RE: Parking Enforcement Update
DATE: May 3, 2016

PARKING ENFORCEMENT UPDATE

- A proposed ordinance amendment to Ch. 10-1 and Ch. 10-23 as well as a related resolution setting parking fines has been prepared.
 - The amendment allows parking fines to be paid directly to the City instead of the County Court.
 - Appeals will be heard by the Special Magistrate instead of a County Judge.
 - Established a “repeat violator” and requirement to be filed with the County Court.
- A proposed ordinance amendment to Ch. 2-252 has been prepared.
 - The amendment give jurisdiction to hear parking issues before the Special Magistrate.
- The IT Department has identified a parking “app” that has proven effective in the Miami-Dade area.
 - The app is used through either a phone or tablet along with a hand-held printer. No more hand written citations.
 - Through a company called “T2”. The parking consultant has confirmed that this company has multiple solutions that can address all of our parking needs – both current and future.
 - A small demo is scheduled for Friday, May 6th to get us up and running and there will be a much more comprehensive demonstration presented to the Parking Committee to help implement future solutions.

Unlock the value of all-seeing parking enforcement.

*"The T2 enforcement solution is the best possible foundation
to build your parking operation around."*

- Parking Director, T2 Customer

Now You'll See Everything

The T2 enforcement solution increases your ability to keep your eyes on the enforcement process from start to finish. Powered by real-time information, our solution allows your staff to effectively enforce parking rules and maximize parking asset utilization.

Our solution works for you from the moment a violation occurs, ending only after the citation has been resolved. Built on the T2 Flex platform and hosted in our best-in-class private cloud, it becomes the epicenter of enforcement information including real-time data from meters, LPR, and mobile payment systems.

All financial activity is managed in Flex, so you can easily manage payment plans and payroll deductions, as well as take payments via credit card, cash, or check.

From Start to Finish

- Your enforcement officers receive real-time information on their handhelds for payments, permitted or timed parking, making it easy and quick to identify violations
- Officers issue a citation on their rugged handheld or Android/iOS mobile device—that information is automatically uploaded into Flex
- Appeals, hearings, and dockets are administered right inside Flex
- Repeat offences are escalated in real-time and you manage the boot/tow process
- After the citation is resolved all historical data is saved and accessible in T2's PCI Level 1 compliant private cloud

The Pinnacle of Parking Intelligence

Data is what we do. That's why our parking industry experts designed a cloud environment that captures every data point you need to successfully manage your operation. You can even utilize GPS tracking to monitor the movement and improve efficiency of your enforcement officers. We take care of the technology, while you take care of the business.

Your data—be it monthly citations issued by location, yearly citation revenue, or citations issued by officer—is clearly shown in the T2 parking management dashboard. Customizable dashboards provide the key to actionable insight that will allow you to make operational changes

Getting a Ticket Becomes a "Non-event"

T2 makes it easy for your customers to pay a citation—improving your collection rate, revenue, and customer service. Our online solutions remove long lines and unhappy customers from your parking office by allowing patrons to submit payments and appeals via your parking website.

Write Tickets Directly from Your Vehicle

With eTicketBook, officers can issue parking citations directly from their in-vehicle computers and upload all citation information to T2 Flex. This solution can be easily integrated with Genetec's AutoVu mobile LPR to dramatically improve workflow.

Collect More, Faster

Multi-space Pay Stations

Advanced Multi-Space Parking Technology Boosts Operational Efficiency

The University of Central Florida (UCF) replaced outdated pay stations with T2's Digital multi-space pay stations in its parking garages and surface lots. Leveraging the flexibility of the T2 pay stations' power management, communications, and payment options, UCF was able to achieve substantial cost savings in its parking operations.

The University of Central Florida (UCF) was a growing campus with goals to improve its parking operations. Unfortunately, its outdated pay stations were obsolete. The student population stretched the aging pay stations beyond their limited functional capacity, and its parking management accounting practices were antiquated and cumbersome. It became necessary for UCF to take the technological leap to modernize its fleet of parking pay stations to save costs within its parking operations and to meet the growing demands of its parking public. To that end, UCF needed a pay station that was technologically advanced, secure, and intuitive to use; a pay station and back-end software that combined the flexibility of optimum power management, communications, and multiple payment options in one all-encompassing unit.

UCF Parking Challenges

Increasing Parking Demands Due to a Growing Campus

UCF is the second largest university campus in America by number of students. It is home to more than 56,000 students. Between 1998 and 2005, UCF saw a spike in student numbers from 26,000 to nearly 43,000 by fall count. This 63 percent jump stretched UCF's parking operations, which served 13,711 parking spaces, including five parking garages, and

39 surface lots, beyond its abilities to offer streamlined parking operations. The old pay stations, installed since 1998, could not keep pace with the demands of a rising student population. More students, more pay stations, which meant burdened maintenance and collections staff struggling to keep pace with growing operational needs.

Streamlining Accounting Practices and Ensuring Compliance

Accounting practices and procedures needed to be overhauled to quickly and easily reconcile transactions. Moreover, credit card acceptance at the old pay stations fell short of meeting Payment Card Industry (PCI) standards. A revamp in security, hardware, and backend management software propelled UCF to cast its net wide in search of a superior parking solution.

Finding the Right Parking Solution

Participation in top trade shows offered the university a glimpse into the most sophisticated parking technology on display. To cement its decision to further revitalize its parking operations, UCF, in 2006, put out a Request for Information (RFI) for a proposed parking solution that focused on:

- Flexibility in power management and communications options for parking garages and surface lots.
- A wide range of convenient payment options.
- A comprehensive backend system that supported sophisticated remote configuration, maintenance alerts, and reporting.
- A demonstrated ability to continue improving the product over time by delivering “next generation” hardware and software capabilities.

Selecting T2

UCF selected the T2 solution for a number of reasons. Most importantly, UCF wanted to reduce operational costs using a flexible, secure product that steered it towards the Digital pay stations. The combination of optimal power management and the right communications mix offered UCF a winning formula. For garage parking, UCF could take advantage of the AC power already entrenched in the garages. And for the on-street installations, UCF opted to go with solar power. Twinned with mobile broadband communications, UCF did not need to dig to install electrical or data connections.

From a backend management perspective, T2’s open architecture platform, the Enterprise Management System (EMS), proved advantageous over competitive brands that were proprietary and inextensible in nature. EMS also offers real-time maintenance and repair alerts via e-mail, over-the-air configuration, and real-time reporting, further reducing operational costs. A 30-day trial by UCF using two Digital pay stations on-site effectively showcased

“By all accounts, I believe implementing this system has been most beneficial to the University in every way, both from the users’ standpoint, and that of the administration.”
Kris Singh, Parking Director

the pay stations’ excellent power management and real-time functionalities, and confirmed the value proposition that Digital’s pay stations brought to the university. The trial provided valuable insight into the capabilities and the expectations of operational use. The next step was to commission the DPT pay stations for installation over a three-year period thereby completing the university’s evolution to modern, sophisticated parking technology.

In 2006, UCF placed an initial order for 30 Digital SHELBY pay stations, the majority of which were installed in a new 1,640 space parking garage; the remainder were placed in high volume areas replacing the outdated pay stations. Over the next four years, the university added a further 30 SHELBY and 20 LUKE pay stations, bringing its new pay station acquisition total to the current 80 installed throughout campus. The pay stations are a mix of AC and solar power, wired and mobile broadband communications. They are configured for Pay-and-Display/Pay-by-Space operation, and to accept coins, bills, and credit cards.

Key Learning Points

As UCF found, when transitioning from the old to the new, there are numerous obstacles to overcome. However, Digital’s parking management solution and expertise cut into the challenges seamlessly and provided UCF with an easy integration. Key to the successful deployment was experience gained from each milestone reached. By phasing its installations, UCF’s parking management team was able to ramp up operations quickly.

During Phase 1, the team provided data and power requirements ahead of installation and relied on Digital to configure the pay

stations and to train UCF parking staff to use the new technology. By the time Phases 2 and 3 rolled, UCF had become adept at completing installation in-house and fine-tuning configurations on its own, while Digital took on a supportive role.

Return on Investment (ROI) Realized

The deployment of DPT's parking pay stations translated to one year in which UCF recouped all purchase and maintenance costs associated with its new pay station acquisition. "There are many tangibles and intangibles that have resulted in lowering operating costs and higher revenues," says UCF Department of Public Safety and Police technology manager, Andrew O'Mara. "One of the objectives was to reduce time spent for collections and reconciliation. With such features as EMS and real-time credit card processing, efficiency improved significantly; this produced lower costs in operation." Some of the benefits realized by UCF from its deployment of DPT pay stations included:

- A reduction in credit card settlement time, from three days to one.
- A reduction in collection times from an arduous all day process to periodically checking online the status of each cash storage device and determining pick-up locations.

