Good Morning Tracy,

Sounds good! 4,150 is around the exact amount; 4,500 is to account for vertical distances (if needed) for the handholes. You are correct in that billing will reflect what was actually utilized.

Thanks!
Eric

Eric,

I have to place this on the agenda for approval. The contractor came up with 4,150 LF of PVC pipe when he did his takeoff so if the final plans reflect conduit under the 4,500 LF I assume that the billing will reflect what was actually utilized, correct?

Good Afternoon Tracy,

I have finalized the Street Lighting for Ohio Ave based upon your corrections to our paper plan, and have the data you have been requesting. This is what we anticipate City of Fort Pierce installing, that FPUA will provide:

Estimated 2" Sch 40 PVC Conduit: 4500'
Estimated 24" – 2" Sched 40 Elbows: 150
Street Lighting Handholes: 49

FPUA will install the cable, lighting poles and fixtures, and terminations. The estimated cost for this street lighting project is roughly just under **\$200,000** to be invoiced to the City of Fort Pierce; please advise if you accept the cost and we will proceed towards finalization come October 1st. I am finishing up the design work for the pole relocation which will be finalized and ready come October 1st.

Please let me know if you have any questions in the meantime.

Thanks,
Eric

Tracy,

I have the design completed; I am aiming to have the numbers to you this week.

Thanks,

Eric

Tracy,

Almost, I'm finalizing it and should have them this week. Sorry for the delay, I've almost finalized the pole relocation portion and will be in touch with you on that shortly as well. Thank you again for your patience.

Thanks,
Eric

Eric,

I received the contractor's labor quote for the installation of the streetlighting conduit. I want to take this quote and FPUA's material quote at the same time to the commission for approval. Do you have your numbers yet?
