Detailed Cost Estimate by a Licensed General Contractor

As a fully Licensed and State Certified construction firm, we have our own internal estimating division that allows us to be more precise and efficient when cost estimating on all our all projects.

Our internal estimating team has put together a cost estimate to complete construction that we as an organization believe is current to the market trends and not comprising material quality for cost.

Property Development Utilization

Growing up in Fort Pierce makes this project truly hit home (pun intended). We understand the commitment and responsibility to come back and build a development that is a part of a bigger picture revitalizing and transforming Fort Pierce. While reviewing the sites we wanted to ensure that we could maximize its potential and utilization. We believe four modern multifamily units will add to this changing community.

We are committed to hire only subcontractors such as electricians, plumbers, air conditioning, concrete, and roofers for this project that are from the immediate local area of Fort Pierce. By hiring local subcontractors, an immediate economic impact to the area can be made. As a Minority-Owned Business Enterprise, we value seeking and partnering with those other local firms who are also disadvantaged.

While construction of the development is underway, our management team will focus on communicating with the Fort Pierce Affordable Housing program, to get those who are qualified and in need of a quality residence, identified and ready for a move in date. Affordable housing is a national issue in the United States and our commitment is to find opportunities by utilizing our resources to develop sustainable affordable housing. Whether it be a single parent or a family of six, we will provide an affordable solution that is energy efficient and sustainable to the environment.

Once construction is complete, our management team will employ a property management firm local to Fort Pierce to ensure there is immediate service and assistance available to our tenants. Our goal is to have this development built by the community for the community. We strongly believe in supporting the local area businesses and by utilizing their services, we can provide a better overall footprint as a sustainable housing developer.

Development Narrative

Fort Pierce is one of Florida's historic cities poised with opportunity in the eyes of our team. Our multi-family duplex development would bring in a multitude of positive take aways for the city and our end-user Tenants. Those features this development focuses on, are the following:

- Two Additional affordable housing alternative units within the immediate area.
- Modern design Duplex with modern luxuries
- Restore the urban landscape and add trees to along the sidewalks.
- Connect local small business and minority/disadvantage business for concentrated economic growth.
- *Assist* in the vision of the city by their enabling private sector development of new residential units to update existing development patterns.

Our plan for 1620 Avenue E. is to deliver an aesthetically modern multi-family duplex that is for those local families in need of affordable housing while striving to be a contributor of the future of Fort Pierce.

We are committed to ensuring those families in that are in need of housing in the City of Fort Pierce, can be provided a quality place to live at an affordable cost.

ABOUT US

The life we are blessed with is not so much about the beginning or the end, but more about the **“Journey”** between. In the same way when you are developing or building, you can get any reputable construction management firm to build your project, but the difference maker is the Journey. The **Journey** will dictate the future.
