Application for Zoning Atlas Map Amendment

Application submission shall include the following:

•**TRC** (*Initial Submission): One (1) original and (8) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

•**Planning Board**: One (1) original and (16) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

•**City Commission**: One (1) original and (11) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

In addition to a complete application, packets shall include:

- ☑ Warranty Deed & Legal Description
- ☑ St. Lucie County Property Record Card
- ☑ Statement of why there is a need for the proposed future land use map amendment and how the amendment will result in an orderly and logical development pattern; statements how amendment(s) are consistent with Comprehensive Plan; how future land use designation is compatible with future land use designations and existing land uses surrounding the amended lands; identify future land use designations and existing land uses within a ½ mile of the subject property that have the same or greater type of proposed future land use designation; data and analysis to support conclusions.
- ☑ Current Survey
- ☑ Environmental Study
- ☑ Traffic Impact Report
- ☑ *** Capacity Analysis-Separate Form
- ☑ Drainage Analysis
- ☑ Historical Report
- ☐ 1 CD of all documents submitted in PDF
- ☐ Other_____

1. Property Address/Location: 3720 Okeechobee Rd, Ft. Pierce, FL
2. Property Tax ID(s): 26494
3. Total Acreage: 1.06 ac
4. Existing Future Land Use Designation: BC - Boundary Commercial
5. Existing Zoning Classification: C-2 - Neighborhood Commercial
6. Proposed Zoning Classification: C-3 - General Commercial
7. Other applications being submitted concurrent with this application, if any: Future land use map Amendment

8. Describe the existing uses, improvements and structures on the amendment lands: Empty building not being utilized. Had been a church previously.

9. Are there any identified or possible historical structures on the amendment lands? No.

10. The reason for making this request: All surrounding properties are currently zoned C-3. Would like to unify the lots.

11. **CAPACITY ANALYSIS**

I. **Site Data:**

	Existing Use	Future Land Use	Zoning
North	FPUA	GC	C-3
South	A/C Company	GC	C-3
East	Oil Company	GC	C-3
West	Vacant land	GC	C-3

	Future Land Use	Zoning Classification	Maximum Intensity Residential: Dwelling Units per Acre Other: Square Footage	Total Acreage	Flood Zone
Current	BC	C-2	10 du/ac	1.06	X
Proposed	GC	C-3	15 du/ac	1.06	N/A

II. **Public Facilities Information:**

A. Potable Water:		
Average Use	Residential: 100 gallons per day per person (du x 2.6 = persons x 100 gpd = demand) Other: 0.125 gallons per day per square foot	
Demand Analysis	Maximum	
Current Zoning	Total gallons per day	2,600
Proposed Zoning	Total gallons per day	3,900
Change in Demand	**Total gallons per day**	1,300

B. Wastewater:		
Average Use	Residential: 100 gallons per day per person (du x 2.6= persons x 100 gpd = demand) Other: 0.1 gallons per day per square foot	
Demand Analysis	Maximum	
Current Zoning	Total gallons per day	2,600
Proposed Zoning	Total gallons per day	3,900
Change in Demand	**Total gallons per day**	1,300

C. Parks and Recreation (Residential Classifications Only):
(Du x 2.6 = persons + 44,227 = population /LOS)

Park Type	LOS	Existing Population Park Demand	Proposed Population Park Demand	Change in Demand
Regional	20 acres per 1,000 people			
Urban District	5 acres per 1,000 people		N/A	
Community	2.5 acres per 1,000 people			
Neighborhood	1.36 acres per 1,000 people			

D. Public Schools (Residential Classifications Only):

Application for Future Land Use Map Amendment

☐ Large Scale (>50 acres) FL. Statute 163.3184 ☒ Small Scale (≤50 acres) FL. Statute 163.3187

You are encouraged to schedule a Planning Discussion meeting with the Planning staff.

Application submission shall include the following:

•**TRC** (*Initial Submission): One (1) original and (2) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

•**Planning Board**: One (1) original and (2) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

In addition to a complete application, packets shall include:

- ☑ Warranty Deed & Legal Description
- ☑ St. Lucie County Property Record Card
- ☑ Statement of why there is a need for the proposed future land use map amendment and how the amendment will result in an orderly and logical development pattern; statements how amendment(s) are consistent with Comprehensive Plan; how future land use designation is compatible with future land use designations and existing land uses surrounding the amended lands; identify future land use designations and existing land uses within a ½ mile of the subject property that have the same or greater type of proposed future land use designation; data and analysis to support conclusions.
- ☑ Current Survey
- ☑ Environmental Study
- ☑ Traffic Impact Report
- ☑ Capacity Analysis
- ☑ Drainage Analysis
- ☑ Historical Report
- ☐ 1 CD/Flash Drive of all documents submitted in PDF

1. Property Address/Location: 3720 Okeechobee Rd, FT. Pierce, FL
2. Property Tax ID(s): 26494
3. Total Acreage: 1.06 ac
4. Existing Future Land Use Designation: BC - Boundary Commercial
5. Existing Zoning Classification: C2 - Neighborhood Commercial
6. Proposed Zoning Classification: C3 - General Commercial
7. Other applications being submitted concurrent with this application, if any: Zoning Atlas Map Amendment
8. Describe the existing uses, improvements, and structures on the amendment lands: Empty building not being utilized. Had been a church previously.
9. Are there any identified or possible historical structures on the amendment lands? No.

Capacity Analysis:

Executive Summary

Ms. Janica Jules retained Solutech, Inc. (Solutech) to conduct a Phase I/II Environmental Site Assessment (ESA) of the former church property at 3720 Okeechobee Road, Fort Pierce (Saint Lucie County), Florida ("the subject property"). The primary objective of the Phase I/II ESA was to provide an independent, professional opinion regarding *recognized environmental conditions* (RECs)*, historical recognized environmental conditions* (HRECs), *controlled recognized environmental conditions* (CRECs), and *business environmental risks* (BERs) that may be associated with the subject property. The scope of work was conducted under an *Agreement for Environmental Services* between Janica and Daniel Jules and Solutech, which includes the terms and conditions under which the work was performed. The Phase I ESA site walk-through and an AHERA-certified Asbestos Demolition Survey (Appendix E) took place August 17, 2021. Phase II soil and groundwater testing took place September 20, 2021.

Solutech conducted the Phase I/II ESA according to 40 CFR Part 312 *Standards and Practices for All Appropriate Inquiries* (AAI) and the scope and limitations of American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process;* and ASTM E1903-19 *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process.* Report Sections 1.2 and 8.0 outline exceptions, additions, and deletions from the protocol.

The subject property is approximately 1.75 miles east of Interstate 95 (Figures 1 and 2, Figures Tab), and comprised of the following four (4) contiguous parcels:

- Northwestern Parcel 2417-331-0003-000-4 Wooded 1.47 +/- acre parcel, with fill placement in 1980, 1992 and 2005/2006.

- Southwestern Parcel 2417-331-0005-000-8 Wooded 0.37 +/- acre parcel, formerly improved with a house demolished in 1998.

- Central Parcel 2417-331-0004-000-1 Unimproved partially wooded 0.60 +/- acre parcel.

- Eastern Parcel 2417-331-0002-000-7 Partially wooded 1.06 +/- acre parcel, improved with a single-story CMU building containing 2,097 +/- square feet under roof, originally constructed in 1958. Past tenants include a restaurant (circa 1964), food store (circa 1969 to 1992) and a church since 2000. The building is on septic and was connected to a potable well system until recent connection to the municipal water system.

Prior to 1958, the site area was Florida flatwoods and low-density rural/residential.

Recognized Environmental Conditions (RECs)

Based on our August 17, 2021, site walk-through, historic data collection, and regulatory agency file review, the following *recognized environmental conditions* were found to be associated with the subject property:

- Fill placement occurred on the northwestern parcel during three separate events visible on the 1980, 1995 and 2005/2006 aerial photographs (Appendix B). The nature of the material appears to be mulch and vegetative debris, aggregate, concrete and construction demolition debris and drainage pipes. The fill material may affect construction of future building foundations.

- Mastec west of Totten Road had leaking petroleum underground storage tanks (UST's). Since Mastec is up gradient of the subject property, groundwater

contamination from the former leaking UST's could migrate onto the northwestern subject parcel.

- The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks, with approximately 8,000 tons of petroleum contaminated soil removed by ECT in 2008.

Historical Recognized Environmental Conditions (HRECs)

An HREC as defined by ASTM E1527-13 is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed by the regulatory agency having jurisdiction over the area, and therefore no longer represents a REC. There were no HREC's identified.

Controlled Recognized Environmental Conditions (CRECs)

A CREC as defined by ASTM E1527-13, is a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been allowed to remain in-place by the applicable regulatory agency, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Solutech did not identify any CREC's during this Phase I ESA.

Business Environmental Risks (BERs)

A BER as defined by ASTM E1527-13 is a non-scope consideration that may present a material environmental impact on the business associated with the current or planned use of the subject property. The following BER's were identified:

- Lead based paint (LBP) was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Concern for LBP is primarily associated with residential structures. The United States Department of Housing and Urban Development (HUD) defines LBP as coatings that contain 0.5% lead by weight (approximately 5,000 parts per million). The risk of lead toxicity from LBP varies based on the condition of the painted surface and the year of its application. Based on the date of construction (circa 1958) there is a potential for LBP. Since the condition of the painted surfaces was good, no paint samples were collected.

  Beginning April 22, 2010, the Renovation, Repair, and Painting Rule (40 CFR Part 745) requires that if potential LBP is disturbed during renovation, repair, or painting (>2 square feet), contractors must be certified and follow specific work practices to minimize lead contamination. These practices must include but are not limited to containing the work area, minimizing dust generation, and thoroughly cleaning-up after work is completed.

- The building remains on septic, with a disconnected potable well system. During future redevelopment of the property, the septic system should be properly abandoned according to Saint Lucie County Department of Health (DOH) guidelines, and the potable well properly grouted according to South Florida Water Management District (SFWMD) abandonment procedures.

Conclusions and Recommendations:

There were no HREC's or CREC's identified during performance of this Phase I/II ESA. Based on adjacent petroleum contaminated facilities including Mastec west of Totten Road and the Indian River Oil Company adjacent east, Phase II soil and groundwater testing was performed as part of this Phase I/II ESA.

Solutech personnel mobilized to the subject September 20, 2021, to perform three (3) *Geoprobe* borings to the ambient water table at the approximate locations shown on Figure 2 (Figures Tab). Generally, subsurface conditions consisted of grass and topsoil or limerock base from 6 to 12-inches, dark brown fine sand with silt to 3-feet, light brown fine sand to 4.5-feet; and a hardpan layer from 4.5 to 6-feet underlain by olive grey silty sand to the boring termination at 10-feet. The ambient water table was encountered at the top of the hardpan layer at 4.5-feet. Soil samples from 1 to 4-feet were field-screened with an Organic Vapor Analyzer (OVA) equipped with a flame ionization detector. No OVA readings were obtained from borings B-1 or B-3, and slight readings of 1 to 3.2 parts per million (ppm) were obtained at boring B-2 from the 2.5 to 3.5-foot sampling interval.

Soil samples were collected from the 2.5 to 3.5-foot interval at borings B-1 and B-2, placed in laboratory-supplied supplied containers, packed on ice, and shipped to SGS Labs under chain-of-custody. SGS was instructed to analyze the samples according to Environmental Protection Agency (EPA) Methods 8260 (BTEX + MTBE), 8270 (PAH) and TRPH-FLPRO. The sampling chain-of-custody and laboratory report are contained in Appendix D.

Trace concentrations of polynuclear aromatic hydrocarbons (PAH) were reported in the soil samples collected along the eastern fence line at concentrations less than their respective Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup

Target Levels (SCTL) and leachability to groundwater criteria. Soil sampling results are summarized in Table 1.0:

Table 1.0 Soil Analytical Results (in mg/kg)

Parameter	B-1	B-2	SCTL[1]	Leachability[2]
Benzo(a)anthracene	3.5 **U**	0.0038	1.3	0.8
Benzo(a)pyrene	3.5 **U**	0.0059	0.1	8
B(a)P-TEQ[4]	NA	0.0095	0.1	8
Benzo(b)fluoranthene	3.5 **U**	0.0088	1.3	2.4
Benzo(g,h,i)perylene	3.5 **U**	0.0041	2,500	32,000
Chrysene	3.5 **U**	0.0051	130	77
Indeno(1,2,3-cd)pyrene	3.5 **U**	0.0049	1.3	6.6
TRPH	10.7	11.2	2,400	880

1. Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup Target Level (SCTL)
2. FAC Chapter 62-777 Leachability to Groundwater Guidance Concentration
3. Refer to Appendix D for the B(a)P-TEQ: Benzo(a)pyrene Total Toxicity Equivalent Sheet
I – Detected above Method Detection Limit but less than Practical Quantitation Limit
NA – Not Applicable

Each boring was converted to temporary groundwater sampling points, with the collection interval placed from 3 to 8 feet below grade. Groundwater samples were collected from the temporary sample points with a low-flow peristaltic pump, placed in laboratory-supplied containers, packed on ice, and transported to SGS under chain-of-custody for analysis. SGS was instructed to analyze the groundwater samples according to EPA Methods 8260 (BETX + MTBE), 8270 (PAH), 6010 (Pb), 504 (EDB) and TRPH-FLPRO. The groundwater sampling chain-of-custody and laboratory report are attached. Method-listed parameters reported by SGS were below method detection limits (MDL), or between the MDL and Practical Quantitation Limit (PQL).

Soil and groundwater analytical results obtained during this Phase I/II ESA indicate minor soil impacts near boring B-2 by petroleum-derived organic compounds below their respective FAC Chapter 62-777 SCTL's, which require no further assessment or

remediation at this time. Groundwater analytical results show no onsite migration of volatile or semi-volatile organic compounds from Mastec west of Totten Road or Indian River Oil Company adjacent east, which indicates no existing vapor intrusion risk to the existing slab-on-grade former church structure. Based on the analytical results obtained during this Phase I/II ESA, no additional soil or groundwater sampling or vapor intrusion studies are recommended at this time.

1.0 INTRODUCTION

Ms. Janica Jules retained Solutech, Inc. (Solutech) to conduct a Phase I/II Environmental Site Assessment (ESA) of the former church property at 3720 Okeechobee Road, Fort Pierce (Saint Lucie County), Florida ("the subject property"). The scope of work was conducted under an *Agreement for Environmental Services* between Janica and Daniel Jules and Solutech, which includes the terms and conditions under which the work was performed.

1.1 PURPOSE

The primary objective of the Phase I ESA was to provide an independent, professional opinion regarding *recognized environmental conditions* (RECs)*, historical recognized environmental conditions* (HRECs), *controlled recognized environmental conditions* (CRECs), and *business environmental risks* (BERs) that may be associated with the subject property. According to ASTM Standard Practice E1527-13, Section 1.1.1, the term *recognized environmental condition* means "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to: (1) any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

An HREC as defined by ASTM E1527-13 is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed by the applicable regulatory agency having jurisdiction over the matter, and therefore no longer represents a REC. A CREC as defined by ASTM E1527-13, is a REC resulting from a past

release of *hazardous substances* or *petroleum products* that has been allowed to remain in-place by the applicable regulatory agency, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A BER as defined by ASTM E1527-13 is a non-scope consideration that may present a material environmental impact on the business associated with the current or planned use of the subject property.

1.2 METHODOLOGY USED AND EXCEPTIONS

The Phase I/II ESA was conducted in general conformance with 40 CFR Part 312 *Standards and Practices for All Appropriate Inquiries* (AAI) and the scope and limitations of American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process;* and ASTM E1903-19 *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process,* and included the following general components:

- A walk-through assessment of the subject property.
- A review of pertinent records for evidence of present and historical use of the subject and adjacent properties.
- A review of available government regulatory agency database information for sites of potential environmental concern listed within ASTM recommended search distances from the subject property.
- Interviews with site personnel and local and State government officials.
- Performance of limited Phase II soil and groundwater sampling and analysis.
- Performance of an AHERA-certified asbestos demolition survey (Appendix E); and
- An evaluation of the information gathered and development of this report.

This Phase I/II ESA does not include sampling or analysis of air, vapor intrusion, vegetation, mold and mildew, radon, and lead in paint or drinking water. Although ASTM references a 50-year chain-of-title, this service was not performed during preparation of this document at the request of the Client. We will review any title work performed by others if requested by the Cient later, at an additional cost.

Mr. Jordan Stevenson, Solutech Staff Engineer, performed the initial site walk-through August 17, 2021, accompanied by Ms. Janica Jules. Photographs documenting representative property conditions were taken during the site walk-through (Appendix A). Phase II soil and groundwater testing took place September 20, 2021.

The Phase I/II ESA report was prepared by Mr. Stevenson, and reviewed by Mr. Robert R. Maschue, P.G. (Florida License No. 1712) Solutech Principal Geologist. Mr. Stevenson and Mr. Maschue satisfy the AAI definition of Environmental Professional as provided in the Final AAI Rule (40 CFR Part 312.10) and have performed all appropriate inquiries in general conformance with the standards and practices set forth in the Final AAI Rule. Resumes of the individuals involved in the preparation of this document are contained in Appendix F.

1.3 SOURCES OF INFORMATION

Information required to complete the Phase I/II ESA was obtained from interviews with local government officials, a review of Federal and State records, and other references cited at the end of this document. This information, to the extent it was relied on to form our opinion, was assumed complete and correct. Solutech is not responsible for the quality or content of information from these sources.

1.4 USER SUPPLIED INFORMATION

Ms. Janica Jules was interviewed, and a User Questionnaire completed on her behalf (Appendix F). Ms. Jules has no specialized site knowledge (e.g., liens and restrictions, valuation reduction, environmental issues/concerns), and requested this Phase I/II ESA for real estate acquisition, and *Landowner Liability Protections* under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or "Superfund" as amended by the Superfund Amendments and Re-authorization Act of 1986 {SARA} and Small Business Liability Relief and Brownfields Revitalization Act of 2002 {"Brownfields Amendments"} 42 U.S.C §9601 *et seq.*).

2.0 PROPERTY DESCRIPTION

The subject property is approximately 1.75 miles east of Interstate 95 (Figures 1 and 2, Figures Tab), and comprised of the following four (4) contiguous parcels:

- Northwestern Parcel 2417-331-0003-000-4 Wooded 1.47 +/- acre parcel, with fill placement in 1980, 1992 and 2005/2006.
- Southwestern Parcel 2417-331-0005-000-8 Wooded 0.37 +/- acre parcel, formerly improved with a house demolished in 1998.
- Central Parcel 2417-331-0004-000-1 Unimproved partially wooded 0.60 +/- acre parcel.
- Eastern Parcel 2417-331-0002-000-7 Partially wooded 1.06 +/- acre parcel, improved with a single-story CMU building containing 2,097 +/- square feet under roof, originally constructed in 1958. Past tenants include a restaurant (circa 1964), food store (circa 1969 to 1992) and a church since 2000. The building is on septic and was connected to a potable well system until recent connection to the municipal water system.

Prior to 1958, the site area was Florida flatwoods and low-density rural/residential.

2.1 SITE AND VICINITY CHARACTERISTICS

Site ingress-egress is provided by a single driveway apron south along Okeechobee Road. The site is partially fenced. Asphalt paved areas are located around the perimeter of the former church building, with a basketball hoop north of the building. Church buses are parked in the unpaved grass-covered area along the eastern fence line. Fort Pierce Utilities provides electrical service through a pole-mounted transformer.

The church building is constructed of a concrete masonry units (CMU) supported by concrete slab-on-grade and a conventional spread footings. The asphalt shingle gable roof (not accessed) is supported by plywood sheathing and timber truss anchored to the CMU sidewalls. The exterior includes painted cement stucco and a stone façade with vinyl siding on the southern exposure along Okeechobee Road. Interiors include painted gypsum wallboard partitions, carpeting, terrazzo, wood paneling and vinyl and ceramic tile. Lighting is fluorescent.

Surrounding land use includes:

North:	Fort Pierce Utilities Construction Staging Yard
East	Construction Staging Yard and Indian River Oil Company
South:	Okeechobee Road
West:	Single Family Residential, Totten Road and Mastec

Mastec west of Totten Road had leaking petroleum underground storage tanks (UST's). Since Mastec is up gradient of the subject property, groundwater contamination from the former leaking UST's could migrate onto the northwestern subject parcel. The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks.

2.2 GEOLOGY/HYDROGEOLOGY

The subject property is in the Eastern Flatwoods Physiographic Province (Brooks 1981). According to the United States Geological Survey (USGS 1983), the site is flat at 16 feet above sea level based on the National Geodetic Vertical Datum of 1929 (Figure 3D, Figures

Tab). Surficial soils are classified as Ankona and Tantile sands. This soil designation is applied to nearly level poorly drained areas in the flatwoods, consisting of dark gray to grayish-brown fine sand (Watts, et al. 1980).

The Surficial Aquifer System is the main source of potable water in Saint Lucie County. The Surficial Aquifer System is comprised of several stratigraphic units, which include the basal Caloosahatchee Marl (Pliocene), up to Pleistocene sands of the Atlantic Coastal Ridge (a relict dune feature). Discharge from the unconfined, non-artesian Surficial Aquifer System occurs through groundwater flow to the Atlantic Ocean, public wellfield pumping, and evapotranspiration. Depth to groundwater in the site area is at or around 5-feet, with shallow flow east/southeast. The site is not located within the drawdown zone of any public water supply wellfields.

3.0 HISTORICAL RECORDS REVIEW

The land use history of the site area was reviewed for information concerning past owners or operators who may have stored, handled, generated, or discharged hazardous materials or wastes, and/or petroleum products. The information was compiled from the following sources:

1. **City Directories:** City and Cross-Reference Directories (Polk, City, and Hill-Donnelly 1940 to 2020) were obtained from the Saint Lucie County Main Library (Appendix B).
2. **Aerial Photographs:** Aerial photographs of the site and surrounding area were obtained from the University of Florida Digital Collection (UFDC 1958), Florida Department of Transportation (FDOT 1969, 1970, 1980, and 1992), and Google (1994, 1999, 2005, 2006, 2007, 2009, 2010, 2012, 2019 and 2021; Appendix B).
3. **Fire Insurance Maps:** Sanborn Fire Insurance Maps are not published for this area of Saint Lucie County.
4. **Topographic Maps:** USGS (1949, 1950, 1970, 1972, 1983, 2012 and 2021) Fort Pierce, Florida, 7.5-Minute Series Topographic Quadrangle Maps were reviewed (Figures 3A to 3G, Figures Tab).
5. **Title Search Report:** A chain-of-title summary was not prepared by Solutech, and the Client did not provide one.
6. **Environmental Lien Search:** An environmental lien search was prepared by Envirosite (2021).
7. **Prior Reports:** Prior reports were not provided.
8. **Interviews:** Interviews were conducted with Ms. Janica Jules, and local and State agencies.

City Directories (1940 to 2020), aerial photographs (1958, 1969, 1970, 1980, 1992, 1994, 1999, 2005, 2006, 2007, 2009, 2010, 2012, 2019 and 2021), topographic maps (1949, 1950, 1970, 1972, 1983, 2012 and 2021) and Saint Lucie County property records were reviewed. Prior to construction of the existing site improvements (circa 1958), the site area was low-density residential with a house on the southeastern parcel (demolished by 1998). Although available historic information does not satisfy ASTM E1527-13, Section 8.3.2 *Uses of the Property* which states "*all obvious uses of the property shall be identified from*

the present back to the property's first developed use, or back to 1940, whichever is earlier" data failure is considered insignificant since former use was low-density residential with no anticipated onsite sources of contamination.

3.1 CITY DIRECTORIES

City and Cross-Reference Directories (Polk, City, and Hill-Donnelly 1940 to 2020) were obtained from the Saint Lucie County Main Library (Appendix B). The site was listed as a restaurant (circa 1964), food store (circa 1969 to 1992) and a church since 2000. The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. Mastec has been listed west of Totten Road since 2003. Both facilities have a history of petroleum discharge from above and underground storage tanks (AST/UST).

3.2 AERIAL PHOTOGRAPHS

Aerial photographs of the site and surrounding area were obtained from UFDC (1958), FDOT (1969, 1970, 1980, and 1992), and Google (1994, 1999, 2005, 2006, 2007, 2009, 2010, 2012, 2019 and 2021). The aerial photographs are contained in Appendix B and summarized as follows:

- <u>UFDC 1958:</u>

  The site area is low-density residential with a house on the southwestern subject parcel along Totten Road. The property adjacent east had two commercial buildings.

- FDOT 1969/70:

  The former church building has been constructed on the south end of the eastern subject parcel. The property adjacent east has an above ground bulk petroleum terminal northeast of the church building. There is a construction staging yard on the Mastec property west of Totten Road.

- FDOT 1980/92:

  Commercial properties have been developed west along Okeechobee Road. A small area of fill has been placed on the northwestern subject parcel in 1980, with additional fill placement in 1992. The northern portion of the Indian River Oil Company property was cleared.

- Google 1994/99:

  An electrical substation has been constructed north of Mastec. The shed is visible north of the subject church building. The house is no longer visible on the southwestern subject parcel.

- Google 2005/06/07:

  A large area of fill has been placed on the northwestern subject parcel with a dirt road leading from the Mastec site west of Totten Road, to the newly constructed Fort Pierce Utility Authority staging yard adjacent north.

- Google 2009/10/12/19/21:
  The above ground storage tank farm adjacent east of the church building has been removed, and a new tank farm constructed north at its existing location. By 2021, the site and surrounding area are similar to current conditions.

Fill placement occurred on the northwestern parcel during three separate events visible on the 1980, 1995 and 2005/2006 aerial photographs (Appendix B). The nature of the material appears to be mulch and vegetative debris, aggregate, concrete and construction demolition debris and drainage pipes. The fill material may affect construction of future building foundations.

Mastec west of Totten Road and up gradient of the subject property had leaking petroleum underground storage tanks (UST's). The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks.

3.3 FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps are not published for this area of Saint Lucie County.

3.4 TOPOGRAPHIC MAPS

USGS (1949, 1950, 1970, 1972, 1983, 2012 and 2021) Fort Pierce, Florida, 7.5-Minute Series Topographic Quadrangle Maps were reviewed (Figures 3A to 3G, Figures Tab). The site and surrounding area is depicted as low-density residential with roadway infrastructure. The 2021 topographic map shows roadway infrastructure only with no improvements or buildings depicted. The 2012 orthophoto map shows the site and surrounding area similar to current conditions. Above ground storage tanks adjacent east of the church building in 1972 and 2012 are *recognized environmental conditions,* as defined by ASTM, with noted releases of petroleum to the soil and groundwater (Sections 4.0/4.1).

3.5 TITLE SEARCH REPORT

A chain-of-title summary was not prepared by Solutech and one was not provided by the Client. Limited deed information was obtained from the Saint Lucie County Recorder and is contained in Appendix B. The site owner is listed as Young Cheal Hu & Yong Ja Hu

(Appendix B). Available ownership records do not present an environmental concern to the subject property at this time.

3.6 ENVIRONMENTAL LIEN SEARCH

An environmental lien search was prepared by Envirosite (2021), with no environmental liens found to be filed against the subject property (Appendix C).

3.7 PRIOR REPORTS

Prior reports were not provided.

3.8 INTERVIEWS

Interviews were conducted with Ms. Janica Jules, and local and State agencies. Ms. Jules has no specialized site knowledge (e.g., liens and restrictions, valuation reduction, environmental issues/concerns), and requested this Phase I ESA for real estate acquisition, and *Landowner Liability Protections* under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or "Superfund" as amended by the Superfund Amendments and Re-authorization Act of 1986 {SARA} and Small Business Liability Relief and Brownfields Revitalization Act of 2002 {"Brownfields Amendments"} 42 U.S.C §9601 *et seq.*).

Additional interviews with local and State government agencies are provided in Section 4.1.

4.0 STANDARD ENVIRONMENTAL RECORD SOURCES, FEDERAL, STATE, AND LOCAL

Readily available government database information was reviewed to evaluate both the subject property and sites listed within ASTM recommended search distances (Appendix C). The subject property is listed in the databases searched during this assessment (Envirosite 2021). Other nearby properties listed in pertinent government regulatory agency databases are further discussed in the following sections.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)

CERCLIS contains data on potentially hazardous waste sites reported to the United States Environmental Protection Agency (USEPA) by State or local government agencies, or private individuals or companies, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains facilities or sites proposed for inclusion in the National Priorities List (NPL) or are within the screening and assessment phase for inclusion in the NPL. There are no CERCLIS sites within 0.50 miles of the subject property (Envirosite 2021).

