Fort Pierce, FL 34950

Re: Relocation of Wastewater Reclamation Facility to Energy Drive

Dear Mr. Cisneros:

The relocation of the existing wastewater reclamation facility to the Treasure Coast Energy Center is a project that has been discussed for a very long time. We are very glad and proud to see this much needed project come to fruition.

The environmental, economic, and residential benefits the city and surrounding areas will experience is the most important aspect. The environmental benefits are vast and highly important. Our freshwater system is home to so many vital pieces of health and wellness of the area. In times such as these, the improvement that will be made to the economic stability of our great City is not only needed but welcomed.

On behalf of the City of Fort Pierce, Florida we would like to join the Fort Pierce Utilities Authority and submit a grant application for potential financial assistance from the State of Florida in offsetting the total project costs with the Resilient Florida Grant Program. The City will submit the application on behalf of the Authority and the project for the betterment of the community as a whole.

The City of Fort Pierce is excited to submit the application to the State and if additional information is required, please let us know. We appreciate the time and commitment of the State and the Fort Pierce Utilities Authority in making this project a success.

Sincerely,

Linda Hudson
Mayor
