
RECREATION & OPEN SPACE ELEMENT

The purpose of the Recreation and Open Space Element is to plan for the comprehensive provision of recreational and open space opportunities for City residents in accordance with their needs. In addition, the location of Fort Pierce along the Indian River Lagoon and the Atlantic Ocean creates an opportunity for the City to increase its economic base through the provision of regional recreational facilities. The attraction of a regional population benefits the economy and the residents of the City directly as the recreational amenities provided will exceed those that are normally available in a community of this size. Thus, while servicing the needs of residents of Fort Pierce is important, the City also has a goal to serve a portion of the desires of a much larger population.

This element provides for an inventory of existing park and open space facilities and establishes a level of service of the future demand for such facilities from within and outside of the City. The future demand and needs are assessed, as well as plans devised for the programs and facilities necessary for their accommodation. The goals, objectives, and policies section of this element lists the ultimate desires of the community in the areas of recreation and open space and lists the specific measures to be taken by the community to meet those desires.

The inclusion of this element in the Comprehensive Plan reflects the City's interest, acknowledgement, and dedication to recreation lands and open spaces as a fundamental component of the community fabric and essential to quality of life.

Policy 7.1.4 requires the creation and maintenance of a complete inventory of public and private recreation lands and amenities. In addition to these public and private assets, the public schools within Fort Pierce can also be a source of recreation space but interlocal agreements with the school board are typically necessary. The projected park needs for the City are based on the estimated population over the 10-year (2035) and 20-year (2045) planning periods, and the level of service (LOS) for neighborhood and community parks separately. The results are shown in Tables 7-1 and 7-2. As part of the new inventory required in Policy 7.1.4, any potential deficit should be evaluated for how best to address it.