National Priorities List (NPL)

The Federal NPL is a subset of CERCLIS and contains facilities within the United States having the highest cleanup priority ranking. The NPL database is no longer used and has been replaced by the Superfund Environmental Management System (SEMS). There are no NPL/SEMS sites listed within 1.0 mile of the subject property (Envirosite 2021).

Emergency Response Notification System (ERNS)

The subject property has not reported any release of toxic or hazardous substances to the National Response Center, Treasure Coast Regional Planning Council, or the United States Coast Guard and is not listed in the ERNS Database (Envirosite 2021).

Resource Conservation and Recovery Information System (RCRIS)

The Resource, Conservation and Recovery Act Information System includes data on sites that generate, transport, store, treat and/or dispose of hazardous substances or waste as defined by the Federal Resource, Conservation and Recovery Act (RCRA) of 1976, and the Hazardous and Solid Waste Amendments (HSWA) of 1984. Sites can be listed as treatment, storage and disposal (TSD) facilities, large quantity generators (LQG), or small quantity generators (SQG). SQG facilities produce between 100 kilograms (220 pounds) and 1,000 kilograms (2,200 pounds) of hazardous waste in a calendar month, while LQG facilities produce greater than 1,000 kilograms in a calendar month. Very small quantity generators (VSQG) formerly identified as conditionally exempt small quantity generators (CESQG), generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per calendar month.

There are no TSD facilities listed within 0.50 miles of the subject property, and no LQG or SQG facilities within 0.25-miles (Envirosite 2021). Fort Pierce Utilities Energy Services and the electrical substation north of the subject property are listed as VSQG facilities with no violations reported.

Registered and Leaking above and Underground Storage Tanks (LAST/LUST)

The Florida Department of Environmental Protection (FDEP) maintains a database of registered and leaking above and underground storage tanks (LAST/LUST) within the State of Florida. The database was reviewed for registered above and underground storage tanks (AST/UST) within 0.25 miles of the subject property, and LAST/LUST sites within 0.50 miles.

Mastec west of Totten Road had leaking petroleum underground storage tanks (UST's) west of Totten Road. They received a Site Rehabilitation Completion Order (SRCO) from FDEP April 30, 2013. The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks, with approximately 8,000 tons of petroleum contaminated soil removed by ECT in 2008. Both facilities are further discussed in Section 4.1.

Tribal Records

There are no Indian Reservations (>640 acres), Indian UST Sites, or Indian LUST Sites listed within ASTM recommended search distances from the subject property (Envirosite 2021).

Solid Waste Facilities

There are no solid or hazardous waste landfills listed within 0.50 or 1.0-mile of the subject property, respectively (Envirosite 2021).

Dry Cleaning Operations/Priority Cleaners

There are no registered or Priority Cleaners within 0.50 miles of the subject property (Envirosite 2021).

Engineering and Institutional Control (EIC) Sites

This database is a registry of all listed Federal and State Engineering and Institutional Control (EIC) sites. Engineering and institutional controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers to limit property access or exposure. There are no EIC sites listed within 0.50 miles of the subject property (Envirosite 2021).

Florida (FDEP) Sites List (CS – FL)

This summary status report is a compilation and revision of other existing lists. It was developed from several lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites list, EPA's Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the Department. There are eight (8) sites listed within 1.0 mile of the subject property (Envirosite 2021), which includes the Indian River Oil Company adjacent east of the subject property. The facility may present an environmental concern to the subject property based on petroleum remediation and ongoing releases from former and existing bulk petroleum AST's.

Florida DWM - CONTAM

The FDEP Department of Waste Management Contaminated (FL DWM CONTAM) sites are a list of active or known sites that require cleanup but are not actively being worked on because of insufficient funding. These are primarily petroleum and drycleaning sites. There are ten (10) DWM – CONTAM sites listed within 0.50 miles of the subject property (Envirosite 2021), which includes Mastec west of the subject property, and Indian River Oil adjacent east. These facilities may present an environmental concern to the subject property based on petroleum remediation and ongoing releases from former and existing petroleum UST's and AST's.

Federal and State Brownfields

Brownfield areas are sites or groups of sites where the expansion, redevelopment, or reuse of the property may be complicated by the perceived presence of environmental impairments. The Brownfield Program was developed by USEPA to encourage neighborhood revitalization. There are no Brownfield areas listed within 0.50 miles of the subject property (Envirosite 2021).

EDB – Florida Drinking Water Wells contaminated with Ethylene Dibromide (EDB)

EDB is a man-made chemical that was manufactured in the US for over 70 years. EDB was used to kill insects in fruit and grain, to kill termites, to kill small destructive microscopic worms in soil called nematodes, and for leaded gasoline. EDB in agricultural applications was discontinued in 1984 and leaded gasoline which contained EDB is no longer available. In 1984, the State of Florida adopted a Drinking Water Standard for EDB, which requires that no more than 0.02 parts per billion (ppb) be present in water. There are thirty-eight

(38) EDB-contaminated wells listed within 0.50 miles of the subject property (Envirosite 2021).

Unmapped Sites

Unmapped sites listed by Envirosite (2021) are placed in a list. Solutech performed a site reconnaissance of properties within 1.0 mile of the subject property and could not identify any of the facilities listed.

4.1 AGENCY CONTACTS

Fort Pierce Fire Department

The Stuart Fire Department was contacted regarding any release of toxic or hazardous materials on or around the subject property. There are no open files according to a representative.

Saint Lucie County Department of Health

The Saint Lucie County Department of Health (DOH) was contacted regarding any open compliance or enforcement files regarding the subject property. There are no open files according to a representative, and no violations of the Clean Drinking Water Act noted from the former onsite potable well system.

Florida Department of Environmental Protection (FDEP)

Mastec west of Totten Road had leaking petroleum underground storage tanks (UST's). Since Mastec is up gradient of the subject property, groundwater contamination from the former leaking UST's could migrate onto the northwestern subject parcel. The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks, with approximately 8,000 tons of petroleum contaminated soil removed by ECT in 2008.

4.2 PHASE II SOIL/GROUNDWATER SAMPLING

Based on adjacent petroleum contaminated facilities including Mastec west of Totten Road and the Indian River Oil Company adjacent east, soil and groundwater testing was performed as part of this Phase I/II ESA. Solutech personnel mobilized to the subject September 20, 2021, to perform three (3) *Geoprobe* borings to the ambient water table at the approximate locations shown on Figure 2 (Figures Tab). Generally, subsurface conditions consisted of grass and topsoil or limerock base from 6 to 12-inches, dark brown fine sand with silt to 3-feet, light brown fine sand to 4.5-feet; and a hardpan layer from 4.5 to 6-feet underlain by olive grey silty sand to the boring termination at 10-feet. The ambient water table was encountered at the top of the hardpan layer at 4.5-feet. Soil samples from 1 to 4-feet were field-screened with an Organic Vapor Analyzer (OVA) equipped with a flame ionization detector. No OVA readings were obtained from borings B-1 or B-3, and slight readings of 1 to 3.2 parts per million (ppm) were obtained at boring B-2 from the 2.5 to 3.5-foot sampling interval.

Soil samples were collected from the 2.5 to 3.5-foot interval at borings B-1 and B-2, placed in laboratory-supplied supplied containers, packed on ice, and shipped to SGS Labs under chain-of-custody. SGS was instructed to analyze the samples according to Environmental Protection Agency (EPA) Methods 8260 (BTEX + MTBE), 8270 (PAH) and TRPH-FLPRO. The sampling chain-of-custody and laboratory report are contained in Appendix D. Soil sampling results are summarized in Table 1.0:

Table 1.0 Soil Analytical Results (in mg/kg)

Parameter	B-1	B-2	SCTL[1]	Leachability[2]
Benzo(a)anthracene	3.5 **U**	0.0038	1.3	0.8
Benzo(a)pyrene	3.5 **U**	0.0059	0.1	8
B(a)P-TEQ[4]	NA	0.0095	0.1	8
Benzo(b)fluoranthene	3.5 **U**	0.0088	1.3	2.4
Benzo(g,h,i)perylene	3.5 **U**	0.0041	2,500	32,000
Chrysene	3.5 **U**	0.0051	130	77
Indeno(1,2,3-cd)pyrene	3.5 **U**	0.0049	1.3	6.6
TRPH	10.7	11.2	2,400	880

1. Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup Target Level (SCTL)
2. FAC Chapter 62-777 Leachability to Groundwater Guidance Concentration
3. Refer to Appendix D for the B(a)P-TEQ: Benzo(a)pyrene Total Toxicity Equivalent Sheet
I – Detected above Method Detection Limit but less than Practical Quantitation Limit
NA – Not Applicable

Trace concentrations of polynuclear aromatic hydrocarbons (PAH) were reported in the soil samples collected along the eastern fence line at concentrations less than their respective Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup Target Levels (SCTL) and leachability to groundwater criteria.

The borings were converted to temporary groundwater sampling points, with the collection interval placed from 3 to 8 feet below grade. Groundwater samples were collected from the temporary sample points with a low-flow peristaltic pump, placed in laboratory-supplied containers, packed on ice, and transported to SGS under chain-of-

custody for analysis. SGS was instructed to analyze the groundwater samples according to EPA Methods 8260 (BETX + MTBE), 8270 (PAH), 6010 (Pb), 504 (EDB) and TRPH-FLPRO. The groundwater sampling chain-of-custody and laboratory report are attached. Method-listed parameters reported by SGS were below method detection limits (MDL), or between the MDL and Practical Quantitation Limit (PQL).

Soil and groundwater analytical results obtained during this Phase I/II ESA indicate minor soil impacts near boring B-2 by petroleum-derived organic compounds below their respective FAC Chapter 62-777 SCTL's, which require no further assessment or remediation at this time. Groundwater analytical results show no onsite migration of volatile or semi-volatile organic compounds from Mastec west of Totten Road or Indian River Oil Company adjacent east, which indicates no vapor intrusion risk to the existing slab-on-grade former church structure.

5.0 SITE INSPECTION

Mr. Jordan Stevenson, Solutech Staff Engineer, performed the initial site walk-through August 17, 2021, accompanied by Ms. Janica Jules. Photographs documenting representative property conditions were taken during the site walk-through (Appendix A).

5.1 HAZARDOUS MATERIALS AND WASTES

The subject property was assessed for signs of storage, use, or disposal of hazardous materials and wastes. The assessment consisted of looking for evidence (i.e., drums, tanks, staining, and unusual vegetation patterns) indicating that hazardous materials and wastes are currently or were previously located onsite. No such evidence was observed.

5.2 STORAGE TANKS

The site was inspected for evidence of regulated storage tanks (e.g., fill ports, vent lines). No such indications were observed, and there are no records of regulated storage tanks at the subject property (Sections 4.0/4.1).

5.3 SOLID WASTE DISPOSAL

Fill placement occurred on the northern portion of the site during three events visible on the 1980, 1995 and 2005/2006 aerial photographs (Figure 2, Figures Tab). The nature of the material appears to be mulch and vegetative debris, aggregate, concrete and construction demolition debris and drainage pipes.

5.4 UTILITIES

Site infrastructure includes:

- The property was recently connected to the Fort Pierce Utility Authority (FPUA) water system, but remains on septic.
- FPUA provides electrical service.
- The City of Fort Pierce provides trash collection.
- Storm water flows from roofs to perimeter green areas. There are no provisions for onsite retention.

5.4.1 PCB-Containing Equipment

The subject property was inspected for the presence of liquid cooled electrical units (e.g., transformers, capacitors). Such equipment may be potential PCB sources, which may subject the owner/operator to various regulatory requirements under the Toxic Substances Control Act (TSCA), and State of Florida regulations. The release of PCB fluids or their combustion products (in the event of spillage or fire) are potential environmental liabilities that may require costly remediation. Pole-mounted electrical transformers owned by FPUA are in utility easements. No leakage of dielectric fluids was noted around observed transformers. Unlabeled transformers are considered by regulation to contain PCB's and are FPUA's responsibility in the event of a release.

The building contains fluorescent light fixtures and their associated ballasts. Fluorescent light ballasts often contain PCB's. Disposal of ten (10) or more light ballasts is reportable under TSCA.

5.4.2 Wastewater Treatment

The property is on septic.

5.4.3 Pits, Ponds and Lagoons

There are no onsite pits, ponds or lagoons.

5.4.4 Wells

There is an out-of-service potable well system that needs to be properly grouted and abandoned, according to South Florida Water Management District (SFWMD) guidelines.

5.5 AIR EMISSIONS

No regulated sources of air emissions were observed at the subject property during the walk-through.

5.6 DRYCLEANING OPERATIONS

Drycleaning operations were not identified at the subject or adjacent properties during the site walk-through.

5.7 VAPOR INTRUSION

Based on adjacent petroleum contaminated facilities including Mastec west of Totten Road and the Indian River Oil Company adjacent east, soil and groundwater testing was performed as part of this Phase I/II ESA (Section 4.2). Groundwater analytical results showed no onsite migration of volatile or semi-volatile organic compounds from the

adjacent facilities. Based on the analytical results obtained, there is no vapor intrusion risk to existing or proposed slab-on-grade structures.

6.0 NON-SCOPE CONSIDERATIONS

The ultimate objective of ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* is to help users qualify for one of the CERCLA Landowner Liability Protections. Other Federal, State, and local environmental laws and regulations may impose additional liabilities and obligations on owners and operators of real property that are outside the scope of ASTM E1527-13. These non-scope considerations referred to as *business environmental risks* (BERs), may present a material environmental impact on the business associated with the current or planned use of the subject property. Some examples of BER's include:

- Asbestos Containing Building Materials
- Lead-Based Paint
- Lead in Drinking Water
- Radon
- Wetlands and
- Mold.

Although the scope of this Phase I/II ESA specifically excludes sampling and analysis of some of these non-scope considerations (See Section 1.2), the following sections provide background data regarding these items, and brief explanations as to why the items may or may not present BER's to the User, based on readily available published data, date of construction, and condition of the building materials or components observed during the Phase I ESA walk-through.

6.1 ASBESTOS CONTAINING MATERIALS

An AHERA-certified Asbestos Demolition Survey was performed on the former Church Building by ARS (Appendix E). Asbestos was not reported in any of the twenty-two bulk samples analyzed using polarized light microscopy (PLM).

