to a comfortable climbing angle.

Release of the handle allows the ladder to latch automatically and it will not retract until the scissor lock is raised. The ladder shall have a two-rung fold-down section and a six-rung main ladder section and be equipped with cast aluminum rungs having flat, non-skid surfaces to provide traction and safety.

## **LADDER LIGHTING**

# BME Fire Trucks, LLC

There shall be two (2) Whelen 0S series part# 0AC0EDCR 45 degree angled light(s) installed to adequately illuminate the rear ladder.

## **HOSE BODY CONSTRUCTION SPECIFICATIONS**

The hose bed side sheets and floor shall be constructed from aluminum material. The hose body shall be free of sharp corners, bolts, or other obstructions that may catch hose and other equipment.

## **HOSE BED DIVIDER**

One (1) adjustable width hose bed divider constructed from no less than .250 (1/4") aluminum material shall be installed. The divider shall be secured to the hose bed by utilizing adjustable track type channels and fasteners. The divider shall be full length and depth of the hose bed.

## **ALUMINUM HOSEBED GRATING**

The hose bed compartment deck shall be constructed entirely from maintenance-free, extruded aluminum slats. The slats shall have an anodized, contoured ribbed top surface. The slats shall be of widths approximately 3/4" high x 7.5" wide and shall be riveted into a one-piece grid system to prevent the accumulation of water and allow ventilation to assist in drying hose.

## **HYPALON HOSEBED COVER**

The apparatus shall be equipped with a Hypalon hose bed cover with a positive secured compliant rear flap.

The hosebed cover shall be black in color.

## **WATER TANK SPECIFICATIONS**

The water tank shall have a capacity of 3000 gallons.

## **WATER TANK WARRANTY**

The polypropylene water tank that is specified to be supplied with this apparatus shall be warranted by the water tank manufacturer for a "lifetime" period from the date that the apparatus is put into service. The tank manufacturer shall repair, at no cost to the purchaser, any problems caused by defective materials and/or workmanship. The warranty shall cover the reasonable costs of removing the water tank from the apparatus and reinstalling it after the completion of the covered warranty repairs, but shall not cover any liability for the loss of service or downtime costs of the apparatus.

# BME Fire Trucks, LLC

## **NFPA COMPLIANCE**

The water tank construction shall conform to applicable NFPA standards.

## **TANK FILL PROVISIONS**

A 10" square x 10" high fill tower shall be equipped with a hinged, watertight cover and a removable screen to catch debris. A color-coded label or visible permanent marking that reads "WATER TANK FILL" shall be placed at or near the water tank fill opening. The fill tower shall be centrally located at the front area of the tank.

## **SQUARE DUMP FLANGE**

There shall be a 10" square quick dump flange incorporated in the tank design. It shall be located at the rear of the tank; centered at the bottom.

## **DIRECT TANK FILL FLANGE**

There shall be a 4" direct tank fill flange, with diffuser incorporated in the tank design.

## **TANK SUMP**

A 12" square x 4" deep sump shall be installed in the bottom of the water tank. The water tank sump shall be equipped with anti-swirl device.

## **WATER TANK DRAIN PROVISIONS**

A 3" plugged drain provision shall be installed in the bottom of the water tank, sump, or plumbing for water tank draining and the flushing-out of debris.

## **WATER TANK SLEEVE**

A 6" outside diameter sleeve shall be incorporated into the fabrication of the water tank. The horizontal sleeve shall allow 5" piping to pass through the tank.

## **CLASS A FOAM TANK SPECIFICATIONS**

The Class A foam tank shall have a capacity of 20 gallons.

## **FOAM TANK WARRANTY**

The foam tank shall carry a "lifetime" warranty against defects in workmanship and perforation corrosion. The provisions of this warranty shall be provided in the delivery documentation. The tank manufacturer shall repair,

# BME Fire Trucks, LLC

at no cost to the purchaser, any problems caused by defective materials and/or workmanship. The warranty shall cover the reasonable costs of removing the water tank from the apparatus and reinstalling it after the completion of the covered warranty repairs, but shall not cover any liability for the loss of service or downtime costs of the apparatus.

## **FOAM TANK FILL AND VENTING PROVISIONS**

The foam concentrate tank shall be provided with a fill pipe having a volume of not less than 2 percent of the total tank volume. The filler opening shall be capped with a sealed air-tight threaded cover. The fill opening shall be designed to incorporate a removable screen and shall be located so that foam concentrate from a five (5) gallon container can be dumped into the tank.

The foam tank filler shall be equipped with a pressure/vacuum vent that enables the tank to compensate for changes in pressure or vacuum when filling or withdrawing foam concentrate from the tank. The pressure/vacuum vent shall not allow atmospheric air to enter the foam tank except during operation or to compensate for thermal fluctuations. The vent shall be protected to prevent foam concentrate from escaping or directly contacting the vent at any time. The vent shall be of sufficient size to prevent tank damage during filling or foam withdrawal.

A color coded label or visible permanent marking that reads "CLASS A -- FOAM TANK FILL" shall be placed at or near the foam concentrate tank fill opening. An additional label shall be placed at or near any foam concentrate tank fill opening stating the type of foam concentrate the system is designed to use.

Any restrictions on the types of foam concentrate that can be used with the system shall also be stated, along with a warning message that states "WARNING: DO NOT MIX BRANDS AND TYPES OF FOAM."

A 3/4" diameter connection, piping, and gate type valve shall be installed for the foam tank for draining purposes.

## **CENTER REAR 180 DEGREE QUICK DUMP VALVE**

A Newton Kwik-Dump 10" 180 degree swivel dump chute shall be supplied. The dump chute shall be centrally located at the rear of the vehicle at a height that allows for proper operation.

All components exposed to the contents of the tank shall be constructed from stainless steel or other non-corrosive materials.

A Newton quick dump model #4036-34 36" stainless steel quick dump chute extension shall be installed on quick dump.

## **Quick Dump Valve**

# BME Fire Trucks, LLC

A manual style flip type stainless steel quick dump valve shall be installed on the quick dump.

## **TANK FILL VALVE**

(1) Firemen's Friend check valve for direct filling of the tank shall be installed. The valve shall be configured with 4" NST female threads, intake screen, threaded plug with retention chain. The valve shall be located on the drivers side rear of the body.

## **12 VOLT ELECTRICAL SPECIFICATIONS**

The following describes the low voltage electrical system on the apparatus including all panels, electrical components, switches and relays, wiring harnesses, and other electrical components. The apparatus manufacturer shall conform to the latest Federal DOT standards, current automotive electrical system standards, and the applicable requirements of the current NFPA standards.

Wiring shall be stranded copper or copper alloy conductors of a gauge rated to carry 125 percent of the maximum current for which the circuit is protected. Voltage drops shall not exceed 10 percent in all wiring from the power source to the user device. The wiring and wiring harness and insulation shall be in conformance to applicable SAE and NFPA standards. The wiring harness shall conform to SAE J-1128 with GXL temperature properties. Exposed wiring shall be run in a loom with a 290 degree Fahrenheit rating. Wiring looms shall be properly supported and attached to body members. Electrical conductors shall be constructed in accordance with applicable SAE standards, except when good engineering practice requires special construction.

All wiring connections and terminations shall provide positive mechanical and electrical connections and be installed in accordance with the device manufacturer's instructions. When wiring passes through metal panels, electrical connections shall be with mechanical type fasteners and rubber/plastic grommets.

Wiring between cab and body shall be split using Deutsch type connectors or enclosed in a terminal junction panel allowing body removal with minimal impact on the apparatus electrical system. Connections shall be insulated with heat shrink crimp-type tubing to resist moisture and foreign debris such as grease and road grime. Weather-resistant connectors shall be provided throughout the system.

Electrical junction or terminal boxes shall be weather resistant and located away from water spray conditions. When required, automatic reset breakers and relays shall be housed in the main body junction panel.

There shall be no exposed electrical cabling, harnesses, or terminal connections located in compartments, unless enclosed in an electrical junction box or covered with a removable electrical panel. Wiring shall be secured in place and protected against heat, liquid contaminants, damage, and shall be uniquely identified at least every six inches (6") by color-coding or permanent marking with a circuit function code and identified on a reference chart or electrical wiring schematic per requirements of applicable NFPA standards.

# BME Fire Trucks, LLC

Low voltage protective devices shall be provided for the electrical circuits. The devices shall be accessible and located in required terminal connection locations or weather-resistant enclosures. Overcurrent protection devices shall be automatic reset types suitable for electrical equipment and meet SAE standards. All electrical equipment, switches, relays, terminals, and connectors shall have a direct current rating of 125 percent of the maximum current for which the circuit is protected. Electro-magnetic interference suppression shall be provided in the system as required in applicable SAE standards.

The electrical system shall include the following:

Electrical terminals in weather-exposed areas shall have a non-conductive grease or spray applied. All terminal plugs located outside of the cab or body shall be treated with a corrosion preventative compound.

All electrical wiring shall be placed in a protective loom or be harnessed.

Exposed connections shall be protected by heat shrink material and sealed connectors.

Large fender washers shall be used when fastening equipment to the underside of the cab roof and all holes made in the roof shall be caulked with silicone.

Electrical components installed in exposed areas shall be mounted in a manner that will not allow moisture to accumulate inside.

A service loop shall be provided behind an electrical appliance to allow them to be pulled away from the mounting area for inspection and service work.

Upon completion of the vehicle and prior to delivery, the apparatus shall be electrically tested and the electrical testing, certifications, and test results shall be submitted with delivery documentation per requirements of the applicable NFPA standard.

## **ELECTRICAL WIRING HARNESS**

The electrical system shall be divided into separate harnesses. The individual harness shall be connected to the electrical box with Deutsch type quick connectors. The wiring and appliances shall be protected by automatic reset type circuit breakers.

## **CUSTOM FABRICATED CONSOLE**

A custom fabricated electrical console and enclosure shall be located between the driver's and the officer's seating positions. The console shall feature a flat lid with two rows of havis style plates side by side.

## **CONSOLE MAP BOX**

There shall be a map box attached to the rear of the console. The map box shall be painted to match the console.

The specified compartment(s) shall be coated with Black/Black colored Multi-Spec paint.

# BME Fire Trucks, LLC

## **BATTERY SWITCH - MASTER DISCONNECT**

A battery cutoff switch shall be provided in the cab within easy reach of the driver; by the chassis manufacturer. There shall be a 200amp continuous rated solenoid installed and switched by the OEM battery master switch.

## **BATTERY CHARGER**

A Kussmaul Autocharge 1000 PLC, model #091-215-12, automatic battery charger shall be provided. The battery charger shall be wired to the 12 volt battery system. The unit shall be mounted in a clean, dry area accessible for service and/or maintenance. It shall be wired to the specified shore power receptacle. Included in the package is a Kussmaul Super 15 Auto Eject Deluxe with built in bar graph display.

## **ENGINE BLOCK HEATER WIRING**

A 120 volt engine block heater shall be installed by chassis manufacturer and shall be wired to the specified shore power receptacle.

The specified auto eject cover shall be grey.

## **IDENTIFICATION LIGHTS**

All LED identification lights shall be installed on the vehicle as required by applicable highway regulations.

## **LICENSE PLATE MOUNTING AND LIGHT**

A predrilled backing plate and LED light shall be installed on the rear for mounting of the license plate.

Stop, Tail, Turn Lights, Tomar, 4" x "6, Triple, Package

## **STOP AND TAIL LIGHT**

Two (2) Tomar Model # R46L-STT 4" x 6" LED stop and tail lights with clear lenses shall be provided. The light can be used in combination with a separated turn signal, or alone as a Brake, tail, and turn light.

## **TURN SIGNALS**

Two (2) Tomar model# R46L-TURN 4" x 6" LED turn signal lights with clear lenses shall be provided.

## **TAILLIGHT BEZELS**

# BME Fire Trucks, LLC

Two (2) Tomar Chrome plastic housings Model #R46-BZ3 shall be installed at the rear of the apparatus for Three (3) Tomar 4" x 6" stop-tail-turn-backup and warning lights.

## **ZONE C- LOWER REAR WARNING LIGHT - DRIVER SIDE**

(1) Tomar Revolution multi-function Model # R46D-W-BAW LED light shall be installed. The dimensions of the light shall be 4" x 6". The light shall be equipped with a clear lens, and emit blue, white and amber light.

Light shall be installed on the driver's side.

## **ZONE C- LOWER REAR WARNING LIGHT - PASSENGER SIDE**

(1) Tomar Revolution multi-function Model # R46D-W-RAW LED light shall be installed. The dimensions of the light shall be 4" x 6". The light shall be equipped with a clear lens, and emit red, white and amber light.

## **FRONT BUMPER -- GROUND LIGHTS**

There shall be two (2) Tecniq E10, LED ground light(s) installed under the front bumper.

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

## **CAB DOOR -- GROUND LIGHTS**

There shall be two (2) Tecniq E10, LED ground lights installed under the cab door(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

## **GROUND LIGHTS - PUMP PANEL**

There shall be two (2) Tecniq E10, LED ground lights installed under the pump panel running board(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

## **GROUND LIGHTS - FRONT BODY**

There shall be two (2) Tecniq E10, LED ground lights installed under the front body compartment(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

# BME Fire Trucks, LLC

## **GROUND LIGHTS - UNDER REAR SIDE COMPARTMENT**

There shall be two (2) Tecniq E10, LED ground lights installed under the rear side body compartment(s).

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

## **GROUND LIGHTS - UNDER REAR STEP**

There shall be two (2) Tecniq E10, LED ground lights installed under the rear step area.

The ground lights shall be activated when parking brake is set, or the transmission is placed into park (where applicable).

## **LADDER LIGHTING**

There shall be two (2) Whelen 0S series part# 0AC0EDCR 45 degree angled light(s) installed to adequately illuminate the rear ladder.

## **SCENE LIGHTS**

Two (2) Tomar Revolution Model# R79L-13 7" by 9", clear LED flood scene light(s) shall be installed. The light(s) shall feature a 13 degree down angle lens. The light(s) shall include a rubber gasket for surface mounting.

The specified Tomar 7" x 9" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R79-BZ

## **DOOR OPEN WARNING LIGHT**

A door open warning light shall be installed on cab dash. The light shall be a flashing LED light with a red lens. The light shall include a label, "Do Not Move Apparatus When Light is ON".

## **"DOOR OPEN" AND EQUIPMENT OPERATION ALARM**

A buzzer or alarm shall be installed in cab to indicate "doors open" or equipment operation on the apparatus. The buzzer shall operate when parking brake is released.

## **RADIO ANTENNA INSTALLATION**

There shall be one (1) radio antenna installed on the apparatus and routed to the cab center console.

# BME Fire Trucks, LLC

## **BACK UP ALARM**

One (1) solid state back up alarm shall be provided at the rear of the apparatus. The back up alarm shall be wired to the reverse circuit of the transmission, and shall provide an audible alarm to the rear of the apparatus when reverse gear is selected. The alarm shall have a volume of 87 to 112 db while in operation.

## **BACK UP CAMERA**

There shall be a Rear View Safety back up camera system supplied and installed on the apparatus.

## **HEADLIGHT FLASHER**

The headlights shall be set to alternate flash (Wig-Wag).

The wig wag shall be triggered by the siren controller slide switch position 3.

## **ELECTRONIC SIREN**

Tomar Model 948 Siren amp and electronic controller, shall be provided. The siren controller shall have a 4 position slide switch, along with 6 auxiliary switches to control outputs, also to contain siren controls. Model # 948L-SIREN-R.

## **SIREN SPEAKER**

One (1) Tomar Model # SPK100 speaker shall be provided.

## **ZONE A -- UPPER FRONT -- LIGHTBAR**

One (1) Tomar Scorpion 58" lightbar Model# 970L-58DT-BR Shall be installed. The lightbar shall contain full dual color front and sides (red/blue/wht). Lightbar shall include CA flash rates and CA steady red. The front of the lightbar shall be fully populated with eight (8) 12-LED modules, High-power off-road TRX take downs, and four (4) 24-LED corner modules with alley lights. The light bar shall be aluminum in color.

## **ZONE A -- LOWER FRONT WARNING LIGHTS**

(1) Tomar revolution dual color Model# R37D-W-RW LED light shall be installed. The dimensions of the light shall be 3" x 7". The light shall be equipped with a clear lens, and red and white LED.

The light shall be installed on the driver's side of the grill.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

# BME Fire Trucks, LLC

## **ZONE A -- LOWER FRONT WARNING LIGHTS**

(1) Tomar revolution dual color Model# R37D-W-BW LED light shall be installed. The dimensions of the light shall be 3" x 7". The light shall be equipped with a clear lens, and blue and white LED.

The light shall be installed on the passenger's side of the grill.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

## **ZONE B AND D- INTERSECTION LIGHTS**

Two (2) Tomar revolution dual color Model# R37D-W-RW LED lights shall be installed. The dimensions of the lights shall be 3" x 7". The lights shall be equipped with a Clear lens, and Red and White LED.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

## **ZONE B AND D LOWER MID BODY WARNING LIGHTS**

Two (2) Tomar revolution dual color Model# R37D-W-BW LED lights shall be installed. The dimensions of the lights shall be 3" x 7". The lights shall be equipped with a Clear lens, and Blue and White LED.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

## **ZONE B AND D LOWER REAR CORNER WARNING LIGHTS**

Two (2) Tomar revolution dual color Model# R37D-W-BW LED lights shall be installed. The dimensions of the lights shall be 3" x 7". The lights shall be equipped with a Clear lens, and Blue and White LED.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

## **ZONE B AND D- UPPER SIDE FRONT WARNING LIGHTS**

Two (2) Tomar revolution dual color Model# R37D-W-RW LED lights shall be installed. The dimensions of the lights shall be 3" x 7". The lights shall be equipped with a Clear lens, and Red and White LED.

The specified Tomar 3" x 7" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R37-BZ

## **ZONE B AND D- UPPER SIDE REAR WARNING LIGHTS**

Two (2) Tomar revolution dual color Model# R79LV13-RW series LED lights shall be installed. The dimensions of the lights shall be 7" x 9". The lights shall be equipped with a Clear lens, and red and white LED.

# BME Fire Trucks, LLC

The specified Tomar 7" x 9" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R79-BZ

## **ZONE C- UPPER REAR WARNING LIGHT - DRIVER SIDE**

(1) Tomar revolution dual color Model# R79LVD13-RAW series LED light shall be installed. The dimensions of the light shall be 7" x 9". The light shall be equipped with a clear lens and red, amber, and white LED.

The light shall be installed on the driver's side.

The specified Tomar 7" x 9" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R79-BZ

## **ZONE C- UPPER REAR WARNING LIGHT - PASSENGER SIDE**

(1) Tomar revolution dual color Model# R79LVD13-BAW series LED light shall be installed. The dimensions of the light shall be 7" x 9". The light shall be equipped with a clear lens and blue, amber, and white LED.

The light shall be installed on the passenger's side.

The specified Tomar 7" x 9" light(s) shall be equipped with a Tomar bezel Chrome in color. Model # R79-BZ

## **REAR TRAFFIC ADVISOR, EIGHT (8) LAMPS**

A Tomar L stick traffic advisor model # LSTICK-14TD8-B LED shall be provided and mounted at the rear of the body. The traffic advisor shall include a 40' cable.

## **PAINT CODES/COLORS**

The apparatus shall be painted the following color(s): Pierce 117 Red lower with Pierce 20 White upper.

## **BODY PAINTING SPECIFICATIONS**

All exposed surfaces shall be prepared and painted using a multi-step process to ensure a blemish-free, protective coating for the base metal materials.

All removable items, such as brackets and compartment doors, shall be removed and painted separately to insure finish paint behind them after they are reinstalled.

Due to its modular design, the apparatus body shall be completely finish painted prior to its installation on the chassis.

The body shall be sanded, and cleaned. Any imperfections or defects in the metal shall be corrected with

# BME Fire Trucks, LLC

premium body filler and then sanded smooth.

An epoxy primer shall be utilized on all painted and coated surfaces and shall prepare the metal for the final paint. The direct-to-metal primer shall be used to create a first level seal allowing secure adhesion between the base metal and the subsequent substrates.

All body and components shall then be primed, thoroughly sanded, and meticulously inspected for any imperfections; which shall be properly corrected..

All surfaces shall then be painted with a base coat of premium paint following the guidelines as established by the paint manufacturer. The body shall be painted using a single color to match the cab primary color, and then shall be buffed to a high gloss finish.

## **INTERIOR COMPARTMENT FINISH**

The interior wall, floor and ceiling surfaces of compartments shall be finished with Rust-Oleum brand Multispec color flecked paint.

The specified compartment(s) shall be coated with Gray Stone colored Multi-Spec paint.

## **TOUCH-UP PAINT**

Touch-up paint (one for each color) shall be furnished with the completed truck at final delivery.

## **STRIPING PACKAGE- SINGLE 4" STRIPE**

There shall be a single 4" reflective stripe installed one on each side of the apparatus. The stripe is limited to single color only.

## **CHEVRON STRIPING**

The rear panels of the body shall have 3M brand, 6" wide, reflective striping installed in the available area. The Chevron style stripes shall be applied at a 45-degree angle, pointing towards the center upper portion of the rear panel. The Chevron striping shall cover the entire rear of the apparatus.

## **CHEVRON COLORS**

The specified chevron colors shall be red and yellow.

## **SUCTION HOSE**

There shall be **NO** suction hose supplied on the apparatus.

# BME Fire Trucks, LLC

## **HARD SUCTION MOUNTINGS -- LEFT SIDE**

There shall be one (1) horizontally mounted .188" aluminum hard suction hose tray(s) installed. The tray(s) shall be equipped with spring loaded hose clamps. Location shall be: left side.

## **PORTABLE WATER TANK MOUNTING -- RIGHT SIDE**

One (1) Zico 12 volt electric folding tank mounting shall be installed on the right side of the apparatus. The Quic-Lift assembly shall be comprised of a high strength aluminum casting with a 12 volt electric lift system for raising and lowering the folding tank. The storage system shall be powered by a 12 volt self-contained electric power unit. The Quic-Lift system shall be mounted in an upright position above the compartments.

The lift control shall be a momentary switch, properly labeled. The mounting shall be equipped with reflective stripping and red flashing marker lights, front and rear, which activate when the rack is moved out of the locked position. A warning light shall be provided in the cab. The light shall flash whenever the rack is out of the stored position. An alarm system shall be provided when in operation which shall be interlocked with the neutral safety and parking brake switch. The storage system shall be built to meet NFPA standards.

## **FOLDING TANK COVER (ALUMINUM DIAMOND PLATE)**

The folding tank shall have an aluminum diamond plate cover.

## **WHEEL CHOCKS**

Two (2) Zico brand, Model#AC-2 aluminum wheel chock blocks, with mounting brackets, shall be provided and installed on the apparatus body. The mounting locations for the chock blocks shall be one (1) each side of the apparatus body.

## **5# DRY CHEMICAL FIRE EXTINGUISHER**

One (1) 5# ABC dry chemical fire extinguisher and mounting bracket shall be provided on the apparatus. The extinguisher shall have a pressure gauge and shall be filled with a dry chemical extinguishing agent.

## **HYDRAULIC JACK**

One (1) hydraulic jack shall be provided. The jack shall be designed for lifting capacity of twelve (12) tons.

## **LUG WRENCH**

There shall be one (1) lug wrench provided and shipped loose with the completed apparatus.

Mark Wilson

# BME Fire Trucks, LLC

## **REFLECTOR**

A set of three (3) triangular reflectors shall be provided.

# H-GAC

Houston-Galveston Area Council  
P.O. Box 22777 · 3555 Timmons · Houston, Texas 77227-2777

Cooperative Agreement - Contract - Hughes Fire Equipment, Inc. - Public Services - ID: 11604 - - FS12-23

## MASTER GENERAL PROVISIONS

This Master Agreement is made and entered into, by and between the Houston-Galveston Area Council hereinafter referred to as H-GAC having its principal place of business at 3555 Timmons Lane, Suite 120, Houston, Texas 77027 and Hughes Fire Equipment, Inc., hereinafter referred to as the Contractor, having its principal place of business at 910 Shelley Street, Springfield, OR 97477.

WITNESSETH:

WHEREAS, H-GAC hereby engages the Contractor to perform certain services in accordance with the specifications of the Master Agreement; and

WHEREAS, the Contractor has agreed to perform such services in accordance with the specifications of the Master Agreement;

NOW, THEREFORE, H-GAC and the Contractor do hereby agree as follows:

### **ARTICLE 1: LEGAL AUTHORITY**

The Contractor warrants and assures H-GAC that it possesses adequate legal authority to enter into this Master Agreement. The Contractor's governing body, where applicable, has authorized the signatory official(s) to enter into this Master Agreement and bind the Contractor to the terms of this Master Agreement and any subsequent amendments hereto.

### **ARTICLE 2: APPLICABLE LAWS**

The Contractor agrees to conduct all activities under this Master Agreement in accordance with all federal laws, executive orders, policies, procedures, applicable rules, regulations, directives, standards, ordinances, and laws, in effect or promulgated during the term of this Master Agreement, including without limitation, workers' compensation laws, minimum and maximum salary and wage statutes and regulations, and licensing laws and regulations. When required, the Contractor shall furnish H-GAC with satisfactory proof of its compliance therewith.

### **ARTICLE 3: PUBLIC INFORMATION**

Except as stated below, all materials submitted to H-GAC, including any attachments, appendices, or other information submitted as a part of a submission or Master Agreement, are considered public information, and become the property of H-GAC upon submission and may be reprinted, published, or distributed in any manner by H-GAC according to open records laws, requirements of the US Department of Labor and the State of Texas, and H-GAC policies and procedures. In the event the Contractor wishes to claim portions of the response are not subject to the Texas Public Information Act, it shall so; however, the determination of the Texas Attorney General as to whether such information must be disclosed upon a public request shall be binding on the Contractor. H-GAC will request such a determination only if Contractor bears all costs for preparation of the submission. H-GAC is not responsible for the return of creative examples of work submitted. H-GAC will not be held accountable if material from submissions is obtained without the written consent of the contractor by parties other than H-GAC, at any time during the evaluation process.

### **ARTICLE 4: INDEPENDENT CONTRACTOR**

The execution of this Master Agreement and the rendering of services prescribed by this Master Agreement do not change the independent status of H-GAC or the Contractor. No provision of this Master Agreement or act of H-GAC in performance of the Master Agreement shall be construed as making the Contractor the agent, servant, or employee of H-GAC, the State of Texas, or the United States Government. Employees of the Contractor are

subject to the exclusive control and supervision of the Contractor. The Contractor is solely responsible for employee related disputes and discrepancies, including employee payrolls and any claims arising therefrom.

**ARTICLE 5: ANTI-COMPETITIVE BEHAVIOR**

Contractor will not collude, in any manner, or engage in any practice which may restrict or eliminate competition or otherwise restrain trade.

**ARTICLE 6: SUSPENSION AND DEBARMENT**

Debarment and Suspension (Executive Orders 12549 and 12689) – A contract award (2 CFR 180.220) must not be made to parties listed on the government-wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR Part 1966 Comp. p. 189) and 12689 (3 CFR Part 1989 Comp. p. 235), “Debarment and Suspension.” SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

Pursuant to the Federal Rule above, Respondent certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency or by the State of Texas and at all times during the term of the Contract neither it nor its principals will be debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation by any federal department or agency or by the State of Texas Respondent shall immediately provide the written notice to H-GAC if at any time the Respondent learns that this certification was erroneous when submitted or has become erroneous by reason of changed circumstances. H-GAC may rely upon a certification of the Respondent that the Respondent is not debarred, suspended, ineligible, or voluntarily excluded from the covered contract, unless the H-GAC knows the certification is erroneous.

**ARTICLE 7: GOAL FOR CONTRACTING WITH SMALL AND MINORITY BUSINESSES, WOMEN’S BUSINESS ENTERPRISES, AND LABOR SURPLUS AREA FIRMS (if subcontracts are to be let)**

H-GAC’s goal is to assure that small and minority businesses, women's business enterprises, and labor surplus area firms are used when possible in providing services under a contract. In accordance with federal procurements requirements of 2 CFR §200.321, if subcontracts are to be let, the prime contractor must take the affirmative steps listed below:

1. Placing qualified small and minority businesses and women’s business enterprises on solicitation lists;
2. Assuring that small and minority businesses and women’s business enterprises are solicited whenever they are potential sources;
3. Dividing total requirements, when economically feasible, into smaller task or quantities to permit maximum participation by small and minority businesses, and women’s business enterprises;
4. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women’s business enterprises;
5. Using the services and assistance as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce.
- 6.

Nothing in this provision will be construed to require the utilization of any firm that is either unqualified or unavailable. The Small Business Administration (SBA) is the primary reference and database for information on requirements related to Federal Subcontracting <https://www.sba.gov/federal-contracting/contracting-guide/prime-subcontracting>

NOTE: The term DBE as used in this solicitation is understood to encompass all programs/business enterprises such as: Small Disadvantaged Business (SDB), Historically Underutilized Business (HUB), Minority Owned Business Enterprise (MBE), Women Owned Business Enterprise (WBE) and Disabled Veteran Business Enterprise (DVBE) or other designation as issued by a certifying agency.

**Contractor agrees to work with and assist HGACBuy customer in meeting any DBE targets and goals, as may be required by any rules, processes, or programs they might have in place. Assistance may include compliance with reporting requirements, provision of documentation, consideration of Certified/Listed subcontractors, provision of documented evidence that an active participatory role for a DBE entity was**

**considered in a procurement transaction, etc.**

**ARTICLE 8: SCOPE OF SERVICES**

The services to be performed by the Contractor are outlined in an Attachment to this Master Agreement.

**ARTICLE 9: PERFORMANCE PERIOD**

This Master Agreement shall be performed during the period which begins Dec 01 2023 and ends Nov 30 2027. All services under this Master Agreement must be rendered within this performance period, unless directly specified under a written change or extension provisioned under Article 21, which shall be fully executed by both parties to this Master Agreement.

**ARTICLE 10: PAYMENT OR FUNDING**

Payment provisions under this Master Agreement are outlined in the Special Provisions. H-GAC will not pay for any expenses incurred prior to the execution date of a contract, or any expenses incurred after the termination date of the contract.

**ARTICLE 11: PAYMENT FOR WORK**

The H-GAC Customer is responsible for making payment to the Contractor upon delivery and acceptance of the goods or completion of the services and submission of the subsequent invoice.

**ARTICLE 12: PAYMENT TERMS/PRE-PAYMENT/QUANTITY DISCOUNTS**

If discounts for accelerated payment, pre-payment, progress payment, or quantity discounts are offered, they must be clearly indicated in the Contractor's submission prior to contract award. The applicability or acceptance of these terms is at the discretion of the Customer.

**ARTICLE 13: REPORTING REQUIREMENTS**

If the Contractor fails to submit to H-GAC in a timely and satisfactory manner any report required by this Master Agreement, or otherwise fails to satisfactorily render performances hereunder, H-GAC may terminate this Master Agreement with notice as identified in Article 29 of these General Provisions. H-GAC has final determination of the adequacy of performance and reporting by Contractor. Termination of this Master Agreement for failure to perform may affect Contractor's ability to participate in future opportunities with H-GAC. The Contractor's failure to timely submit any report may also be considered cause for termination of this Master Agreement. Any additional reporting requirements shall be set forth in the Special Provisions of this Master Agreement.

**ARTICLE 14: INSURANCE**

Contractor shall maintain insurance coverage for work performed or services rendered under this Master Agreement as outlined and defined in the attached Special Provisions.

**ARTICLE 15: SUBCONTRACTS AND ASSIGNMENTS**

Except as may be set forth in the Special Provisions, the Contractor agrees not to assign, transfer, convey, sublet, or otherwise dispose of this Master Agreement or any right, title, obligation, or interest it may have therein to any third party without prior written approval of H-GAC. The Contractor acknowledges that H-GAC is not liable to any subcontractor or assignee of the Contractor. The Contractor shall ensure that the performance rendered under all subcontracts shall result in compliance with all the terms and provisions of this Master Agreement as if the performance rendered was rendered by the Contractor. Contractor shall give all required notices, and comply with all laws and regulations applicable to furnishing and performance of the work. Except where otherwise expressly required by applicable law or regulation, H-GAC shall not be responsible for monitoring Contractor's compliance, or that of Contractor's subcontractors, with any laws or regulations.

**ARTICLE 16: AUDIT**

Notwithstanding any other audit requirement, H-GAC reserves the right to conduct or cause to be conducted an independent audit of any transaction under this Master Agreement, such audit may be performed by the H-GAC local government audit staff, a certified public accountant firm, or other auditors designated by H-GAC and will be

conducted in accordance with applicable professional standards and practices. The Contractor understands and agrees that the Contractor shall be liable to the H-GAC for any findings that result in monetary obligations to H-GAC.

**ARTICLE 17: TAX EXEMPT STATUS**

H-GAC and Customer members are either units of government or qualified non-profit agencies, and are generally exempt from Federal and State sales, excise or use taxes. Respondent must not include taxes in its Response. It is the responsibility of Contractor to determine the applicability of any taxes to an order and act accordingly. Exemption certificates will be provided upon request.

**ARTICLE 18: EXAMINATION OF RECORDS**

The Contractor shall maintain during the course of the work complete and accurate records of all of the Contractor's costs and documentation of items which are chargeable to H-GAC under this Master Agreement. H-GAC, through its staff or designated public accounting firm, the State of Texas, and United States Government, shall have the right at any reasonable time to inspect, copy and audit those records on or off the premises by authorized representatives of its own or any public accounting firm selected by H-GAC. The right of access to records is not limited to the required retention period, but shall last as long as the records are retained. Failure to provide access to records may be cause for termination of the Master Agreement. The records to be thus maintained and retained by the Contractor shall include (without limitation): (1) personnel and payroll records, including social security numbers and labor classifications, accounting for total time distribution of the Contractor's employees working full or part time on the work, as well as cancelled payroll checks, signed receipts for payroll payments in cash, or other evidence of disbursement of payroll payments; (2) invoices for purchases, receiving and issuing documents, and all other unit inventory records for the Contractor's stocks or capital items; and (3) paid invoices and cancelled checks for materials purchased and for subcontractors' and any other third parties' charges.

Contractor agrees that H-GAC will have the right, with reasonable notice, to inspect its records pertaining to purchase orders processed and the accuracy of the fees payable to H-GAC. The Contractor further agrees that the examination of records outlined in this article shall be included in all subcontractor or third-party Master Agreements.

**ARTICLE 19: RETENTION OF RECORDS**

The Contractor and its subcontractors shall maintain all records pertinent to this Master Agreement, and all other financial, statistical, property, participant records, and supporting documentation for a period of no less than seven (7) years from the later of the date of acceptance of the final payment or until all audit findings have been resolved. If any litigation, claim, negotiation, audit or other action involving the records has been started before the expiration of the retention period, the records shall be retained until completion of the action and resolution of all issues which arise from it, or until the end of the seven (7) years, whichever is later, and until any outstanding litigation, audit, or claim has been fully resolved.

**ARTICLE 20: DISTRIBUTORS, VENDORS, RESELLERS**

Contractor agrees and acknowledges that any such designations of distributors, vendors, resellers or the like are for the convenience of the Contractor only and the awarded Contractor will remain responsible and liable for all obligations under the Contract and the performance of any designated distributor, vendor, reseller, etc. Contractor is also responsible for receiving and processing any Customer purchase order in accordance with the Contract and forwarding of the Purchase Order to the designated distributor, vendor, reseller, etc. to complete the sale or service. H-GAC reserves the right to reject any entity acting on the Contractor's behalf or refuse to add entities after a contract is awarded.

**ARTICLE 21: CHANGE ORDERS AND AMENDMENTS**

- A. Any alterations, additions, or deletions to the terms of this Master Agreement, which are required by changes in federal or state law or by regulations, are automatically incorporated without written amendment hereto, and shall become effective on the date designated by such law or by regulation.

- B. To ensure the legal and effective performance of this Master Agreement, both parties agree that any amendment that affects the performance under this Master Agreement must be mutually agreed upon and that all such amendments must be in writing. After a period of no less than 30 days subsequent to written notice, unless sooner implementation is required by law, such amendments shall have the effect of qualifying the terms of this Master Agreement and shall be binding upon the parties as if written herein.
- C. Customers have the right to issue a change order to any purchase orders issued to the Contractor for the purposes of clarification or inclusion of additional specifications, qualifications, conditions, etc. The change order must be in writing and agreed upon by Contractor and the Customer agency prior to issuance of any Change Order. A copy of the Change Order must be provided by the Contractor to, and acknowledged by, H-GAC.

**ARTICLE 22: CONTRACT ITEM CHANGES**

- A. If a manufacturer discontinues a contracted item, that item will automatically be considered deleted from the contract with no penalty to Contractor. However, H-GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item, or take any other action deemed by H-GAC, at its sole discretion, to be in the best interests of its Customers.
- B. If a manufacturer makes any kind of change in a contracted item which affects the contract price, Contractor must advise H-GAC of the details. H-GAC may allow or reject the change at its sole discretion. If the change is rejected, H-GAC will remove the item from its program and there will be no penalty to Contractor. However, H-GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item, or take any other action deemed by H-GAC, at its sole discretion, to be in the best interests of its Customers.
- C. If a manufacturer makes any change in a contracted item which does not affect the contract price, Contractor shall advise H-GAC of the details. If the 'new' item is equal to or better than the originally contracted item, the 'new' item shall be approved as a replacement. If the change is rejected H-GAC will remove the item from its program and there will be no penalty to Contractor. However, H-GAC may at its sole discretion elect to make a contract award to the next lowest Respondent for the item or may take any other action deemed by H-GAC at its sole discretion, to be in the best interests of its Customers.
- D. In the case of specifically identified catalogs or price sheets which have been contracted as base bid items or as published options, routine published changes to products and pricing will be automatically incorporated into the contract. However, Contractor must still provide written notice and an explanation of the changes to products and pricing. H-GAC will respond with written approval.

**ARTICLE 23: CONTRACT PRICE ADJUSTMENTS**

**Price Decreases**

If Contractor's Direct Cost decreases at any time during the full term of this award, Contractor must immediately pass the decrease on to H-GAC and lower its prices by the amount of the decrease in Direct Cost. (Direct Cost means Contractor's cost from the manufacturer of any item or if Contractor is the manufacturer, the cost of raw materials required to manufacture the item, plus costs of transportation from manufacturer to Contractor and Contractor to H-GAC. Contractor must notify H-GAC of price decreases in the same way as for price increases set out below. The price decrease shall become effective upon H-GAC's receipt of Contractor's notice. If Contractor routinely offers discounted contract pricing, H-GAC may request Contractor accept amended contract pricing equivalent to the routinely discounted pricing.

**Price Increase**

Contractors may request a price increase for items priced as Base Bid items and Published Options. The amount of any increase will not exceed actual documented increase in Contractor's Direct Cost and will not exceed 10% of

the previous bid price. Considerations on the percentage limit will be given if the price increase is the result of increased tariff charges or other governmental actions, or other economic factors. Manufacturer price/contract changes involving the sale of motor vehicles will be considered and may be allowed during the entire contract period subject to submission and verification of the proper documentation required for a contract change as referenced in this section.

### **Price Changes**

Any permanent increase or decrease in offered pricing for a base contract item or published option is considered a price change. Temporary increases in pricing by whatever name (e.g., 'surcharge', 'adjustment', 'equalization charge', 'compliance charge', 'recovery charge', etc.), are also considered to be price changes.

For published catalogs and price sheets as part of an H-GAC contract, requests to amend the contract to reflect any new published catalog or price sheet must be submitted whenever the manufacturer publishes a new document. The request must include the new catalog or price sheet. All Products shall, at time of sale, be equipped as required under any then current applicable local, state, and federal government requirements. If, during any contract, changes are made to any government requirements which cause a manufacturer's costs of production to increase, Contractor may increase pricing to the extent of Contractor's actual cost increase. The increase must be substantiated with support documentation acceptable to H-GAC prior to taking effect. Modifications to a Product required to comply with such requirements which become effective after the date of any sale are the responsibility of the Customer.

### **Requesting Price Increase/Required Documentation**

Contractor must submit a written overview of changes requested and reasons for the request, stating the amount of the increase, along with an itemized list of any increased prices, showing the Contractor's current price, revised price, the actual dollar difference and the percentage of the price increase by line item. Price change requests must be supported with substantive documentation (e.g., notices from suppliers and manufacturers of pricing changes in products, components, transportation, raw materials or commodities, and/or product availability, copies of invoices from suppliers, etc.) clearly showing that Contractor's actual costs have increased per the applicable line-item bid. The Producer Price Index (PPI) may be used as partial justification, subject to approval by H-GAC, but no price increase based solely on an increase in the PPI will be allowed. This documentation should be submitted in Excel format to facilitate analysis and updating of the website. The letter and documentation must be sent to Lead Program Coordinator, [james.glover@h-gac.com](mailto:james.glover@h-gac.com).

### **Review/Approval of Requests**

If H-GAC approves the price increase, Contractor will be notified in writing; no price increase will be effective until Contractor receives this notice. If H-GAC does not approve Contractor's price increase, Contractor may terminate its performance upon sixty (60) days advance written notice to H-GAC, however Contractor must fulfill any outstanding Purchase Orders. Termination of performance is Contractor's only remedy if H-GAC does not approve the price increase. H-GAC reserves the right to accept or reject any price change request.

### **ARTICLE 24: DELIVERIES AND SHIPPING TERMS**

The Contractor agrees to make deliveries only upon receipt of authorized Customer Purchase Order acknowledged by H-GAC. Delivery made without such Purchase Order will be at Contractor's risk and will leave H-GAC the option of canceling any contract awarded to the Contractor. The Contractor must secure and deliver any item within five (5) working days, or as agreed to on any corresponding customer Purchase Order.

Shipping must be Freight On Board Destination to the delivery location designated on the Customer purchase order. The Contractor will retain title and control of all goods until delivery is completed and the Customer has accepted the delivery. All risk of transportation and all related charges are the responsibility of the Contractor. The Customer will notify the Contractor and H-GAC promptly of any damaged goods and will assist the Contractor in arranging for inspection. The Contractor must file all claims for visible or concealed damage. Unless otherwise stated in the Master Agreement, deliveries must consist only of new and unused merchandise.

### **ARTICLE 25: RESTOCKING (EXCHANGES AND RETURNS)**

There will be no restocking charge to the Customer for return or exchange of any item purchased under the terms of any award. If the Customer wishes to return items purchased under an awarded contract, the Contractor agrees

to exchange, these items for other items, with no additional charge incurred. Items must be returned to Contractor within thirty (30) days from date of delivery. If there is a difference in price in the items exchanged, the Contractor must notify H-GAC and invoice Customer for increase price or provide the Customer with a credit or refund for any decrease in price per Customer's preference. On items returned, a credit or cash refund will be issued by the Contractor to Customer. This return and exchange option will extend for thirty (30) days following the expiration of the term of the Contract. All items returned by the Customer must be unused and in the same merchantable condition as when received. Items that are special ordered may be returned only upon approval of the Contractor.

#### **ARTICLE 26: MANUALS**

Each product delivered under contract to any Customer must be delivered with at least one (1) copy of a safety and operating manual and any other technical or maintenance manual. The cost of the manual(s) must be included in the price for the Product offered.

#### **ARTICLE 27: OUT OF STOCK, PRODUCT RECALLS, AND DISCONTINUED PRODUCTS**

H-GAC does NOT purchase the products sold pursuant to a Solicitation or Master Agreement. Contractor is responsible for ensuring that notices and mailings, such as Out of Stock or Discontinued Notices, Safety Alerts, Safety Recall Notices, and customer surveys, are sent directly to the Customer with a copy sent to H-GAC. Customer will have the option of accepting any equivalent product or canceling the item from Customer's Purchase Order. Contractor is not authorized to make substitutions without prior approval.

#### **ARTICLE 28: WARRANTIES, SALES, AND SERVICE**

Warranties must be the manufacturer's standard and inclusive of any other warranty requirements stated in the Master Agreement; any warranties offered by a dealer will be in addition to the manufacturer's standard warranty and will not be a substitute for such. Pricing for any product must be inclusive of the standard warranty.

Contractor is responsible for the execution and effectiveness of all product warranty requests and any claims, Contractor agrees to respond directly to correct warranty claims and to ensure reconciliation of warranty claims that have been assigned to a third party.

#### **ARTICLE 29: TERMINATION PROCEDURES**

The Contractor acknowledges that this Master Agreement may be terminated for Convenience or Default. H-GAC will not pay for any expenses incurred after the termination date of the contract.

##### *A. Convenience*

H-GAC may terminate this Master Agreement at any time, in whole or in part, with or without cause, whenever H-GAC determines that for any reason such termination is in the best interest of H-GAC, by providing written notice by certified mail to the Contractor. Upon receipt of notice of termination, all services hereunder of the Contractor and its employees and subcontractors shall cease to the extent specified in the notice of termination.

The Contractor may cancel or terminate this Master Agreement upon submission of thirty (30) days written notice, presented to H-GAC via certified mail. The Contractor may not give notice of cancellation after it has received notice of default from H-GAC.

##### *B. Default*

H-GAC may, by written notice of default to the Contractor, terminate the whole or any part of the Master Agreement, in any one of the following circumstances:

- (1) If the Contractor fails to perform the services herein specified within the time specified herein or any extension thereof; or
- (2) If the Contractor fails to perform any of the other provisions of this Master Agreement for any reason whatsoever, or so fails to make progress or otherwise violates the Master Agreements that completion of services herein specified within the Master Agreement term is significantly endangered, and in either of these two instances does not cure such failure within a period of ten (10) days (or such longer period of time as may be authorized by H-GAC in writing) after receiving written notice by certified mail of default from H-GAC.

- (3) In the event of such termination, Contractor will notify H-GAC of any outstanding Purchase Orders and H-GAC will consult with the End User and notify the Contractor to what extent the End User wishes the Contractor to complete the Purchase Order. If Contractor is unable to do so, Contractor may be subject to a claim for damages from H-GAC and/or the End User.

### **ARTICLE 30: SEVERABILITY**

H-GAC and Contractor agree that should any provision of this Master Agreement be determined to be invalid or unenforceable, such determination shall not affect any other term of this Master Agreement, which shall continue in full force and effect.

### **ARTICLE 31: FORCE MAJEURE**

To the extent that either party to this Master Agreement shall be wholly or partially prevented from the performance of any obligation or duty placed on such party by reason of or through strikes, stoppage of labor, riot, fire, flood, acts of war, insurrection, accident, order of any court, act of God, or specific cause reasonably beyond the party's control and not attributable to its neglect or nonfeasance, in such event, the time for the performance of such obligation or duty shall be suspended until such disability to perform is removed. Determination of force majeure shall rest solely with H-GAC.

### **ARTICLE 32: CONFLICT OF INTEREST**

No officer, member or employee of the Contractor or Contractor's subcontractor, no member of the governing body of the Contractor, and no other public officials of the Contractor who exercise any functions or responsibilities in the review or Contractor approval of this Master Agreement, shall participate in any decision relating to this Master Agreement which affects his or her personal interest, or shall have any personal or pecuniary interest, direct or indirect, in this Master Agreement.

- A. **Conflict of Interest Questionnaire:** Chapter 176 of the Texas Local Government Code requires contractors contracting or seeking to contract with H-GAC to file a conflict-of-interest questionnaire (CIQ) if they have an employment or other business relationship with an H-GAC officer or an officer's close family member. The required questionnaire and instructions are located on the H-GAC website or at the Texas Ethics Commission website <https://www.ethics.state.tx.us/forms/CIQ.pdf>. H-GAC officers include its Board of Directors and Executive Director, who are listed on this website. Respondent must complete and file a CIQ with the Texas Ethics Commission if an employment or business relationship with H-GAC office or an officer's close family member as defined in the law exists.
- B. **Certificate of Interested Parties Form – Form 1295:** As required by Section 2252.908 of the Texas Government Code. H-GAC will not enter a Contract with Contractor unless (i) the Contractor submits a disclosure of interested parties form to H-GAC at the time the Contractor submits the contract H-GAC, or (ii) the Contractor is exempt from such requirement. The required form and instructions are located at the Texas Ethics Commission website [https://www.ethics.state.tx.us/whatsnew/elf\\_info\\_form1295.htm](https://www.ethics.state.tx.us/whatsnew/elf_info_form1295.htm). Respondents who are awarded a Contract must submit their Form 1295 with the signed Contract to H-GAC.

### **ARTICLE 33: FEDERAL COMPLIANCE**

Contractor agrees to comply with all federal statutes relating to nondiscrimination, labor standards, and environmental compliance. With regards to "Rights to Inventions Made Under a Contract or Master Agreement," If the Federal award meets the definition of "funding Master Agreement" under 37 CFR § 401.2 (a) and the recipient or subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding Master Agreement," the recipient or subrecipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Master Agreements," and any implementing regulations issued by the awarding agency. Contractor agrees to be wholly compliant with the provisions of 2 CFR 200, Appendix II. Additionally, for work to be performed under the Master Agreement or subcontract thereof, including procurement of materials or leases of equipment, Contractor shall notify each potential subcontractor or supplier of the Contractor's federal compliance obligations. These may include, but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b)

Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) the Fair Labor Standards Act of 1938 (29 USC 676 et. seq.), (d) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps and the Americans with Disabilities Act of 1990; (e) the Age Discrimination in Employment Act of 1967 (29 USC 621 et. seq.) and the Age Discrimination Act of 1974, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (f) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (g) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to the nondiscrimination on the basis of alcohol abuse or alcoholism; (h) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (i) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (j) any other nondiscrimination provisions in any specific statute(s) applicable to any Federal funding for this Master Agreement; (k) the requirements of any other nondiscrimination statute(s) which may apply to this Master Agreement; (l) applicable provisions of the Clean Air Act (42 U.S.C. §7401 et seq.), the Federal Water Pollution Control Act, as amended (33 U.S.C. §1251 et seq.), Section 508 of the Clean Water Act (33 U.S.C. 1368), Executive Order 11738, and the Environmental Protection Agency regulations at 40 CFR Part 15; (m) applicable provisions of the Davis- Bacon Act (40 U.S.C. 276a - 276a-7), the Copeland Act (40 U.S.C. 276c), and the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-332), as set forth in Department of Labor Regulations at 20 CFR 5.5a; (n) the mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (P.L. 94-163).

**ARTICLE 34: PROHIBITION ON CONTRACTING WITH ENTITIES USING CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE EQUIPMENT (EFFECTIVE AUG. 13, 2020 AND AS AMENDED OCTOBER 26, 2020)**

Pursuant to 2 CFR 200.216, Contractor shall not offer equipment, services, or system that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. Covered telecommunications equipment or services means 1) telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities); 2) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities); 3) telecommunications or video surveillance services provided by such entities or using such equipment; or 4) telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country. Respondent must comply with requirements for certifications. The provision at 48 C.F.R Section 52.204-26 requires that offerors review SAM prior to completing their required representations. This rule applies to all acquisitions, including acquisitions at or below the simplified acquisition threshold and to acquisitions of commercial items, including commercially available off the-shelf items.

**ARTICLE 35: DOMESTIC PREFERENCE**

In accordance with 2 CFR 200.322, as appropriate and to the extent consistent with law, when using federal grant award funds H-GAC should, to the greatest extent practicable, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). H-GAC must include this requirement in all subawards including all contracts and purchase orders for work or products under the federal grant award. If Contractor intends to qualify for Purchase Orders using federal grant money, then it shall work with H-GAC to provide all required certifications and other documentation needed to show compliance.

**ARTICLE 36: CRIMINAL PROVISIONS AND SANCTIONS**

The Contractor agrees to perform the Master Agreement in conformance with safeguards against fraud and abuse as set forth by the H-GAC, the State of Texas, and the acts and regulations of any related state or federal agency. The Contractor agrees to promptly notify H-GAC of any actual or suspected fraud, abuse, or other criminal activity

through the filing of a written report within twenty-four (24) hours of knowledge thereof. Contractor shall notify H-GAC of any accident or incident requiring medical attention arising from its activities under this Master Agreement within twenty-four (24) hours of such occurrence. Theft or willful damage to property on loan to the Contractor from H-GAC, if any, shall be reported to local law enforcement agencies and H-GAC within two (2) hours of discovery of any such act.

The Contractor further agrees to cooperate fully with H-GAC, local law enforcement agencies, the State of Texas, the Federal Bureau of Investigation, and any other duly authorized investigative unit, in carrying out a full investigation of all such incidents.

The Contractor shall notify H-GAC of the threat of lawsuit or of any actual suit filed against the Contractor pertaining to this Master Agreement or which would adversely affect the Contractor's ability to perform services under this Master Agreement.

**ARTICLE 37: INDEMNIFICATION AND RECOVERY**

H-GAC's liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, is limited to its order processing charge. In no event will H-GAC be liable for any loss of use, loss of time, inconvenience, commercial loss, lost profits, or savings or other incidental, special or consequential damages to the full extent such use may be disclaimed by law. Contractor agrees, to the extent permitted by law, to defend and hold harmless H-GAC, its board members, officers, agents, officials, employees, and indemnities from any and all claims, costs, expenses (including reasonable attorney fees), actions, causes of action, judgements, and liens arising as a result of Contractor's negligent act or omission under this Master Agreement. Contractor shall notify H-GAC of the threat of lawsuit or of any actual suit filed against Contractor relating to this Master Agreement.

**ARTICLE 38: LIMITATION OF CONTRACTOR'S LIABILITY**

Except as specified in any separate writing between the Contractor and an END USER, Contractor's total liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, but excluding its obligation to indemnify H-GAC, is limited to the price of the particular products/services sold hereunder, and Contractor agrees either to refund the purchase price or to repair or replace product(s) that are not as warranted. In no event will Contractor be liable for any loss of use, loss of time, inconvenience, commercial loss, loss of profits or savings or other incidental, special or consequential damages to the full extent such use may be disclaimed by law. Contractor understands and agrees that it shall be liable to repay and shall repay upon demand to END USER any amounts determined by H-GAC, its independent auditors, or any agency of State or Federal government to have been paid in violation of the terms of this Master Agreement.

**ARTICLE 39: TITLES NOT RESTRICTIVE**

The titles assigned to the various Articles of this Master Agreement are for convenience only. Titles shall not be considered restrictive of the subject matter of any Article, or part of this Master Agreement.

**ARTICLE 40: JOINT WORK PRODUCT**

This Master Agreement is the joint work product of H-GAC and the Contractor. This Master Agreement has been negotiated by H-GAC and the Contractor and their respective counsel and shall be fairly interpreted in accordance with its terms and, in the event of any ambiguities, no inferences shall be drawn against any party.

**ARTICLE 41: PROCUREMENT OF RECOVERED MATERIAL**

H-GAC and the Respondent must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired during the preceding fiscal year exceeded \$10,000; (2) procuring solid waste management services in a manner that maximizes energy and resource recovery; and (3) establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. Pursuant to the Federal Rule above, as required by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. § 6962(c)(3)(A)(i)), Respondent

certifies that the percentage of recovered materials content for EPA-designated items to be delivered or used in the performance of the Contract will be at least the amount required by the applicable contract specifications or other contractual requirements.

**ARTICLE 42: COPELAND “ANTI-KICKBACK” ACT**

Contractor shall comply with 18 U.S.C. § 874, 40 U.S.C. § 3145, and the requirements of 29 C.F.R. pt. 3 as may be applicable, which are incorporated by reference into the contract. The contractor or subcontractor shall insert in any subcontracts the clause above and such other clauses as appropriate agency instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all of these contract clauses. A breach of the contract clauses above may be grounds for termination of the Contract, and for debarment as a contractor and subcontractor as provided in 29 C.F.R. § 5.12.

**ARTICLE 43: DISCRIMINATION**

Respondent and any potential subcontractors shall comply with all Federal statutes relating to nondiscrimination. These include, but are not limited to:

- a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352), which prohibits discrimination on the basis of race, color, or national origin;
- b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex;
- c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794), which prohibits discrimination on the basis of handicaps;
- d) The Age Discrimination Act of 1975, as amended (42 U.S.C. §§6101- 6107), which prohibits discrimination on the basis of age;
- e) The Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse;
- f) The Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism;
- g) Sections 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. §§290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records;
- h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. §§3601 et seq.), as amended, relating to nondiscrimination in the sale, rental, or financing of housing;
- i) Any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and
- j) The requirements of any other nondiscrimination statute(s) that may apply to the application.

**ARTICLE 44: DRUG FREE WORKPLACE**

Contractor must provide a drug-free workplace in accordance with the Drug-Free Workplace Act, as applicable. For the purposes of this Section, “drug-free” means a worksite at which employees are prohibited from engaging in the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance. H-GAC may request a copy of this policy.

**ARTICLE 45: APPLICABILITY TO SUBCONTRACTORS**

Respondent agrees that all contracts it awards pursuant to the contract awarded as a result of this Master Agreement will be bound by the foregoing terms and conditions.

**ARTICLE 46: WARRANTY AND COPYRIGHT**

Submissions must include all warranty information, including items covered, items excluded, duration, and renewability. Submissions must include proof of licensing if using third party code for programming.

**ARTICLE 47: DATA HANDLING AND SECURITY**

It will always be the responsibility of the selected Contractor to manage data transfer and to secure all data appropriately during the project to prevent unauthorized access to all data, products, and deliverables.

**ARTICLE 48: DISPUTES**

All disputes concerning questions of fact or of law arising under this Master Agreement, which are not addressed within the Whole Master Agreement as defined pursuant to Article 4 hereof, shall be decided by the Executive Director of H-GAC or his designee, who shall reduce his decision to writing and provide notice thereof to the Contractor. The decision of the Executive Director or his designee shall be final and conclusive unless, within thirty (30) days from the date of receipt of such notice, the Contractor requests a rehearing from the Executive Director of H-GAC. In connection with any rehearing under this Article, the Contractor shall be afforded an opportunity to be heard and offer evidence in support of its position. The decision of the Executive Director after any such rehearing shall be final and conclusive. The Contractor may, if it elects to do so, appeal the final and conclusive decision of the Executive Director to a court of competent jurisdiction. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the Master Agreement and in accordance with H-GAC's final decision.

**ARTICLE 49: CHOICE OF LAW: VENUE**

This Master Agreement shall be governed by the laws of the State of Texas. Venue and jurisdiction of any suit or cause of action arising under or in connection with the Master Agreement shall lie exclusively in Harris County, Texas. Disputes between END USER and Contractor are to be resolved in accordance with the law and venue rules of the state of purchase. Contractor shall immediately notify H-GAC of such disputes.

**ARTICLE 50: ORDER OF PRIORITY**

In the case of any conflict between or within this Master Agreement, the following order of priority shall be utilized: 1) General Provisions, 2) Special Provisions, 3) Scope of Work, and 4) Other Attachments.

**ARTICLE 51: WHOLE MASTER AGREEMENT**

**Please note, this is an H-GAC Master Agreement template and is used for all products and services offered in H-GAC Cooperative Purchasing. Any redlines to this Master Agreement may not be reviewed. If this Master Agreement has not been signed by the Contractor within 30 calendar days, this Master Agreement will be automatically voided.** The Master General Provisions, Master Special Provisions, and Attachments, as provided herein, constitute the complete Master Agreement between the parties hereto, and supersede any and all oral and written Master Agreements between the parties relating to matters herein. Except as otherwise provided herein, this Master Agreement cannot be modified without written consent of the parties.

**ARTICLE 52: UNIVERSAL IDENTIFIER AND SYSTEM FOR AWARD MANAGEMENT (SAM)**

In accordance with 2 CFR Title 2, Subtitle A, Chapter I, Part 25 as it applies to a Federal awarding agency's grants, cooperative agreements, loans, and other types of Federal financial assistance as defined in 2 CFR 25.406.

Contractor understands and as it relates to 2 CFR 25.205(a), a Federal awarding agency may not make a Federal award or financial modification to an existing Federal award to an applicant or recipient until the entity has complied with the requirements described in 2 CFR 25.200 to provide a valid unique entity identifier and maintain an active SAM registration ([www.SAM.gov](http://www.SAM.gov)) with current information (other than any requirement that is not applicable because the entity is exempted under § 25.110). 2 CFR 25.200(b) requires that registration in the SAM **prior to submitting an application or plan**; and maintain an active SAM registration with current information, including information on a recipient's immediate and highest level owner and subsidiaries, as well as on all predecessors that have been awarded a Federal contract or grant within the last three years, if applicable, at all times during which it has an active Federal award or an application or plan under consideration by a Federal awarding agency; and provide its unique entity identifier in each application or plan it submits to the Federal awarding agency. To remain registered in the SAM database after the initial registration, the applicant is required to review and update its information in the SAM database on an annual basis from the date of initial registration or subsequent updates to ensure it is current, accurate and complete. At the time a Federal awarding agency is ready to make a Federal award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the Federal awarding agency: (1) May determine that the applicant is not qualified to receive a Federal award; and (2) May use that determination as a basis for making a Federal award to another applicant.

**ARTICLE 53: PROCUREMENT OF RECOVERED MATERIALS**

In accordance with 2 CFR 200.323, the Houston-Galveston Area Council and the Contractor or Subrecipient must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include: (1) procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired during the preceding fiscal year exceeded \$10,000; (2) procuring solid waste management services in a manner that maximizes energy and resource recovery; and (3) establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines. Pursuant to the Federal Rule above, as required by the Resource Conservation and Recovery Act of 1976 (42 U.S.C. § 6962(c)(3)(A)(i)), the Contractor or Subrecipient certifies that the percentage of recovered materials content for EPA-designated items to be delivered or used in the performance of the Agreement will be at least the amount required by the applicable contract specifications or other contractual requirements.

**SIGNATURES:**

H-GAC and the Contractor have read, agreed, and executed the whole Master Agreement as of the date first written above, as accepted by:

## MASTER SPECIAL PROVISIONS

**Please note, this is an H-GAC Master Agreement template and is used for all products and services offered in H-GAC Cooperative Purchasing. Any redlines to this Master Agreement may not be reviewed.** Incorporated by attachment, as part of the whole Master Agreement, H-GAC and the Contractor do, hereby agree to the Master Special Provisions as follows:

### **ARTICLE 1: BIDS/PROPOSALS INCORPORATED**

In addition to the whole Master Agreement, the following documents listed in order of priority are incorporated into the Master Agreement by reference: Bid/Proposal Specifications and Contractor's Response to the Bid/Proposal.

### **ARTICLE 2: END USER MASTER AGREEMENTS ("EUA")**

H-GAC acknowledges that the END USER, which is the HGACBuy customer utilizing the contract (CUSTOMER and END USER may be used interchangeably) may choose to enter into an End User Master Agreement (EUA) with the Contractor through this Master Agreement. A CUSTOMER/END USER is a state agency, county, municipality, special district, or other political subdivision of a state, or a qualifying non-profit corporation (providing one or more governmental function or service that possess legal authority to enter into the Contract. The term of the EUA may exceed the term of the current H-GAC Master Agreement.

H-GAC's acknowledgement is not an endorsement or approval of the End User Master Agreement's terms and conditions. Contractor agrees not to offer, agree to or accept from the CUSTOMER/END USER, any terms or conditions that conflict with those in Contractor's Master Agreement with H-GAC. Contractor affirms that termination of its Master Agreement with H-GAC for any reason shall not result in the termination of any underlying EUA, which shall in each instance, continue pursuant to the EUA's stated terms and duration. Pursuant to the terms of this Master Agreement, termination of this Master Agreement will disallow the Contractor from entering into any new EUA with CUSTOMER/END USER. Applicable H-GAC order processing charges will be due and payable to H-GAC on any EUAs, surviving termination of this Master Agreement between H-GAC and Contractor.

### **ARTICLE 3: MOST FAVORED CUSTOMER CLAUSE**

Contractor shall provide its most favorable pricing and terms to H-GAC. If at any time during this Master Agreement, Contractor develops a regularly followed standard procedure of entering into Master Agreements with other governmental customers within the State of Texas, and offers the same or substantially the same products/services offered to H-GAC on a basis that provides prices, warranties, benefits, and or terms more favorable than those provided to H-GAC, Contractor shall notify H-GAC within ten (10) business days thereafter, and this Master Agreement shall be deemed to be automatically retroactively amended, to the effective date of Contractor's most favorable past Master Agreement with another entity. Contractor shall provide the same prices, warranties, benefits, or terms to H-GAC and its CUSTOMER/END USER as provided in its most favorable past Master Agreement. H-GAC shall have the right and option at any time to decline to accept any such change, in which case the amendment shall be deemed null and void. If Contractor claims that a more favorable price, warranty, benefit, or term that was charged or offered to another entity during the term of this Master Agreement, does not constitute more favorable treatment, than Contractor shall, within ten (10) business days, notify H-GAC in writing, setting forth the detailed reasons Contractor believes the aforesaid

offer is not in fact most favored treatment. H-GAC, after due consideration of Contractor's written explanation, may decline to accept such explanation and thereupon this Master Agreement between H-GAC and Contractor shall be automatically amended, effective retroactively, to the effective date of the most favored Master Agreement, to provide the same prices, warranties, benefits, or terms to H-GAC and the CUSTOMER/END USER.

**EXCEPTION:** This clause shall not be applicable to prices and price adjustments offered by a bidder, proposer, or contractor, which are not within bidder's/proposer's control [example; a manufacturer's bid concession], or to any prices offered to the Federal Government and its agencies.

**ARTICLE 4: PARTY LIABILITY**

Contractor's total liability under this Master Agreement, whether for breach of contract, warranty, negligence, strict liability, in tort or otherwise, is limited to the price of the particular products/services sold hereunder. Contractor agrees either to refund the purchase price or to repair or replace product(s) that are not as warranted. Contractor accepts liability to repay, and shall repay upon demand to CUSTOMER/END USER, any amounts determined by H-GAC, its independent auditors, or any state or federal agency, to have been paid in violation of the terms of this Master Agreement.

**ARTICLE 5: GOVERNING LAW & VENUE**

Contractor and H-GAC agree that Contractor will make every reasonable effort to resolve disputes with the CUSTOMER/END USER in accord with the law and venue rules of the state of purchase. Contractor shall immediately notify H-GAC of such disputes.

**ARTICLE 6: SALES AND ORDER PROCESSING CHARGE**

Contractor shall sell its products to CUSTOMER/END USER based on the pricing and terms of this Master Agreement. H-GAC will invoice Contractor for the applicable order processing charge when H-GAC receives notification of a CUSTOMER/END USER order. Contractor shall remit to H-GAC the full amount of the applicable order processing charge, after delivery of any product or service and subsequent CUSTOMER/END USER acceptance. Payment of the Order Processing Charge shall be remitted from Contractor to H-GAC, within thirty (30) calendar days or ten (10) business days after receipt of a CUSTOMER/END USER's payment, whichever comes first, notwithstanding Contractor's receipt of invoice. For sales made by Contractor based on this Master Agreement, including sales to entities without Interlocal Master Agreements, Contractor shall pay the applicable order processing charges to H-GAC. Further, Contractor agrees to encourage entities who are not members of H-GAC's Cooperative Purchasing Program to execute an H-GAC Interlocal Master Agreement. H-GAC reserves the right to take appropriate actions including, but not limited to, Master Agreement termination if Contractor fails to promptly remit the appropriate order processing charge to H-GAC. In no event shall H-GAC have any liability to Contractor for any goods or services a CUSTOMER/END USER procures from Contractor. At all times, Contractor shall remain liable to pay to H-GAC any order processing charges on any portion of the Master Agreement actually performed, and for which compensation was received by Contractor.

**ARTICLE 7: LIQUIDATED DAMAGES**

Contractor and H-GAC agree that Contractor shall cooperate with the CUSTOMER/END USER at the time a CUSTOMER/END USER purchase order is placed, to determine terms for any liquidated damages.

**ARTICLE 8: INSURANCE**

Unless otherwise stipulated in Section B of the Bid/Proposal Specifications, Contractor must have the following insurance and coverage minimums:

- a. General liability insurance with a Single Occurrence limit of at least \$1,000,000.00, and a General Aggregate limit of at least two times the Single Occurrence limit.
- b. Product liability insurance with a Single Occurrence limit of at least \$1,000,000.00, and a General Aggregate limit of at least two times the Single Occurrence limit for all Products except Automotive Fire Apparatus. For Automotive Fire Apparatus, see Section B of the Bid/Proposal Specifications.
- c. Property Damage or Destruction insurance is required for coverage of End User owned equipment while in Contractor's possession, custody, or control. The minimum Single Occurrence limit is \$500,000.00 and the General Aggregate limit must be at least two times the Single Occurrence limit. This insurance may be carried in several ways, e.g. under an Inland Marine policy, as art of Automobile coverage, or under a Garage Keepers policy. In any event, this coverage must be specifically and clearly listed on insurance certificate(s) submitted to H-GAC.
- d. Insurance coverage shall be in effect for the length of any contract made pursuant to the Bid/Proposal, and for any extensions thereof, plus the number of days/months required to deliver any outstanding order after the close of the contract period.
- e. Original Insurance Certificates must be furnished to H-GAC on request, showing Contractor as the insured and showing coverage and limits for the insurances listed above.
- f. If any Product(s) or Service(s) will be provided by parties other than Contractor, all such parties are required to carry the minimum insurance coverages specified herein, and if requested by H-GAC, a separate insurance certificate must be submitted for each such party.
- g. H-GAC reserves the right to contact insurance underwriters to confirm policy and certificate issuance and document accuracy.

#### **ARTICLE 9: PERFORMANCE AND PAYMENT BONDS FOR INDIVIDUAL ORDERS**

H-GAC's contractual requirements DO NOT include a Performance & Payment Bond (PPB); therefore, Contractor shall offer pricing that reflects this cost savings. Contractor shall remain prepared to offer a PPB to cover any order if so requested by the CUSTOMER/END USER. Contractor shall quote a price to CUSTOMER/END USER for provision of any requested PPB, and agrees to furnish the PPB within ten business (10) days of receipt of CUSTOMER/END USER's purchase order.

#### **ARTICLE 10: ORDER PROCESSING CHARGE**

H-GAC will apply an Order Processing Charge for each sale done through the H-GAC contract, with the exception of orders for motor vehicles. Any pricing submitted must include this charge amount per the most current H-GAC schedule. For motor vehicle orders, the Processing Charge is paid by the CUSTOMER/END USER. Contractor will need to refer to the solicitation for the Order Processing Charge.

#### **ARTICLE 11: CHANGE OF STATUS**

Contractor shall immediately notify H-GAC, in writing, of ANY change in ownership, control, dealership/franchisee status, Motor Vehicle license status, or name. Contractor shall offer written guidance to advise H-GAC if this Master Agreement shall be affected in any way by such change. H-GAC shall have the right to determine whether or not such change is acceptable, and to determine what action shall be warranted, up to and including cancellation of Master Agreement.

#### **ARTICLE 12: REQUIREMENTS TO APPLICABLE PHYSICAL GOODS**

In the case of physical goods (e.g. equipment, material, supplies, as opposed to services), all Products offered must comply with any applicable provisions of the Texas Business and Commerce Code, Title 1, Chapter 2 and with at least the following:

- a. Be new, unused, and not refurbished.
- b. Not be a prototype as the general design, operation, and performance. This requirement is NOT meant to preclude the Contractor from offering new models or configurations which incorporate improvements in a current design or add functionality, but in which new model or configuration may be new to the marketplace.
- c. Include all accessories which may or may not be specifically mentioned in the Master Agreement, but which are normally furnished or necessary to make the Product ready for its intended use upon delivery. Such accessories shall be assembled, installed, and adjusted to allow continuous operation of Product at time of delivery.
- d. Have assemblies, sub-assemblies and component parts that are standard and interchangeable throughout the entire quantity of a Product as may be purchased simultaneously by any END USER/CUSTOMER.
- e. Be designed and constructed using current industry accepted engineering and safety practices, and materials.
- f. Be available for inspection at any time prior to or after procurement.

### **ARTICLE 13: TEXAS MOTOR VEHICLE BOARD LICENSING**

All Contractors that deal in motor vehicles shall maintain current licenses that are required by the Texas Motor Vehicle Commission Code. If at any time during this Master Agreement term, any required Contractor license is denied, revoked, or not renewed, Contractor shall be in default of this Master Agreement, unless the Texas Motor Vehicle Board issues a stay or waiver. Contractor shall promptly provide copies of all current applicable Texas Motor Vehicle Board documentation to H-GAC upon request.

### **ARTICLE 14: INSPECTION/TESTING**

All Products sold pursuant to this Master Agreement will be subject to inspection/testing by or at the direction of H-GAC and/or the ordering CUSTOMER/END USER, either at the delivery destination or the place of manufacture. In the event a Product fails to meet or exceed all requirements of this Master Agreement, and unless otherwise agreed in advance, the cost of any inspection and/or testing, will be the responsibility of the Contractor.

### **ARTICLE 15: ADDITIONAL REPORTING REQUIREMENTS**

Contractor agrees to submit written quarterly reports to H-GAC detailing all transactions during the previous three (3) month period. Reports must include, but are not limited, to the following information:

- a. CUSTOMER/END USER Name
- b. Product/Service purchased, including Product Code if applicable
- c. Customer Purchase Order Number
- d. Purchase Order Date
- e. Product/Service dollar amount
- f. HGACBuy Order Processing Charge amount

### **ARTICLE 16: BACKGROUND CHECKS**

Cooperative customers may request background checks on any awarded contractor's employees who will have direct contact with students, or for any other reason they so choose, any may require contractor to pay the cost of obtaining any background information requested by the CUSTOMER/END USER.

### **ARTICLE 17: PROHIBITION ON CONTRACTS WITH COMPANIES BOYCOTTING ISRAEL CERTIFICATION**

As required by Chapter 2271 of the Texas Local Government Code the Contractor must verify that it 1) does not boycott Israel; and 2) will not boycott Israel during the term of the Contract. Pursuant to Section 2271.001, Texas Government Code:

1. “Boycott Israel” means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. “Company” means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

**ARTICLE 18: NO EXCLUDED NATION OR TERRORIST ORGANIZATION CERTIFICATION**

As required by Chapter 2252 of the Texas Government Code the Contractor must certify that it is not a company engaged in active business operations with Sudan, Iran, or a foreign terrorist organization – specifically, any company identified on a list prepared and maintained by the Texas Comptroller under Texas Government Code §§806.051, 807.051, or 2252.153. (A company that the U.S. Government affirmatively declares to be excluded from its federal sanctions regime relating to Sudan, Iran, or any federal sanctions regime relating to a foreign terrorist organization is not subject to the contract prohibition.)

**ARTICLE 19: PROHIBITION ON CONTRACTING WITH ENTITIES USING CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE EQUIPMENT (Effective Aug. 13, 2020 and as amended October 26, 2020)**

Pursuant to 2 CFR 200.216, Contractor shall not offer equipment, services, or system that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system. “Covered telecommunications equipment or services means 1) telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation (or any subsidiary or affiliate of such entities); 2) for the purpose of public safety, security of government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities); 3) telecommunications or video surveillance services provided by such entities or using such equipment; or 4) telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the government of a covered foreign country.

Contractor must comply with requirements for certifications. The provision at 48 C.F.R Section 52.204-26 requires that Contractors review SAM prior to completing their required representations. This rule applies to all acquisitions, including acquisitions at or below the simplified acquisition threshold and to acquisitions of commercial items, including commercially available off the-shelf items.

**ARTICLE 20: BUY AMERICA ACT (National School Lunch Program and Breakfast Program)**

With respect to products purchased by CUSTOMER/END USER for use in the National School Lunch Program and/or National School Breakfast Program, Contractor shall comply with all federal procurement laws and regulations with respect to such programs, including the Buy American provisions set forth in 7 C.F.R. Part 210.21(d), to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs.

In the event Contractor or Contractor’s supplier(s) are unable or unwilling to certify compliance with the Buy American Provision, or the applicability of an exception to the Buy American provision, H-GAC CUSTOMER/END USER may decide not to purchase from Contractor. Additionally, H-GAC

CUSTOMER/END USER may require country of origin on all products and invoices submitted for payment by Contractor, and Contractor agrees to comply with any such requirement.

**ARTICLE 21: BUY AMERICA REQUIREMENT (Applies only to Federally Funded Highway and Transit Projects)**

With respect to products purchased by CUSTOMER/END USER for use in federally funded highway projects, Contractor shall comply with all federal procurement laws and regulations with respect to such projects, including the Buy American provisions set forth in 23 U.S.C. Section 313, 23 C.F.R. Section 635.410, as amended, and the Steel and Iron Preference provisions of Texas Transportation Code Section 223.045, to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs. With respect to products purchased by CUSTOMER/END USER for use in federally funded transit projects, Contractor shall comply with all federal procurement laws and regulations with respect to such projects, including the Buy American provisions set forth in 49 U.S.C. Section 5323(j)(1), 49 C.F.R. Sections 661.6 or 661.12, to the extent applicable. Contractor agrees to provide all certifications required by CUSTOMER/END USER regarding such programs.

**ARTICLE 22: DOMESTIC PREFERENCE**

In accordance with 2 CFR 200.322, as appropriate and to the extent consistent with law, a CUSTOMER/END USER using federal grant award funds should, to the greatest extent practicable, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The CUSTOMER/END USER must include this requirement in all subawards including all contracts and purchase orders for work or products under the federal grant award. If Contractor intends to qualify for Purchase Orders using federal grant money, they shall work with the CUSTOMER/END USER to provide all required certifications and other documentation needed to show compliance.

**ARTICLE 23: TITLE VI REQUIREMENTS**

H-GAC in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 U.S.C. §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that it will affirmatively ensure that any disadvantaged business enterprises will be afforded full and fair opportunity to submit in response to this Master Agreement and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award.

**ARTICLE 24: EQUAL EMPLOYMENT OPPORTUNITY**

Except as otherwise provided under 41 CFR Part 60, all Contracts and CUSTOMER/END USER Purchase Orders that meet the definition of “federally assisted construction contract” in 41 CFR Part 60-1.3 shall be deemed to include the equal opportunity clause provided under 41 CFR 60-1.4(b), in accordance with Executive Order 11246, “Equal Employment Opportunity” (30 FR 12319, 12935, 3 CFR Part, 1964-1965 Comp., pg.339), as amended by Executive Order 11375, “Amending Executive Order 11246 Relating to Equal Employment Opportunity,” and implementing regulations at 41CFR Part 60, “Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor.”

The equal opportunity clause provided under 41 CFR 60-1.4(b) is hereby incorporated by reference. Contractor agrees that such provision applies to any contract that meets the definition of “federally assisted construction contract” in 41 CFR Part 60-1.3 and agrees that it will comply with such provision.

**ARTICLE 25: CLEAN AIR AND WATER POLLUTION CONTROL ACT**

CUSTOMER/END USER Purchase Orders using federal funds must contain a provision that requires the Contractor to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean

Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

Pursuant to the Federal Rule above, Contractor certifies that it is in compliance with all applicable provisions of the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387) and will remain in compliance during the term of the Contract.

**ARTICLE 26: PREVAILING WAGE**

Contractor and any potential subcontractors have a duty to and shall pay the prevailing wage rate under the Davis-Bacon Act, 40 U.S.C. 276a – 276a-5, as amended, and the regulations adopted thereunder contained in 29 C.F.R. pt. 1 and 5.

**ARTICLE 27: CONTRACT WORK HOURS AND SAFETY STANDARDS**

As per the Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708), where applicable, all CUSTOMER/END USER Purchase Orders in excess of \$100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer, on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

**ARTICLE 28: PROFIT AS A SEPARATE ELEMENT OF PRICE**

For purchases using federal funds more than the current Simplified Acquisition Threshold of \$250,000, requires negotiation of profit as a separate element of the price. See, 2 CFR 200.324(b). Contractor agrees to provide information and negotiate regarding profit as a separate element of the price for the purchase. Contractor also agrees that the total price, including profit, charged by Contractor will not exceed the awarded pricing, including any applicable discount, under any awarded contract.

**ARTICLE 29: BYRD ANTI-LOBBYING AMENDMENT**

Byrd Anti-Lobbying Amendment (31U.S.C. 1352) – Contractors that apply or bid for an award exceeding \$100,000 must file the required anti-lobbying certification. Each tier must certify to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier, up to the CUSTOMER/END USER. As applicable, Contractor agrees to file all certifications and disclosures required by, and otherwise comply with, the Byrd Anti-Lobbying Amendment (31 USC 1352). Contractor certifies that it is currently in compliance with all applicable provisions of the Byrd Anti-Lobbying Amendment (31 U.S.C. 1352) and will continue to be in compliance throughout the term of the Contract and further certifies that:

1. No Federal appropriated funds have been paid or will be paid by or on behalf of the Contractor, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection

with the awarding of a Federal contract, the making of a Federal Grant, the making of a Federal Loan, the entering into a cooperative Master Agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative Master Agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing, or attempting to influence, an officer or employee of a Member of Congress in connection with a Federal contract, grant, loan, or cooperative Master Agreement, Contractor shall complete and submit Standard Form – LLL, “Disclosure Form to Report Lobbying”, in accordance with its instructions.
3. Contractor shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative Master Agreements) and that all subcontractors shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certificate is a prerequisite for making or entering into this transaction imposed by Section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

**ARTICLE 30: COMPLIANCE WITH EPA REGULATIONS APPLICABLE TO GRANTS, SUBGRANTS, COOPERATIVE MASTER AGREEMENTS, AND CONTRACTS**

Contractor certifies compliance with all applicable standards, orders, regulations, and/or requirements issued pursuant to the Clean Air Act of 1970, as amended (42 U.S.C. 1857(h)), Section 508 of the Clean Water Act, as amended (13 U.S.C. 1368), Executive Order 117389 and Environmental Protection Agency Regulation, 40 CFR Part 15.

**ARTICLE 31: COMPLIANCE WITH ENERGY POLICY AND CONSERVATION ACT**

Contractor certifies that Contractor will be in compliance with mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-163, 89 Stat. 871).

· **Due Date:** Thursday, September 14, 2023 12:00pm

Posted Wednesday, July 26, 2023 7:00am

Bid Unsealed Thursday, September 14, 2023 12:05pm

Pricing Unsealed Thursday, September 14, 2023 12:05pm

## 4. Specifications/Categories/Scope of Work

*This is an indefinite quantity/indefinite delivery offerings contract. The HGACBuy Customer is responsible to ensure adequate competition is performed between the various contractors or contractors outside of HGACBuy to determine price reasonableness that might be required per any funding agency. Customer will need to ensure compliance with any funding agency requirements before proceeding with a purchase order under this contract. Please consult legal counsel regarding questions concerning compliance as a contractor under this solicitation.*

### 4.1. Overview

H-GAC is soliciting responses for selecting qualified manufacturers, dealers, distributors, and service providers of Fire Apparatus and Other Special Service Vehicles and related services to make these types of products and services available to Customers of the HGACBuy Cooperative Purchasing Program under blanket type contracts. Customers (end users) may require selective acquisitions of equipment and/or services OR full turnkey projects necessitating additional services, training, and maintenance agreements. H-GAC is seeking the broadest possible selection of available fire apparatus and special service vehicles to best serve our customers by providing the largest selection of products/services available to meet their needs. This solicitation may include a request for a discount percent off price catalog, category, or manufacturer, or price list for supplies, materials, or not to exceed hourly rates for installation or repair. Respondents are not required to provide offerings on all categories. Please note: awarded contracts for FS12-23 allow contractors to update their manufacturer pricing and product offerings at any time during the course of the four-year contract term.

### 4.2. Categories

This Solicitation is divided into twelve (12) separate but related product categories (A-L). When submitting a response, Respondent may choose to submit a response to any of the categories or all of them. No additional weighted value will be assigned to a response that addresses more than one or all categories listed. All equipment must be the manufacturer's new and current model and must be fully operational upon delivery to the Customer.

This solicitation does not include ambulances - please see HGACBuy Contract AM10-20 and AM10-23.

Alternative Fuel Vehicles: All responses that include electric, hybrid, or other alternative fuel vehicles must include these vehicles in Category I. If that specific vehicle is also available with an internal combustion engine (ICE),

please list the ICE vehicle separately in the appropriate vehicle category. Category I will only include the alternative fuel vehicles, regardless of vehicle function or type.

Product categories are as follows:

A. **Wildland Fire Apparatus - Brush Fire, Off-Road Tenders/Tankers, Crew Carriers, Slip-in Units, etc.**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, type/function, model, chassis (make and model), cab configuration, 2WD/4WD, and fuel type, and tank and pump.

B. **Aerial Fire Apparatus - Boom/Platform, Ladder, Ladder/Platform, etc.**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, aerial category/construction, aerial functions, cab types, and axle configurations.

C. **Pumper Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, cab types, axle configurations, tank capacities/construction, and pump capacity/position.

D. **Pumper-Tanker/Tanker/Tender Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories, which include Manufacturer, model, chassis, cab types, axle configurations, tank capacities/construction, and pump capacity/position.

E. **Aircraft Rescue & Fire-Fighting Vehicles (ARFF)**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, cab types, axle configurations, and by Class Types 1-5.

F. **Special Service Apparatus – Rescue/Fast Response, Re-Hab, Hazmat, Mobile Emergency Command/Communication Centers/Trailers, Light/Air Vehicle, Dive Response Vehicle, ATV/UTV Response Vehicles, Mobile Fire Pump Testers, etc.**

Response listings/descriptions must be organized by Manufacturer, function, type, or purpose of the apparatus/vehicle, and include brief and concise details about the vehicle.

G. **Fire Boats, Rescue Boats, Emergency Response Boats**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, type, function, size, and propulsion.

H. **Fire Command Vehicles - Light, medium, and heavy-duty pickups and SUVs**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, and 2WD/4WD, fuel type.

### **I. Electric/Alternative Fuel Fire Apparatus**

Response listings/descriptions must be organized by major sub-categories including Manufacturer, model, chassis, vehicle type, fuel/propulsion type, and function.

### **J. Fire Apparatus/Vehicle Service/Maintenance Plans**

Response listings/descriptions must include plan details, including details about which fees are included in costs, and items such as labor rates, and fee structures.

### **K. Fire Apparatus/Vehicle Parts and Supplies**

Response listing need only to include percentage discount.

### **L. Fire Apparatus/Vehicle Options**

Please provide a complete listing or catalog of options, accessories, and loose equipment offered. Please clearly indicate if the options are model or vehicle specific, or only available for specific models or vehicles. Options must be clearly identified as upgrades or downgrades and clearly show the net effect to the price of the base model.

(Please upload in Section 9.1.4 Required Documents.)

## **4.3. General Requirements**

All products priced and sold pursuant to this Solicitation must, as applicable:

1. Meet all applicable requirements of federal, state and local laws and regulations.
2. Be manufacturer's normal offering with all standard features and functions and performance levels.
3. Be ready for turn-key operation upon delivery.
4. Respondent must include specifications, brochures, warranty information, and any other relevant product information with solicitation Response.

Note: "Unpriced/unpublished" options cannot be quoted on the Base Pricing List and may not be sold through this contract.

## **4.4. Additional Requirements**

### **Licenses**

1. Contractor must have and maintain the appropriate license(s) as required by the State of Texas, Department of Transportation, Department of Motor Vehicles, Motor Vehicle Commission Code [latest edition], or any other local, state and federal licenses required and which are applicable to the respondent's operations.
2. The prescribed licenses must include the manufacturer/respondent, and any and all dealers and their representatives as may be required by the Motor Vehicle Department. Contractor must ensure all

emergency and specialty vehicles sold are in accordance with the laws of the state where the sale and acquisition are made.

3. Contractor must maintain all licensing required by the State of Texas as applicable to their business operations during the entire contract term. If during the contract period such licensing lapses, Contractor will be in default and become subject to contract termination unless issued a stay or waiver.

### **Manuals**

1. Contractor must supply at the time of delivery, at least two (2) sets of complete operations and service documentation covering the completed emergency vehicles as delivered and accepted.
2. Respondent must supply the following information with their response: Technical Specifications, Product Brochures, Tear Sheets, Cut Sheets, Strippers, etc. which clearly show all the standard features and capabilities of each response listing.

### **Warranty**

Contractors must comply with the minimum warranty and maintenance requirements described below for any products or services provided under this Solicitation.

1. Contractor must furnish with response, and for all equipment sold through this H-GAC contract, the manufacturer's general warranty, which must be honored by all the manufacturer's authorized service locations.
2. All service/maintenance plan listings must clearly indicate the cost structure for such plans, clearly indicating which costs and fees are included (such as: hourly labor rates, shop fees, supply fees, environmental fees).
3. The Contractor will handle all warranty claims and all work must be completed within ten (10) calendar days after receipt of equipment/vehicle by the Contractor without cost to H-GAC or the Customer. Delayed warranties must be available for all vehicles and equipment. Warranty start date will be effective the date that the completed unit is placed into service by the Customer. The Contractor must furnish a delayed warranty card/document for each unit delivered and/or advise the Customer of the procedures to be followed for obtaining the delayed start of warranty coverage. Requests for delayed warranties will not exceed six months after delivery.
4. Any and all documents necessary to effect manufacturer's warranty must be properly applied for and submitted by the Contractor. The Contractor will provide to H-GAC and the Customer a manufacturer's warranty which will be honored by any of the manufacturer's authorized dealers and a complete copy must be provided at the time of delivery. When additional warranties are available as standard, they must be included as a part of the response for the benefit of H-GAC and Customer.
5. The patient compartment, all modifications to the OEM chassis by Contractor on the accepted unit, and equipment and parts will be guaranteed for a minimum period of one (1) year against defects in design,

materials, and workmanship. The warranty period will begin upon final acceptance of the equipment. This warranty will cover parts and labor expenses.

6. In the event any component part of equipment or materials furnished under these specifications, or its subsequent contract(s), becomes defective by reason of material or workmanship during said period, and the end user agency immediately notifies Contractor of such defect, Contractor will, at no expense to the End User agency or H-GAC, repair or replace equipment or component with new equipment or component.
7. Warranty of all system equipment is the sole responsibility of the Contractor under contract, but may be performed by their certified, designated agent.

#### 4.5. Vehicle Requirements

All equipment and vehicles must be new and be the manufacturer's latest and current model. Each vehicle must be fully assembled, adjusted, serviced and ready for immediate and continuous operation upon delivery. If the equipment or vehicle does not meet the specification requirements upon delivery, Contractor will be responsible for correcting all deficiencies and making any corrections or adjustments needed to attain specification requirements.

All equipment and vehicles must conform to applicable local, state, federal requirements and must comply to all applicable industry standards including National Fire Protection Association (NFPA), Department of Transportation, United States Coast Guard (USCG), and Occupational Safety and Health Administration (OSHA).

#### 4.6. Service / Maintenance Plans and Parts

All service/maintenance plan listings must clearly indicate the cost structure for such plans, including which costs and fees are included (ex: hourly labor rates, shop fees, supply fees, environmental fees).

#### 4.7. Labor Hours Definitions

If the awarded contract contains hours for labor related services, the following definitions will apply:

1. "Business Day" Monday through Friday
2. "Business Hours" Standard Business Hours 8 a.m. to 5 p.m.
3. "Regular Time" Work that occurs during standard business hours
4. "Emergency Time" Work that occurs outside standard business hours

#### 4.8. Administrative Fee

For each purchase order processed under an awarded contract, H-GAC will directly invoice the contractor an administrative fee (Order Processing Charge) applicable to the sale of all equipment and services submitted in contractor's response. It is the contractor's responsibility to remit the administrative fee within thirty (30) days of processing any customer's purchase order, even if an invoice is not received from H-GAC. Contractor agrees that H-GAC will have the right, with reasonable notice, to inspect its records pertaining to purchase orders processed and the accuracy of the fees payable to H-GAC. For this solicitation the administrative fee is as follows:

Administrative Fee (per Purchase Order)

<b>Category A</b> – Brush Trucks/Light Rescue	\$1,000 per purchase order
<b>Category B</b> – Aerial Fire Apparatus	\$2,000 per purchase order
<b>Category C</b> – Pumper Fire Apparatus	\$2,000 per purchase order
<b>Category D</b> – Pumper/Tanker and Tanker Apparatus	\$2,000 per purchase order
<b>Category E</b> – ARFF Apparatus	\$2,000 per purchase order
<b>Category F</b> – Special Service Vehicles	
Heavy Rescue*/Special Service	\$2,000 per purchase order
Light Rescue/Quick Response	\$1,000 per purchase order
All Trailers	2% of purchase order
*Heavy Rescue is vehicle with GVWR of 26,000 and above.	
<b>Category G</b> –Fire/Rescue/Emer. Response Boats	2% of purchase order
<b>Category H</b> - Fire Command Vehicles	\$1,000 per purchase order
<b>Category I</b> - Alternative Fuel Vehicles	Fee determined by category of vehicle
<b>Category J</b> –Service/Maintenance Plans	2% per purchase order
<b>Category K</b> - Fire Apparatus/Vehicle Parts and Supplies	2% per purchase order
<b>Category L</b> - Fire Apparatus/Vehicle Options	No separate fee - part of vehicle

#### 4.9. Final Contract Deliverables

Contractor agrees to submit written quarterly reports to H-GAC detailing all transactions during the previous three (3) month period. Reports must include, but are not limited, to the following information:

- Customer Name and address
- HGACBuy confirmation number
- Product/Service purchased
- Customer Purchase Order Number
- Purchase Order Date
- Product/Service dollar amount
- HGACBuy Order Processing Charge amount

Reports must be provided to H-GAC in Excel or other acceptable electronic format by the 30th day of the month following the quarter being reported. If Contractor defaults in providing Products or Services reporting as required by the contract, recourse may be exercised through cancellation of the contract and other legal remedies as appropriate.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Brandi Suda, Finance Director  
**Co-Submitter:** Heidi Derryberry  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Adoption of Ordinance No. 2024-17:** An ordinance levying upon the assessed valuation of the property within the City of Flagstaff, Arizona, subject to taxation a certain sum upon each one hundred dollars (\$100.00) of valuation sufficient to raise the amount estimated to be required in the annual budget, less the amount estimated to be received from other sources of revenue; providing funds for various bond redemptions, for the purpose of paying interest upon bonded indebtedness and providing funds for general municipal expenses, all for the Fiscal Year ending the 30th day of June 2025. **(Primary and secondary property tax levies for FY 2024-2025)**

**STAFF RECOMMENDED ACTION:**

1. Read Ordinance No. 2024-17 by title only for the final time
2. City Clerk reads Ordinance No. 2024-17 by title only (if approved above)
3. Adopt Ordinance No. 2024-17

**Executive Summary:**

The City Council is required to fix and levy the amount to be raised from property taxation after the adoption of the final budget, per A.R.S. Section 42-17151. The final budget is anticipated to be adopted on June 18, 2024.

**Financial Impact:**

The City is proposing a flat primary property tax levy of \$7,159,207 on existing properties, plus a levy of \$71,670 on new construction, for a total primary property tax levy in Fiscal Year (FY) 2024-2025 of \$7,230,877. The primary property tax rate to support this levy is 0.6363 per \$100 of assessed valuation (lower than the prior fiscal year). The proposed levy is less than the maximum allowable primary property tax levy allowed for FY 2024-2025, which is \$7,983,170.

The City is proposing a secondary property tax levy of \$9,001,046 on existing properties, plus a levy of \$90,108 on new construction, for a total secondary property tax levy in FY 2023-2024 of \$9,091,154. The proposed secondary property tax rate is 0.8000 per \$100 of net assessed valuation (same as the prior fiscal year).

**Policy Impact:**

Adoption of the proposed property tax levies will generate revenues to help fund the community needs as identified in the FY 2024-2025 Final Budget and policies reflected therein.

**Previous Council Decision or Community Discussion:**

- December Council Retreat on December 14, 2023
- February Budget Retreat on February 1, 2024 and February 2, 2024
- March Capital Improvement Budget Retreat on March 28, 2024

- Council Budget Retreat on April 25, 2024 and April 26, 2024
- Tentative Budget Adoption on June 4, 2024

**Options and Alternatives to Recommended Action:**

- 1) Adopt the primary and secondary property tax rates as proposed.
- 2) Adopt lower primary and secondary property tax rates than proposed.
- 3) Adopt higher tax rates than proposed, however, this action may be barred by Truth in Taxation Notice publication deadlines or other legal considerations.

**Background and History:**

Primary property tax revenues may be used for all purposes. Primary property tax levies are limited, per A.R.S. Section 42-17051. The City has the ability to increase the amount received from the primary property tax levy by a maximum of 2% each year excluding new construction. The maximum allowable increase for FY 2024-2025 is 10.0%. FY 2024-2025 proposed primary property tax levy is set at \$7,230,877, which is less than the maximum allowable levy of \$7,983,170.

Primary property tax levies are also subject to "Truth in Taxation" notice and hearing requirements, per A.R.S. Section 42-17107. On or before February 10 of each year, the county assessor must transmit to each city and town an estimate of the total net assessed valuation of the city, including new property added to the tax roll. If the proposed primary tax levy amount, excluding amounts attributable to new construction, is greater than the levy amount in the previous year, the city must follow the "Truth in Taxation" procedures. It is important to note that it is the levy amount and not the rate which triggers the "Truth in Taxation" procedures. The proposed FY2024-2025 primary tax levy amount did not trigger the "Truth in Taxation" procedures.

The City is budgeting primary property tax revenues of \$7,146,000 in its FY 2024-2025 Budget. This budgeted amount is less than the levy amount because the City is allowing for approximately 1.0% in bad debt (taxes not able to be collected). The City anticipates an overall 0.7% increase in primary property tax revenues in FY 2024-2025, due to the increase from new construction (properties added to tax roll). Primary property tax revenues may be used for any general purpose use of the City government.

Secondary property tax revenues may only be used by cities and towns to retire the principal and interest or redemption charges on general obligation bonds issued to pay for capital projects. Secondary property tax levies are not limited. The City has budgeted a total of \$9,091,154 in FY 2024-2025 secondary property tax, an approximate 5.3% increase over the FY 2023-2024 budget (\$8,633,802). The increase is directly related to the increased assessed valuation (increase in property values) and new construction. Secondary property tax revenues are used to pay general obligation debt issued for City capital projects. Five years of historical data is shown below:

Property Tax Rates	FY 2020-2021	FY 2021-2022	FY 2022-2023	FY 2023-2024	FY 2024-2025 Proposed
Primary	0.7510	0.7186	0.6954	0.6634	0.6363
Secondary	0.8000	0.8000	0.8000	0.8000	0.8000
Total	1.5510	1.5186	1.4954	1.4634	1.4363

Primary property taxes account for 7.9% of the General Fund revenues budgeted for FY 2024-2025. The adoption of the property tax levy is the final step in the entire budget approval process.

**Connection to PBB Priorities and Objectives:**

The adoption of the Annual Budget and Financial Plan provides direction and financial resources to support the Key Community Priorities and Objectives. The property tax adoption is part of the overall City budget adoption.

**Connection to Regional Plan:**

None

**Connection to Carbon Neutrality Plan:**

None

**Connection to 10-Year Housing Plan:**

None.

---

**Attachments:**    [Ord. 2024-17](#)

**ORDINANCE NO. 2024-17**

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF FLAGSTAFF, LEVYING UPON THE ASSESSED VALUATION OF THE PROPERTY WITHIN THE CITY OF FLAGSTAFF, ARIZONA, SUBJECT TO TAXATION A CERTAIN SUM UPON EACH ONE HUNDRED DOLLARS (\$100.00) OF VALUATION SUFFICIENT TO RAISE THE AMOUNT ESTIMATED TO BE REQUIRED IN THE ANNUAL BUDGET, LESS THE AMOUNT ESTIMATED TO BE RECEIVED FROM OTHER SOURCES OF REVENUE; PROVIDING FUNDS FOR VARIOUS BOND REDEMPTIONS, FOR THE PURPOSE OF PAYING INTEREST UPON BONDED INDEBTEDNESS AND PROVIDING FUNDS FOR GENERAL MUNICIPAL EXPENSES, ALL FOR THE FISCAL YEAR ENDING THE 30TH DAY OF JUNE, 2025**

**RECITALS:**

WHEREAS, by the provisions of State law, the ordinance levying taxes for fiscal year 2024-2025 is required to be finally adopted not later than the third Monday in August; and

WHEREAS, the County of Coconino is the assessing and collecting authority for the City of Flagstaff.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. There is hereby levied on each one hundred dollars (\$100.00) of the assessed value of all property, both real and personal within the corporate limits of the City of Flagstaff, except such property as may be by law exempt from taxation, a primary property tax rate of 0.6363 for the fiscal year ending on the 30th day of June 2025. If this tax rate exceeds the maximum levy allowed by law, the Board of Supervisors of the County of Coconino is hereby authorized to reduce the levy to the maximum allowable by law after providing notice to the City.

SECTION 2. In addition to the rate set in Section 1 hereof, there is hereby levied on each one hundred dollars (\$100.00) of the assessed value of all property, both real and personal within the corporate limits of the City of Flagstaff, except such property as may be by law exempt from taxation, a secondary property tax rate of 0.8000 for the fiscal year ending June 30, 2025.

SECTION 3. Failure by the county officials of Coconino County, Arizona, to properly return the delinquent list, any irregularity in assessments or omissions in the same, or any irregularity in any proceedings shall not invalidate such proceedings or invalidate any title conveyed by any tax deed; failure or neglect of any officer or officers to timely perform any of the duties assigned to him or to them shall not invalidate any proceedings or any deed or sale pursuant thereto, the validity of the assessment or levy of taxes or of the judgment of sale by which the collection of the same may be enforced shall not affect the lien of the City of Flagstaff upon such property for the delinquent taxes unpaid thereon; overcharge as to part of the taxes or of costs shall not invalidate any proceedings for the collection of taxes or the foreclosure of the lien thereon or a sale of the

property under such foreclosure; and all acts of officers de facto shall be valid as if performed by officers de jure.

SECTION 4. All ordinances and parts of ordinances in conflict herewith are hereby repealed.

SECTION 5. That the Clerk is hereby directed to transmit a certified copy of this ordinance to the County Assessor and the Board of Supervisors of the County of Coconino, Arizona.

SECTION 6. Effective Date. The tax levies imposed by this Ordinance shall take effect August 2, 2024.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

MAYOR

ATTEST:

\_\_\_\_\_  
CITY CLERK

APPROVED AS TO FORM:

\_\_\_\_\_  
CITY ATTORNEY

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Erin Young, Water Resources Manager  
**Co-Submitter:** Shannon Jones, Water Services Director  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Adoption of Resolution No. 2024-30 and Ordinance No. 2024-19:** A Resolution of the Flagstaff City Council declaring as a public record that certain document filed with the City Clerk and entitled "*Water Services Rates Code Changes*" and An Ordinance of the City Council of the City of Flagstaff, amending the Flagstaff City Code Title 3, Business Regulations, Section 3-10-001-0008 License Fees and Title 7, Health and Sanitation, Chapter 7-02 Wastewater Regulations, and Chapter 7-03 Water Regulations, by adopting by reference that certain document entitled "*Water Services Rates Code Changes*"; providing for penalties, repeal of conflicting ordinances, severability, and establishing an effective date

**STAFF RECOMMENDED ACTION:**

1. Adopt Resolution No. 2024-30
2. Read Ordinance No. 2024-19 by title only for the final time
3. City Clerk reads Ordinance No. 2024-19 by title only (if approved above)
4. Adopt Ordinance No. 2024-19

**Executive Summary:**

This action adopts an ordinance increasing water, sewer, and reclaimed water user and service fees, and water and sewer capacity fees. The charges are increased over five years to adequately fund operations, maintenance, debt repayment, and replacement projects contained in the ten-year capital improvement program per Council direction.

**Financial Impact:**

Water, wastewater, and reclaimed water utility rates and fees and water and wastewater capacity charges will be phased in over a 5-year period. The new rates for Year 1 would take effect on September 1, 2024:

- Year 1: September 1, 2024 through December 31, 2025
- Year 2: January 1, 2026 through December 31, 2026
- Year 3: January 1, 2027 through December 31, 2027
- Year 4: January 1, 2028 through December 31, 2028
- Year 5: January 1, 2029 through December 31, 2029

**Policy Impact:**

The City is proposing modifications to the water, wastewater, and reclaimed water rates and rate structures, increasing water and sewer capacity fees, and increasing miscellaneous water charges, to meet cost recovery requirements for services provided to specific customers. The impact on the combined utility bill for water and wastewater service was carefully considered in determining the appropriate balance between the proposed rate changes and debt financing. Based on the ten-year financial plans, a synopsis of cost impacts is explained below:

**Water**

The water enterprise fund is impacted by multiple cost factors over the five-year planning period including:

- Operating cost increases for treatment chemicals due to scarcity and supply challenges.
- Operating cost increases for contractual services necessary for treating raw water.
- Increasing costs for replacing and repairing aging infrastructure.
- Surface water treatment plant upgrades to improve water source resiliency and maintain water quality.
- Increasing costs required for drought preparedness through watershed health.
- Additional operations and trades staff to support a growing community, and capital improvement program development.
- Operating cost increases for personnel services and benefits.
- Adjustments to water capacity fees and revenues to align fee per single family equivalent (3/4-inch meter equivalent) with current level of service requirements, growth-related shares of past infrastructure investments and planned capital improvements, and preparations for sustainable future water supplies.
- While Water Services proposed to decrease the base fee from 29% cost recovery to 25% cost recovery, the overall increases to base fees are proposed to better reflect the recovery of fixed operating costs.
- Increases to commodity rates are proposed to generate sufficient revenues to maintain the water fund as a self-sustaining enterprise, encourage efficient water use and urge conservation.
- Condensing the Institutional customer class to the Commercial customer class to remove single-user categories from the customer class list.
- Additionally, the ratios between water rate tiers are being adjusted to provide price incentives for efficiency indoors and re-setting the cost-of-service of providing water for outdoor water uses.

### **Wastewater**

The wastewater enterprise fund is impacted by multiple cost factors over the five-year planning period including:

- Operating cost increases for treatment chemicals due to scarcity and supply challenges.
- Increasing cost for replacing and repairing aging infrastructure.
- Maintenance cost increases of system infrastructure due to deferred maintenance due to a lack of funding and increased system demand.
- Operating cost increases for personnel services and benefits.
- The introduction of base fees are proposed to reflect the recovery of fixed operating costs and adjusted for the cost-of-service to each customer class.
- Adjustment to the wastewater capacity fees and revenues to align the fee per single family equivalent (3/4-inch meter equivalent) with current level of service requirements including solids treatment capacity, growth-related shares of past infrastructure investments and planned capital improvements, and preparations for future wastewater treatment expansions.
- Adjustments to volumetric rates are proposed to reflect the cost of wastewater loadings by customer class and generate sufficient revenues to maintain the wastewater fund as a self-sustaining enterprise.

Overall, from FY 2025 through FY 2029, the water, wastewater, and reclaimed water base fee and volumetric rate changes are forecasted to generate an increase in average annual revenue of up to \$1.7 million or 9.4% in the water fund, \$1.7 million or 12.5% in the wastewater fund, and \$102,000 or 8.1% in the reclaimed water fund and become effective September 1, 2024. Details of the increase are provided in a written report with data supporting the changes on file with the City Clerk and posted to Flagstaff's Rate Study webpage at [www.cleanwaterflagstaff.com](http://www.cleanwaterflagstaff.com).

### **Water and Wastewater Miscellaneous Charges**

To address cost recovery, to meet the City's financial policy that charges recover all direct and indirect costs of service, miscellaneous charges are assessed to specific users of the service so that general rate payers do not bear the burden.

### **Previous Council Decision or Community Discussion:**

On April 16, 2024 Council adopted a Notice of intention to increase water, sewer, and reclaimed water rates or rate components, fees, or service charges

Water Services has presented on various elements of the rate study to City Council beginning February 2023. The videos of these meetings are available on the City's Rate Study website [cleanwaterflagstaff.com](http://cleanwaterflagstaff.com) from the "View Past Meetings" tab. Here is a list of all meetings where staff presented to City Council on the Rate

## Study:

- February 21, 2023 Discussion regarding a rate and fee study for water, reclaimed water, and wastewater funds.
- March 7, 2023 Consideration of a Contract for Professional Services with Stantec Consulting Services, Inc
- September 5, 2023 Introduction of the Rate Study Team
- December 12, 2023 Water, Wastewater, and Reclaimed Water Rate Study Presentation 1 of 2 on Capacity Fees and Misc. Fees
- January 23, 2024 Water, Wastewater, and Reclaimed Water Rate Study Presentation 2 of 3 on Capacity Fees and Misc. Fees
- February 6, 2024 Water, Wastewater, and Reclaimed Water Rate Study Presentation 3 of 3 on Capacity Fees and Misc. Fees
- February 13, 2024 Introduction to Water, Wastewater, Reclaimed Water Rate Design
- April 2, 2024 Follow-up discussion from the March 25, 2024 City Council - Water Commission Joint Meeting
- April 16, 2024 Notice of intention to increase water, sewer, and reclaimed water rates or rate components, fees, or service charges
- May 16, 2024 Council special worksession; presentation from Water Services Director on the operational needs of the Division
- May 21, 2024 Presentation from Stantec on Financial Model Assumptions; Direction from Council on changes to assumptions
- June 4, 2024 Staff presentation on the results of Council's Direction; Council directed staff to proceed with changes for the June 18 Public Hearing

Joint meetings of the Flagstaff City Council and Water Commission were held on the following dates. The videos of these meetings are available on the City's Rate Study website [cleanwaterflagstaff.com](http://cleanwaterflagstaff.com) from the "View Past Meetings" tab.

- October 23, 2023 Discussion and Direction on the Rate Study Financial Plans
- March 4, 2024 Wastewater Rate Design Workshop & Direction on Rate Design
- March 25, 2024 Water & Reclaimed Water Rate Design Workshop & Direction on Rate Design

Presentations were provided to the Water Commission about the Rate Study on the following dates. The videos of these meetings are available on the City's Rate Study website [cleanwaterflagstaff.com](http://cleanwaterflagstaff.com) from the "View Past Meetings" tab.

- August 7, 2023 Introduction of Stantec Team
- September 21, 2023 Rate Study Update on Task 2
- October 19, 2023 Rate Study Financial Planning Scenarios Presentation and Discussion
- November 16, 2023 Rate Study Approach for Capacity Fee Calculations, Cost Allocations, Misc. Fees
- December 14, 2023 Update on Capacity Fee Calculations, Cost Allocations, Misc. Fees
- January 18, 2024 Water, Wastewater, and Reclaimed Water Rate Study Presentation on Capacity Fees and Misc. Fees
- February 15, 2024 Rate Design Discussions with Water Commission
- March 21, 2024 Brief update from staff with questions for commissioners
- April 18, 2024 Stantec provided the same presentation given to Council on April 16

## Community Meetings

- Water Services held a Water Rate Study Informational Meeting on December 7, 2023. This was a public information meeting available as a dial-in (spanish or english) or WebEx. Video is available on [cleanwaterflagstaff.gov](http://cleanwaterflagstaff.gov)
- Water Services held a drop-in meeting on Capacity Fees at its Administrative Offices on January 30 & 31
- Water Services tabled at the Downtown Community Library on April 1 from 5-7 pm; Jay Lively Ice Arena on April 3 from 5-7 pm
- Water Services tabled at Science Saturday at Willow Bend on April 6, Joe Montoya on April 10 from 10-noon
- Water Services held a drop-in event at the East Flagstaff Community Library on April 8, 2024 from 5:30 to 7:00 pm

- Water Services provided information on the rate study and held a tour at the Rio de Flag Water Reclamation Plant on April 13, 2024 at 10 am
- Water Services tabled at Earth Day on April 20th from 11 am to 2 pm
- Water Services were invited to introduce the rate study before a hike at Schultz Creek with Friends of the Rio de Flag on May 2 at 5 pm
- Water Services tabled for the rate study during the Arizona Department of Environmental Quality community event on wastewater systems at the East Flagstaff Library on May 8, 2024 from 5:30 to 7 pm
- Water Services held a drop-in event at the Aquaplex on May 18, 2024 from 11 am to 2 pm

Meetings to discuss various components of the Rate Study have been held with individual customers and community groups including the Greater Flagstaff Chamber of Commerce, Capstone Homes, Northern Arizona University, Snowbowl, a member of the Downtown Business Alliance, Historic Brewery, Joy Cone. Community "Roundtable" type discussions were held in September 2023. Staff also presented to the Economic Collaborative of Northern Arizona, Friends of Flagstaff's Future, and the City's Tourism Commission (April 25), Airport Commission (May 9), and Housing Commission (May 23). The community groups comprised representatives of the City of Flagstaff's commissions.

The City released a website for rate study information in October, 2023 at [cleanwaterflagstaff.com](http://cleanwaterflagstaff.com). Between October and April, the website had over 2,800 views. The site had 2,966 views in April, and 4,188 views in May. A Water Rate Calculator was added to the site on April 16 and video on how to use the calculator is available on the website, released on May 24. Customers can leave comments from the website.

Water Services has emailed out notices throughout the study to multiple lists of customers and organizations, sharing information about Council or Commission meetings, and community meetings, to customers monthly. The City's Public Information Office issued press releases related to the rate study, on October 16, 2023, December 12, 2023, February 29, 2024, and March 28, 2024. A notice of the June 18 and July 2 public hearing dates are scheduled for the Daily Sun.

#### **Options and Alternatives to Recommended Action:**

Council may elect to change elements of the rate study. Doing so would result in a time and dollar increase change order on the contract with Stantec and delay the public hearing process.

#### **Connection to PBB Priorities and Objectives:**

Serve the public by providing high-quality customer service  
 Deliver outstanding services to residents through a healthy, well-maintained infrastructure system  
 Support and strengthen a robust, diverse, and sustainable economy  
 Promote, protect, and enhance a healthy, sustainable environment and its natural resources

#### **Connection to Regional Plan:**

Goal WR.2. Manage a coordinated system of water, wastewater, and reclaimed water utility service facilities and resources at the City level and identify funding to pay for new resources.  
 Goal WR.4. Logically enhance and extend the City's public water, wastewater, and reclaimed water services including their treatment, distribution, and collection systems in both urbanized and newly developed areas of the City to provide efficient delivery of services.

#### **Connection to Carbon Neutrality Plan:**

CR-2 Strengthen existing community systems to create resilience to both short-term shocks and long-term change.  
 WS-1 Improve water infrastructure and expand water reuse.  
 HS-3 Adequately fund services for disaster preparedness.  
 HS-4 Improve the resilience of public infrastructure and City facilities.

#### **Connection to 10-Year Housing Plan:**

None

#### **Connection to Division Specific Plan:**

Council-adopted Water Policies (Utilities Integrated Master Plan 2014)

Section A Finance Policies:

Policy A1.1, A1.2

Policy A3.1, A3.2, A3.3

---

**Attachments:**    Res. 2024-30  
                          Water Services Rates Code Changes  
                          Ord. 2024-19

**RESOLUTION NO. 2024-30**

**A RESOLUTION OF THE FLAGSTAFF CITY COUNCIL DECLARING AS A PUBLIC RECORD THAT CERTAIN DOCUMENT FILED WITH THE CITY CLERK AND ENTITLED “*WATER SERVICES RATES CODE CHANGES*”**

**RECITALS:**

WHEREAS, pursuant to A.R.S. § 9-802 a municipality may enact or amend provisions of the City Code by reference to a public record, provided that the adopting ordinance is published in full; and

WHEREAS, ARS §§9-511, 9-511.01 et. seq. provides authority for municipalities to adjust water, wastewater, and reclaimed water utility rates and fees, and water and wastewater capacity charges, and

WHEREAS, amending water, wastewater, and reclaimed fees and rates and fees require adoption of City Code changes by Ordinance, and

WHEREAS, City Code changes required are being provided in a document known as “*Water Services Rates Code Changes*”.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. In General.

That certain document known as “*Water Services Rates Code Changes*” attached hereto as Exhibit A is hereby declared to be a public record, and one (1) paper copy and one (1) electronic copy maintained in compliance with A.R.S. § 44-7041 shall remain on file with the City Clerk and kept available for public use and inspection.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

Water Services Rates Code Changes

## WATER SERVICES RATES CODE CHANGES

### PART 1: LICENSE FEE SECTION

#### **3-10-001-0008 License Fees**

The user fees of the Management Services Division shall be as follows:

Fee Type	Fee per Each
Business license – annual	\$8
Business license – renewal	\$8
Business license – penalty failure to obtain/renew	50% of fee
Transient merchant approval	\$0
Transaction privilege and use tax license (see Section 3-05-003-0320)	
Commercial ground transportation – per taxi	\$38
Commercial ground transportation – per motor coach	\$38
Commercial ground transportation – annual renew	\$8
Adult oriented business (see Section 3-08-001-0006)	
Adult oriented business renew (see Section 3-08-001-0006)	
Scavenger waste permit	<del>\$45</del> \$24
Short-term rental license – annual (see Chapter 3-12)	\$175*

\* Short-term rental license fee will increase by five dollars (\$5.00) annually on November 1st, commencing in 2024.

PART 2: WASTEWATER REGULATIONS

**CHAPTER 7-02  
WASTEWATER REGULATIONS**

SECTIONS:

- 7-02-001-0001 PURPOSE
- 7-02-001-0002 DEFINITIONS
- 7-02-001-0003 INTERFERENCE WITH THE WATER SERVICES DIVISION; DIGGING UP STREETS WITHOUT A PERMIT; TAMPERING WITH EQUIPMENT PROHIBITED
- 7-02-001-0004 RESPONSIBILITY FOR CLEANING, REPAIR AND REPLACEMENT OF BUILDING SEWERS AND CONNECTIONS
- 7-02-001-0005 UNSANITARY DISPOSAL OF EXCREMENT PROHIBITED
- 7-02-001-0006 TREATMENT OF POLLUTED WASTES REQUIRED
- 7-02-001-0007 PROHIBITED SUBSTANCES
- 7-02-001-0008 STANDARDS FOR DISCHARGE
- 7-02-001-0009 INDUSTRIAL CLASSIFICATION
- 7-02-001-0010 INDUSTRIAL SELF-MONITORING
- 7-02-001-0011 REPORTING REQUIREMENTS
- 7-02-001-0012 SIGNATORY REQUIREMENTS
- 7-02-001-0013 CONFIDENTIALITY OF BUSINESS INFORMATION
- 7-02-001-0014 INTERCEPTORS; TYPE, CAPACITY, LOCATION, MAINTENANCE
- 7-02-001-0015 CONTROL MANHOLES
- 7-02-001-0016 INSPECTIONS AND MONITORING
- 7-02-001-0017 PROVISION OF FALSE INFORMATION
- 7-02-001-0018 PUBLIC NOTIFICATION, DEFINITION OF SIGNIFICANT VIOLATION
- 7-02-001-0019 ENFORCEMENT
- 7-02-001-0020 UPSET AN AFFIRMATIVE DEFENSE
- 7-02-001-0021 SUSPENSION OF WATER AND/OR SEWER SERVICE
- 7-02-001-0022 DISREGARD OF SAMPLES
- 7-02-001-0023 CREDIT FOR PRETREATMENT EXPENDITURES
- 7-02-001-0024 PUBLIC RECLAIMED WASTEWATER PIPELINE AND SEWER EXTENSIONS; APPROVAL BY CITY ENGINEER
- 7-02-001-0025 CONSTRUCTION AND OWNERSHIP OF PUBLIC RECLAIMED WASTEWATER PIPELINES, PUBLIC SEWER LINES AND OTHER EQUIPMENT MAINTAINED BY DIVISION
- 7-02-001-0026 PUBLIC RECLAIMED WATER PIPELINE EXTENSION AND CONVERSION POLICY FOR REUSERS
- 7-02-001-0027 MAIN SEWER EXTENSION POLICY FOR AREAS BEYOND PRESENT CITY TRUNK LINES
- 7-02-001-0028 PRIVATE SEWERAGE SYSTEMS; CONSTRUCTION AND MAINTENANCE WITHIN THE CITY PROHIBITED GENERALLY
- 7-02-001-0029 PRIVATE SEWERAGE SYSTEMS; WHEN PERMITTED, TO BE CONSTRUCTED AND MAINTAINED IN SANITARY MANNER
- 7-02-001-0030 PRIVATE SEWERAGE SYSTEMS; DISCONTINUANCE
- 7-02-001-0031 PRIVATE SEWERAGE SYSTEMS; AUTHORITY OF DIRECTOR OF HEALTH DEPARTMENT
- 7-02-001-0032 PERMIT REQUIRED

- 7-02-001-0033 APPLICATION FOR BUILDING CONNECTION
- 7-02-001-0034 DIRECTOR TO APPROVE DESIGN NUMBER, LOCATION, SIZE AND CONSTRUCTION OF BUILDING CONNECTIONS
- 7-02-001-0035 SPECIAL PROVISIONS FOR INSTALLING BUILDING CONNECTIONS IN NEW SUBDIVISIONS AND DEVELOPMENTS
- 7-02-001-0036 RECORDS TO BE KEPT BY COMMUNITY DEVELOPMENT
- 7-02-001-0037 SEWER TAP FEE
- 7-02-001-0038 SEWER USER CHARGES
- 7-02-001-0039 THE COLLECTION OF USERS CHARGES SHALL BE UNDER THE DIRECTION OF THE CITY'S ~~FINANCE~~ MANAGEMENT SERVICES DIRECTOR
- 7-02-001-0040 RATE ESTABLISHMENT AND REVIEW PROCEDURE
- 7-02-001-0041 SEWER USE CHARGES, CAPACITY CHARGES
- 7-02-001-0042 SCAVENGER WASTE AND GREASE HAULERS
- 7-02-001-0042.1 SCAVENGER WASTE DISCHARGE PERMITS
- 7-02-001-0043 SEWER RATES TO BE ADDED TO WATER BILLS
- 7-02-001-0044 WHEN BILLS PAYABLE; DISCONNECTION OF SERVICE FOR FAILURE TO PAY; RECONNECTION FEE
- 7-02-001-0045 DETERMINATION OF WASTEWATER QUANTITY AND BILLINGS: NONRESIDENTIAL
- 7-02-001-0046 PAYMENT OF BILLS AND CHARGES
- 7-02-001-0047 NOTICE PRIOR TO DISCONNECT
- 7-02-001-0048 SERVICE CONNECTIONS
- 7-02-001-0049 PERMITS REQUIRED FOR INDUSTRIAL USERS
- 7-02-001-0050 INDUSTRIAL USER PERMITS
- 7-02-001-0051 PERMITTEE REQUIREMENTS
- 7-02-001-0052 SEWER SERVICE OUTSIDE CITY LIMITS
- 7-02-001-0053 DISCONNECTION OF SERVICE

**7-02-001-0001 PURPOSE**

A. City Water Treatment Facilities. City water treatment facilities include the Lake Mary Water Treatment Plant, NORTH RESERVOIR TREATMENT PLANT, Rio de Flag Water Reclamation Plant (WRP), and the Wildcat HILL WRP. The Water Services Director has authority over all field operations of the City's water treatment and collection system, including flow test measurements, quality of waste, service connections, line construction plus the operation and maintenance of all water facilities.

B. The purpose of this chapter is to establish uniform requirements for users of the publicly owned treatment works (POTW) for the City of Flagstaff, Arizona ("City"), and enable the City to comply with all applicable State and Federal laws, A.R.S. Section 49-391, relating to local enforcement of water pretreatment requirements, the Clean Water Act ("CWA") (33 U.S.C. §§ 1251 et seq.) and the general pretreatment regulations (40 CFR Part 403). The objectives of these wastewater regulations are:

1. To prevent the introduction of pollutants into the POTW that will interfere with their operation;
2. To prevent the introduction of pollutants into the POTW that will pass through the POTW without adequate treatment, into receiving waters, or that will otherwise be incompatible with the POTW;

3. To protect the POTW personnel who may be affected by wastewater and sludge in the course of their employment and to protect the general public;
4. To promote reuse and recycling of effluent and sludge from the POTW;
5. To provide for fees for the equitable distribution of the cost of operation, maintenance, and improvement of the POTW;
6. To enable the City to comply with its Arizona pollutant discharge elimination system permit conditions, its sludge use and disposal requirements, and any other Federal or State laws to which the City's POTW is, or may become, subject. These wastewater regulations shall apply to all users of the City's POTW, and shall authorize the issuance of wastewater discharge permits; provide for effective monitoring, compliance, and enforcement procedures; establish administrative review procedures; establish user monitoring and reporting requirements; provide for the setting of fee rates and surcharges for the equitable distribution of costs resulting from the proper maintenance and operation of the City's POTW; and provide for the assessment of civil and criminal penalties for wastewater regulation violations.

C. The rules and regulations of this chapter are made for the benefit of the users of the City sewer system, for the protection of the sewer system, and to protect the quality of the effluent of the ~~sewage treatment~~ WATER RECLAMATION plants.

#### **7-02-001-0002 DEFINITIONS**

The general definitions found in Section 7-01 (Water Services) shall apply to this chapter. In addition, for the purposes of this chapter, the following words and terms shall have the following meanings, unless the context indicates otherwise:

**ALERT LIMIT:** The level at which, if exceeded by a significant industrial user, it is recommended that the POTW or City conduct an evaluation to determine if that discharge had or is having impact on the plant effluent quality, and if pass-through or interference was or is occurring leading to compliance concerns at the POTW, then voluntary correction or enforcement action is recommended.

**APPROVED LABORATORY PROCEDURES:** The measurements, tests and analysis of the characteristics of water and wastes in accordance with analytical procedures as established in 40 CFR Part 136 as revised.

**AVERAGE QUALITY:** The arithmetic average (weighted by flow value) of all the "daily determinations of concentration," as that term is defined herein, made during a calendar month.

**BEST MANAGEMENT PRACTICES or BMPs:** The schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in 40 CFR 403.5(a)(1) and (b). BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw materials storage.

**BOD (biochemical oxygen demand):** The quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory conditions for five (5) days at a temperature of twenty degrees (20°C) centigrade, expressed in milligrams per liter.

**BRANCH SEWER:** An arbitrary term for a sewer which receives sewage from lateral sewers from a relatively small area.

**BUILDING CONNECTION:** The connection to the public sewer and extension therefrom of the sewer to the property line in an alley or street, or to the easement line in an easement, whichever is applicable, depending on the location of the public sewer.

**BUILDING OFFICIAL:** The Chief Building Inspector, or authorized representative.

**BUILDING SEWER:** The service line from the building to the sewer main.

**BYPASS:** The intentional diversion of waste streams from any portion of an industrial user's facility.

**CATEGORICAL STANDARD:** Limits for pollutants that are set by the EPA for individual types of industry listed in 40 CFR 403.

**COD (chemical oxygen demand):** The quantity of oxygen consumed from a chemical oxidation of inorganic and organic matter present in the water or wastewater, expressed in milligrams per liter.

**COLLECTION SYSTEM:** Any and all lines, manholes, or other mechanical or physical appurtenances which may be involved with the conveyance of wastewater to or from the City water reclamation plant(s).

**COOLING WATER:** The clean wastewater discharged from any heat transfer system such as condensation, air conditioning, cooling, or refrigeration.

**DAILY COMPOSITE SAMPLE:** A sample of effluent, discharge or other source of pollutants continuously collected, manually or automatically, over a normal operating day. Samples shall be collected over a twenty-four (24) hour period or at least an eight (8) hour period during production, with one (1) sample being drawn at least once every two (2) hours. Composites should be flow proportional wherever feasible.

**DAILY DETERMINATION OF WASTEWATER QUALITY:** For composite samples, "daily determination of wastewater quality" shall be the concentration of any parameter tested in a daily composite sample. For grab samples, the "daily determination of wastewater quality" shall be the arithmetic average (weighted by flow value) of the concentrations of any parameter in each grab sample obtained in any calendar day.

**DEVELOPER:** Any person engaged in the organizing and financing of a sewage collecting system within an area contributing to a branch, main or a trunk sewer of the City sewer system. Such may be either a subdivider or a legally constituted improvement district.

**DISCHARGE:** The disposal of sewage, water or any liquid from any sewer user into the sewerage system.

**DOMESTIC WASTE:** A typical, residential-type waste which requires no pretreatment under the provisions of this chapter before discharging into the sanitary sewer system, excluding all commercial, manufacturing and industrial wastes.

**EFFLUENT:** Wastewater or other liquid - raw, partially or completely treated - flowing from a basin, treatment process, or treatment plant.

**FINAL:** The local limits established by ordinance and to remain in effect which are recommended to remain until the system is reevaluated as a whole, during the next local limits update.

**GRAB SAMPLE:** An individual sample of effluent, discharge or other source of pollutants collected in less than fifteen (15) minutes.

**HAZARDOUS DISCHARGE:** A discharge which is considered by the City to be an imminent hazard to health, the environment, or the POTW.

**INDIRECT DISCHARGE:** The introduction of pollutants into a POTW from any nondomestic source regulated under Section 307(b), (c) or (d) of the Clean Water Act as amended 33 U.S.C. § 1251, et seq.

**INDUSTRIAL PRETREATMENT DISCHARGE PERMIT:** The permit granted by the City to an industrial user granting the right to discharge to the sewer works subject to the terms and conditions set forth in the permit.

**INDUSTRIAL USER:** A source of indirect discharge.

**INDUSTRIAL WASTE:** Any liquid, free-flowing waste, including cooling water, resulting from any industrial or manufacturing process or from the development, recovery or processing of natural resources, with or without suspended solids excluding uncontaminated water.

**INFLOW:** Water other than wastewater that enters a sewer system (including sewer service connections) from sources such as roof leaders, cellar drains, foundation drains, drains from springs and swampy areas, manhole covers, cross connections between stormwater, surface runoff, street wash waters or drainage.

**INTERFERENCE:** Inhibition or disruption of the sewer system, treatment processes or operations which contribute to a violation of any requirement of a National Pollutant Discharge Elimination System permit. The term includes prevention of sewage sludge use or disposal by the cities in accordance with Section 405 of the Act, or any criterial guidelines or regulations developed pursuant to the Solid Waste Disposal Act (SWDA), the Clean Air Act, the Toxic Substances Control Act, or more stringent State criteria (including those contained in any State sludge management plan prepared pursuant to Title IV of SWDA) applicable to the method of disposal or use employed by the City.

**INTERIM:** Guiding limits while the POTW or City investigates other sources of pollutants and ways of controlling those sources.

**LATERAL SEWER:** A sewer which discharges into a branch or other sewer and has no other common tributary to it.

**MAIN SEWER:** A sewer which receives sewage from one (1) or more branch sewers as tributaries.

**MAINTENANCE:** Keeping the treatment works in a state of repair, including expenditures necessary to maintain the capacity (capability) for which said works were designed and constructed.

**NATURAL OUTLET:** Any outlet into a watercourse, ditch, or other body of surface or ground water.

**NPDES PERMIT:** The permit or permits issued to and held by the City under the National Pollutant Discharge Elimination System, pursuant to 33 U.S.C. § 1342 and 40 CFR Parts 122 through 125.

**PARAMETER:** See "TREATMENT PARAMETER."

**PASS-THROUGH:** An effluent flow which exits the POTW in quantities or concentrations which alone or in conjunction with a discharge or discharges from other sources is a cause of a violation of any requirement of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation).

**PERMITTEE, PERMIT HOLDER:** Any person, firm, association, corporation or trust which owns, operates, possesses or controls an establishment or plant being operated under a valid industrial pretreatment permit to discharge waste into the City sewer system.

**pH:** The logarithm of reciprocal of the weight of hydrogen ions in grams per liter of solution.

**POTW:** Publicly owned treatment works.

**PRETREATMENT:** The reduction of the amount of pollutants, the elimination of pollutants, or the alteration of pollutant properties in wastewater prior to or in lieu of discharging or otherwise introducing such pollutants into the POTW, as further defined and described in 40 CFR 403.3(q).

**PRETREATMENT STANDARDS or PRETREATMENT REQUIREMENTS:** Any substantive or procedural requirements relating to pretreatment, including the specific pollutant limits set forth in Section 7-02-001-0008.

**PUBLIC SEWER:** A lateral, branch, main or trunk sewer controlled and maintained by the City of Flagstaff.

**RECLAIMED WASTEWATER:** The treated effluent which is the product of the municipal wastewater system, although not suitable for human consumption, may be used for certain industrial or commercial purposes.

**REPLACEMENT:** Those expenditures made for obtaining and installing equipment, accessories and/or appurtenances during the useful life of the treatment works which are necessary to maintain the capacity and performance of the treatment works for which they were designed and constructed.

**REPRESENTATIVE SAMPLE:** A sample which takes a portion of the user's discharge which will be indicative of all the constituents of the discharge.

**SANITARY SEWER:** A sewer which carries sewage and to which storm, surface, and ground waters are not intentionally admitted.

**SEVERE PROPERTY DAMAGE:** Substantial physical damage to property, damage to the treatment facilities which caused them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. "Severe property damage" does not mean economic loss caused by delays in production.

**SEWAGE/SEWERAGE:** A combination of water-carried wastes from residences, business buildings, institutions, and industrial establishments, together with such ground, surface, and stormwater as may be present.

**SEWAGE TREATMENT PLANT:** Any arrangement of devices and structures used for treating sewage.

**SEWER:** A pipe or conduit for carrying sewage.

**SEWER TAP:** Includes hole cut into main line and saddle to which to connect.

**SLUG LOAD:** Any pollutant discharged in quantities large enough to cause interference, upset, or pass-through at the POTW.

**STANDARD INDUSTRIAL CLASSIFICATION (SIC):** A coded classification of industries based upon economic activity developed by the U.S. Department of Commerce as published in the Standard Industrial Classification Manual, 1987, Office of Management and Budget.

**STANDARD METHODS:** The procedure as described in the most current edition of Standard Methods for the Examination of Water and Wastewater published by the American Health Association, or the most current edition of Manual of Methods for Chemical Analysis of Water and Wastes published by the U.S. Environmental Protection Agency.

**STORM SEWER or STORM DRAIN:** A sewer or drainage which carries storm and surface waters, but excludes sewage and polluted industrial wastes.

**SURCHARGE:** An additional charge levied against industrial users for exceeding certain thresholds of BOD or TSS, as described in Section 7-02-001-0040(H) and set forth in Section 7-02-001-0041(A).

**SUSPENDED SOLIDS (SS):** Solids measured in milligrams per liter that either float on the surface of or are in suspension in water, wastewater or other liquids and which are largely removable by a laboratory filtration device, as defined in the "Standard Methods" as defined herein.

**SYSTEM DESIGN CAPACITY:** The design capacity for normal domestic wastewater as established by accepted engineering standards.

**TREATMENT PARAMETER:** A fundamental characteristic of sewage around which treatment is designed, such as, but not limited to, flow, BOD, and suspended solids.

**TSS:** Total suspended solids, expressed in milligrams per liter, in a user's discharge.

TRUNK SEWER: A sewer which receives sewage from many tributary main sewers and serves as an outlet for a large territory.

UPSET: An exceptional incident in which there is unintentional and temporary noncompliance with categorical pretreatment standards because of factors beyond the reasonable control of the industrial user. This does not include noncompliance due to operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

U.S.C.: The United States Code, as amended.

USER: Any person, lot, parcel of land, building, premises, municipal corporation or other political subdivision that discharges, causes or permits the discharge of wastewater into the sewage system.

VOC (volatile organic compounds): Those parameters included in EPA method 624/625.

WASTEWATER SYSTEM: All facilities for collection, pumping, treating, and disposing of sewage. As used in this chapter the terms "sewer system" or "wastewater system" shall have the same meaning and definition.

WATERCOURSE: A channel in which a flow of water occurs, either continuously or intermittently.

#### **7-02-001-0003 INTERFERENCE WITH THE WATER SERVICES DIVISION; DIGGING UP STREETS WITHOUT A PERMIT; TAMPERING WITH EQUIPMENT PROHIBITED**

Every person who shall in any way interfere with employees of the Water Services Division in any discharge of their duties, either in the tapping of any sewer pipe, main, or lateral belonging to the City, or the cleaning, laying, or connection of any such pipe or main or lateral, or who shall dig up or cause to be dug up, any street or alley in the City for the purpose of connecting with the sewer system of the City without first obtaining a permit from the City Engineer, or who, having a permit, shall dig up any portion of any street or alley of the City for the purpose of connecting with the sewer system of the City and shall fail or neglect to place the street or alley in its original condition, or who shall maliciously or willfully break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the municipal sewer system shall be guilty of a petty offense.

#### **7-02-001-0004 RESPONSIBILITY FOR CLEANING, REPAIR AND REPLACEMENT OF BUILDING SEWERS AND CONNECTIONS**

##### **A. Property Owner Responsibilities.**

1. The property owner shall be responsible for the cleaning, unstopping, maintenance and repair of the sewer connection piping serving the owner's property from the owner's home or building to the public sewer main.
2. Where the correction of a stoppage requires the repair or replacement of a damaged or broken section which is located off-property in a street or alley, the necessary repairs must be made by a licensed contractor, the scope of which licenses allows **THEM** ~~him~~ to work

within a public right-of-way subject to securing a right-of-way permit from the Engineering Section.

3. After repairs are made to a sewer connection in a concrete or asphalt street, the street shall be cut, filled, and compacted to grade, the top lift being one (1) foot of road base material approved by the City Engineering ~~Section~~ **DIVISION** Section. Upon completion, the street shall be opened to traffic and the City Public Works Division contacted to repair the street.

4. When the repairs to a sewer connection are required under a sidewalk, curb or gutter, the sidewalk, curb or gutter shall be square cut to avoid unnecessary damage. After completion, the excavation shall be backfilled and compacted to grade and the City Public Works Division contacted to repair the sidewalk, curb or gutter.

5. If in the opinion of the City Water Services Director an unnecessary amount of street, sidewalk, or curb and gutter is damaged in the process of making the repair, the contractor shall be charged for the repair of that amount.

**B. City Responsibilities.**

1. If the property owner perceives the location of a sewer service problem to be the City's main sewer line, the property owner should contact the City's Water Services Director.

2. The City will cooperate with the property owner to locate the cause of a sewer service problem, including the performance of appropriate tests or inspections on the City's main line. If the location of the sewer service problem is identified to be in the property owner's service line, responsibility for the repairs shall be pursuant to subsection (A) of this section. The City will cease any repair efforts if responsibility for the repairs falls on the property owner pursuant to subsection (A) of this section.

3. If the location is determined to be in the City's main line, the City will initiate the appropriate repair action.

4. If the location of the sewer problem cannot be identified, the City will proceed with the appropriate excavation to locate the cause of the problem. If the location of the problem is determined to be within the property owner's service line, responsibility for the repairs shall be pursuant to subsection (A) of this section. In addition, the property owner shall reimburse the City for costs incurred by the City in performing the necessary excavation if responsibility for the repair is on the property owner pursuant to subsection (A) of this section. If the location of the problem is within the City's main line, the City shall perform the appropriate repairs and the property owner shall bear no responsibility for the costs of excavation.

**7-02-001-0005 UNSANITARY DISPOSAL OF EXCREMENT PROHIBITED**

It shall be unlawful for any person to deposit, or permit to be deposited, in an unsanitary manner, upon public or private property within the City, or in any area under the jurisdiction of the City, any human or animal excrement or other objectionable waste.

**7-02-001-0006 TREATMENT OF POLLUTED WASTES REQUIRED**

It shall be unlawful to discharge to any natural outlet within the City or in any area under the jurisdiction of the City, any sewage, industrial wastes, or other polluted waters, except where suitable treatment has been provided, in accordance with provisions of this chapter.

## 7-02-001-0007 PROHIBITED SUBSTANCES

A. The Water Services Director shall have the authority to regulate the volume and flow rate of discharge to the sewage works and to establish permissible limits of concentration for various specific substances, materials, or wastes that can be accepted into the sewage works, and to specify those substances, materials, waters or wastes that are prohibited from entering the sewage works.

B. The following are prohibited from **ENTERING** the City wastewater collection system:

1. Any substance that interferes with the POTW or wastewater collection system.
2. Any liquids, solids, or gases which by reason of their nature or quantity could be sufficient, either alone or by interaction with other substances, to cause injury to the POTW from fire or explosion. At no time shall two (2) successive readings on an explosion hazard meter, at the point of discharge to the POTW, be more than five percent (5%), nor any single reading over ten percent (10%), of the lower explosive limit (LEL) of the meters. Prohibited materials include, but are not limited to: gasoline, kerosene, naphtha, trichloroethylene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, perchlorates, bromates, carbides, hydrides and sulfides, waste streams with a closed cup flash point of less than one hundred forty degrees (140° **F**) Fahrenheit or sixty degrees (60° **C**) centigrade using the test methods specified in 40 CFR 261.21.
3. Any water which contains a solid or viscous substance which could obstruct the flow in the collection system or interfere with the POTW.
4. Any particles greater than one-half (1/2) inch in any dimension, animal tissues, manure, ashes, cinders, sand, metal, glass, straw, paper, wood, plastics, gas, tar, asphalt and grinding wastes.
5. Any substance that can cause corrosive damage to the POTW or collection system and any substance with a pH of less than 6.0 standard units (s.u.) or greater than 11.0 (s.u.).
6. Any liquid or vapor which causes the temperature entering the POTW to exceed one hundred four degrees (104° **F**) Fahrenheit (40° C) or any liquid or vapor with a temperature greater than one hundred sixty degrees (160° **F**) Fahrenheit (71° C).
7. Any toxic or radioactive substance in sufficient quantity to interfere with the POTW or collection system or to create a health or environmental hazard.
8. Any substance requiring unusual attention or expense of the City unless specifically authorized. Compensatory payments be determined by the City to be paid by the user who contributes any such authorized substance.
9. Any noxious or malodorous liquid, gas or solid which creates a public nuisance, health or environmental hazard, or inhibits entry into any part of the wastewater system for maintenance or monitoring.

10. Any water with a volume greater than twenty (20) **GALLONS PER MINUTE (GPM)** containing dyes, inks or other color-causing substances that change the typical color in the wastewater collection system.
11. Any substance causing a hazard to health or to the environment.
12. Petroleum oil, nonbiodegradable cutting oil or products of mineral oil origin in amounts that cause interference or pass-through.
13. Any trucked or hauled pollutants, except at discharge points designated by the POTW.
14. Unless otherwise approved by the Water Services Director, any stormwater, surface water, groundwater, roof runoff, surface drainage, or unpolluted process waters that may constitute inflow as defined herein.
15. Any combination of substances contributed by one (1) or more users which results in any of the above situations.
16. The following pesticides are expressly prohibited from discharge into the City sewer system: 4,4'-DDD; 4,4'-DDE; 4,4'-DDT; aldrin; and heptachlor.

**7-02-001-0008 STANDARDS FOR DISCHARGE**

A. A technically based determination of local industrial user discharge limits for heavy metals, organics and other pollutants, for which there exists a specific discharge limit at the POTW, be made by the City Water Services Director and EPA. Such determination shall take into account removal percentages of the POTW, and dilution factors.

B. The following specific limits shall apply to all industrial user discharges and may be modified, with prior notice to the industrial user and an opportunity to respond, to comply with applicable State and/or Federal regulations.

<b>Parameter</b>	<b>Maximum</b>	<b>(mg/L)</b>
Inorganics		
Lead	0.08	
Copper	0.20	
Zinc	3.0	
Mercury	0.017	
Cyanide (total)	0.24	
Arsenic	0.18	
Selenium	0.015	
Sulfides	5.0	
HEM [a]	200	
Volatile Organic Compounds		

Parameter	Maximum (mg/L)
Toluene	0.14
Total Trihalomethanes	0.32
Bromide	0.5
Conventional Pollutants	
BOD	700 lb/day*
TSS	130 lb/day*
pH	6.0 < pH ≤ 11.0
Ammonia	173
Total Kjeldahl nitrogen (TKN)	173
Nitrate/nitrite	10

\* Lbs/day = Pollutant concentration in mg/L x 8.34 (pounds/gallon) x flow in million gallons per period.

C. The City may set limits based on mass measurements of pollutants for a particular substance or a particular user if it is necessary for adequate regulation. Discharge limits be set in order to meet any limits set for sludge disposal.

D. Industrial users meet the requirements of the U.S. Code of Federal Regulations, 40 CFR 403 and the amendments thereof. No discharge may exceed any Federal categorical standard or cause the POTW to exceed its AZPDES or APP Permit. The City may request approval to modify a Federal categorical standard, according to 40 CFR 403.

E. Dilution may not be used to meet a standard or limit unless it is expressly authorized by the categorical standard set by the EPA or by the City.

F. Bypass Prohibition.

1. Notice of Bypass to Occur.

a. If an industrial user knows in advance of the need for a bypass, it shall submit prior notice to the Water Services Director, if possible, at least ten (10) days before the date of the bypass.

b. An industrial user shall submit oral notice of an unanticipated bypass that exceeds applicable pretreatment standards to the Water Services Director within twenty-four (24) hours from the time the industrial user becomes aware of the bypass. A written submission shall also be provided within five (5) days of the time the industrial user becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

2. Prohibition of Bypass. Bypass is prohibited, and the Water Services Division may take enforcement action against an industrial user for a bypass unless:

- a. Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;
- b. There were no feasible alternatives to the bypass;
- c. The user submitted notices as required above.

G. O&M Requirements. Industrial users required to install suitable pretreatment facilities to treat waste streams which do not meet City discharge limits shall provide necessary maintenance on such equipment to ensure their continued and efficient operation.

An industrial violation of City discharge limits, which is due to operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventative maintenance, carelessness or improper operation will not be considered unintentional by the City of Flagstaff.

All industrial users shall maintain their general facilities in such a manner as to eliminate or minimize the possibility of discharge of substances by that industry, which are in violation of applicable pretreatment standards.

#### **7-02-001-0009 INDUSTRIAL CLASSIFICATION**

A. Each industrial user shall be classified into one (1) of the following categories as designated by the Code of Federal Regulations 40 CFR 403.3(t)(1) and (2).

1. Significant - defined as any industry that:
  - a. Is subject to categorical standards as defined by 40 CFR 403.6 and 40 CFR Chapter I, Subchapter N.
  - b. Discharges an average process wastestream of twenty-five thousand (25,000) gallons per day (0.025 **MILLION GALLONS PER DAY** mgd) or more to the POTW (excluding sanitary, noncontact cooling and boiler blowdown wastewater).
  - c. Contributes a process wastestream which makes up five percent (5%) or more of the average dry weather hydraulic or organic (BOD, TSS, etc.) capacity of the POTW.
  - d. Has a reasonable potential, in the opinion of the Director, to adversely affect the POTW's operation or for violating any pretreatment standard or requirement in accordance with 40 CFR 403.8(f)(6) or this chapter.
2. The Control Authority may determine that an industrial user subject to categorical pretreatment standards under Section 403.6 and 40 CFR Chapter I, Subchapter N is a nonsignificant categorical industrial user rather than a significant industrial user on a finding that the industrial user never discharges more than one hundred (100) gallons per day (gpd) of total categorical wastewater (excluding sanitary, noncontact cooling and boiler blowdown wastewater, unless specifically included in the pretreatment standard) and the following conditions are met:
  - a. The industrial user, prior to the Control Authority's finding, has consistently complied with all applicable categorical pretreatment standards and requirements;

b. The industrial user annually submits the certification statement required in CFR Section 403.12(q) together with any additional information necessary to support the certification statement; and

c. The industrial user never discharges any untreated concentrated wastewater.

