Hi Mr. Andrews. I was recently involved in the FDOT Jenkins Rd / SR70 project, completed this month. As you may have heard, the project was very challenging (to say the least), mostly due to the extensive presence of underground utilities, narrow work zone widths and wet conditions.

Despite all of the difficulties, we were able to form a very strong team of committed stakeholders and complete the project ahead of schedule. Ed Seissiger was one of the key members of that team. He remained closely involved with the project and attended every progress meeting. Ed's technical input was instrumental in resolving multiple constructability issues and his involvement was of great value to the project team.

As such, I wanted to reach out to the City of Fort Pierce, on behalf of our entire project team, to express our appreciation for the excellent job by Ed Seissiger!