6.2 LEAD BASED PAINT

Lead based paint (LBP) was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Concern for LBP is primarily associated with residential structures. The United States Department of Housing and Urban Development (HUD) defines LBP as coatings that contain 0.5% lead by weight (approximately 5,000 parts per million). The risk of lead toxicity from LBP varies based on the condition of the painted surface and the year of its application. Based on the initial date of construction (circa 1958) there is a potential for LBP in prime and intermediate layers. Since the condition of the painted surfaces was good, no paint samples were collected.

Beginning April 22, 2010, the Renovation, Repair, and Painting Rule (40 CFR Part 745) requires that if potential LBP is disturbed during renovation, repair, or painting (>2 square feet), contractors must be certified and follow specific work practices to minimize lead contamination. These practices must include but are not limited to containing the work area, minimizing dust generation, and thoroughly cleaning-up after work is completed.

6.3 RADON

Radon, specifically radon isotope 222, is a naturally occurring radioactive gas formed by the decay of uranium in bedrock and soil. The adverse health effects associated with radon gas depend on various factors, such as the concentration of the gas and the duration of exposure. The concentration of radon gas in a building depends on subsurface soil conditions, the integrity of the foundation, and the ventilation system. Saint Lucie County is in Radon Zone 3, which includes areas where average predicted radon levels are less than 2.0 picoCuries per Liter (pCi/L). The USEPA recommended action level is 4 pCi/L.

6.4 WETLANDS

The subject property was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands vegetation, floodplain) located on or adjoining the subject property. No such indicators were observed and none are depicted (USFWS-NWI). According to the Federal Emergency Management Agency (FEMA 2012) Flood Insurance Rate Map (FIRM) of the site area, the subject property is in non-flood hazard Zone X.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Solutech completed a Phase I/II Environmental Site Assessment (ESA) of the former church property at 3720 Okeechobee Road, Fort Pierce (Saint Lucie County), Florida ("the subject property"). The Phase I/II ESA was conducted according to 40 CFR Part 312 *Standards and Practices for All Appropriate Inquiries* (AAI) and the scope and limitations of American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process;* and ASTM E1903-19 *Standard Practice for Environmental Site Assessments: Phase II Environmental Site Assessment Process.* Report Sections 1.2 and 8.0 outline exceptions, additions, and deletions from the protocol.

The subject property is approximately 1.75 miles east of Interstate 95 (Figures 1 and 2, Figures Tab), and comprised of the following four (4) contiguous parcels:

- Northwestern Parcel 2417-331-0003-000-4 Wooded 1.47 +/- acre parcel, with fill placement in 1980, 1992 and 2005/2006.
- Southwestern Parcel 2417-331-0005-000-8 Wooded 0.37 +/- acre parcel, formerly improved with a house demolished in 1998.
- Central Parcel 2417-331-0004-000-1 Unimproved partially wooded 0.60 +/- acre parcel.
- Eastern Parcel 2417-331-0002-000-7 Partially wooded 1.06 +/- acre parcel, improved with a single-story CMU building containing 2,097 +/- square feet under roof, originally constructed in 1958. Past tenants include a restaurant (circa 1964), food store (circa 1969 to 1992) and a church since 2000. The building is on septic and was connected to a potable well system until recent connection to the municipal water system.

Prior to 1958, the site area was Florida flatwoods and low-density rural/residential.

Recognized Environmental Conditions (RECs)

Based on our August 17, 2021, site walk-through, historic data collection, and regulatory agency file review, the following *recognized environmental conditions* were found to be associated with the subject property:

- Fill placement occurred on the northwestern parcel during three separate events visible on the 1980, 1995 and 2005/2006 aerial photographs (Appendix B). The nature of the material appears to be mulch and vegetative debris, aggregate, concrete and construction demolition debris and drainage pipes. The fill material may affect construction of future building foundations.

- Mastec west of Totten Road had leaking petroleum underground storage tanks (UST's). Since Mastec is up gradient of the subject property, groundwater contamination from the former leaking UST's could migrate onto the northwestern subject parcel.

- The Indian River Oil Company bulk petroleum distribution terminal has been adjacent east of the subject property since circa 1960. It originally operated as the Kicliter Oil Company and was the Indian River Oil Company by 1964. There has been documented petroleum contamination along the eastern fence line from existing and former bulk petroleum storage tanks, with approximately 8,000 tons of petroleum contaminated soil removed by ECT in 2008.

Historical Recognized Environmental Conditions (HRECs)

An HREC as defined by ASTM E1527-13 is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed by the regulatory agency having jurisdiction over the area, and therefore no longer represents a REC. There were no HREC's identified.

Controlled Recognized Environmental Conditions (CRECs)

A CREC as defined by ASTM E1527-13, is a REC resulting from a past *release* of *hazardous substances* or *petroleum products* that has been allowed to remain in-place by the applicable regulatory agency, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Solutech did not identify any CREC's during this Phase I ESA.

Business Environmental Risks (BERs)

A BER as defined by ASTM E1527-13 is a non-scope consideration that may present a material environmental impact on the business associated with the current or planned use of the subject property. The following BER's were identified:

- Lead based paint (LBP) was commonly used for corrosion protection in the 1960s, and in prime, intermediate, and finish coats well into the 1970s. Concern for LBP is primarily associated with residential structures. The United States Department of Housing and Urban Development (HUD) defines LBP as coatings that contain 0.5% lead by weight (approximately 5,000 parts per million). The risk of lead toxicity from LBP varies based on the condition of the painted surface and the year of its application. Based on the date of construction (circa 1958) there is a potential for

LBP. Since the condition of the painted surfaces was good, no paint samples were collected.

Beginning April 22, 2010, the Renovation, Repair, and Painting Rule (40 CFR Part 745) requires that if potential LBP is disturbed during renovation, repair, or painting (>2 square feet), contractors must be certified and follow specific work practices to minimize lead contamination. These practices must include but are not limited to containing the work area, minimizing dust generation, and thoroughly cleaning-up after work is completed.

- The building remains on septic, with a disconnected potable well system. During future redevelopment of the property, the septic system should be properly abandoned according to Saint Lucie County Department of Health (DOH) guidelines, and the potable well properly grouted according to South Florida Water Management District (SFWMD) abandonment procedures.

Conclusions and Recommendations:

There were no HREC's or CREC's identified during performance of this Phase I/II ESA. Based on adjacent petroleum contaminated facilities including Mastec west of Totten Road and the Indian River Oil Company adjacent east, soil and groundwater testing was performed as part of this Phase I/II ESA.

Solutech personnel mobilized to the subject September 20, 2021, to perform three (3) *Geoprobe* borings to the ambient water table at the approximate locations shown on Figure 2 (Figures Tab). Generally, subsurface conditions consisted of grass and topsoil or limerock base from 6 to 12-inches, dark brown fine sand with silt to 3-feet, light brown

fine sand to 4.5-feet; and a hardpan layer from 4.5 to 6-feet underlain by olive grey silty sand to the boring termination at 10-feet. The ambient water table was encountered at the top of the hardpan layer at 4.5-feet. Soil samples from 1 to 4-feet were field-screened with an Organic Vapor Analyzer (OVA) equipped with a flame ionization detector. No OVA readings were obtained from borings B-1 or B-3, and slight readings of 1 to 3.2 parts per million (ppm) were obtained at boring B-2 from the 2.5 to 3.5-foot sampling interval.

Soil samples were collected from the 2.5 to 3.5-foot interval at borings B-1 and B-2, placed in laboratory-supplied supplied containers, packed on ice, and shipped to SGS Labs under chain-of-custody. SGS was instructed to analyze the samples according to Environmental Protection Agency (EPA) Methods 8260 (BTEX + MTBE), 8270 (PAH) and TRPH-FLPRO. The sampling chain-of-custody and laboratory report are contained in Appendix D.

Trace concentrations of polynuclear aromatic hydrocarbons (PAH) were reported in the soil samples collected along the eastern fence line at concentrations less than their respective Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup Target Levels (SCTL) and leachability to groundwater criteria. Soil sampling results are summarized in Table 1.0:

Table 1.0 Soil Analytical Results (in mg/kg)

Parameter	B-1	B-2	SCTL[1]	Leachability[2]
Benzo(a)anthracene	3.5 **U**	0.0038	1.3	0.8
Benzo(a)pyrene	3.5 **U**	0.0059	0.1	8
B(a)P-TEQ[4]	NA	0.0095	0.1	8
Benzo(b)fluoranthene	3.5 **U**	0.0088	1.3	2.4
Benzo(g,h,i)perylene	3.5 **U**	0.0041	2,500	32,000
Chrysene	3.5 **U**	0.0051	130	77
Indeno(1,2,3-cd)pyrene	3.5 **U**	0.0049	1.3	6.6
TRPH	10.7	11.2	2,400	880

1. Florida Administrative Code (FAC) Chapter 62-777 Residential Soil Cleanup Target Level (SCTL)

2. FAC Chapter 62-777 Leachability to Groundwater Guidance Concentration
3. Refer to Appendix D for the B(a)P-TEQ: Benzo(a)pyrene Total Toxicity Equivalent Sheet
I – Detected above Method Detection Limit but less than Practical Quantitation Limit
NA – Not Applicable

Each boring was converted to temporary groundwater sampling points, with the collection interval placed from 3 to 8 feet below grade. Groundwater samples were collected from the temporary sample points with a low-flow peristaltic pump, placed in laboratory-supplied containers, packed on ice, and transported to SGS under chain-of-custody for analysis. SGS was instructed to analyze the groundwater samples according to EPA Methods 8260 (BETX + MTBE), 8270 (PAH), 6010 (Pb), 504 (EDB) and TRPH-FLPRO. The groundwater sampling chain-of-custody and laboratory report are attached. Method-listed parameters reported by SGS were below method detection limits (MDL), or between the MDL and Practical Quantitation Limit (PQL).

Soil and groundwater analytical results obtained during this Phase I/II ESA indicate minor soil impacts near boring B-2 by petroleum-derived organic compounds below their respective FAC Chapter 62-777 SCTL's, which require no further assessment or remediation at this time. Groundwater analytical results show no onsite migration of volatile or semi-volatile organic compounds from Mastec west of Totten Road or Indian River Oil Company adjacent east, which indicates no existing vapor intrusion risk to the existing slab-on-grade former church structure. Based on the analytical results obtained during this Phase I/II ESA, no additional soil or groundwater sampling or vapor intrusion studies are recommended at this time.

8.0 LIMITATIONS

The activities described and the results, conclusions, and recommendations included in this report are based on information gathered during a Phase I/II Environmental Site Assessment of the subject property. The information and opinions rendered in this report are exclusively for use by Janica and Daniel Jules. Solutech will not distribute or publish this report without the express written consent of the aforementioned parties, except as required by law or court order. The information and opinions expressed in this document were given in response to a limited scope of work and should be considered and implemented only in light of that particular scope of work. The conclusions and recommendations were based on the conditions encountered at the site at the time the investigation was conducted. Any subsequent Phase II subsurface explorations or contamination assessment studies on this or nearby properties, which could be performed later, may produce different or additional results.

Solutech acknowledges Janica and Daniel Jules are relying on the information contained in this report, to assess any *recognized environmental conditions* associated with the subject property, as they relate to real estate acquisition and certain *Landowner Liability Protections* under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or "Superfund" as amended by the Superfund Amendments and Re-authorization Act of 1986 {SARA} and Small Business Liability Relief and Brownfields Revitalization Act of 2002 ({"Brownfields Amendments"} 42 U.S.C §9601 *et seq.*). Solutech warrants the services, findings, and recommendations provided to Janica and Daniel Jules, their affiliates, subsidiaries, successors, and assigns have been prepared, performed, and rendered according to procedures, practices, and standards generally accepted as usual and customary for use in similar environmental consulting assignments. No other expressed or applied warranty is made.

EVELYN KLAESEN
109 S. Chestnut St., Fleetwood, Pennsylvania
hereinafter called the grantor, to

FILED AND RECORDED
DOUGLAS DIXON
ST LUCIE COUNTY

FRANKLIN LEEDY

whose postoffice address is 805 Apt. C. King Orange Dr., Ft. Pierce, FL 34950
hereinafter called the grantee:

(Wherever used herein the term "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

1082652

Witnesseth: *That the grantor, for and in consideration of the sum of* $ 10.00 *and other valuable considerations, receipt whereof is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the grantee, all that certain land situate in* ST. LUCIE *County, Florida, viz:*

From the intersection of the North side of Okeechobee Road and the East side of Totten Road run northerly along East side of Totten Road a distance of 375 feet to Point of Beginning; thence East parallel with North side of SW 1/4 of SW 1/4 of Section 17, Township 35 South, Range 40 East, St. Lucie County, Florida, a distance of 160 feet; thence northerly parallel with Totten Road 100 feet; thence Westerly 160 feet to East side of Totten Road; thence Southerly along East side of Totten Road 100 feet to Point of Beginning.

THE ABOVE DESCRIBED PROPERTY IS NOT THE HOMESTEAD OF THE GRANTOR.

Together *with all the tenements, hereditaments and appurtenances thereto belonging or in any wise appertaining.*

To Have and to Hold, *the same in fee simple forever.*

And *the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to December 31, 19* 90.

In Witness Whereof, *the said grantor has signed and sealed these presents the day and year first above written.*

Signed, sealed and delivered in our presence:

This Warranty Deed Made the 5th day of December A.D. 1997 by **ANNIE M. WIDLAN** hereinafter called the Grantor, to **T. QUACKENBOS CRUSADES, INC. a Florida Corporation** a corporation existing under the laws of the State of Florida, with its permanent post office address 2829-D Stoneway Lane, Ft Pierce FL 34982 hereinafter called the Grantee:

(Wherever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

Witnesseth: That the grantor, for and in consideration of the sum of $10.00 and other valuable considerations, receipt whereof is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys and confirms unto the grantee all that certain land situate, lying and being St. Lucie County, , viz:

From the Northeast corner of the SW 1/4 of the SW 1/4 of Section 17, Township 35 South, Range 40 East, run West on the North line of said SW 1/4 of the SW 1/4, 256.97 feet to the Point of Beginning, thence run Southerly parallel with Tottens Road 523.5 feet to the North boundary line of Okeechobee Road, thence run Southwesterly along said road 100 feet

Continued on last page.

GRANTOR hereby certifies that subject property is not her homestead and that she resides at: 243 23rd Street, Okeechobee, FL 34974

Subject To taxes accruing subsequent to December 31, 1997.

