Subject: Thank you Mr. Reals and your Fleet Maintenance Staff!

We would like to take time to give our appreciation and thanks to the City of Fort Pierce Fleet Maintenance staff. As you are aware, our van has definitely seen better days! It is getting on in years but has traveled many important miles, carrying very precious cargo. The van means everything to us and we must be able to count on it not only to be safe but reliable. There are many days there are 4-5 dogs and/or some cats on board and stalling out in 90 degree heat or the pouring rain would be disastrous!

The crew, under the leadership of Jean Longcore, have always been helpful and efficient in maintaining the vehicle. When we have a low tire, smell gas, or need a tail light bulb replaced, they stop to come to our aid and promptly fix the problem. They are friendly and helpful and we are grateful for their attention and care when working on our vehicle. We may not be chasing criminals but our work is important and the many pets and their owners that participate in the United For Animals Happy Hounds and Frisky Felines program agree and are thankful we are able to get to them. Whether we are transporting pets or delivering food or medical supplies, dog houses, flea products, or taking a trip to the veterinarian, we are a welcome sight to them. Most of our families do not have transportation so it is necessary to have our "mobile unit" to be able to reach out.

Mr. Reals should be proud of his staff and the fine work they do in keeping us on the road! Thank you Jean Longcore, Doug Desmarais, George Hunter, Maurice Parnell and Sandy Freudenthal, for taking such good care of us!

Sincerely,

Janice Douglas and Susan Parry
United for Animals