- A reduction in time to configure rates and settings, from an entire workday to 15 minutes.
- A reduction in time for accounting reconciliation, from five hours a week to one hour each week, which freed up valuable hours for other important functions.
- A reduction in operating costs, resulting in less wear and tear on collections vehicles and fewer parts to support fewer pay stations.
- Real-time credit card processing, as opposed to manually downloading card information from each pay station, which reduces processing fees and eliminates exposure to bad debt.
- Proactive monitoring and alarming thereby streamlining maintenance and repair operations.

"By all accounts, I believe implementing this system has been most beneficial to the University in every way, both from the users' standpoint, and that of the administration," concludes UCF Parking Director, Kris Singh.

State College Streamlines Parking Operations with the UNIFI Parking Management Platform

The Borough of State College, Pennsylvania, home of Penn State University, faces a significant demand for parking. In order to accommodate waves of sports fans, academic visitors, and the campus community itself, the city maintains a large parking operation that includes three surface lots, three parking garages, and over 1,200 on-street parking spaces.

Before working with T2, State College used coin-operated, single-space meters that did not have the capability to communicate with handheld enforcement tools in real-time. Because of these meters, the parking enforcement office's process of collecting fines and issuing permits was painstakingly slow.

State College Parking Manager Charley DeBow found a complete set of solutions in T2's UNIFI Parking Management Platform. With T2, DeBow was able to implement a License-Plate Enabled (LEP) ecosystem with a combination of Digital Luke II multi-space parking meters, Genetec AutoVu LPR technology, and Parkmobile Pay-by-Cell.

A New Way of Parking

Under the new system, parking payments are made through Digital Luke II on-street pay stations or on the Parkmobile app. All transaction data is pushed directly to the Digital Iris cloud-based platform, where it is stored and updated in real-time and accessible to all enforcement handhelds.

AutoVu keeps track of who is paying and who isn't by reading license plates and communicating with Flex and Digital Iris to update the list of valid

permits and paid license plates. This allows for a system where each visitor can pay one price and park anywhere in the city with a Digital parking meter.

A New Look at Success

After an extensive planning stage, State College was able to transition seamlessly to the UNIFI Parking Management Platform. This seamless transition allowed parking operations to get back on track as quickly as possible, which resulted in easier parking management, and easier parking for State College customers.

"The Digital pay stations have made a world of difference," DeBow said. "They've allowed us to increase revenue through the elimination of piggybacking, provide more payment options to customers, and provide a single parking credential that can be used anytime our patrons park in State College."

Since adopting Flex, State College has seen immediate benefits, including:

- **30% revenue increase in lots with multi-space pay stations**
- **\$30k/year revenue increase by eliminating piggybacking**
- **Savings of \$2,500/year from the elimination of hangtags**
- **Pay station collection cycles cut in half with pay-by-phone option**
- **200% increase in online sales—dramatically reducing in-office traffic**

T2 gives DeBow more power over his operation through a streamlined set of solutions that work together to tackle his parking challenges head-on and make parking better for everyone in State College.

"Having a unified parking management system has revolutionized the way we manage parking," DeBow said. "The ROI numbers are fantastic and continue to improve."

VACATION RENTAL ENFORCEMENT UPDATE

- For several months we have been working with a volunteer to create a spreadsheet of properties that have ads on the multiple rental websites. Ms. Adair is an “official volunteer” for the City and she will continue to work with the Code Enforcement Department on collecting information and assisting with case management specific to this topic.
- Eighteen properties located in the R1 and R2 zone on South Beach have been issued a Notice of Violation.
 - 13 properties are in a “monitor” status and 5 properties are active.
- A page was added to Code Enforcement’s website that details all the requirements for having a vacation rental. The link to this page has been included in our Notice of Violation letter.
- A “Friendly Letter” has been drafted and is ready to send to all R4A properties. This has not been done yet as waiting for review of the ordinance as it relates to R4A zone.
- The City is also investigating the possibility of contracting with a 3rd party, Host Compliance, that continuously monitors 20+ websites, provides notification to the City as well as both the County and State.
- We have met with the SLC Tax Collectors office.
 - They are going to pull a list of all properties in the 34949 zip code that are registered as a short term rental and advise them that they must comply with the City regulations.
 - They will not create any further Tourism Tax accounts without an approved Conditional Use from the City.
 - They will update their website to include a link to the City’s website.