Subject To covenants, restrictions and easement of record, if any; however this reference thereto shall not operate to reimpose same.

Together, with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said Grantee that the Grantor is lawfully seized of said land in fee simple; that the Grantor has good right and lawful authority to sell and convey said land; that the Grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances.

In Witness Whereof, the said Grantor has signed and sealed these presents the day and year first above written.

That said Grantor, for and in consideration of the sum of TEN and NO/100 ($10.00) DOLLARS and other good and valuable consideration to said Grantor in hand paid, the receipt and sufficiency of which are hereby acknowledged, has granted, bargained, and sold to the said Grantee, and Grantee's heirs, successors, and assigns forever, the following described land situate, lying, and being in Martin County, Florida, to-wit:

> From the Intersection of the North side of Okeechobee Road and the East side of Totten Road run northerly along east side of Totten Road a distance of 375 feet to Point of Beginning; thence east parallel with north side of SW 1/4 of SW 1/4 of Section 17, Township 35 South, Range 40 East, St. Lucie County, Florida, a distance of 160 feet; thence northerly parallel with Totten Road 100 feet; thence westerly 160 feet to east side of Totten Road; thence southerly along east side of Totten Road; thence southerly along east side of Totten Road 100 feet to point of beginning;

and said Grantor does hereby fully warrant the title to said land and will defend the same against the lawful claims of all persons whomsoever.

This conveyance from Grantor to Grantee is an absolute conveyance of title to the above described property in consideration and extinguishment of the obligation, as evidenced by that certain promissory note dated April 5, 1996 and secured by that certain mortgage recorded in Official Records Book 1011 at Page 1455 of the Public Records of St. Lucie County, Florida and is not intended to be and shall not be construed as being additional security for said obligation.

IN WITNESS WHEREOF, Grantor has hereunto set Grantor's hand and seal on the day and year set forth below.

Signed, sealed, and delivered in the presence of:

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Piping Monitoring - Mechanical line leak detector

Piping Items :
Miscellaneous Attributes - Dispenser liners
Miscellaneous Attributes - Pressurized piping system
Primary Construction - Fiberglass
Secondary Containment - Double wall

Tank Information

Tank ID :	2
Gallons :	10000
Tank Location :	UNDERGROUND
Substance :	Vehicular Diesel
Install Date :	1992-03-01
Status :	In Service
Status Date :	N/R

Construction Items :
Overfill/Spill - Ball check valve
Overfill/Spill - Spill containment bucket
Primary Construction - Fiberglass
Secondary Containment - Double wall

Monitoring Items :
Internal Tk Monitoring - Monitor dbl wall tank space
Miscellaneous - Electronic monitor pipe sumps
Piping Monitoring - Mechanical line leak detector

Piping Items :
Miscellaneous Attributes - Pressurized piping system
Miscellaneous Attributes - Dispenser liners
Primary Construction - Fiberglass
Secondary Containment - Double wall

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Tank Information

Tank ID :	1
Gallons :	12000
Tank Location :	UNDERGROUND
Substance :	Unleaded Gas
Install Date :	1999-07-01
Status :	In Service
Status Date :	1999-07-01

Construction Items :
Overfill/Spill - Flow shut-Off
Overfill/Spill - Ball check valve
Overfill/Spill - Spill containment bucket
Overfill/Spill - Tight fill
Overfill/Spill - Level gauges/alarms
Primary Construction - Fiberglass clad steel
Secondary Containment - Double wall - tank jacket

Monitoring Items :
External Tk Monitoring - Site Suitability Plan
Internal Tk Monitoring - Monitor dbl wall tank space
Miscellaneous - Electronic monitor dispenser liners
Miscellaneous - Electronic monitor pipe sumps
Piping Monitoring - Mechanical line leak detector
Piping Monitoring - Monitor dbl wall pipe space

Piping Items :
Miscellaneous Attributes - Dispenser liners
Miscellaneous Attributes - Pressurized piping system
Primary Construction - Approved synthetic material

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 07/09/2021

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 07/09/2021

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/25/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 08/06/2021

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/29/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 08/06/2021

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 05/11/2021
Agency Update Frequency: Varies
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 08/06/2021

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 05/11/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 05/11/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 07/09/2021

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 06/08/2021

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 05/11/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 05/11/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

SEMS_DELETED NPL: All Deleted National Priority List Sties

Agency Version Date: 05/11/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 11/02/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 08/06/2021

FEDERAL LANDFILL AND/OR SOLID WASTE DISPOSAL SITE LISTS

EPA LF MOP: Sites in the EPA Landfill Methane Outreach Program

Agency Version Date: 07/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/04/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/06/2021

FEDERAL ERNS LIST

ERNS: Emergency Response Notification System records of reported spills

Agency Version Date: 05/03/2021
Agency Update Frequency: Annually
Planned Next Contact: 10/26/2021
Agency: National Response Center United States Coast Guard
Agency Contact: N/R
Most Recent Contact: 07/30/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES

FED E C: Federal listing of remediation sites with engineering controls

Agency Version Date: 06/07/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/01/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 06/07/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES (cont.)

FED I C: Federal listing of remediation sites with institutional controls

Agency Version Date: 06/07/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/01/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 06/07/2021

RCRA IC_EC: Sites with institutional or engineering controls related to Resource Conservation and Recovery Act

Agency Version Date: 05/18/2021
Agency Update Frequency: Varies
Planned Next Contact: 11/11/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 08/16/2021

FEDERAL RCRA GENERATORS LIST

HIST RCRA_CESQG: List of Resource Conservation and Recovery Act licensed conditionally exempt small quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

HIST RCRA_LQG: List of Resource Conservation and Recovery Act licensed large quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

HIST RCRA_NONGEN: List of Resource Conservation and Recovery Act licensed non-generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469

NPDES - FL: Listing of facilities with wastewater and NPDES permits

Agency Version Date: 07/01/2021
Agency Update Frequency: Monthly
Planned Next Contact: 09/28/2021

Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-8325
Most Recent Contact: 07/01/2021

PRIORITY CLEANERS - FL: Listing of sites included in the Drycleaning Solvent Cleanup Program Priority Ranking List

Agency Version Date: 08/09/2021
Agency Update Frequency: Varies
Planned Next Contact: 11/03/2021

Agency: Department of Environmental Protection
Agency Contact: 850-245-8927
Most Recent Contact: 08/09/2021

SIS - FL: Listing of site investigation section sites

Agency Version Date: 05/13/2021
Agency Update Frequency: Varies
Planned Next Contact: 11/04/2021

Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-2118
Most Recent Contact: 08/10/2021

T 2 - FL: List of facilities that must submit an Emergency and Hazardous Chemical Inventory Form

Agency Version Date: 04/02/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/24/2021

Agency: Florida Division of Emergency Management
Agency Contact: 850-413-9928
Most Recent Contact: 06/29/2021

OTHER ASCERTAINABLE RECORDS (cont.)

UIC - FL: Underground injection well permits

Agency Version Date: 06/29/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/24/2021
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-2118
Most Recent Contact: 06/29/2021

VIOLATION_BROWARD COUNTY - FL: Broward county listing of environmental notices of violation cases

Agency Version Date: 05/07/2021
Agency Update Frequency: Semi Annually
Planned Next Contact: 10/15/2021
Agency: Broward County Environmental Protection Department
Agency Contact: 954-519-0332
Most Recent Contact: 07/20/2021

WASTEWATER - FL: Listing of permitted wastewater facilities

Agency Version Date: 05/06/2021
Agency Update Frequency: Monthly
Planned Next Contact: 10/27/2021
Agency: Florida Department of Environmental Protection
Agency Contact: 850-245-8325
Most Recent Contact: 08/02/2021

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Re: Post Remediation Monitoring Quarterly Report – 1st Quarter
Indian River Oil
3700 Okeechobee Rd, Fort Pierce
St. Lucie, Florida
FDEP Facility ID# 56/8840959

Dear Mr. Scarborough:

Environmental Consulting and Technology, Inc. (ECT) is pleased to present this Post Remediation Monitoring Quarterly Report as final deliverable for the work order 2010-91-W89898 conducted at the Indian River Oil facility located at 3700 Okeechobee Rd, Fort Pierce, St. Lucie, Florida.

Prior to this report, a Post Remedial Action Report was submitted to FDEP on February 11, 2010, and approved by FDEP on February 19, 2010. A copy of the approval letter is attached as Appendix C.

If you have any questions regarding this deliverable or if you require additional information, please do not hesitate to contact either of the undersigned at (954)771-0444.

Sincerely,

ENVIRONMENTAL CONSULTING & TECHNOLOGY, INC.

Charlie Medina
Associate Engineer I

1.0 INTRODUCTION

Environmental Consulting & Technology, Inc. (ECT) is pleased to present this Post Remediation Monitoring Quarterly Report (1st quarter) for the Indian River Oil facility located at 3700 Okeechobee Road, Fort Pierce, St. Lucie County, Florida (Facility ID 56/8840959), under work order 2010-91-W89898.

The objective of the quarterly assessment was to satisfy the criteria of "No Further Action" before Site Rehabilitation Completion Order be granted by the agency. Chapter 62-770.750(5)(f), F.A.C., stipulates that "a minimum of four groundwater sampling events is required and site rehabilitation shall be considered complete when the No Further Action criteria of subsection 62-770.680(1), 62-770.680(2), or 62-770.680(3), F.A.C., have been met for at least the last two quarterly or semiannual sampling events…".

Prior to this report, a Post Remedial Action Report was submitted to FDEP on February 11, 2010, and approved by FDEP on February 19, 2010. A copy of the approval letter is attached in Appendix C.

Figure 1 is a site vicinity map.

2.0 REMEDIAL ACTION BACKGROUND

In December 2008, ECT implemented the remedial actions that were approved by FDEP in October 2008. ECT and its subcontractors excavated and removed a total of approximately 7,980 tons of soil, followed by groundwater treatment in the process of hydrocarbon oxidation by chemical application. Remedial activities were completed on January 21, 2009, by backfilling the excavated area with clean fill material. Approved remedial activities are summarized in ECT's Source Removal Report dated April 7, 2009.

On October 8 and 9, 2009, ECT provided oversight on the installation of seven (7) permanent shallow wells (PMW-1 to PMW-7) for post remedial monitoring. ECT collected groundwater samples from the aforementioned wells on October 12, 2009.

Groundwater assessment results from the October 12, 2009 sampling event are discussed in the approved Remedial Action Interim Report submitted to FDEP on November 6, 2009. Additional post remedial monitoring shallow well (PMW-8) was installed on January 14, 2010, to provide a complete contaminant delineation in the area of concern. Subsequently, groundwater samples were collected from PMW-1 to PMW-8 on January 15, 2010. Details of the January 15, 2010 groundwater assessment is discussed in the approved Post Remedial Action Monitoring Report submitted to FDEP on February 11, 2010.

3. GROUNDWATER ASSESSMENT

ECT mobilized to the subject site on April 15, 2010, and collected groundwater samples from the eight (8) approved monitoring wells (PMW-1 to PMW-8) for post remediation monitoring. The groundwater samples were submitted to Palm Beach Environmental Laboratory to be analyzed by EPA method 8021B (BTEX/MTBE), PAH, and FL-PRO. Details of the laboratory analytical results are discussed in Section 5.0.

Prior to groundwater sample collection, ECT collected a complete round of water level measurements. Groundwater purging and sampling were conducted in accordance with the FDEP Standard Operating Procedure 001/01, FS 2200 Groundwater Sampling. Purge water from the wells was discharged onto an asphalt or concrete surface and allowed to evaporate. Appendix B contains the FDEP groundwater sampling logs. Groundwater elevation contours are provided in Figure 2.

4.0 METHODOLOGIES

Groundwater sampling was conducted in accordance with the Florida Department of Environmental Protection Standard Operating Procedure (DEP SOP) 001/01, FS 2200 Groundwater Sampling. In general, prior to sample collection, ECT purged the well using a peristaltic pump until at least three (3) rounds of consecutive stabilization parameters (temperature, pH and specific conductance) were collected and dissolved oxygen was no

greater than 20% of saturation at field temperature and turbidity was no greater than 20 NTU, or five (5) well volumes were purged, whichever occurred first. At the completion of purging activities, groundwater samples were collected using a peristaltic pump. Volatile organics were sampled by collecting a sufficient amount of groundwater within the tubing from the initial foot of the water column and then the pump was turned off. Next, the tubing was removed from the well and the flow was reversed on the pump. This enabled the sample to be collected without passing through the pump head. After all samples were appropriately containerized and labeled, they were placed in a temperature controlled environment for delivery to the laboratory.

5.0 LABORATORY ANALYTICAL RESULTS

Laboratory results for groundwater samples collected from all monitoring wells (PMW-1 to PMW-8), indicated all analyzed parameters were below detection limits (BDL) or below Groundwater Clean-up Target Levels (GCTL's).

For comparison, historical and current groundwater analytical results are summarized in Table 1. Table 2 summarizes the groundwater elevation measurements. Groundwater elevation contours are provided in Figure 2. Complete laboratory analytical results are included in Appendix A. FDEP groundwater sampling logs are included in Appendix B.

6.0 CONCLUSION AND RECOMMENDATIONS

The groundwater analytical results for the 1st quarter of post remediation monitoring indicated contaminant concentrations to be below GCTL's. Based on ECT's observations, the contaminant impacts onsite appears to have been remediated.

In accordance to Chapter 62-770.680, to achieve the "No Further Action" criteria, ECT recommends a new work order to conduct the next quarter of post remediation monitoring.

1 All extraction well elev.

1 All extraction well elevations were taken at the rim of the manhole cover, as the system was operational at the time of the survey.

LOG #: 0007166

April 20, 2010

Enclosed is the laboratory report for your project. All results meet the requirements of the NELAC standards.

Please note the following:

(1) The samples were received as stated on the chain of custody, correctly labeled and at the proper temperature unless otherwise noted. The results contained in this report relate only to the items tested or to the samples as received by the laboratory.

(2) This report may not be reproduced except in full, without the written approval of the laboratory. Any anomalies are noted in the case narrative.

(3) Results for all solid matrices are reported in dry weight unless otherwise noted.

(4) Results for all liquid matrices are analyzed as received in the laboratory unless otherwise noted.

(5) Samples are disposed of within 30 days of their receipt by the laboratory.

(6) A statement of Qualifiers is available upon request.

