PUBLIC HEALTH

What is Public Health?

“Public health is the science and art of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, public and private, communities and individuals”

World Health Organization

“Proudly Serving Our Community Since 1947”

Ten Essential Public Health Services

- 1/ Monitor** health status to identify community health problems.
- 2/ Diagnose and investigate** health problems and health hazards in the community.
- 3/ Inform, educate, and empower** people about health issues.
- 4/ Mobilize** community partnerships to identify and solve health problems.
- 5/ Develop policies and plans** that support individual and community health efforts.

"Proudly Serving Our Community Since 1947"

Ten Essential Public Health Services (continued)

6/ Enforce laws and regulations that protect health and ensure safety.

7/ Link people to needed personal health services and assure the provision of health care when otherwise unavailable.

8/ Assure a competent public health and personal healthcare workforce.

9/ Evaluate effectiveness, accessibility, and quality of personal and population-based health services.

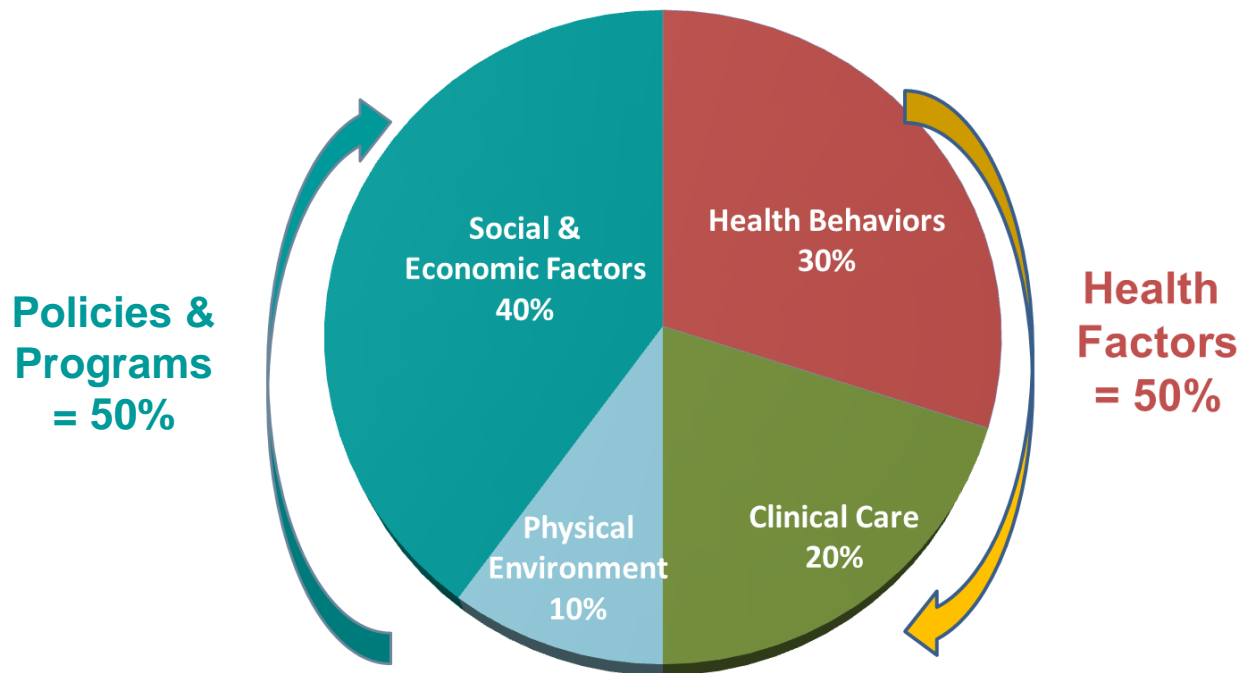

10/ Research for new insights and innovative solutions to health problems.

2. Protect financial cost per service ratio
3. Prevent lack of leadership with an organizational, communication and cultural plan

2016-18

7 Florida Health Performs

▲ childhood vaccines

▲ health equity

▲ trauma services

▼ hiv infections

▼ infant mortality

▼ inhaled nicotine

▼ licensure time

7 Agency Goals for 2016-2018

1. Increase vaccination of children
2. Ensure Floridians in all communities will have opportunities to achieve healthier outcomes
3. Develop a Trauma System that ensures the highest quality service for all Floridians
4. Reduce the incidence of HIV infections
5. Reduce infant mortality across all races and ethnicities
6. Decrease inhaled nicotine use
7. Decrease time to issue licenses to health care professionals

FL Health Performs

1. Childhood vaccination: increase the percentage of 2-year-olds who are fully immunized from **86% to 90%** through education
2. Health equity: establish a reporting structure for reporting progress and best practices and measure the percent of increase in number of new partners that collaborate with health departments to address one or more local community health influences
3. Trauma system: restructure Florida's current trauma allocation methodology and standards.
4. HIV: reduce the number of newly diagnosed HIV infections in Florida by **2% annually** since 2014
5. Infant mortality: reduce the three year rolling average black infant mortality rate from **10.9 to 8.3 per 1,000 births**
6. Inhaled nicotine: reduce the prevalence of inhaled nicotine in youth from **14.7% to 12.6%** and to reduce the prevalence of inhaled nicotine in adults from **21.2% to 19.2%**
7. Licensure time: reduce the average time to issue a license from **65 days to 49 days**

Impact on Florida's Families

- High immunization levels **contribute** positively to the state's economy by **lowering** disease incidence, **lowering** healthcare costs and **protecting** travelers from vaccine-preventable diseases.
- All Floridians regardless of gender, race, ethnicity, age, geographic location and physical and developmental differences should be able to attain the **highest** level of health. **Eliminating** health gaps between different communities in Florida is a strategic priority for the department.
- Florida will have an integrated Trauma System that **drives** performance through data reporting and competition with a goal of **ensuring** quality outcomes for severely injured patients.
- By **reducing** the incidence of HIV, more Floridians will live **longer** and **healthier** lives.
- **Reducing** the black infant mortality rate will **improve** health outcomes for Florida's children, families and communities.
- By **decreasing** inhaled nicotine use through outreach and education, Floridians will experience **longer** and **healthier** lives.
- By **decreasing** the licensure processing time, health care professionals will be able to get to work in a **timelier** manner.