B. The City will notify all users of Federal and local requirements which may be applicable to them. Upon request, significant industrial users shall receive a copy of:

1. This chapter;
2. Applicable parts of the U.S. Code of Federal Regulations;
3. An application for an industrial pretreatment discharge permit;
4. Applicable categorical standards;
5. Any other pertinent materials;
6. Any changes in Federal or local requirements as they occur.
7. City Enforcement Response Plan.

C. The industrial user may request certification of its industrial user classification from the EPA according to 40 CFR 403.6(a). The industrial user may request variation from Federal categorical standards according to 40 CFR 403.13 and the Clean Water Act.

#### **7-02-001-0010 INDUSTRIAL SELF-MONITORING**

A. Significant industrial users, at the user's expense, must provide safe and convenient access for sampling by the City. A City-approved manhole must be provided from which a sample that is representative of the total discharge can be taken. There must be unobstructed access to the open flow in the manhole so that a grab sample can be taken and so that sampling equipment can be set up in the manhole.

B. Sampling and analysis must be performed by significant industrial users, at their own expense, at least twice each year, in two (2) separate quarters, (January – March and July – September), and results of such sampling submitted to the City before the last day of each respective quarter or as directed by the City.

C. If a test result is not within the limits of this chapter or the categorical standards from any semiannual sampling, completed by the permitted industrial user, the industrial user shall immediately notify the City within twenty-four (24) hours of becoming aware of the violation (i.e., issuance of final lab report). The industrial user, or the City if they so choose, shall repeat the sampling and analysis and submit the results of the repeat analysis within thirty (30) days after becoming aware of the violation, or more often if it is determined to be necessary by the City.

D. Grab samples must be used when sampling for pH, cyanide, total phenols, oil and grease, sulfide, and volatile organics.

E. Twenty-four (24) hour composite samples must be obtained through flow-proportional composite sampling techniques, where feasible. The City may waive flow-proportional composite sampling for any industrial user that demonstrates that flow proportional sampling is infeasible. In such cases, samples may be obtained through time-proportional composite sampling techniques or through a minimum of four (4) grab samples where the user demonstrates that this will provide a representative sample of the effluent being discharged.

F. The flow must be measured by the industrial user at the time that the sample is taken, according to 40 CFR 403.12.

G. The methods of sampling must be performed in accordance with 40 CFR 136 and any other applicable Federal, State, or local requirements. The sampling location and type must be approved by the City. An authorized representative of the industry (see Section 7-02-001-0012) shall sign and submit with these sample results a statement verifying the validity of the methods and location.

H. All records of sampling, analysis and flows must be kept by the industrial user and the City for at least three (3) years. All records must be available to the City upon request. This period of retention shall be extended during the course of any unresolved litigations regarding the industrial user USER or POTW or when requested by the State Director or the EPA Regional Administrator.

#### **7-02-001-0011 REPORTING REQUIREMENTS**

A. Within one hundred eighty (180) days of the promulgation by the EPA of a categorical standard or within one hundred eighty (180) days of a final administrative decision, the industrial users that are subject to the standard must report the information provided for in 40 CFR 403.12(b). This information must also be supplied by existing sources of discharge as well as new sources that discharge after the standards have been promulgated.

B. All industrial users must immediately report to the Water Services Division any discharge, including accidental discharge, which contains a slug load, a prohibited substance, or any substance which might be harmful to the POTW, the collection system, the environment or to any person.

C. The industrial user must provide a written report (separate from the immediate report) within five (5) days of the detection of the upset. The report must include the nature and volume of the discharge, the period of noncompliance including exact dates and time or if not corrected the anticipated time the upset is expected to continue, the action being taken by the industrial user to correct the problem and preventive measures needed to avoid future spills.

D. The significant industrial user shall report to the City prior to any significant changes in production, including, but not limited to, production rate, product, raw materials utilized, rate of discharge, concentration of pollutants being discharged, etc.

E. If in the course of self-monitoring, a categorical or significant industrial user becomes aware of a violation of the limits set forth in their discharge permit, they shall notify the City within twenty-four (24) hours of becoming aware of such.

F. Repealed by Ord. 2021-10.

G. All industrial users shall notify the POTW, the EPA Regional Waste Management Division Director, and State hazardous waste authorities in writing and within one hundred eighty (180) days of any discharge into the POTW of a substance, which, if otherwise disposed of would be a hazardous waste under 40 CFR Part 261 as required in 40 CFR 403.12(p)(1) through (4).

## **7-02-001-0012 SIGNATORY REQUIREMENTS**

A. The reports required by this chapter must be signed as follows:

1. By a responsible corporate officer, if the industrial user submitting the reports is a corporation. For the purpose of this subsection, a responsible corporate officer means:
  - a. A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or
  - b. The manager of one (1) or more manufacturing, production, or operation facilities, provided, the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiate and direct other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; can ensure that the necessary systems are established or actions taken to gather complete and accurate information for control mechanism requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.
2. By a general partner or proprietor if the industrial user submitting the reports is a partnership or sole proprietorship respectively.
3. By a duly authorized representative of the individual designated in subsection (A)(1) of this section if:
  - a. The authorization is made in writing by the individual described in subsection (A)(1) of this section;
  - b. The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial discharge originates, such as the position of plant manager, operator of a well, or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and
  - c. The written authorization is submitted to the City of Flagstaff, Water Services Division.
4. If an authorization under subsection (A)(3) of this section is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for the environmental matters for the company, a new authorization satisfying the requirements of subsection (A)(3) of this section must be submitted to the Division prior to or together with any reports to be signed by an authorized representative.

## **7-02-001-0013 CONFIDENTIALITY OF BUSINESS INFORMATION**

A. Any information, except effluent data as defined by 40 CFR 2.302, submitted to the City of Flagstaff pursuant to this chapter, may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission by stamping the words "CONFIDENTIAL BUSINESS INFORMATION" on each page containing such information. If no claim is made at the time of submission, the City may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in 40 CFR Part 2 (Public Information).

B. For the purposes of this section "effluent data" shall be defined as:

1. Information necessary to determine the identity, amount, frequency, concentration, temperature, or other characteristics (to the extent related to water quality) of any pollutant which has been discharged by the source (or of any pollutant resulting from any discharge from the source), or any combination of the foregoing;
2. Information necessary to determine the identity, amount, frequency, concentration, temperature, or other characteristics (to the extent related to water quality) of the pollutants which, under an applicable standard or limitation, the source was authorized to discharge (including, to the extent necessary for such purpose, a description of the manner or rate of operation of the source); and
3. A general description of the location and/or nature of the source to the extent necessary to identify the source and to distinguish it from other sources (including, to the extent necessary for such purposes, a description of the device, installation, or operation constituting the source).

C. For the purposes of this section, the following shall be considered to be "effluent data" only to the extent necessary to allow the regulatory agency having jurisdiction to disclose publicly that a source is (or is not) in compliance with an applicable standard or limitation, or to allow such regulatory authority to demonstrate the feasibility, practicability, or attainability (or lack thereof) of an existing or proposed standard or limitation:

1. Information concerning research, or the results of research, on any product, method, device, or installation (or any component thereof) which was produced, developed, installed, and used only for research purposes; and
2. Information concerning any product, method, device, or installation (or any component thereof) designed and intended to be marketed or used commercially but not yet so marketed or used.

## **7-02-001-0014 INTERCEPTORS; TYPE, CAPACITY, LOCATION, MAINTENANCE**

A. The City of Flagstaff has adopted a Fats, Oils, and Grease (FOG) Discharge Manual for regulatory compliance. A copy of this plan will be posted on the Division website and is maintained by the City Clerk as a public record. The manual describes: (1) owner pretreatment requirements; (2) installation, operation, and maintenance standards; (3) participating pumper program; (4) plan review process; (5) waiver process.

B. A City-approved grease interceptor is required for a food service establishment (FSE). An FSE is defined as an operation that stores, prepares, serves, vends, or otherwise provides food for human consumption at the retail level. Grease interceptor sizing is to be in accordance with the City's FOG Discharge Manual.

C. A City-approved sand/oil interceptor is required for any business that performs automotive repairs or service facilities that wash vehicles, or business where oily and flammable liquid wastes are produced. A two (2) week notice is required for an inspection if contents will be taken to a City-owned facility.

D. A City-approved lint interceptor is required for any business with more than one (1) residential size washing machine or any amount of industrial size washing machines. An industrial size washing machine is one that has a tub three and one-half (3.5) cubic feet or larger and/or an American Household Appliance Manufacturers Association ("AHAMA") capacity of twenty-five (25) pounds or more. Residential machines will be any washing machine with less capacity than industrial machines.

E. If a blockage is found in the collection system and it can be determined by the City to be caused by a particular user's discharge, then the City can require the user to install a City-approved interceptor, at the user's expense, to catch the substance causing the blockage. If any interceptor is determined by the City to be inadequate in size or design, the City may require the user to install or upgrade such interceptor at the user's expense.

F. All interceptors shall be of a type and capacity approved by the Director and shall be located to be readily and easily accessible for cleaning and inspection.

G. Sand/oil interceptors shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight, and equipped with easily removable and accessible covers. When bolted covers are required, they shall be gastight and watertight.

H. All interceptors shall be maintained by the owner and/or user at his or her own expense. The interceptor must always be kept in continuously efficient operation and a record of maintenance performed on such interceptor shall be kept by the user on a form (or other means) provided by the City.

I. The City shall periodically inspect such interceptors and/or records to ensure they are being kept in efficient operation. A cleaning schedule will be set by the City.

## **7-02-001-0015 CONTROL MANHOLES**

When required by the Water Services Director, the owner of any property served by a building sewer carrying potentially harmful or industrial wastes shall install a suitable control manhole in the building sewer to facilitate observation, measurement and sampling of the wastes. Such manhole, when required, shall be accessible and safely located and shall be constructed in accordance with plans approved by the Director. The manhole shall be installed by the owner at **THEIR** his expense and shall be maintained by **THEM** him-so as to be safe and accessible at all times. Users whose effluent must be treated before it enters the wastewater collection system or whose effluent may potentially contain any prohibited substance may be required to install a control manhole for sampling purposes. The manhole must be located so that a representative

sample can be taken and there must be unobstructed access to the open flow in the manhole so that a grab sample can be taken and so that sampling equipment can be set up in the manhole.

#### **7-02-001-0016 INSPECTIONS AND MONITORING**

A. Any authorized employee of the Water Services Division shall, upon presentation of their credentials, have access to any commercial or industrial premises connected to or disposing of any type waste to the City wastewater system for the purpose of surveillance and/or an inspection of the premises to determine the nature and quantity of wastes discharged to the City wastewater system, or for examining or copying records, required by 40 CFR 403.12(m). The commercial/industrial user must make available to the City any and all records which would enable them to make an accurate determination of the constituents and flow of the user's waste stream.

B. Authorized employee of the Division, whose duty it may be to enter upon commercial or industrial premises to make inspections and collect samples or measure the quantity of wastes discharged to the City sewer, shall be provided with credentials to identify them as authorized representatives for the Division.

C. No person, except an authorized employee of the Division, shall have or exhibit any credentials of that Division. It shall be the responsibility of each employee or authorized representative of the Division, upon resignation or dismissal, to deliver and surrender at the office of the Water Services Director all credentials of the Division in his/her possession.

D. Questionnaires will be provided to all new businesses entering the City of Flagstaff to gather information pertaining to waste that may be generated by such. If any waste other than domestic is discharged from such an establishment, the City may perform an inspection of such premises at least annually or more often as necessary to determine its status of compliance with this chapter.

E. The City of Flagstaff or its designated representative shall have the authority to randomly sample industrial user waste streams and analyze for any pollutants that would be anticipated to be present for that particular user utilizing EPA approved methods. The City will review and analyze self-monitoring reports submitted by industrial users and make notification to such user of any compliance action to be taken as a result of such.

F. The information from the City's inspection and monitoring activity will be available to the administrative authority of the State and/or EPA. This information will also be made available to the general public upon request with the exception of that information protected by Section 7-02-001-0013. The City will maintain these records for a minimum of three (3) years.

G. Repealed by Ord. 2021-10.

#### **7-02-001-0017 PROVISION OF FALSE INFORMATION**

A. Reports, documents, questionnaires or any other information provided to the City as required by this chapter by a commercial or industrial user shall be subject to:

1. The provisions of 18 U.S.C. § 1001 relating to fraud and false statements.

2. The provisions of Sections 309(c)(4) of the Act, as amended, governing false statements, representation or certification.
3. The provisions of Section 309(c)(6) of the Act regarding responsible corporate officers.

B. Failure or refusal by the industrial user to provide information requested by the City as provided for in this chapter will result in enforcement action being taken against such user.

#### **7-02-001-0018 PUBLIC NOTIFICATION, DEFINITION OF SIGNIFICANT VIOLATION**

A. The City shall give notice of any decisions being made about the pretreatment program which may interest the public, special interest groups, or government agencies. Information about the operation or requirements of the program will be given to any party which requests it. The Water Commission may be used for public information and input if there is an interest expressed in this.

B. The City will publish in the largest local newspaper, at least once each year, a list of industrial users who have not been in compliance with any substantial portion of this chapter at any time during the previous year. For the purpose of this section, an industrial user is in significant noncompliance if its violation meets one or more of the following criteria:

1. Chronic violation of wastewater discharge limits, defined here as those in which sixty-six percent (66%) or more of all of the measurements taken during a six (6) month period exceed (by any magnitude) the daily maximum limit or the average limit for the same pollutant parameter;
2. Technical review criteria (TRC) violations, defined here as those in which thirty-three percent (33%) or more of all of the measurements for each pollutant parameter taken during a six (6) month period equal or exceed the product of the daily maximum limit or the average limit multiplied by the applicable TRC (TRC = 1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants except pH);
3. Any other violation of a pretreatment effluent limit (daily maximum or longer-term average) that the Control Authority determines has caused, alone or in combination with other discharges, interference or pass through (including endangering the health of POTW personnel or the general public);
4. Any discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority to halt or prevent such a discharge;
5. Failure to meet within ninety (90) days after the schedule date, a compliance schedule milestone contained in a local control mechanism or enforcement order for starting construction, completing construction, or attaining final compliance;
6. Failure to provide, within thirty (30) days after the due date, required reports such as baseline monitoring reports, ninety (90) day compliance reports, periodic self-monitoring reports, and reports on compliance with compliance schedules;
7. Failure to accurately report noncompliance;

8. Any other violation or group of violations which the Water Services Director determines will adversely affect the efficient operation of the City water reclamation plants or implementation of this chapter.

#### **7-02-001-0019 ENFORCEMENT**

This chapter will be enforced pursuant to the general enforcement provisions found in Chapter 7-01, and any additional specific enforcement procedures set forth herein.

#### **7-02-001-0020 UPSET AN AFFIRMATIVE DEFENSE**

An upset shall constitute an affirmative defense to an action brought for noncompliance with categorical pretreatment standards if the industrial user can demonstrate through properly signed contemporaneous operating logs, or other relevant evidence, that:

- A. An upset occurred and the industrial user can identify the specific cause(s) of the upset;
- B. The facility was at the time being operated in a prudent and ~~workman-like~~ QUALITY manner and in compliance with applicable operation and maintenance procedures;
- C. The industrial user has submitted the reports required in Section 7-02-001-0011 in a timely manner.

#### **7-02-001-0021 SUSPENSION OF WATER AND/OR SEWER SERVICE**

- A. For hazardous discharges: The violation of any section of this chapter shall be sufficient cause for the City to discontinue, after informal notice (phone call), water or sewer service to any premises that appears to present an imminent endangerment to the health and welfare of persons or the POTW.
- B. For instances of noncompliance other than hazardous discharges: The City will provide written notice to the industrial user, by certified, return receipt requested mail, at least twenty-four (24) hours in advance and provide the industry with an opportunity to respond before proceeding with discontinuance of water or sewer service.
- C. Such service shall not be restored until the violations have been discontinued or eliminated and the City may undertake any legal proceedings as may be necessary to halt, enjoin or punish the illegal discharge, and/or to recover any expenses the City may incur as a result of handling or eliminating any illegal discharge.

#### **7-02-001-0022 DISREGARD OF SAMPLES**

In any circumstance in which clear and convincing evidence demonstrates, to the satisfaction of the Director, that one (1) or more effluent samples or analyses thereof taken or performed by or for an industrial user, as required by Section 7-02-001-0010 and/or such user's wastewater discharge permit or compliance schedule, is not accurate or representative of such user's discharge, then the director or his designee may, but shall not be required to, disregard such sample(s) or analysi(e)s for purposes of determining any surcharge or penalty imposed by this chapter; provided, that such action by the Director (or designee) does not contravene any State or Federal law, rule or regulation. The foregoing authorization of the Director to disregard samples or analyses shall (A) create no independent right in any industrial user, and (B) be

exercised, if at all, in the sole discretion of the Director. Any determination made by the Director hereunder shall be final.

#### **7-02-001-0023 CREDIT FOR PRETREATMENT EXPENDITURES**

The Director as part of a consent order or similar negotiated settlement may, but shall not be required to, allow a credit against, or grant a rebate of, any surcharge or penalty imposed for violation of any pretreatment standards, for up to sixty percent (60%) of such substantiated expenditures made within one (1) year of such violation for improvement of the industrial user's pretreatment facilities as the Director, in his sole discretion, shall determine as appropriate and likely to correct or ameliorate the violation giving rise to such surcharge or penalty. The foregoing authorization of the Director to credit pretreatment expenditures or grant rebates therefor shall not apply to any surcharge or penalty resulting from a violation of pretreatment standards that causes:

- A. A pass-through or interference at the POTW;
- B. A violation of any requirement of the POTW's NPDES permit; or
- C. An endangerment of the health or safety of POTW personnel or the general public.

#### **7-02-001-0024 PUBLIC RECLAIMED WASTEWATER PIPELINE AND SEWER EXTENSIONS; APPROVAL BY CITY ENGINEER**

No public reclaimed wastewater pipeline or public sewer extension shall be made until the plans and specifications are approved by the City Engineer. Public reclaimed wastewater pipeline and public sewer extensions shall be constructed in accordance with standards and specifications as set forth in the City of Flagstaff General Construction Standards and Specifications. Such document is on file in the office of the City Engineer.

#### **7-02-001-0025 CONSTRUCTION AND OWNERSHIP OF PUBLIC RECLAIMED WASTEWATER PIPELINES, PUBLIC SEWER LINES AND OTHER EQUIPMENT MAINTAINED BY DIVISION**

- A. In new subdivisions and developments where public sewers are authorized by the City, such public sewers shall be constructed at the developer's expense. Detailed plans and specifications for public sewer extensions must be approved by the City Engineer prior to construction. The engineering cost for the preparation of plans and specifications, the staking of the location of the new public sewers, the cost of inspecting the construction, the preparation of as-built plans and the cost of easements shall be assumed by the developer. The City will perform the inspection during construction at the developer's expense.
- B. The ownership of all public sewer lines, pumping stations, treatment facilities, and equipment and other appurtenances to the sewer system maintained, or accepted for maintenance by the Division shall be vested in the City, and in no case shall the owner of any premises have the right to claim any part except where otherwise provided in this code.
- C. Where extensions of public reclaimed wastewater pipelines are authorized by the City, such pipelines shall be constructed at the reuser's expense. Detailed plans and specifications for public reclaimed wastewater pipeline extensions shall be approved by the City Engineer prior to construction. The engineering cost for the preparation of the plans and specifications, the

staking of the location of the new reclaimed wastewater pipeline, the cost of inspecting the construction, the preparation of as-built plans and the cost of easements shall be assumed by the reuser. The City will perform the inspection during construction at the reuser's expense.

D. The ownership of all public reclaimed wastewater pipelines, pumping stations, treatment facilities, equipment and other appurtenances to the reclaimed wastewater system maintained, or accepted for maintenance by the City shall be vested in the City, and in no case shall the owner of any premises have the right to claim any part except where otherwise provided in this code.

## **7-02-001-0026 PUBLIC RECLAIMED WATER PIPELINE EXTENSION AND CONVERSION POLICY FOR REUSERS**

A. Definitions. For the purpose of this section, the following words and phrases shall have the meanings respectively ascribed to them herein, unless the text clearly indicates otherwise:

**CONVERSION AGREEMENT FOR RECLAIMED WATER:** A written agreement between the City and the reclaimed water reuser for reimbursement of the City's costs incurred in converting the reuser's potable water system to a reclaimed water system, by the extension of, and connection to, a public reclaimed water pipeline, approved by the City Council and executed in the name of the City by the Mayor.

**POINT OF DELIVERY:** A location designated by the City for acceptance and measuring of the reclaimed water by the reuser. The point of delivery shall include a vault, pit, meter, valves, and other appurtenances necessary to meter reclaimed water to the reuser.

**RECLAIMED WATER AGREEMENT:** A written agreement between the reclaimed water reuser and the Division for connection to an existing public reclaimed water pipeline, approved and executed in the name of the Water Services Director.

**REIMBURSEMENT AGREEMENT FOR RECLAIMED WATER:** A written agreement between the reclaimed water reuser and the City for reimbursement of the reuser's costs incurred in providing for the extension of, and connection to, a public reclaimed water pipeline, approved by the City Council and executed in the name of the City by the Mayor.

**REUSER:** Any person or persons requesting or required to connect to the reclaimed water system of the City for any residential or nonresidential use, use where potable water quality is not required by City, State, or Federal regulations.

B. Plans and Specifications for Public Reclaimed Water Pipeline Extensions. A reuser who wishes to extend or install reclaimed water facilities must employ an engineer, registered in Arizona, to perform the field engineering and prepare detailed plans and specifications for the extension in accordance with good engineering practice, and adopted general construction standards and specifications of the City and regulations of the Arizona Department of Environmental Quality for the reuse of water. The final detailed plans and specifications for the reclaimed water pipeline extension shall be approved by the City Engineer before construction begins.

C. Costs of Extensions and Conversions. The reuser causing an extension of a public reclaimed water pipeline, conversion of an existing irrigation system to reclaimed water, and the construction of the point of delivery shall pay in full for the rights-of-way and easements, the

purchase, construction and installation of the reclaimed water pipeline, and all other costs of the extension and/or conversion. However, the City reserves the right to increase the diameter of the extension through cash or a reimbursement agreement.

D. Recovery of Costs of Extensions and Conversions. Subject to City approval, reusers may recover costs incurred from converting an existing irrigation system to use reclaimed wastewater or from extending public reclaimed water pipelines in accordance with subsection (C) of this section. Recovery of costs shall be in the form of a rebate amounting to ten percent (10%) per year of said costs for a period of ten (10) years. Rebates shall be paid to the reuser at the end of each full calendar year of reclaimed water usage. The total amount of the allowable costs to be recovered shall be agreed to prior to the reuser obtaining reclaimed water and shall be in the form of a written agreement between the City and the reuser. No interest shall be paid to the reuser on the costs being recovered.

E. Replacement and/or Repair. All persons or other entities who create, cause to be built, or build any such extensions of services as contemplated herein or convert existing irrigation systems to use reclaimed water, shall also pay for any and all such replacements as becomes necessary as a direct or indirect result of the creation, building or construction of such extensions and/or conversions. For example, repairs or replacements of sidewalks, paving or other utilities damaged or disturbed during the building of reclaimed water pipeline extensions and/or conversions. Costs of said replacements and/or repairs may be included in the costs incurred from subsection (D) of this section.

F. Reimbursement Agreement Between City and Reuser. Before the reuser incurs any costs in the extension of any public reclaimed water pipeline to provide service for any individual or property, the reuser desiring such service shall execute a reimbursement agreement for reclaimed water with the City which shall include the following:

1. A warranty of workmanship **QUALITY OF WORK** and materials for public reclaimed water pipelines and facilities installed which shall run to the benefit of the City for a period of at least one (1) year from the date of acceptance by the City.
2. A diagram of all property which will be served by the reclaimed water pipeline to be installed and an irrigation plan for the property.
3. A statement that the City acquires ownership of public reclaimed water pipelines, appurtenances, and easements upon completion and acceptance by the City.
4. The regulations for reuse of reclaimed water, quantity, quality, and cost of the reclaimed water.
5. The terms for cost recovery by the reuser of reclaimed water pipeline extension and/or conversion costs if applicable.

G. Conversion Agreement between City and Reuser. Before the City incurs any costs in the extension of any public reclaimed water pipeline needed to convert a reuser's private, potable water system to a reclaimed water system, the City and the reuser shall execute a conversion agreement for reclaimed water. Conversion agreements are subject to City approval and limited to projects that provide a "net present value" cost recovery to the City within ten (10) years. Net present value shall be determined by the estimated cost of the project and the current prime interest rate. Recovery of costs shall be in the form of billing for consumption of reclaimed water

at seventy-five percent (75%) of the reuser's present potable water rate. Recovery of costs estimates shall be based on consumption history as determined by the City, or on an engineered estimate in the case of new sites. The availability of conversion agreements shall always be subject to budgetary constraint. Conversion agreements shall include, but not necessarily be limited to, the following:

1. Place of use;
2. Quality standards;
3. Point of delivery;
4. Commodity rate;
5. Costs to City;
6. Costs to user;
7. Compliance with regulations;
8. Commencement of service;
9. Termination of service;
10. Resale of reclaimed water;
11. Inspection.

H. Penalty. Any person who excavates or causes an extension to be made for the purpose of laying any reclaimed water pipeline in public streets, alleyways or upon the property of the City without first complying with the provisions hereof, shall be subject to a fine of not less than two hundred dollars (\$200.00) nor more than three hundred dollars (\$300.00). A separate offense shall be deemed committed upon each day during or on which a violation occurs or continues.

I. The Director shall approve, execute and enforce reclaimed water agreements, for the purpose of expanding the reclaimed water program to all residential and nonresidential reusers located adjacent to existing public reclaimed water pipelines.

J. Reclaimed Water Agreement between the Division and the Reuser. Before connecting to an existing public reclaimed water pipeline, the reuser requesting such connection shall execute a reclaimed water agreement with the Division which shall include, but not necessarily be limited to, the following:

1. Place of use;
2. Quality standards;
3. Point of delivery;
4. Commodity rate;

5. Costs to user;
6. Compliance with regulations;
7. Commencement of service;
8. Termination of service;
9. Resale of reclaimed water;
10. Inspection.

#### **7-02-001-0027 MAIN SEWER EXTENSION POLICY FOR AREAS BEYOND PRESENT CITY TRUNK LINES**

A. Definitions. For the purpose of this section, the following words and phrases shall have the meanings respectively ascribed to them herein, unless the text clearly indicates otherwise:

CITY: The word "City" shall mean the City of Flagstaff in the County of Coconino and the State of Arizona, except as otherwise indicated.

DEVELOPER-OWNER: Any person or persons requesting or required to connect to the sewer system of the City in developing one (1) or more parcels of land. The term includes subdividers, industrial developers, private property owners, companies and legally constituted improvement districts who improve or serve with sewers, platted or unplatted property.

SEWER LINES includes:

1. LATERAL SEWER: A sewer which discharges into a branch or other sewer and has not other common sewer tributary to it.
2. BRANCH SEWER: An arbitrary term for a sewer which receives sewage from lateral sewers from a relatively small area.
3. MAIN SEWER: A sewer which receives sewage from one (1) or more branch sewers as tributaries.
4. TRUNK SEWER: A sewer which receives sewage from many tributary main sewers, and serves as an outlet for a large territory.

B. Plans and Size of Sewer Line Extensions. A developer-owner who wishes to extend or install sewer facilities must employ an engineer, registered in Arizona, to perform the field engineering and prepare detailed plans and specifications for the sewer extension in accordance with good engineering practice, and adopted standards set forth in the Uniform Building Code (current adopted edition), Uniform Fire Code (current adopted edition), general construction standards and specifications of the City, current subdivision regulations, general land use plan currently adopted, and any applicable State health regulations and any applicable City Code requirements or standards. The final detailed plans and specifications for the sewer extensions must be approved by the City Engineer before construction begins.

C. Costs of Extension. The developer-owner causing an extension of sewer line shall pay in full for the rights-of-way and easements, the purchase, construction and installation of the sewer lines, and all other costs of extension. However, the City reserves the right to increase the diameter of the extension, if it is deemed advisable, and the City may participate in the oversizing costs, through cash or a reimbursement agreement.

D. Replacement of Repair. All persons or other entities who create, cause to be built, or build any such extensions of any such services as contemplated herein shall also pay for any and all such replacements as becomes necessary as a direct or indirect result of the creation, building or construction of such extensions. For example, repairs or replacement of sidewalks, paving or other utilities damaged or disturbed during the building of sewer line extensions.

E. Agreement between City and Developer-Owner. Before the extension of any sewer line shall be made to serve a subdivision, platted or unplatted property, to provide service for any individual or unplatted property, the developer-owner desiring such service shall execute an agreement with the City which shall include the following:

1. A warranty of ~~workmanship~~ **QUALITY OF WORK** and materials for sewer lines and facilities installed which shall run to the benefit of the City for a period of at least one (1) year from the date of acceptance by the City.
2. A diagram of all property which may be served by any sewer line to be installed.
3. A statement that the City acquires ownership of sewer line appurtenances and easements upon completion and acceptance of the work by the City.
4. A statement of the developer-owner's proportionate share of the cost for previously installed sewer lines if any reimbursement agreements are in existence concerning the sewer line.

#### **7-02-001-0028 PRIVATE SEWERAGE SYSTEMS; CONSTRUCTION AND MAINTENANCE WITHIN THE CITY PROHIBITED GENERALLY**

Except as provided in this chapter, it shall be unlawful to construct or maintain within the City any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

#### **7-02-001-0029 PRIVATE SEWERAGE SYSTEMS; WHEN PERMITTED, TO BE CONSTRUCTED AND MAINTAINED IN SANITARY MANNER**

Where in a public sanitary sewer is not available within the City, or in any area under the jurisdiction of the City, the building sewer shall be connected to a private sewage disposal system, complying with the provisions and recommendations of the Arizona Department of Health Services and the Sanitary Code of the County Health Department. Such private sewage disposal system shall be constructed, maintained, and operated at all times in a sanitary manner.

#### **7-02-001-0030 PRIVATE SEWERAGE SYSTEMS; DISCONTINUANCE**

At such time as a public sewer becomes available to property served by a private sewage disposal system, a direct connection shall be made to the public sewer in accordance with the

provisions of this chapter and any septic tank, cesspool or similar private sewage disposal facilities shall be abandoned and filled with suitable material within ninety (90) days of the aforesaid connection.

#### **7-02-001-0031 PRIVATE SEWERAGE SYSTEMS; AUTHORITY OF DIRECTOR OF HEALTH DEPARTMENT**

No statement contained in the preceding two (2) sections shall be construed to interfere with any additional requirements that may be imposed by the Health Departments of the State and County.

#### **7-02-001-0032 PERMIT REQUIRED**

No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the City Community Development Division.

#### **7-02-001-0033 APPLICATION FOR BUILDING CONNECTION**

Each person desiring a building connection shall make application to the Community Development Division. All applications for building connections to be constructed by Water Services Division shall be accompanied by the current fee for such work.

#### **7-02-001-0034 DIRECTOR TO APPROVE DESIGN NUMBER, LOCATION, SIZE AND CONSTRUCTION OF BUILDING CONNECTIONS**

The design, number, location, manner of connection and size of all building connections shall be subject to the approval of the Water Services Director. The Division will install all building connections less than eight (8) inches in diameter, except as provided elsewhere in this chapter. All building connections eight (8) inches in diameter or larger shall be installed by a private contractor at the property owner's expense. Building connections shall be installed on lateral branch and main sewers only, unless specifically authorized and approved by the Director. All building connections shall be constructed in accordance with standards and specifications on file in the Engineering Section.

#### **7-02-001-0035 SPECIAL PROVISIONS FOR INSTALLING BUILDING CONNECTIONS IN NEW SUBDIVISIONS AND DEVELOPMENTS**

In new subdivisions or developments where public sewer extensions are authorized by the City and constructed at the developer's expense, the City may authorize the developer or his agent, if he so desires, to install building connections with "wyes" and connect the building sewers to the building connection under the following provisions:

A. The construction of the public sewer, building connections, and connections of the building sewers to the building connection shall be under the supervision of a registered engineer holding registration in the State, who shall submit "as-built transparency plans," bearing the registered engineer's registration seal and number, to the Engineering Section. It shall be the duty of the developer to require that all building connections, serving lots in the development upon which no buildings are constructed, be effectively sealed until such time as buildings will be constructed on the lots left vacant. Such sealed connections shall be inspected and approved by the City Engineer before being backfilled and shall be designated for location on

the "as-built plans." The effective seal shall consist of a vitrified clay stopper inserted in the bell of the sewer extending to the property line from the public sewer; such stopper shall be jointed according to the standard details on file in the Engineering Section.

B. Before any building sewer construction is commenced, plumbing permits must be obtained by the developer or his agent from the Building Official.

C. When the "as-built plans" are prepared by the Engineering Section, a record of the building connections will be made.

### **7-02-001-0036 RECORDS TO BE KEPT BY COMMUNITY DEVELOPMENT**

The Community Development Division shall keep a record of all building connections made, the purpose for which they are to be used.

### **7-02-001-0037 SEWER TAP FEE**

Each person, firm or corporation requesting a sewer tap to be installed by the City shall pay the fee as hereby established:

Four (4) inch sewer tap: ~~\$275.00~~ \$400.00.

Six (6) inch sewer tap: ~~\$275.00~~ \$400.00.

Procedures for owner/contractor:

Owner/contractor shall pay ~~buy-in~~ CAPACITY FEES charges if applicable.

Owner/contractor shall obtain a permit from the Engineering ~~Section~~ DIVISION and pay a permit fee before starting excavation.

When notified by ARIZONA 811 ~~the Flagstaff Blue Stake Center~~, Division personnel will locate the sewer main for owner/contractor.

Owner/contractor excavates site and shores trench if necessary, shoring shall be determined by Division personnel.

Owner/contractor provides barricades, lights and traffic control as determined by the Engineering Inspector.

Wastewater collection personnel installs the saddle and makes the tap in the sewer main.

Owner/contractor installs building connection to the saddle and completes the connection.

Engineering Inspector inspects the owner/contractor's work and approves if work is completed satisfactorily.

Owner/contractor compacts and backfills trench, replaces pavement if necessary.

Final inspection is done by the Engineering Inspector.

Approval (permit sign-off) is made by the Engineering Inspector.

Owner/contractor shall not tap the main sewer at any time.

### 7-02-001-0038 SEWER USER CHARGES

In order to provide for the protection of the public health, safety and welfare of the citizens of Flagstaff, a system of charges for sewerage use services is hereby established.

### 7-02-001-0039 THE COLLECTION OF USERS CHARGES SHALL BE UNDER THE DIRECTION OF THE CITY'S FINANCE MANAGEMENT SERVICES DIRECTOR

The Finance MANAGEMENT SERVICES Director is authorized to collect all user charges, industrial cost recovery charges and all other charges prescribed by this chapter.

### 7-02-001-0040 RATE ESTABLISHMENT AND REVIEW PROCEDURE

A. Rates established by ordinance of the City Council shall be based upon the City's determination of the cost of rendering sewerage services. The rates shall be established to provide for adequate funding for operation and maintenance of sewage works as required by the Environmental Protection Agency. The Council may also consider the funding of debt service, capital replacement, capital improvements and other costs through user charges.

B. In addition to other pertinent factors deemed relevant by the City Council, the rate schedules adopted by the City Council may include the following cost factors:

1. Appropriate indirect costs of the Division and other City divisions in rendering sewer related services such as purchasing, accounting, billing, administration, equipment maintenance, and other indirect costs.
2. Annual debt service charge for the retirement of sanitary sewer bonds.

C. Rate schedules shall distribute cost based upon the volume of wastewater discharged as well as BOD and SS of the wastewater discharged.

D. ~~The method to be used for determining user charges expressed in a formula is:~~

$$\text{Rate} = \frac{\text{Total Cost* of Flow}}{\text{Total Flow}} + \frac{\text{Total Cost* of BOD or COD}}{\text{Total BOD or COD}} + \frac{\text{Total Cost * of SS}}{\text{Total SS}}$$

User Charge = Rate X User's Units of Contribution

~~\*Cost = Operation and Maintenance plus Replacement Cost~~

~~The basis for the units of contribution shall consider volume (as determined by water meters or estimates).~~

E. Financial Management System. The user charge system shall include an adequate financial management system that will accurately account for O&M revenues and expenditures

associated with the treatment works. The accounting system must segregate O&M revenue and expenditure from other wastewater revenue and expenditures to assure adequate revenue to properly operate and maintain the treatment works. All revenues collected for operation and maintenance (including replacement) shall be deposited in a separate fund. This fund shall have two (2) accounts, one (1) for O&M and one (1) for replacement.

F. Notification. All users of the system shall be notified at least annually in conjunction with a regular billing for sewage service as to:

1. The rate schedule in effect.
2. The part of user charges attributable to wastewater treatment services.

G. Inconsistent Agreements. The user charge system shall take precedence over any terms or conditions of agreements or contracts between the City and users (including industrial users, special districts, other municipalities, or Federal agencies or installations) which are inconsistent with the requirements of Section 204(b)(1)(A) of the Clean Water Act and these regulations.

H. Toxic Pollutants and Pollutants in Excess of Specified Limits. The user charge system shall provide that each user which discharges any toxic pollutants or others which cause an increase in the cost of managing the effluent or the sludge of the City's treatment works shall pay for such increased costs by the following formula:

Total Cost\* of Any Pollutant

Surcharge = Total of Any Pollutant

\*Cost = Operation and Maintenance Plus Replacement Costs

I. Wastewater Treatment By-Products. All revenue from the sale of treatment related by-products shall be used to offset the cost of operation and maintenance. User charges shall be proportionally reduced for all users. Total annual revenues received from the sale of a by-product shall be credited to the treatment works O&M cost no later than the fiscal year immediately following their receipt.

## **7-02-001-0041 SEWER USE CHARGES, CAPACITY CHARGES**

The sewer user charges to be charged by the Finance ~~Finance~~ **CUSTOMER SERVICE** Section to all users and to all others that have reasonable access to sewer mains is presented in the following schedule:

The City Council may adjust these rate schedules as they deem necessary.

A. Sewer User Charges.

### **MONTHLY RATE PER 1,000 GALLONS OF WATER CONSUMPTION**

The following monthly service rates shall be charged for customers receiving City of Flagstaff sewer service inside the limits of the City of Flagstaff. ~~Sewer charges are based on water consumption. Flat rate charge (dollars/1,000 gallons) for residential based on winter quarter average water use. Other customer classes based on actual water use (dollars/1,000 gallons).~~

The monthly base service charge applies whether the water meter is active or inactive. The monthly service charge is based on the fixed cost of operation and maintaining the sewer system so that the system is available to collect wastewater from the parcel when service is activated. Parcels with shutoff water meters will continue to pay base monthly service fee since sewer service is available and may be activated and used by the property owner at any time. The sewer base service charge will be based on the water meter size. In the absence of a City water meter, the Customer Service Director will determine the appropriate sewer base service charge.

Sewer volume charges are based on water consumption as determined in Section 7-02-001-0045 and will be billed monthly per 1,000 gallons of water consumption.

Sewer only service customers will be charged a monthly **BASE** service fee and sewer usage **VOLUME** charge based on estimated water consumption as approved by the **Water Services CUSTOMER SERVICE** Director. If the **CUSTOMER SERVICE** Director determines that adequate water meter information is not available for billing a residential customer as described above, then the customer will be charged the average monthly billing for that user class.

Customer Classes	Monthly Rate				
	7/1/16	1/1/17	1/1/18	1/1/19	1/1/20
Residential:					
Single-family	\$4.07	\$4.36	\$4.67	\$5.00	\$5.35
Multiple and mobile home (per unit)	\$4.07	\$4.36	\$4.67	\$5.00	\$5.35
Nonresidential:					
Car washes	\$4.09	\$4.38	\$4.69	\$5.02	\$5.38
Laundromats	\$4.20	\$4.50	\$4.82	\$5.16	\$5.53
Commercial	\$4.31	\$4.62	\$4.95	\$5.30	\$5.68
Hotels, motels	\$5.76	\$6.17	\$6.61	\$7.08	\$7.58
Restaurants	\$6.92	\$7.41	\$7.93	\$8.49	\$9.09
Industrial laundries	\$6.36	\$6.81	\$7.29	\$7.81	\$8.36
Manufacturing plants	\$4.63	\$4.96	\$5.31	\$5.69	\$6.09
Pet food manufacturers	\$10.15	\$10.87	\$11.64	\$12.46	\$13.34
Soft drink bottlers	\$8.04	\$8.61	\$9.22	\$9.87	\$10.57
Ice cream cone manufacturers	\$12.56	\$13.44	\$14.39	\$15.40	\$16.48
Northern Arizona University	\$3.73	\$4.00	\$4.28	\$4.58	\$4.91

<u>SCAVENGER WASTES –</u> <u>SEPTAGE</u> Other treatment plant sludge (charge per 100 gallons)	\$8.00	\$11.00			

Customer Classes	Monthly Rate				
	7/1/16	1/1/17	1/1/18	1/1/19	1/1/20
<u>SCAVENGER WASTES</u> – Mud sump waste (charge per 100 gallons)	\$25.00	<u>\$31.00</u>			
Waste material <u>SCAVENGER WASTES</u> delivered to the treatment plant at times other than <u>SPECIFIED IN THE SCAVENGER WASTE PERMIT.</u> 8:00 a.m. to 4:00 p.m. Weekends or holidays shall be assessed an after hours fee of:	\$35.00	<u>\$146.00</u>			
Sewer surcharges:					
Biochemical oxygen demand - per pound concentrations over 300 milligrams per liter	<del>\$.2703</del>	<u>\$0.421</u>			
Suspended solids - per pound for concentrations over 350 milligrams per liter	<del>\$.1343</del>	<u>\$0.292</u>			

If a customer's discharge exceeds the BOD and TSS limit already included in the monthly rate calculation for that customer class listed above, then sewer surcharges may be added as a condition to the customer user permit, compliance agreement or administrative order. ANY SURCHARGES IMPOSED BY THIS CHAPTER SHALL BE BASED ON THE AVERAGE OF ALL SAMPLING CONDUCTED DURING THE APPLICABLE BILLING PERIOD OVER THE TOTAL FLOW FOR SUCH PERIOD.

BOD and TSS included in monthly rates for specific customer classes are as follows:

Customer Class	BOD mg/L	TSS mg/L
Car Washes	20	150
Laundromats	150	110
Commercial	200	175
Manufacturing	200	175
Pet Food Manufacturers	<del>1,800</del> <u>700</u>	<del>1,100</del> <u>525</u>
Soft Drink Bottlers	1,800	400
Ice Cream Cone Manufacturers	9,700	100

All customers served directly by the City and located outside the City limits shall pay at a rate of one hundred ten percent (110%) times the rate for the same classification of service inside the City.

In the case of one (1) meter serving a user that has different classifications of business, the Director shall be authorized to adjust the rate per one thousand (1,000) gallons based upon the contribution of each classification.

The user shall be determined according to customer class OR WASTEWATER SOLIDS CHARACTERISTICS (see rate schedule above).

B. Capacity Charges.

1. A capacity charge, as prescribed below, shall be assessed upon:
  - a. Initial connection to the municipal sewer system; or
  - b. Any subsequent expansion or modification of the user's building or facility which results in an increased contribution to the sewer system from:
    - (i) For single- or multifamily residential users, an increase in the number of residential units, or
    - (ii) For commercial or industrial users, an increase in the number of fixture units, ~~or~~
    - (iii) ~~For industrial users, any change in operations resulting in a twenty percent (20%) or greater increase in billable volume as measured on an annual basis, or~~
    - (iv) ~~A change of use of the property whereby an increased volume of discharge to the sewer system occurs.~~
  - c. Size of water meter installed on the property.
  - d. Each additional water meter added will require additional sewer capacity fees unless specifically designated as a landscape meter.
2. The capacity charges for the various types of users are as follows:
  - a. Customer (capacity) charge, dollars.
  - b. Residential.
  - c. Single-family residential and townhomes (per unit):

EFFECTIVE <del>7-1-16</del> <u>09-01-2024</u>	<del>\$3,723</del> <u>\$4,086</u>
---	-----------------------------------
  - d. Multiple residential, condos and mobile home (per unit):

EFFECTIVE <del>7-1-16</del> <u>09-01-2024</u>	<del>\$3,723</del> <u>\$4,086</u>
---	-----------------------------------

When a change of use occurs that increases the volume of discharge to the sewer system, regardless of whether a change in ownership has taken place, the capacity charge shall be based on the capacity charge for the new use less the existing capacity

charge rate for the previous use. No refund shall be made in the case of reduced volume of discharge from a change of use.

Nonresidential:

Meter size	EFFECTIVE 7/1/16
	<u>09/01/2024</u>
5/8" or 3/4"	\$3,723 <u>\$4,086</u>
1"	\$6,218 <u>\$6,824</u>
1-1/2"	\$12,399 <u>\$13,608</u>
2"	\$19,845 <u>\$21,780</u>
3"	\$37,233 <u>\$40,863</u>
4"	\$62,068 <u>\$68,120</u>
6"	\$124,099 <u>\$136,198</u>
8"	\$198,566 <u>\$217,927</u>
10"	\$285,468 <u>\$313,302</u>

\*gallon per day of estimated flow

THE ABOVE LIST IS THE MINIMUM CAPACITY CHARGE FOR EACH METER SIZE, FLOWS AND LOADINGS EXCEEDING 0.67 POUNDS PER DAY FOR NEW CONNECTIONS, AS DETERMINED BY THE WATER SERVICES DIRECTOR, WILL BE MULTIPLIED BY \$10.94 PER GALLON AND \$1.891 PER POUND TO DETERMINE THE CAPACITY FEE FOR ANY METER SIZE.

~~Where the capacity charge is based on volume, said charge will initially be calculated based on an estimate of flowage to be submitted in writing by the customer and agreed upon by the City. The capacity charge will be adjusted based upon the volume of the highest consecutive twelve (12) month period for the thirty-six (36) months immediately following commencement of service for assessment of an additional capacity charge.~~

~~The Division shall review all industrial user accounts on an annual basis and assess an additional capacity charge when the annual average billable volume increased by twenty percent (20%) or more. The charge is calculated at the current volume less previously assessed capacity charge recalculated at then current rates.~~

~~Wastewater capacity associated with similar user classes may be transferred from one (1) location to another with the approval of the Division. The location from which the wastewater capacity was transferred shall be without wastewater capacity until a subsequent purchaser of said location establishes a new capacity and fees for the new use. The transferor of the wastewater capacity is required to notify any subsequent purchaser of the property, which no longer has wastewater capacity, that such capacity does not exist. The City shall record an agreement between the transferor and the City with the County Recorder against the property without wastewater capacity rights. The agreement shall reference the legal description of the property without wastewater capacity and clearly indicate that wastewater capacity rights do not exist.~~

~~Exemption and Payment of Capacity Charges. Structures with a minimum of stem wall, and first floor existing on December 1, 1979, shall be exempt from the capacity charges. As of that date, the capacity charge is immediately due and payable upon receipt of an application for connection to the sewerage system.~~

If connection is made to the sewerage system without appropriate permit, the capacity charge is immediately due and payable upon the earliest date that such permit was required. No connection to the sewerage system shall be made without the proper permit and payment of the capacity charge except as provided below for installment payments.

C. Capacity Fee Installment Payments. Capacity fees may be paid for by installment payments in accordance with the following conditions:

1. A capacity fee that totals an amount greater than one hundred fifty thousand dollars (\$150,000.00 100,000.00) may be paid as follows:

a. No less than one-third (1/3) of the total capacity fee due is to be paid upon receipt of the application for connection to the sewerage system.

b. The balance due of the capacity fee is to be paid in equal monthly installments over no more than thirty-six (36) months to include an interest rate calculated to be the prime rate + 1/2% at the time of the application.

c. The customer agrees to secure the balance due to the City by a letter of credit drawn in favor of the City, or in any other form of security satisfactory to the City Manager, City Attorney and Finance MANAGEMENT SERVICES Director.

~~2. For industrial capacity fees greater than twenty five thousand dollars (\$25,000.00) the City Council may consider reduced initial payments and/or extended time periods for payment. Consideration shall be based on the following criteria and other criteria the City Council may wish to include:~~

~~a. Economic impact.~~

~~b. Community impact.~~

~~c. Environmental impact.~~

~~d. Desirability.~~

~~e. Financial viability.~~

~~3. Requests for reduced initial payments and/or extended time periods for the payment of industrial sewer capacity fees shall be made in writing to the City Water Services Director for consideration by the City Council. Requests shall address the aforementioned criteria and shall be subject to the following:~~

~~a. No less than twenty five thousand dollars (\$25,000.00) of the total capacity fee is due to be paid upon receipt of the application for connection to the sewerage system.~~

b.—The balance of the capacity fee shall be paid in equal monthly installments for a period of up to thirty (30) years as requested by the industrial customer and approved by the City Council. A written agreement shall be executed between the City and the customer which shall include an interest rate as recommended by the City Manager and City Treasurer and approved by the City Council of the application.

c.—The industrial customer agrees to secure the balance due to the City by a letter of credit drawn in favor of the City or in any form of security satisfactory to the City Treasurer.

D.—Special Rules for Application of Surcharges. The following special rules shall pertain in applying the surcharges described in Section 7-02-001-0040(H) and subsection (A) of this section:

1.—Biochemical Oxygen Demand.

a.—In the event that an industrial user's wastewater shall exhibit concentrations of BOD exceeding four hundred (400) mg/L, then the surcharge for concentrations from four hundred (400) mg/L to five hundred (500) mg/L shall be multiplied by two (2);

b.—In the event that an industrial user's wastewater shall exhibit concentrations of BOD exceeding five hundred (500) mg/L, then the surcharge for concentrations from four hundred (400) mg/L to five hundred (500) mg/L shall be multiplied by two (2), and the surcharge for concentrations of BOD exceeding five hundred (500) mg/L shall be multiplied by three (3).

2.—Total Suspended Solids.

a.—In the event that an industrial user's wastewater shall exhibit concentrations of TSS exceeding four hundred fifty (450) mg/L, then the surcharge for concentrations from four hundred fifty (450) mg/L to five hundred fifty (550) mg/L shall be multiplied by two (2);

b.—In the event that an industrial user's wastewater shall exhibit concentrations of TSS exceeding five hundred fifty (550) mg/L, then the surcharge for concentrations from four hundred fifty (450) mg/L to five hundred fifty (550) mg/L shall be multiplied by two (2), and the surcharge for concentrations of TSS exceeding five hundred fifty (550) mg/L shall be multiplied by three (3).

3.—All surcharges imposed by this chapter shall be based on the average of all sampling conducted during the applicable billing period over the total flow for such period.

## 7-02-001-0042 SCAVENGER WASTE AND GREASE HAULERS

A. "Scavenger waste" is defined as sewage or human excreta that is removed from a septic tank or other on-site wastewater treatment facility, privy, sewage vault, river can, rocket can, or fixed or transportable chemical toilet or other similar units.

B. "Grease" is defined as fats, oils and grease (FOG); organic polar compounds derived from animal and/or plant sources as detectable in cooking oils, food scraps containing grease, butter or oil, lard or tallow, meat fat, grease and juices, gravies, sauces, shortening and dairy products.

C. Authorized Scavenger Waste Haulers. Only scavenger wastes generated within Coconino County shall be authorized to discharge into the sewerage system.

1. The Water Services Director shall require haulers of scavenger waste to obtain a scavenger waste discharge permit FOR EACH VEHICLE THAT HAULS WASTES TO THE TREATMENT PLANT.
2. Septage haulers shall not discharge mixed loads of grease and septic tank or scavenger waste or any other type of waste. Scavenger waste haulers may discharge loads only at locations designated by the Director and at such times as are established by the Director. The Director may collect samples of each hauled load to ensure compliance with applicable standards. The Director may require the scavenger waste hauler to provide a waste analysis of any load prior to discharge. The discharge of hauled septic tank waste is subject to all other requirements of this chapter.
3. The Director shall establish hours for operation and acceptance for discharging of scavenger waste. The hours of operation shall be available on the Flagstaff Water Services website and posted at the entrance gate of the water reclamation plant.
4. Septage haulers are required to weigh in before and after discharging to the water reclamation plant or POTW, provided a scale is available.
5. Discharge of scavenger waste at hours other than those established by the Director shall be at the discretion of the plant operator and will be subject to a fee set forth in Section 7-02-001-0041 ~~3-10-001-0008~~. Scavenger waste haulers must provide a completed City waste-tracking or manifest form for every load, prior to entering the water reclamation plant. This form shall include, at a minimum, the name and address of the waste hauler, permit number, truck identification, names, addresses and phone number of sources of waste, and volume and characteristics of waste. Scavenger waste haulers shall maintain records of all waste-tracking or manifest forms for at least five (5) years.

D. Authorized Grease Haulers. Grease will only be accepted for discharge into the designated grease receiving station from generators that have written acceptance by the Director and will be subject to the following conditions:

1. The Director shall require grease haulers to obtain a scavenger waste discharge permit FOR EACH VEHICLE THAT HAULS WASTES TO THE TREATMENT PLANT.
2. Grease haulers shall not discharge mixed loads of grease and septic tank or scavenger waste or any other type of waste. Grease haulers may discharge loads only at locations designated by the Director and at such times as are established by the Director. The Director may collect samples of each hauled load to ensure compliance with applicable standards. The Director may require the grease hauler to provide a waste analysis of any load prior to discharge. The discharge of hauled grease is subject to all other requirements of this chapter.
3. The Director shall establish hours for operation and acceptance for discharging of grease. The hours of operation shall be available on the Flagstaff Water Services website and posted at the entrance gate of the water reclamation plant.

4. Grease haulers are required to weigh in before and after discharging to the water reclamation plant or POTW, provided a scale is available.
5. Discharge of grease at hours other than those established by the Director shall be at the discretion of the plant operator and will be subject to a fee set forth in Section 7-02-001-0041 ~~3-10-001-0008~~.
6. Grease haulers must provide a completed City waste-tracking or manifest form for every load, prior to entering the water reclamation plant. This form shall include, at a minimum, the name and address of the grease hauler, permit number, truck identification, names, addresses and phone number of sources of waste, and volume and characteristics of waste. Grease haulers shall maintain records of all waste-tracking or manifest forms for at least five (5) years.

#### **7-02-001-0042.1 SCAVENGER WASTE DISCHARGE PERMITS**

A. All authorized persons or companies, as defined in Section 7-02-001-0042, wishing to discharge scavenger wastes or grease must first obtain a scavenger waste discharge permit for each vehicle that will haul scavenger waste or grease from the Director. Vehicle permit applications shall be provided by the City and must include the following information:

1. Business name;
2. Business phone number;
3. Name of business owner or responsible party;
4. Business physical location;
5. Business mailing address;
6. Business email address;
7. Name(s) of operator(s);
8. Operator phone number(s);
9. Vehicle information:
  - a. Year/make/model;
  - b. License plate number/state;
  - c. Tank capacity;
  - d. Type of hauled waste(s);
  - e. ADEQ license number.
10. Any additional information as required to meet applicable Federal and/or State regulations or as deemed necessary to prevent incidences of overloading, interference or

pass-through at the water reclamation plant and/or interference, damage, etc., to the wastewater collection systems.

B. The permit provided for in this section shall be issued by the Director to all applicants who comply with the terms and conditions set forth in this section as follows:

1. For each vehicle utilized for the transportation of scavenger wastes or grease for disposal into the sewerage system, payment or prorated portion of the annual fee as established per City Code Section 3-10-001-0008, License Fees.
2. Once permits are obtained, all waste haulage equipment operated by companies with permits shall be registered with the Management Services Division and shall submit documentation that fee has been paid and shall be identifiable by display of the license plate number.
3. The permit issued as provided for in this section shall expire January 2nd of each year and not more than one (1) year after the date of issue. It shall be the responsibility of the hauler to seek renewal of their permit, at least thirty (30) days prior to the expiration date.
4. Noncompliance with any part of this section or subsequent regulations shall subject the permit holder to revocation of permit to utilize the services of the City sewerage system for disposal of scavenger wastes or grease. Reissuance of permit to discharge after revocation shall be at the discretion of the Director and may be subject to such conditions as deemed appropriate.
5. The Director may establish regulations as are deemed necessary to control the discharge of scavenger wastes so as to prevent incidences of overloading, interference or pass-through at the water reclamation plant and/or interference, damage, etc., to the wastewater collection systems. All discharges shall comply with the prohibited substances restrictions set forth in Section 7-02-001-0007.
6. The water reclamation plant does not accept hazardous waste as defined by the Resource Conservation and Recovery Act and the Code of Federal Regulations.
7. The waste hauler will be financially responsible for any damage to or interference with the publicly owned treatment works (POTW), or for any expense to the City (including testing) caused by the discharge from the hauler. The waste hauler and/or generator will be charged for all expenses in monitoring and handling their discharge.
8. Waste haulers may not discharge unless a plant operator is present and has approved the discharge. The operator may refuse to accept any discharge if it is suspected to contain wastes which are considered unacceptable to the City water reclamation plants.
9. The waste hauler shall have sampling taps or outlets (as approved by the Water Services Division) on each truck for proper sampling of contents. The waste hauler shall be subject to random sampling/monitoring by the City.
10. Waste haulers will position their trucks at the direction of the plant operator to prevent spills. Any traces of the hauler's discharge must be removed by the hauler immediately.

11. Waste haulers shall not bypass any control device while discharging to the City Water Reclamation Plant or POTW.

12. Waste haulers cleaning trucks at the water reclamation plant shall be subject to a truck clean out fee set forth in Section 3-10-001-0008. Truck shall be empty prior to clean out. Septic tank and scavenger waste haulers shall be subject to the enforcement guides set forth in Section 7-02-001-0019.

13. Provision of false information by either the generator or the hauler shall also be considered a violation of this code and subject to the provisions of Sections 7-02-001-0017 and 7-02-001-0019.

C. The Director may revoke a permit for any of the following actions or inactions by the permittee:

1. Disposing hauled waste at any location not designated or approved by the Director.
2. Misrepresenting or failing to fully disclose all relevant facts in the waste hauler discharge permit application.
3. Falsifying information provided on waste tracking forms or waste disposal manifests.
4. Failure to provide a waste tracking form or waste disposal manifest.
5. In the event that the City implements an electronic or web-based waste tracking form or waste disposal manifest reporting system, all reports shall be submitted on this system.
6. The hauler shall be responsible for any fees associated with an electronic or web-based reporting system.
7. Tampering with samples collected from waste loads.
8. Refusing to allow the Director timely access to the facility premises or records.
9. Failing to meet effluent requirements.
10. Failing to pay fines or penalties.
11. Failing to pay waste disposal charges.
12. Failing to complete a waste hauler discharge permit application.
13. Violating any general or specific permit condition or requirement, or any terms of the waste hauler discharge permit or this section.

#### **7-02-001-0043 SEWER RATES TO BE ADDED TO WATER BILLS**

All sewer user charges to be added to and collected with the bills as rendered for water by the ~~Finance~~ **CUSTOMER SERVICE** Section, and all of the rules and regulations promulgated by the ~~Finance~~ **MANAGEMENT SERVICES** Director shall apply to, and be effective in, the collection of such sewer service charges.

**7-02-001-0044 WHEN BILLS PAYABLE; DISCONNECTION OF SERVICE FOR FAILURE TO PAY; RECONNECTION FEE**

All bills for sewer service shall be due and payable on the billing dates of the various districts, and if not paid within thirty (30) days thereafter will be considered delinquent and the sewer service may be discontinued without notice. In the event extraordinary costs are incurred by the City to discontinue the sewer service, such costs shall be paid by the customer before service is continued.

**7-02-001-0045 DETERMINATION OF WASTEWATER QUANTITY VOLUME CHARGE AND BILLINGS: NONRESIDENTIAL**

A. In the absence of suitable data to make a determination for nonresidential users as to the amount of water discharged to the sewer system, the sewer ~~user~~ VOLUME charge shall be based on the amount of water supplied to the premises. The Director may require or permit the installation of acceptable additional water or sewer meters at such party's expense and in such a manner as to determine the quantity of water actually entering the sewer system, in which case, the quantity of water used to determine the sewer charge shall be the quantity of water actually entering the sewer system as so determined. The meter (or meters) must measure the total flow unless another method has been approved by the City.

B. It shall be the responsibility of each user, who chooses or is required to perform the purchase and installation of such meters, to notify and gain approval of the City Water Services Division. Upon initial written verification, by a qualified individual, that the meter has been installed and is functioning accurately and efficiently, the user assumes daily operation and maintenance of such meters.

If at any time, the Division determines that such meter is insufficient for the purpose it is intended, whether because of inability to repair, increased discharge rate of waste stream, etc., the user shall replace the meter or have modifications performed to the existing meter, at the user's expense and in such a way that is considered satisfactory to the City Water Services Director.

C. All significant industrial users shall have a City approved sewer flow meter or other City approved means of measuring their effluent. This meter shall be equipped to provide a permanent record of the flow measurements. All records of the flow shall be kept for a minimum of three (3) years and must be available to the City.

D. It shall be the responsibility of all industrial users who are required or choose to install flow measurement devices to provide a security system which would provide the City with unrestricted access to such meter, yet at the same time provide protection from user access unauthorized by the City, tampering, vandalism, the elements or any other factor which may inhibit accurate flow measurement of the waste stream.

E. The industrial user shall keep their wastewater collection lines free from debris, turbulence or any other entity that may inhibit the accurate measurement of sewer flow.

**RESIDENTIAL:**

- A. Sewer user VOLUME charge shall be based on the average monthly water billed to each customer during the preceding December, January, February and March and shall represent sewage flow for full-time residential customers.
- B. If the Director determines that adequate water meter information is not available for billing a residential customer as described above, then the customer shall be charged the average monthly billing for that user class.
- C. Upon approval of the Director, any individual user may, at his own expense and subject to the regulations of the Division, install a separate meter in order to determine the quantity of water actually entering the sewer system and future sewer charges shall be limited to that water actually entering the sewer system as so determined by the Director.
- D. If, within ten (10) days of billing, a customer files a written complaint with the Director alleging that a significant portion of his water usage does not enter the sewer system, the Director, in accordance with written appeals procedure, shall provide an opportunity for the customer to present THEIR his supporting documentation to an employee designated by the Director to hear complaints.
- E. Upon approval of the Director, metered water usage may be used to determine the sewer use charge when it can be shown to be more accurate than using the average winter water usage.

#### **7-02-001-0046 PAYMENT OF BILLS AND CHARGES**

- A. All notices sent out by the City regarding sewer user accounts, and all notices regarding any other matter pertaining to the user of the City sewer system, shall be sent to the house and street number of such property. To ~~insure~~ ENSURE proper delivery of notices, all errors in house numbers should be promptly reported to the Finance CUSTOMER SERVICE Section.
- B. The sewer account and bill shall distinguish the amount of the sewer user charge from any industrial cost recovery charge, if applicable.
- C. All rates and service charges are payable when rendered and shall be paid by the due date. If the total of such bill is not received by the City within five (5) days after the due date the consumer shall be charged an additional five dollar (\$5.00) nonrefundable late payment penalty fee. Consumers on a payment plan that has been approved by the Water Services Division may be exempted from the late payment penalty fee.

All charges shall be considered delinquent thirty (30) days after bill date. If the total of such bill is not paid within ten (10) days after the date of delinquency (thirty (30) days from bill date), a notice may be placed at the service address notifying of the past due amount and service charge which must be paid within twenty-four (24) hours. After twenty-four (24) hours, the water or sewer service may be disconnected from the premises of the delinquent consumer. The total amount of the bill due and any deposit, if such deposit is required, shall be collected before again providing sewer service or water service. Any closed, delinquent account requiring special collection effort may be assessed a delinquent collection charge to cover the additional cost as established by the Finance CUSTOMER SERVICE Director.

D. A consumer's water or sewer service may be disconnected for nonpayment of a bill for service rendered at a previous location served by the City, provided such bill is not paid within thirty (30) days after the unpaid bill has been presented to the consumer at his new location.

E. Any expense caused to the City for the repair or replacement of damaged, stolen, tampered with or misused sewer or water facilities shall be charged against and collected from the person or persons who caused the expense.

F. When a user of the water or sewer system has been notified of the amount of charges remaining due after the deduction of THEIR his security deposit, and payment for same has not been received, the Finance CUSTOMER SERVICE Director may assign the account to a bona fide collection agency.

G. Before water or sewer service will be turned on to any premises all charges against the premises when due and payable to the City as required by this chapter, or including any of the following items must have been paid: on account of labor supplied or materials furnished by the Water Services Division in the installation of service pipes connecting the premises with the City sewer mains, or for tapping the City sewer system; on account of water or sewer service previously supplied to the premises; whether used by the applicants or by some previous occupant of the premises; or on account of the assessment of any fine or penalty; or for turning water or sewer services off or on; or for repair or replacement of damaged, stolen or misused sewer works facilities.

#### **7-02-001-0047 NOTICE PRIOR TO DISCONNECT**

Before discontinuing water or sewer service for nonpayment of any sewer user charge, deposit or other assessment provided for in this chapter, the Finance CUSTOMER SERVICE Director shall give written notice to the person of the discontinuance and an opportunity to appear before the Finance CUSTOMER SERVICE Director or his designee on any disputed matter relative to the discontinuance of sewer service.

#### **7-02-001-0048 SERVICE CONNECTIONS**

Every separate building to be provided with sewer service shall have its own separate sewer service connection to the City sewer main, except that two (2) or more buildings located on the same lot or on contiguous lots under the same ownership or property known as a court, apartment house or block covering more than one lot, may be provided sewer service through the same connection as long as the single ownership continues. Upon change from such single ownership, a new and separate connection shall be immediately made for the building or premises to replace the indirect connection. No person having sewer service shall provide sewer service to any other sewer user, whether gratuitously or for a charge.

#### **7-02-001-0049 PERMITS REQUIRED FOR INDUSTRIAL USERS**

All significant industrial users, as defined by Section 7-02-001-0009(A)(1), shall obtain a permit for connection and discharge or any modification that changes the treatment, production, flow, etc., of the existing facility to the City's sewer system from the Director.

#### **7-02-001-0050 INDUSTRIAL USER PERMITS**

A. The significant industrial user shall make application for such permit, at least ninety (90) days prior to commencement of discharge, on a form provided by the Director. An applicant shall pay a fee as determined by the City of Flagstaff for each application and thereafter be issued an industrial pretreatment discharge permit which shall be valid for a period of five (5) years from the date of issuance or less as determined by the Director.

**Industrial Pretreatment Discharge Permit Fee**

(Effective <del>1-1-07</del> <u>09/01/2014</u> )	(Effective <del>1-1-08</del> )	(Effective <del>1-1-09</del> )	(Effective <del>1-1-10</del> )
\$100 per year <u>\$1,950.00 FOR 5 YEARS</u>	\$150 per year	\$200 per year	\$250 per year

B. Upon expiration of such permit, an applicant who holds a valid wastewater discharge permit and is in compliance with the terms and conditions established by this chapter shall file an application for renewal of an industrial pretreatment discharge permit, at least ninety (90) days prior to the expiration date of the previous permit, together with the existing fee and, thereafter, shall be issued a renewed industrial pretreatment discharge permit, which shall be valid for a period of five (5) years from the date of issuance of the renewal or less as determined by the Director.

C. The applicant shall submit the information contained in subsections (D) through (G) of this section and any other information requested by the City at the time of submittal, or the application will be rejected and the applicant required to resubmit with the appropriate fee.

D. An applicant seeking an industrial pretreatment discharge permit or renewal shall submit, as part of its application, the results of an analysis, compliant with standard methods, conducted by a laboratory certified by the State of Arizona Department of Health Services, of a representative daily composite sample of the effluent discharge from the applicant's plant.

E. An applicant shall submit as part of its application for a permit a discharge report which includes, but not be limited to, the nature of process, volumes, rates of flow, production quantities, concentrations in the wastewater discharge and any other information that may be relevant to the generation of waste.

F. An applicant, as part of its application for a permit, shall submit a plan showing the location and size of on-site sewers, sampling point, pretreatment facilities, City sewers and any other pertinent physical details.

G. An applicant as part of its application for a permit shall list each product manufactured, the type, amount and rate of production and the chemical components and quantity of liquid or gaseous materials stored on site, even though they may not normally be discharged into the sewer system.

H. In the event a producer of industrial waste which is authorized to make a connection to the City sewer for pretreated industrial waste disposal under the provisions hereof is sold, leased, or its operation is assumed or taken over by another person, firm or corporation other than that named in the permit, a new application for a permit shall be made by the new owner, lessee or operator. No permit issued under the provisions hereof shall be assignable and a violation of

this provision shall be grounds for summary suspensions or revocation of such permit by the Director.

I. It shall be a condition of the permit that the City may at any time test any of the wastes being discharged by the company or plant for quality or quantity. A duly authorized City representative may enter the permittee's premises at any time during business or operational hours for the purpose of inspecting plant operations to estimate quality or quantity of wastes.

J. It shall be a condition of the permit that the permittee shall install facilities, approved by the City Engineer at the permittee's expense for the purpose of the City's representative inspecting, observing and sampling representative flows in accordance with Section 7-02-001-0015.

K. It shall be a condition of the permit that additional periodic reports as may be required by the Director to properly monitor the discharge of the industrial wastes, be submitted to the Director.

L. Issuance of an industrial pretreatment discharge permit shall not release the permit holder from the obligation to comply with all other provisions of this chapter.

M. The City may change the conditions of any permit in order to comply with requirements of Federal or State regulations. An industrial user may petition the Director to modify their permit for monitoring parameters or process changes. The user must submit sampling reports and/or documentation to support their petition.

#### **7-02-001-0051 PERMITTEE REQUIREMENTS**

A. Each permittee shall provide protection from accidental discharge of prohibited materials or other wastes regulated by this chapter. If such discharge may occur, permittee must report it to the Water Services Director as described in Section 7-02-001-0011.

B. In order that officers, agents and employees of permittees will be informed of the City's requirements, permittees shall make available to their employees copies of this chapter together with such other wastewater information and notices which may be furnished by the City from time to time for the purposes of improving and making more effective water pollution control. A notice shall be furnished and permanently posted on the permittee's bulletin board advising officers, agents and employees who to call in case of an accidental discharge in excess of the limits authorized by the permit.

C. Any possible connection or entry point for a hazardous and/or prohibited substance to the permittee's plumbing or drainage system shall be appropriately labeled to warn operating personnel against discharge of such substances.

#### **7-02-001-0052 SEWER SERVICE OUTSIDE CITY LIMITS**

A. For all places outside the corporate limits of the City not mentioned in this chapter where sewer service is rendered by the City, and for which no rate is specifically fixed, the rate to be charged, including a connection charge, shall be as fixed by the City Council.

B. City sewer service offered to users outside the City limits shall be offered by the City subject to compliance by the users with the terms of this chapter.

## **7-02-001-0053 DISCONNECTION OF SERVICE**

The violation of any section of this chapter shall be sufficient cause for the City to discontinue water or sewer service to any premises, and such service shall not be restored until such violations have been discontinued or eliminated and all outstanding charges paid. The discontinuance of sewer service shall be accomplished by physically cutting and blocking the building connection. A charge for disconnecting and reconnecting shall be paid to the Finance CUSTOMER SERVICE Section for reconnecting the sewer service.

PART 3: WATER REGULATIONS

**CHAPTER 7-03  
CITY WATER SYSTEM REGULATIONS**

SECTIONS:

7-03-001-0001	APPLICATION FOR CONNECTION
7-03-001-0002	APPLICATION FOR SERVICE
7-03-001-0003	DEPOSIT REQUIRED
7-03-001-0004	CONNECTION FEES
7-03-001-0005	SERVICE CHARGES
7-03-001-0006	AUTHORITY REQUIRED
7-03-001-0007	MALICIOUS DAMAGE
7-03-001-0008	ACCOUNTS PAYABLE
7-03-001-0009	METERS
7-03-001-0010	WATER RATES
7-03-001-0011	WATER MAIN CAPACITY CHARGES

7-03-001-0013	CITY WATER MAIN EXTENSION POLICY
7-03-001-0014	WATER CONSERVATION
7-03-001-0015	CROSS CONNECTION CONTROL
7-03-001-0016	WATER RESOURCE DEVELOPMENT FEE
7-03-001-0017	PURCHASED ENERGY COMPONENT FOR WATER
7-03-001-0018	RECLAIMED WATER RATE SCHEDULE

**7-03-001-0001 APPLICATION FOR CONNECTION**

Every person requesting connection to the sewer or water system of the City shall first make application to the ~~Utilities~~ **WATER SERVICES** Division on such forms as the City shall prescribe and pay the fees and charges provided for herein. Connection ~~may~~ **SHALL** be made ~~either by the Utilities Division or by a contractor duly licensed by the State of Arizona to perform such work.~~ The work shall be done according to City specifications, and any contractor performing such work shall not cover such connection until the same shall have been inspected and approved by the **WATER SERVICES** ~~Utilities~~ Division.

**7-03-001-0002 APPLICATION FOR SERVICE:**

Every person requesting water service shall make application therefor on such forms as the City may prescribe, and the deposit and charge provided for herein shall be paid before such new service may commence.

**7-03-001-0003 DEPOSIT REQUIRED**

A. Deposit Required. There shall be charged all persons applying for residential water service to be provided to any premises a non-interest bearing deposit of one hundred fifty dollars (\$150.00). There shall be charged all persons applying for nonresidential water service to be provided to any premises a non-interest bearing deposit of three hundred dollars (\$300.00). The deposit must be paid in full at the time of account setup or, if requested by the customer, in three (3) equal installments. If the deposit is paid in installments, the first installment is due at the time of account setup, the next installment will be billed with the first monthly account bill,

and the final installment will be billed with the second monthly account bill. Specific exemption from this provision shall apply to churches, nonprofit community organizations and other utilities. Additionally, persons who have qualified for a deposit refund pursuant to subsection (B) of this section and have no other municipal account delinquency shall be exempt from any deposit requirement or additional or new water service. New customers providing the City with a recent letter from a present or previous utility supplier which shows a good payment history may be exempted from the deposit requirements.

B. Deposit Refund. Except as provided below, a customer shall be entitled to a refund of deposits on hand one (1) year after the required deposit is deposited with the City or when the account is closed. However, in the event a customer fails to make timely payment of a monthly billing, or allows any arrearage to accrue on the customer's account, then the customer shall not be entitled to a refund until the customer has first established a one (1) year record of timely payments with no arrearage. A deposit on a closed account will be refunded, less any amounts owed. No interest shall be paid by the City upon any deposit refund.

**7-03-001-0004 CONNECTION CUSTOMER METER AND WATER TAP FEES**

Any person desiring a connection with any main or lateral of the water or reclaimed water system of the City shall first make application to the City Utilities WATER SERVICES Division, and pay the fees and charges specified for the size of the service desired. All water meters connected to the City water or reclaimed water system are, shall be and shall remain the property of the City. THE SERVICE TO THE CITY'S MAIN IS THE RESPONSIBILITY OF THE APPLICANT'S CONTRACTOR AS SPECIFIED BELOW. Upon payment of the specified fees to the Treasurer by the applicant, the Utilities Division shall, within a reasonable time, make the connection and install the meter. Connection fees shall be:

For Meter Size

5/8" x 3/4"	Cost of meter, fittings and labor, plus overhead
1"	Cost of meter, fittings and labor, plus overhead
1-1/2"	Cost of meter, fittings and labor, plus overhead
2"	Cost of meter, fittings and labor, plus overhead
>2"	Cost of meter, fittings and labor, plus overhead

Connections made by a contractor as provided for in Section 7-3-1 hereof, where service lines have been previously installed and the City is required only to supply and install the meter, shall be subject to the following fees in lieu of the schedule shown above.

For Meter Size (COST OF METER, FITTINGS AND LABOR, PLUS OVERHEAD)

5/8" x 3/4"	<del>\$210.00</del> <u>\$806.00</u>
1"	<del>\$390.00</del> <u>\$972.00</u>
1 1/2"	<del>\$790.00</del> <u>\$1,466.00</u>
2"	<del>\$940.00</del> <u>\$1,703.00</u>
All others	Cost of meter, fittings and labor, plus overhead

For connections and meters larger than two inches (2"), the following deposit must be paid in advance before beginning the connection. Where the deposit is less than the actual cost, the difference will be billed and shall be paid by the applicant prior to service being established for such connection. Where the deposit is more than the actual cost, the difference shall be refunded within a reasonable period of time.

For Meter Size

3"	\$3,000.00
4"	\$4,000.00
6"	\$6,000.00
All others	Cost of meter, fittings and labor, plus overhead

**WATER TAP FEE**

**EACH PERSON, FIRM OR CORPORATION REQUESTING A WATER TAP TO BE INSTALLED BY THE CITY SHALL PAY THE FEE AS HEREBY ESTABLISHED:**

**THREE-QUARTER (3/4) INCH TO TWO (2) INCH WATER TAP: \$350.00.**

**THREE (3) INCH TO TWELVE (12) INCH: \$702.00.**

**ADDITIONAL TAP, SAME TIME, SAME PARCEL, SAME SIZE, 3/4" to 2": \$80**

**ADDITIONAL TAP, SAME TIME, SAME PARCEL, SAME SIZE, 3" to 12": \$160**

**ADDITIONAL TAP, SAME TIME, SAME PARCEL, DIFFERENT SIZE, 3" to 12": \$702**

**PROCEDURES FOR OWNER/CONTRACTOR:**

**OWNER/CONTRACTOR SHALL PAY CAPACITY FEES IF APPLICABLE.**

**OWNER/CONTRACTOR SHALL OBTAIN A PERMIT FROM THE ENGINEERING DIVISION AND PAY A PERMIT FEE BEFORE STARTING EXCAVATION.**

**WHEN NOTIFIED BY ARIZONA 811, WATER SERVICES DIVISION PERSONNEL WILL LOCATE THE WATER MAIN FOR OWNER/CONTRACTOR.**

**OWNER/CONTRACTOR EXCAVATES SITE AND SHORES TRENCH IF NECESSARY, SHORING SHALL BE DETERMINED BY ENGINEERING DIVISION PERSONNEL. OWNER/CONTRACTOR INSTALLS TAPPING SLEEVE AND CORPORATION STOP ON WATER MAIN. ONCE THE TRENCH AND TAPPING SADDLE ARE APPROVED BY THE ENGINEERING INSPECTOR, THE ENGINEERING INSPECTOR WILL SCHEDULE A WATER DISTRIBUTION CREW TO COMPLETE THE TAP.**

**ENGINEERING INSPECTOR INSPECTS THE OWNER/CONTRACTOR'S WORK AND APPROVES IF WORK IS COMPLETED SATISFACTORILY.**

OWNER/CONTRACTOR COMPACTS AND BACKFILLS TRENCH, REPLACES PAVEMENT IF NECESSARY.

FINAL INSPECTION IS DONE BY THE ENGINEERING INSPECTOR.

APPROVAL (PERMIT SIGN-OFF) IS MADE BY THE ENGINEERING INSPECTOR.

OWNER/CONTRACTOR SHALL NOT TAP THE WATER MAIN AT ANY TIME.

All water taps or connections made outside the corporate limits of the City shall be 110% of the above charges, fees and/or deposits.

~~The connection fee for automatic read meters shall include an additional \$130.00 for the meter interface unit and the meter adder.~~

### 7-03-001-0005 SERVICE CHARGES

In addition to the other charges and fees required by this Chapter, the following service charges shall apply:

Description	Service Fee Current	Service Fee 01/01/2011 <u>09/01/2024</u>
<del>New Customer turn-on/off working hours-account activation fee for new customer at existing location</del>	<del>\$24.00</del>	<del>\$24.00</del>
<del>Emergency turn-on/off working hours</del>	<del>\$24.00</del>	<del>\$24.00</del>
<del>New Customer turn-on/off after hours</del>	<del>\$65.00</del>	<del>\$65.00</del>
<u>WATER SERVICE ESTABLISHMENT FEE (NEXT BUSINESS DAY)</u>		<u>\$45.00</u>
<u>WATER SERVICE ESTABLISHMENT FEE (SAME DAY SURCHARGE)</u>		<u>\$20.00</u>
Collection/ Non Payment charge	\$24.00	<del>\$24.00</del> <u>\$45.00</u>
Existing Meter Testing Rate		
Accuracy test (at customer's request) of a meter permanently connected to the water system. The fee is waived if meter testing reveals the meter was reading inaccurately	\$74.00	\$74.00
Backflow Prevention Permit Fee		
Inspection of backflow assembly whose installation has been authorized by permit.		\$87.00
Backflow Compliance Fee		
Additional site visit after customer has failed to correct backflow or reclaimed meter-related deficiencies for which they have received prior written notice. This fee recovers the cost of the additional field visit.		\$87.00

Description	Service Fee Current	Service Fee 01/01/2011 <u>09/01/2024</u>
Unauthorized Connection Fee For illegal service connections made to the public water main. Payable at the time of violation		Twice the System Capacity and Resource Fees
Large Meter Vault – Design Fee for Non-Std City of Flagstaff may provide design and construction documents for the large meter vaults required by the special needs of Developer-required facilities.		Billed at Cost
Perform ADEQ Regulatory Engineering Review and Permitting Services. City of Flagstaff may provide Engineering review and issue permits on behalf of ADEQ under a delegation agreement with ADEQ for water and sewer facilities.		Billed at Current ADEQ Rates in accordance with AAC R18-14-103

**7-03-001-0006 AUTHORITY REQUIRED**

It shall be unlawful for any person to turn on and furnish water or sewer service or authorize or direct another to do so without authority from the ~~Utilities~~ WATER SERVICES Division AND/OR CUSTOMER SERVICE SECTION; and any person violating the provisions hereof shall be guilty of a misdemeanor and incur a penalty in the sum of one hundred-fifty dollars (\$150.00)

**7-03-001-0007 MALICIOUS DAMAGE**

It shall be unlawful for any person intentionally to break, deface, tamper with or damage any meter, hydrant, valve, pipe or other water system appliance or fixture, or in any other manner interfere with the operation of any part of the water system of the City. It shall be unlawful for any person, with intent to injure or defraud, to connect any pipe, tube or other instrument with any main or service pipe for conducting water belonging to the City, for the purpose of taking water from such main or service pipe without the permission or authority of the ~~Utilities~~ WATER SERVICES Division AND/OR CUSTOMER SERVICE SECTION. (Ord. 800, 5-25-71) It shall be unlawful to permit any coupling, pipe, fitting, or tank not dedicated for potable water use to come into contact with public water facility dispensing hoses. Any person violating the provisions hereof shall be guilty of a misdemeanor and incur a penalty in the sum of one hundred-fifty dollars (\$150.00).

**7-03-001-0008 ACCOUNTS PAYABLE**

A. All water accounts charges for water sold and furnished to customers by the City shall be due and payable ~~at the office of the Treasurer~~ TO THE CUSTOMER SERVICE SECTION during regular business hours as established by the ~~Treasurer~~ CITY for the collection of such accounts, Monday through Friday, inclusive, holidays excepted.

B. All water accounts shall be due and payable upon presentation ~~by the office of the Treasurer~~ BY THE CUSTOMER SERVICE SECTION of invoice statement therefor, and shall

become delinquent thirty (30) days thereafter. If such charges are not paid within ten (10) days after such delinquent date, water service may be discontinued without notice and the City may pursue all remedies available at law. The Treasurer CUSTOMER SERVICE DIRECTOR is hereby authorized to consolidate more than one (1) charge for City services into one (1) itemized statement of charges at appropriate billing levels.

C. Any person found in violation of this section shall be guilty of a civil infraction and shall be fined a sum not to exceed five hundred dollars (\$500.00). Any violation which is continuing in nature shall constitute a separate offense on each successive date the violation continues, unless otherwise provided. Any enforcement action is subject to the civil enforcement procedures set forth in Section 1-15-001-0011.

**7-03-001-0009 METERS**

All water furnished or sold by the City shall be delivered or supplied through meter only, and every separate building supplied with City water must have its own separate service connection and meter, except that two (2) or more buildings located on the same lot or on contiguous lots under the same ownership or property known as a court, apartment house or block covering more than one lot, may be supplied through the same connection and meter as long as the single ownership continues. Upon change from such single ownership, a new and separate connection shall be immediately made for the building or premises to replace the in direct connection. No person having a water service connection shall otherwise furnish or deliver water to any other water user, whether gratuitously or for a charge.

**7-03-001-0010 WATER RATES**

There shall be charged the following rates for all water furnished consumers and measured by meter on any service connection with City water mains for and during each monthly billing period.

The base monthly service charge applies whether the water meter is active or inactive. The monthly service charge is based on the fixed cost of operation and maintaining the water system so that the system is available to provide water to the parcel when water service is activated. Parcels with shutoff water meters will continue to pay base monthly service fee since water service is available and may be activated and used by the property owner at any time.

A. Inside City Limits: The following monthly charges shall be effective with bills rendered on and after January 1, 1991.

Applicable sales taxes will be in addition to these charges.

Charge per one thousand (1,000) gallons of measured or estimated water use per month.

Energy Component:

Charge per one thousand (1,000) gallons, applied to all customer classes (refer to subsection (D) of this section)

Energy component cost will be calculated annually based on a one (1) year rolling average of water related energy costs as per subsection (D) of this section.

1. Water Resources and Infrastructure Protection Through Wildland Fire Management Component: In addition to all volume charges, each customer shall pay an additional fee based on water consumption as follows:

Effective 8-1-20	\$0.52 per 1,000 gallons
Effective 7-1-22	\$0.53 per 1,000 gallons

This fee shall be used to protect all Flagstaff water resources and infrastructure from wildland fires including water, wastewater, reclaimed water and stormwater.

### PRIVATE FIRE PROTECTION

<b>Connection Size (Inches)</b>	<b>Monthly Charge</b>				
	<del>1/1/11</del> <u>09/01/2024</u>	<del>1/1/12</del> <u>01/01/2026</u>	<del>1/1/13</del> <u>01/01/2027</u>	<del>1/1/14</del> <u>01/01/2028</u>	<del>1/1/15</del> <u>01/01/2029</u>

Rates for water sold or furnished to customers for use outside the City limits shall be one hundred ten percent (110%) the rates for water sold or furnished for use inside the City.

#### B. Special Rates:

Special rates for customers who are not included in existing customer classifications and have usage characteristics different from other customers may be negotiated between the City and customer, without requiring an amendment to the City Code.

C. Special Rates: If the initial bill of any new consumer or the final bill of any consumer shall show usage of less than one thousand (1,000) gallons for the initial or final billing period, the consumer shall be billed for the initial or final billing period at the prorated amount based on existing rates for each one hundred (100) gallons or fraction thereof.

Because fire hydrants are not designed to sustain continuous use and because such hydrants are part of the emergency fire protection system of the City, regular use of fire hydrants for water supply is discouraged. When an applicant for water to be delivered from a hydrant can show hardship if forced to obtain water from another source, and the request has been approved in writing by the City's ~~Utilities~~ **WATER SERVICES** Director, the Division may install a meter on a fire hydrant for the use of such applicant, following payment of the required fee for such installation and use. The applicant shall be and remain responsible for payment to the City for all water used through such hydrant meter, and for the purpose of protecting **THEM** himself may place a lock upon said meter.

The fee for installation and use of such hydrant meter shall be ~~\$356.00~~ 440.00. The rate of water delivered through a hydrant meter shall be at existing standpipe rate. In addition, a ~~seven hundred dollar (\$700.00) deposit will~~ **MAY** be required to assure repair work on the meters and **ASSOCIATED PARTS** hydrants if needed. **THE DEPOSIT FOR A THREE QUARTER (3/4) INCH METER IS TWELVE HUNDRED AND FORTY-FIVE DOLLARS (\$1245.00) AND THE DEPOSIT FOR A THREE (3) INCH METER IS THREE THOUSAND SEVEN HUNDRED AND EIGHTY DOLLARS (\$3780.00). EXCEPTIONS TO THE DEPOSIT WILL BE DETERMINED BY THE CUSTOMER SERVICE DIRECTOR.** ~~An additional three hundred dollar (\$300.00) will be required when a backflow prevention device is necessary.~~ The deposits will be refunded if there is no damage sustained when the meter and/or backflow device is returned to the City.

D. Automatic Rate Adjustments. The City agrees to adopt a rate schedule which provides for automatic adjustments to pass along increases in energy related operating costs for delivering water service based on the current electrical and gas tariff rates on file with the Arizona Corporation Commission. Automatic adjustments to the energy surcharge shall be calculated on an annual basis using the past **TWELVE (12)** months rolling average of water related energy charges.

1. Energy Cost Adjustment. City reserves the right to automatically pass along future increases in electrical and natural gas energy related charges imposed on City by another agency. These automatic adjustments may be made whenever the other agency: (1) increases the standard cost of energy beyond the current energy cost assumed by City in the proposed rate structure described in this section.
2. Adjustments shall begin on January 1 of each calendar year and continue through the end of year.

### **7-03-001-0011 WATER MAIN CAPACITY CHARGES**

The water main capacity charges for all new service connections to be charged by the Finance **CUSTOMER SERVICE** Section is presented in the following schedule:

- A. A capacity charge, as prescribed below, shall be assessed upon:
  1. Initial connection to the municipal water system; or

2. Any increase in meter size.

B. The capacity charges for the various types of users are as follows:

**SCHEDULE FOR CAPACITY CHARGES**

Meter Size	Capacity Charge		<u>MAXIMUM FLOW RATE (GPM)</u>
	<u>Effective 7/1/16</u> <u>09/01/2024</u>		
5/8" x 3/4"	<u>\$8,146</u>	<del>\$5,728</del>	<u>30</u>
1"	<u>\$13,604</u>	<del>\$9,566</del>	<u>50</u>
1-1/2"	<u>\$27,126</u>	<del>\$19,074</del>	<u>100</u>
2"	<u>\$43,418</u>	<del>\$30,530</del>	<u>160</u>
3"	<u>\$81,456</u>	<del>\$57,279</del>	<u>350</u>
4"	<u>\$84,459</u>	<del>\$95,484</del>	<u>500</u>
6"	<u>\$271,500</u>	<del>\$190,910</del>	<u>1,000</u>
8"	<u>\$434,417</u>	<del>\$305,468</del>	<u>1,600</u>
10"	<u>\$624,541</u>	<del>\$439,157</del>	<u>4,200</u>

Meters will be sized using the American Water Works Association Manual, AWWA No. M22. Sizing will be submitted to the City WATER SERVICES DIVISION Utilities Department by the developer or owner for City review.

WHEN THE FEE SCHEDULE REFERENCES "CALL", All capacity charges ARE BASED ON for connections larger than four inches (4") shall be based on a proration of midrange MAXIMUM flow gallons per minute (gpm) of a 5/8 x 3/4 inch meter divided into the midrange MAXIMUM flow of the meter to be evaluated. The resulting number shall be used as a multiplier times the capacity fee for a 5/8 x 3/4 inch meter to determine the large meter capacity fee. Meters will be sized using American Water Works Association Manual, AWWA No. M22. Sizing will be submitted to the City by the developer or owner for City review.

Where the capacity charge is based on volume, said charge will initially be calculated based on an estimate of flowage agreed upon by the City and the customer and will be adjusted based upon the volume of the highest consecutive twelve (12) month period for the thirty-six (36)

~~months immediately following commencement of service or assessment of an additional capacity charge.~~

When the capacity charge results from an increase in meter size the charge shall be adjusted to the difference between the charge for the new size meter and the ~~charge for the previous size meter~~ BASED ON THE CURRENT CAPACITY FEES. NO REFUND SHALL BE MADE IN THE CASE OF REDUCED VOLUME OF DISCHARGE FROM A CHANGE OF USE.

~~C. The Division shall review all customer accounts with meters larger than four inches (4") on an annual basis and assess an additional capacity charge when the annual average demand increases by twenty percent (20%) or more. The additional capacity charge will be calculated using the recommended meter size by AWWA Manual No. M22 or equating to equivalent 5/8 x 3/4 inch meters but substituting for demand the difference between actual current demand, as determined by the previous twelve (12) month average, and the demand used to calculate the previous capacity charge assessed upon the customer.~~

C. CAPACITY FEE INSTALLMENT PAYMENTS. CAPACITY FEES MAY BE PAID FOR BY INSTALLMENT PAYMENTS IN ACCORDANCE WITH THE FOLLOWING CONDITIONS:

1. A CAPACITY FEE THAT TOTALS AN AMOUNT GREATER THAN ONE HUNDRED THOUSAND DOLLARS (\$100,000) MAY BE PAID AS FOLLOWS:

A. NO LESS THAN ONE-THIRD (1/3) OF THE TOTAL CAPACITY FEE DUE IS TO BE PAID UPON RECEIPT OF THE APPLICATION FOR CONNECTION TO THE WATER SYSTEM.

B. THE BALANCE DUE OF THE CAPACITY FEE IS TO BE PAID IN EQUAL MONTHLY INSTALLMENTS OVER NO MORE THAN THIRTY-SIX (36) MONTHS TO INCLUDE AN INTEREST RATE CALCULATED TO BE THE PRIME RATE + 1/2% AT THE TIME OF THE APPLICATION.

C. THE CUSTOMER MAY BE REQUIRED TO SECURE THE BALANCE DUE TO THE CITY BY A LETTER OF CREDIT DRAWN IN FAVOR OF THE CITY, OR IN ANY OTHER FORM OF SECURITY SATISFACTORY TO THE CITY MANAGER, CITY ATTORNEY AND MANAGEMENT SERVICES DIRECTOR.

**7-03-001-0012 WATER REVENUE FUND**

There is hereby created a fund to be known and kept as the "water fund". Said fund shall be applied exclusively to the payment of the expense of operating, maintaining and keeping in repair the said water system, the payment of interest of any bonds issued for the purpose of construction of waterworks, and the establishment and continuance of a sinking fund.

**7-03-001-0013 CITY WATER MAIN EXTENSION POLICY**

A. Definitions: For the purpose of this Section, the following words and phrases shall have the meanings respectively ascribed to them herein, unless the text clearly indicates otherwise.

DEVELOPER AND OWNER: Any person or persons engaged in the requesting and financing of a water main extension beyond the present City water mains to one or more parcels of land.

The term includes subdividers, industrial developers, private property owners and companies, who improve platted or unplatted property.

CITY: The word "City" shall mean the City of Flagstaff in the County of Coconino, State of Arizona, except as otherwise indicated.

MAIN: Any water line which constitutes or will constitute part of the City water system.

B. Size of Water Main Extensions: No water main will be installed with less than the minimum pipe size dictated by good engineering practice, and adopted standards set forth in the Uniform Building Code (current adopted edition), Uniform Fire Code (current adopted edition), General Construction Standards and Specifications of the City, current subdivision regulations, or the general land use plan currently adopted.<sup>1</sup> In no case shall any water main be of a size less than six inches (6") for residential areas and eight inches (8") for commercial and industrial areas.

1. Section 8-10-001-0001; Title 8 of the City Code, respectively

C. Replacement or Repair: All persons or other entities who create, cause to be built or build any such extensions of any services as contemplated herein, shall also pay for any and all such replacements as becomes necessary as a direct or indirect result of the creation, building or construction of such extensions. For example, repairs or replacement of sidewalks, paving or other utilities damaged or disturbed during the building of water line extensions.

D. Agreement Between City and Developer-Owner: Before the extension of any water main shall be made to serve a subdivision, platted or unplatted property, or any existing main tapped to provide service for any individual or unplatted property, the developer-owner desiring such service shall execute an agreement with the City which shall include in the following:

1. A warrant of workmanship QUALITY and material for mains and facilities installed which shall run to the benefit of the City for a period of at least one year, from the date of acceptance by the City.
2. A diagram of all property which may be served by any main and appurtenances upon completion and acceptance of the work by the City.
3. A statement that the City acquires ownership of any main and appurtenances upon completion and acceptance of the work by the City.
4. A statement of the developer-owner's proportionate share of the cost for previously installed mains, if any reimbursement agreements are in existence concerning the line.

E. Costs of Extension: The developer causing an extension of water mains shall pay in full for the rights of way and easements, the purchase, construction and installation of the lines, pipes, mains, fire hydrants and all other extension costs. However, the City reserves the right to increase the diameter of the main extension if it is deemed advisable, but under the condition that the laid cost of the main extension of the larger diameter pipe to the developer will not exceed the laid cost of the same extension of a size necessary to serve solely the proposed development.

F. Penalty: Any person who excavates or causes an excavation to be made for the purpose of laying any water lines or pipes in the public streets, alleyways or other property of the City

without first complying with the provisions hereof, shall be subject to a fine of not less than two hundred dollars (\$200.00) nor more than three hundred dollars (\$300.00). A separate offense shall be deemed committed upon each day during or on which a violation occurs or continues.

## **7-03-001-0014 WATER CONSERVATION**

### **A. Definitions:**

1. **Commercial Provision:** An agreement between the WATER SERVICES Utilities Division and a commercial customer where compliance with the Strategy Level may cause unreasonable economic hardship. A Commercial Provision may be applied for by a business that requires a water use for its day-to-day business operation to succeed. There is no fee associated with obtaining a Commercial Provision. Commercial Provisions shall not be considered for aesthetic landscaping purposes. Examples of businesses that may request a Commercial Provision include, but are not limited to, landscapers and nurseries. A request for a Commercial Provision shall be made in writing to the WATER SERVICES Utilities-Director and shall include the nature of the business, the anticipated water usage per day, and what steps are being taken to conserve water at the business location. Approval and denial commercial provision letters shall be copied to the City Manager and City Council for informational purposes.
2. **Emergency Authority:** Authority to make operational adjustments and/or changes to the potable water and reclaimed water system for the purpose of protecting the system from damage, maintaining water supply, or restoring the system to operation after a system failure. This includes authority to mix potable water with reclaimed water for the purpose of protecting the system from imminent system damage.
3. **Even-numbered address:** Any street address ending in; zero (0), two (2), four (4), six (6), or eight (8).
4. **Irrigate:** To supply land or crops with water by means of pipes or hoses.
5. **Odd-numbered address:** Any street address ending in; one (1), three (3), five (5), seven (7), or nine (9).
6. **Potable Water:** Water that is safe and satisfactory for drinking and cooking.<sup>1</sup>
7. **Reclaimed Water:** Water that has been treated or processed by a wastewater treatment plant or an on-site treatment facility. (ARS 49-201.31)
8. **Resource Status I:** When water demand is equal to or less than safe production capability.
9. **Resource Status II:** When water demand exceeds safe production capability for five (5) consecutive days.
10. **Resource Status III:** When water demand exceeds total production capability and the amount of water in storage may impair fire protection for the City.
11. **Safe Production Capability:** 90% of total water resources available measured in million gallons per day (MGD), based on potable water production and distribution components.

12. Special Provision: An agreement between the WATER SERVICES Utilities-Division and a large-volume irrigator allowing special hours of irrigation due to public access concerns or hydraulic constraints.
13. Surcharge: To charge an additional fee, cost, or levy.
14. Total Production Capability: The total water resources available measured in million gallons per day (MGD), based on potable water production and distribution components.
15. Unreasonable Economic Hardship: A hardship where a business' ability to operate using normally accepted practices is adversely affected by the water restriction.
16. Water Availability Strategy: An effort initiated to ensure the availability of adequate water resources for the future, and in times of emergency.
17. Wasting Water: To use or expend water thoughtlessly or carelessly. Examples include, but are not limited to, allowing water to run into the street/gutter, allowing water to pool, irrigating during precipitation events, and failing to repair water leaks. The determination of Wasting Water shall be made by a representative of the City of Flagstaff.

<sup>1</sup> Symons, James M. et al., The Drinking Water Dictionary (American Water Works Association, 2001), P. 333.

B. The City Manager, upon the recommendation of the WATER SERVICES Utilities-Director, after notification to the City Council is hereby authorized to declare and suspend Water Availability Strategies and elements of Strategies. The Strategies may be initiated and suspended based upon Resource Status Levels, or other pertinent information, which evaluate the relationship between water demand and municipal safe production capability.

C. The WATER SERVICES Utilities-Division has emergency authority to take operational measures deemed necessary to protect the potable and reclaimed water systems.

D. Augmentation of the reclaimed water system with potable water except as referenced in Paragraph C shall require prior approval of the City Manager, upon the recommendation of the WATER SERVICES Utilities-Director and after notification to the City Council.

E. The following Water Availability Strategies shall govern the use of City water by any user of the City potable water system, as prescribed below:

1. Strategy I: Water Awareness (may implement with Resource Status I). Conserve water, in and outside of the home, using the best practices available to minimize waste. Water users are specifically encouraged to landscape with plant materials requiring little or no supplemental irrigation water. The following uses are restricted or prohibited.

No person shall:

- a. Irrigate between the hours of 9 AM and 5 PM. Even-numbered street addresses shall irrigate Wednesday, Friday, and Sunday. Odd-numbered street addresses shall irrigate Tuesday, Thursday, and Saturday. No irrigation shall be allowed on Monday. Daily hand watering with a hose or watering can is allowed. Strategy I irrigation hours

shall apply to hand watering. Water use for maintenance of irrigation systems is permitted during all times of the day.

- b. Use water from a fire hydrant unless for public health or safety, or with the authorization of the WATER SERVICES ~~Utilities~~-Division.
- c. Waste water, as defined in section A.
- d. Irrigate golf courses with potable water.

New landscape permits. Daily irrigation of new landscape may be allowed for elective landscaping and will be allowed for required landscaping by obtaining a permit from the Water Conservation Office. The permit shall be good for a maximum of thirty (30) days. The fee for the permit shall be ten dollars (\$10) to cover administration and printing, and shall be adjusted to cover changing costs. The permit shall be obtained prior to landscape installation and prominently posted at the irrigation site. The determination of provision of an elective landscaping permit shall be made by a representative of the WATER SERVICES ~~Utilities~~-Division and may be appealed by the applicant to the Flagstaff Water Commission if thought to be unreasonably denied. The decision of the Water Commission shall be final. Strategy I irrigation hours shall apply to irrigation permits.

2. Strategy II: Water Emergency (may implement with Resource Status II). In addition to the requirements of Strategy I, the following uses are restricted or prohibited.

No person shall:

- a. Irrigate or wash vehicles, except as provided. Even-numbered street addresses are restricted to said uses on Wednesday, Friday, and Sunday. Odd-numbered street addresses are restricted to said uses on Tuesday, Thursday, and Saturday. No outdoor watering activity shall be allowed between the hours of 9 AM and 5 PM. Vehicle washing for public health and safety shall be exempt. This restriction shall not apply to commercial car washes.
- b. Wash paved areas such as drives, sidewalks and tennis courts, or buildings, except for health or safety. Restriction shall not apply to commercial high pressure water blasting for maintenance or construction purposes during strategy II. The use of Reclaimed Water for said uses shall not be restricted.
- c. Use potable water for filling ornamental fountains, artificial ponds or streams.
- d. Fill recreational swimming pools, spas, or wading pools holding more than one hundred (100) gallons.
- e. Use potable water for major construction activity, such as dust control, soil compaction, or street cleaning. Major construction activity shall be considered that activity requiring the use of a hydrant meter for the dispensing of potable water or obtaining the water from City of Flagstaff standpipes.

Single-Family Residential, and all lawn meter rates shall increase to one hundred fifty percent (150%) of the established rate for any water consumption between six thousand two hundred one (6,201) and eleven thousand five hundred (11,500) gallons. Rates shall increase to two

hundred percent (200%) of the established rate for any water consumption greater than eleven thousand five hundred one (11,501) gallons per billing cycle. Rate increases shall take effect with the billing cycle(s) following the implementation of Strategy II.

Multi-family, Commercial, Industrial, and Institutional water rates shall increase to 120% of the established rate. The rate increase shall take effect with the billing cycle(s) following the implementation of Strategy II.

Potable water standpipe rates shall increase to one hundred thirty percent (130%) of the established rate. The rate increase shall take effect upon implementation of Strategy II. Standpipe water shall be limited to uses within a twenty-five (25) mile radius of City Hall. Standpipe water shall not be used for major construction activity, dust control, irrigation of decorative landscaping and/or turf.

No new elective or required landscaping permits shall be issued. Landscaping not installed and required by the City of Flagstaff to meet the Land Development Code will not delay a Certificate of Occupancy to be issued providing its installation is delayed as a result of a suspension of new landscaping permits and a surety is provided acceptable to the Community Development Division.

Upon suspension of Strategy II, rates shall return to their respective level with the billing cycle(s) following the date of the suspension, or in the case of standpipe rates, upon suspension.

3. Strategy III. Water Crises (may implement with Resource Status III). In addition to the requirements of Strategy I and Strategy II, the following uses are restricted or prohibited.

No person shall:

- a. Use any potable water for outside use.
- b. Use fire hydrants, unless for public health, safety, and welfare by authorized government agencies only.
- c. Waste water intentionally or unintentionally. Specifically applies to all residential, commercial, industrial, and institutional use.
- d. Use potable water in violation of any other restriction deemed necessary by the City Council for the purpose of protecting the welfare of the citizens of Flagstaff.

No new Special or Commercial provisions shall be allowed unless approved by the Flagstaff City Council or the Water Commission.

D. Surcharges/Appeals:

1. A Surcharge of \$25.00 shall be assessed to the account of record for a violation of Strategy I.
2. A Surcharge of \$50.00 shall be assessed to the account of record for a violation of Strategy II.

3. A Surcharge of \$100.00 shall be assessed to the account of record for a violation of Strategy III.
4. Surcharges shall double for every repeat violation. Each succeeding Surcharge under the prevailing strategy level may be twice the previous Surcharge assessed for the previous violation.
5. A commercial water hauler determined to be violating the standpipe restrictions shall pay a surcharge equal to that for the appropriate Strategy Level prior to the receipt of additional water.
6. The assessment of the Surcharge may be informally appealed, in writing, within fourteen (14) calendar days of the notice of the Surcharge assessment. The written appeal shall be received by the City of Flagstaff WATER SERVICES ~~Utilities~~-Division within said fourteen (14) day time limit or the right to such appeal shall be permanently waived. Address all Surcharge-related correspondence to:

City of Flagstaff WATER SERVICES ~~Utilities~~-Division  
Water Conservation Program Manager

2323 N WALGREENS ST, SUITE 1 ~~211 West Aspen Avenue~~  
Flagstaff, AZ 86004 ~~86001~~

### **7-03-001-0015 CROSS CONNECTION CONTROL**

#### **A. Definitions.**

**Approved:** The term "approved" as herein used in reference to a water supply shall mean a water supply that has been approved by the Arizona Department of Environmental Quality (ADEQ) and the City of Flagstaff.

The term "approved" as herein used in reference to backflow prevention assemblies or methods shall mean an approval by the City of Flagstaff, WATER SERVICES ~~Utilities~~-Division based on a favorable laboratory and field evaluation report by a testing laboratory recognized by the Division.

**Assembly:** Any system for backflow protection consisting of more than one component and having been tested as one unit, and approved as one unit by the Division.

**AWWA:** American Water Works Association.

**Backflow:** The undesirable reversal of flow of water or mixtures of water and other liquids, gases, or other substances into the distribution pipes of the potable water supply from any source or sources. Backflow is caused by either backpressure or backsiphonage.

**Backflow prevention assembly approval:** Any backflow prevention assembly equipped with test cocks shall have been issued a certificate of approval by the USC Foundation for Cross-Connection Control and Hydraulic Research. Any backflow prevention assembly not equipped with test cocks shall be certified by a third-party entity unrelated to the product's manufacturer or vendor and approved by the Arizona Department Of Environmental Quality (ADEQ). A backflow

prevention assembly not listed by USC-FCCCHR cannot be used for containment, fire line or landscape protection.

**Backflow prevention method:** A backflow prevention method may be approved by the City of Flagstaff if it is contained in the most current edition of the USC-FCCCHR Manual of Cross-Connection Control.

**Backflow Prevention Assembly Tester (registered):** A person who is currently certified by an authority recognized in the Arizona Department of Environmental Quality regulations and is approved and registered with the City of Flagstaff to test, repair, and maintain backflow prevention assemblies.

**Backpressure:** Any Elevation of pressure in the customer's water distribution system (by pump, elevation of piping, or steam and/or air pressure) above the public potable water supply pressure which could cause a reversal of the normal direction of water flow from the consumer's water supply system into the public potable water supply system.

**Backsiphonage:** A form of backflow due to a reduction in the public water supply system pressure which causes a negative or sub-atmospheric pressure to exist at a site in the water system. A reversal in the normal flow of water results.

**Check Valve –** A valve that allows free flow in one direction and stops flow in the other direction.

**Close as practicable:** Is the point nearest the service connection where the assembly can be installed. Where the assembly installation location may interfere with obstacles such as driveways and sidewalks, then close as practicable is the nearest point after the obstacle, but in no event beyond the first tap.

**Compliance date:** The annual date by which the annual backflow prevention assembly compliance test report must be received by the City of Flagstaff Cross Connection Control office.

**Consumer or Customer:** The owner, official custodian or person in control of any premises or any property supplied by or in any manner connected to the City of Flagstaff public water supply system.

**Contamination:** An impairment of the quality of the water which creates an actual hazard to the public health through poisoning or through the spread of disease by sewage, industrial fluids, waste, etc.

**Cross-Connection:** Any unprotected actual or potential connection or structural arrangement between a public or a consumer's potable water system and any other source or system through which it is possible to introduce into any part of the potable system any used water, industrial fluid, gas, or substance other than the intended potable water with which the system is supplied. By-pass arrangements, jumper connections, removable sections, swivel or change-over devices and other temporary or permanent devices through which or because of which "backflow" can or may occur are considered to be cross-connections.

**Division:** The City of Flagstaff, Water Services Division.

Hazard: A cross connection or potential cross connection between the public water supply and a private plumbing system involving any substance that could, if introduced into the public water supplies, be aesthetically objectionable or a nuisance (pollution), cause severe damage to the physical facilities of the public water supply systems, cause death, illness, or spread disease (contamination), or have a high probability of causing such effects.

Hazard, Degree of: Evaluation of the potential risk to the public health and/or adverse effects upon the potable water supply system. Health hazards shall be classified as contamination while non-health hazards shall be classified as pollution.

Health Hazard: Any condition, device or practice in a water system or its operation resulting from a real or potential danger to the health and well-being of consumers. The word "severe" as used to qualify "health hazard" means a hazard to the health of the user that could be expected to result in death or significant reduction in the quality of life.

Improper: Not functioning within the manufacturer's or City of Flagstaff's specifications or the requirements of this section.

Inspection: A visual examination of a premise or any backflow protection equipment, materials, workmanship QUALITY OF WORK and operational performance.

Maintenance: Work performed or repairs made to keep backflow prevention assemblies operable and in compliance.

O.S. & Y. Valve: Outside screw and yoke control valve for fire sprinkler systems.

Pollution: An impairment of the quality of the water to a degree which does not create a hazard to the public health but which does adversely and unreasonably affect the aesthetic qualities of such waters for domestic use.

Proper: Functioning within the parameters of the manufacturer's and City of Flagstaff's specifications and the requirements of this article.

Public water supply system: All mains, pipes and structures owned and/or maintained by the City of Flagstaff, through which water is obtained and distributed to the public, including wells and well structures, intakes and cribs, pumping stations, treatment plant reservoirs, storage tanks and appurtenances, collectively or separate, actually used or intended for use for the purpose of furnishing potable water.

Reclaimed water: Wastewater that has been sufficiently treated by the City of Flagstaff's water reclamation plants for approved use, and is provided through the City of Flagstaff's reclaimed water system.

Retrofit: Furnish new parts, equipment, or method of installation, any existing assembly that does not meet the requirements of this ordinance in such a way that will bring the assembly into compliance with this Ordinance.

Service Connection: The terminal end of a water tap from the public potable water system, (i.e. where the water purveyor may lose jurisdiction and sanitary control over the water at its point of delivery to the consumer's water system). If a city-owned meter is installed at the end of the service connection, then the service connection shall mean the discharge end of the meter.

Service Protection: The acceptable backflow prevention method installed between a City of Flagstaff's water meter and a customer's private plumbing system.

Testing: An authorized procedure to determine the operational and functional status of a backflow prevention assembly.

B. Purpose and Application.

1. To protect the public water supplies of the City of Flagstaff from the possibility of contamination or pollution by preventing the backflow of contaminants and pollutants into the public water supply systems.
2. To promote the elimination or control of cross-connections, actual or potential, between a customer's internal water systems, plumbing fixtures, industrial piping systems, and the public water supply.
3. To provide for a continuing program of cross-connection control which will prevent the contamination or pollution of the public water supply systems.
4. To implement the requirements of the most current AAC pertaining to the cross-connection control program requiring public water systems to protect against backflow, and to this end, this chapter shall be construed and applied consistently with the requirements of the most current AAC.

C. General Requirements.

1. Cross-connections prohibited. Connections between the public water supply system and other systems or equipment containing water or other substances of unknown or questionable quality are prohibited except when and where approved backflow prevention assemblies or methods are installed or implemented, tested and maintained to Division specifications to insure proper operation on a continuing basis.
2. Rights and Responsibilities of the Division. It shall be the right and responsibility of the Division to evaluate and investigate as deemed necessary, industrial and commercial properties served by the public water supply to determine whether actual or potential hazards to the public water supply exist. Such evaluations and investigations shall be repeated as often as the Division deems necessary.

It shall also be the right and responsibility of the Division to require the installation and annual testing of backflow prevention assemblies at any premises or property where such potential or actual hazards are found to exist.

3. Responsibility of the Consumer. The consumer, as defined by Section 7-03-001-0015(A), shall be responsible and financially obligated for the protection of the public water supply system from the possibility of contamination or pollution due to backflow or backsiphonage of contaminants through the customer's water service connection into the public potable water system.
4. Existing Facilities.

a. All presently installed backflow prevention assemblies, devices, or methods which do not meet the requirements of the Division and/or applicable state or federal regulations but were approved for the purposes described herein at the time of installation shall be evaluated for their ability to efficiently and satisfactorily protect the public water system from potential or existing cross connections with the private water supply. If, upon such evaluation, the Division determines that an existing device, method or assembly does not meet existing requirements, the customer shall at their own expense, upon due written notice and within the prescribed time indicated on the notice; retrofit, replace or modify the installation of such to meet current standards or show just cause for noncompliance.

b. Whenever an existing device, method or assembly is removed or moved from the present location, requires more than minimum maintenance, or when the Division finds that the maintenance constitutes a hazard to health, the unit shall be replaced by an approved backflow prevention assembly meeting the requirements of these regulations.

c. If an existing facility undergoes construction for improvements or change of use, the installed backflow assemblies will be evaluated for hazard. If it is found the current backflow assembly(ies) is inadequate protection, the customer will be required to replace with a device suited for the hazard.

5. New Facilities.

a. New facilities shall present their plans for review by an authorized representative of the Division for determination of cross-connection hazards.

b. All backflow prevention assemblies to be installed shall be shown on all required building and engineering plans. No installation of assemblies shall be made unless these plans are reviewed and approved by an authorized representative of the Division.

c. During construction of new facilities, water shall not be used for construction purposes until the containment backflow assembly has been tested.

d. All assemblies shall be inspected by an authorized representative of the Division upon installation and the consumer shall provide written verification that the assembly has been successfully tested as described in subsection (K) of this section, prior to issuance of certification of occupancy. Water service may be withheld if the assembly is not installed and tested in accordance with this chapter and Division requirements.

6. Adoption of Public Record. The most current edition of the USC-FCCCHR Manual of Cross-Connection Control.

D. List of Backflow Prevention Methods. A backflow prevention method shall be any assembly or other means designed to prevent backflow. The following are the recognized backflow prevention methods which the City of Flagstaff may require (in order of degree of protection):

1. Air Gap (AG): The unobstructed vertical distance through the free atmosphere between the opening of the pipe or faucet supplying potable water to a tank, plumbing fixture or other device. An approved air gap shall be at least double the effective opening of the supply pipe or faucet and in no case less than one (1) inch above the flood rim.

2. Reduced Pressure Principle Assembly (RPA or RP): An assembly containing two (2) independently acting approved check valves together with a hydraulically operating, mechanically independent pressure differential relief valve located between the check valves, and at the same time, below the first check valve. The assembly shall include properly located test cocks and tightly closing shutoff valves located at each end of the assembly.
3. Reduced Pressure Principle Detector Assembly (RPDA): An assembly composed of a line sized approved reduced pressure principle assembly with a bypass containing a specific water meter and an approved reduced pressure principle assembly.
4. Double Check Valve Assembly (DCVA or DC): An assembly composed of two (2) independently acting, approved check valves, including tightly closing shutoff valves located at each end of the assembly and fitted with properly located test cocks.
5. Double Check Detector Assembly (DCDA OR DDCVA): An assembly composed of a line size approved double check valve assembly with a bypass containing a specific water meter and an approved double check valve assembly.
6. Pressure Vacuum Breaker Assembly (PVB): An assembly containing an independently operating, loaded check valve and an independently operating, loaded air inlet valve located on the discharge side of the check valve. The assembly shall be equipped with properly located test cocks and tightly closing shutoff valves located at each end of the assembly.
7. Spill-Resistant Pressure Vacuum Breaker (SVB): An assembly containing an independently operating internally loaded check valve and an independently operating loaded air inlet valve located on the discharge side of the check valve. The assembly shall be equipped with a properly located resilient seated test cock, properly located bleed/vent valve and tightly closing resilient seated shutoff valves located at each end of the assembly.
8. Repealed by Ord. 2021-09.
9. Repealed by Ord. 2021-09.

E. Backflow Prevention Methods Required.

1. The following conditions shall warrant the installation of an approved backflow prevention assembly:
  - a. When the City of Flagstaff determines that the water supplied by the public water systems may be subject to contamination or pollution, an approved backflow prevention method shall be required at every service connection to a customer's water system. The customer shall install the required backflow protection within the time specified by the City of Flagstaff. In determining the time in which backflow protection shall be installed, the City of Flagstaff shall consider the degree of hazard potential to the public water supplies.
  - b. The backflow prevention method required shall be determined by the City of Flagstaff. The method required by the City of Flagstaff shall be sufficient to protect against the hazard potential as stated in the most current edition of the University of

Southern California Foundation for Cross-Connection Control and Hydraulic Research (USC-FCCCHR) Manual of Cross-Connection Control.

- c. Premises with internal cross-connections which the division determines to be noncorrectable, or premises with plumbing systems so intricate that a cross-connection inspection is impossible or impractical.
- d. Premises with security restrictions or other access prohibitions which make cross-connection inspections impossible or impractical.
- e. Premises with an existing unprotected cross-connection or with a history of cross-connection violations.

2. Whenever the following items exist or activities are conducted on premises served by the public water systems, a potential hazard to the public water supplies shall be presumed, and a backflow prevention method of the type specified herein for that item or activity must be utilized or installed at each service connection for that premises. If an activity or item is not on the following list, it shall be evaluated by the City of Flagstaff and a method of backflow prevention will be determined.

- a. Cooling tower, boiler, condenser, chiller, and other cooling systems: RP.
- b. Tank, vessel, receptacle, and all other water connections, including mobile units, except emergency vehicles and private swimming pools: RP.
- c. Ice maker (other than a residential service): RP.
- d. Water-cooled equipment, boosters, pumps or autoclaves: RP.
- e. Water treatment facilities and all water processing equipment (other than residential water softeners): RP.
- f. Bottle washer, bedpan washer, garbage can washer: RP.
- g. Pesticide, herbicide, fertilizer, and chemical applicators (other than typical in-home use): RP.
- h. Aspirator: RP.
- i. Commercial dishwashers, food processing and/or preparation equipment, carbonation equipment or other food service processes: RP.
- j. Decorative fountain, baptismal, nonresidential swimming pool or spa, or any location water is exposed to atmosphere: RP.
- k. X-ray equipment, plating equipment, or any other photographic processing equipment: RP.
- l. Auxiliary water supply and/or connections to unapproved water supply systems: RP.

- m. Reclaimed water sites with potable water connections: RP on the potable meter, AG between feed line from supplemental domestic water supply to a holding tank to reclaim water lines.
- n. Recreational vehicle dump stations (sewer), or any other location where water may be exposed to bacteria, virus or gas: RP.
- o. Any premises on which chemicals, oils, solvents, pesticides, disinfectants, cleaning agents, acids or other pollutants and/or contaminants are handled in a manner by which they may come in direct contact with water, or there is evidence of the potential to contact water: RP.
- p. Materials and piping systems unapproved by the currently adopted City of Flagstaff Plumbing Code or Environmental Protection Agency (EPA) for potable water usage: RP.
- q. Separately metered or unprotected irrigation systems, and construction water services: RP or PVB/SVB as allowed.
- r. Any premises where a cross-connection is maintained or where internal backflow protection is required pursuant to the City of Flagstaff adopted plumbing code: RP.
- s. Multimetered properties with more than one (1) meter connected to another or any building three (3) stories or greater than thirty-four (34) feet in height from service level: RP.
- t. Fire systems – AWWA Classes 1 and 2 and all systems constructed of a piping material not approved for potable water pursuant to the City of Flagstaff Plumbing Code: DCVA (DC) or Double Detector CVA (DCDVA): DC residential fire sprinklers shall be exempt from this requirement.
- u. Fire systems – AWWA Class 3, 4, 5, 6: RP or RP with detector.
- v. Fire systems which require backflow protection and where backflow protection is required on the industrial/domestic service connection that is located on the same premises, both service connections will have adequate backflow protection for the highest degree of hazard affecting either system: RP.
- w. Any premises which has a source of water supply that is not accepted by the public water system or not approved by the Arizona Department of Environmental Quality: RP or AG as determined by the City of Flagstaff.
- x. Any premises where an unprotected cross-connection exists or where there has previously occurred a cross-connection problem within the premises: AG or RP as determined by the City of Flagstaff.
- y. Any premises where there is a significant possibility that a cross-connection problem will occur and entry onto the premises is restricted to the extent that cross-connection inspections cannot be made with sufficient frequency or on sufficiently short notice to assure that unprotected cross-connections do not exist: RP or AG as determined by the City of Flagstaff.

- z. Multi-use commercial property: RP.
- aa. Properties with active private wells: RP.
- bb. Consecutive systems, when required by the City of Flagstaff: RP.
- cc. Fire hydrant/construction water: RP.
- dd. Jumper connection to new water mains: RP.
- ee. Post mix soda machine with a carbonator: ASSE 1022.
- ff. Shampoo sink: RP.
- gg. Brewery, distillery, meadery, or alcohol making process: RP OR AG.
- hh. Hospitals and medical offices: RP.

F. Installation Requirements.

1. The Division shall use the most current edition of the USC-FCCCHR Manual of Cross-Connection Control for list of approved assemblies.
2. Backflow prevention assemblies shall have a diameter at least equal to the diameter of the service connection.
3. Backflow prevention assemblies shall be installed and maintained by the customer, at the customer's expense and in compliance with the standards and specifications adopted by the City of Flagstaff at each service connection. The customer is responsible for notifying the City of Flagstaff Industrial Pretreatment Section of any installation, repair, relocation, removal, or replacement.
4. The approved assembly shall be installed above ground, as close as practicable, to the service connection before the first branch line leading off the service line, and in a hot box with electricity for heat. The heated enclosure must be ASSE 1060 certified or similar. The electrical for the heat must be installed in accordance with City-approved building code and City Engineer standard drawing 19-02-025. Assemblies shall be installed per manufacturer's specifications with adequate clearances for testing and maintenance, and not installed in a meter box, pit or vault.
  - a. Where containment at the property line cannot be achieved or is waived based on extenuating circumstances, installation within a building can be completed, provided a City of Flagstaff Attorney-approved "Backflow Prevention Assembly Hold Harmless Agreement" is signed by the property owner and notarized. This document must be received and approved by the City of Flagstaff Industrial Pretreatment Supervisor prior to the installation of the backflow prevention assembly. The interior installation of a backflow assembly must be done as close as practicable to the incoming water line.

- b. Internal installations shall have clearance on all sides and ends for testing and maintenance. RP and DC assemblies must have twelve (12) inch bottom clearance from lowest point on the assembly (i.e., relief valve on RP style).
5. When a customer requires a continuous water supply, two (2) backflow prevention assemblies shall be installed parallel to one another at the service connection to allow a continuous water supply during testing, repair and/or maintenance of the backflow prevention assemblies. When backflow prevention assemblies are installed parallel to one another, the sum of the cross-sectional diameters of the assemblies shall be at least equal to the cross-sectional diameter of the service connection or service line piping at the point of installation and the assemblies shall be of the same type.
6. For an AG installation all piping installed between the user's connection and the receiving tank shall be entirely visible unless otherwise approved in writing by the City of Flagstaff Industrial Pretreatment Section.
7. Any property with more than one (1) water service connection shall install backflow prevention assemblies on each service connection to the property, unless otherwise designated by the Division.
8. Fiberglass insulation cannot be wrapped or otherwise placed around a backflow prevention assembly as a form of freeze protection as it allows condensation to occur and subsequent degradation of the backflow prevention assembly. There must be adequate air flow around the backflow prevention assembly to prevent the formation of condensation on the assembly or for a purge event by a RP relief valve.
9. All test cocks and relief ports on a backflow prevention assembly must be accessible for testing and for release of water from the relief port during a discharge event.
10. PVB, AVB, or RP backflow assemblies are approved for irrigation systems. Valves shall not be installed downstream from an AVB. If chemicals will be used, a RP assembly is required.
11. If a customer fails to install a backflow prevention assembly pursuant to this chapter, the City of Flagstaff shall discontinue water service and assess a compliance fee pursuant to this chapter.
12. If, in the judgment of the Division, an approved backflow prevention assembly is necessary for the protection of the public water system, the Division shall give notice to the consumer to install such. The consumer, after due written notice and within the prescribed time indicated on the notice, shall install such approved assembly(ies) at their own expense. Installation of such assembly(ies) shall be in accordance with the manufacturer's instructions, and the Division's installation requirements. Installation of the backflow prevention assembly must be completed within the time specified in the notice to install or within forty-five (45) days of the water meter installation. A time extension may be granted by the City of Flagstaff provided no cross-connection hazards exist at the site.
13. A backflow prevention assembly for containment or landscape may need to have a pressure reducing valve upstream of it if the water line pressure is higher than eighty (80) psi. This does not apply to fire lines.

G. Installation of Backflow Prevention Assemblies for Fire Systems.

1. Fire protection systems may consist of sprinklers, hose connections, and hydrants for commercial, industrial or residential structures and services. Sprinkler systems may be dry or wet, open or closed. Systems consisting of fixed-spray nozzles may be used indoors or outdoors for protection of flammable-liquid and other hazardous processes. It is standard practice, especially in cities, to equip automatic sprinkler systems with fire department pumper connections.
2. A meter (compound, detector check) should not be permitted as part of a backflow prevention assembly. An exception may be made if the meter and backflow prevention assembly are specifically designed for that purpose.
3. For cross-connection control, fire protection systems shall be classified based on water source and arrangement of supplies as follows:
  - a. Class 1: Direct connections from public water mains only; no pumps, tanks or reservoirs; no physical connection from other water supplies; no antifreeze or other additives of any kind; all sprinkler drains discharging to atmosphere, dry wells or other safe outlets.
  - b. Class 2: Same as class 1, except that booster pumps may be installed in the connections from the street mains. It is necessary to avoid drafting so much water that pressure in the water main is reduced below twenty (20) psi.
  - c. Class 3: Direct connection from public water supply main plus one (1) or more of the following: elevated storage tanks; fire pumps taking suction from above-ground covered reservoirs or tanks; and pressure tanks (all storage facilities are filled or connected to public water only, the water in the tanks to be maintained in a potable condition). Class 3 systems will require minimum protection (approved double check valves) to prevent stagnant waters from backflowing into the public potable water system.
  - d. Class 4: Directly supplied from public mains like classes 1 and 2, and with an auxiliary water supply on or available to the premises; or an auxiliary supply may be located within one thousand seven hundred (1,700) feet of the pumper connection. Class 4 systems will require backflow protection at the service connection. The type (air gap or reduced pressure) will depend on the quality of the auxiliary supply.
  - e. Class 5: Directly supplied from public mains, and interconnected with auxiliary supplies, such as: pumps taking suction from reservoirs exposed to contamination, or rivers and ponds; driven wells, mills or other industrial water systems; or where antifreeze or other additives are used. Class 4 and 5 systems will need maximum protection (air gap or reduced pressure) to protect the public water system.
  - f. Class 6: Combined industrial and fire protection systems supplied from the public water mains only, with or without gravity storage or pump suction tanks. Class 6 system protection would depend on the requirements of both industry and fire protection and could only be determined by a survey of the premises.
4. Installation of Assembly.

a. When a backflow assembly is required for a water service connection supplying water only to a fire system, the assembly shall be installed on the service line in compliance with standard specifications adopted by the City. Installation of DC or DCDVA may be allowed on fire systems with the City of Flagstaff approval provided both the manufacturer's specifications and U.S.C. approval allow such an installation.

b. RP's for fire line assemblies may be installed inside a fire riser room provided they have an adequate drain for a full port discharge for the size of the assembly per the manufacturer's specifications into the sanitary sewer system, not the storm water system. If a drain cannot be provided that can contain a full port discharge to the sanitary sewer system from a fire line with chemical additives such as anti-freeze or glycerin, the assembly must be installed outside the building in an insulated enclosure with electricity for a heat source for freeze protection and a check valve must be installed in the system to prevent the discharge of antifreeze onto the ground.

5. All backflow assemblies installed on fire sprinkler systems shall have a chain with a padlock from the first O.S. & Y. valve to the second O.S. & Y. valve, or an operable alarm system or both.

6. For looped fire lines, a DC or RP backflow prevention assembly is required on both ends of a private water main that is connected to the public water services at two (2) or more locations.

#### H. Removal Requirement.

1. It shall be unlawful for any person to alter, modify, bypass or remove a backflow prevention method without the written approval of the division.

2. If a device is removed without the approval of the City, the City reserves the right to visually inspect the piping to verify there is a physical separation and/or no piping is connected before an existing backflow assembly.

3. The device and piping shall be removed as close as possible to the main service connection and any property connections to mitigate the possibility of stagnating water in the piping.

4. A device will not be deactivated in the City's records unless there is a physical separation between the piping and no possibility of connecting the two (2) ends. An inspection of the removal by the City will need to be completed before removal from the records.

#### I. Inspections.

1. A customer's water system shall always be available during business operations for premises inspection by City of Flagstaff personnel and backflow prevention assembly testing, if necessary. The inspection shall be conducted to determine whether any cross-connection or other hazard potentials exist and to determine compliance with this chapter and modifications.

2. City of Flagstaff shall inspect all new sites, assembly installations, assembly relocations, assembly removal and assemblies that have been repaired for compliance.
3. A waived premises is a property for which the City of Flagstaff has determined there are currently no hazard potentials. All waived premises shall be inspected periodically or when there has been a change in owner/tenant or there has been a use change.
4. If a customer refuses entry to a premises for inspection during business operations, the City of Flagstaff may discontinue water service, require backflow prevention or take any steps allowed by law to gain entry to the premises.

J. Authorization.

1. Installation authorizations for the installation of all backflow prevention assemblies required by the City of Flagstaff shall be obtained from the City of Flagstaff prior to installation.
2. It shall be the duty of the person doing the work to notify the City of Flagstaff, in writing, that the work is ready for inspection. Such notification shall be given not less than twenty-four (24) hours before the work is to be inspected and shall be given only if there is reason to believe that the work done will meet current City codes and regulations.
3. Whenever any work is being done contrary to the provisions of the City's adopted plumbing code or this chapter, the City of Flagstaff or an authorized representative may order the work stopped by notice in writing served on any persons engaged in the doing or causing such work to be done; and any such person shall forthwith stop such work until authorized by City of Flagstaff to proceed with the work.

K. Maintenance and Testing.

1. The annual test compliance date shall be set by the City of Flagstaff Industrial Waste Section. The consumer shall have backflow prevention assemblies tested upon installation and at least once per year, or more frequently if deemed necessary by the Division, at the consumer's expense. If the Division determines that a health hazard exists, they may specify a more restrictive testing schedule.
2. The customer may request in writing a change of the annual test compliance date for any assembly. No compliance date may be changed to be more than twelve (12) months after the most recent test.
3. The consumer shall be responsible for maintenance of all backflow assemblies at his/her expense. If the Division or customer learns or discovers, during the interim period between tests that an assembly is defective or in unsatisfactory operating condition, the customer shall arrange for repairs. The customer shall have any necessary repairs performed by an appropriately licensed contractor, including replacement or overhaul of the assembly, if necessary, which will return the assembly to satisfactory operating condition within thirty (30) days of discovery. Such assembly shall be retested within thirty (30) days following repairs, until testing reveals no defects or unsatisfactory operating conditions.
4. All testing shall be performed by an individual who holds a valid "General" Tester Certification issued by the California-Nevada American Water Works Association (Cal-Nev

AWWA), the Arizona State Environmental Technical Training (ASETT) Center, or other certifying authority approved by the Division. A list of certified testers registered with the City of Flagstaff shall be available upon request to all persons required to install or maintain a backflow prevention assembly. Test procedures shall be performed as required by the ADEQ as set forth in the most current edition of the USC-FCCCHR Manual of Cross-Connection Control. The tester shall provide a copy of the test report to the customer and to the City of Flagstaff Industrial Pretreatment Section within five (5) working days from the date of the test and shall maintain a copy for their records for at least three (3) years.

5. No existing backflow prevention assembly shall be altered, disconnected or replaced without prior approval of the Division.
6. During construction, any new backflow assemblies must be tested before the water is used for any purpose, including construction uses.
7. Test cocks are to be used for testing only and shall be installed in accordance with Division requirements. Any unauthorized use of these test cocks is a violation of this code.
8. Each backflow prevention assembly shall be easily identified by displaying the following in a conspicuous manner on the assembly:
  - a. Manufacturer.
  - b. Model Number.
  - c. Serial Number.

This information must also be provided to the Division by the consumer promptly upon installation.

9. The customer shall maintain records of the results of all tests and all servicing, repairs, or replacements of the backflow prevention assembly. A copy of the records shall be provided to the City of Flagstaff within five (5) days after completion of the activity for which the record is made.
10. The consumer shall notify and receive approval from the City of Flagstaff Fire Marshal, at least twenty-four (24) hours in advance, of any maintenance or testing performed upon assemblies installed upon fire sprinkler systems which requires discontinuance of water supply to that system. Fire systems shall not be out of service for more than eight (8) consecutive hours due to testing, maintenance or repairs. The fire department shall be notified immediately of any changes in fire service status.
11. In lieu of discontinuance of service, City of Flagstaff may take action to install, test, repair, or replace a backflow device at the customer's point of service and bill the customer for all costs associated with the installation, test, repair, or replacement of a backflow prevention device.
12. The City of Flagstaff will return incomplete and erroneous test forms to the tester and customer for correction and resubmission by the compliance date. Information on submitted test forms can only be changed or modified by the tester who has signed the form and is

responsible for that test. Test reports must have a clear description of the location of the backflow device.

13. Test equipment shall be maintained and calibrated annually by an agency approved by the City of Flagstaff as required by the cross-connection manual. A copy of the annual equipment calibration certificates shall be submitted to the City of Flagstaff Industrial Pretreatment Section (or proctor) to maintain equipment registration and certification. Test equipment used on anything other than potable water backflow prevention assemblies shall not be used to test such assemblies and shall be identified as non-potable test equipment.

14. Testers shall register with the City of Flagstaff Industrial Pretreatment Section (or proctor) if they are conducting backflow assembly testing in City of Flagstaff service area. Testers shall submit a current copy of their certification or recertification upon registration. A City of Flagstaff registration issued to a backflow prevention assembly tester for testing backflow prevention assemblies in the City of Flagstaff service area may be revoked or suspended upon certification expiration or for improper testing, maintenance, reporting or other improper practices.

L. Enforcement.

1. Repealed by Ord. 2021-09. [THIS CHAPTER WILL BE ENFORCED PURSUANT TO THE GENERAL ENFORCEMENT PROVISIONS FOUND IN CHAPTER 7-01, AND ANY ADDITIONAL SPECIFIC ENFORCEMENT PROCEDURES SET FORTH HEREIN.](#)

2. When convicted of a violation of this chapter, any license previously issued to that person by the City may be revoked by the Flagstaff City Council or any proper court, if there may be reasonable relationship between the activities listed and the offense. Revocation of license shall not be considered a recovery of penalty so as to bar any other penalty being enforced.

3. The Division may deny or discontinue, after reasonable notice to the occupants thereof, the water service to anyone using the City of Flagstaff water distribution system or to any premises wherein any backflow prevention assembly or method required by these regulations is not installed, tested, maintained and repaired in a manner acceptable to the Division, or if required reports and/or records are not properly filed, or if it is found that the backflow prevention assembly or method has been removed or bypassed, or if an unprotected cross-connection exists on the premises. Reasonable notice shall be sent in writing at least two (2) weeks prior to the disconnection, unless the Division determines that a potential for a severe health hazard exists.

4. If the Division determines that a potential for a severe health hazard exists, the Division may immediately discontinue water service without notice. Notice by telephone will be given as soon as possible and written notice will be sent within five (5) days, following discontinuance of water service. Water service to such premises shall not be restored until the consumer has corrected or eliminated such conditions or defects in conformance with these regulations and to the satisfaction of the Division.

5. Fire sprinkler systems shall not be subject to disconnection without the explicit approval of the City Fire Marshal, but will be subject to other penalties as provided for in this chapter.

**7-03-001-0016 WATER RESOURCE DEVELOPMENT FEE**

New connections to the City water system shall pay the following Water Resource Development Fee for the purpose of retiring the debt required to develop water resources necessary to accommodate projected future City water demand. A customer increasing the meter size shall pay the difference between the water resource development fee for the new meter and that for the previous meter. No refund shall be made in the case of a reduced meter size. The Water Resource Development Fee shall expire on July 1, 2012.

**WATER RESOURCE DEVELOPMENT FEE**

**FOR**

**PURCHASE OF RED GAP RANCH**

<b>METER SIZE (INCHES)</b>	<b>(EFFECTIVE 1-1-07)</b>	<b>(EFFECTIVE 1-1-08)</b>	<b>(EFFECTIVE 1-1-09)</b>
3/4 X 5/8	\$462	\$938	\$1,400
1	\$792	\$1,608	\$2,400
1-1/2	\$1,551	\$3,149	\$4,700
2	\$2,475	\$5,025	\$7,500
3	\$5,148	\$10,452	\$15,600
4	\$7,953	\$16,147	\$24,100
6	\$15,444	\$31,356	\$46,800

**7-03-001-0017 PURCHASED ENERGY COST FOR WATER**

Whenever the City of Flagstaff's purchased power (electric fuel and/or natural gas) expense in any of its water systems increases or decreases, or will increase or decrease, from the amount adopted by the City Council in the WATER SERVICES Utilities last general rate proceeding for that system, the Utility may adopt a new energy charge schedule designed to recover such increased or decreased purchase power expense, provided that:

- A. The total amount of the increase or decrease in purchased power expense will be calculated by comparing the WATER SERVICES Utilities normalized cost for power during the test year utilized in the last rate case with the WATER SERVICES Utilities normalized cost of power for the test year computed at the WATER SERVICES Utilities new increased or decreased cost of power.
- B. The total purchased power expense for water will be divided by the total gallonage sold during the test year to determine the Water Energy Cost (WEC) per 1000 gallons.
- C. The calculated increase or decrease in rates for the system must amount to at least \$0.01 per 1000 gallons before an adjustment can be made.

E. **WATER SERVICES** Utilities Division staff and the Finance department will annually calculate the energy charge amount for the water system based on the last twelve (12) month rolling average of water related power costs.

F. The WEC shall be approved annually prior to November 30 through the City Manager. In the first year of implementation the rate will not be adjusted due to partial fiscal year revenues. Revenues from the WEC fee will be posted to a separate revenue account.

G. The new Water Energy Cost amount will become effective on January 1st of each year.

H. The Water Energy Cost shall be determined by the estimated total energy cost projected for the current fiscal year for water adjusted by actual prior fiscal year WEC account surplus or deficit divided by the current fiscal year projected water sold.

$$\text{WEC} = \text{Total Annual Energy Cost} / \text{Total Annual Water Sold}$$

Illustration of the Water Energy Charge calculation assuming the following test year data:

1. 2,500,000 TG Gallons Sold during past TWELVE (12) months per ONE THOUSAND (1000) gal.
2. \$1,875,000 Purchase Power Expense (Gas, Fuel, Electric)
3. \$0 Prior fiscal year WEC account end balance

The Water Energy Charge Pass Thru Calculation steps would be

$$\text{WEC} = (\$1,875,000 - \$0) / 2,500,000 = \$0.75 \text{ per TG}$$

**7-03-001-0018 RECLAIMED WATER RATE SCHEDULE**

There shall be charged the following rates for all reclaimed water furnished consumers and measured by meter on any service connection with City reclaimed water mains for and during each monthly billing period.:

A. The base monthly service charge applies whether the reclaimed water meter is active or inactive. The monthly service charge is based on the fixed cost of operation and maintaining the reclaimed water system so that the system is available to provide water to the parcel when water service is activated. Parcels with shutoff reclaimed water meters will continue to pay base monthly service fee since water service is available and may be activated and used by the property owner at any time. Reclaimed water monthly service charge equal to water monthly service charge, see Section 7-03-001-0011.:

**VOLUME CHARGE**

Monthly Water Use Gallons	Volume Charge \$/1,000 gal		
	1-1-18	1-1-19	1-1-20 <sup>(4)</sup>
Single-Family			

Monthly Water Use Gallons	Volume Charge \$/1,000 gal		
	1-1-18	1-1-19	1-1-20 <sup>(4)</sup>
Tier 1 0—3,500	1.30	1.36	1.43
Tier 2 3,500—6,200	1.60	1.69	1.77
Tier 3 6,200—11,500	2.32	2.44	2.56
Tier 4 Over 11,501+	4.35	4.58	4.80
Commercial (no main ext)	1.71	1.83	1.95
Commercial (with main extension)	3.62	3.88	4.14
Manufacturing (no main ext)	1.69	1.81	1.93
Manufacturing (with main ext)	3.59	3.84	4.10
Northern Arizona University (no main extension)	1.59	1.70	1.82
Northern Arizona University (with main extension)	3.40	3.62	3.85
City Departmental	1.71	1.83	1.95
Standpipe-Hydrant Meter	3.70	3.85	4.00
Off-Peak/Golf Course Rate			
Tier 1 (0—150,000,000)	1.47	1.56	1.65
Tier 2 (Over 150,000,000)	1.26	1.45	1.65

<sup>(4)</sup>—Rates shown in table above are projected based on current potable water rates and the energy surcharge rate of eighty-three cents (\$0.83) per one thousand (1,000). Actual rates will be adjusted if necessary based on subsection (B) of this section.

B. Automatic Rate Adjustments Effective January 1, 2020. The City agrees to adopt a rate schedule which provides for automatic adjustments to reclaimed water rates based on changes to the potable water rate. Automatic adjustments to the energy surcharge component of potable water rates cause the reclaimed water rate to fluctuate each year.

1. Reclaimed water rates shall be set at thirty-five percent (35%) of potable water rates including **PLUS** energy cost component for all classes of customers that do not require a main extension, after 2020.
2. Reclaimed water rates shall be set at seventy-five percent (75%) of potable water rates **PLUS ENERGY COST COMPONENT** for all classes of customers that require a main extension, after 2020.
3. Standpipe-hydrant meter rates shall be set at fifty percent (50%) of the equivalent customer potable water rates including **PLUS** energy cost component after 2020.
4. Off-peak Tier 1 customer rates shall be set at eighty-seven percent (87%) of commercial reclaimed water rates **PLUS ENERGY COST COMPONENT**.

5. Energy Cost Adjustment. City reserves the right to automatically pass along future increases in reclaimed water rates based on energy cost adjustments to the potable water rate.

6. Adjustments shall begin on January 1st of each calendar year and continue through the end of the year.

**ORDINANCE NO. 2024-19**

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF FLAGSTAFF, AMENDING THE FLAGSTAFF CITY CODE, TITLE 3, BUSINESS REGULATIONS, SECTION 3-10-001-0008 LICENSE FEES AND TITLE 7, HEALTH AND SANITATION, CHAPTER 7-02 WASTEWATER REGULATIONS AND CHAPTER 7-03 WATER REGULATIONS, BY ADOPTING BY REFERENCE THAT CERTAIN DOCUMENT ENTITLED “*WATER SERVICES RATES CODE CHANGES*”; PROVIDING FOR PENALTIES, REPEAL OF CONFLICTING ORDINANCES, SEVERABILITY, AND ESTABLISHING AN EFFECTIVE DATE**

**RECITALS:**

WHEREAS, ARS §§9-511, 9-511.01 *et. seq.* provides authority for municipalities to adjust water, wastewater, and reclaimed water utility rates and fees and water and wastewater capacity charges, and

WHEREAS, water and wastewater capacity charges are established for the purpose of charging the cost of additional system capacity to new customers; and

WHEREAS, service charges and fees are established to charge the user of a specific service the cost of delivering the specific service; and

WHEREAS, the City of Flagstaff (“City”) has found that it is necessary to update, adjust and increase water, wastewater, and reclaimed water service fees and charges in order to provide for the present cost of maintaining service levels and system capacity; and

WHEREAS, the City wishes to change language in the City Code, (1) Title 3, Business Regulations, Section 3-10-001-0008 License Fees and (2) Title 7, Health and Sanitation, Chapter 7-02 Wastewater Regulations, and Chapter 7-03 Water Regulations, to water, wastewater, and reclaimed water utility rates and fees and water and wastewater capacity charges in order to revise and update the City Code, and

WHEREAS, the City has finds that the updates, adjustments and increases to: the water, wastewater, and reclaimed water utility rates and fees and water and wastewater capacity charges are all just and reasonable.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. That certain document known as “*Water Services Rates Code Changes*”, one(1) paper copy and (1) electronic copy of which are on file in the office of the City Clerk of the City of Flagstaff, Arizona, has been declared a public record by Resolution No. 2024-30 of the City of Flagstaff, Arizona, is hereby referred to, adopted and made a part hereof as if fully set out in this ordinance.

**SECTION 2. Repeal of Conflicting Ordinances**

All ordinances and parts of ordinances in conflict with the provisions of the code adopted herein are hereby repealed.

**SECTION 3. Severability**

If any section, subsection, sentence, clause, phrase or portion of this ordinance or any part of the code adopted herein by reference is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions thereof.

**SECTION 4. Clerical Corrections**

The City Clerk is hereby authorized to correct clerical and grammatical errors, if any, related to this ordinance, and to make formatting changes appropriate for purposes of clarity, form, or consistency with the Flagstaff City Code.

**SECTION 5. Effective Date:**

This Ordinance shall be effective September 1, 2024 following adoption by the City Council.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

\_\_\_\_\_  
CITY ATTORNEY

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Carmen Pryer, Real Estate Specialist  
**Co-Submitter:** Bryce Doty  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

**TITLE:**

**Consideration and Adoption of Ordinance No. 2024-18:** An ordinance of the City Council of the City of Flagstaff, authorizing the exchange of real property of substantially equal value with property owners, Gary G. and Mary Eileen Hundelt; providing for severability, authority for clerical corrections, and establishing an effective date; and

**Consideration and Approval of Purchase Agreement** with Gary G. and Mary Eileen Hundelt.

**STAFF RECOMMENDED ACTION:**

1. Read Ordinance No. 2024-18 by title only for the final time
2. City Clerk reads Ordinance No.2024-18 by title only (if approved above)
3. Adopt Ordinance No. 2024-18
4. Approve the Purchase Agreement and authorize the City Manager to execute the necessary documents.