(7) Certain analyses are subcontracted to outside NELAC certified laboratories and are designated on your report.

(8) Precision & Accuracy will be provided when clients require a measure of estimated uncertainty.

(9) The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report Preliminary Data should not be used for regular purposes. Authorized signature(s) is provided on final report only

Please contact me if you have any questions or concerns regarding this report.

Sincerely,

Pamela Shore
QA Officer

Subject: Deliverable Review and Proposal Request
Indian River Oil Company
3700 Okeechobee Road
Fort Pierce, St. Lucie County
FDEP Facility ID# 568840959

Dear Mr. Medina:

The Bureau of Petroleum Storage Systems (BPSS) has reviewed the Post Remedial Action Report dated February 11, 2010 (received February 15, 2010), submitted for this facility. The report is acceptable and demonstrates that the work outlined in Work Order # 2010-91-W88546 for this report was satisfactorily performed. For future groundwater sampling field activities, please refer to the groundwater sampling memo as per my email dated February 19, 2010.

Please remember that pursuant to Petroleum Cleanup Program Preapproval Procedures, the final invoice for this work order must be received by March 31, 2010. Please submit a proposal to continue post remediation groundwater sampling. If you should have any questions about the review or the needed proposal, please contact me at (850) 245-8873 or at the letterhead address, Mail Station 4540.

Sincerely,

Bobby Scarborough

Technical Report for

Solutech, Inc

3720 Okeechobee Rd, Ft Pierce, FL

57201.01

SGS Job Number: FA89126

Sampling Date: 09/20/21

Report to:

Solutech, Inc

pedara@solutechenv.com

ATTN: Priya Edara

Total number of pages in report: 31

Test results contained within this data package meet the requirements of the National Environmental Laboratory Accreditation Program and/or state specific certification programs as applicable.

Norm Farmer
Technical Director

Client Service contact: Dwayne Foster 407-425-6700

Certifications: FL(E83510), LA(03051), KS(E-10327), NC(573), NJ(FL002), NY(12022), SC(96038001) DoD ELAP(ANAB L2229), AZ(AZ0806), CA(2937), TX(T104704404), PA(68-03573), VA(460177), AL, AK, AR, CT, IA, KY, MA, MI. MS, ND, NH, NV, OK, OR, UT, VT, WA, WV

Benzo(a)pyrene Conversion Table

For Direct Exposure Soil Cleanup Target Levels

Facility/Site Name: Indian River Oil Company
Location: 3720 Okeechobee Road
Facility/Site ID No.:

Soil Sample No. B-2
Sample Date 9/20/2021
Location: Eastern Fence Line
Depth (ft): 2.5

INSTRUCTIONS: Calculate Total Benzo(a)pyrene Equivalents if at least one of the carcinogenic PAHs is detected in the sample at a concentration equal to or higher than the Method Detection Limit (MDL), whether quantified with certainty (the concentration reported has no qualifier) or estimated (the concentration reported has a “J”, “T” or “I” qualifier). Enter the contaminant concentrations (in mg/kg) for all seven carcinogenic PAHs in the yellow boxes using the following criteria (and see table below):

1. If quantified with certainty, or estimated and has the “J” qualifier, enter the reported value;
2. If not detected at the MDL (the concentration reported is the MDL followed by the “U” qualifier) enter 1/2 of the reported value;
3. If detected at a concentration lower than the MDL and the concentration is estimated (has the “T” qualifier) enter the estimated value;
4. If detected at a concentration equal to or higher than the MDL but lower than the Practical Quantitation Limit (PQL) and the concentration is estimated (has the “I” qualifier) enter the estimated value;
5. If detected at a concentration equal to or higher than the MDL but lower than the PQL and it is not estimated (the concentration reported is the PQL followed by the “M” qualifier) enter 1/2 of the reported value.

Contaminant	Concentration (mg/kg)	Toxic Equivalency Factor	Benzo(a)pyrene Equivalents
Benzo(a)pyrene	0.006	1.0	0.0059
Benzo(a)anthracene	0.004	0.1	0.0004
Benzo(b)fluoranthene	0.009	0.1	0.0009
Benzo(k)fluoranthene	0.000	0.01	0.0000
Chrysene	0.005	0.001	0.0000
Dibenz(a,h)anthracene	0.000	1.0	0.0000
Indeno(1,2,3-cd)pyrene	0.005	0.1	0.0005

DE Residential = 0.1 mg/kg; DE Industrial = 0.7 mg/kg

Total Benzo(a)pyrene Equivalents = 0.0

The concentration shown does not exceed the Residential Direct Exposure SCTL of 0.1 mg/kg.

The concentration shown does not exceed the Industrial Direct Exposure SCTL of 0.7 mg/kg.

Summary Criteria for Table Entries			
Detection	**Concentration Reported**	**Data Qualifier**	**Enter**
Various	Quantified with certainty	None	reported value
Various	Estimated	J	reported (estimated) value
ND at MDL	MDL	U	1/2 reported value
< MDL	Estimated	T	reported (estimated) value
≥ MDL but < PQL	Estimated	I	reported (estimated) value
≥ MDL but < PQL	PQL	M	1/2 reported value

Asbestos Survey — Project Summary

Pursuant to your request; ARS Environmental, Inc., has performed an Asbestos Building Survey on 8/17/2021 and limited to the above referenced location.

The **Interior/Exterior** of the above referenced location was visually inspected to identify building materials that may contain asbestos. Suspect materials were collected and samples sent to laboratory for analysis.

The **Roof** was not sampled. If the **Roof** system will be disturbed by renovation or demolition samples of the materials that will be affected should be obtained and analyzed to determine asbestos content prior to any disturbance.

Laboratory Results

Based on the laboratory analysis, no asbestos was detected in amounts greater than 1% in the secured bulk samples.

It has been a pleasure working with you. Please call on us again.

Regards,

Alex Front,
ARS Environmental, Inc.

Friable Asbestos Containing Material

NONE DETECTED

Recommendations

Friable: any material containing more than one percent asbestos which has been applied on ceilings, walls, structural members, piping, duct work, or any other part of a building, which when dry, may be crumbled, pulverized, or reduced to powder by hand pressure.

The following work practice should be followed whenever demolition/renovation activities involving RACM occur: Notify EPA of intention to demolish/renovate, remove all RACM from a facility being demolished or renovated before any disruptive activity begins or before access to the material is precluded, keep RACM adequately wet before, during, and after removal operations, conduct demolition/renovation activities in a manner which produces no visible emissions to the outside air, and handle and dispose of all RACM in an approved manner.

The above building material is considered friable and must be removed by a Florida Licensed Asbestos Abatement Contractor, prior to any disturbance caused by renovation or demolition.

When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect human health and the environment, but may also be the least burdensome method. Nothing in these recommendations should be construed as prohibiting or discouraging removal.

In the event that demolition or renovation is deemed necessary, parties shall comply with all applicable laws, ordinances, rules and regulations of Federal, State and Local Governmental Agencies, including any National Emissions Standard Hazardous Air Pollutants (N.E.S.H.A.P.) Notification requirements

Category I - Non-Friable Asbestos Containing Material

NONE DETECTED

Recommendations

The above referenced Asbestos Contained Building Materials may be left in place if deemed to be in good condition and no repairs or renovations are scheduled which would disturb them. Care should be taken to ensure that the materials not be disturbed during repair, renovation or remodeling activities which could possibly release fibers into the air. To reduce the intrinsic liability to the owners, the ultimate solution may be to have the material removed. However, at the minimum, a formal Operations and Maintenance (O&M) Program is recommended to minimize potential fiber releases, monitor any future deterioration, and to ensure proper record keeping.

Under the FDEP regulations, Category I non-friable asbestos-containing materials may be left in place during demolition under wet conditions. However, OSHA regulations require that disposal of asbestos-containing materials and debris is disposed of in a leak-tight and labeled container. The container may be plastic bags so long as the holding is leak-tight. All materials must be disposed of in a Class I landfill and manifest as Category I Non-Friable Asbestos containing material.

To meet the requirements of a wet demolition, it is the responsibility of the demolition contractor to control any visible emissions by adequately applying water on the structure. Furthermore, the work practices for the demolition of a building containing asbestos must be in regulatory compliance with OSHA 1926.1101. All materials must be kept thoroughly wet or saturated during the demolition to assist in preventing the release of asbestos fibers. A certified asbestos supervisor must perform or supervise the work. If during the demolition process visible emissions are observed, the asbestos-containing materials must then be abated.

The regulations of the Occupational Safety and Health Administration (OSHA) applies to any detectable amount of asbestos in building materials or on facility components. This requirement covers worker training, work practices, and disposal methods. In summary, removing asbestos in a commercial setting requires training, specific work practices, and disposal methods for the asbestos and asbestos-containing debris.

However, if Category I Materials have become friable or are in poor condition, they must be removed before demolition or renovation begins by a Florida Licensed Asbestos Abatement Contractor. When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect human health and the environment, but may also be the least burdensome method. Nothing in these recommendations should be construed as prohibiting or discouraging removal.

Category II - Non-Friable Asbestos Containing Material

NONE DETECTED

Recommendations

The above referenced Asbestos Contained Building Materials may be left in place if deemed to be in good condition & no repairs or renovations are scheduled which would disturb them. Care should be taken to ensure that the materials not be disturbed during repair, renovation or remodeling activities which could possibly release fibers into the air. To reduce the intrinsic liability to the owners, the ultimate solution may be to have the material removed.

The above building materials are considered Category II Non-Friable and are likely to become crushed, crumbled, pulverized or reduced to powder during demolition or renovation therefore must be removed before demolition or renovation begins by a Florida Licensed Asbestos Abatement Contractor.

To meet the requirements of a wet demolition, it is the responsibility of the demolition contractor to control any visible emissions by adequately applying water on the structure. Furthermore, the work practices for the demolition of a building containing asbestos must be in regulatory compliance with OSHA 1926.1101. All materials must be kept thoroughly wet or saturated during the demolition to assist in preventing the release of asbestos fibers. A certified asbestos supervisor must perform or supervise the work. If during the demolition process visible emissions are observed, the asbestos-containing materials must then be abated.

The regulations of the Occupational Safety and Health Administration (OSHA) applies to any detectable amount of asbestos in building materials or on facility components. This requirement covers worker training, work practices, and disposal methods. In summary, removing asbestos in a commercial setting requires training, specific work practices, and disposal methods for the asbestos and asbestos-containing debris.

However, if Category II Materials have become friable or are in poor condition, they must be removed before demolition or renovation begins by a Florida Licensed Asbestos Abatement Contractor. When implementing the response actions, parties responsible for final selection should remember that actions shall be sufficient to protect human health and the environment, but may also be the least burdensome method. Nothing in these recommendations should be construed as prohibiting or discouraging removal.

General Terms and Conditions

Scope of Work

ARS Environmental's inspections are limited and non-destructive in nature. Any conditions or materials which were not able to be visually observed on the surface, or in easily accessible areas, were not inspected and may differ from those observed. It was not within the scope of this investigation to remove surface materials to investigate portions of the structure or materials which lay beneath the surface. Our selection of sample locations and frequency is based upon our observations and the assumption that like materials in the same area are homogeneous. This inspection report is the result of a diligent search of the facility for Asbestos Containing Building Materials (ACBM). The purpose of this inspection was to identify those materials which may pose a health hazard to occupants of a building and impart future liability to the owners and insurers of the property. However, we do not claim to have identified all of the asbestos containing building materials present in the facility. Materials such as underground pipes, any material inside walls, ceilings, floors, or other enclosed and inaccessible areas were not sampled and are not covered in this report. This report is designed to aid the building owner, architect, construction manager, general contractor, and potential asbestos abatement contractor in locating asbestos containing building materials. Under no circumstances is this report to be utilized as a proposal or a project specification document. This report is based upon conditions and practices observed at the property and information made available to the surveyor. This report does not intend to identify all hazards or unsafe practices, nor to indicate that other hazards or unsafe practices do not exist at the premises. In the event that demolition or renovation is deemed necessary, parties shall comply with all applicable laws, ordinances, rules, and regulations of federal, state, and local governmental agencies, including any National Emissions Standard Hazardous Air Pollutants (NESHAP) notification requirements.

Right of Entry

The client will provide for right of entry to ARS Environmental's personnel in order to complete the above referenced work.

Invoices

ARS Environmental will submit invoices to client upon completion of services.

Ownership of Documents

All reports, field data, field notes, laboratory tests data, calculations, estimates, and any other documents prepared by ARS Environmental as instruments of service shall remain the property of ARS Environmental.

Assumptions and Limitations

The results, findings, conclusions, and recommendations expressed in this report are based only on conditions which were observed during inspections by this report. ARS Environmental makes no representation or assumptions as to past conditions or future occurrences.

Assigns

Neither the client nor ARS Environmental may delegate, assign, sublet or transfer his duties or interest in this agreement without the written consent of the other party.

Roof Cuts

To obtain accurate information in a roof investigation, roof cuts approximately four inch 4" squares, may be deemed necessary. It is the responsibility of our client to make appropriate repairs to these roof cuts, using materials consistent with the roofing system and in accordance with any existing material manufacturer's warranties. A roofing contractor or maintenance personnel selected by our client should be on the roof to make any necessary repairs at the time the samples are being obtained. Although, every attempt will be made to make these repaired areas water tight, ARS Environmental will in no way be responsible for any water damage to the roofing system, building, or it's contents resulting from ARS Environmental temporary repairs.

Disclaimer

If in the course of a renovation or demolition activity, suspect materials become exposed, ALL FURTHER ACTIVITY SHOULD IMMEDIATELY CEASE AND THE STATUS OF THE MATERIAL SHOULD BE DETERMINED BEFORE PROCEEDING.

APPENDIX F

Robert R. Maschue, P.G.
President
South Florida Corporate Office

Education

B.S. Geology, Kent State University, 1988
Field Camp, South Dakota School of Mines and Technology, Summer 1987

Professional Registration

Professional Geologist, State of Florida License No. 1712
Professional Geologist, State of Wisconsin PG-1323-13
Professional Geologist, State of North Carolina License No. 2488
Professional Geologist, State of Indiana License No. 2547
Radon Measurement Technician, State of Florida Certification No. R2361

Professional Certifications

- Certified OSHA, 1910.120 Hazardous Waste Operations and Emergency Response 40-Hour Course
- Certified OSHA, 1910.120 Hazardous Waste Operations and Emergency Response 8-Hour Annual Refresher
- AHERA Certified Asbestos Inspector

Experience

35 years of experience in environmental sciences; and civil, structural, and architectural engineering.

