Subject: South Beach Park Issues

I want to thank you for your attention to our complaints about activity in South Beach parks, especially Jaycee, on weekends. I am well aware of the demands on limited manpower, the need for some of our assigned officers to assist in training, and the usual summer demands in other parts of the city as well. The plan you have presented to try to restore order, safety, and enjoyable surroundings to our recreational sites that are so overtaxed on weekends is much appreciated by all. I have had very positive responses as I have started to tell residents that I am confident you will keep things under control in a balanced manner for the benefit, safety, and comfort of all users. The fact that you have reached out to other agencies for help, especially with water based issues you are not staffed or equipped to address at this time, is encouraging.

Hopefully I will see you at the Unity In The Community event and can thank you in person!!