**Executive Summary:**

This ordinance authorizes the exchange of real property of Substantially equal value: City remnant parcels originally acquired for the Lone Tree Overpass Project will be exchanged for real property interest needed for the same Project from Gary G., and Mary Eileen Hundelt. The exchange provides the following benefits to the City:

1. Disposes of remnant land no longer needed by City
2. Offsets the cost to acquire real property interests from Gary G., and Mary Eileen Hundelt
3. Returns remnant land back to tax base

The remnant properties were evaluated by the Housing Section as per Resolution 2022-52, and it was determined that the remnants are too small to be utilized as stand alone parcels for affordable housing. Additionally, City staff attending and internal property and development team meeting, representing multiple City divisions, did not identify any opposition to the exchange.

City Council is also being asked to consider approval of a Purchase Agreement, which includes terms and conditions of the exchange. The Purchase Agreement is attached to this staff report. The City will be paid \$409.00. The City will pay escrow fees and expenses. City also commits to ensuring continued property access as part of the Lone Tree Overpass Project.

**Financial Impact:**

The Lone Tree Overpass Project (north of Butler Avenue) is currently budgeted in FY2021-2022 in the amount of \$8,686,681 in the Transportation Fund, Account Number 047-05-112-3054-6. The Lone Tree Corridor Project (south of Butler Avenue) is currently budgeted in FY2021-2022 in the amount of \$250,000 in the Transportation Fund, Account Number 048-05-118-3495-6. Both funds will be utilized to complete the attached Project scope from Route 66 to Sawmill Road.

The areas to be exchanged have been valued at substantially equal value.

Gary G. Hundelt and Mary Eileen Hundelt agree to sell to the City of Flagstaff 282 square feet of fee in the amount of \$11,421.00. (as shown on exhibit A)

2. As part of this Agreement the City of Flagstaff agrees to exchange to Gary G. Hundelt and Mary Eileen Hundelt 1,183 square feet of fee in the amount of \$11,830.00. (as shown on exhibit B)

Fee 104-01-024 Exhibit A 282 sq/ft @ 40.50 sq/ft \$11,421.00

Fee 104-01-023 Exhibit B 1,183 sq/ft @ \$10.00 sq/ft - \$ 11,830.00

Total to be paid to the City of Flagstaff \$ 409.00

**Policy Impact:**

None

**Previous Council Decision or Community Discussion:**

On May 16, 2023 Council approved Ordinance 2023-13 authorizing acquisition of this property, including others for the Lone Tree Overpass Project.

**Options and Alternatives to Recommended Action:**

1. Retain City remnant parcels, and pay full appraised value for real property interests needed from Gary G. and Mary Eileen Hundelt.
2. Dispose or use City remnant parcels at a later date.

**Background and History:**

The Lone Tree Overpass has been a planned project for over a decade in the Flagstaff community. The Lone Tree Overpass Study, which evaluated conceptual design options for the bridge was completed in 2010. The goal of the project is to provide better connectivity for our transportation network and provide a grade-separated crossing which increases safety and convenience for commuters.

The Overpass also coordinates with the future planned improvements of the Lone Tree Corridor reconstruction which was studied in a report completed in 2006. The Lone Tree Corridor and Overpass serves to connect the southern area of town with the Route 66 corridor and provides a option that reduces congestion on other roadway corridors.

A portion of the Lone Tree Corridor from Sawmill Road to Butler Avenue is included in this Overpass design. This section of the corridor was included at this time to provide a coordinated improvement north and south of the Butler Avenue Intersection.

In November 2018, the Flagstaff voters approved a ballot measure to fund the Overpass (Proposition 420) and a separate ballot measure to fund the Corridor Improvements (Proposition 419). Both propositions passed.

On August 21, 2020, the City issued a Request for Statements of Qualifications (RSOQ) from Arizona Registered Contractors for a Design-Builder to provide design and construction services for the Overpass.

On September 24, 2020, the City received four responses to the Request for Statements of Qualifications (RSOQ). Upon the completion of the evaluation process, Ames was determined to be the most qualified Design-Builder to perform the work.

On February 2, 2021, City Council awarded the Design-Build Services Agreement for Phase I of the project development to Ames Construction.

On July 6, 2021, Council passed Ordinance 2021-15, authorizing acquisition of real property for the Project.

**Connection to PBB Priorities and Objectives:**

**Safe and Healthy Community**

- Foster a safe, secure, and healthy community.
- Ensure the built environment is safe through the use of consistent standards, rules and regulations, and land use practices.

**Connection to Regional Plan:**

- Improve transportation safety and efficiency for all modes.

**Connection to Carbon Neutrality Plan:**

None

**Connection to 10-Year Housing Plan:**

None

# LTO Hundelt Exchange

# Vicinity Map

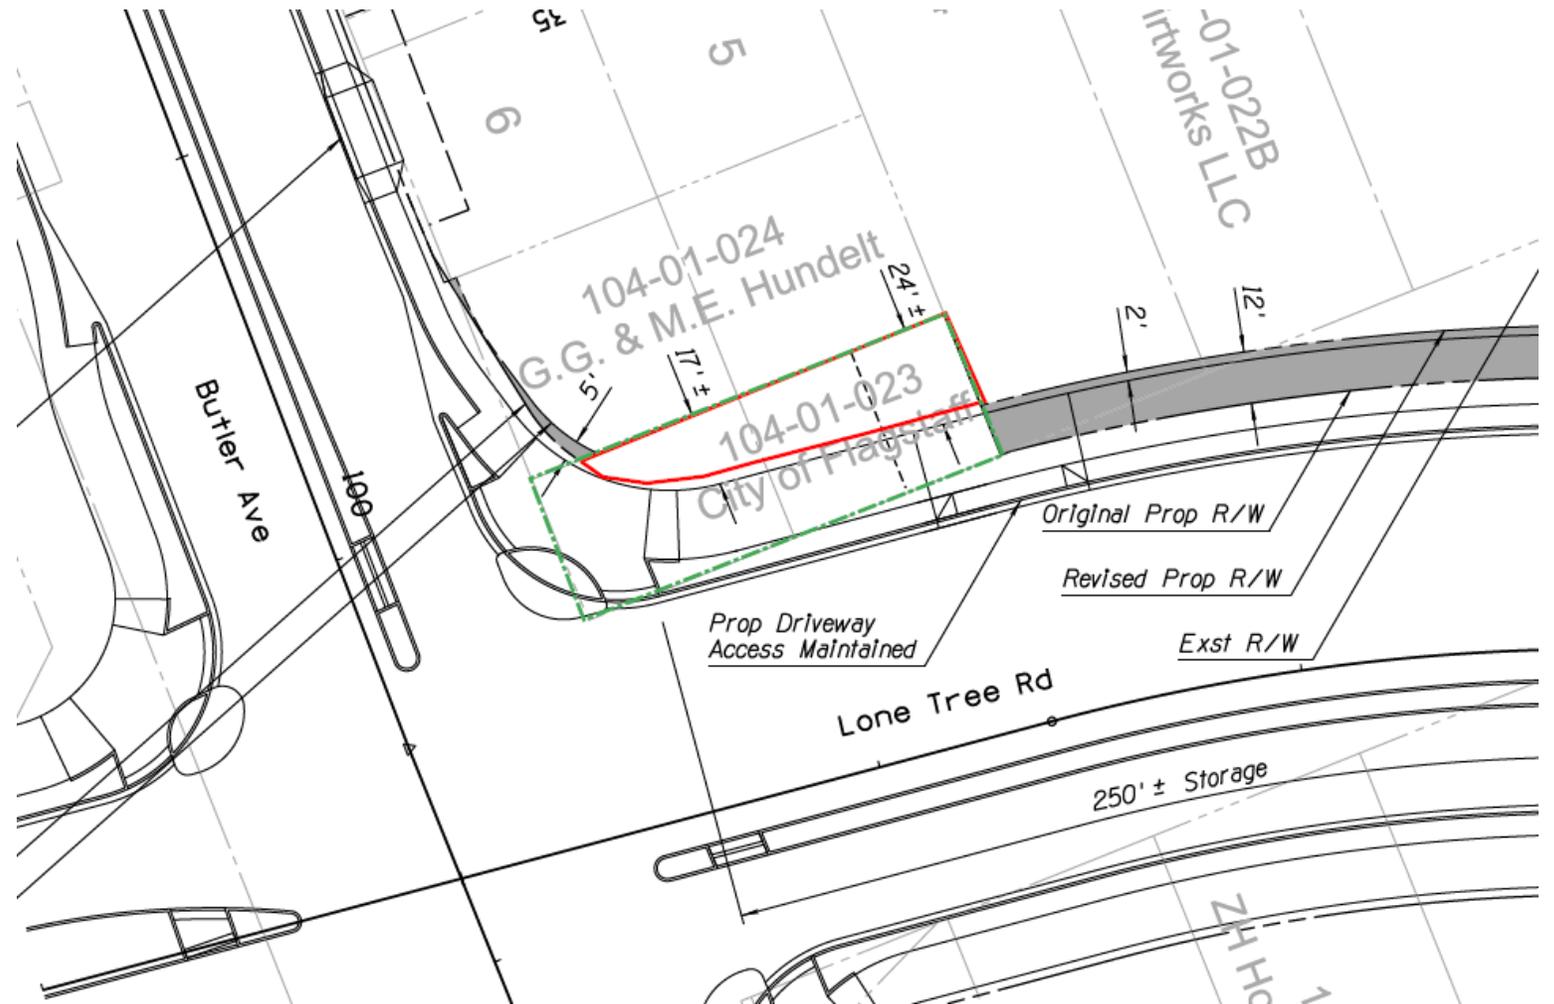

# Background

- City purchased entirety APN 104-01-023 for Lone Tree Overpass (LTO) (Green outline)
- LTO does not need the red highlighted portion of parcel (1,183 SQFT)
- LTO does need 282 SQFT on adjacent parcel 104-01-024 owned by the Hundelts
- Hundelt's would like to partially exchange what is needed on their property for the excess lands on the City parcel

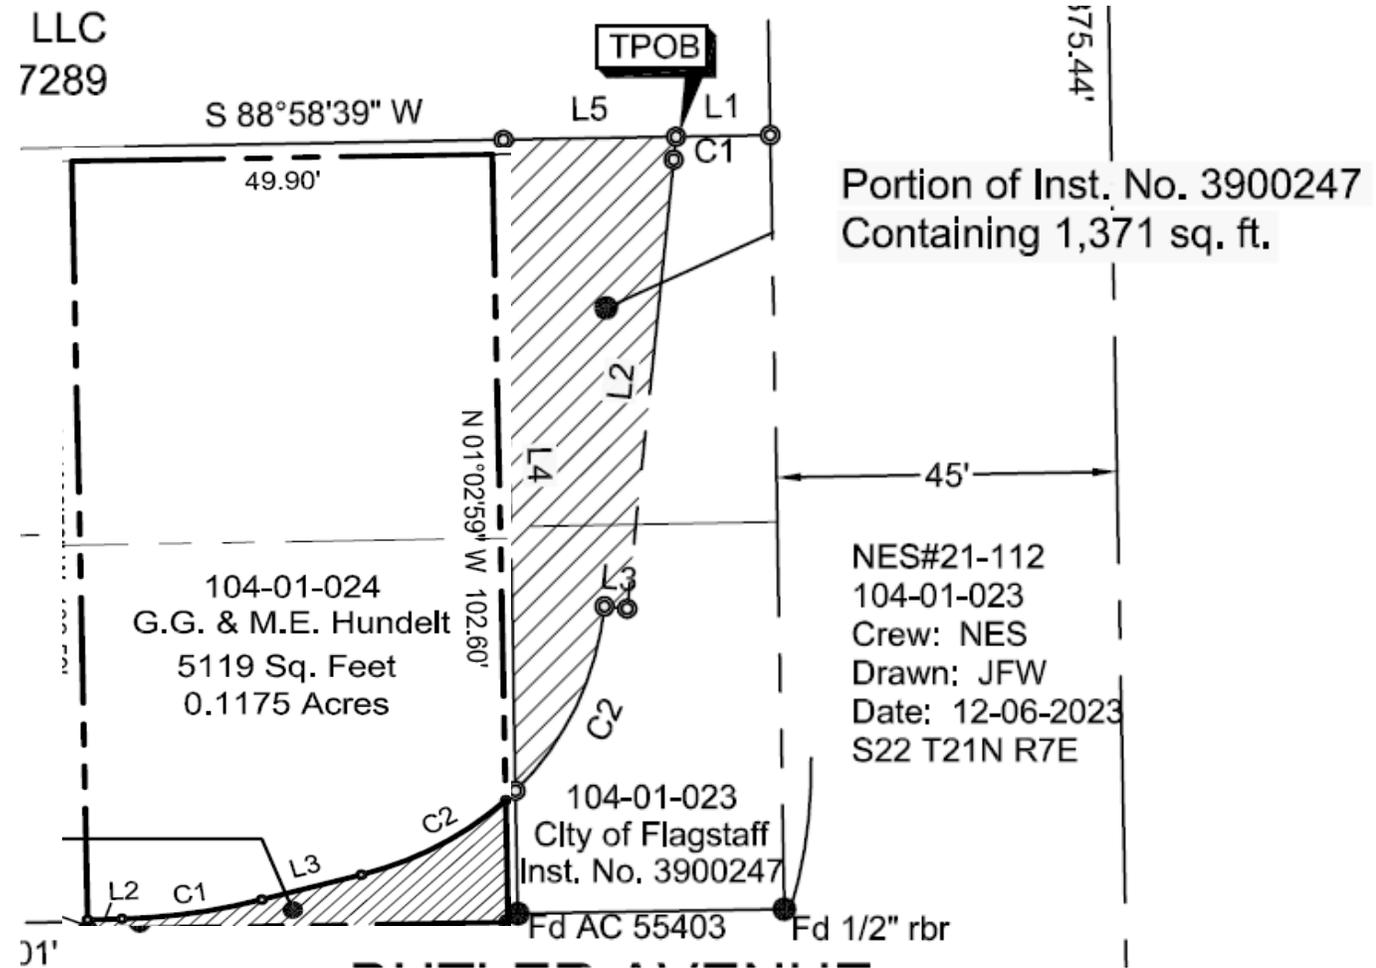

# Background

# Considerations

- Both properties LI zoning
- Limited alternative uses for such a small remnant piece.
- As vacant a maintenance liability

**ORDINANCE NO. 2024-18**

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF FLAGSTAFF, AUTHORIZING THE EXCHANGE OF REAL PROPERTY OF SUBSTANTIALLY EQUAL VALUE, WITH PROPERTY OWNERS GARY G. AND MARY EILEEN HUNDELT; PROVIDING FOR SEVERABILITY, AUTHORITY FOR CLERICAL CORRECTIONS, AND ESTABLISHING AN EFFECTIVE DATE**

**RECITALS:**

WHEREAS, the City Council has authority to acquire and exchange real property of substantially equal value, pursuant to the Flagstaff City Charter, Article I, Section 3 and A.R.S. Section 9-407; and

WHEREAS the City desires to receive property necessary for the Lone Tree Overpass Project in exchange for City property and has published a notice of intent to exchange property.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

**SECTION 1. In General**

The City of Flagstaff hereby authorizes the exchange of properties of substantially equal value, to consist of a City grant of approximately 1,183 square feet of land to, Gary and Mary Hundelt, husband and wife, as joint tenants with right of survivorship, as legally described and depicted in the attached Exhibits A and A-1, in exchange for a Gary and Mary Hundelt grant of 282 square feet of land to the City for the Lone Tree Overpass Project, as legally described and depicted in the Attached Exhibit B, with Gary and Mary Hundelt to pay the City an additional sum of \$409.00 for the exchange, all pursuant to a separate Purchase Agreement approved by City Council. A map depicting the exchange is attached hereto as Exhibit C.

All ordinances and parts of ordinances in conflict with the provisions of the code adopted herein are hereby repealed.

**SECTION 2 Delegation of Authority**

The Mayor, City Manager, City Attorney, City Clerk, Finance Director, Real Estate Manager, or their designees are hereby delegated authority to take all actions necessary and appropriate to complete the transactions approved in this ordinance.

**SECTION 3 Repeal of Conflicting Ordinances**

All ordinances and parts of ordinances in conflict with the provisions of the code adopted herein are hereby repealed.

**SECTION 4 Severability**

If any section, subsection, sentence, clause, phrase or portion of this ordinance or any part of the code adopted herein by reference is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions thereof.

**SECTION 5. Clerical Corrections**

The City Clerk is hereby authorized to correct clerical and grammatical errors, if any, related to this ordinance, and to make formatting changes appropriate for purposes of clarity, form, or consistency with the Flagstaff City Code.

**SECTION 6. Effective Date**

This Ordinance shall be effective thirty (30) days following adoption by the City Council.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this of July 2nd, 2024.

## Addendum to the Purchase Agreement

Between

City of Flagstaff

And

**Gary G. Hundelt and Mary Eileen Hundelt, husband and wife,  
as joint tenants with right of survivorship**

1. Gary G. Hundelt and Mary Eileen Hundelt shall convey to the City of Flagstaff 282 square feet of land in fee simple by Warranty Deed (Exhibit 1), valued at \$11,421.00.
2. In exchange, the City of Flagstaff shall convey to Gary G. Hundelt and Mary Eileen Hundelt 1,183 square feet of land in fee simple by Special Warranty Deed (Exhibit 2), valued at \$11,830.00.

Fee	104-01-024	Exhibit 1	282 sq/ft @ 40.50 sq/ft	\$11,421.00
Fee	104-01-023	Exhibit 2	1,183 sq/ft @ \$10.00 sq/ft	<u>- \$ 11,830.00</u>
<b>Total to be paid by Hundelts to the City of Flagstaff</b>				<b>\$ 409.00</b>

3. The escrow agent shall deposit all escrowed funds in an escrow account and disburse same by check; pay encumbrances in accordance with this agreement; prorate all agreed items; record such escrowed instruments as are necessary or proper in the issuance of title insurance; and pay the balance of the escrowed funds to the party or parties entitled thereto.
4. The City will pay all typical escrow service fees and or title insurance.
5. Due to the loss of access off Butler Road, the City will be providing access and a driveway on the east side of the property off of Lone Tree Road (Colorado Road).
6. All utilities adjacent to the property will be relocated as part of the project at no cost to the Seller.
7. The existing address, 422 E. Butler is not being changed as part of the project.
8. The assemblage of the remnant parcel to the west parcel, if needed, will be supported by the City of Flagstaff. If the owner decides to combine the two parcels, one legal description combining the two parcels will be required by Coconino County. A legal description for the total parcel will be provided by the City to the Seller, at no cost to the property owner. The legal description and exhibit will be prepared by a Registered Land Surveyor (RLS).
9. All parties have the authority to enter into this Agreement and have the authority and power to enter into this Agreement to consummate this transaction.
10. This entire Agreement, together with any attachments, shall supersede any and all other prior understandings and agreements, either written or oral.

# EXHIBIT 2

# EXHIBIT "A"

A portion of that parcel of land recorded in Inst. No. 3900247, Records of Coconino County (R1), being a portion of Block 25 of the Revised plat of Brannen Addition as recorded in Book 1, Page 42, Records of Coconino County, situated in Section 22, Township 21 North, Range 7 East, Gila and Salt River Meridian, Coconino County, Arizona

## LEGAL DESCRIPTION:

A portion of that parcel of land recorded in Inst. No. 3900247, Records of Coconino County (R1), being a portion of Block 25 of the Revised plat of Brannen Addition as recorded in Book 1, Page 25, Records of Coconino County, situated in Section 22, Township 21 North, Range 7 East, Gila and Salt River Meridian, Coconino County, Arizona, said portion being more particularly described as follows:

FROM the northeast corner of that parcel of land recorded in Inst. No. 3707289, R.C.C. (R2), said point being a found 12 rebar, thence S 01° 02' 18" E [Basis of Bearings: Grid per State Plane Zone Arizona Central (0202)], along the east line of said Block 25 Brannen Addition, for a distance of 139.04 feet to the northeast corner of said parcel recorded in Inst. No. 3900247 (R1);

thence S 88° 58' 39" W, along the north he of said parcel (R1), for a distance of 15.47 feet to a non-tangent point of curvature, said point being the TRUE POINT OF BEGINNING;

thence southwesterly along a curve to the left, having a central angle of 0° 16' 08ft and a radius of 573.00 feet, for a distance of 2.69 feet, the chord of said curve bears S 06° 01' 29" W a distance of 2.69 feet to a point of tangency;

thence S 05° 53' 25" W for a distance of 59.83 feet to a point of curvature;

thence southwesterly along a curve to the right, having a central angle of 39° 38' 11" and a radius of 40.00 feet, for a distance of 27.67 feet, the chord of said curve bears S 25° 42' 31" W a distance of 27.12 feet to a non-tangent point, said point being on the west line of said parcel (R1);

thence N 01° 02' 59" W, along the said west line (R1), for a distance of 86.29 feet to a point, said point being the northwest corner of said parcel (R1);

thence N 88° 58' 39" E, along the said north line of parcel (R1), for a distance of 19.77 feet to the TRUE POINT OF BEGINNING,

said parcel of land contains 1,183 square feet of land, more or less, including any easements of record over the above described parcel, as shown on Exhibit A-1", which is made a part hereof by this reference.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Edward Schenk, Water Services Manager - Stormwater  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Adoption of Resolution No. 2024-32 and Ordinance No. 2024-20:** A resolution of the Flagstaff City Council declaring as a public record that certain document filed with the City Clerk and entitled "2024 Revisions to Floodplain Regulations" and an ordinance of the City Council of the City of Flagstaff, amending the Flagstaff City Code, Title 12 Floodplains, Chapter 12-01 Flood Plain Regulations, by adopting by reference that certain document entitled "2024 Revisions to Floodplain Regulations"; providing for penalties, repeal of conflicting ordinances, severability, and establishing an effective date

**STAFF RECOMMENDED ACTION:**

1. Adopt Resolution No. 2024-32
2. Read Ordinance No. 2024-20 by title only for the final time
3. City Clerk reads Ordinance No. 2024-20 by title only for the final time
4. Adopt Ordinance No. 2024-20

**Executive Summary:**

Chapter 12-01 of City Code is titled "Flood Plain Regulations" and provides a comprehensive list of development regulations for FEMA special flood hazard areas (SFHAs). This chapter is required by FEMA for all communities but is up to the community to write and maintain. The current revision of Chapter 12-01 is from 2011 and includes terms and definitions that are outdated. The purpose of this revision is to bring the City of Flagstaff's code up to compliance with the current definitions that FEMA uses in 2024. This revision has no policy implications, no changes in regulations, and no fiscal impact. This update is required by FEMA as part of our Community Rating Service (CRS) rating of 5, which provides a 25% discount to federally-backed flood insurance policies.

**Financial Impact:**

There is no financial impact of this revision.

**Policy Impact:**

There is no policy impact of this revision, the revision will update terms and definitions to current FEMA standards.

**Previous Council Decision or Community Discussion:**

None

**Options and Alternatives to Recommended Action:**

The alternative is to not move forward with this minor revisions, due to current CRS standards this will disqualify the City of Flagstaff as a Class 5 community under FEMA forfeiting our 25% National Flood Insurance Policy discount.

**Background and History:**

The Flagstaff community is currently a Class 5 CRS community, providing a 25% discount on National Flood Insurance Policy claims. The City receives this designation through an annual routine audit, and a five-year extensive audit, of flood risk mitigations, actions, and regulations. Chapter 12-01 of City Code provides the majority of the FEMA special flood hazard area (SFHA) regulations for new and existing development in FEMA recognized floodplains and floodways. In the 2019 audit of the City's CRS program there was a recommendation to update Chapter 12-01 to be consistent with current terms and definitions of FEMA. This recommendation became a requirement to remain a Class 5 community in 2021 when the FEMA CRS Handbook was updated. This new requirement was communicated to Stormwater staff in January of this year by our State FEMA regulatory representative (Arizona Department of Water Resources). Stormwater staff consulted with Legal in February and March of this year and are bringing the minor changes required to Council to update Chapter 12-01 to be consistent with FEMA.

**Connection to PBB Priorities and Objectives:**

Priority Based Budget Key Community Priorities and Objectives

Safe & Healthy Community: Ensure the built environment is safe through the use of consistent standards, rules & regulations, & land use practices

**Connection to Regional Plan:**

Regional Plan

Goal WR.5: Manage watersheds and stormwater to address flooding concerns, water quality, environmental protections, and rainwater harvesting.

Goal T.21: Improve transportation safety and efficiency for all modes.

**Connection to Carbon Neutrality Plan:**

This minor revision has no substantial nexus with the Carbon Neutrality Plan

**Connection to 10-Year Housing Plan:**

This minor revision has no substantial nexus with the 10-Year Housing Plan

**Connection to Division Specific Plan:**

This supports both the 2025 Water Services Division Plan and the 2028 Stormwater Section Plan

---

**Attachments:**    Res. 2024-32  
                          2024 Revisions to Floodplain Regulations  
                          Ord. 2024-20

**RESOLUTION NO. 2024-32**

**A RESOLUTION OF THE FLAGSTAFF CITY COUNCIL DECLARING AS A PUBLIC RECORD THAT CERTAIN DOCUMENT FILED WITH THE CITY CLERK AND ENTITLED “2024 REVISIONS TO FLOODPLAIN REGULATIONS”**

**RECITALS:**

WHEREAS, pursuant to A.R.S. § 9-802 a municipality may enact or amend provisions of the City Code by reference to a public record, provided that the adopting ordinance is published in full;

WHEREAS, the City of Flagstaff wishes to incorporate by reference amendments to the Flagstaff City Code, Ordinance No. 2024-20, by first declaring said amendments to be a public record.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. In General.

That certain document known as “*2024 Revisions to Floodplain Regulations*” attached hereto as Exhibit A is hereby declared to be a public record, and one (1) paper copy and one (1) electronic copy maintained in compliance with A.R.S. § 44-7041 shall remain on file with the City Clerk and kept available for public use and inspection.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

2024 Revisions to Floodplain Regulations

## 2024 REVISIONS TO FLOODPLAIN REGULATIONS

### 12-01-001-0001 STATEMENT OF PURPOSE

It is the purpose of these regulations to promote the public health, safety and general welfare, and to minimize public and private losses due to flood conditions in the City of Flagstaff by provisions designed:

- A. To protect human life and health;
- B. To minimize flood damages and reduce the height and velocities which are caused by obstructions which restrict the capacity of the watercourses and floodways;
- C. To reduce the financial burden imposed on the community, its governmental units and its citizens;
- D. To assure retention of sufficient floodway area to convey the base flood;
- E. To enhance wildlife and recreation values where appropriate by preserving riparian vegetation along watercourses and floodplains;
- F. To minimize expenditure of public money for costly flood control projects;
- G. To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- H. To minimize prolonged business interruptions;
- I. To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets, and bridges located in SPECIAL FLOOD HAZARD AREAS;
- J. To help maintain a stable tax base by providing for the ~~second~~ SOUND use and development of SPECIAL FLOOD HAZARD AREAS so as to minimize future flood blight areas;
- K. To ~~insure~~ PROVIDE A FRAMEWORK that potential buyers are notified EDUCATED that property is in an area of Special FLOOD HAZARD AREA;
- L. To insure that those who occupy Special FLOOD HAZARD AREA assume responsibility for their actions; and
- M. To maintain eligibility for the National Flood Insurance Program and State and/or Federal Disaster Relief.

### 12-01-001-0001.01 STATUTORY AUTHORIZATION

~~A.R.S. § 48-3610, the Arizona State Legislature authorizes City of Flagstaff to adopt regulations in conformance with A.R.S. § 48-3603 designed to promote the public health, safety and general welfare of its citizenry.~~

IN A.R.S. § 48-3610, THE ARIZONA STATE LEGISLATURE ENABLED THE CITY TO ASSUME

THE POWERS AND DUTIES FOR FLOODPLAIN MANAGEMENT AND ADOPT REGULATIONS IN CONFORMANCE WITH A.R.S. § 48-3609 DESIGNED TO PROMOTE THE PUBLIC HEALTH, SAFETY, AND GENERAL WELFARE OF ITS CITIZENRY. THEREFORE, THE CITY COUNCIL OF FLAGSTAFF, ARIZONA, DOES ORDAIN AS FOLLOWS:

**12-01-001-0001.2 FINDINGS OF FACT**

A. The SPECIAL FLOOD HAZARD AREAS of the City of Flagstaff are subject to periodic inundation which may result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

B. These flood losses may be caused by the cumulative effect of obstructions in SPECIAL FLOOD HAZARD AREAS which increase flood heights and velocities and, when inadequately anchored, cause damage in other areas. Uses that are inadequately flood proofed, elevated or otherwise protected from flood damage, also contribute to the flood loss.

**12-01-001-0002 METHODS OF REDUCING FLOOD LOSSES:**

In order to accomplish its purpose, these regulations includes methods and provisions for:

A. Restricting or prohibiting uses which are dangerous to health, safety, and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;

B. Requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

C. Controlling the alteration of natural floodplains, stream channels, and natural protective barriers, which help accommodate or channel flood waters;

D. Controlling filling, grading, dredging, and other development which may increase flood damage; and

E. Preventing or regulating the construction of flood barriers which may unnaturally divert flood waters or which may increase flood hazards in other areas.

F. Controlling or regulating increased stormwater runoff caused by development within contributing watersheds of watercourses and floodplains.

**12-01-001-0003 DEFINITIONS**

Unless specifically defined below, words or phrases used in these regulations shall be interpreted so as to give them the meaning they have in common usage and to give these regulations their most reasonable application.

"Accessory Use" means a use which is incidental and subordinate to the principal use of the parcel of land on which it is applied.

"Accessory Structure" ~~means a structure that is solely for the parking of no more than 2 cars; or~~

~~limited storage (small, low cost sheds 200 sq. ft. or less).~~ FEMA PUBLICATION P-2140: FLOODPLAIN MANAGEMENT REQUIREMENTS FOR AGRICULTURAL STRUCTURES AND ACCESSORY STRUCTURES, DEFINES AN ACCESSORY STRUCTURE AS:

FOR FLOODPLAIN MANAGEMENT PURPOSES, ACCESSORY STRUCTURES ARE STRUCTURES THAT ARE ON THE SAME PARCEL OF PROPERTY AS A PRINCIPAL STRUCTURE, THE USE OF WHICH IS INCIDENTAL TO THE USE OF THE PRINCIPAL STRUCTURE. ACCESSORY STRUCTURES MUST BE USED FOR PARKING OR STORAGE, BE SMALL AND REPRESENT A MINIMAL INVESTMENT BY OWNERS, AND HAVE LOW DAMAGE POTENTIAL. FEMA CONSIDERS "SMALL" TO MEAN NOT LARGER THAN A ONE-STORY TWO-CAR GARAGE. EXAMPLES OF SMALL ACCESSORY STRUCTURES INCLUDE, BUT ARE NOT LIMITED TO, DETACHED GARAGES, STORAGE AND TOOL SHEDS, AND SMALL BOATHOUSES.

- STRUCTURE SIZE - THE FOOTPRINT OF A TYPICAL TWO-CAR GARAGE IS ABOUT 600 SQUARE FEET IN AREA. OR LIMITED STORAGE (SMALL, LOW COST SHEDS 200 SQ. FT. OR LESS).
- STORAGE - CONTENTS STORED IN WET FLOODPROOFED STRUCTURES WILL GET WET DURING FLOODING.

"Addition" means any alteration to an existing structure which results in any extension or increase in the structure's floor area or height.

"Alluvial Fan Flooding" means flooding occurring on the surface of an alluvial fan or similar landform which originates at the apex and is characterized by high velocity flows, active processes of erosion, sediment transport and deposition, and unpredictable flow paths.

"Alteration" means any act or process that changes one or more of the existing features of a structure, including but not limited to, exterior changes or interior modifications of a structure or any of its architectural details or visual characteristics, including paint color, surface texture, and facade materials.

"Apex" means a point on an alluvial fan or similar landform below which the flow path of the major stream that formed the fan becomes unpredictable and alluvial fan flooding can occur.

"Appeal" means a request for a review of the Floodplain Administrator's interpretation of any provision of these regulations.

"Architect" means a Registered Professional Architect in the State of Arizona.

"Area of Jurisdiction" means the lands within the municipal boundaries of the City of Flagstaff.

"Area of Shallow Flooding" means a designated AO or AH Zone on the Flood Insurance Rate Map, (FIRM) with a one percent or greater annual chance of flooding. The base flood depths range from one to three feet; a clearly defined channel does not exist; the path of flooding is unpredictable and indeterminate; and velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

~~"Area of Special Flood Hazard" means the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. This area is designated as Zone A, AO, AH, AE, or A99 on the FIRM and other areas determined by the criteria adopted by the~~

~~Director of the Arizona Department of Water Resources. For the purposes of these regulations, the term "Special Flood Hazard Area" (SFHA) is synonymous in meaning with "area of special flood hazard".~~

"Base Flood" means the flood having a one percent chance of being equaled or exceeded in any given year. For the purposes of these regulations, the term "base flood" is synonymous in meaning with the "100-year flood".

~~"Base Flood Elevation (BFE)" means the elevation shown on the Flood Insurance Rate Map for Zones AH, V and VE that indicate the water surface elevation resulting from a flood that has a 1-percent or greater chance of being equaled or exceeded in any given year.~~

"Base Flood Elevation (BFE)" The computed elevation to which floodwater is anticipated to rise during the base flood.

"Breakaway Wall" means a wall that is not part of the structural support of a building and is intended through its design and construction to collapse under specific lateral loading forces, without causing damage to the elevated portion of the building supporting foundation system.

"Building" see "Structure".

~~"Chief Executive Officer of the Community (CEO)" means the official of the community who is charged with the authority to implement and administer laws, ordinances, and regulations for that community.~~

"Community" means any state or area or political subdivision thereof, or any Indian tribe or authorized tribal organization, ~~or Alaska Native village~~ or authorized native organization, which has authority to adopt and enforce floodplain management regulations for the areas within its jurisdiction.

"Critical Facilities" means structures or facilities that produce, use or store highly volatile, flammable, explosive, toxic, and/or water reactive materials; hospitals; nursing homes and housing likely to contain occupants who may not be sufficiently mobile to avoid death or injury during a flood; police stations; fire stations; vehicle and equipment storage facilities and emergency operations centers that are needed for flood response activities before, during, and after a flood; and public and private utility facilities that are vital to maintaining or restoring normal services to flooded areas before, during, and after a flood.

"Critical Feature" means an integral and readily identifiable part of a flood protection system without which the flood protection provided by the entire system would be compromised.

"Development" means any man-made change to improved or unimproved real estate, including but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating or drilling operations or storage of materials or equipment.

"Discontinued Use" means the relinquishment of a property or the cessation of a use or activity by the owner or tenant, excluding temporary or short term interruptions for the purpose of remodeling, maintaining or otherwise improving or rearranging the facility. A use shall be deemed as discontinued when such use is suspended as evidenced by the cessation of activities or conditions that constitute the principal use of the property.

~~"Elevation Certificate" — means the most current version of the Elevation Certificate form developed by the Federal Emergency Management Agency (FEMA Form 81-31) AN ADMINISTRATIVE TOOL OF THE NATIONAL FLOOD INSURANCE PROGRAM (NFIP) THAT IS USED TO PROVIDE ELEVATION INFORMATION NECESSARY TO ENSURE COMPLIANCE WITH COMMUNITY FLOODPLAIN MANAGEMENT ORDINANCE, TO DETERMINE THE PROPER INSURANCE PREMIUM RATE, AND TO SUPPORT A REQUEST FOR A LETTER OF MAP AMENDMENT (LOMA) OR LETTER OF MAP REVISION BASED ON FILL (LOMR-F).~~

"Encroachment" means the advance or infringement of any uses, including but not limited to, ANTHROPOLOGICAL plant growth (INTENTIONAL PLANTINGS), fill, excavation, buildings, permanent structures, fencing, or other development into a floodplain which may impede and/or alter the flow or storage capacity of a floodplain, or cause an increase in the floodway elevation.

"Engineer" means a Professional Engineer registered in the State of Arizona.

Engineering Geologist means a Professional Engineering Geologist registered in the State of Arizona.

"Erosion", OR "EROSION HAZARD", means the process of the gradual wearing away of land masses. This peril is not, per se, covered under the NATIONAL FLOOD INSURANCE PROGRAM (NFIP) (see "flood-related erosion").

~~"Erosion Hazard" means the process of the wearing away of land masses. This peril is not per se covered under the NFIP (see "flood-related erosion").~~

"Exceptional Hardship" means a hardship that would result from failure to grant a variance which is exceptional, unusual, and peculiar to the property involved. Mere economic or financial hardship alone is not exceptional.

Inconvenience, aesthetic considerations, physical handicaps, personal preferences, or the disapproval of one's neighbors likewise cannot, as a rule, qualify as an exceptional hardship. All of these problems can be resolved through other means without granting a variance, even if the alternative is more expensive, or requires the property owner to build elsewhere or put the parcel to a different use than originally intended.

"FEMA" means the Federal Emergency Management Agency

"Flood or Flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- A. The overflow of inland or tidal waters;
- B. The unusual and rapid accumulation or runoff of surface waters from any source, and/or
- C. The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding as defined in this definition.

~~"Flood Boundary and Floodway Map (FBFM)" means the official map on which the Federal Emergency Management Agency (FEMA) has delineated both the Special Flood Hazard Areas and the regulatory floodway.~~

"Flood Elevation Determination" means a determination, by the Administrator, of the water surface elevations of the base flood, that is, the flood level that has a one percent or greater chance of occurrence in any given year.

~~"Flood Elevation Study" means an examination, evaluation, and determination of flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of mudslide (i.e., mudflow) and/or flood-related erosion hazards.~~

"Flood Fringe" means that area located between the regulatory floodway and the boundary of the 100-year floodplain as shown on the FLOOD INSURANCE STUDY. ~~Flood Boundary and Floodway Map~~

"Flood Insurance Rate Map (FIRM)" means the official map of the community, on which the Federal Insurance Administrator FEMA has delineated both the SPECIAL FLOOD HAZARD AREAS and the risk premium zones applicable to the community.

"Flood Insurance Study (FIS)" means the official report provided by the Federal Emergency Management Agency (FEMA) that includes flood profiles, ~~the Flood Insurance Rate Map~~, the Flood Boundary and Floodway Map, and the water surface elevations of the base flood.

"Flood Protection System" means those physical structural works for which funds have been authorized, appropriated, and expended and which have been constructed specifically to modify flooding in order to reduce the extent of the area within a community subject to a "special flood hazard" and the extent of the depths of associated flooding. Such a system typically includes channels, dams, reservoirs, levees, or dikes. These specialized flood modifying works are those constructed in conformance with sound engineering standards.

"Floodproofing" means any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to improved or unimproved real property, water and sanitary facilities, structures and their contents BY MEANS OTHER THAN ELEVATION.

"Floodproofing Certificate" – means the most current version of the Floodproofing Certificate form developed by the Federal Emergency Management Agency ~~(FEMA Form 81-65)~~.

"Flood-Related Erosion" means the collapse or subsidence of land along the shore of a lake or other body of water as a result of undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as a flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding.

"Floodplain or Flood-Prone Area" means any land area susceptible to being inundated by water from any source (see definition of "flood or flooding"). "Floodplain" areas include the "flood fringe" and the "regulatory floodway".

"Floodplain Administrator" is the individual or his/her authorized representative authorized by the

Floodplain Board to administer, implement, and enforce the provisions of these regulations. MOST OFTEN THE STORMWATER SECTION DIRECTOR OR THE STORMWATER PROJECT MANAGER FOR THE FLOODPLAIN MANAGEMENT PROGRAM.

"Floodplain Board" is the City Council of the City of Flagstaff at such times as they are engaged in the administration, implementation, and enforcement of these regulations.

"Floodplain Management" means the operation of an overall program of corrective and preventive measures for reducing flood damage and preserving and enhancing where possible natural resources in the floodplain. Including, but not limited to, emergency preparedness plans, flood control works, floodplain management regulations and open space plans.

"Floodplain Management Regulations" means the zoning ordinances, subdivision regulations, building codes, health regulations, state statutes, special purpose ordinances (such as a floodplain management ordinance, grading ordinance, stormwater management ordinance, and erosion control ordinance) and other relevant applications of police power. The term describes such Federal, state, or local regulations, in any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

"Floodplain Use Permit" means a permit issued by the Floodplain Administrator under the provisions of these regulations for development of land located in a floodplain.

"Flood-Related Erosion Area Management" means the operation of an overall program of corrective and preventive measures for reducing flood-related erosion damage, including, but not limited to, emergency preparedness plans, flood-related erosion control works, and floodplain management regulations.

"Floodway" - see "Regulatory Floodway".

"Freeboard" means a factor of safety usually expressed in feet above a flood level for purposes of floodplain management. "Freeboard" tends to compensate for the many unknown factors that could contribute to flood heights greater than the height calculated for selected size flood and floodway conditions, such as wave action, bridge openings, and the hydrological effect of urbanization of the watershed.

"Functionally Dependent Use" means a use which cannot be performed unless it is located or carried out in close proximity to water. The term includes only docking facilities, port facilities that are necessary for the loading and unloading of cargo or passengers, and ship building and ship repair facilities, but does not include long-term storage or related manufacturing facilities.

"Highest Adjacent Grade (HAG)" means the highest natural elevation, prior to fill or excavation, of the ground surface prior to construction next to the proposed walls of a structure.

"Historic Structure" means any structure that is:

- A. Listed individually in the National Register of Historic Places (a listing maintained by the Department of Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- B. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by

the Secretary to qualify as a registered historic district;

C. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or

D. Individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:

1. By an approved state program as determined by the Secretary of the Interior; or
2. Directly by the Secretary of the Interior in states without approved programs.

"Lateral Addition" An addition to an existing structure that is beside and connected to the existing structure. If one building is connected to another through a covered breezeway or similar connection it is considered to be a separate building, and not an addition, for the purpose of this Ordinance.

"Levee" means a man-made structure; usually an earthen embankment, designed and constructed in accordance with sound engineering practices to contain, control, or divert the flow of water so as to provide protection from temporary flooding.

"Levee System" means a flood protection system which consists of a levee, or levees, and associated structures, such as closure and drainage devices, which are constructed and operated in accordance with sound engineering practices.

"Lowest Floor" means the lowest floor of the lowest enclosed area (including basement) of a building. An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access, or storage in an area other than a basement area is not considered a building's lowest floor, provided, that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this CITY Ordinance. The lowest floor elevation is defined as the bottom of the lowest floor joist, horizontal structural member, or duct work.

"Manufactured Home" means a structure, transportable in one (1) or more sections, which is built on a permanent chassis and is designed for use with or without a permanent foundation when attached to the required utilities.

For the purposes of floodplain management, the term "manufactured home" also includes park trailers, travel trailers and other similar vehicles placed on a site for greater than 180 consecutive days or which are not licensed and ready for highway use. The term "manufactured home" does not include a "recreational vehicle".

"Manufactured Home Park or Subdivision" means a parcel (or contiguous parcels) of land divided into two (2) or more manufactured home lots for sale or rent.

"Map" means the ~~Flood Hazard Boundary Map (FHBM) or the Flood Insurance Rate Map (FIRM)~~ for the community as issued by FEMA.

"Market Value" shall be determined by the current Coconino County Assessor's Office assessed value or by an independent professional appraiser by estimating the cost to replace the structure in new condition and adjusting that cost figure by the amount of depreciation which has accrued since the structure was constructed. The cost of replacement of the structure shall be based on a square foot cost factor determined by reference to a building cost estimating guide recognized

by the building construction industry. The amount of depreciation shall be determined by taking into account the age and physical deterioration of the structure and functional obsolescence as approved by the Floodplain Administrator, but shall not include economic or other forms of external obsolescence. Use of replacement costs or accrued depreciation factors different from those contained in recognized building cost estimating guides may be considered only if such factors are included in a report prepared by an independent professional appraiser and supported by a written explanation of the differences.

"Mean Sea Level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum, (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, or other datum, to which **BASE FLOOD ELEVATIONS** shown on a community's Flood Insurance Rate Map are referenced.

"Mudslide (i.e., Mudflow)" describes a condition where there is a river, flow or inundation of liquid mud down a hillside usually as a result of a dual condition of loss of brush cover, and the subsequent accumulation of water on the ground preceded by a period of unusually heavy or sustained rain. A mudslide (i.e., mudflow) may occur as a distinct phenomenon while a landslide is in progress, and will be recognized as such by the Administrator only if the mudflow, and not the landslide, is the proximate cause of damage that occurs.

"Mudslide (i.e., Mudflow) Area Management" means the operation of an overall program of corrective and preventive measures for reducing mudslide (i.e., mudflow) damage, including, but not limited to, emergency preparedness plans, mudslide control works, and floodplain management regulations.

"Mudslide (i.e. Mudflow), Prone Area" means an area with land surfaces and slopes of unconsolidated material where the history, geology, and climate indicate a potential for mudflow.

"New Construction" means, for the purposes of determining insurance rates, structures for which the "start of construction" commenced on or after the effective date of an initial FIRM or after December 31, 1974, whichever is later, and includes any subsequent improvements to such structures. For floodplain management purposes, "new construction" means structures for which the "start of construction" commenced on or after the effective date of a floodplain management regulation adopted by a community and includes any subsequent improvements to such structures.

"New Manufactured Home Park or Subdivision" means a manufactured home park or subdivision for which the construction of facilities for servicing the lots on which the manufactured homes are to be affixed, including, at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads, and which is completed on or after the effective date of these floodplain regulations.

"Nonconforming Use" means a structure or the use of a structure or premises, which was lawful but not in conformity with these regulations before the adoption or amendment of these floodplain regulations.

"Nonresidential Structure" means any structure or any portion of a structure used exclusively for, or designed as and capable of being used for, without limitation, office, commercial, business, educational, public, industrial, factory, or governmental occupation.

"Obstruction" includes, but is not limited to, any dam, wall, wharf, embankment, levee, dike, pile,

abutment, protection, excavation, channelization, bridges, conduit, culvert, building, wire, fence, rock, gravel, fill, dumping, structure, vegetation, or other material in, along, across, or projecting into a watercourse which may alter, impede, retard or change the direction and/or velocity of the flow of water, or due to its location, its propensity to snare or collect debris carried by the flow of water, or its likelihood of being carried downstream.

"One Hundred-Year Flood" means the flood having a one percent chance of being equaled or exceeded in any given year (see "Base Flood").

"Person" includes an individual or his agent, firm, partnership, association, limited liability company, or corporation, or agent of the aforementioned groups, or this State or its agencies or political subdivisions.

"Program Deficiency" means a defect in a community's floodplain management regulations or administrative procedures that impairs effective implementation of those floodplain management regulations or of the National Flood Insurance Program standards.

"Reconstruction" means the rebuilding of an existing structure which has been partially or completely destroyed by any cause (e.g., fire, wind, flood) without increasing the floor area of the structure.

"Recreational Vehicle" means a vehicle which is:

- A. Built on a single chassis;
- B. 400 square feet or less when measured at the largest horizontal projection;
- C. Designed to be self-propelled or permanently towable by a light duty truck; and
- D. Designed primarily not for use as a permanent dwelling but as a temporary living quarters for recreational, camping, travel, or seasonal use.

"Regulatory Flood Elevation (RFE)" means an elevation one foot above the BASE FLOOD ELEVATION for a watercourse for which the BASE FLOOD ELEVATION has been determined and shall be as determined by the criteria developed by the Director of the Arizona Department of Water Resources for all other watercourses.

"Regulatory Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height.

"Rehabilitation" means any improvements and repairs which are made to the interior or exterior of an existing structure but which do not result in any increase in the floor area of the structure.

"Remedy a Violation" means to bring the structure or other development into compliance with FEDERAL, State, or local floodplain management regulations, or, if this is not possible, to reduce the impacts of its noncompliance. Ways that impacts may be reduced include protecting the structure or other affected development from flood damages, implementing the enforcement provisions of this Ordinance or otherwise deterring future similar violations, or reducing FEDERAL OR STATE financial exposure with regard to the structure or other development.

"Residential Structure" means any structure or any portion of a structure that is used for, or designed as and capable of being used for, the temporary or permanent domicile of persons, including without limitation a dwelling unit, apartment house, boarding house, hotel, motel, nursing home, lodging house, congregate residence, jail, prison, and similarly used structures.

Soils Engineer means a Professional Soils Engineer registered in the State of Arizona.

"Special Flood Hazard Area (SFHA)" means an area in the floodplain subject to a 1 percent or greater chance of flooding in any given year. An area having special flood or flood-related erosion hazards, and shown on an FBFM or **THE** FIRM as Zone A, AO, AE, A99, or AH (see "Area of Special Flood Hazard").

"Start of Construction", includes substantial improvement and other proposed new development, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement was within 180 days of the permit date. The actual start means either the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns, or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations, or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement, the actual "start of construction" means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Stormwater Management Design Manual" means the most recent edition of the City of Flagstaff Stormwater Management Design Manual.

"Structure" means, for floodplain management purposes, that which is built or constructed, an edifice or building of any kind, or any piece of work artificially built up or composed of parts joined together in some definite manner. This includes, without limitation, a walled and roofed building, including a gas or liquid storage tank that is principally above ground, as well as a manufactured home.

"Substantial Damage" means damage of any origin sustained by a structure whereby the cumulative cost of restoring the structure to its before damaged condition would equal or exceed fifty (50) percent of the market value of the structure before the damage occurred.

"Substantial Improvement" means any repair, reconstruction, rehabilitation, addition or other improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure before the "start of construction" of the improvement. This term includes structures which have incurred "substantial damage", regardless of the actual repair work performed. The term does not, however, include either:

- A. Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions;
- or

B. Any alteration of a "historic structure", provided that the alteration will not preclude the structure's continued designation as a "historic structure".

"Surveyor" means a Registered Professional Land Surveyor in the State of Arizona.

"Variance" means a grant of relief from the requirements of this Ordinance which permits construction in a manner that would otherwise be prohibited by these regulations.

"Violation" means the failure of a structure or other development to be fully compliant with the community's floodplain management regulations. A structure or other development without the elevation certificate, other certifications, or other evidence of compliance required in these regulations is presumed to be in violation until such time as that documentation is provided.

"Water Surface Elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929, North American Vertical Datum (NAVD) of 1988, (or other datum, where specified) of floods of various magnitudes and frequencies in the floodplains of riverine areas.

"Watercourse" means a lake, river, creek, stream, wash, arroyo, channel, or other topographic feature on or over which waters flow at least periodically. "Watercourse" includes specifically designated areas in which substantial flood damage may occur.

~~"Watercourse Master Plan" means a hydraulic and hydrologic plan for a watercourse that examines the cumulative impacts of existing development and future encroachment in the floodplain and future development in the watershed on potential flood damages, and establishes technical criteria for subsequent development so as to minimize potential flood damages for all flood events up to and including the one hundred-year flood.~~

"WATERSHED MASTER PLAN" MEANS A HYDRAULIC AND HYDROLOGIC PLAN FOR A WATERCOURSE THAT EXAMINES THE CUMULATIVE IMPACTS OF EXISTING DEVELOPMENT AND FUTURE ENCROACHMENT IN THE FLOODPLAIN AND FUTURE DEVELOPMENT IN THE WATERSHED ON POTENTIAL FLOOD DAMAGES, AND ESTABLISHES TECHNICAL CRITERIA FOR SUBSEQUENT DEVELOPMENT SO AS TO MINIMIZE POTENTIAL FLOOD DAMAGES FOR ALL FLOOD EVENTS UP TO AND INCLUDING THE ONE HUNDRED-YEAR FLOOD.

## **12-01-001-0004 GENERAL PROVISIONS**

### **12-01-001-0004.01 JURISDICTION**

A. These regulations shall apply to all areas within the corporate limits of the City of Flagstaff, Arizona INCLUDING SPECIAL FLOOD HAZARD AREAS AND ADMINISTRATIVE FLOODPLAINS.

B. The provisions of these regulations shall apply to lands outside the corporate limits of the City of Flagstaff upon annexation of such lands.

### **12-01-001-0004.02 BASIS FOR ESTABLISHING SPECIAL FLOOD HAZARD AREAS**

A. The Federal Emergency Management Agency (FEMA) scientific and engineering report entitled "Flood Insurance Study, dated September 3, 2010, Coconino County, Arizona and Incorporated Areas" with accompanying Flood Insurance Rate Maps (FIRM's), and all

subsequent amendments and/or revisions, identifying SPECIAL FLOOD HAZARD AREAS, are hereby adopted by reference and declared to be a part of this Ordinance. The Flood Insurance Study (FIS) and the FIRM panels are on file in the office of the Floodplain Administrator at ~~City Hall, City of Flagstaff, 211 W. Aspen Ave. Flagstaff, AZ 86001~~ 2323 N WALGREENS DR. FLAGSTAFF, AZ 86004 AND ONLINE AT FLAGSTAFFAZ.GOV/4315/FLOOD-INFORMATION. The FIS and attendant mapping is the minimum area of applicability of these regulations and may be supplemented by studies for other areas which allow implementation of this Ordinance and which are recommended to the Floodplain Board by the Floodplain Administrator. The Floodplain Board, within its area of jurisdiction, shall delineate, or may by rule require developers of land to delineate, for areas where development is ongoing or imminent, and thereafter as development becomes imminent, floodplains consistent with the criteria developed by the Federal Emergency Management Agency and the Director of the Arizona Department of Water Resources.

B. The Floodplain Board may adopt additional floodplain studies or reports by reference and declare them to be part of these regulations, provided that any differences in floodplain delineation between such additional studies or reports and the effective Flood Insurance Rate Map(s) shall be resolved by applying those provisions which result in a broader floodplain delineation. A copy of such studies shall be on file in the office of the Floodplain Administrator.

#### **12-01-001-0004.03 COMPLIANCE**

No structure or development shall hereafter be constructed, located, extended, converted, or altered without full compliance with the provisions of these regulations and other applicable codes.

#### **12-01-001-0004.04 ABROGATION AND GREATER RESTRICTIONS:**

These regulations are not intended to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where these regulations and another Ordinance, easement, covenant, or deed restriction conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

#### **12-01-001-0004.05 INTERPRETATION:**

In the interpretation and application of these regulations, all provisions shall be:

- A. Considered as minimum requirements;
- B. Liberally construed in favor of the governing body; and
- C. Deemed neither to limit nor repeal any other powers granted under State Statutes.

#### **12-01-001-0004.06 WARNING AND DISCLAIMER OF LIABILITY:**

The degree of flood protection required by these regulations is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This Ordinance does not imply that land outside the SPECIAL FLOOD HAZARD AREAS or uses permitted within such areas will be free from flooding or flood damages. These regulations shall not create liability on the part of the City of Flagstaff, any officer or employee thereof, the State of Arizona, or the Federal Emergency Management Agency, for any flood damages that

result from reliance on these regulations or any administrative decision lawfully made thereunder.

**12-01-001-0004.07 STATUTORY EXEMPTIONS:**

A. In accordance with A.R.S. Section 48-3609(H), unless otherwise expressly provided, this and any regulation adopted pursuant to said statute do not affect:

1. Existing legal uses of property or the right to continuation of such legal use. However, if a nonconforming use of land or a building or structure is discontinued for twelve (12) months or destroyed to the extent of fifty (50) percent of its market value, as determined by an independent professional appraiser, any further use shall comply with ~~these regulations~~ THIS ORDINANCE.

2. Reasonable repair or alteration of property for the purposes for which the property was legally used on August 3, 1984, or on the date any regulations affecting such property takes effect, except that any alteration, addition or repair to a nonconforming building or structure which would result in increasing its flood damage potential by fifty (50) percent or more shall be either flood-proofed or elevated to or above the REGULATORY FLOOD ELEVATION.

3. Reasonable repair of structures constructed with the written authorization required by A.R.S. Section 48-3613.

4. Facilities constructed or installed pursuant to a CERTIFICATE of environmental compatibility issued pursuant to Title 40, Chapter 2, Article 6.2, Arizona revised Statutes (A.R.S. Section 40-360, et seq.). ~~B. BEFORE THE FOLLOWING TYPES OF CONSTRUCTION AUTHORIZED BY A.R.S. § 48-3613(B) BEGIN, THE RESPONSIBLE PERSON MUST SUBMIT PLANS FOR THE CONSTRUCTION TO THE FLOODPLAIN BOARD (THE "BOARD") FOR REVIEW AND COMMENT PURSUANT TO A.R.S. § 48-3613(C). In accordance with A.R.S. Section 48-3613, written authorization shall not be required, nor shall the Floodplain Board (the "Board") prohibit:~~

5. The construction of bridges, culverts, dikes, and other structures necessary for the construction of public highways, roads, and streets intersecting or crossing a watercourse.

6. The construction of storage dams for watering livestock or wildlife and structures on banks of a watercourse to prevent erosion of or damage to adjoining land if the structure will not divert, retard or obstruct the natural channel of the watercourse, or dams for the conservation of floodwaters as permitted by A.R.S. Title 45, Chapter 6.

7. Construction of tailing dams and waste disposal areas for use in connection with mining and metallurgical operations. This paragraph does not exempt those sand and gravel operations which will divert, retard, or obstruct the flow of waters in any watercourse from complying with and acquiring authorization from the Board pursuant to regulations adopted by the Board under said statute.

8. Other construction if it is determined by the Board that written authorization is unnecessary.

9. Any flood control district, county, city, town, or other political subdivision from exercising powers granted to it under A.R.S. Title 48, Chapter 21, Article 1 said statute.

10. The construction of streams, waterways, lakes, and other auxiliary facilities in conjunction with development of public parks and recreation facilities by a public agency or political subdivision.

11. The construction and erection of poles, towers, foundations, support structures, guy wires, and other facilities related to power transmission as constructed by any utility whether a public service corporation or a political subdivision.

~~C. — Before any construction authorized by Subsection B of this Section may begin, the responsible person must submit plans for the construction to the Board for review and comment. These exemptions do not preclude any person from liability if that person's actions increase flood hazards to any other person's property.~~

C. IN ACCORDANCE WITH A.R.S. § 48-3613(D), IN ADDITION TO OTHER PENALTIES OR REMEDIES OTHERWISE PROVIDED BY LAW, THIS STATE, A POLITICAL SUBDIVISION OR A PERSON WHO MAY BE DAMAGED OR HAS BEEN DAMAGED AS A RESULT OF THE UNAUTHORIZED DIVERSION, RETARDATION, OR OBSTRUCTION OF A WATERCOURSE HAS THE RIGHT TO COMMENCE, MAINTAIN, AND PROSECUTE ANY APPROPRIATE ACTION OR PURSUE ANY REMEDY TO ENJOIN, ABATE, OR OTHERWISE PREVENT ANY PERSON FROM VIOLATING OR CONTINUING TO VIOLATE THIS SECTION OR REGULATIONS ADOPTED PURSUANT TO A.R.S. TITLE 48, CHAPTER 21, ARTICLE 1. IF A PERSON IS FOUND TO BE IN VIOLATION OF THIS SECTION, THE COURT SHALL REQUIRE THE VIOLATOR TO EITHER COMPLY WITH THIS SECTION IF AUTHORIZED BY THE FLOODPLAIN BOARD OR REMOVE THE OBSTRUCTION AND RESTORE THE WATERCOURSE TO ITS ORIGINAL STATE. THE COURT MAY ALSO AWARD SUCH MONETARY DAMAGES AS ARE APPROPRIATE TO THE INJURED PARTIES RESULTING FROM THE VIOLATION INCLUDING REASONABLE COSTS AND ATTORNEY FEES.

~~D. — In addition to other penalties or remedies otherwise provided by law, this State, a political subdivision thereof, or a person who may be damaged or has been damaged as a result of the unauthorized diversion, retardation, or obstruction of a watercourse has the right to commence, maintain, and prosecute any appropriate action or pursue any remedy to enjoin, abate, or otherwise prevent any person from violating or continuing to violate this section or regulations adopted pursuant to A.R.S. Section 48-3610. If a person is found to be in violation of this section, the court shall require the violator to either comply with this section if authorized by the Board or remove the obstruction and restore the watercourse to its original state. The court may also award such monetary damages as are appropriate to the injured parties resulting from the violation including reasonable costs and attorney fees.~~

#### **12-01-001-0004.08 NONCONFORMING USES:**

A structure or the use of a structure or premises which existed and was lawful, but not in conformity, before the adoption or amendment of these regulations, may be continued subject to the following conditions:

A. No existing structure in the floodway shall be expanded, but may be modified, altered or repaired to incorporate elevation or flood proofing measures, provided such measures comply with the substantial improvement requirements of this ordinance and do not raise the level of the base flood or floodway.

B. If a nonconforming use of land or a building or structure is discontinued for twelve (12) months or destroyed to the extent of fifty percent of its market value, as determined by a

competent professional appraiser, any further use shall comply with these regulations. Intent to resume active operations shall not affect the foregoing.

C. If any nonconforming building in the floodplain is substantially damaged, it shall not be reconstructed except in conformance with the provisions of these regulations.

D. Additions to nonconforming structures shall be constructed in conformance with the provisions of these regulations.

#### **12-01-001-0004.09 DECLARATION OF PUBLIC NUISANCE:**

~~Every new structure, building, fill, excavation, or development~~ **ALL DEVELOPMENT** located or maintained within any Special Flood Hazard Areas after August 8, 1973, in violation of these regulations, is a public nuisance per se and may be abated, prevented, or restrained by action of the City of Flagstaff.

#### **12-01-001-0004.10 VIOLATIONS AND ABATEMENT**

A. No structure or land within the Special Flood Hazard Area shall be constructed, located, extended, converted or altered without full compliance with the requirements of this Ordinance and other applicable regulations.

B. Upon discovery of a violation of the provisions of these regulations, the Floodplain Administrator shall issue a written Notice of Violation to the person or property owner responsible for such violation. The Notice of Violation shall specify the nature of the violation and order abatement of the violation.

C. If the Floodplain Administrator determines that a violation of this ordinance does not result in a life-safety issue, or does not create an immediate threat to surrounding properties, then the responsible party shall have 30 days following a Notice of Violation in order to remedy the violation, or develop a remediation plan acceptable to the Floodplain Administrator, before any penalties are assessed pursuant to Section 12-01-001-0004.11.

D. It is unlawful for a person to engage in any development or to divert, retard or obstruct the flow of waters in a watercourse if it creates a hazard to life or property without securing the written authorization required by Arizona Revised Statute (ARS) section 48-3613. Where the watercourse is a delineated floodplain it is unlawful to engage in any development affecting the flow of waters without securing written authorization required by section ARS 48- 3613.

E. Stormwater that is generated and concentrated as a result of single, residential lot development is not considered a watercourse and not regulated under this ordinance.

F. The Floodplain Administrator shall reserve the right to submit to the Administrator of the Federal Emergency Management Agency (FEMA) a declaration for denial of insurance, stating that a property is in violation of a specified federal, state or local law, regulation, or ordinance, pursuant to 44 CFR Ch. 1, Part 73 – Implementation of Section 1316 of the National Flood Insurance Act of 1968.

G. Nothing contained herein shall prevent the City of Flagstaff from taking such lawful action as is necessary to prevent or remedy any violation.

## **12-01-001-0004.11 PENALTIES**

Violations of the provisions of these regulations by failure to comply with any of their requirements, including violations of conditions and safeguards established in connection with conditions, shall constitute a misdemeanor. Any person who violates the provisions of these regulations or fails to comply with any of their requirements shall, upon conviction thereof, be guilty of a Class 2 misdemeanor and subject to the associated fines and penalties established by the Arizona Revised Statutes, §§ 48-3615 and 13-802B. In addition, such person shall pay all costs and expenses involved in the case. A separate offense shall be deemed committed for each day such violation continues.

## **12-01-001-0005 ADMINISTRATION**

### **12-01-001-0005.1 FLOODPLAIN BOARD**

The City Council of Flagstaff, Arizona is hereby established as the Floodplain Board (the "Board").

#### **A. Powers of the Board:**

1. To delineate or by rule require developers of land to delineate, for areas where development is ongoing or imminent, and thereafter as development becomes imminent, floodplains consistent with criteria developed by the Federal Emergency Management Agency and the Director of Water Resources.
2. To adopt, amend, repeal, enforce, and otherwise administer floodplain management resolutions, rules, regulations, and orders pertaining to the delineated floodplains within the City of Flagstaff including comprehensive floodplain management and watercourse master plans, pursuant to the regulations of the City of Flagstaff setting forth requirements for the enactment and amendment of ordinances and resolutions.
3. To enter into cooperative agreements authorized by A.R.S. Section 48-3624.
4. To publicly hear and decide appeals and/or variance requests from the review, order, requirement, decision, or determination of the Floodplain Administrator.

### **12-01-001-0005.2 FLOODPLAIN ADMINISTRATOR**

The Stormwater Manager is hereby appointed as Floodplain Administrator. The Floodplain Administrator may delegate to others the duties and authority necessary to carry out the duties outlined in this Section. The Floodplain Administrator shall administer and implement these regulations by granting or denying Floodplain Use Permit applications in accordance with the provisions herein. The Floodplain Administrator shall have the authority to establish methods and standards for constructing the flood protection measures required by this Ordinance when the details of such methods and standards have not been specified by the Ordinance. The various Technical Bulletins published by FEMA are considered to be acceptable methods and standards, provided they are not less restrictive than requirements already established by other City standards and regulations.

#### **A. Duties of the Floodplain Administrator shall include, but not be limited to the following:**

1. Administer and enforce the provisions of these regulations.

2. Require Floodplain Use Permits for all proposed construction and other developments including the placement of manufactured homes and fill within SPECIAL FLOOD HAZARD AREAS as identified ON the FIRM.
3. Review all Floodplain Use Permits applications to determine that:
  - a. The permit requirements of these regulations have been satisfied;
  - b. All other required State and Federal permits pertaining to construction in floodplains and watercourses have been obtained;
  - c. The site is reasonably safe from flooding; and
  - d. The proposed development does not adversely affect the carrying capacity of SPECIAL FLOOD HAZARD AREAS, WHERE THE BASE FLOOD ELEVATION HAS BEEN DETERMINED. For purposes of these regulations, "adversely affect" means that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will NOT increase the water surface elevation of the base flood at any point.
4. Establish the criteria and policy by which consistent technical evaluations of the floodplain are made.
5. Formulate overall comprehensive floodplain management and watercourse master plans.
6. When Base Flood Elevation data has not been provided in accordance with Section 12-01-001-0004.02, the Floodplain Administrator shall obtain, review, and reasonably utilize any BASE FLOOD ELEVATION data available from a Federal, State, or other source, including data developed pursuant to paragraph 12-01-001- 0006.04, as criteria for requiring that new construction, substantial improvements, or other development in Zone A on the FIRM meet the provisions of these regulations. Any such information shall be consistent with the requirements of the Federal Emergency Management Agency and the Director of Arizona Department of Water Resources.
7. Delineate or by rule require developers of land located in Zones "A", or along watercourses that constitute a flood hazard as determined by the criteria established by the Arizona Department of Water Resources (ADWR) in State Standard 2-96 that do not have BASE FLOOD ELEVATION or floodway data, to delineate for areas where development is ongoing or imminent, floodplains and floodways consistent with criteria developed by the Federal Emergency Management Agency and the Director of the Arizona Department of Water Resources.
8. In those areas along a watercourse where the channel width, topography, and/or channel gradient clearly vary from the cross-section and profile data in the FIS, FIRM, and/or FBFM, the Floodplain Administrator may require a floodplain delineation re-study to ensure that the Base Flood Elevation data and horizontal location of the floodway and flood fringe are correctly shown on any property prior to development.
9. Obtain and maintain for public inspection and make available as needed for Flood Insurance Policies or affecting Increased Cost of Construction Coverage:

- a. The certified REGULATORY FLOOD ELEVATION required for residential structures in Section 12-01-001- 0006.1.A.3.c;
- b. The certification required for manufactured homes in Section 12-01-001-0006.5.A.1;
- c. The floodproofing certification required for floodproofed non-residential structures in Section 12-01- 001-0006.1.A.3.d.3;
- d. The certified elevation required for subdivisions in Section 12-01-001-0006.4.E;
- e. The flood vent certification required in Section 12-01-001-0006.A.3.f;
- f. Permit records for repair of flood-related damage to structures on a cumulative basis Improvements, modifications, and additions to existing buildings are counted cumulatively for the 10 years prior to the date of application for construction.
- g. The Floodplain Administrator shall require that the above certifications are provided using the most current version of the FEMA elevation certificate and Floodproofing certificate forms.
- h. Obtain and maintain improvement AND DAMAGE calculations.
- ~~i. Maintain a record of all variance actions, including justification for their issuance, and report such variances issued in the biennial report submitted to the Federal Emergency Management Agency.~~
- ~~j. Complete and submit a Biennial Report to the Federal Emergency Management Agency.~~

10. Whenever a watercourse is to be altered or relocated:

- a. Notify adjacent communities and the Arizona Department of Water Resources prior to such alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Emergency Management Agency (FEMA) through appropriate notification means;
- b. Require that the flood carrying capacity of the altered or relocated portion of said watercourse is maintained.
- c. Base FLOOD ELEVATION and rate of flow due to physical alterations:
  - (1) Base FLOOD ELEVATIONS may increase or decrease resulting from physical changes affecting flooding conditions. As soon as practicable, but not later than six months after the date such information becomes available, the Floodplain Administrator shall notify the Federal Emergency Management Agency (FEMA) of the changes by submitting technical or scientific data in accordance with Volume 44 Code of Federal Regulations section 65.3. Such a submission is necessary so that upon confirmation of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements will be based upon current data.

(2) Within one hundred twenty (120) days after completion of construction of any flood control protective works which changes the rate of flow during the flood or the configuration of the floodplain upstream or downstream from or adjacent to the project, the person or agency responsible for installation of the project shall provide to the governing bodies of all jurisdictions affected by the project a new delineation of all floodplains affected by the project. The new delineation shall be done according to the criteria adopted by the Director of the Arizona Department of Water Resources, CITY OF FLAGSTAFF, AND FEMA.

~~11. Within one hundred twenty (120) days after completion of construction of any flood control protective works which changes the rate of flow during the base flood or the configuration of the floodplain upstream or downstream from or adjacent to the project, the person, or agency responsible for installation of the project shall provide to the governing bodies of all jurisdictions affected by the project a new delineation of all floodplains affected by the project. The new delineations shall be done according to the criteria adopted by the Federal Emergency Management Agency (FEMA), the Director of the Arizona Department of Water Resources and the City of Flagstaff.~~

11. Advise the Flood Control District of Coconino County (the "District") and any adjacent jurisdiction having responsibility for floodplain management in writing and provide a copy of any development plan of all applications for Floodplain Use Permits or variances to develop land in a floodplain or floodway within one mile of the boundary between the City's area of jurisdiction and the area of jurisdiction of the District. Also, advise the District and any jurisdiction having responsibility for floodplain management in writing and provide a copy of any development plan of any major development proposed within a floodplain or floodway which could affect floodplains, floodways or watercourses outside the City's area of jurisdiction.

12. Make interpretations where needed as to the exact location of the boundaries of the SPECIAL FLOOD HAZARD AREAS (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). Any person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in Section 12-01-001-0007.1.

13. Take actions on violations of these regulations as required in Section 12-01-001-0004.10 herein.

14. Notify the Administrator and Director of the Arizona Department of Water Resources of acquisition by means of annexation, incorporation, or otherwise, of additional areas of jurisdiction.

B. Substantial Improvement and Substantial Damage Procedures.

Develop detailed procedures REFERENCING LAST FEMA SI/SD PUBLICATION for identifying and administering requirements for substantial improvement and substantial damage, to include defining "Market Value." Assure procedures are coordinated with other departments and divisions and implemented by city staff.

**12-01-001-0005.3 ESTABLISHMENT OF FLOODPLAIN USE PERMIT:**

A. Except as provided in ARS section 48-3625, a person shall not engage in any development which will divert, retard or obstruct the flow of waters in any watercourse without securing written authorization from the Floodplain Administrator. Where the watercourse is a delineated floodplain no development shall take place in the floodplain without written authorization from the FLOODPLAIN ADMINISTRATOR.

B. Floodplain Use Permit, issued by the Floodplain Administrator, shall be obtained prior to any construction or substantial improvement of any building, structure or portion thereof; including placement of manufactured homes; prior to the use or change of use of land, building or structure; prior to the change or extension of a non-conforming use; and prior to the placement of fill in the flood fringe. Application for a Floodplain Use Permit shall be made on forms furnished by the Floodplain Administrator.

C. The following information, at a minimum, is required for a Floodplain Use Permit application:

1. Plans in duplicate drawn to an engineering scale showing the nature, location, dimensions, and elevation of the area in question; existing and proposed structures, fill, storage of materials; and existing and proposed drainage facilities.
2. Proposed elevation in relation to mean sea level, of the lowest floor (including basement) of all structures. In Zone AO elevation of existing highest adjacent natural grade and proposed elevation of lowest floor of all structures.
3. Proposed elevation in relation to mean sea level to which any nonresidential structure will be flood proofed.
4. Certification by a REGISTERED PROFESSIONAL engineer or architect that the flood proofing methods for any nonresidential structure meet the flood proofing criteria in Section 12-01-001-0006.1.A.3.d.3.
5. Base FLOOD ELEVATION data for subdivision proposals or other development GREATER THAN 50 LOTS OR 5 ACRES, WHICHEVER IS THE LESSER.
6. Description of the extent to which any watercourse will be altered or relocated as a result of proposed development.
7. The signatures of all property owners for all property subject to the development request on the permit.
8. Surface (i.e., plan) view, drawn to an engineering scale, showing all elevation and contours; fill and storage elevations; sizes, locations and spatial arrangement of all proposed, anticipated, and existing structures on the site; location and elevations of streets, water supply and sanitary facilities.
9. Specifications for building construction and materials, filling, dredging, grading, channel improvements and changes, storage of materials, water supply and sanitary facilities.

D. The Floodplain Administrator may require the applicant to furnish additional information, data, and details as deemed necessary, by the Floodplain Administrator, to evaluate the effects of the proposed construction upon the floodplain, including without limitation:

1. A detailed floodplain analysis, performed by a registered professional engineer, of the flood profile, Base Flood Elevations, floodway, and velocities, using methodologies acceptable to the City of Flagstaff Floodplain Administrator, Director of the Arizona Department of Water Resources, and the Federal Emergency Management Agency (FEMA), including existing and anticipated uses.
2. Cross section showing the floodplain surrounding the watercourse, cross sections of the area to be occupied by the proposed development, and Base Flood Elevations.
3. A profile showing the slope of the flow line of the channel or thalweg of the watercourse.
4. A structural analysis by a registered professional engineer showing that any proposed structure(s) will be adequately designed and constructed to prevent flotation, collapse, or lateral movement of the structure(s) resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy, scour and other erosion hazards.
5. Provide any other information needed to ensure that the proposed construction complies with this ordinance.

E. The Floodplain Administrator shall consider the following potential impacts upon review of all Floodplain Use Permit applications:

1. The effects upon lands upstream, downstream and in the immediate vicinity of the proposed development.
2. The effects upon the flood profile and channel stability.
3. The effects upon any tributaries to the main watercourse, drainage channels and any other drainage facilities or systems.
4. Whether the proposed use of a structure is intended for human occupancy.
5. The potential danger to persons upstream, downstream and in the immediate vicinity of the proposed development.
6. Whether any proposed changes in the watercourse will have an adverse environmental impact on the watercourse, including without limitation, erosion of streambanks and stream side trees, vegetation, and wildlife.
7. Whether any proposed water supply, sanitary sewer systems and other utility systems can prevent disease, contamination and unsanitary or hazardous conditions during a flood.
8. The relationship of the proposed development to elements of any applicable City of Flagstaff master plan or other floodplain management program.
9. Whether safe access is available to the proposed development in times of flood for ordinary and emergency vehicles.
10. Whether the cumulative effect of the proposed development, with other existing and anticipated uses, will increase flood heights.

11. Whether expected flood heights, velocities, duration, rate of rise, channel stability and sediment transport of the floodwaters expected at the site will adversely effect the development or the surrounding property.

F. Upon review of a Floodplain Use Permit application and consideration of the provisions of these regulations, the Floodplain Administrator may attach conditions to the approval of the Floodplain Use Permit as he/she deems necessary. Such conditions may include, but are not limited to:

1. Modification of waste disposal and water supply facilities.
2. Limitations on periods of use and operation.
3. Impositions of operational controls, sureties, and deed restrictions.
4. Requirements for construction of channel modifications, dikes, levees, and other protective measures.
5. Floodproofing measures as described in Section 12-01-001-0006.1.A.3.

G. The Floodplain Administrator shall act on an application for a Floodplain Use Permit within thirty (30) days from receipt of the complete application. If the Floodplain Administrator determines that the proposed use is located within the regulatory floodway and is prohibited under Section 12-01-001-0006.7, the Floodplain Administrator shall deny the application.

H. An applicant for a Floodplain Use Permit shall pay the floodplain use permit fee in Section 12-02-002-0003. If the Floodplain Administrator, pursuant to Section 12-01-001-0005.3.D.1, requires the applicant to furnish a floodplain study, the applicant shall also pay any applicable review fee established in Section 12-02-002-0003.

I. Every person who has obtained a Floodplain Use Permit shall conduct all construction authorized by said permit in accordance with the approved application, design, and permit conditions.

J. Prior to issuance of a Floodplain Use Permit, the applicant must submit evidence to the Floodplain Administrator that necessary State and Federal permits have been obtained.

K. The Floodplain Administrator may require deed restrictions or performance bonds, assurances or other security to ensure the performance of the conditions and restrictions imposed on the Floodplain Use Permit.

## **12-01-001-0006 PROVISIONS FOR FLOOD HAZARD REDUCTION**

### **12-01-001-0006.1 DEVELOPMENT STANDARDS IN FLOOD FRINGE AREAS**

A. In all ~~areas~~ of special flood hazard AREAS the following development standards are required:

1. Anchoring:

- a. All new construction and substantial improvements shall be anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy; and.
- b. All manufactured homes shall meet the anchoring standards of 12-01-001-0006.5.A.2.

2. Construction Materials and Methods:

- a. All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.
- b. All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.
- c. All new construction, substantial improvements, and other proposed new development shall be constructed with electrical, heating, ventilation, plumbing and air conditioning equipment and other service facilities that are designed and/or located AT OR ABOVE THE REGULATORY FLOOD ELEVATION so as to prevent water from entering or accumulating within their components during conditions of flooding.
- d. All new construction, substantial improvements, and other development within Zones AH or AO shall be constructed so that adequate drainage paths around the structure(s) on slopes guide flood waters around and away from proposed or existing structures.
- e. All new construction, substantial improvements or other development shall be designed and constructed in accordance with the current City of Flagstaff Design and Construction Standards and Specifications and the City of Flagstaff Stormwater Management Design Manual.

3. Elevation and Floodproofing Requirements:

- a. All new and substantially improved or substantially damaged residential structures within Zones AE and AH of SPECIAL FLOOD HAZARD AREAS shall have the lowest floor (including basement) AND ATTACHED MACHINERY AND EQUIPMENT elevated at or above the REGULATORY FLOOD ELEVATION. Floodproofing of new residential structures is prohibited. Nonresidential structures may meet the standards in Section 12-01-001-0006.1.A.3.d and e. The lowest floor elevation is defined as the bottom of the lowest floor joist, horizontal structural member, or duct work.
- b. All new and substantially improved residential structures in Zone AO shall have the lowest floor (including basement) and attached machinery and equipment be elevated above the highest adjacent grade at least one foot higher than the depth number on the FIRM, or at least two feet if no depth number is specified. Nonresidential structures in AO Zones may meet the standards in Section 12-01-001-0006.1.A.3.d and e. Upon completion of the structure, a registered professional engineer or surveyor shall certify to the Floodplain Administrator that the elevation of the structure meets this standard.
- c. All new or substantially improved residential structures shall have the lowest floor elevation certified by a REGISTERED PROFESSIONAL engineer or surveyor or architect

and provide an elevation certificate to the Floodplain Administrator. IN ZONES AE AND AH, THE BASE FLOOD ELEVATION IS DETERMINED FROM THE FIS AND/OR FIRM.

D. A GARAGE ATTACHED TO A RESIDENTIAL STRUCTURE, CONSTRUCTED WITH THE GARAGE FLOOR SLAB BELOW THE REGULATORY FLOOD ELEVATION, MUST BE DESIGNED TO ALLOW FOR THE AUTOMATIC ENTRY AND EXIT OF FLOOD WATERS AND MUST BE USED SOLELY FOR PARKING, ACCESS AND/OR STORAGE. SEE {THE NUMBERING SYSTEM USED BY THE COMMUNITY}.

E. Nonresidential structures shall either be elevated in conformance with Section 12-01-001- 0006.1.A.3.a. through ce. or together with attendant utility and sanitary facilities:

1. be flood proofed so that below the regulatory flood level the structure is watertight with walls substantially impermeable to the passage of water;
2. have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and
3. be certified by a REGISTERED PROFESSIONAL engineer or architect that the standards of this subsection are satisfied. An elevation certificate shall be provided to the Floodplain Administrator prior to issuance of a building permit.

E. Whenever flood proofing measures are required, a REGISTERED professional engineer or architect shall develop and/or review structural design, specifications, and plans for the construction, and design and methods of construction are in accordance with accepted standards of practice for meeting the applicable provisions of these regulations. The following measures shall be utilized, where appropriate, to ensure that design, specifications, and methods of construction will withstand flood depths, pressures, velocities, impact, and uplift forces and other factors associated with flooding:

- (1) anchoring of structures, or addition of mass or weight to structures to prevent flotation;
- (2) reinforcement of walls and floors to resist rupture or collapse caused by water pressures or floating debris;
- (3) construction of wells, water supply systems and wastewater treatment/disposal systems so as to prevent the entrance of flood waters into such systems;
- (4) subsurface drainage systems to relieve external pressures on foundation walls or basement floors;
- (5) cut-off valves or backflow prevention devices on sewer lines or the elimination of gravity flow basement drains; and
- (6) placement of utilities at or above the REGULATORY FLOOD ELEVATION.

G. For all new construction and substantial improvements, fully enclosed areas below the lowest floor that are useable solely for parking of vehicles, building access, or storage in an area other than a basement and which are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry

and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria:

(1) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided on opposite sides of each enclosed area, if physically possible. If a structure has more than one enclosed area, each area must have openings on exterior walls to allow floodwater to enter and exit directly.

(2) The bottom of all openings shall be no higher than one foot above the adjacent grade; and

(3) Openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters. Openings which require human intervention will not meet the requirement for an opening.

FOR ENGINEERED OPENINGS:

ENGINEERED OPENINGS (OR COVERS AND DEVICES) THAT ARE SPECIFICALLY DESIGNED AND CERTIFIED BY A REGISTERED ENGINEER OR ARCHITECT AS MEETING THE REQUIRED PERFORMANCE AND DESIGN REQUIREMENTS.

ENGINEERED OPENINGS (OR COVERS AND DEVICES) FOR WHICH AN EVALUATION REPORT HAS BEEN ISSUED BY THE INTERNATIONAL CODE COUNCIL (ICC) EVALUATION SERVICE, INC. (ICC-ES), A SUBSIDIARY OF THE INTERNATIONAL CODE COUNCIL, INC.

(4) A garage door, which does not have an opening in conformity with the design criteria in Section 12-01-001-0006.1.A.3.f, does not meet the requirement for an opening.

H. Additions to existing structures or buildings shall be constructed such that the lowest floor is in conformity with the standards set forth in Section 12-01-001-0006.1.A.3.

I. Manufactured homes shall meet the standards set forth in Section 12-01-001-0006.1 and also the standards set forth in Section 12-01-001-0006.5.

4. Structural fill shall be allowed within the flood fringe, under a Floodplain Use Permit, to the extent that it is not prohibited under any other regulation and the following standards are met:

a. Fill which is intended to elevate a structure at or above the REGULATORY FLOOD ELEVATION must be designed and compacted to 95 percent of the maximum density obtainable with the Standard Proctor Test method issued by the American Society for Testing and Materials (ASTM Standard D-698) or other equivalent method. The fill must extend a minimum of 15 feet, or as approved by the Floodplain Administrator, beyond the exterior walls of any structure erected thereon before dropping below the BASE FLOOD ELEVATION. Fill must be designed and certified by A REGISTERED PROFESSIONAL

engineer.

b. Fill slopes for granular material can be no steeper than two horizontal to one vertical unless substantiating data, prepared by a REGISTERED PROFESSIONAL soils engineer or engineering geologist, justifying steeper slopes is provided.

c. Adequate protection must be provided for fill slopes exposed to flood waters with velocities of five feet per second or less by covering the slopes with grasses, or other equivalent planting that is able to withstand the design velocities.

d. Adequate protection must be provided for fill slopes exposed to flood waters with velocities greater than five feet per second by armoring the slopes in accordance with the standards in the City of Flagstaff Stormwater Management Design Manual.

e. New structures constructed on structural fill must have the lowest floor elevation in conformance with Section 12-01-001-0006.1.A.3 herein.

5. All temporary and permanent structures shall be anchored to prevent flotation, which could result in damage to other structures, restriction of bridge openings and other sections of the regulatory floodway.

6. Attendant utility and sanitary facilities for new construction and substantial improvements shall be elevated and/or flood proofed to the Regulatory Flood Elevation.

7. Garages and low cost accessory structures

a. Attached garages.

(1) A garage attached to a residential structure, constructed with the garage floor slab below the REGULATORY FLOOD ELEVATION, must be designed to allow for the automatic entry of flood waters. See Section 12-01-001-0006.1.A.3.f. Areas of the garage below the REGULATORY FLOOD ELEVATION must be constructed with flood resistant materials. See Section 12-01-001-0006.1.A.2.

(2) A garage attached to a nonresidential structure must meet the above requirements or be dry floodproofed.

b. Detached garages and accessory structures.

~~(1) "Accessory structure" used solely for parking (2 car detached garages or smaller) or limited storage (small, low-cost sheds 200 sq ft or less), may be constructed such that its floor is below the Regulatory Flood Elevation, provided the structure is designed and constructed in accordance with the following requirements:~~

(1) FEMA PUBLICATION P-2140: FLOODPLAIN MANAGEMENT REQUIREMENTS FOR AGRICULTURAL STRUCTURES AND ACCESSORY STRUCTURES, DEFINES AN ACCESSORY STRUCTURE AS: FOR FLOODPLAIN MANAGEMENT PURPOSES, ACCESSORY STRUCTURES ARE STRUCTURES THAT ARE ON THE SAME PARCEL OF PROPERTY AS A PRINCIPAL STRUCTURE, THE USE OF WHICH IS INCIDENTAL TO THE USE OF THE PRINCIPAL STRUCTURE. ACCESSORY STRUCTURES MUST BE USED FOR PARKING OR STORAGE, BE

SMALL AND REPRESENT A MINIMAL INVESTMENT BY OWNERS, AND HAVE LOW DAMAGE POTENTIAL. FEMA CONSIDERS "SMALL" TO MEAN NOT LARGER THAN A ONE-STORY TWO-CAR GARAGE. EXAMPLES OF SMALL ACCESSORY STRUCTURES INCLUDE, BUT ARE NOT LIMITED TO, DETACHED GARAGES, STORAGE AND TOOL SHEDS, AND SMALL BOATHOUSES.

(2) STRUCTURE SIZE - THE FOOTPRINT OF A TYPICAL TWO-CAR GARAGE IS ABOUT 600 SQUARE FEET IN AREA. OR LIMITED STORAGE (SMALL, LOW COST SHEDS 200 SQ. FT. OR LESS).

(3) STORAGE - CONTENTS STORED IN WET FLOODPROOFED STRUCTURES WILL GET WET DURING FLOODING.

- (a) Use of the accessory structure must be limited to parking or limited storage;
- (b) The portions of the accessory structure located below the REGULATORY FLOOD ELEVATION must be built using flood-resistant materials;
- (c) The accessory structure must be adequately anchored to prevent flotation, collapse and lateral movement;
- (d) Any mechanical and utility equipment in the accessory structure must be elevated or floodproofed to or above the REGULATORY FLOOD ELEVATION;
- (e) The accessory structure must comply with floodplain encroachment provisions in Section 12-01-001-0006.7; and
- (f) The accessory structure must be designed to allow for the automatic entry of flood waters in accordance with Section 12-01-001-0006.1.A.3.f.1.

c. Detached garages and accessory structures not meeting the above standards must be constructed in accordance with all applicable standards in Section 12-01-001-0006.

UPON COMPLETION OF THE STRUCTURE, CERTIFICATION BY A REGISTERED PROFESSIONAL ENGINEER OR SURVEYOR THAT THE REQUIREMENTS OF THIS SECTION HAVE BEEN SATISFIED SHALL BE PROVIDED TO THE FLOODPLAIN ADMINISTRATOR FOR VERIFICATION.

#### **12-01-001-0006.2 STANDARDS FOR STORAGE OF MATERIALS AND EQUIPMENT:**

A. The storage or processing of materials that are, in time of flooding, buoyant, flammable, explosive, toxic, or could be injurious to human, animal, or plant life is prohibited IN SPECIAL FLOOD HAZARD AREAS.

B. Storage of other material or equipment may be allowed if not subject to major damage by floods, and if firmly anchored to prevent flotation, or if readily removable from the area within the time available after flood warning.

#### **12-01-001-0006.3 STANDARDS FOR UTILITIES:**

- A. All new or replacement water supply and sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system and discharge from systems into flood waters.
- B. On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.
- C. Waste disposal systems shall not be installed wholly or partially in a regulatory floodway.
- D. All areas within the Floodplain that are disturbed as a result of the construction or maintenance of underground utilities must be restored to pre-construction conditions including, but not limited to, re-seeding, re-vegetating and restoring the same grade.

#### **12-01-001-0006.4 STANDARDS FOR SUBDIVISIONS:**

- A. All preliminary subdivision proposals and other proposed development (including proposals for manufactured home parks and subdivisions), GREATER THAN 50 LOTS OR 5 ACRES, shall identify the Special Flood Hazard Areas and the Base Flood Elevation.
- B. A preliminary drainage report is required for all preliminary plat submittals in accordance with the City of Flagstaff Stormwater Management Design Manual. A final drainage report which technically demonstrates compliance with these regulations and the Stormwater Management Design Manual is required to be submitted and accepted prior to approval of subdivision construction plans and recording of the final plat.
- C. All subdivision proposals or other developments must provide BASE FLOOD ELEVATION data.
- D. All final subdivision plats within SPECIAL FLOOD HAZARD AREAS shall show the limits of the base flood, BASE FLOOD ELEVATIONS, and floodway. All final subdivision plans shall provide the minimum lowest floor elevation(s) of proposed structure(s) and pads.
- E. In SPECIAL FLOOD HAZARD AREAS, all final subdivision construction plans shall provide the minimum lowest floor elevations of proposed structures and elevations of the engineered pads. If the site is filled above the base flood, the lowest floor and pad elevations shall be certified by A REGISTERED PROFESSIONAL engineer or surveyor and provided to the Floodplain Administrator. The subdivider must complete a revision of the Flood Insurance Rate Map for any areas filled above the BASE FLOOD ELEVATION.
- F. All subdivision proposals and other proposed development shall be consistent with the need to minimize flood damage.
- G. All subdivision proposals and other proposed development shall have public utilities and facilities such as sewer, gas, electrical, and water systems located and constructed to minimize flood damage.
- H. All subdivision proposals and other proposed development shall provide adequate drainage to reduce exposure to flood hazards.
- I. All subdivisions shall provide stormwater facilities in accordance with the City of Flagstaff

**12-01-001-0006.5 STANDARDS FOR MANUFACTURED HOMES, MANUFACTURED HOME PARKS AND SUBDIVISIONS, AND RECREATIONAL VEHICLES:**

A. All new and replacement manufactured homes, additions to manufactured homes, and recreational vehicles which are left on site for more than 180 days or are not licensed and ready for highway use shall:

1. Be elevated so that the bottom of the structural frame or the lowest point of any attached appliances, whichever is lower, is at or above the REGULATORY FLOOD ELEVATION.
2. Be securely anchored to an adequately anchored foundation system to resist flotation, collapse, or lateral movement capable of resisting forces of at least four thousand eight hundred (4,800) pounds. This requirement is in addition to applicable State and local anchoring requirements to withstand wind forces. One of the following methods shall be used:
  - a. by providing over-the-top to ground anchors at each of the four corners of the manufactured home. Manufactured homes fifty (50) feet or more in length must have two (2) additional ties per side at intermediate locations and manufactured homes less than fifty (50) feet in length must have one (1) additional over-the-top tie per side; or by providing frame ties at each of the four corners of the manufactured home. Manufactured homes fifty (50) feet or more in length must have five (5) additional ties per side, and manufactured homes less than fifty (50) feet in length must have four additional frame ties per side. 44 CFR § 60.3(B)(8).
3. The manufactured home chassis must be supported by reinforced piers or other foundation elements of at least equivalent strength that are no more than thirty-six (36) inches in height above grade and be securely anchored to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.
4. Any additions to a manufactured home must be similarly anchored.

UPON COMPLETION OF INSTALLATION OF THE MANUFACTURED HOME, CERTIFICATION BY A REGISTERED PROFESSIONAL ENGINEER OR SURVEYOR THAT THE ELEVATION REQUIREMENTS OF THIS SECTION HAVE BEEN SATISFIED SHALL BE PROVIDED TO THE FLOODPLAIN ADMINISTRATOR FOR VERIFICATION.

B. Minimum Requirements for Manufactured Home Parks and Manufactured Home Subdivisions:

1. Adequate surface drainage and vehicular access for a manufactured home transport vehicle shall be provided.
2. All manufactured homes shall be placed on pads, lots elevated on compacted fill or pilings so that the bottom of the structural frame or the lowest point on any attached appliances, whichever is lower, is at or above the Regulatory Flood Elevation. If elevated on pilings:
  - a. the lots shall be large enough to permit steps;
  - b. the pilings shall be placed in stable soil no more than ten (10) feet apart; and

c. reinforcement shall be provided for pilings more than six (6) feet above the ground level.

C. No manufactured home, recreational vehicle, new manufactured home park, or enlargement of an existing manufactured home park shall be permitted in the regulatory floodway.

D. Recreational vehicles placed on sites within Zones A, AH, AE and AO must meet the following requirements:

1. be on the site for fewer than 180 consecutive days;
2. be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on wheels or a jacking system, is attached to the site only by quick disconnect type utilities and security devices, and has no permanently attached additions; or
3. recreational vehicles not meeting the criteria in items 1 and 2 must meet the requirements of Section 12-01-001-0006.5.A.

#### **12-01-001-0006.6 RESERVED FOR FUTURE USE**

#### **12-01-001-0006.7 DEVELOPMENT STANDARDS FOR REGULATORY FLOODWAYS:**

Located within THE SPECIAL FLOOD HAZARD AREAS established in Section 12-01-001-0004.02 are areas designated as regulatory floodways. The following provisions shall apply to regulatory floodways:

A. The following are prohibited in, on, or over the regulatory floodway unless removed by a FEMA map revision: Encroachments, including fill, new construction, additions to existing structures which increase the building footprint, storage of materials or equipment, manufactured homes, recreational vehicles, or other development are prohibited. Substantial improvements are prohibited within the regulatory floodway unless it has been demonstrated through hydrologic and hydraulic analyses performed in accordance with standard engineering practice that the proposed substantial improvement would not result in any increase in flood levels within the community during the occurrence of the base flood. DOCUMENTED BY A NO-RISE CERTIFICATE. All new construction and substantial improvements shall comply with all other applicable flood hazard reduction provisions of Section 12-01-001-0006.

B. Storage of materials that are buoyant, flammable, explosive or injurious to human, animal, plant, fish or other aquatic life is prohibited in, on or over the regulatory floodway.

C. Any solid or hazardous waste disposal facility is prohibited in, on or over the regulatory floodway.

D. Any wastewater treatment facility or pond is prohibited in, on or over the regulatory floodway. New private sewage systems, or additions to existing private sewage systems are prohibited in, on or over the regulatory floodway.

E. Zone A, for which a regulatory floodway has not been delineated, shall be deemed in entirety as regulatory floodway for the purposes of these regulations.

F. Uses having low flood-damage potential and not obstructing flood flows shall be permitted in the regulatory floodway to the extent that they are not prohibited by any other regulation, and

provided they do not require structures, fill or storage of materials and equipment, or anything which will significantly impede or obstruct flood flows. Such uses include:

1. Agricultural uses such as general farming, pasture and forestry but, does not include permanent crops which would constitute an obstruction to flood flows.
2. Functionally dependent uses, industrial/commercial loading areas and parking lots. Overnight parking and unattended vehicles are prohibited in the regulatory floodway.
3. Private and public recreational uses including but not limited to: golf courses, driving ranges, picnic grounds, swimming areas, parks, ball or multi-use fields, shooting preserves, target ranges, trap and skeet ranges, hunting and fishing areas, hiking and horseback trails.
4. Functions that serve the public interest and that will not cause a rise in the floodway elevation. Such uses include but are not limited to: water conservation, power and water quality service facilities and related works; remedial or corrective actions; environmental restoration; flood control facilities and related works; public roadways and bridges; fish and wildlife enhancement activities; emergency action assistance; public health assistance; utility transmission lines, pipelines, and water monitoring devices.

#### **12-01-001-0006.8 MISCELLANEOUS PROVISIONS:**

A. The Floodplain Administrator shall review and approve all development permits before issuance to ensure compliance with the provisions of these regulations.

B. Lateral additions to existing structures must meet all requirements of this Ordinance. If the Lateral Addition constitutes a Substantial Improvement to the existing structure then both the addition and the existing structure must meet all requirements of this Ordinance. The exception to this is for lateral additions located in the flood fringe, if the Lateral Addition is connected to the existing structure by only one doorway, not exceeding 36 inches in width, and minimal finishing is done to the common wall.

C. Substantial improvements to existing structures shall be counted on a cumulative basis for the 10 years prior to the date of application for construction. Additions to existing structures shall be included in the determination of a substantial improvement to the original structure. The property owner or permit applicant may have the option of having the structure independently appraised, the cost of which shall be assumed by the property owner or permit applicant, to be used as the market value. A copy of the certified appraisal must be submitted to the Floodplain Administrator.

D. The development of all land within the City of Flagstaff must include provisions for the management of stormwater runoff from the property which is to be developed. This management shall consist of stormwater storage facilities or other mitigation measures for rainfall events up to and including the one-hundred year event, in accordance with the City of Flagstaff Stormwater Management Design Manual.

E. No street shall be used as a major carrier of stormwater from adjacent lands in lieu of natural washes, man-made channel, or storm drains. Streets shall be used for local runoff only. In all cases the flow of water from public streets shall be confined in public rights-of-way or drainage easements.

F. All lots, structures, etc. within a development shall be accessible over terrain which can be traversed by conventional motor vehicles from the boundary of that development during the one-hundred year flood. Boundary shall include any adjacent street(s). At least one access route shall be accessible with a maximum water depth of one foot over the top of the access route or road during the one-hundred year flood.

G. Parking lots are permitted within the floodplain provided that:

1. All vehicles are fully licensed, ready for highway use, and are not unattended. The term "unattended" shall mean that the owner or authorized driver cannot reasonably be expected to be available to remove the vehicle before flooding occurs.
2. Any parking lot subject to flooding shall have a prominent sign posted at each entrance stating "Warning, parking lot subject to flooding".
3. Overnight parking is prohibited in the regulatory floodway and shall be limited to flood fringe areas where the flooding does not exceed one foot of depth during the one-hundred year flood.

H. An erosion hazard and building setback from the top of the channel bank is required for all new development to create a buffer and to provide access to the channel for possible maintenance and improvements work. This buffer shall be designated by the Floodplain Administrator according to the flood-related erosion hazard and erosion rates in relation to the anticipated "useful life" of structures, and depending upon the geologic, hydrologic, topographic, and climatic characteristics of the land. The minimum setback shall be ten (10) feet. The buffer may be used for suitable open space purposes, such as for agriculture, forestry, outdoor recreation, wildlife habitat areas, landscaping and for other activities using temporary and portable structures only.

I. A waiver to the setback requirements may be granted by the Floodplain Administrator if it can be demonstrated that adequate erosion and flow velocity protection can and will be constructed and maintained, and vehicular maintenance access along the top of the channel bank is not required. All plans for erosion and flow velocity protection must be prepared by A REGISTERED PROFESSIONAL engineer and reviewed and approved by the Floodplain Administrator.

J. No new critical facility shall be constructed within the 100 or 500-year floodplain.

K. No person shall change the use of an existing structure from a nonresidential use to a residential use without compliance with the provisions of these regulations.

L. The design and evaluation of all new floodplain and stormwater management facilities shall be in accordance with the policies and design criteria set forth in the City of Flagstaff Stormwater Management Design Manual.

M. Private Drainage Infrastructure that was required to be constructed as a condition of development, such as detention basins, Low Impact Development (LID) facilities, culverts and open channels, shall be maintained by the private property owner, or responsible party(s), to ensure proper function pursuant to the approved design.

N. In order to provide for properly sized drainage infrastructure and to minimize the need for

the upsizing of drainage infrastructure in the future, drainage infrastructure shall be sized according to the best available hydrologic and hydraulic data including, but not limited to Drainage Master Plans, future conditions modeling and other drainage studies as may be approved by the City.

## **12-01-001-0007 VARIANCE PROCEDURE**

### **12-01-001-0007.1 APPEAL AND VARIANCE BOARD**

A. The Floodplain Board (the "Board") of the City of Flagstaff shall hear and decide appeals and requests for variances from the requirements of these regulations.

B. The Board shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the Floodplain Administrator in the enforcement or administration of these regulations.

~~C. The Board shall hear and decide variance requests from the provisions of these regulations.~~

~~C. D.~~ Applications for an appeal or variance shall be made on forms and in accordance with procedures furnished by the Floodplain Administrator. Persons requesting an appeal or variance shall pay a fee in the amount of three hundred dollars (\$300.00). Upon receipt of the appeal/variance request, fee, and all required information, the Floodplain Administrator shall schedule the request before the Board within thirty (30) calendar days.

~~D. E.~~ The Board shall conduct hearings on all appeals and variance requests and all hearings shall be open to the public. Notice of the public hearing shall be published in a newspaper of general circulation a minimum of fifteen (15) days prior to the hearing.

~~E. F.~~ The Board shall render a written decision on an appeal or variance within thirty (30) calendar days from the date of the public hearing. When additional information is required by the Board, the Board shall render a decision within thirty (30) calendar days from receipt of such information.

~~F. G.~~ In ~~passing~~ **CONSIDERING** ~~upon~~ such applications, the Board shall consider all technical evaluations, all relevant factors, standards specified in other sections of these regulations, and:

1. The danger that materials may be swept onto other lands to the injury of others;
2. The danger of life and property due to flooding or erosion damage;
3. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
4. The importance of the services provided by the proposed facility to the community;
5. The necessity to the facility of a waterfront location, where applicable;
6. The availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;

7. The compatibility of the proposed use with existing and anticipated development;
8. The relationship of the proposed use to the comprehensive plan and floodplain management program for that area;
9. The safety of access to the property in time of flood for ordinary and emergency vehicles;
10. The expected heights, velocity, duration, rate of rise, and sediment transport of the flood waters expected at the site; and,
11. The costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical, water system, and streets and bridges.

**G.H.** The Floodplain Administrator shall maintain a record of all variance actions, including justification for their issuance and report such variances issued in its biennial report submitted to the Federal Emergency Management Agency.

## **12-01-001-0007.2 VARIANCES**

### **A. NATURE OF VARIANCES**

The variance criteria set forth in these regulations are based on the general principle of zoning law that variances pertain to a piece of property and are not personal in nature. A variance may be granted for a parcel of property with physical characteristics so unusual that complying with the requirements of this Ordinance would create an exceptional hardship to the applicant or the surrounding properties. Mere economic or financial hardship alone is not exceptional. The characteristics must be unique to the property and not be shared by adjacent parcels. The unique characteristic must pertain to the land itself, not the structure, its inhabitants, or the property owners.

It is the duty of the Floodplain Board to help protect its citizens from flooding. This need is so compelling and the implications of the cost of insuring a structure built below the **REGULATORY FLOOD ELEVATION** are so serious that variances from the flood elevation or from other requirements in the flood ordinance are quite rare. The long-term goal of preventing and reducing flood loss and damage can only be met if variances are strictly limited. Therefore, the variance guidelines provided in this ordinance are more detailed and contain multiple provisions that must be met before a variance can be properly granted. The criteria are designed to screen out those situations in which alternatives other than a variance are more appropriate.

### **B. CONDITIONS FOR VARIANCES**

1. Variances may be issued for the repair, rehabilitation, or restoration of structures listed in the National Register of Historic Places or the State Inventory of Historic Places, upon a determination that the proposed repair or rehabilitation will not preclude the structure's continued designation as a historic structure and the variance is the minimum necessary to preserve the historic character and design of the structure.
2. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

3. Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
4. Variances shall only be issued upon:
  - a. A showing of good and sufficient cause;
  - b. A determination that failure to grant the variance would result in exceptional hardship to the applicant;
  - c. A showing that the use cannot perform its intended purpose unless it is located or carried out in close proximity to water. This includes only facilities defined in Section 12-01-001-0003 of these regulations in the definition of "Functionally Dependent Use"; and
  - d. A determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of, the public, or conflict with existing local laws or ordinances.
5. Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items 12-01-001-0005 and 12-01-001-0006 have been fully considered. As the lot size increases beyond one-half acre, the technical justification required for issuing the variance increases.
6. Upon consideration of the factors of Section 12-01-001-0007.1 and the purposes of these regulations, the Floodplain Board may attach such conditions to the granting of variances as it deems necessary to further the purposes of these regulations.
7. Any applicant to whom a variance is granted shall be given written notice over the signature of Floodplain Administrator that:
  - a. The issuance of a variance to construct a structure below the ~~base~~ **REGULATORY** flood level will result in increased premium rates for flood insurance coverage; and
  - b. Such construction below the base flood level increases risks to life and property.

Such notification shall be maintained with a record of all variance actions as required in Paragraph 12-1-7-1.8. of these regulations. ~~Such notice will also state that the land upon which the variance is granted shall be ineligible for exchange of land pursuant to any flood relocation and land exchange program~~ A copy of the notice shall be recorded by the Board in the Office of the Coconino County Recorder and shall be recorded in a manner so that it appears in the chain of title of the affected parcel of land.

8. If the Floodplain Board has cause to believe, after approval of a variance, that any stipulations or conditions may have been violated, the Floodplain Board may set a hearing for the purpose of determining to revoke the variance for such violation. The Floodplain Board may revoke the variance for finding a violation of the stipulations or conditions or it may grant a limited time in which to correct the violation in order to avoid revocation of the variance.

### **12-01-001-0007.3 APPEALS**

A person may appeal to the Board for a judgment on the interpretation of the provisions of these regulations when it is alleged there is an error in any requirement, decision, or determination made by the Floodplain Administrator in the enforcement or administration of these regulations.

#### **12-01-001-0009 AMENDMENTS**

The provisions of these regulations may, from time to time, be amended, supplemented, changed or repealed, as provided in the Arizona Revised Statutes. However, no such action may be taken until a public hearing in relation thereto has been held, at which time parties in interest and citizens shall have an opportunity to be heard. At least fifteen (15) days notice of the time and place of such hearing shall be published in a newspaper of general circulation.

A full text of any proposed amendments to these regulations shall be available for inspection by the public at the office of the Floodplain Administrator at least fifteen (15) days prior to the date of the amendment hearing.

#### **12-01-001-0010 SEVERABILITY:**

These regulations and the various parts thereof are hereby declared to be severable. Should any section of these regulations be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of these regulations as a whole, or any portion thereof other than the section so declared to be unconstitutional or invalid.

#### **12-01-001-0011 RESERVED FOR FUTURE USE**

#### **12-01-001-0012 RESERVED FOR FUTURE USE**

**ORDINANCE NO. 2024-20**

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF FLAGSTAFF, AMENDING THE FLAGSTAFF CITY CODE, TITLE 12 FLOODPLAINS, CHAPTER 12-01 FLOOD PLAIN REGULATIONS, BY ADOPTING BY REFERENCE THAT CERTAIN DOCUMENT ENTITLED “2024 REVISIONS TO FLOODPLAIN REGULATIONS”; PROVIDING FOR PENALTIES, REPEAL OF CONFLICTING ORDINANCES, SEVERABILITY, AND ESTABLISHING AN EFFECTIVE DATE**

**RECITALS:**

WHEREAS, the City of Flagstaff has established policies, codes and regulations related the floodplain; and

WHEREAS, the City of Flagstaff continues to create and improve policies, codes and regulations related to the floodplain; and

WHEREAS, the City of Flagstaff requires residents to comply with said floodplain policies, codes and regulations; and

WHEREAS, the requirements found in Flagstaff’s City Code related to the floodplain are updated when needed; and

WHEREAS, Chapter 12-01 of the Flagstaff City Code which is entitled “Floodplain Regulations” contains language that should be aligned with language of the Federal Emergency Management Agency (FEMA); and

WHEREAS, from time to time, the City Council for the City of Flagstaff can update, add to, or amend the floodplain regulations to provide come into better alignment with state and federal regulations; and

WHEREAS, the City Council has determined that policies, codes and regulations related to the floodplain should be updated to align with the regulations of FEMA for management of the floodplain in the City of Flagstaff.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. That certain document known as “2024 Revisions to Floodplain Regulations”, one(1) paper copy and (1) electronic copy of which are on file in the office of the City Clerk of the City of Flagstaff, Arizona, has been declared a public record by Resolution No. 2024-32 of the City of Flagstaff, Arizona, is hereby referred to, adopted and made a part hereof as if fully set out in this ordinance.

SECTION 2. Repeal of Conflicting Ordinances

All ordinances and parts of ordinances in conflict with the provisions of the code adopted herein are hereby repealed.

**SECTION 3. Severability**

If any section, subsection, sentence, clause, phrase or portion of this ordinance or any part of the code adopted herein by reference is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions thereof.

**SECTION 4. Clerical Corrections**

The City Clerk is hereby authorized to correct clerical and grammatical errors, if any, related to this ordinance, and to make formatting changes appropriate for purposes of clarity, form, or consistency with the Flagstaff City Code.

**SECTION 5. Effective Date**

This Ordinance shall be effective thirty (30) days following adoption by the City Council.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Trevor Henry, Capital Improvements Engineer  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

**TITLE:**

**Consideration and Approval of Contract:** Second Amendment to the Construction Manager at Risk (CMAR) Construction Phase Services Agreement with Eagle Mountain Construction, Inc. for the Spruce Wash Flood Mitigation Suite of Projects to add Guaranteed Maximum Price (GMP) 3.

**STAFF RECOMMENDED ACTION:**

1. Approve the Second Amendment to the CMAR Construction Phase Services Agreement with Eagle Mountain Construction, Inc. for the Spruce Wash Flood Mitigation Suite of Projects to include GMP 3 in the amount of \$2,907,375.00 and adding 0 days to the contract duration; and
2. Approve an Owner's Contingency of \$50,000, which is approximately 2.0% of Guaranteed Maximum Price #3; and
3. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

Staff recommends approval of the Second Amendment to the CMAR Construction Phase Services Agreement No. 2023-60, with Eagle Mountain Construction (EMC), for the Spruce Wash Flood Mitigation Suite of Projects (the Suite) to include GMP 3 in the amount of **\$2,907,375.00**, an Owner's Contingency of **\$50,000**, and adding 0 days to the contract duration. Approval of this Second Amendment will authorize construction of the Linda Vista to Cedar Channel Project. The remaining Projects within the Suite will be presented for Council's consideration at a later date as the Third Amendment to this Agreement with GMP#4. Please refer to the attached context and vicinity maps.

Construction of the Suite of Projects began in September of 2023 with GMP#1 for the underground utilities portion of the Grandview Project and Wedge Clearing. Amendment One, GMP#2 began in March of 2024 and includes the utility relocations for the Linda Vista to Cedar Channel, Grandview Street Improvements, the Linda Vista Crossing and the Wedge Utilities. Amendment one extended construction to 1,025 days to cover construction of the entire Suite spanning over four construction seasons with a target completion prior to monsoon season of 2026. Design is nearing completion on the remaining projects within the Suite and is anticipated to be completed this summer 2024. The final scheduling and construction sequencing of the Suite will be determined once designs and other funding source requirements are known.

The majority of the improvements in the Suite of Projects will be constructed within City property, in City right-of-way, and or within the existing public utility and drainage easement along Spruce Wash. This Second Amendment adding GMP 3 requires an access and drainage easement from one property owner and temporary construction easements for final grading from four property owners along the channel. The concrete channel is located entirely with an existing drainage and public utilities easement.

**Financial Impact:**

The Second Amendment adding GMP 3 plus expenditures from the owner's contingency will be funded by Proposition 441 Funds under the GO Capital Project Fund from the 2024/25 fiscal year in the amount of **\$2,957,375.00**, Account Number 410-08-385-3525-3, Cedar to Linda Vista Channel project.

The total project budget:

Project / Portion of Project	FY2023-24	FY2024-25	Budget Line	Account Number
Linda Vista to Cedar Channel	\$757,055	\$3,328,095	Cedar to Linda Vista Channel	410-08-385-3525-3

**Policy Impact:**

No impact.

**Previous Council Decision or Community Discussion:**

- Council previously approved the ballot language for the November 2022 voter approved Proposition 441 Wildfire, Flood, and Wastewater Infrastructure Bond, which dedicated \$26 million towards flood mitigation projects
- Council previously approved the Agreement with EMC for the Suite of Projects for GMP#1 on July 3, 2023.
- Council previously approved Amendment One with EMC for the Suite of Projects for GMP #2 on March 5, 2024.

**Options and Alternatives to Recommended Action:**

1. Approve the Second Amendment as recommended. Approval will allow work to move forward; or,
2. Reject approval of the award as recommended. This action would delay the Project.
  - a. If rejection occurs, possible options include:
    - i. Ask staff to re-evaluate the recommendation; or
    - ii. Suspend or cancel the Project completely.

**Background and History:**

On July 21, 2019, the Museum Fire broke out in the Dry Lake Hills area just above Flagstaff within the Coconino National Forest. The fire ultimately charred 1,961 acres, including a significant portion of the Spruce Wash Watershed. Flood modeling subsequently showed potential flood risk to neighborhoods in Coconino County and the City of Flagstaff. Throughout the summer of 2021, monsoon rain events impacted the Museum burn scar and caused multiple rounds of flash flooding in Flagstaff neighborhoods.

In the November 2022 election, voters approved Proposition 441 with support from 76% of Flagstaff voters. The Proposition invests \$57 million in City of Flagstaff wildfire suppression, stormwater flood mitigation and wastewater treatment infrastructure. Specifically, \$26 million of this funding will be used to fund stormwater infrastructure improvements in the Spruce Wash area to lessen the impacts of flooding in affected neighborhoods.

The development of the Spruce Wash Technical Feasibility Study Phase I and Phase II conducted by Peak Engineering identified eight Projects to be constructed with the \$26 million in funding from Prop 441 to mitigate post-wildfire flooding in the Spruce Wash. The Suite of Projects will be constructed in addition to the Park Way Basins and the Killip Basins Inlet, which are funded through other sources.

On December 15, 2022, Purchasing staff solicited a Request for Statement of Qualifications for CMAR design and construction phase services. On January 13, 2023 Purchasing received Statements of Qualifications (SOQs) from the following five construction firms: Banicki Construction, Eagle Mountain Construction, Fann Contracting, Kinney Construction, and Tiffany Construction Company. A nine-member selection committee of City staff, three outside engineering consultants, and an outside contractor executive evaluated the SOQs. After the selection committee review process and negotiations, in early April 2023 the City's qualifications based selection process identified Eagle Mountain Construction as the most qualified Contractor to perform the CMAR design and construction phase services for the Suite of Projects.

**Key Considerations:**

This is the Second Amendment to add GMP 3 to the current Agreement with EMC for the Suite of Projects. GMP 3 includes the Linda Vista to Cedar Channel Project. The First Amendment adding GMP 2 included the utility relocations in the Linda Vista to Cedar Channel in addition to the Wedge Utilities, Grandview Street Improvements and Linda Vista Crossing. The remaining projects within the Suite of Projects will be presented for Council's consideration later in 2024 with a Third Amendment adding GMP 4. Please refer to the attached context and vicinity maps.

The Suite of Projects consist of the following eight Projects:

1. Grandview Drive Reconstruction -- a reconstructed inverted crown street with a modified rolled curb instead of a typical rolled curb to increase stormwater capacity of the roadway on Grandview from Linda Vista to Cedar including the side-streets, and replacing and lowering the existing aging water and sewer infrastructure to ensure proper cover with the lowered roadway.
2. The Wedge Detention Basin -- a detention basin to receive diverted flows from Spruce Wash.
3. Linda Vista Drive Crossing -- a new box culvert to increase the inlet and downstream channel capacity and reduce the potential for overtopping of Linda Vista Drive. This project also includes adding an inlet for the storm drain to the Wedge Detention Basin Project and relocating existing water and sewer mains so they are not in conflict with the new concrete box culvert.
4. Cedar Avenue to Linda Vista Drive Channel: a re-graded and hardened channel to improve capacity for stormwater runoff conveyance. The work under Amendment One, GMP #2 includes the franchise utility relocations for UniSource Energy Services and Arizona Public Service. The work under this Amendment Two, GMP #3 generally includes earthwork and installation of armor flex and concrete channel linings. ArmorFlex is a flexible, interlocking matrix of cellular concrete blocks and will be installed in the upper ~350 foot long portion of the channel, nearest Linda Vista Drive. The lower ~1,600 linear feet of channel will be a concrete trapezoidal channel.
5. Cedar Avenue Crossing: a new box culvert to increase the inlet and downstream channel capacity.
6. Arroyo Seco Drive to Dortha Avenue Channel: a re-graded and hardened channel to improve capacity for stormwater runoff conveyance.
7. Arroyo Seco Drive Inlet: a reconstructed inlet structure for the purpose of increasing the inlet capacity to capture more stormwater into the downstream existing 60-inch storm drain.
8. Killip Basins Outlet: a new outlet structure from the Killip Regional Detention Basins to an existing storm drain in Main Street to serve as a secondary outlet for larger storm events, reducing the impact of water overtopping the basins.

Design is nearing completion on the remaining Projects within the Suite and is anticipated to be completed this summer 2024. The final scheduling and construction sequencing of the Suite will be determined once designs and other funding source requirements are known.

The majority of the improvements in the Suite of Projects will be constructed within City property, in City right-of-way, and or within the existing public utility and drainage easement along Spruce Wash. This Amendment Two, GMP #3 requires an access and drainage easement from one property owner and temporary construction easements for final grading from four property owners along the channel. The concrete channel is located with an existing drainage and public utilities easement.

The Construction Manager at Risk (CMAR) method of procurement was selected to expedite the design and construction schedule and to accommodate the complex sequencing of construction activities for this large-scale complex Suite of Projects with limits in an established neighborhood, near multiple schools, on high traffic volume streets with Mountain Line bus routes, and in a wash that experiences post-wildfire flooding. The CMAR process is a collaborative effort, which allows for flexibility with delivering the design and construction of the Project, as well as an open dialog between the City, the Design Consultant, and the Contractor on critical design and construction issues to minimize impacts to the community during construction.

#### **Expanded Financial Considerations:**

The Spruce Wash Flood Mitigation Suite of Projects is funded by the November 2022 voter approved Proposition 441 Wildfire, Flood, and Wastewater Infrastructure Bond, which dedicated \$26 million towards flood mitigation projects.

GMP#1 is \$2,906,383.00 plus an Owners Contingency of \$50,000.00 for a Total Contract Price of

\$2,956,383.00. GMP#1 is for the construction of the utilities portion of the Grandview Project and the clearing portion of the Wedge Project.

GMP#2 is \$7,429,149.06 plus an approximate 2.5% Owners Contingency of \$185,000.00. GMP#2 is for the utility relocations in the Linda Vista to Cedar Channel and construction of the Wedge Utilities, Grandview Street Improvements and Linda Vista Crossing.

This GMP#3 is \$2,907,375.00 plus an approximate 2.0% Owners Contingency of \$50,000.00.

The Total Contract Price including Amendment One and this Amendment Two and owners contingency is now \$13,527,907.06.

The contract duration is 1,025 days with an anticipated completion date of June 26, 2026.

Project / Portion of Project	FY24	FY25	Budget Line	Account Number
Linda Vista to Cedar Channel	\$2,359,852	\$1,725,298	Cedar to Linda Vista Channel	410-08-385-3525-3

**Community Benefits and Considerations:**

- Mitigating post-wildfire flooding in the Spruce Wash and surrounding neighborhoods, businesses, parks, and schools.
- Replacing and or abandoning aged and undersized existing water and sewer infrastructure, ranging from 51-63 years old, to meet current standards.
- Reducing required utilities maintenance with the construction of the new infrastructure.
- Coordinating construction of multiple projects and utilizing project areas for temporary construction yards in the immediate vicinity to minimize inconveniences to the public and reduce costs.

**Community Involvement:**

Inform, Involve, Empower:

- Starting from roughly August of 2021 there have been over 19 Museum Flood and Post Wildfire Flooding Council Updates which will continue through and after the design and construction of the Suite of Projects.
- In January 2022, Beta PR, on behalf of the City of Flagstaff, created the Museum Fire Flood Projects Website [museumfloodprojects.com](http://museumfloodprojects.com). As of May 31, 2024, 5,615 individuals have visited site with over 6,930 total visits. The site also includes a subpage where people can sign up to receive E-Newsletters sent out via email on a weekly basis to provide updates and information on the Museum Fire Flood Mitigation Projects.
- In February 2022, Beta PR, on behalf of the City of Flagstaff, began sending out the ENewsletters and will continue to do so through and after the completion of the Suite of Projects. As of May 31, 2024, there are currently 550 ENewsletter subscribers.
- Beta PR created and maintains a Museum Fire Flood Projects email address ([info@museumfloodprojects.com](mailto:info@museumfloodprojects.com)) and a project hotline. To date, over 95 stakeholders have utilized the the hotline to get their questions and concerns answered.
- In February 2022, Beta PR, on behalf of the City of Flagstaff, sent out an introduction mailer for Museum Fire Flood Mitigation Projects that was mailed to 950 properties in Spruce Wash area that included a Spanish translated side. Since February 2022, BetaPr, on behalf of the City, has mailed seven notification fliers and placed five door hangers to spread project information.
- In November 2022, voters approved Proposition 441 with support from 76% of Flagstaff voters.
- In December 2022, the Proposition 441 subpage of the Museum Fire Flood Projects Website was created which includes more information regarding the Suite of Projects.
- On February 2, 2023, the City hosted a Spruce Wash Community Meeting to provide information on the history of the Museum Fire, update on the progress of Spruce Wash Watershed restoration, November Prop 441 passage, and Prop 441 preliminary projects.
- On May 15, 2023, the City hosted the second Spruce Wash Community Meeting to provide information on the 2023 monsoon forecast, a Suite of Projects update, Coconino County Flood Control District Update, and preparing for the 2023 monsoon season.

## SECOND AMENDMENT

### Spruce Wash Drainage Improvements Projects Construction Manager at Risk

#### Construction Phase Services Agreement Phase 2 - GMP 3

**Project No. #03-23014  
Agreement No. 2023-60**

This Second Amendment (“Second Amendment”) to the fully executed Construction Phase Services Phase 1 - Agreement No. 2023-60 dated July 14, 2023 (the “Agreement”) for the City of Flagstaff Spruce Wash Drainage Improvement Projects (the “Projects”) is made and entered into this \_\_\_\_ day of \_\_\_\_\_, 2024, by and between the City of Flagstaff, an Arizona municipal corporation (“City”), and Eagle Mountain Construction, Inc., an Arizona corporation (“Construction Manager at Risk” or “CMAR”).

The Parties to the Agreement, hereby agree to the following Second Amendment:

- A. Pursuant to Article 5 – Contract Price, Section 5.2, Exhibit B – is amended to include GMP 3 – Cover Letter and Contract Summary, dated May 7, 2024, 2 pages (attached hereto).
- B. CMAR’s GMP 3 is for the roadway improvements for channel grading and armoring for Linda Vista-Cedar Channel (Phase 2) portion of work of the Project and shall total **two million, nine hundred seven thousand, three hundred seventy-five dollars and zero cents (\$2,907,375.00)** plus and approximately 2% Owners Contingency of **fifty thousand dollars and zero cents (\$50,000.00)** which combined equals the total Second Amendment amount of **two million, nine hundred fifty-seven thousand, three hundred seventy-five dollars and zero cents (\$2,957,375.00)**.
- C. The total Contract Price for the complete performance of work under the Agreement, as amended by this Second Amendment, shall be **thirteen million, five hundred twenty-seven thousand, nine hundred seven dollars and six cents (\$13,527,907.06)**.
- D. All other provisions of the Agreement shall remain unchanged in full force and effect.

***(Signatures on Following Page)***

IN WITNESS WHEREOF, the Parties have caused this Second Amendment to be executed by their duly authorized representatives as of the date first written above. This Second Amendment will be in full force and effect only when it has been approved and executed by the duly authorized City officials.

Re: Spruce Wash Watershed Improvements (“Project”)  
City of Flagstaff Project # 03-23014  
Construction Manager at Risk – Guaranteed Maximum Price (“GMP”) 3

Dear Mr. Henry,

Eagle Mountain Construction (“EMC”) is submitting GMP 3 for the above referenced Project.

The Spruce Wash Watershed Improvements is a “suite” of 8-9 individual projects (pending final designs) along the Spruce Wash drainage corridor, with several of the scopes having multiple phases. This GMP 3 includes Phase 2 of the Linda Vista to Cedar Channel; consisting generally of channel grading and armoring per JE Fuller’s plans sealed 4-1-24.

As the remaining suite of projects progress through the design phase, EMC will continue with our Design Phase services, offering constructability reviews, cost and schedule modeling, TAC Meeting attendance, and subsequent GMP development. EMC’s services for the balance of the Design Phase are reflected in the General Conditions for each project still in the design phase.

This scope is tentatively scheduled to begin after the Phase 1 Unisource gas main & services relocations are completed, which is again tentatively scheduled for mid-late fall.

We continue to be honored to be apart this Team and appreciate the opportunity to work with so many of the Project stakeholders, the team of engineers, and the City of Flagstaff staff in the execution of the ever changing and challenging Project.

Sincerely,

Eagle Mountain Construction

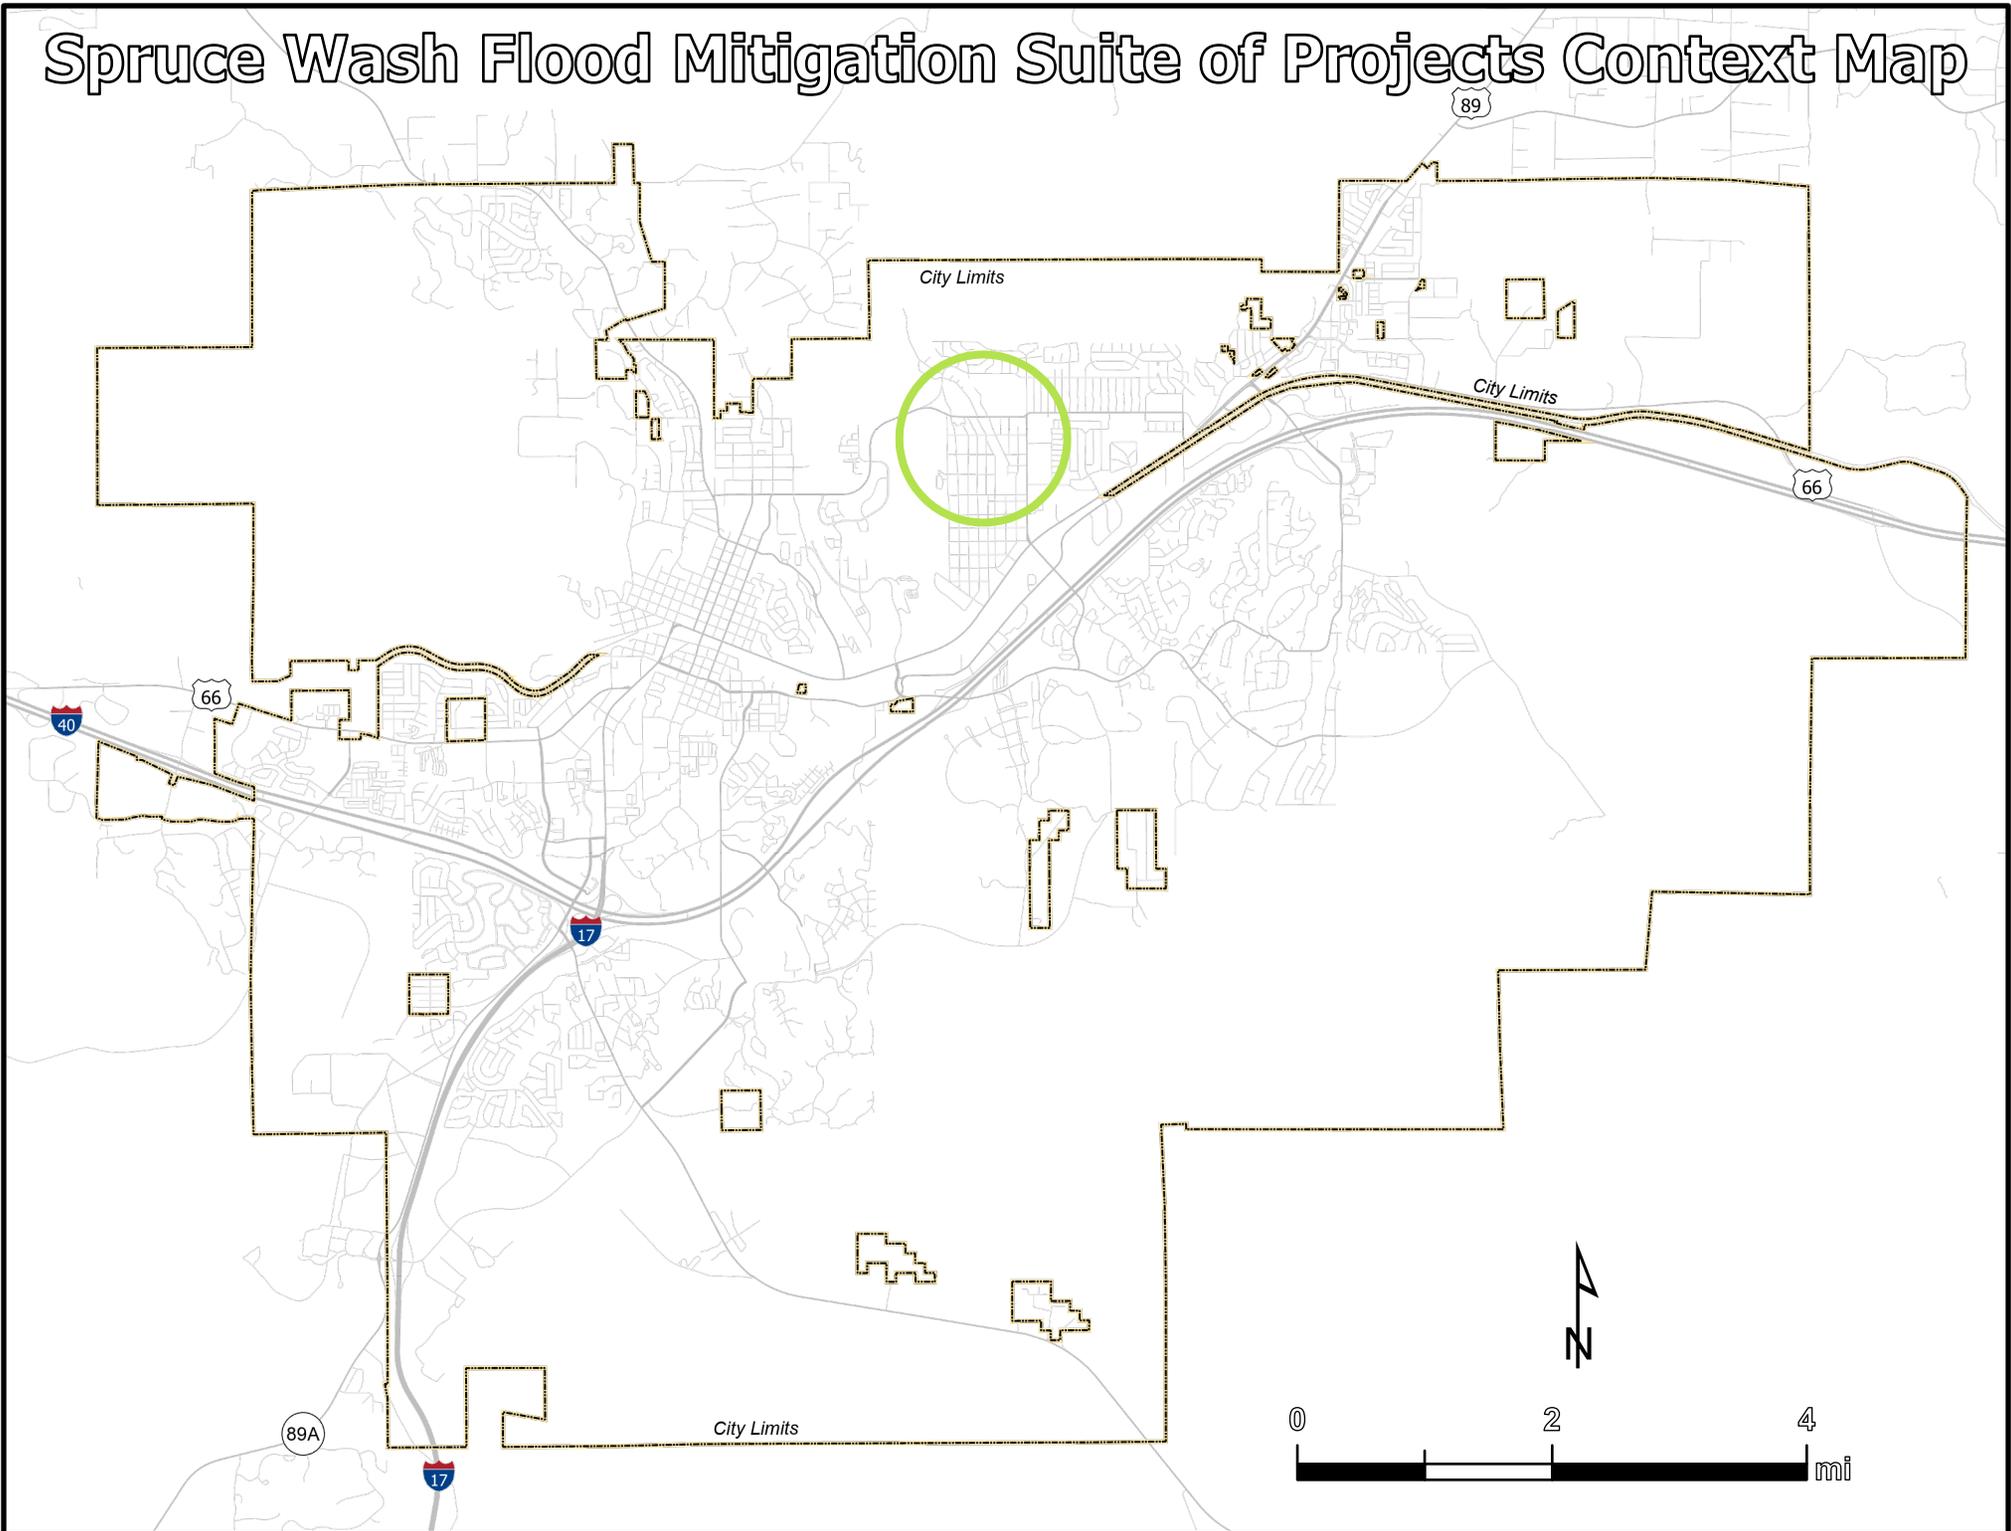

**Marco Spagnuolo**  
CEO

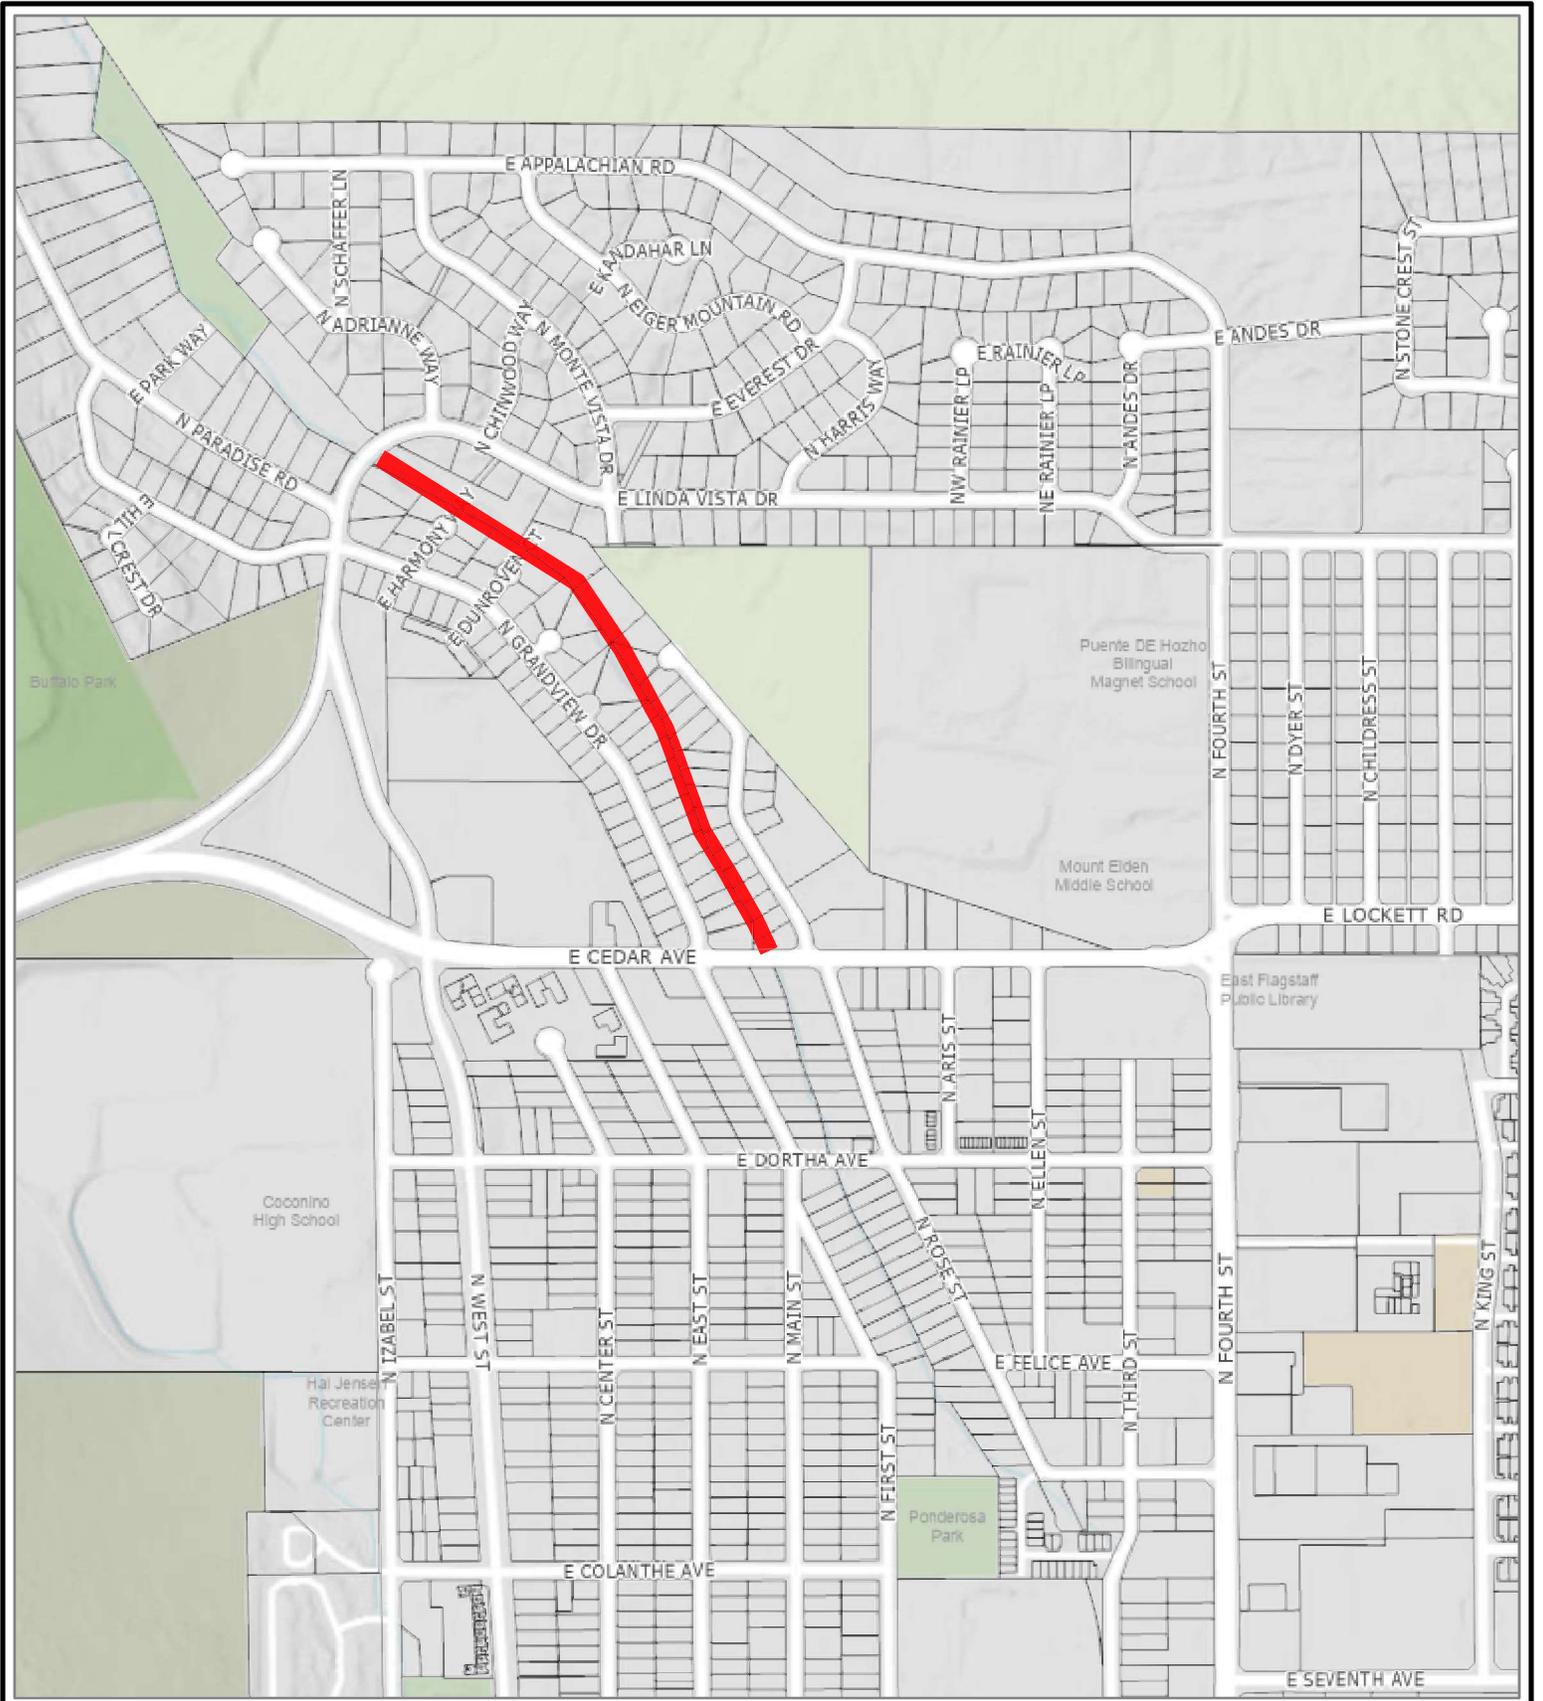

**LINDA VISTA - CEDAR CHANNEL**

# CITY OF FLAGSTAFF CONTRACT SUPPLEMENTARY JUSTIFICATION Design-Build OR CMAR Contracts

PROJECT NO. WS3525 PROJECT NAME: Spruce Wash – Cedar to Linda Vista Channel

FILE NO. 03-23012 Project Manager: Trevor Henry

CONTRACTOR/CONSULTANT: Eagle Mountain Construction (EMC)

**PROJECT DESCRIPTION:**

This project includes construction of a hardened channel in Spruce Wash between Cedar Avenue and Linda Vista Drive. This work is funded by Proposition 441 and is a portion of the Spruce Wash Flood Mitigation Suite of Projects.

**JUSTIFICATION FOR USE AND AMOUNT:**

**Contractor’s Contingency Justification and Amount:**

Contractors Contingency of **\$75,000.00** was negotiated and was recognized to be necessary to compensate Eagle Mountain Construction for increases in material costs which could not be determined at the time of contracting.

**Owner’s Contingency Justification and Amount:**

Owner’s Contingency of **\$50,000.00** was recognized to be necessary to compensate EMC should there be unidentified services needed, unsuitable native material discovered, scope changes, and/or differing site conditions. The **\$50,000.00** Owner’s Contingency is roughly 2.0% of the \$ **2,907,375.00** Guaranteed Maximum Price #3 proposed by EMC to complete the work, which combined equals the Contract Price of **\$2,957,375.00**. If this Project were utilizing traditional project delivery methods, this amount would be within the allowable limits for a Contract Allowance per the Procurement Code revisions approved by Council on April 16, 2019.

**COST/BUDGET/FUNDING SOURCE ANALYSIS:**

**Contractor’s & Owner’s Contingency:**

Contractor’s and Owner’s Contingencies are recommended to be in the Total Contract Price and can be funded by Account Number **410-08-385-3525-3** in FY25.

## Definitions

### **Owner's Contingency (Design/Build or Construction Manager at Risk)**

"Owner's Contingency" means a fund to cover cost growth during the Project used at the discretion of the City usually for costs that result from City's directed changes or Differing Site Conditions, or as the City may otherwise elect. The amount of the Owner's Contingency will be set solely by the City and will be in addition to the Project costs included in the Design-Builder's GMP packages.