1999 to Present - President
Solutech Inc., West Palm Beach, Florida

- **Lake Park Landfill, Lake Park, FL**
  Mr. Maschue prepared Phase I/II studies of this former unlined dump site in Lake Park (Palm Beach County), Florida. Recent studies have included the preparation of a Preliminary Contamination Assessment Report (PCAR) for submittal to FDEP Southeast District. Recommendations include excavation, screening, and sorting of trash for recycling and onsite redistribution. Future plans for the property include light industrial or self-storage. A Brownfields Application is being considered for future liability protection.

- **Ferro-Sil/Cyprus Foote, Keokuk, IA**
  Mr. Maschue managed RCRA closure of this former steel foundry with USEPA Region 7. The foundry operated for 30+ years at the confluence of the De Moines and Mississippi Rivers and disposed of hazardous waste in two unlined

landfills. The final work plan consisted of stockpiling and categorization of surficial foundry waste for offsite legal disposal; and the demolition of the main foundry, steel shredder and roller bearing buildings.

- **General Electric, Stamford, CT**
  Managed Master Services Agreement with GE Capital Corporation Real Estate North American Debt. Performed Phase I/II ESAs under competitive bidding process with other GE approved vendors.

- **JPI Apartments Homes, Dallas, TX**
  Performed environmental due diligence for this multi-family residential developer, from Phase I ESAs, asbestos and mold issues, wetlands mitigation and management, and threatened and endangered species relocation. Projects included Jefferson at Flagler, West Palm Beach; Jefferson at Imperial, Bonita Springs; Jefferson at Young Circle, Hollywood; Jefferson at Pines, Pembroke Pines; Jefferson at Flagler Heights, Fort Lauderdale; and the Mancini/University Trust Dormitory, Orlando.

- **August Schmidt Company, West Allis, WI**
  Performed Phase I/II ESA for due diligence/legal proceedings. Mr. Maschue prepared a Supplemental Site Assessment and Limited Scope Remedial Action Plan under the Wisconsin Department of Commerce PECFA reimbursement program.

- **Paygro (a Division of Garick Corp.), South Charleston, OH**
  Managed land acquisition and expansion proceedings at this compost production facility.

- **Tarheel Bark Company, Charleston, NC**
  Mr. Maschue managed land acquisition and expansion proceedings at this Land Clearing and Inert Debris Landfill. Future work includes the preparation of a storm water management plan and NPDES permit application.

- **Fairbanks Morse Diesel, Beloit, WI**
  Performed Phase I/II ESA for due diligence/site redevelopment proceedings. Facility operated as windmill/generator manufacturing facility during the 1880s, a diesel locomotive factory during WWI, and currently as an onboard diesel power plant manufacturing operation for the US Navy.

- **Besly Products Corporation, South Beloit, IL**
  Performed Phase I/II ESA for due diligence/acquisition proceedings of this hardened drill/tap machining operation. Initial Remedial Actions included excavation and disposal of over 3000 cubic yards of cutting oil contaminated soils around the storm water management system, and tank closure assessments around several abandoned UST areas.

- **Hernando County Planning Department, Brooksville, FL**
  Mr. Maschue performed due diligence on various parcels around the existing Cypress Lakes Preserve, Hernando County, Florida.

- **American Builders & Contractors Supply, Beloit, WI**
  Perform all aspects of industrial property acquisition due-diligence from asbestos issues to contamination cleanup at facilities in the Continental United States, Puerto Rico and Hawaii.

- **Banyan Golf Club of Palm Beach, West Palm Beach, FL**
  Assist the Club with threatened and endangered species issues, landscape planning, wetlands mitigation, and water use issues. Prepare annual SARA Title III reports. Mr. Maschue managed petroleum cleanup proceedings around the Maintenance Department through the Florida Department of Environmental Protection Pre-Approval Program.

1997 to 1999 - Branch Manager
Clayton Group Services, Inc., Boca Raton, Florida

- **Atlas Miami River Recycling Facility**
  Mr. Maschue directed environmental explorations of this ferrous metal processing plant.

- **USEPA Drum Removal Action, Pompano Beach, Florida**
  Mr. Maschue served as project manager during this USEPA Region 5 drum removal action. The project consisted of uncovering and classifying thirty five, 55-gallon drums containing volatile organic compounds. The drums were over packed, staged, and transported to a USEPA approved TSD facility.

- **Bobcat Trails PUD, North Port, Florida**
  Mr. Maschue performed a Phase I ESA for the construction financing of this golf course development.

- **Legacy Golf Club, Sarasota, Florida**
  Mr. Maschue prepared an environmental compliance inspection of this existing golf course for refinancing purposes.

- **Oaks Square Shopping Plaza, Gainesville, Florida**
  Mr. Maschue managed asbestos abatement during the demolition of a previous hotel structure and gas station. Approximately 600 cubic yards of petroleum contaminated soils were excavated and treated at a nearby asphalt batch plant for re-use in construction materials.

1990 to 1997 – Senior Hydrogeologist/Scientist
Ardaman & Associates, Inc., West Palm Beach, Florida

- **U.S. Postal Service, Miami VMF**
  Mr. Maschue managed the removal and replacement of seven underground petroleum and chemical storage tanks (USTs) at this Vehicle Maintenance Facility (VMF). A Contamination Assessment Report (CAR) was prepared, and a recommendation for "No Further Action" accepted by MetroDade DERM.

- **U.S. Postal Service, Fort Lauderdale VMF**
  Mr. Maschue managed the removal and replacement of existing petroleum USTs at the facility. A CAR was prepared and accepted by the Broward County DNRP, and a soil vapor extraction/air-sparging system was installed to facilitate site cleanup.

- **U.S. Postal Service, West Palm Beach VMF**
  Mr. Maschue managed the retrofitting of existing petroleum USTs at the facility. Additionally, a CAR and Remedial Action Plan (RAP) were prepared and accepted by Palm Beach County DERM. The treatment system has remedied the condition and has been closed. Additional work included the preparation of an industrial waste discharge permit, for the installation of a sanitary sewer service connection from an existing equipment wash bay.

- **U.S. Postal Service, Pompano Beach Auxiliary VMF**
  Mr. Maschue supervised an investigation of the existing stormwater management system.

- **U.S. Postal Service, Hollywood Auxiliary VMF**
  Mr. Maschue designed and supervised the installation of a washwater reclaim system at the facility.

- **U.S. Postal Service, Snapper Creek Branch**
  Mr. Maschue managed the removal and replacement of existing fueling operations at the facility. A CAR was prepared and "No Future Action" accepted by MetroDade DERM.

- **U.S. Postal Service, Little River Branch**
  A CAR and RAP were prepared for petroleum contamination from a previously existing fueling operation. The documents were accepted by MetroDade DERM with a recommendation for bioremediation coupled with natural attenuation, and on-going groundwater monitoring.

- **U.S. Postal Service, Various UST Closure Projects**
    - Ludlam Branch, Coral Gables
    - Coral Gables Branch, Coral Gables
    - Quail Heights Branch, Miami
    - Olympia Heights Branch, Miami
    - Flagler Station, Miami
    - Norland Branch, Miami
    - Ocean View Branch, North Miami Beach
    - Surfside Branch, Miami Beach
    - Oakland Park Beach, Oakland park
    - Davie Branch, Davie
    - Deerfield Beach Branch, Deerfield Beach
    - Delray Beach Branch, Delray Beach
    - Lake Worth Branch, Lake Worth
    - West Palm Beach Annex, West Palm Beach
    - Palm Beach Gardens Branch, Palm Beach Gardens
    - Jupiter Branch, Jupiter
    - Stuart Associate Office, Stuart
    - Port St. Lucie Branch, Port St. Lucie
    - Fort Pierce Branch, Fort Pierce
    - Wekiva Springs Branch, Altamonte Springs

  All of the facilities have been closed with "No Further Action" necessary.

- **Berman Road Landfill, Okeechobee County**
  Mr. Maschue served as Principal Hydrogeologist for this cell expansion project. Prepared a hydrologic evaluation and testing program, supervised the field explorations and monitor well installation, and evaluated the data.

- **Okeechobee Airport Landfill, Okeechobee County**
  Mr. Maschue prepared a Site Specific Quality Assurance Plan, Contamination Assessment Plan, CAR and RAP at this unlined dump site.

- **NASA Boulevard Landfill, City of Melbourne Airport Authority**
  Mr. Maschue served as Principal Hydrogeologist during the preparation of a contamination assessment and an eventual monitoring program. Supervised the field explorations and monitor well installation, and evaluated the data.

- **Haverhill Yard Trash Site, City of West Palm Beach**
  Mr. Maschue served as Team Coordinator for the closure design of the facility. Design included the re-grading of trash filled areas to a network of drainage swales discharging to a 40-acre lake. The lake and swales contain wetland mitigation areas.

- **Judicial Center Parking Garage, City of West Palm Beach**
  Mr. Maschue prepared UST explorations at a former Standard Oil Bulk Fuel Terminal along the FEC Railroad, a Tank Closure Assessment, and a petroleum CAR prior to redevelopment as a parking garage.

- **Bear Lakes Country Club, West Palm Beach**
  Mr. Maschue designed an equipment wash pad, obtained permits, and supervised construction.

- **Riverwalk Shopping Plaza, Boynton Beach**
  Mr. Maschue completed a Drycleaning Solvent Cleanup Program Application for a former drycleaning operation and prepared a PCAR and soil IRA program. He assisted with site development concerns, as well as the preparation of a Phase II Environmental Site Assessment during the property transaction and construction funding.

1988 to 1990 - Environmental/Geotechnical Engineering
Universal Engineering Sciences, Inc., Orlando, Florida

- **AT&T Communications, Various South Florida Main Terminals and Radio Relay Stations**
  Monitored and directed backup generator UST removals and replacements at various sites throughout South Florida.

- **Southland Corporation, Various Central and South Florida Service Stations**
  Directed UST and contaminated soil removal projects at gasoline stations throughout Central and South Florida. Prepared CAR and RAP documents, and assisted with groundwater treatment system installations.

- **Dolphin and Swan Convention Hotels, Walt Disney World**
  Mr. Maschue served as consulting building inspector to Tishman Realty's Construction Division. Prepared punch-lists and assisted the Project Manager with progress reports.

- **Pleasure Island, Walt Disney World**
  Mr. Maschue served as building inspector with Walt Disney Imagineering during construction. Duties included punch-list preparation and structural steel inspection.

- **Third Runway Expansion, Orlando International Airport**
  Mr. Maschue served as a quality control inspector during the project. Supervised concrete runway and asphalt shoulder placement.

1985 to 1988 - Civil Engineering
Western Reserve Engineering and Surveying Company, Cleveland, Ohio

- Designed site plans for various industrial warehouse complexes and office buildings in the Cleveland/Akron area. Designs included site geometry, grading and drainage, and waterworks.

- Performed municipal engineering services for various communities in Cuyahoga County. Services included design of culvert erosion control, water lines, and storm and sanitary sewer systems. Assisted the City Engineer of Pepper Pike, Ohio, in developing an annual pavement maintenance program.

- Consulting inspector for the Ohio Department of Transportation. Supervised the repaving and bridge deck repair of State Routes 14 and 77, Cuyahoga County, Ohio.

ASTM E 1527-13
User Questionnaire

Introduction

In order to qualify for one of the *Landowner Protections* (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete.

Solutech Project No. : 57201.00 :

Project Name/Address: Former Church Property, 3720 Okeechobee Rd, Fort Pierce, FL:

Solutech Project Manager : _____ 10/08/2021
Signature *Date*

User Name (Owner/Operator): Janica and Daniel Jules :

User Name Telephone No: (954) 464-4258

(1.) Environmental cleanup liens are filed or recorded against this site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? NO

_____
_____
_____
_____
_____

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, state or local law? NO

_____
_____
_____
_____

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the user of this ESA do you have any specialized knowledge

or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? NO

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? NO

_____
_____
_____

(5). Commonly known or reasonably ascertainable information about the property (40CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property? NO

(b.) Do you know of specific chemicals that are present or once were present at the property? NO

_____
_____
_____

(c.) Do you know of spills or other chemical releases that have taken place at the property? NO

_____
_____
_____

(d.) Do you know of any environmental cleanups that have taken place at the property? NO

_____
_____
_____
_____
_____

(6). The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? NO

IV. Project Description

PHASING

Is this project (phase) part of a larger project? ☒ Yes ☐ No			
If yes, enumerate each phase, the number of units or square footage in each phase and beginning/completion date.			
Total Project: Residential Units:	Single Family:	Multifamily:	
Non-residential (square footage):	9,000		
Mixed-use (describe use):			
(If this is a single phase project, name it Phase I – Total)	Phase 1 - Event Center		

RESIDENTIAL DATA

Type	**Phase**	**Number of Units**	**Acres**	**Expected beginning date**	**Expected completion date**
Single-family, detached		N/A			
Single-family, attached					
Multi-family					
Other (specify)					

NON-RESIDENTIAL DATA

Type(s) specify	Phase	Square footage	Acres	Expecting beginning date	Expected completion date
Main Building	1	9,000	3.5	06/24	06/25
Outdoor Area	11	2,000	3.5	06/24	06/26

A. Indicate whether the proposed project will be eliminating any existing recreational facilities. If yes, detail the number and type being eliminated. ☐ Yes ☒ No

B. 1. Does this application involve demolition or re-use of any structure(s)? ☒ Yes ☐ No
If yes, what is the size of the structure(s) to be demolished or re-used? 2,900

2. What is the current use of the structure to be demolished or re-used? Vacant / church

3. Are you claiming trip credits for the demolition or re-use of a structure(s) at the site? ☐ Yes ☐ No
If yes, provide estimates of credits for each previous use at the site. (Attach sheet with calculations)

C. Exemptions Requested:

** Complete section if requesting a change in zoning, future land use, or expanding

We are requesting a change in zoning from C2 to C3. Also future land use change from BC to GC. All surround lots are all currently zoned C3 with FLU of GC. This would bring this property to conform to all surrounding properties. We plan to submit a full Capacity analysis and Traffic analysis with the site plan for the above mentioned project. We are currently just looking to unify the 4 parcels to create the 3.5 acres so that the proposed project can be submitted for review.

