November 20, 2026

Good Morning,

I would like to provide an update on the funding for Station 53 on Colcord Road for the septic project. Woody was very gracious to give us $10k a year ago for this project. So far we have spent approximately $1,000 on test holes, soil samples etc, and we have discovered that a traditional septic system cannot be installed at our location for multiple reasons.

Due to property lines, the location of the well, the shape of the property, and not being able to get the proper depth, we are unable to install a "standard" septic system. After having an engineer look at our situation, he has advised us we need to have a n alternative system installed. The estimate given by him is $16,100. That includes the engineering fee, County permit fee's and related materials. We still have $9,000 remaining from the initial money granted us by Woody, and are in need of an additional $7,000 to see the project through. Would the County be willing to grant us an additional $7,000 to help us get this project completed? Please let me know, and thank you so much for hearing me out. I look forward to your response.

Reegards,

Rhett Connolly
Fire Chief