The Owner's Contingency are funds to be used at the sole discretion of the City to cover any increases in Project costs that result from City directed changes, Differing Site Conditions, or as the City may otherwise elect. Owner's Contingency will be added to the GMP amount provided by the Design-Builder/CMAR, the sum of which will be the full Contract Price for construction. Markups for Construction Fee and taxes will be applied by the Design-Builder at the time that Owner's Contingency is used

### **Contractor's Contingency (Design/Build or Construction Manager at Risk)**

"Design-Builder's/CMAR Contingency" means a fund to cover cost growth during the Project used at the discretion of the Design-Builder/CMAR, usually for costs that result from Project circumstances. The amount of the Design-Builder's/CMAR Contingency will be negotiated as a separate line item in each GMP package.

Use and management of the Design-Builder's/CMAR Contingency:

Design-Builder's/CMAR Contingency is an amount the Design-Builder/CMAR may use under the following conditions: (1) at its discretion for increases in the Cost of the Work, or (2) with written approval of the City for increases in General Condition Costs. Design-Builder/CMAR Contingency is assumed to be a direct Project cost so will receive all markups at the time of GMP submission.

When the Design-Builder/CMAR utilizes Design-Builder's/CMAR Contingency funds, the Design-Builder/CMAR shall make the appropriate changes to the Schedule of Values with the next regular progress Payment Request. The Design-Builder/CMAR shall deduct the amount of Design-Builder's/CMAR Contingency funds used from the Design-Builder's/CMAR Contingency line item and add the same amount to the line item on the Schedule of Values where the funds were used. If the Design-Builder's/CMAR Contingency funds are used for a new line item that was not given with the original Schedule of Values, that will be so indicated.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Trevor Henry, Capital Improvements Engineer  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Contract:** Approve Change Order No. 18 with Shephard Wesnitzer, Inc. in the amount of \$214,480.00 and a 365 calendar day time extension for the Rio de Flag Flood Control Utility Relocation Design Services Contract.

**STAFF RECOMMENDED ACTION:**

1. Approve Change Order No. 18 with Shephard Wesnitzer, Inc. the amount of \$214,480.00 and a 365 calendar day time extension for the Rio de Flag Flood Control Utility Relocation Design Services Contract; and
2. Authorize the City Manager to execute the necessary documents.

**Executive Summary:**

Approval of Change Order No. 18 will compensate Shephard Wesnitzer, Inc. (SWI) for assisting the City in acquiring the property rights necessary for the U.S. Army Corps of Engineers (USACE) to certify the real estate for construction based on the needed lands, easements, rights-of-way, relocations, and disposal site (LERRD) and complete design for the Rio de Flag Flood Control Project (Project). The additional tasks of Change Order No. 18 include master easement tracking, additional legal descriptions, Utility compensability letters, BNSF utility accommodation policy services, USACE comment resolution, Five Points Construction, Architect/Engineering Quality Control Plan, Signal plans, Wastewater updates and meetings/coordination. There is a 365 calendar day time extension requested with Change Order No. 18 to ensure the estate necessary meets the guidelines and requirements as outlined by the USACE.

The Change Order Committee considered this item on June 13, 2024, it was approved with a recommendation to forward to the Council for final approval at the City Council meeting on July 2, 2024.

**Financial Impact:**

The FY 2004-2005 original Design Services Contract was approved by City Council to SWI in the amount of \$1,582,521.00. Subsequent values of prior changes authorized through the City Manager's Change Order Authority and City Council approval has resulted in an amount of \$2,397,431.34. The funding to pay the amount of Change Order No. 18 (\$214,480.00) will come from the Stormwater Fund, tracked in the Rio de Flag project account #206-08-385-3236-0-4421.

The Rio de Flag project has \$1,151,354 budgeted in FY24, \$20,851,032 appropriated in FY25 and \$1,290,000 appropriated in FY26.

Original Contract Value	\$1,582,521.00
Value of Prior Changes	\$2,397,431.34
Value of this Change	<u>\$ 214,480.00</u>
New Contract Value	\$4,194,432.34

**Policy Impact:**

No Impact

**Previous Council Decision or Community Discussion:**

Previous City Council actions pertaining to authorized value changes and action items necessary for the continuation of the Project since FY 2004-2005.

**Options and Alternatives to Recommended Action:**

1. Approve Change Order No. 18 with SWI the amount of \$214,480.00 and a 365 calendar day time extension as recommended; or
2. Reject Change Order No. 18, which will forfeit the opportunity for the City to comply with its requirement to provide the estate necessary to allow the USACE to certify the real estate for the Rio de Flag Flood Control Project.

**Background and History:**

On January 18, 2005, the City Council awarded the Design Services Contract to SWI to perform design services for this Project.

**Key Considerations:**

The Rio de Flag Flood Control Project is included in the City's Stormwater Management Capital Improvement Program and is the number one priority. The Project has also been the subject of numerous City Council meetings, City-to-Citizen communications and newspaper articles.

The USACE requested funding for their FY 20 work plan to construct the entire Project. The USACE received \$52M which will complete their share (65%) of the project as outlined in the Project Cooperation Agreement.

In 2018, the City Council authorized a fee increase to the Stormwater rate that would provide funding for the Capital Improvement Program (CIP). In 2019, City Council authorized collection of the rate increase. The rate increase will provide funding for the Stormwater CIP, of which the Rio de Flag Flood Control Project is the number one priority. The City has the capacity and commitment to complete our share of the project as outline in the Project Cooperation Agreement.

On April 12, 2021, the USACE submitted to the City the real estate "take letter" outlining the estate necessary for the real estate certification. It is the City's responsibility as outlined in the Project Cooperation Agreement to provide the corridor necessary for the USACE to solicit, award and construct the Project.

A sample of the additional tasks contained in Change Order No. 18 includes:

**Master Easement Tracking Spreadsheet:**

- Ardurra prepared a master easement tracking spreadsheet with every parcel impacted by the project. Each parcel includes the APN, owner, site address, mailing address, type of easement being acquired (Channel Easement, Temporary Work Area Easement, Drainage Easement, Waterline Easement, Sewer line Easement, Etc.), utility conflicts, ongoing tasks, when the legal description was updated and completed, and additional notes for the easements.

**Stage 1 Legal Descriptions:**

- Ardurra prepared 14 additional easements for Stage 1 for the Mikes Pike traffic phasing plan, Mikes Pike, and the Flagtown parcels. The legal descriptions are complete and submitted to the City of Flagstaff.

**Phase 2 Legal Descriptions:**

- This item includes Segment Map revisions already completed based on USACE comments on the previously prepared segment map. Item also includes up to 25 Public Utility Easements (PUE's), updates to 80 TWAE and Channel Easement legal descriptions already completed (need to be reviewed and

updated once segment map is approved), up to 45 aerial easement exhibits, and staking up to 80 parcels for property owners to see the limits of proposed easements.

#### Utility Compensability:

- Item includes up to 10 Utility Compensability letters/exhibits. The Utility Compensability deliverable is assumed to be the same as what was submitted to the USACE for Stage 1.

#### BNSF UAP Applications:

- Complete BNSF UAP forms and prepare supporting exhibits. Ardurra has already created 19 UAP applications that are ready to submit under Change Order #16. This item includes 24 additional applications.

#### ATR Comment Resolution:

- Item includes addressing City of Flagstaff and USACE ATR comments on the Street Reconstruction and Utility Relocation Plans for both Stages 1 and 2. Plans will be updated and submitted to the City and USACE as part of the Backcheck submittal process. Item includes comment resolution meetings with City staff, coordination with Tetra Tech, and updates to the project specifications.

#### Five Points Construction Plans:

##### Eastbound Right Turn Lane

- An Eastbound right turn lane on Clay Avenue at the Milton intersection is required to address and ATR comment. The right turn lane will be added to the Stage 1 Surface Replacement construction plans.

##### 30" Waterline Realignment

- The ATR submittal included a 30% water line vertical realignment in the Five Points Intersection. During constructability review, it was determined that the vertical realignment could not be accomplished without closing the entire intersection. An alternate realignment route was identified through APN 103-06-003B that can be constructed without closing the intersection. The Utility Relocation Plans will be updated to reflect the new realignment.

##### 100% Phasing Plans

- 60% construction plans for the Five Points Intersection were completed under Change Order #17. Ardurra prepared and submitted several different traffic phasing plans, including one lane and two lane options, to ADOT before a phasing plan was agreed upon. This item includes addressing ADOT comments and completing 100% construction plans for the traffic phasing plan.

##### Traffic Control Plans

- Traffic control plans will be completed and submitted to the City and ADOT for both phases of the Five Points construction. Draft TCP's have already been submitted and reviewed, and Ardurra is currently updating the TCP's for final submittal.

#### Architect-Engineer (A-C) QC Plan:

SWI/Ardurra will prepare a Specific Quality Control Plan using the Hansen Dam Recreation Area Project example provided by the Corps. The document will be revised to be project specific to the Utility Relocation and Surface Replacement plans prepared by SWI/Ardurra. Additionally, a project team from another Ardurra office that has not worked on the RDF project will review the ATR sets of plans for QA/QC.

#### Meetings & Coordination:

- This item includes the following meetings for an additional 12 months with two SWI/Ardurra staff:

- Weekly meetings with the City of Flagstaff

- Bi-weekly meetings with the City of Flagstaff, Corps, and Tetra Tech

- Monthly coordination meetings to coordinate the Lone Tree Overpass and RDF projects.

- Monthly coordination meetings with BNSF to coordinate all City projects along the BNSF corridor.

#### Signal Plans (Lee Engineering):

- Lee Engineering will update the previously prepared traffic signal plans for the Five Points intersection to incorporate the newly added eastbound right turn lane on Clay Avenue.

#### Siphon Plan Updates:

- Water Works will update the previously prepared Siphon construction plans to relocate the vent pipe and update CAD backgrounds as part of the ATR review process.

#### Landscape Plans:

- Norris will update the landscape plans to address revisions to address ATR comments. Revisions include landscape plans and details, irrigation plans and details, form liner design and concept drawings, and nine (9) additional meetings. The total change order from Norris is \$12,600. Task 3 in CO #13 (\$7,700) will be used to help offset this change order task.

Change Order No. 18 will add 365 calendar days to the Design Services Contract. The revised completion date is October 1, 2025.

Change Order No. 18 was presented to the Change Order Committee for their consideration on June 13, 2024. The item was approved with a recommendation to forward to the City Council for consideration and final approval.

#### Expanded Financial Considerations:

Funding for Change Order No. 18 (\$214,00) will come from the Stormwater Fund and will be tracked in the Rio de Flag Flood Control project 206-08-385-3236-0-4421. The Stormwater Fee rate increase started collection in July 2019 to fund the Stormwater CIP. The Rio de Flag Flood Control Project is part of the Stormwater CIP and is the highest priority Project.

The Rio de Flag project has \$604,000 budgeted in FY24, \$24,275,415 appropriated in FY25 and \$1,371,650 appropriated in FY26.

The USACE was awarded \$52M in their FY 20 work plan, providing commitment for their full share of the project at 65%.

#### Expanded Options and Alternatives:

1. Approve Change Order No. 18 with SWI in the amount of \$214,480.00 and a 365 calendar day time extension as recommended; or
2. Reject Change Order No. 18, which will forfeit the opportunity for the City to comply with its requirement to provide the estate necessary to allow the USACE to certify the real estate for the Rio de Flag Flood Control Project.

#### Connection to PBB Priorities and Objectives:

- Deliver outstanding services to residents through a healthy, well maintained infrastructure system.
- Strengthen Flagstaff's resilience to climate change impacts on built, natural, economic, health, & social systems.

# City of Flagstaff

Rio de Flag Flood Control Project

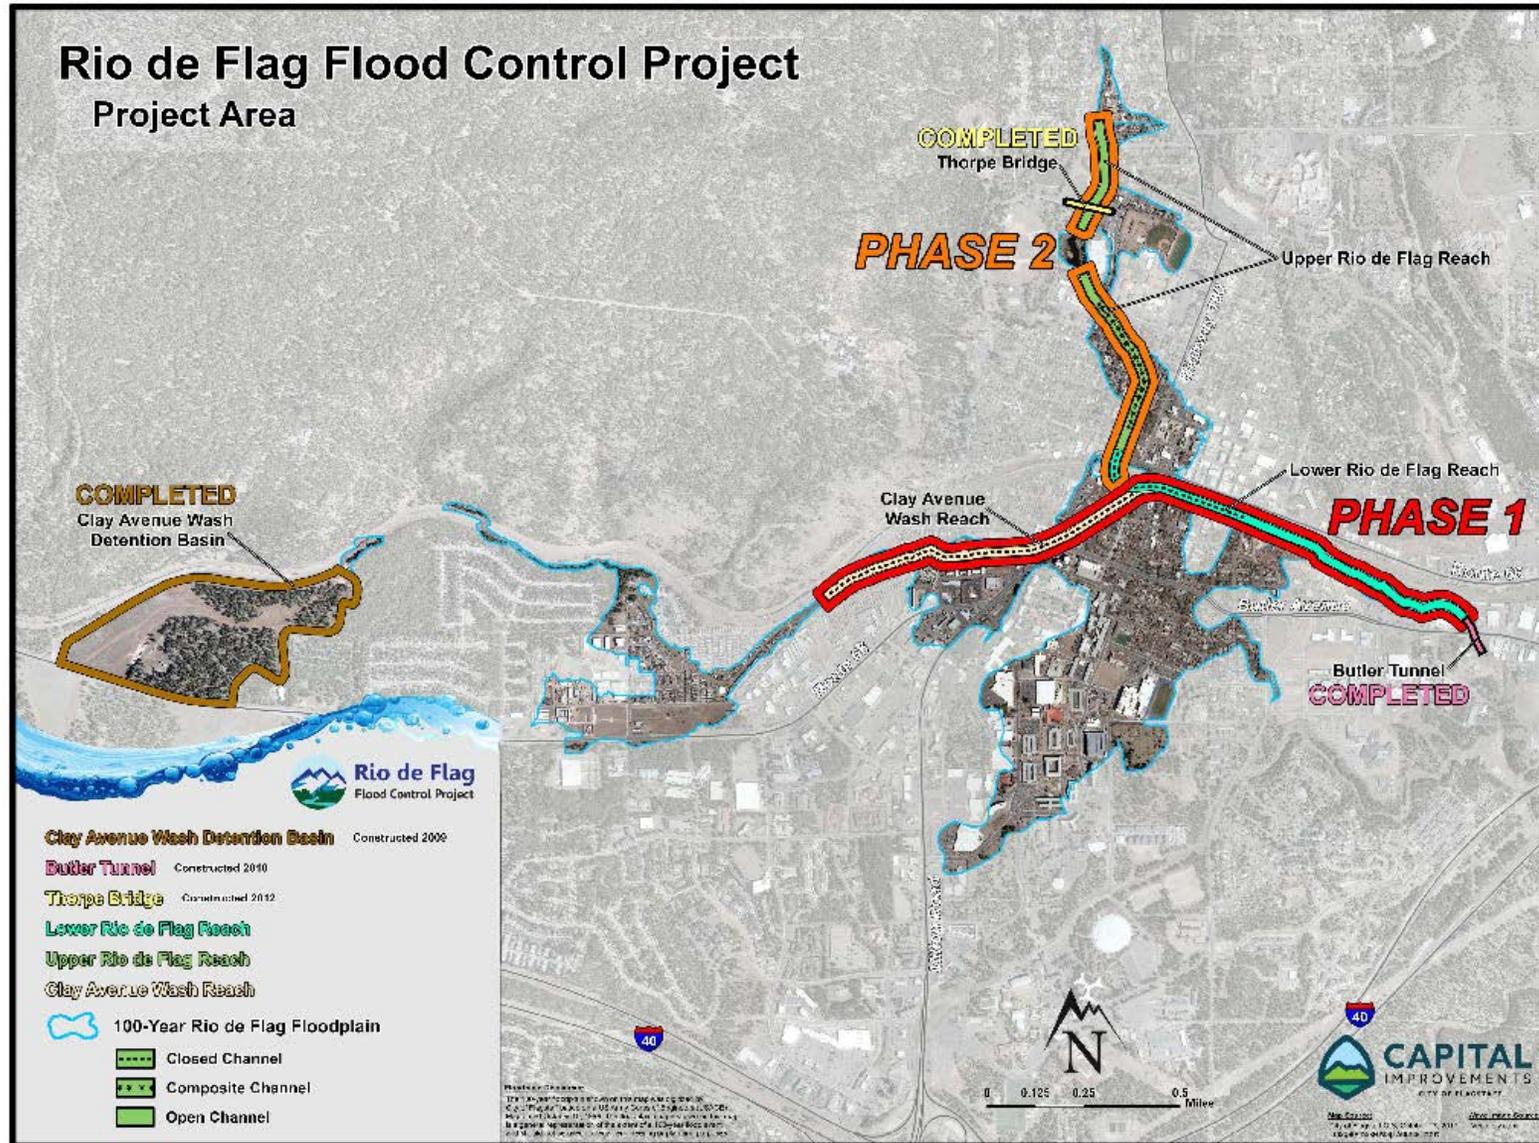

Change Order No. 18

July 2, 2024

# CHANGE ORDER NO. 18

# CHANGE ORDER NO. 18

## Rio de Flag Flood Control Project

- Lead Agency: U.S. Army Corps of Engineers
- Project Cooperation Agreement - 2004
- Engineer: Tetra Tech and Ardurra - SWI
- Construction Bid: Winter 2024
- Budget: \$122M (Phase 1 & 2)
  - City 35%
- Construction: Spring 2025 to Spring 2030
- LERRDS (land, easements, ROW, removals, disposals)

# CHANGE ORDER NO. 18

## History of Design Services with Shephard Wesnitzer, Inc.

- Original Design Services Contract, **2005**
- Contract Modifications, **2005 to 2009**
  - No Council Action, City Manager's CO Authority and Staff's CA Authority
- Change Order No. 4, **2009**
- Additional Contract Modifications, **2009 to 2020**
  - No Council Action, City Manager's CO Authority and Staff's CA Authority
- Change Orders No. 13-17, **March 2020- April 2024**

# CHANGE ORDER NO. 18

## History of Design Services with Shephard Wesnitzer, Inc.

- July 2, 2024, Council consideration of Change Order No. 18
  - **Change Order No. 18** – added tasks, master easement tracking, additional legal descriptions, Utility compensability letters, BNSF utility accommodation policy services, USACE comment resolution, Five Points Construction, Architect/Engineering Quality Control Plan, Signal plans, Wastewater updates and meetings/coordination
    - **\$214,480 with 365 days**
  - City is responsible for acquiring the property rights.
  - Real Estate Certification for Army Corps of Engineers – LERRDS
  - Stormwater Fee will fund CO #18

# CHANGE ORDER NO. 18

## History of Design Services with Shephard Wesnitzer, Inc.

- **Change Order No. 18:**

- On June 13, 2024, the Change Order Committee reviewed and approved with a recommendation to be forwarded to the Council for final approval

- **Staff Recommended Action:**

1. Approve Change Order No. 18 with Ardurra - Shephard Wesnitzer, Inc. in the amount of \$214,480.00.
2. Add 365 calendar days to the design services contract
3. Authorize the City Manager to execute the necessary documents.

RE: Rio De Flag  
Additional Services Change Order #18

Dear Ms. Cameron:

Ardurra has been asked to provide additional services for the design and real estate portions of the project. Please provide a change order for the additional services listed below.

**1.0 SCOPE OF SERVICES, ADDITIONAL**

We propose to provide the following:

<b>Item No.</b>	<b>Description</b>	<b>Fee</b>
<b>1.</b>	<b>Master Easement Tracking Spreadsheet:</b> Ardurra prepared a master easement tracking spreadsheet with every parcel impacted by the project. Each parcel includes the APN, owner, site address, mailing address, type of easement being acquired (Channel Easement, Temporary Work Area Easement, Drainage Easement, Waterline Easement, Sewerline Easement, Etc.), utility conflicts, ongoing tasks, when the legal description was updated and completed, and additional notes for the easements.	<b>\$9,600</b>
<b>2.</b>	<b>Stage 1 Legal Descriptions:</b> Ardurra prepared 14 additional easements for Stage 1 for the Mikes Pike traffic phasing plan, Mikes Pike, and the Flagtown parcels. The legal descriptions are complete and submitted to the City of Flagstaff.	<b>\$8,400</b>
<b>3.</b>	<b>Phase 2 Legal Descriptions:</b> This item includes Segment Map revisions already completed based on USACE comments on the previously prepared segment map. Item also includes up to 25 Public Utility Easements (PUE's), updates to 80 TWAE and Channel Easement legal descriptions already completed (need to be reviewed and updated once segment map is approved), up to 45 aerial easement exhibits, and staking up to 80 parcels for property owners to see the limits of proposed easements.	<b>\$88,300</b>
<b>4.</b>	<b>Utility Compensability:</b> Item includes up to 10 Utility Compensability letters/exhibits. The Utility Compensability deliverable is assumed to be the same as what was submitted to the USACE for Stage 1.	<b>\$4,200</b>
<b>5.</b>	<b>BNSF UAP Applications:</b> Complete BNSF UAP forms and prepare supporting exhibits. Ardurra has already created 19 UAP applications that are ready to submit under Change Order #16. This item includes 24 additional applications.	<b>\$7,200</b>

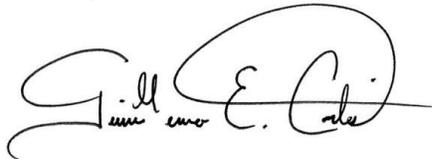

- |     |  |  |
|-----|--|--|
| 6.  | <b>ATR Comment Resolution:</b><br>Item includes addressing City of Flagstaff and USACE ATR comments on the Street Reconstruction and Utility Relocation Plans for both Stages 1 and 2. Plans will be updated and submitted to the City and USACE as part of the Backcheck submittal process. Item includes comment resolution meetings with City staff, coordination with Tetra Tech, and updates to the project specifications.   | <b>\$24,000</b>  |
| 7.  | <b>Five Points Construction Plans:</b><br><u>7.1 Eastbound Right Turn Lane</u><br>An Eastbound right turn lane on Clay Avenue at the Milton intersection is required to address and ATR comment. The right turn lane will be added to the Stage 1 Surface Replacement construction plans.<br><br><u>7.2 30" Waterline Realignment</u><br>The ATR submittal included a 30% water line vertical realignment in the Five Points Intersection. During constructability review, it was determined that the vertical realignment could not be accomplished without closing the entire intersection. An alternate realignment route was identified through APN 103-06-003B that can be constructed without closing the intersection. The Utility Relocation Plans will be updated to reflect the new realignment.<br><br><u>7.3 100% Phasing Plans</u><br>60% construction plans for the Five Points Intersection were completed under Change Order #17. Ardurra prepared and submitted several different traffic phasing plans, including one lane and two lane options, to ADOT before a phasing plan was agreed upon. This item includes addressing ADOT comments and completing 100% construction plans for the traffic phasing plan.<br><br><u>7.4 Traffic Control Plans</u><br>Traffic control plans will be completed and submitted to the City and ADOT for both phases of the Five Points construction. Draft TCP's have already been submitted and reviewed, and Ardurra is currently updating the TCP's for final submittal. | <b>\$3,520</b><br><br><b>\$2,320</b><br><br><b>\$8,320</b><br><br><b>\$8,320</b> |
| 8.  | <b>Architect-Engineer (A-C) QC Plan:</b><br>SWI/Ardurra will prepare a Specific Quality Control Plan using the Hansen Dam Recreation Area Project example provided by the Corps. The document will be revised to be project specific to the Utility Relocation and Surface Replacement plans prepared by SWI/Ardurra. Additionally, a project team from another Ardurra office that has not worked on the RDF project will review the ATR sets of plans for QA/QC.   | <b>\$12,200</b>  |
| 9.  | <b>Meetings &amp; Coordination:</b><br>This item includes the following meetings for an additional 12 months with two SWI/Ardurra staff: <ul style="list-style-type: none"> <li>• Weekly meetings with the City of Flagstaff</li> <li>• Bi-weekly meetings with the City of Flagstaff, Corps, and Tetra Tech</li> <li>• Monthly coordination meetings to coordinate the Lone Tree Overpass and RDF projects.</li> <li>• Monthly coordination meetings with BNSF to coordinate all City projects along the BNSF corridor.</li> </ul>  | <b>\$25,200</b>  |
| 10. | <b>Signal Plans (Lee Engineering):</b><br>Lee Engineering will update the previously prepared traffic signal plans for the Five Points intersection to incorporate the newly added eastbound right turn lane on Clay Avenue.   | <b>\$5,000</b>   |

- 11. **Siphon Plan Updates:** **\$3,000**  
 Water Works will update the previously prepared Siphon construction plans to relocate the vent pipe and update CAD backgrounds as part of the ATR review process.
  
- 12. **Landscape Plans** **\$4,900**  
 Norris will update the landscape plans to address revisions to address ATR comments. Revisions include: landscape plans and details, irrigation plans and details, form liner design and concept drawings, and nine (9) additional meetings. The total change order from Norris is \$12,600. Optional Task 3 in CO #13 (\$7,700) will be used for this change order.

**ASWO#18 DESIGN TOTAL: \$214,480.00**

Your signature below will serve as your acceptance of this Work Order, pursuant to the terms and conditions of the original contract. Feel free to call if you have any questions or concerns.

Sincerely,

Guillermo E. Cortes, P.E.  
 Vice President

Accepted: \_\_\_\_\_ Date: \_\_\_\_\_

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Ben Mejia, Planner  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Approval of Preliminary Plat:** PZ-23-00027-01: Preliminary replat of lots 23-24 and Tract E of the "Final Plat for Coconino Ridge at Pine Canyon"

**STAFF RECOMMENDED ACTION:**

Approve the Preliminary Plat in accordance with the findings presented in this report and the Planning and Zoning Commission recommendation of approval (5-0 vote in favor on May 22, 2024).

**Executive Summary:**

TLC PC Land Investors, LLC and Coconino Ridge at Pine Canyon, LLC request Preliminary Plat approval for Preliminary replat of lots 23-24 and Tract E of the "Final Plat for Coconino Ridge at Pine Canyon" located at 2460 S Pinyon Jay Dr, an existing 31 unit subdivision on 19.2 acres in the Single-Family Residential (R1) Zone. The site has a Resource Protection Overlay and is currently subdivided. It is located in the northeastern corner of the larger 660-acre Pine Canyon development.

**Financial Impact:**

There are no financial impacts associated with this Preliminary Plat.

**Policy Impact:**

There are no policy impacts affiliated with this Preliminary Plat.

**Previous Council Decision or Community Discussion:**

The final plat for Coconino Ridge at Pine Canyon was approved by Council in 2016. The request for replat is to modify the approved plat to allow Tract E for use as private road.

**Options and Alternatives to Recommended Action:**

1. Approve the Preliminary Plat with no conditions.
2. Approve the Preliminary Plat with conditions.
3. Deny the Preliminary Plat based on non-compliance with the Zoning Code, the Subdivision Code, and/or the Engineering Standards and Specifications for New Infrastructure.

**Background and History:**

In 2016, the City of Flagstaff approved the Coconino Ridge at Pine Canyon subdivision as a 32-lot subdivision within the R1 Zone. Since recordation of the plat, one parcel (Lot 32) has been combined with neighboring parcels, currently 31 lots exist within the subdivision. All areas in the subdivision not allocated as lots are reserved as tracts. Tract E was reserved as private open space, public utility easement, and private drainage easement. This Preliminary Plat request is to replat the existing Coconino Ridge at Pine Canyon subdivision to reserve Tract E for private roads in addition to private drainage easement and public utility easement. The private open space reservation will be abandoned with this modification. Tract E will be increased in width to

# PLANNING & DEVELOPMENT SERVICES REPORT

## PRELIMINARY PLAT

**PZ-23-00027-01**

**DATE:** May 1, 2024  
**MEETING DATE:** May 22, 2024  
**REPORT BY:** Ben Mejia

### **REQUEST:**

Coconino Ridge at Pine Canyon, LLC and TLC PC Land Investors, LLC request Preliminary Plat approval for replat of the “Final Plat for Coconino Ridge Pine Canyon” located at 2460 and 2473 S Pinyon Jay Dr, within the 31-lot single-family subdivision of Coconino Ridge at Pine Canyon on 19.2 acres in the Single-Family Residential (R1) Zone. The proposed replat modifies the reservation of Tract E to allow private roads and remove the private open space reservation.

### **STAFF RECOMMENDATION:**

Staff recommends the Planning and Zoning Commission, in accordance with the findings presented in this report, forward the Preliminary Plat to the City Council with a recommendation of approval.

### **PRESENT LAND USE:**

The subject site is an existing subdivision with 31 single-family residential lots on 19.2 acres in the R1 zone. Tract E, modified by this request, is currently reserved for private open space, private drainage easement, and public utility easement.

### **PROPOSED LAND USE:**

The proposal is to modify Coconino Ridge at Pine Canyon subdivision, consisting of 31 single-family lots located on 19.2 acres in the R1 Zone to reserve Tract E for private road use in addition to private drainage easement and public utility easement. The Open Space use will be abandoned with this modification. Lots 23 and 24 will be reduced in size to allow for the road use of Tract E.

### **NEIGHBORHOOD DEVELOPMENT:**

See the attached vicinity map for more information.

North: Juniper Point, RR Zone

South: Deer Creek Crossing Unit One, R1 Zone

East: Undeveloped 126-acre parcel of formerly State Trust Land, RR Zone; National Forest, PF Zone

West: Deer Creek Crossing Unit One, R1 Zone

### **REQUIRED FINDINGS:**

The Planning and Zoning Commission shall find the proposed Preliminary Plat meets the requirements of the City Code Title 10, Flagstaff Zoning Code; City Code Title 11, General Plans and Subdivisions; and City Code Title 13, Engineering Design Standards and Specifications.

---

### **STAFF REVIEW:**

#### **I. Project Information**

##### **A. Background**

In 2016, the City of Flagstaff approved the Coconino Ridge at Pine Canyon subdivision as a 32-lot subdivision within the R1 Zone. Since recordation of the plat, one parcel (Lot 32) has been combined with neighboring parcels, currently 31 lots exist within the subdivision. All areas in the subdivision not allocated as lots are reserved as tracts. Tract E was reserved as private open space, public utility easement, and private drainage easement.

**B. Type of Plat**

This Preliminary Plat request is to replat the existing Coconino Ridge at Pine Canyon subdivision to reserve Tract E for private roads in addition to private drainage easement and public utility easement. The private open space reservation will be abandoned with this modification. Tract E will be increased in width to accommodate the road, and Lots 23 and 24 will be reduced in size. No new lots are proposed with this plat.

**II. Required Findings: Conformance with City Development Standards and Regional Plan**

Staff reviewed and approved the Preliminary Plat based on conformance with City Code Title 10, Flagstaff Zoning Code; City Code Title 11, General Plans and Subdivisions; and City Code Title 13, Engineering Design Standards and Specifications.

**A. City of Flagstaff Zoning Code (Title 10)**

**i. Single-Family Residential (R1)**

The modifications to this plat are in conformance with the requirements of R1 zone. The density will be consistent with existing conditions of the subdivision. The impacted lots meet the required size and dimension for the R1 zone. Both lots will be reduced from approximately 17,000 sq. ft. to approximately 14,000 sq. ft. which exceed the 6,000 sq. ft. minimum for the zone. This Preliminary Plat complies with the building form and placement standards such as setbacks for the R1 zone (Division 10-40.30.030 of the Zoning Code).

Setback requirements for R1 zone are:

Front:	15' , 25' parking
Side:	8' interior, 15' street side
Rear:	25'

**ii. Natural Resources**

The subject property is located within the Resource Protection Overlay. Resources within this plat are limited to forest resources. The minimum required tree protection rate for residential zones is 50%. The replat will result in a minor resource preservation rate reduction from 52.7% to 50.3%. To mitigate the reduction of resources for the proposed roadway, the building envelopes of Lots 23 and 24 have been reduced.

**iii. Historic/Cultural Resources**

Cultural resource clearance was completed as part of the original plat approval. No additional review was required.

**iv. Parks, Open Space, Pedestrian, and Bicycle Facilities**

While no parks or open space are required for this subdivision, the Pine Canyon development area includes open space amenities for its residents.

As part of the overall Pine Canyon development, a 10-foot-wide paved FUTS trail from the intersection of existing Lone Tree Road to the intersection of JWP Blvd along the north side of the extension of Lone Tree Road to the intersection of Zuni was completed. A 10-foot-wide paved FUTS trail was also constructed from the intersection of Lake Mary Road on the east side of JWP Blvd to the Lone Tree intersection. An extension of the trail was constructed from the intersection of existing Lone Tree/JWP eastward along the south side of JWP towards the proposed third entrance to Pine Canyon where

the FUTS penetrates into the Pine Canyon development and extends to Fisher Point. This portion of the FUTS trail runs along the western side of the proposed subdivision but is located within the Deer Creek Crossing Subdivision.

## **B. City of Flagstaff Subdivision Standards (Title 11)**

### **i. Preliminary Plat**

IDS approved the Preliminary Plat based on conformance with the procedures and application requirements outlined in Section 11-20.60: Preliminary Plat on April 18, 2024.

### **ii. Subdivision Standards and Regulations**

IDS also approved the Preliminary Plat based on conformance with relevant standards in Section 11-20.120: Subdivision Design Standards and Requirements.

#### **ii.1 Lot Design**

The proposed changes to the subdivision meets the standards for lot design:

- Meet the minimum lot width, depth, and size requirements of the Zoning Code.
- Be designed appropriately for the location and character of the proposed development, street improvements, and underlying topography.
- All lots shall be lawfully built upon and be developable (lots are designed in a way so that development can meet all relevant development standards).
- Buildable area (building envelope) shall be located away from the crest of ridge lines.
- Buildable area shall be determined by setback requirements and the location of natural topographic features.

#### **ii.2 Street Design**

The proposed subdivision meets the standards for street design:

- Existing street design was developed under previous Code which allowed private streets to be constructed without meeting City standards in accordance with the development agreement. The proposed road would be within the bounds for the development agreement.
- Street design is appropriate for underlying topography and in relation to existing streets. Where feasible, streets shall be placed on top of ridges to minimize the extent of grading and reduce the visual impact of development.

#### **ii.3 Easement Design**

The proposed subdivision meets the standards for easement design:

- Easements shall be provided and dedicated where deemed necessary for specific purposes (the plat will dedicate a public utility easement and a drainage easement).
- Drainage easements shall substantially follow the line of any existing watercourse that traverses the land.

#### **ii.4 Block Design**

The proposed subdivision meets the standards for block design:

- Blocks in non-transect zones shall not normally exceed 1,200 feet in length measured from the property lines, except in hillside developments or where a subdivision of one-half acre lots or larger justify or require a variation from this requirement, or where there are unusual conditions of the property being subdivided.

### **iii. Minimum Required Subdivision Improvements**

The subdivider is required to improve all streets, pedestrian ways, alleys, and easements in the subdivision and adjacent to it as required to serve the subdivision. Staff review of the Preliminary Plat along with the impact analyses discussed in the Engineering Standards section below identified the required improvements in conformance with

Section 11-20.130: Minimum Required Subdivision Improvements. These improvements will formally be approved with Civil Engineering Plans review, which will occur after Preliminary Plat approval by City Council.

**C. City of Flagstaff Engineering Standards (Title 13)**

As part of the Preliminary Plat review, Staff conducted a public systems analysis to confirm preliminary compliance with Engineering Standards. Following Preliminary Plat approval, the applicant shall submit and receive approval for Civil Engineering Plans for the subdivision prior to review and approval of the Final Plat. Approval of the Civil Engineering Plans will be contingent on the plat meeting City Engineering Standards.

**i. Access and Traffic**

A Traffic Impact Analysis was prepared and approved for the entire Pine Canyon master planned community. Improved access to the development is provided by John Wesley Powel (JWP) Blvd from Lake Mary Road, and by the extension of Lone Tree Road from the intersection of Lone Tree Road and Zuni Drive to the new intersection of JWP Blvd. All interior streets within Pine Canyon are private and maintained by the Homeowner’s Association.

A private looped street named Clubhouse Circle provides access throughout Pine Canyon. E. Telluride Drive provides access to the subject site from Clubhouse Circle. The street design within the subdivision consists of a cul-de-sac street named Pinyon Jay Drive. The cross section of the private streets provides a 27-foot-wide street section with rolled curb and gutter on both sides and a five-foot wide tail on both sides of the street. The expansion of Tract E to 61 feet wide would accommodate a higher street design dependent on future development to the east.

**ii. Water and Wastewater**

The development is serviced by a Zone B water pressure system. All of the water mains are public. A twenty (20) inch transmission main within the alignment of JWP Blvd was extended from Lake Mary Road into Pine Canyon. A sixteen (16) inch looped water main has been constructed within the alignment of Clubhouse Circle. A new eight (8) inch water line extends from Telluride Drive into the subdivision to provide water service.

Eight-inch public sewer lines have been constructed beneath the public and private streets. These public mains flow by gravity into a private lift station. This private lift station transfers the wastewater through a force main north into a public gravity sewer line. All maintenance associated with the private force mains and lift station is the responsibility of the developer/Homeowner Association. An eight (8) inch sewer line extends from Telluride Drive into the subdivision to provide service.

**iii. Stormwater**

A Stormwater Analysis was completed for the entire Pine Canyon development and was accepted by the Stormwater Manager. The development was required to provide subregional on-site detention in the golf course ponds that serve as a dual purpose for storage of irrigation water and stormwater detention. Development of the first phase and golf course constructed this system.

---

**REQUIRED FINDINGS:**

The Planning and Zoning Commission shall find the Preliminary Plat meets the requirements of the City Code Title 10, Flagstaff Zoning Code; City Code Title 11, General Plans and Subdivisions; and City Code Title 13, Engineering Design Standards and Specifications.

**Recommendation**

Staff recommends the Planning and Zoning Commission, in accordance with the required findings presented in this report, forward the Preliminary Plat to the City Council with a recommendation of approval.

# Request Overview

- Request from Coconino Ridge at Pine Canyon, LLC and TLC PC Land Investors, LLC for **Preliminary Plat approval of Replat of Lots 23-24 and Tract E of the "Final Plat for Coconino Ridge at Pine Canyon"** located at 2460 and 2473 S Pinyon Jay Dr.
- Existing single-family subdivision with 31 single-family home lots on 19.2 acres in the Single-Family Residential (R1) Zone also within the Resource Protection Overlay Zone(RPOZ)
- Staff approved the Preliminary Plat of this replat on April 18, 2024
  - P&Z Commission recommended approval (5-0) on May 22, 2024

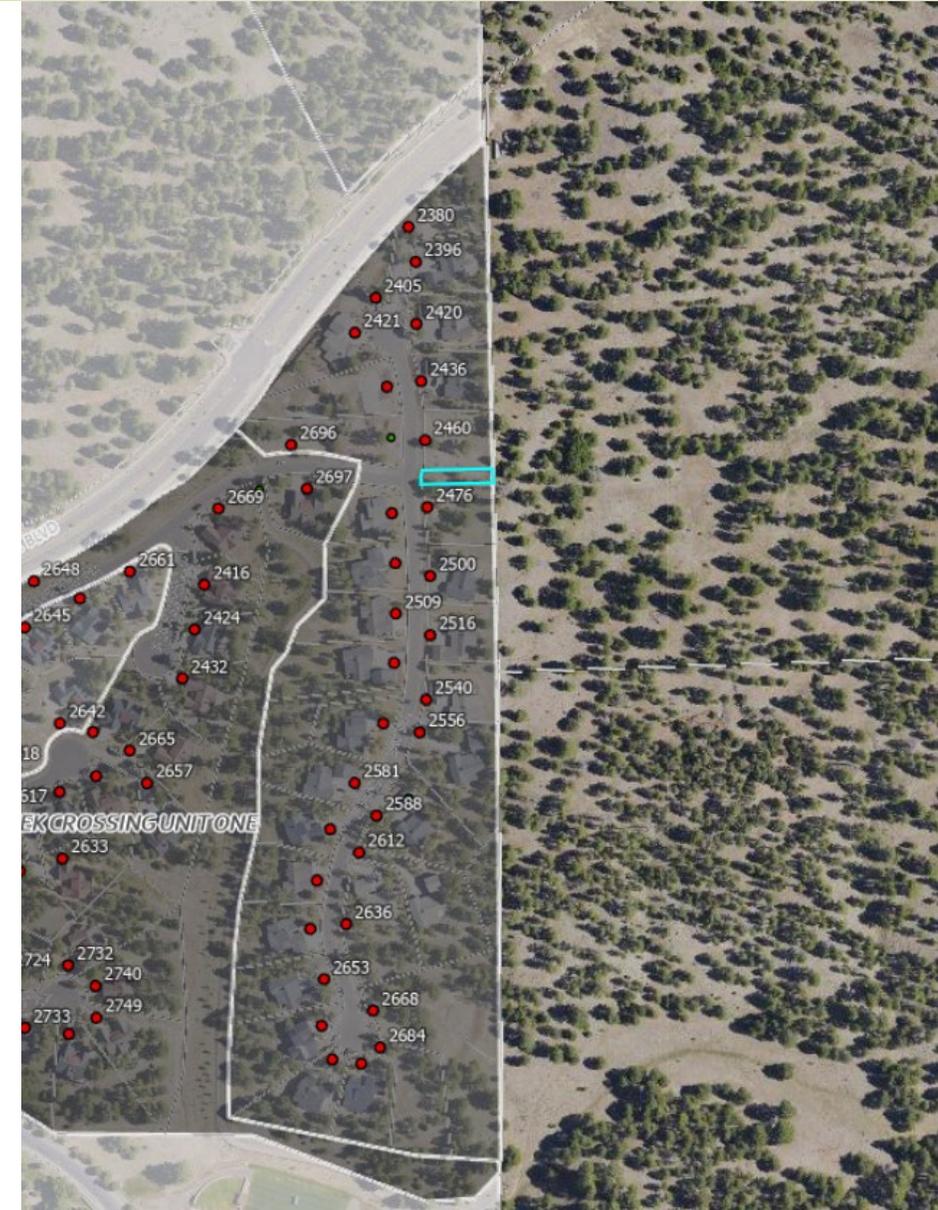

# Coconino Ridge at Pine Canyon- Background

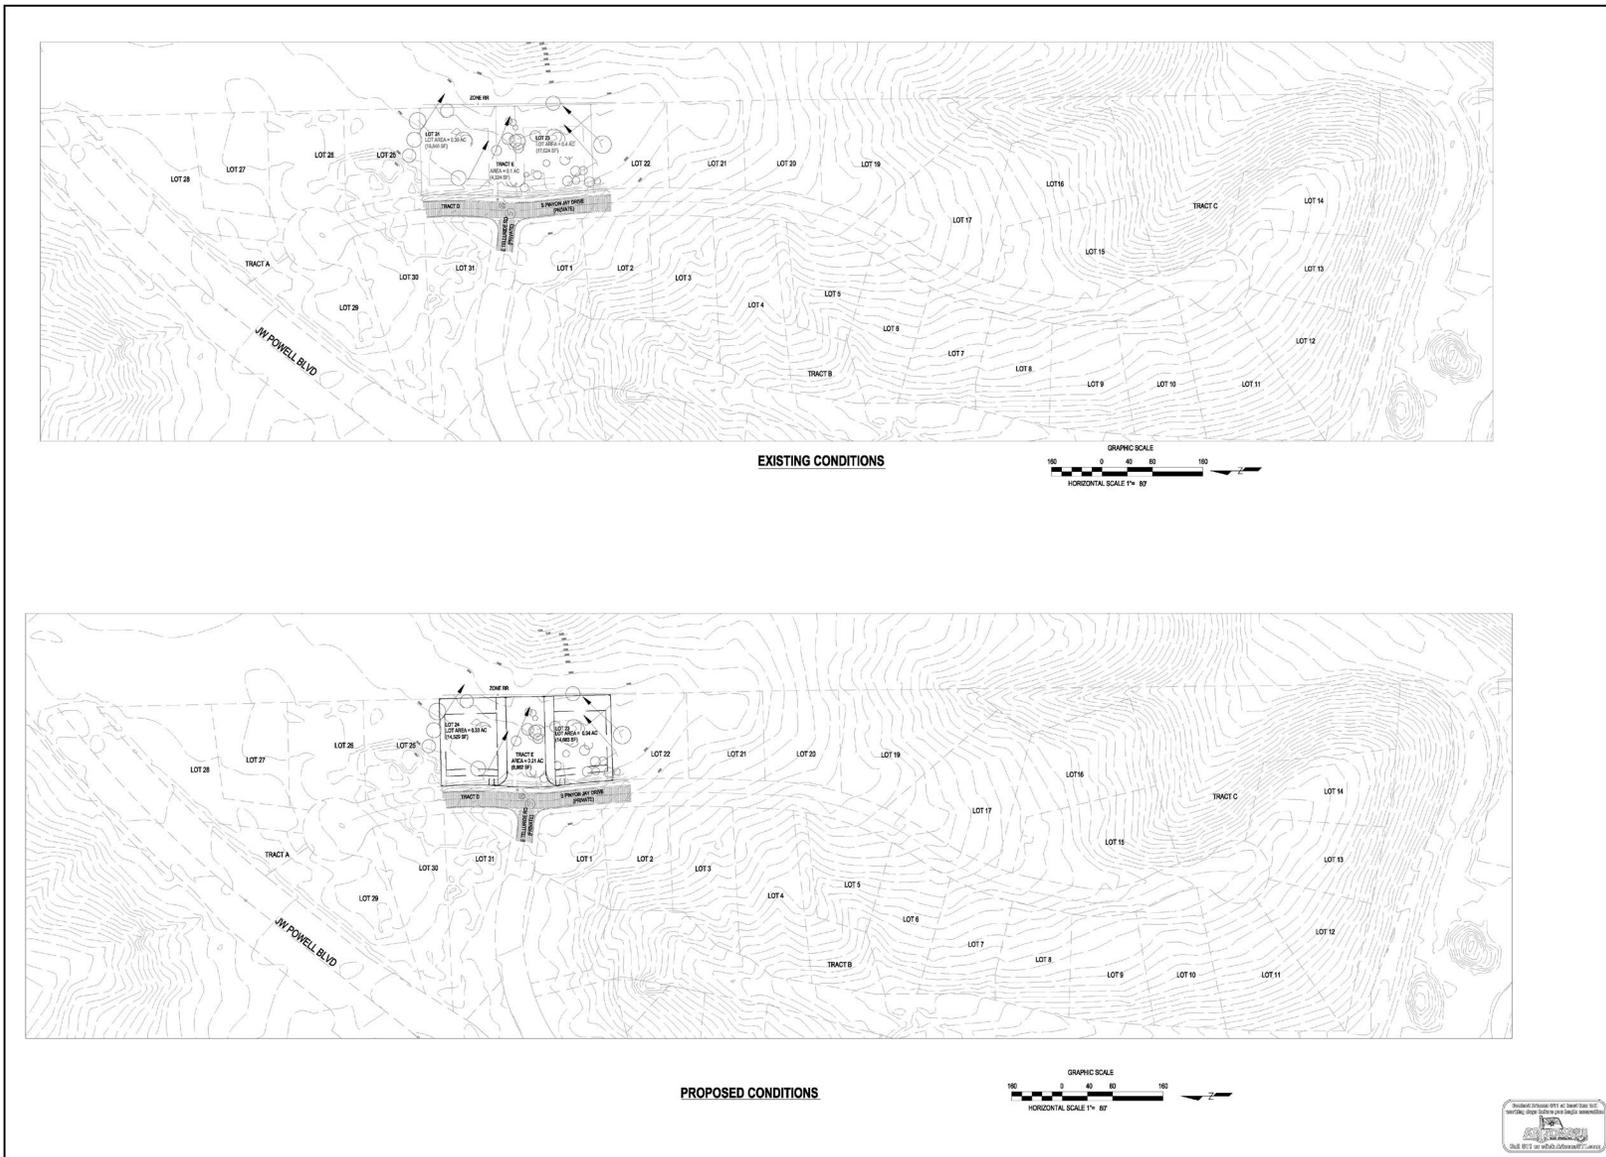

- In 2017, Coconino Ridge at Pine Canyon was recorded as a 32-lot subdivision within the R1 Zone.
- Since recordation of the plat, one parcel (Lot 32) has been combined with neighboring parcels, currently 31 lots exist within the subdivision.
- Tract E was reserved as private open space, public utility easement, and private drainage easement.

SHEET  
 4 OF 4

# Required Finding #1: Zoning Code (Title 10)

## Meets Single-Family Residential (R1) Standards

### Density

- The density will be consistent with existing conditions of the subdivision.

### Lot design and resource protection

- Lots designed to meet resource protection requirements using specific building envelopes

### Lot sizes

- Proposed lot sizes are approximately 14,000 sq. ft., exceeding the 6,000 sq. ft. minimum of Zone
- Proposed lot dimensions are approximately 84' wide and 135' deep, exceeding the 65'x100' minimum per zone

### Setbacks

- Conforms with the R1 minimum setbacks:
- Front = 15', 25' parking
- Side = 8' interior, 15' Street
- Rear = 25' min

***Zoning Code allows City Council to approve alternate lot sizes and setbacks on a final plat***

# Required Finding #1: Zoning Code (Title 10)

## Meets other relevant standards

- Historic/Cultural Resources
  - Cultural Resource clearance completed with original approval
- Parks, Open Space, Pedestrian, Bicycle Facilities
  - While no parks or open space are required for this subdivision, the Pine Canyon development area includes open space amenities for its residents.
  - FUTS trail runs along southern and western boundary of Coconino Ridge at Pine Canyon subdivision within Deer Creek Crossing Unit One

## Meets Engineering Standards

- Public systems analysis conducted to confirm preliminary compliance with Engineering Standards
  - Compliance confirmed with Civil Engineering Plans (after Preliminary Plat approval)
- Access and Traffic
  - A Traffic Impact Analysis (TIA) was not required for this subdivision. A TIA was completed for the entire Pine Canyon development area.

# Required Finding #2: Engineering Standards (Title 13)

## Meets Engineering Standards

### Water and Wastewater

- 8" water line provided with the existing streets serving subdivision
- 8" sewer line –each lot provided with a tap

### Stormwater

- Stormwater Analysis was completed for the entire Pine Canyon development

# Required Finding #3: Subdivisions Standards (Title 11)

## Meets Subdivision and Land Split Regulations (Chapter 11-20)

- Meets Preliminary Plat procedures, application requirements
- Minimum Required Subdivision Improvements
  - Identified in public systems analyses (previous slides)

# Required Finding #3: Subdivisions Standards (Title 11)

## Meets Subdivision and Land Split Regulations (Chapter 11-20)

### Subdivision Standards and Regulations

- Lot Design
- Street Design
- Easement Design
- Block Design

# Findings and Recommendation

## Required Findings

- **The City Council shall find the Preliminary Plat meets the requirements of City Code Title 10, Flagstaff Zoning Code; City Code Title 11, General Plans and Subdivisions; and City Code Title 13, Engineering Design Standards and Specifications**

## Staff Recommendation

- **Staff recommends the City Council approve the Preliminary Plat, in accordance with the findings presented in this report and the Planning and Zoning Commission recommendation (5-0).**

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** David McIntire, Community Investment Director  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration of Approval:** City of Flagstaff Workforce Analysis and Strategic Plan

**STAFF RECOMMENDED ACTION:**

Approve the Workforce Analysis and Strategic Plan.

**Executive Summary:**

City Council requested an analysis of the community workforce and the Workforce Development systems in the area. Staff procured Keen Independent Research, LLC through a Request for Statement of Qualifications procurement process. Keen performed its analysis and has provided recommendations in their Workforce Analysis and Strategic Plan. After a discussion with Council in the work session meeting of May 28th, the document was provided to interested parties and the general public. It now returns to City Council for consideration of approval with feedback incorporated.

**Financial Impact:**

The strategies in the plan may have an impact on expenditures of local transaction privilege tax revenues from the hotel and restaurant industries (BBB tax) - Economic Development funding. Many of the strategies and recommendations are focused on staff time and not formal resource expenditures. There are strategies, such as potentially supporting new partner training programs, that would use City BBB resources to support the identified programs. These expenditures would be budgeted and brought to Council as part of implementation of the plan if appropriate. There would likely be no impact on the General Fund.

**Policy Impact:**

The City has generally been a support for our partners' workforce development activities. Keen's recommendation is that we generally remain as a support, but take some leadership in formalizing relationships, convening partners, encouraging and soliciting business feedback, and other areas. This is not a significant policy shift, but may guide staff to be more proactive in specific areas. Additionally, the use of BBB funds to support otherwise ineligible internship programs would be consistent with City use of ARPA Workforce Development Funding, but an increase in scope of use of BBB - Economic Development funds.

The document does not focus on housing or childcare, but it recognizes affordable housing and childcare as pressing issues. The City's Housing Section is responsible for affordable housing at the staff level. Economic Development Staff will look into whether childcare is an area for further policy development or participation.

**Previous Council Decision or Community Discussion:**

Council requested this analysis in a previous budget year and approved the contract in Fall of 2023.

Council heard a presentation on the findings and recommendations of the plan on May 28, 2024.

**Options and Alternatives to Recommended Action:**

Approve the plan as presented and provide feedback on implementation as desired.

Request amendments to the plan and approve it after those are incorporated (likely after Council break).

Do not approve the plan and provide guidance on desired alternatives.

**Background and History:**

Workforce Development is a critical concern in any community's economic development, and that is true for Flagstaff as well. The need to support people in growing their skills benefits both the people who find better jobs and the employers who need skilled labor. Helping ensure the appropriate training for the workforce is available and ties to the needs of employers in the area is an ever-shifting process. Flagstaff faces numerous challenges in this area and Council requested an analysis of the workforce development needs and potential strategies for the City to consider. After a procurement process, staff began working with Keen Independent Research.

Keen did community outreach and interviewed many business and economic leaders in the community. They also worked with Stiletto to ensure the Economic Development Strategic Plan and the strategies in the Workforce Development plan were generally aligned.

**Connection to PBB Priorities and Objectives:**

Addresses the PBB priority: Robust and Resilient Economy

**Connection to Regional Plan:**

Goal ED.2 - Support and encourage an excellent educational system that promotes critical thinking and job training at all levels.

**Connection to Carbon Neutrality Plan:**

Not applicable

**Connection to 10-Year Housing Plan:**

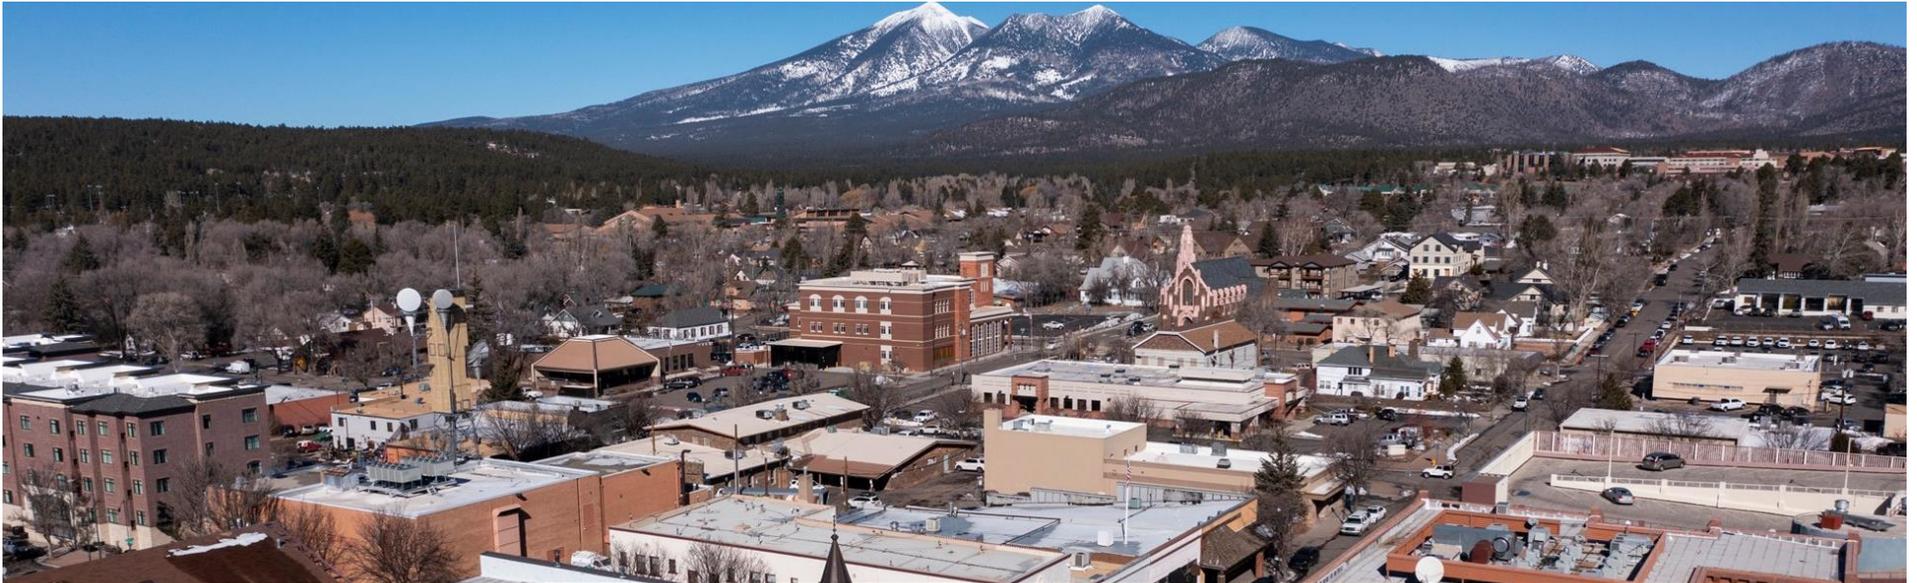

Not applicable

**Connection to Division Specific Plan:**

This will create a division specific plan.

# STRATEGIC WORKFORCE DEVELOPMENT PLAN

The City of Flagstaff seeks to ensure that its workforce is prepared for good jobs in Flagstaff’s growing and changing economy. The City retained Keen Independent Research LLC (Keen Independent) to develop a workforce development strategic plan to help the City coordinate efforts to train and fortify workforce in the community.

## Introduction

The City of Flagstaff is at a crossroads. Historically a tight-knit mountain community, Flagstaff continues to attract full-time and part-time newcomers looking to escape to the mountains. Jobs related to Northern Arizona University, the tourism industry and service industries remain important. Second home ownership has contributed to the relative scarcity and high cost of housing. The minimum wage increase may have had unintended consequences, including local business closures and shortages of non-service industry workers. Continuing down this path, Flagstaff could become a community in which its workers cannot afford to live. “Poverty with a view,” a term now at least one-half century old, continues to describe the tradeoff many local workers face when choosing where to put down roots. One question raised in this study is what will keep Flagstaff from going the path of Aspen, where the town is for non-residents and workers make long commutes to local jobs.

The City has an opportunity to chart a different course. By following an economic growth strategy that focuses on sustainable growth and workforce development in key industries and jobs, Flagstaff can create a future in which local talent fills local good jobs and residents can thrive. Residents would be adequately prepared for careers that allow them to support their families in Flagstaff. The City has an economic strategic plan in development that envisions such a future. To prepare for this future and help meet existing labor market needs, the City’s workforce must be intentionally prepared and supported. This plan focuses on the Flagstaff workers and their pathways to economic self-sufficiency.

## City Role in Workforce Development

The plan recognizes that the City is one of many partners in the local workforce development network. It does not have its own workforce development board and does not regularly receive federal funds that support local workforce development. The Coconino County Workforce Development Board is that agency. The City is also not an educational or training institution; city residents are served by an excellent university, community college, K-12 system, individual training organizations and on-the-job training with local employers. The City can be voice, convenor and partner that supports training and good jobs for people who live and work in the community. The plan focuses on this role.

### 1. Downtown Flagstaff, Arizona

Source: SearchNet Media via Wikimedia Commons.

# STRATEGIC WORKFORCE DEVELOPMENT PLAN — Background

---

## Methodology

Keen Independent conducted comprehensive research on the local labor market and available workforce training, which included:

- Review of data on labor market composition and trends;
- Inventory of existing workforce development resources for job seekers in the Flagstaff area, including County programs and offerings at the university and community college;
- Interviews and focus groups with City staff, elected officials, Coconino County Workforce Development Board members and staff, higher education and K-12 administrators, and local business owners and company representatives;
- Case studies of workforce development in three communities across the United States similar to Flagstaff; and
- Other research.

## Plan Organization

This plan for the City of Flagstaff to support workforce development is organized as follows:

- Overview of workforce development;
- Background on demographic and labor market trends;
- Overview of existing workforce development resources;
- Summary of comments from stakeholders;
- Lessons learned from case studies;
- Employment pathways; and
- Recommendations for the City.

This plan is supported by several appendices that are referenced throughout the document.

**Priority sectors.** In the City’s new economic development plan, Stiletto (the consulting firm that developed the plan) identified the following sectors as priorities for Flagstaff:

- Astronomy;
- Biomedical and healthcare;
- Food processing;
- Forestry; and
- Manufacturing.

The employment pathways section of this plan considers each priority sector. We also add sections for construction and transportation and utilities. Although not identified as a priority for growth, these additional sectors are prominent in Flagstaff and would benefit from workforce development to ensure that local workers can fill the available jobs. This plan concludes with a summary of goals and actions the City may consider adopting to support its local workforce.

## Context

This plan does not directly consider the important roles the City plays in helping sustain and support a skilled workforce through addressing housing cost and availability, affordable childcare, health and wellness, mobility across the community, environmental amenities, policies that support growing local businesses, inclusive workplaces, and a broad range of other quality of life measures.

These issues were often the first to be mentioned in our research in the community, especially when Keen Independent asked, “What can the City do to support local workers?” They are as or more important to workforce development as any of the measures in this workforce development plan.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Workforce development overview

---

This plan outlines a role for the City of Flagstaff to play in the development of its workforce. Understanding what workforce development is and how it typically functions helps contextualize this plan and recommendations.

### Defining Workforce Development

Broadly, workforce development refers to programs, training and services designed to help workers gain employment and skills needed for advancement. Typically, workforce development programs and services have one or more of the following components:

- Facilitating job search and placement, primarily into high-quality employment with upward mobility;
- Occupational skills training, often at little to no cost;
- Job search training, which includes advice on how and where to search, resume review and interview preparation; and
- Support services (e.g., direct assistance with transportation, childcare expenses, access to technology, interview clothing).

Workforce development programs are offered by a variety of organizations, including non-profits, colleges and universities and private companies.

### Workforce Innovation and Opportunity Act

The Workforce Innovation and Opportunity Act (WIOA), signed into law in 2014, reauthorized the Workforce Investment Act, which provides federal funding for state and local workforce development programs.<sup>1</sup> WIOA funding supports programs that are designed to develop local workers and connect them with employers.

**Unified state plans.** Under WIOA, states are required to have a unified plan to provide the core workforce development programs outlined in the legislation. These programs include services for adults, youth and displaced workers, among other populations.<sup>2</sup>

**Workforce development boards.** Workforce development boards are entities that serve as conveners of workforce development programs and service providers.<sup>3</sup> State and local boards are stewards of WIOA dollars. The Workforce Arizona Council is the state board responsible for enacting Arizona's workforce development plan. ARIZONA@WORK is the State-level workforce development network that connects job seekers to training and employment. The Council leverages ARIZONA@WORK and partners with local boards to provide targeted services. Local boards are typically at the County level, although some larger cities have one or more workforce development boards.

Flagstaff residents are served by the Coconino County Workforce Development Board. The Board fosters connections between services, workers and employers and aims to support the production of a highly skilled workforce.

# STRATEGIC WORKFORCE DEVELOPMENT PLAN — Demographic and labor market trends

We provide an overview of Flagstaff’s demographics and labor market to highlight trends we considered in the construction of this plan. Appendix A reviews this and other information in more detail.

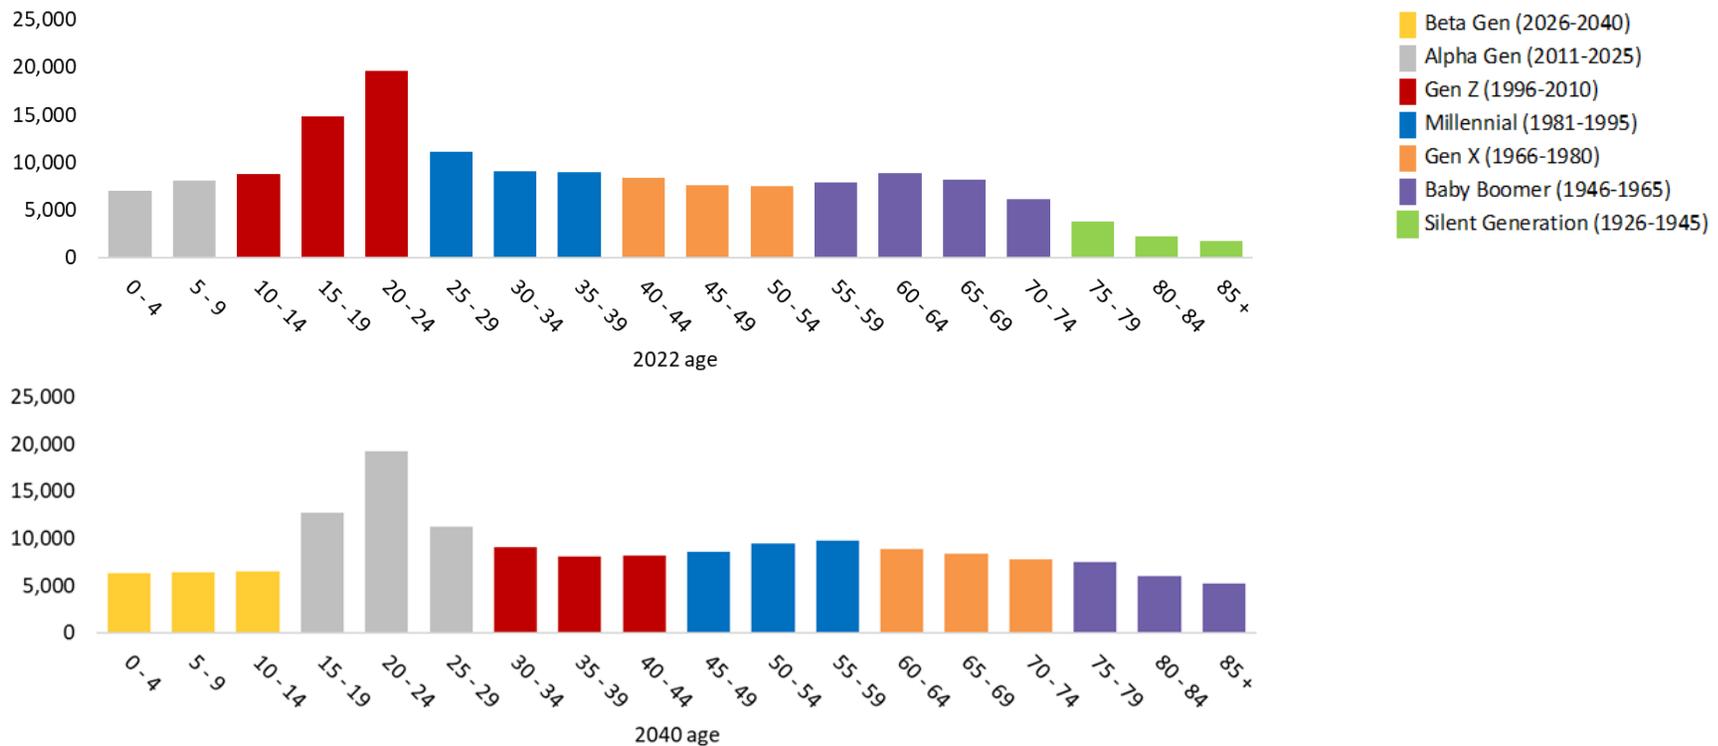

## Demographics

Over the next 15 years, the population of Coconino County is expected to grow from about 150,000 to about 160,000 according to projections by the Arizona Commerce Authority.

Although a modest population increase is expected, the Flagstaff area has for decades experienced an exodus of young adults, many of whom can no longer afford to live in the area. Figure 2 below shows this trend. In 2022, Generation Z is the largest age group, but in 2040, the population of Generation Z has decreased substantially.

The Flagstaff workforce is highly educated. More than half of residents have a bachelor’s degree or higher compared to about a third of Arizona residents (see Appendix A for additional demographic information).

2. Population by age group and generational cohort, Coconino County, 2022 and 2040

Source: Arizona Commerce Authority Coconino County Medium Series Population Projections.

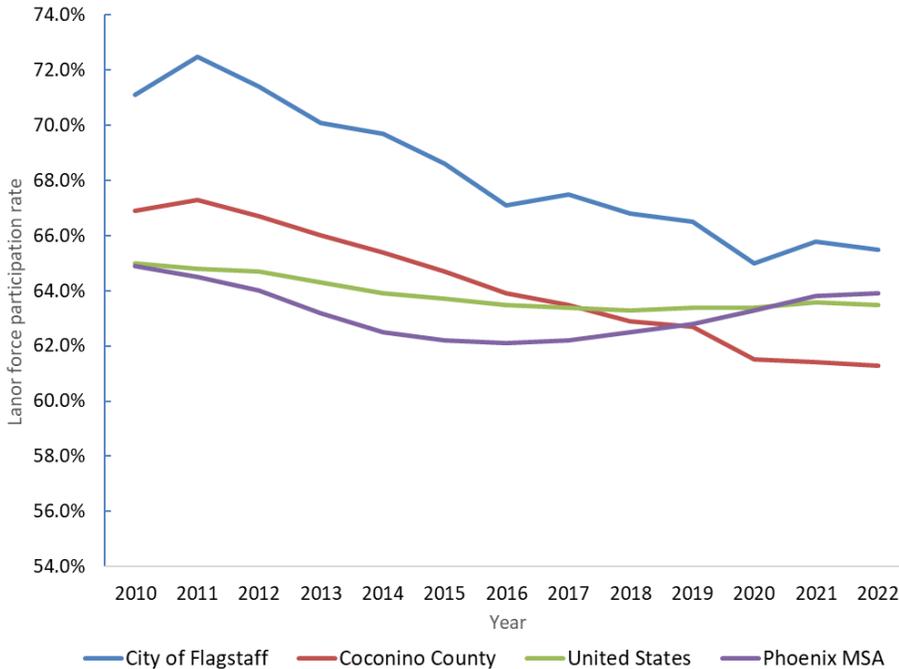

# STRATEGIC WORKFORCE DEVELOPMENT PLAN — Demographic and labor market trends

## Flagstaff Labor Market

Based on past trends, State projections indicate that the county will add the most jobs in the leisure and hospitality industry within the next decade.

**Labor force participation.** Although Flagstaff's population has grown modestly in recent years, the labor force has not kept pace. Figure 3 shows that the labor force participation for city residents is higher than other areas, it has been decreasing

3. Labor force participation rates, 2010-2022

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates.

**Employment and projections by industry.** In 2022, the following industries had the highest levels of employment in Coconino County:

- Leisure and hospitality (17,131 employees);
- Education and health services (16,661 employees); and
- Trade transportation and utilities (10,200 employees).

If current trends continue, professional and business services and construction are expected to also be large employers by 2032. More information on employment trends can be found in Appendix A.

4. Coconino County 2022 and 2032 employment by industry

Coconino County	2022 Employment	2032 Employment	Percentage change	Numeric change
<b>Industry</b>				
Leisure and Hospitality	17,131	19,120	11.6 %	1,989

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Existing workforce development resources

---

There are many workforce development programs and services that currently serve Flagstaff residents (reviewed in more detail in Appendix B). Some are listed on the eligible training provider list (meaning eligible participants may receive financial support through WIOA to attend) while others are not. As mentioned in the introduction, the City of Flagstaff does not directly receive funds for workforce development. Rather, the Coconino County Workforce Development Board is the recipient of federal workforce development funding.

### Note on Individual Eligibility

We note that subsidization of participation in a WIOA-eligible program also depends on individual income eligibility. Individuals may be eligible to receive WIOA funding for training and educational programs on the eligible training provider list if they qualify as low-income based on:

- Income falling below 70 percent of the Lower Living Standard Income Level (set by the U.S. Department of Labor);
- Receipt of public assistance for the previous six months;
- Homelessness; or
- Disability status.<sup>4</sup>

In 2024, 70 percent of the Lower Living Standard Income Level for a single individual is \$13,951 in a metro area of Arizona and \$13,739 in a non-metro area.<sup>5</sup> Many workers who may benefit from these programs are not eligible for WIOA funding.

We acknowledge this as a major barrier and later in the plan provide suggestions for how the City may help identify workers who can receive WIOA funding and support those who cannot.

### Education Programs

Flagstaff has two major higher education institutions that both provide workforce development programs and services.

**Northern Arizona University.** Major workforce development resources at Northern Arizona University (NAU) include career education and counseling. Career Steps is a series of online career preparation modules available to any NAU student. The Educational Opportunity Centers program offers counseling to low-income participants who want to enter or continue a high school equivalent, postsecondary education or a postsecondary credential program. Additionally, students in NAU's bachelor's degree programs in Nursing and Computer Information Technology are eligible for WIOA funding to support their education.

**Coconino Community College.** Historically an institution that has supported adult education and vocational training, Coconino Community College (CCC) currently offers 24 programs that are eligible for WIOA funding. Commercial Driver's License (CDL) training is one of their more popular programs. Additionally, CCC offers a Career and Technical Education program with eight career pathways that result in an associate's degree or certificate upon completion. CCC offers a variety of non-credit courses.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Existing workforce development resources

---

### Independent Training Programs

Several other entities in Flagstaff offer workforce training. Here, we list four that have WIOA-eligible programs.

- Warrior-to-Inspector;
- Northland Hospice and Palliative Care;
- Sedona School of Massage; and
- Kuttz Beauty and Barber College.

### Apprenticeship Programs

Although apprenticeship programs are relatively rare in Flagstaff, two that we identified are through the Northern Arizona Contractors' Association and Boilermakers Western States. The former program is eligible for WIOA funding while the latter is not.

### ARIZONA@WORK Programs

ARIZONA@WORK is the State workforce development network. All services provided through the ARIZONA@WORK are supported by WIOA funding. There are two ARIZONA@WORK Career Centers in Flagstaff and they provide workshops, career fairs and other services. Additional services offered through ARIZONA@WORK include:

- Reemployment services;
- Job training opportunities for adults aged 55 or older;
- Career services for individuals with disabilities; and
- Career services for Native Americans.

### Resources from Nonprofit Organizations

Flagstaff is served by many local nonprofit organizations that engage in workforce development that falls outside the scope of WIOA. Many of these organizations have community partnerships with NAU, CCC and others in a collaborative approach to workforce development. Examples of such nonprofits include:

- ECoNA;
- Greater Flagstaff Chamber of Commerce;
- Local First Arizona; and
- Moonshot.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Stakeholder feedback

---

As part of the economic development research, Stiletto conducted a survey of the Flagstaff community that included workforce development questions Keen Independent developed. Keen Independent conducted individual interviews and focus groups with stakeholders (detailed in Appendix C), who corroborated much of what members of the public said in the survey.

### Education

Stakeholders described Flagstaff’s workforce as highly educated. This is reflected in the community survey, for which nearly a third of respondents held a master’s degree. However, several interview and focus group participants pointed out that the workforce is “missing that middle ground,” referring to skilled trades workers.

### Challenges

Interview and focus group participants identified several challenges facing Flagstaff’s workforce, including:

- High cost of living;
- Lack of affordable housing;
- Lack of affordable childcare;
- Awareness of workforce development resources;
- Shortage of workers in skilled trades and nursing; and
- Employers struggling with the minimum wage.

### City Role

One of the more common suggestions from stakeholders was for the City to become a leader in workforce development and facilitate dialogue around it. Several interview and focus group participants mentioned the City coordinating with the County on messaging and working with CCC and NAU to offer more WIOA-eligible programs.

*Not everybody has to go to a four-year college. You can get certificates in different areas that are highly needed.*

*City elected official*

---

*We get so many people that are really excited about the opportunity work for, work in Flagstaff, they just can't make the numbers work with [the high cost of living].*

*City employee*

---

*I'm paying my guys \$40, \$45 an hour and I advertise that ... to look for other mechanics nationwide and I can't get anybody to move here because our rent prices are so high because our housing is so low.*

*Small business owner*

---

*I just believe that a lot of people just don't know about all the resources that are available to them.*

*Workforce professional*

---

*And I don't see [shortage of skills among] our workforce as being the problem. The problem is minimum wage ....*

*Workforce professional*

---

*Maybe the City needs to ... adopt a leadership role within Northern Arizona.*

*Healthcare employer representative*

---

*I would like to see us [continue to] be smart about investments in economic development. Growth has been what we've been talking about, but it really means the type of growth that we want.*

*City elected official*

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Case studies of workforce development

To provide the City with examples of workforce development strategies from other communities, Keen Independent conducted case studies of the following cities:

- Asheville, North Carolina;
- Bend, Oregon; and
- Missoula, Montana.

Communities were selected because they have some similarities to Flagstaff in terms of population, geography and economy. Appendix D provides more detail on each individual city.

### Key Takeaways

Like Flagstaff, Asheville, Bend and Missoula communities with unique cultures and distinct challenges. We noted, however, several commonalities with the workforce development systems in each community.

- Cities themselves do not directly offer full workforce development programs and instead partner with other agencies and organizations to deliver programs and services.
- Local workforce development boards often lead local workforce development and have extensive partnerships with other organizations that act as service providers.
- Local community colleges are instrumental in providing workforce development, such as licensing and certification, soft skills training and industry-specific job training.
- Training programs are often general (internships, soft skills, low-hours certificates, CDL) but workforce development in some communities also invest in workforce for specific industries (OJT) and longer-term training, such as apprenticeship programs.
- Cost of living and housing are concerns in all case study communities. Although such issues go beyond the scope of this report, they greatly impact the workforce and create more urgency to train more residents for living wage jobs.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Employment pathways

---

Employment pathways look different for job seekers with and without college degrees. We consider both in this section.

### Framing Pathways

Ensuring that residents have opportunities to obtain jobs that allow them to live in Flagstaff should be a top priority of the City. We describe what those pathways may look like for different job seekers in terms of the priority sectors and present additional sectors for consideration.

**Needed annual income.** A single adult with no children needs annual income of more than \$50,000 to support themselves working full-time.<sup>6</sup> Annual median salaries for most jobs included in the employment pathways exceed that amount or are within a few thousand dollars.

**Note on food service workers.** Many of the jobs in the leisure and hospitality industry are in food service. We do not include food service jobs in this plan because our research indicates that additional training is not needed for food service workers, who are available for work but are not earning a living wage. Workforce development training will address little unmet need in terms of preparing food service workers. Many would benefit from upskilling or training for other career paths to better paying jobs.

### Four-Year Degree Pathways

Between NAU and CCC, Flagstaff produces thousands of graduates each year in a variety of fields. Job seekers with four-year degrees and more advanced degrees have options for careers that will earn them a living wage, depending on their field.

**Priority sectors.** The priority sectors with living-wage jobs that require a bachelor's degree (or higher) include astronomy, biomedical and healthcare, and forestry.

**Astronomy.** As NAU and other universities already produce graduates who are prepared to enter careers in astronomy, there is little need for major workforce support from the City of Flagstaff. Potential actions the City could take to support local workers seeking jobs in this sector include promotion of astronomy careers and recognition of the contributions of astronomical research to the community.

**Biomedical and healthcare.** NAU educates students for many types of biomedical and healthcare careers through bachelor's and more advanced degrees. The four-year nursing bachelor's degree program at NAU is WIOA-approved. NAU is working to establish a College of Nursing, which will provide more robust training for students seeking careers in healthcare. The Community College trains students for jobs requiring two-year degrees or certificates and could become a larger training provider for the healthcare sector.

To support job seekers in the biomedical and healthcare sector, the City of Flagstaff and other partners may consider facilitating conversations with local healthcare providers and the Coconino County Workforce Development Board to identify the needs that additional training programs in biomedicine and healthcare could address. Additionally, the City may offer support to CCC and NAU as they work to have more programs approved for WIOA funding.

---

<sup>6</sup> Glasmeier, A. (2024). *Living wage calculator for Flagstaff, AZ*. Massachusetts Institute of Technology. <https://livingwage.mit.edu/metros/22380>

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Employment pathways

**Forestry.** NAU’s School of Forestry offers bachelor’s, master’s and doctoral degrees in forest science. Additionally, the school offers several certificate programs, including Fire Ecology and Management, Forest Resilience and Adaptation, and Natural Resource Management. These programs are not supported by WIOA and the City may consider assisting the County with this process.

**Other options.** The following occupations require a bachelor’s degree or higher and have median salaries above \$95,000:

- Industrial production manager;
- Chief executive;
- Computer and information systems manager;
- Industrial engineer;
- Sales manager;
- Computer network architect;
- Business school professor;
- Computer programmer;
- Lawyer;
- Mechanical engineer;
- Occupational therapist; and
- Physical therapist.

Many of these occupations are management-level positions, which require experience and may benefit from certifications. Job seekers looking to advance to management positions in their field may consider taking certification courses at CCC. The City could engage in dialogue with major employers in various industries to determine what types of training or certification programs would be beneficial for workers looking to advance to management and assess current training offerings for gaps.

5. Median annual earnings of occupations related to astronomy, biomedical/healthcare and forestry in Coconino County, 2022

Occupation	Median annual earnings	Typical education level
<b>Astronomy occupations</b>		
Physical scientist	\$ 102,044	Bachelor's degree
Computer and mathematical occupations	76,190	Bachelor's degree
<b>Biomedical/healthcare occupations</b>		
Biomedical engineer	\$ 165,541	Bachelor's degree
Pharmacist	153,480	Doctoral or professional degree
Physician assistant	129,987	Master's degree
Nurse practitioner	121,009	Bachelor's degree
Medical and health services manager	102,911	Bachelor's degree
<b>Forestry occupations</b>		
Conservation scientists	\$ 75,026	Bachelor's degree
Environmental scientists	63,757	Bachelor's degree

Source: Arizona Commerce Authority, 2022 Occupational Employment and Wages.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Employment pathways

---

### High School Diploma (or Equivalent) Pathways

Statistically, workers with higher levels of education earn, on average, higher salaries than those with a high school diploma. However, job seekers in Flagstaff have many options, including two-year degree programs, certificate programs and training programs, that will position them to obtain living-wage employment.

**Priority sectors.** The priority sectors with the most opportunity for job seekers with high school diplomas are food processing and manufacturing.

**Food processing.** As food processing occurs in large plants, many of the jobs in this sector fall under manufacturing.

**Manufacturing.** Although manufacturing as a sector is projected to experience a decline in the next 10 years, there is opportunity for Flagstaff to attract more clean manufacturing jobs, and many occupations within the sector will change.

CCC offers a CNC machinist training course to help job seekers in manufacturing stay ahead of automation by learning to service automated machines. Additionally, CCC offers a Certified Manufacturing Engineer course for individuals who have worked at least four years in a manufacturing engineering job. These programs are not supported by WIOA funding. Stakeholders mentioned apprenticeships as helpful in manufacturing. However, formal apprenticeship programs are not widely offered in Flagstaff.

The City may work with the Workforce Development Board and CCC to make the above manufacturing courses WIOA eligible. Additionally, the City can champion apprenticeship programs and promote soft skills and other training courses that may benefit workers as the manufacturing sector becomes increasingly automated.

**Other options.** Construction and transportation are among other sectors that offer job seekers paths to economic self-sufficiency.

**Construction.** Similar to manufacturing, construction can include workers across sectors. On-the-job training was identified by stakeholders as particularly effective for sectors like construction where experience is crucial. The Coconino County Workforce Development Board has funding to support on-the-job training for eligible employers through ARIZONA@WORK. Additionally, CCC offers construction associate's degrees and certificate programs that provide participants with practical experience. Those programs are not supported by WIOA funding, but CCC's HVAC certificate program is eligible.

The City of Flagstaff may consider assisting the County with expanding its allocation of WIOA funding for on-the-job training. The City can build relationships with employers in construction (and other industries) and inform them of the availability of this funding. Then, the City may facilitate the necessary coordination between employers and the County to set up the WIOA-funded on-the-job training program.

**Transportation.** Transportation also supports other sectors. Although college degrees are not required for most transportation occupations, many do have certification requirements. Many stakeholders indicated that CDL-certified drivers are in high demand in Flagstaff. Both NAU and CCC have partnered with industry organizations to offer CDL certificate courses that can be completed within four to six weeks. The CCC program is eligible for WIOA funding support but the NAU program is not (we note that NAU's program is newer).

The City may work with NAU and the County to expedite approval of their CDL programs for WIOA funding support. Additionally, on-the-job training support could benefit employers and workers for other jobs in this sector, so the City may consider facilitating conversations between employers in this sector and the Workforce Development Board.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Employment pathways

**Miscellaneous.** Other career opportunities for workers with a high school diploma or equivalent with a median salary of more than \$60,000 per year include the following:

- Supervisor of police and detectives;
- Chef or head cook;
- Supervisor of entertainment and recreation workers;
- Food service manager;
- Lodging manager; and
- Supervisor of firefighters and prevention workers.

As with the college degree pathways to jobs in other sectors that were not identified as priorities for growth, many of these occupations are supervisor-level positions. Thus, workers looking to advance may benefit from skills training courses offered by CCC. Again, the City may consider comparing available training opportunities to skills employers in these sectors cite as required for advancement.

6. Median annual earnings of occupations related to construction and manufacturing in Coconino County, 2022

Occupation	Median annual earnings	Typical education level
<b>Construction occupations</b>		
Supervisors of construction workers	\$ 66,467	HS diploma or equivalent
Construction equipment operators	50,618	HS diploma or equivalent
Construction and building inspectors	56,651	HS diploma or equivalent
Highway maintenance workers	46,226	HS diploma or equivalent
<b>Manufacturing occupations</b>		
Supervisors of production workers	\$ 65,932	HS diploma or equivalent
Machinists	63,070	HS diploma or equivalent
Industrial machinery mechanics	63,417	HS diploma or equivalent
Welders, cutters, solderers and brazers	46,881	HS diploma or equivalent
<b>Transportation occupations</b>		
Transportation, storage and distribution managers	\$ 84,520	HS diploma or equivalent
Supervisors of transportation workers	47,282	HS diploma or equivalent
Heavy and tractor-trailer truck drivers	48,753	HS diploma or equivalent
Light truck drivers	45,909	HS diploma or equivalent

Source: Arizona Commerce Authority, 2022 Occupational Employment and Wages.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Summary

---

The City of Flagstaff seeks to be more engaged in developing its workforce. The previous sections provided guidance by sector and the present section provides overall guidance for the City.

### City Role in Workforce Development

Most City governments are not directly involved in creating workforce development programs. Rather, they partner with other organizations, including the local workforce development board, to promote programs and services to their residents. The City of Flagstaff may best use its influence and resources to connect workforce development programs and services across institutions and ensure that businesses have a voice in the process.

### Strategic Goals

We propose the following four strategic workforce development goals to the City of Flagstaff:

1. Promote existing programs and pathways to jobs that require four-year degrees and more advanced degrees.
2. Encourage the creation of new certificate programs and training programs that are responsive to market needs.
3. Promote upskilling programs that will allow workers to advance in their careers.
4. Facilitate ongoing conversations with local business representatives and with workers to learn more about and respond to their needs.

The table (P-8) on the following page describes the target population served by each goal, suggested actions that would make progress toward each goal, and a timeframe for implementing each action.

### Integration with Economic Development Strategic Plan

In addition to the primary sectors of focus, the City's Economic Development Strategic Plan, developed by Stiletto, outlines four pillars where recommendations focus:

1. Focus and positioning;
2. Branding and awareness;
3. Sustainable economic development; and
4. Community ecosystem development.

Workforce development integrates horizontally through all pillars. Desired outcomes from the workforce development plan that align with the four pillars include:

- Aligning the talent pipeline to the priority sectors;
- Presenting a clear value proposition for workers, who seek clear information about how to enter and advance in desired careers;
- Presenting a clear value proposition for businesses that want to be sure their needs will be met by the future workforce;
- Ensuring that the talent pipeline evolves to meet future needs of key sectors;
- Developing formal partnerships with the workforce development board, NAU and CCC; and
- Positioning the City as a connector between workforce development resources, businesses and workers.

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Summary

### 7. Overall goals, suggested actions and timeframe for City of Flagstaff workforce development strategy

Goal	Target population	Sample actions	Timeframe (years)		
			1-2	3-5	6-10
1. Promote existing programs and pathways to four-year+ degree required jobs	Workers with bachelor's degrees or higher	Formalize partnerships with NAU, CCC and FUSD		X	
		Develop a workforce development landing page that describes career pathways		X	
2. Encourage new certificate and training programs	Skilled trade workers	Formalize partnership with Coconino County Workforce Development Board	X		
		Collect data from employers on what types of skills incoming employees need		X	
		Endorse new training programs (e.g., through NAU or CCC) that will lead to a recognizable credential			X
3. Promote upskilling programs	Workers looking to advance/change careers	Formalize partnership with Coconino County Workforce Development Board	X		
		Develop communications strategy around skill-building programs through CCC, CCWDB and others		X	
		Build relationships with nonprofits and community organizations to support ongoing workforce efforts			X
4. Facilitate conversations with businesses to determine needs	All workers	Form business advisory groups to regularly solicit feedback from various sectors		X	
		Encourage local business leaders and workers to serve on County Workforce Development Board			X
		Explore using City BBB funds to support businesses in developing paid internships that are not eligible for WIOA funding due to income eligibility restrictions	X		

## STRATEGIC WORKFORCE DEVELOPMENT PLAN — Additional considerations

---

As the City works to implement the recommended workforce development goals, we provide a few additional considerations that will help operationalize workforce development actions.

### Identifying WIOA-Eligible Participants

Although anyone may participate in workforce development programs on the eligible training provider list, only individuals who are identified as low-income may be eligible to have the program cost offset by WIOA funding. The City may consider working with the County and others to identify who may be eligible for WIOA subsidy and find ways to directly provide workforce development resources to them.

For example, Coconino County Health and Human Services may track recipients of social services. The City could work with the County to ensure those individuals know and can access ARIZONA@WORK. Additionally, the City and County may work with state and local workforce development entities to outline automatic eligibility criteria.

### Outlining Partnership Terms

The workforce development strategic plan recommends partnerships with educational institutions, nonprofit organizations and industry entities. We recommend the City develop memorandums of understanding (MOUs) with partners that outline:

- The nature of the relationship;
- Benefits to each party;
- Anticipated outcomes; and
- MOU revision schedule.

The MOUs should be updated and revisited regularly to ensure that the partnership is mutually beneficial and adjust when needed. The City may also consider developing joint MOUs when appropriate (e.g., with multiple educational institutions) that outline how all parties will contribute to workforce development.

### Leveraging Existing Efforts

As mentioned, Flagstaff benefits from many organizations that engage in workforce development. The City may consider ways to leverage existing efforts as it looks to implement the recommended goals. For example, the Greater Flagstaff Chamber of Commerce already convenes business advisory groups and may consider partnering with the City.

### Childcare Workforce

Although childcare was not identified as a primary growth sector in the City's economic strategic plan, Keen Independent heard about rising childcare costs in interviews and focus groups with stakeholders. As the city retains and attracts more residents, a growing need for affordable childcare will affect the workforce. The City may consider ways to ensure that it has a strong early childhood workforce in place.

The National League of Cities has a Cities Supporting the Early Childhood Workforce initiative designed to help cities strengthen their early childhood workforce.<sup>7</sup> The City of Phoenix has participated in this initiative. Leadership from the City of Flagstaff may consider facilitating a conversation with leadership from the City of Phoenix to discuss this initiative, its strengths and how the City of Phoenix has incorporated early childhood workers into its workforce development strategy.

---

<sup>7</sup> <https://www.nlc.org/initiative/early-childhood-workforce/>

## APPENDIX A. Labor Market Trends — Introduction

---

Keen Independent examined labor market trends and current conditions for the Flagstaff region. This includes:

- Analysis of changes in employment, unemployment, total workers by age and participation in the labor force;
- Types of jobs and industries that comprise the largest share of local employment, now and in the future; and
- Labor force, industry and occupational employment projections, including projected job openings.

The following pages of Appendix A present results of these analyses.

### Methodology

The following section describes the methodology utilized by Keen Independent in its analysis of the Flagstaff labor market.

**Definition of the region.** Federal and state data sources regarding economic and labor force conditions in the Flagstaff area usually only provide data at the county level. Therefore, Keen Independent often had to use data that aggregated all jobs or workers within Coconino County when analyzing conditions in the Flagstaff area.

Based on AZ Commerce Authority July 1, 2023, population estimates, a majority of the residents of Coconino County (approximately 53%), live within the City of Flagstaff and only 11 percent reside in the other incorporated cities in the County. Use of County information is appropriate and relatively accurate for this study.

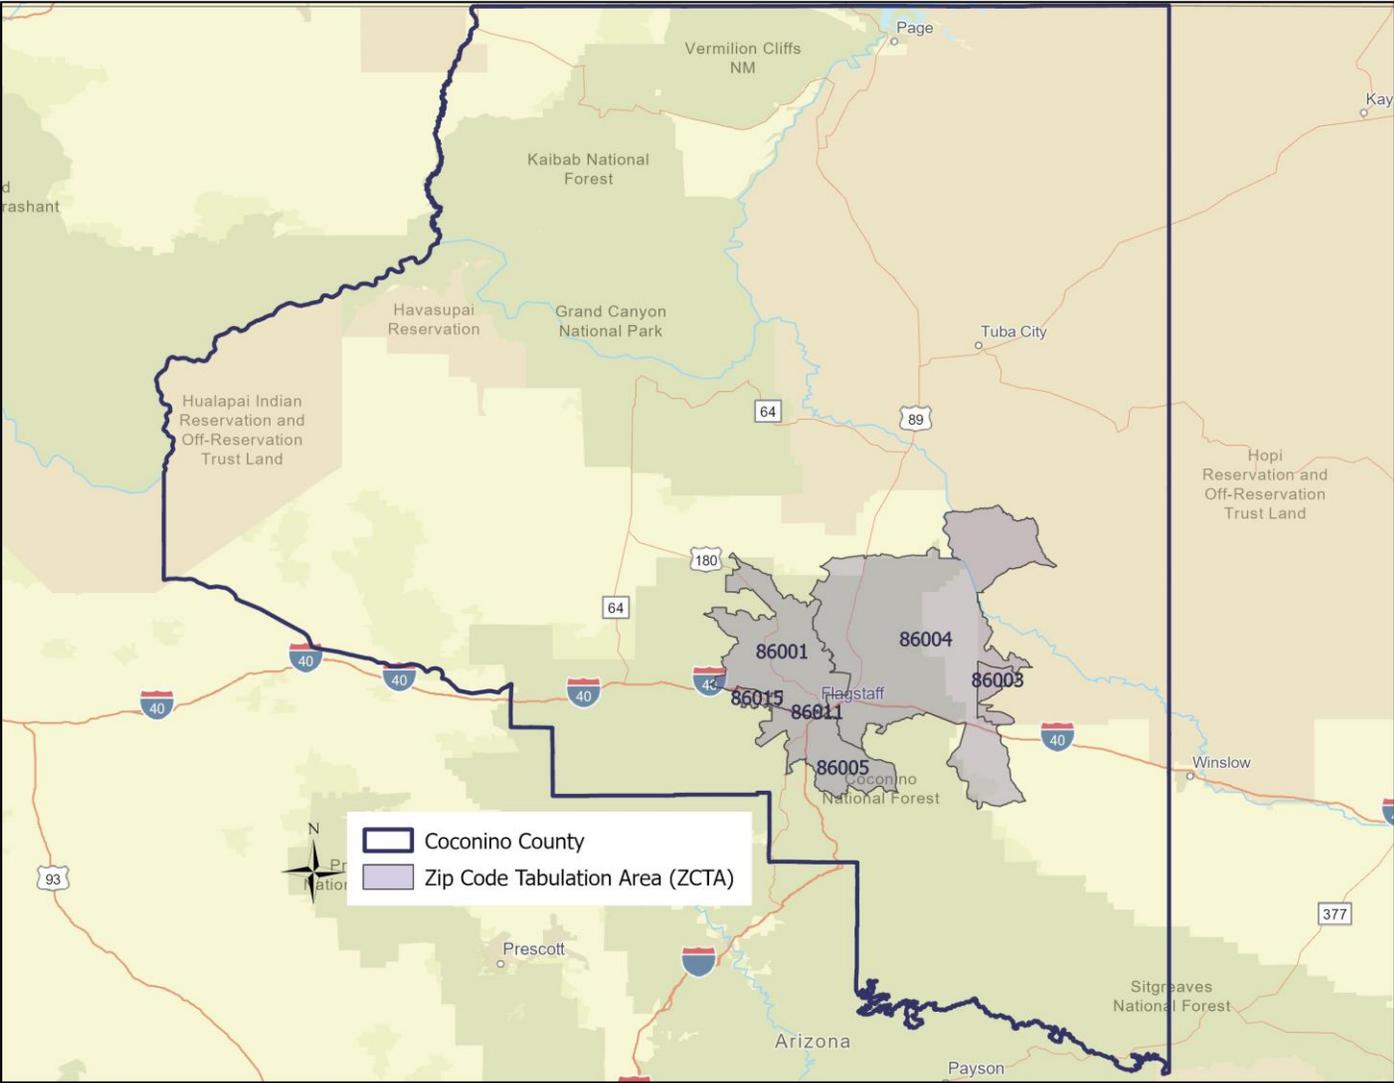

**Data sources.** Keen Independent primarily obtained employment and workforce data from the U.S. Census Bureau ACS 5-Year Estimates and labor market data provided by the Arizona Commerce Authority and Bureau of Labor Statistics (BLS).

### Coordination with Others Performing Economic Research

Concurrent with the Keen Independent study, the City of Flagstaff retained Stiletto, an economic research firm, to develop an economic development strategic plan for the Flagstaff area. Keen Independent consulted with Stiletto professionals, City staff and staff of the Coconino County Workforce Development Board throughout this process.

# A. Labor Market Trends — Introduction

A-1. ZIP codes included in the Flagstaff area

Source: Esri, TomTom, Garmin, FAO, NOAA, USGS, Bureau of Land Management, EPA, NPS, USFWS, Ohio Emergency Management Agency and U.S. Census Bureau shapefiles and basemaps.

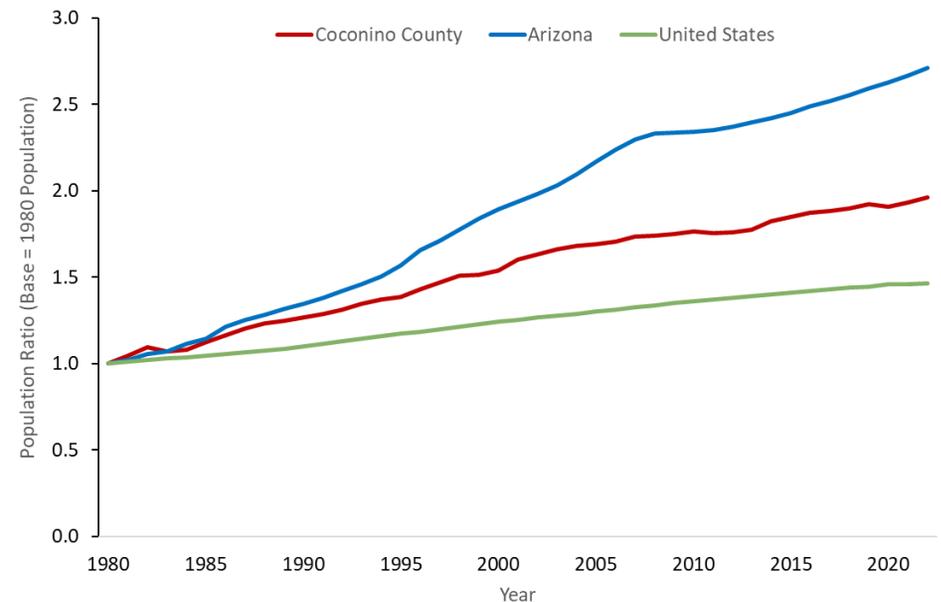

## A. Labor Market Trends — Total population by age

### Coconino County Population Compared to Arizona and the United States

The study team analyzed historical population estimates for Coconino County from the Arizona Commerce Authority from 1980 to 2022 and found that its population has doubled during that time from approximately 76,000 to 150,000. Keen Independent also compared the population growth of Coconino County with that of Arizona and the United States during the same time period. To do so, population ratios were developed using 1980 population levels as the base year for each region. Figure A-2 on the right shows these results.

Results indicate that Arizona’s population has almost tripled since 1980. Coconino County’s population has not grown at the same rate as the state but has increased at a faster rate than the United States as a whole.

A-2. Coconino County, Arizona and U.S. trends in population 1980–2022

Source: Arizona Commerce Authority and World Bank Population Estimates

## A. Labor Market Trends — Total population by age

### Overall Population Growth

The Arizona Commerce Authority developed population projections for Coconino County through 2040. Figure A-3 shows the Medium Series projections, which have county population growing to about 160,000 residents in 2040, up from 150,000 people in 2022. Overall, the county is projected to grow by about 500 residents per year.

Some of this population growth will come from more births than deaths in the county over this period, but much more will come from net in-migration to the county. (In-migration to the county will account for about four times the population change due to births and deaths.<sup>1</sup>)

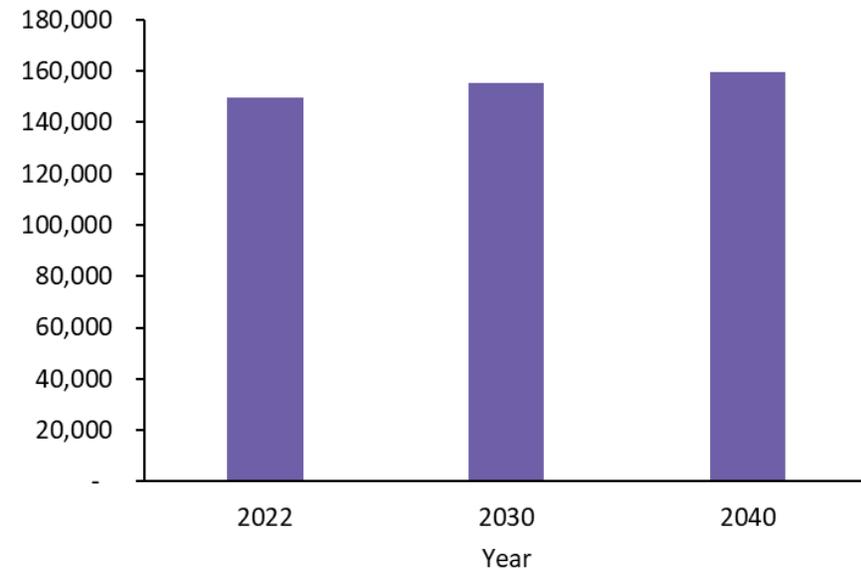

Population in Coconino County has grown more slowly than Arizona as a whole and the State’s projection of continued slow county population growth mirrors past trends. If conditions in the Flagstaff area were to change, there could be an uptick in the rate of population growth.

### Changes by Age Group

Figure A-4 on the following page shows total county population by age group and generational cohort for 2022 and projections for 2030 and 2040 (also come from the Medium Series projections).

Many individuals in the Gen Z population now living in the county, which is college age and other young adults (shown in red in the top graph in Figure A-3), are projected to move out of the county by 2030 (shown in red in the second graph in Figure A-3). This pattern will be repeated by the Alpha generation by 2040, again following past trends.

A-3. Coconino County population projections, 2022, 2030 and 2040

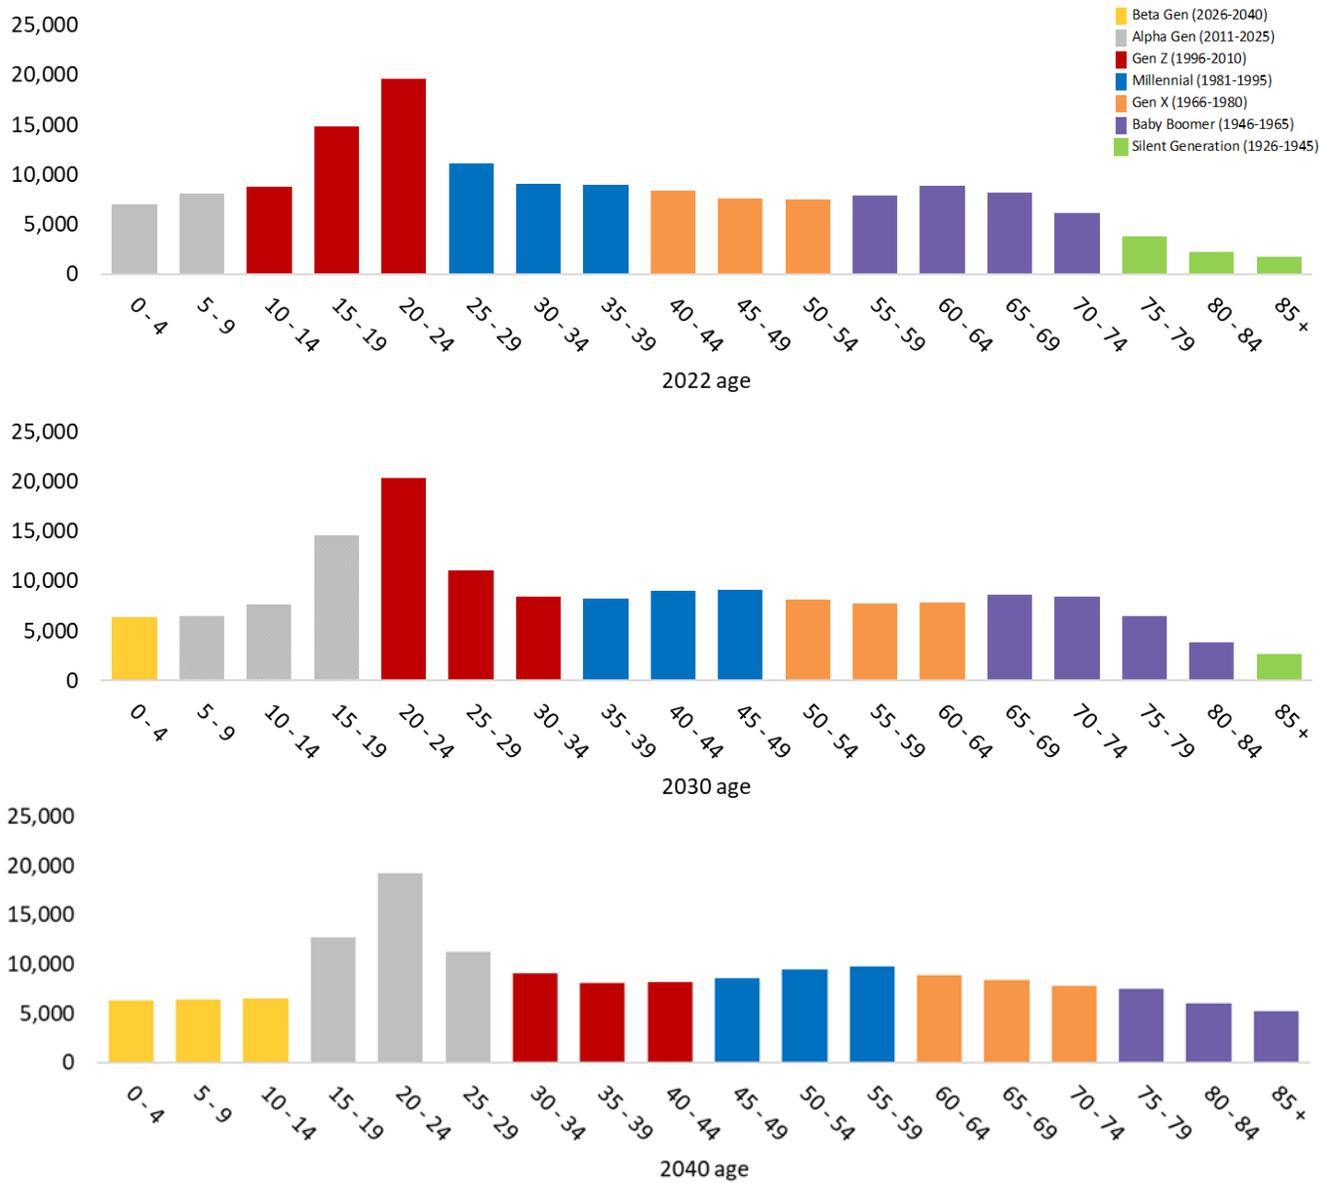

Source: Arizona Commerce Authority Coconino County Medium Series Population Projections

<sup>1</sup> Arizona Commerce Authority Coconino Population Projections Medium Series, Table 1. Total population and components of population change, accessed via: <https://www.azcommerce.com/oeo/population/population-projections/>

# A. Labor Market Trends — Total population by age

A-4. Population by age group and generational cohort, Coconino County, 2022, 2030 and 2040

Source: Arizona Commerce Authority Coconino County Medium Series Population Projections.

## A. Labor Market Trends — Total labor force and employment

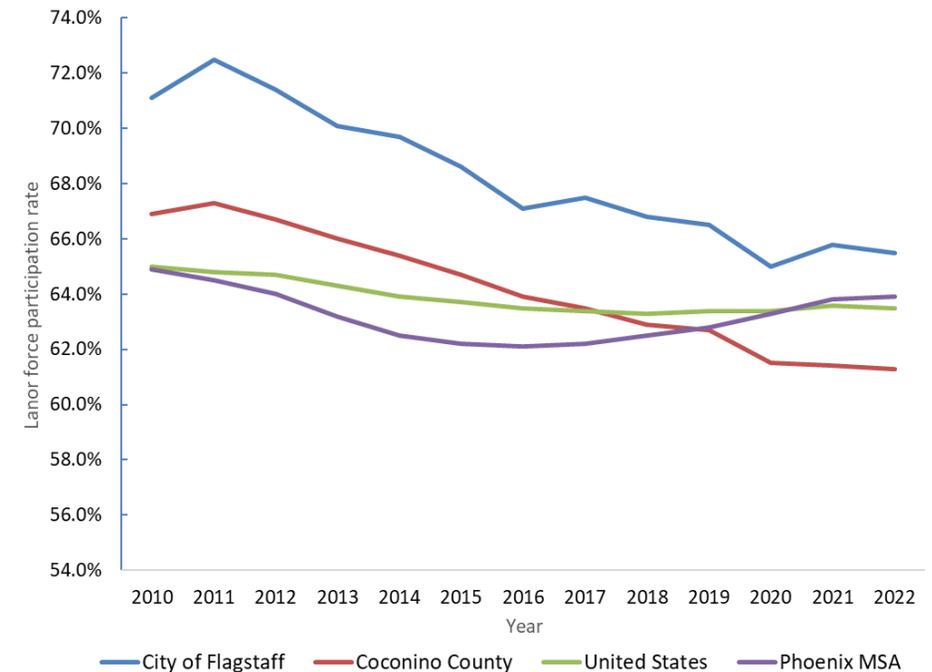

The following sections provide detail on current labor force participation rates and trends within Coconino County.

### Trends in Labor Force Participation Compared to Phoenix MSA and the United States

Keen Independent analyzed labor force participation rates for the City of Flagstaff, Coconino County, Phoenix Metropolitan Statistical Area (MSA) and United States using ACS 5-Year Estimates from the U.S. Census Bureau from 2010 to 2022.

In 2022, the labor force participation rate for people living in the City of Flagstaff and Coconino County were 65.5 percent and 61.3 percent, respectively (compared to 63.9 percent for Phoenix MSA and 63.5 percent of the U.S.). Labor force participation has steadily decreased in the City of Flagstaff over the last decade, but is still higher than the County, the Phoenix MSA and the United States (see Figure A-5). (Note that the 5-year estimates somewhat smoothed out the short-term dip in labor force participation in the COVID-19 pandemic.)

A-5. Labor force participation rates, 2010-2022

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates.

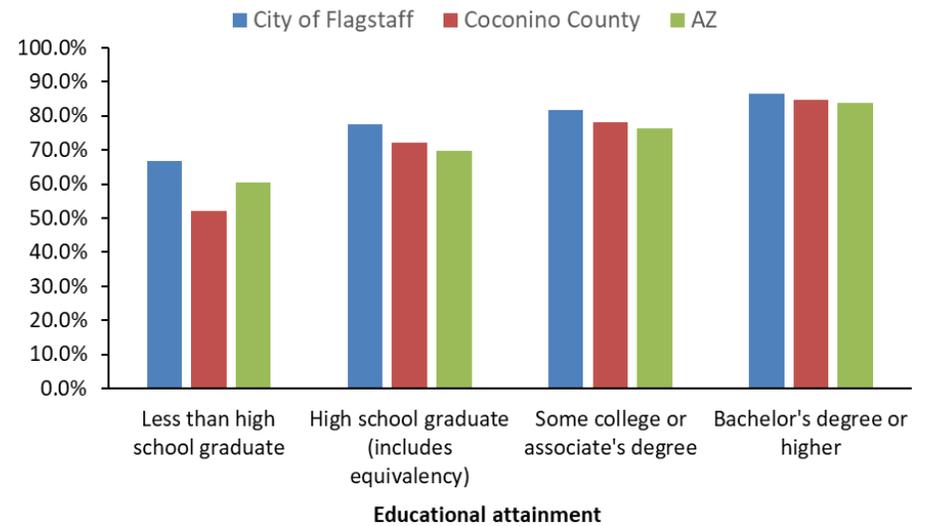

## A. Labor Market Trends — Total labor force and employment

### Labor Force Participation by Educational Attainment

Labor force participation rates are higher for Flagstaff compared with the county and the state. Also, Flagstaff residents in the working age population who had more education had higher rates of participation in the labor force than those with less education.

Figure A-6 examines the labor force participation rates for different groups for the five years before the COVID-19 Pandemic (2015–2019).

A-6. Labor force participation by educational attainment, 2015-2019

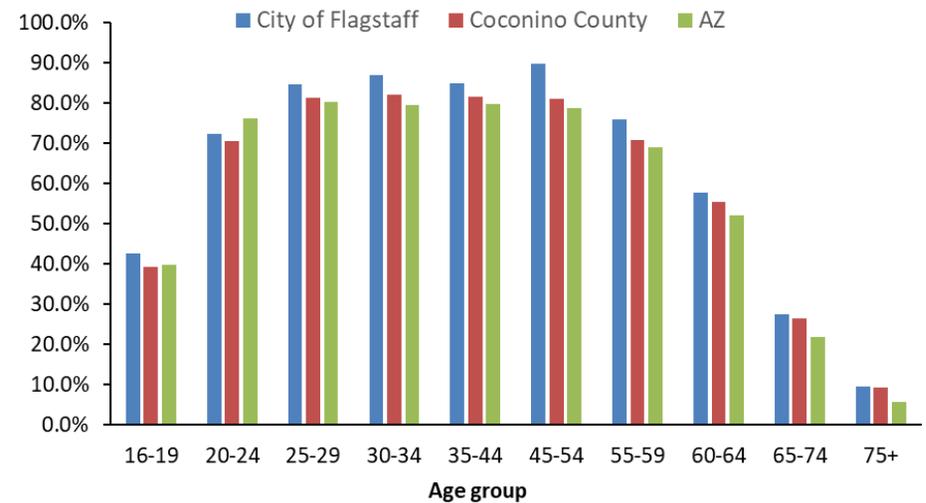

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2015-2019.

## A. Labor Market Trends — Total labor force and employment

### Labor Force Participation by Age

In Coconino County the 30-34 age group had the highest labor force participation rate (82%) for 2015-2019. However, individuals 25-54 had very similar participation rates. Participation rates were the lowest for those 19 and under, as well as those 65+. These results were also seen for the City of Flagstaff and the State of Arizona (see Figure A-7).

A-7. Labor force participation by age group, 2015-2019

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2015-2019.

# A. Labor Market Trends — Total labor force and employment

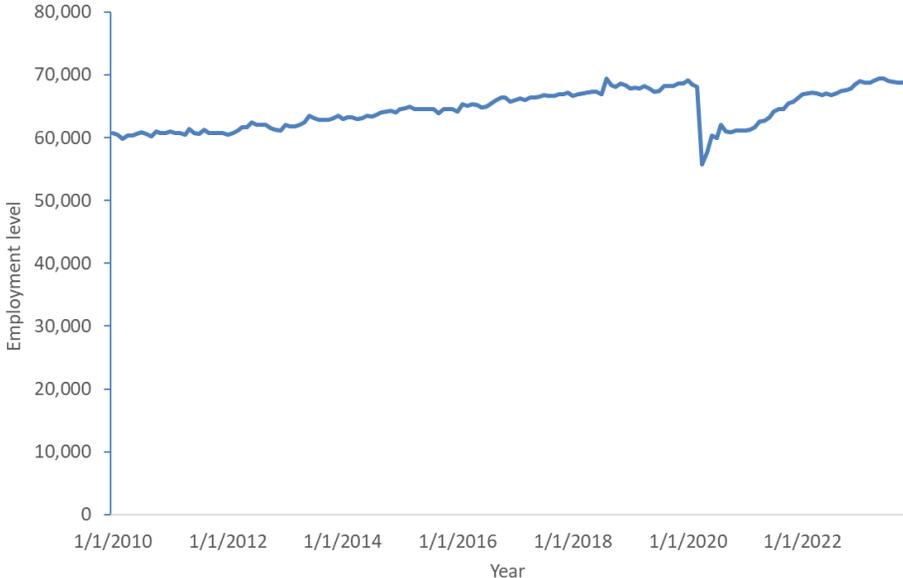

Keen Independent analyzed historical monthly, seasonally adjusted employment levels for Coconino County from 2010 to 2023. The data were sourced from the Arizona Commerce Authority’s employment estimates.

## Trends in Employment in Coconino County

In October 2023, Coconino County had a total employment level of 68,800. Employment has been steadily increasing since spring 2020, reaching levels similar to those before the pandemic.

Figure A-8 shows these results.

A-8. Coconino County employment level (seasonally adjusted), 2010-2023

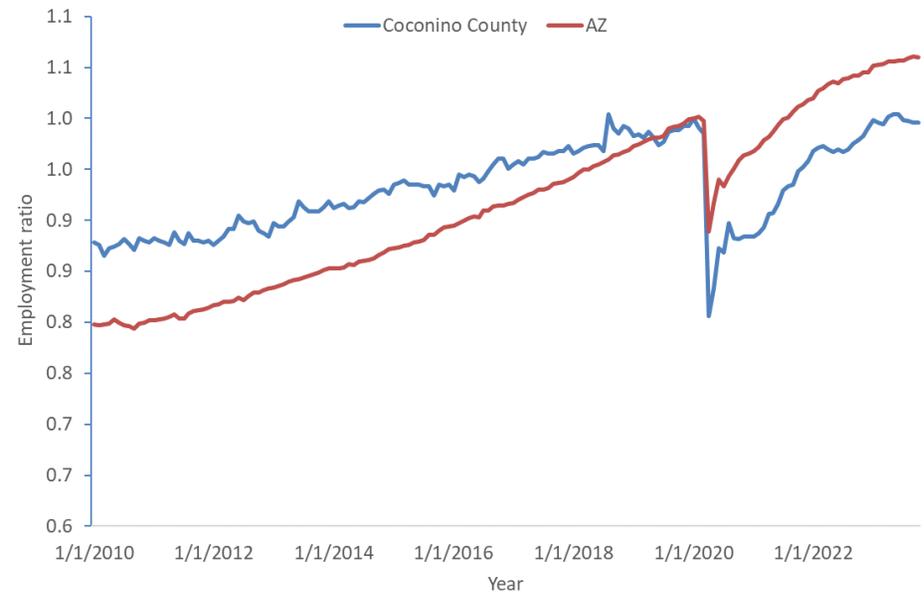

Source: AZ Commerce Authority, Labor Market: Industry Employment and Wages Datasets.

## A. Labor Market Trends — Total labor force and employment

Keen Independent also compared trends in total Coconino County employment to those for Arizona. To do so, Keen Independent calculated a ratio of the employment level for a given month divided by the respective employment in January 2020.

Figure A-9 shows the trend for Coconino County and Arizona employment ratios (with January 2020 equal to 1.0). County employment grew more slowly than the state until spring 2020, and then experienced a much greater relative drop in employment during the pandemic. Statewide employment returned to its pre-pandemic employment levels much more quickly than the county.

A-9. Seasonally adjusted employment ratios (base = Jan. 2020), 2010-2023

Source: AZ Commerce Authority, Labor Market: Industry Employment and Wages Datasets.

## A. Labor Market Trends — Total labor force and employment

Keen Independent analyzed current and projected employment levels by industry. Findings are described in the following pages.

### Current Employment and Employment Projections by Industry Sector

The Arizona Commerce Authority provides current employment levels and projections at the industry level. Keen Independent analyzed the figures from 2022 and compared them to the industry projections for 2032. Figure A-10 shows these results.

In Coconino County in 2022, the following industries had the highest levels of employment:

- Leisure and hospitality (17,131 employees);
- Education and health services (16,661 employees); and
- Trade transportation and utilities (10,200 employees).

These industries accounted for more than one-half of jobs in Coconino County and are also expected to be the biggest industries in 2032. Other industries anticipated to have significant employment increases from 2022 to 2032 are:

- Professional and business services, gaining 1,517 jobs (33% increase); and
- Construction, gaining 639 jobs (21% increase).

Two industries are projected to show job losses: the Self Employed and Government sectors (decreasing by 6.3% and 1.2%, respectively).

A-10. Coconino County 2022 and 2032 employment by industry

Coconino County	2022 Employment	2032 Employment	Percentage change	Numeric change
<b>Industry</b>				
Leisure and Hospitality	17,131	19,120	11.6 %	1,989

## A. Labor Market Trends — Total labor force and employment

---

### Current Employment by Industry Sector in Coconino County Compared to Phoenix MSA

Keen Independent compared the share of jobs in Coconino County by industry to the share in the Phoenix MSA. In the following pages, Figures A-11 and A-12 show the share of employment in each industry for the county and the Phoenix MSA for 2022.<sup>2</sup>

Many of the industries present in the Phoenix MSA are also found in the county. (Analyses later in this appendix show this is also true for specific types of jobs.) However, the relative importance of the sectors differs.

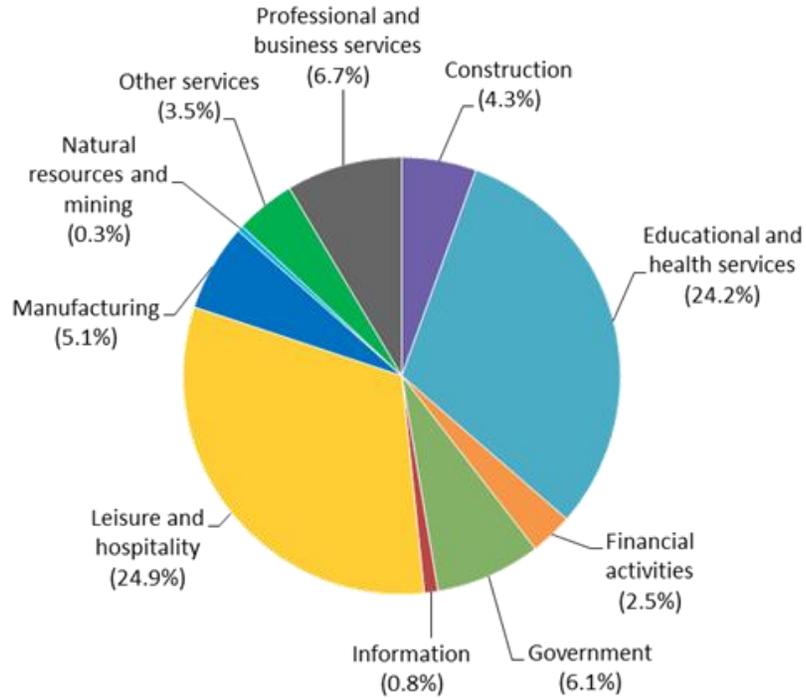

- As mentioned in the previous section, the county’s major industries are leisure and hospitality and educational and health services. The share of the total workforce in these industries in Phoenix MSA is substantially smaller.
- In comparison to Phoenix MSA, the share of the county workforce in Coconino County within the professional and business services, financial activities and construction industries was smaller.

## A. Labor Market Trends — Total labor force and employment

### High Location Quotient Industries

Employment Location Quotients (LQs) are a more sophisticated way to compare an industry’s share of total employment in a region to the that for the U.S. For example, if the share of the county’s employment made up by the construction industry was 10 percent and the share of U.S. employment in that same industry was 5 percent, the LQ for that industry for the county would be 2.0. Any ratio greater than 1.0 indicates that the industry has a higher share of employment compared to the U.S.

**Coconino County employment LQs.** Keen Independent analyzed LQs for private sector June 2023 employment from the Bureau of Labor Statistics. For Coconino County, the three highest June 2023 employment LQs were for the following industries:

- Accommodation and food services (ratio of 2.40);
- Arts, entertainment, and recreation (ratio of 2.17); and
- Retail trade (ratio of 1.08).

In comparison to their share of U.S. employment, these industries made up a larger share of Coconino County employment, indicating that the county has a specialization in these industries when compared to the nation (see Figure A-13). All other industries had an LQ below 1.0.

A-13. June 2023 employment LQs by industry, Coconino County

NAICS industry sector	June 2023 employment location quotient
NAICS 11 Agriculture, forestry, fishing and hunting	0.25
NAICS 21 Mining, quarrying, and oil and gas extraction	0.18
NAICS 22 Utilities	0.80
NAICS 23 Construction	0.87
NAICS 31-33 Manufacturing	0.74
NAICS 42 Wholesale trade	0.37
NAICS 44-45 Retail trade	1.08
NAICS 48-49 Transportation and warehousing	0.43
NAICS 51 Information	0.33
NAICS 52 Finance and insurance	0.27
NAICS 53 Real estate and rental and leasing	0.72
NAICS 54 Professional, scientific, and technical services	0.39
NAICS 55 Management of companies and enterprises	0.50
NAICS 56 Administrative and support and waste management and remediation services	0.45
NAICS 61 Educational services	0.43
NAICS 62 Health care and social assistance	0.98
NAICS 71 Arts, entertainment, and recreation	2.17
NAICS 72 Accommodation and food services	2.40
NAICS 81 Other services (except public administration)	0.81

## A. Labor Market Trends — Total labor force and employment

---

Keen Independent also reviewed employment levels and projections at the occupation level. Findings are described in the following sections.

### Current Employment and Employment Projections by Occupation

The Arizona Commerce Authority also provides current employment levels, as well as 2032 projections for occupations within the industries mentioned in the previous section.

**Occupational mix.** First, data on employment by occupation shows that the county has most of the same types of jobs found in the Phoenix metro area, but a somewhat different mix of them that follows the differences in share of total employment by industry.

**Occupations projected to have the most growth.** Keen Independent analyzed the 30 occupations that were expected to have the highest percentage change in county employment levels between 2022 and 2032 (see Figure A-14 on the following page). For the county, the occupations with the greatest expected percentage increases were:

- Nurse practitioners (53% increase);
- Personal financial advisors (49% increase);
- Travel agents (42% increase);
- Veterinary assistants (40% increase); and
- Medical and health services managers (39% increase).

In comparison, the expected percentage change in employment for occupations overall was about 9 percent.

Out of the top 30 occupations analyzed, about one-third were part of a healthcare related occupation group. The next most common occupation groups included sales and related occupations, as well as construction and extraction services.

In addition to changes in employment, Keen Independent identified the typical education levels for individuals who were employed in these occupations. Out of the 30 highest-growth occupations:

- About one-third had a current workforce with a typical education level of a bachelor's degree or higher; and
- Approximately one out of five occupations had a current workforce with a typical education level of an associate's degree or a post-secondary non-degree awarded.<sup>3</sup>

## A. Labor Market Trends — Unemployment

The following sections provide detail on current unemployment rates and unemployment trends for Coconino County.

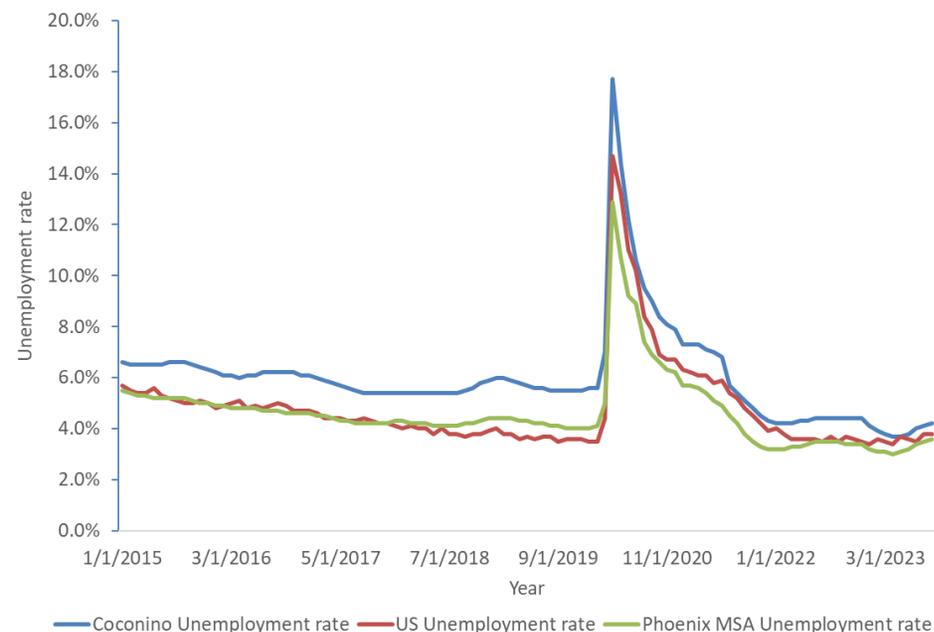

### Trends in Unemployment Compared to Phoenix MSA and the United States

For October 2023, the Arizona Commerce Authority reported an unemployment rate for Coconino County of 4.4 percent. That meant that 4.4 percent of people in the labor force in the county were unemployed in that month (totaling to about 3,400 unemployed individuals). This was higher than the unemployment rate in that month for the U.S. as a whole (3.9%) and the Phoenix metropolitan area (3.7%).

Figure A-15 compares unemployment rates for the county, state and U.S. Unemployment in the county follows statewide and national trends and is usually somewhat higher than the state or nation.

Unemployment in Coconino County (seasonally adjusted) reached 17.76 percent with the COVID-19 pandemic but is now lower than pre-pandemic levels. As shown in Figure A-15, the unemployment rate in the county in 2023 was closer to state and U.S. levels than it was prior to the pandemic.

A-15. Monthly unemployment rate (seasonally adjusted), 2015-2023

Source: Arizona Commerce Authority, Labor Market Unemployment Datasets

## A. Labor Market Trends — Unemployment by group

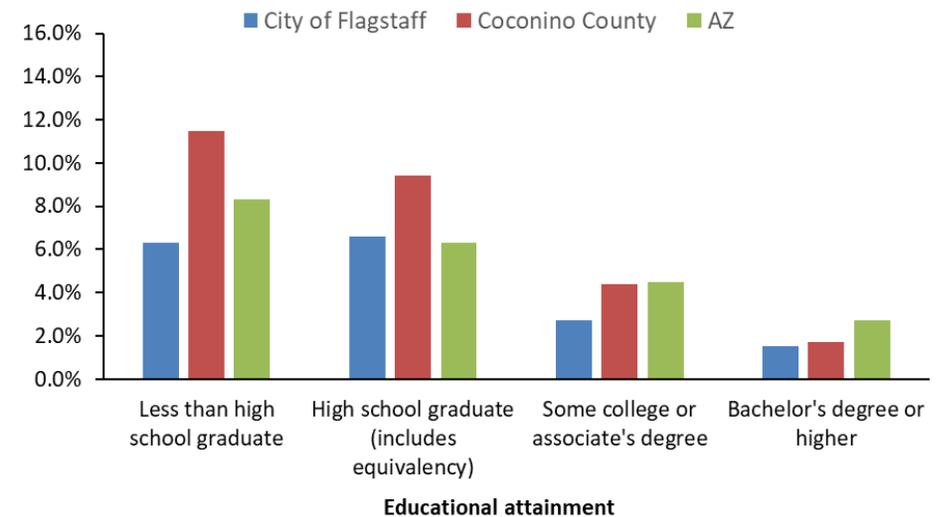

### Unemployment by Educational Attainment

Keen Independent examined the unemployment rates for different groups for the five years before the COVID-19 Pandemic (2015–2019). Figure A-16 presents these results.

Unemployment rates vary considerably for individuals with different levels of formal education:

- About 6 percent of people living in Flagstaff who were in the labor force and had less than a high school education were unemployed, along with 7 percent of the labor force who were high school graduates.
- The unemployment rate for Flagstaff residents was only 3 percent for those with some college education or an associate degree and 2 percent for those with a bachelor’s degree or higher.

A-16. Unemployment rate by educational attainment, 2015-2019

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2015-2019

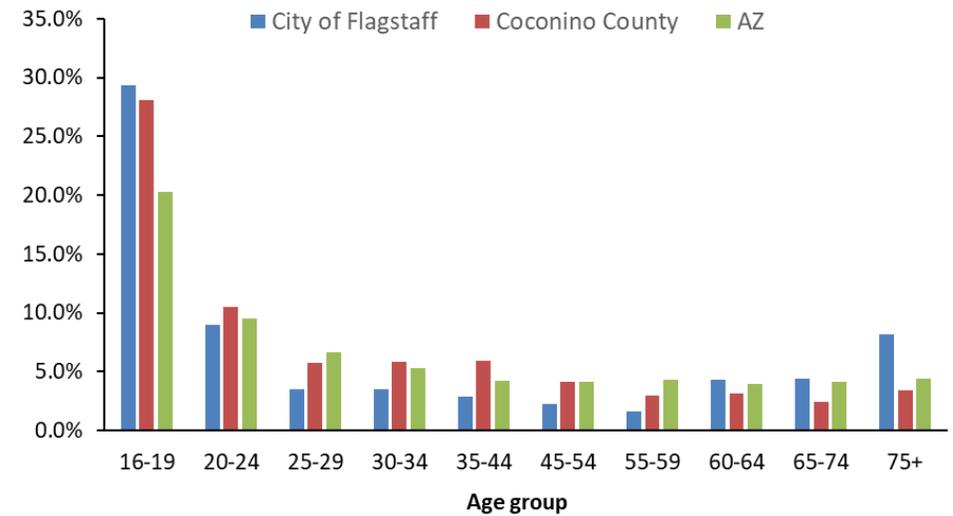

## A. Labor Market Trends — Unemployment by group

### Unemployment by Age

Consistent with differences in unemployment rates by education, the age groups with the highest rates of unemployment in Coconino County for 2015–2019 were those ages 16 to 19 (counting only those in the workforce), dropping substantially for those ages 25 and older.

Figure A-17 provides these comparisons using American Community Survey data for the five years ending in 2019.

A-17. Unemployment rate by age group, 2015-2019

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2015-2019

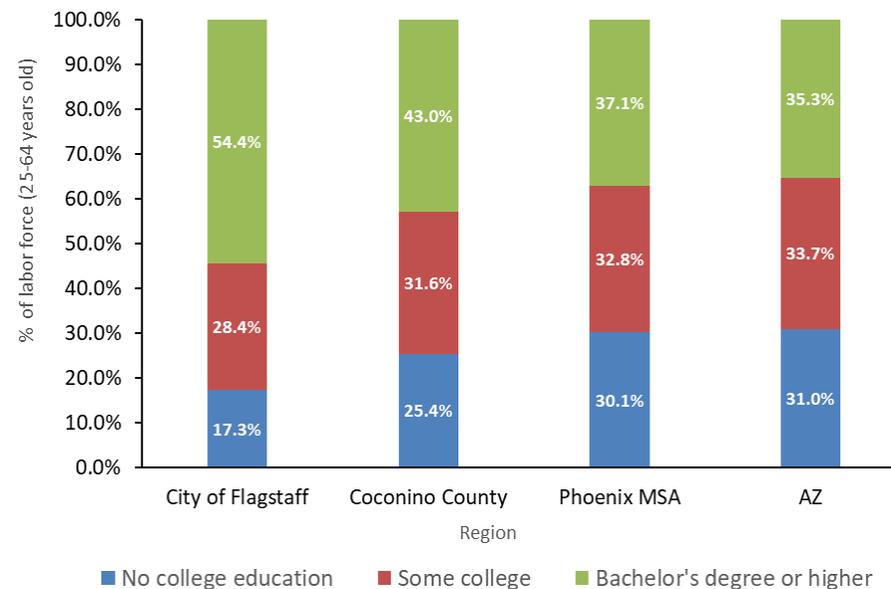

## A. Labor Market Trends — Labor force education

### Educational attainment of the labor force

Keen Independent analyzed the educational attainment of the labor force for residents of Flagstaff, Coconino County, the Phoenix MSA and Arizona. Data from ACS 2018-2022 estimates were utilized to calculate the percentage of the labor force (ages 25-64 years old) that had a bachelor's degree or higher, some college education, or no college education.

The results in Figure A-18 show that workers in Flagstaff and Coconino County (54% and 43%, respectively) had much higher percentages of the labor force with a bachelor's degree or higher than the Phoenix MSA (37%) or Arizona (35%).

A-18. Educational attainment of the labor force (25-64 years old), 2015-2019

Source: U.S. Census Bureau, American Community Survey 5-Year Estimates 2015-2019

## A. Labor Market Trends — Labor force education

---

### Fields of Education for Individuals with a Bachelor's Degree

Keen Independent analyzed the fields of education for individuals with a bachelor's degree living in Coconino County compared with those living in the Phoenix metro area. Figures A-19 and A-20 in the following pages show these breakdowns.

The same types of bachelor's degrees found for Phoenix metro area residents are also found in Coconino County, but the distribution differs. In Coconino County, the most common degrees for those with a bachelor's degree were:

- Education (14.7%);
- Business (12.5%); and
- Science and engineering related fields (9.2%)<sup>4</sup>.

In Phoenix MSA, the following fields of education were the largest:

- Business (22.7%);
- Education (12.9%); and
- Science and engineering related fields (10.0%)

The biggest difference in bachelor's degrees was for business, just 12.5 percent of Coconino County residents with a college degree having a business degree compared with 22.7 percent of Phoenix metro area residents with a college degree. Among county residents with a bachelor's degree, only 5.8 percent had a degree in engineering compared with 8.3 percent for the Phoenix metro area.

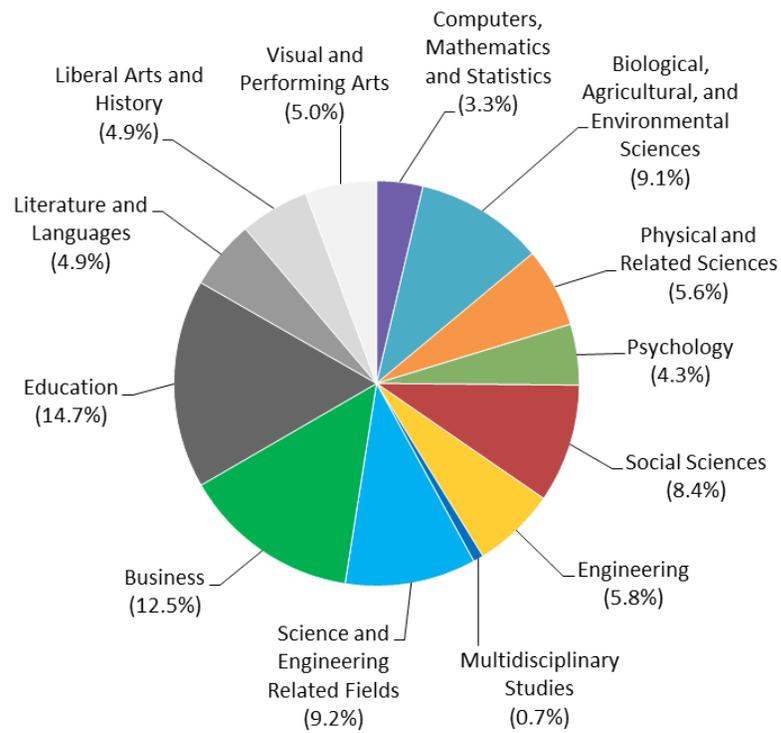

---

<sup>4</sup> Science and engineering related fields excludes the following education fields: Computers, Mathematics and Statistics, Biological, Agricultural, and Environmental

Sciences, Physical and Related Sciences, Psychology, Social Sciences, Engineering and Multidisciplinary Studies.

## A. Labor Market Trends — Wage levels of workers

### Trends in Average Weekly Wages for Coconino County Compared to Arizona

In Quarter 2 of 2023, the Arizona Commerce Authority reported a total employment average weekly wage in Coconino County of \$1,260. This was lower than the average weekly wage for Arizona (\$1,454).<sup>5</sup>

Data from 2010 to 2023 show that both the state and county average weekly wages have been steadily increasing. However, Coconino County's average weekly wage has consistently been below those of the state (see Figure A-21).

A-21. Quarterly average weekly wage levels, 2010 to 2023

Source: Arizona Commerce Authority, Industry Employment and Wages: Quarterly Census of Employment and Wages

<sup>5</sup> Note that comparable data for the Phoenix MSA was not available.

## A. Labor Market Trends — Wage levels of workers

---

### Weekly Wages by Employment Sector

In addition to overall average weekly wage levels, Keen Independent analyzed wages for individual industries.

The Arizona Commerce Authority provides average weekly wages for industries every quarter. Keen Independent analyzed the available data for Q2 2023.

**Highest weekly wages.** Out of 46 industries reported, the ones with the highest levels in average weekly wages were:

- Insurance carriers and related activities (\$1,970);
- Justice, public order and safety activities (\$1,877);
- Professional and technical services (\$1,690);
- Support activities for transportation (\$1,675); and
- Administration of human resource programs (\$1,483).

**Lowest weekly wages.** The industries with the lowest average weekly wages were:

- Food and beverage stores (\$617);
- Accommodation (\$613);
- Social assistance (\$605);
- Food services and drinking places (\$544); and
- Motion picture and sound recording industries (\$539)

These results for the lowest-wage industries are notable because of the large number of accommodation and food services and drinking places jobs in the county.

Figure A-22 shows the average weekly wages for the 46 industries.

## A. Labor Market Trends — Wage levels of workers

## A. Labor Market Trends — High and low earnings occupations and education

---

### High and Low Earning Occupations and the Typical Education Level of the Workforce

Keen Independent also analyzed the 30 highest and lowest annual earning occupations within Coconino County, using 2022 data from the Arizona Commerce Authority.<sup>6</sup> Additionally, data from the Bureau of Labor Statistics was utilized to identify the typical education level needed for entry level of the workforce for each of those occupations.<sup>7</sup> These results are shown in Figure A-23 and Figure A-24 in the following pages.

**Highest earning occupations.** Overall, the top 30 occupations had median annual earnings of \$78,862 or higher. In terms of education, a majority of the 30 highest earning occupations in Coconino County (approximately two out of three) had a typical education entry level of a bachelor's degree. Another one out of four had a typical education entry level of a master's degree or higher and only one out of ten had a typical education entry level of an associate degree or postsecondary non-degree award or lower.

Based on the 2022 earnings data, the seven highest earning occupations were:

- Biomedical engineers (\$165,541 and typical education level of a bachelor's degree);
- Pharmacists (\$153,480 and typical education level of a doctoral or professional degree);
- Physician Assistants (\$129,987 and typical education level of a master's degree);
- Industrial production managers (\$125,337 and typical education level of a bachelor's degree);
- Nurse practitioners (\$121,009 and a typical education level of a master's degree),
- Chief executives (\$119,437 and a typical education level of a bachelor's degree); and
- Natural sciences managers (\$104,416 and a typical education level of a bachelor's degree).

---

<sup>6</sup> Arizona Commerce Authority, 2022 Occupational Employment and Wages, accessed via: <https://www.azcommerce.com/o eo/labor-market/occupation-employment/>

<sup>7</sup> Employment Projections program, U.S. Bureau of Labor Statistics, accessed via: <https://www.bls.gov/emp/tables/education-and-training-by-occupation.htm>

## A. Labor Market Trends — High and low earnings occupations and education

---

**Lowest earning occupations.** The 30 lowest occupations (in terms of median annual earnings) were those that earned \$30,457 or below. The typical education level for these occupations was generally a high school diploma (or equivalent) or no formal educational credential. Only one out of ten occupations had a higher typical education level, with the highest among those being an associate degree.

The seven lowest earning occupations on the other hand were:

- Tire repairers and changers (\$29,293 and a typical education level of a high school diploma or equivalent);
- Fast food and counter workers (\$29,258 and a typical education level of no formal educational credential);
- Childcare workers (\$29,212 and a typical education level of a high school diploma or equivalent),
- Teaching assistants, except postsecondary (\$29,207 and typical education level of some college);
- Dietetic technicians (\$28,958 and typical education level of an associate degree);
- Recreation workers (\$28,848 and typical education level of a high school diploma or equivalent); and
- Amusement and recreation attendants (\$28,777 and a typical education level of no formal educational credential).

## A. Labor Market Trends — High and low earnings occupations and education

---

### High Growth, Moderate Wage Occupations that Do Not Require College Degree

Keen Independent identified 25 occupations in Coconino County for which the Arizona Commerce Authority projected the highest growth rates between 2022 and 2032 that we determined had typical education requirements below a bachelor's degree. Keen Independent then considered corresponding median earnings for each of these occupations. Results are shown in Figure A-25 on the following page.

Occupations with high growth projections, no college degree required and relatively high average wages tend to fall into four general groups:

- Light truck drivers (high growth rate, typical formal education of a high school diploma and median annual earnings of \$45,909);
- Healthcare occupations such as practical and vocational nurses, nursing assistants, psychiatric technicians and pharmacy technicians;
- Construction tradespersons such as electricians, telecommunications equipment installers, masons, HVAC mechanics and installers, and plumbers and pipefitters; and
- Sales representatives in fields like travel, services and insurance.

## A. Labor Market Trends — High and low earnings occupations and education

A-25. High growth occupations with educational requirements below a bachelor’s degree and median annual earnings, Coconino County, 2022 and 2032

Coconino County		2022 Employment	2032 Employment	Percentage change	Median annual earnings	Typical education level

## APPENDIX B. Workforce Development Programs

In this appendix, Keen Independent provides an overview of workforce development programs and services available to job seekers in the Flagstaff area.

### Introduction

Local schools, agencies and organizations operate a wide range of workforce development programs for Flagstaff residents seeking training, continuing education and other career services. Although the following discussion of programs is not exhaustive, it provides many examples of programs that residents of Flagstaff and Coconino County could access.

Appendix B examines workforce development programs in the Flagstaff and Coconino County areas, grouped into three categories:

- Education programs;
- Independent training programs;
- Apprenticeship programs;
- ARIZONA@WORK programs; and
- Resources from local nonprofits.

We note that ARIZONA@WORK is the statewide workforce development network and at the local level, consists of providers that offer workforce development services. These providers have contracts with the Coconino County Workforce Development Board, which serves as the steward of Workforce Innovation and Opportunity Act (WIOA) funding. Although we present education and independent training programs separately, many also fall into this local network and are supported by WIOA funding (we note which programs are and are not eligible for WIOA funding).