SHORT TERM / VACATION RENTALS

Vacation / Short Term rentals have become extremely popular throughout the State of Florida. The ease in which a homeowner can rent their property utilizing websites such as VRBO.com and Homeaway.com has helped spur this growth and popularity. However, prior to deciding to rent your property as a vacation or short term rental, there are several factors that must be considered as well as associated fees.

STATE OF FLORIDA - DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATIONS

A "vacation rental" is defined by the State of Florida as any dwelling or unit rented to guests more than three (3) times per year for periods less than thirty (30) days or a transient public lodging establishment, which is advertised and held out to the public as a place regularly rented to guests. Such properties require licensing by the State of Florida. Applications and instructions can be found on the DBPR website for the Division of Hotels and Restaurants at www.myfloridalicense.com.

LOCAL REGULATIONS

Vacation / Short-term rentals are also regulated by both St. Lucie County and the City of Fort Pierce. The following list of rules apply to all properties within the E3, R1, R2, R3, R4, R4A and R5 zoning districts. If you are unsure in which zone your property is located, you can find it at www.paslc.org.

- Dwelling Rentals are allowed as a permitted use in all residential zoning districts, providing the rental is for a term of at least six months.
- To rent a unit for a term of less than six months requires an

approved conditional use permit. You can download the [Conditional Use Application here](#).

- o All vacation rentals (less than 30 days as defined by the DBPR) are required to have a valid business tax receipt (formerly called an Occupational License) from the City of Fort Pierce. Business Tax Receipts are issued by the City Clerk's Office.

TOURISM DEVELOPMENT TAX

In addition to the state and local regulations listed above, a five percent (5.5%) tourist development tax is imposed on anyone who rents or leases any living quarters or accommodations for a period of six months or less. Living quarters are accommodations in any house, hotel, motel, apartment, rooming house, mobile home park, recreational vehicle park or condominium. Information on the Tourism Development Tax can be found on [the County's website](#).

STATE OF FLORIDA - DEPARTMENT OF REVENUE

A sales tax identification number is required to register with the St. Lucie County Tax Collector's office. Contact the Florida Department of Revenue to obtain a sales tax identification number. Information on sales tax can be found at the [Dept. of Revenue website](#) or by calling their local office at 772-429-2900.

Dear Vacation Rental Owner / Manager,

We have become aware that a vacation rental property is operating at this South Hutchinson Island location. A "vacation rental" is defined by the State of Florida as any dwelling or unit rented to guests more than three (3) times per year for periods less than thirty (30) days. Such properties require licensing by the State of Florida.

A flyer issued by the Florida Department of Business & Professional Regulation (DBPR) entitled a "Guide to Vacation Rentals and Timeshare Projects" has been enclosed to provide helpful information. Applications and instructions can be found on the DBPR website for the Division of Hotels and Restaurants at www.myfloridalicense.com.

The City of Fort Pierce also has specific requirements that must be met when operating a short-term rental within the city limits. These include:

- Dwelling Rentals are allowed as a permitted use in all residential zoning districts, providing the rental is for a term of at least six months. To rent a unit for a term of less than six months requires an approved conditional use permit. An application for the Conditional Use has been included. Please contact the Planning Department at 772-467-3729 with any questions or for additional information.
- All short-term dwelling / vacation rentals are required to have a current and valid business tax receipt. This can be obtained through the City Clerk's office at City Hall. Their office can also be reached by telephone at 772-467-3065.

Please consider this as a friendly reminder to a valued partner in our community. These actions are required to continue operation of a vacation rental property. Without taking these steps, operations as a vacation rental will need to cease or the matter will be addressed by the Code Enforcement Department.