PLANNING DEPARTMENT Florida

Application for Future Land Use Map Amendment

☐ Large Scale (>50 acres) FL. Statute 163.3184 ☒ Small Scale (≤50 acres) FL. Statute 163.3187

You are encouraged to schedule a Planning Discussion meeting with the Planning staff.

Application submission shall include the following:

•**TRC** (*Initial Submission): One (1) original and (2) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

•**Planning Board**: One (1) original and (2) paper copies of the application and support documents and provide one (1) electronic copy of the application packet as described below.

In addition to a complete application, packets shall include:

- ☑ Warranty Deed & Legal Description
- ☑ St. Lucie County Property Record Card
- ☑ Statement of why there is a need for the proposed future land use map amendment and how the amendment will result in an orderly and logical development pattern; statements how amendment(s) are consistent with Comprehensive Plan; how future land use designation is compatible with future land use designations and existing land uses surrounding the amended lands; identify future land use designations and existing land uses within a ½ mile of the subject property that have the same or greater type of proposed future land use designation; data and analysis to support conclusions.
- ☑ Current Survey
- ☑ Environmental Study
- ☑ Traffic Impact Report
- ☑ Capacity Analysis
- ☑ Drainage Analysis
- ☑ Historical Report
- ☐ 1 CD/Flash Drive of all documents submitted in PDF

1. Property Address/Location: 3720 Okeechobee Rd, FT. Pierce, FL
2. Property Tax ID(s): 26494
3. Total Acreage: 1.06 ac
4. Existing Future Land Use Designation: BC - Boundary Commercial
5. Existing Zoning Classification: C2 - Neighborhood Commercial
6. Proposed Zoning Classification: C3 - General Commercial
7. Other applications being submitted concurrent with this application, if any: Zoning Atlas Map Amendment
8. Describe the existing uses, improvements, and structures on the amendment lands: Empty building not being utilized. Had been a church previously.
9. Are there any identified or possible historical structures on the amendment lands? No.

The environmental assessment report below has been compiled in accordance with the St Lucie County and City of Ft Pierce Development Review Division and previsions set forth by the state of Florida. The parcel is listed by the St Lucie County Property Appraiser as Parcel ID numbers 2417-331-0002-000-7, 2417-331-0003-000-4, 2417-331-0005-000-8, 2417-331-0004-000-1 and is a total of 3.5 acres. The property is located at 3720 Okeechobee Road, Ft Pierce, Florida. The following report describes the findings of our recent on-site review and database research as it pertains to St Lucie County, City of Ft Pierce, and the State of Florida.

LAND USE RECORDS

The St Lucie County Property Appraiser's Report lists this property as 0000 Vacant Residential, 1100 Store 1 Story, and 1000 Vacant Commercial.

SOIL COMPOSITION:

Based on a review of the United State Department of Agriculture's Web Soil Survey database the site's soils are comprised of the following:

Tantile and Pomona Sand - This soil is a nearly level, poorly drained soil in low poorly defined drainageways in the flatwoods. The water table is typically at a depth of less than 10 inches for cumulative periods of 2 to 6 months during wet seasons, and recedes to a depth of 40 inches or more during extended dry periods. The Holopaw series consists of poorly drained, moderately or rapidly permeable soils that formed in thick beds of sandy and loamy marine sediment. These soils are loamy and siliceous and are found in broad, low lying flatlands and along poorly defined drainageways. The surficial layer is very dark gray fine sand 0 to 6 inches thick. The water table is at a depth of 10 for cumulative periods of 2 to 6 months during the wet season in most years. Natural vegetation includes scattered slash pine, cabbage palm, saw palmetto, wax myrtle, saltbush, St. John's wort, blue maidencane, pineland threeawn, bluestems, panicums and other grasses. The soil is not suitable for row crops, citrus or pasture under natural conditions unless intensive management, soil improving measures and a good water control system are implemented. Improved pasture is well suited to this soil.

Ankona and Farmton sands- The Ankona and Farmton series consists of very deep, very poorly drained, slowly permeable soils. These sands formed in sandy and loamy marine sediments. A water table is within depths of 6 to 18 inches for 1 to 4 months, primarily in the winter and early spring and it is at depths of 18 to 40 inches for 6 months or more during the rest of the year in most years. Ankona and Farmton soils are found in broad flats and depressional areas. Typical vegetation consists of longleaf pine, slash pine, saw palmetto, wax myrtle, gallberry, fetterbush, creeping bluestem, chalky bluestem, lopsided Indiangrass, low panicums and pineland threeawn. Depressional areas are dominated by marsh vegetation consisting of maidencane, cutgrass, sand cordgrass, and St. John's wort

WILDLIFE EVALUATION:

On August 5th, 2021, ARE conducted pedestrian transects across 100% of property looking for local, state and federally listed or endangered species present on the site. This survey primarily focused on the presence of gopher tortoise burrows or recent activity. During the pedestrian transects of the property, gopher tortoise activity was not observed on site. No other listed plant or animal species were observed on site during the site visit.

NATIVE HABITAT

The site investigation conducted by ARE, Inc. did not find native upland habitat on the site. The site has been cleared and has dense exotic hardwoods throughout the currently vegetated areas on site. Species observed during the site reconnaissance included the following:

Brazilian Pepper (*Schinus terebinthifolia*) Laurel Oak (Quercus laurifolia)
Bahia grass (*Paspalum notatum*) Guinea Grass (*Panicum maximum*)
Air potato (Discorea bulbifera) Cabbage Palm (Sabal Palmetto)

WETLAND DELINEATION:

Based on the State definition of a wetland in 62-340 FAC, there are three components: hydric soils, wetland plants, and hydrologic indicators. These factors listed were not present during the site investigation. ARE concludes this property does not include state or federally jurisdictional wetlands on site in its current configuration. This is a lake along the eastern side of the parcel that would classify as an "other surface water".

COUNTY/ CITY REQUIREMENTS

The County/City will require proof of a completed gopher tortoise survey by a licensed agent. Please submit this document with any applications to use as the needed verification of a 100% gopher tortoise survey has been completed on the site. Per FWC regulations a gopher tortoise survey is good for 90 days, and any clearing must have a valid survey prior to commencement. The County/City will not authorize/issue any permitting without a current gopher tortoise survey. There are trees on site that meet the protection standards of both the City and the County, any removal of native trees on site will likely require both a permit and mitigation to offset the impacts to those trees.

CONCLUSION:

Based on County requirements, ARE, Inc. conducted a site investigation throughout the property to survey for the presence of any listed plant or animal species. No Gopher Tortoise activity was observed on site, and there were no other State or Federally listed species observed on the property during the site visit. A 100% gopher tortoise survey of the property was conducted and completed by an FWC licensed gopher tortoise agent during the site investigation. Native habitat was not determined to be on site due to the previous clearing and dense exotic vegetation. It is the professional opinion of ARE, Inc. that there are no State or Federally jurisdictional wetlands on the site as the site's characteristics did not meet the minimum thresholds required for wetland classification.

Proposal for Re-Zoning of 3720 Okeechobee Rd

Location and Property Identity:
The Property located at 3720 Okeechobee Rd, parcel number 2417-331-0002-000-7 sits on 1.06 acres.

History of Property:
From historical research, we have found that the property was a neighborhood store at some time in the past. In more recent years, the location was being used as a Church.

Current Land Use:
The property is currently zoned C2 - Neighborhood Commercial.

Future Land Use:
The property has a BC zoning - Boundary Commercial for the future land use of this property. However, this is the ONLY property in the entire neighborhood that has this future land use zoning of BC. All other properties have a GC - General Commercial future land use.

Request:
We are requesting that the zoning be changed from the current zoning of C2 to C3 which brings the property to conform to the surrounding properties current zoning.

We are not requesting any changes other than what the City is currently proposing for the surrounding area.

All the lots that fall within the City of Ft Pierce, in all directions, to the west, east and North of the subject property, are currently all zoned C3 with future land use of GC - General Commercial.

Changing the subject property from C2 to C3 will conform with the current zoning of the properties that surround it.

Traffic Impact Report and Capacity Analysis:
It is our understanding that the calculations between C2 zoning and C3 zoning are not significantly different, so a Traffic Impact Report and a complete Capacity Analysis has not been included with this request.

However, we understand that a Traffic Impact Report and a Capacity Analysis will be required for any and all future construction or development plans on this property.

Future Plans for the Property:

We are currently working with the Planning Department to discuss the opportunity to build a 9,000 sq ft event center on this parcel and the 3 other connecting parcels to 3720 Okeechobee Rd.. The 3 connecting parcels have just recently been annexed over to the city of Fort Pierce and zoned C-3. Once 3720 Okeechobee Rd has been re-zoned to match the surrounding parcels, all 4 parcels will be unified to create one parcel. This will create one lot at 3.5 acres.

The plan is to build a modern Industrial event space that will seat approximately 400 people. The vision is to build a beautiful location for the local and surrounding community to host their celebrations and create unforgettable memories. The location will be designed with the business world in mind as well, to bring a meeting space that appeals and meets the needs of the corporate function.

We look forward to presenting you with a site plan very shortly.

Conclusion:

We are requesting to stay within the future land use for the surrounding area and are requesting that the current zoning of C2- Neighborhood Commercial be changed to C3 - General Commercial. This will bring the subject property to the same current zoning as the surrounding properties.

We thank you for your time and consideration in this request.

WARRANTY DEED

THIS WARRANTY DEED dated January 18, 2023, by Young Cheal Hu and Tong Ja Hu, his wife, hereinafter called the grantor, to Daniel Jules and Janica Jules, a married couple, whose post office address is PO Box 31713, West Palm Beach, FL 33420, hereinafter called the grantee:

(Wherever used herein the terms "grantor" and "grantee" include all the parties to this instrument and the heirs, legal representatives and assigns of individuals, and the successors and assigns of corporations)

WITNESSETH: That the grantor, for and in consideration of the sum of Ten And No/100 Dollars ($10.00) and other valuable consideration, receipt whereof is hereby acknowledged, hereby grants, bargains, sells, aliens, remises, releases, conveys, and confirms unto the grantee, all the certain land situated in the County of Saint Lucie, State of Florida, to wit:

PARCEL 1:

FROM THE INTERSECTION OF EAST RIGHT OF WAY LINE OF TOTTEN ROAD WITH NORTH RIGHT OF WAY LINE OF OKEECHOBEE ROAD, RUN NORTHERLY ON EAST LINE OF TOTTEN ROAD, 275 FEET; THENCE EAST 160 FEET TO THE POINT OF BEGINNING; THENCE CONTINUE EAST 130 FEET; THENCE NORTHERLY 200 FEET; THENCE WEST 130 FEET; THENCE SOUTHERLY 200 FEET TO POINT OF BEGINNING. LOCATED IN SECTION 17. TOWNSHIP 35 SOUTH, RANGE 40 EAST, SAID LANDS SITUATE, LYING AND BEING IN ST. LUCIE COUNTY. FLORIDA.

PARCEL 2:

FROM THE NORTHEAST CORNER OF THE SW 1/4 OF THE SW 1/4 OF SECTION 17, TOWNSHIP 35 SOUTH, RANGE 40 EAST, RUN WEST ON THE NORTH LINE OF SAID SW 1/4 OF THE SW 1/4, 256.97 FEET TO THE POINT OF BEGINNING, THENCE RUN SOUTHERLY PARALLEL WITH TOTTENS ROAD 523.5 FEET TO THE NORTH BOUNDARY LINE OF OKEECHOBEE ROAD, THENCE RUN SOUTHWESTERLY ALONG SAID ROAD 100 FEET TO A STAKE OR PIPE, THENCE RUN NORTHERLY PARALLEL TO TOTTENS ROAD 585 FEET TO THE

WARRANTY DEED
(continued)

NORTH LINE OF SAID SW 1/4 OF SW 1/4, THENCE RUN EAST 83.8 FEET TO THE POINT OF BEGINNING; SAID LANDS SITUATE, LYING AND BEING IN ST. LUCIE COUNTY, FLORIDA AND EXCEPTING THEREFROM ALL RIGHTS OF WAY FOR PUBLIC ROADS AND DRAINAGE CANALS.

PARCEL 3:

FROM THE INTERSECTION OF THE NORTH SIDE OF OKEECHOBEE ROAD AND THE EAST SIDE OF TOTTEN ROAD, RUN NORTHERLY ALONG EAST SIDE OF TOTTEN ROAD A DISTANCE OF 375 FEET TO POINT OF BEGINNING; THENCE EAST PARALLEL WITH NORTH SIDE OF SW 1/4 OF SECTION 17, TOWNSHIP 35 SOUTH, RANGE 40 EAST, ST. LUCIE COUNTY, FLORIDA A DISTANCE OF 160 FEET THENCE NORTHERLY PARALLEL WITH TOTTEN ROAD 100 FEET, THENCE WESTERLY 160 FEET TO EAST SIDE OF TOTTEN ROAD THENCE SOUTHERLY ALONG EAST SIDE OF TOTTEN ROAD 100 FEET TO POINT OF BEGINNING, SAID LANDS SITUATE, LYING AND BEING IN ST. LUCIE COUNTY, FLORIDA.

PARCEL 4:

BEGIN ON THE EAST SIDE OF TOTTEN ROAD AT THE NORTH LINE OF THE SW 1/4 OF THE SW 1/4 OF SECTION 17, TOWNSHIP 35 SOUTH, RANGE 40 EAST AND RUN EAST 290 FEET, THENCE IN A SOUTHERLY DIRECTION 220 FEET MORE OR LESS, TO AN ESTABLISHED CORNER, THENCE WEST 290 FEET, MORE OR LESS, TO THE EAST SIDE OF TOTTEN ROAD, THENCE NORTH TO THE POINT OF BEGINNING, SAID LAND LYING AND BEING IN ST. LUCIE COUNTY, FLORIDA.

Subject to easements, restrictions, reservations and limitations of record, if any.

The property being hereby conveyed, is not now, nor has it ever been, nor was it ever intended to be the homestead of the grantor, the grantor's spouse, and/or minor children, if any. Nor is it contiguous with or adjacent to such homestead. The grantor's residence is at the street or post office address designated below.

TOGETHER with all the tenements, hereditaments and appurtenances thereto belonging or in any wise appertaining.

TO HAVE AND TO HOLD the same in Fee Simple forever.

AND the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons whomsoever; and that said land is free of all encumbrances, except taxes accruing subsequent to December 31, 2022.