Source: Gary Dee via Wikimedia Commons.

## B. Workforce Development Programs — Education programs

---

Several opportunities for education and training in post-secondary settings exist in Flagstaff and Coconino County. Northern Arizona University and Coconino County Community College both offer several programs geared towards adult learners and job seekers.

### Northern Arizona University

Northern Arizona University (NAU) is a four-year public research university based in Flagstaff, Arizona. NAU supports two main workforce development programs: Career Steps and the Educational Opportunity Centers Program. Additionally, two of NAU's bachelor's degree programs are eligible for County WIOA funding.

**Career Steps.** Career Steps are online, self-paced modules that cover career related topics and are available to any NAU student. These modules are connected to Udemy, an online learning website that NAU students have access to for free. All modules that are passed with an 80 percent score or higher will result in a Certificate of Completion for that module. In the past year, over 3,000 students and alumni have engaged with the Career Steps program.<sup>1</sup> Examples of modules include:

- Exploring myths and realities of careers;
- Establishing your professional identity;
- Communicating in the workplace;
- Crafting your resume content;
- Accessing the job market; and
- Formulating interview success strategies.

**Educational Opportunity Centers Program.** The NAU Education Opportunity Centers is a federally funded TRIO program that provides counseling and support to low-income adult participants (age 19 or older) who want to enter or continue a high school equivalent, postsecondary education or a postsecondary credential program.<sup>2</sup> The main NAU Educational Opportunity Centers is located in Flagstaff and primarily serves residents of Coconino, Apache, Navajo, Mohave or Yavapai counties, although NAU statewide locations exist. Provided services include:

- Referrals to local GED preparation classes;
- Career assessment and exploration;
- Scholarship search and application assistance;
- Financial aid counseling; and
- Referrals to community resources.

**WIOA-eligible bachelor's degree programs.** Students working toward bachelor's degrees in NAU's Nursing and Computer Information Technology programs may be eligible to receive funding for their programs through WIOA. ARIZONA@WORK lists these programs on its website as approved for WIOA funding and interested students may verify their eligibility via this website.

<sup>2</sup> <https://in.nau.edu/educational-opportunity-centers/eligibility/>

## B. Workforce Development Programs — Education programs

---

### Coconino Community College

Coconino Community College (CCC) is a public community college located in Flagstaff, Arizona. CCC has three locations in Coconino County and serves, on average, 2,500 students per semester. Since its founding in 1991, CCC has served over 75,000 students county-wide.<sup>3</sup> Overall, CCC has 24 programs that are eligible for WIOA funding.

**Small Business Development Center.** The Coconino Small Business Development Center (SBDC) provides counseling, training and resources for small businesses throughout Coconino County at two CCC campus locations, one in Flagstaff and one in Page.<sup>4</sup> Anyone who operates a for profit business or is planning to start a business can register to receive free, confidential business advice from a team of experienced small business experts. Examples of topics the experts can assist with include:

- Business planning;
- Market feasibility and research;
- Start-up guidance;
- Cash flow analysis;
- Identification of potential capital sources;
- SBA Loan Assistance; and
- Diverse business certification.

This program is part of the larger Arizona SBDC Network, a statewide source of assistance for small businesses offered through ten Arizona community college districts, the U.S. Small Business Administration and the U.S. Department of Defense. The AZSBDC Network is fully accredited by the America's SBDC, a national system that connects 63 SBDC networks across the United States.<sup>5</sup>

**CCC2Work – Career and Technical Education Program.** The Coconino Community College's Career and Technical Education program (CCC2Work) provides eight career pathways, many of which are one- or two-year programs that result in an associate degree or a certificate upon program completion.<sup>6</sup> The eight pathways are:

- Business and Accounting;
- Computer and Information Technology;
- Early Childhood Education;
- Fire Science;
- GED Prep and ESL;
- Health Services;
- Public Safety; and
- Skilled Trades.

Two of these pathways (GED Prep and ESL and Skilled Trades) are connected to the next two programs.

<sup>6</sup> <https://www.coconino.edu/cc2work>

## B. Workforce Development Programs — Education programs

---

**Adult Basic Education for College and Careers Program.** CCC's Adult Basic Education for College and Careers Program offers free High School Equivalency test preparation and English as a Second Language (ESL) courses. These courses are offered in multiple modalities, such as in-person classes at four Adult Education sites across Coconino County, synchronous virtual classes and asynchronous self-paced online courses. Courses are open to Coconino County residents who are at least 16 years old and legally present in the United States.<sup>7</sup>

**Workforce Training.** CCC offers a variety of non-credit career courses, meaning the completion of these courses does not apply towards a degree program.<sup>8</sup> Many of these courses do, however, conclude with a certification if all requirements are met. Classes are offered online and in-person. Examples of workforce training opportunities include:

- Class A Commercial Driver's License training;
- Real estate pre-licensing and continuing education courses;
- Certificate for Apartment Maintenance Technician (CAMT) courses;
- Tour guide training; and
- Production assistant training.

---

<sup>7</sup> <https://www.coconino.edu/adult-education>

<sup>8</sup> <https://www.coconino.edu/workforce-training>

### Flagstaff Unified School District

Flagstaff Unified School District (FUSD) is a K-12 school district serving more than 9,000 students at 15 schools.<sup>9</sup> FUSD has a College and Career Development Department that ensures students are prepared for their postsecondary plans to enter college or the workforce.

**Career and Technical Education.** The Arizona Department of Education has a Career and Technical Education (CTE) department that provides students with support of their academic and professional careers. FUSD has several partnerships with local colleges and industry enterprises that enrich their CTE. Additionally, FUSD is served by the Coconino Association for Vocations, Industry and Technology (CAVIAT), an overlay district that provides funding for CTE to FUSD and other school districts.

**Dual enrollment.** Through partnerships with CCC and Yavapai College, FUSD offers dual enrollment courses where students can receive college credit while in high school. Offerings include courses in Career and Technical Education. According to FUSD's website, more than 60 percent of their students graduate with college credit due to dual enrollment.<sup>10</sup>

**Work-based learning.** FUSD has opportunities for students to gain real-world job experience through shadowing, tours of workplaces and even internships and apprenticeships.

<sup>9</sup> <https://www.fusd1.org/domain/3>

<sup>10</sup> <https://www.fusd1.org/Page/19729>

## B. Workforce Development Programs — Independent training programs

---

Here, we review a few examples of independent training programs offered by smaller schools and other individual organizations.

### Warrior-to-Inspector

Warrior-to-Inspector is a military transitioning Pipeline Integrity Non-Destructive Testing (NDT) trade school and apprenticeship program based in Flagstaff.<sup>11</sup> Veterans and civilians are eligible to apply to the 18-month education and training program. The program provides hands-on experience and combines formal classroom training, indoor simulation training and outdoor structured training. The program does not guarantee job placement upon graduation, but claims that historically, one hundred percent of graduates have found related employment upon graduation.

Pre-requisites for enrollment include competencies in mechanical and communication skills, a high school diploma or equivalent and the ability to meet physical requirements. The total estimated cost for the program is \$32,470 and is eligible for WIOA funding.

### Northland Hospice and Palliative Care

The Northland Hospice and Palliative Care agency in Flagstaff offers a Certified Caregiver Training program. The program is approved by the Arizona Board of Nursing Care Institution Administrators and Assisted Living Managers and successful completion of an approved program is required to earn a Certified Caregiver certificate in Arizona. This six-week program meets the educational requirements to earn the certification and prepares students to take the State Certification exam. Program costs are estimated to be \$1,132, which includes the cost of

the certification exam. Scholarships, grants and WIOA funding are available to reduce the cost of enrollment for eligible students.

### Sedona School of Massage

The Sedona School of Massage offers a five-month, 700-hour massage therapy program that prepares students to take the National Certification Exam and Massage and Bodywork Licensing Exam. The courses cover a range of topics from physiology and kinesiology to business practices. Applicants must have a high school diploma or equivalent. The estimated cost of the program is \$8,000 and no financial aid is currently offered, however, the school does offer no interest payment plans. The curriculum is certified by the Arizona State Board for Private Postsecondary Education and eligible for WIOA funding.

### Kuttz Beauty and Barber College

Kuttz Beauty and Barber College, located in Flagstaff, offers an instructional program that prepares students to earn a cosmetology or barber license in Arizona.<sup>12</sup> Students begin with classroom instruction and are then allowed to begin hands-on training while continuing their coursework. Once all training is completed, students have the classes and practice hours required to take the written and practical exams needed to obtain a cosmetology or barber license. Some classes are available online but practice hours must be completed in person.

The cost of the program is estimated to range from \$26,193 to \$29,826 which includes required supplies, fees and the cost of the licensing exam. Financial aid is available to eligible applicants. Nine of the programs offered at Kuttz are eligible for WIOA funding.

---

<sup>11</sup> <https://www.war2in.org/>

<sup>12</sup> <https://www.kuttzbarbershop.com/barber-college>

## B. Workforce Development Programs — Apprenticeship programs

---

Two industry-specific apprenticeship programs were found in the Flagstaff area and are discussed in this section.

### **Northern Arizona Electrical Contractors' Association (NAECA) Apprenticeship Program**

The NAECA is a trade association with a mission to further educational training, safety and community within the electrical industry in Northern Arizona. The accredited four-year apprenticeship program prepares apprentices for a career in electrical contracting. Classes associated with the apprenticeship program are taught in-person at Sinagua High School in Flagstaff. The cost of the program is \$895 and it is eligible for WIOA funding.

### **Boilermakers Western States Apprenticeship Program**

Apprentice boilermakers who receive training from the Boilermakers Western States Apprenticeship Program learn about all phases of the erection and repair industry, including reading blueprints, rigging on heavy loads, burning, welding and fabrication of metal parts. Apprentices receive a minimum of 144 hours of classroom training per year, for a total of 576 program hours. Total fees for the program are \$250. The program is not listed as eligible for WIOA funding on the ARIZONA@WORK website.

Those who wish to apply to the program must first complete and pass the required Boilermaker Apprentices online lessons (available online) and must submit a birth certificate and high school diploma or equivalent with their application. All completed applications are entered into a drawing of eligible candidates and randomly picked to participate. Applicants with previous experience or veterans registered with Helmets to Hardhats (a national nonprofit that connects transitioning active-duty military and veterans with training and employment opportunities in construction trades) can increase their chances of being selected by following the procedures to upgrade their status in the Pool of Eligibles. For example, Boilermakers Western States Apprenticeship Program has an agreement with Helmets to Hardhats that 25 percent of placements per drawing will be given to Helmet to Hardhat registered applicants.

## B. Workforce Development Programs — ARIZONA@WORK

---

ARIZONA@WORK Coconino County is the local workforce development network with two offices in Flagstaff. The Coconino County Workforce Development Board oversees ARIZONA@WORK services to ensure alignment with local needs and provides support through federal WIOA funding. ARIZONA@WORK services are available at no cost to job seekers and employers across Arizona.

### Career Centers

ARIZONA@WORK Career Centers are designed to provide a multitude of services in one location. There are two career centers in Flagstaff:

- Coconino County Health & Human Services office (2625 North King Street, 2nd Floor Flagstaff AZ 86004); and
- Comprehensive One-Stop at the Department of Economic Security (1701 North Fourth Street Flagstaff AZ 86004).

Examples of services provided include:

- A resource room with computers, printers and other technology needs for job seekers;
- Access to workforce specialists and advisors; and
- Frequent workshops, events and job fairs.

### Senior Community Service Employment Program

The Senior Community Service Employment Program (SCSEP) is a federally funded program, authorized by the Older Americans Act in 1965, that assists low-income, unemployed adults aged 55 and older with job training opportunities that help develop the skills and experience needed to find permanent employment. Enrollment priority is given to members of historically minoritized racial and ethnic groups, limited English speaking individuals and those with greatest economic and special employment needs.<sup>13</sup>

Participants in the program receive work-based job training for an average of 20 hours per week at local nonprofit and public facilities and are paid minimum wage (currently \$17.40 per hour in Flagstaff) through grant sponsored funding. While engaging in these opportunities, participants receive supervised training on developing or improving existing employment skills, accessing educational opportunities and job search skills. Participants also receive an assessment to determine their individual training, support services and employment needs.

The National Indian Council on Aging (NICOA) was awarded additional funding as a set-aside grantee for this program in 1989. NICOA operates in seven states, including Arizona. Individuals of any racial or ethnic background who are eligible to participate in the SCSEP can apply through NICOA.

---

<sup>13</sup> <https://des.az.gov/services/older-adults/senior-community-service-employment-program>

## B. Workforce Development Programs — ARIZONA@WORK

---

### Phoenix Indian Center

The Phoenix Indian Center has two locations, one in Phoenix and one in Flagstaff. The Flagstaff office is co-located with the Native Americans for Community Action organization, which provides community health resources. The Phoenix Indian Centers provide a range of services, including workforce development. These centers provide training opportunities, career coaching, career forecasting information and employment resources, as well as regularly hosting job fairs and hiring events.

Those interested in receiving services begin by filling out an application and meeting with a Workforce Specialist to determine program eligibility. There is no cost to apply or to participate in the program. Many of the hiring events and some virtual training opportunities are free and available to all.

### Reemployment Services and Eligibility Assessment

The Arizona Department of Economic Security Reemployment Services and Eligibility Assessment (RESEA) program assists those collecting Unemployment Insurance benefits with becoming reemployed. RESEA participants have one-on-one meetings with an assigned workforce specialist and receive assessments, reviews of work search activities and an individualized employment plan.

Participation in this program is mandatory for all selected Unemployment Insurance participants and refusal to participate if selected can result in the suspension of Unemployment Insurance.

### Trade Adjustment Assistance

Another federal program administered by the Arizona Department of Economic Security through ARIZONA@WORK is the Trade Adjustment Assistance (TAA) program. TAA offers training and employment opportunities to those who have lost work due to outsourcing or foreign trade. Services provided to TAA-certified workers may include:

- Access to reemployment services;
- Occupational or on-the-job training;
- Continuing education;
- Income support;
- Wage subsidy for workers 50 years old or older;
- Job search allowance;
- Relocation allowance; and
- Health Coverage Tax Credit.

To participate in TAA, a petition must be filed with the U.S. Department of Labor and the Arizona Trade Coordinator by or on behalf of a group of workers who have lost their jobs as a result of foreign trade.<sup>14</sup> TAA Counselors are available to provide assistance, if needed.

---

<sup>14</sup> <https://des.az.gov/services/employment/job-seekers/trade-adjustment-assistance>

## B. Workforce Development Programs — ARIZONA@WORK

---

### Vocational Rehabilitation Services

The Vocational Rehabilitation program assists persons with disabilities as they prepare for, enter into or retain employment. The program provides a variety of services, such as:

- Vocational evaluation;
- Job training;
- Job search assistance;
- Job placement;
- Transportation;
- Job site modification; and
- Self-employment and entrepreneurial activities.

Applications can be submitted online or at a Vocational Rehabilitation office. To be eligible for this program, individuals must:

- Have a physical or mental impairment that results in a substantial impediment to employment;
- Require services to prepare for, secure, retain or regain employment; and
- Be able to benefit from the services by achieving employment.

### Disabled Veterans Outreach Program

The Disabled Veterans Outreach Program (DVOP) provides specialized, intensive services to disabled veterans, non-disabled veterans and eligible spouses of veterans with priority given to those who have significant barriers to employment such as homelessness, recent incarceration or not having a high school diploma or equivalent certificate. A federal program that is locally operated by the Arizona Department of Economic Security, DVOP services include:

- Assessments;
- Employment plans;
- Career guidance;
- Referral to supportive services; and
- Connections to job openings.

## B. Workforce Development Programs — Resources from local nonprofits

---

Flagstaff is served by many nonprofit organizations that provide workforce support that falls outside of WIOA. Here, we list a few examples of such organizations and provide brief descriptions of their activities and programs that support the local workforce.

We note that, as with other programs listed in this appendix, this list is not exhaustive of nonprofit organizations that provide workforce development, as many organizations offer some sort of career support to their constituents. Rather, it is intended to provide examples for the City as it considers how to aid existing workforce development efforts occurring in the community.

### Economic Collaborative of Northern Arizona (ECoNA)

ECoNA envisions Northern Arizona “as a premier business destination” and “top performing economy” in which businesses grow sustainably.<sup>15</sup> In addition to developing strategy around business attraction and producing reports on the state of the economy in Northern Arizona, ECoNA platforms the workforce development efforts of local agencies and schools. Additionally, ECoNA has partnerships with providers of workforce development programs and services.

### Greater Flagstaff Chamber of Commerce

The Greater Flagstaff Chamber of Commerce was founded in 1891 and continues to champion local businesses and their contributions to the economy.<sup>16</sup> The Chamber’s Education and Workforce Division offers a Skills for Workplace Success program that brings mentors from industry jobs to classrooms to discuss career pathways with students.<sup>17</sup>

---

<sup>15</sup> <https://econa-az.com/about-econa/our-services/>

<sup>16</sup> <https://downtownflagstaff.org/go/greater-flagstaff-chamber-of-commerce>

<sup>17</sup> <https://www.flagstaffchamber.com/skills-for-workplace-success/>

Additionally, the Chamber convenes leaders in the business community and regularly solicits their feedback on the most pressing economic issues facing Flagstaff.

### Local First Arizona

Although Local First Arizona is a state-wide nonprofit organization, its mission is to elevate and develop local businesses in Arizona cities like Flagstaff.<sup>18</sup> Local First Arizona provides a search tool for website users to identify local businesses and has several programs and events dedicated to helping small businesses thrive in their local economies. Additionally, Local First Arizona offers services to job seekers looking for local employment opportunities.

**Northern Arizona Good Jobs Network.** A four-year initiative led by Local First Arizona, the Northern Arizona Good Jobs Network is a government-funded effort to support the placement of local talent into local jobs.<sup>19</sup> The initiative brings together local partners from government, industry and nonprofit across sectors to develop training and other resources to upskill local workers.

### Moonshot

Focused on entrepreneurialism, Moonshot strives to develop local talent into local business owners.<sup>20</sup> Moonship provides several opportunities, including pitch contests, direct mentoring and skill-building courses designed to support local entrepreneurs as they develop their businesses.

<sup>18</sup> <https://localfirstaz.com/about>

<sup>19</sup> <https://localfirstaz.com/workforce-development>

<sup>20</sup> <https://www.moonshotaz.com/about.html>

## APPENDIX C. Stakeholder Input

---

This appendix summarizes input from Flagstaff area stakeholders regarding the local labor market and workforce development.

### Methodology

Keen Independent conducted interviews and focus groups with Flagstaff stakeholder, which included:

- Local business owners and company representatives;
- City staff;
- Coconino County Workforce Development Board members;
- City of Flagstaff elected officials;
- Higher education administrators (university and community college); and
- K-12 administrators.

**In-depth interviews.** Some of the input discussed in this appendix comes from interviews with 11 individuals. We identified and contacted interviewees based on a list that was provided by the City of Flagstaff. The study team also asked all interviewees if there were others to whom we should speak as part of this assessment and identified other interview candidates from those responses.

All interviews were conducted via Zoom. We used a semi-structured approach in the interviews, providing a framework for discussion and allowing participants to steer the conversation into areas they found relevant or of interest.

**Focus groups.** Keen Independent hosted three virtual focus groups of 10 total individuals knowledgeable about the Flagstaff workforce and workforce development. Like the interviews, these sessions followed a semi-structured format.

### Topics

The interviews and focus groups included the following pre-determined topics as well as general themes that emerged during the discussions with stakeholders:

- Descriptions of the Flagstaff workforce;
- Challenges for employers and employees;
- Existing and desired workforce development services and programs; and
- Ways the City can support the local workforce.

## C. Stakeholder Input — Descriptions of the Flagstaff workforce

---

As an introductory exercise, Keen Independent prompted many stakeholders to provide descriptions of the Flagstaff workforce.

### Education

When describing the workforce, many stakeholders centered education as a key feature in Flagstaff due to the presence of high-quality educational institutions like Northern Arizona University (NAU) and Coconino Community College (CCC).

**Culture of four-year college degrees.** A few stakeholders described Flagstaff as a community that prioritizes four-year and advanced college degrees to the detriment of certifications or trade skills.

**Disconnect between educational institutions and employers.** A few stakeholders described how the educational institutions are not able to meet the immediate needs of employers in Flagstaff.

*We've got a lot going on here in terms of research and scientific discovery. I think we have a strong arts and culture ... that I see as complementing the scientific discovery section of our community.*

*City elected official*

---

*We're a small town ... with a great university, a great community college. And so, I would say we have a very highly skilled workforce, very educated workforce. But I think we're kind of missing that like middle ground.*

*Higher education professional*

---

*Not everybody has to go to a four-year college. You can get certificates in different areas that are highly needed.*

*City elected official*

---

*The disconnect in Northern Arizona is that you have a handful of major employers who [have] workforce needs, right? And you have these great educational institutions ... the educators are going to say, "We can do this for you, give us 12 to 18 months." And then the employers are going to say, "No way are we waiting 12 to 18 months. We need this now."*

*Workforce professional*

## C. Stakeholder Input — Descriptions of the Flagstaff workforce

---

### Employment

Stakeholders also described their impressions of employment in Flagstaff and previewed a few topics that would later be discussed as barriers for employers and job seekers.

**Worker shortages.** Several stakeholders described the workforce as missing crucial segments, including:

- Workers with specialized skill sets requiring an advanced college degree;
- Workers with specialized skill sets that do not require a college degree; and
- Workers with skill sets in between the highly skilled workers and minimum wage job workers.

**Skill gaps.** Additionally, a few stakeholders mentioned that workers, particularly those concentrated in minimum wage jobs, were lacking in soft skills that could help them obtain and retain employment.

**Limited availability of well-paying jobs.** Many stakeholders mentioned that minimum wage jobs are readily available due to the size of the hospitality industry in Flagstaff, but relatively few job opportunities offer a sustainable wage. A few commented that job training in Flagstaff and Coconino County as a whole is not helping many people obtain careers that offer economic self-sufficiency because there are not many such job options available.

*We're doing well when it comes to the nurses and EMTs and some of these more specific or, needing like a bachelor's degree or above.*

*Higher education professional*

*Within the City, of course, we have a need for more of the trade skills.*

*City employee*

---

*I think more than anything, the skills that are lacking are in the soft skills, in the people skills ... how do I fill out a resume? How do I work a computer? How do I log onto a Zoom call? What does public transportation look like? What does childcare look like?*

*Higher education professional*

---

*I'm concerned about the growth of the hospitality industry, and I wouldn't be in and of itself, but when compared to all the others, it really concerns me because I think we have so much potential. It's frustrating to see so little growth in some of those areas that could be really creating a lot of great jobs for people.*

*City elected official*

*There's plenty of jobs here. ... There's not a lot of careers here. You have very large pockets of high turnover .... It's hard to invest in because it doesn't lead to any kind of self-sufficiency.*

*Workforce professional*

*I think the training that's available, it's to meet minimal need ... because there's just not many opportunities for careers with sustainability.*

*Workforce professional*

## C. Stakeholder Input — Challenges for employers and employees

---

Stakeholders spoke about several challenges that employers, employees and job seekers in Flagstaff face. Many of these challenges are outside the scope of Keen Independent’s study with the City but are important to note.

### Overall Challenges

Many of the workforce challenges stakeholders discussed affect both employers and employees.

**Cost of living.** In every conversation we had, the study team heard about the cost of living as a major challenge (potentially the largest challenge) for both employers and employees in Flagstaff. Stakeholders cited rent, mortgages, and costs of goods and services as having increased substantially in recent years, outpacing what workers earn.

Stakeholders familiar with educational institutions commented that schools’ high graduation rates do not necessarily translate to more workers, since many are priced out by cost of living. A few mentioned large incidents of students moving away from Flagstaff after graduation.

*I know there's a lot of folks who will say, well, you know, the cost of living has increased everywhere. And I think, while that might be true, the problem is very, very acute here in Flagstaff.*

*Higher education professional*

*You know, [people] can make a solid 6 figures here in Flagstaff and struggle or they can go somewhere else where the cost of living is significantly less and make about the same.*

*Higher education professional*

*We get so many people that are really excited about the opportunity work for, work in Flagstaff, they just can't make the numbers work with [the high cost of living].*

*City employee*

*We have a robust sign-on and bonus and relocation program and those initiatives help us bring people in from other states, but shortly after ... they have to rely on the wages that they make no matter what market adjustments we make. We continue to struggle ... with folks who just leave with less than a year of service with us and they just tell us, “I just can't continue living here. I really like it. I love the job. I love the organization. I just can't make it.”*

*Healthcare professional*

*We [NAU] can produce graduates all day long ... [it's] just to come to a point where you know, people can't afford to be here, right?*

*Higher education professional*

*The cheapest house in Flagstaff is like \$1.8 million. A studio apartment is \$2,000. And God forbid you have a kid and you gotta pay childcare. Soon as you [graduate], you leave.*

*Workforce professional*

## C. Stakeholder Input — Challenges for employers and employees

---

**Lack of housing.** Relatedly, many stakeholders pointed to the lack of any available housing, affordable or not, in Flagstaff. With limited new construction, incoming workers experience difficulties finding places to live, making it difficult for employers to retain their new hires. A few stakeholders mentioned the influx of second homeowners as a factor contributing to the housing shortage.

**Affordable childcare.** A few stakeholders specifically mentioned affordable childcare as a barrier to employment. One stakeholder moved to Flagstaff from another community that had universal pre-K and was surprised that Flagstaff did not.

**Awareness.** There were many workforce development resources mentioned throughout our conversations with stakeholders. One stakeholder suggested that a potential barrier to self-sustaining employment is the lack of broader awareness of those resources and how to utilize them.

*I would say a big [challenge] is the housing and being able to attract and retain qualified candidates, qualified talent.*

*City employee*

*I'm paying my guys \$40, \$45 an hour and I advertise that, you know, to look for other mechanics nationwide and I can't get anybody to move here because our rent prices are so high because our housing is so low. And you know, that was that's been a common trend here for a long time.*

*Small business owner*

*If I'm not losing people to the restaurant industry I'm losing them to Flagstaff housing.*

*Workforce professional*

*We need all levels of housing and we need to update infrastructure.*

*Workforce professional*

*Tomorrow, I-17 is gonna be a zoo because [Phoenix residents are] all coming up here to go skiing and, by the way, they're all staying in AirBnbs that are all second homes.*

*Higher education professional*

---

*Another factor I think that contributes to young families leaving is access to quality and affordable childcare and preschool.*

*K-12 professional*

---

*I just believe that a lot of people just don't know about all the resources that are available to them.*

*Workforce professional*

## C. Stakeholder Input — Challenges for employers and employees

---

### Challenges for Employers

Stakeholders discussed several challenges that employers in particular face in Flagstaff.

**Minimum wage.** One extremely commonly cited challenge for employers was the minimum wage ordinance. We were told that many businesses have had to close or scale back their operations to afford to pay their workers more.

Entities that are not subject to the minimum wage ordinance are also suffering because they are often unable to compete with service jobs that offer more flexibility and better pay. Participants have observed or heard of workers who elect to take a service job over a government job or a job at an educational institution for this reason.

**Restrictions and fees.** A few stakeholders commented that Flagstaff has many regulations in place that make it difficult for new businesses or industries to establish themselves.

*And I don't see [shortage of skills among] our workforce as being the problem. The problem is minimum wage ... employers are downsizing. They're cutting back, they're trying to do more with less.*

*Workforce professional*

*... with the high minimum wage here in Flagstaff, we compete with people who are saying, like, "Why would I work 12-hour shifts in a hospital taking care of, you know, ill patients when I could go work at Target for the same amount of money?"*

*Healthcare professional*

*There's a number of reasons [employers are] not tapping into any of these training dollars and numbers for trainees are just not there. What I'm seeing from the employer side is they don't have its time or resources to ... access these dollars. Employers are scrambling because they're trying to figure out this last 60-cent increase [in the minimum wage] which started a month ago.*

*Workforce professional*

---

*We have really high fees. We just passed a stormwater rate increase that's gonna start being impactful in another year or so ... there's a lot of negatives when an industry is looking to come to Flagstaff.*

*City elected official*

*[The City should look into the] permitting process ... I've heard nightmare story after nightmare story about businesses ... they see all of the hurdles placed in front of them and they're like, "You know what? Check. I'm out of here. I can go to Winslow and not only pay way less money, but they'll give me darn near everything I want."*

*Higher education professional*

## C. Stakeholder Input — Challenges for employers and employees

---

**Training and certifications.** When discussing candidate qualifications, some stakeholders mentioned that employers would like to see more workers coming in with job-relevant certifications. Relatedly, a few discussed difficulties with on-the-job training. While larger employers have more resources to get employees up to speed, representatives from smaller businesses cited challenges affording high-quality training required for many new hires.

**Shortage of available workers.** Stakeholders indicated that many industries in Flagstaff are facing worker shortages due to the factors outlined earlier in this section. A few specific industries that participants mentioned as experiencing acute shortages included healthcare (specifically nursing), manufacturing and transportation.

*Some of our more niche positions like our project manager positions, our engineering positions are difficult to fill right now. You know, just those positions that really require a specific skill set or specific certifications.*

*City employee*

*It would be ideal for people to come in with some of these certifications already.*

*City employee*

*I can't afford to teach them [new hires].*

*Small business owner*

*Essentially, we train people to then go somewhere else and find a lower cost of living.*

*City elected official*

---

*[We recognize that] nurses, specifically, [are] not just a regional need, but a statewide need.*

*Higher education professional*

*I mean, we have people that are knocking down our door saying we need maintenance [technicians].*

*Higher education professional*

*There is a lot of, internal competition between different agencies ... take CDL drivers, for example ... there's just not enough.*

*Higher education professional*

## C. Stakeholder Input — Challenges for employers and employees

---

**Workers leaving.** Stakeholders discussed another factor contributing to workers shortages: many in the existing workforce are leaving Flagstaff for the reasons outlined earlier in this section. This exodus of workers and families has meant a decline in new births in Flagstaff and fewer students in the K-12 school system. Higher education is affected by teachers leaving the profession, as many can earn more in the private sector in their respective fields than they can teaching.

**Land availability.** A few stakeholders commented that businesses are constrained by Flagstaff’s lack of land for development. Due to local ordinances, there is not much land available to be developed, so existing resources must be used efficiently.

*Where is that pipeline of skilled labor that we invest millions of dollars in every year to meet the needs of our vacancies? Where are they going? They're leaving. So even with the best efforts of training in individuals, we'll never meet their needs and the needs that are here.*

*Workforce professional*

*The birth rate is continuing to decrease and so, [K-12] enrollment in the last 4 years has declined 6 percent ... public schools are paid per pupil from the state, so it impacts our overall budget as well.*

*K-12 professional*

*Our teachers are usually in a position where they have been or at least could be making a lot more money [in the industry] than they're making teaching.*

*Higher education professional*

---

*Here, we're also constrained by land availability .... We need to be utilizing our scarce available land resources as efficiently as possible.*

*City elected official*

## C. Stakeholder Input — Existing workforce development programs and services

---

Keen Independent asked stakeholders to identify existing workforce development programs and services. Many stakeholders highlighted opportunities for improvement of workforce development programs, services and coordination.

### Existing Programs

Stakeholders described several different types of workforce development programs, services and initiatives offered in the community. Note that the goal of this discussion was to provide examples of workforce development programs and services that work well, not to compile a comprehensive inventory of programs and services.

**Educational institution partnerships.** The major educational institutions in Flagstaff serving both K-12 and post-secondary students have formalized partnerships that have created workforce pipelines. Stakeholders discussed the benefits of those partnerships, and many expressed wanting even more joint programming between institutions.

**County partnerships.** A few stakeholders indicated that their institutions partner with Coconino County and receive WIOA funding for some students in workforce development programs.

*[NAU] has a partnership with all of the community colleges around the state ... when somebody applies to NAU, rather than receiving the rejection letter as they used to if they weren't immediately meeting all the requirements, they can enroll directly with [a community college]. As soon as they complete their requirements, they transfer seamlessly into NAU.*

*Higher education professional*

*Compared to much of the state and especially a lot of rural communities, we felt we're in a better position. And we attribute a lot of that to the partnership we have with NAU that provides that pipeline of educators for us ... [we are] able to offer them a contract, you know, even before they're graduating.*

*K-12 professional*

*[CCC has] a really good presence in the high schools too with dual enrollment courses.*

*Higher education professional*

*[NAU] did launch a partnership with Mountain Line and Coconino Community College, so we have our own CDL course that'll come online pretty soon here.*

*Higher education professional*

---

*[For] several of our programs ... students can receive WIOA funding and career services through Coconino County. We also partner with the County Workforce Development Board.*

*Higher education professional*

## C. Stakeholder Input — Existing workforce development programs and services

---

**Certificate programs.** Stakeholders also discussed traditional certification programs. A few of these programs were identified as highly successful, like the CDL certification program at CCC.

Shorter time to program completion and comparable wages were highlighted among stakeholders as benefits of certificate programs compared to four-year degree programs.

*We have a commercial driver's license program. It is 4 weeks full time. You come in, you leave with your class A CDL. We had 150 people go through the program last year and we have about a 98 percent job placement rate. And good paying jobs, \$50,000 to \$60,000 starting [pay].*

*Higher education professional*

*You don't have to go for 2 years to get a good paying job. This maintenance technician program ... we have two different versions. One's a 7 week in-person, 25 hours per week and then we also have an 11-week hybrid program ... and you get your OSHA 1 card. You get your opportunity to take your EPA 608 which is for refrigerants, like HVAC, and then you have the opportunity to take the National Apartment Association's certificate for apartment maintenance technician.*

*Higher education professional*

*[For] big certifications that are required for a position that candidates may not have, the City will, you know, do our best to help them obtain those certifications by paying for them and helping them through the process.*

*City employee*

## C. Stakeholder Input — Existing workforce development programs and services

---

**Expanded programming to meet acute needs.** A few stakeholders commented that their institutions are responding to labor market needs by expanding their workforce programming and services. Healthcare and manufacturing were two industries that stakeholders mentioned as having acute workforce needs in Flagstaff.

Challenges to creating these programs include crafting curriculum that covers an extensive topic in a short period of time.

**Soft skills training.** Several stakeholders mentioned their institutions partnering with businesses and other state and local resources to offer soft skills training. These types of programs include guidance on using computers, resolving conflicts and communicating in the workplace.

*[NAU] recently launched an initiative to create a college of nursing rather than just a school of nursing ... [with the] understanding that the need for health care workforce is ... not going away anytime soon.*

*Higher education professional*

*[Coconino Community College is] in the process of developing a manufacturing program that is gonna go through ... the basic understanding and skills when it comes to manufacturing. That is such a broad, broad, topic that it's hard to go into robotics and machining and PLCs and all these really specific things.*

*Higher education professional*

---

*We have had specific businesses that have reached out to us to provide customized training opportunities, not necessarily for any type of certificate, but it might be like an HR department that's really small or once an outside entity to train their employees. So, for example, we've been working with Little America Hotel on conflict resolution, team building, team strengths, communication skills ....*

*Higher education professional*

*[CCC works] with a lot of partners like Coconino County Career Services, DES [Arizona Department of Economic Security], ARIZONA@WORK, The Phoenix. We work with a lot of different entities that provide career services support ... for instance, if somebody comes to us that wants to participate in a program, but ... they have no clue how to use a computer, I'm gonna send them over to Goodwill because Goodwill, I know, does computer literacy courses. We don't offer all of those services, but it's knowing who does and then what capacity.*

*Higher education professional*

## C. Stakeholder Input — Existing workforce development programs and services

---

**Internships and apprenticeships.** Although several stakeholders lamented that internships and apprenticeships were not widely offered, some organizations provide one or both and many are looking to expand those programs. Having an educational partner like NAU, CCC or Flagstaff Unified School District can help organizations offering internships and apprenticeships ensure that they have a steady pipeline of participants.

**Upskilling.** A few stakeholders spoke about training up existing workers to fill vacancies within their organizations. One of the major benefits of this approach, as explained by one stakeholder, is that the worker is already in Flagstaff and presumably would not have to face many of the barriers to considering relocation.

*The fire department has a formal program with CCC and NAU both, I believe. ... Basically, they invite students to come shadow at the fire department and participate in some of their physical activity training and all that to see what it's like to be a firefighter and [learn] how they can become a firefighter.*

*City employee*

*I believe Water Services ... has a presence, you know, at the colleges and then the city has an agreement with NAU, regarding internships where all City of Flagstaff internships must be posted on the NAU Handshake website, which is where students can view available internships.*

*City employee*

*Another area that I think is really valuable that we're working toward is apprenticeships, creating paid apprenticeships or working more with employers on that on-the-job training.*

*Higher education professional*

*Last year, we offered our first internships for high school students.*

*K-12 education representative*

---

*There's been a large uptick in incumbent worker training for us where employers are just upskilling and reskilling ... those individuals are already here, they're working in the company and we're now helping employers to get additional skills where they're having a hard time finding those skilled laborers in the meantime.*

*Workforce professional*

## C. Stakeholder Input — Existing workforce development programs and services

---

### Opportunities for Programs and Services

In their discussions of existing workforce development programs and services, stakeholders highlighted areas where there is room for improvement in efficiency and impact.

**Coordinated services.** One of the most cited opportunities for workforce development programs and services by stakeholders was coordination. Although some stakeholders indicated they have partnerships with other organizations that offer these services and can refer job seekers, many indicated that organizations often do parallel work but do not talk to or coordinate with each other.

**Leveraging the community college.** Many stakeholders mentioned CCC expanding its role to include more vocational training and certificate programs. Additionally, a few stakeholders expressed that having more dual enrollment classes between the high schools and CCC would help build the pipeline of qualified workers in Flagstaff.

*Sometimes, [there is] just a disconnect ... like, DES, ARIZONA@WORK, they often will get people in looking for certain services and maybe not think to send them our way .... And I think that there's also disconnect from our end too of having students that ... need some of those wrap around services that entities like the County [or City] or ARIZONA@WORK offer.*

*Higher education professional*

---

*I think there's an opportunity for us to get the short-term trainings into the community college that will meet the needs of healthcare in all of those sectors.*

*Workforce professional*

*I venture to say we [should] do less training and do more work-based learning because there's so much of a need ... so many different varieties of things we just have to meet the needs of right now with the short-term certificate training. And then we just kind of build up our pathways, right?*

*Workforce professional*

*The community college used to think that they were ... a steppingstone to going to [university]. And I think that they can do that still, but I think that they also don't think that they're considered a technical school ... [if they] became both [that would help the workforce] .... I think that we are missing a lot with technical, vocational skills here.*

*City employee*

*We need more community college programs in the healthcare area to be able to offer dual enrollment classes to our students.*

*K-12 education representative*

## C. Stakeholder Input — Ways the City can support workforce development

---

Stakeholders offered ideas about how the City can better support workforce development. We note that while some suggestions are relatively straightforward for the City to implement, others might be difficult for the City to undertake or do not fall under the City's jurisdiction.

### Direct Support

Some suggested actions for the City would indirectly support the workforce. There are discussed beginning on page 17.

In the next three pages, we considered stakeholders' suggestions for direct support by the City, including facilitating actions or conversations that relate to workforce and economic development.

**Leadership in the region.** When envisioning how the City can best support workforce development efforts, most stakeholders indicated that the City could take more of a leadership role in the region by shaping conversations around workforce and bringing together representatives from local organizations.

A few stakeholders commented that the City could also make more of an effort to engage the business community when developing workforce strategy. They said that business owners often felt left out of prior efforts.

*Maybe the City needs to ... adopt a leadership role within Northern Arizona.*

*Healthcare employer representative*

*I would say to [the City], they need to find some definitive direction, they need to set the mission and vision.*

*Higher education professional*

*The City and the County could also be presenting that cohesive [narrative and consider] how we might be able to partner [with other entities].*

*City elected official*

*[The City could encourage some] of the larger employers in the City of Flagstaff to join the [County] workforce development board ... so we can make sure we always have funding to meet their needs.*

*Workforce professional*

*We need to come together more and discuss the impacts of decisions that are made over here ... [and then] unintended consequences of attracting a business if we're over here increasing fees or making the process slow for developers.*

*City elected official*

*The business community doesn't feel as well represented [in the dialogue around workforce] as the [general] community does.*

*Healthcare employer representative*

## C. Stakeholder Input — Ways the City can support workforce development

---

**Coordination and partnerships.** Coordination of services was another commonly mentioned role the City might play in assisting with workforce development. Even though this role generally falls within the scope of a workforce development board, the City may have opportunities to encourage new programs and partnerships and to foster greater dialogue among key stakeholders.

The concept of more or stronger partnerships was also mentioned. These comments included strengthening existing partnerships (e.g., between the City and the local colleges) and forging new partnerships.

*There needs to be coordination. You know, I think the best the City can do is communicate.*

*Workforce professional*

*[The City does] have some partnerships [with NAU and CCC] in place but, additional [partnerships] would be great or more attention to that would be great.*

*City employee*

*With [the City's] influence, the community college will [add more vocational training programs].*

*Small business owner*

*Maybe [the City] could look at forming partnerships not only [within] this county but other counties and ... broadening their scope ...*

*Healthcare employer representative*

*At times, we maybe forget others that are doing the exact same work and so we're all moving parallel. But we're only getting so far and so if we were able to align all of our resources ... I think we could capitalize more on the resources we have that are somewhat limited in our community.*

*Vocational education representative*

*You know, we have really great organizations that exist in the city that our students aren't even aware of... we would love to see that communication of information where the City is helping us create awareness.*

*Higher education professional*

## C. Stakeholder Input — Ways the City can support workforce development

---

**Economic development strategy.** Several stakeholders expressed their perception that the City is overly focused on hospitality and tourism. They might be unaware of broader efforts at the City.

We note that the City is working on a new economic development strategy at the time of the writing of this report.

**Offering internships and apprenticeships.** A few stakeholders indicated that the City has previously offered internships or apprenticeships, but that these programs are not well-established. Stakeholders wanted to see the City actively building a pipeline for its own jobs by working with schools to set up enduring internship and apprenticeship programs.

*Another thing that the City could do and should do is look at diversifying where their attention is paid in terms of economic development. I think the Economic Development team from the City's side is very much focused on that hospitality industry, but I think if they look at, attracting some of these ... high wage industries, you know, advanced manufacturing, for example, I think we'd be doing a lot better.*

*Higher education professional*

*I would like to see us [continue to] be smart about investments in economic development. Growth has been what we've been talking about, but it really means the type of growth that we want.*

*City elected official*

*I think our best bet in the future is to look at what we have available [in terms of infrastructure] and try to get those things filled.*

*City employee*

---

*The City did sponsor a couple of our students in conjunction with the National Workforce Alliance. I'd like to see internships and apprenticeships through the City be offered.*

*K-12 education representative*

## C. Stakeholder Input — Ways the City can support workforce development

---

### Indirect Support

Many stakeholders mentioned actions the City could take that would indirectly support the local workforce. Even though these suggestions were not focused on workforce training, they may be necessary conditions for building a stronger, sustainable workforce and local economy.

**Housing.** Although housing is not part of what Keen Independent focused on in this assessment, it was top of mind for many stakeholders when discussing workforce challenges. Several commented that the City could best support the workforce through making it easier for more housing to be built in Flagstaff.

Stakeholders with knowledge of the City’s current plans and initiatives indicated that Flagstaff is already taking actions to address the housing crisis, but that there are limits on how much the City can do.

**Minimum wage and voter education.** Stakeholders acknowledged that the minimum wage ordinance was a voter initiative and thus can only be reversed by another voter initiative. Although the City cannot directly change the minimum wage, some stakeholders suggested that the City could engage in more education to inform voters about the effects of these types of initiatives.

*There is nothing that can solve the housing issue like more housing.*

*Higher education professional*

*[The City] could rethink the minimum wage decision. It's creating this wage compression and I think that was maybe another unintended consequence ... what it did to the to the \$20 to \$25 an hour employee that a lot of us rely on.*

*Healthcare employer representative*

*[The City is] working with many nonprofit partners on getting some affordable housing .... We are invested in housing, but there's only so much that the City can do.*

*City elected official*

*We really have to get a big grasp on the housing problem...and I think we need to work with our County on that at a greater level too.*

*City employee*

*In San Diego, there was a cap ... on how much you could raise rent per year. Here, you know, and I'm not a big fan of, "Hey, let's get government [involved]," ... but same time, when I have staff telling me their rent just got doubled, literally doubled .... I don't have a way to [help with] that.*

*Higher education professional*

---

*One of the things City leadership could do, and this is both elected and employed City leadership, is do better job of educating the voting public, not just [on minimum wage], but on other initiatives and also provide some much-needed leadership in explaining and taking positions and saying why this will be good or not good for certain things.*

*Healthcare employer representative*

## C. Stakeholder Input — Ways the City can support workforce development

---

**Transportation.** One stakeholder mentioned transportation as a barrier for workers with non-traditional jobs. This stakeholder indicated that the City might indirectly help many workers, particularly those in minimum wage jobs, if it worked to extend public transportation hours.

*The City could definitely help ... by extending the bus line [hours]. We clean the bank buildings at 10 o'clock at night ... the bus line is done at 9 p.m.*

*Small business owner*

## APPENDIX D. Case Studies

---

This appendix provides an overview of the workforce development resources in three communities identified to serve as case studies for the City of Flagstaff.

### Background

Keen Independent identified potential communities for further research into workforce development strategies that may be instructive to the City of Flagstaff. To be considered, a community needed to meet all or most of the following criteria:

- Has a metro area population size of approximately 50,000 to 300,000;
- Is a high-amenity mountain area community;
- Is located at least 100 miles away from a large metro area (over 1 million in population size);
- Has a university and/or college; and
- Has a strong tourism economy.

**Selections.** With input from the City of Flagstaff, Keen Independent chose the following communities:

- Asheville, North Carolina;
- Bend, Oregon; and
- Missoula, Montana.

### Organization of the Appendix

Major sections of this report appendix are organized by each community identified for case study. For each community, we provide descriptions of the following:

- Community profile, including population size, geography, key industries, cost of living and income;
- Workforce development programs and services offered directly by each City; and
- Workforce development programs operated by partners that work with each City.

Our research was supplemented by brief informational interviews with individuals from these communities who have knowledge of workforce development programs and services.

We note that this appendix is not meant to provide an exhaustive list of workforce development programs and services in each of these communities but rather to provide insight into how other communities with some similar characteristics approach workforce development.

## D. Case Studies — Asheville, NC

First, we describe Asheville, North Carolina, a city that is larger than Flagstaff but has some similar features.

### Community Profile

Located among mountains and rivers, Asheville is a growing city in western North Carolina with a thriving downtown.

- Metro area population: 476,072.<sup>1</sup>
- Geography: Situated near Blue Ridge Mountains.
- Closest metro area with a population of 1 million or more: Charlotte, NC (130 miles).
- Major university/college: University of North Carolina at Asheville, Asheville-Buncombe Technical Community College (A-B Tech).
- Revenue from tourism: \$2.6 billion (2022).<sup>2</sup>

---

**Key industries.** Key industries include trade, education and health services, leisure and hospitality, retail, government, manufacturing and trade, transport and utilities.<sup>3</sup>

**Cost of living and income.** The composite cost of living in Asheville is slightly lower than the U.S. average.<sup>4</sup> However, about 40 percent of Western North Carolina residents are spending half or more of their income on housing.<sup>5</sup> Median income in Asheville is just under \$64,000, which is comparable to that of Flagstaff (just under \$66,000).<sup>6</sup>

## D. Case Studies — Asheville, NC

---

### City Workforce Programs and Services

With support from Buncombe County and the Asheville City School Foundation, the City of Asheville hosts a leadership academy that provides high school youth with paid summer internship opportunities, community service experience and career literacy courses. A major stated aim of the program is “giving Asheville’s young people the opportunity to stay and work in Asheville.”<sup>7</sup>

In the career workshops, students learn financial literacy and have opportunities to explore different career paths. They are also provided with training in transferable skills that are essential in the workplace. Students are paid while they attend workshops. The program boasts a 100 percent college acceptance rate among participants.<sup>8</sup>

### Workforce Partnerships

The City itself provides limited workforce development programs and instead partners with the local workforce development board and other organizations to promote their services.

**Mountain Area Workforce Development Board and NCWorks.** The Mountain Area Workforce Development Board (MAWDB) serves four counties in North Carolina, including Buncombe County in which Asheville sits. MAWDB allocated WIOA funding to NCWorks Career Centers, which have locations throughout North Carolina, to provide services to job seekers.

At the career centers, NCWorks hosts in-person workshops on topics like networking, social media and resume prep. NCWorks offers soft skills tutorials online that job seekers may use at their leisure either on their own device or at a computer at one of the career centers. Additionally, the career centers host employers each day who can connect with prospective candidates. Many of the centers’ visitors are older workers.

**Service referrals.** NCWorks Career Centers have a WIOA case manager on site who can connect job seekers with funding for training. If an individual indicates they want to return to school for a certification or two-year degree, an on-site representative will connect them with partner A-B Tech. Popular certificate programs that job seekers referred from NCWorks participate in at A-B Tech include nursing (CNA) and truck driving (CDL).

**On-the-job training.** NCWorks also distributes funding for on-the-job (OTJ) training. Industries that most frequently make use of these funds include manufacturing, healthcare, and, to a lesser extent, hospitality and tourism.

**Unemployment assistance.** The career centers also assist individuals whose unemployment insurance income is set to expire. Individuals who have been collecting unemployment for five weeks can see a Reemployment Services and Eligibility Assessment Grants (RESEA) representative who will assist them with making a plan to find employment.

## D. Case Studies — Asheville, NC

**Goodwill Industries.** The City of Asheville partners with Goodwill Industries, which delivers a variety of workforce development programs and services, including:

- Job training and placement for individuals with disabilities, veterans and formerly incarcerated individuals;
- GED program (in Asheville, via A-B Tech) with subsequent job placement assistance;
- Job readiness and search training (e.g., resume writing, interviewing, computer access); and
- Skill building programs in partnership with the community college system.

Upon visiting or emailing a Goodwill Career Center, job seekers are connected with a Career navigator who will help direct them to the appropriate programs and services, from resume review and job search to job skills training.

## D. Case Studies — Bend, OR

In this section, we provide an overview of workforce development programs and services in Bend, Oregon.

### Community Profile

The largest city among the Cascade Mountains, Bend is known for its varied outdoor activities for residents and visitors.

- Metro area population: 206,549.<sup>9</sup>
- Geography: Situated near the Cascade Mountain Range.
- Closest metro area with a population of 1 million or more: Portland, OR (163 miles).
- Major university/college: Oregon State University Cascades, Central Oregon Community College.
- Revenue from tourism: \$382 million (2022).<sup>10</sup>

---

<sup>9</sup> U.S. Census Bureau (2022). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Bend, OR Metro Area <<http://censusreporter.dokku.censusreporter.org/profiles/31000US13460-bend-or-metro-area/>>

<sup>12</sup> Economic Development for Central Oregon. (n.d.). *About Bend*. <https://edcoinfo.com/communities/bend/>

**Key industries.** The major industries in Bend are education and health services, leisure and hospitality, retail trade and professional and business services.<sup>11</sup> Software, bioscience and manufacturing are among the industries in the area that are experiencing significant growth.<sup>12</sup> The City collaborates with groups like Economic Development for Central Oregon to attract businesses and support its local workforce.

**Cost of living and income.** Overall, the cost of living in Bend is about 11 percent higher than the national average.<sup>13</sup> The median household income in Bend is nearly \$17,000 more than that of Flagstaff (approximately \$83,000 compared to \$66,000).<sup>14</sup> Affordable housing is a challenge as demand continues to outpace supply.<sup>15, 16</sup>

---

### City Workforce Programs and Services

The City of Bend has a strategic objective to “grow and develop a talented workforce.”<sup>17</sup> The City leverages its partnerships with the workforce development board and others to deliver programs and services to local job seekers.

### Workforce Partnerships

Job seekers in Bend are served by the local workforce development board, which has additional partners to deliver programs and services.

**Workforce development board.** Bend is served by East Cascades Works (EC Works), the workforce development board that serves 10 counties in Central Oregon. The priorities of EC Works are aligned with that of the State Workforce and Talent Development Board and include:

- Better integrating the K-12 education system into the workforce system;
- Investing in resources that allow for work-based learning; and
- Closing the opportunity gap in access to training, education and job placement services.<sup>18</sup>

---

<sup>17</sup> City of Bend. (n.d.). *Economic Development*.

<https://www.bendoregon.gov/government/departments/economic-development>

<sup>18</sup> East Cascade Works, (2024). *Workforce Innovation and Opportunity Act Local Plan: East Cascades Workforce Area*.

**Mobile workforce development services.** Recognizing that access to workforce development services can be difficult for job seekers, in 2024 EC Works partnered with the Central Oregon Intergovernmental Council to purchase and staff a mobile WorkSource Unit (WSU). The WSU will prioritize visits to remote areas of Central Oregon, bringing programming like hiring events to individuals who have historically had less access to career centers.

**Central Oregon Community College.** EC Works has a partnership with Central Oregon Community College (COCC) as a provider of career and technical education and training. COCC operates a Center for Business, Industry and Professional Development through which job seekers can:

- Prepare for licensing and certification exams, such as those needed to become contractors, tax consultants, pesticide applicators, property managers and real estate brokers;
- Learn program-specific skills (e.g., Microsoft Excel, QuickBooks, Adobe Creative Cloud); and
- Take a general skill building course in areas like digital marketing, data analytics and cybersecurity;

COCC has previously offered pre-apprenticeship programs in industries like construction but no current programs like this are offered.

## D. Cast Studies — Missoula, MT

Keen Independent also reviewed workforce development in Missoula, Montana, another similar western community.

### Community Profile

A historic trading post, Missoula is a city where arts, culture and the outdoors attract new residents and visitors. The city's visitor's bureau describes Missoula as a multifaceted regional destination with a thriving arts and culture scene in addition to its outdoor activities.

- Metro area population: 121,041.<sup>19</sup>
- Geography: Situated near the Mission Mountain Range.
- Closest metro area with a population of 1 million or more: Spokane, WA (198 miles).<sup>20</sup>
- Major university/college: University of Montana, Missoula College.
- Revenue from tourism: \$390 million (2022).<sup>21</sup>

---

<sup>19</sup> U.S. Census Bureau (2022). American Community Survey 1-year estimates. Retrieved from Census Reporter Profile page for Bend, OR Metro Area <<http://censusreporter.dokku.censusreporter.org/profiles/31000US33540-missoula-mt-metro-area/>

<sup>20</sup> The Spokane MSA population is just under 1 million, but it is the closest large metro area to Missoula.

**Key industries.** Government, accommodations and food (hospitality), healthcare and construction are major industries in Missoula.<sup>22</sup>

**Cost of living and income.** The overall cost of living in Missoula is about 2 percent higher than the national average.<sup>23</sup> The median household income Missoula is just under \$60,000.<sup>24</sup> In 2020, the City of Missoula adopted an economic health strategic goal to support the development of affordable housing.<sup>25</sup>

## D. Cast Studies — Missoula, MT

---

### City Workforce Programs and Services

The City of Missoula’s workforce programs and services are provided primarily through partner organizations.

### Workforce Partnerships

Organizations that provide workforce development services for job seekers in Missoula include the state workforce development board, Missoula Economic Partnership, the local university, the local community college and the local K-12 school district.

**MontanaWorks.** The statewide workforce development board, MontanaWorks, has a Job Service center in Missoula. MontanaWorks coordinates with the Montana Department of Labor and Industry to promote additional state workforce development resources and to advertise state job openings.

The State operates a paid apprenticeship program (described later) that MontanaWorks promotes. Additionally, the MontanaWorks website allows job seekers to search for WIOA-eligible training programs by provider and degree (or certificate) type. AccelerateMT is among these training providers that offers rapid training in a variety of industries, including healthcare, technology and construction and trades.

**University of Montana Missoula College.** The junior college of the University of Montana, Missoula College provides over 100 certificate programs, most of which require six or fewer classes to complete. Many of these are not specifically workforce development programs (e.g., certificate in African American Studies, which requires 15 credit hours), but can help students stand out in the job market.

**Missoula County Public Schools.** The City of Missoula aims to strengthen its partnership with Missoula County Public Schools.<sup>26</sup> MCPS partners with Missoula College to offer dual enrollment at many schools in the district. Additionally, many MCPS schools offer apprenticeships with local employers.

**Montana Registered Apprenticeship.** While not explicitly listed on the City’s website, the State of Montana offers a Registered Apprenticeship program that connects job seekers with employers looking to sponsor their training. All apprenticeships through this program are paid. The majority of the program apprentices work in the trades but the program is expanding its available industries and occupations.<sup>27</sup> MontanaWorks provides information on this program on its website.

## D. Case Studies — Lessons learned

---

In this final section, we summarize major takeaways from studying the three communities in this appendix.

### Summary

Although Asheville, Bend and Missoula are different communities with distinct challenges (as is Flagstaff), there were several common themes. We note the following commonalities between each of the case study communities:

- Cities themselves do not directly offer full workforce development programs and instead partner with other agencies and organizations to deliver programs and services. (There are some programs that are directly offered by cities, but they are limited and relatively rare.)
- Local workforce development boards often lead local workforce development and have extensive partnerships with other organizations that act as service providers.
- Local community colleges are instrumental in providing workforce development, such as licensing and certification, soft skills training and industry-specific job training.
- Training programs are often general (internships, soft skills, low-hours certificates, CDL) but workforce development in some communities also invest in workforce for specific industries (OJT) and longer-term training, such as apprenticeship programs.
- Cost of living and housing are concerns in all communities. Although such issues go beyond the scope of this report, they greatly impact the workforce and create more urgency to train more local residents for living wage jobs.

# Study background — Findings

## Key takeaways

- Flagstaff has an acute affordability challenge that greatly impacts the workforce
- County workforce development board stewards WIOA funding and leads local workforce development efforts in partnership with NAU, CCC and others
- Income ceiling (about \$14,000 per year) limits who is eligible to participate in a program or training subsidized by WIOA
- City governments serve as partners in workforce development and do not directly offer programs/services
- Stakeholders see the City of Flagstaff playing being a regional leader, educator and convener to support ongoing workforce development efforts

*...I can't get anybody to move here because our rent prices are so high because our housing is so low.*

*Small business owner*

*Not everybody has to go to a four-year college. You can get certificates in different areas that are highly needed.*

*City elected official*

*Maybe the City needs to ... adopt a leadership role within Northern Arizona.*

*Healthcare employer representative*

*I would like to see us [continue to] be smart about investments in economic development. Growth has been what we've been talking about, but it really means the type of growth that we want.*

*City elected official*

# Workforce development strategy — Employment pathways

## Four-year degree pathways

- NAU and CCC graduate thousands of individuals in a variety of fields each year
- Key priority sectors\* with jobs requiring 4-year degrees
  - Astronomy
  - Biomedical/healthcare
  - Forestry
- Management-level positions across sectors often have bachelor's degree requirements

Median annual earnings of occupations related to astronomy, biomedical/healthcare and forestry in Coconino County, 2022

Occupation	Median annual earnings	Typical education level
<b>Astronomy occupations</b>		
Physical scientist	\$ 102,044	Bachelor's degree
Computer and mathematical occupations	76,190	Bachelor's degree
<b>Biomedical/healthcare occupations</b>		
Biomedical engineer	\$ 165,541	Bachelor's degree
Pharmacist	153,480	Doctoral or professional degree
Physician assistant	129,987	Master's degree
Nurse practitioner	121,009	Bachelor's degree
Medical and health services manager	102,911	Bachelor's degree
<b>Forestry occupations</b>		
Conservation scientists	\$ 75,026	Bachelor's degree
Environmental scientists	63,757	Bachelor's degree

\*As defined in the City's draft economic strategic plan

Source: Arizona Commerce Authority, 2022 Occupational Employment and Wages.

# Workforce development strategy — Employment pathways

## High school diploma (or equivalent) pathways

- Two-year degree and certificate programs available in Flagstaff (many through CCC)
- Key priority sectors\* with jobs requiring HS degrees
  - Food processing
  - Manufacturing
- Other sectors with HS degree-required jobs
  - Construction
  - Transportation
- Individuals in these jobs can also advance to supervisory positions with experience

Median annual earnings of occupations related to construction and manufacturing in Coconino County, 2022

Occupation	Median annual earnings	Typical education level
<b>Construction occupations</b>		
Supervisors of construction workers	\$ 66,467	HS diploma or equivalent
Construction equipment operators	50,618	HS diploma or equivalent
Construction and building inspectors	56,651	HS diploma or equivalent
Highway maintenance workers	46,226	HS diploma or equivalent
<b>Manufacturing occupations</b>		
Supervisors of production workers	\$ 65,932	HS diploma or equivalent
Machinists	63,070	HS diploma or equivalent
Industrial machinery mechanics	63,417	HS diploma or equivalent
Welders, cutters, solderers and brazers	46,881	HS diploma or equivalent

\*As defined in the City's draft economic strategic plan

# Workforce development strategy — Pathways (continued)

## High school diploma (or equivalent) pathways

- Two-year degree and certificate programs available in Flagstaff (many through CCC)
- Key priority sectors\* with jobs requiring HS degrees
  - Food processing
  - Manufacturing
- Other sectors with HS degree-required jobs
  - Construction
  - Transportation
- Individuals in these jobs can also advance to supervisory positions with experience

Median annual earnings of occupations related to transportation in Coconino County, 2022

Occupation	Median annual earnings	Typical education level
<b>Transportation occupations</b>		
Transportation, storage and distribution managers	\$ 84,520	HS diploma or equivalent
Supervisors of transportation workers	47,282	HS diploma or equivalent
Heavy and tractor-trailer truck drivers	48,753	HS diploma or equivalent
Light truck drivers	45,909	HS diploma or equivalent

\*As defined in the City's draft economic strategic plan

# Overall goals, suggested actions and timeframe for City of Flagstaff workforce development strategy

Goal	Target population	Sample actions	Timeframe (years)		
			1-2	3-5	6-10
1. Promote existing programs and pathways to four-year+ degree required jobs	Workers with bachelor's degrees or higher	Formalize partnerships with NAU, CCC and FUSD		X	
		Develop a workforce development landing page that describes career pathways		X	
2. Encourage new certificate and training programs	Skilled trade workers	Formalize partnership with Coconino County Workforce Development Board	X		
		Collect data from employers on what types of skills incoming employees need		X	
		Endorse new training programs (e.g., through NAU or CCC) that will lead to a recognizable credential			X
3. Promote upskilling programs	Workers looking to advance/change careers	Formalize partnership with Coconino County Workforce Development Board	X		
		Develop communications strategy around skill-building programs through CCC, CCWDB and others		X	
		Build relationships with nonprofits and community organizations to support ongoing workforce efforts			X
4. Facilitate conversations with businesses to determine needs	All workers	Form business advisory groups to regularly solicit feedback from various sectors		X	
		Encourage local business leaders and workers to serve on County Workforce Development Board			X
		Explore using City BBB funds to support businesses in developing paid internships that are not eligible for WIOA funding due to income eligibility restrictions	X		

# Themes in feedback received

## Key strengths

- Framing the issues in Flagstaff
- Positioning the City as a partner in workforce development efforts
- Integrating with the economic strategic plan
- Focusing on career pathways

## Room for improvement

- More acknowledgement of ongoing workforce activities by other local entities
  - FUSD
  - Greater Flagstaff Chamber of Commerce
  - Other local nonprofits
- Consideration of childcare

# Updates to strategic plan

## Strategic plan report

- Broadening of workforce development partnerships for the City to consider
- Acknowledgement of childcare as an important area for consideration

## Appendices

- Addition of workforce development activities of other local organizations to inventory
- Explanation of eligibility requirements for participation in WIOA-subsidized programs

Source: Ken Lund via Wikimedia Commons.

Thank you!

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Stacy Saltzburg, City Clerk  
**Co-Submitter:** Kevin Fincel  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Adoption of Resolution No. 2024-33:** A resolution approving the extension of an Intergovernmental Agreement between the City of Flagstaff and Coconino County regarding the County's continued use of the Joe C. Montoya Community and Senior Center to operate its Senior Nutrition Programs.

**STAFF RECOMMENDED ACTION:**

1. Read Resolution No. 2024-33 by title only
2. City Clerk reads Resolution No. 2024-33 by title only (if approved above)
3. Adopt Resolution No. 2024-33

**Executive Summary:**

This is the renewal of an Intergovernmental Agreement between the City of Flagstaff and Coconino County for the purposes of continuing the Meals on Wheels Program and the Congregate Meal Program for the benefit of seniors in the greater Flagstaff community.

**Financial Impact:**

There is no financial impact to the City with approval of this agreement.

**Policy Impact:**

This is an existing program with no policy impact.

**Connection to PBB, Carbon Neutrality Plan, 10-Year Housing Plan & Regional Plan:**

This Intergovernmental Agreement and its implementation relates closely to both the Regional Plan and the City of Flagstaff's Strategic Plan in the following ways:

Regional Plan, Policy Rec.1.2. Promote public and private partnerships to offer parks, recreation facilities, and resources.

Strategic Priority #1 Serve the public through quality internal and external customer service.

Strategic Priority #4 Work in partnership to enhance a safe and liveable community

**PBB:**

**Safe & Healthy Community:** Support social services, community partners, and housing opportunities.

**Carbon Neutrality Plan:**

**Inclusive Recreation-2:** Ensure equity, accessibility, and inclusion across all City of Flagstaff Parks and Recreation facilities, helping all members of the Flagstaff community to meet their health and wellness needs.

**Has There Been Previous Council Decision on This:**

This intergovernmental agreement was last approved in June 2019.

**Options and Alternatives:**

1. Approve the extension as proposed.
2. Direct staff to make changes to the intergovernmental agreement.
3. Not approve the extension.

**Background and History:**

For more than 20 years, Coconino County has provided a congregate meal to seniors and the disabled each weekday at noon at the Joe C. Montoya Community and Senior Center. Additionally, the Meals on Wheels program prepares and delivers a weekday noon meal to homebound seniors within city limits. This program has been run cooperatively with the City and the County partnering to deliver a nutritious meal and for congregate meal participants, socialization and communal activities. The Joe C. Montoya Community and Senior Center was designed specifically with this program in mind. Design features and amenities were selected specifically for this partnership and implementing this agreement maximizes the use of this City facility.

**Key Considerations:**

The Meals on Wheels and Congregate Meal program have been providing a nutritious meal to senior citizens in partnership with the City of Flagstaff for more than 20 years. Ensuring that seniors receive a nutritious meal is a vital part of maintaining a healthy elder population. For many program participants, this is the only interaction they may have with other community members each day. For the Meals on Wheels participants, receiving the daily meal also serves as a "Well Check" for them. Trained County staff interface personally with these seniors each day allowing case workers and others the ability to keep in touch with people and monitor their general well being. Besides the nutritional benefits, patrons are also benefiting from the ancillary offerings at the Joe C. Montoya Center during the lunch program, including informational discussions regarding their health and wellness, exercise, and continuing education sessions.

**Community Involvement:**

Community members participating in either the Meals on Wheels or Congregate Meal Program benefit greatly from their involvement. The daily social interaction and expectation that one attends helps hold people accountable to one another and enhances their social network thus keeping them involved in their community. Additionally, other benefits besides nutrition are provided to program participants to help them live longer, healthier and more rewarding lives as active members of their community.

---

**Attachments:**    Res. 2024-33  
                          Executed IGA

**RESOLUTION NO. 2024-33**

**A RESOLUTION OF THE FLAGSTAFF CITY COUNCIL, APPROVING THE EXTENSION OF AN INTERGOVERNMENTAL AGREEMENT BETWEEN THE CITY OF FLAGSTAFF AND COCONINO COUNTY REGARDING THE COUNTY'S CONTINUED USE OF THE JOE C. MONTOYA SENIOR CENTER TO OPERATE ITS SENIOR NUTRITION PROGRAMS**

**RECITALS:**

WHEREAS, the Joe C. Montoya Community and Senior Center ("Center") is a facility owned and operated by the City of Flagstaff ("City") located at 245 North Thorpe Park Road in Flagstaff;

WHEREAS, Coconino County ("County") operates its Senior Congregate and Meals on Wheels programs at the Center, using the kitchen for meal preparation Monday through Friday, the Allen Room for congregare meals, and the driveway for Meals on Wheels and deliveries;

WHEREAS, the County's current use of the Center for its senior nutrition programs is governed by an intergovernmental agreement with the City dated June 4, 2019, which has an initial term of five years with the option for two (2) successive five (5) year renewal terms;

WHEREAS, the County and the City desire to renew the Intergovernmental Agreement pursuant to the existing terms and conditions under which the County will continue to have access to the Center for the purpose of carrying out its senior nutrition programs;

WHEREAS, the County and the City are empowered by Arizona Revised Statutes § 11-952 to enter into the proposed Intergovernmental Agreement;

WHEREAS, the City Council has read and considered the staff summary report and current Intergovernmental Agreement attached hereto and finds that it is in the best interests of the City to renew the Agreement for an additional five (5) year term.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

**SECTION 1. In General.**

That the Intergovernmental Agreement between the County and the City dated June 4, 2019, pertaining to the County's Senior Congregate and Meals on Wheels Programs at the Center be renewed for an additional five (5) year term.

**SECTION 2. Effective Date.**

This resolution shall be immediately effective upon adoption.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July 2024.

CITY ATTORNEY

Exhibits:  
IGA

**INTERGOVERNMENTAL AGREEMENT**

**by and between  
Coconino County  
and the  
City of Flagstaff**

This Intergovernmental Agreement ("Agreement") is made this 4<sup>th</sup> day of June 2019, by and between COCONINO COUNTY, a political subdivision of the State of Arizona, of 219 East Cherry Avenue, Flagstaff, Arizona ("County") and the CITY OF FLAGSTAFF, an Arizona municipal corporation with offices at 211 West Aspen Avenue, Flagstaff, Arizona ("City") for use of the Joe C. Montoya Community and Senior Center ("Center") for senior nutrition programs. The City and County may be referred to individually in this Agreement as a Party or collectively as Parties.

**RECITALS**

- A. The Joe C. Montoya Community and Senior Center is a City-owned and operated facility located at 245 North Thorpe Park Road in Flagstaff.
- B. The County operates its Senior Congregate and Meals on Wheels programs at the Center, using the kitchen for meal preparation Monday through Friday, the Allen Room for congregate meals, and the driveway for Meals on Wheels and deliveries.
- C. Funding for the County nutrition programs is provided by Older American Act funds through the Area-Agency on Aging, Coconino County general funds, and participant and corporate donations.
- D. The County's current use of the Center for its senior nutrition programs is governed by an intergovernmental agreement with the City dated March 6, 2014, which has a term of five years.
- E. The County and the City desire to enter an intergovernmental agreement establishing the terms and conditions under which the County will continue to have access to the Center for the purpose of carrying out its senior nutrition programs.

NOW THEREFORE, pursuant to A.R.S. § 11-952, authorizing contracts between public agencies for services or the joint exercise of powers common to both, and the inherent powers of each Party to protect the health and welfare of its constituents, for and in consideration of the mutual obligations and covenants set forth herein, the Parties agree as follows:

**AGREEMENT**

**1. DURATION AND TERMINATION.**

This Agreement shall be effective on the date first set forth above and shall continue in force and effect for an Initial Term of five (5) years. Upon expiration of the Initial Term, this Agreement may be renewed for up to two (2) successive five (5) year terms (each a "Renewal Term") subject to the provisions of this IGA upon mutual written consent of the Parties. This Agreement may be terminated by either Party upon thirty (30) days written notice of termination delivered to the other Party. Either Party may terminate this Agreement if sufficient funding is no longer available to carry out that Party's responsibilities under the Agreement. This Agreement may be terminated by either Party without penalty or further obligation, in accordance with the provisions of Arizona Revised Statutes §38-511, in the event of the occurrence of any of the circumstances described in A.R.S. §38-511(A).

**2. FUNDING; FINANCIAL RESPONSIBILITIES.**

The County shall be responsible and pay for all expenses associated with the operation of its senior nutrition programs, including but not limited to, the costs of food, supplies, telephones, vehicles, gasoline, liability insurance, and the maintenance and upkeep of all kitchen equipment, appliances, drains, and other items necessary for the operation of the program. The County shall be responsible for obtaining and paying for all permits and inspections necessary to operate the senior nutrition programs. The County shall pay for all costs associated with the supervision of its senior nutrition program staff. Any kitchen improvements or replacement of large equipment or appliances must be approved by the City in advance. The County shall pay for repairing or replacing any kitchen equipment damaged as a result of the County's own negligent use of such equipment. Aside from the references to maintenance obligations in Section 6 below, the City shall maintain only the Center itself and pay for the upkeep and repair of the same. The County shall maintain and pay for the upkeep, repairs and/or replacement of the storage shed located outside the Center near the kitchen entrance.

**3. UTILITIES.**

The City shall pay for all utility costs in the Center (other than communications related utilities including but not limited to phone, fax and internet services).

**4. SCHEDULING; USE OF BUILDING.**

The County shall have use of the kitchen for all meal program events between 5:30 a.m. and 2:30 p.m. Monday through Friday. The County shall have use of the Allen Room for meal program events between 10:30 a.m. and 2:30 p.m. Monday through Friday. No other groups or events shall be scheduled in the kitchen or Allen Room during the times listed above, without prior notification. The County may use the kitchen and Allen Room at other times subject to City approval and space availability. Programs and events have priority use of the Allen room outside of the times allocated to the County as defined in this agreement. If the need arises that the City requires the use of the Allen room and/or kitchen during the County's allotted time slot, the City may, in its sole discretion, use the kitchen and/or Allen Room. Where possible, the City shall give the County a two (2) week notice prior to such use. However, in the event that no such prior notice is possible due to an emergency situation, the City shall not be required to give the County the two (2) week notice.

**5. DAILY OPERATIONAL STANDARDS.**

The County shall maintain the kitchen and Allen Room in a sanitary and safe condition at all times, per County health regulations. The County agrees to set up the Allen Room beginning at 10:30 a.m. and to clear the Allen Room beginning at 1:30 p.m. each day, Monday through Friday. County employees and volunteers will conduct themselves at all times in a professional and courteous manner while utilizing the kitchen at the Center.

The County agrees to clean off all tables and chairs prior to putting them away and to sweep and mop the floors to remove all debris after each serving. City staff will monitor clean up to ensure areas are ready for the next user group. County staff shall limit their activities, as much as possible, to the kitchen and Allen Room and shall keep other areas free of equipment and materials that may block or otherwise impair the use of the Center for other purposes. County staff shall alert the City of any special events, safety concerns, or repairs that are needed at the Center that the County becomes aware of under the course of its activities under this Agreement

**6. FACILITIES AND EQUIPMENT USE AND MAINTENANCE; SUPPLIES.**

The County shall maintain all kitchen equipment in an operational and sanitary condition, in compliance with applicable County health requirements. The County shall not allow any entity other than the County and its employees to use the kitchen equipment during the County's scheduled use periods. The City shall take reasonable steps to ensure that dining or food supplies purchased by the County are not used by any

other entity without the express permission of the County. The County shall clearly identify and label its dining and food supplies. As the kitchen and equipment are utilized extensively by the County, replacement of and repairs to existing kitchen equipment shall be handled on a case by case basis to determine which Party will be responsible for maintenance or replacement. These determinations will ultimately be made by the City, after the matter is reviewed by the Center's Supervisor, Facilities Supervisor, and the Recreation Services Director in cooperation with staff designated by the County. The County will pay for the replacement of dining room tables as needed as they are used primarily for the meal program.

**7. EMPLOYMENT STATUS.**

County employees and volunteers associated with the senior nutrition programs shall at all times remain employees of the County. The City shall not have supervisory authority or control over the day-to-day work of the County employees or volunteers associated with the County's senior nutrition programs.

**8. INSURANCE.**

The County and the City shall each maintain sufficient liability insurance to cover each Party's respective activities associated with this Agreement.

**9. INDEMNIFICATION.**

Each party (as "Indemnitor") agrees to indemnify, defend and hold harmless the other party (as "Indemnitee") from and against any and all claims, losses, liability, costs or expenses, including reasonable attorney fees, (hereinafter collectively referred to as "Claims") arising out of bodily injury of any person, including death, or property damage, but only to the extent that such Claims which result in vicarious or derivative liability to the Indemnitee are caused by the act, omission, negligence, misconduct or other fault of the Indemnitor, its officers, officials, agents, employees or volunteers.

**10. NOTICES.**

Any notice or other communication required or permitted to be given under this Agreement shall be in writing and sent to the address given below for the Party to be notified, or to such other address, notice of which is given in accordance with this Section:

If to the County:

If to the City:

County Manager  
219 East Cherry Avenue  
Flagstaff, AZ 86001

City Manager  
211 West Aspen Avenue  
Flagstaff, AZ 86001

**11. AUTHORITY TO CONTRACT.**

Each Party represents and warrants that it has full power and authority to enter into this Agreement and perform its obligations hereunder and has taken all required acts or actions necessary to authorize the same.

**12. GOVERNING LAW.**

This Agreement shall be governed, interpreted, and enforced in accordance with the laws of the State of Arizona.

**13. DISPUTE RESOLUTION.**

Either Party shall have the right to litigate any disputes which arise under this Agreement. Any litigation brought by either Party against the other to enforce the provisions of this Agreement must be filed in the Coconino County Superior Court. In the event any action at law or in equity is instituted between the Parties in connection with this Agreement, the prevailing Party in the action will be entitled to its costs including reasonable attorneys' fees and court costs from the non-prevailing Party.

**14. AGENTS, EMPLOYEES, AND CONTRACTORS**

Agents, employees and contractors hired by a Party to provide services under this Agreement shall be and remain the agents, employees, and contractors of the hiring Party solely, and shall not be considered agents, employees, or contractors of the other Party.

**15. LEGAL WORKERS.**

As mandated by Arizona Revised Statutes § 41-4401, each Party (a) warrants the Party's compliance with all federal immigration laws and regulations that relate to the Party's employees and their compliance with Arizona Revised Statutes § 23-214(A); (b) acknowledges that a breach of the warranty in subsection (a) of this section shall be deemed a material breach of this Agreement that is subject to penalties up to and including termination of this Agreement; and (c) retains the legal right to inspect the papers of any contractor or subcontractor employee who works pursuant to this Agreement to ensure compliance with the warranty.

**16. CONSTRUCTION.**

This Agreement shall be construed as a whole and in accordance with its fair meaning. This Agreement shall not be construed for or against either Party.

**17. INTEGRATION; MODIFICATION.**

Both Parties acknowledge and agree that they have not relied upon any statements, representations, agreements, or warranties, except as expressed in this Agreement, and that this Agreement constitutes the Parties' entire agreement with respect to the matters addressed. All prior or contemporaneous agreements and understandings, oral or written, with respect to such matters are superseded by and merged in this Agreement. This Agreement may be modified or amended only by written agreement signed by or for both Parties, and any such modification or amendment will become effective on the date so specified.

**18. NO ASSIGNMENT; BINDING EFFECT.**

This Agreement is not assignable by either Party. Any attempt to do so shall render the assignment null and void and the Agreement may be terminated immediately by the non-assigning Party.

**19. SEVERABILITY.**

In the event that a court of competent jurisdiction shall hold any part or provision of this Agreement void or of no effect, the remaining provisions of this Agreement shall remain in full force and effect.

**20. WAIVER.**

No failure to enforce any condition or covenant of this Agreement shall imply or constitute a waiver of the right to insist upon performance of such condition or covenant, or of any other provision hereof, nor shall any waiver by either Party of any breach of any one or more conditions or covenants of this Agreement constitute a waiver of any succeeding or other breach of this Agreement.

**21. HEADINGS.**

The headings used in this Agreement are for convenience only and are not intended to alter or affect the meaning of any provision of this Agreement.

**[SIGNATURE PAGE FOLLOWS]**

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed as of the day and year first above written.

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Sterling Solomon, City Attorney  
**Date:** 06/27/2024  
**Meeting Date:** 07/02/2024

---

**TITLE:**

**Consideration and Adoption Resolution No. 2024-34:** A resolution of the Flagstaff City Council authorizing approval of the Northeastern Arizona Indian Water Rights Settlement Agreement

**STAFF RECOMMENDED ACTION:**

1. Read Resolution No. 2024-34 by title only
2. City Clerk reads Resolution No. 2024-34 by title only (if approved above)
3. Adopt Resolution No. 2024-34

**Executive Summary:**

The litigation of cases known as "In Re: The General Adjudication of All Rights to Use Water in the Little Colorado River General Adjudication, CV 6417; In Re: Hopi Reservation HSR, Contested Case No. CV 6417-203; In Re: Navajo Nation, Contested Case No. CV 6417-300 has been ongoing in various forms since 1978. Hereinafter, the litigation shall be referred to as the "Adjudication." This momentous resolution is a result of a comprehensive water rights settlement that resolves the water rights claims of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the United States acting as trustee for each Tribe, in the Adjudication. Staff is providing the City Council with a resolution authorizing approval of the Northeastern Arizona Indian Water Rights Settlement Agreement for City Council's consideration and possible approval.

The Northeastern Arizona Indian Water Rights Settlement Agreement ("Agreement") dated as of May 9, 2024, resolves certain water rights disputes in the Adjudication, and specifically the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the United States acting as trustee for each Tribe. The Hopi Tribe approved the Agreement on May 20, 2024, the Navajo Nation approved the Agreement on May 23, 2024, and the San Juan Southern Paiute approved the Agreement on May 23, 2024. The City has determined it is in the best interests of the City to enter into the Agreement and end protracted and costly litigation related to these water rights claims.

The Agreement anticipates federal funding for needed water supply infrastructure projects benefiting the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe. The Agreement will confirm, among the Parties to the Agreement, certain surface water rights and groundwater rights for the City. Certain exhibits to the Agreement must be completed or updated before execution of the Agreement by the Parties, including the City's Exhibits set forth in Attachment A to the resolution.

In 2005, and with 71% voter approval, the City acquired Red Gap Ranch, located approximately 35 miles east of Flagstaff, for the purpose of developing its future municipal water supply and to provide water resiliency and water security for its residents. The City has invested millions of dollars in acquiring Red Gap Ranch for a municipal water supply project and continues to invest in the development of a Regional Water Supply Project by conducting engineering feasibility studies, design plans, hydrology studies and by having drilled no less than ten (10) additional wells at Red Gap Ranch for municipal use.

In 2011, and in anticipation of a comprehensive water rights settlement that did not materialize at that time, the City entered into a stipulation with the Navajo Nation regarding Red Gap Ranch; however, that 2011

stipulation was never submitted to the Adjudication court for binding effect and enforcement as between the parties to the 2011 stipulation and by its own terms remains null and void. There is no new stipulation or other agreement between the City and the Navajo Nation regarding Red Gap Ranch included as an exhibit to the Agreement.

Groundwater uses and wells are addressed in Paragraph 9.0 of the Agreement which establishes two groundwater "Buffer Zones." The vast majority of Red Gap Ranch is located in these two Buffer Zones, and only one parcel of Red Gap Ranch fee land is located outside of these Buffer Zones. Paragraph 9.0 of the Agreement provides for the right to use groundwater from Existing Wells in the two Buffer Zones. In Paragraph 9.0 of the Agreement, Existing Wells located in Buffer Zone 1 and Buffer Zone 2 as of the Effective Date will be catalogued by the Arizona Department of Water Resources based on the capacity of the well or well casing sizes provided in Table 1 of subparagraph 9.4.1. In Buffer Zone 1 on Red Gap Ranch, the City owns eleven (11) Existing Wells with a total pumping capacity of 2,912 acre-feet per year, as further described on Attachment B. In Buffer Zone 2 on Red Gap Ranch, the City owns sixteen (16) Existing Wells with a total pumping capacity of up to 19,003 acre-feet per year, as further described on Attachment B. Paragraph 9.0 of the Agreement allows for the replacement of Existing Wells. Paragraph 9.0 of the Agreement allows for the drilling of New Wells, subject to certain requirements. There are no restrictions on withdrawals of groundwater from Wells located outside the Buffer Zones.

The Regional Water Supply Project is a critical component of the City's future water supply and necessary for the City's water resiliency and water security needs. The Regional Water Supply Project is also an important component of the Agreement because Paragraph 12.0 allows the Navajo Nation to have access to the Regional Water Supply Project by entering into Water Supply Contracts with the City as described the Agreement.

In Paragraph 9.0 of the Agreement, the Arizona State Land Department agrees to coordinate with the City regarding the drilling of New Wells on Arizona State Land Department parcels in and around Red Gap Ranch for the benefit of the Regional Water Supply Project. The City continues to identify, in coordination with the Arizona Department of Transportation, and with further anticipated input from regional participants including the Navajo Nation, the Hopi Tribe and the Arizona State Land Department, various Points of Access to the Regional Water Supply Project at ADOT intersections along the Interstate 40 corridor, or at other mutually beneficial locations. To further the development of the Regional Water Supply Project, the City is seeking federal funding on a cost-share basis.

City Council's adoption of this resolution will authorize 1) the City's approval of the Northeastern Arizona Indian Water Rights Settlement Agreement subject to the inclusion of the correct City exhibits attached to the resolution, and authorize and direct 2) the City Attorney to make such conforming or other changes as might be required and consistent with the Agreement before formal execution of the Agreement by the City, 3) the City Manager and City Attorney to take such other actions as are necessary to carry out the purpose of the resolution, and 4) the City Manager and City Attorney to seek federal funding on a cost-share basis for the further development of the Regional Water Supply Project described in the Agreement, and by other legislation, grants or viable funding sources.

The settlement agreement and related documents are also attached to the staff summary.

**Financial Impact:**

None at this time.

**Policy Impact:**

Confirm the City's water rights among the Parties to the Agreement and improve relations with our Indigenous partners as their claims for water rights will be resolved.

**Previous Council Decision or Community Discussion:**

Many City Councils and the community over the decades have discussed, voted and overwhelmingly indicated the importance of securing the City's water resources in the context of the Adjudication, ensuring the City's future municipal supplies at Red Gap Ranch, and the role that the Red Gap Regional Water Supply Project plays in assuring those water resources for the City and the region.

**Options and Alternatives to Recommended Action:**

1. Approve the resolution authorizing the settlement agreement that resolves the water rights claims of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute, and the United States acting as trustee for each Tribe, and confirms among the Parties to the Agreement, the City's water rights in the Adjudication.
2. Continue litigation with the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute, and the United States acting as trustee for each Tribe, and other Parties regarding their claims and the City's claims in the Adjudication.

**Connection to PBB Priorities and Objectives:**

**Connection to Regional Plan:**

**Connection to Carbon Neutrality Plan:**

**Connection to 10-Year Housing Plan:**

## RESOLUTION NO. 2024-34

### A RESOLUTION OF THE FLAGSTAFF CITY COUNCIL AUTHORIZING APPROVAL OF THE NORTHEASTERN ARIZONA INDIAN WATER RIGHTS SETTLEMENT AGREEMENT

#### RECITALS:

WHEREAS, the City of Flagstaff (City) and multiple other parties are actively engaged in the case known as, In Re: The General Adjudication of All Rights to Use Water in the Little Colorado River General Adjudication, CV 6417 (“Adjudication”); and In re: Hopi Reservation HSR, Contested Case No. CV 6417-203; and In re: Navajo Nation, Contested Case No. CV 6417-300;

WHEREAS, the Northeastern Arizona Indian Water Rights Settlement Agreement (“Agreement”) dated as of May 9, 2024, resolves certain water rights disputes in the Adjudication, and specifically the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the United States acting as trustee for each Tribe;

WHEREAS, the Hopi Tribe approved the Agreement on May 20, 2024, the Navajo Nation approved the Agreement on May 23, 2024, and the San Juan Southern Paiute approved the Agreement on May 23, 2024;

WHEREAS, the City has determined it is in the best interests of the City to enter into the Agreement and end protracted and costly litigation related to the water rights claims of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the United States acting as trustee for each Tribe;

WHEREAS, the Agreement anticipates federal funding for needed water supply infrastructure projects benefiting the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe;

WHEREAS, the Agreement will confirm, among the Parties to the Agreement, certain surface water rights and groundwater rights for the City;

WHEREAS, certain exhibits to the Agreement must be completed or updated before execution of the Agreement by the Parties, including the City’s Exhibits set forth in Attachment A;

WHEREAS, in 2005 and with 71% voter approval, the City acquired Red Gap Ranch, located approximately 35 miles east of Flagstaff, for the purpose of developing its future municipal water supply and to provide water resiliency and water security for its residents;

WHEREAS, the City has invested millions of dollars in acquiring Red Gap Ranch for a municipal water supply project and continues to invest in the development of a Regional Water Supply Project by conducting engineering feasibility studies, design plans, hydrology studies and by having drilled no less than ten (10) additional Wells at Red Gap Ranch for municipal use;

WHEREAS, in 2011, and in anticipation of a comprehensive water rights settlement that did not materialize at that time, the City entered into a stipulation with the Navajo Nation regarding Red Gap Ranch; however, that 2011 stipulation was never submitted to the Adjudication court for binding effect and enforcement as between the parties to the 2011 stipulation and by its own terms remains null and void;

WHEREAS, there is no new stipulation or other agreement between the City and the Navajo Nation regarding Red Gap Ranch included as an exhibit to the Agreement;

WHEREAS, Paragraph 9.0 of the Agreement establishes two groundwater “Buffer Zones”;

WHEREAS, the vast majority of Red Gap Ranch is located in these two Buffer Zones, and only one parcel of Red Gap Ranch fee land is located outside of these Buffer Zones;

WHEREAS, Paragraph 9.0 of the Agreement provides for the right to use groundwater from Existing Wells in the two Buffer Zones;

WHEREAS, in Paragraph 9.0 of the Agreement, Existing Wells located in Buffer Zone 1 and Buffer Zone 2 as of the Effective Date will be catalogued by the Arizona Department of Water Resources based on the capacity of the Well or Well casing sizes provided in Table 1 of subparagraph 9.4.1;

WHEREAS, in Buffer Zone 1 on Red Gap Ranch, the City owns eleven (11) Existing Wells with a total pumping capacity of 2,912 acre-feet per year, as further described on Attachment B;

WHEREAS, in Buffer Zone 2 on Red Gap Ranch, the City owns sixteen (16) Existing Wells with a total pumping capacity of up to 19,003 acre-feet per year, as further described on Attachment B;

WHEREAS, Paragraph 9.0 of the Agreement allows for the replacement of Existing Wells;

WHEREAS, Paragraph 9.0 of the Agreement allows for the drilling of New Wells, subject to certain requirements;

WHEREAS, there are no restrictions on withdrawals of groundwater from Wells located outside the Buffer Zones;

WHEREAS, the Regional Water Supply Project is a critical component of the City’s future water supply and necessary for the City’s water resiliency and water security needs;

WHEREAS, the Regional Water Supply Project is also an important component of the Agreement because Paragraph 12.0 allows the Navajo Nation to have access to the Regional Water Supply Project by entering into Water Supply Contracts with the City as described the Agreement;

WHEREAS, in Paragraph 9.0 of the Agreement, the Arizona State Land Department agrees to coordinate with the City regarding the drilling of New Wells on Arizona State Land Department parcels in and around Red Gap Ranch for the benefit of the Regional Water Supply Project;

WHEREAS, the City continues to identify, in coordination with the Arizona Department of Transportation, and with further anticipated input from regional participants including the Navajo Nation, the Hopi Tribe and the Arizona State Land Department, various Points of Access to the Regional Water Supply Project at ADOT intersections along the Interstate 40 corridor, or at other mutually beneficial locations;

WHEREAS, to further the development of the Regional Water Supply Project, the City is seeking federal funding on a cost-share basis.

**ENACTMENTS:**

**NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF FLAGSTAFF AS FOLLOWS:**

SECTION 1. General.

The City Council hereby approves the Northeastern Arizona Indian Water Rights Settlement Agreement in substantial form, subject to the express inclusion of the correct City Exhibits attached to this Resolution.

SECTION 2. Delegation of Authority.

FURTHER authorizing and directing the City Attorney to make such conforming or other changes as might be required and consistent with the Agreement before formal execution of the Agreement by the City.

FURTHER authorizing and directing the City Manager and City Attorney to take such other actions as are necessary to carry out the purpose of this Resolution.

FURTHER authorizing and directing the City Manager and City Attorney to seek federal funding on a cost-share basis for the further development of the Regional Water Supply Project described in the Agreement, and by other legislation, grants or viable funding sources.

SECTION 3. Effective Date.

This Resolution shall be immediately effective.

PASSED AND ADOPTED by the City Council of the City of Flagstaff this 2nd day of July, 2024.

PARCEL NO. 8:

THAT PORTION OF SECTION 35 LYING NORTH OF THE NORTH RIGHT OF WAY LINE OF THE ATCHISON, TOPEKA AND SANTA FE RAILROAD, LOCATED IN TOWNSHIP 20 NORTH, RANGE 13 EAST, OF THE GILA AND SALT RIVER BASE AND MERIDIAN, COCONINO COUNTY, ARIZONA;

EXCEPT A RECTANGULAR PARCEL OF LAND 210 FEET BY 622.29 FEET LOCATED IN THE NORTHWEST QUARTER OF SAID SECTION 35, BOUNDED BY LINES MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHWEST CORNER OF SAID SECTION 35, SAID CORNER BEING A GOVERNMENT LAND OFFICE STANDARD BRASS CAP MARKER, THE COMMON CORNER OF SECTION 26, 27, 34 AND 35 IN SAID TOWNSHIP AND RANGE;

THENCE SOUTH 0° 03' 30" EAST ALONG THE WEST BOUNDARY OF SAID SECTION 35, A DISTANCE OF 1162.05 FEET TO AN INTERSECTION WITH THE SOUTHERLY BOUNDARY OF THE RIGHT OF WAY OF THE NEWLY CONSTRUCTED HIGHWAY 66;

THENCE SOUTH 79° 52' EAST ALONG THE SOUTHERLY BOUNDARY OF THE HIGHWAY RIGHT OF WAY A DISTANCE OF 2017.35 FEET TO THE TRUE POINT OF BEGINNING;

THENCE CONTINUING ALONG THE SAID SOUTHERLY BOUNDARY OF THE HIGHWAY RIGHT OF WAY,

SOUTH 79° 52' EAST A DISTANCE OF 622.29 FEET;  
THENCE SOUTH 10° 08' WEST A DISTANCE OF 210 FEET;  
THENCE NORTH 79° 52' WEST A DISTANCE OF 622.29 FEET;  
THENCE NORTH 10° 08' EAST A DISTANCE OF 210 FEET MORE OR LESS, TO THE TRUE POINT OF BEGINNING; AND

EXCEPT THAT PORTION OF THE NORTH HALF OF THE NORTH HALF OF SECTION 35, TOWNSHIP 20 NORTH, RANGE 13 EAST, OF THE GILA AND SALT RIVER BASE AND MERIDIAN, COCONINO COUNTY, ARIZONA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHWEST CORNER OF SAID SECTION 35;  
THENCE ALONG THE NORTH LINE OF SAID SECTION 35, SOUTH 89° 51' 44" EAST 3764.11 FEET;  
THENCE SOUTH 0° 00' 15" EAST 1021.80 FEET TO THE EXISTING NORTHERLY RIGHT OF WAY LINE OF INTERSTATE HIGHWAY 40 (FLAGSTAFF HOLBROOK HIGHWAY);  
THENCE ALONG SAID EXISTING HIGHWAY RIGHT OF WAY LINE OF THE FOLLOWING THREE COURSES:

- (1) NORTH 79° 52' 00" WEST 350.00 FEET;
- (2) SOUTH 70° 18' 22" WEST 864.52 FEET;
- (3) NORTH 79° 52' 00" WEST 2646.41 FEET TO THE WEST LINE OF SAID SECTION 35;

THENCE ALONG SAID WEST SECTION LINE NORTH 0° 02' 25" WEST 794.99 FEET TO THE POINT OF BEGINNING; AND

EXCEPT THAT PORTION OF THE EAST HALF OF SECTION 35, TOWNSHIP 20 NORTH, RANGE 13 EAST, OF THE GILA AND SALT RIVER BASE AND MERIDIAN, COCONINO COUNTY, ARIZONA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE POINT OF INTERSECTION OF THE EXISTING SOUTHERLY RIGHT OF WAY LINE OF INTERSTATE HIGHWAY 40 (FLAGSTAFF-HOLBROOK HIGHWAY) WITH THE EAST LINE OF SAID SECTION 35, WHICH POINT IS SOUTH 0° 00' 15" EAST 2091.92 FEET FROM THE NORTHEAST CORNER OF SAID SECTION 35;  
THENCE ALONG THE AFORESAID EAST LINE OF SECTION 35, SOUTH 0° 00' 15" EAST 639.33 FEET TO THE EXISTING NORTHERLY LINE OF THE 200.00 FOOT RIGHT OF WAY OF THE A.T.&S.F. RAILWAY COMPANY;  
THENCE ALONG SAID NORTHERLY RIGHT OF WAY LINE NORTH 84° 12' 45" WEST 1728.49 FEET;  
THENCE NORTH 0° 00' 15" WEST 376.59 FEET TO THE AFORESAID EXISTING SOUTHERLY RIGHT OF WAY LINE OF INTERSTATE HIGHWAY 40;  
THENCE ALONG SAID HIGHWAY RIGHT OF WAY LINE THE FOLLOWING FOUR COURSES:

- (1) SOUTH 79° 52' 00" EAST 35.00 FEET;
- (2) NORTH 72° 20' 34" EAST 836.48 FEET;
- (3) SOUTH 79° 52' 00" EAST 739.40 FEET;
- (4) ALONG A CURVE TO THE RIGHT HAVING A RADIUS OF 34,227.48 FEET, A DISTANCE OF 162.87 FEET TO THE POINT OF BEGINNING;

AND FURTHER EXCEPTING THEREFROM ANY PORTION LYING WITHIN INTERSTATE HIGHWAY 40 AS SET FORTH IN FINAL ORDER OF CONDEMNATION RECORDED MAY 29, 1974 IN DOCKET 507, PAGE 476, AND IN DOCKET 507, PAGE 520, RECORDS OF COCONINO COUNTY, ARIZONA;

EXCEPT 15/16TH INTEREST OF ALL OIL, GAS, HYDROCARBON AND MINERALS AS RESERVED IN INSTRUMENTS RECORDED IN BOOK 68 OF DEEDS, PAGE 322, BOOK 25 OF OFFICIAL RECORDS, PAGE 494, BOOK 46 OF OFFICIAL RECORDS, PAGE 475, AND IN DOCKET 296, PAGE 57, RECORDS OF COCONINO COUNTY, ARIZONA.

## **Northeastern Arizona Indian Water Rights**

### **Settlement Agreement**

## **1.0 INTRODUCTION**

The purpose of this Agreement is to resolve, fully and finally, any and all claims to Water from any source in the State by: the Navajo Nation on behalf of the Navajo Nation and the Members of the Navajo Nation; the Hopi Tribe on behalf of the Hopi Tribe and the Members of the Hopi Tribe; the San Juan Southern Paiute Tribe on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe; the United States acting as trustee for the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Members of the Navajo Nation, the Members of the Hopi Tribe and the Members of the San Juan Southern Paiute Tribe; and the United States acting as trustee for Navajo Allottees and Hopi Allottees.

## **2.0 PARTIES**

This Agreement dated as of this \_\_\_ day of \_\_\_\_\_, 2024, is entered into among: the United States of America; the State of Arizona; the Navajo Nation; the Hopi Tribe; the San Juan Southern Paiute Tribe; the Central Arizona Water Conservation District; the Salt River Project Agricultural Improvement and Power District; the Salt River Valley Water Users' Association; the Arizona cities and towns of Flagstaff, Winslow, Holbrook, Taylor, Snowflake, Show Low, Eagar, Springerville, and St. Johns; Arizona Public Service Co.; Bar T Bar Ranch, Inc.; Bar T Bar Ranch Company, LLP; Meteor Crater Enterprises, Inc.; Crater Ranch, LLC; Flying M Ranch, Inc.; Aztec Land and Cattle Company, Limited; Aztec Land Company, LLC; Arizona State Land Department; Arizona Game and Fish Commission; Arizona Department of Transportation; Grover's Hill Irrigation District; J. Albert Brown

Ranches, Inc.; Pioneer Irrigation Company; Show Low/Pinetop-Woodland Irrigation Company; Silver Creek Irrigation District; Lakeside Irrigation Company; Little Colorado Water Conservation District; Forest Lakes Domestic Water Improvement District; Pinetop-Lakeside Sanitary District; Porter Springs, LLC; and Atkinson Trading Company, Inc.

### **3.0 GENERAL PROVISIONS**

#### **3.1 DEFINITIONS**

For purposes of this Agreement only, the terms set forth below shall have the meanings ascribed to them in this Subparagraph.

3.1.1 “1934 Act Case” shall mean *Honyoama v. Shirley, Jr.*, Case No. CIV 74-842-PHX-EHC (D. Ariz. 2006).

3.1.2 “AFY” shall mean acre-feet per Year.

3.1.3 “Abstract” shall mean a summary of Water Rights or Uses held or owned by any Person, as represented in a form substantially similar to the one attached as Exhibit 3.1.3.

3.1.4 “Act” shall mean the Northeastern Arizona Indian Water Rights Settlement Act of 2024, a copy of which is attached hereto as Exhibit 3.1.4.

3.1.5 “Agreement” shall mean this Northeastern Arizona Indian Water Rights Settlement Agreement and the Exhibits attached hereto.

3.1.6 “Akchin” shall mean traditional water capture practices which include Low Technology Watershed Restoration and practices which are traditionally used to improve soil health and moisture levels, increase forage, improve habitat, prevent erosion and otherwise facilitate sediment retention, slow water flow, induce sediment deposition, increase water spreading over floodplain, induce meandering and mitigate erosive forces, increase base flow, or increase groundwater recharge.

3.1.7 “Arizona Department of Water Resources” or “ADWR” shall mean the agency of the State established pursuant to A.R.S. § 45-102, *et seq.*, or its successor agency or entity.

3.1.8 “Arizona State Land Department” or “ASLD” shall mean the agency of the State established pursuant to A.R.S. § 37-101, *et seq.*, or its successor agency or entity.

3.1.9 “ASLD Lands” shall mean land owned by the State acting through ASLD and held in trust pursuant to the Arizona-New Mexico Enabling Act of June 20, 1910, ch. 310, 36 Stat. 557, as amended. ASLD has charge and control of ASLD Land pursuant to A.R.S. § 37-101, *et seq.*

3.1.10 “Bar T Bar” shall mean, collectively, Bar T Bar Ranch, Inc., Bar T Bar Ranch Company, LLP, and Meteor Crater Enterprises, Inc.

3.1.11 “Betterment” shall mean any water control measures or practices to optimize Water Use, including project reconfiguration, as long as the Diversion capacity, surface storage capacity, or irrigated acreage is not increased.

3.1.12 “Buffer Zone 1” shall mean the lands generally within two sections of the western and southern boundary of the Navajo Reservation bounded on the east by the Arizona-New Mexico state line and extending west thence extending north, but excluding: (a) Twin Arrows; (b) Turquoise Ranch; (c) Public Domain Allotments outside the Navajo Reservation; (d) lands managed by the United States National Park Service; (e) lands managed by the United States Forest Service; (f) fee lands owned by the Zuni Tribe; (g) lands excluded from Buffer Zone 1 in Exhibit 9.10; and (h) all ASLD Land as of the Effective Date in Sections 6 and 12, T20N R11E, and Section 36, T21N R10E. Buffer Zone 1 is depicted on the map attached hereto as Exhibit 3.1.12. In the case of a conflict between this definition and Exhibit 3.1.12, this definition shall control. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 3.1.12, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

3.1.13 “Buffer Zone 2” shall mean the lands generally within six sections of the western and southern boundary of the Navajo Reservation, bounded on the east by the Arizona-New Mexico state line and extending west thence extending north, but excluding: (a) Twin Arrows; (b) Turquoise Ranch; (c) Public Domain Allotments outside the Navajo Reservation; (d) lands managed by the United States National Park Service; (e) lands managed by the United States Forest Service; (f) fee lands owned by the Zuni Tribe; (g) lands excluded from Buffer Zone 2 in Exhibit 9.10; and (h) all lands within Buffer Zone 1. All ASLD Land as of the Effective Date in Sections 6 and 12, T20N R11E, and Section 36, T21N R10E, shall be treated as though they are in Buffer Zone 2. Buffer Zone 2 is depicted on the

map attached hereto as Exhibit 13.1.12. In the case of a conflict between this definition and Exhibit 13.1.12, this definition shall control. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 3.1.13, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

3.1.14 “Buffer Zones” shall mean Buffer Zone 1 and Buffer Zone 2, collectively.

3.1.15 “CAP Repayment Contract” shall mean: (a) the contract dated December 1, 1988 (Contract No. 14-06-W-245, Amendment No. 1), between the United States and the Central Arizona Water Conservation District for the delivery of water and the repayment of costs of the Central Arizona Project; and (b) any amendment to, or revision of, that contract.

3.1.16 “CAP System” shall mean: (a) the Mark Wilmer Pumping Plant; (b) the Hayden-Rhodes Aqueduct; (c) the Fannin-McFarland Aqueduct; (d) the Tucson Aqueduct; (e) any pumping plant or appurtenant work of a feature described in (a), (b), (c), or (d); and (f) any extension of, addition to, or replacement for a feature described in (a), (b), (c), (d), or (e).

3.1.17 “Central Arizona Project” or “CAP” shall mean the federal reclamation project authorized and constructed by the United States in accordance with Title III of the Colorado River Basin Project Act (43 U.S.C. § 1521, *et seq.*).

3.1.18 “Central Arizona Water Conservation District” or “CAWCD” shall mean the political subdivision of the State that is the contractor under the CAP Repayment Contract.

3.1.19 “Cibola Water” shall mean the Hopi Tribe’s entitlement to the Diversion of up to 4,278 AFY of the Fourth Priority Water described in the Hopi Tribe Existing Cibola Contract.

3.1.20 “Claimant” shall mean a Person who has filed a Statement of Claimant in the LCR Adjudication.

3.1.21 “Closed Basin” shall mean those Surface Water subwatersheds within the LCR Watershed depicted on the maps attached as Exhibits 3.1.21A and 3.1.21B.

3.1.22 “Colorado River Compact” shall mean the Colorado River Compact of 1922, as ratified and reprinted at Title 45, Chapter 7, Article 2 of the Arizona Revised Statutes.

3.1.23 “Colorado River Water” shall mean the waters of the Colorado River authorized for use within the State by: the Boulder Canyon Project Act of 1928, 43 U.S.C. §§ 617c and 617d, as amended; the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes; the Colorado River Basin Project Act of 1968, 43 U.S.C. § 1501, *et seq.*, as amended; the Contract for Delivery of Water Between the United States and the State of Arizona dated February 9, 1944; and the Decree. The definition of Colorado River Water in this Agreement and the Act shall not be used for any interpretation of: the Boulder Canyon Project Act of 1928, 43 U.S.C. §§ 617c and 617d, as amended; the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes; the Colorado River Basin Project Act of 1968, 43 U.S.C. § 1501, *et seq.*, as

amended; the Contract for Delivery of Water Between the United States and the State of Arizona dated February 9, 1944; or the Decree.

3.1.24 “Confined Aquifer” shall mean any location at which the static water level in a Well completed in the N-Aquifer rises 10 feet or more above the top of the geologic formation known as the Navajo Sandstone at the time the Well is drilled, as generally depicted on Exhibit 3.1.24. In the case of a conflict between this definition and Exhibit 3.1.24, Exhibit 3.1.24 shall control.

3.1.25 “Decree”, when used without a modifying adjective, shall mean collectively the decree of the Supreme Court of the United States in *Arizona v. California*, 376 U.S. 340 (1964), the Consolidated Decree entered on March 27, 2006, in that case, 547 U.S. 150, and any modifications thereof.

3.1.26 “De Minimis Use” shall mean a Surface Water Use for: (a) domestic purposes not to exceed one AFY; (b) stockwatering purposes; (c) wildlife purposes; or (d) an Impoundment having a storage capacity of not more than fifteen acre-feet that is used primarily for watering livestock or wildlife.

3.1.27 “Deplete” shall mean an action or process that leads to a Depletion.

3.1.28 “Depletion” shall mean: (a) in the Lower Basin, Diversions less return flows; and (b) in the Upper Basin, the quantity of consumptive use measured by human-made decreases of the virgin flow at Lee Ferry.

3.1.29 “Director” shall mean the Director of the Arizona Department of Water Resources.

3.1.30 “Diversion” shall mean an act to Divert.

3.1.31 “Divert,” “Diverting,” and “Diverted” shall mean to receive, withdraw, develop, produce or capture Water using: (a) a ditch, canal, flume, bypass, pipeline, pit, collection or infiltration gallery, conduit, Well, pump, turnout, dam, or any other mechanical device; or (b) any other human act.

3.1.32 “Domestic Use” shall mean the Diversion of Water by one or more individuals or households for purposes of: (a) drinking, cooking, laundering, and other personal comforts or necessities; (b) the irrigation of a family garden, orchard, or yard less than two acres in size per family unit or household; (c) livestock watering using tanks with a storage capacity not to exceed 5,000 gallons; or (d) the crafting of articles such as jewelry, pottery, or other traditional items by a household resident for personal use or sale.

3.1.33 “Effective Date” shall mean the date as of which this Agreement has been executed by no less than 30 of the Parties including all of the following: the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the State of Arizona, the Arizona State Land Department, the Central Arizona Water Conservation District, the Salt River Project Agricultural Improvement and Power District, and the Salt River Valley Water Users’ Association.

3.1.34 “Effluent” shall mean Water that: (a) has been used in the State for domestic, municipal, or industrial purposes, other than solely for hydropower generation; and (b) is available for re-use for any purpose, regardless of whether the Water has been treated to improve the quality of the Water.

3.1.35 “Enactment Date” shall mean the date as of which the legislation approving this Agreement has been enacted by Congress.

3.1.36 “Enforceability Date” shall mean the date on which the Secretary publishes in the Federal Register the statement of findings described in section 16 of the Act and Paragraph 14.0 of this Agreement.

3.1.37 “Exempt Well” shall mean a Well having a pump with a maximum capacity of not more than 35 GPM. For purposes of determining whether a Well is an Exempt Well, a series of Wells serving the same facility shall be considered a single Well.

3.1.38 “Exhibit” shall mean an exhibit to this Agreement as enumerated in Subparagraph 3.2.

3.1.39 “Existing Reservoir” shall mean: (a) before the final judgment and decree entered by the LCR Adjudication Court, a Reservoir existing on or before the Effective Date that is the subject of a Statement of Claimant; and (b) after the final judgment and decree entered by the LCR Adjudication Court, any Reservoir included in that decree with a priority date earlier than the Effective Date.

3.1.40 “Existing Surface Water Use” shall mean: (a) before the final judgment and decree entered by the LCR Adjudication Court, any Use of Surface Water initiated on or before the Effective Date that is the subject of a Statement of Claimant; and (b) after the final judgment and decree entered by the LCR Adjudication Court, any Use of Surface Water included in that decree with a priority date earlier than the Effective Date.

3.1.41 “Existing Well” shall mean a Non-Exempt Well that was completed or substantially completed on or before the Effective Date for the purpose of withdrawing Underground Water, and that has not been abandoned by filling or sealing the Well so as to prevent the Well, including the annular space outside the casing, from being a channel allowing the vertical movement of Underground Water.

3.1.42 “Fifth Priority Water” shall mean Fifth Priority Water as that term is defined in the Hopi Tribe Existing Cibola Contract.

3.1.43 “Fourth Priority Water” shall mean Colorado River Water available for delivery within the State for satisfaction of entitlements: (a) in accordance with contracts, Secretarial reservations, perfected rights, and other arrangements between the United States and water users in the State entered into or established subsequent to September 30, 1968, for use on federal, State, or privately owned lands in the State, in a total quantity not greater than 164,652 AFY of Diversions; and (b) after first providing for the delivery of Colorado River Water for the CAP System, including for use on Indian land, under Section 304(e) of the Colorado River Basin Project Act (43 U.S.C. § 1524(e)), in accordance with the CAP Repayment Contract.

3.1.44 “GPM” shall mean gallons per minute.

3.1.45 “Gila River Adjudication” shall mean that action pending in the Superior Court of the State, in and for the County of Maricopa, In re the General Adjudication of All Rights To Use Water in The Gila River System and Source, W-1 (Salt), W-2 (Verde), W-3 (Upper Gila), W-4 (San Pedro) (Consolidated).

3.1.46 “Gila River Adjudication Court” shall mean the Superior Court of the State, in and for the County of Maricopa, exercising jurisdiction over the Gila River Adjudication.

3.1.47 “Gila River Adjudication Decree” shall mean the judgment or decree entered by the Gila River Adjudication Court in substantially the same form as the form of judgment attached hereto as Exhibit 3.1.47.

3.1.48 “Groundwater” shall mean all water beneath the surface of the earth within the State that is not: (a) Surface Water; (b) Colorado River Water; or (c) Effluent.

3.1.49 “Historic Irrigation Diversion Capacity” shall mean Water Diverted from the Managed Washes that is determined from historical records or evidence.

3.1.50 “Hopi Allotment” shall mean any of the eleven (11) parcels allotted pursuant to Section 4 of the General Allotment Act of 1887, 24 Stat. 389, ch. 119 (formerly codified at 25 U.S.C. § 334) that are: (a) located within the exterior boundaries of the Hopi Reservation; and (b) held in trust by the United States for the benefit of one or more individual Indians under allotment record numbers AR-39, -40, -41, -42, -43, -44, -45, -46, -47, -48, and -49.

3.1.51 “Hopi Allottee” shall mean an individual Indian holding a beneficial interest in a Hopi Allotment, or an Indian Tribe holding an undivided fractional beneficial interest in a Hopi Allotment.

3.1.52 [Intentionally Omitted]

3.1.53 “Hopi Fee Land” shall mean land, other than Hopi Trust Land, that: (a) is located in the State outside the exterior boundaries of the Hopi Reservation; and (b) as of the Enforceability Date, is owned by the Hopi Tribe, whether in its own name or through an entity wholly owned or controlled by the Hopi Tribe.

3.1.54 “Hopi Industrial Park” shall mean those lands held in trust by the United States for the Hopi Tribe as provided in the Act of May 22, 1970, Pub. L. No. 91-264, § 1, 84 Stat. 260 (1970).

3.1.55 “Hopi Land” shall mean, collectively, the Hopi Reservation, Hopi Trust Land, and Hopi Fee Land.

3.1.56 “Hopi Reservation” shall mean those lands within the exterior boundaries of the “Hopi Indian Reservation” defined as District 6, and all lands withdrawn by the Executive Order of Dec. 16, 1882 and partitioned to the Hopi Tribe in accordance with the Act of Dec. 22, 1974, Pub. L. 93-531, § 4, 88 Stat. 1713 (formerly codified as amended at 25 U.S.C. § 640d-3), by Judgment of Partition, Feb. 10, 1977, *Sekaquaptewa v. MacDonald*, Case No. CIV-579-PCT-JAW (D. Ariz.), *aff’d*, 626 F.2d 113 (9th Cir. 1980), and all lands recognized as part of the Hopi Reservation in the 1934 Act Case. The foregoing definition is

more particularly set forth on the map attached as Exhibit 3.1.56. In case of a conflict between this definition and Exhibit 3.1.56, Exhibit 3.1.56 shall be demonstrative only, and this definition shall control.

3.1.57 “Hopi Tribe” shall mean the Hopi Tribe, a tribe of Hopi Indians organized under Section 16 of the Indian Reorganization Act of June 18, 1934, 48 Stat. 987 (25 U.S.C. § 476), and duly recognized by the Secretary (89 Fed. Reg. 944, 945 (Jan. 8, 2024)).

3.1.58 “Hopi Tribe Agricultural Conservation Trust Fund Account” shall mean the account created pursuant to section 11 of the Act and described in Subparagraph 12.3.3.

3.1.59 “Hopi Tribe Cibola Water” shall mean the Fourth, Fifth, and Sixth Priority Colorado River Water to which the Hopi Tribe is entitled pursuant to Subparagraphs 5.8.2 and 5.8.3.

3.1.60 “Hopi Tribe Existing Cibola Contract” shall mean Contract No. 04-XX-30-W0432 between the United States and the Hopi Tribe, as amended and in full force and effect as of the Effective Date.

3.1.61 “Hopi Tribe Groundwater Projects” shall mean the projects described in Subparagraph 12.3.1.

3.1.62 “Hopi Tribe Groundwater Projects Trust Fund Account” shall mean the account created pursuant to section 11 of the Act and described in Subparagraph 12.3.1.

3.1.63 “Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account” shall mean the account created pursuant to section 11 of the Act and described in Subparagraph 12.3.4.

3.1.64 “Hopi Tribe OM&R Trust Fund Account” shall mean the account created pursuant to section 11 of the Act and described in Subparagraph 12.3.2.

3.1.65 “Hopi Tribe Settlement Cibola Contract” shall mean the contract entered into between the United States and the Hopi Tribe pursuant to this Agreement and the Act for delivery of Hopi Tribe Cibola Water after the Enforceability Date.

3.1.66 “Hopi Tribe Upper Basin Colorado River Water” shall mean the 2,300 AFY of Upper Basin Colorado River Water allocated to the Hopi Tribe as provided in Subparagraphs 5.7 and 11.1.1 and pursuant to section 6 of the Act.

3.1.67 “Hopi Tribe Water Delivery Contract” shall mean one or more contracts entered into by the Secretary and the Hopi Tribe in accordance with this Agreement and the Act for the delivery of Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water.

3.1.68 “Hopi Trust Land” shall mean land that: (a) is located in the State outside the exterior boundaries of the Hopi Reservation; and (b) as of the Enforceability Date, is held in trust by the United States for the benefit of the Hopi Tribe.

3.1.69 “iiná bá - paa tuwaqat’si pipeline” shall mean the Water project described in Subparagraph 12.1 and section 8 of the Act.

3.1.70 “iiná bá – paa tuwaqat’si pipeline Implementation Fund Account” shall mean the account created in the Treasury of the United States pursuant to section 9 of the Act and described in Subparagraph 12.1.1.

3.1.71 “Impoundment” shall mean a human-made structure used to store Water.

3.1.72 “Industrial Use” shall mean the use of Water by any Person engaged in generating electrical energy, or making, converting, or extracting objects or materials into commercially valuable products by machinery or any other mechanical process, including the extraction, conversion, or transportation of any materials.

3.1.73 “Injury to Rights to Surface Water” shall mean, for purposes of Paragraph 8.0 only, a direct Diversion of Surface Water, other than from a Well, that materially diminishes the flows and flood flows of Surface Water on the Navajo Reservation or on a Navajo Allotment.

3.1.74 “Injury to Water Rights” shall mean an interference with, diminution of, or deprivation of Water Rights under federal, State, or other law. The term “Injury to Water Rights” does not include any injury to water quality.

3.1.75 “Injury to Water” shall mean injury to Water based on changes in or degradation of the salinity or concentration of naturally occurring chemical constituents contained in Water.

3.1.76 “Irrigation” shall mean the Use of Water on two (2) or more acres of land to produce plants or parts of plants for sale or human consumption, or for use as feed for livestock, range livestock, or poultry.

3.1.77 “Kerley Valley Project” shall mean an irrigation project that is south and southwest of Tuba City that serves both Navajo and Hopi farmers (as described in the November 28, 2000, Kerley Valley and Lower Kerley Valley report).

3.1.78 “Lake Mary Reservoirs” shall mean those Reservoirs described in the City of Flagstaff’s Abstracts set forth in Exhibit 8.2.1.1D.

3.1.79 “LCR” shall mean the Little Colorado River.

3.1.80 “LCR Adjudication” shall mean that action pending in the Superior Court of the State, in and for the County of Apache, In re: the General Adjudication of All Rights to Use Water in the Little Colorado River System and Source, CIV No. 6417.

3.1.81 “LCR Adjudication Court” shall mean the Superior Court of the State, in and for the County of Apache, exercising jurisdiction over the LCR Adjudication.

3.1.82 “LCR Decree” shall mean the judgment or decree entered by the LCR Adjudication Court in substantially the same form as the form of judgment attached hereto as Exhibit 3.1.82.

3.1.83 “LCR Watershed” shall mean lands located within the Surface Water drainage of the LCR and its tributaries in the State, as shown on the map attached as Exhibit 3.1.83.

3.1.84 “Little Colorado River Plateau Groundwater Basin” shall mean the ‘Little Colorado river plateau groundwater basin’ as that term is used in A.R.S. § 45-544.

3.1.85 “Low Technology Watershed Restoration” shall mean installation, construction, maintenance, repair, replacement, and relocation of low technology structures (for example, one-rock dams, wicker weirs, rock or picket baffles, post vanes, check dams, gully plugs, bagged earth, straw bales or baffles, media lunas, Zuni bowls, berms, and trincheras) in the Managed Washes and Minor Tributary Washes for Watershed Restoration purposes.

3.1.86 “Lower Basin” shall mean the ‘Lower Basin’ as defined in Article II(g) of the Colorado River Compact.

3.1.87 “Lower LCR Watershed” shall mean that portion of the LCR Watershed that is depicted as the “Lower LCR Watershed” on the map attached hereto as Exhibit 3.1.83, excluding the Navajo Reservation and the Hopi Reservation. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 3.1.87 shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

3.1.88 “Main Washes” shall mean the mainstem of the five washes north of, and tributary to, the Little Colorado River, which flow across both the Navajo Reservation and the Hopi Reservation: Moenkopi, Dinnebito, Oraibi, Polacca, and Jeddito (also known as Jadito per the United States Geological Survey).

3.1.89 “Major Tributary Washes” shall mean the mainstem of Shonto, Begashibito, and Wepo washes, which are tributary to the Main Washes.

3.1.90 “Managed Washes” shall mean the mainstems of the Main Washes and the Major Tributary Washes. These Managed Washes are shown on the map attached hereto as Exhibit 7.1.1.2D.

3.1.91 “McHood Reservoir”, also known as “Clear Creek Reservoir”, shall mean that Reservoir located on Clear Creek owned by the City of Winslow, as described in the City of Winslow’s Abstract set forth in Exhibit 8.2.1.1J.

3.1.92 “Member” or “Members” shall mean any person or persons duly enrolled as a member or members of the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe.

3.1.93 “Minor Tributary Washes” shall mean all washes tributary to the Managed Washes, other than the Major Tributary Washes.

3.1.94 “Municipal Use” shall mean all non-Irrigation Uses of Water supplied by a Municipal Water Provider.

3.1.95 “Municipal Water Provider” shall mean a city, town, private water company, specially designated homeowners association, any special taxing district established pursuant to Title 48 of the Arizona Revised Statutes, or a Tribe or any of its entities or enterprises, that supplies Water for Municipal Use.

3.1.96 “N-Aquifer” shall mean the Navajo Aquifer depicted on Exhibit 3.1.96.

3.1.97 “Navajo Allotment” shall mean a parcel of land patented pursuant to Section 1 of the General Allotment Act of 1887, 24 Stat. 388, ch. 119 (formerly codified at 25 U.S.C. § 331): (a) originally allotted to an individual identified in the allotting document as a Navajo Indian; (b) located within the exterior boundaries of the Navajo Reservation; and (c) held in trust by the United States for the benefit of one or more individual Indians.

3.1.98 “Navajo Allottee” shall mean an individual Indian holding a beneficial interest in a Navajo Allotment, or an Indian Tribe holding an undivided fractional beneficial interest in a Navajo Allotment.

3.1.99 “Navajo Fee Land” shall mean land, other than Navajo Trust Land, that: (a) is located in the State; (b) is located outside the exterior boundaries of the Navajo Reservation; and (c) as of the Enforceability Date, is owned by the Navajo Nation, whether in its own name or through an entity wholly owned or controlled by the Navajo Nation.

3.1.100 “Navajo Land” shall mean, collectively, the Navajo Reservation, Navajo Trust Land, and Navajo Fee Land.

3.1.101 “Navajo Nation” shall mean the Navajo Nation, a body politic and federally recognized Indian nation, 89 Fed. Reg.944, 945 (Jan. 8, 2024), also known variously as the ‘Navajo Tribe’, the ‘Navajo Tribe of Arizona, New Mexico & Utah’, the ‘Navajo Tribe of Indians’, and other similar names, and includes all bands of Navajo Indians and chapters of the Navajo Nation.

3.1.102 “Navajo Nation Agricultural Conservation Trust Fund Account” shall mean the account created pursuant to section 10 of the Act and described in Subparagraph 12.2.4.

3.1.103 “Navajo Nation Cibola Water” shall mean the Navajo Nation’s entitlement to the diversion of up to 100 AFY of Fourth Priority Water at the same location and for the same Uses described in the Hopi Tribe Existing Cibola Contract or the delivery and consumptive use of up to 71.5 AFY at locations and for uses within the State other than as described in the Existing Hopi Tribe Cibola Contract, which shall have been assigned and transferred by the Hopi Tribe from its Cibola Water under the Hopi Tribe Existing Cibola Contract to the Navajo Nation.

3.1.104 “Navajo Nation Fourth Priority Water” shall mean the Diversion right to 3,500 AFY of Fourth Priority Water reserved for use in a Navajo-Hopi Indian water rights settlement under Paragraph 11.3 of the Arizona Water Settlement Agreement among the United States, the State of Arizona, and the Central Arizona Water Conservation District, as authorized by Section 106(a)(1) and (2) of Public Law 108-451, and allocated to the Navajo Nation as provided in Subparagraphs 4.9 and 10.1 and pursuant to section 6 of the Act.

3.1.105 “Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account” shall mean the account created pursuant to section 10 of the Act and described in Subparagraph 12.2.5.

3.1.106 “Navajo Nation OM&R Trust Fund Account” shall mean the account created pursuant to section 10 of the Act and described in Subparagraph 12.2.2.

3.1.107 “Navajo Nation Renewable Energy Trust Fund Account” shall mean the account created pursuant to section 10 of the Act and described in Subparagraph 12.2.3.

3.1.108 “Navajo Nation Upper Basin Colorado River Water” shall mean the 44,700 AFY of Upper Basin Colorado River Water allocated to the Navajo Nation as provided in Subparagraphs 4.7 and 10.1 and pursuant to section 6 of the Act.

3.1.109 “Navajo Nation Water Delivery Contract” shall mean one or more contracts entered into by the Secretary and the Navajo Nation in accordance with this Agreement and the Act for the delivery of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water.

3.1.110 “Navajo Nation Water Projects” shall mean the projects described in Subparagraph 12.2.1.

3.1.111 “Navajo Nation Water Projects Trust Fund Account” shall mean the account created pursuant to section 10 of the Act and described in Subparagraph 12.2.1.

3.1.112 “Navajo Reservation” shall mean those lands shown on the map attached hereto as Exhibit 3.1.112a, which are: within the exterior boundaries of the “Navajo Indian

Reservation” in the State, defined by the Act of June 14, 1934, ch. 521, 48 Stat. 960; all lands withdrawn by the Executive Order of Dec. 16, 1882 and partitioned to the Navajo Nation in accordance with the Act of Dec. 22, 1974, Pub. L. 93-531, § 8(b), 88 Stat. 1713 (previously codified as amended at 25 U.S.C. § 640d-7(b)), by Judgment of Partition, Feb. 10, 1977, *Sekaquaptewa v. MacDonald*, Case No. CIV-579-PCT-JAW (D. Ariz.), *aff’d*, 626 F.2d 113 (9th Cir. 1980); all lands taken into trust as a part of the Navajo Reservation pursuant to the Act of Dec. 22, 1974, Pub. L. No. 93-531, § 11, 88 Stat. 1713, as amended (previously codified at 25 U.S.C. § 640d-10, a copy of which is attached as Exhibit 3.1.112b); and excepting all lands within the Hopi Reservation as defined in Subparagraph 3.1.56 and the San Juan Southern Paiute Reservation as defined in Subparagraph 3.1.148; provided, however, that if lands are taken in to trust as part of the Navajo Reservation pursuant to the Act of December 22, 1974, subsequent to the Effective Date, such lands shall be considered part of the Navajo Reservation as if they had been reservation lands prior to the Effective Date, except as provided in Subparagraphs 3.1.12, 3.1.13, 3.1.87, 3.1.170, 4.1.5, 4.1.6, 4.6.1, and 8.1.1. In the case of a conflict between this definition and Exhibit 3.1.112a, Exhibit 3.1.112a shall be demonstrative only, and this definition shall control.

3.1.113 “Navajo Tribal Utility Authority” or “NTUA” shall mean the enterprise established by the Navajo Nation found at 21 N.N.C. § 1 *et seq.*, or its successor agency or entity.

3.1.114 “Navajo Trust Land” shall mean land that: (a) is located in the State; (b) is located outside the exterior boundaries of the Navajo Reservation; and (c) as of the Enforceability Date, is held in trust by the United States for the benefit of the Navajo Nation.

3.1.115 “New Reservoir” means a Reservoir that is constructed after the Effective Date, including any additional storage capacity constructed in a Reservoir after the Effective Date. A “New Reservoir” shall not include a Reservoir that is modified, reconstructed, or replaced after the Effective Date as provided in Subparagraphs 8.6.4, 8.8.2, and 8.8.3, or an Impoundment that is modified or enlarged as provided in Subparagraph 8.6.5.

3.1.116 “New Surface Water Use” shall mean a Use of Surface Water initiated after the Effective Date.

3.1.117 “New Well” shall mean a Non-Exempt Well that is completed after the Effective Date for the purpose of withdrawing Underground Water, excluding a replacement Well drilled pursuant to Subparagraph 9.4.2.

3.1.118 “Non-Exempt Well” shall mean a Well with a maximum capacity greater than 35 GPM.

3.1.119 “Norviel Decree” shall mean the final decree of the Superior Court of the State, in and for the County of Apache, in *The St. John's Irrigation Company and the Meadows Reservoir Irrigation Company, et al. v. Round Valley Water Storage & Ditch*

Company, Eagar Irrigation Company, Springerville Water Right and Ditch Company, et al., Case No. 569 (Apr. 29, 1918), and any modifications thereof.

3.1.120 “Off-Reservation” shall mean lands located in the State outside the exterior boundaries of the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Reservation.

3.1.121 “OM&R” shall mean operation, maintenance, and replacement.

3.1.122 “Paragraph” shall mean a numbered paragraph of this Agreement, including all Subparagraphs in such Paragraph.

3.1.123 “Party” or “Parties” shall mean a Person who is a signatory or Persons who are signatories to this Agreement.

3.1.124 "Pasture Canyon" shall mean the incised wash tributary to Moenkopi wash that extends approximately 4.5 miles in length. Approximately 3.0 miles of the canyon, beginning from Highway 160 (NW ¼ SW ¼ Section 27 T32N R11E) and moving north, are located within the external boundaries of the Hopi Reservation. The north most 1.5-mile section of the canyon (ending in the NE ¼ Section 3 T32N R11E) is located on the Navajo Reservation. Pasture Canyon, including the portion located within the external boundaries of the Hopi Reservation, and the portion located on the Navajo Reservation, is labeled and generally identified on Exhibit 7.2.3.5.4.

3.1.125 “Peabody Impoundments” shall mean the Impoundments described and depicted in Exhibit 3.1.125.

3.1.126 “Permanent Surface Water Control Structure” shall mean any water control structure: (a) over fifteen feet in height, as measured from the lowest elevation of the downstream toe at its intersection with the natural ground surface to either the spillway crest, or the crest of dam if a spillway is not present; or (b) with active storage of more than seventy-five acre-feet.

3.1.127 “Person” shall mean: an individual; public or private corporation; company; partnership; joint venture; firm; association; society; estate or trust; any other private organization or enterprise; the United States; any Indian tribe; any state, territory, or country; any governmental entity; and any political subdivision or municipal corporation organized under or subject to the constitution and laws of the State. This definition includes the officers, directors, agents, insurers, representatives, employees, attorneys, assigns, subsidiaries, affiliates, enterprises, legal representatives, assigns, predecessors, and successors in interest and their heirs, of any Person.

3.1.128 “Points of Access” shall mean one or more locations where the City of Flagstaff provides access to Water delivered from the Red Gap Ranch Regional Pipeline Project.

3.1.129 “Prior Written Consent” shall mean ‘Prior Written Consent’ as provided in Subparagraph 7.5.1.

3.1.130 “Public Domain Allottee” shall mean an individual Indian or an Indian tribe holding a beneficial interest in a Public Domain Allotment outside the Navajo Reservation or a Public Domain Allotment within the Navajo Reservation.

3.1.131 “Public Domain Allotments within the Navajo Reservation” shall mean lands allotted to individual Indians from the public domain that are (1) held in trust by the United States for the benefit of one or more individual Indians or Indian tribes and (2) located within the exterior boundaries of the Navajo Reservation. A list of Public Domain Allotments within the Navajo Reservation is attached hereto as Exhibit 3.1.131.

3.1.132 “Public Domain Allotments outside the Navajo Reservation” shall mean the 51 parcels of land allotted to individual Indians from the public domain pursuant to Section 4 of the General Allotment Act of 1887, 24 Stat. 388, ch. 119 that are (1) held in trust by the United States for the benefit of one or more individual Indians or Indian tribes and (2) located outside the exterior boundaries of the Navajo Reservation and the Hopi Reservation, as depicted on the map attached hereto as Exhibit 3.1.132A. Abstracts for the 51 Public Domain Allotments outside the Navajo Reservation are attached hereto as Exhibit 3.1.132B.

3.1.133 “Reclamation” shall mean the United States Bureau of Reclamation.

3.1.134 “Red Gap Ranch” shall mean those fee lands owned by the City of Flagstaff, located approximately 35 miles east of the City of Flagstaff along Interstate 40, as depicted in Exhibit 3.1.134A, and more particularly described in Exhibit 3.1.134B. In

case of a conflict between the map in Exhibit 3.1.134A and the legal description in Exhibit 3.1.134B, the legal description in Exhibit 3.1.134B shall control.

3.1.135 “Red Gap Ranch Regional Pipeline Project” shall mean the City-owned and operated infrastructure, pumping and storage facilities, treatment facilities, and Points of Access necessary for the City of Flagstaff to withdraw and deliver Water from Red Gap Ranch or from locations south of Red Gap Ranch to the City of Flagstaff and Points of Access for Municipal Use.

3.1.136 “Rehabilitation” shall mean the replacement in kind with comparable works, including on-farm or system water conservation measures and technologically improved components, so long as the Diversion capacity, surface storage capacity, or irrigated acreage is not increased.

3.1.137 “Reservoir” shall mean an Impoundment of Surface Water that is not a De Minimis Use.

3.1.138 “Restricted Zone” shall mean lands depicted on the map attached hereto as Exhibit 3.1.138 within one-half mile of either side of the boundary line between the Hopi Reservation and the Navajo Reservation. In the case of conflict between this definition and Exhibit 3.1.138, Exhibit 3.1.138 shall control.

3.1.139 “San Juan Southern Paiute Fee Land” shall mean land, other than San Juan Southern Paiute Trust Land, that: (a) is located in the State; (b) is located outside the exterior boundaries of the San Juan Southern Paiute Reservation; and (c) as of the

Enforceability Date, is owned by the San Juan Southern Paiute Tribe, whether in its own name or through an entity wholly owned or controlled by the San Juan Southern Paiute Tribe.

3.1.140 “San Juan Southern Paiute Groundwater Projects” shall mean the projects described in Subparagraph 12.4.1 and section 12 of the Act.

3.1.141 “San Juan Southern Paiute Land” shall collectively mean the San Juan Southern Paiute Southern Area, San Juan Southern Paiute Trust Land, and San Juan Southern Paiute Fee Land.

3.1.142 “San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account” shall mean the account created pursuant to section 12 of the Act and described in Subparagraph 12.4.3.

3.1.143 “San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account” shall mean the account created pursuant to section 12 of the Act and described in Subparagraph 12.4.1.

3.1.144 “San Juan Southern Paiute Tribe OM&R Trust Fund Account” shall mean the account created pursuant to section 12 of the Act and described in Subparagraph 12.4.2.

3.1.145 “San Juan Southern Paiute Trust Land” shall mean land that: (a) is located in the State; (b) is located outside the exterior boundaries of the San Juan Southern Paiute Reservation; and (c) as of the Enforceability Date, is held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe.

3.1.146 “San Juan Southern Paiute Northern Area” shall mean the land depicted on the map attached hereto as Exhibit 3.1.146.

3.1.147 “San Juan Southern Paiute Southern Area” shall mean the land depicted on the map attached hereto as Exhibit 3.1.147.

3.1.148 “San Juan Southern Paiute Reservation” shall mean the approximately 5,400 acres of land described in Paragraph 6.0 as the San Juan Southern Paiute Northern Area and the San Juan Southern Paiute Southern Area, as depicted in the maps attached hereto as Exhibit 3.1.146 and Exhibit 3.1.147.

3.1.149 “San Juan Southern Paiute Tribe” shall mean the San Juan Southern Paiute Tribe, a body politic and federally recognized Indian tribe, 89 Fed. Reg. 944, 946 (Jan. 8, 2024).

3.1.150 “Secretary” shall mean the Secretary of the United States Department of the Interior or the Secretary’s authorized designee.

3.1.151 “Sixth Priority Water” shall mean Sixth Priority Water as that term is defined in the Hopi Tribe Existing Cibola Contract.

3.1.152 “State” shall mean the State of Arizona.

3.1.153 “Statement of Claimant” shall mean a statement of claimant filed in the LCR Adjudication and bearing a file number beginning with the number ‘39’.

3.1.154 “Subparagraph” shall mean a numbered subparagraph of this Agreement.

3.1.155 “Surface Water” shall mean all water in the State that is appropriable under State law. “Surface Water” shall not include Colorado River Water.

3.1.156 “Three Canyon Area” shall mean the Clear Creek, Chevelon Creek, and Jacks Canyon subwatersheds of the LCR Watershed, as depicted on the map attached hereto as Exhibit 3.1.156. In the case of a conflict between this definition and Exhibit 3.1.156, Exhibit 3.1.156 shall control.

3.1.157 “Treaty” shall mean the Articles of Treaty and Agreement entered into by the Navajo Nation and the San Juan Southern Paiute Tribe to settle land claims and other disputes, as executed on March 18, 2000.

3.1.158 “Treaty Addendum” shall mean the Addendum to the Treaty entered into by the Navajo Nation and the San Juan Southern Paiute Tribe on May 7, 2004.

3.1.159 “Tribe” shall mean the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe.

3.1.160 “Tribes” shall mean the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe.

3.1.161 “Turquoise Ranch” shall mean the 373.73 acres of land in Coconino County as described in Exhibit 3.1.161.

3.1.162 “Twin Arrows” shall mean the 405.61 acres of land in Coconino County as described in Exhibit 3.1.162.

3.1.163 “Underground Water” shall mean all water beneath the surface of the Earth, within the State, other than Effluent and Colorado River Water, regardless of its legal characterization as appropriable or non-appropriable under federal, State, or other law.

3.1.164 “United States” or “United States of America” shall mean the United States acting as trustee for the Tribes, their Members, Hopi Allottees, and Navajo Allottees, except as otherwise expressly provided. When the term ‘United States’ or ‘United States of America’ is used in reference to a particular agreement or contract, the term shall mean the United States acting in the capacity as set forth in such agreement or contract.

3.1.165 “Upper Basin” shall mean ‘Upper Basin’ as defined in Article II(f) of the Colorado River Compact.

3.1.166 “Upper Basin Colorado River Water” shall mean the 50,000 AFY of consumptive use of Colorado River Water apportioned to the State in the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes.

3.1.167 “Use” shall mean any beneficial use, including instream flow, recharge, storage, recovery, or any other use recognized as beneficial under applicable law.

3.1.168 “Water”, when used without a modifying adjective, shall mean Groundwater, Surface Water, Colorado River Water, or Effluent.

3.1.169 “Water Right” shall mean any right in or to Groundwater, Surface Water, Colorado River Water, or Effluent under federal, State or other law.

3.1.170 “Watershed of the LCR” shall mean the Silver Creek watershed, the upper Little Colorado River watershed or the Lower LCR Watershed, as depicted on the map in Exhibit 3.1.83, but excluding the Navajo Reservation and the Hopi Reservation.

Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 3.1.170, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

3.1.171 “Water Supply Contract” shall mean any agreement for Water service required by the City of Flagstaff that will address and include the operation, maintenance, energy, replacement, treatment, and capital expenses for the Red Gap Ranch Regional Pipeline Project, and other agreements regarding scheduling, capacity, reciprocal service, Water treatment, conveyance, temporary or permanent shortages, and other components for Water delivery.

3.1.172 “Watershed Restoration” shall mean efforts to: (a) support Akchin and flood-water farming; (b) improve soil health and moisture levels; (c) increase forage; (d) improve habitat; (e) prevent erosion and otherwise facilitate sediment retention; (f) slow Water flow; (g) induce sediment deposition; (h) increase Water spreading over floodplain; (i) induce meandering and mitigate erosive forces; (j) increase base flow; or (k) increase Underground Water recharge.

3.1.173 “Well” shall mean a human-made opening in the Earth through which Underground Water may be withdrawn or obtained.

3.1.174 “Year” shall mean a calendar year.

3.1.175 “Zuni Indian Tribe” or “Zuni Tribe” shall mean the body politic and federally recognized Indian tribe of that name, 89 Fed. Reg. 944, 947 (Jan. 8, 2024).

### 3.2 EXHIBITS

**4.0 NAVAJO NATION WATER RIGHTS**

The Navajo Nation, Navajo Allottees, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, shall have the rights to use Water as described in this Paragraph.

**4.1 GENERALLY APPLICABLE PROVISIONS**

4.1.1 The Navajo Nation’s Water Rights described in this Paragraph 4.0 may be used for any purpose consistent with this Agreement, the LCR Decree, and the Gila River Adjudication Decree.

4.1.2 The United States shall enter into contracts with the Navajo Nation, as necessary, for delivery of any of the Water Rights described in this Paragraph 4.0.

4.1.3. The Navajo Nation shall provide ADWR with a copy of any proposed contract for the Off-Reservation lease, exchange or storage of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water at least sixty (60) days prior to execution to allow ADWR to determine whether the contract complies with the terms of this Agreement and the Act. The proposed contract may have financial information redacted.

4.1.4 Water Rights Held in Trust. The Water Rights described in Subparagraphs 4.2, 4.4, 4.5, 4.6, 4.7, and 4.9 shall be held in trust by the United States for the benefit of the Navajo Nation and Navajo Allottees. Water Rights held in trust by the United States for the benefit of the Navajo Nation and Navajo Allottees shall not be subject to loss through non-use, forfeiture, or abandonment.

4.1.5 The Navajo Nation shall have the right to store in a Reservoir on the Navajo Reservation any Water supply that it has a right to use, in accordance with applicable tribal and federal laws and subject to this Agreement. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 4.1.5, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

4.1.6 Except as provided in Paragraph 7.0, nothing in this Agreement shall be construed to prohibit the Navajo Nation from initiating New Surface Water Uses for Irrigation by means of direct Diversion of Surface Water on the Navajo Reservation. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 4.1.6, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

## **4.2 UNDERGROUND WATER**

The Navajo Nation, and the United States acting as trustee for the Navajo Nation and the Navajo Allottees, shall have the right to all Underground Water on the Navajo Reservation, subject to the provisions on the Use of the N-Aquifer described in Subparagraph 7.2.

## **4.3 EFFLUENT**

4.3.1 The Navajo Nation shall have the right to Effluent developed on the Navajo Reservation, which may be used for such purposes as the Navajo Nation may determine.

4.3.2 Effluent developed by the Navajo Nation on lands held in trust by the United States for the benefit of the Navajo Nation, but located outside of the Navajo Reservation, or on Public Domain Allotments outside the Navajo Reservation may be used on the Navajo Reservation or on lands held in trust by the United States for the benefit of the Navajo Nation or on Public Domain Allotments outside the Navajo Reservation for such purposes as the Navajo Nation may determine, subject to applicable law.

4.3.3 Effluent developed by the Navajo Nation on land owned in fee by the Navajo Nation, but located outside of the Navajo Reservation, may be used by the Navajo Nation for such purposes as the Navajo Nation may determine, subject to State law.

## **4.4 SPRINGS**

The Navajo Nation, and the United States acting as trustee for the Navajo Nation and the Navajo Allottees, shall have the right to all springs on the Navajo Reservation, subject to the provisions in Paragraph 7.0.

#### **4.5 LITTLE COLORADO RIVER TRIBUTARIES**

4.5.1 The Navajo Nation shall have the right to Divert and Deplete all Surface Water that flows within the Navajo Reservation in water courses north of and tributary to the LCR, subject to the provisions of Subparagraph 7.1, and provided that such Diversions and Depletions shall not interfere with or diminish Existing Surface Water Uses.

4.5.2 The Navajo Nation shall have the right to Divert and Deplete all Surface Water that reaches the Navajo Reservation in water courses south or west of and tributary to the LCR, provided that such Diversions and Depletions shall not interfere with or diminish Existing Surface Water Uses.

#### **4.6 LITTLE COLORADO RIVER MAINSTEM**

4.6.1 The Navajo Nation shall have the right to Divert and Deplete any Surface Water of the LCR mainstem that reaches the Navajo Reservation. The physical withdrawal of Water from the alluvium of the LCR on the Navajo Reservation by the Navajo Nation, Navajo Allottees, or the United States acting as trustee for the Navajo Nation and Navajo Allottees, shall be considered to be a Diversion of Surface Water. Between 2001 and 2021, the average United States Geological Survey gage flow of the LCR near Winslow, Arizona, that reached the Navajo Reservation was approximately 122,000 AFY. Nothing in this Subparagraph shall be construed as a guarantee that such quantity will reach the Navajo Reservation. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Subparagraph 4.6.1, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

4.6.2 The Navajo Nation shall have the right to Divert and Deplete up to 40,780 AFY of Surface Water from the LCR in the quantities and with the priorities described below:

<b>HISTORIC PROJECT (Locations described in Exhibit 4.6.2)</b>	<b>ACREAGE (acres)</b>	<b>DIVERSION QUANTITY (AFY)</b>	<b>PRIORITY</b>
Beaver Farms	99	495	Nov. 14, 1901
Bird Springs	1673	8365	Nov. 14, 1901
Black Falls	1460	7300	Jan. 8, 1900
Cameron Farms	154	770	Jan. 8, 1900
	20	100	May 7, 1917
	5	20	July 14, 1934
Grand Falls	191	955	Nov. 14, 1901
Leupp Farms	1900	9500	Nov. 14, 1901
North Leupp	69	345	Nov. 14, 1901
Sunrise Fields	407	2035	Nov. 14, 1901
	1019	5095	July 14, 1934
Tolchico	359	1795	Nov. 14, 1901
Scattered Fields	318	1590	Jan. 8, 1900
	370	1850	Nov. 14, 1901
	113	565	July 14, 1934

4.6.3 Neither the Navajo Nation, nor the United States acting as trustee for the Navajo Nation or Navajo Allottees, shall make calls or exercise rights of priority, in the LCR

Adjudication or any other judicial or administrative proceeding, against upstream or downstream Off-Reservation Uses of Water in the LCR Watershed with priority dates earlier than the Effective Date to satisfy the Navajo Nation's historic, existing, and future Uses.

