# CITY CODE: DIVISION 3 - VARIANCES

## Sec. 125-98

The purpose of a variance is to allow a modification of certain zoning ordinance regulations when such modification will not be contrary to the public interest and when, owing to conditions peculiar to the property and not the result of the actions of the applicant, a literal enforcement of the ordinance provisions would result in unnecessary and undue hardship. Unnecessary and undue hardships may result from the size, shape or dimensions of a site; the location of existing structures on the site; geographic, topographic or physiographic features or other conditions on the site or in the immediate vicinity; or street locations or traffic conditions in the immediate vicinity.

**A variance may be granted only in the event that all of the following criteria are satisfied:**

- (1)  
Special conditions and circumstances exist which are peculiar to the land, structure or building involved and which are not applicable to other lands, structures or buildings in the same zoning district;
- (2)  
The special conditions and circumstances do not result from the actions of the applicant;
- (3)  
The literal interpretation of the provisions of the zoning ordinance would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the ordinance and would result in unnecessary and undue hardship on the applicant;
- (4)  
The variance granted is the minimum variance that will make possible the reasonable use of the land, building or structure; and
- (5)  
The granting of the variance will be in harmony with the general intent and purpose of the ordinance codified in this section and such variance will not be injurious to the area involved or otherwise detrimental to the public welfare.