WHAT WE DO

Analyze needs and regulatory objectives

Develop short-term rental ordinance

Devise policies and procedures for registering and permitting hosts

and manage outreach registration and permitting

Monitor hosts-compliance and identify and register new hosts as they appear

Collect and remit TOT from hosts

Audit TOT and enforce ordinances as needed

Analyze data and propose regulatory changes if needed

Host Compliance helps local governments enforce short-term rental regulation more cost-effectively than they can do it in-house

WHAT WE DO

Host Compliance helps local governments implement, monitor and enforce short-term rental regulation without adding internal resources or net costs. In doing so our partner municipalities achieve real tangible benefits, including:

- Enforceable regulatory frameworks that simultaneously protects citizens' property rights and the rights of the neighbors
- A dramatic reduction in noise, parking and trash complaints related to short-term renters
- Fair, continuous and consistent compliance monitoring and enforcement
- Improved municipal finances resulting from higher TOT collections and permitting fees
- Lower monitoring and enforcement costs
- State-of-the-art reporting and analytics
- 24/7 hotlines for neighbors to report problems
- Access to easy to use web and mobile applications that allow property owners and local government staff to easily manage compliance duties with no added paperwork

HOW WE DO IT

Host Compliance work closely with our local government partners to understand their needs and regulatory objectives and craft enforceable short-term rental ordinances and practical policies and procedures. Once the legislation is approved, we help identify, educate, register and permit rental property owners and collect Transient Occupancy Taxes. Finally we assist our partners with TOT audits and data analysis to uncover specific as well as systematic problems that needs to be addressed.

HOW WE ARE DIFFERENT

Host Compliance was founded on the premise that effective and efficient enforcement of short-term rentals regulation requires 'Big City' and "Big Data" technology. Unlike any other vendors we have therefore invested significant resources into building state-of-the art monitoring solutions and workflows

that enable us to deliver fair, continuous and consistent compliance monitoring and enforcement of any regulatory regime. As a result no other external service provider or internal compliance department can rival us when it comes to performance and cost.

RE: Animal Control Enforcement
DATE: May 3, 2016

ANIMAL CONTROL ENFORCEMENT UPDATE

- From January 1, 2016 to April 30, 2016 Animal Control has issued 108 citations:
 - Registration Required (includes 1 breeder registration) – 34
 - Rabies Required – 25
 - Running at Large / Fail to Restrain – 27
 - Animal Care / Injury / Abuse & Cruelty – 12
 - Public Nuisance / # of Animals / Public Areas – 10
- In addition to bite cases, stray dogs and cats and welfare checks, Animal Control has responded to the following types of calls in the past few months (this is just a sample):
 - Dead possum with live babies
 - Injured birds – owls, hawks, Sandhill cranes, gannets, and pelicans
 - Dead sea turtle
 - Nuisance alligator
 - Goat running loose
 - Kitten stuck in pipe
 - Ducklings stuck in drain
 - Chicken complaints
 - Large iguana eating birds and their eggs
 - Dead hog in roadway
 - Snakes at Public Works
- We continue to work with PetData on our registration program.
 - Prior to PetData our annual registration income was \$3,880. In FY 2015 (our first full year with PetData) our registration income was \$10,658.
 - We are on track this year to meet that same income.

- We now have PayPal readers to make pet registrations easier.
 - In 2015 we attended a rabies clinic hosted by the Humane Society but we were unable to issue any registrations and turned people away because no one had cash or check to pay.
 - All three ACO's now have card readers in their trucks and can issue registrations on site.
 - The readers are equipped with a chip reader, so are compliance with the new regulations.
 - The readers are connected to the PetData bank account and are pre-loaded with the registration costs.

- We have a plan to improve our call follow ups, issuing reports and record keeping.
 - SLC purchased an enterprise license for the animal control module from SunGuard. It is available to the COFP and in fact is already at the FPPD.
 - Shay is working in two phases –
 - Upgrading the existing laptops to a “Toughbook” type of laptop for use by AC in the field. These computers would be leased v. purchasing outright.
 - Once received, they will hopefully be set up with the OneSolution program, which will be available in the field. This will require coordination with SLC Operation Center, FPPD and PSLPD (who already has it set up). We are currently just in the initial exploratory phase of this project.
 - We will also have access to the CAD program from SLC Operation Center that provides access to all AC calls – pending, active and past.

RE: Anti-Tethering Amendment
DATE: May 4, 2016

In preparing to amend our ordinance to include rules regarding anti-tethering and restricting outdoor dogs, staff reviewed the ordinances of Martin County, St. Lucie County and Port St. Lucie. It should be noted that both Martin County and St. Lucie County recently adopted substantial ordinance amendments that include anti-tethering regulations.

During this review, it was noted that our current ordinance was lacking in several areas and it would be prudent to conduct a full review and amendment in addition to including restrictions for outdoor animals. Comments are provided in the red-line version indicating the jurisdiction from which the item was copied. Below is a summary of the relevant amendments.