4.6.4 In order to protect its right to the flows of the LCR that reach the Navajo Reservation, as set forth in Subparagraph 4.6.2, and except as provided in Paragraph 8.0, the Navajo Nation or the United States acting as trustee for the Navajo Nation or Navajo Allottees, and in consultation with the Navajo Nation, may make calls and exercise rights of priority against upstream or downstream Off-Reservation New Surface Water Uses in the LCR Watershed.

4.6.5 Neither the Navajo Nation, nor the United States acting as trustee for the Navajo Nation or Navajo Allottees, shall make calls or exercise rights of priority for instream flow Uses.

4.6.6 For Water described in Subparagraph 4.6.2, the Navajo Nation may forbear its senior priority to junior users Off-Reservation pursuant to State law.

#### **4.7 NAVAJO NATION UPPER BASIN COLORADO RIVER WATER**

4.7.1 The State expressly agrees to the allocation of Upper Basin Colorado River Water to the Navajo Nation as provided in this Subparagraph 4.7 and pursuant to section 6 of the Act.

4.7.2 The Navajo Nation shall have the right to 44,700 AFY of Upper Basin Colorado River Water.

4.7.3 The Navajo Nation shall have the right to Divert Navajo Nation Upper Basin Colorado River Water in Arizona, Utah, and New Mexico and to transport Navajo Nation Upper Basin Colorado River Water for Use only within the State.

4.7.4 The Navajo Nation shall have the right to Navajo Nation Upper Basin Colorado River Water for Use in the Upper Basin and the Lower Basin in the State.

4.7.5 The Navajo Nation shall have the right to store Navajo Nation Upper Basin Colorado River Water in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir, in New Mexico, for Use in the State. Any storage of Navajo Nation Upper Basin Colorado River Water in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir shall be credited against the State's Upper Basin apportionment in the year in which the Diversion for storage in the Reservoir occurs. Such Water shall be accounted for and reported by the Secretary separately from any other Water stored in the Navajo Reservoir and the Frank Chee Willetto Sr. Reservoir.

4.7.6 The Navajo Nation may store Navajo Nation Upper Basin Colorado River Water at underground storage facilities or Groundwater savings facilities located: (a) within the Navajo Reservation in accordance with Navajo law, or State law if mutually agreed to by the Navajo Nation and the State; (b) on any other Indian reservation located in the State in accordance with applicable law; and (c) within the State and outside of any Indian reservation in accordance with State law. The Navajo Nation may assign any long-term storage credits accrued as a result of storage under this Subparagraph in accordance with applicable law. Any Water stored pursuant to tribal law may only be recovered on the Indian reservation where the Water was stored.

4.7.7 The Navajo Nation shall have the right to use the Colorado River and the San Juan River as a conveyance mechanism to convey Navajo Nation Upper Basin Colorado River Water from the Upper Basin to the Lower Basin for Use within the State.

4.7.8 With the approval of the Secretary, the Navajo Nation may lease or exchange any portion of Navajo Nation Upper Basin Colorado River Water for Use in the Upper Basin or Lower Basin in the State. Such leased or exchanged Navajo Nation Upper Basin Colorado River Water shall be deemed a federal resource held in trust for the benefit of the Navajo Nation to which the lessee or exchanging party shall acquire only a leasehold or limited interest for the term of the lease or exchange agreement. By leasing or exchanging such Water, the Navajo Nation shall not forfeit or abandon or lose to non-use its rights to Navajo Nation Upper Basin Colorado River Water. A lease or exchange agreement under this Subparagraph shall provide that the Water received from the Navajo Nation shall be used in accordance with applicable law. The non-use of all or any portion of Navajo Nation Upper Basin Colorado River Water by a lessee or exchange party shall not result in the loss through non-use, forfeiture, or abandonment of any portion of the Navajo Nation Upper Basin Colorado River Water.

4.7.9 The Navajo Nation, or any Person who leases or exchanges Navajo Nation Upper Basin Colorado River Water, may transport such Water through the CAP System in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP System to transport water other than CAP water.

#### **4.8 NAVAJO NATION CIBOLA WATER**

4.8.1 Pursuant to the assignment, transfer, and assumption of rights, interests, and obligations described in this Subparagraph 4.8.1, the Navajo Nation shall have the right to Divert and consumptively use: (a) 100 AFY of Cibola Water at the location and for the same Use as exists in the Hopi Tribe Existing Cibola Contract; or (b) 71.5 AFY of Cibola Water at locations and for uses other than as described in the Hopi Tribe Existing Cibola Contract. Effective as of the Enforceability Date:

4.8.1.1 The Hopi Tribe hereby assigns and transfers to the Navajo Nation all rights, interests, and obligations under the Hopi Tribe Existing Cibola Contract for a Diversion of up to 100 AFY of Cibola Water;

4.8.1.2 The Hopi Tribe hereby relinquishes all of the Hopi Tribe's rights, interests, and obligations under the Hopi Tribe Existing Cibola Contract for a Diversion of up to 100 AFY of Cibola Water; and

4.8.1.3 The Navajo Nation hereby assumes all of the Hopi Tribe's rights to, interests in, and obligations for 100 AFY of Cibola Water, which equates to: (a) a volume of 100 AFY when the Navajo Nation Diverts the Water at the same location and for the same Use as exists in the Hopi Tribe Existing Cibola Contract; or (b) 71.5 AFY of Navajo Nation Cibola Water, at locations and for uses other than as described in the Existing Hopi Tribe Cibola Contract.

4.8.1.4 The Hopi Tribe and the Navajo Nation shall further memorialize the assignment, transfer, and assumption described in this Subparagraph by executing and delivering such further documentation as may reasonably be required by

Reclamation, including an assignment and transfer of a portion of the entitlement relating to the Hopi Tribe Existing Cibola Contract.

4.8.2 Pursuant to Subparagraph 4.8 and as authorized in section 6 of the Act, the State recommends the allocation to the Navajo Nation of 100 AFY of Cibola Water, which equates to a volume of: (a) 100 AFY when the Navajo Nation Diverts the Water at the same location and for the same Use as exists in the Hopi Tribe Existing Cibola Contract; or (b) 71.5 AFY of Navajo Nation Cibola Water at locations and for Uses other than as described in the Hopi Tribe Existing Cibola Contract.

4.8.3 The Navajo Nation shall have the right to Navajo Nation Cibola Water for Use in the Upper Basin and the Lower Basin in the State. The Navajo Nation shall have the right to Divert Navajo Nation Cibola Water in Arizona, Utah, and New Mexico, and to transport Navajo Nation Cibola Water for Use only within the State pursuant to the Navajo Nation Water Delivery Contracts to be included as exhibits to this Agreement pursuant to Subparagraph 14.1.1.2.

4.8.4 The Navajo Nation shall have the right to store Navajo Nation Cibola Water in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico, for Use in the State. Any storage of Navajo Nation Cibola Water in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir shall be credited against the State's Lower Basin apportionment in the year in which the Diversion for storage in the Navajo Reservoir and Frank Chee Willetto, Sr. Reservoir occurs. Such Navajo Nation Cibola Water shall be accounted for and reported by the Secretary separately from any other water stored in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir.

4.8.5 The Navajo Nation may store Navajo Nation Cibola Water at underground storage facilities or Groundwater savings facilities located: (a) within the Navajo Reservation in accordance with Navajo law, or State law if mutually agreed to by the Navajo Nation and the State; (b) on any other Indian reservation located in the State in accordance with applicable law; and (c) within the State and outside of any Indian reservation in accordance with State law. The Navajo Nation may assign any long-term storage credits accrued as a result of storage under this Subparagraph in accordance with applicable law. Any Water stored pursuant to tribal law may only be recovered on the Indian reservation where the Water was stored.

4.8.6 With approval of the Secretary, the Navajo Nation may lease or exchange any portion of Navajo Nation Cibola Water for Use in the Upper Basin and Lower Basin of the State, to which the lessee or exchange party shall acquire only a leasehold or limited interest for the term of the lease or exchange agreement. By leasing or exchanging Navajo Nation Cibola Water, the Navajo Nation shall not forfeit, abandon, or lose to non-use its rights to Navajo Nation Cibola Water. The non-use of all or any portion of Navajo Nation Cibola Water by a lessee or exchange party shall not result in the loss through non-use, forfeiture, or abandonment of any portion of Navajo Nation Cibola Water. A lease or exchange agreement under this Subparagraph shall provide that Navajo Nation Cibola Water shall be used in accordance with applicable law.

4.8.7 The Navajo Nation, or any Person who leases or exchanges Navajo Nation Cibola Water, may transport such Water through the CAP System in accordance with all

laws of the United States and the agreements between the United States and CAWCD governing the use of CAP System to transport water other than CAP water.

#### **4.9 NAVAJO NATION FOURTH PRIORITY WATER**

4.9.1 The State recommends the allocation of Fourth Priority Colorado River Water to the Navajo Nation as provided in this Subparagraph 4.9 and pursuant to section 6 of the Act.

4.9.2 The Navajo Nation shall have the right to Divert up to 3,500 AFY of Fourth Priority Water. The Navajo Nation shall have the right to Divert Navajo Nation Fourth Priority Water in Arizona, Utah, and New Mexico and to transport Navajo Nation Fourth Priority Water for Use only within the State.

4.9.3 The Navajo Nation shall have the right to Navajo Nation Fourth Priority Water for Use in the Upper Basin and the Lower Basin in the State.

4.9.4 The Navajo Nation shall have the right to store Navajo Nation Fourth Priority Water in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico, for Use in the State. Any storage of Navajo Nation Fourth Priority Water shall be credited against the State's Lower Basin apportionment in the year in which the Diversion for storage in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir occurs. Such Navajo Nation Fourth Priority Water shall be accounted for and reported by the Secretary separately from any other water stored in the Navajo Reservoir and Frank Chee Willetto, Sr. Reservoir.

4.9.5 The Navajo Nation may store Navajo Nation Fourth Priority Water at underground storage facilities or Groundwater savings facilities located: (a) within the Navajo Reservation in accordance with Navajo law, or State law if mutually agreed to by the Navajo Nation and the State; (b) on any other Indian reservation located in the State in accordance with applicable law; and (c) within the State and outside of any Indian reservation in accordance with State law. The Navajo Nation may assign any long-term storage credits accrued as a result of storage under this Subparagraph in accordance with applicable law. Any Water stored pursuant to tribal law may only be recovered on the Indian reservation where the Water was stored.

4.9.6 With approval of the Secretary, the Navajo Nation may lease or exchange any portion of Navajo Nation Fourth Priority Water for Use in the Upper Basin or Lower Basin in the State. Such leased or exchanged Navajo Nation Fourth Priority Water shall be deemed a federal resource held in trust for the benefit of the Navajo Nation to which the lessee or exchanging parties shall acquire only a leasehold or limited interest for the term of the lease or exchange agreement. By leasing or exchanging such Water, the Navajo Nation shall not forfeit or abandon or lose to non-use its rights to Navajo Nation Fourth Priority Water. A lease or exchange agreement under this Subparagraph shall provide that the Water received from the Navajo Nation shall be used in accordance with applicable law. The non-use of all or any portion of Navajo Nation Fourth Priority Water by a lessee or exchange party shall not result in the loss through non-use, forfeiture, or abandonment of any portion of the Navajo Nation Fourth Priority Water.

4.9.7 The Navajo Nation, or any Person who leases or exchanges Navajo Nation Fourth Priority Water, may transport such Water through the CAP System in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP System to transport water other than CAP water.

#### **4.10 RIGHTS OF NAVAJO ALLOTTEES**

4.10.1 The rights of Navajo Allottees, and the United States acting as trustee for Navajo Allottees, to use Water on Navajo Allotments located on the Navajo Reservation shall be satisfied solely from the Water Rights described in this Paragraph 4.0 and be subject to the terms thereof.

4.10.2 The provisions of section 7 of the Act of February 8, 1877, 24 Stat. 390, ch. 119; 25 U.S.C. § 381, shall apply to the Water Rights identified in Subparagraph 4.1.2.

4.10.3 The rights of Navajo Allottees shall be enforceable as follows:

4.10.3.1 Before asserting any claim against the United States under section 7 of the Act of February 8, 1887, 24 Stat. 390, ch. 199; 25 U.S.C. § 381, or any other applicable law, a Navajo Allottee shall exhaust remedies available under the Navajo Nation Water Code or other applicable Navajo law.

4.10.3.2 After the exhaustion of all remedies available under the Navajo Nation Water Code or other applicable Navajo law, a Navajo Allottee may seek relief under section 7 of the Act of February 8, 1887, 24 State. 390, ch. 119; 25 USC § 381, or other applicable law.

4.10.3.3 The Secretary shall have authority to protect the rights of Navajo Allottees in accordance with this Subparagraph.

4.10.4 To the extent necessary, and subject to the approval of the Secretary, the Navajo Nation shall amend the Navajo Nation Water Code to provide:

4.10.4.1 that use of Water by Navajo Allottees shall be satisfied with Water from the Water Rights described in Subparagraph 4.1.4;

4.10.4.2 a process by which a Navajo Allottee may request that the Navajo Nation provide Water in accordance with this Agreement, including the provision of Water under any Navajo Allottee lease under section 4 of the Act of June 25, 1910, 36 Stat. 856, ch. 431; 25 U.S.C. § 403;

4.10.4.3 a due process system for the consideration and determination by the Navajo Nation of any request of a Navajo Allottee (or a successor in interests to a Navajo Allottee) for an allocation of Water on a Navajo Allotment, including a process for:

4.10.4.3.1 appeal and adjudication of any denied or disputed distribution of Water; and

4.10.4.3.2 resolution of any contested administrative decision.

4.10.4.4 a requirement that any Navajo Allottee asserting a claim relating to the enforcement of rights of the Navajo Allottee under the Navajo Nation Water Code, including to the quantity of Water allocated to land of the Navajo Allottee,

shall exhaust all remedies available to the Navajo Allottee under Navajo law before initiating an action against the United States or petitioning the Secretary pursuant to subparagraph 4.10.3.

4.10.5 During the period beginning on the Enactment Date and ending on the date on which a Navajo Nation Water Code is amended as described in Subparagraphs 4.10.3 and 4.10.4, the Secretary shall administer, with respect to the rights of the Navajo Allottees, the Water Rights identified in Subparagraph 4.1.3.

4.10.6 The Navajo Nation Water Code amendments described in Subparagraph 4.10.4 shall not be valid unless the provisions of the Navajo Nation Water Code required by Subparagraph 4.10.4 are approved by the Secretary.

4.10.7 Each subsequent amendment to the Navajo Nation Water Code that affects the rights of a Navajo Allottee shall also be approved by the Secretary.

4.10.8 The Secretary shall approve or disapprove the Navajo Nation Water Code amendments described in Subparagraphs 4.10.4 and 4.10.6 not later than 180 days after the date on which the amendments are submitted to the Secretary. This deadline may be extended by the Secretary after consultation with the Navajo Nation.

#### **4.11 WATER RIGHTS AND USES OF WATER FOR LANDS OWNED IN FEE BY THE NAVAJO NATION AS OF THE EFFECTIVE DATE—LCR WATERSHED**

4.11.1 As of the Effective Date, the Navajo Nation owns lands in fee that are located outside the exterior boundaries of the Navajo Reservation within the LCR Watershed, as set forth in Exhibit 4.11.1A. Subject to the terms of this Agreement, the Navajo Nation shall

continue to have all Water Rights and Uses of Water existing under State law as of the Effective Date that are appurtenant to or associated with such fee lands, as described in the Abstracts attached as Exhibits 4.11.1B and 4.11.1C. Such Water Rights and Uses of Water shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or in any other judicial or administrative proceeding. After incorporation in the LCR Decree, such Water Rights and Uses shall be binding on all parties to the LCR Adjudication. Exhibits 4.11.1A, 4.11.1B, and 4.11.1C may be supplemented upon application to the LCR Adjudication Court before the Enforceability Date to correct errors and omissions.

4.11.2 In addition to the Water Rights and Uses of Water for the lands described in Subparagraph 4.11.1, after the Effective Date but before the Enforceability Date, the Navajo Nation may obtain new Water Rights and initiate new Uses of Water for such fee lands, including changing the manner or place of Use of Water Rights, as permitted by State law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands after the Effective Date but before the Enforceability Date. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.11.3 After the Enforceability Date, the Navajo Nation may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 4.11.1, including changing manner or place of Use of Water Rights, as permitted by State law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of

Water obtained or initiated for such fee lands by the Navajo Nation after the Enforceability Date and shall promptly move to supplement the LCR Decree to include the Abstracts for such additional or modified Water Rights and Uses of Water.

4.11.4 If the Abstracts described in Subparagraphs 4.11.1, 4.11.2, and 4.11.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.11.1, 4.11.2, and 4.11.3 are not agreed to by all of the Parties before their submission to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 4.11.1, 4.11.2, and 4.11.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**4.12 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE NAVAJO NATION IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE NAVAJO NATION, AFTER THE EFFECTIVE DATE BUT BEFORE THE ENFORCEABILITY DATE—LCR WATERSHED**

4.12.1 Lands within the LCR Watershed acquired by the Navajo Nation in fee, or taken into trust by the United States for the benefit of the Navajo Nation, after the Effective Date but before the Enforceability Date, shall be subject to any applicable limitations imposed by this Agreement and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with

the lands that were held by the grantor or transferor of the lands and included in the transaction. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands acquired by the Navajo Nation, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation or the United States, whichever completed the Abstracts, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional Water Rights and Uses of Water.

4.12.2 The Navajo Nation, or the United States acting as trustee for the Navajo Nation in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 4.12.1, including changing the manner or place of Use of Water Rights, after the date of their acquisition but before the Enforceability Date as follows: (a) for lands acquired by the Navajo Nation in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation or the United States, whichever completed the Abstracts, shall

promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.12.3 The Navajo Nation, or the United States acting as trustee for the Navajo Nation in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water, including changing the manner or place of Use of Water Rights, after the Enforceability Date for the lands described in Subparagraph 4.12.1 as follows: (a) for lands acquired by the Navajo Nation in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall promptly complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall promptly complete Abstracts for all Water Rights and Uses of Water for such trust lands. The Navajo Nation or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.12.4 If the Abstracts described in Subparagraphs 4.12.1, 4.12.2, and 4.12.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.12.1, 4.12.2, and 4.12.3 are not agreed to by all of the Parties before being submitted to the LCR

Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 4.12.1, 4.12.2, and 4.12.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**4.13 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE NAVAJO NATION IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE NAVAJO NATION, AFTER THE ENFORCEABILITY DATE—LCR WATERSHED**

4.13.1 Lands within the LCR Watershed acquired by the Navajo Nation in fee, or taken into trust by the United States for the benefit of the Navajo Nation, after the Enforceability Date shall be subject to any applicable limitations imposed by this Agreement, and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. The Navajo Nation or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for such additional Water Rights and Uses of Water.

4.13.2 The Navajo Nation, or the United States acting as trustee for the Navajo Nation in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 4.13.1,

including changing the manner or place of Use of Water Rights, after the Enforceability Date as follows: (a) for lands acquired by the Navajo Nation in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. The Navajo Nation or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.13.3 If the Abstracts described in Subparagraphs 4.13.1 and 4.13.2 are agreed to by all of the Parties before being submitted by the Navajo Nation to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.13.1 and 4.13.2 are not agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 4.13.1 and 4.13.2 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**4.14 WATER RIGHTS AND USES OF WATER FOR LANDS OWNED IN FEE BY THE NAVAJO NATION AS OF THE EFFECTIVE DATE—VERDE RIVER SUBWATERSHED IN GILA RIVER ADJUDICATION**

4.14.1 As of the Effective Date, the Navajo Nation owns lands in fee that are located outside the exterior boundaries of the Navajo Reservation within the Verde River subwatershed in the Gila River Adjudication, as set forth in Exhibit 4.14.1A. Subject to the terms of this Agreement, the Navajo Nation shall continue to have all Water Rights and Uses of Water existing as of the Effective Date that are appurtenant to or associated with such fee lands, as described in the Abstracts attached as Exhibits 4.14.1B and 4.14.1C. Such Water Rights and Uses of Water shall not be subject to objection, dispute, or challenge by the Parties in the Gila River Adjudication or any other judicial or administrative proceeding. After incorporation in the Gila River Adjudication Decree, such Water Rights and Uses shall be binding on all parties to the Gila River Adjudication. Exhibits 4.14.1A, 4.14.1B, and 4.14.1C may be supplemented upon application to the Gila River Adjudication Court before the Enforceability Date to correct errors and omissions.

4.14.2 In addition to the Water Rights and Uses of Water for the lands described in Subparagraph 4.14.1, after the Effective Date but before the Enforceability Date, the Navajo Nation may obtain new Water Rights and initiate new Uses of Water for such fee lands, including changing the manner or place of Use, as permitted by State law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such lands after the Effective Date but before the Enforceability Date. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation shall promptly move to supplement the Gila River Adjudication

Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.14.3 After the Enforceability Date, the Navajo Nation may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 4.14.1, including changing manner or place of Use of Water Rights, as permitted by State law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands by the Navajo Nation after the Enforceability Date and shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for such additional or modified Water Rights and Uses of Water.

4.14.4 If the Abstracts described in Subparagraphs 4.14.1, 4.14.2, and 4.14.3 are agreed to by all of the Parties before being submitted to the Gila River Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the Gila River Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.14.1, 4.14.2, and 4.14.3 are not agreed to by all of the Parties before their submission to the Gila River Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the Gila River Adjudication Decree. After the incorporation of the Abstracts described in Subparagraphs 4.14.1, 4.14.2, and 4.14.3 in the Gila River Adjudication Decree, such Abstracts shall be binding on all parties to the Gila River Adjudication.

**4.15 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE NAVAJO NATION IN FEE, OR TAKEN INTO TRUST FOR THE BENEFIT OF THE NAVAJO NATION, AFTER THE EFFECTIVE DATE BUT BEFORE THE ENFORCEABILITY DATE— VERDE RIVER SUBWATERSHED IN GILA RIVER ADJUDICATION**

4.15.1 Lands within the Verde River subwatershed in the Gila River Adjudication acquired by the Navajo Nation in fee, or taken into trust by the United States for the benefit of the Navajo Nation, after the Effective Date but before the Enforceability Date, shall be subject to any applicable limitations imposed by this Agreement and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands acquired by the Navajo Nation, unless previously decreed by the Gila River Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the Gila River Adjudication Court. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation or the United States, whichever completed the Abstracts, shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for any such additional Water Rights and Uses of Water.

4.15.2 The Navajo Nation, or the United States acting as trustee for the Navajo Nation, and in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water described in Subparagraph 4.15.1, including changing the manner or place of Use of Water Rights, after the date of their acquisition but before the Enforceability Date as follows: (a) for lands acquired by the Navajo Nation in fee,

as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all such Water Rights and Uses of Water for such trust lands. All such Abstracts must be completed on or before the Enforceability Date. The Navajo Nation or the United States, whichever completed the Abstract, shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.15.3 The Navajo Nation, or the United States acting as trustee for the Navajo Nation, and in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water, including changing the manner or place of Use of Water Rights, after the Enforceability Date for the lands described in Subparagraph 4.15.1 as follows: (a) for lands acquired by the Navajo Nation in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall promptly complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall promptly complete Abstracts for all Water Rights and Uses of Water for such trust lands. The Navajo Nation or the United States, whichever completed the Abstracts, shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.15.4 If the Abstracts described in Subparagraphs 4.15.1, 4.15.2, and 4.15.3 are agreed to by all of the Parties before being submitted to the Gila River Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the Gila River Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.15.1, 4.15.2, and 4.15.3 are not agreed to by all the Parties before being submitted to the Gila River Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the Gila River Adjudication Decree. After the incorporation of the Abstracts described in Subparagraphs 4.15.1, 4.15.2, and 4.15.3 in the Gila River Adjudication Decree, such Abstracts shall be binding on all parties to the Gila River Adjudication.

**4.16 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE NAVAJO NATION IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE NAVAJO NATION, AFTER THE ENFORCEABILITY DATE—VERDE RIVER SUBWATERSHED IN GILA RIVER ADJUDICATION**

4.16.1 Lands within the Verde River subwatershed in the Gila River Adjudication acquired by the Navajo Nation in fee, or taken into trust by the United States for the benefit of the Navajo Nation, after the Enforceability Date shall be subject to any applicable limitations imposed by this Agreement, are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands, unless previously decreed by the

Gila River Adjudication Decree. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed in the Gila River Adjudication Decree. The Navajo Nation or the United States, whichever completed the Abstracts, shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for such additional Water Rights and Uses of Water.

4.16.2 The Navajo Nation, or the United States acting as trustee for the Navajo Nation, and in consultation with and upon the agreement of the Navajo Nation, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 4.16.1, including changing the manner or place of Use of Water Rights, after the Enforceability Date as follows: (a) for lands acquired by the Navajo Nation in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the Navajo Nation, in accordance with applicable law and this Agreement. The Navajo Nation shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained for such trust lands. The Navajo Nation or the United States, whichever completed the Abstracts, shall promptly move to supplement the Gila River Adjudication Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

4.16.3 If the Abstracts described in Subparagraphs 4.16.1 and 4.16.2 are agreed to by all of the Parties before being submitted by the Navajo Nation to the Gila River Adjudication Court before being submitted for approval (which agreement shall not be

unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the Gila River Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 4.16.1 and 4.16.2 are not agreed to by all the Parties before being submitted to the Gila River Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the Gila River Adjudication Decree. After the incorporation of the Abstracts described in Subparagraphs 4.16.1 and 4.16.2 in the Gila River Adjudication Decree, such Abstracts shall be binding on all parties to the Gila River Adjudication.

#### **4.17 AGREEMENT NOT TO OBJECT, DISPUTE, OR CHALLENGE**

Except as provided in Paragraph 7.0, the Parties shall not object to, dispute, or challenge the withdrawal or Use of Underground Water from any Well located on the Navajo Reservation, or the drilling or replacement of any Well for the withdrawal and Use of Underground Water on the Navajo Reservation, in the LCR Adjudication or any other judicial or administrative proceeding.

#### **4.18 PLACE OF USE FOR WATER RIGHTS AND USES OF WATER SUBJECT TO SETTLEMENT AGREEMENT**

4.18.1 The rights of the Navajo Nation, or the United States acting as trustee for the Navajo Nation, to the Water described in Subparagraphs 4.2, 4.4, 4.5, and 4.6 may be used anywhere on the Navajo Reservation, but may not be sold, leased, transferred, or in any way used off of the Navajo Reservation or off of Off-Reservation land held in trust by the United States for the benefit of the Navajo Nation.

4.18.2 Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water may be used on the Navajo Reservation, or off of the Navajo Reservation within the State, but may not be used, leased, exchanged, forborne, or otherwise transferred in any way by the Navajo Nation or the United States acting as trustee for the Navajo Nation, for Use directly or indirectly outside of the State, except for storage as provided in Subparagraphs 4.7.5, 4.8.4, and 4.9.4.

4.18.3 Water Use on Off-Reservation lands taken into trust by the United States for the benefit of the Navajo Nation shall be governed by Subparagraphs 4.12, 4.13, 4.15, and 4.16. The Water referred to in the preceding sentence may be used only on lands held in trust by the United States for the benefit of the Navajo Nation.

4.18.4 Water Use on lands owned in fee by the Navajo Nation shall be governed by Subparagraphs 4.11, 4.12, 4.13, 4.14, 4.15, and 4.16.

4.18.5 The rights of a Navajo Allottee, or the United States acting as trustee for a Navajo Allottee, to use Water described in Subparagraph 4.10.1 on a Navajo Allotment may not be sold, leased, transferred, or in any way used off of the Navajo Allotment, except for Use on the Navajo Reservation pursuant to the Nation Water Code.

4.18.6 Notwithstanding Subparagraphs 4.18.1, 4.18.3, and 7.2, the Navajo Nation may provide water for Municipal Use off of the Navajo Reservation from facilities that are physically connected to facilities on the Navajo Reservation.

## **4.19 REPORTING**

Beginning on March 1 of the first Year following the Year in which the Enforceability Date occurs, and on March 1 of each Year thereafter, the Navajo Nation shall submit a report to ADWR showing: (a) the annual Diversion amount, point of Diversion, and places of Use of Navajo Nation Upper Basin Colorado River Water; (b) the annual Diversion amount, point of Diversion, and places of Use of Navajo Nation Cibola Water; (c) the annual Diversion amount, point of Diversion, and places of Use of Navajo Nation Fourth Priority Water; (d) the location and annual amount of any Off-Reservation storage of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water; (e) the amount of an Off-Reservation exchange involving Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water; and (f) the location and annual amount of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water leased Off-Reservation. In order to accurately measure the flow of Water Diverted in the Upper Basin for Use by the Navajo Nation in the State, the Navajo Nation shall install suitable measuring devices at or near each point of Diversion of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water from the Colorado River's mainstem in the Upper Basin and the San Juan River in the Upper Basin. The Navajo Nation shall notify ADWR in writing of any annual reporting conflicts between Reclamation, the Navajo Nation, or the Upper Colorado River Commission prior to the completion of Reclamation's annual "Colorado River Accounting and Water Use Report for the Lower Basin."

## **5.0 WATER RIGHTS OF THE HOPI TRIBE AND HOPI ALLOTTEES**

The Hopi Tribe, and the United States acting as trustee for the Hopi Tribe, shall have the rights to use Water described in Subparagraphs 5.1 through 5.8, and 5.10 through 5.15 below. The Hopi Allottees, and the United States acting as trustee for Hopi Allottees, shall have the rights to use Water described in Subparagraphs 5.9 and 5.15 below.

### **5.1 GENERALLY APPLICABLE PROVISIONS**

5.1.1 The Water Rights of the Hopi Tribe described in this Paragraph 5.0 may be used for any purpose consistent with this Agreement and the LCR Decree.

5.1.2 The United States shall enter into contracts with the Hopi Tribe, as necessary, for delivery of any of the Water Rights of the Hopi Tribe described in this Paragraph 5.0.

5.1.3. The Hopi Tribe shall provide ADWR with a copy of any proposed contract for the Off-Reservation lease, exchange or storage of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water at least sixty (60) days prior to execution to allow ADWR to determine whether the contract complies with the terms of this Agreement and the Act. The proposed contract may have financial information redacted.

5.1.4 Water Rights Held in Trust. Except for Effluent, Hopi Tribe Cibola Water, Water Rights pertaining exclusively to Hopi Fee Land, and Water Rights of Hopi Allottees, all Water Rights described in this Paragraph 5.0 shall be held in trust by the United States for the benefit of the Hopi Tribe. Water Rights held in trust by the United States for the benefit of the Hopi Tribe shall not be subject to loss through non-use, forfeiture, or abandonment.

5.1.5 The Hopi Tribe shall have the right to store in a Reservoir on the Hopi Reservation any Water supply that it has a right to use, in accordance with applicable tribal and federal laws and subject to this Agreement.

## **5.2 UNDERGROUND WATER**

The Hopi Tribe, and the United States acting as trustee for the Hopi Tribe, shall have the right to all Underground Water on the Hopi Reservation, subject to the provisions on the Use of the N-Aquifer described in Subparagraph 7.2.

## **5.3 EFFLUENT**

5.3.1 The Hopi Tribe shall have the right to Effluent developed on the Hopi Reservation, which may be used for such purposes as the Hopi Tribe may determine.

5.3.2 Effluent developed by the Hopi Tribe on lands held in trust by the United States for the benefit of the Hopi Tribe may be used on the Hopi Reservation or on lands held in trust by the United States for the benefit of the Hopi Tribe for such purposes as the Hopi Tribe may determine, subject to applicable law.

5.3.3 Effluent developed by the Hopi Tribe on land owned in fee by the Hopi Tribe may be used by the Hopi Tribe for such purposes as the Hopi Tribe may determine subject to State law.

## **5.4 SURFACE WATER**

Subject to the provisions of Subparagraph 7.1, the Hopi Tribe, and the United States acting as trustee for the Hopi Tribe, shall have the right to Divert and Deplete all Surface Water that reaches or flows within the Hopi Reservation.

## **5.5 SPRINGS**

The Hopi Tribe, and the United States acting as trustee for the Hopi Tribe, shall have the right to all springs on the Hopi Reservation, subject to the provisions in Paragraph 7.0 and Subparagraph 5.9.

**5.6** [Intentionally Omitted]

## **5.7 HOPI TRIBE UPPER BASIN COLORADO RIVER WATER**

5.7.1 The State expressly agrees to the allocation of Upper Basin Colorado River Water to the Hopi Tribe as provided in this Subparagraph 5.7 and pursuant to section 6 of the Act.

5.7.2 The Hopi Tribe shall have the right to 2,300 AFY of Upper Basin Colorado River Water. The Hopi Tribe shall have the right to Divert Hopi Tribe Upper Basin Colorado River Water in Arizona only, and to transport Hopi Tribe Upper Basin Colorado River Water for Use only within the State.

5.7.3 The Hopi Tribe shall have the right to Hopi Tribe Upper Basin Colorado River Water for Use in the Upper Basin and the Lower Basin in the State.

5.7.4 The Hopi Tribe may store Hopi Tribe Upper Basin Colorado River Water at underground storage facilities or Groundwater savings facilities located: (a) within the Hopi

Reservation in accordance with Hopi law, or State law if mutually agreed to by the Hopi Tribe and the State; (b) on any other Indian reservation located in the State in accordance with applicable law; and (c) within the State and outside of any Indian reservation in accordance with State law. The Hopi Tribe may assign any long-term storage credits accrued as a result of storage under this Subparagraph in accordance with applicable law. Any Water stored pursuant to tribal law may only be recovered on the Indian reservation where the Water was stored.

5.7.5 The Hopi Tribe shall have the right to use the Colorado River as a conveyance mechanism to convey Hopi Tribe Upper Basin Colorado River Water from the Upper Basin to the Lower Basin for Use within the State.

5.7.6 With the approval of the Secretary, the Hopi Tribe may lease or exchange any portion of Hopi Tribe Upper Basin Colorado River Water for Use in the Upper Basin or Lower Basin in the State. Such leased or exchanged Hopi Tribe Upper Basin Colorado River Water shall be deemed a federal resource held in trust for the benefit of the Hopi Tribe to which the lessee or exchanging party shall acquire only a leasehold or limited interest for the term of the lease or exchange agreement. By leasing or exchanging such Water, the Hopi Tribe shall not forfeit or abandon or lose to non-use its rights to Hopi Tribe Upper Basin Colorado River Water. A lease or exchange agreement under this Subparagraph shall provide that the Water received from the Hopi Tribe shall be used in accordance with applicable law. The non-use of all or any portion of the Hopi Tribe Upper Basin Colorado River Water by a lessee or exchange party shall not result in the loss through non-use, forfeiture or abandonment of any portion of the Hopi Tribe Upper Basin Colorado River Water.

5.7.7 The Hopi Tribe, or any Person who leases or exchanges Hopi Tribe Upper Basin Colorado River Water may transport such Hopi Tribe Upper Basin Colorado River Water through the CAP System in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP System to transport water other than CAP water.

## **5.8 HOPI TRIBE CIBOLA WATER**

5.8.1 The State recommends the allocation of Hopi Tribe Cibola Water to the Hopi Tribe as provided in this Subparagraph 5.8 and as authorized in section 6 of the Act.

5.8.2 Subject to Subparagraph 5.8.3, the Hopi Tribe shall have the right to 4,178 AFY of Fourth Priority Water, 750 AFY of Fifth Priority Water, and 1,000 AFY of Sixth Priority Water. The Hopi Tribe shall have the right to Divert Hopi Tribe Cibola Water in Arizona only, and to transport Hopi Tribe Cibola Water for Use only within the State pursuant to the Hopi Tribe Settlement Cibola Contract.

5.8.3 Any use of Hopi Tribe Cibola Water on land not described in the Hopi Tribe Existing Cibola Contract, or for a use not described in the Hopi Tribe Existing Cibola Contract, shall be subject to a consumptive use calculation by the Secretary utilizing consumptive use methodologies employed by the Secretary for calculating consumptive use of Colorado River Water at land described in the Hopi Tribe Existing Cibola Contract and other comparable locations on the mainstem in the Lower Basin. Such consumptive use volume shall be established by the Secretary at the time of a change in place of use or change in purpose of use of Hopi Tribe Cibola Water. Such consumptive use volume as

established by the Secretary shall remain in effect for as long as such change in place of use or change in purpose of use of Hopi Tribe Cibola Water continues. Notwithstanding (a) any prior use of Hopi Tribe Cibola Water on land not described in the Hopi Tribe Existing Cibola Contract, (b) any prior use not described in the Hopi Tribe Existing Cibola Contract, (c) any prior consumptive use calculation by the Secretary, or (d) any history of consumptive use on land not described in the Hopi Tribe Existing Cibola Contract, or for a use not described in the Hopi Tribe Existing Cibola Contract, the Hopi Tribe shall have the right to Divert and consumptively use up to 4,178 AFY of Fourth Priority Water, 750 AFY of Fifth Priority Water, and 1,000 AFY of Sixth Priority Water on land described in the Hopi Tribe Existing Cibola Contract for the use described in the Hopi Tribe Existing Cibola Contract.

5.8.4 The Hopi Tribe may store Hopi Tribe Cibola Water at underground storage facilities or Groundwater savings facilities located: (a) within the Hopi Reservation in accordance with Hopi law, or State law if mutually agreed to by the Hopi Tribe and the State; (b) on any other Indian reservation located in the State in accordance with applicable law; and (c) within the State and outside of any Indian reservation in accordance with State law. The Hopi Tribe may assign any long-term storage credits accrued as a result of storage under this Subparagraph in accordance with applicable law. Any such Hopi Tribe Cibola Water stored pursuant to tribal law may only be recovered on the Indian reservation where such Hopi Tribe Cibola Water was stored.

5.8.5 With approval of the Secretary, the Hopi Tribe may lease or exchange any portion of Hopi Tribe Cibola Water for Use in the State, to which the lessee or exchange party shall acquire only a leasehold or limited interest for the term of the lease or exchange

agreement. By leasing or exchanging Hopi Tribe Cibola Water, the Hopi Tribe shall not forfeit, abandon, or lose to non-use its rights to Hopi Tribe Cibola Water. The non-use of all or any portion of the Hopi Tribe Cibola Water by a lessee or exchange party shall not result in the loss through non-use, forfeiture, or abandonment of any portion of the Hopi Tribe Cibola Water. A lease or exchange agreement under this Subparagraph shall provide that such Hopi Tribe Cibola Water shall be used in accordance with applicable law.

5.8.6 The Hopi Tribe, or any Person who leases or exchanges Hopi Tribe Cibola Water, may transport such Hopi Tribe Cibola Water through the CAP System in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP System to transport water other than CAP water.

## **5.9 HOPI ALLOTTEES**

Subject to the terms of this Agreement, a Hopi Allottee, and the United States acting as trustee for a Hopi Allottee, shall have all Water Rights and uses of Water that are described in the Abstracts attached as Exhibit 5.9. Such rights and uses shall not be subject to objection, dispute, or challenge by the Parties, in the LCR Adjudication or in any other judicial or administrative proceeding, and, after incorporation in the LCR Decree, shall be binding on all parties to the LCR Adjudication. All Water Rights for each Hopi Allotment shall be held in trust by the United States for the benefit of Hopi Allottees for such Hopi Allotment, and shall not be subject to loss through non-use, forfeiture, or abandonment. The Hopi Tribe Water Code shall provide Hopi Allottees a process to enforce the Water Rights abstracted in Exhibit 5.9 against the Hopi Tribe.

**5.10 WATER RIGHTS AND USES OF WATER FOR LANDS OWNED IN FEE BY THE HOPI TRIBE, OR HELD IN TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE HOPI TRIBE, AS OF THE EFFECTIVE DATE—LCR WATERSHED**

5.10.1 As of the Effective Date: (1) the Hopi Tribe owns lands in fee that are located outside the exterior boundaries of the Hopi Reservation within the LCR Watershed, including the 26 Bar Ranch, DoBell Ranch, Aja Ranch fee lands, Homolovi fee lands, Hart Ranch fee lands, and Clear Creek Ranch fee lands as set forth in Exhibits 5.10.1A, 5.10.1B, 5.10.1C, 5.10.1D, 5.10.1E, and 5.10.1F; and (2) the United States holds lands in trust for the benefit of the Hopi Tribe that are located outside the exterior boundaries of the Hopi Reservation within the LCR watershed, including the Hart Ranch, Twin Arrows trust land, Drye Ranch, Aja Ranch trust lands, Clear Creek Ranch trust lands, and the Hopi Industrial Park as set forth in Exhibits 5.10.1G, 5.10.1H, 5.10.1I, 5.10.1J, 5.10.1K, and 5.10.1L. Subject to the terms of this Agreement, the Hopi Tribe shall continue to have all Water Rights and Uses of Water existing under State law as of the Effective Date that are appurtenant to or associated with such fee lands, as described in the Abstracts attached as Exhibits 5.10.1AA, 5.10.1BB, 5.10.1CC, 5.10.1DD, 5.10.1EE, and 5.10.1FF. Subject to the terms of this Agreement, the Hopi Tribe, and the United States acting as trustee for the Hopi Tribe, shall continue to have all Water Rights and Uses of Water existing as of the Effective Date that are described in the Abstracts attached as Exhibits 5.10.1GG 5.10.1HH, 5.10.1II, 5.10.1JJ, 5.10.1KK, and 5.10.1LL. Such Water Rights and Uses of Water shall not be subject to objection, dispute, or challenge by the Parties, in the LCR Adjudication or any other judicial or administrative proceeding. After incorporation in the LCR Decree, such Water Rights and Uses shall be binding on all parties to the LCR Adjudication. Exhibits

5.10.1A – 5.10.1L and Exhibits 5.10.1AA – 5.10.1LL may be supplemented upon application to the LCR Adjudication Court before the Enforceability Date, to correct errors and omissions.

5.10.2 In addition to the Water Rights and Uses of Water for the lands described in Subparagraph 5.10.1, after the Effective Date but before the Enforceability Date, the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, may obtain new Water Rights or initiate new Uses of Water for such lands, including changing the manner or place of Use of Water Rights:

(a) for so long as the lands are held in fee status, as permitted by State law and this Agreement;

(b) for lands that are held in trust as of the Effective Date, other than the Hopi Industrial Park, in accordance with Public Law No. 104-301, 110 Stat. 3649, and this Agreement; and

(c) for Hopi Industrial Park, in accordance with applicable law and this Agreement.

The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated after the Effective Date but before the Enforceability Date for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated after the Effective Date but before the Enforceability Date for such trust lands. All such Abstracts must be completed on or before the Enforceability Date. The Hopi Tribe or the United States, whichever prepared the Abstract, shall promptly move to supplement

the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

5.10.3 After the Enforceability Date, the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 5.10.1, including changing the manner or place of Use of Water Rights:

(a) for so long as such lands are in fee status, as permitted by State law, and this Agreement;

(b) for lands that are held in trust as of the Effective Date, other than the Hopi Industrial Park, in accordance with Public Law No. 104-301, 110 Stat. 3649, and this Agreement; and

(c) for Hopi Industrial Park, in accordance with applicable law and this Agreement.

The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated after the Enforceability Date for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated after the Enforceability Date for such trust lands. The Hopi Tribe or the United States, whichever prepared the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

5.10.4 If the Abstracts described in Subparagraphs 5.10.1, 5.10.2 and 5.10.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 5.10.1, 5.10.2, and 5.10.3 are not agreed to by all of the Parties before their submission to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 5.10.1, 5.10.2, and 5.10.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**5.11 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE HOPI TRIBE IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE HOPI TRIBE, AFTER THE EFFECTIVE DATE BUT BEFORE THE ENFORCEABILITY DATE—  
LCR WATERSHED**

5.11.1 Lands within the LCR Watershed acquired by the Hopi Tribe in fee, or taken into trust by the United States for the benefit of the Hopi Tribe pursuant to Public Law No. 104-301, 110 Stat. 3649, or taken into trust by the United States for the benefit of the Hopi Tribe other than pursuant to Public Law No. 104-301, 110 Stat. 3649, after the Effective Date but before the Enforceability Date shall be subject to any applicable limitations imposed by this Agreement and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water

appurtenant to or associated with such fee lands acquired by the Hopi Tribe, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. All such Abstracts must be completed on or before the Enforceability Date. The Hopi Tribe and the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional Water Rights and Uses of Water.

5.11.2 The Hopi Tribe, or the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, may obtain new Water Rights and initiate new Uses of Water for the lands described in Subparagraph 5.11.1, including changing the manner or place of Use of Water Rights, after the date of their acquisition but before the Enforceability Date as follows: (a) for lands acquired by the Hopi Tribe in fee, as permitted by State law and this Agreement; (b) for lands taken into trust pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with this Agreement and Public Law No. 104-301, 110 Stat. 3649; and (c) for lands taken into trust by the United States for the benefit of the Hopi Tribe other than pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with applicable law and this Agreement. The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. All such Abstracts must be completed on or before the Enforceability Date. The Hopi Tribe or the United States, whichever completed the

Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

5.11.3 The Hopi Tribe, or the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, may obtain new Water Rights or initiate new Uses of Water, including changing the manner or place of Use of Water Rights, after the Enforceability Date for the lands described in Subparagraph 5.11.1 as follows: (a) for lands acquired by the Hopi Tribe in fee, as permitted by State law and this Agreement; (b) for lands taken into trust pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with this Agreement and Public Law No. 104-301, 110 Stat. 3649; and (c) for lands taken into trust by the United States for the benefit of the Hopi Tribe other than pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with applicable law and this Agreement. The Hopi Tribe shall promptly complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall promptly complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. The Hopi Tribe or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

5.11.4 If the Abstracts described in Subparagraphs 5.11.1, 5.11.2 and 5.11.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial

or administrative proceeding. If the Abstracts described in Subparagraphs 5.11.1, 5.11.2 and 5.11.3 are not agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 5.11.1, 5.11.2, and 5.11.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**5.12 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE HOPI TRIBE IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE HOPI TRIBE, AFTER THE ENFORCEABILITY DATE—LCR WATERSHED**

5.12.1 Lands within the LCR Watershed acquired by the Hopi Tribe in fee, or taken into trust by the United States for the benefit of the Hopi Tribe pursuant to Public Law No. 104-301, 110 Stat. 3649, or taken into trust by the United States for the benefit of the Hopi Tribe other than pursuant to Public Law No. 104-301, 110 Stat. 3649, after the Enforceability Date shall be subject to any applicable limitations imposed by this Agreement, and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. The Hopi Tribe or the United States, whichever completed the Abstract,

shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional Water Rights and Uses of Water.

5.12.2 The Hopi Tribe, or the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 5.12.1, including changing the manner or place of Use of Water Rights, after the Enforceability Date, as follows: (a) for lands acquired by the Hopi Tribe in fee, as permitted by State law and this Agreement; (b) for lands taken into trust pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with this Agreement and Public Law No. 104-301, 110 Stat. 3649; and (c) for lands taken into trust by the United States for the benefit of the Hopi Tribe other than pursuant to Public Law No. 104-301, 110 Stat. 3649, in accordance with applicable law and this Agreement. The Hopi Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. The Hopi Tribe or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

5.12.3 If the Abstracts described in Subparagraphs 5.12.1 and 5.12.2 are agreed to by all of the Parties before being submitted by the Hopi Tribe to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any

other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 5.12.1 and 5.12.2 are not agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 5.12.1 and 5.12.2 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

### **5.13 NEW SURFACE WATER USES**

Subject to Paragraph 8.0, and conditioned upon compliance with the Abstract requirements of Subparagraphs 5.10, 5.11, and 5.12 and incorporation of the Abstracts in the LCR Decree, the Hopi Tribe, and the United States acting as trustee for the Hopi Tribe in consultation with and upon the agreement of the Hopi Tribe, shall have the right to make any further Use of Surface Water on lands that are held in trust as set forth in Pub. L. No. 104-301, 110 Stat. 3649 which was unappropriated on the date that each parcel was taken into trust pursuant to Pub. L. No. 104-301, 110 Stat. 3649. The priority date for the right described in the immediately preceding sentence shall be the date the lands are taken into trust.

### **5.14 AGREEMENTS NOT TO OBJECT, DISPUTE OR CHALLENGE**

5.14.1 Subject to the terms of Exhibit 9.10, the Parties shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the withdrawal or Use of Underground Water by the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe, from any Off-Reservation Well located on lands owned by the

Hopi Tribe in fee or held in trust by the United States for the benefit of the Hopi Tribe, or the drilling or replacement of any Off-Reservation Well by the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe, located on lands owned by the Hopi Tribe in fee or lands held in trust by the United States for the benefit of the Hopi Tribe. The Parties also shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the withdrawal or Use of Underground Water by the Hopi Tribe in a manner described in the Abstracts attached as Exhibits 5.10.1AA, et seq.

5.14.2 Except as provided in Paragraph 7.0, the Parties shall not object to, dispute, or challenge the withdrawal or Use of Underground Water from any Well located on the Hopi Reservation, or the drilling or replacement of any Well for the withdrawal and Use of Underground Water on the Hopi Reservation in the LCR Adjudication or any other judicial or administrative proceeding.

**5.15 PLACE OF USE FOR WATER RIGHTS AND USES OF WATER SUBJECT TO SETTLEMENT AGREEMENT; OTHER PROVISIONS**

5.15.1 The rights of the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe, to the Water described in Subparagraphs 5.2, 5.4, and 5.5 may be used anywhere on the Hopi Reservation, but may not be sold, leased, transferred or in any way used off of the Hopi Reservation or off of Off-Reservation land held in trust by the United States for the benefit of the Hopi Tribe.

5.15.2 Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water may be used on or off of the Hopi Reservation within the State, but may not be used, leased, exchanged, forborne, or otherwise transferred in any way by the Hopi Tribe or the

United States acting as trustee for the Hopi Tribe for Use directly or indirectly outside of the State.

5.15.3 Water Use on Off-Reservation lands held in trust by the United States for the benefit of the Hopi Tribe shall be governed by Subparagraphs 5.10, 5.11, 5.12, and 5.13. The Water referred to in the preceding sentence may be used only on lands held in trust by the United States for the benefit of the Hopi Tribe.

5.15.4 Water Use on lands owned in fee by the Hopi Tribe shall be governed by Subparagraphs 5.10, 5.11, and 5.12.

5.15.5 The rights of a Hopi Allottee, or the United States acting as trustee for a Hopi Allottee, to use Water described in Subparagraph 5.9 on a Hopi Allotment may not be sold, leased, transferred, or in any way used off of the Hopi Allotment.

5.15.6 Notwithstanding Subparagraph 5.15.1, 5.15.3, and 7.2, the Hopi Tribe may provide water for Municipal Use off of the Hopi Reservation from facilities owned by the Hopi Tribe or its entities or enterprises which are physically connected to their facilities on the Hopi Reservation.

5.15.7 The Hopi Tribe may subordinate its senior priority under the Norviel Decree to junior users.

## **5.16 REPORTING**

Beginning on March 1 of the first Year following the Year in which the Enforceability Date occurs, and on March 1 of each Year thereafter, the Hopi Tribe shall submit a report to ADWR showing: (a) the annual Diversion amount, point of Diversion, and places of Use

of Hopi Tribe Upper Basin Colorado River Water; (b) the annual Diversion amount, point of Diversion, and places of Use of Hopi Tribe Cibola Water; (c) the location and annual amount of any Off-Reservation storage of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water; (d) the amount of an Off-Reservation exchange involving Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water; and (e) the location and annual amount of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water leased Off-Reservation. In order to accurately measure the flow of Water Diverted in the Upper Basin for Use by the Hopi Tribe in the State, the Hopi Tribe shall install suitable measuring devices at or near each point of Diversion of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water from the Colorado River's mainstem in the Upper Basin. The Hopi Tribe shall notify ADWR in writing of any annual reporting conflicts between Reclamation, the Hopi Tribe, or the Upper Colorado River Commission prior to the completion of Reclamation's annual "Colorado River Accounting and Water Use Report for the Lower Basin."

## **6.0 SAN JUAN SOUTHERN PAIUTE TRIBE LAND AND WATER RIGHTS**

### **6.1 THE SAN JUAN SOUTHERN PAIUTE RESERVATION**

6.1.1 There is hereby approved, as set forth in section 19 of the Act, the Treaty and the Treaty Addendum.

6.1.2 There is hereby proclaimed, as set forth in section 19 of the Act, all right, title and interest, including Water Rights, to the approximately 5,400 acres of land within the Navajo Indian Reservation that are described in the Treaty as the San Juan Paiute Northern

Area and the San Juan Paiute Southern Area, as the San Juan Southern Paiute Reservation and such lands shall be held by the United States in trust as a reservation for the exclusive benefit of the San Juan Southern Paiute Tribe, subject to the rights of access under the Treaty.

6.1.3 The Treaty and the Treaty Addendum shall be approved on the Enactment Date.

6.1.4 Once the Treaty and Treaty Addendum are approved, no subsequent action or inaction related to this Agreement shall alter the effectiveness of the Treaty or the Treaty Addendum.

6.1.5 Subparagraphs 6.2 through 6.6 of this Agreement satisfy and do not conflict with Article XV of the Treaty concerning Water Rights.

6.1.6 Section 9 of Public Law 93–531 (88 Stat. 1716, formerly codified at 25 U.S.C. 640d–8) shall be repealed in the Act.

6.1.7 In the course of implementing the Treaty, the United States shall provide advance notice to the Tribes of any ground disturbance that may disturb or damage archaeological or cultural sites. The Tribes and the United States shall work together to avoid or mitigate damage to those sites.

## **6.2 SAN JUAN SOUTHERN PAIUTE SOUTHERN AREA WATER RIGHTS**

6.2.1 The San Juan Southern Paiute Tribe, and the United States acting as trustee for the San Juan Southern Paiute Tribe, shall have the Water Rights described in this

Subparagraph 6.2 for Use on the San Juan Southern Paiute Southern Area. The Water Rights described in this Subparagraph 6.2 may be used for any purpose consistent with this Agreement and the LCR Decree.

6.2.2 Except for Effluent, the Water Rights described in this Subparagraph 6.2 shall be held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe. Water Rights held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe shall not be subject to loss through non-use, forfeiture, or abandonment.

6.2.3 The San Juan Southern Paiute Tribe, and the United States acting as trustee for the San Juan Southern Paiute Tribe, shall have the right to all Underground Water on the San Juan Southern Paiute Southern Area.

6.2.4 The San Juan Southern Paiute Tribe, and the United States acting as trustee for the San Juan Southern Paiute Tribe, shall have the right to Divert and Deplete all Surface Water that reaches or flows within the San Juan Southern Paiute Southern Area.

6.2.5 Effluent.

6.2.5.1 The San Juan Southern Paiute Tribe shall have the right to Effluent developed on the San Juan Southern Paiute Southern Area, which may be used for such purposes as the San Juan Southern Paiute Tribe may determine.

6.2.5.2 Effluent developed by the San Juan Southern Paiute Tribe on lands held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe, but located outside of the San Juan Southern Paiute Southern Area, may be

used on the San Juan Southern Paiute Southern Area or on lands held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe for such purposes as the San Juan Southern Paiute Tribe may determine, subject to applicable law.

6.2.5.3 Effluent developed by the San Juan Southern Paiute Tribe on land owned in fee by the San Juan Southern Paiute Tribe may be used by the San Juan Southern Paiute Tribe for such purposes as the San Juan Southern Paiute Tribe may determine subject to State law.

6.2.6 The San Juan Southern Paiute Tribe, and the United States acting as trustee for the San Juan Southern Paiute Tribe, shall have the right to all springs on the San Juan Southern Paiute Southern Area.

### **6.3 SAN JUAN SOUTHERN PAIUTE WATER DELIVERY**

6.3.1 Pursuant to a water services agreement between the San Juan Southern Paiute Tribe and NTUA, the Navajo Nation shall deliver Water to the San Juan Southern Paiute Southern Area in an amount determined by the San Juan Southern Paiute Tribe but not to exceed 350 AFY. The water services agreement shall include the following provisions:

6.3.1.1 The San Juan Southern Paiute Tribe members presently using the community water system serviced by the NTUA, and their heirs and assigns, may, at their option, remain connected to that system and shall be served by it on a nondiscriminatory basis from the Water described in Subparagraph 6.3.1.

6.3.1.2 The Navajo Nation shall deliver on a nondiscriminatory basis, through NTUA, the Water described in Subparagraph 6.3.1 to additional San Juan Southern Paiute Tribe members who connect to the community water system. Connection to the community water system shall not be denied.

6.3.1.3 All rates, terms, and surcharges for retail water service shall be applied the same to all NTUA individual customers regardless of tribal affiliation.

6.3.1.4 At the San Juan Southern Paiute Tribe's option, the Navajo Nation, through NTUA, shall deliver the Water described in Subparagraph 6.3.1 to the San Juan Southern Paiute Southern Area pursuant to an amendment to the water services agreement, described below, providing for bulk water delivery, which may include delivery through the iiná bá – paa tuwaqat'si pipeline.

6.3.1.4.1 Upon written notice by the San Juan Southern Paiute Tribe calling for bulk delivery, the Navajo Nation shall cause NTUA to enter into the amendment.

6.3.1.4.2 The amendment shall specify the quantity of bulk water to be delivered and ensure bulk water delivery is available within twelve (12) months of receiving notice, or at a later time as agreed upon in writing by the San Juan Southern Paiute Tribe and the Navajo Nation.

6.3.1.4.3 The rate for such bulk water service will be determined by an independent cost of service and rate design expert, to be selected by mutual agreement of the San Juan Southern Paiute Tribe and the Navajo Nation. If an

expert cannot be agreed upon a mediator shall be retained for the sole purpose of selecting an expert from a list of candidates identified by the San Juan Southern Paiute Tribe and the Navajo Nation.

6.3.1.4.4 The San Juan Southern Paiute Tribe shall be responsible for the cost of constructing and maintaining facilities necessary to bring water from any points of delivery to the San Juan Southern Paiute Tribe's facilities, as well as for the cost of constructing and maintaining the San Juan Southern Paiute Tribe's facilities to accept bulk water deliveries.

6.3.1.4.5 Terms and conditions of the amendment to the water services agreement providing for bulk water delivery shall contain industry standard terms.

6.3.2 The San Juan Southern Paiute Tribe shall own any water infrastructure (wells, treatment, distribution pipelines, etc.) it funds or constructs on the San Juan Southern Paiute Reservation.

6.3.3 The San Juan Southern Paiute Tribe will have the option to acquire any portion of NTUA's facilities which may be located on the San Juan Southern Paiute Reservation that are used exclusively to serve the San Juan Southern Paiute Tribe. The portion of the facilities used exclusively to serve the San Juan Southern Paiute Tribe will be available for transfer at a cost minus depreciation price when the San Juan Southern Paiute Tribe begins operation of its water utility.

6.3.4 NTUA will have the right to retain its existing facilities that cross through the San Juan Southern Paiute Reservation to serve other NTUA customers.

**6.4 WATER RIGHTS AND USES OF WATER FOR LANDS OWNED IN FEE BY THE SAN JUAN SOUTHERN PAIUTE TRIBE AS OF THE EFFECTIVE DATE—LCR WATERSHED**

6.4.1 As of the Effective Date, the San Juan Southern Paiute Tribe owns lands in fee that are located outside the exterior boundaries of the San Juan Southern Paiute Reservation within the LCR Watershed, as set forth in Exhibits 6.4.1A and 6.4.1B. Subject to the terms of this Agreement, the San Juan Southern Paiute Tribe shall continue to have all Water Rights and Uses of Water existing under State law as of the Effective Date that are appurtenant to or associated with such fee lands, as described in the Abstracts attached as Exhibits 6.4.1AA and 6.4.1BB. Such Water Rights and Uses of Water shall not be subject to objection, dispute, or challenge by the Parties, in the LCR Adjudication or in any other judicial or administrative proceeding. After incorporation in the LCR Decree, such Water Rights and Uses of Water shall be binding on all parties to the LCR Adjudication. Exhibits 6.4.1A and 6.4.1B, and Exhibits 6.4.1AA and 6.4.1BB, may be supplemented upon application to the LCR Adjudication Court, before the Enforceability Date, to correct errors and omissions.

6.4.2 In addition to the Water Rights and Uses of Water for the lands described in Subparagraph 6.4.1, after the Effective Date but before the Enforceability Date, the San Juan Southern Paiute Tribe may obtain new Water Rights or initiate new Uses of Water for such fee lands, including changing the manner or place of Use of Water Rights, as permitted by State law and this Agreement. The San Juan Southern Paiute Tribe shall

complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands after the Effective Date but before the Enforceability Date. All such Abstracts must be completed on or before the Enforceability Date. The San Juan Southern Paiute Tribe shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

6.4.3 After the Enforceability Date, the San Juan Southern Paiute Tribe may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 6.4.1, including changing the manner or place of Use of Water Rights, as permitted by State law and this Agreement. The San Juan Southern Paiute Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands by the San Juan Southern Paiute Tribe after the Enforceability Date and shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

6.4.4 If the Abstracts described in Subparagraphs 6.4.1, 6.4.2 and 6.4.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties, in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 6.4.1, 6.4.2 and 6.4.3 are not agreed to by all of the Parties before their submission to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts

described in Subparagraphs 6.4.1, 6.4.2 and 6.4.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**6.5 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE SAN JUAN SOUTHERN PAIUTE TRIBE IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AFTER THE EFFECTIVE DATE BUT BEFORE THE ENFORCEABILITY DATE —LCR WATERSHED**

6.5.1 Lands within the LCR Watershed acquired by the San Juan Southern Paiute Tribe in fee, or taken into trust by the United States for the benefit of the San Juan Southern Paiute Tribe, after the Effective Date but before the Enforceability Date shall be subject to any applicable limitations imposed by this Agreement and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The San Juan Southern Paiute Tribe shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands acquired by the San Juan Southern Paiute Tribe, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. All such Abstracts must be completed on or before the Enforceability Date. The San Juan Southern Paiute Tribe, or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional Water Rights and Uses of Water.

6.5.2 The San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe in consultation with and upon the agreement of the San

Juan Southern Paiute Tribe, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 6.5.1, including changing the manner or place of Use of Water Rights, after the date of their acquisition but before the Enforceability Date as follows: (a) for lands acquired by the San Juan Southern Paiute Tribe in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the San Juan Southern Paiute Tribe, in accordance with applicable law and this Agreement. The San Juan Southern Paiute Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. All such Abstracts must be completed on or before the Enforceability Date. The San Juan Southern Paiute Tribe or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

6.5.3 The San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe in consultation with and upon the agreement of the San Juan Southern Paiute Tribe, may obtain new Water Rights or initiate new Uses of Water, including changing the manner or place of Use of Water Rights, after the Enforceability Date for the lands described in Subparagraph 6.5.1 as follows: (a) for lands acquired by the San Juan Southern Paiute Tribe in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the San Juan Southern Paiute Tribe, in accordance with applicable law and this Agreement. The San Juan Southern Paiute Tribe shall promptly complete Abstracts for all Water Rights and Uses of

Water obtained or initiated for such fee lands. The United States shall promptly complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. The San Juan Southern Paiute Tribe or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

6.5.4 If the Abstracts described in Subparagraphs 6.5.1, 6.5.2 and 6.5.3 are agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties, in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 6.5.1, 6.5.2 and 6.5.3 are not agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 6.5.1, 6.5.2 and 6.5.3 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

**6.6 WATER RIGHTS AND USES OF WATER FOR LANDS ACQUIRED BY THE SAN JUAN SOUTHERN PAIUTE TRIBE IN FEE, OR TAKEN INTO TRUST BY THE UNITED STATES FOR THE BENEFIT OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AFTER THE ENFORCEABILITY DATE—LCR WATERSHED**

6.6.1 Lands within the LCR Watershed acquired by the San Juan Southern Paiute Tribe in fee, or taken into trust by the United States for the benefit of the San Juan Southern Paiute Tribe, after the Enforceability Date shall be subject to any applicable limitations

imposed by this Agreement, and are entitled to any applicable benefits provided by this Agreement, including Water Rights and Uses of Water appurtenant to or associated with the lands that were held by the grantor or transferor of the lands and included in the transaction. The San Juan Southern Paiute Tribe shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such fee lands, unless previously decreed by the LCR Adjudication Court. The United States shall complete Abstracts for all Water Rights and Uses of Water appurtenant to or associated with such trust lands, unless previously decreed by the LCR Adjudication Court. The San Juan Southern Paiute Tribe, or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for such additional Water Rights and Uses of Water.

6.6.2 San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe in consultation with and upon the agreement of the San Juan Southern Paiute Tribe, may obtain new Water Rights or initiate new Uses of Water for the lands described in Subparagraph 6.6.1, including changing the manner or place of Use of Water Rights, after the Enforceability Date as follows: (a) for lands acquired by the San Juan Southern Paiute Tribe in fee, as permitted by State law and this Agreement; and (b) for lands taken into trust by the United States for the benefit of the San Juan Southern Paiute Tribe, in accordance with applicable law and this Agreement. The San Juan Southern Paiute Tribe shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such fee lands. The United States shall complete Abstracts for all Water Rights and Uses of Water obtained or initiated for such trust lands. The San Juan Southern Paiute Tribe

or the United States, whichever completed the Abstract, shall promptly move to supplement the LCR Decree to include the Abstracts for any such additional or modified Water Rights and Uses of Water.

6.6.3 If the Abstracts described in Subparagraphs 6.6.1 and 6.6.2 are agreed to by all of the Parties before being submitted by the San Juan Southern Paiute Tribe to the LCR Adjudication Court for approval (which agreement shall not be unreasonably withheld, conditioned, or delayed), the Water Rights and Uses of Water described in such Abstracts shall not be subject to objection, dispute, or challenge by the Parties in the LCR Adjudication or any other judicial or administrative proceeding. If the Abstracts described in Subparagraphs 6.6.1 and 6.6.2 are not agreed to by all of the Parties before being submitted to the LCR Adjudication Court for approval, the Parties who are not in agreement may object to the incorporation of all or portions of such Abstracts in the LCR Decree. After the incorporation of the Abstracts described in Subparagraphs 6.6.1 and 6.6.2 in the LCR Decree, such Abstracts shall be binding on all parties to the LCR Adjudication.

## **6.7 PLACE OF USE FOR WATER RIGHTS AND USES OF WATER SUBJECT TO SETTLEMENT AGREEMENT**

6.7.1 The rights of the San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe, to the Water described in Subparagraphs 6.2.3, 6.2.4, and 6.3.1 may not be sold, leased, transferred or in any way used off of the San Juan Southern Paiute Southern Area or off of land held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe.

6.7.2 Water Use on lands held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe shall be governed by Subparagraphs 6.5 and 6.6.

6.7.3 Water Use on lands owned in fee by the San Juan Southern Paiute Tribe shall be governed by Subparagraphs 6.4, 6.5, and 6.6.

## **7.0 NAVAJO NATION AND HOPI TRIBE INTER-TRIBAL AGREEMENT FOR USES OF THE MANAGED WASHES AND N-AQUIFER**

When used in this Paragraph 7.0: (a) the term “Tribes” refers to the Navajo Nation and the Hopi Tribe; and (b) the term “Tribe” refers to either the Navajo Nation or the Hopi Tribe. The purpose of this Paragraph 7.0 is to address inter-tribal issues respecting Uses by the Tribes of the Managed Washes, Minor Tributary Washes, and N-Aquifer, and certain related obligations of the United States.

### **7.1 TRIBAL WASH MANAGEMENT**

Consistent with Paragraphs 4.0 and 5.0, and subject to the terms of this Paragraph 7.0, the Navajo Nation and the Hopi Tribe, or the United States acting as trustee for either of the Tribes, shall each have the right to utilize all Surface Water flowing through the Managed Washes and their tributaries for all historic and existing Uses, but neither Tribe, nor the United States acting as trustee for either of the Tribes, shall modify those Uses except as provided in this Paragraph 7.0. Any modification by the United States acting as trustee for either of the Tribes shall be in consultation with and upon agreement of the Tribes. This Paragraph 7.0 shall not apply to any Water Use downstream of the southern boundary of the Hopi Reservation.

7.1.1 Historic and Existing Irrigation Uses.

7.1.1.1 All irrigation Uses of Water in the Managed Washes and Minor Tributary Washes that occurred prior to or existed on the Effective Date, as set forth in Exhibits 7.1.1.1A and 7.1.1.1B may resume or continue and shall not be subject to objection, dispute, or challenge by the parties to the LCR Adjudication, provided that should a dispute between the Tribes arise as to whether a particular Use occurred prior to or existed on the Effective Date, the dispute resolution procedures in Subparagraph 7.3 shall apply.

7.1.1.2 The historic irrigation projects that Divert Surface Water directly out of the Managed Washes have been designated and assigned acreages; they are listed in Exhibits 7.1.1.2A, 7.1.1.2B, and 7.1.1.2C. The general locations of the designated historic irrigation projects are shown in Exhibit 7.1.1.2D.

7.1.1.3 Rehabilitation and Betterment is permitted for historic and existing Uses subject to the limitations in this Subparagraph 7.1. Historic Irrigation Diversion Capacity shall be determined from historical records or evidence. If the Historic Irrigation Diversion Capacity cannot be substantiated by historical records or evidence, an on-farm water duty of one cubic foot per second per ninety acres will be used as the design criteria for all Rehabilitation and Betterment projects.

7.1.1.3.1 Rehabilitation and Betterment are permitted for the designated historic irrigation projects listed in Exhibits 7.1.1.2A, 7.1.1.2B, and 7.1.1.2C.

7.1.1.3.2 Rehabilitation is permitted for historic and existing irrigation that is not within a designated historic irrigation project.

7.1.1.3.3 Rehabilitation and Betterment are permitted for a dike used for historic or existing irrigation that is not within a designated historic irrigation project, provided that the height and length of the dike is not increased except as reasonably necessary to restore dike functionality consistent with originally intended storage and diversion amounts. Historic and existing dike properties shall be determined from historical records or other evidence such as Bureau of Indian Affairs aerial photographs.

7.1.1.3.4 Rehabilitation and Betterment are permitted for historic and existing irrigation that Diverts Surface Water from a Minor Tributary Wash, provided that the historic or existing irrigation acreage subject to the Rehabilitation and Betterment from any single Diversion structure does not exceed seventy-five acres.

7.1.1.3.5 The benefits from the Rehabilitation and Betterment of a joint designated historic irrigation project shall be shared by the Tribes in approximate proportion to their designated acreage as listed in Exhibit 7.1.1.2C.

7.1.1.3.6 Historic and existing irrigation may be relocated provided that an equivalent amount of acreage is retired (or idled) and no downstream historic or existing irrigation is impaired.

7.1.1.3.7 Without limiting or impairing the irrigation Uses of Water in the Managed Washes and Minor Tributary Washes permitted by the foregoing provisions of this Subparagraph 7.1, installation, construction, maintenance, repair, replacement, and relocation of low technology structures (for example, earthen berms) and nonpermanent Diversions to support Akchin farming, flood-water farming, and other traditional farming practices are expressly permitted.

7.1.2 Other New Surface Water Impoundments.

7.1.2.1 The Tribes agree not to construct new Permanent Surface Water Control Structures designed as reservoirs on the mainstem of the Managed Washes upstream of the other Tribe without the Prior Written Consent of the other Tribe, provided, however, the Tribes may construct new Permanent Surface Water Control Structures on the mainstem of the Managed Washes upstream of the other Tribe that prevent additional erosion, backfill incised reaches, and enhance local recharge as part of watershed restoration efforts, with fifteen (15) days' written notice to the other Tribe.

7.1.2.2 Pursuant to the provisions of Subparagraph 7.5, each Tribe shall notify the other of the planned construction of any new Impoundment capable of fifteen (15) AFY or more of storage it proposes to undertake upstream of the other Tribe, subject to the provisions of Subparagraph 7.1.2.3, and shall not engage in such construction without the Prior Written Consent of the other Tribe.

7.1.2.3 Pursuant to the provisions of Subparagraph 7.5, each Tribe shall notify the other of any plan to move Impoundment capacities within the same Managed Wash drainage, except that capacities of Impoundments downstream of the Hopi Reservation, including those on Jeddito Island, may not be moved upstream of the Hopi Reservation. However, the aggregate capacity of all Impoundments that exist as of the Effective Date (exclusive of the Peabody Impoundments and the Pasture Canyon Impoundments, sewage lagoons, and those permitted pursuant to Subparagraph 7.1.2.4) within each of the Main Wash drainages listed in Exhibit 7.1.2.3 may not be exceeded without the Prior Written Consent of the other Tribe. The Tribes acknowledge and agree that the Peabody Impoundments are permanently located and shall not be moved.

7.1.2.4 New Surface Water Impoundments shall be allowed on Minor Tributary Washes on the lands awarded to the Hopi Tribe pursuant to the 1934 Act Case, up to an aggregate capacity for all such structures of three hundred (300) acre-feet.

7.1.3 Moenkopi Wash Alluvial Aquifer Storage. The Tribes agree to jointly investigate the feasibility of an alluvial recharge/storage project to store a portion of the seasonal flows of Moenkopi Wash along the Wash for the benefit of Hopi and Navajo farmers. If the Tribes mutually determine that the project is feasible, the Tribes shall cooperate in the project's planning and implementation.

7.1.4 Additional Provisions for Moenkopi Wash.

7.1.4.1 Subject to the continuing jurisdiction of the United States District Court for the District of Arizona in the 1934 Act Case, Use of the source Waters of Pasture Canyon, including springs, water storage facilities, and direct runoff, shall be governed exclusively by this Subparagraph 7.1.4.1 and not by any other provisions of Subparagraph 7.1. All Water yields of Pasture Canyon are reserved for Use by the Hopi Tribe, except for: (1) the rights of individual Members of the Navajo Nation recognized in the 1934 Act Case; and (2) any rights to use Water, as of the Effective Date, upstream of the northern boundary of the Hopi Reservation in Pasture Canyon or which were previously served by the Pasture Canyon ditches. Notwithstanding the foregoing, unused tailwater may be Diverted into the Kerley Valley Project for use by either or both Tribes. The Navajo Nation shall not transfer its Uses in Pasture Canyon permitted in this Subparagraph 7.1.4.1 to any other location or source.

7.1.4.2 Each Tribe may Divert Water from Moenkopi Wash above the Kerley Valley Project dam for historic and existing irrigation.

7.1.4.3 After accounting for Diversions permitted by this Agreement, the direct flows within Moenkopi Wash at the Kerley Valley Project dam and any Effluent made available by a Tribe for use by the Kerley Valley Project shall be allocated to the Tribes in proportion to each Tribe's acreage within the Kerley Valley Project as set forth in Exhibit 7.1.1.2C.

7.1.4.4 The Navajo Nation and the Hopi Tribe agree that the Rehabilitation and Betterment of the Kerley Valley Project should be fully investigated. If the Tribes determine that the project should proceed, the Tribes shall cooperate in its planning and implementation.

7.1.5 Closed Basins. Water Uses in the sub-basins identified in Exhibits 3.1.21A and 3.1.21B (sub-basins located in a Managed Wash or a Minor Tributary Wash that do not contribute any surface flow outside of that sub-basin) are not subject to the provisions of this Subparagraph 7.1.

7.1.6 Monitoring. The Hopi Tribe and the Navajo Nation agree to cooperate in seeking the continuation of the programs for the monitoring of stream flows on the Managed Washes to facilitate monitoring of the effects of Subparagraph 7.1 concerning the Use of Water from Managed Washes.

7.1.7 Watershed Restoration. The Navajo Nation and the Hopi Tribe agree to cooperate on efforts to restore the watersheds on their reservations, recognizing that such efforts may improve habitat, enhance stream flows, and reduce sediment and floods to the benefit of both Tribes. Without limiting the agreement to cooperate set forth in the immediately preceding sentence, Low Technology Watershed Restoration is permitted. In addition to Low Technology Watershed Restoration, except as provided in Subparagraph 7.1.2.1, installation, construction, maintenance, repair, replacement, and relocation of water control structures to support Watershed Restoration are: (a) permitted in the Minor Tributary Washes; and (b) permitted in the Major Tributary Washes with the

Prior Written Consent of the other Tribe, which consent shall not be unreasonably withheld, conditioned or delayed, and shall be deemed given unless the Tribe whose consent is required shall fail to object in writing, with reasonable particularity insofar as concerns the basis for the objection, within six (6) months following receipt of a written request for consent from the other Tribe, which request for consent shall include a reasonably detailed description of the proposed undertaking and the purposes to be served thereby. If there is a circumstance where a Tribe wishes to enter the other Tribe's reservation to conduct Low Technology Watershed Restoration or other permitted watershed restoration activities, that Tribe must obtain Prior Written Consent from the other Tribe. All Watershed Restoration activities will comply with applicable federal and tribal laws and regulations.

## **7.2 N-AQUIFER PROVISIONS**

The provisions of this Subparagraph 7.2 apply only to the Use of Underground Water from the N-Aquifer by the Tribes or by the United States acting as trustee for either of the Tribes.

### **7.2.1 General Purposes and Goals.**

7.2.1.1 To provide a permanent homeland for the Hopi Tribe and the Navajo Nation, the Tribes shall limit their pumping of the N-Aquifer to provide a long-term reliable water supply to meet the domestic and municipal demands of the Tribes.

7.2.1.2 The Tribes shall limit their pumping of the N-Aquifer to accomplish the general purpose described in Subparagraph 7.2.1.1 in a manner that:

(a) protects the underground environment of the N-Aquifer on a long-term basis for

use by present and future generations; and (b) recognizes the significance of springs that rely on the N-Aquifer to both Tribes and includes reasonable measures to protect spring flows, taking into account natural variability, climate change, aridification, mega-drought, and other ecological, meteorological, and hydrological considerations.

7.2.2 N-Aquifer Monitoring. The United States, in consultation with the Tribes, shall continue to monitor the N-Aquifer, as follows:

7.2.2.1 N-Aquifer Monitoring Scope. The Secretary, acting through the United States Geological Survey, and subject to the availability of funding, shall expand the scope of its monitoring program in the Black Mesa area. Such expanded scope shall include: (a) a survey of N-Aquifer springs developed in coordination with the Tribes; and (b) monitoring and collection of hydrologic data on selected representative springs identified in consultation with the Tribes.

7.2.2.2 Commencing five years after the Enforceability Date and every five years thereafter, subject to the availability of funding, the United States Geological Survey shall prepare an assessment report on the N-Aquifer. Such report shall include an assessment regarding existing Underground Water withdrawals and the effect of such withdrawals on flows from the selected springs and N-Aquifer water levels, and predictions of future effects of anticipated withdrawals on flows from the selected springs and N-Aquifer water levels.

7.2.2.3 Commencing five years after the Enforceability Date and every five years thereafter, subject to the availability of funding, the United States Geological Survey will update an existing, or develop a new, groundwater model to conduct predictions of future effects of anticipated withdrawals on N-Aquifer water levels, and on the timing and magnitude of changes in combined spring discharge volumes.

7.2.2.4 The United States Geological Survey and the Tribes shall meet periodically to discuss technical issues related to the N-Aquifer monitoring and potential modification of the monitoring.

7.2.2.5 The Hopi Tribe and the Navajo Nation shall cooperate and attempt to secure funding for the activities described in this Subparagraph 7.2.2 to be performed from time to time by United States Geological Survey. No additional expenditures of money by either Tribe shall be required to fund the activities described in this Subparagraph 7.2.2 to be performed from time to time by United States Geological Survey; provided, that in the event funding is unavailable from time to time, the Hopi Tribe shall endeavor in good faith to cover forty percent (40%) of any funding shortfall from Hopi Tribe sources of funding, and the Navajo Nation shall endeavor in good faith to cover sixty percent (60%) of any funding shortfall from Navajo Nation sources of funding.

7.2.3 N-Aquifer Management Terms.

7.2.3.1 Prohibition on N-Aquifer Exports to Areas Outside Reservation. Except as provided in Subparagraphs 4.18.6 and 5.15.6, neither Tribe may export Underground Water outside the Hopi Reservation or the Navajo Reservation.

7.2.3.2 Priority for Domestic Use or Municipal Use. The Navajo Nation and the Hopi Tribe agree to give priority to Domestic Use and Municipal Use so long as they are consistent with Subparagraph 7.2.

7.2.3.3 Pumping Limitations. Total pumping from the Confined Aquifer and the Shonto Recharge Area within the LCR Watershed (as depicted in Exhibit 3.1.24) shall not exceed 14,000 AFY. Of this total limit, pumping by the Navajo Nation shall not exceed 8,400 AFY and pumping by the Hopi Tribe shall not exceed 5,600 AFY.

7.2.3.4 Industrial Uses. Neither Tribe may use Underground Water from the Confined Aquifer and the Shonto Recharge Area for Industrial Uses beyond a maximum aggregate of 2,000 AFY per Tribe, without Prior Written Consent of the other Tribe.

7.2.3.5 Development of New Wells After the Effective Date.

7.2.3.5.1 All Well development will occur in a manner consistent with the applicable tribal Well construction code. Each Tribe shall provide written notice to the other Tribe at least 30 days prior to drilling any New Well in the N-Aquifer. The notice will include the location, depth, and casing size of the New Well.

7.2.3.5.2 Neither Tribe may develop a New Well within the Restricted Zone. A replacement Well is not a New Well.

7.2.3.5.3 Boundary Springs. Neither Tribe shall drill a New Well within one and one-half miles of any N-Aquifer spring listed in Exhibit 7.2.3.5.3 that is located on the property of the other Tribe, without Prior Written Consent of the other Tribe.

7.2.3.5.4 Tuba City Wells. Neither Tribe shall drill or permit to be drilled a New Well within the Pasture Canyon Springs Buffer Zone specified in Exhibit 7.2.3.5.4 without Prior Written Consent of the other Tribe.

7.2.4 NTUA and Moenkopi. The Tribes agree to develop an interconnection between the Navajo Tribal Utility Authority water infrastructure at Tuba City and water infrastructure at Moenkopi, in order to create mutually beneficial redundancy, facilitate water exchanges, anticipate the provision of Colorado River Water for Tuba City and the Hopi Reservation via the iiná bá-paa tuwaqat'si pipeline, and for other settlement purposes.

### **7.3 DISPUTE RESOLUTION**

7.3.1 Application. For purposes of Paragraph 7.0, the following provisions shall apply following the Effective Date whenever either Tribe notifies the other Tribe in writing if it believes the other Tribe is acting in violation of Subparagraphs 7.1 or 7.2 and the Tribes have first met in good faith and failed to resolve their dispute.

7.3.2 Special Inter-Tribal Commission. In the event of a dispute under Subparagraphs 7.1, 7.2.1, 7.2.3, or 7.2.4, following good faith efforts to amicably resolve the dispute, if such efforts are unsuccessful the Tribes shall arbitrate the dispute under the Federal Arbitration Act pursuant to this provision.

7.3.2.1 The arbitrators will be an Inter-Tribal Commission, consisting of five members. The Commission will have two members selected by the Hopi Tribe, two members selected by the Navajo Nation, and one neutral member. At least one member for each Tribe shall have either hydrological training or be an employee of the Tribe's Water Resources Department (or equivalent). The Commission's sole responsibilities shall be to resolve matters between the Tribes concerning compliance with Subparagraphs 7.1, 7.2.1, 7.2.3, or 7.2.4, including actions to adopt, revise, implement, or enforce the N-Aquifer management terms in accordance and consistent with the general purposes and goals set forth in Subparagraph 7.2.1.

7.3.2.2 The fifth member of the Commission shall be a retired judge appointed by the joint decision of the Tribes. The fifth member will sit for a five-year term and may be re-appointed by the Tribes if they so agree. In the event of a vacancy in the position of the fifth member, the Tribes shall jointly appoint a new fifth member. The fifth member will sit as the Chairman of the Commission. In the event of an arbitration hearing, the Chairman will rule on the admissibility of evidence.

7.3.2.3 The Commission shall establish its own rules and procedures for the resolution of any dispute brought before it, consistent with the Federal Arbitration Act, hearing such evidence and argument as it may, in its discretion, choose to accept.

7.3.2.4 The Commission may attempt to resolve the matter by formal and informal means and the Chairman may communicate with the Tribes *ex parte*. The Commission shall seek by informal means to obtain a mutually agreeable resolution of the dispute, prior to any formal arbitration proceedings.

7.3.2.5 The Commission shall render a decision following arbitration which may include issuance of restraining orders, injunctions, declaratory judgments, and orders of specific performance enforcing the terms of the arbitration decision, but the Commission shall not have the authority to award damages, attorneys' fees, or the costs of arbitration. The Commission shall decide and resolve a dispute by issuing a written decision signed by a majority of the five members within 180 days after receiving the request for dispute resolution. Decisions of the Commission shall be final and binding on the Tribes.

7.3.3 Fees and Costs. The fees and costs of the Chairman will be split equally between the Tribes, including any costs for the hearing room, court reporters, and costs associated with a hearing. The fees and costs of the other four members of the Commission will be paid by the Tribe that appointed the members. Each Tribe shall be responsible for its own attorneys' fees and costs.

7.3.4 Enforcement of Award. Any award shall be enforced by the United States District Court for the District of Arizona.

**7.4 LIMITATION.**

Neither the Tribes nor the special Inter-Tribal Commission described in Subparagraph 7.3 shall have any power to interpret, modify, or amend the LCR Decree. Only the LCR Adjudication Court shall have the power to interpret, modify, or amend the LCR Decree, without limiting the right of appeal.

**7.5 NOTICES.**

7.5.1 For purposes of this Paragraph 7.0, when Prior Written Consent is required, and unless otherwise provided, a Tribe shall provide sixty (60) days' written notice to the other Tribe in advance of taking the action that requires Prior Written Consent. Said notice shall prominently state at the top of its first page the following:

THIS NOTICE IS DELIVERED PURSUANT TO PARAGRAPH 7.5.1 OF THE  
NORTHEASTERN ARIZONA INDIAN WATER RIGHTS SETTLEMENT AGREEMENT.  
FAILURE TO RESPOND WITHIN SIXTY (60) DAYS SHALL BE DEEMED CONSENT BY  
THE [INSERT NAME OF TRIBE RECEIVING NOTICE] TO THE [INSERT NAME OF TRIBE  
PROVIDING NOTICE] TO TAKE THE ACTION DESCRIBED BELOW.

In response to such prior written notice, the receiving Tribe shall provide its agreement or denial of consent to the notifying Tribe no later than sixty (60) days after receipt of the prior written notice. If the Tribe receiving notice shall fail to respond to the notifying Tribe's

request for consent within sixty (60) days of receipt of the prior written notice, the notifying Tribe may deem the Prior Written Consent as having been given.

7.5.2 All notices intended to impose liability on the Hopi Tribe or the Navajo Nation or exercise a right based on this Paragraph 7.0 shall be in writing and sent by certified or registered mail, return receipt requested, or hand delivered by an authorized agent of either party, or delivered by a nationally recognized overnight courier (such as FedEx or UPS). Notices shall be sent to the address set forth below or to such other address as may be designated by notice and shall be effective the date received or refused, but in no event later than (3) days after the notice was mailed, or if by hand delivery or courier delivery, the day delivered. If courier delivery is refused or not able to be made, the day delivery was first attempted shall be deemed the delivery date.

If to the Hopi Tribe:                    Hopi Tribe  
    Office of General Counsel  
    PO Box 123  
    Kykotsmovi, Arizona 86039

## **8.0 OFF-RESERVATION USES OF SURFACE WATER**

### **8.1 PARAGRAPH 8.0 LIMITED TO SURFACE WATER DIVERSIONS AND USES AND IMPOUNDMENTS OF WATER OUTSIDE THE NAVAJO RESERVATION, THE SAN JUAN SOUTHERN PAIUTE RESERVATION, AND THE HOPI RESERVATION IN THE LCR WATERSHED; EXPANDED DEFINITION OF TRIBES**

8.1.1 This Paragraph 8.0 applies only to Surface Water Diversions and Uses within the LCR Watershed and outside of the Navajo Reservation, the San Juan Southern Paiute Reservation, and the Hopi Reservation. Notwithstanding Subparagraph 3.1.112, Navajo Reservation, as used in this Paragraph 8.0, shall not include lands taken into trust as part of the Navajo Reservation subsequent to the Effective Date.

8.1.2 Expanded Definition of Tribes. For purposes of this Paragraph 8.0, “Tribes” shall mean the Navajo Nation, the San Juan Southern Paiute Tribe, the Hopi Tribe, and their agents or any third-party acting on behalf thereof. “Tribe” shall mean any one of the Tribes. The expanded definition of Tribes does not apply to the United States when acting as trustee for the Navajo Nation, the San Juan Southern Paiute Tribe, the Hopi Tribe, Hopi Allottees, Navajo Allottees, and Public Domain Allottees.

### **8.2 EXISTING SURFACE WATER USES**

8.2.1 Existing Surface Water Uses Described in an Abstract

8.2.1.1 Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J describe Existing Surface Water Uses of specific Claimants.

8.2.1.2 Claimants required to submit Abstracts pursuant to Subparagraph 8.2.1.1 include:

8.2.1.1A	Arizona Game & Fish Commission: Chevelon Cr. Wildlife Area Chevelon Canyon Lake
8.2.1.1B	Bar T Bar Ranch, Inc.
8.2.1.1C	Flying M Ranch, Inc.
8.2.1.1D	Flagstaff, City of
8.2.1.1E	Grover's Hill Irrigation District
8.2.1.1F	SRP C.C. Cragin Reservoir
8.2.1.1G	Show Low, City of
8.2.1.1H	Show Low Pinetop Woodland Irrigation Co.
8.2.1.1I	Silver Creek Irrigation District
8.2.1.1J	Winslow, City of

8.2.1.3 Except as provided in Subparagraph 15.5.3, the Parties, including the Claimant identified in an Abstract, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees:

8.2.1.3.1. Shall not object to, dispute, or challenge, on any basis, in the LCR Adjudication or in any other judicial or administrative proceeding, any Existing Surface Water Use described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J; and

8.2.1.3.2 Agree to the entry of a decree setting forth water rights with the attributes described in the Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J.

8.2.1.4 The Claimant of an Existing Surface Water Use described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, or 8.2.1.1J shall not claim a storage capacity for the Existing Surface Water Use that is greater than the storage capacity described in the Exhibit. The Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, retain the right to object to, dispute, or challenge a Claimant's assertion of a storage capacity for an Existing Surface Water Use described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, or 8.2.1.1J that is greater than the storage capacity described in the Exhibit.

8.2.1.5 The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not place a call, or exercise rights of priority, against an Existing Surface Water Use described in Exhibits 8.2.1.1A,

8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J.

8.2.2 Existing Surface Water Uses Not Described in an Abstract

8.2.2.1 Any Existing Surface Water Use not described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J shall be subject to Subparagraph 8.2.2.

8.2.2.2 The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, on any basis, in the LCR Adjudication or in any other judicial or administrative proceeding, any Existing Surface Water Use not described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J.

8.2.2.3 The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not place a call, or exercise rights of priority, against any Existing Surface Water Use not described in Exhibits 8.2.1.1A, 8.2.1.1B, 8.2.1.1C, 8.2.1.1D, 8.2.1.1E, 8.2.1.1F, 8.2.1.1G, 8.2.1.1H, 8.2.1.1I, and 8.2.1.1J; provided, however, that the Hopi Tribe retains the right to make calls or exercise rights of priority against any Existing Surface Water Use subject to the jurisdiction of the Norviel Decree Court, based on the Hopi Tribe's rights granted by the Norviel Decree.

8.2.3 The United States acting as trustee for the Public Domain Allottees shall not object to, dispute, or challenge, on any basis, in the LCR Adjudication or in any other judicial or administrative proceeding, claims to Existing Surface Water Uses.

### **8.3 SURFACE WATER USES OF THE ZUNI TRIBE ABSTRACTED IN THE LCR ADJUDICATION**

The Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, agree to be bound by the Zuni Indian Tribe Water Rights Settlement Judgment and Decree. The Abstracts for Surface Water uses for Zuni Lands set forth in Exhibit 4.1.A(1) *et seq.* to the Zuni Indian Tribe Water Rights Settlement Agreement of 2002, as amended, and the Zuni Indian Tribe Water Rights Settlement Judgment and Decree are attached as Exhibit 8.3A and Exhibit 8.3B to this Agreement.

### **8.4 NEW SURFACE WATER USES**

8.4.1 Initiation of New Surface Water Uses. After the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall initiate New Surface Water Uses: (a) with respect to Parties other than the Tribes and the United States, only in accordance with State law and this Agreement; and (b) specifically with respect to the Tribes and the United States, in accordance with Subparagraphs 4.11.2, 4.11.3, 4.12.2, 4.12.3, 4.13.2, 4.14.2, 4.14.3, 4.15.2, 4.15.3, 4.16.2, 5.10.2, 5.10.3, 5.11.2, 5.11.3, 5.12.2, 6.4.2, 6.4.3, 6.5.2, 6.5.3, and 6.6.2, as applicable.

8.4.2 Agreement not to Object to, Dispute or Challenge. Except as provided in Subparagraphs 4.6.4, 8.4.6, 8.6.6, and 8.6.7, the Tribes, and the United States acting as

trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, challenge, place a call, or exercise rights of priority against New Surface Water Uses, in the LCR Adjudication or in any other judicial or administrative proceeding; provided, however, that the Tribes, and the United States acting as trustee for the Tribes, retain the right to place a call or exercise rights of priority against New Surface Water Uses based on rights to the Use of Surface Water arising under State law or this Agreement that are associated with land owned in fee by a Tribe or Off-Reservation land held in trust by the United States for the benefit of a Tribe.

8.4.3 No New Surface Water Uses for Irrigation by Direct Diversion. After the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not initiate New Surface Water Uses for Irrigation by means of direct Diversion of Surface Water. As used in this Subparagraph, direct Diversion of Surface Water excludes the withdrawal of Underground Water from a Well.

8.4.4 No New Surface Water Uses in Three-Canyon Area by Means of Direct Stream Diversion. After the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not initiate new non-De Minimis Uses by means of direct Diversion of Surface Water in the Three-Canyon Area, except as provided in Subparagraphs 8.6.3 and 8.8.2. As used in this Subparagraph, direct Diversion of Surface Water excludes the withdrawal of Underground Water from a Well.

8.4.5 No New Surface Water Uses in Norviel Decree Area. Notwithstanding any provision of Subparagraph 8.4, no New Surface Water Uses may be initiated within the area of the LCR Watershed subject to the jurisdiction of the Norviel Decree Court.

8.4.6 The Parties, including the Tribes and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, retain the right to object to, challenge, dispute, place a call on, or exercise rights of priority against any Person, including a Party, that initiates a New Surface Water Use contrary to the provisions of Subparagraphs 8.4.3, 8.4.4, or 8.4.5. The LCR Adjudication Court or the Norviel Decree Court, as applicable, shall have exclusive jurisdiction to resolve any objections, challenges, disputes, calls, or exercises of rights of priority brought by a Party, including a Tribe or the United States, acting as trustee for a Tribe, a Hopi Allottee, or a Navajo Allottee, pursuant to this Subparagraph.

8.4.7 The United States acting as trustee for Public Domain Allottees shall not object to, dispute, or challenge, on any basis, in the LCR Adjudication or in any other judicial or administrative proceeding, claims to New Surface Water Uses.

## **8.5 WELLS**

8.5.1 Except as provided in Paragraph 9.0, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the withdrawal and Use of Underground Water from a Well even if the Well is capturing or will capture Surface Water; nor shall the Tribes, or the United States acting as trustee for the

Tribes, Hopi Allottees, and Navajo Allottees, place a call or exercise rights of priority against such a withdrawal and Use even if the Well is capturing Surface Water or the Well will capture Surface Water in the future.

8.5.2 Atkinson Trading Company Wells and Wellfield Location in the LCR Alluvium Near Cameron. The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the withdrawal or Use of Water from the two Existing Wells or any replacement Well(s) near Cameron owned by the Atkinson Trading Company, Inc., described in ADWR Certificate of Water Right No. 3930.001 and within the NW  $\frac{1}{4}$  SE  $\frac{1}{4}$ , Section 22, T29N, R9E, Gila and Salt River Basin Meridian, Coconino County, Arizona, and more particularly shown in the map attached hereto as Exhibit 8.5.2.

8.5.3 In the event the Navajo Nation determines to locate a Well or wellfields in the LCR alluvium near Cameron to meet demand for future Uses, the Navajo Nation shall meet and confer with the Atkinson Trading Company, Inc. to address Well siting in a manner that does not cause injury to Atkinson Trading Company, Inc.'s withdrawal or Use of Water or Water Rights and any such Wells or wellfield shall be sited in a manner as to: (a) avoid Injury to Water Rights of Atkinson Trading Company, Inc.; (b) avoid interference with Atkinson Trading Company, Inc.'s two Existing Wells and any replacement Well(s) and any future Navajo Nation Wells; and (c) maximize aquifer sustainability consistent with scenario 4 in Exhibit 8.5.3.

8.5.4 Exhibit 8.5.4 is the Abstract for the withdrawal and Use of Water from the two Existing Wells owned by the Atkinson Trading Company, Inc. The two Existing Wells and any replacement Well(s) described in Exhibit 8.5.4 shall be subject to the protections and provisions of Subparagraph 8.5.1. Except as provided in Subparagraph 15.5.3, the Parties, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees agree to the entry of a decree that sets forth the Water Right as described in Exhibit 8.5.4.

## **8.6 RESERVOIRS**

8.6.1 Agreement not to Construct New Reservoirs. Except as provided in Subparagraphs 8.6.2 and 8.6.3, after the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not construct any New Reservoir outside of the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Reservation.

8.6.2 Exceptions to Agreement Not to Construct New Reservoirs. After the Effective Date, the Tribes, and United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, challenge, place a call on, or exercise rights of priority against, in the LCR Adjudication or in any other judicial or administrative proceeding, the impoundment of Water by a New Reservoir in accordance with State law, so long as the New Reservoir:

8.6.2.1 Is wholly contained within a Closed Basin;

8.6.2.2 Is located within the Lower LCR Watershed and the Surface Water stored is used for Municipal Uses in the Lower LCR Watershed;

8.6.2.3 Stores Surface Water that became available for storage as a result of a change in place or purpose of use, or change in point of Diversion within the same Watershed of the LCR, and such change does not cause Injury to Rights to Surface Water;

8.6.2.4 Has no permanent water storage, and is operated solely for flood control purposes;

8.6.2.5 Is permitted by Subparagraph 8.8.2 or Subparagraph 8.8.3;

8.6.2.6 Impounds Effluent;

8.6.2.7 Impounds tailwater that is used to recover operational waste from an Irrigation Use for reuse for any purpose not otherwise prohibited by this Agreement;  
or

8.6.2.8 Impounds Underground Water.

8.6.3 Future Storage of Surface Water by the Navajo Nation and the Hopi Tribe.

8.6.3.1 Future Storage of Water in Lower LCR Watershed

8.6.3.1.1 Except as provided in Subparagraph 8.6.3.1.2, nothing in this Agreement shall be construed to prevent the Navajo Nation, and the United States acting as trustee for the Navajo Nation in consultation with and upon the agreement of the Navajo Nation, from developing, in accordance

with State law: (a) New Reservoirs within the Lower LCR Watershed; or  
(b) additional capacity in Existing Reservoirs within the Lower LCR  
Watershed.

8.6.3.1.2 Notwithstanding Subparagraph 8.6.3.1.1, the Navajo Nation and the United States acting as trustee for the Navajo Nation shall not develop or construct New Reservoirs or develop or construct additional capacity in Existing Reservoirs within the Upper Clear Creek, Lower Clear Creek, and Walnut Creek United States Geological Survey hydrologic unit codes as depicted on the map attached hereto as Exhibit 8.8.2.

8.6.3.2 The Hopi Tribe shall have the right to share up to fifty (50) percent of the yield available to the Navajo Nation or the Hopi Tribe from projects utilizing or bordering Hopi Lands, provided that the Hopi Tribe pays its allocable share of the capital and OM&R costs. Without limiting the generality of the foregoing, the foregoing specifically includes the ability to participate in any future arrangement with the City of Winslow to enlarge McHood Reservoir and share the enlarged capacity. The Hopi Tribe shall grant easements to the Navajo Nation for the impoundment and conveyance of Surface Water on or across Hopi Lands in the Three Canyon Area if said easements are required for any such joint project.

8.6.3.3 Nothing in this Agreement shall create any right of access or easement to impound or convey Surface Water upon or over land owned by another Person.

8.6.4 Operation, Maintenance or Modification of Reservoirs. After the Effective Date, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees shall not object to, dispute, challenge, place a call on, or exercise rights of priority against the following, in the LCR Adjudication or in any other judicial or administrative proceeding:

8.6.4.1 The operation or maintenance of any Existing Reservoir, or of any New Reservoir not prohibited by Subparagraph 8.6.1, including de-siltation, draining, dredging, lining to prevent seepage, or any appropriate maintenance of or replacement of any dam, weir, or headgate, so long as: (a) the operation, maintenance, or replacement is consistent with the operating criteria, if any, specified in the decree entered by the LCR Adjudication Court; and (b) the original storage entitlement is not exceeded; and

8.6.4.2 The modification, reconstruction, or replacement of any Existing Reservoir, or of any New Reservoir not prohibited by Subparagraph 8.6.1, including any change in location of a Reservoir as part of such modification, reconstruction, or replacement, and any increase in the capacity of a Reservoir to replace the original capacity lost due to infiltration, sedimentation, or dam failure, so long as: (a) the original storage entitlement is not exceeded; and (b) the location of any such Reservoir remains within the same Watershed of the LCR.

8.6.5 Operation, Modification or Enlargement of Other Impoundments. After the Effective Date, the Tribes, and the United States acting as trustee for the Tribes, Hopi

Allottees, and Navajo Allottees shall not object to, dispute, challenge, place a call on, or exercise rights of priority against the following, in the LCR Adjudication or in any other judicial or administrative proceeding:

8.6.5.1 The operation, modification, or enlargement of Impoundments containing Effluent within the LCR Watershed, in accordance with State law;

8.6.5.2 Tailwater ponds existing as of the Effective Date that are used to recover operational waste from an Irrigation Use for reuse for any purpose not otherwise prohibited by this Agreement; and

8.6.5.3 The operation, modification or enlargement of Impoundments containing Underground Water, in accordance with State law.

8.6.6 The Parties, including the Tribes and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, retain the right to object to, challenge, dispute, place a call on, or exercise rights of priority against any Party or any Person that constructs a New Reservoir other than as provided in Subparagraphs 8.6.2 or 8.6.3. The LCR Adjudication Court shall have exclusive jurisdiction to resolve any objections, challenges, disputes, calls, or exercises of rights of priority brought by the Parties, including a Tribe, or the United States, acting as trustee for a Tribe, a Hopi Allottee, or a Navajo Allottee, pursuant to this Subparagraph.

8.6.7 The Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, retain the right to object to, challenge, dispute, place a call on, or exercise rights of priority against any Party or any Person that operates, maintains,

modifies, relocates, alters, or enlarges an Existing Reservoir other than as provided in Subparagraphs 8.6.4 and 8.6.5, if the Navajo Nation or the United States acting in its capacity as trustee for the Navajo Nation and Navajo Allottees, can demonstrate that such operation, maintenance, modification, relocation, alteration, or enlargement causes an Injury to Rights to Surface Water. The LCR Adjudication Court shall have exclusive jurisdiction to resolve any objections, challenges, disputes, calls, or exercises of rights of priority brought by the Navajo Nation, or the United States acting as trustee for the Navajo Nation or a Navajo Allottee, pursuant to this Subparagraph.

#### **8.7 APPLICATION FOR SEVERANCE AND TRANSFER, CHANGE IN PLACE OF USE OR PURPOSE OF USE, OR CHANGE IN POINT OF DIVERSION OF A SURFACE WATER USE**

8.7.1 After the Enforceability Date, an application for severance and transfer, change in place of Use or purpose of Use, or change in point of Diversion of a decreed Right to Surface Water by the Tribes, or the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, and in consultation with and upon the agreement of the relevant Tribe, shall be filed with the LCR Adjudication Court. The LCR Adjudication Court shall give notice of any such application to the Court-approved mailing list by electronic means, and direct ADWR to publish notice of the application as ordered by the LCR Adjudication Court. The LCR Adjudication Court may request technical assistance from ADWR in connection with the processing of an application. The decision to grant or deny an application, in whole or in part, shall be made by the LCR Adjudication Court.

8.7.2 The LCR Adjudication Court shall conduct any hearings on an application for severance and transfer, change in place of Use or purpose of Use, or change in point of Diversion of a Surface Water Use filed pursuant to Subparagraph 8.7.1 in the county in which the existing point of Diversion for the Surface Water Use is located.

8.7.3 Except as provided in Subparagraph 8.7.4, after the Effective Date, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, any application:

8.7.3.1 For severance and transfer, change in place of Use or purpose of Use, or change in point of Diversion for a Use of Surface Water; or

8.7.3.2 To relocate an Existing Reservoir, so long as the relocated Reservoir remains in the same Watershed of the LCR.

8.7.4 Subparagraph 8.7.3 shall not apply to the following objections, disputes, or challenges:

8.7.4.1 By the Hopi Tribe, if an application to sever and transfer a Use of Surface Water or an application for a change in purpose of a Use of Surface Water is for a right granted by the Norviel Decree and the application proposes to sever and transfer the use to a point upstream of the Diversions for the 26 Bar Ranch, and the Hopi Tribe can demonstrate that the proposed severance and transfer will cause harm to the Hopi Tribe's rights granted by the Norviel Decree.

8.7.4.2 By a Tribe, or the United States acting as trustee for a Tribe, a Navajo Allottee, or a Hopi Allottee, in consultation with and upon the agreement of the Tribes, to an application to sever and transfer the storage rights of a reservoir with a storage capacity of greater than 500 acre-feet, other than C.C. Cragin Reservoir as provided in Subparagraph 8.8.2 or Lake Mary Reservoirs as provided in Subparagraph 8.8.3, if the Tribe or the United States can demonstrate that the requested severance and transfer will cause Injury to Rights to Surface Water.

8.7.4.3 By the successors in interest of a Tribe for land owned in fee by a Tribe, unless the successor in interest is a Tribe.

8.7.5 Any Water Rights decreed by the Norviel Decree shall retain their character as State based Water Rights, regardless of the identity of the owner and regardless of whether the Water Rights are held in trust for a Tribe.

## **8.8 TRANSPORTATION OF SURFACE WATER AWAY FROM THE LCR WATERSHED**

8.8.1 With the exception of the right to Divert and transport Surface Water from C.C. Cragin Reservoir for use outside the LCR Watershed as provided in Subparagraph 8.8.2 and the right to Divert and transport Surface Water from Lake Mary Reservoirs and other Surface Water rights owned by the City of Flagstaff for Use outside of the LCR Watershed as provided in Subparagraph 8.8.3 and set forth in Exhibit 8.2.1.1D, after the Effective Date, the Parties shall not transport Surface Water Diverted within the LCR Watershed for Use outside of the LCR Watershed.

8.8.2 C.C. Cragin Reservoir; Surface Water Transportation, Severance and Transfer and Change in Purpose of Use. This Subparagraph 8.8.2 addresses rights to Surface Water and Uses at C.C. Cragin Reservoir. To the extent that other provisions in Paragraph 8.0 conflict with this Subparagraph 8.8.2, the terms of this Subparagraph 8.8.2 shall control. As of the Effective Date, Certificate of Water Right Nos. 3696.0002 and 3696.0003 for C.C. Cragin Reservoir, and associated amendments to those certificates, permit the transportation of Surface Water from C.C. Cragin Reservoir for Use outside of the LCR Watershed. Except as provided in Subparagraph 15.5.3, after the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or in any other judicial or administrative proceeding: (a) the Water Right as evidenced by the Certificates of Water Right or any associated amendments to the Certificates of Water Right for C.C. Cragin Reservoir; (b) the severance and transfer of all or any portion of the right to Use Surface Water from C.C. Cragin Reservoir to a location outside of the LCR Watershed in accordance with State law; (c) the change in purpose of use of all or any portion of the right to use Surface Water from C.C. Cragin Reservoir in accordance with State law; or (d) the operation, maintenance, modification, reconstruction, or replacement of C.C. Cragin Reservoir, including the relocation of C.C. Cragin Reservoir within the Upper Clear Creek and Lower Clear Creek United States Geological Survey hydrologic unit codes and depicted on the map attached hereto as Exhibit 8.8.2 as part of any modification, reconstruction, or replacement; or (e) the

increase in capacity of C.C. Cragin Reservoir to replace the original capacity lost to sedimentation or catastrophic dam failure.

8.8.3 This Subparagraph 8.8.3 addresses rights to Surface Water and Uses at Lake Mary Reservoirs. To the extent that other provisions in Paragraph 8.0 conflict with this Subparagraph 8.8.3, the terms of this Subparagraph 8.8.3 shall control. Except as provided in Subparagraph 15.5.3, after the Effective Date, the Parties, including the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or in any other judicial or administrative proceeding, any of the City of Flagstaff's rights to Surface Water and Uses described in Abstracts set forth in Exhibit 8.2.1.1D, or the change in point of Diversion or place of Use for the City of Flagstaff rights to Surface Water and Uses, including the Lake Mary Reservoirs in accordance with State law; or the operation, maintenance, modification, reconstruction, or replacement of the Lake Mary Reservoirs or to commingle Water in the Lake Mary Reservoirs, including the relocation of all or any portion of the Lake Mary Reservoirs within the Lake Mary Watershed as more particularly described in Exhibit 8.8.3, as part of such modification, reconstruction, or replacement; or the increase in capacity of the Lake Mary Reservoirs to commingle Water or to replace the original capacity lost to infiltration, sedimentation, or dam failure.

8.8.4 The Parties, including the Tribes and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, retain the right to object to, challenge, or dispute the Diversion and transportation of Surface Water for Use outside the LCR Watershed that is contrary to the prohibition in Subparagraph 8.8.1. The LCR Adjudication

Court shall have exclusive jurisdiction to resolve any objections, challenges, disputes, calls, or exercises of rights of priority brought by the Parties, including a Tribe or the United States, acting as trustee for a Tribe, a Hopi Allottee, or a Navajo Allottee, pursuant to this Subparagraph.

#### **8.9 AGREEMENT NOT TO ASSERT FORFEITURE OR ABANDONMENT OF EXISTING SURFACE WATER USES**

Due to the unique conditions in the LCR Watershed, including human-made depletions and changes in LCR channel conditions, the LCR is no longer a perennial river. Based on gage data, the LCR near Holbrook is typically dry during the spring and only regularly flows during monsoon storms. The LCR flow near Winslow is generally divided into two seasonal flow periods during summer monsoon storms and during spring snowmelt mostly from the Three Canyon Area. In recognition of this, and with the twin purposes of protecting the spring and monsoon flood flows that reach the Navajo Reservation and protecting existing upstream Uses, the Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, Existing Surface Water Uses on the basis of forfeiture or abandonment. Except as provided in Subparagraph 15.5.3, no Party, directly or indirectly through an agent or other third-party acting on its behalf, shall object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the Hopi Tribe's rights granted by the Norviel Decree on the basis of forfeiture or abandonment.

#### **8.10 BURDEN OF PROOF**

The Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, shall bear the burden of proof when asserting claims for Injury to Rights to Surface Water pursuant to this Paragraph 8.0.

**9.0 OFF—RESERVATION GROUNDWATER WITHDRAWALS AND USES WITHIN THE LCR WATERSHED**

**9.1** This Paragraph 9.0 applies only to Groundwater withdrawals and Uses within the LCR Watershed and outside of the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Reservation.

**9.2 EXPANDED DEFINITION OF TRIBES**

For purposes of this Paragraph 9.0, “Tribes” shall mean the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe, and their agents or any third-party acting on their behalf. The expanded definition of Tribes does not apply to the United States when acting as trustee for the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, Hopi Allottees, Navajo Allottees, and Public Domain Allottees.

**9.3 WITHDRAWAL AND USE OF GROUNDWATER BY ANY PERSON OUTSIDE THE BUFFER ZONES**

The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge the withdrawal or Use of Groundwater from any Off-Reservation Well located outside the Buffer Zones, or the drilling or replacement of any Well for the withdrawal and Use of Groundwater located outside the Buffer Zones, in the LCR Adjudication or any other judicial or administrative proceeding. For purposes of this Subparagraph 9.3, any Well located on land owned or

claimed to be owned by Atkinson Trading Company, Inc. as described in Subparagraphs 8.5.2 and 8.5.4 shall be considered an Off-Reservation Well located outside the Buffer Zones.

**9.4 CATALOGING EXISTING WELLS WITHIN THE BUFFER ZONES; RETENTION OF CLAIMS AGAINST PUMPING EXCEEDANCES**

9.4.1 Cataloging Existing Wells Located within the Buffer Zones.

Within 24 months after the Enactment Date, ADWR shall compile a catalog that identifies all Existing Wells within Buffer Zone 1 and all Existing Wells within Buffer Zone 2, other than Existing Wells on lands held in trust by the United States for the benefit of a Tribe. In compiling the catalog, ADWR shall use information in ADWR’s records as of the Enactment Date. The catalog shall identify each Existing Well required to be included in the catalog by well registration number, and shall include the following information for each Existing Well if the information is available in ADWR’s records: location by legal description, and as determined through the use of global positioning system units; owner; casing diameter; the larger of the Well capacity (if equipped) or the casing diameter set forth in the chart below; and date of completion (if known). For unequipped Existing Wells required to be included in the catalog, the following capacities shall be assigned:

<b>Casing Diameter (inches)</b>	<b>Capacity (AFY)</b>
4	87
5	136
6	196
8	348
10	544
12	784
14	1067

16 or larger	1400
--------------	------

9.4.1.1 Before completing the catalog, ADWR shall post a draft of the catalog on its website, publish notice of the posting of the draft of the catalog in a newspaper of general circulation in the county or counties in which the Buffer Zones are located and send written notice of the posting of the draft of the catalog by first-class mail to each owner of a Non-Exempt Well in the Buffer Zones, other than the owner of an Existing Well on land held in trust by the United States for the benefit of a Tribe, at the owner's address on file with ADWR. The notice shall state that any Existing Well owner may contact ADWR within 180 days after the date of the notice to provide ADWR with information to correct any errors or omissions in the catalog.

9.4.1.2 Once the catalog is completed, ADWR shall submit the catalog to the LCR Adjudication Court for approval, and provide notice: (1) by electronic means, to the LCR Adjudication Court approved mailing list; and (2) by first class mail, to the Parties, all Persons that filed Statements of Claimant for Water sources located in the Buffer Zones, other than for lands held in trust by the United States for the benefit of a Tribe, and all Persons who own Existing Wells identified in the catalog.

9.4.1.3 Any Person, including the Tribes and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, who owns an Existing Well within the Buffer Zones may object to the catalog of Existing Wells in the same Buffer Zone only on the basis that information concerning a Well or Wells in the catalog is inaccurate, or that an Existing Well was omitted from the catalog. The

LCR Adjudication Court shall conduct hearings on any objections, revise the catalog if needed to reflect the resolution of objections, and then approve the catalog.

Upon application to the LCR Adjudication Court prior to approval of the catalog, and upon a showing of good cause, the catalog may be supplemented to include any Existing Wells that were required to be included in the catalog but were omitted, to correct any inaccurate information concerning an Existing Well or to remove a Well from the catalog that was not existing as of the Effective Date.

9.4.1.4 Any Existing Well that is required to be included in the catalog by this Subparagraph 9.4.1, but is not included in the catalog as approved by the LCR Adjudication Court, shall be treated as a New Well.

9.4.1.5 The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge the withdrawal or Use of Groundwater from the Existing Wells listed in the catalog approved by the LCR Adjudication Court, unless:

9.4.1.5.1 An Existing Well within Buffer Zone 1 withdraws an amount in a given Year that exceeds the Well's capacity as set forth in the catalog; or

9.4.1.5.2 An Existing Well within Buffer Zone 2 withdraws an amount that exceeds the Well's capacity as set forth in the catalog, or 500 GPM, or a volume of 800 AFY, whichever is greater.

9.4.1.6 The Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, retain claims for injury to rights to Groundwater caused by withdrawals of Groundwater from an Existing Well within Buffer Zone 1, to the extent that the withdrawals in a given Year exceed the Existing Well's capacity set forth in the catalog. The claim against the owner of an Existing Well within Buffer Zone 1, as described in this Subparagraph, shall be brought in the LCR Adjudication Court, which shall have exclusive jurisdiction over such disputes.

9.4.1.7 The Navajo Nation and the United States acting as trustee for the Navajo Nation and Navajo Allottees retain claims for injury to rights to Groundwater caused by withdrawals of Groundwater from an Existing Well within Buffer Zone 2, to the extent that the withdrawals exceed the capacity of the Existing Well as set forth in the catalog, or a capacity of 500 GPM or a volume of 800 AFY, whichever is greater. The claim against the owner of an Existing Well within Buffer Zone 2, as described in this Subparagraph, shall be brought in the LCR Adjudication Court, which shall have exclusive jurisdiction over such disputes.

#### 9.4.2 Replacement of Existing Wells.

9.4.2.1 Any Existing Well within Buffer Zone 1 may be replaced with a Well that is: (a) limited to the same capacity as the original Existing Well, as provided in Subparagraph 9.4.1; and (b) located at a site no farther than 660 feet from the location of the original Existing Well. The original Existing Well may be operated in conjunction with the replacement Well as long as the combined withdrawals from both Wells does not exceed the pumping capacity of the original Existing Well.

9.4.2.2 Any Existing Well within Buffer Zone 2 may be replaced with a Well that is: (a) limited to a pumping capacity the same as the original Existing Well, or, if the pumping capacity of the original Well was less than 500 GPM, to a pumping capacity no greater than 500 GPM; and (b) located at a site no farther than 660 feet from the location of the original Existing Well; and (c) outside Buffer Zone 1. The original Existing Well may be operated in conjunction with the replacement Well as long as the combined Groundwater withdrawal from both Wells does not exceed the pumping capacity of the original Existing Well.

9.4.2.3 An Existing Well that is replaced as provided in this Subparagraph 9.4.2 is not a New Well.

9.4.2.4 The owner of an Existing Well that is replaced as provided in this Subparagraph 9.4.2 shall provide notice to the LCR Adjudication Court that the Well has been replaced and request that the catalog of Existing Wells described in Subparagraph 9.4.1 be updated to reflect the new location of the Well and any other changes in the description of the Well as set forth in the catalog.

## **9.5 EXEMPT WELLS WITHIN THE BUFFER ZONES.**

Exempt Wells within the Buffer Zones, regardless of when they are drilled or equipped, shall not be cataloged. The Tribes, and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge, in the LCR Adjudication or any other judicial or administrative proceeding, the drilling or

replacement of Exempt Wells or the withdrawal and Use of Groundwater from Exempt Wells within the Buffer Zones, regardless of when the Exempt Wells are drilled or equipped.

#### **9.6 NEW WELLS WITHIN BUFFER ZONE 1**

The Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, retain claims for injury to rights to Groundwater caused by the withdrawal of Groundwater from a New Well within Buffer Zone 1. The claim against the owner of a New Well within Buffer Zone 1, as described in this Subparagraph, shall be brought in the LCR Adjudication Court, which shall have exclusive jurisdiction over such disputes.

#### **9.7 NEW WELLS WITHIN BUFFER ZONE 2**

For purposes of this Subparagraph 9.7, a series of New Wells within Buffer Zone 2 that serves the same facility shall be considered a single New Well.

9.7.1 The Tribes and the United States acting as trustee for the Tribes, Hopi Allottees, and Navajo Allottees, shall not object to, dispute, or challenge the withdrawal or Use of Groundwater from any New Well within Buffer Zone 2, or the drilling of any Well for the withdrawal and Use of Groundwater within Buffer Zone 2, in the LCR Adjudication or any other judicial or administrative proceeding, if the New Well is equipped with a pumping capacity of 500 GPM or less.

9.7.2 Except as provided in Subparagraph 9.7.4, the Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, retain claims for injury to rights to Groundwater caused by the withdrawal of Groundwater from a New Well within

Buffer Zone 2 that is equipped with a pumping capacity greater than 500 GPM. The claim against the owner of the New Well within Buffer Zone 2, as described in this Subparagraph, shall be brought in the LCR Adjudication Court, which shall have exclusive jurisdiction over such disputes.

9.7.3 A New Well located on land that is ASLD Land as of the Effective Date in Sections 6 and 12, T20N R11E, and Section 36, T21N R10E, shall be limited to 500 GPM or less.

9.7.4 Notwithstanding Subparagraph 9.7.2, the Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, shall not retain claims for injury to rights to Groundwater caused by the withdrawal of Groundwater from a New Well within Buffer Zone 2 with a capacity greater than 500 GPM, so long as the New Well complies with the “Well Spacing Configuration” defined below.

9.7.4.1 Pursuant to the “Well Spacing Configuration”, to construct a New Well of greater than 500 GPM, there shall be an offset of acreage, the “Restricted Pumping Acreage,” where no other New Wells can be drilled. “Restricted Pumping Acreage” shall mean the number of acres upon which New Well pumping shall be restricted within Buffer Zone 2 and shall be calculated pursuant to the following formula:

New Well GPM x 1.25 acres = Restricted Pumping Acreage.

And in other words,

Restricted Pumping Acreage x (0.8) = maximum New Well GPM against which a claim is not retained.

For example, for a 1,000 GPM New Well, 1,250 acres [1,000 x 1.25] shall be required as Restricted Pumping Acreage within Buffer Zone 2.

As an additional example, two sections of 640 acres totaling 1,280 acres would provide sufficient Restricted Pumping Acreage to allow for a 1,024 GPM [1,280 x 0.8] New Well in Buffer Zone 2.

9.7.4.2 Restricted Pumping Acreage need not be contiguous to the parcel housing the New Well (the “New Well Parcel”), but all Restricted Pumping Acreage must be within five miles of the New Well. Consistent with the Navajo Nation’s objective to protect against pumping impacts on the Navajo Reservation, Restricted Pumping Acreage shall be identified as those parcels located closest to the Navajo Reservation boundary within Buffer Zone 2. An identification of the Restricted Pumping Acreage shall be provided in writing to the Navajo Nation.

9.7.5 ASLD agrees, solely for the benefit of the Red Gap Ranch Regional Pipeline Project, that:

9.7.5.1 A New Well that is: (a) located on land that is ASLD Land as of the Effective Date; (b) within Buffer Zone 2; (c) within or adjacent to Red Gap Ranch as identified on Exhibit 3.1.134A; and (d) west of Highway 99 shall be limited to a pumping capacity of 500 GPM or less.

9.7.5.2 A New Well that is: (a) located on land that is ASLD land as of the Effective Date; (b) within Buffer Zone 2; and (c) within two miles east of Highway 99 may have a pumping capacity of greater than 500 GPM for a single use only if (1) it complies with the Well Spacing Configuration requirements described in Subparagraph 9.7.4, and (2) the City of Flagstaff provides its prior written consent, to be reasonably withheld only for the benefit of the Red Gap Ranch Regional Pipeline Project.

## **9.8 BURDEN OF PROOF**

The Navajo Nation and the United States acting as trustee for the Navajo Nation and Navajo Allottees shall bear the burden of proof when asserting claims for injury to rights to Groundwater pursuant to this Paragraph 9.0.

## **9.9 ADWR NOTICE**

After the Effective Date, ADWR shall make its best efforts to cause reasonable notice to be made available to persons intending to drill a New Well or replace an Existing Well in Buffer Zone 1 or Buffer Zone 2 of the potential claims available to the Navajo Nation and the United States acting as trustee for the Navajo Nation and Navajo Allottees pursuant to Subparagraphs 9.6 and 9.7. ADWR shall make its best efforts to provide a copy of such notices to the Navajo Nation and the Hopi Tribe.

## **9.10 IN LIEU AGREEMENTS**

The Agreement between the Navajo Nation, the Hopi Tribe, the United States acting as trustee for the Navajo Nation and the Hopi Tribe, Bar T Bar, and the Arizona State Land

Department is attached as Exhibit 9.10 hereto. To the extent that the terms of Paragraph 9.0 conflict with the terms of Exhibit 9.10, the terms of Exhibit 9.10 shall govern the rights and obligations of the parties to that Exhibit.

## **10.0 NAVAJO NATION WATER DELIVERY CONTRACTS AND RELATED PROVISIONS**

### **10.1 WATER DELIVERY CONTRACTS**

The Secretary shall contract with the Navajo Nation for delivery and Use of the Water described in Subparagraphs 4.7, 4.8 and 4.9.

#### 10.1.1 Navajo Nation Upper Basin Colorado River Water

Pursuant to section 6 of the Act, the Secretary shall negotiate and execute one or more contracts for the delivery and Use of Navajo Nation Upper Basin Colorado River Water.

#### 10.1.2 Navajo Nation Cibola Water

Pursuant to section 6 of the Act, the Secretary shall negotiate and execute one or more contracts for the delivery and Use of Navajo Nation Cibola Water.

#### 10.1.3 Navajo Nation Fourth Priority Water

Pursuant to section 6 of the Act, the Secretary shall negotiate and execute one or more contracts for the delivery and Use of Navajo Nation Fourth Priority Water.

### **10.2 TERMS OF WATER DELIVERY CONTRACTS**

10.2.1 A Navajo Nation Water Delivery Contract shall become effective on the Enforceability Date and, once effective, shall be permanent and without limit as to term. The United States shall waive Colorado River Storage Project standby charges and delivery charges and annual administration fees as provided in section 6 of the Act.

10.2.2 Except for storage by the Navajo Nation at the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico, a Navajo Nation Water Delivery Contract shall not permit the Use of the Water outside of the State.

10.2.3 A Navajo Nation Water Delivery Contract shall not, either temporarily or permanently, alter or reduce the State's annual Lower Basin apportionment pursuant to the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, et seq., as amended, and the Decree, or annual Upper Basin apportionment pursuant to the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes.

10.2.4 Nothing in a Navajo Nation Water Delivery Contract shall alter or impair the State's rights, authorities, and interests under the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, et seq., as amended, the contract between the United States and the State of Arizona dated February 9, 1944, or the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes, or the Decree.

10.2.5 A Navajo Nation Water Delivery Contract shall not limit the State's ability to seek or advocate changes in the Colorado River system's operating rules, criteria or

guidelines as they apply to the State's apportionments from the Upper Basin and the Lower Basin.

10.2.6 In the event that a Navajo Nation Water Delivery Contract will result in the delivery of Upper Basin Colorado River Water to the Lower Basin or Lower Basin Colorado River Water to the Upper Basin, the Secretary shall confer with the State prior to executing such Navajo Nation Water Delivery Contract concerning: (a) the impact of the Water deliveries on the availability of Upper Basin or Lower Basin Colorado River Water within the State; (b) Reclamation's annual accounting for such Water on the State's Colorado River apportionments in the Upper Basin and Lower Basin; and, if appropriate (c) the impact on the operations of the Central Arizona Project.

10.2.7 A Navajo Nation Water Delivery Contract shall identify: (a) the Water's place(s) of Use; (b) the purpose of the Water's Use(s) during the term of the contract; (c) the mechanism(s) for delivery of the Water; and (d) each point of Diversion under the contract.

10.2.8 Water Service Contract No. 09-WC-40-318 between the United States and the Navajo Nation dated December 23, 2009 for the delivery of up to 950 AFY of water from Lake Powell to the Navajo Nation for municipal and industrial Use within the Community of LeChee shall be replaced with a Navajo Nation Water Delivery Contract for the delivery of Navajo Nation Upper Basin Colorado River Water that complies with all the terms and conditions in this Subparagraph 10.2. Upon the Enforceability Date, Water Service Contract No. 09-WC-40-318 shall terminate.

10.2.9 A Navajo Nation Water Delivery Contract shall not prejudice the interests of the State, or serve as precedent against the State, in any litigation related to the apportionment, Diversion, storage, or Use of Water from the Colorado River system as defined in Article II(a) of the Decree.

10.2.10 In the case of a conflict between a Navajo Nation Water Delivery Contract and this Agreement, this Agreement shall control.

10.2.11 Any material amendment or modification of a Navajo Nation Water Delivery Contract shall comply with all of the terms and conditions in this Subparagraph 10.2.

### **10.3 CONDITIONS OF DELIVERY**

10.3.1 Curtailment of Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water Diverted Above Lee Ferry. Deliveries of Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water effected by the Diversion of Water from the Colorado River above Lee Ferry shall be curtailed during shortages of Colorado River Water to the same extent as other non-CAP Fourth Priority Colorado River Water supplies. Nothing herein precludes the Navajo Nation from firming its Lower Basin Colorado River Water.

10.3.2 Accounting for the Type of Water Delivered. In accordance with section 17 of the Act, deliveries of Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water effected by the Diversion of Water from the Colorado River above Lee Ferry shall be accounted for as deliveries of Lower Basin Colorado River Water.

10.3.3 Accounting Regardless of the Place of Use or Point of Diversion.

10.3.3.1 In accordance with section 17 of the Act, all Navajo Nation Upper Basin Colorado River Water delivered to and consumptively used by the Navajo Nation or its lessees or exchange partners pursuant to this Agreement shall be accounted for: (a) as if such use had occurred in the Upper Basin, regardless of the point of Diversion or place of Use; and (b) as part of the 50,000 acre-feet of Upper Basin Colorado River Water apportioned to the State of Arizona in Article III(a)(1) of the Upper Colorado River Basin Compact of 1948.

10.3.3.2 In accordance with section 17 of the Act, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water delivered to and consumptively used by the Navajo Nation or its lessees or exchange partners pursuant to this Agreement shall be accounted for: (a) as if such use had occurred in the Lower Basin, regardless of the point of Diversion or place of Use; and (b) as part of the 2.8 million acre-feet of Lower Basin Colorado River Water apportioned to the State of Arizona in Article II(B)(1) of the Decree.

10.3.4 Accounting for Upper Basin Diversions as Lower Basin Deliveries. In accordance with section 17 of the Act, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water Diverted from the Colorado River or its tributaries above Lee Ferry shall be accounted for as if such water had been delivered to the Lower Basin at Lee Ferry for purposes of Article III(d) of the Colorado River Compact.

#### **10.4 LEASES AND EXCHANGES; LESSEE RESPONSIBILITY FOR CHARGES**

10.4.1 Leases for Use or Storage on the Navajo Reservation. The Navajo Nation may lease Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water for Use or storage on the Navajo Reservation in accordance with Navajo Nation leasing regulations and applicable federal law.

10.4.2 Leases and Exchanges for Use or Storage off of the Navajo Reservation. With the approval of the Secretary, the Navajo Nation may enter into contracts to lease, options to lease, contracts to exchange or options to exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water. CAWCD's approval shall also be required to deliver Water through the CAP System in any such transaction. Contracts to lease and options to lease shall be for a term not to exceed one hundred (100) years. Contracts to exchange or options to exchange shall be for the term provided for in each such contract or option. The Navajo Nation may renegotiate any lease, at any time during the term of that lease provided the term of such renegotiated lease does not exceed one hundred (100) years. Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water shall not be permanently alienated.

10.4.3 Lessee Responsibility for Charges. Notwithstanding Subparagraph 10.2, any lessee of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water shall be responsible for all charges and fees associated with the delivery of such water.

10.4.4 All contracts to lease, exchange, or store Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water shall identify: (a) the Water's place(s) of Use or places of storage; (b) the purpose of the Water's Use(s) during the term of the contract; (c) the mechanism(s) for delivery of the Water; and (d) each point of Diversion under the contract. A contract to lease, exchange, or store Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water shall not conflict with the Act or this Agreement.

#### **10.5 ENTITLEMENT TO LEASE AND EXCHANGE MONIES**

The Navajo Nation, and not the United States in any capacity, shall be entitled to all consideration due to the Navajo Nation under any contracts to lease, options to lease, contracts to exchange or options to exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water or Navajo Nation Fourth Priority Water. The United States in any capacity shall have no trust obligation or other obligation to monitor, administer or account for, in any manner, any monies received by the Navajo Nation as consideration under any such contracts to lease, options to lease, contracts to exchange, or options to exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water.

#### **11.0 HOPI TRIBE WATER DELIVERY CONTRACTS AND RELATED PROVISIONS**

##### **11.1 WATER DELIVERY CONTRACTS**

The Secretary shall contract with the Hopi Tribe for delivery and Use of the Water described in Subparagraphs 5.7 and 5.8.

11.1.1 Hopi Tribe Upper Basin Colorado River Water.

Pursuant to section 6 of the Act, the Secretary shall negotiate and execute one or more contracts for the delivery and Use of the Hopi Tribe Upper Basin Colorado River Water.

11.1.2 Hopi Tribe Cibola Water

Pursuant to section 6 of the Act, the Secretary shall negotiate and execute the Hopi Tribe Settlement Cibola Contract.

**11.2 TERMS OF WATER DELIVERY CONTRACTS**

11.2.1 A Hopi Tribe Water Delivery Contract shall become effective on the Enforceability Date and, once effective, shall be permanent and without limit as to term. The United States shall waive Colorado River Storage Project standby charges and delivery charges and annual administration fees as provided in section 6 of the Act.

11.2.2 A Hopi Tribe Water Delivery Contract shall not permit the Use of the Water outside of the State.

11.2.3 A Hopi Tribe Water Delivery Contract shall not, either temporarily or permanently, alter or reduce the State's annual Lower Basin apportionment pursuant to the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, et seq., as amended or the Decree, or annual Upper Basin apportionment pursuant to the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes.

11.2.4 Nothing in a Hopi Tribe Water Delivery Contract shall alter or impair the State's rights, authorities, and interests under the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, et seq., as amended, the contract between the United States and the State of Arizona dated February 9, 1944, or the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in Title 45, Chapter 7, Article 3 of the Arizona Revised Statutes or the Decree.

11.2.5 A Hopi Tribe Water Delivery Contract shall not limit the State's ability to seek or advocate changes in the Colorado River system's operating rules, criteria or guidelines as they apply to the State's apportionments from the Upper Basin and the Lower Basin.

11.2.6 In the case of a conflict between a Hopi Tribe Water Delivery Contract and this Agreement, this Agreement shall control.

11.2.7 Any material amendment or modification of a Hopi Tribe Water Delivery Contract shall comply with all of the terms and conditions in this Subparagraph 11.2.

11.2.8 In the event that a Hopi Tribe Water Delivery Contract will result in the delivery of Upper Basin Colorado River Water to the Lower Basin or Lower Basin Colorado River Water to the Upper Basin, the Secretary shall confer with the State prior to executing of such Hopi Tribe Water Delivery Contract concerning: (a) the impact of the Water deliveries on the availability of Upper Basin or Lower Basin Colorado River Water within the State; (b) Reclamation's annual accounting for such Water on the State's Colorado River apportionments in the Upper Basin and Lower Basin; and if appropriate, (c) the impact on the operations of the Central Arizona Project.

11.2.9 A Hopi Tribe Water Delivery Contract shall identify: (a) the Water's place(s) of Use; (b) the purpose of the Water's Use(s) during the term of the contract; (c) the mechanism(s) for delivery of the Water; and (d) each point of Diversion under the contract.

11.2.10 A Hopi Tribe Water Delivery Contract shall not prejudice the interests of the State, or serve as precedent against the State, in any litigation related to the apportionment, Diversion, storage, or Use of Water from the Colorado River system as defined in Article II(a) of the Decree.

### **11.3 CONDITIONS OF DELIVERY**

11.3.1 Curtailment of Fourth Priority Hopi Tribe Cibola Water Diverted Above Lee Ferry. Deliveries of Hopi Tribe Cibola Water effected by the Diversion of Water from the Colorado River above Lee Ferry shall be curtailed during shortages of Colorado River Water to the same extent as other non-CAP Fourth, Fifth, and Sixth Priority Colorado River Water supplies, as applicable. Nothing herein precludes the Hopi Tribe from firming its Lower Basin Colorado River Water.

11.3.2 Accounting for the Type of Water Delivered. In accordance with section 17 of the Act, all deliveries of Hopi Tribe Cibola Water effected by the Diversion of Water from the Colorado River above Lee Ferry shall be accounted for as deliveries of Fourth, Fifth or Sixth Priority Colorado River Water, as applicable.

11.3.3 Accounting Regardless of the Place of Use or Point of Diversion.

11.3.3.1 In accordance with section 17 of the Act, all Hopi Tribe Cibola Water delivered to and consumptively used by the Hopi Tribe or its lessees or exchange

partners pursuant to this Agreement shall be accounted for: (a) as if such use had occurred in the Lower Basin, regardless of the point of Diversion or place of Use; and (b) as part of the 2.8 million acre-feet of Colorado River water apportioned to the State of Arizona in Article II(B)(1) of the Decree.

11.3.3.2 In accordance with Section 17 of the Act, all Hopi Tribe Upper Basin Colorado River Water delivered to and consumptively used by the Hopi Tribe or its lessees or exchange partners pursuant to this Agreement shall be accounted for: (a) as if such use had occurred in the Upper Basin, regardless of the point of Diversion or place of Use; and (b) as part of the 50,000 acre-feet of Upper Basin Colorado River Water apportioned to the State of Arizona in Article III(a)(1) of the Upper Colorado River Basin Compact of 1948.

11.3.4 Accounting for Upper Basin Diversions as Lower Basin Deliveries. In accordance with section 17 of the Act, all Hopi Tribe Cibola Water Diverted from the Colorado River or its tributaries above Lee Ferry for delivery through the iiná bá - paa tuwaqat'si pipeline shall be accounted for as if such water had been delivered to the Lower Basin at Lee Ferry for purposes of Article III(d) of the Colorado River Compact.

#### **11.4 LEASES AND EXCHANGES; LESSEE RESPONSIBILITY FOR CHARGES**

11.4.1 Leases for Use or Storage on the Hopi Reservation. The Hopi Tribe may lease Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water for Use or storage on the Hopi Reservation in accordance with Hopi Tribe leasing regulations and applicable federal law.

11.4.2 Leases for Use or Storage off of the Hopi Reservation. With the approval of the Secretary, the Hopi Tribe may enter into contracts to lease, options to lease, contracts to exchange or options to exchange Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water. CAWCD's approval shall also be required to deliver Water through the CAP System in any such transaction. Contracts to lease and options to lease shall be for a term not to exceed one hundred (100) years. Contracts to exchange or options to exchange shall be for the term provided for in each such contract or option. The Hopi Tribe may renegotiate any lease, at any time during the term of that lease provided the term of such renegotiated lease does not exceed one hundred (100) years. The Hopi Tribe Upper Basin Colorado River Water and the Hopi Tribe Cibola Water shall not be permanently alienated.

11.4.3 Lessee Responsibility for Charges. Notwithstanding Subparagraph 11.2, any lessee of Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water shall be responsible for all charges and fees associated with the delivery of such water.

11.4.4 All contracts to lease, exchange, or store Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water shall identify: (a) the Water's place(s) of Use or places of storage; (b) the purpose of the Water's Use(s) during the term of the contract; (c) the mechanism(s) for delivery of the Water; and (d) each point of Diversion under the contract. A contract to lease, exchange, or store Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water shall not conflict with the Act or this Agreement.

## **11.5 ENTITLEMENT TO LEASE AND EXCHANGE MONIES**

The Hopi Tribe, and not the United States in any capacity, shall be entitled to all consideration due to the Hopi Tribe under any contracts to lease, options to lease, contracts to exchange or options to exchange Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water. The United States in any capacity shall have no trust obligation or other obligation to monitor, administer or account for, in any manner, any monies received by the Hopi Tribe as consideration under any such contracts to lease, options to lease, contracts to exchange, or options to exchange Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water.

## **12.0 INFRASTRUCTURE; FUNDING AND RELATED SUPPORT**

Pursuant to section 9 of the Act, there is established a non-trust settlement fund known as the iiná bá – paa tuwaqat’si pipeline Implementation Fund Account and a series of trust funds to which money will be deposited for use by the Tribes and the United States to plan, design, construct, operate, and maintain water supply infrastructure to the communities of the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Reservation, as well as trust and fee lands outside the reservations and funds to support those efforts.

### **12.1 IINÁ BÁ - PAA TUWAQAT’SI PIPELINE IMPLEMENTATION FUND ACCOUNT**

12.1.1 Pursuant to section 9 of the Act, there is established a non-trust interest-bearing account known as the iiná bá – paa tuwaqat’si pipeline Implementation Fund Account to be managed and distributed by the Secretary consisting of a mandatory authorization and appropriation of \$1.715 billion, together with any interest earned on that

amount, any indexing, and any additional appropriations authorized pursuant to section 13 of the Act necessary to complete the iiná bá - paa tuwaqat'si pipeline, together with any interest earned on and indexing of such additional appropriations.

12.1.2 The Secretary, acting through the Commissioner of Reclamation, shall plan, design, and construct the iiná bá - paa tuwaqat'si pipeline, to transport water from Lake Powell to the areas identified in Subparagraphs 12.1.8, 12.1.9, and 12.1.10 on the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Southern Area for municipal, domestic, commercial, and industrial Water Uses.

12.1.3 The federal funding for the iiná bá - paa tuwaqat'si pipeline is \$1.715 billion, which shall be funded by direct appropriations, and such other amounts as are authorized and required to complete the pipeline as provided in Section 13 of the Act. The total amount of obligations incurred by the Secretary in carrying out Subparagraph 12.1 shall be increased or decreased through indexing, as appropriate, based on ordinary fluctuations from January 1, 2024, in construction cost indices applicable to the types of construction involved in the design and construction of the iiná bá – paa tuwaqat'si pipeline.

12.1.4 The Secretary shall form a Project Construction Committee composed of representatives from Reclamation, the Bureau of Indian Affairs, the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe to participate in the planning and design of the iiná bá - paa tuwaqat'si pipeline. The iiná bá – paa tuwaqat'si pipeline shall be substantially configured as Alternative 5, Option B-100 described in the Reclamation Navajo-Hopi Value Planning Study – Arizona dated October 2020 (Value Planning Draft Report for Presentation (Not for Distribution)). The iiná bá - paa tuwaqat'si pipeline may

include components that have already been built or acquired by the Navajo Nation or the Hopi Tribe as a contribution by the Navajo Nation or the Hopi Tribe towards the cost of planning, designing, and constructing the pipeline. Construction of the iiná bá – paa tuwaqat’si pipeline shall commence after design, construction phasing, cost estimating, and value engineering have occurred and the phasing of construction has been agreed to among the Secretary, the Navajo Nation, and the Hopi Tribe, with the Secretary deciding on phasing if an agreement is not reached.

12.1.5 The Secretary, acting through the Commissioner of Reclamation, shall complete construction of the iiná bá - paa tuwaqat’si pipeline no later than December 31, 2040, or such later date as is agreed to by the Secretary, the Navajo Nation, and the Hopi Tribe.

12.1.6 All costs incurred by the Secretary in carrying out this Subparagraph 12.1 shall be nonreimbursable.

12.1.7 The iiná bá - paa tuwaqat’si pipeline shall include the planning, design, and construction of water intake facilities to transport Water into the pipeline from Lake Powell, as well as a water treatment plant, storage tanks, pumping stations, and electrical transmission equipment.

12.1.8 The iiná bá - paa tuwaqat’si pipeline is intended to serve the following areas and communities of the Navajo Reservation: LeChee, Coppermine, Bitter Springs, Cedar Ridge, Bodaway/Gap, Cameron, Grey Mountain, Coal Mine Mesa, and Tuba City.

12.1.9 The iiná bá - paa tuwaqat'si pipeline is intended to serve the following areas and communities of the Hopi Reservation: Moenkopi, Howell Mesa, First Mesa, Second Mesa, Third Mesa, and Keams Canyon.

12.1.10 The iiná bá - paa tuwaqat'si pipeline is intended to serve the San Juan Southern Paiute Southern Area in Arizona.

12.1.11 Prior to substantial completion of any phase of the iiná bá - paa tuwaqat'si pipeline that will provide Water to both the Navajo Nation and the Hopi Tribe, the Navajo Nation and the Hopi Tribe shall execute a project operations agreement, approved by the Secretary, that sets forth all terms and conditions necessary for long-term operations of the iiná bá - paa tuwaqat'si pipeline, including: (a) distribution of water; (b) responsibility for maintenance of the iiná bá - paa tuwaqat'si pipeline or section of the pipeline; (c) the allocation and payment of annual operation, maintenance and replacement costs of the iiná bá - paa tuwaqat'si pipeline or section of the pipeline based on the proportionate uses and ownership of the pipeline; and (d) a right to sue in United States District Court to enforce the operations agreement.

## **12.2 THE NAVAJO NATION WATER SETTLEMENT TRUST FUND**

Pursuant to section 10 of the Act, there is established a trust fund for the Navajo Nation to be known as the Navajo Nation Water Settlement Trust Fund to be managed, invested, and distributed by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Navajo Nation Water Settlement Trust Fund, together with any investment

earnings, including interest, earned on those amounts. The Secretary shall manage the Navajo Nation Water Settlement Trust Fund in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. § 4001 *et seq.*). Established within the Navajo Nation Water Settlement Trust Fund are the following accounts: (a) the Navajo Nation Water Projects Trust Fund Account, (b) the Navajo Nation OM&R Trust Fund Account, (c) the Navajo Nation Renewable Energy Trust Fund Account, (d) the Navajo Nation Agricultural Water Conservation Trust Fund Account, and (e) the Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account, all of which are described below:

12.2.1 The Navajo Nation Water Projects Trust Fund Account.

The Navajo Nation Water Projects Trust Fund Account will be used to plan, design, construct, operate, and maintain water supply infrastructure including wells, water treatment facilities, pipelines, storage tanks, pumping stations, electrical transmission equipment, wastewater treatment facilities, and renewable energy facilities to serve Navajo communities. Federal funding required for the Navajo Nation Water Projects is \$2.3692 billion. The water projects are as follows:

12.2.1.1 The iiná bá - paa tuwaqat'si pipeline lateral is intended to provide potable Water to serve the community of LeChee and Antelope Point.

12.2.1.2 Southwest Navajo Regional Groundwater Project is intended to provide potable Water to the communities of: Leupp, Dilkon, Birdsprings, Indian Wells, Teesto, and Tolani Lake, and, subject to future Water Supply Contracts, may

interconnect to the Red Gap Ranch Regional Pipeline Project and obtain potable Water from the Red Gap Ranch Regional Pipeline Project at Points of Access;

12.2.1.3 Ganado Regional Groundwater Project is intended to provide potable Water to the communities of: Ganado, Steamboat, Cornfields, Kinlichee, and Jeddito;

12.2.1.4 Black Mesa Regional Groundwater Project is intended to transport potable Water to the communities of Black Mesa, Shonto, and Forest Lake;

12.2.1.5 Four Corners Project is intended to provide potable Water to the communities of Chinle and Many Farms;

12.2.1.6 Lupton Area Project is intended to provide potable Water to the communities of Lupton and Nahata Dziil;

12.2.1.7 Code Talker Lateral Extension Project is intended to provide potable Water to the communities of Ganado, Jeddito, Steamboat, Kinlichee, and Cornfields;

12.2.1.8 Kayenta Aquifer Storage and Recovery Project is intended to provide for the storage of water in the Navajo aquifer and the alluvial aquifer in Arizona or Utah with capacity to store 5,000 AFY of Water diverted near Halchita in Utah. This project is intended to serve Chilchinbeto, Dennehotso, Kayenta, Mexican Water, and Oljato; and

12.2.1.9 Local Upper Basin Water Projects are small local projects in the Upper Basin that are intended to provide Water infrastructure to Many Farms,

Nazlini, Kayenta, Chilchinbeto, Rough Rock, Sweetwater, Mexican Water, Rock Point, and Tsaile/Wheatfields.

