PROPOSAL

2/9/16

Granny's Kitchen
901 Ave D
Fort Pierce, FL

CRS Plumbing will provide and install the following:

CRS Plumbing is to supply and install (1) 1050 gallon grease interceptor. This tank will meet local and FPUA code requirements. The tank will have the following; (2) traffic rings and covers style U.S. Foundry style 170 or approved equivalent, (2) clean out tees PVC DWV two way with rings and covers U.S. Foundry style 7620 or approved equivalent. Tank is to have 4" walls, 4" bottom, 6" traffic bearing lid to meet H-20 loading requirements with rebar reinforcement. Tank will have (2) coats of water based epoxy coating inside and outside. Tank will have (2) tee's inside of tank with 316 stainless steel support hangers. All support material will be stainless steel and pipe will be PVC schedule 40.

CRS Plumbing will move the existing ice machine to a new location for construction. The excavation of this grease interceptor will be in the driveway area on the south east corner of the building. The driveway must be closed for 2 to 3 days pending inspections and backfilling. The concrete under the ice machine must be broken up so that piping from the existing grease trap in place on the east side of the building can be re-piped and go to the new location of the grease interceptor being installed. This tank will require the concrete to be removed and to be replaced after inspection – then the ice machine is to be placed back in the area which it was removed from. After the grease interceptor has been tested and inspected, all fill will be removed from the job site and cleanup will be done by CRS Plumbing. Per request – CRS Plumbing will not pour any concrete or do any asphalt work- all other work on repairing sidewalk and parking lot will be done by the city as per request.

CRS Plumbing will set elevations of manhole covers and clean out covers before the repair of the parking lot and the driveway. CRS Plumbing is going to connect the existing piping to and from the existing grease interceptor, no inside piping – no work inside is included in this bid.

Shop drawings, submittal data, and permitting will be submitted to the city and FPUA within 24 working hours from time of collection of deposit

This pricing includes: Shop drawings by CRS Plumbing to the city and FPUA, permits, testing, inspections, labor and material.

Cost: \$8795.75

Payment will be 1/3 down at acceptance and 1/3 at tank set, and 1/3 at final. Final payment will be paid before final inspection is completed which will be scheduled within 24 hours of final payment.

This proposal is valid for 45 days at which time it becomes void.

Acceptance of Proposal:
