Good morning, thank you very much. I took a look at the criterias needed, the only one he doesn't meet is being in middle school. He is in his last year of elementary school (5th grade), he is actually 2 years ahead of where he should be. Technically he should be in the 3rd grade. I will still go ahead and enter him to be nominated. Thank you again.

Dear Mayor Linda Hudson,

I hope this email finds you well. I wanted to take a moment to share some exciting news about my son, Denzil Irving III, who has been making remarkable strides in his passion for science.

In February, he had the incredible opportunity to be featured on The Jennifer Hudson Show for his love of chemistry and science. It was a proud moment for our family and a testament to his dedication and enthusiasm for learning.

As a young scholar from Fort Pierce, his journey serves as an inspiration to other children in our community who dream big and pursue their passions. I wanted to share this achievement with you in the hopes that it can help highlight the importance of STEM education and inspire future young scientists in our city.

Thank you for your time, and I appreciate all that you do for our community. If there's an opportunity to recognize young achievers like [Son's Name], I would love to discuss how we can encourage more students to explore their interests in science.

Attached is a link to his segment on the show. His segment starts at 23 minutes 55 seconds. Enjoy