12.2.2 The Navajo Nation OM&R Trust Fund Account.

The Navajo Nation will use the Navajo Nation OM&R Trust Fund Account to support the operation, maintenance, and replacement of the components of each of the projects described in Subparagraph 12.2. The amount of the Navajo Nation OM&R Trust Fund shall be \$229.5 million.

12.2.3 The Navajo Nation Renewable Energy Trust Fund Account.

The Navajo Nation Renewable Energy Trust Fund Account of \$40 million will provide funding for the development of renewable energy facilities to support the energy demands of the iiná bá - paa tuwaqat'si pipeline and the Navajo Nation water projects developed pursuant to Subparagraph 12.2.

12.2.4 The Navajo Nation Agricultural Conservation Trust Fund Account.

The Navajo Nation Agricultural Conservation Trust Fund Account will be used to reduce water shortages on land within the Navajo Reservation that was historically irrigated. The Navajo Nation Agricultural Conservation Trust Fund will be used for the implementation or repair of sprinklers, drip or other types of irrigation systems, land leveling, stream bank stabilization and restoration, pasture seeding, pasture management, fencing wind breaks, stockpounds, windmills, and wells. The federal funding for the Navajo Nation Agricultural Conservation Trust Fund Account is \$80 million. Up to half of the Navajo Nation Agricultural Conservation Trust Fund can be used for the replacement and

development of livestock wells and impoundments on the Navajo Nation Reservation and Trust Land.

#### 12.2.5 The Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account.

Pursuant to section 10 of the Act, there is established the Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account to provide \$28 million for the purchase of land and associated Lower Basin Colorado River water rights within the State..

#### 12.3 The Hopi Tribe Water Settlement Trust Fund.

Pursuant to section 11 of the Act, there is established a trust fund for the Hopi Tribe to be known as the Hopi Tribe Water Settlement Trust Fund to be managed, invested, and distributed by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Hopi Tribe Water Settlement Trust Fund, together with any investment earnings, including interest, earned on those amounts. The Secretary shall manage the Hopi Tribe Water Settlement Trust Fund in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. § 4001 *et seq.*). Established within the Hopi Tribe Water Settlement Trust Fund are the following accounts: (a) the Hopi Tribe Groundwater Projects Trust Fund Account, (b) the Hopi Tribe OM&R Trust Fund Account, (c) the Hopi Tribe Agricultural Water Conservation Trust Fund Account, and (d) the Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account, all of which are described below:

##### 12.3.1 The Hopi Tribe Groundwater Projects Trust Fund Account.

The Hopi Tribe Groundwater Projects Trust Fund Account will be used to plan, design, construct, operate, and maintain water supply infrastructure including wells, water treatment facilities, pipelines, storage tanks, pumping stations, electrical transmission equipment, wastewater treatment facilities, and renewable energy facilities to serve Hopi communities. Federal funding required for the Hopi Tribe Groundwater Projects is \$390 million. The Hopi Tribe Groundwater Projects are as follows:

12.3.1.1 The Side Rock-Moenkopi Groundwater Project. The Side Rock-Moenkopi Groundwater Project is intended to provide potable Water to Moenkopi and unserved locations on the Hopi Reservation.

12.3.1.2 The Expanded Hopi Arsenic Mitigation Project (HAMP). The HAMP is intended to provide potable Water to communities at First, Second, and Third Mesas and Keams Canyon.

12.3.2 The Hopi Tribe OM&R Trust Fund Account.

The Hopi Tribe will use the Hopi Tribe OM&R Trust Fund Account to support the operation, maintenance, and replacement of the components of each of the projects described in Subparagraph 12.3. The amount of the fund shall be \$87 million.

12.3.3 The Hopi Tribe Agricultural Conservation Trust Fund Account.

The Hopi Tribe Agricultural Conservation Trust Fund Account will be used to reduce water shortages on land within the Hopi Reservation that was historically irrigated and grazing land. The Fund will be used for the implementation or repair of sprinklers, drip or other types of irrigation systems, land leveling, stream bank stabilization and restoration, pasture seeding, pasture management, fencing, wind breaks, stockpounds, windmills and

wells, spring restoration, repair, replacement, and relocation of low technology structures to support Akchin farming, flood-water farming and other traditional farming practices, among other actions. The federal funding for the Hopi Tribe Agricultural Conservation Trust Fund Account is \$30 million.

#### 12.3.4 The Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account.

Pursuant to section 11 of the Act, there is established the Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account to provide \$1.5 million for the purchase of land and associated Lower Basin Colorado River water rights within the State.

#### 12.4 The San Juan Southern Paiute Tribe Water Settlement Trust Fund Account.

Pursuant to section 12 of the Act, there is established a trust fund for the San Juan Southern Paiute Tribe to be known as the San Juan Southern Paiute Tribe Water Settlement Trust Fund to be managed, invested, and distributed by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Trust Fund, together with any investment earnings, including interest, earned on those amounts. The Secretary shall manage the San Juan Southern Paiute Tribe Water Settlement Trust Fund in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. § 4001 *et seq.*). Established within the San Juan Southern Paiute Tribe Water Settlement Trust Fund are the following accounts: (a) the San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account, (b) the San Juan Southern Paiute Tribe OM&R Trust Fund Account, and (c)

the San Juan Southern Paiute Tribe Agricultural Water Conservation Trust Fund Account, all of which are described below:

12.4.1 The San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account.

The San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account will be used to plan, design, construct, operate, and maintain the San Juan Southern Paiute Tribe Groundwater Project, which shall include water treatment facilities, pipelines, storage tanks, pumping stations, electrical transmission equipment, wastewater treatment facilities, and renewable energy facilities. Federal funding required for the San Juan Southern Paiute Tribe Groundwater Projects is \$28 million.

12.4.2 The San Juan Southern Paiute Tribe OM&R Trust Fund Account.

The San Juan Southern Paiute Tribe will use the San Juan Southern Paiute Tribe OM&R Trust Fund Account to support the operation, maintenance, and replacement of the components of the groundwater project described in Subparagraph 12.4.1. The amount of the San Juan Southern Paiute Tribe OM&R Trust Fund shall be \$1.5 million.

12.4.3 The San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account.

The San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account will be used to reduce water shortages on the San Juan Southern Paiute Southern Area that was historically irrigated. This project includes the implementation or repair of sprinklers, drip or other types of irrigation systems, land leveling, pipelines, pumps and storage, stream bank stabilization and restoration, pasture seeding, pasture management, fencing, wind breaks, stockponds, windmills and wells, among other actions. The federal funding

for the San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account is \$0.3 million. Up to half of San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account can be used for the replacement and development of livestock wells and impoundments on the San Juan Southern Paiute Southern Area.

## **12.5 RIGHTS-OF-WAY AND CONSTRUCTION CORRIDORS**

### **12.5.1 Grants of Rights-of-Way Between the Tribes and the United States.**

12.5.1.1 Each Tribe shall timely consent to the grant of perpetual, non-exclusive rights-of-way to the United States, for purposes of coming upon and using land within the consenting Tribe's reservation to plan, design, construct, access, operate, maintain, modify, and replace: (a) the iiná bá - paa tuwaqat'si pipeline; and (b) any infrastructure reasonably necessary to operate said pipeline, at no cost to the United States. Upon transfer of ownership of the pipeline pursuant to section 8 of the Act, the Secretary shall also transfer that section of the right-of-way that lies on the Navajo Reservation between Moenkopi and the boundary of the 1882 Reservation to the Hopi Tribe.

12.5.1.2 The Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe shall: (a) each timely consent to the grant of perpetual, non-exclusive rights-of-way to the other Tribes, for purposes of coming upon and using land within the consenting Tribe's reservation to plan, design, construct, access, operate, maintain, modify, and replace (i) the Navajo Nation Water Projects, (ii) the Hopi Tribe Groundwater Projects, and (iii) the San Juan Southern Paiute Groundwater Project, and (iv) any infrastructure reasonably necessary to operate said projects, all in

furtherance of provision of water supplies to the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Southern Area, without charge or other payment or consideration from the other Tribes, excepting surface damages; and (b) as the consenting Tribe, waive any right to tax, directly or indirectly, the right-of-way or infrastructure permitted by the immediately preceding clause (a) to be located in the right-of-way or related activities.

12.5.1.3 Except as expressly stated in Subparagraphs 12.5.1.1 and 12.5.1.2, the Tribes and the United States may not develop, use, or occupy the rights-of-way for any other purpose without the prior written approval of the consenting Tribe. The approval of the consenting Tribe for such purposes may be granted, granted upon conditions, or withheld in the sole discretion of the consenting Tribe. Except as expressly stated in Subparagraphs 12.5.1, 12.5.3, and 12.5.4, nothing in this Agreement shall be construed to affect or modify the rights or responsibilities of any Tribe with respect to: (a) claims to access or lack thereof across the reservation or lands of another Tribe; or (b) such rights of access as may exist under applicable law as of the Effective Date.

12.5.2 Construction Corridors or Other Consents by a Tribe to the United States.

Notwithstanding the provisions of Subparagraph 12.5.1, with the consent of each affected Tribe, the United States may enter into legal devices other than rights-of-way such as construction corridor agreements when operating within the jurisdiction of one of the Tribes in furtherance of the planning, design, and construction of the iiná bá - paa tuwaqat'si pipeline.

12.5.3 Side Rock-Moenkopi Groundwater Project Right-of-Way.

Notwithstanding Paragraph 14.0, and subject to the condition that the Hopi Tribe has consented to and the United States has granted the right-of-way described in Subparagraph 12.5.4, as of the Effective Date, the Navajo Nation: (a) hereby consents to the grant of a perpetual, non-exclusive right-of-way to the Hopi Tribe, for purposes of coming upon and using land within the Navajo Reservation along an alignment generally depicted in Exhibit 12.5.3, to plan, design, construct, access, operate, maintain, modify, and replace a water pipeline, and any infrastructure reasonably necessary to operate said pipeline, in furtherance of the Side Rock-Moenkopi Groundwater Project, without charge or other payment of consideration from the Hopi Tribe or the United States, excepting surface damages; and (b) waives any right to tax, directly or indirectly, the right-of-way or infrastructure permitted by the immediately preceding clause (a) to be located in the right-of-way or related activities. Except as expressly stated in the immediately preceding sentence, the Hopi Tribe may not develop, use, or occupy the right-of-way for any other purpose without the prior written approval of the Navajo Nation. The approval of the Navajo Nation required by the immediately preceding sentence may be granted, granted upon conditions, or withheld in the sole discretion of the Navajo Nation. Except as expressly stated in Subparagraphs 12.5.1, 12.5.3, or 12.5.4, nothing in this Agreement shall be construed to affect or modify the rights or responsibilities of the Navajo Nation or the Hopi Tribe with respect to: (a) claims to access or lack thereof across the reservation or lands of the other; or (b) such rights of access as may exist under applicable law as of the Effective Date.

12.5.4 NTUA (Questar) Right-of-Way.

Notwithstanding Paragraph 14.0, and subject to the condition that the Navajo Nation has consented to and the United States has granted the right-of-way described in Subparagraph 12.5.3, as of the Effective Date, the Hopi Tribe: (a) hereby consents to the grant of a perpetual, non-exclusive right-of-way to Navajo Nation Tribal Utility Authority, for purposes of coming upon and using land within the Hopi Reservation along an alignment generally depicted in Exhibit 12.5.4, to plan, design, construct, access, operate, maintain, modify, and replace a natural gas pipeline, and any infrastructure reasonably necessary to operate said pipeline, in furtherance of provision of natural gas supplies to the Navajo Reservation and the Hopi Reservation, without charge or other payment of consideration from the Navajo Nation or the United States, excepting surface damages; and (b) waives any right to tax, directly or indirectly, the right-of-way or infrastructure permitted by the immediately preceding clause (a) to be located in the right-of-way or related activities. Except as expressly stated in the immediately preceding sentence, Navajo Nation Tribal Utility Authority may not develop, use, or occupy the right-of-way for any other purpose without the prior written approval of the Hopi Tribe. The approval of the Hopi Tribe required by the immediately preceding sentence may be granted, granted upon conditions, or withheld in the sole discretion of the Hopi Tribe. Except as expressly stated in Subparagraphs 12.5.1, 12.5.3, or 12.5.4, nothing in this Agreement shall be construed to affect or modify the rights or responsibilities of the Navajo Nation or the Hopi Tribe with respect to: (a) claims to access or lack thereof across the reservation or lands of the other; or (b) such rights of access as may exist under applicable law as of the Effective Date.

#### 12.5.5 Taxes.

Without limiting the generality of the tax waivers set forth in Subparagraph 12.5.1, 12.5.3, and 12.5.4, the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe each covenants that it will not tax or assess, in any manner whatever, directly or indirectly, any rights, property or activity associated with the rights-of-way or other legal devices, infrastructure, and activities described in Subparagraphs 12.5.1, 12.5.2, 12.5.3, and 12.5.4.

### **12.6 FUTURE PROJECTS AMENDMENT**

The Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe may, within their individual discretion, determine that any or all of the projects identified in this Paragraph 12.0, except for the iiná bá - paa tuwaqat'si pipeline, should be amended to serve the Tribes' future needs for water on their respective reservations, utilizing the federal funds appropriated to each of the Tribes as set forth in this Paragraph 12.0 and in sections 10, 11, and 12 of the Act.

### **13.0 WAIVERS, RELEASES AND RETENTION OF CLAIMS**

#### **13.1 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE NAVAJO NATION, ON BEHALF OF THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES), AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES)**

13.1.1 Except as provided in Subparagraph 13.1.3, the Navajo Nation, on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the

Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), as part of the performance of the respective obligations of the Navajo Nation and the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Hopi Allottees, the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under federal, State, or other law for all:

13.1.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Land, arising from time immemorial and, thereafter, forever;

13.1.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;

13.1.1.3 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Land, arising from time immemorial through the Enforceability Date;

13.1.1.4 Past, present, and future claims for Injury to Water for Navajo Land, arising from time immemorial and, thereafter, forever;

13.1.1.5 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;

13.1.1.6 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for Navajo Land, resulting from the Diversion or Use of Water outside of Navajo Land in a manner not in violation of this Agreement or State law; and

13.1.1.7 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.1.2 The waiver and release of claims described in Subparagraph 13.1.1 shall be in the form set forth in Exhibit 13.1 and shall take effect on the Enforceability Date.

13.1.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.1.1 and Exhibit 13.1, the Navajo Nation, acting on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), shall retain any right:

13.1.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.1.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the LCR Decree and the Gila River Adjudication Decree;

13.1.3.3 To assert claims for Water Rights for land owned or acquired by the Navajo Nation in fee, or held in trust by the United States for the benefit of the Navajo Nation, in the LCR Watershed pursuant to Subparagraphs 4.11, and 4.12, or in the Gila River Basin pursuant to Subparagraphs 4.14 and 4.15;

13.1.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.1.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.2 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE UNITED STATES, ACTING AS TRUSTEE FOR THE NAVAJO ALLOTTEES**

13.2.1 Except as provided in Paragraph 13.2.3, the United States, acting as trustee for the Navajo Allottees, as part of the performance of the obligations of the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Navajo Nation, the Hopi Tribe, the Hopi Allottees, and the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under federal, State, or other law, for all:

13.2.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Allotments, arising from time immemorial and, thereafter, forever;

13.2.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Allottees or predecessors of the Navajo Allottees;

13.2.1.3 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Allotments, arising from time immemorial through the Enforceability Date;

13.2.1.4 Past, present, and future claims for Injury to Water for Navajo Allotments, arising from time immemorial and, thereafter, forever;

13.2.1.5 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and,

thereafter, forever, that are based on the aboriginal occupancy of land within the State by Navajo Allottees or predecessors of the Navajo Allottees;

13.2.1.6 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for the Navajo Allotments, resulting from the Diversion or Use of Water outside of Navajo Allotments in a manner not in violation of this Agreement or State law; and

13.2.1.7 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.2.2 The waiver and release of claims under Subparagraph 13.2.1 shall be in the form set forth in Exhibit 13.2 and shall take effect on the Enforceability Date.

13.2.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.2.1 and Exhibit 13.2, the United States acting as trustee for the Navajo Allottees, shall retain any right:

13.2.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Allottees under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.2.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Allottees under the LCR Decree;

13.2.3.3 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.2.3.4 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.3 WAIVER, RELEASE AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE NAVAJO NATION, ON BEHALF OF THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES), AGAINST THE UNITED STATES**

13.3.1 Except as provided in Subparagraph 13.3.3, the Navajo Nation, acting on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), as part of the performance of the obligations of the Navajo Nation under this Agreement and the Act, shall execute a waiver and release of all claims against the United States, including agencies, officials, and employees of the United States, under federal, State, or other law for all:

13.3.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Land, arising from time immemorial and, thereafter, forever:

13.3.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;

13.3.1.3 Claims for Water Rights within the State that the United States, acting as trustee for the Navajo Nation and Navajo Allottees, asserted or could have asserted in any proceeding, except to the extent that such rights are recognized as part of the Navajo Nation's Water Rights under the Act.

13.3.1.4 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Land, arising from time immemorial through the Enforceability Date;

13.3.1.5 Past, present, and future claims for Injury to Water for Navajo Land, arising from time immemorial and, thereafter, forever;

13.3.1.6 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;

13.3.1.7 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for Navajo Land, resulting from the Diversion or Use of Water outside of Navajo Land in a manner not in violation of this Agreement or State law;

13.3.1.8 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act;

13.3.1.9 Past, present, and future claims arising out of, or relating in any manner to, United States Geological Survey monitoring and reporting activities described in Paragraph 7.0;

13.3.1.10 Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of Paragraphs 8.0 and 9.0;

13.3.1.11 Past and Present claims for foregone benefits from non-Navajo Use of Water, on and off Navajo Land (including Water from all sources and for all Uses), within the State arising before the Enforceability Date;

13.3.1.12 Past and Present claims for damage, loss, or injury to land or natural resources due to loss of Water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of Water or Water Rights, claims relating to interference with, Diversion of, or taking of Water, or claims relating to a failure to protect, acquire, replace, or develop Water, Water

Rights, or Water infrastructure, within the State, arising before the Enforceability Date;

13.3.1.13 Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on Navajo Land;

13.3.1.14 Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial Water delivery system on Navajo Land;

13.3.1.15 Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation projects on Navajo Land, including damages, losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date; and

13.3.1.16 Past and Present claims arising before the Enforceability Date from a failure to provide a dam safety improvement to a dam on Navajo Land within the State.

13.3.2 The waiver and release of claims described in Subparagraph 13.3.1 shall be in the form set forth in Exhibit 13.3 and shall take effect on the Enforceability Date.

13.3.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.3.1 and Exhibit 13.3, the Navajo Nation, acting on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), shall retain any right:

13.3.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.3.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the LCR Decree and the Gila River Adjudication Decree;

13.3.3.3 To assert claims for Water Rights for land owned or acquired by the Navajo Nation in fee in the LCR Watershed pursuant to Subparagraphs 4.11 and 4.12, or in the Verde River Subwatershed pursuant to Subparagraphs 4.14 and 4.15;

13.3.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.3.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.4 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION**

13.4.1 Except as provided in Subparagraph 13.4.3, the United States, in all capacities (except as trustee for an Indian Tribe other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the obligations of the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the Navajo Nation, the Members of the Navajo Nation, or any agency, official, or employee of the Navajo Nation, under federal, State, or any other law for all:

13.4.1.1 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on Navajo Land, arising from time immemorial through the Enforceability Date;

13.4.1.2 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on Navajo Land in a manner that is not in violation of this Agreement or State law; and

13.4.1.3 Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.4.2 The waiver and release of claims under Subparagraph 13.4.1 shall be in the form set forth in Exhibit 13.4 and shall take effect on the Enforceability Date.

13.4.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.4.1 and Exhibit 13.4, the United States shall retain any right to assert any claim not

expressly waived in accordance with that Subparagraph and that Exhibit, in any federal or State court of competent jurisdiction.

**13.5 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY PARTIES, OTHER THAN THE NAVAJO NATION ON BEHALF OF THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION, AND THE UNITED STATES ACTING AS TRUSTEE FOR THE NAVAJO NATION, THE MEMBERS OF THE NAVAJO NATION AND THE NAVAJO ALLOTTEES**

13.5.1 For purposes of this Subparagraph 13.5, the term “Parties” shall mean the Parties, except: (a) the Navajo Nation on behalf of the Navajo Nation and the Members of the Navajo Nation; (b) the United States, acting as trustee for the Navajo Nation, the Members of the Navajo Nation, and the Navajo Allottees; (c) the Hopi Tribe on behalf of the Hopi Tribe and the Members of the Hopi Tribe; (d) the United States acting as trustee for the Hopi Tribe, the Members of the Hopi Tribe, and the Hopi Allottees; (e) the San Juan Southern Paiute Tribe on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe; and (f) the United States acting in its capacity as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe.

13.5.2 Except as provided in Subparagraph 13.5.4, the Parties shall execute a waiver and release of all claims against the Navajo Nation, the Members of the Navajo Nation, the Navajo Allottees, the United States, acting as trustee for the Navajo Nation, the Members of the Navajo Nation, and the Navajo Allottees, under federal, State, or other law for all:

13.5.2.1 Past and present claims for Injury to Water Rights resulting from the Diversion or Use of Water on Navajo Land and the Navajo Allotments, arising from time immemorial through the Enforceability Date;

13.5.2.2 Claims for Injury to Water Rights arising after the Enforceability Date resulting from the Diversion or Use of Water on or for Navajo Land and the Navajo Allotments in a manner not in violation of this Agreement or State law; and

13.5.2.3 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.5.3 The waiver and release of claims described in Subparagraph 13.5.2 shall be in the form set forth in Exhibit 13.5 and shall take effect on the Enforceability Date.

13.5.4 Notwithstanding the waiver and release of claims described in Subparagraph 13.5.2 and Exhibit 13.5, the Parties shall retain any right:

13.5.4.1 To assert claims for injuries to, and seek enforcement of, their rights under this Agreement or the Act in any State or federal court of competent jurisdiction;

13.5.4.2 To assert claims for injuries to, and seek enforcement of, their rights under any judgment and decree entered by the court in the LCR Adjudication Proceedings and any judgment or decree entered by the court in the Gila River Adjudication Proceedings;

13.5.4.3 To assert past, present, and future claims to Water, including Colorado River Water, that are not inconsistent with this Agreement; and

13.5.4.4 To assert any claims arising after the Enforceability Date for Injury to Water Rights not specifically waived herein.

**13.6 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE HOPI TRIBE, ON BEHALF OF THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES), AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES)**

13.6.1 Except as provided in Subparagraph 13.6.3, the Hopi Tribe, on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), as part of the performance of the respective obligations of the Hopi Tribe and the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Navajo Nation, the Navajo Allottees, the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under federal, State, or other law for all:

13.6.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Land, arising from time immemorial and, thereafter, forever;

13.6.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are

based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;

13.6.1.3 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Land, arising from time immemorial through the Enforceability Date;

13.6.1.4 Past, present, and future claims for Injury to Water for Hopi Land, arising from time immemorial and, thereafter, forever;

13.6.1.5 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;

13.6.1.6 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for Hopi Land, resulting from the Diversion or Use of Water outside of Hopi Land in a manner not in violation of this Agreement or State law; and

13.6.1.7 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.6.2 The waiver and release of claims described in Subparagraph 13.6.1 shall be in the form set forth in Exhibit 13.6 and shall take effect on the Enforceability Date.

13.6.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.6.1 and Exhibit 13.6, the Hopi Tribe, acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), shall retain any right:

13.6.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.6.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the LCR Decree;

13.6.3.3 To assert claims for Water Rights for land owned or acquired by the Hopi Tribe in fee, or held in trust by the United States for the benefit of the Hopi Tribe, in the LCR Watershed pursuant to Subparagraphs 5.10 and 5.11;

13.6.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.6.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.7 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE UNITED STATES, ACTING AS TRUSTEE FOR THE HOPI ALLOTTEES**

13.7.1 Except as provided in Paragraph 13.7.3, the United States, acting as trustee for the Hopi Allottees, as part of the performance of the obligations of the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Navajo Nation, the Navajo Allottees, and the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under federal, State, or other law, for all:

13.7.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Allotments, arising from time immemorial, and, thereafter, forever;

13.7.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Allottees or predecessors of the Hopi Allottees;

13.7.1.3 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Allotments, arising from time immemorial through the Enforceability Date;

13.7.1.4 Past, present, and future claims for Injury to Water for Hopi Allotments, arising from time immemorial and, thereafter, forever;

13.7.1.5 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by Hopi Allottees or predecessors of the Hopi Allottees;

13.7.1.6 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for the Hopi Allotments, resulting from the Diversion or Use of Water outside of the Hopi Allotments in a manner not in violation of this Agreement or State law; and

13.7.1.7 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.7.2 The waiver and release of claims under Subparagraph 13.7.1 shall be in the form set forth in Exhibit 13.7 and shall take effect on the Enforceability Date.

13.7.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.7.1 and Exhibit 13.7, the United States acting as trustee for the Hopi Allottees, shall retain any right:

13.7.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Allottees under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.7.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Allottees under the LCR Decree;

13.7.3.3 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.7.3.4 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.8 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE HOPI TRIBE, ON BEHALF OF THE HOPI**

**TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES), AGAINST THE UNITED STATES**

13.8.1 Except as provided in Subparagraph 13.8.3, the Hopi Tribe, acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), as part of the performance of the obligations of the Hopi Tribe under this Agreement and the Act, shall execute a waiver and release of all claims against the United States, including agencies, officials, and employees of the United States, under federal, State, or other law for all:

13.8.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Land, arising from time immemorial and, thereafter, forever:

13.8.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;

13.8.1.3 Claims for Water Rights within the State that the United States, acting a trustee for the Hopi Tribe and Hopi Allottees, asserted or could have asserted in any proceeding, except to the extent that such rights are recognized as part of the Hopi Tribe's Water Rights under the Act.

13.8.1.4 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Land, arising from time immemorial through the Enforceability Date;

13.8.1.5 Past, present, and future claims for Injury to Water for Hopi Land, arising from time immemorial and, thereafter, forever;

13.8.1.6 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;

13.8.1.7 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for Hopi Land, resulting from the Diversion or Use of Water outside of Hopi Land in a manner not in violation of this Agreement or State law;

13.8.1.8 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act;

13.8.1.9 Past, present, and future claims arising out of, or relating in any manner to, United States Geological Survey monitoring and reporting activities described in Paragraph 7.0;

13.8.1.10 Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of Paragraphs 8.0 and 9.0;

13.8.1.11 Past and Present claims for foregone benefits from non-Hopi Use of Water, on and off Hopi Land (including Water from all sources and for all Uses), within the State arising before the Enforceability Date;

13.8.1.12 Past and Present claims for damage, loss, or injury to land, or natural resources due to loss of Water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of Water or Water Rights, claims relating to interference with, Diversion of, or taking of Water, or claims relating to a failure to protect, acquire, replace, or develop Water, Water Rights, or Water infrastructure, within the State, arising before the Enforceability Date;

13.8.1.13 Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on Hopi Land;

13.8.1.14 Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial Water delivery system on Hopi Land; and

13.8.1.15 Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation projects on

Hopi Land, including damages, losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date.

13.8.2 The waiver and release of claims described in Subparagraph 13.8.1 shall be in the form set forth in Exhibit 13.8 and shall take effect on the Enforceability Date.

13.8.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.8.1 and Exhibit 13.8, the Hopi Tribe, acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), shall retain any right:

13.8.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under this Agreement, whether such rights are generally stated or specifically described, or the Act, in any federal or State court of competent jurisdiction;

13.8.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the LCR Decree;

13.8.3.3 To assert claims for Water Rights for land owned or acquired by the Hopi Tribe in fee in the LCR Watershed pursuant to Subparagraphs 5.10 and 5.11;

13.8.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

13.8.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.

**13.9 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE, AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE**

13.9.1 Except as provided in Subparagraph 13.9.3, the United States, in all capacities (except as trustee for an Indian Tribe other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the obligations of the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the Hopi Tribe, the Members of the Hopi Tribe, or any agency, official, or employee of the Hopi Tribe, under federal, State, or any other law for all:

13.9.1.1 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on Hopi Land arising from time immemorial through the Enforceability Date;

13.9.1.2 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on Hopi Land in a manner that is not in violation of this Agreement or State law; and

13.9.1.3 Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.9.2 The waiver and release of claims under Subparagraph 13.9.1 shall be in the form set forth in Exhibit 13.9 and shall take effect on the Enforceability Date.

13.9.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.9.1 and Exhibit 13.9, the United States shall retain any right to assert any claim not expressly waived in accordance with that Subparagraph and that Exhibit, in any federal or State court of competent jurisdiction.

**13.10 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY THE PARTIES, OTHER THAN THE HOPI TRIBE ON BEHALF OF THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE, AND THE UNITED STATES ACTING AS TRUSTEE FOR THE HOPI TRIBE, THE MEMBERS OF THE HOPI TRIBE AND THE HOPI ALLOTTEES**

13.10.1 For purposes of this Subparagraph 13.10, the term “Parties” shall mean the Parties, except: (a) the Navajo Nation on behalf of the Navajo Nation and the Members of the Navajo Nation; (b) the United States, acting as trustee for the Navajo Nation, the Members of the Navajo Nation, and the Navajo Allottees; (c) the Hopi Tribe on behalf of the Hopi Tribe and the Members of the Hopi Tribe; (d) the United States acting as trustee for the Hopi Tribe, the Members of the Hopi Tribe, and the Hopi Allottees; (e) the San Juan Southern Paiute Tribe on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe; and (f) the United States acting in its capacity as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe.

13.10.2 Except as provided in Subparagraph 13.10.4, the Parties shall execute a waiver and release of all claims against the Hopi Tribe, the Members of the Hopi Tribe, the Hopi Allottees, and the United States, acting as trustee for the Hopi Tribe, the Members of the Hopi Tribe, and the Hopi Allottees, under federal, State, or other law for all:

13.10.2.1 Past and present claims for Injury to Water Rights resulting from the Diversion or Use of Water on Hopi Land and the Hopi Allotments, arising from time immemorial through the Enforceability Date;

13.10.2.2 Claims for Injury to Water Rights arising after the Enforceability Date resulting from the Diversion or Use of Water on or for Hopi Land and the Hopi Allotments in a manner not in violation of this Agreement or State law; and

13.10.2.3 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.10.3 The waiver and release of claims described in Subparagraph 13.10.2 shall be in the form set forth in Exhibit 13.10 and shall take effect on the Enforceability Date.

13.10.4 Notwithstanding the waiver and release of claims described in Subparagraph 13.10.2 and Exhibit 13.10, the Parties shall retain any right:

13.10.4.1 To assert claims for injuries to, and seek enforcement of, their rights under this Agreement or the Act in any State or federal court of competent jurisdiction;

13.10.4.2 To assert claims for injuries to, and seek enforcement of, their rights under any judgment and decree entered by the court in the LCR Adjudication Proceedings;

13.10.4.3 To assert past, present, and future claims to Water, including Colorado River Water, that are not inconsistent with this Agreement; and

13.10.4.4 To assert any claims arising after the Enforceability Date for Injury to Water Rights not specifically waived herein.

**13.11 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE SAN JUAN SOUTHERN PAIUTE TRIBE, ON BEHALF OF THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE**

13.11.1 Except as provided in Subparagraph 13.11.3, the San Juan Southern Paiute Tribe, on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, as part of the performance of the respective obligations of the San Juan Southern Paiute Tribe and the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Hopi Allottees, the Navajo Nation, the Navajo Allottees, and any other individual, entity, corporation, or municipal corporation under federal, State, or other law for all:

13.11.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;

13.11.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

13.11.1.3 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial through the Enforceability Date;

13.11.1.4 Past, present, and future claims for Injury to Water for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;

13.11.1.5 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

13.11.1.6 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for San Juan Southern Paiute Land, resulting from the Diversion or Use of Water outside of San Juan Southern Paiute Land in a manner not in violation of this Agreement or State law; and

13.11.1.7 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.11.2 The waiver and release of claims described in Subparagraph 13.11.1 shall be in the form set forth in Exhibit 13.11 and shall take effect on the Enforceability Date.

13.11.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.11.1 and Exhibit 13.11, the San Juan Southern Paiute Tribe, acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, shall retain any right:

13.11.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under this Agreement, whether such rights are generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.11.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the LCR Decree;

13.11.3.3 To assert claims for Water Rights for land owned or acquired by the San Juan Southern Paiute Tribe in fee or held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe in the LCR Watershed pursuant to Subparagraphs 6.4 and 6.5;

13.11.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; and

13.11.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe.

**13.12 WAIVER, RELEASE, AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE SAN JUAN SOUTHERN PAIUTE TRIBE, ON BEHALF OF THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AGAINST THE UNITED STATES**

13.12.1 Except as provided in Subparagraph 13.12.3, the San Juan Southern Paiute Tribe, acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, as part of the performance of the obligations of the San Juan Southern Paiute Tribe under this Agreement and the Act, shall execute a waiver and release of all claims against the United States, including agencies, officials, and employees of the United States, under federal, State, or other law for all:

13.12.1.1 Past, present, and future claims for Water Rights, including rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever:

13.12.1.2 Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

13.12.1.3 Claims for Water Rights within the State that the United States, acting as trustee for the San Juan Southern Paiute Tribe, asserted or could have asserted in any proceeding, except to the extent that such rights are recognized as part of the San Juan Southern Paiute Tribe's Water Rights under the Act.

13.12.1.4 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial through the Enforceability Date;

13.12.1.5 Past, present, and future claims for Injury to Water for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;

13.12.1.6 Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan

Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

13.12.1.7 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for San Juan Southern Paiute Land, resulting from the Diversion or Use of Water outside of San Juan Southern Paiute Land in a manner not in violation of this Agreement or State law;

13.12.1.8 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act;

13.12.1.9 Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of Paragraphs 8.0 and 9.0;

13.12.1.10 Past and Present claims for foregone benefits from non-San Juan Southern Paiute Tribe Use of Water, on and off San Juan Southern Paiute Land (including Water from all sources and for all Uses), within the State arising before the Enforceability Date;

13.12.1.11 Past and Present claims for damage, loss, or injury to land, or natural resources due to loss of Water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of Water or Water Rights, claims relating to interference with, Diversion of, or taking of Water, or claims relating to a failure to protect, acquire, replace, or develop Water, Water

Rights, or Water infrastructure, within the State, arising before the Enforceability Date;

13.12.1.12 Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on San Juan Southern Paiute Land;

13.12.1.13 Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial Water delivery system on San Juan Southern Paiute Land; and

13.12.1.14 Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation projects on San Juan Southern Paiute Land, including damages, losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date.

13.12.2 The waiver and release of claims described in Subparagraph 13.12.1 shall be in the form set forth in Exhibit 13.12 and shall take effect on the Enforceability Date.

13.12.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.12.1 and Exhibit 13.12, the San Juan Southern Paiute Tribe, acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, shall retain any right:

13.12.3.1 To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under this Agreement, whether such rights are

generally stated or specifically described, or the Act in any federal or State court of competent jurisdiction;

13.12.3.2 To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the LCR Decree;

13.12.3.3 To assert claims for Water Rights for land owned or acquired by the San Juan Southern Paiute Tribe in fee in the LCR Watershed pursuant to Subparagraphs 6.4 and 6.5;

13.12.3.4 To object to any claims for Water Rights by or for: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; and

13.12.3.5 To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe;

**13.13 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE**

13.13.1 Except as provided in Subparagraph 13.13.3, the United States, in all capacities (except as trustee for an Indian Tribe other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the

obligations of the United States under this Agreement and the Act, shall execute a waiver and release of all claims against the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or any agency, official, or employee of the San Juan Southern Paiute Tribe, under federal, State, or any other law for all:

13.13.1.1 Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on San Juan Southern Paiute Land arising from time immemorial through the Enforceability Date;

13.13.1.2 Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on San Juan Southern Paiute Land in a manner that is not in violation of this Agreement or State law; and

13.13.1.3 Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.13.2 The waiver and release of claims under Subparagraph 13.13.1. shall be in the form set forth in Exhibit 13.13 and shall take effect on the Enforceability Date.

13.13.3 Notwithstanding the waiver and release of claims described in Subparagraph 13.13.1 and Exhibit 13.13, the United States shall retain any right to assert any claim not expressly waived in accordance with that Subparagraph and that Exhibit, in any federal or State court of competent jurisdiction.

**13.14 WAIVER, RELEASE, AND RETENTION OF CLAIMS BY PARTIES OTHER THAN THE SAN JUAN SOUTHERN PAIUTE TRIBE ON BEHALF OF THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AND THE UNITED STATES ACTING AS TRUSTEE FOR THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE**

13.14.1 For purposes of this Subparagraph 13.14, the term “Parties” shall mean the Parties, except: (a) the Navajo Nation on behalf of the Navajo Nation and the Members of the Navajo Nation; (b) the United States, acting as trustee for the Navajo Nation, the Members of the Navajo Nation, and the Navajo Allottees; (c) the Hopi Tribe on behalf of the Hopi Tribe and the Members of the Hopi Tribe; (d) the United States acting as trustee for the Hopi Tribe, the Members of the Hopi Tribe, and the Hopi Allottees; (e) the San Juan Southern Paiute Tribe on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe; and (f) the United States acting in its capacity as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe.

13.14.2 Except as provided in Subparagraph 13.14.4, the Parties shall execute a waiver and release of all claims against the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, and the United States acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe under federal, State, or other law for all:

13.14.2.1 Past and present claims for Injury to Water Rights resulting from the Diversion or Use of Water on San Juan Southern Paiute Land arising from time immemorial through the Enforceability Date;

13.14.2.2 Claims for Injury to Water Rights arising after the Enforceability Date; resulting from the Diversion or Use of Water on or for San Juan Southern Paiute Land in a manner that is not in violation of this Agreement or State law; and

13.14.2.3 Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or the Act.

13.14.3 The waiver and release of claims described in Subparagraph 13.14.2 shall be in the form set forth in Exhibit 13.14 and shall take effect on the Enforceability Date.

13.14.4 Notwithstanding the waiver and release of claims described in Subparagraph 13.14.2 and Exhibit 13.14, the Parties shall retain any right:

13.14.4.1 To assert claims for injuries to, and seek enforcement of, their rights under this Agreement or the Act in any State or federal court of competent jurisdiction;

13.14.4.2 To assert claims for injuries to, and seek enforcement of, their rights under any judgment and decree entered by the court in the LCR Adjudication Proceedings;

13.14.4.3 To assert past, present, and future claims to Water, including Colorado River Water, that are not inconsistent with this Agreement; and

13.14.3.4 To assert any claims arising after the Enforceability Date for Injury to Water Rights not specifically waived herein.

### **13.15 SATISFACTION OF WATER RIGHTS AND OTHER BENEFITS**

13.15.1 The Navajo Nation and the Members of the Navajo Nation.

13.15.1.1 The benefits provided under this Agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the Navajo Nation and the Members of the Navajo Nation against the Parties, including the United States, that is waived and released by the Navajo Nation acting on behalf of the Navajo Nation and the Members of the Navajo Nation under Subparagraphs 13.1 and 13.3.

13.15.1.2 Any entitlement to Water of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees) or the United States acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), for Navajo Land shall be satisfied out of the Water resources and other benefits granted, confirmed, quantified, or recognized by this Agreement and the Act, to or for the Navajo Nation, the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees).

13.15.2 Navajo Allottees and the United States, acting as trustee for the Navajo Allottees.

13.15.2.1 The benefits realized by the Navajo Allottees under this Agreement shall be in complete replacement of, complete substitution for, and full satisfaction of:

(a) all claims waived and released by the United States (acting as trustee for the Navajo Allottees) under Subparagraph 13.2; and

(b) any claims of the Navajo Allottees against the United States similar to the claims described in Subparagraph 13.2 that the Navajo Allottees asserted or could have asserted.

13.15.2.2 Any entitlement to Water of the Navajo Allottees or the United States acting as trustee for the Navajo Allottees, for Navajo Allotments shall be satisfied out of the Water resources and other benefits granted, confirmed, or recognized by this Agreement and the Act, to or for the Navajo Allottees and the United States, acting as trustee for the Navajo Allottees.

13.15.3 Notwithstanding Subparagraphs 13.15.1 and 13.15.2, nothing in this Agreement or the Act recognizes or establishes any right of a Member of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees) to Water on Navajo Land.

13.15.4 The Hopi Tribe and the Members of the Hopi Tribe.

13.15.4.1 The benefits provided under this Agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the Hopi Tribe and the Members of the Hopi Tribe against the Parties, including the

United States, that is waived and released by the Hopi Tribe acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe under Subparagraphs 13.6 and 13.8.

13.15.4.2 Any entitlement to Water of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees) or the United States acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), for Hopi Land shall be satisfied out of the water resources and other benefits granted, confirmed, quantified, or recognized by this Agreement and the Act, to or for the Hopi Tribe, the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees).

13.15.5 Hopi Allottees and the United States, acting as trustee for the Hopi Allottees.

13.15.5.1 The benefits realized by the Hopi Allottees under this Agreement shall be in complete replacement of, complete substitution for, and full satisfaction of:

(a) all claims waived and released by the United States (acting as trustee for the Hopi Allottees) under Subparagraph 13.7; and

(b) any claims of the Hopi Allottees against the United States similar to the claims described in Subparagraph 13.7 that the Hopi Allottees asserted or could have asserted.

13.15.5.2 Any entitlement to Water of the Hopi Allottees or the United States acting as trustee for the Hopi Allottees, for Hopi Allotments shall be satisfied out of the Water resources and other benefits granted, confirmed, or recognized by this Agreement and the Act, to or for the Hopi Allottees and the United States, acting as trustee for the Hopi Allottees.

13.15.6 Notwithstanding Subparagraphs 13.15.4 and 13.15.5, nothing in this Agreement or the Act recognizes or establishes any right of a Member of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees) to Water on Hopi Land.

13.15.7 San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe

13.15.7.1 The benefits provided under this Agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the San Juan Southern Paiute Tribe and the Member of the San Juan Southern Paiute Tribe against the Parties, including the United States, that is waived and released by the San Juan Southern Paiute Tribe acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe under Subparagraphs 13.11 and 13.12.

13.15.7.2 Any entitlement to Water of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe or the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, for San Juan Southern Paiute Land shall be satisfied out of

the water resources and other benefits granted, confirmed, quantified, or recognized by this Agreement and the Act, to or for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe.

13.15.8 Notwithstanding Subparagraphs 13.15.7, nothing in this Agreement or the Act recognizes or establishes any right of a Member of the San Juan Southern Paiute Tribe to Water on San Juan Southern Paiute Land.

#### **13.16 NO EFFECT ON ENFORCEMENT OF ENVIRONMENTAL LAWS**

Nothing in this Agreement precludes the United States, acting as sovereign, the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe from enforcing the requirements of federal environmental law and the regulations implementing such law. Nothing in this Agreement precludes the United States, acting as sovereign, the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe from enforcing the requirements of the environmental laws of the Tribes, and the regulations implementing such laws, on the Navajo Reservation, the Hopi Reservation, the San Juan Southern Paiute Reservation, Navajo Allotments, Hopi Allotments, and lands held in trust by the United States for the benefit of the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe.

#### **14.0 ENFORCEABILITY DATE**

##### **14.1 CONDITIONS TO THE ENFORCEABILITY DATE**

This Agreement, including the waivers and releases of claims described in Paragraph 13.0 of this Agreement and in the Act, shall take effect and be fully enforceable on the date on which the Secretary publishes in the Federal Register a statement of findings that:

14.1.1 This Agreement has been revised, through an amendment and restatement, to:

14.1.1.1 eliminate any conflict between this Agreement and the Act; and

14.1.1.2 include as Exhibits to this Agreement the executed Navajo Nation Water Delivery Contracts required by Subparagraphs 10.1.1, 10.1.2, and 10.1.3, and the executed Hopi Tribe Water Delivery Contracts as required by 11.1.1 and 11.1.2 ;

14.1.2 The Agreement as revised through an amendment and restatement has been signed by all Parties and any exhibit requiring execution by any Party has been executed by the required Party;

14.1.3 The waivers and releases of claims described in Paragraph 13.0 of the Agreement and section 14 of the Act have been executed by the United States, Navajo Nation, Hopi Tribe, San Juan Southern Paiute Tribe, the State, and the Parties;

14.1.4 Five billion dollars (\$5.0 billion) has been appropriated and deposited in the designated accounts;

14.1.5 The LCR Decree has been approved by the LCR Adjudication Court substantially in the form of the judgment and decree attached to this Agreement as Exhibit 3.1.82, as amended to ensure consistency with the Act;

14.1.6 The Gila River Adjudication Decree has been approved by the Gila River Adjudication Court substantially in the form of the judgment and decree attached to this Agreement as Exhibit 3.1.47, as amended to ensure consistency with the Act; and

14.1.7 The San Juan Southern Paiute Tribe and the NTUA have executed the water service agreement referred to in Subparagraph 6.3.1.

14.1.8 The Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe each have executed the tribal resolution referenced in subsection 18(a)(2), 18(b)(2), and 18(c)(2) of the Act consenting to the limited waiver of sovereign immunity from suit in the circumstances described in section 18 of the Act.

## **14.2 FAILURE TO SATISFY CONDITIONS**

Pursuant to section 16 of the Act, if the Secretary fails to publish in the Federal Register a statement of findings under Subparagraph 14.1 of this Agreement by June 30, 2035, or such alternative later date as may be agreed to by the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the Secretary, and the State, the Act will be repealed and this Agreement shall be void.

## **14.3 CONTINUED EXISTENCE OF THE SAN JUAN SOUTHERN PAIUTE RESERVATION**

Notwithstanding Subparagraph 14.2, if the Secretary fails to publish in the Federal Register a statement of findings under Subparagraph 14.1 of this Agreement by June 30, 2035, or such alternative later date as may be agreed upon by the Navajo Nation, the Hopi

Tribe, the San Juan Southern Paiute Tribe, the Secretary and the State, section 19 of the Act shall remain in full force and effect.

## **15.0 OTHER PROVISIONS**

### **15.1 NO IMPAIRMENT OF EXISTING RIGHTS**

Nothing in this Agreement or any contract entered into pursuant to this Agreement or the Act shall impair any right to the delivery or beneficial consumptive use of Colorado River water under the 1944 Treaty with Mexico or any compact, law, decree, or contract in effect on the Enforceability Date.

### **15.2 RELATION TO PUBLIC DOMAIN ALLOTMENTS**

15.2.1 Nothing in this Agreement:

15.2.1.1 Quantifies or adjudicates any Water Right or any claim or entitlement to Water of a Public Domain Allottee; or

15.2.1.2 Precludes the United States, acting as trustee for Public Domain Allottees, from making claims for Water Rights in Arizona that are consistent with the Abstracts attached as Exhibit 3.1.132B. To the extent authorized by applicable law, Public Domain Allottees, or the United States, acting as trustee for Public Domain Allottees, may make claims to, and may be adjudicated, individual Water Rights in Arizona.

15.2.2 Water rights for Public Domain Allotments shall be separately adjudicated outside of this Agreement. None of the conditions of Use of the Navajo Nation's Water

Rights as set forth in this Agreement shall apply, by virtue of this Agreement, to Water Rights later decreed for Public Domain Allotments.

15.2.3 Water Uses for Public Domain Allotments Outside the Navajo Reservation:

15.2.3.1 Exhibit 3.1.132B describes Water Uses for Public Domain Allotments outside the Navajo Reservation.

15.2.3.2 Except as provided in Subparagraph 15.2.3.3 and Subparagraph 15.2.3.4, the Parties shall not object to, dispute, or challenge, on any basis, in the LCR Adjudication or in any other judicial or administrative proceeding, claims to Water Rights with the attributes described in the Abstracts for the 51 Public Domain Allotments outside the Navajo Reservation attached hereto as Exhibit 3.1.132B; and

15.2.3.3 The Parties retain the right to object to the “Basis of Right” attribute described in the Abstracts for the 51 Public Domain Allotments outside the Navajo Reservation attached hereto as Exhibit 3.1.132B.

15.2.3.4 The United States, acting as trustee for Public Domain Allottees, shall not assert claims to Water Rights that are inconsistent with the Abstracts attached hereto as Exhibit 3.1.132B. The Parties retain the right to object to, dispute, or challenge claims asserted on behalf of Public Domain Allottees that are inconsistent with Abstracts attached hereto as Exhibit 3.1.132B.

**15.3 ENTIRE UNDERSTANDING**

This Agreement constitutes the entire understanding among the Parties. Evidence of conduct or statements made in the course of negotiating this Agreement, including, but not limited to previous drafts of this Agreement, is inadmissible in any legal proceedings.

#### **15.4 MODIFICATIONS TO AGREEMENT AND AMENDMENTS TO EXHIBITS**

15.4.1 Amendments to the Agreement. No modification of this Agreement after the Enforceability Date shall be effective unless it is in writing, signed by all Parties, and is approved by the LCR Adjudication Court. Notice of such amendments shall be made to all of the Parties in accordance with Subparagraph 15.18.

15.4.2 Amendments to Exhibits. Notwithstanding the provisions of Subparagraph 15.4.1, Exhibits to this Agreement may be amended by the Parties to such Exhibits in accordance with their terms, without LCR Adjudication Court approval, unless such approval is required in the Exhibit or by law; provided, however, that no amendment of any Exhibit may violate any provisions of the Act, or this Agreement, or adversely affect the rights under this Agreement of any Party who is not a signatory of such an amendment. Notice of such amendments shall be made to all of the Parties in accordance with Subparagraph 15.18. Failure to provide such notice in accordance with the terms of Subparagraph 15.18 shall not affect the validity of an amendment to an Exhibit made hereunder.

#### **15.5 STATE CAPACITY**

15.5.1 Execution by the Governor. Execution of this Agreement by the Governor of the State constitutes the commitment of the State to assist in carrying out the provisions of this Agreement to the extent it may do so in accordance with its responsibility and authority under the law. Execution of this Agreement by the Governor of the State also constitutes

the commitment of the State to carry out the terms and conditions of Subparagraphs 9.4.1, 9.4.1.1, 9.4.1.2, 9.9, 13.5, 13.10 and 13.14.

15.5.2 Execution by State Agencies. Execution of this Agreement by the Arizona State Land Department, the Arizona Game and Fish Commission and the Arizona Department of Transportation signifies that provisions of this Agreement affecting the State as a Claimant have been approved by the Arizona State Land Department, the Arizona Game and Fish Commission, the Arizona Department of Transportation, and these agencies assume the obligations of and are entitled to the benefits of this Agreement.

15.5.3 Exceptions. Except as provided in Subparagraphs 15.5.1 and 15.5.2, it is not intended that this Agreement shall be determinative of any decision or recommendation to be made by any State agency in any administrative, adjudicatory, rule making, or other proceeding or matter.

## **15.6 PARTIES BOUND ON EFFECTIVE DATE; OBLIGATION TO WORK IN GOOD FAITH**

With the exception of the United States, all of the Parties shall be bound by the terms of this Agreement as of the Effective Date, regardless of the date on which the Party executes the Agreement. Each Party shall have the obligation to work in good faith to satisfy the conditions in this Agreement.

## **15.7 STAY OF LITIGATION AND WITHDRAWAL OF OBJECTIONS**

15.7.1 Not later than 30 days following the Effective Date, the Parties who are parties to the LCR Adjudication shall file a motion in the form attached hereto as Exhibit

15.7.1 in the LCR Adjudication Court to stay all litigation relating to the claims of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the United States on their behalf.

15.7.2 Not later than 30 days following the Effective Date, the Parties who are parties to the LCR Adjudication shall file and seek approval by the LCR Adjudication Court of stipulations in substantially the same form as the form of stipulations attached hereto as Exhibit 15.7.2.

## **15.8 AUTHORITY TO EXECUTE**

By signing this Agreement each signatory represents that he or she has the authority to execute it.

## **15.9 RIGHT TO PETITION ANY COURT OF COMPETENT JURISDICTION**

Any Party shall have the right to petition any State or federal court of competent jurisdiction, without any requirement to exhaust tribal administrative or judicial remedies, for such declaratory and injunctive relief as may be necessary to enforce the terms, conditions, and limitations of this Agreement. Nothing contained herein waives the right of the United States, the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe to object to the jurisdiction of the courts of the State to adjudicate any dispute arising under this Agreement or the Act. Furthermore, nothing herein waives the right of any Party to object to the jurisdiction of any federal Court to adjudicate a dispute arising under this Agreement or the Act.

**15.10 GOVERNING LAW**

This Agreement shall be construed in accordance with applicable law.

**15.11 SUCCESSORS AND ASSIGNS**

This Agreement shall inure to the benefit of and be binding upon the successors and assigns of the Parties, including successor State agencies.

**15.12 STATE CONFLICT OF INTEREST**

The provisions of A.R.S. § 38-511 are incorporated by reference herein.

**15.13 ANTI-DEFICIENCY**

15.13.1 United States. The expenditure or advance of any money or the performance of any obligation by the United States, in any of its capacities, under this Agreement shall be contingent upon appropriation of funds. The United States shall not be liable for the failure to carry out any obligation or activity authorized under this Agreement and the Act (including any such obligation or activity under this Agreement and the Act) if adequate appropriations are not provided by Congress expressly to carry out the purposes of this Agreement and the Act.

15.13.2 State. The expenditure or advance of any money or the performance of any obligation by the State, in any of its capacities, under this Agreement shall be contingent upon appropriation of funds. No liability shall accrue to the State, in any of its capacities, in the event funds are not appropriated.

**15.14 NO BENEFIT TO MEMBERS OF CONGRESS OR RESIDENT COMMISSIONERS**

No member of or delegate to Congress or Resident Commissioner shall be admitted to any share of this Agreement or to any benefit that may arise herefrom. This restriction shall not be construed to extend to this Agreement if made with a corporation or company for its general benefit.

#### **15.15 DUPLICATE ORIGINALS AND COUNTERPARTS**

This Agreement may be executed in one or more counterparts, each of which shall constitute an original, and all of which, when taken together, shall constitute one and the same instrument. This Agreement also may be executed in duplicate originals, each of which shall constitute an original Agreement.

#### **15.16 NO QUANTIFICATION OR EFFECT ON RIGHTS OF OTHER TRIBES OR THE UNITED STATES ON THEIR BEHALF**

Except as provided in Subparagraph 8.3:

15.16.1 Nothing in this Agreement shall be construed to quantify or otherwise affect the Water Rights, claims or entitlements to Water of any Indian tribe, nation, band or community, other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe.

15.16.2 Nothing in this Agreement shall affect the ability of the United States to take action on behalf of any Indian tribe, nation, band, community, other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and their Members, Navajo Allottees, Hopi Allottees, and Public Domain Allottees.

#### **15.17 CONSTRUCTION AND EFFECT**

The Paragraph and Subparagraph titles used in this Agreement are for convenience only and shall not be considered in the construction of this Agreement. As used in this Agreement, a capitalized term shall have the meaning set forth in Subparagraph 3.1. All other words shall have their ordinary meaning.

#### **15.18 NOTICES**

All notices required to be given hereunder shall be in writing and may be given in person or by United States mail postage prepaid, and shall become effective at the earliest of actual receipt by the Party to whom notice is given, when delivered to the designated address of the Party, or if mailed, forty-eight hours after deposit in the United States mail addressed as shown on Exhibit 15.18 or to such other address as such Party may from time to time designate in writing. Any communication by facsimile transmission or electronic mail by one Party to another shall not constitute effective notice as is required by this Subparagraph, but shall be deemed to be given as a courtesy only.

#### **15.19 INTENDED THIRD-PARTY BENEFICIARIES**

Any Person who is not a Party to this Agreement but whose Water Rights are protected by this Agreement is a third-party beneficiary and is entitled to enforce the provisions of this Agreement against the Parties.

#### **15.20 NO STATE LEGISLATION PERMITTING GROUNDWATER TRANSPORTATION OUT OF LITTLE COLORADO RIVER BASIN**

After the Enforceability Date, the Parties, other than the State, the Arizona State Land Department, the Arizona Game and Fish Commission, the Arizona Department of

Transportation, and the United States, shall not seek legislation, and shall oppose any bill introduced in the state legislature, that would allow groundwater to be transported away from the Little Colorado River Plateau Groundwater Basin, except as allowed under A.R.S. § 45-544 in effect on the Effective Date.

#### **15.21 ATKINSON TRADING COMPANY, INC., PROPERTY**

The terms of this Agreement and the laws of the State shall apply to the withdrawal or Use of Water from the two Existing Wells owned by the Atkinson Trading Company, Inc. and any replacement Well(s). This Agreement does not address: (a) jurisdiction over land that Atkinson Trading Company, Inc. owns or claims to own, or other facilities owned by Atkinson Trading Company, Inc. for any other purpose; or (b) ownership of land between the west bank of the Little Colorado River and the centerline of the Little Colorado River located in Section 22, T29N, R9E, which is part of the land depicted in the map attached as Exhibit 8.5.2. The Navajo Nation, the United States acting as trustee for the Navajo Nation, and the Atkinson Trading Company, Inc. retain their rights or claims concerning the described land. The assertion of such rights or claims relating to said land, if any, or the resolution of such claims in any forum or tribunal, shall not modify or affect in any way the provisions of this Agreement regarding Atkinson Trading Company, Inc.'s withdrawal and Use of Water including the jurisdiction over such withdrawal and Use of Water.

#### **15.22 PARAGRAPH AND SUBPARAGRAPH REFERENCES**

A reference to a Paragraph of this Agreement shall mean a reference to the Paragraph in its entirety, including all Subparagraphs of that Paragraph. A reference to a

*Agreement Dated as of May 9, 2024*

Subparagraph of this Agreement shall mean a reference to the Subparagraph in its entirety, including all subparagraphs of that Subparagraph.

- SEC. 19. Ratification of the Treaty; Proclamation of San Juan Southern Paiute Reservation.
- SEC. 20. In general.

**SEC. 1. SHORT TITLE.**

This Act may be cited as the “Northeastern Arizona Indian Water Rights Settlement Act of 2024.”

**SEC. 2. PURPOSES.**

The purposes of this Act are—

(1) to achieve a fair, equitable and final settlement of all claims to rights to Water in the State of Arizona for—

(A) the Navajo Nation and Navajo Allottees;

(B) the Hopi Tribe and Hopi Allottees;

(C) the San Juan Southern Paiute Tribe; and

(D) the United States, acting as trustee for the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, Navajo Allottees, and Hopi Allottees;

(2) to authorize, ratify, and confirm the Northeastern Arizona Indian Water Rights Settlement Agreement entered into by the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe, the State, and other Parties to the extent that the Northeastern Arizona Indian Water Rights settlement agreement is consistent with this Act;

(3) to authorize and direct the Secretary to execute and perform the duties and obligations of the Secretary under the settlement agreement and this Act; and

(4) to authorize funds necessary for the implementation of the settlement agreement and this Act.

### SEC. 3. DEFINITIONS.

In this title:

(1) 1882 RESERVATION. The term “1882 Reservation” means those lands within the exterior boundaries of the “Hopi Indian Reservation” defined as District 6, and all lands withdrawn by the Executive Order of Dec. 16, 1882 and partitioned to the Hopi Tribe in accordance with the Act of Dec. 22, 1974, Pub. L. 93-531, § 4, 88 Stat. 1713 (formerly codified as amended at 25 U.S.C. § 640d-3), by Judgment of Partition, Feb. 10, 1977, *Sekaquaptewa v. MacDonald*, Case No. CIV-579-PCT-JAW (D. Ariz.), *aff’d*, 626 F.2d 113 (9th Cir. 1980).

(2) 1934 ACT CASE. The term “1934 Act Case” means *Honyoama v. Shirley, Jr.*, Case No. CIV 74-842-PHX-EHC (D. Ariz. 2006).

(3) AFY. The term “afy” means acre-feet per Year.

(4) ARIZONA DEPARTMENT OF WATER RESOURCES OR ADWR. The terms “Arizona Department of Water Resources” or “ADWR” mean the agency of the State established pursuant to Arizona Revised Statutes § 45-102, *et seq.*, or its successor agency or entity.

(5) CENTRAL ARIZONA PROJECT OR CAP. The terms “Central Arizona Project” or “CAP” mean the federal reclamation project authorized and constructed by the United States in accordance with Title III of the Colorado River Basin Project Act (43 U.S.C. § 1521, *et seq.*).

(6) CENTRAL ARIZONA WATER CONSERVATION DISTRICT OR CAWCD. The terms “Central Arizona Water Conservation District” or “CAWCD” mean the political subdivision of the State that is the contractor under the CAP Repayment Contract.

(7) CAP REPAYMENT CONTRACT. The term CAP Repayment Contract” means:

- (A) the contract dated December 1, 1988 (Contract No. 14-06-W-245, Amendment No. 1), between the United States and the Central Arizona Water Conservation District for the delivery of Water and the repayment of costs of the Central Arizona Project; and
- (B) any amendment to, or revision of, that contract.

(8) CIBOLA WATER. The term “Cibola Water” means the Hopi Tribe’s entitlement to the Diversion of up to 4,278 afy of the Fourth Priority Water described in the Hopi Tribe Existing Cibola Contract.

(9) COLORADO RIVER COMPACT. The term “Colorado River Compact” means the Colorado River Compact of 1922, as ratified and reprinted in article 2 of chapter 7 of title 45, Arizona Revised Statutes.

(10) COLORADO RIVER WATER.

- (A) The term “Colorado River Water” means the waters of the Colorado River apportioned for use within the State by the Boulder Canyon Project Act of 1928, 43 U.S.C. §§ 617c and 617d, as amended; the Upper Colorado River Basin Compact of 1948, as ratified and reprinted, article 3 of chapter 7 of title 45, Arizona Revised Statutes; the Colorado River Basin Project Act of 1968, 43 U.S.C. § 1501, *et seq.*, as amended; the Contract for Delivery of Water Between the United States and the State of Arizona dated February 9, 1944; and the Decree.

- (B) The definition of Colorado River Water in this Agreement and this Act shall be used only for purposes of interpreting the settlement agreement and this Act, and shall not be used for any interpretation of existing law or contract, including:
- (i) The Boulder Canyon Project Act of 1928, 43 U.S.C. §§ 617c and 617d, as amended;
  - (ii) the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in article 3 of chapter 7 of title 45, Arizona Revised Statutes;
  - (iii) the Colorado River Basin Project Act of 1968, 43 U.S.C. § 1501, *et seq.*, as amended;
  - (iv) the Contract for Delivery of Water Between the United States and the State of Arizona dated February 9, 1944; and
  - (v) the Decree.

(11) DECREE. The term “Decree” means, when used without a modifying adjective, collectively the decree of the Supreme Court of the United States in *Arizona v. California*, 376 U.S. 340 (1964), the Consolidated Decree entered on March 27, 2006, in that case, 547 U.S. 150, and any modifications thereof.

(12) DIVERSION. The term “Diversion” means an act to Divert.

(13) DIVERT, DIVERTING, AND DIVERTED. The terms “Divert,” “Diverting,” and “Diverted” mean to receive, withdraw, develop, produce, or capture Water using:

- (A) a ditch, canal, flume, bypass, pipeline, pit, collection or infiltration gallery, conduit, Well, pump, turnout, dam, or any other mechanical device; or
- (B) any other human act.

(14) **EFFECTIVE DATE.** The term “Effective Date” means the date as of which the settlement agreement has been executed by no less than 30 of the Parties including all of the following: the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the State of Arizona, the Arizona State Land Department, the Central Arizona Water Conservation District, the Salt River Project Agricultural Improvement and Power District, and the Salt River Valley Water Users’ Association.

(15) **EFFLUENT.** The term “Effluent” means water that: (a) has been used in the State for domestic, municipal, or industrial purposes, other than solely for hydropower generation; and (b) is available fore re-use for any purpose, regardless of whether the water has been treated to improve the quality of the water.

(16) **ENACTMENT DATE.** The term “Enactment Date” means the date of enactment of this Act.

(17) **ENFORCEABILITY DATE.** The term “Enforceability Date” means the date described in section 16 of this Act.

(18) **FIFTH PRIORITY WATER.** The term “Fifth Priority Water” means Fifth Priority Water as that term is defined in the Hopi Tribe Existing Cibola Contract.

(19) **FOURTH PRIORITY WATER.** The term “Fourth Priority Water” means Colorado River Water available for delivery within the State for satisfaction of entitlements:

- (A) in accordance with contracts, Secretarial reservations, perfected rights, and other arrangements between the United

States and Water users in the State entered into or established subsequent to September 30, 1968, for use on Federal, State, or privately owned lands in the State, in a total quantity not greater than 164,652 afy of Diversions; and

- (B) after first providing for the delivery of Colorado River Water for the CAP System, including for use on Indian land, under Section 304(e) of the Colorado River Basin Project Act (43 U.S.C. § 1524(e)), in accordance with the CAP Repayment Contract.

(20) GILA RIVER ADJUDICATION. The term “Gila River Adjudication” means that action pending in the Superior Court of the State, in and for the County of Maricopa, *In re the General Adjudication of All Rights To Use Water in The Gila River System and Source*, W-1 (Salt), W-2 (Verde), W-3 (Upper Gila), W-4 (San Pedro) (Consolidated).

(21) GILA RIVER ADJUDICATION COURT. The term “Gila River Adjudication Court” means the Superior Court of the State, in and for the County of Maricopa, exercising jurisdiction over the Gila River Adjudication.

(22) GILA RIVER ADJUDICATION DECREE. The term “Gila River Adjudication Decree” means the judgment or decree entered by the Gila River Adjudication Court in substantially the same form as the form of judgment attached to the settlement agreement as Exhibit 3.1.48.

(23) GROUNDWATER. The term “Groundwater” means all Water beneath the surface of the earth within the State that is not:

- (A) Surface Water;
- (B) Colorado River Water; or
- (C) Effluent.

(24) HOPI ALLOTMENT. The term “Hopi Allotment” means any of the eleven (11) parcels allotted pursuant to Section 4 of the General Allotment Act of 1887, 24 Stat. 389, ch. 119 (formerly codified at 25 U.S.C. § 334) that are:

- (A) located within the exterior boundaries of the Hopi Reservation; and
- (B) held in trust by the United States for the benefit of one or more individual Indians under allotment record numbers AR-39, -40, -41, -42, -43, -44, -45, -46, -47, -48, and -49.

(25) HOPI ALLOTTEE. The term “Hopi Allottee” means an individual Indian holding a beneficial interest in a Hopi Allotment, or an Indian Tribe holding an undivided fractional beneficial interest in a Hopi Allotment.

(26) HOPI FEE LAND. The term “Hopi Fee Land” means land, other than Hopi Trust Land, that:

- (A) is located in the State;
- (B) is located outside the exterior boundaries of the Hopi Reservation; and
- (C) as of the Enforceability Date, is owned by the Hopi Tribe; whether in its own name or through an entity wholly owned or controlled by the Hopi Tribe.

(27) HOPI LAND. The term “Hopi Land” means, collectively, the Hopi Reservation, Hopi Trust Land, and Hopi Fee Land.

(28) HOPI RESERVATION. The term “Hopi Reservation” means those lands within the exterior boundaries of the “Hopi Indian Reservation” defined as District 6, and all lands withdrawn by the Executive Order of Dec. 16, 1882 and partitioned to the Hopi Tribe in accordance with the Act of Dec. 22, 1974, Pub. L. 93-531, § 4, 88 Stat. 1713 (formerly codified as amended at 25 U.S.C. § 640d-3), by Judgment of Partition, Feb. 10, 1977, *Sekaquaptewa v. MacDonald*, Case No. CIV-579-PCT-JAW (D. Ariz.), aff’d, 626 F.2d 113 (9th Cir. 1980), and all lands recognized as part of the Hopi Reservation in the 1934 Act Case. The foregoing description of the Hopi Reservation is more particularly set forth on the map attached to the settlement agreement as Exhibit 3.1.57. In case of a conflict between this definition and Exhibit 3.1.57 of the settlement agreement, Exhibit 3.1.57 shall be demonstrative only, and this definition shall control.

(29) HOPI TRIBE. The term “Hopi Tribe” means the Hopi Tribe, a tribe of Hopi Indians organized under Section 16 of the Indian Reorganization Act of June 18, 1934, 48 Stat. 987 (25 U.S.C. § 476), and duly recognized by the Secretary (89 Fed. Reg. 944, 945 (Jan. 8, 2024)).

(30) HOPI TRIBE AGRICULTURAL CONSERVATION TRUST FUND ACCOUNT. The term “Hopi Tribe Agricultural Conservation Trust Fund Account” means the account created pursuant to section 11(b)(3) of this Act and described in subparagraph 12.3.3 of the settlement agreement.

(31) Hopi TRIBE CIBOLA WATER. The term “Hopi Tribe Cibola Water” means the Fourth, Fifth, and Sixth Priority Colorado River Water to which the Hopi Tribe is entitled pursuant to subparagraphs 5.8.2 and 5.8.3 of the settlement agreement.

(32) HOPI TRIBE EXISTING CIBOLA CONTRACT. The term “Hopi Tribe Existing Cibola Contract” means Contract No. 04-XX-30-W0432 between the United States and the Hopi Tribe, as amended and in full force and effect as of the Effective Date.

(33) HOPI TRIBE GROUNDWATER PROJECTS. The term “Hopi Tribe Groundwater Projects” means the projects described in section 11(f)(1) of this Act and in subparagraph 12.3.1 of the settlement agreement.

(34) HOPI TRIBE GROUNDWATER PROJECTS TRUST FUND ACCOUNT. The term “Hopi Tribe Groundwater Projects Trust Fund Account” means the account created pursuant to section 11(b)(1) of this Act and described in subparagraph 12.3.1 of the settlement agreement.

(35) HOPI TRIBE LOWER BASIN COLORADO RIVER WATER ACQUISITION TRUST FUND ACCOUNT. The term “Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account” means the account created pursuant to section 11(b)(4) of this Act and described in subparagraph 12.3.4 of the settlement agreement.

(36) HOPI TRIBE OM&R TRUST FUND ACCOUNT. The term “Hopi Tribe OM&R Trust Fund Account” means the account created pursuant to section 11(b)(2) of this Act and described in subparagraph 12.3.2 of the settlement agreement.

(37) HOPI TRIBE SETTLEMENT CIBOLA CONTRACT. The term “Hopi Tribe Settlement Cibola Contract” means the contract entered into between the United States and the Hopi Tribe pursuant to section 6 of this Act and the settlement agreement for delivery of Hopi Tribe Cibola Water after the Enforceability Date.

(38) HOPI TRIBE UPPER BASIN COLORADO RIVER WATER. The term “Hopi Tribe Upper Basin Colorado River Water” means the 2,300 afy of Upper Basin

Colorado River Water allocated to the Hopi Tribe pursuant to section 6 of this Act and as provided in subparagraphs 5.7 and 11.1.1 of the settlement agreement.

(39) HOPI TRIBE WATER DELIVERY CONTRACT. The term “Hopi Tribe Water Delivery Contract” means one or more contracts entered into by Secretary and the Hopi Tribe in accordance with section 6 of this Act and paragraph 11 of the settlement agreement for the delivery of Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water.

- (40) HOPI TRUST LAND. The term “Hopi Trust Land” means land that:
- (A) is located in the State;
  - (B) is located outside the exterior boundaries of the Hopi Reservation; and
  - (C) as of the Enforceability Date is held in trust by the United States for the benefit of the Hopi Tribe.

(41) IINÁ BÁ - PAA TUWAQAT’SI PIPELINE. The term “iiná bá - paa tuwaqat’si pipeline” means the water project described in section 8 of this Act and subparagraph 12.1 of the settlement agreement.

(42) IINÁ BÁ – PAA TUWAQAT’SI PIPELINE IMPLEMENTATION FUND ACCOUNT. The term “iiná bá – paa tuwaqat’si pipeline Implementation Fund Account” means the account created in the Treasury of the United States described in section 9 of this Act and subparagraph 12.1.1 of the settlement agreement.

(43) IMPOUNDMENT. The term “Impoundment” means a human-made structure used to store water.

(44) INJURY TO RIGHTS TO SURFACE WATER. The term “Injury to Rights to Surface Water” means a direct Diversion of Surface Water, other than from

a Well, that materially diminishes the flows and flood flows of Surface Water on the Navajo Reservation or on a Navajo Allotment, relating only to paragraph 8.0 of the settlement agreement.

(45) INJURY TO WATER. The term “Injury to Water” means injury to water based on changes in or degradation of the salinity or concentration of naturally occurring chemical constituents contained in Water.

(46) INJURY TO WATER RIGHTS. The term “Injury to Water Rights” means an interference with, diminution of, or deprivation of, Water Rights under Federal, State, or other law. The term “Injury to Water Rights” does not include any injury to water quality.

(47) IRRIGATION. The term “Irrigation” means the use of water on two (2) or more acres of land to produce plants or parts of plants for sale or human consumption, or for use as feed for livestock, range livestock, or poultry.

(48) LCR. The term “LCR” means the Little Colorado River.

(49) LCR ADJUDICATION. The term “LCR Adjudication” means that action pending in the Superior Court of the State, in and for the County of Apache, *In re: the General Adjudication of All Rights to Use Water in the Little Colorado River System and Source*, CIV No. 6417.

(50) LCR ADJUDICATION COURT. The term “LCR Adjudication Court” means the Superior Court of the State, in and for the County of Apache, exercising jurisdiction over the LCR Adjudication.

(51) LCR DECREE. The term “LCR Decree” means the judgment or decree entered by the LCR Adjudication Court in substantially the same form as the form of judgment attached as Exhibit 3.1.82 to the settlement agreement.

(52) LCR WATERSHED. The term “LCR Watershed” means lands located within the Surface Water drainage of the LCR and its tributaries in the State, as shown on the map attached as Exhibit 3.1.83 to the settlement agreement.

(53) Lower Basin. The term “Lower Basin” means the ‘Lower Basin’ as defined in Article II(g) of the Colorado River Compact.

(54) MEMBER OR MEMBERS. The terms “Member” or “Members” means any person or persons duly enrolled as a member or members of the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe.

(55) NAVAJO ALLOTMENT. The term “Navajo Allotment” means a parcel of land patented pursuant to Section 1 of the General Allotment Act of 1887, 24 Stat. 388, ch. 119 (formerly codified at 25 U.S.C. § 331):

- (A) originally allotted to an individual identified in the allotting document as a Navajo Indian;
- (B) located within the exterior boundaries of the Navajo Reservation; and
- (C) held in trust by the United States for the benefit of one or more individual Indians.

(56) NAVAJO ALLOTTEE. The term “Navajo Allottee” means an individual Indian holding a beneficial interest in a Navajo Allotment, or an Indian Tribe holding an undivided fractional beneficial interest in a Navajo Allotment.

(57) NAVAJO FEE LAND. The term “Navajo Fee Land” means land, other than Navajo Trust Land, that:

- (A) is located in the State;
- (B) is located outside the exterior boundaries of the Navajo Reservation; and
- (C) as of the Enforceability Date, is owned by the Navajo Nation, whether in its own name or through an entity wholly owned or controlled by the Navajo Nation.

(58) NAVAJO-GALLUP WATER SUPPLY PROJECT. The term “Navajo-Gallup Water Supply Project” means the project authorized, constructed, and operated pursuant to the Northwestern New Mexico Rural Water Projects Act.

(59) NAVAJO LAND. The term “Navajo Land” means collectively, the Navajo Reservation, Navajo Trust Land, and Navajo Fee Land.

(60) NAVAJO NATION. The term “Navajo Nation” means the Navajo Nation, a body politic and federally recognized Indian nation, 89 Fed. Reg.944, 945 (Jan. 8, 2024), also known variously as the ‘Navajo Tribe’, the ‘Navajo Tribe of Arizona, New Mexico & Utah’, the ‘Navajo Tribe of Indians’, and other similar names, and includes all bands of Navajo Indians and chapters of the Navajo Nation.

(61) NAVAJO NATION AGRICULTURAL CONSERVATION TRUST FUND ACCOUNT. The term “Navajo Nation Agricultural Conservation Trust Fund Account” means the account created in the Treasury of the United States pursuant to subsection 10(b) of this Act and described in subparagraph 12.2.4 of the settlement agreement.

(62) NAVAJO NATION CIBOLA WATER. The term “Navajo Nation Cibola Water” means the Navajo Nation’s entitlement to the diversion of up to 100 afy of Fourth Priority Water at the same location and for the same Uses described in the Hopi Tribe Existing Cibola Contract or the delivery and consumptive use of up to

71.5 afy at locations and for Uses within the State other than as described in the Hopi Tribe Existing Cibola Contract, which shall have been assigned and transferred by the Hopi Tribe from its Cibola Water under the Hopi Tribe Existing Cibola Contract to the Navajo Nation.

(63) NAVAJO NATION FOURTH PRIORITY WATER. The term “Navajo Nation Fourth Priority Water” means the Diversion right to 3,500 afy of Fourth Priority Water reserved for use in a Navajo-Hopi Indian water rights settlement under paragraph 11.3 of the Arizona Water Settlement Agreement among the United States, the State of Arizona, and the Central Arizona Water Conservation District, as authorized by Section 106(a)(1) and (2) of Public Law 108-451, and allocated to the Navajo Nation pursuant to section 6 of this Act and as described in subparagraphs 4.9 and 10.1 of the settlement agreement.

(64) NAVAJO NATION LOWER BASIN COLORADO RIVER WATER ACQUISITION TRUST FUND ACCOUNT. The term “Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account” means the account created pursuant to subsection 10(b) of this Act and described in subparagraph 12.2.5 of the settlement agreement.

(65) NAVAJO NATION OM&R TRUST FUND ACCOUNT. The term “Navajo Nation OM&R Trust Fund Account” means the account created pursuant to subsection 10(b) of this Act and described in subparagraph 12.2.2 of the settlement agreement .

(66) NAVAJO NATION RENEWABLE ENERGY TRUST FUND ACCOUNT. The term “Navajo Nation Renewable Energy Trust Fund Account” means the account created pursuant to subsection 10(b) of this Act and described in subparagraph 12.2.3 of the settlement agreement.

(67) NAVAJO NATION UPPER BASIN COLORADO RIVER WATER. The term “Navajo Nation Upper Basin Colorado River Water” means the 44,700 afy of Upper Basin Colorado River Water allocated to the Navajo Nation pursuant to section 6 of this Act and as described in subparagraphs 4.7 and 10.1 of the settlement agreement.

(68) NAVAJO NATION WATER DELIVERY CONTRACT. The term “Navajo Nation Water Delivery Contract” means one or more contracts entered into by Secretary and the Navajo Nation in accordance with section 6 of this Act and pursuant to paragraph 10 of the settlement agreement for the delivery of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, or Navajo Nation Fourth Priority Water.

(69) NAVAJO NATION WATER PROJECTS. The term “Navajo Nation Water Projects” shall mean the projects pursuant to subsection 10(f)(1) of this Act and described in subparagraph 12.2.1 of the settlement agreement.

(70) NAVAJO NATION WATER PROJECTS TRUST FUND ACCOUNT. The term “Navajo Nation Water Projects Trust Fund Account” shall mean the account created pursuant to subsection 10(b)(1) of this Act and described in subparagraph 12.2.1 of the settlement agreement.

(71) NAVAJO RESERVATION. The term “Navajo Reservation” means those lands shown on the map attached as Exhibit 3.1.112a to the settlement agreement, which are: within the exterior boundaries of the “Navajo Indian Reservation” in the State, defined by the Act of June 14, 1934, ch. 521, 48 Stat. 960; all lands withdrawn by the Executive Order of Dec. 16, 1882 and partitioned to the Navajo Nation in accordance with the Act of Dec. 22, 1974, Pub. L. 93-531, § 8(b), 88 Stat. 1713 (previously codified as amended at 25 U.S.C. § 640d-7(b)), by Judgment of Partition, Feb. 10, 1977, *Sekaquaptewa v. MacDonald*, Case No. CIV-579-PCT-

JAW (D. Ariz.), *aff'd*, 626 F.2d 113 (9th Cir. 1980); all lands taken into trust as a part of the Navajo Reservation pursuant to the Act of Dec. 22, 1974, Pub. L. No. 93-531, § 11, 88 Stat. 1713, as amended (previously codified at 25 U.S.C. § 640d-10, a copy of which is attached as Exhibit 3.1.112b to the settlement agreement); and excepting all lands within the Hopi Reservation and the San Juan Southern Paiute Reservation; provided, however, that if lands are taken in to trust as part of the Navajo Reservation pursuant to the Act of December 22, 1974, Pub. L. No. 93-531, and subsequent to the Effective Date, such lands shall be considered part of the Navajo Reservation as if they had been reservation lands prior to the Effective Date, except as provided in subparagraphs 3.1.12, 3.1.13, 3.1.87, 3.1.170, 4.1.5, 4.1.6, 4.6.1, and 8.1.1 of the settlement agreement.

(72) NAVAJO TRIBAL UTILITY AUTHORITY OR NTUA. The terms “Navajo Tribal Utility Authority” or “NTUA” mean the enterprise established by the Navajo Nation found at 21 Navajo Nation Code § 1 *et seq.*, or its successor agency or entity.

(73) NAVAJO TRUST LAND. The term “Navajo Trust Land” means land that:

- (A) is located in the State;
- (B) is located outside the exterior boundaries of the Navajo Reservation; and
- (C) as of the Enforceability Date, is held in trust by the United States for the benefit of the Navajo Nation.

(74) NORTHWESTERN NEW MEXICO RURAL WATER PROJECTS ACT. The term “Northwestern New Mexico Rural Water Projects Act” shall mean Title X.B of the Omnibus Public Land Management Act of 2009, Public Law 111-11, as amended.

(75) OFF-RESERVATION. The term “Off-Reservation” means lands located in the State outside the exterior boundaries of:

- (A) the Navajo Reservation;
- (B) the Hopi Reservation; and
- (C) the San Juan Southern Paiute Reservation.

(76) OM&R. The term “OM&R” means operation, maintenance, and replacement.

(77) PARTY OR PARTIES. The terms “Party” or “Parties” mean a Person who is a signatory or Persons who are signatories to the settlement agreement.

(78) PERSON. The term “Person” means an individual; public or private corporation; company; partnership; joint venture; firm; association; society; estate or trust; any other private organization or enterprise; the United States; any Indian tribe; any state, territory, or country; any governmental entity; and any political subdivision or municipal corporation organized under or subject to the constitution and laws of the State. This definition includes the officers, directors, agents, insurers, representatives, employees, attorneys, assigns, subsidiaries, affiliates, enterprises, legal representatives, assigns, predecessors, and successors in interest and their heirs, of any Person.

(79) PUBLIC DOMAIN ALLOTTEE. The term “Public Domain Allottee” means an individual Indian or an Indian tribe holding a beneficial interest in a Public Domain Allotment outside the Navajo Reservation or a Public Domain Allotment within the Navajo Reservation.

(80) PUBLIC DOMAIN ALLOTMENTS WITHIN THE NAVAJO RESERVATION. The term “Public Domain Allotments within the Navajo Reservation” means lands allotted to individual Indians from the public domain that are (1) held in trust by the

United States for the benefit of one or more individual Indians or Indian tribes and (2) located within the exterior boundaries of the Navajo Reservation. A list of Public Domain Allotments within the Navajo Reservation is attached as Exhibit 3.1.131 to the settlement agreement.

(81) PUBLIC DOMAIN ALLOTMENTS OUTSIDE THE NAVAJO RESERVATION. The term “Public Domain Allotments outside the Navajo Reservation” means the 51 parcels of land allotted to individual Indians from the public domain pursuant to Section 4 of the General Allotment Act of 1887, 24 Stat. 388, ch. 119 that are (1) held in trust by the United States for the benefit of one or more individual Indians or Indian tribes and (2) located outside the exterior boundaries of the Navajo Reservation and the Hopi Reservation, as depicted on the map attached as Exhibit 3.1.132A to the settlement agreement.

(82) RECLAMATION. The term “Reclamation” means the United States Bureau of Reclamation.

(83) SAN JUAN SOUTHERN PAIUTE FEE LAND. The term “San Juan Southern Paiute Fee Land” means land, other than San Juan Southern Paiute Trust Land, that:

- (A) is located in the State;
- (B) is located outside the exterior boundaries of the San Juan Southern Paiute Reservation; and
- (C) as of the Enforceability Date, is owned by the San Juan Southern Paiute Tribe, whether in its own name or through an entity wholly owned or controlled by the San Juan Southern Paiute Tribe.

(84) SAN JUAN SOUTHERN PAIUTE GROUNDWATER PROJECTS. The term “San Juan Southern Paiute Groundwater Projects” means the projects described in section 12 of this Act and in subparagraph 12.4.1 of the settlement agreement.

(85) SAN JUAN SOUTHERN PAIUTE LAND. The term “San Juan Southern Paiute Land” means collectively, the San Juan Southern Paiute Southern Area, San Juan Southern Paiute Trust Land, and San Juan Southern Paiute Fee Land.

(86) SAN JUAN SOUTHERN PAIUTE NORTHERN AREA. The term “San Juan Southern Paiute Northern Area” means the land depicted on the map attached as Exhibit 3.1.146 to the settlement agreement.

(87) SAN JUAN SOUTHERN PAIUTE TRIBE AGRICULTURAL CONSERVATION TRUST FUND ACCOUNT. The term “San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account” means the account created pursuant to section 12(f)(2) of this Act and described in subparagraph 12.4.3 of the settlement agreement.

(88) SAN JUAN SOUTHERN PAIUTE TRIBE GROUNDWATER PROJECT TRUST FUND ACCOUNT. The term “San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account” means the account created pursuant to section 12(f)(1) of this Act and described in subparagraph 12.4.1 of the settlement agreement.

(89) SAN JUAN SOUTHERN PAIUTE TRIBE OM&R TRUST FUND ACCOUNT. The term “San Juan Southern Paiute Tribe OM&R Trust Fund Account” means the account created pursuant to section 12(f)(3) of this Act and described in subparagraph 12.4.2 of the settlement agreement.

(90) SAN JUAN SOUTHERN PAIUTE SOUTHERN AREA. The term “San Juan Southern Paiute Southern Area” means the land depicted on the map attached as Exhibit 3.1.150 to the settlement agreement.

(91) SAN JUAN SOUTHERN PAIUTE RESERVATION. The term “San Juan Southern Paiute Reservation” means the approximately 5,400 acres of land described in paragraph 6.0 of the settlement agreement as the San Juan Southern Paiute Northern Area and the San Juan Southern Paiute Southern Area, as depicted in the maps attached as Exhibits 3.1.149 and 3.1.150 to the settlement agreement.

(92) SAN JUAN SOUTHERN PAIUTE TRIBE. The term “San Juan Southern Paiute Tribe” means the San Juan Southern Paiute Tribe, a body politic and federally recognized Indian tribe, 89 Fed. Reg. 944, 946 (Jan. 8, 2024).

(93) SAN JUAN SOUTHERN PAIUTE TRUST LAND. The term “San Juan Southern Paiute Trust Land” means land that:

- (A) is located in the State;
- (B) is located outside the exterior boundaries of the San Juan Southern Paiute Reservation; and
- (C) as of the Enforceability Date, is held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe.

(94) SECRETARY. The term “Secretary” means the Secretary of the United States Department of the Interior or the Secretary’s authorized designee.

(95) SETTLEMENT AGREEMENT. The term “settlement agreement” means the Northeastern Arizona Indian Water Rights Settlement Agreement and the Exhibits attached thereto.

(96) SIXTH PRIORITY WATER. The term “Sixth Priority Water” shall mean Sixth Priority Water as that term is defined in the Hopi Tribe Existing Cibola Contract.

(97) STATE. The term “State” means the State of Arizona.

(98) SURFACE WATER. The term “Surface Water” means all water in the State that is appropriable under State law. “Surface Water” shall not include Colorado River Water.

(99) TREATY. The term “Treaty” means the Articles of Treaty and Agreement entered into by the Navajo Nation and the San Juan Southern Paiute Tribe to settle land claims and other disputes, as executed on March 18, 2000.

(100) TREATY ADDENDUM. The term “Treaty Addendum” means the Addendum to the Treaty entered into by the Navajo Nation and the San Juan Southern Paiute Tribe on May 7, 2004.

(101) TRIBE. The term “Tribe” means:

- (A) the Navajo Nation;
- (B) the Hopi Tribe; or
- (C) the San Juan Southern Paiute Tribe.

(102) TRIBES. The term “Tribes” means:

- (A) the Navajo Nation,
- (B) the Hopi Tribe, and
- (C) the San Juan Southern Paiute Tribe.

(103) UNDERGROUND WATER. The term “Underground Water” means all Water beneath the surface of the earth, within the State, other than Effluent, regardless of its legal characterization as appropriable or non-appropriable under Federal, State, or other law.

(104) UNITED STATES OR UNITED STATES OF AMERICA. The terms “United States” or “United States of America” mean the United States acting as trustee for the Tribes, their Members, Hopi Allottees, and Navajo Allottees, except as

otherwise expressly provided. When the term ‘United States’ or ‘United States of America’ is used in reference to a particular agreement or contract, the term shall mean the United States acting in the capacity as set forth in such agreement or contract.

(105) UPPER BASIN. The term “Upper Basin” means ‘Upper Basin’ as defined in article II(f) of the Colorado River Compact of 1922.

(106) UPPER BASIN COLORADO RIVER WATER. The term “Upper Basin Colorado River Water” means the 50,000 afy of consumptive use of Colorado River Water apportioned to the State in the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in article 3 of chapter 7 of title 45, Arizona Revised Statutes.

(107) USE. The term “Use” means any beneficial use, including instream flow, recharge, storage, recovery, or any other use recognized as beneficial under applicable law.

(108) WATER. The term “water”, when used without a modifying adjective, means Groundwater, Surface Water, Colorado River Water, or Effluent.

(109) WATER RIGHT. The term “Water Right” means any right in or to Groundwater, Surface Water, Colorado River Water, or Effluent under Federal, State, or other law.

(110) WELL. The term “Well” means a human-made opening in the Earth through which Underground Water may be withdrawn or obtained.

(111) YEAR. The term “Year” means a calendar year.

(112) ZUNI INDIAN TRIBE OR ZUNI TRIBE. The terms “Zuni Indian Tribe” or “Zuni Tribe” mean the body politic and federally recognized Indian tribe of that name, 89 Fed. Reg. 944, 947 (Jan. 8, 2024).

**SEC. 4. RATIFICATION AND EXECUTION OF THE NORTHEASTERN ARIZONA INDIAN WATER RIGHTS SETTLEMENT AGREEMENT.**

(a) RATIFICATION.

(1) IN GENERAL. Except as modified by this Act and to the extent the settlement agreement does not conflict with this Act, the settlement agreement is authorized, ratified, and confirmed.

(2) AMENDMENTS. If an amendment to the settlement agreement, or to any Exhibit attached to the settlement agreement requiring the signature of the Secretary, is executed in accordance with this Act to make the settlement agreement consistent with this Act, the amendment is authorized, ratified, and confirmed, to the extent the amendment is consistent with this Act.

(b) EXECUTION OF SETTLEMENT AGREEMENT.

(1) IN GENERAL. To the extent the settlement agreement does not conflict with this Act, the Secretary shall execute the settlement agreement, including all exhibits to the settlement agreement requiring the signature of the Secretary.

(2) MODIFICATIONS. Nothing in this Act prohibits the Secretary from approving any modification to the settlement agreement, including exhibits to the settlement agreement, which is consistent with this Act, to the extent the modification does not otherwise require congressional approval under section 2116 of the Revised Statutes

(25 U.S.C. 177) or any other applicable provision of Federal law.

(c) ENVIRONMENTAL COMPLIANCE.

(1) IN GENERAL. In implementing the settlement agreement (including all exhibits to the settlement agreement requiring the signature of the Secretary) and this Act, the Secretary shall comply with all applicable provisions of:

(A) the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*);

(B) the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), including the implementing regulations of that Act; and

(C) all other Federal environmental laws and regulations.

(2) COMPLIANCE.

(A) IN GENERAL. In implementing the settlement agreement and this Act, and excluding environmental compliance related to the iiná bá - paa tuwaqat'si pipeline, the applicable tribe shall prepare any necessary environmental documents consistent with all applicable provisions of:

(i) the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*);

(ii) the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), including the implementing regulations of that Act; and

- (iii) all other Federal environmental laws and regulations.
- (d) AUTHORIZATIONS. The Secretary shall:
  - (1) independently evaluate the documentation submitted under subparagraph (c)(2)(A); and
  - (2) be responsible for the accuracy, scope, and contents of that documentation.
- (e) EFFECT OF EXECUTION. The execution of the settlement agreement by the Secretary under this section shall not constitute a major action for purposes of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).
- (f) COSTS. Excluding compliance related to the iiná bá - paa tuwaqat'si pipeline, any costs associated with the performance of the compliance activities under subsection (c) shall be paid from funds deposited in the Navajo Nation Water Projects Trust Fund Account, the Hopi Tribe Groundwater Projects Trust Fund Account, or the San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account, whichever is applicable, subject to the condition that any costs associated with the performance of Federal approval or other review of such compliance work or costs associated with inherently Federal functions shall remain the responsibility of the Secretary. Costs associated with the performance of the compliance activities under subsection (c) related to the iiná bá - paa tuwaqat'si pipeline shall be paid from funds deposited in the iiná bá - paa tuwaqat'si pipeline Implementation Fund Account.

**SEC. 5. WATER RIGHTS.**

(a) CONFIRMATION OF WATER RIGHTS.

(1) IN GENERAL. The Water Rights of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the Navajo Allottees, and the Hopi Allottees as set forth in the settlement agreement are ratified, confirmed, and declared to be valid.

(2) USE. Any use of water pursuant to the Water Rights described in subsection (a)(1) by the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the Navajo Allottees, and the Hopi Allottees shall be subject to the terms and conditions of the settlement agreement and this Act.

(3) CONFLICT. In the event of a conflict between the settlement agreement and this Act, this Act shall control.

(b) INTENT OF CONGRESS. It is the intent of Congress to provide to Navajo Allottees benefits that are equivalent to, or exceed, the benefits the Navajo Allottees possess on the day before the date of enactment of this Act, taking into consideration:

(1) the potential risks, cost, and time delay associated with litigation that would be resolved by the settlement agreement and this Act;

(2) the availability of funding under this Act and from other sources;

- (3) the availability of water from the Water Rights of the Navajo Nation; and
  - (4) the applicability of section 7 of the Act of February 8, 1887, (25 U.S.C. 381) and this Act to protect the interests of Navajo Allottees.
- (c) WATER RIGHTS TO BE HELD IN TRUST FOR THE TRIBES, THE NAVAJO ALLOTTEES, AND THE HOPI ALLOTTEES. The United States shall hold the following Water Rights in trust for the benefit of the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the Navajo Allottees, and the Hopi Allottees:
- (1) NAVAJO NATION AND THE NAVAJO ALLOTTEES. The United States shall hold the following Water Rights in trust for the benefit of the Navajo Nation and Navajo Allottees:
    - (A) Underground Water described in subparagraph 4.2 of the settlement agreement;
    - (B) Springs described in subparagraph 4.4 of the settlement agreement;
    - (C) Little Colorado River tributary water described in sub-paragraph 4.5 of the settlement agreement;
    - (D) Little Colorado River Mainstem water described in subparagraph 4.6 of the settlement agreement;

- (E) Navajo Nation Upper Basin Colorado River Water described in sub-paragraph 4.7 of the settlement agreement;
  - (F) Navajo Nation Fourth Priority Water described in subparagraph 4.9 of the settlement agreement; and
  - (G) Water Rights appurtenant or associated with lands held in trust by the United States for the benefit of the Navajo Nation as described in subparagraphs 4.12, 4.13, 4.15, and 4.16 of the settlement agreement.
- (2) HOPI TRIBE. The United States shall hold the following Water Rights in trust for the benefit of the Hopi Tribe:
- (A) Underground Water described in subparagraph 5.2 of the settlement agreement;
  - (B) Surface Water described in subparagraph 5.4 of the settlement agreement;
  - (C) Springs described in subparagraph 5.5 of the settlement agreement;
  - (D) Hopi Tribe Upper Basin Colorado River Water as described in subparagraph 5.7 of the settlement agreement; and
  - (E) Water Rights appurtenant or associated with lands held in trust by the United States for the benefit of the Hopi Tribe as described in subparagraphs 5.10, 5.11, 5.12, and 5.13 of the settlement agreement.

- (3) SAN JUAN SOUTHERN PAIUTE TRIBE. The United States shall hold the following Water Rights in trust for the benefit of the San Juan Southern Paiute Tribe:
  - (A) Underground Water described in subparagraph 6.2.3 of the settlement agreement;
  - (B) Surface Water described in subparagraph 6.2.4 of the settlement agreement;
  - (C) Springs described in subparagraph 6.2.6 of the settlement agreement; and
  - (D) Water Rights appurtenant or associated with lands held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe as described in subparagraphs 6.5 and 6.6 of the settlement agreement.
- (4) HOPI ALLOTTEES. The United States shall hold the Water Rights described in subparagraph 5.9 of the settlement agreement in trust for the benefit of the Hopi allottees.
- (d) NONUSE, FORFEITURE, AND ABANDONMENT.
  - (1) Water Rights of the Navajo Nation and the Navajo Allottees described in subparagraphs 4.2, 4.4, 4.5, 4.6, 4.7, and 4.9 of the settlement agreement shall not be subject to loss by non-use, forfeiture, or abandonment;
  - (2) Water Rights of the Hopi Tribe described in subparagraphs 5.2, 5.4, 5.5, and 5.7 of the settlement agreement, and Water Rights pertaining to lands held in trust

by the United States for the benefit of the Hopi Tribe as described in subparagraphs 5.10, 5.11, 5.12, and 5.13 of the settlement agreement, shall not be subject to loss by non-use, forfeiture, or abandonment;

- (3) Water Rights of the San Juan Southern Paiute Tribe described in subparagraphs 6.2.3, 6.2.4, and 6.2.6 of the settlement agreement shall not be subject to loss by non-use, forfeiture, or abandonment.
  - (4) Water Rights of the Hopi Allottees described in subparagraph 5.9 of the settlement agreement shall not be subject to loss by non-use, forfeiture, or abandonment.
- (e) NAVAJO ALLOTTEES.
- (1) APPLICABILITY OF THE ACT OF FEBRUARY 8, 1887. The provisions of section 7 of the Act of February 8, 1877, 24 Stat. 390, ch. 119; 25 U.S.C. § 381, shall apply to the Water Rights identified in subsection (c)(1).
  - (2) ENTITLEMENT TO WATER. The rights of Navajo Allottees, and the United States acting as trustee for Navajo Allottees, to use water on Navajo Allotments located on the Navajo Reservation shall be satisfied solely from the Water Rights described in subsection (c)(1).
  - (3) ALLOCATIONS. A Navajo Allottee shall be entitled to a just and equitable distribution of water for irrigation purposes.

- (4) CLAIMS.
  - (A) EXHAUSTION OF REMEDIES. Before asserting any claim against the United States under section 7 of the Act of February 8, 1887, 24 Stat. 390, ch. 199; 25 U.S.C. § 381, or any other applicable law, a Navajo Allottee shall exhaust remedies available under the Navajo Nation Water Code or other applicable Navajo law.
  - (B) ACTION FOR RELIEF. After the exhaustion of all remedies available under the Navajo Nation Water Code or other applicable Navajo law, a Navajo Allottee may seek relief under section 7 of the Act of February 8, 1887, 24 State. 390, ch. 119; 25 USC § 381, or other applicable law.
- (5) AUTHORITY OF THE SECRETARY. The Secretary shall have authority to protect the rights of Navajo Allottees in accordance with this subsection.
- (f) NAVAJO NATION WATER CODE. To the extent necessary, and subject to the approval of the Secretary, the Navajo Nation shall amend the Navajo Nation Water Code to provide
  - (1) that use of Water by Navajo Allottees shall be satisfied with water from the Water Rights described in subsection (c)(1);
  - (2) a process by which a Navajo Allottee may request that the Navajo Nation provide water in accordance with the settlement agreement, including the provision of water

under any Navajo Allottee lease under section 4 of the Act of June 25, 1910, 36 Stat. 856, ch. 431; 25 U.S.C. § 403;

(3) a due process system for the consideration and determination by the Navajo Nation of any request of a Navajo Allottee (or a successor in interests to a Navajo Allottee) for an allocation of water on a Navajo Allotment, including a process for:

(A) appeal and adjudication of any denied or disputed distribution of water; and

(B) resolution of any contested administrative decision; and

(4) a requirement that any Navajo Allottee asserting a claim relating to the enforcement of rights of the Navajo Allottee under the Navajo Nation Water Code, including to the quantity of water allocated to land of the Navajo Allottee, shall exhaust all remedies available to the Navajo Allottee under Navajo law before initiating an action against the United States or petitioning the Secretary pursuant to subparagraph (e)(4)(B).

(g) ACTION BY THE SECRETARY.

(1) IN GENERAL. During the period beginning on the Enactment Date and ending on the date on which a Navajo Nation Water Code is amended as described in paragraph (f)(1) of this section, the Secretary shall administer, with respect to the rights of the Navajo Allottees, the Water Rights identified in subsection (c)(1).

- (2) APPROVAL. The Navajo Nation Water Code amendments described in paragraph (f)(1) of this section shall not be valid unless:
  - (A) the amendments described in paragraph (f)(1) of this section have been approved by the Secretary; and
  - (B) each subsequent amendment to the Navajo Nation Water Code that affects the rights of a Navajo Allottee is approved by the Secretary.
- (3) APPROVAL PERIOD.
  - (A) APPROVAL PERIOD. The Secretary shall approve or disapprove the Navajo Nation Water Code amendments described in paragraph (f)(1) of this section not later than 180 days after the date on which the amendments are submitted to the Secretary.
  - (B) EXTENSION. This deadline may be extended by the Secretary after consultation with the Navajo Nation.
- (h) EFFECT. Except as otherwise expressly provided in this section, nothing in this Act:
  - (1) authorizes any action by a Navajo Allottee against any individual or entity, or against the Navajo Nation, under Federal, State, tribal, or local law; or
  - (2) alters or affects the status of any action brought pursuant to section 1491(a) of title 28, United States Code.

**SEC. 6. ALLOCATION AND ASSIGNMENT OF COLORADO RIVER WATER TO THE TRIBES; WATER DELIVERY CONTRACTS.**

(a) ALLOCATION AND ASSIGNMENT TO THE NAVAJO NATION AND THE HOPI TRIBE.

(1) ALLOCATION AND ASSIGNMENT TO THE NAVAJO NATION.

(A) NAVAJO NATION UPPER BASIN COLORADO RIVER WATER. Forty-four Thousand Seven Hundred (44,700) afy of Upper Basin Colorado River Water is allocated to the Navajo Nation upon the enforceability date. Pursuant to subparagraph 4.7.1 of the settlement agreement, the State has expressly agreed to this allocation.

(B) NAVAJO NATION CIBOLA WATER. Pursuant to subparagraph 4.8.2 of the settlement agreement, the State has recommended the assignment of Navajo Nation Cibola Water by the Hopi Tribe to the Navajo Nation effective on the enforceability date.

(C) NAVAJO NATION FOURTH PRIORITY WATER. Three Thousand Five Hundred (3,500) afy of uncontracted Fourth Priority Water reserved for use in a Navajo-Hopi Indian Water Rights settlement under paragraph 11.3 of the Arizona Water Settlement Agreement among the United States, the State, and CAWCD, as authorized by Section 106(a)(1) and (2) of Public Law 108-451, is allocated

to the Navajo Nation upon the enforceability date. Pursuant to subparagraph 4.9.1 of the settlement agreement, the State has recommended the allocation.

(2) ALLOCATION TO HOPI TRIBE AND AMENDMENT TO CIBOLA CONTRACT.

(A) ARIZONA HOPI TRIBE UPPER BASIN COLORADO RIVER WATER. Two Thousand Three Hundred (2,300) afy of Upper Basin Colorado River Water is allocated to the Hopi Tribe upon the enforceability date. Pursuant to subparagraph 5.7.1 of the settlement agreement, the State has expressly agreed to this allocation.

(B) HOPI TRIBE CIBOLA WATER. Pursuant to subparagraph 5.8.1 of the settlement agreement, the State has recommended the amendment of the existing Hopi Tribe Cibola Contract to reduce the Hopi Tribe's fourth priority water diversion entitlement to 4,178 afy, and to provide for additional uses and places of use of Hopi Tribe Cibola Water, effective on the enforceability date.

(b) COLORADO RIVER WATER USE AND STORAGE.

(1) IN GENERAL.

(A) NAVAJO NATION UPPER BASIN COLORADO RIVER WATER AND HOPI TRIBE UPPER BASIN COLORADO RIVER WATER. Navajo Nation Upper Basin Colorado River Water may be used at

any location within the State; and Hopi Tribe Upper Basin Colorado River Water may be used at any location within the State.

(B) NAVAJO NATION CIBOLA WATER, NAVAJO NATION FOURTH PRIORITY WATER, AND HOPI TRIBE CIBOLA WATER. The Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water and Hopi Tribe Cibola Water may be used at any location within the State.

(C) STORAGE IN ARIZONA. Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water may be stored at underground storage facilities or groundwater savings facilities located:

- (i) within the Navajo Reservation in accordance with Navajo law, or State law if mutually agreed to by the Navajo Nation and the State;
- (ii) within the Hopi Reservation in accordance with Hopi law, or State law if mutually agreed to by the Hopi Tribe and the State;
- (iii) on any other Indian reservation located in the State in accordance with applicable law; and

- (iv) within the State and outside of any Indian reservation in accordance with State law.
  - (v) The Navajo Nation and the Hopi Tribe may assign any long-term storage credits accrued as a result of storage under this subparagraph in accordance with applicable law. Any water stored pursuant to tribal law may only be recovered on the Indian reservation where the water was stored.
- (D) TRANSPORTATION OF WATER THROUGH THE CAP SYSTEM. The Navajo Nation or the Hopi Tribe may transport Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water through the CAP system for storage or use in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP system to transport water other than CAP Water, subject to payment of applicable charges.
- (2) STORAGE IN NEW MEXICO. The Navajo Nation may store its Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water at the Navajo Reservoir and at the Frank Chee Willetto, Sr. Reservoir in New Mexico so long as the Water

stored there is subsequently transported to the State for use in the State.

- (A) Any storage of Navajo Nation Upper Basin Colorado River Water in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir shall be credited against Upper Basin Colorado River Water in the year in which the diversions for storage in the Reservoir occurs. Such Water shall be accounted for and reported by the Secretary separately from any other water stored in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir.
  - (B) Any storage of Navajo Nation Cibola Water or Navajo Nation Fourth Priority Water in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir shall be credited against the State's apportionment of Lower Basin Colorado River Water in the year in which the diversion for storage in the Navajo Reservoir or Frank Chee Willetto, Sr. Reservoir occurs. Such Water shall be accounted for and reported by the Secretary separately from any other water stored in the Navajo Reservoir or the Frank Chee Willetto, Sr. Reservoir.
- (3) NO USE OUTSIDE ARIZONA.
- (A) The Navajo Nation may divert its Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority

Water in Arizona, New Mexico, and Utah, but, with the exception of storage in the Navajo Reservoir and Frank Chee Willetto, Sr. Reservoir described in subparagraph (2), the Navajo Nation may not use, lease, exchange, forbear, or otherwise transfer any of the water for use directly or indirectly outside of the State.

(B) The Hopi Tribe may divert its Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water in Arizona, and the Hopi Tribe may not use, lease, exchange, forbear, or otherwise transfer any of the water for use directly or indirectly outside of the State.

(4) All contracts to store Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water shall identify: (a) the water's place of storage; (b) the mechanisms for delivery of the water; and (c) each point of Diversion under the contract. A contract to store Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water shall not conflict with the settlement agreement or this Act.

- (c) WATER DELIVERY CONTRACTS. The Secretary shall enter into the following Water delivery contracts, which contracts shall be without limit as to term:
  - (1) NAVAJO NATION WATER DELIVERY CONTRACTS FOR NAVAJO NATION UPPER BASIN COLORADO RIVER WATER
    - (A) The Secretary shall enter into a water delivery contract with the Navajo Nation for Navajo Nation Upper Basin Colorado River Water in accordance with the settlement agreement, which shall provide for, among other things:
      - (i) the delivery of up to 44,700 afy of Navajo Nation Upper Basin Colorado River Water;
      - (ii) one or more points of Diversion in Arizona, New Mexico, and Utah;
      - (iii) one or more storage locations at any place within the State and the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico;
      - (iv) use at any location within the State; and
      - (v) delivery of Navajo Nation Upper Basin Colorado River Water to the Navajo Nation's lessees and exchange partners in the Upper Basin and the Lower Basin within the State.
    - (B) Water Service Contract No. 09-WC-40-318 between the United States and the Navajo Nation dated

December 23, 2009 for the delivery of up to 950 afy of Water from Lake Powell to the Navajo Nation for municipal and industrial Use within the Community of LeChee shall be replaced with a Navajo Nation Water Delivery Contract for the delivery of Navajo Nation Upper Basin Colorado River Water that complies with this subsection. As provided in the settlement agreement, upon the Enforceability Date, Water Service Contract No. 09-WC-40-318 shall terminate.

- (2) NAVAJO NATION WATER DELIVERY CONTRACT FOR NAVAJO NATION CIBOLA WATER. The Secretary shall enter into a water delivery contract with the Navajo Nation for the Navajo Nation Cibola Water in accordance with the settlement agreement which shall provide for, among other things:
  - (A) the Diversion of up to 100 afy at the location and for the same uses described in the Hopi Tribe Existing Cibola Contract; or delivery and consumptive use of up to 71.5 afy at locations and for Uses within the State other than as described in the Hopi Tribe Existing Cibola Contract;
  - (B) one or more points of Diversion in Arizona, New Mexico, and Utah;

- (C) storage in any location within the State and in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico;
- (D) use at any location within the State;
- (E) delivery of Navajo Nation Cibola Water to the Navajo Nation's lessees and exchange partners in the Upper Basin and the Lower Basin within the State; and
- (F) curtailment as provided in subsection (e).

(3) NAVAJO NATION WATER DELIVERY CONTRACT FOR NAVAJO NATION FOURTH PRIORITY WATER.

The Secretary shall enter into a water delivery contract with the Navajo Nation for Navajo Nation Fourth Priority Water in accordance with the settlement agreement which shall provide for, among other things:

- (A) delivery of up to 3,500 afy of Navajo Nation Fourth Priority Water;
- (B) one or more points of Diversion in Arizona, New Mexico, and Utah;
- (C) storage in any location in Arizona and in the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico;
- (D) use at any location within the State;
- (E) delivery of Navajo Nation Fourth Priority Water to the Navajo Nation's lessees and exchange partners in

the Upper Basin and the Lower Basin within the State; and

(F) curtailment as provided in subsection (e).

(4) HOPI TRIBE DELIVERY CONTRACTS FOR HOPI TRIBE UPPER BASIN COLORADO RIVER WATER.

The Secretary shall enter into a water delivery contract with the Hopi Tribe for Hopi Tribe Upper Basin Colorado River Water in accordance with the settlement agreement, which shall provide for, among other things:

(A) the delivery of up to 2,300 afy of Hopi Tribe Upper Basin Colorado River Water;

(B) one or more points of diversion in the State, including Lake Powell;

(C) one or more storage locations at any place within the State;

(D) use at any location within the State; and

(E) delivery of Hopi Tribe Upper Basin Colorado River Water to the Hopi Tribe's lessees and exchange partners in the Upper Basin and the Lower Basin within the State.

(5) HOPI TRIBE WATER DELIVERY CONTRACT FOR HOPI TRIBE CIBOLA WATER.

The Secretary shall enter into a water delivery contact with the Hopi Tribe for Hopi Tribe Cibola Water in accordance with the settlement agreement, which shall provide for, among other things:

- (A) the delivery of up to 4,178 afy of fourth priority water, 750 afy of fifth priority water, and 1,000 afy of sixth priority water;
  - (B) one or more points of diversion in the State, including Lake Powell;
  - (C) storage in any location within the State;
  - (D) use at any location within the State consistent with subparagraph 5.8.3 of the settlement agreement;
  - (E) delivery of Hopi Tribe Cibola Water to the Hopi Tribe's lessees and exchange partners in the Upper Basin and Lower Basin within the State; and
  - (F) curtailment as provided in subsection (e).
- (d) REQUIREMENTS AND LIMITATIONS APPLICABLE TO WATER DELIVERY CONTRACTS.

The Navajo Nation Water Delivery Contracts and Hopi Tribe Water Delivery Contracts described in subsection (c) shall be subject to the following requirements and limitations:

- (1) Except for storage by the Navajo Nation at the Navajo Reservoir and the Frank Chee Willetto, Sr. Reservoir in New Mexico, a Water delivery contract shall not permit the use of the Water outside of the State.
- (2) A water delivery contract shall not, either temporarily or permanently, alter or reduce the State's annual Lower Basin apportionment pursuant to the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, *et seq.*, as amended, and the Decree,

or annual Upper Basin apportionment pursuant to the Upper Colorado River Basin Compact, as ratified and reprinted in article 3 of chapter 7 of title 45, Arizona Revised Statutes.

- (3) Nothing in a water delivery contract shall alter or impair the State's rights, authorities, and interests under the Boulder Canyon Project Act of 1928, 43 U.S.C. 617, *et seq.*, as amended, the contract between the United States and the State of Arizona dated February 9, 1944, or the Upper Colorado River Basin Compact of 1948, as ratified and reprinted in article 3 of chapter 7 of title 45, Arizona Revised Statutes, or the Decree.
- (4) A water delivery contract shall not limit the State's ability to seek or advocate changes in the Colorado River system's operating rules, criteria, or guidelines as they apply to the State's apportionments from the Upper Basin and the Lower Basin of the Colorado River.
- (5) In the event that a water delivery contract will result in the delivery of Upper Basin Colorado River Water to the Lower Basin or Lower Basin Colorado River Water to the Upper Basin, the Secretary shall confer with the State prior to executing such water delivery contract concerning: (a) the impact of the water deliveries on the availability of Upper Basin or Lower Basin Colorado River Water within the State; (b) Reclamation's annual accounting for such water on the State's Colorado River apportionments in the Upper

Basin and Lower Basin; and, if appropriate, (c) the impact on the operations of the Central Arizona Project.

- (6) A water delivery contract shall identify: (a) the place(s) of use; (b) the purpose of the use(s) during the term of the contract; (c) the mechanism(s) for delivery of the water; and (d) each point of diversion under the contract.
- (7) A water delivery contract shall not prejudice the interests of the State, or serve as precedent against the State, in any litigation related to the apportionment, diversion, storage, or use of water from the Colorado River system as defined in Article II(a) of the Decree.
- (8) In the case of a conflict between a water delivery contract and this Act or the settlement agreement, this Act or the settlement agreement shall control.
- (9) Any material amendment or modification of a water delivery contract shall comply with, and be subject to, all requirements and limitations for the water delivery contract as set forth in the settlement agreement and this Act.
- (10) A water delivery contract shall become effective on the Enforceability Date and, once effective, shall be permanent and without limit as to term.
- (11) The United States shall waive Colorado River Storage Project standby charges and delivery charges and annual administration fees for Water delivered pursuant to a water delivery contract.

(e) CURTAILMENT.

(1) NAVAJO NATION CIBOLA WATER AND NAVAJO NATION FOURTH PRIORITY WATER.

Deliveries of Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water, regardless of the point of diversion, shall be subject to reduction in any year in which a shortage is declared to the same extent as other non-CAP fourth priority Lower Basin Colorado River Water supplies.

(2) OTHER LOWER BASIN COLORADO RIVER WATER ACQUIRED BY THE NAVAJO NATION.

Any other Lower Basin Colorado River Water that the Navajo Nation may acquire shall be subject to reduction in any year in which a shortage is declared in accordance with criteria applied by the Secretary to Water of the same priority.

(3) HOPI TRIBE CIBOLA WATER.

(A) Deliveries of Hopi Tribe Cibola Water of fourth priority, regardless of the point of diversion, shall be subject to reduction in any year in which a shortage is declared to the same extent as other non-CAP fourth priority Lower Basin Colorado River Water supplies.

(B) Deliveries of Hopi Tribe Cibola Water of fifth priority, regardless of the point of diversion, shall be subject to reduction in any year in which a shortage is declared to the same extent as other fifth priority Lower Basin Colorado River Water supplies.

(4) OTHER LOWER BASIN COLORADO RIVER WATER ACQUIRED BY THE HOPI TRIBE.

Any other Lower Basin Colorado River Water that the Hopi Tribe may acquire shall be subject to reduction in any year in which a shortage is declared in accordance with criteria applied by the Secretary to water of the same priority.

(f) USE OF THE COLORADO RIVER MAINSTREAM AND SAN JUAN RIVER.

The Secretary is authorized to use the Colorado River Mainstream and dams and works on the Mainstream now or hereafter controlled or operated by the United States, which regulate the flow of water in the Mainstream or the diversion of water from the Mainstream in the Upper Basin or the Lower Basin to transport and deliver Navajo Nation Upper Basin Colorado River Water, Hopi Tribe Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, and Hopi Tribe Cibola Water. The Secretary is also authorized to use the San Juan River and the dams and works described in subparagraphs 4.7.5, 4.8.4, and 4.9.4 of the settlement agreement to transport, store, and deliver Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water.

(1) Navajo Nation Upper Basin Colorado River Water or Hopi Tribe Upper Basin Colorado River Water which enters the Mainstream and dams and works on the Mainstream now or hereafter controlled or operated by the United States which regulate the flow of Water in the Mainstream or the

diversion of Water from the Mainstream in the Upper Basin or the Lower Basin of the United States of the Lower Colorado River, shall not be deemed water controlled by the United States under the Decree and shall be managed differently than Lower Basin Mainstream Water and be accounted for separately by the Secretary in a manner such that the Navajo Nation Upper Basin Colorado River Water or the Hopi Tribe's Upper Basin Colorado River Water is not subject to paragraphs II(A) or II(B) of the Decree.

- (2) Navajo Nation Upper Basin Colorado River Water that enters the San Juan River and the dams and works described in subparagraphs 4.7.5, 4.8.4, and 4.9.4 of the settlement agreement shall not be deemed water controlled by the United States and is not subject to the Decree provided that if Navajo Nation Upper Basin Colorado River Water spills from dams on the San Juan River described in subparagraphs 4.7.5, 4.8.4, and 4.9.4, it becomes part of the San Juan River system.
- (g) ACQUISITIONS OF ENERGY. Amounts of energy needed to deliver water to the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe shall be acquired by the Tribes.
  - (h) REPORTING BY NAVAJO NATION AND HOPI TRIBE.
    - (1) NAVAJO NATION. Beginning on March 1 of the first year following the year in which the Enforceability Date occurs, and on March 1 of each year thereafter, the Navajo Nation shall submit a report to the Arizona Department of Water

Resources showing: (a) the annual diversion amount, point of diversion, and places of use of Navajo Nation Upper Basin Colorado River Water; (b) the annual diversion amount, point of diversion, and places of use of Navajo Nation Cibola Water; (c) the annual diversion amount, point of diversion, and places of use of Navajo Nation Fourth Priority Water; (d) the location and annual amount of any off-Reservation storage of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water; (e) the amount of an off-Reservation exchange involving Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water; and (f) the location and annual amount of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water leased off-Reservation. In order to accurately measure the flow of Water diverted in the Upper Basin for use by the Navajo Nation in the State, the Navajo Nation shall install suitable measuring devices at or near each point of diversion of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water from the Colorado River's mainstem in the Upper Basin and the San Juan River in the Upper Basin. The Navajo Nation shall notify the Arizona Department of Water Resources in writing of any annual reporting conflicts between Reclamation, the Navajo Nation, or the Upper

Colorado River Commission prior to the completion of Reclamation's annual "Colorado River Accounting and Water Use Report for the Lower Basin."

- (2) HOPI TRIBE. Beginning on March 1 of the first year following the year in which the Enforceability Date occurs, and on March 1 of each year thereafter, the Hopi Tribe shall submit a report to the Arizona Department of Water Resources showing: (a) the annual diversion amount, point of diversion, and places of use of Hopi Tribe Upper Basin Colorado River Water; (b) the annual diversion amount, point of diversion, and places of use of Hopi Tribe Cibola Water; (c) the location and annual amount of any off-Reservation storage of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water; (d) the amount of an off-Reservation exchange involving Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water; and (e) the location and annual amount of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water leased off-Reservation. In order to accurately measure the flow of Water diverted in the Upper Basin for use by the Hopi Tribe in the State, the Hopi Tribe shall install suitable measuring devices at or near each point of diversion of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water from the Colorado River's mainstem in the Upper Basin. The Hopi Tribe shall notify the Arizona Department of Water Resources in writing of any annual

reporting conflicts between Reclamation, the Hopi Tribe, or the Upper Colorado River Commission prior to the completion of Reclamation's annual "Colorado River Accounting and Water Use Report for the Lower Basin."

**SEC. 7. COLORADO RIVER WATER LEASES AND EXCHANGES; USES.**

(a) IN GENERAL. Subject to approval by the Secretary:

(1) The Navajo Nation shall have authority to enter into leases, or options to lease, or exchanges, or options to exchange, Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water, for use and storage in the State, and provide for the temporary delivery to other persons of any portion of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water in the State in accordance with the settlement agreement and all applicable Federal and State laws governing the transfer of Colorado River Water entitlements within the State.

(2) The Hopi Tribe shall have authority to enter into leases, or options to lease, or exchanges, or options to exchange, Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water for use and storage in the State, and provide for the temporary delivery to other persons of any portion of Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water in the State in accordance with the

settlement agreement and all applicable Federal and State laws governing the transfer of Colorado River Water entitlements within the State.

(b) TERMS OF LEASES AND EXCHANGES.

(1) LEASING – ON RESERVATION. The Navajo Nation may lease the Navajo Nation Upper Basin Colorado River Water, the Navajo Nation Cibola Water and the Navajo Nation Fourth Priority Water for use or storage on the Navajo Reservation and the Hopi Tribe may lease Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water for use or storage on the Hopi Reservation. Leases or options to lease under this subsection shall be subject to:

(A) the Navajo Nation or Hopi Tribe’s leasing regulations, whichever is applicable; and

(B) Federal provisions regarding the lease of restricted land (25 U.S.C. § 415(a) and (e)).

(2) LEASING – OFF RESERVATION. Subject to approval by the Secretary for an off Reservation lease:

(A) NAVAJO NATION LEASING. The Navajo Nation may lease Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, and Navajo Nation Fourth Priority Water for use or storage off of the Navajo Reservation anywhere within the State, in accordance with the settlement agreement and all applicable Federal and State laws

governing the transfer of Colorado River Water within the State.

- (B) HOPI TRIBE LEASING. The Hopi Tribe may lease Hopi Tribe Upper Basin Colorado River Water and Hopi Tribe Cibola Water for use or storage off of the Hopi Reservation anywhere within the State, in accordance with the settlement agreement and all applicable Federal and State laws governing the transfer of Colorado River Water within the State.
  - (C) TERM OF LEASES AND EXCHANGES. Contracts to lease and options to lease off of the Reservation shall be for a term not to exceed one hundred (100) years. Exchanges or options to exchange shall be for the term provided for in the exchange or option, as applicable.
  - (D) RENEGOTIATION; RENEWAL. The Navajo Nation and the Hopi Tribe may, with the approval of the Secretary, renegotiate any lease described in subsection (b)(2) at any time during the term of that lease provided the term of the renegotiated lease off of the Reservation does not exceed one hundred (100) years.
- (3) REQUIREMENTS FOR ALL CONTRACTS TO LEASE AND CONTRACTS TO EXCHANGE. All contracts to lease or exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation

Fourth Priority Water, Hopi Tribe Upper Colorado River Water and Hopi Tribe Cibola Water shall:

- (A) identify the Water's places of use, the purpose of the Water's uses during the term of the contract, the mechanisms for delivery of the water, and each point of Diversion under the contract and
  - (B) a lease or exchange agreement under this subsection shall provide that the water received from the Navajo Nation or the Hopi Tribe, whichever applies, shall be used in accordance with applicable law.
- (4) NO CONFLICT WITH SETTLEMENT AGREEMENT OR THIS ACT. A contract to lease or exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water or Hopi Tribe Cibola Water shall not conflict with the settlement agreement or this Act.
- (c) PROHIBITION ON PERMANENT ALIENATION. No Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, or Hopi Tribe Cibola Water may be permanently alienated.
- (d) ENTITLEMENT TO LEASE AND EXCHANGE MONIES.
- (1) ENTITLEMENT. The Navajo Nation or the Hopi Tribe, as applicable, shall be entitled to all consideration due to the Navajo Nation or Hopi Tribe under any lease, option to

lease, exchange, or option to exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, or Hopi Tribe Cibola Water entered into by the Navajo Nation or the Hopi Tribe.

(2) EXCLUSION. The United States shall not, in any capacity, be entitled to the consideration described in paragraph (1).

(3) OBLIGATION OF THE UNITED STATES. The United States shall not, in any capacity, have any trust or other obligation to monitor, administer, or account for, in any manner, any funds received by the Navajo Nation or the Hopi Tribe as consideration under any lease, option to lease, exchange, or option to exchange Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water entered into by the Navajo Nation or the Hopi Tribe.

(e) DELIVERY OF COLORADO RIVER WATER TO LESSEES. All lessees of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water shall pay all OM&R charges, all energy charges, and all other applicable charges associated with the delivery of the leased Water.

- (f) DELIVERY OF COLORADO RIVER WATER THROUGH THE CAP SYSTEM.
- (1) CAWCD APPROVAL. The Navajo Nation, the Hopi Tribe, or any person who leases Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water under subsection 7(a), may transport such Water through the CAP system in accordance with all laws of the United States and the agreements between the United States and CAWCD governing the use of the CAP system to transport Water other than CAP Water, and other applicable charges.
  - (2) LESSEE RESPONSIBILITY FOR CHARGES. Any lease or option to lease providing for the temporary delivery of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water through the CAP system shall require the lessee to pay the CAP operating agency all CAP fixed OM&R charges and all CAP pumping energy charges associated with the delivery of the leased Water, and other applicable charges.
  - (3) NO RESPONSIBILITY FOR PAYMENT. The Navajo Nation, the Hopi Tribe, and the United States acting in any capacity, shall not be responsible for the payment of any

charges associated with the delivery of Colorado River Water leased to others.

- (4) PAYMENT IN ADVANCE. No leased Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water shall be delivered through the CAP system unless the CAP fixed OM&R charges, the CAP pumping energy charges, and other applicable charges associated with the delivery of such Water have been paid in advance.
- (5) CALCULATION. The charges for delivery of Navajo Nation Upper Basin Colorado River Water, Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, Hopi Tribe Upper Basin Colorado River Water, and Hopi Tribe Cibola Water delivered through the CAP system pursuant to a lease shall be calculated in accordance with the agreements between the United States and CAWCD governing the use of the CAP system to transport Water other than CAP Water.

**SEC. 8. THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE; CONSTRUCTION; OWNERSHIP.**

- (a) IINÁ BÁ - PAA TUWAQAT'SI PIPELINE.
  - (1) PLANNING, DESIGN, AND CONSTRUCTION OF THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE. The Secretary, acting through the Commissioner of Reclamation, shall plan, design, and construct the iiná bá - paa tuwaqat'si

pipeline. As provided in subparagraph 12.1.4 of the settlement agreement, the Secretary shall form a Project Construction Committee including the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe to participate in the planning and design of the iiná bá - paa tuwaqat'si pipeline to provide Water delivery to the Navajo Reservation, the Hopi Reservation, and the San Juan Southern Paiute Southern Area. The iiná bá – paa tuwaqat'si pipeline shall be substantially configured as Alternative 5, Option B-100 described in the Reclamation *Navajo-Hopi Value Planning Study – Arizona* dated October 2020 (Value Planning Draft Report for Presentation (Not for Distribution)). The iiná bá - paa tuwaqat'si pipeline may include components that have already been built or acquired by the Navajo Nation or the Hopi Tribe as a contribution by the Navajo Nation or the Hopi Tribe towards the cost of planning, designing, and constructing the pipeline. The iiná bá – paa tuwaqat'si pipeline shall deliver potable water for domestic, commercial, municipal and industrial uses and be capable of delivering from Lake Powell: (i) up to 7,100 afy of potable Colorado River Water to the Navajo Nation for use in delivering up to 6,750 afy to serve Navajo communities and up to 350 afy to serve the San Juan Southern Paiute Southern Area; and (ii) up to 3,076 afy of potable Colorado River Water to the Hopi Tribe for use in delivering up to 3,076 afy to serve Hopi communities. Construction of the iiná bá – paa tuwaqat'si pipeline shall

commence after environmental compliance, design, construction phasing, cost estimating, and value engineering have occurred, and the phasing of construction has been agreed to among the Secretary, the Navajo Nation, and the Hopi Tribe, with the Secretary deciding on phasing if an agreement is not reached.

- (2) OWNERSHIP. The iiná bá - paa tuwaqat'si pipeline shall be owned by the United States during construction. Upon substantial completion of all or a phase of the iiná bá - paa tuwaqat'si pipeline, the Secretary shall transfer title to such sections of the pipeline on the Navajo Reservation, except that section that lies on the Navajo Reservation between Moenkopi and the boundary of the 1882 Reservation, to the Navajo Nation, and transfer title to such sections of the pipeline on the Hopi Reservation, and that section that lies on the Navajo Reservation between Moenkopi and the boundary of the 1882 Reservation and the right-of-way for that section of the pipeline, to the Hopi Tribe.
- (3) SUBSTANTIAL COMPLETION. The Secretary shall determine that the iiná bá - paa tuwaqat'si pipeline or a phase of the pipeline is substantially complete after consultation with the Navajo Nation and the Hopi Tribe. Substantial completion of the iiná bá - paa tuwaqat'si pipeline project or a phase of the pipeline project occurs when the infrastructure constructed is capable of storing, diverting, treating, transmitting, and distributing a supply of

Water as set forth in the final project design described in subsection (a)(1).

(4) OPERATION.

(A) The Secretary shall form a Project Operation Committee including the Navajo Nation and the Hopi Tribe. The Project Operation Committee shall develop a project operations agreement to be executed by the Navajo Nation, the Hopi Tribe, and the Secretary prior to substantial completion of any phase of the iiná bá - paa tuwaqat'si pipeline that will provide Water to both the Navajo Nation and the Hopi Tribe. The project operations agreement shall set forth all terms and conditions necessary for long-term operations of the iiná bá - paa tuwaqat'si pipeline, including: (a) distribution of Water; (b) responsibility for maintenance of the iiná bá - paa tuwaqat'si pipeline or section of the pipeline; (c) the allocation and payment of annual OM&R costs of the iiná bá - paa tuwaqat'si pipeline or section of the pipeline based on the proportionate uses and ownership of the pipeline; and (d) a right to sue in United States District Court to enforce the project operations agreement.

(B) The Navajo Nation shall operate that section of the iiná bá - paa tuwaqat'si pipeline that delivers water to the Navajo communities other than Coal Mine Mesa,

and that may deliver Water through the iiná bá - paa tuwaqat'si pipeline to the San Juan Southern Paiute Tribe. The Hopi Tribe shall operate that section of the iiná bá - paa tuwaqat'si pipeline that delivers Water to Moenkopi and the 1882 Reservation and the Navajo community of Coal Mine Mesa.

(b) TRIBAL EASEMENTS AND RIGHTS-OF-WAY.

- (1) In partial consideration for the funding provided under section 13 of the Act, the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe shall each timely consent to the grant of rights-of-way as described in, and in accordance with, subparagraphs 12.5.1, 12.5.2, and 12.5.3 of the settlement agreement.
- (2) With the consent of each affected tribe, the Secretary is authorized to enter into legal devices other than rights-of-way such as construction corridors when operating within the jurisdiction of one of the Navajo Nation, Hopi Tribe, or San Juan Southern Paiute Tribe in furtherance of the planning, design, and construction of the iiná bá - paa tuwaqat'si pipeline.
- (3) The Secretary is authorized to and shall grant the rights-of-way consented to by the Tribes referred to in (b)(1).

**SEC. 9. THE IINA BA - PAA TUWAQAT'SI PIPELINE IMPLEMENTATION FUND.**

- (a) ESTABLISHMENT. The Secretary shall establish a non-trust, interest-bearing account, to be known as the “iiná bá - paa

tuwaqat'si pipeline Implementation Fund Account” (referred to in this section as the “Implementation Fund Account”), to be managed and distributed by the Secretary, for use by the Secretary for carrying out this Act.

- (b) DEPOSITS. The Secretary shall deposit in the Implementation Fund Account established under subsection 9(a), the amounts made available pursuant to paragraphs 13(a)(1).
- (c) USES. The Implementation Fund Account shall be used by the Secretary to carry out section 8 of the Act.
- (d) INTEREST. In addition to the deposits under subsection (b), any investment earnings, including interest credited to amounts unexpended in the Implementation Fund Account are authorized to be appropriated to be used in accordance with the uses described in subsection (c).

**SEC. 10. THE NAVAJO NATION WATER SETTLEMENT TRUST FUND.**

- (a) ESTABLISHMENT. The Secretary shall establish a trust fund for the Navajo Nation, to be known as the “Navajo Nation Water Settlement Trust Fund,” to be managed, invested, and distributed by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Navajo Nation Water Settlement Trust Fund under subsection (c), together with any investment earnings, including interest, earned on those amounts, for the purpose of carrying out this Act.

- (b) ACCOUNTS. The Secretary shall establish in the Navajo Nation Water Settlement Trust Fund the following accounts:
- (1) The Navajo Nation Water Projects Trust Fund Account;
  - (2) The Navajo Nation OM&R Trust Fund Account;
  - (3) The Navajo Nation Agricultural Water Conservation Trust Fund Account;
  - (4) The Navajo Nation Renewable Energy Trust Fund Account;  
and
  - (5) The Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account.
- (c) DEPOSITS. The Secretary shall deposit:
- (1) in the Navajo Nation Water Projects Trust Fund Account established under subsection (b)(1), the amounts made available pursuant to paragraph (A)(i) of section 13(b)(3);
  - (2) in the Navajo Nation OM&R Trust Fund Account established under subsection (b)(2), the amounts made available pursuant to paragraph (A)(ii) of section 13(b)(3);
  - (3) in the Navajo Nation Agricultural Water Conservation Trust Fund Account established under subsection (b)(3), the amounts made available pursuant to paragraph (A)(iii) of section 13(b)(3);
  - (4) in the Navajo Nation Renewable Energy Trust Fund Account established under subsection (b)(4), the amounts made available pursuant to paragraph (A)(iv) of section 13(b)(3); and

- (5) in the Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account established under subsection (b)(5), the amounts made available pursuant to paragraph (A)(v) of section 13(b)(3).
- (d) MANAGEMENT AND INTEREST.
- (1) MANAGEMENT. On receipt and deposit of the funds into the accounts in the Navajo Nation Water Settlement Trust Fund Accounts pursuant to subsection (c), the Secretary shall manage, invest, and distribute all amounts in the Trust Fund in a manner that is consistent with the investment authority of the Secretary under:
    - (A) the first section of the Act of June 24, 1938 (25 U.S.C. 162a);
    - (B) the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*); and
    - (C) this subsection.
  - (2) INVESTMENT EARNINGS. In addition to the deposits made to the Navajo Nation Water Settlement Trust Fund Accounts under paragraph (c), any investment earnings, including interest, credited to amounts held in the Navajo Nation Water Settlement Trust Fund Accounts are authorized to be appropriated to be used in accordance with paragraph (g).

- (e) WITHDRAWALS.
  - (1) AMERICAN INDIAN TRUST FUND MANAGEMENT REFORM ACT OF 1994.
    - (A) IN GENERAL. The Navajo Nation may withdraw any portion of the amounts in the Navajo Nation Water Settlement Trust Fund Accounts on approval by the Secretary of a Tribal management plan submitted by the Navajo Nation in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*).
    - (B) REQUIREMENTS. In addition to the requirements under the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*), the Tribal management plan under this paragraph shall require that the Navajo Nation spend all amounts withdrawn from the Navajo Nation Water Settlement Trust Fund Accounts, and any investment earnings accrued through the investments under the Tribal management plan, in accordance with this Act.
    - (C) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary:
      - (i) to enforce the Tribal management plan; and
      - (ii) to ensure that amounts withdrawn from the Navajo Nation Water Settlement Trust Fund

Accounts by the Navajo Nation under this paragraph are used in accordance with this Act.

(2) EXPENDITURE PLAN.

- (A) IN GENERAL. The Navajo Nation may submit to the Secretary a request to withdraw funds from the Navajo Nation Water Settlement Trust Fund Accounts pursuant to an approved expenditure plan.
- (B) REQUIREMENTS. To be eligible to withdraw funds under an expenditure plan under this paragraph, the Navajo Nation shall submit to the Secretary for approval an expenditure plan for any portion of the Navajo Nation Water Settlement Trust Fund Accounts that the Navajo Nation elects to withdraw pursuant to this subparagraph, subject to the condition that the funds shall be used for the purposes described in this Act.
- (C) INCLUSIONS. An expenditure plan under this paragraph shall include a description of the manner and purpose for which the amounts proposed to be withdrawn from the Navajo Nation Water Settlement Trust Fund Accounts will be used by the Navajo Nation in accordance with subsection (g).
- (D) APPROVAL. On receipt of an expenditure plan under this paragraph, the Secretary shall approve the

expenditure plan if the Secretary determines that the expenditure plan:

- (i) is reasonable; and
- (ii) is consistent with, and will be used for, the purposes of this Act.

(E) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary to enforce an expenditure plan under this paragraph to ensure that amounts disbursed under this paragraph are used in accordance with this Act.

(f) USES. Amounts from the Navajo Nation Water Settlement Trust Fund Accounts shall be used by the Navajo Nation for the following purposes:

(1) THE NAVAJO NATION WATER PROJECTS TRUST FUND ACCOUNT. Amounts in the Navajo Nation Water Projects Trust Fund Account established under subsection (b)(1) may only be used for the purpose of Environmental compliance, planning, engineering activities, and construction of projects designed to deliver potable water to communities such as Leupp, Dilkon, Ganado, Black Mesa, Sweetwater, Chinle, Lupton/Nahata Dziil Area, Kayenta, and Oljato.

(2) THE NAVAJO NATION OM&R TRUST FUND ACCOUNT. Amounts in the Navajo Nation OM&R Trust

Fund Account established under subsection (b)(2) may only be used to pay OM&R costs of the Navajo Water projects described in subsection (f)(1) and the iiná bá - paa tuwaqat'si pipeline project.

(3) THE NAVAJO NATION AGRICULTURAL WATER CONSERVATION TRUST FUND ACCOUNT. Amounts in the Navajo Nation Agricultural Water Conservation Trust Fund Account established under subsection (b)(3) may only be used to pay the cost of the following:

(A) improvements to reduce water shortages on the Navajo Nation's historically irrigated land including sprinklers, drip or other efficient irrigation systems, land leveling, wells, pipelines, pumps and storage, stream bank stabilization and restoration, pasture seeding and management, fencing, wind breaks or alluvial wells.

(B) up to half of this fund may be used for replacement and development of livestock wells and impoundments on the Navajo Reservation and Navajo Trust Land.

(4) THE NAVAJO NATION RENEWABLE ENERGY TRUST FUND ACCOUNT. Amounts in the Navajo Nation Renewable Energy Trust Fund Account established under subsection (b)(4) may only be used to pay the cost of planning, designing, and constructing renewable energy

facilities to support the cost of operating the Navajo Nation Water projects and the iiná bá - paa tuwaqat'si pipeline.

- (5) THE NAVAJO NATION LOWER BASIN COLORADO RIVER WATER ACQUISITION TRUST FUND ACCOUNT. Amounts in the Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account established under subsection (b)(5) may only be used to purchase land within the State and associated Lower Basin Colorado River Water Rights.
- (g) LIABILITY. The Secretary and the Secretary of the Treasury shall not be liable for the expenditure or investment of any amounts withdrawn from the Navajo Nation Water Settlement Trust Fund Accounts by the Navajo Nation pursuant to paragraph (f).
- (h) TITLE TO INFRASTRUCTURE. Title to, control over, and operation of any project constructed using funds from the Navajo Nation Water Settlement Trust Fund Accounts shall remain in the Navajo Nation.
- (i) PROJECT EFFICIENCIES. If the total cost of the activities described in subsection (g) results in cost savings and is less than the amounts authorized to be obligated under any of subparagraphs (1) through (5) of this subsection required to carry out those activities, the Secretary, at the request of the Navajo Nation, shall deposit those savings in a different Account within the Navajo Nation Water Settlement Trust Fund, to be used in accordance with that subparagraph.

- (j) CONTRIBUTIONS TO THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE. In its sole discretion the Navajo Nation may utilize funds in any of the Navajo Nation Water Settlement Trust Fund Accounts to supplement funds in the iiná bá - paa tuwaqat'si pipeline Implementation Fund.
- (k) ANNUAL REPORT. The Navajo Nation shall submit to the Secretary an annual expenditure report describing accomplishments and amounts spent from use of withdrawals under a Tribal management plan or an expenditure plan described in this section.
- (l) NO PER CAPITA PAYMENTS. No principal or interest amount in any account established by this section shall be distributed to any member of the Navajo Nation on a per capita basis.
- (m) EFFECT. Nothing in this Act entitles the Navajo Nation to judicial review of a determination of the Secretary regarding whether to approve a Tribal management plan under paragraph (1) or an expenditure plan under paragraph (2), except as provided under subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the "Administrative Procedure Act").

**SEC. 11. THE HOPI TRIBE SETTLEMENT TRUST FUND.**

- (a) ESTABLISHMENT. The Secretary shall establish a trust fund for the Hopi Tribe, to be known as the "Hopi Tribe Water Settlement Trust Fund", to be managed, invested, and distributed

by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Hopi Tribe Water Settlement Trust Fund under subsection (c), together with any investment earnings, including interest, earned on those amounts, for the purpose of carrying out this Act.

(b) ACCOUNTS. The Secretary shall establish in the Hopi Tribe Water Settlement Trust Fund the following accounts:

- (1) The Hopi Tribe Groundwater Projects Trust Fund Account;
- (2) The Hopi Tribe OM&R Trust Fund Account;
- (3) The Hopi Tribe Agricultural Water Conservation Trust Fund Account; and
- (4) The Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account.

(c) DEPOSITS. The Secretary shall deposit:

- (1) in the Hopi Tribe Groundwater Projects Trust Fund Account established under subsection (b)(1), the amounts made available pursuant to paragraph (B)(i) of section 13(b)(3);
- (2) in the Hopi Tribe OM&R Trust Fund Account established under subsection (b)(2), the amounts made available pursuant to paragraph (B)(ii) of section 13(b)(3);
- (3) in the Hopi Tribe Agricultural Water Conservation Trust Fund Account established under subsection (b)(3), the amounts made available pursuant to paragraph (B)(iii) of section 13(b)(3); and

- (4) in the Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account established under subsection (b)(4), the amounts made available pursuant to paragraph (B)(iv) of section 13(b)(3).
- (d) MANAGEMENT AND INTEREST.
- (1) MANAGEMENT. On receipt and deposit of the funds into the accounts in the Hopi Tribe Water Settlement Trust Fund Accounts pursuant to subsection (c), the Secretary shall manage, invest, and distribute all amounts in the Trust Fund in a manner that is consistent with the investment authority of the Secretary under:
    - (A) the first section of the Act of June 24, 1938 (25 U.S.C. 162a);
    - (B) the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*); and
    - (C) this subsection.
  - (2) INVESTMENT EARNINGS. In addition to the deposits made to the Hopi Tribe Water Settlement Trust Fund Accounts under paragraph (c), any investment earnings, including interest, credited to amounts held in the Hopi Tribe Water Settlement Trust Fund Accounts are authorized to be appropriated to be used in accordance with paragraph (f).

- (e) WITHDRAWALS.
  - (1) AMERICAN INDIAN TRUST FUND MANAGEMENT REFORM ACT OF 1994.
    - (A) IN GENERAL. The Hopi Tribe may withdraw any portion of the amount in the Hopi Tribe Water Settlement Trust Fund Accounts on approval by the Secretary of a Tribal management plan submitted by the Hopi Tribe in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*).
    - (B) REQUIREMENTS. In addition to the requirements under the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*), the Tribal management plan under this paragraph shall require that the Hopi Tribe spend all amounts withdrawn from the Hopi Tribe Water Settlement Trust Fund Accounts, and any investment earnings accrued through the investments under the Tribal management plan, in accordance with this Act.
    - (C) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary:
      - (i) to enforce the Tribal management plan; and
      - (ii) to ensure that amounts withdrawn from the Hopi Tribe Water Settlement Trust Fund Accounts by

the Hopi Tribe under this paragraph are used in accordance with this Act.

- (2) EXPENDITURE PLAN.
  - (A) IN GENERAL. The Hopi Tribe may submit to the Secretary a request to withdraw funds from the Hopi Tribe Water Settlement Trust Fund Accounts pursuant to an approved expenditure plan.
  - (B) REQUIREMENTS. To be eligible to withdraw funds under an expenditure plan under this paragraph, the Hopi Tribe shall submit to the Secretary for approval an expenditure plan for any portion of the Hopi Tribe Water Settlement Trust Fund Accounts that the Hopi Tribe elects to withdraw pursuant to this paragraph, subject to the condition that the funds shall be used for the purposes described in this Act.
  - (C) INCLUSIONS. An expenditure plan under this paragraph shall include a description of the manner and purpose for which the amounts proposed to be withdrawn from the Hopi Tribe Water Settlement Trust Fund Accounts will be used by the Hopi Tribe in accordance with subsection (f).
  - (D) APPROVAL. On receipt of an expenditure plan under this paragraph, the Secretary shall approve the expenditure plan if the Secretary determines that the expenditure plan:

- (i) is reasonable; and
  - (ii) is consistent with, and will be used for, the purposes of this Act.
- (E) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary to enforce an expenditure plan under this paragraph to ensure that amounts disbursed under this paragraph are used in accordance with this Act.
- (f) USES. Amounts from the Hopi Tribe Water Settlement Trust Fund Accounts shall be used by the Hopi Tribe for the following purposes:
  - (1) THE HOPI TRIBE GROUNDWATER PROJECTS TRUST FUND ACCOUNT. Amounts in the Hopi Tribe Water Projects Trust Fund Account established under subsection (b)(1) may only be used for the purpose of environmental compliance, planning, engineering and design activities, and construction to deliver water to Hopi communities.
  - (2) THE HOPI TRIBE OM&R TRUST FUND ACCOUNT. Amounts in the Hopi Tribe OM&R Trust Fund Account established under subsection (b)(2) may only be used to pay the OM&R costs of the Hopi Water projects described in subsection 11(f)(1) and the iiná bá - paa tuwaqat'si pipeline project.

