### Criteria:

In order to determine whether your request for Variance meets all the criteria in Section 22-108 of the City Code, please answer the following questions. Please provide answers of questions on separate pages:

1. Describe those conditions peculiar to the specific property and not applicable to other lands, structures, or buildings in the same zoning district.
2. Do special conditions or circumstances result from actions other than that of yours? Please explain
3. Identify any undue hardships or deprivation of commonly enjoyed property rights that would result in the literal interpretation of the code for the zoning district.
4. What is the minimum variance that would give the reasonable use of the land, building, or structure?
5. Explain how the variance request would not impair the intent of the zoning ordinance or be detrimental to the general public welfare:

1. My home was built in 1952 so it was built on a 17-foot setback rather than a 25-foot setback that is required today. So, therefore my building is a legal non-conforming building.
2. Yes, special circumstances result from the fact that I was not the owner in 1952. I just recently purchased this home in 2017, so understandably I had no control over this.
3. If my home was built according to the code for the zoning district it would cause undue hardship because the home I would be creating wouldn't look continuous from the street. I would have to draw up the building plans with an additional 8-foot setback from the original line that was originally there when I demolished the carport, which would make the overall building appearance not look cohesive and awkward.
4. The minimum variance is that 8-foot variance in order to have the addition and the existing house line the same.
5. I am not asking for any other variances. All I am doing is keeping the same line of construction that I already have with the house that exist.
6. I am asking that you please take into consideration my plea and allow me to build onto my home in order to make my family comfortable. I understand the regulations have since changed since 1952, but I truly believe this is a special exception considering I am not adding onto the the lines that were already there. Thank you!
