

Required Additional Materials

1. Project Narrative:

I would like to plant Flagstaff native plants at the Sejo Lily trail head at the intersection of Sixth Avenue and Izabel Street. It will enhance the beauty of the area as well as provide pollinator opportunities for bees and other insects. The area is currently only grass and dirt on a grade. If there were shrubs and flowers planted, the waterflow that comes from the mesa during rain storms would also be slowed. I intend to get the soil, flowers and plants from Lily of the Valley, Warners or Violas. I would like to do a mix of different perennials and small shrubs that will flower at different times, be drought tolerant, and deer resistant so as to not attract deer to a busy intersection. I intend to water as needed, especially in the beginning to ensure plants become established.

Depending on availability, the following flowers and shrubs would be planted:

- Yarrow
- Blanketflower
- Bridges Penstemon
- Blue Flax
- Rubber Rabbitbrush
- Rocky Mountain Penstemon
- Mexican Hat

2. Budget:

- \$150 - 10-12 bags of potting soil
- \$300 - Native perennial flowers/small shrubs from a local nursery

3. Property Owner Permission:

This property is owned by the City of Flagstaff PROSE and would require approval to move forward with the project. I met with Sylvia Struss, Open Space Coordinator, at the site and spoke about future plans for the area. Sylvia gave feedback on what would be best planted there with her knowledge of the climate and area. She is in approval of the project and looks forward to working with me as I complete the project with grant funding.