- (3) THE HOPI TRIBE AGRICULTURAL WATER CONSERVATION TRUST FUND ACCOUNT. Amounts in the Hopi Tribe Agricultural Water Conservation Trust Fund Account established under subsection (b)(3) may only be used to pay the cost of improvements to reduce water shortages on the Hopi Tribe's historically irrigated land and grazing land including sprinklers, drip or other efficient irrigation systems, land leveling, wells, impoundments, pipelines, pumps and storage, stream bank stabilization and restoration, pasture seeding and management, fencing, and wind breaks or alluvial wells, and spring restoration, repair, replacement, and relocation of low technology structures to support Akchin farming, flood-water farming, and other traditional farming practices.
- (4) THE HOPI TRIBE LOWER BASIN COLORADO RIVER WATER ACQUISITION TRUST FUND ACCOUNT. Amounts in the Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account established under subsection (b)(4) may only be used to purchase land within the State and associated Lower Basin Colorado River Water Rights.
- (g) LIABILITY. The Secretary and the Secretary of the Treasury shall not be liable for the expenditure or investment of any amounts withdrawn from the Hopi Tribe Water Settlement Trust Fund Accounts by the Hopi Tribe pursuant to paragraph (f).

- (h) TITLE TO INFRASTRUCTURE. Title to, control over, and operation of any project constructed using funds from the Hopi Tribe Water Settlement Trust Fund Accounts shall remain in the Hopi Tribe.
- (i) PROJECT EFFICIENCIES. If the total cost of the activities described in subsection (f) results in cost savings and is less than the amounts authorized to be obligated under any of paragraphs (c)1 through 4 of this subsection required to carry out those activities, the Secretary, at the request of the Hopi Tribe, shall deposit those savings in a different Account within the Hopi Tribe Water Settlement Trust Fund, to be used in accordance with that subparagraph.
- (j) CONTRIBUTIONS TO THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE. In its sole discretion the Hopi Tribe may utilize funds in any of the Hopi Tribe Water Settlement Trust Fund Accounts to supplement funds in the iiná bá - paa tuwaqat'si pipeline Implementation Fund.
- (k) ANNUAL REPORT. The Hopi Tribe shall submit to the Secretary an annual expenditure report describing accomplishments and amounts spent from use of withdrawals under a Tribal management plan or an expenditure plan described in this section.
- (l) NO PER CAPITA PAYMENTS. No principal or interest amount in any account established by this section shall be distributed to any member of the Hopi Tribe on a per capita basis.

- (m) EFFECT. Nothing in this Act entitles the Hopi Tribe to judicial review of a determination of the Secretary regarding whether to approve a Tribal management plan under paragraph (e)(1) or an expenditure plan under paragraph (e)(2), except as provided under subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the “Administrative Procedure Act”).

**SEC. 12. THE SAN JUAN SOUTHERN PAIUTE TRIBE WATER SETTLEMENT TRUST FUND.**

- (a) ESTABLISHMENT. The Secretary shall establish a trust fund for the San Juan Southern Paiute Tribe, to be known as the “San Juan Southern Paiute Tribe Water Settlement Trust Fund”, to be managed, invested, and distributed by the Secretary and to remain available until expended, withdrawn, or reverted to the general fund of the Treasury, consisting of the amounts deposited in the Trust Fund Accounts under subsection (c), together with any investment earnings, including interest, earned on those amounts, for the purpose of carrying out this Act.
- (b) ACCOUNTS. The Secretary shall establish in the San Juan Southern Paiute Tribe Water Settlement Trust Fund the following accounts:
  - (1) The San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account;
  - (2) The San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account; and

(3) The San Juan Southern Paiute Tribe OM&R Trust Fund Account.

(c) DEPOSITS. The Secretary shall deposit:

(1) in the San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account established under subsection (b)(1), the amounts made available pursuant to paragraph (C)(i) of section 13(b)(3);

(2) in the San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account established under subsection (b)(2), the amounts made available pursuant to paragraph (C)(iii) of section 13(b)(3); and

(3) in the San Juan Southern Paiute Tribe OM&R Trust Fund Account established under subsection (b)(3), the amounts made available pursuant to paragraph (C)(ii) of section 13(b)(3).

(d) MANAGEMENT AND INTEREST.

(1) MANAGEMENT. On receipt and deposit of the funds into the accounts in the San Juan Southern Paiute Water Settlement Trust Fund pursuant to subsection (C), the Secretary shall manage, invest, and distribute all amounts in the San Juan Southern Paiute Trust Fund Accounts in a manner that is consistent with the investment authority of the Secretary under:

(A) the first section of the Act of June 24, 1938 (25 U.S.C. 162a);

- (B) the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*); and
  - (C) this subsection.
- (2) INVESTMENT EARNINGS. In addition to the deposits made to the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts under subsection 13(c)(3), any investment earnings, including interest, credited to amounts held in the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts are authorized to be appropriated to be used in accordance with paragraph (f).
- (e) WITHDRAWALS.
- (1) AMERICAN INDIAN TRUST FUND MANAGEMENT REFORM ACT OF 1994.
- (A) IN GENERAL. The San Juan Southern Paiute Tribe may withdraw any portion of the amounts in the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts on approval by the Secretary of a Tribal management plan submitted by the San Juan Southern Paiute Tribe in accordance with the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*).
  - (B) REQUIREMENTS. In addition to the requirements under the American Indian Trust Fund Management Reform Act of 1994 (25 U.S.C. 4001 *et seq.*), the Tribal management plan under this paragraph shall require that the San Juan Southern Paiute Tribe spend

all amounts withdrawn from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts, and any investment earnings accrued through the investments under the Tribal management plan, in accordance with this Act.

(C) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary:

(i) to enforce the Tribal management plan; and

(ii) to ensure that amounts withdrawn from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts by the San Juan Southern Paiute Tribe under this paragraph are used in accordance with this Act.

(2) EXPENDITURE PLAN.

(A) IN GENERAL. The San Juan Southern Paiute Tribe may submit to the Secretary a request to withdraw funds from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts pursuant to an approved expenditure plan.

(B) REQUIREMENTS. To be eligible to withdraw funds under an expenditure plan under this paragraph, the San Juan Southern Paiute Tribe shall submit to the Secretary for approval an expenditure plan for any portion of the San Juan Southern Paiute Tribe Water

Settlement Trust Fund Accounts that the San Juan Southern Paiute Tribe elects to withdraw pursuant to this paragraph, subject to the condition that the funds shall be used for the purposes described in this Act.

- (C) INCLUSIONS. An expenditure plan under this paragraph shall include a description of the manner and purpose for which the amounts proposed to be withdrawn from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts will be used by the San Juan Southern Paiute Tribe in accordance with subsection (f).
- (D) APPROVAL. On receipt of an expenditure plan under this paragraph, the Secretary shall approve the expenditure plan if the Secretary determines that the expenditure plan:
  - (i) is reasonable; and
  - (ii) is consistent with, and will be used for, the purposes of this Act.
- (E) ENFORCEMENT. The Secretary may carry out such judicial and administrative actions as the Secretary determines to be necessary to enforce an expenditure plan under this paragraph to ensure that amounts disbursed under this paragraph are used in accordance with this Act.

- (f) USES. Amounts from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts shall be used by the San Juan Southern Paiute Tribe for the following purposes:
- (1) THE SAN JUAN SOUTHERN PAIUTE TRIBE GROUNDWATER PROJECT TRUST FUND ACCOUNT. Amounts in the San Juan Southern Paiute Tribe Groundwater Project Trust Fund Account established under subsection (b)(1) may only be used to pay the cost of designing and constructing Water projects, including Water treatment facilities, pipelines, storage tanks, pumping stations, pressure reducing valves, electrical transmission facilities, and the other appurtenant items, including real property and easements necessary to deliver groundwater to the areas served.
  - (2) THE SAN JUAN SOUTHERN PAIUTE TRIBE AGRICULTURAL CONSERVATION TRUST FUND ACCOUNT. Amounts in the San Juan Southern Paiute Tribe Agricultural Conservation Trust Fund Account established under subsection (b)(2) may only be used to pay the cost of the following:
    - (A) improvements to reduce water shortages on the San Juan Southern Paiute Tribe's historically irrigated land including sprinklers, drip or other efficient irrigation systems, land leveling, wells, pipelines, pumps and storage, stream bank stabilization and

restoration, pasture seeding and management, fencing, wind breaks or alluvial wells.

(B) up to half of this fund may be used for replacement and development of livestock wells and impoundments on San Juan Southern Paiute Land.

(3) THE SAN JUAN SOUTHERN PAIUTE TRIBE OM&R TRUST FUND ACCOUNT. Amounts in the San Juan Southern Paiute Tribe OM&R Trust Fund Account established under subsection (b)(3) may only be used to pay the OM&R costs of the San Juan Southern Paiute Tribe Water projects described in subsection (f)(1) and for the imputed costs for delivery of Water from the iiná bá - paa tuwaqat'si pipeline.

(g) LIABILITY. The Secretary and the Secretary of the Treasury shall not be liable for the expenditure or investment of any amounts withdrawn from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts by the San Juan Southern Paiute Tribe pursuant to subsection (f).

(h) TITLE TO INFRASTRUCTURE. Title to, control over, and operation of any project constructed using funds from the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts shall remain in the San Juan Southern Paiute Tribe.

(i) PROJECT EFFICIENCIES. If the total cost of the activities described in subsection (f) results in cost savings and is less than the amounts authorized to be obligated under any of paragraphs 1

through 3 of this subsection required to carry out those activities, the Secretary, at the request of the San Juan Southern Paiute Tribe, shall deposit those savings in a different Account within the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts to be used in other Accounts in accordance with that subparagraph.

- (j) CONTRIBUTIONS TO THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE. In its sole discretion the San Juan Southern Paiute Tribe may utilize funds in any of the San Juan Southern Paiute Tribe Water Settlement Trust Fund Accounts to supplement funds in the iiná bá - paa tuwaqat'si pipeline Implementation Fund.
- (k) ANNUAL REPORT. The San Juan Southern Paiute Tribe shall submit to the Secretary an annual expenditure report describing accomplishments and amounts spent from use of withdrawals under a Tribal management plan or an expenditure plan described in this section.
- (l) NO PER CAPITA PAYMENTS. No principal or interest amount in any account established by this section shall be distributed to any member of the San Juan Southern Paiute Tribe on a per capita basis.
- (m) EFFECT. Nothing in this Act entitles the San Juan Southern Paiute Tribe to judicial review of a determination of the Secretary regarding whether to approve a Tribal management plan under paragraph (1) or an expenditure plan under paragraph (2), except as provided under subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the "Administrative Procedure Act").

**SEC. 13. FUNDING**

(a) THE IINÁ BÁ - PAA TUWAQAT'SI PIPELINE IMPLEMENTATION ACCOUNT.

(1) MANDATORY APPROPRIATION. Out of any funds in the Treasury not otherwise appropriated, the Secretary of the Treasury shall transfer to the Secretary \$1.715 billion for deposit in the iiná bá - paa tuwaqat'si pipeline Implementation Account, to carry out the planning, engineering, design, environmental compliance, and construction of the iiná bá - paa tuwaqat'si pipeline, such funds to remain available until expended, withdrawn, or reverted to the general fund of the Treasury.

(2) AVAILABILITY.

(A) IN GENERAL. Except as provided in subsection (2)(B), amounts appropriated to and deposited in the iiná bá - paa tuwaqat'si pipeline Implementation Account shall not be available for expenditure until such time as the Secretarial findings required by subsection (a) of section 16 are made and published.

(B) EXCEPTION. Of the amount made available under paragraph (1), \$25 million shall be made available before the Enforceability Date for Reclamation to carry out environmental compliance and preliminary design of the iiná bá - paa tuwaqat'si pipeline. Withdrawal of the \$25 million is conditioned on:

- (i) the revision of the settlement agreement and exhibits to conform to the Act; and
  - (ii) execution by all of the settlement parties, including the United States to the conformed settlement agreement and exhibits, including the waivers and releases of claims.
- (3) ADDITIONAL AUTHORIZATION. In addition to the mandatory appropriation made available under paragraph (1), there is authorized to be appropriated to the iiná bá - paa tuwaqat'si pipeline Implementation Account such funds as are necessary to complete the construction of the iiná bá - paa tuwaqat'si pipeline.
- (b) THE NAVAJO NATION WATER SETTLEMENT TRUST FUND, THE HOPI TRIBE WATER SETTLEMENT TRUST FUND AND THE SAN JUAN SOUTHERN PAIUTE SETTLEMENT TRUST FUND.
  - (1) MANDATORY APPROPRIATION. Out of any funds in the Treasury not otherwise appropriated, the Secretary of the Treasury shall transfer to the Secretary \$3.285 billion, for the trust funds established for each of the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe, such funds to remain available until expended, withdrawn, or reverted to the general fund of the Treasury;
  - (2) AVAILABILITY. Amounts appropriated to and deposited in the Navajo Nation Water Settlement Trust Fund, the Hopi Tribe Water Settlement Trust Fund, and the San Juan Southern Paiute Water Settlement Trust Fund shall not be

available for expenditure until such time as the Secretarial findings required by subsection (a) of section 16 are made and published.

(3) ALLOCATION. The Secretary shall distribute the \$3.285 billion funds as follows:

(A) THE NAVAJO NATION WATER SETTLEMENT TRUST FUND. \$2.7467 billion, to remain available until expended, withdrawn, or reverted to the general fund of the Treasury and to be allocated to the Trust Fund Accounts as follows:

- (i) The Navajo Nation Water Projects Trust Fund Account, \$2.3692 billion;
- (ii) The Navajo Nation OM&R Trust Fund Account, \$229.5 million;
- (iii) The Navajo Nation Agricultural Conservation Trust Fund Account, \$80 million;
- (iv) The Navajo Nation Renewable Energy Trust Fund Account, \$40 million; and
- (v) The Navajo Nation Lower Basin Colorado River Water Acquisition Trust Fund Account, \$28 million.

(B) THE HOPI TRIBE WATER SETTLEMENT TRUST FUND. \$508.5 million to remain available until expended, withdrawn, or reverted to the general fund

of the Treasury and to be allocated to the Trust Fund Accounts as follows:

- (i) The Hopi Tribe Groundwater Projects Trust Fund Account, \$390 million;
- (ii) The Hopi Tribe OM&R Trust Fund Account, \$87 million;
- (iii) The Hopi Tribe Agricultural Conservation Trust Fund Account, \$30 million; and
- (iv) The Hopi Tribe Lower Basin Colorado River Water Acquisition Trust Fund Account, \$1.5 million.

(C) THE SAN JUAN SOUTHERN PAIUTE WATER SETTLEMENT TRUST FUND. \$29.8 million to remain available until expended, withdrawn, or reverted to the general fund of the Treasury and to be allocated to the Trust Fund Accounts as follows:

- (i) The San Juan Southern Paiute Groundwater Project Trust Fund Account, \$28 million;
- (ii) The San Juan Southern Paiute OM&R Trust Fund Account, \$1.5 million; and
- (iii) The San Juan Southern Paiute Agricultural Conservation Trust Fund Account, \$0.3 million.

- (c) INVESTMENTS. The Secretary shall invest amounts in the Accounts in accordance with:
- (1) the Act of April 1, 1880 (25 U.S.C. § 161);
  - (2) the first section of the Act of June 24, 1938 (25 U.S.C. § 162a); and
  - (3) obligations of Federal corporations and Federal Government-sponsored entities, the charter documents of which provide that the obligations of the entities are lawful investments for federally managed funds.
- (d) CREDITS TO ACCOUNTS.
- (1) The interest on, and the proceeds from, the sale or redemption of, any obligations held in the Navajo Nation Water Settlement Trust Fund Accounts, the Hopi Tribe Water Settlement Trust Fund Accounts, and the San Juan Southern Paiute Water Settlement Trust Fund Accounts shall be credited to and form a part of the respective accounts.
  - (2) Amounts appropriated to and deposited in the Navajo Nation Water Settlement Trust Fund, the Hopi Tribe Water Settlement Trust Fund, and the San Juan Southern Paiute Tribe Water Settlement Trust Fund, may be used as described in sections 10, 11, and 12 of this Act and paragraph 12 of the settlement agreement.

(e) FLUCTUATION IN COSTS.

(1) IMPLEMENTATION FUND. The amounts authorized to be appropriated under subsection (a) shall be:

(A) increased or decreased, as appropriate, by such amounts as may be justified by reason of ordinary fluctuations in costs occurring after January 1, 2024, as indicated by the Bureau of Reclamation Construction Cost Trends Index applicable to the types of construction involved; and

(B) adjusted to address construction cost changes necessary to account for unforeseen market volatility that may not otherwise be captured by engineering cost indices as determined by the Secretary, including repricing applicable to the types of construction and current industry standards involved.

(2) TRUST FUNDS. The amounts authorized to be appropriated under subsection (b) shall be:

(A) increased or decreased, as appropriate, by such amounts as may be justified by reason of ordinary fluctuations in costs occurring after January 1, 2024, as indicated by the Bureau of Reclamation Construction Cost Index—Composite Trend; and

(B) adjusted to address construction cost changes necessary to account for unforeseen market volatility that may not otherwise be captured by engineering cost indices as determined by the Secretary, including

repricing applicable to the types of construction and current industry standards involved.

(3) REPETITION. The adjustment process under paragraphs (1) and (2) shall be repeated for each subsequent amount appropriated until the amount authorized to be appropriated under subsections (a) and (b), as adjusted, has been appropriated.

(4) PERIOD OF INDEXING.

(A) IMPLEMENTATION FUND. With respect to the Implementation Fund, the period of adjustment under paragraph (1) for any increment of funding shall be annually until the iiná bá - paa tuwaqat'si pipeline project is completed.

(B) TRUST FUNDS. With respect to the Trust Funds, the period of indexing adjustment under paragraph (2) for any increment of funding shall end on the date on which the funds are deposited into the Trust Funds.

#### **SEC. 14. WAIVERS, RELEASES, AND RETENTION OF CLAIMS**

(a) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE NAVAJO NATION, ON BEHALF OF THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES), AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES).

- (1) Except as provided in Subsection 14(a)(3), the Navajo Nation, on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), as part of the performance of the respective obligations of the Navajo Nation and the United States under the settlement agreement and this Act, are authorized to execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Hopi Allottees, the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under Federal, State, or other law for all:
  - (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Land, arising from time immemorial and, thereafter, forever;
  - (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo

- Nation, or predecessors of the Members of the Navajo Nation;
- (C) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Land, arising from time immemorial through the Enforceability Date;
  - (D) Past, present, and future claims for Injury to Water for Navajo Land, arising from time immemorial and, thereafter, forever;
  - (E) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;
  - (F) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for Navajo Land, resulting from the Diversion or Use of Water outside of Navajo Land in a manner not in violation of the settlement agreement or State law; and
  - (G) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution,

or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.

- (2) The waiver and release of claims described in subsection (a)(1) shall be in the form set forth in Exhibit 13.1 to the settlement agreement and shall take effect on the Enforceability Date.
- (3) Notwithstanding the waiver and release of claims described in subsection (a)(1) and Exhibit 13.1 to the settlement agreement, the Navajo Nation, acting on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), shall retain any right:
  - (A) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;
  - (B) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the LCR Decree and the Gila River Adjudication Decree;

- (C) To assert claims for Water Rights, for land owned or acquired by the Navajo Nation in fee, or held in trust by the United States for the benefit of the Navajo Nation, in the LCR Watershed pursuant to subparagraphs 4.11 and 4.12, of the settlement agreement, or in the Gila River Basin pursuant to subparagraphs 4.14 and 4.15 of the settlement agreement;
  - (D) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or
    - (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and
  - (E) To assert past, present, or future claims for Injury to Water Rights: (i) against any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (b) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE UNITED STATES, ACTING AS TRUSTEE FOR THE NAVAJO ALLOTTEES.
- (1) Except as provided in subsection (b)(3), the United States, acting as trustee for the Navajo Allottees, as part of the

performance of the obligations of the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Navajo Nation, the Hopi Tribe, the Hopi Allottees, and the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under Federal, State, or other law, for all:

- (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Allotments, arising from time immemorial and, thereafter, forever;
- (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Allottees or predecessors of the Navajo Allottees;
- (C) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Allotments, arising from time immemorial through the Enforceability Date;
- (D) Past, present, and future claims for Injury to Water for Navajo Allotments, arising from time immemorial and, thereafter, forever;

- (E) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by Navajo Allottees or predecessors of the Navajo Allottees;
  - (F) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for the Navajo Allotments, resulting from the Diversion or Use of Water outside of Navajo Allotments in a manner not in violation of the settlement agreement or State law; and
  - (G) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.
- (2) The waiver and release of claims under subsection (b)(1) shall be in the form set forth in Exhibit 13.2 to the settlement agreement and shall take effect on the Enforceability Date.
  - (3) Notwithstanding the waiver and release of claims described in subsection (b)(1), the United States acting as trustee for the Navajo Allottees, shall retain any right:
    - (A) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Allottees under the

settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;

- (B) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Allottees under the LCR Decree;
  - (C) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or
    - (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and
  - (D) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (c) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE NAVAJO NATION, ON BEHALF OF THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS NAVAJO ALLOTTEES), AGAINST THE UNITED STATES.

- (1) Except as provided in subsection (c)(3), the Navajo Nation, acting on behalf of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), as part of the performance of the obligations of the Navajo Nation under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the United States, including agencies, officials, and employees of the United States, under Federal, State, or other law for all:
  - (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Navajo Land, arising from time immemorial and, thereafter, forever;
  - (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;
  - (C) Claims for Water Rights within the State that the United States, acting as trustee for the Navajo Nation and Navajo Allottees, asserted or could have asserted in any proceeding, except to the extent that such

rights are recognized as part of the Navajo Nation's Water Rights under the Act.;

- (D) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Navajo Land, arising from time immemorial through the Enforceability Date;
- (E) Past, present, and future claims for Injury to Water for Navajo Land, arising from time immemorial and, thereafter, forever;
- (F) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Navajo Nation, the predecessors of the Navajo Nation, the Members of the Navajo Nation, or predecessors of the Members of the Navajo Nation;
- (G) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for Navajo Land, resulting from the Diversion or Use of Water outside of Navajo Land in a manner not in violation of the settlement agreement or State law;
- (H) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution,

or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act;

- (I) Past, present, and future claims arising out of, or relating in any manner to, United States Geological Survey monitoring and reporting activities described in paragraph 7.0 of the settlement agreement;
- (J) Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of paragraphs 8.0 and 9.0 of the settlement agreement;
- (K) Past and Present claims for foregone benefits from non-Navajo Use of Water, on and off Navajo Land (including Water from all sources and for all Uses), within the State arising before the Enforceability Date;
- (L) Past and Present claims for damage, loss, or injury to land or natural resources due to loss of water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of water or Water Rights, claims relating to interference with, Diversion of, or taking of Water, or claims relating to a failure to protect, acquire, replace, or develop water, Water Rights, or water

infrastructure, within the State, arising before the Enforceability Date;

- (M) Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on Navajo Land;
  - (N) Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial water delivery system on Navajo Land;
  - (O) Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation projects on Navajo Land, including damages, losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date; and
  - (P) Past and Present claims arising before the Enforceability Date from a failure to provide a dam safety improvement to a dam on Navajo Land within the State.
- (2) The waiver and release of claims described in subsection (c)(1) shall be in the form set forth in Exhibit 13.3 to the settlement agreement and shall take effect on the Enforceability Date.

- (3) Notwithstanding the waiver and release of claims described in subsection (c)(1) and Exhibit 13.3 to the settlement agreement, the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Allottees) shall retain any right:
  - (A) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;
  - (B) To assert claims for injuries to, and seek enforcement of, the rights of the Navajo Nation under the LCR Decree and the Gila River Adjudication Decree;
  - (C) To assert claims for Water Rights for land owned or acquired by the Navajo Nation in fee in the LCR Watershed pursuant to subparagraphs 4.11 and 4.12 of the settlement agreement, or in the Verde River Subwatershed pursuant to subparagraphs 4.14 and 4.15 of the settlement agreement;
  - (D) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe or
    - (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and

- (E) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (d) WAIVERS, RELEASES AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE, AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION.
  - (1) Except as provided in subsection (d)(3), the United States, in all capacities (except as trustee for an Indian Tribe other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the obligations of the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the Navajo Nation, the Members of the Navajo Nation, or any agency, official, or employee of the Navajo Nation, under Federal, State, or any other law for all:
    - (A) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on Navajo Land, arising from time immemorial through the Enforceability Date;

- (B) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on Navajo Land in a manner that is not in violation of this Agreement or State law; and
  - (C) Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.
- (2) The waiver and release of claims under subsection (d)(1) shall be in the form set forth in Exhibit 13.4 to the settlement agreement and shall take effect on the Enforceability Date.
  - (3) Notwithstanding the waiver and release of claims described in subsection (d)(1) and Exhibit 13.4 to the settlement agreement, the United States shall retain any right to assert any claim not expressly waived in accordance with that subsection and that Exhibit, in any Federal or State court of competent jurisdiction.
- (e) **WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE HOPI TRIBE, ON BEHALF OF THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES), AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES).**

- (1) Except as provided in subsection (e)(3), the Hopi Tribe, on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), as part of the performance of the respective obligations of the Hopi Tribe and the United States under the settlement agreement and this Act, are authorized to execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Navajo Nation, the Navajo Allottees, the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under Federal, State, or other law for all:
  - (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Land, arising from time immemorial and, thereafter, forever;
  - (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;

- (C) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Land, arising from time immemorial through the Enforceability Date;
- (D) Past, present, and future claims for Injury to Water for Hopi Land, arising from time immemorial and, thereafter, forever;
- (E) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;
- (F) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for Hopi Land, resulting from the Diversion or Use of Water outside of Hopi Land in a manner not in violation of the settlement agreement or State law; and
- (G) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.

- (2) The waiver and release of claims described in subsection (e)(1) shall be in the form set forth in Exhibit 13.6 to the settlement agreement and shall take effect on the Enforceability Date.
- (3) Notwithstanding the waiver and release of claims described in subsection (e)(1) and Exhibit 13.6 to the settlement agreement, the Hopi Tribe, acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), shall retain any right:
  - (A) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;
  - (B) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the LCR Decree;
  - (C) To assert claims for Water Rights for land owned or acquired by the Hopi Tribe in fee, or held in trust by the United States for the benefit of the Hopi Tribe, in the LCR Watershed pursuant to subparagraphs 5.10 and 5.11 of the settlement agreement;

- (D) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe;
    - or (ii) the United States acting on behalf of any Indian Tribe, other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and
  - (E) To assert past, present, or future claims for Injury to Water Rights: against (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (f) **WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE UNITED STATES, ACTING AS TRUSTEE FOR THE HOPI ALLOTTEES.**
- (1) Except as provided in subsection (f)(3), the United States, acting as trustee for the Hopi Allottees, as part of the performance of the obligations of the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Navajo Nation, the Navajo Allottees, and the San Juan Southern Paiute Tribe, and any other individual, entity, corporation, or municipal corporation under Federal, State, or other law, for all:

- (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Allotments, arising from time immemorial, and, thereafter, forever;
- (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Allottees or predecessors of the Hopi Allottees;
- (C) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Allotments, arising from time immemorial through the Enforceability Date;
- (D) Past, present, and future claims for Injury to Water for Hopi Allotments, arising from time immemorial and, thereafter, forever;
- (E) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by Hopi Allottees or predecessors of the Hopi Allottees;
- (F) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the

Enforceability Date, for the Hopi Allotments, resulting from the Diversion or Use of Water outside of the Hopi Allotments in a manner not in violation of the settlement agreement or State law; and

(G) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.

(2) The waiver and release of claims under subsection (f)(1) shall be in the form set forth in Exhibit 13.7 of the settlement agreement and shall take effect on the Enforceability Date.

(3) Notwithstanding the waiver and release of claims described in subsection (f)(1) and Exhibit 13.7 of the settlement agreement, the United States acting as trustee for the Hopi Allottees, shall retain any right:

(A) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Allottees under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;

(B) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Allottees under the LCR Decree;

- (C) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and
  - (D) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Hopi Tribe, the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (g) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE HOPI TRIBE, ON BEHALF OF THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE (BUT NOT MEMBERS IN THE CAPACITY OF THE MEMBERS AS HOPI ALLOTTEES), AGAINST THE UNITED STATES.
- (1) Except as provided in subsection (g)(3), the Hopi Tribe, acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), as part of the performance of the obligations of the Hopi Tribe under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the United States, including

agencies, officials, and employees of the United States, under Federal, State, or other law for all:

- (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for Hopi Land, arising from time immemorial and, thereafter, forever;
- (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;
- (C) Claims for Water Rights within the State that the United States, acting a trustee for the Hopi Tribe and Hopi Allottees, asserted or could have asserted in any proceeding, except to the extent that such rights are recognized as part of the Hopi Tribe's Water Rights under this Act;
- (D) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for Hopi Land, arising from time immemorial through the Enforceability Date;

- (E) Past, present, and future claims for Injury to Water for Hopi Land, arising from time immemorial and, thereafter, forever;
- (F) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the Hopi Tribe, the predecessors of the Hopi Tribe, the Members of the Hopi Tribe, or predecessors of the Members of the Hopi Tribe;
- (G) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for Hopi Land, resulting from the Diversion or Use of Water outside of Hopi Land in a manner not in violation of the settlement agreement or State law;
- (H) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act;
- (I) Past, present, and future claims arising out of, or relating in any manner to, United States Geological Survey monitoring and reporting activities described in paragraph 7.0 of the settlement agreement.

- (J) Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of paragraphs 8.0 and 9.0 of the settlement agreement;
- (K) Past and Present claims for foregone benefits from non-Hopi Use of Water, on and off Hopi Land (including Water from all sources and for all Uses), within the State arising before the Enforceability Date;
- (L) Past and Present claims for damage, loss, or injury to land, or natural resources due to loss of water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of water or Water Rights, claims relating to interference with, Diversion of, or taking of water, or claims relating to a failure to protect, acquire, replace, or develop water, Water Rights, or water infrastructure, within the State, arising before the Enforceability Date;
- (M) Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on Hopi Land;

- (N) Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial water delivery system on Hopi Land; and
  - (O) Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation project on Hopi Land, including damages, losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date.
- (2) The waiver and release of claims described in subsection (g)(1) shall be in the form set forth in Exhibit 13.8 to the settlement agreement and shall take effect on the Enforceability Date.
- (3) Notwithstanding the waiver and release of claims described in subsection (g)(1) and Exhibit 13.8 to the settlement agreement, the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees) shall retain any right:
- (A) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;

- (B) To assert claims for injuries to, and seek enforcement of, the rights of the Hopi Tribe under the LCR Decree;
  - (C) To assert claims for Water Rights for land owned or acquired by the Hopi Tribe in fee in the LCR Watershed pursuant to subparagraphs 5.10 and 5.11 of the settlement agreement;
  - (D) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe;
    - or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; and
  - (E) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe other than the Navajo Nation, the San Juan Southern Paiute Tribe, and the Zuni Tribe.
- (h) WAIVERS, RELEASES AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE, AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE.
- (1) Except as provided in subsection (h)(3), the United States, in all capacities (except as trustee for an Indian Tribe other

than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the obligations of the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the Hopi Tribe, the Members of the Hopi Tribe, or any agency, official, or employee of the Hopi Tribe, under Federal, State, or any other law for all:

- (A) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on Hopi Land arising from time immemorial through the Enforceability Date;
- (B) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on Hopi Land in a manner that is not in violation of the settlement agreement or State law; and
- (C) Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.

- (2) The waiver and release of claims under subsection (h)(1) shall be in the form set forth in Exhibit 13.9 to the settlement agreement and shall take effect on the Enforceability Date.
  - (3) Notwithstanding the waiver and release of claims described in subsection(h)(1) and Exhibit 13.9 to the settlement agreement, the United States shall retain any right to assert any claim not expressly waived in accordance with that subsection and that Exhibit, in any Federal or State court of competent jurisdiction.
- (i) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE SAN JUAN SOUTHERN PAIUTE TRIBE, ON BEHALF OF THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE.
- (1) Except as provided in subsection (i)(3), the San Juan Southern Paiute Tribe, on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, as part of the performance of the respective obligations of the San Juan Southern Paiute Tribe and the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the State (or any agency or political subdivision of the State), the Hopi Tribe, the Hopi Allottees,

the Navajo Nation, the Navajo Allottees, and any other individual, entity, corporation, or municipal corporation under Federal, State, or other law for all:

- (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;
- (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;
- (C) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial through the Enforceability Date;
- (D) Past, present, and future claims for Injury to Water for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;
- (E) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River

Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

- (F) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, for San Juan Southern Paiute Land, resulting from the Diversion or Use of Water outside of San Juan Southern Paiute Land in a manner not in violation of the settlement agreement or State law; and
  - (G) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.
- (2) The waiver and release of claims described in subsection (i)(1) shall be in the form set forth in Exhibit 13.11 to the settlement agreement and shall take effect on the Enforceability Date.
  - (3) Notwithstanding the waiver and release of claims described in subsection (i)(1) and Exhibit 13.11 to the settlement agreement, the San Juan Southern Paiute Tribe, acting on

behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, shall retain any right:

- (A) To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;
- (B) To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the LCR Decree;
- (C) To assert claims for Water Rights for land owned or acquired by the San Juan Southern Paiute Tribe in fee or held in trust by the United States for the benefit of the San Juan Southern Paiute Tribe in the LCR Watershed pursuant to subparagraphs 6.4 and 6.5 of the settlement agreement;
- (D) To object to any claims for Water Rights by or for:
  - (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or
  - (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; and

- (E) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe.
- (j) WAIVERS, RELEASES AND RETENTION OF CLAIMS FOR WATER RIGHTS, INJURY TO WATER RIGHTS, AND INJURY TO WATER BY THE SAN JUAN SOUTHERN PAIUTE TRIBE, ON BEHALF OF THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE, AGAINST THE UNITED STATES.
  - (1) Except as provided in subsection (j)(3), the San Juan Southern Paiute Tribe, acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, as part of the performance of the obligations of the San Juan Southern Paiute Tribe under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the United States, including agencies, officials, and employees of the United States, under Federal, State, or other law for all:
    - (A) Past, present, and future claims for Water Rights, including rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;
    - (B) Past, present, and future claims for Water Rights, including rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that

are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

- (C) Claims for Water Rights within the State that the United States, acting as trustee for the San Juan Southern Paiute Tribe, asserted or could have asserted in any proceeding, except to the extent that such rights are recognized as part of the San Juan Southern Paiute Tribe's Water Rights under this Act;
- (D) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, for San Juan Southern Paiute Land, arising from time immemorial through the Enforceability Date;
- (E) Past, present, and future claims for Injury to Water for San Juan Southern Paiute Land, arising from time immemorial and, thereafter, forever;
- (F) Past, present, and future claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising from time immemorial and, thereafter, forever, that are based on the aboriginal occupancy of land within the State by the San Juan Southern Paiute Tribe, the predecessors of the San Juan Southern Paiute Tribe, the Members of the San Juan Southern

Paiute Tribe, or predecessors of the Members of the San Juan Southern Paiute Tribe;

- (G) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date for San Juan Southern Paiute Land, resulting from the Diversion or Use of Water outside of San Juan Southern Paiute Land in a manner not in violation of this Agreement or State law;
- (H) Past, present, and future claims arising out of, or relating in any manner to, the negotiation, execution, or adoption of this Agreement, any judgment or decree approving or incorporating this Agreement, or this Act;
- (I) Past, present, and future claims arising out of, or relating in any manner to, United States Geological Survey monitoring and reporting activities described in paragraph 7.0 of the settlement agreement;
- (J) Past, present, and future claims arising from time immemorial and, thereafter, forever, relating in any manner to Injury to Water or Injury to Water Rights based on the provisions of paragraphs 8.0 and 9.0 of the settlement agreement;
- (K) Past and Present claims for foregone benefits from non-San Juan Southern Paiute Tribe Use of Water, on and off San Juan Southern Paiute Land (including

water from all sources and for all Uses), within the State arising before the Enforceability Date;

- (L) Past and Present claims for damage, loss, or injury to land, or natural resources due to loss of water or Water Rights, including damages, losses, or injuries to hunting, fishing, gathering, or cultural rights due to loss of water or Water Rights, claims relating to interference with, diversion of, or taking of water, or claims relating to a failure to protect, acquire, replace, or develop water, Water Rights, or water infrastructure, within the State, arising before the Enforceability Date;
- (M) Past and Present claims arising before the Enforceability Date from a failure to provide for operation, maintenance, or deferred maintenance for any irrigation system or irrigation project on San Juan Southern Paiute Land;
- (N) Past and Present claims arising before the Enforceability Date from a failure to establish or provide a municipal, rural, or industrial water delivery system on San Juan Southern Paiute Land; and
- (O) Past and Present claims for damage, loss, or injury to land or natural resources due to construction, operation, and management of irrigation project on San Juan Southern Paiute Land, including damages,

losses, or injuries to fish habitat, wildlife, and wildlife habitat, within the State arising before the Enforceability Date.

- (2) The waiver and release of claims described in subsection (j)(1) shall be in the form set forth in Exhibit 13.12 to the settlement agreement and shall take effect on the Enforceability Date.
- (3) Notwithstanding the waiver and release of claims described in subsection (j)(1) and Exhibit 13.12 to the settlement agreement, the San Juan Southern Paiute Tribe, acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe shall retain any right:
  - (A) To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the settlement agreement, whether such rights are generally stated or specifically described, or this Act, in any Federal or State court of competent jurisdiction;
  - (B) To assert claims for injuries to, and seek enforcement of, the rights of the San Juan Southern Paiute Tribe under the LCR Decree;
  - (C) To assert claims for Water Rights for land owned or acquired by the San Juan Southern Paiute Tribe in fee

in the LCR Watershed pursuant to subparagraphs 6.4 and 6.5 of the settlement agreement;

- (D) To object to any claims for Water Rights by or for:
    - (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; and
  - (E) To assert past, present, or future claims for Injury to Water Rights against: (i) any Indian Tribe other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe; or (ii) the United States acting on behalf of any Indian Tribe, other than the Hopi Tribe, the Navajo Nation, and the Zuni Tribe;
- (k) WAIVERS, RELEASES AND RETENTION OF CLAIMS BY THE UNITED STATES IN ALL CAPACITIES (EXCEPT AS TRUSTEE FOR AN INDIAN TRIBE OTHER THAN THE NAVAJO NATION, THE HOPI TRIBE, AND THE SAN JUAN SOUTHERN PAIUTE TRIBE) AGAINST THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE.
- (1) Except as provided in subsection (k)(3), the United States, in all capacities (except as trustee for an Indian Tribe other than the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe), as part of the performance of the obligations of the United States under the settlement agreement and this Act, is authorized to execute a waiver and release of all claims against the San Juan Southern

Paiute Tribe, the Members of the San Juan Southern Paiute Tribe, or any agency, official, or employee of the San Juan Southern Paiute Tribe, under Federal, State, or any other law for all:

- (A) Past and present claims for Injury to Water Rights, including injury to rights to Colorado River Water, resulting from the Diversion or Use of Water on San Juan Southern Paiute Land arising from time immemorial through the Enforceability Date;
- (B) Claims for Injury to Water Rights, including injury to rights to Colorado River Water, arising after the Enforceability Date, resulting from the Diversion or Use of Water on San Juan Southern Paiute Land in a manner that is not in violation of the settlement agreement or State law; and
- (C) Past, present, and future claims arising out of, or related in any manner to, the negotiation, execution, or adoption of the settlement agreement, any judgment or decree approving or incorporating the settlement agreement, or this Act.
- (D) The waiver and release of claims under subsection (k)(1) shall be in the form set forth in Exhibit 13.15 to the settlement agreement and shall take effect on the Enforceability Date.

- (2) Notwithstanding the waiver and release of claims described in subsection (k)(1) and Exhibit 13.13 to the settlement agreement, the United States shall retain any right to assert any claim not expressly waived in accordance with that subsection and that Exhibit, in any Federal or State court of competent jurisdiction.

**SEC. 15. SATISFACTION OF WATER RIGHTS AND OTHER BENEFITS.**

(a) THE NAVAJO NATION AND THE MEMBERS OF THE NAVAJO NATION.

- (1) The benefits provided under the settlement agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the Navajo Nation and the Members of the Navajo Nation against the Parties, including the United States, that is waived and released by the Navajo Nation acting on behalf of the Navajo Nation and the Members of the Navajo Nation under Exhibits 13.1 and 13.3 to the settlement agreement.
- (2) Any entitlement to water of the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees) or the United States acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), for Navajo Land shall be satisfied out of the water resources and other benefits granted, confirmed, quantified, or recognized by the settlement agreement and this Act, to or for the Navajo

Nation, the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees), and the United States, acting as trustee for the Navajo Nation and the Members of the Navajo Nation (but not Members in the capacity of the Members as Navajo Allottees).

(b) NAVAJO ALLOTTEES AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE NAVAJO ALLOTTEES.

(1) The benefits realized by the Navajo Allottees under the settlement agreement and this Act shall be in complete replacement of, complete substitution for, and full satisfaction of:

(A) all claims waived and released by the United States (acting as trustee for the Navajo Allottees) under Exhibit 13.2 to the settlement agreement.

(B) Any claims of the Navajo Allottees against the United States similar to the claims described in Exhibit 13.2 to the settlement agreement that the Navajo Allottees asserted or could have asserted.

(2) Any entitlement to water of the Navajo Allottees or the United States acting as trustee for the Navajo Allottees, for Navajo Allotments shall be satisfied out of the water resources and other benefits granted, confirmed, or recognized by the settlement agreement and this Act, to or for the Navajo Allottees and the United States, acting as trustee for the Navajo Allottees.

- (3) Notwithstanding subsection 15(a) and 15(b), nothing in this Agreement or the Act recognizes or establishes any right of a Member of the Navajo Nation to Water on Navajo Land.
- (c) THE HOPI TRIBE AND THE MEMBERS OF THE HOPI TRIBE.
- (1) The benefits provided under the settlement agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the Hopi Tribe and the Members of the Hopi Tribe against the Parties, including the United States, that is waived and released by the Hopi Tribe acting on behalf of the Hopi Tribe and the Members of the Hopi Tribe under Exhibits 13.6 and 13.8 to the settlement agreement.
  - (2) Any entitlement to Water of the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees) or the United States acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), for Hopi Land shall be satisfied out of the Water resources and other benefits granted, confirmed, quantified, or recognized by the settlement agreement and this Act, to or for the Hopi Tribe, the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees), and the United States, acting as trustee for the Hopi Tribe and the Members of the Hopi Tribe (but not Members in the capacity of the Members as Hopi Allottees).

- (d) HOPI ALLOTTEES AND THE UNITED STATES, ACTING AS TRUSTEE FOR THE HOPI ALLOTTEES.
- (1) The benefits realized by the Hopi Allottees under the settlement agreement shall be in complete replacement of, complete substitution for, and full satisfaction of:
    - (A) all claims waived and released by the United States (acting as trustee for the Hopi Allottees) under Exhibit 13.7 to the settlement agreement; and.
    - (B) any claims of the Hopi Allottees against the United States similar to the claims described in Exhibit 13.7 to the settlement agreement that the Hopi Allottees asserted or could have asserted.
  - (2) Any entitlement to water of the Hopi Allottees or the United States acting trustee for the Hopi Allottees, for Hopi Allotments shall be satisfied out of the water resources and other benefits granted, confirmed, or recognized by the settlement agreement and this Act, to or for the Hopi Allottees and the United States, acting as trustee for the Hopi Allottees.
  - (3) Notwithstanding subsections 15(c) and 15(d), nothing in the settlement agreement or this Act, recognizes or establishes any right of a Member of the Hopi Tribe (but not a Member in the capacity of the Member as a Hopi Allottee) to water on Hopi Land.

- (e) SAN JUAN SOUTHERN PAIUTE TRIBE AND THE MEMBERS OF THE SAN JUAN SOUTHERN PAIUTE TRIBE.
- (1) The benefits provided under the settlement agreement shall be in complete replacement of, complete substitution for, and full satisfaction of any claim of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe against the Parties, including the United States, that is waived and released by the San Juan Southern Paiute Tribe acting on behalf of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe under Exhibits 13.11 and 13.12 to the settlement agreement.
  - (2) Any entitlement to water of the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe or the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe, for San Juan Southern Paiute Land shall be satisfied out of the water resources and other benefits granted, confirmed, quantified, or recognized by the settlement agreement and this Act, to or for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe and the United States, acting as trustee for the San Juan Southern Paiute Tribe and the Members of the San Juan Southern Paiute Tribe.
  - (3) Notwithstanding subsections 15(e) nothing in the settlement agreement or this Act recognizes or establishes any right of a Member of the San Juan Southern Paiute Tribe to water on the San Juan Southern Paiute Southern Area.

**SEC. 16. ENFORCEABILITY DATE.**

(a) **CONDITIONS TO THE ENFORCEABILITY DATE.**

The settlement agreement, including the waivers and releases of claims described in paragraph 13 of the settlement agreement and in section 14 of this Act, shall take effect and be fully enforceable on the date on which the Secretary publishes in the Federal Register a statement of findings that:

- (1) the settlement agreement has been revised, through an amendment and restatement to:
  - (A) eliminate any conflict between the settlement agreement and the Act; and
  - (B) include the executed Water Delivery Contracts required by subparagraphs 10.1.1, 10.1.2, 10.1.3, 11.1.1, and 11.1.2 as Exhibits to the settlement agreement.
- (2) The settlement agreement as revised through an amendment and restatement has been signed by all Parties and any exhibit requiring execution by any Party has been executed by the required Party.
- (3) The waivers and releases of claims described in paragraph 13 of the settlement agreement and section 14 of this Act have been executed by the United States, Navajo Nation, Hopi Tribe, San Juan Southern Paiute Tribe, the State, and the other Parties.

- (4) Five billion dollars (\$5.0 billion) has been authorized, appropriated, and deposited in the designated accounts.
- (5) The LCR Decree has been approved by the LCR Adjudication Court substantially in the form of the judgment and decree attached as Exhibit 3.1.82 to the settlement agreement, as amended to ensure consistency with this Act.
- (6) The Gila River Adjudication Decree has been approved by the Gila River Adjudication Court substantially in the form of the judgment and decree attached as Exhibit 3.1.47 to the settlement agreement, as amended to ensure consistency with this Act.
- (7) The San Juan Southern Paiute Tribe and NTUA have executed a Water services agreement to deliver municipal Water to the San Juan Southern Paiute Tribe and its members.
- (8) Each of the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe have executed the tribal resolution referenced in subsection 18(a)(2), 18(b)(2), and 18(c)(2) of this Act consenting to the limited waiver of sovereign immunity from suit in the circumstances described in Section 18.

(b) FAILURE TO SATISFY CONDITIONS.

- (1) IN GENERAL. Except as provided in subsection (2), if the Secretary fails to publish in the Federal Register a statement

of findings under subsection (a) by June 30, 2035, or such alternative later date as may be agreed to by the Navajo Nation, the Hopi Tribe, the San Juan Southern Paiute Tribe, the Secretary, and the State:

- (A) this Act is repealed with the exception described in paragraph (2) below;
  - (B) Any action taken by the Secretary and any contract or agreement entered into pursuant to this Act shall be void;
  - (C) The United States shall be entitled to Offset any Federal amounts made available under section 13(a)(2)(B) that were used under that section against any claims asserted by the Tribes against the United States; and
  - (D) Any amounts appropriated under section 13, together with any investment earnings on those amounts, less any amounts expended under sections 9, 10, 11, and 12, shall revert immediately to the general fund of the Treasury.
- (2) CONTINUED EXISTENCE OF THE SAN JUAN SOUTHERN PAIUTE RESERVATION. Section 19 becomes effective upon the enactment date. Notwithstanding subsection (1), if the Secretary fails to publish in the Federal Register a statement of findings under subsection (1) by June 30, 2035, or such alternative later

date as may be agreed to by the Tribes, the Secretary and the State, section 19 shall remain in effect.

**SEC. 17. COLORADO RIVER ACCOUNTING.**

- (a) ACCOUNTING FOR THE TYPE OF WATER DELIVERED.
- (1) All deliveries of Navajo Nation Cibola Water and Navajo Nation Fourth Priority Water effected by the diversion of Water from the San Juan River or from the Colorado River above Lee Ferry shall be accounted for as deliveries of Arizona Lower Basin Colorado River Water.
  - (2) All deliveries of Hopi Tribe Cibola Water effected by the diversion of Water from the Colorado River above Lee Ferry shall be accounted for as deliveries of Arizona Lower Basin Colorado River Water.
  - (3) All deliveries of Navajo Nation Upper Basin Colorado River Water effected by diversion of water from the Upper Basin in Arizona, New Mexico, or Utah shall be accounted for as deliveries of Arizona Upper Basin Colorado River Water.
  - (4) All deliveries of Hopi Tribe Upper Basin Colorado River Water effected by diversion of water from the Upper Basin in Arizona, shall be accounted for as deliveries of Arizona Upper Basin Colorado River Water.
  - (5) All deliveries of Upper Basin Colorado River Water leased by either the Navajo Nation or the Hopi Tribe whether effected by a diversion of water from the Upper Basin or the

Lower Basin shall be accounted for as deliveries of Arizona Upper Basin Colorado River Water.

- (6) All deliveries of Colorado River Water in the Lower Basin leased by either the Navajo Nation or the Hopi Tribe whether effected by a diversion of water from the Upper Basin or the Lower Basin shall be accounted for as deliveries of Arizona Lower Basin Colorado River Water.

- (b) SPECIAL ACCOUNTING RULES FOR LOWER BASIN COLORADO RIVER WATER AS LOWER BASIN USE IN ARIZONA, REGARDLESS OF POINT OF DIVERSION OR PLACE OF USE.

Notwithstanding section 10603(c)(2)(A) of the Northwestern New Mexico Rural Water Projects Act, title X.B of the Omnibus Public Land Management Act of 2009, Public Law 111-11, all Navajo Nation Cibola Water, Navajo Nation Fourth Priority Water, and Hopi Tribe Cibola Water delivered to and consumptively used by the Navajo Nation, the Hopi Tribe, or their lessees pursuant to the settlement agreement shall be:

- (1) accounted for as if such use had occurred in the Lower Basin, regardless of the point of diversion or place of use;
- (2) credited as Water reaching Lee Ferry pursuant to articles III(c) and III(d) of the Colorado River Compact;
- (3) charged against the consumptive use apportionment made to the Lower Basin by article III(a) of the Colorado River Compact; and

- (4) accounted for as part of and charged against the 2.8 million acre-feet of Colorado River Water apportioned to Arizona in article II(B)(1) of the decree.
- (c) LIMITATION. Notwithstanding subsections (a) and (b), no water diverted by the Navajo-Gallup Water Supply Project shall be accounted for as provided in subsections (a) and (b) until such time as the Secretary has developed and, as necessary and appropriate, modified, in consultation with the State, the Upper Basin Colorado River Commission and the Governors' representatives on Colorado River Operations from each state signatory to the Colorado River Compact, all operational and decisional criteria, policies, contracts, guidelines, or other documents that control the operations of the Colorado River system reservoirs and diversion works, so as to adjust, account for, and offset the diversion of Water apportioned to the State, pursuant to the Boulder Canyon Project Act of 1928 (43 U.S.C. § 617 *et seq.*), from a point of diversion on the San Juan River in New Mexico; provided that all such modifications shall be consistent with the provisions of section 10603(c) of the Northwestern New Mexico Rural Water Projects Act, as modified by this Act, and the modifications made pursuant to this clause shall be applicable only for the duration of any such diversions pursuant to section 10603(c)(2)(B) of the Northwestern New Mexico Rural Water Projects Act and this Act.

**SEC. 18. LIMITED WAIVER OF SOVEREIGN IMMUNITY.**

(a) LIMITED WAIVER BY THE NAVAJO NATION AND THE UNITED STATES ACTING AS TRUSTEE FOR THE NAVAJO NATION AND NAVAJO ALLOTTEES.

(1) The Navajo Nation, and the United States acting as trustee for the Navajo Nation and Navajo Allottees, may be joined in any action brought in any circumstance described in subsection 18(a)(3), and any claim by the Navajo Nation and the United States to sovereign immunity from any such action is waived.

(2) By Resolution -----dated ----, the Navajo Nation Council has affirmatively consented to the limited waiver of sovereign immunity from suit in any circumstance described in Subsection 18(a)(3), notwithstanding any provision of the Navajo Nation Code or any other Navajo Nation law.

(3) A circumstance referred to in Subsection (a)(1) and (a)(2) is described as any of the following:

(A) Any party to the settlement agreement:

(i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of

(I) this Act; or

(II) the settlement agreement; and

- (ii) names the Navajo Nation, or the United States acting as trustee for the Navajo Nation or Navajo Allottees, as a party in that action; and
  - (iii) shall not include any request for award against the Navajo Nation, or the United States acting as trustee for the Navajo Nation or Navajo Allottees, for money damages, court costs, or attorney fees.
- (B) Any landowner or water user in the LCR Watershed or the Gila River Watershed:
  - (i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of:
    - (I) Paragraph 13 of the settlement agreement;
    - (II) The LCR Decree or the Gila River Adjudication Decree;
    - (III) section 14 of this Act; and/or
  - (ii) names the Navajo Nation, or the United States acting as trustee for the Navajo Nation or Navajo Allottees, as a party in that action; and
  - (iii) shall not include any request for award against the Navajo Nation, or the United States acting as trustee for the Navajo Nation or Navajo

Allottees, for money damages, court costs or attorney fees.

(b) LIMITED WAIVER BY THE HOPI TRIBE AND THE UNITED STATES ACTING AS TRUSTEE FOR THE HOPI TRIBE AND HOPI ALLOTEES.

- (1) The Hopi Tribe, and the United States acting as trustee for the Hopi Tribe and Hopi Allottees, may be joined in any action brought in any circumstance described in subsection 18(b)(3), and any claim by the Hopi Tribe and the United States to sovereign immunity from any such action is waived.
- (2) By Resolution -----dated ----, the Hopi Tribal Council has affirmatively consented to the limited waiver of sovereign immunity from suit in any circumstance described in subsection 18(b)(3) notwithstanding any provision of the Hopi Tribal Code or any other Hopi Tribe law.
- (3) A circumstance referred to in subsections (b)(1) and (b)(2) is described as any of the following:
  - (A) Any party to the settlement agreement
    - (i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of:
      - (I) this Act; or
      - (II) the settlement agreement; and

- (ii) names the Hopi Tribe or the United States, acting as trustee for the Hopi Tribe or Hopi Allottees, as a party in that action; and
  - (iii) shall not include any request for award against the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe or Hopi Allottees, for money damages, court costs, or attorney fees.
- (B) Any landowner or water user in the LCR Watershed:
  - (i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of:
    - (I) Paragraph 13 of the settlement agreement;
    - (II) The LCR Decree; or
    - (III) Section 14 of this Act; and
  - (ii) names the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe or Hopi Allottees, as a party in that action; and
  - (iii) shall not include any request for award against the Hopi Tribe, or the United States acting as trustee for the Hopi Tribe or Hopi Allottees, for money damages, court costs, or attorney fees.

(c) LIMITED WAIVER BY THE SAN JUAN SOUTHERN PAIUTE TRIBE AND THE UNITED STATES ACTING AS TRUSTEE FOR THE SAN JUAN SOUTHERN PAIUTE TRIBE.

(1) The San Juan Southern Paiute Tribe and the United States acting as trustee for the San Juan Southern Paiute Tribe may be joined in any action brought in any circumstance described in subsection 18(c)(3), and any claim by the San Juan Southern Paiute Tribe and the United States to sovereign immunity from any such action is waived.

(2) By Resolution -----dated ----, the San Juan Southern Paiute Tribal Council has affirmatively consented to the limited waiver of sovereign immunity from suit in any circumstance described in subsection 18(c)(3), notwithstanding any provision of the San Juan Southern Paiute Tribal Code or any other San Juan Southern Paiute Tribe law.

(3) A circumstance referred to in Subsections 18(c)(1) and 18(c)(2) is described as any of the following:

(A) Any party to the settlement agreement:

(i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of:

(I) this Act; or

(II) the settlement agreement; and

(ii) names the San Juan Southern Paiute Tribe or the United States acting as trustee for the San

Juan Southern Paiute Tribe as a party in that action; and

- (iii) shall not include any request for award against the San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe, for money damages, court costs, or attorney fees.

(B) Any landowner or water user in the LCR Watershed:

- (i) brings an action in any court of competent jurisdiction relating only and directly to the interpretation or enforcement of:

- (I) Paragraph 13 of the settlement agreement;

- (II) The LCR Decree; or

- (III) section 14 of this Act; and

- (ii) names the San Juan Southern Paiute Tribe or the United States acting as trustee for the San Juan Southern Paiute Tribe as a party in that action; and

- (iii) shall not include any request for award against the San Juan Southern Paiute Tribe, or the United States acting as trustee for the San Juan Southern Paiute Tribe, for money damages, court costs, or attorney fees.

**SEC. 19. RATIFICATION OF THE TREATY AND CREATION OF THE SAN JUAN SOUTHERN PAIUTE RESERVATION.**

(a) RATIFICATION AND APPROVAL OF THE TREATY.

The Treaty and the Treaty Addendum are hereby approved, ratified, and confirmed by the Congress of the United States.

(b) APPROVAL OF THE SECRETARY.

(1) The Secretary is authorized and directed:

(A) to approve and execute the Treaty and the Treaty Addendum as set forth therein, except that the specific findings stated under the heading “APPROVAL,” shall not be binding on the Secretary; and

(B) to take all steps necessary to implement the Treaty and this Act.

(2) The Secretary is delegated the authority, without further Act of Congress, to approve and execute amendments to the Treaty agreed to by the Navajo Nation and the San Juan Southern Paiute Tribe.

(c) LANDS PROCLAIMED A RESERVATION FOR THE SAN JUAN SOUTHERN PAIUTE TRIBE.

(1) IN GENERAL. All right, title and interest, including Water Rights, to the approximately 5,400 acres of land within the Navajo Indian Reservation that are described in the Treaty as the San Juan Paiute Northern Area and the San Juan Paiute Southern Paiute Area, are hereby proclaimed as the San Juan Southern Paiute Reservation and such lands shall

be held by the United States in trust as a reservation for the exclusive benefit of the San Juan Southern Paiute Tribe, subject to the rights of access under subsection (d) of this Act.

- (2) NO APPRAISAL OR VALUATION. Notwithstanding any other law, no appraisal or other valuation shall be required to carry out the provisions of this subsection.
- (d) RIGHTS OF ACCESS AND EASEMENTS. The Navajo Reservation and the San Juan Southern Paiute Reservation shall be subject to the rights of access and easements as identified in the Treaty.
- (e) SURVEYING AND FENCING OF LAND.
  - (1) REQUIREMENT. The Secretary is directed to:
    - (A) complete a survey and legal description of the boundary lines to establish the boundaries of the San Juan Southern Paiute Reservation, as soon as practicable after the date of enactment of this Act;
    - (B) officially file the survey plat in the appropriate office of the Department of the Interior;
    - (C) mark and fence the lands as described in article V of the Treaty, where feasible; and
    - (D) study the feasibility of an access road to the San Juan Paiute Southern Area from U.S. Route 89, as described in article XI of the Treaty.

(2) LEGAL DESCRIPTION.

(A) IN GENERAL. The legal descriptions published in accordance with subsection (e)(2) shall be considered the official legal description of the San Juan Southern Paiute Reservation and shall have the same force and effect as if included in this Act.

(B) PUBLICATION. Upon completion of the surveys under subsection (e)(1), the Secretary shall publish in the Federal Register a legal description of the lands comprising the San Juan Southern Paiute Reservation.

(C) CORRECTIONS. The Secretary may make minor correction to correct technical and clerical errors in the legal descriptions.

(f) REPEAL OF PAIUTE ALLOTMENT PROCEDURES. Section 9 of Public Law 93-531 (88 Stat. 1716, formerly codified at 25 U.S.C. 640d-8) is repealed.

(g) PUBLICATION; JURISDICTION.

(1) PUBLICATION. In accordance with article VI of the Treaty, the Secretary shall publish in the Federal Register separate notices of completion or boundary marking of:

(A) the San Juan Paiute Northern Area; and

(B) the San Juan Paiute Southern Area.

- (2) JURISDICTION. Upon publication in the Federal Register under either subsection (g)(1)(A) or (g)(1)(B):
  - (A) the San Juan Southern Paiute Tribe shall have full jurisdiction over all matters within that area of the San Juan Southern Paiute Reservation to the fullest extent permitted by Federal law; and
  - (B) the Navajo Nation shall no longer have jurisdiction over matters occurring within that area of the San Juan Southern Paiute Reservation except as agreed to by the Navajo Nation and the San Juan Southern Paiute Tribe.

**SEC. 20. IN GENERAL.**

- (a) NO QUANTIFICATION OR EFFECT ON RIGHTS OF OTHER TRIBES OR THE UNITED STATES ON THEIR BEHALF.

Except as provided in paragraph 8.3 of the settlement agreement nothing in this Act:

- (1) quantifies or otherwise affects the Water Rights, or claims or entitlements to water or to Upper Basin Colorado River Water or Lower Basin Colorado River Water, of any Indian tribe, band, or community, other than the Navajo Nation, the Hopi Tribe, or the San Juan Southern Paiute Tribe; or
- (2) affects the ability of the United States to take action on behalf of any Indian tribe, nation, band, community, or allottee, other than the Navajo Nation, the Hopi Tribe and the San Juan Southern Paiute Tribe, their members, Navajo allottees, Hopi allottees, and public domain allottees.

(b) NO QUANTIFICATION OF WATER RIGHTS OF PUBLIC DOMAIN ALLOTTEES.

Nothing in this Act quantifies or adjudicates any Water Right or any claim or entitlement to Water of a public domain allottee, or precludes the United States, acting as trustee for public domain allottees, from making claims for Water Rights in Arizona that are consistent with the claims described in Exhibit 3.1.132B to the settlement agreement. Except as provided in Subparagraphs 8.2.3, 8.4.7, and 15.2.3.4 of the settlement agreement, nothing in this Act affects the ability of the United States to take action on behalf of public domain allottees.

(c) ANTIDEFICIENCY. Notwithstanding any authorization of appropriations to carry out this Act, the United States shall not be liable for any failure of the United States to carry out any obligation or activity authorized by this Act, including all agreements or exhibits ratified or confirmed by this Act if adequate appropriations are not provided expressly by Congress to carry out the purposes of this Act.

(d) NO MODIFICATION OR PREEMPTION OF OTHER LAWS. Unless expressly provided in this Act, nothing in this Act modifies, conflicts with, preempts, or otherwise affects:

- (1) the Boulder Canyon Project Act of 1928 (43 U.S.C. § 617 *et seq.*);
- (2) the Boulder Canyon Project Adjustment Act (54 Stat. 774, chapter 643);

- (3) the Act of April 11, 1956 (commonly known as the “Colorado River Storage Project Act”) (43 U.S.C. § 620, *et seq.*);
  - (4) the Act of September 30, 1968 (commonly known as the “Colorado River Basin Project Act”) (82 Stat. 885);
  - (5) the Treaty between the United States of America and Mexico respecting Utilization of Waters of the Colorado and Tijuana Rivers and of the Rio Grande, signed at Washington February 3, 1944 (59 Stat. 1219);
  - (6) the Colorado River Compact of 1922;
  - (7) the Upper Colorado River Basin Compact of 1948;
  - (8) the Omnibus Public Land Management Act of 2009, Public Law 111-11; or
  - (9) case law concerning Water Rights in the Colorado River system other than any case to enforce the settlement agreement or this Act.
- (e) NO PRECEDENT. Nothing in this Act shall be construed as establishing a precedent for any type of transfer of Colorado River system water between the Upper Basin and the Lower Basin.
- (f) UNIQUE SITUATION. Diversions through the iiná bá - paa tuwaqat’si pipeline and the Navajo-Gallup Water Supply Project facilities consistent with this Act address critical tribal and non-Indian Water supply needs under unique circumstances, which include, among other things:

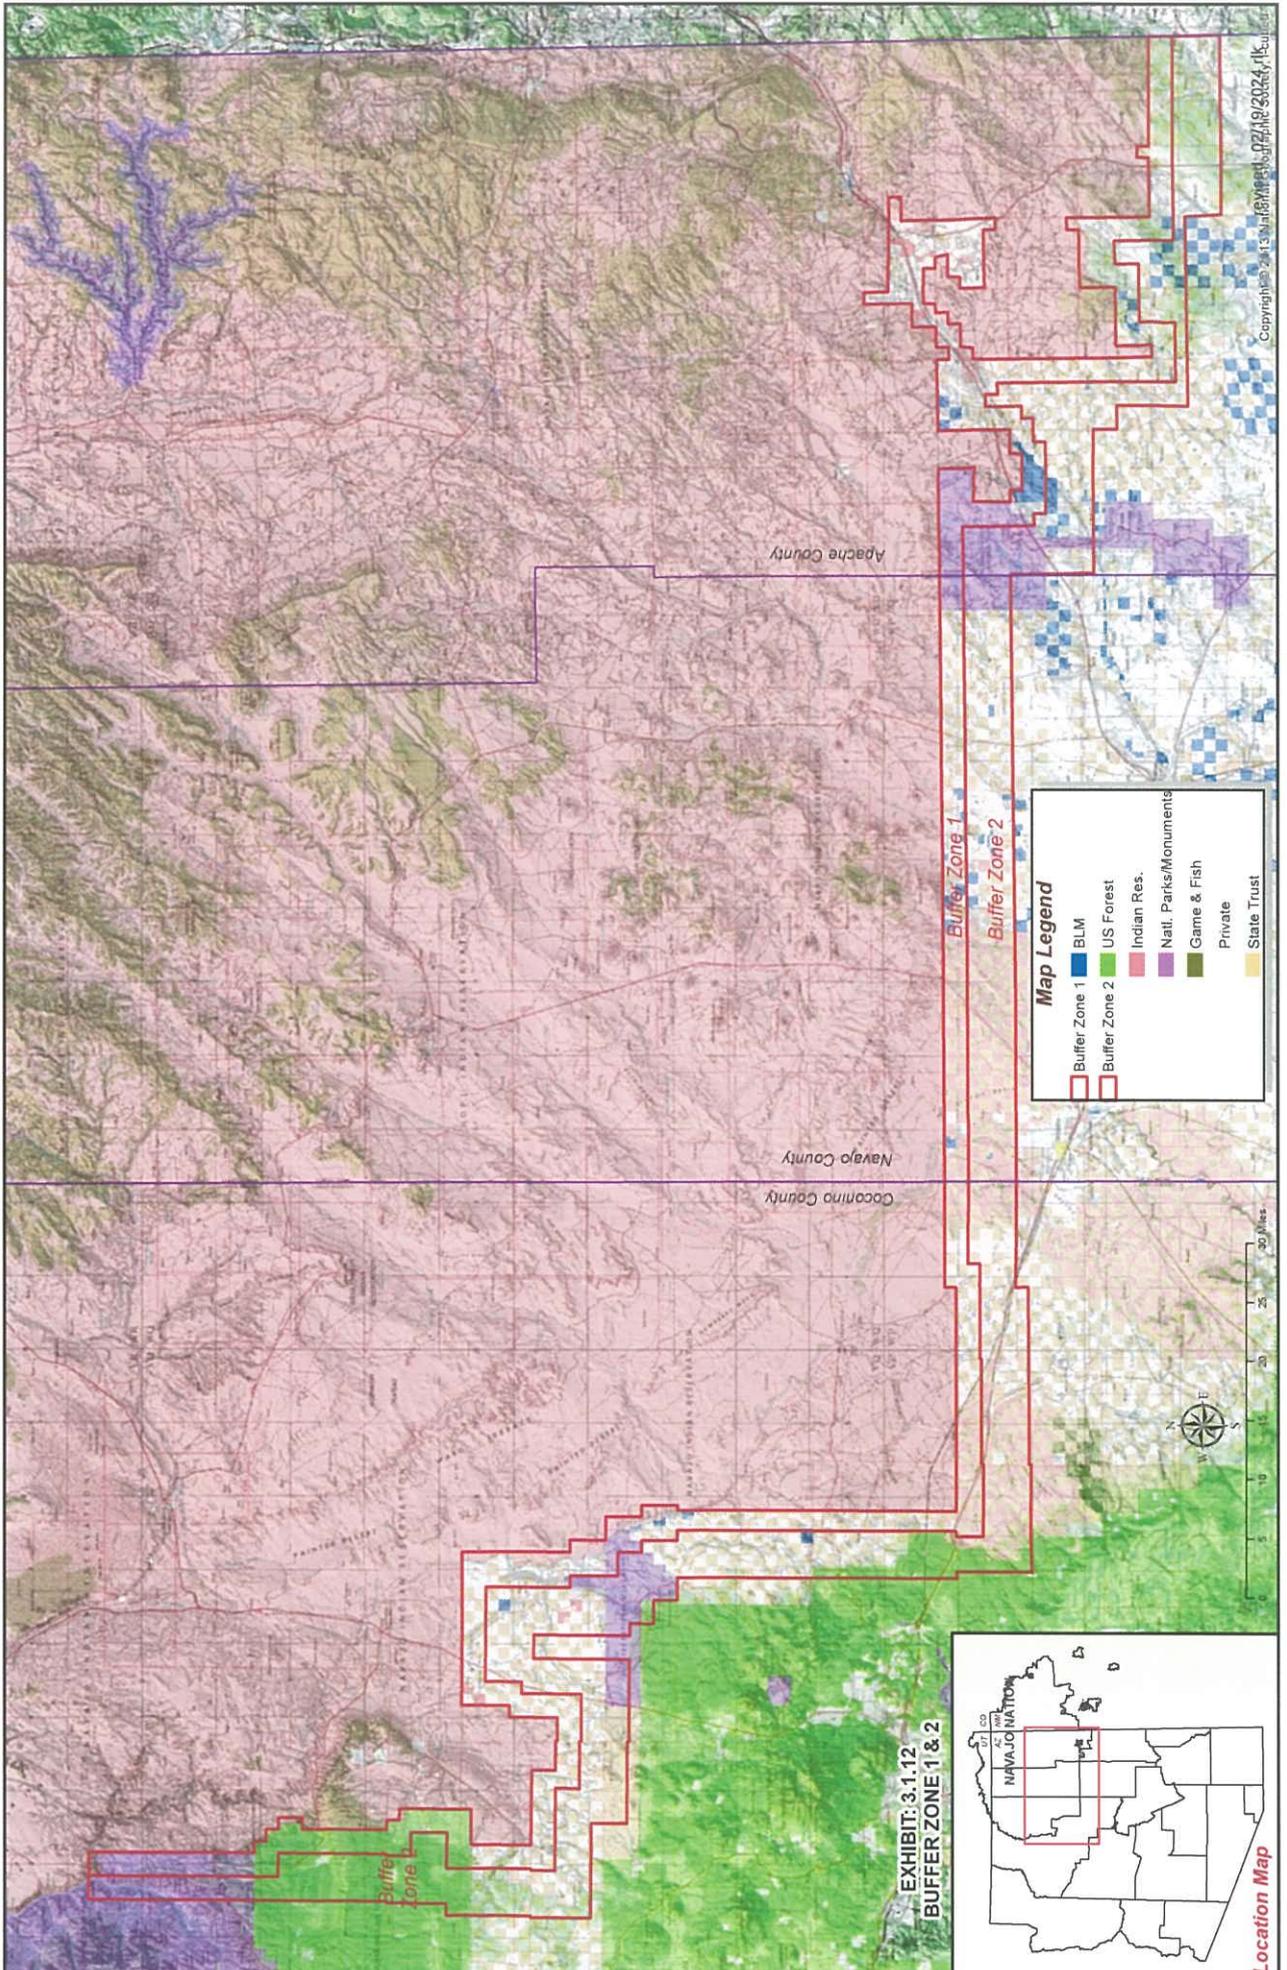

- (1) the intent to benefit a number of American Indian tribes;
  - (2) the Navajo Nation's location in both the Upper Basin and the Lower Basin;
  - (3) the intent to address critical Indian and non-Indian water needs in the State of Arizona;
  - (4) the lack of other reasonable alternatives available for developing a firm, sustainable supply of municipal water for the Navajo Nation, the Hopi Tribe, and the San Juan Southern Paiute Tribe in the State of Arizona; and
  - (5) the limited volume of water to be diverted by the iiná bá - paa tuwaqat'si pipeline and Navajo-Gallup Water Supply Project to supply municipal uses in the State of Arizona.
- (g) EFFICIENT USE. The diversions and uses authorized for the iiná bá - paa tuwaqat'si pipeline under this Act represent unique and efficient uses of Colorado River apportionments in a manner that Congress has determined would be consistent with the obligations of the United States to the Navajo Nation and the Hopi Tribe.
- (h) NO EFFECT ON ENFORCEMENT OF ENVIRONMENTAL LAWS. Nothing in this Act precludes the United States from enforcing the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9601 *et seq.* (including, but not limited to, claims for damages to natural resources), the Safe Drinking Water Act, 42 U.S.C. § 300f *et seq.*, the Clean Water Act, 33 U.S.C. § 1251 *et seq.*, the Resource

*May 9, 2024*

Conservation and Recovery Act, 42 U.S.C. § 6901 *et seq.*, or the regulations implementing said acts.

**TITLE:**  
Annual Update of the CARE Unit

**STAFF RECOMMENDED ACTION:**

Update only

**Executive Summary:**

In FY2020-2021, the City of Flagstaff determined the number of 911 non-emergent type calls were outpacing the resources of the Flagstaff Fire Department, Flagstaff Police Department, and the local private ambulance company. These types of calls were predominately based around substance use and mental health issues. With all the available resources in the City, it was also determined that taking these clients to the hospital was not always the best option and that those resources needed to be brought together to address this community issue. The City of Flagstaff, community members and a special committee partnered together to approve and fund the CARE unit. Terros Health shared the City's vision and was awarded an initial 3-year contract as the project lead and would partner with an FF/EMT on the unit from Flagstaff Fire Department. It took months of planning, inter-agency and inter-divisional collaboration and finally hiring and training to support the new unit becoming operational.

On March 28, 2022, the unit went operational on a 10-hr workday from 9:00 a.m. to 7:00 p.m. Calls for service came through two medians, 911 Dispatch and public outreach as the unit was mobile in the community. The unit is based out of Fire Station 6 on Lake Mary Road, utilizing the community room for its headquarters.

The annual report is part of the contractual agreement between the City and Terros to provide annual statistics and updates on the function and impacts of the unit.

**Financial Impact:**

This is the final year of an agreed upon 3-year contract through October 19, 2024. Funding to continue the program has been included in the Fiscal Year 2024-2025 budget.

**Policy Impact:**

None

**Previous Council Decision or Community Discussion:**

# Care Unit Annual Report

July 2, 2024

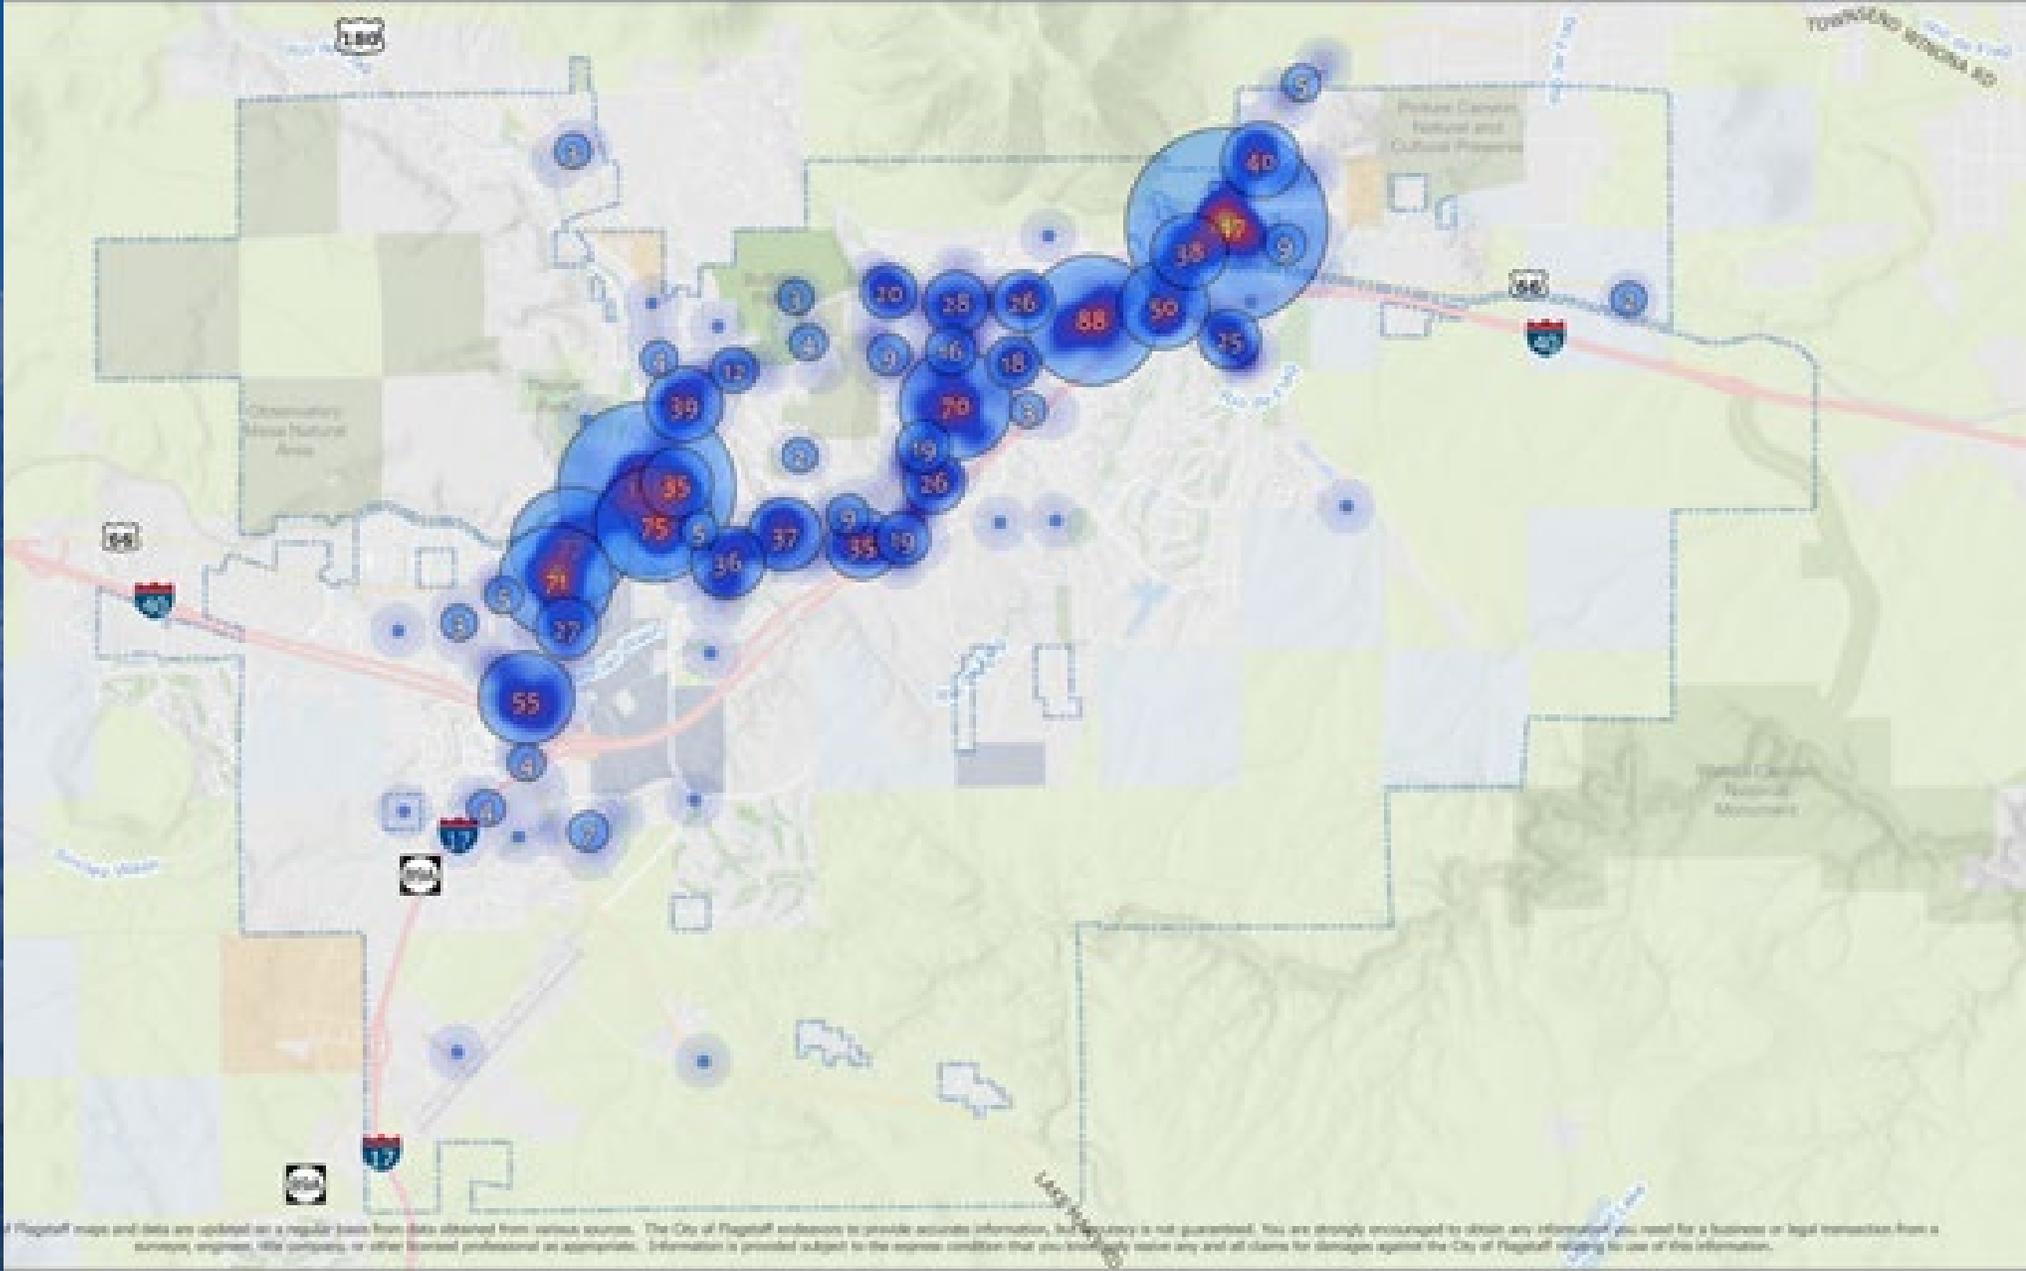

# History

- Vision of the Council
- Create an alternative response model
- Terros and Flagstaff Fire
- Started on March 28, 2022
- Crisis Clinician
- Firefighter/EMT
- Community Support/Reduction on Public Safety
  - 911 dispatch (OMEGA)
  - Proactive outreach

# CARE 2023 Call Locations

# Calls for Service

## Over 2000 dispatches since January 2023

- Less light and siren responses reducing risk of traffic accidents
- Keeps all risk units more available for true emergencies
- 1680 calls diverted from the Emergency Department
- Equates to over 10% of total Fire Department Calls

## Over 1000 outreach attempts

- Providing resources and needs
- Stabilization of the community

# FPD & FFD Calls for Service

	2019	2020 *	2022	2023
FPD Mental Health Related Calls	2,491	2,896	3,067	3,070
FPD Low Priority Alcohol Related Calls	2,828	3,318	3,842	3,388
FPD Number of Arrestees Transported to FMC**	346	1,021	270	67
FPD Hours Spent at FMC with Arrestees	480	649	476	408
FFD Man Down Responses	2,618	2,438	1,824	1,848
FFD Behavioral Health Related Responses	383	426	537	789

# Reductions

- Reduction in man down responses for FFD
  - Capturing 3rd party/drive by callers
- Reduction in arrests/ bookings during CARE hours of operation since inception

ARRESTS (9am to 7pm)			
	2020	2022	2023
Public Consumption	337	51	84
Trespass (2nd/3rd)	154	96	76
Alcohol Shoplifts	69	43	32
Obstruction	43	10	28
Obscene Conduct	41	18	15
Public Sexual Indecency	12	8	3
<b>Total:</b>	<b>656</b>	<b>226</b>	<b>238</b>

Data courtesy of Flagstaff Police Department

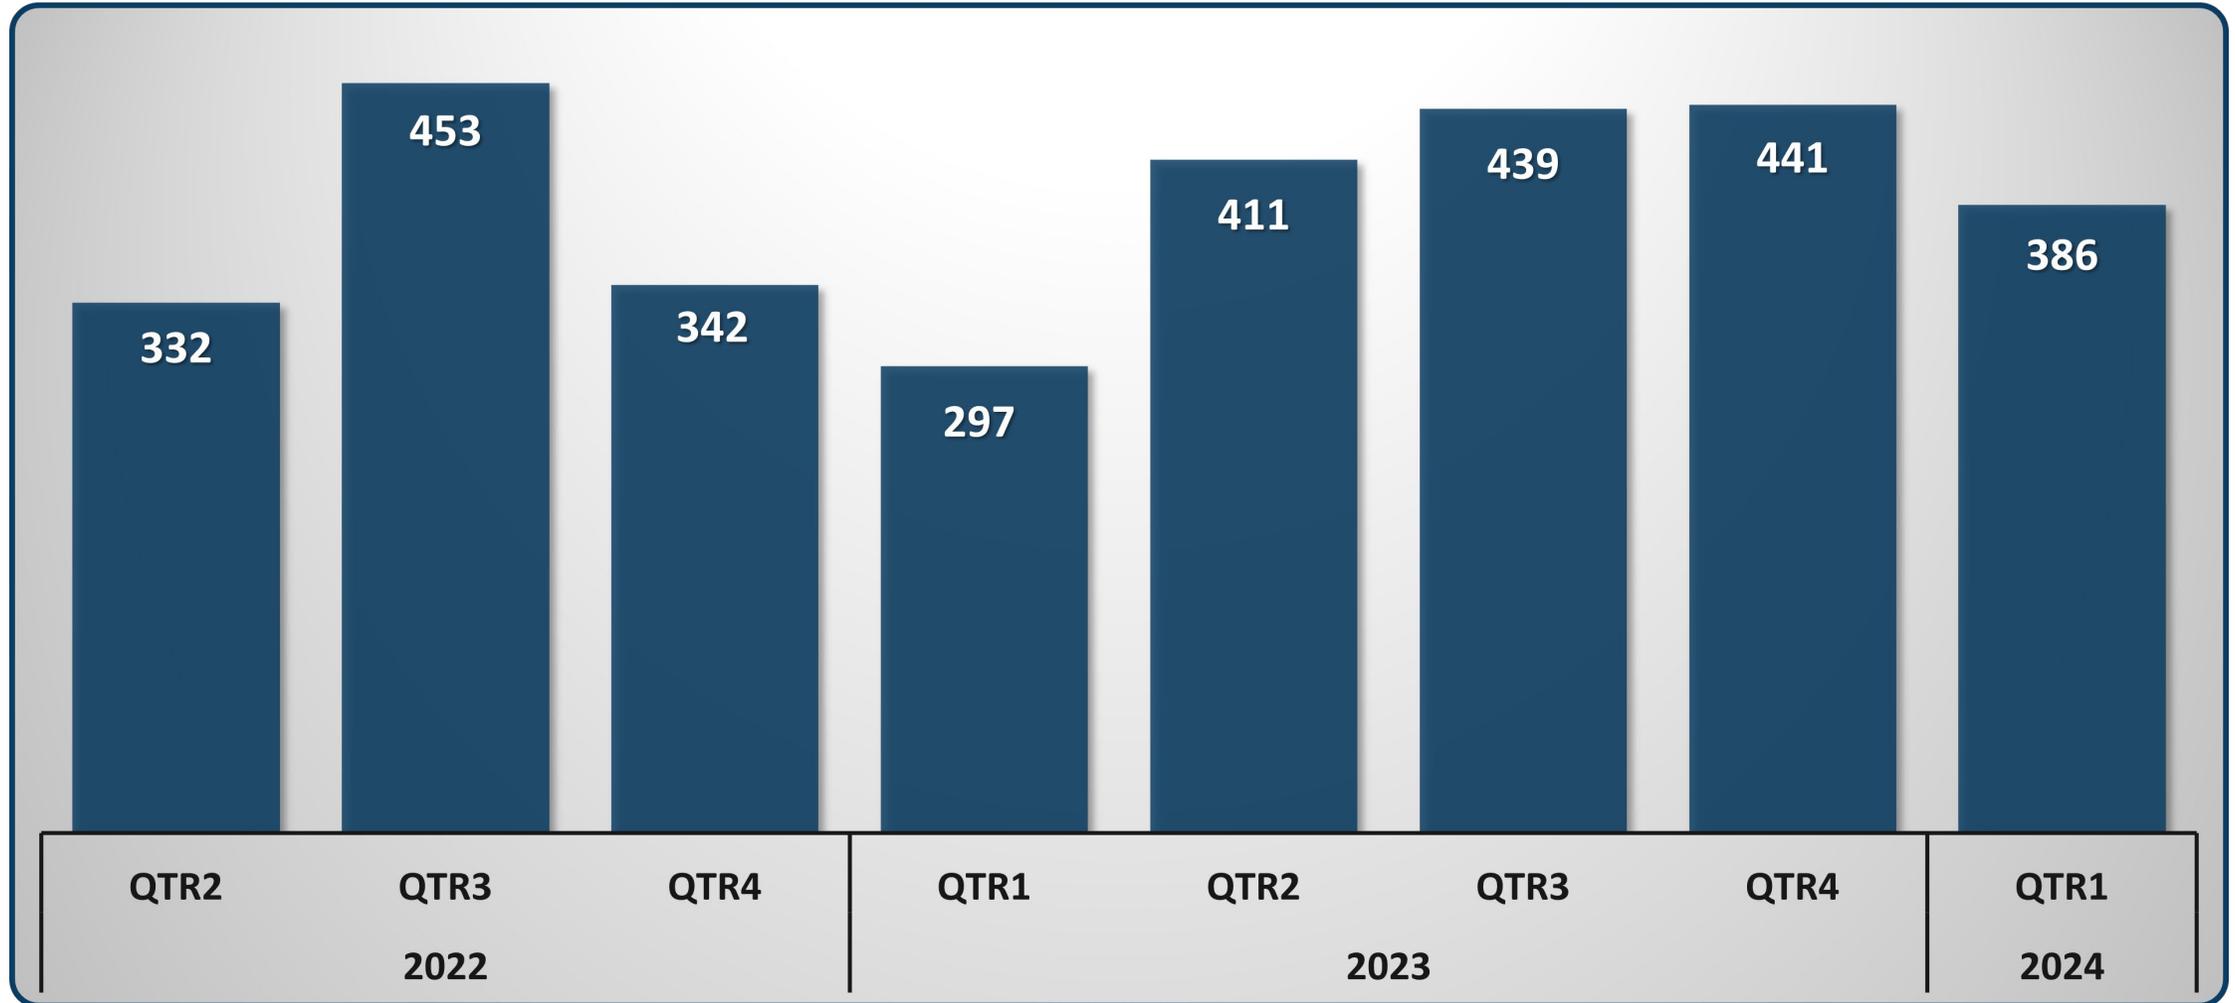

# OMEGA dispatch

- Created to send the right unit to lower acuity incident 911 calls
- Upgrades to a full medical call approximately 15% of the time
- 112 After hours (1900-0900) OMEGA calls for last 5 months

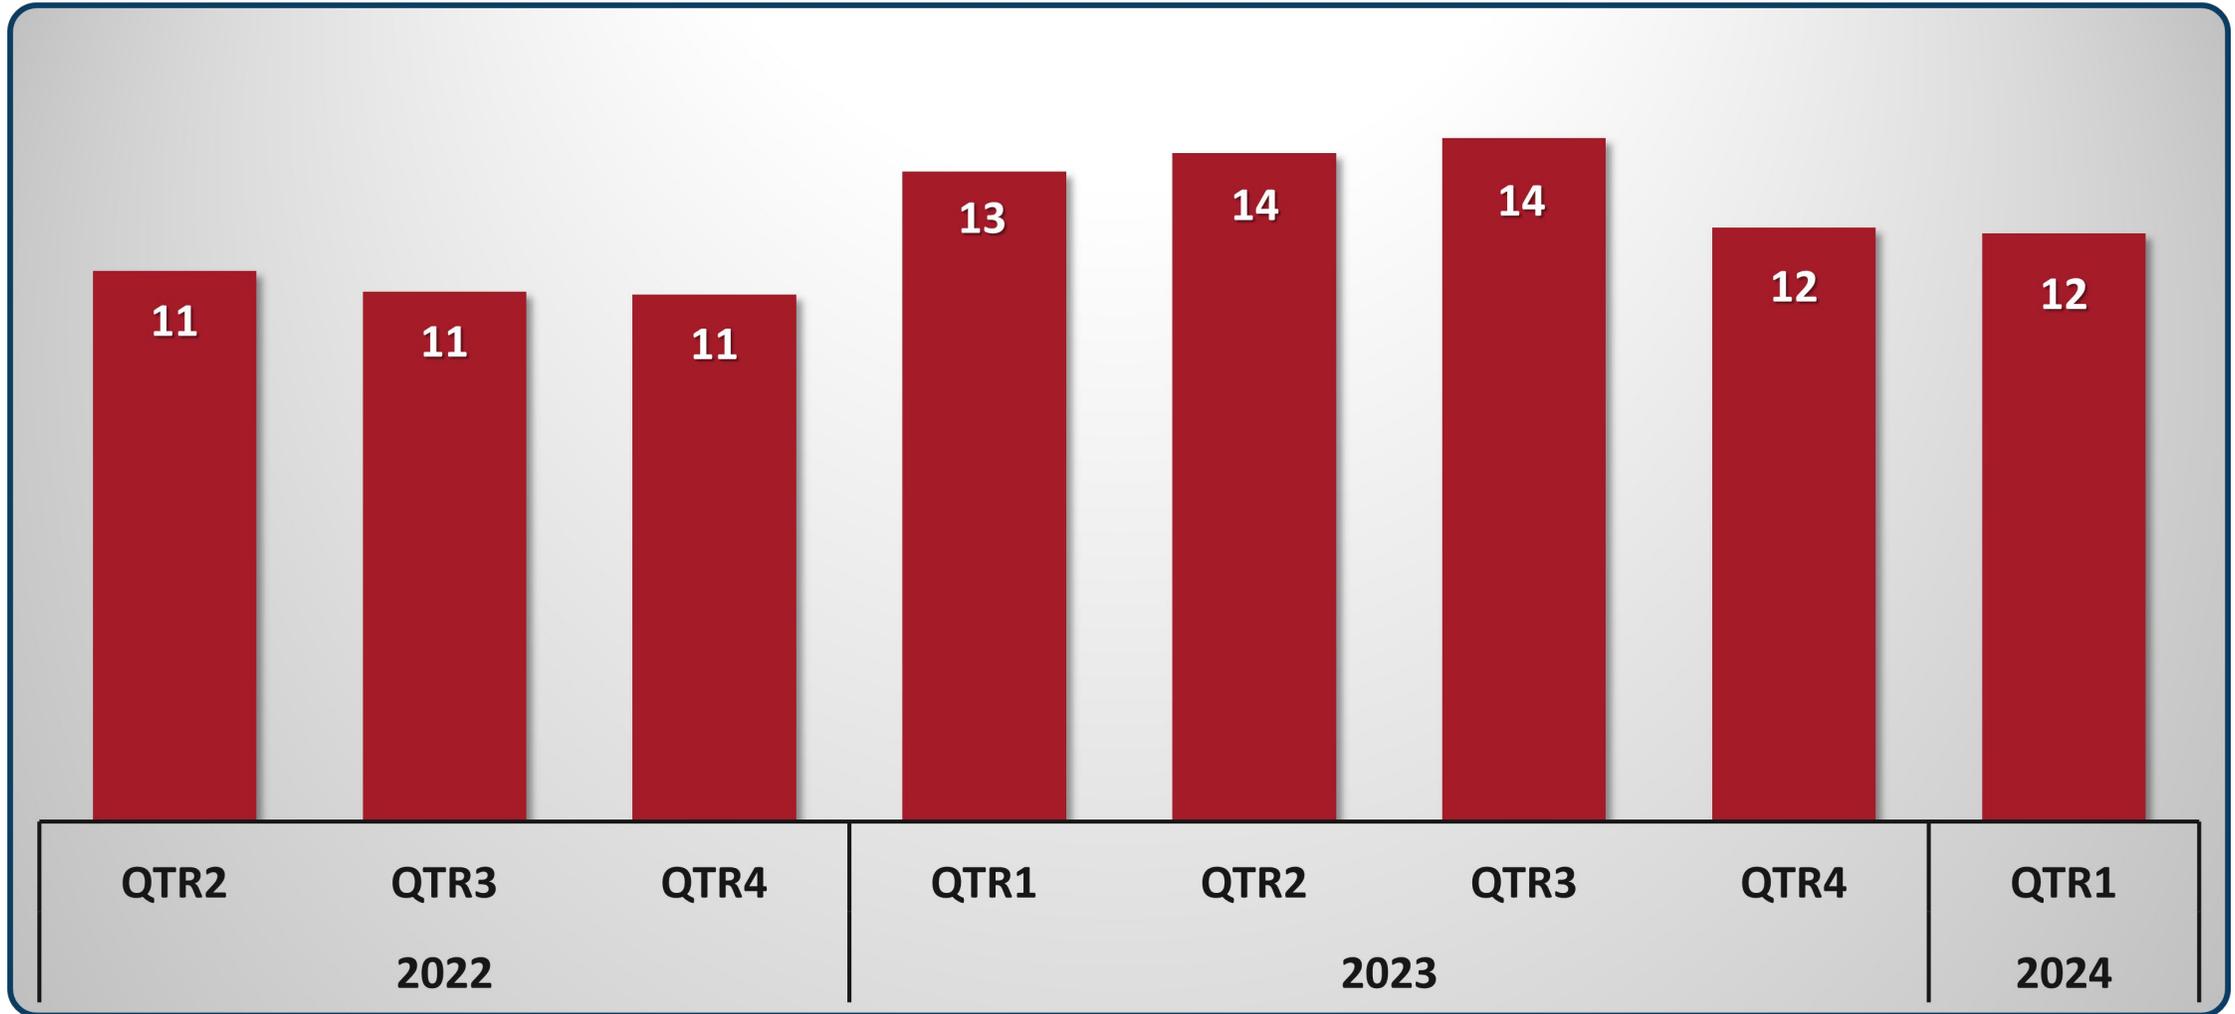

# Dispatches Per Quarter

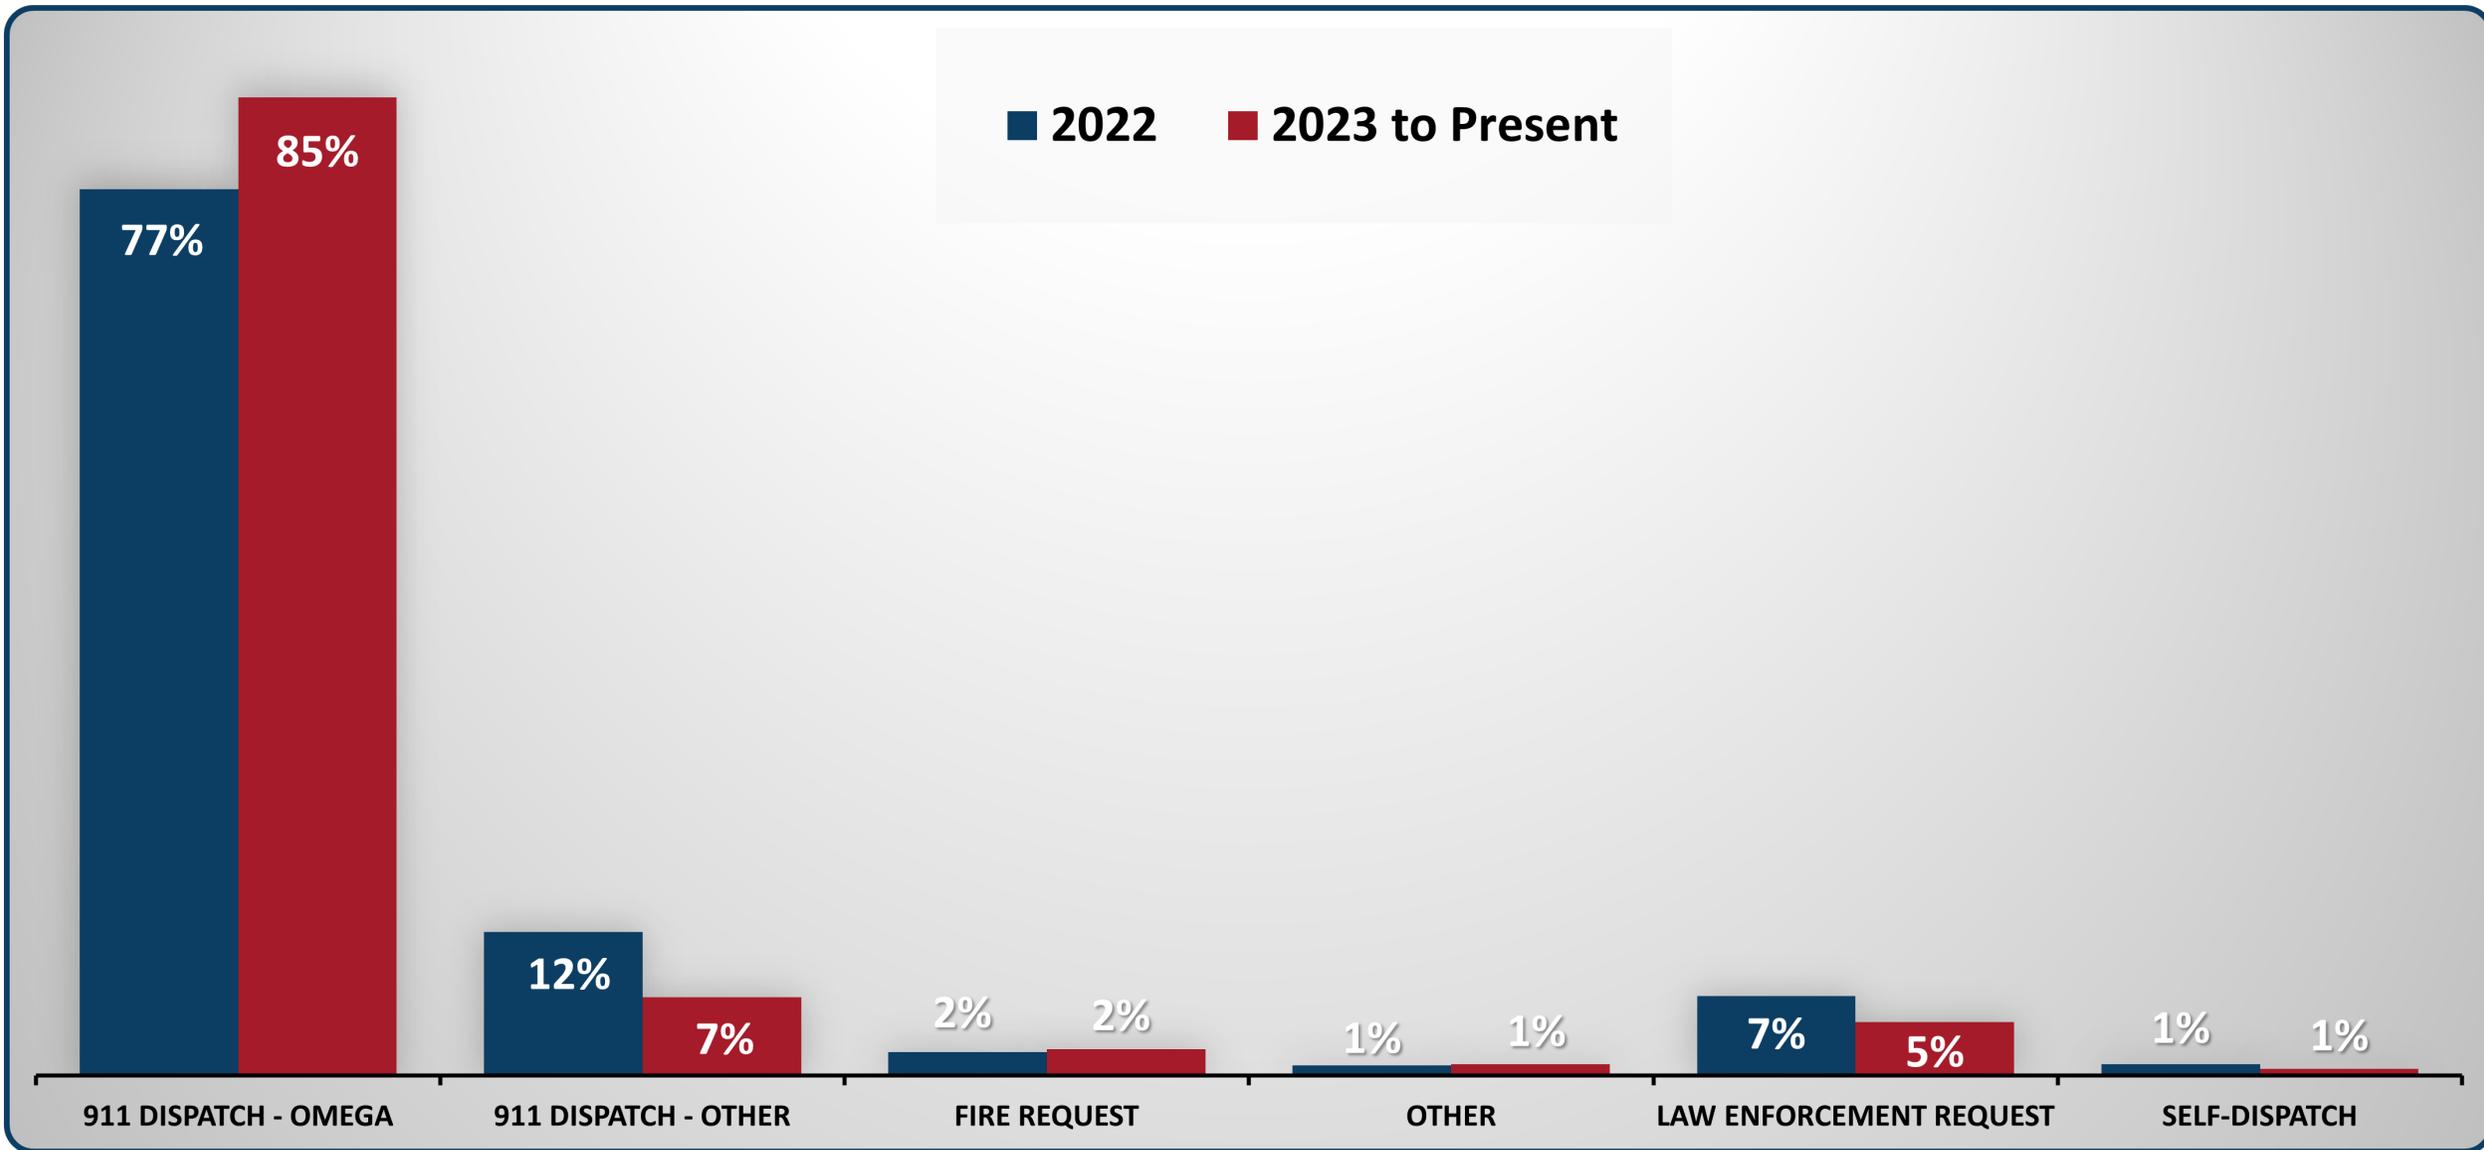

# Response Times (Minutes)

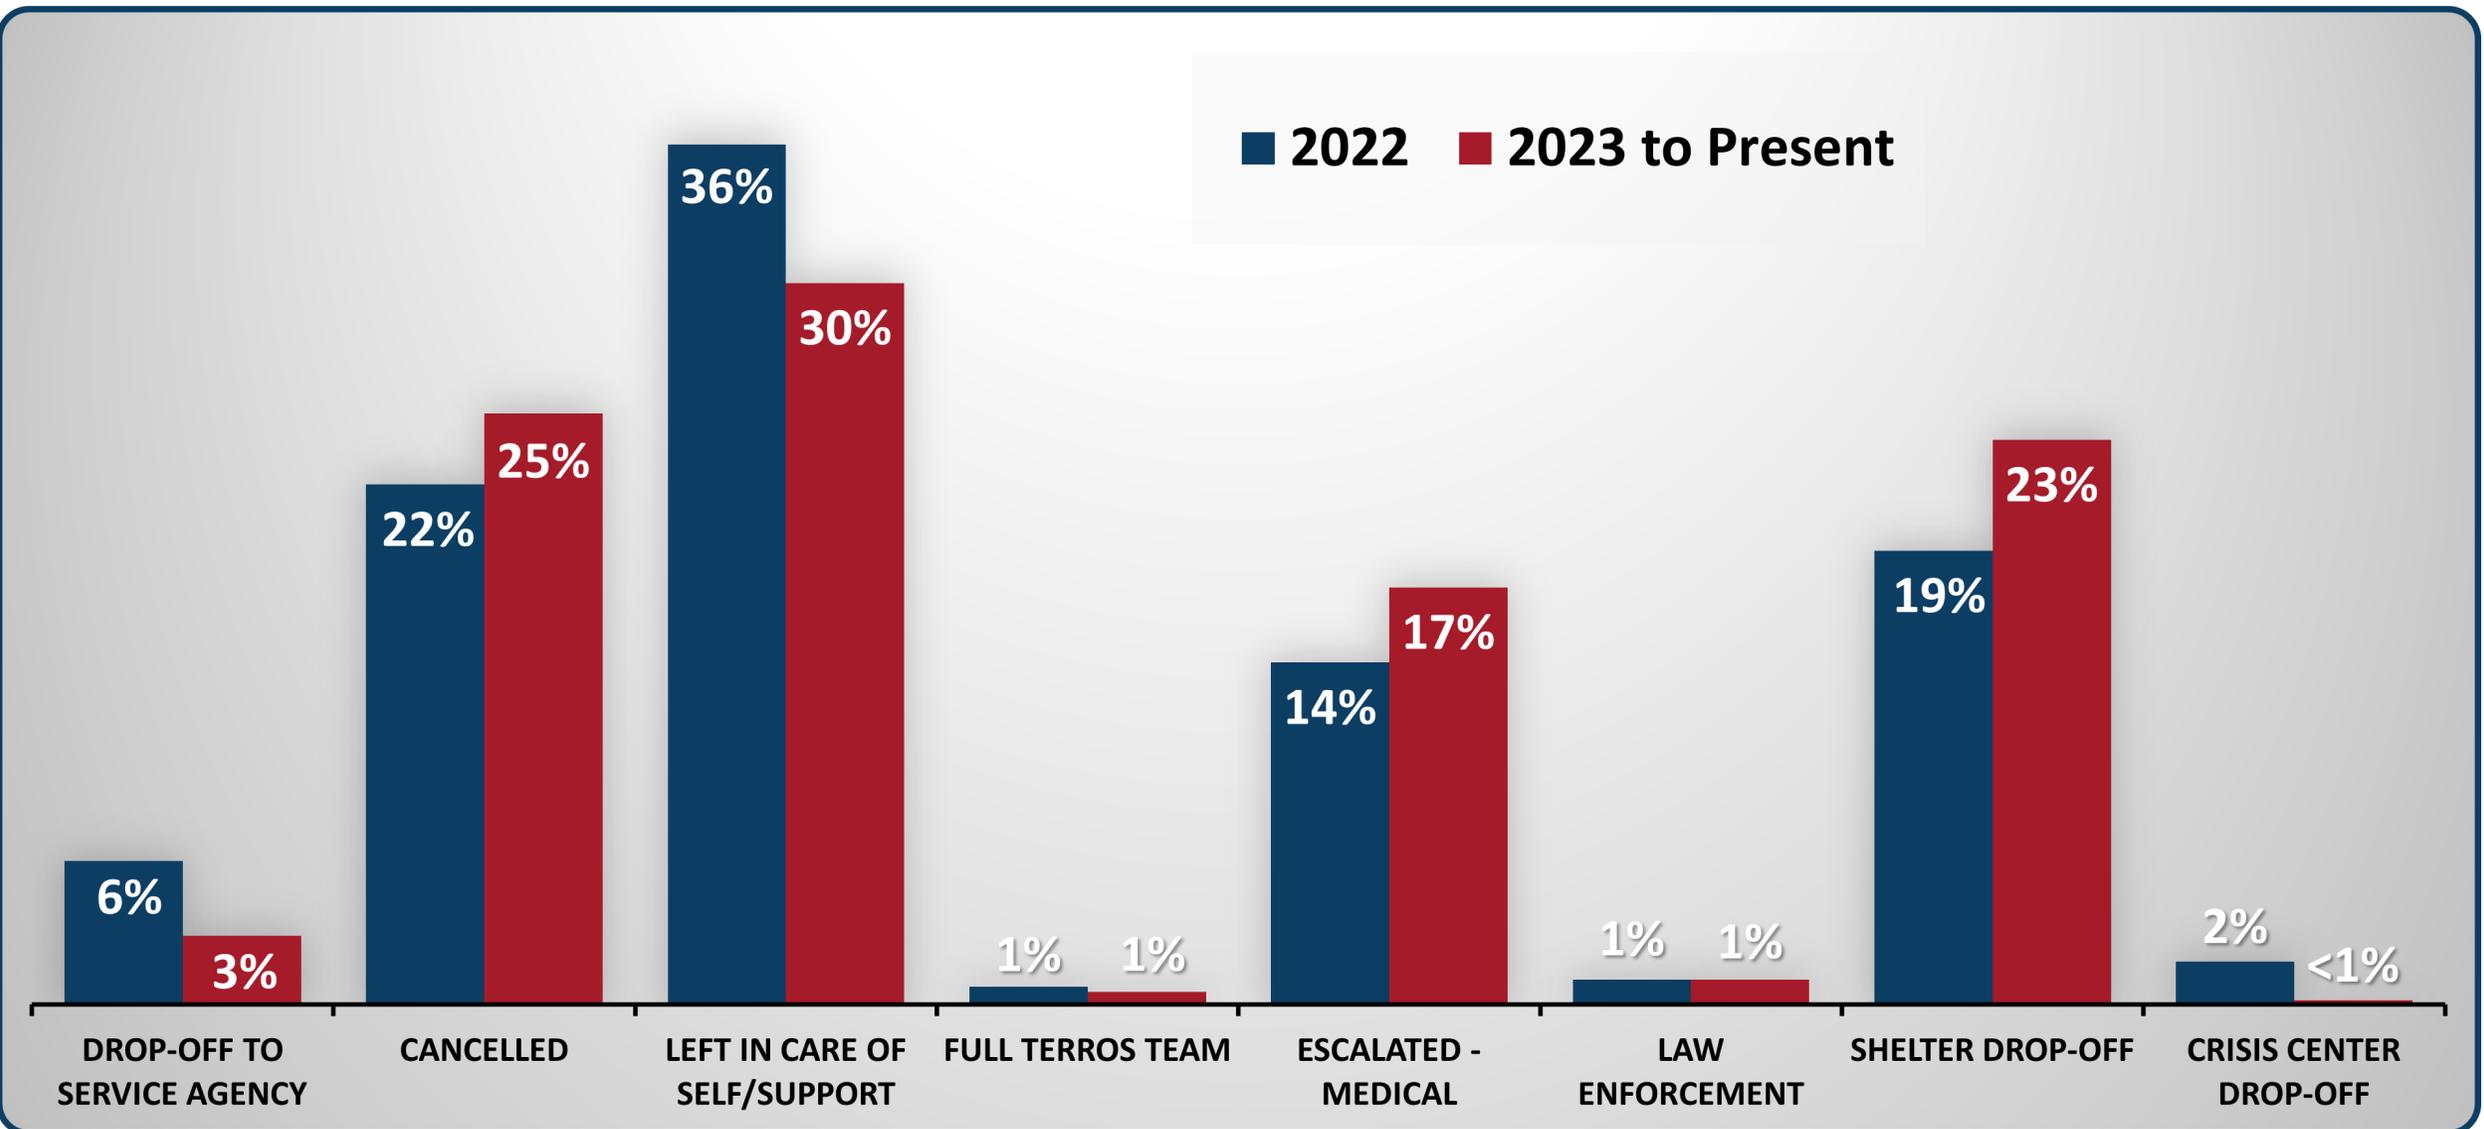

# Type of Dispatch

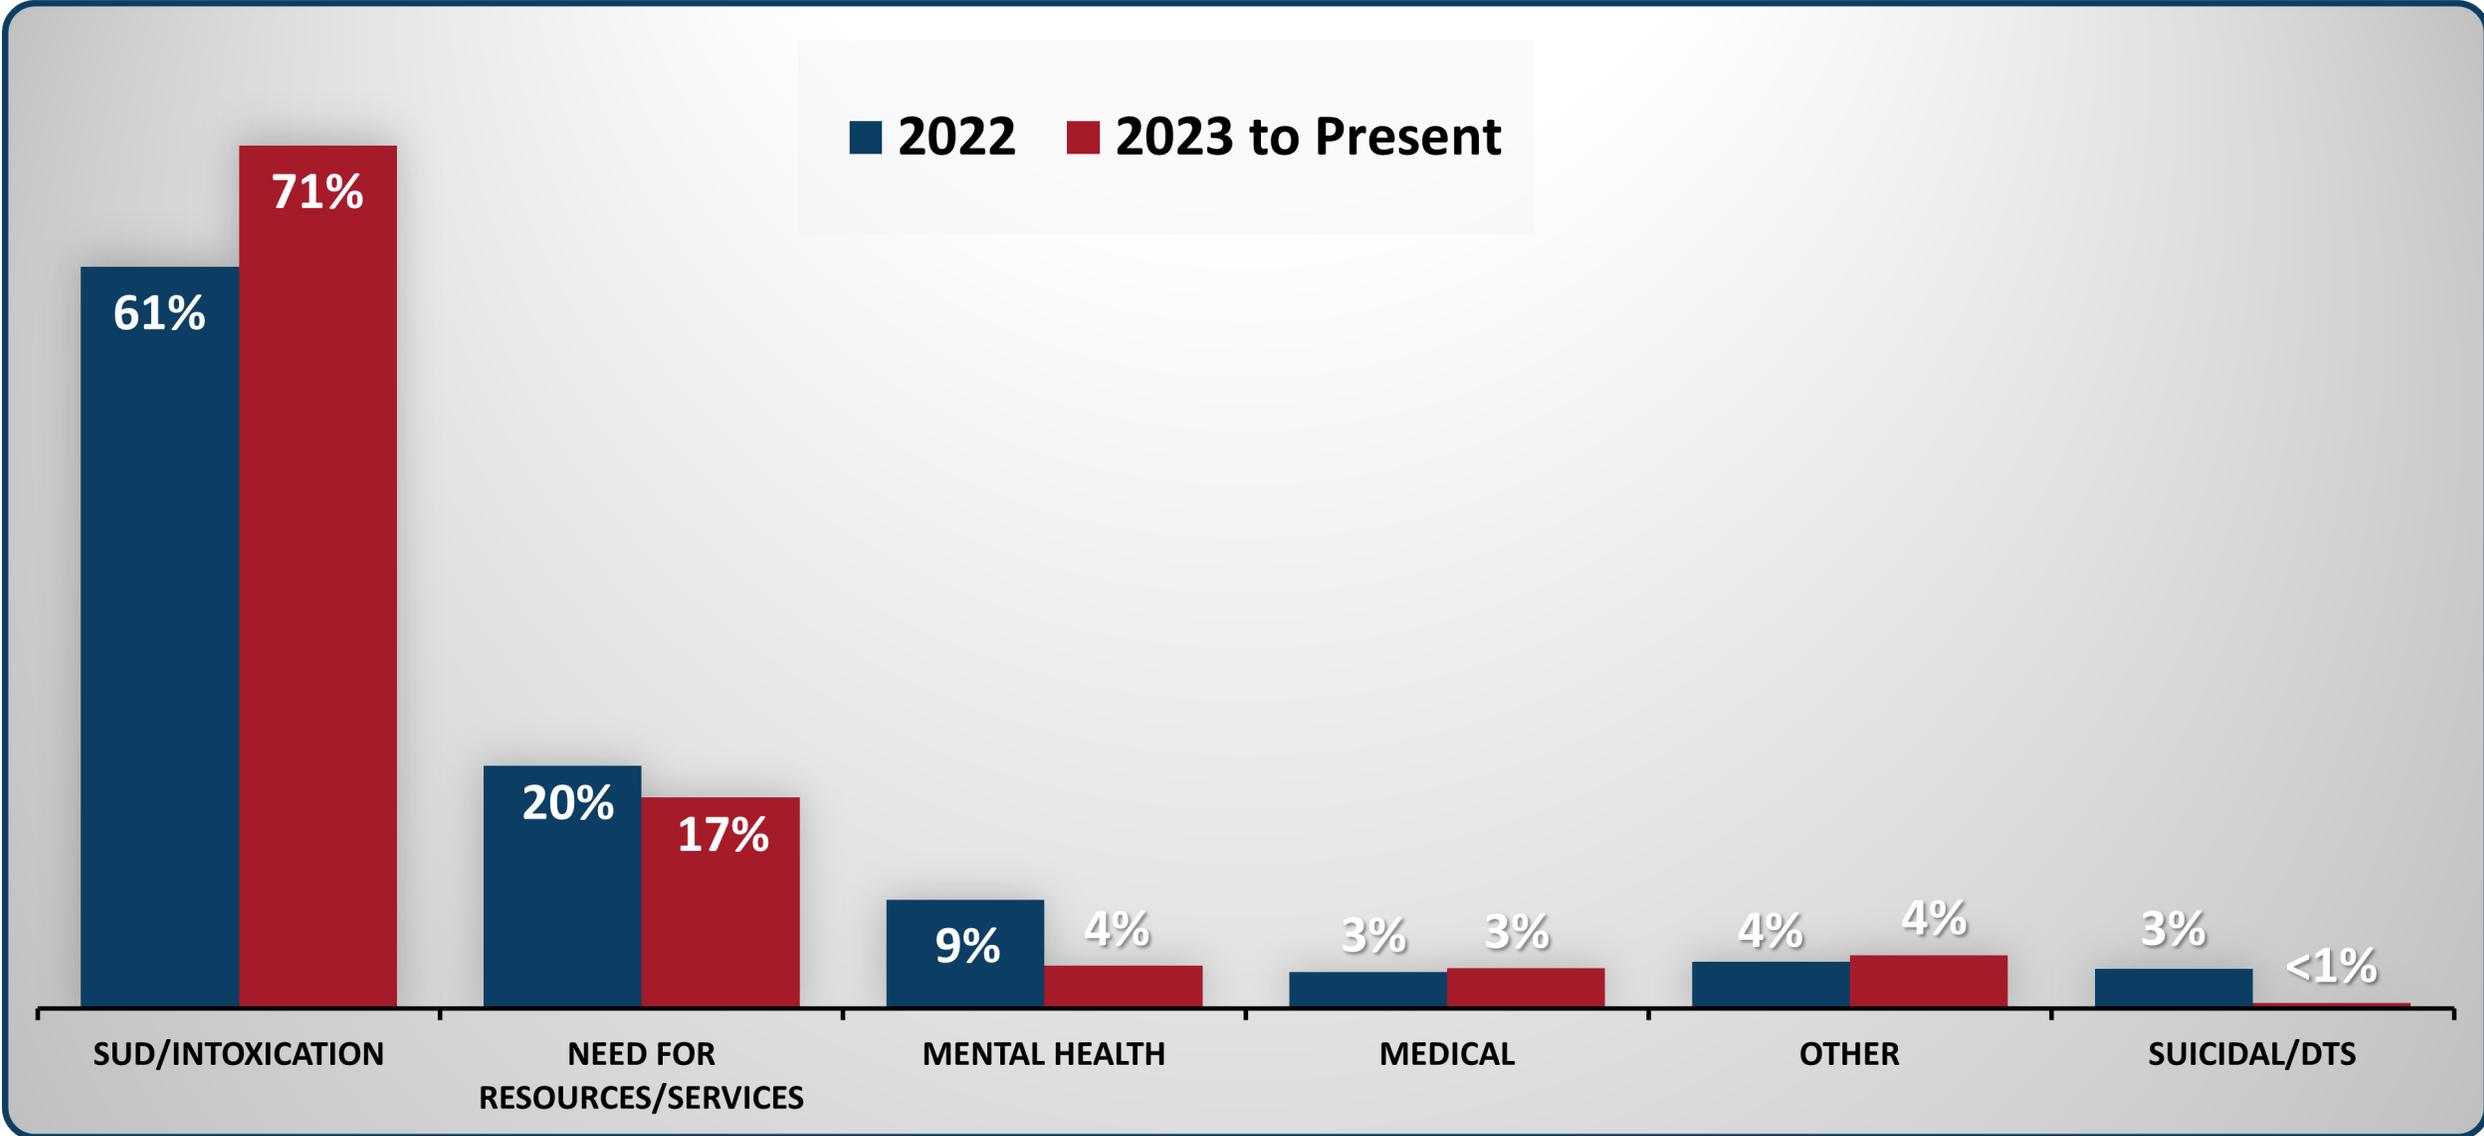

# Response Outcomes

# Primary Issue On Scene

# Proactive Outreach

- Make rounds throughout the city when not dispatched
- Build rapport with individuals and the community
- Most common stops include:
  - Downtown: Wheeler park/library, bus transfer station
  - West side: Safeway, Walmart shopping centers, Milton
  - East Side: Flagstaff Shelter, Food bank, Bushmaster, Safeway
- Distribution of basic needs and resources

# Distribution of Basic Needs

- Over 1000 Sandwiches
- Nearly 1000 bottles of water
- Approximately 200 bus passes
- Around 100 blankets
- Dozens of winter coats, hats, gloves, sleeping bags
- Narcan for opioid overdose prevention
- Informational pamphlets for community resources

# Real Experiences

- The CARE unit's effects on the community goes beyond Data Sets

# Community Partners

- Flagstaff Shelter Services
- The Guidance Center
- Flagstaff Family Food Bank
- The Salvation Army
- SMR
- Mountain Line Bus
- NACA (Native American for Community Action)
- Continuum of Care
- And many others

# Ongoing Challenges

- Ongoing need for direct Fire management over CARE under current configuration
- Challenges with data collection between agencies
- This current model is taking calls off our fire and PD units
- Dispatch models to hold the unit its intended scope
- Facilities for CARE staff and clients.
- Is this the most appropriate staffing model for our community and our employees?

# What's next

- Collaboration meeting with community partners across the city to strengthen relationships to provide better service
  - Continuum of Care
- Terros now contracted with CES Partnerships for CARE Program Evaluation
- Initial contract ends October 19, 2024
  - Option for two additional years

# In Conclusion

CARE is doing what we had intended it to do

- ✓ Reduce low acuity calls for FFD and FPD
- ✓ Reduce the numbers of arrests/ bookings for alcohol related offenses
- ✓ Reduce the number of transports to the emergency department for intoxication or detox issues
- ✓ Provide a tool for addressing community needs (proactive outreach)
- ✓ Allow all-risk units to be more available for emergencies
- ✓ Help connect and transport unsheltered clients to centralized resources

**TEAM FLAGSTAFF**

**WE MAKE THE CITY BETTER**

# Council Questions & Discussion

**CITY OF FLAGSTAFF  
STAFF SUMMARY REPORT**

**To:** The Honorable Mayor and Council  
**From:** Shannon Anderson, Senior Deputy City Manager  
**Co-Submitter:** Daniel Musselman, Police Chief  
**Date:** 06/26/2024  
**Meeting Date:** 07/02/2024

---

**TITLE**

**Sharing of Information About Crisis Mobile Services**

**STAFF RECOMMENDED ACTION:**

This presentation is for informational purposes only.

**Executive Summary:**

The Flagstaff Police Department and Care 1st, the Northern Arizona Regional Behavioral Health Authority, will provide information about how crisis mobile services are requested and what services are provided in the City of Flagstaff.

**Information:**

The City of Flagstaff implemented the CARE unit three years ago to assist the Flagstaff Police Department and Flagstaff Fire Department with substance use and mental health related calls for service. When an individual calls 9-1-1 and they are experiencing a mental health crisis the Police Emergency Communications Specialist will determine if the call will be referred to the crisis line or the crisis mobile unit based on the situation. Currently in Coconino County, including the City of Flagstaff, Terros is the responding agency that provides this mobile crisis unit when there is an identified need. As the Regional Behavioral Health Authority, Care 1st, has identified a benefit to having another mobile crisis unit in Coconino County and they will provide information to City Council on their plans to implement this additional crisis unit.

# Crisis System Overview With Care1st

July 2nd, 2024

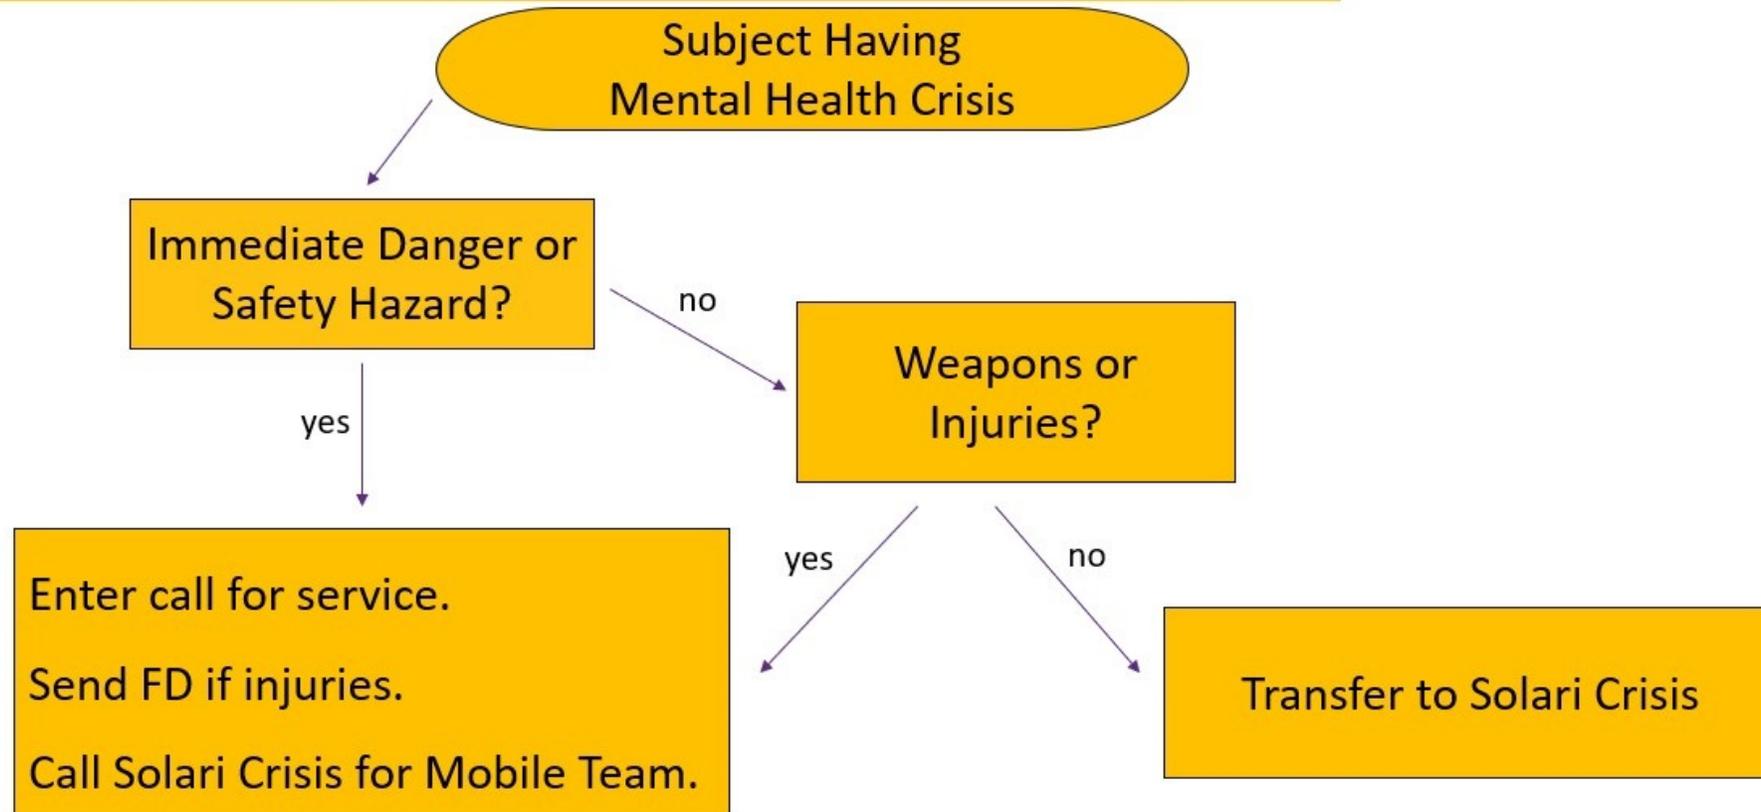

# Introductions

- Katie Brandis, Communications Manager for the Flagstaff  
Coconino Communications Center
- Bill Mitchell, Arizona Complete Health, First Responder  
Liaison – Coconino and Yavapai Counties
- Amy Devins, Arizona Complete Health, Supervisor of  
Crisis-First Responder Services

## Subject Experiencing Mental Health Crisis

# Examples of Crisis Calls

1. Depressed callers
2. Suicidal callers without access to means to cause self-harm.
3. Callers experiencing behavioral health issues (hallucinations, manic episodes, or anxiety).
4. Incurable juveniles that are not armed or exhibiting violence.
5. Third-party callers regarding mental health assistance for another person not showing violence towards others.
6. Situations that do not present a danger to the caller.
7. Frequent callers with no police or medical emergency
8. Callers experiencing any sort of crisis, homelessness, divorce, any significant change in their life, etc.

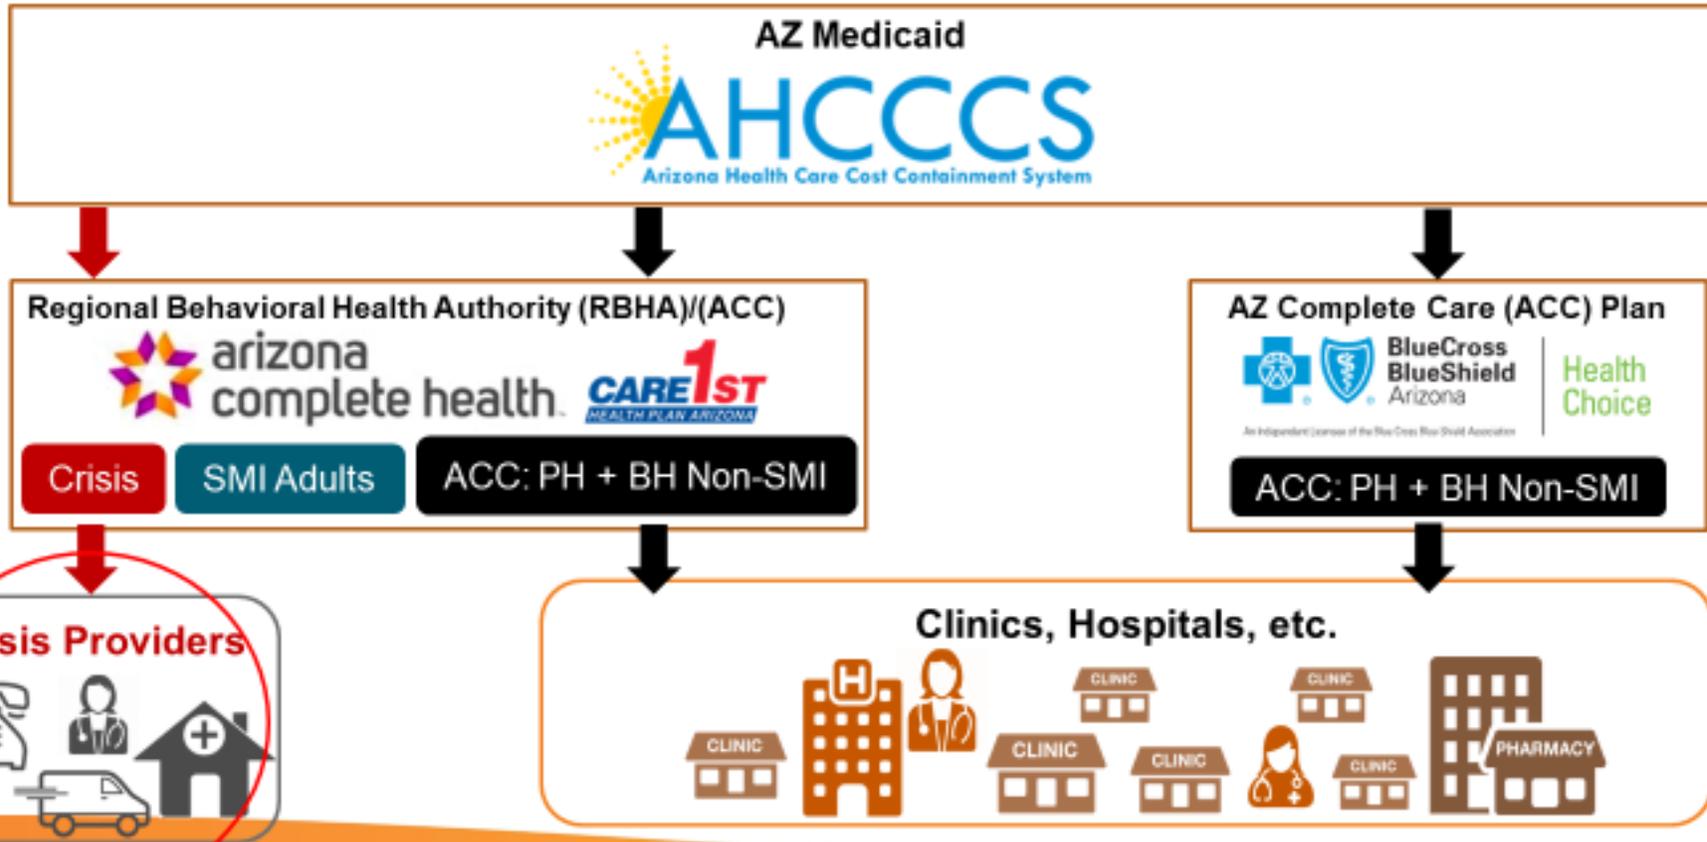

# Mobile Response Teams

- Currently Deployed:
  - Terros Mobile Response: This team is focused on providing services for those with mental and behavioral health needs.
  - Crisis Mobile Team: This team is also staffed by Terros and similar in services. This unit provides additional resources to the community, can respond county-wide and is not viewed as competing with the current CARE unit. This mobile team was recently deployed starting on June 3<sup>rd</sup>, 2024.
  - Community Alliance Response and Engagement (CARE): This unit is available 9:00 am to 7:00 pm, seven days a week, and responds within the city limits for calls of mild intoxication, minor medical issues, and can provide other resources for those unsheltered.

# Crisis System Structure (Northern GSA)

# Crisis Services: Our Approach

**EVERYONE** is eligible for crisis services, regardless of insurance status

## **Crisis Defined**

- Anything outside a person's ability to cope

## **No Wrong Door**

- 24/7 Crisis Line, Crisis Mobile Teams (CMTs) and Crisis Stabilization Units (23-hr Obs).
- Crisis never refuses

## **Community Stabilization**

- A philosophy of care where crisis intervention is done in the community versus removing a person from the community to address their crisis.

## **Real Time Escalation**

- 24/7 supervisor escalation support accessed via Crisis Line. AzCH/Care1st Crisis On Call support.

# The Crisis System Goals

*The Crisis System is designed for early intervention and assistance – not just when someone is a danger to themselves or others.*

## REDUCE:

- Unnecessary detentions, use of hospital emergency departments and involuntary psychiatric commitments
- “Revolving door” usage of 9-1-1 and Emergency Services

## INCREASE:

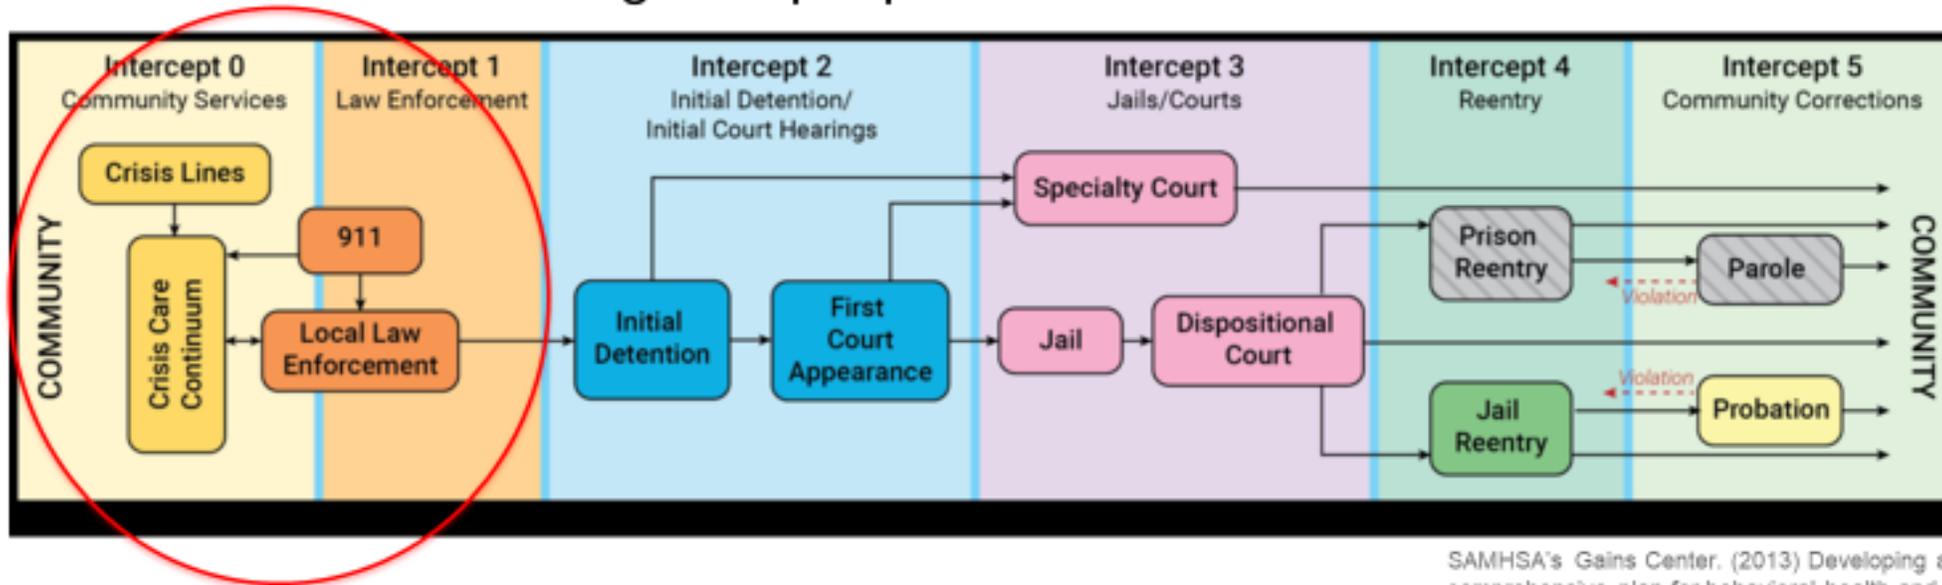

- Use of Crisis Services: Crisis Line, Crisis Mobile Teams and Crisis Centers  
*“No Wrong Door”*
- Communication and collaboration between first responders, crisis services providers, outpatient & inpatient providers, EDs, system partners, County Attorney’s Office, etc.
  - **Crisis Protocols-** Reference guide to crisis services in each county. Updated annually.
  - **Crisis System Meetings-** Quarterly county-specific venue for collaboration.
  - **Crisis Materials-** Crisis cards/flyers, LE Guide to Crisis
  - **Training-** Crisis System Overview, MHFA, CIT, Resiliency: 5 Skills, QPR, etc.

# Sequential Intercept Model

- Building best practice into the Crisis System
- Focused on creating multiple points of intervention

SAMHSA's Gains Center. (2013) Developing a comprehensive plan for behavioral health and Criminal Justice collaboration: The Sequential Intercept Model Delmar NY: Policy Research Associates Inc.

# The Crisis Line & CMTs

## The Crisis Line (CL)

**844-534-4673 (HOPE)**

*People you talk to on the phone.*

- Confidential 24/7 live answer by trained Crisis Specialists (CSs)
- Provider: **Solari**
- Stabilize, assess, coordinate, connect
- **If the crisis cannot be resolved by phone, the CL will dispatch CMT**
- Fast track calls from LEOs, 9-1-1 dispatchers, fire/EMS
- 9-1-1 Crisis Co-location

## Crisis Mobile Teams (CMTs)

*People who respond to the scene.*

- 24/7 availability
- Providers: **Terros, CBI, & Spectrum**  
Activated via the Crisis Line
- 1-2 Behavioral Health Techs (BHTs)
  - 25% Peers
- Respond, assess, coordinate, transport (transport voluntary only)
- GPS & cell dispatched
- Response within:
  - 60 min. metro & 90 min. rural
  - Current avg response time: **24 min**
- Co-locations for faster response
- Critical Incident Support

# NAZ Crisis Services Expansion: Grant Awards

- Planning for deployment of tablets for wildfire/urgent requests (NAZ).
- MHBG BSCA Grant awarded to AzCH for Crisis/Emergency Management expansion in NAZ
  - Adding two 9-1-1 Crisis Line Co-locations (in Yavapai County and Coconino County).
    - Flagstaff 9-1-1/Crisis MOU signed 4/29/24!
    - Now hiring
  - As if June, added 9-1-1-dedicated 24/7 CMT in Coconino County (similar to CARES)
  - Added additional 24/7 CMT Colorado City/Strip area
  - Funding to host two 1-Day Emergency Management/Crisis Conferences in 2024 & 2025 in NAZ.
    - Planning: Aug. 29, 2024 @ NAU High Country Conference Center, Flagstaff

# On the Horizon Additional Crisis/1<sup>st</sup> Responder Programs

## 9-1-1 Familiar Folks Program

- Partnership with interested 9-1-1 PSAPs
- Identify the most frequent 9-1-1 callers/familiar folks and engage their health plan/outpatient providers to reduce 9-1-1 reliance

## Additional Obs

- CBI
  - Youth & Adult Obs
  - Additional programs on the horizon
  - Targeting a winter opening

## Second Responder Program

- Specialty and Peer & Family Run Orgs
- Provide crisis after care services within 24 hours of receiving a crisis referral, then provide care for up to 6 weeks
- A short-term intervention to assist the outpatient BH provider with ensuring more appropriate services for the member post-crisis
  - SBH- Youth (Adult coming soon)
  - Spectrum- Youth
  - TransIntimate- LGBTQIA+ focused team