- Definitions
 - In addition to adding multiple definitions, the definition for a shelter and its requirements were deleted. The requirements for a sufficient shelter were moved to Sec. 4-22.
- Sec. 4-22 - Restraint of Animals
 - Utilized both Martin & St. Lucie County ordinances.
 - May be kept in a shelter if in a fenced area only - cannot be chained or tethered.
 - Shelter requirements are upgraded from current ordinance.
 - Fenced area requirements are established.
 - Tethering is only permitted if a responsible person is present.
 - Tethering requirements are upgraded from current ordinance.
 - Prohibits any dog from being kept outdoors during extreme weather conditions.
- Sec. 4-88 - Duties and powers; immunity from prosecution
 - Provides the authority for animal control officers to enter onto private property to investigate animal complaints - with the exception of fenced in areas, dwelling houses or structures.
 - Removes the exception of fenced in areas if rabies is suspected or if an animal is in need of immediate medical attention.
- Sec. 4-89 - Interference with animal control officer prohibited
 - Is included in all three other jurisdictions.
 - Makes it a violation for an unauthorized person to release an animal from a trap.

(c) Within thirty (30) days of the issuance of a citation for a violation of this chapter, the person cited must comply with one of the following options for disposition of the citation:

(1) Pay the reduced fine, as indicated herein, to the city in the manner provided on the citation form. A person making this election shall be deemed to have admitted the infraction and waived the right to a hearing; or,

(2) Request a hearing to contest the citation in county court, as provided by F.S. § 828.27, by contacting the ~~civil infraction hearing coordinator designated by the chief of police~~ St. Lucie County Clerk of Court, in the manner provided on the citation form.

~~i. The civil infraction hearing coordinator will arrange for a hearing before the county court and cause the person contesting the citation, the citing officer, and any witnesses to be notified of the court hearing by summons.~~

~~ii. The civil infraction hearing coordinator may dismiss a citation, prior to scheduling a hearing, when the facts presented are likely to result in an acquittal by the county court.~~

iii. The standard of proof in the court hearing shall be a preponderance of the evidence.

iv. Contesting the citation shall be deemed a waiver of any right to pay the reduced civil penalty, and upon a finding by the court that the civil infraction was committed, the court may order the violator to correct the violation and impose a penalty up to the maximum civil penalty of five hundred dollars (\$500.00) plus all applicable costs of prosecution and court costs, but in no event shall any such civil penalty imposed by the court be less than the reduced civil penalty as provided in this article. The judge may provide for the civil penalty to be paid, and the violation to be corrected, within such time as the county judge determines to be appropriate. If the person found to be in violation fails to pay the civil penalty or to correct the violation within the time provided, a civil judgment shall be entered against that person in the amount adjudicated, and any other lawful sanctions may be imposed by the court.

Comment [P33]: Moved down in section to (i)

(d) Any person that is issued a citation and fails to pay the reduced civil infraction or request a court hearing within thirty (30) days, or any person that requests to contest a citation by scheduling a court hearing and then fails to appear at such hearing, shall be deemed to have waived the right to contest the citation and a civil judgment shall be entered against the person in an amount not to exceed the maximum civil penalty of five hundred dollars (\$500.00) plus all applicable cost of prosecution, plus court costs, but in no event shall any such civil penalty imposed by the court be less than the reduced civil penalty as provided in this article. However, the court shall have the discretion to continue or reschedule any hearing when it determines that doing so will further the interest of justice.

(e) Payment of any civil penalty imposed by the county court shall be made to the clerk of court, who shall forward the monies collected to the city.

(f) Civil penalties imposed pursuant to this article shall be independent of and in addition to any fees, cost, or charges arising from the impoundment or registration of animals as provided in this chapter.

(g) As provided by F.S. § 828.27, in addition to any civil penalties imposed pursuant to this article there shall be imposed and collected a surcharge of five dollars (\$5.00). The proceeds from such surcharge shall be used to pay the cost of the training for animal control officers.

(h) Nothing in this chapter shall prevent officers from charging violations related to the care and control of animals as criminal offenses, when so provided by Florida Statutes.

(i) Nothing in this chapter shall prevent the Animal Control Division Supervisor from dismissing a citation if the violation is corrected or the facts presented are likely to result in an acquittal by the County Court.
